Total Credits: 120-123

US Diversity and International Perspectives Requirement: Students in HSP M fulfill the US Diversity and International Perspectives Requirements by choosing 3 credits of coursework from each of the University-approved lists.

Note: This sequence is only an example. The number of credits taken each semester should be based on the individual student’s situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

1 BIOL 101 required if student has not completed high school biology

2 When the 4-year plan indicates HSP M Group or General Electives, choice depends on courses available. However, you must have a total of 13-15 credits of HSP M electives and 11-17 credits of General Electives (HSP M courses may be taken to meet General Electives requirements).

3 CHEM 160 required if student has not completed high school chemistry
### Beverage Management Minor

The AESHM Department offers a minor in Beverages through the Hospitality Management program. The minor can be earned by successfully completing the following for a total of 15 credits. The minor must include at least six (6) credits in HSP M courses, six (6) credits in courses numbered 300 or above taken at ISU. All course prerequisites must be completed prior to taking the course. All minor courses must be taken for a grade. The Beverages Minor requires students to complete HSP M 101 and HSP M 133. The remaining 11 credits may be selected from any of the courses below.

The Beverage Management Minor requires students to complete the following courses:

### Human Development and Family Studies Department

The Department of Human Development and Family Studies offers courses that focus on the interactions among individuals, families, their resources, and their environments throughout the life span. The department offers work for the Bachelor of Science degree in five curricula: Early Childhood Education, Family and Consumer Sciences Education and Studies, Financial Counseling and Planning, Human Development and Family Studies, and an affiliated program: Early Childcare Education and Programming (a distance education program offered in collaboration with six other universities).

Students graduating in Human Development and Family Studies will

1. Communicate with clear purpose, workable organization and effective style in written, oral, visual and electronic (WOVE) formats to foster collaboration, provide information and advance knowledge related to child, adult, family, and community services.

2. Consistently and realistically analyze and evaluate one’s own knowledge, abilities and actions in comparison to professional standards and create action plans to enhance personal and professional efficacy related to working with children, adults, families and communities.

3. Understand content related to working with children, adults, families, and communities within a chosen program. Use critical thinking skills
to evaluate and utilize evidence-based practices. Use logical and ethical reasoning to make decisions and solve problems.

4. Understand the diverse needs of children, adults, and families. Ensure equitable access of children, adults, and families to appropriate environments that support healthy living. Engage children, adults, and families with socially responsible and respectful behavior.

**Communication Proficiency requirement:** A student must achieve a grade of C or higher in ENGL 150, Critical Thinking and Communication, and ENGL 250, Written, Oral, Visual, and Electronic Composition. A student achieving a grade of C– or lower in 150 and/or 250 must either repeat the course(s), earning a minimum grade of C, or, in consultation with the advisor and the coordinator of freshman English, complete another appropriate English writing course with a minimum grade of C.

The **Human Development and Family Studies** curriculum leads to work in helping professions with employment opportunities in public and private agencies. Graduates of the program are prepared for employment in agencies and organizations serving children, youth, families, and adults in the areas of education/prevention, treatment, and administration. This flexible program provides a broad emphasis in theory, research, and application in child, adult and family services including attention to community issues and public policy.

Students in Human Development and Family Studies may choose coursework that leads to becoming a Certified Family Life Educator (CFLE), a program that has been approved by the National Council on Family Relations. These courses provide the basic education for students interested in working with families, including adolescents, parents, or adults working to strengthen relationships. The student takes courses that support the development of knowledge and skills in family life content areas selected by the National Council on Family Relations. The certification is a voluntary credential that requires the individual to complete a degree in an approved program and to have at least two years of work experience in family life education settings. Iowa State University does not grant the Certified Family Life Educator credential. The certification is granted only by the National Council on Family Relations. See https://hdfs.hs.iastate.edu/future-students/find-your-major/certified-family-life-educator/ and/or http://www.ncfr.org/cfle-certification (http://www.ncfr.org/cfle-certification/).

The curriculum in **Early Childhood Education – Unified** prepares graduates to teach young children and work with their families. This curriculum has been approved by the Iowa Department of Education and meets requirements for candidates to seek teacher licensure in early childhood education – unified, which permits individuals to teach general and special education for children from birth through third grade. Graduates may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through third grade) or in home-based programs. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and the School of Education. For more information about the program, see https://hdfs.hs.iastate.edu/find-your-major/early-childhood-education/.

Students who enroll in the early childhood education – unified program must apply to and be accepted into the teacher education program prior to enrolling in advanced courses.

**Family and Consumer Sciences Education and Studies** offers a curriculum for the Bachelor of Science degree. (http://catalog.iastate.edu/collegeofhumansciences/familyandconsumerscienceseducationandstudies)

The curriculum in Family and Consumer Sciences Education and Studies (FCEDS) prepares graduates with a broad understanding of individual and family well-being. Graduates apply knowledge and research in family and consumer sciences content in global professional settings. They work in an integrative fashion to improve well-being by addressing and acting on complex problems confronting individuals, families, and communities. The study of Family and Consumer Sciences Education incorporates the following 16 content areas (https://opi.mt.gov/Portals/182/Page%20Files/Career%20%26%20Technical%20Education/Docs/FCS/NationalStandards.pdf): Career, Community and Family Connections; Consumer and Family Resources; Consumer Services; Education and Early Childhood; Facilities Management and Maintenance; Family; Family and Community Services; Food Production and Services; Food Science, Dietetics, and Nutrition; Hospitality, Tourism and Recreation; Housing and Interior Design; Human Development; Interpersonal Relationship; Nutrition and Wellness; Parenting; and Textiles, Fashion and Apparel.

Students in the program choose one of three options, Teacher Licensure, Communications, or Professional Studies.

Students in Family and Consumer Sciences Education and Studies may choose coursework that leads to becoming a Certified Family Life Educator (CFLE), a program that has been approved by the National Council on Family Relations. These courses provide the basic education for students interested in working with families, including adolescents, parents, or adults working to strengthen relationships. The student takes courses that support the development of knowledge and skills in family life content areas selected by the National Council on Family Relations. The certification is a voluntary credential that requires the individual to complete a degree in an approved program and to have at least two years of work experience in family life education settings. Iowa State University does not grant the Certified Family Life Educator credential. The certification is granted only by the National Council on Family Relations. See https://hdfs.hs.iastate.edu/future-students/find-
programs/information (and may be eligible for assistantships. See Graduate Study for more
Certificate in Family Financial Planning. Under concurrent enrollment, Studies or a B.S. in Financial Counseling and Planning 
and a Graduate Counseling and Planning and a M.S. in Human Development and Family

financial counseling and planning, and human service organizations. 
Financial Counseling and Planning majors are also prepared to enter 
Financial Counseling Clinic and with program partners in the financial 
services industry. A field work experience helps students apply their 
professions in real-world settings.
The Financial Counseling and Planning (FCP) curriculum prepares 
students for careers in family financial services. Financial Counseling and Planning is a growing career field and appeals to students who want to 
work with individuals and families to help them meet their financial goals and improve their financial capability to better meet financial challenges. Coursework provides students with the family resource management 
and interpersonal skills needed to help families remain financially secure. 
Based on career goals, students select a path that leads to fulfilling the education requirements for the leading designations and certifications in 
financial counseling and planning. Graduates of the program are prepared for employment in personal banking, financial services, insurance, 
financial counseling and planning, and human service organizations. Laboratory and practicum opportunities exist in the Iowa State University 
Financial Counseling Clinic and with program partners in the financial 
services industry. A field work experience helps students apply their 
studies and experience the profession in real-world settings.
Financial Counseling and Planning majors are also prepared to enter 
graduate programs in family financial planning, financial education, 
economics, finance, and law.
Juniors and seniors in Financial Counseling and Planning who are 
interested in graduate study may apply for concurrent enrollment in 
the Graduate College to simultaneously pursue both a B.S. in Financial Counseling and Planning and a M.S. in Human Development and Family 
Studies or a B.S. in Financial Counseling and Planning and a Graduate Certificate in Family Financial Planning. Under concurrent enrollment, 
students simultaneously take undergraduate and graduate courses and may be eligible for assistantships. See Graduate Study for more 
information (https://hdfs.hs.iastate.edu/graduate-students/graduate-programs/).
The Financial Counseling and Planning major is registered with Certified Financial Planner Board of Standards Inc. as a CFP Board-registered 
Program. ISU courses satisfy CFP Board’s education requirement, 
allowing an individual to sit for the CFP® Certification Examination.
Iowa State University does not certify individuals to use the CFP® CERTIFIED FINANCIAL PLANNER™ title. CFP certification is granted only 
by Certified Financial Planner Board of Standards Inc. to those persons 
who, in addition to completing an educational requirement such as this 
CFP Board-Registered Program, have met its ethics, experience and 
and Family Finance Educator.
There is also an opportunity to take courses that will allow you to be recommended for a family and consumer sciences endorsement or 
teacher licensure as a post baccalaureate student.

The Financial Counseling and Planning (FCP) curriculum prepares students for careers in family financial services. Financial Counseling and Planning is a growing career field and appeals to students who want to work with individuals and families to help them meet their financial goals and improve their financial capability to better meet financial challenges. Coursework provides students with the family resource management and interpersonal skills needed to help families remain financially secure. Based on career goals, students select a path that leads to fulfilling the education requirements for the leading designations and certifications in financial counseling and planning. Graduates of the program are prepared for employment in personal banking, financial services, insurance, financial counseling and planning, and human service organizations. Laboratory and practicum opportunities exist in the Iowa State University Financial Counseling Clinic and with program partners in the financial services industry. A field work experience helps students apply their studies and experience the profession in real-world settings.

Financial Counseling and Planning majors are also prepared to enter graduate programs in family financial planning, financial education, economics, finance, and law.

Juniors and seniors in Financial Counseling and Planning who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a B.S. in Financial Counseling and Planning and a M.S. in Human Development and Family Studies or a B.S. in Financial Counseling and Planning and a Graduate Certificate in Family Financial Planning. Under concurrent enrollment, students simultaneously take undergraduate and graduate courses and may be eligible for assistantships. See Graduate Study for more information (https://hdfs.hs.iastate.edu/graduate-students/graduate-programs/).

The Financial Counseling and Planning major is registered with Certified Financial Planner Board of Standards Inc. as a CFP Board-registered Program. ISU courses satisfy CFP Board’s education requirement, allowing an individual to sit for the CFP® Certification Examination.

Iowa State University does not certify individuals to use the CFP® CERTIFIED FINANCIAL PLANNER™ title. CFP certification is granted only by Certified Financial Planner Board of Standards Inc. to those persons who, in addition to completing an educational requirement such as this CFP Board-Registered Program, have met its ethics, experience and examination requirements (CFP Board of Standards website https://www.cfp.net/).

Certified Financial Planner Board of Standards Inc. owns the certification marks CFP®, CERTIFIED FINANCIAL PLANNER™ and the federally registered CFP (with flame logo), which it awards to individuals who successfully complete initial and ongoing certification requirements.

FCP majors also satisfy the education requirements for the Accredited Financial Counselor (AFC®) designation offered through the Association for Financial Counseling and Planning Education (AFCPE).

Affiliated Programs

The Early Childcare Education and Programming (E C P) curriculum, offered by the Great Plains Interactive Distance Education Alliance (GPIDEA), is designed to prepare graduates to work in a variety of early care and education programs in local communities and on military installations. Some of these programs are childcare centers and homes, infant/toddler and preschool programs, Head Start programs, and before and after-school programs for children ages birth to eight. This is an online program offered through a collaboration of seven universities as part of GPIDEA where the program is referred to as Early Care and Education for a Mobile Society. For more information see https://www.gpidea.org/program/early-care-and-education-in-a-mobile-society (https://www.gpidea.org/program/early-care-and-education-in-a-mobile-society/).

The E C P curriculum is designed to provide content for the final two years of a student’s program; the content is focused specifically on topics directly relevant to the major. Students will complete a total of 120 credits for the major, 51 of which are specific to the E C P curriculum.

These 51 credit hours are comprised of 12 core courses and 3 practica; the final practicum will be a 6-credit capstone experience. Students must complete 30 credits of college work, a lifespan development course, and have a 2.5 GPA to be admitted to E C P. If students prefer to be admitted to ISU before being admitted to the E C P major, they can enroll as Pre ECP (P ECP) students until they are eligible for the E C P major. For more information about the program at Iowa State,
Curricula:

- Early Childhood Education — Unified
- Family and Consumer Sciences Education and Studies
- Financial Counseling and Planning
- Human Development and Family Studies
- Affiliated Program: Early Childcare Education and Programming (GPIDEA program)

Minors

The department offers minors in Human Development and Family Studies and Financial Counseling and Planning. Minors consist of at least 15 credits including 6 credits taken at Iowa State University in courses numbered 300 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

The Human Development and Family Studies minor may be earned by completing 15 credits

Graduate Study

The department offers work for the Master of Science (thesis or non-thesis options) and Doctor of Philosophy degrees with the major in Human Development and Family Studies. Minors are also available for students taking major work in other departments. Graduates of M.S. and Ph.D. programs in the department will understand and apply relevant theories to educational, research, and/or intervention or prevention programs. It is intended that they will produce and disseminate research results and provide leadership in human development and family studies professions.
Graduate study in Human Development and Family Studies at Iowa State University is multidisciplinary and focuses on research and practice in several content areas such as adolescent/youth development, adult development and aging, family studies and policy, family economic well-being and financial planning, infant and child development, health and well-being; and lifespan development.

Prerequisite to work in the major is the completion of a related undergraduate program with basic courses and/or experiences in areas such as child/human development, community and regional planning, economics, education, family studies, psychology, or sociology. Additional coursework or prerequisites (e.g., basic statistics) may be required depending on the undergraduate program and program of study. Students may be admitted to our doctoral program with either a bachelor's (M.S./Ph.D. Track, 5 years) or a master's degree (Ph.D. Track only, 3 years). Students admitted to the Ph.D. Track without a prior master's degree complete requirements for a thesis-based master's degree as part of their doctoral program of study.

All students take a core set of courses; the program of study is then completed with a selection of courses that meet the individual needs of the student. The variety of and flexibility in the coursework allows a student to tailor a program to specific academic interests. The graduate programs are based on a theory, research, and application interactive paradigm with all three areas integrated into content and method courses.

The department offers a graduate minor in Human Development and Family Studies. For more detailed information about the minor, see the Graduate Minors tab.

The department also offers four Graduate Certificates available to HD FS majors as well as students in other departments and professionals in the field.

The department also participates in several Master of Family and Consumer Sciences (MFCS) degree programs (http://catalog.iastate.edu/collegeofhumansciences/familyandconsumersciences/). Admission to the youth (YTH), family financial planning (FFP) and gerontology (GERON) specialization programs require submission of the Graduate College application form, transcripts, 2 letters of recommendation, resume and a goal statement. Students in a MFCS program select one of the options listed below.

1. Master of Family and Consumer Sciences - Human Development and Family Studies (MFCS-HDFS). The Master of Family and Consumer Sciences degree specialization track in Human Development and Family Studies (HDFS) provides students with the opportunity to enhance their background knowledge and skills for working with children and families (37 credits).

2. Master of Family and Consumer Sciences - Youth Development (MFCS-YD). This is an entirely online degree focusing on the skills to serve today's young people. The degree uses a strengths-based curriculum that supports you to grow socially, emotionally, and cognitively. There are also two youth development related certificates available for students (see Graduate Certificates tab for details) (36 credits).

3. Master of Family and Consumer Sciences - Family Financial Planning Program (MFCS-FFP). This is a master’s degree program offered entirely online, designed to prepare individuals to work in the financial planning field (36 credits). Completion of course work in the master's degree or a graduate certificate meets the educational requirements to sit for the Certified Financial Planner (CFP) Board of Standards Certification Examination.

The department offers a Financial Counseling and Planning (FCP) concurrent degree program that allows students to obtain a B.S. in FCP and an M.S. in HD FS or a B.S. in FCP and a Graduate Certificate in Family Financial Planning in 5 years. Application for admission to the Graduate College should be made near the end of the junior year. Under concurrent enrollment, students simultaneously take undergraduate and graduate courses and may be eligible for assistantships. Students interested in these programs should contact the department for details.

Finally, the department collaborates with the interdepartmental Gerontology program; students may declare a minor in Gerontology. The Master of Family and Consumer Sciences - Gerontology program (MFCS-GERON) and the Graduate Gerontology Certificate program are designed to prepare professionals who work directly with older people or are involved in education and research related to older adults. Professionals offering direct services often are involved in health promotion programs, directing inter-generational activities, managing senior centers or retirement communities, counseling older people and their families, and helping people plan for retirement. Professionals involved in education and research may evaluate community-based services, teach others about the aging process, develop policies and programs to serve the needs of older adults, and work with business and industry on issues related to an aging work force.

Graduate Minors

The department offers a graduate minor in Human Development and Family Studies. To earn this minor, students in a Master's program must take 9 credits in HD FS graduate courses (500, 600 level) with a limit of 3 credits in seminar or workshop credit (credits in 591 or 691 not allowed). To earn a minor in HD FS students in a Doctoral program must take 12 credits in HD FS graduate courses (500, 600 level) with a limit of 3 credits in seminar or workshop credit (credits in 591 or 691 not allowed). A graduate faculty member from the minor program must serve on the student’s POS Committee.
HD FS Certificates

The department offers four Graduate Certificates available to HD FS majors as well as students in other departments and professionals in the field. The certificates emphasize application and relevance to growing diversity and demands on the work force. The four certificate areas are:

1. Developmental and Family Sciences Advanced Research Design and Methods (15 credits)
2. Family Well-Being in Diverse Society (12 credits)
3. Infant and Early Childhood Mental Health (12 credits, online)
4. Life-Span Development (12 credits, online)

For more information about courses for the certificates, go to https://hdfs.hs.iastate.edu/graduate-students/graduate-programs/graduate-certificates/

Youth Development Certificates

The department also collaborates to offer two certificates related to youth development through the MFCS program. Both certificates are designed to prepare individuals who work directly with youth or are involved in education and research related to youth. For more information, go to http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/.

1. Youth Development Specialist Certificate (13 credits)
2. Youth Program Management and Evaluation Certificate (13 credits)

Family Financial Planning Certificates

The MFCS – Family Financial Planning (FFP) program also offers two certificates listed below. More information can be found at http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-ffp/.

1. FFP certificate. Master of Family and Consumer Sciences with Family Financial Planning (FFP) specialization graduate certificate program (18 credits)
2. FHC certificate. Master of Family and Consumer Sciences Financial and Housing Counseling (FHC) specialization graduate certificate program (18 credits)

Kinesiology

Mission

We promote health and well-being by creating and disseminating knowledge about physical activity and active living. Through discovery, learning and engagement we improve the lives of citizens of Iowa, the United States and the world.

Goals

The department has identified the following goals to support this mission:

1. We seek to improve the lives of citizens of Iowa, the United States, and the world by the creation and dissemination of knowledge about physical activity and its relationship to health and well-being.
2. We prepare scholars and professionals in the study of physical activity at the undergraduate and graduate levels.
3. We educate the public and the University community in the scientific aspects of physical activity especially exercise, sport, and the role of movement throughout the lifespan.

UNDERGRADUATE STUDY

The Department of Kinesiology offers a Bachelor of Science degree in Kinesiology & Health. The undergraduate curriculum major/option is comprised of three components: general education, required departmental courses and the major/option courses. The intent of the general education component is to promote intellectual and personal growth and to prepare students for success in the basic, advanced and major/option components. Required courses provide an introduction to the field and fundamental principles of physical activity, fitness, health and disease.

B.S. degree in Kinesiology & Health

The Kinesiology & Health major includes five specialization options. Options comprise a focused area of study within Kinesiology and Health. Coursework within each specialization option builds upon personal and scholarly learning by enabling students to master content and skills specific to career applications. Options available are:

1. Community and Public Health
2. Exercise Science
3. Physical Activity and Health Promotion
4. Physical Education Teacher Education
5. Pre-Health Professions

Academic options within the Kinesiology & Health major

Students in the Community and Public Health option are prepared for professional employment at local, state or national health agencies, medical centers, and other public or private organizations that seek to promote health in the population.

Students in the Exercise Science option are prepared for professional roles as health and fitness leaders or program managers. Employment opportunities include work in corporate fitness programs, health/fitness facilities, clinics, or hospitals. Graduates are able to plan, implement and supervise exercise programs which will improve fitness and health.
Graduates also have a basic understanding of management issues related to business applications in the health and fitness field.

Students in the **Physical Activity and Health Promotion** option are prepared for careers focused on health and physical activity. This option provides more emphasis on behavioral and psychological aspects of physical activity. Students are prepared for careers in community based settings, including work sites, schools, hospitals, and other community agencies.

Students in the **Physical Education/Teacher Education** option are prepared to teach physical education in grades K-12 and to meet the State of Iowa learning outcomes for teachers. Graduates can plan developmentally appropriate physical education, and individualize instruction and assessment for diverse audiences.

Students in the **Pre-Health Professions** option utilize an interdisciplinary approach to the study of human movement. In so doing, they become prepared for graduate study in Kinesiology or advanced study leading to careers in medicine, physical therapy, physician assistant or other healthcare professions.

**Student Learning Outcomes for the Undergraduate Degree**

Despite the diversity of options, the learning outcomes comprise a common framework for each student as they progress through Iowa State University.

The learning outcomes emphasized in academic coursework in the Department of Kinesiology are:

**COMMUNICATION**

Uses clear and effective written, oral, visual, and electronic (WOVE) communication techniques to foster inquiry, collaboration, and engagement in physical activity and health related settings.

**LIFELONG LEARNING, ASSESSMENT, AND SELF-REFLECTION**

Analyzes and evaluates one’s own knowledge, abilities and actions relative to professional standards, seeks opportunities to grow professionally, and utilizes self-assessment and assessment of others to foster physical, cognitive, social, and emotional well-being.

**CONTENT KNOWLEDGE, DISCOVERY, AND CRITICAL THINKING**

Understands fundamental concepts of physical activity and health, conducts scientific inquiry, and applies critical thinking to solve problems from personal, scholarly, and professional perspectives.

**ETHICS, DIVERSITY, AND SOCIAL JUSTICE**

Demonstrates leadership and social responsibility to improve quality of life for others and ensures equitable access for diverse groups by creating appropriate environments to initiate and maintain a physically active, healthy lifestyle.

---

**Other Program Offerings:**

**ENDORSEMENT TO COACH INTERSCHOLASTIC ATHLETICS**

The State Department of Education has provided for the endorsement of licensed teachers for the coaching of athletic teams in schools. The endorsement does not lead to licensure to teach physical education. For requirements of the program, leading to the coaching endorsement, see School of Education, Teacher Education. More information can be found at: [http://www.kin.hs.iastate.edu/](http://www.kin.hs.iastate.edu/)

**ENDORSEMENT TO TEACH HEALTH EDUCATION**

Those interested in teaching health education in the public schools may get a primary licensure or an additional endorsement. The State Department of Education has approved the Health Teaching Licensure for grades 5-12.

**BASIC ACTIVITY INSTRUCTION PROGRAM**

The department offers a wide selection of beginning, intermediate, and advanced courses in the areas of aquatics, dance, fitness, martial arts, and sports. These courses are designed to serve general education purposes for all students.

**DANCE**

Coursework in dance provides opportunities for students to develop an understanding and appreciation of dance as part of a liberal education. Those interested in teaching dance and physical education in the public schools may major in Kinesiology and Health (Physical Education Teacher Education) and minor in Dance.

An interdisciplinary Performing Arts major with a Dance emphasis is available through the College of Liberal Arts and Sciences. For further information see Index: Performing Arts to find Performing Arts Major, Emphasis in Dance.

**Curriculum in Athletic Training**

The athletic training major prepares students for a career as an athletic trainer in high school, college or professional settings or for work in other settings (such as sports medicine clinics, the military, industry, and fitness centers). Program details including course requirements, admission procedures and technical standards can be found at [http://www.kin.hs.iastate.edu/programs/athletic-training/#program-information-and-requirements](http://www.kin.hs.iastate.edu/programs/athletic-training/#program-information-and-requirements).

**Curriculum in Kinesiology and Health**

The curriculum in Kinesiology and Health is designed for students preparing to enter professional areas related to the medical, health, physical activity, exercise or sport science fields. Students majoring in Kinesiology & Health may select one of five options:

1. Community and Public Health
2. Exercise Science
3. Physical Activity and Health Promotion
4. Physical Education Teacher Education
5. Pre-Health Professions

Minors in dance, exercise science, health promotion, and kinesiology are available; see requirements under Kinesiology, Undergraduate Programs.

A major in Performing Arts with a dance emphasis is available; see requirements under Curriculum in Performing Arts Program, Dance.

Communication Proficiency
In order to meet graduation requirements, all students must earn an average of C (2.0) or better in ENGL 150 and ENGL 250, with the ENGL 150 grade being no lower than a C- and the ENGL 250 grade no lower than a C. Students not meeting this condition must earn a C or better in an advanced writing course:

STAT 101 Principles of Statistics
or STAT 104 Introduction to Statistics

Social Sciences: 9 cr. min required
Option-specific requirements are:
Community and Public Health
PSYCH 101 Introduction to Psychology 3
PSYCH 230 Developmental Psychology 3
SOC 134 Introduction to Sociology 3

Exercise Science
PSYCH 101 Introduction to Psychology 3
or PSYCH 230 Developmental Psychology 3
SOC 134 Introduction to Sociology 3

Physical Activity and Health Promotion
PSYCH 101 Introduction to Psychology 3
or PSYCH 230 Developmental Psychology 3
SOC 134 Introduction to Sociology 3

Physical Education Teacher Education
PSYCH 230 Developmental Psychology 3
SOC 134 Introduction to Sociology 3

Pre-Health Professions
PSYCH 101 Introduction to Psychology 3
or PSYCH 230 Developmental Psychology 3
SOC 134 Introduction to Sociology 3

Humanities: 6 cr. min required
Choose from department approved list.

Communications: 13 cr. min required
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
LIB 160 Introduction to College Level Research 1
SP CM 212 Fundamentals of Public Speaking 3
One of the following 3
ENGL 302 Business Communication
or ENGL 314 Technical Communication
or SP CM 31 Business and Professional Speaking

Program requirements:
The following courses are required in all majors and options:
H S 110 Personal and Consumer Health 3
H S 350 Human Diseases (*) 3
KIN 252 Introduction to the Discipline of Kinesiology 1
KIN 253 Orientation and Learning Community in Kinesiology and Health 1
KIN 258 Principles of Physical Fitness and Conditioning 2
KIN 358 Exercise Physiology (*) 3
KIN 359 Exercise Physiology Lab (*) 1

* A grade of C- or better is required.

Total cr. required to graduate: A minimum of 124 credits is required, with a minimum of 46 credits in courses numbered 300 or above.

Courses for Kinesiology and Health Major
Option 1. Community and Public Health
This option prepares students for a diverse array of careers in public and private health agencies as well as local, state and federal government programs. Students are qualified for careers in a variety of health and human service agencies, community organizations, and hospitals. This option also provides the ideal background training for credentials as a Certified Health Education Specialist (CHES).

Option Requirements:
P R 220 Principles of Public Relations 3
or P R 305 Publicity Methods 3
H S 105 First Aid and Emergency Care 2
H S 285 Pre-Internship in Kinesiology and Health 1-2
KIN 360 Sociology of Physical Activity and Health (*) 3
H S 310 Community and Public Health (*) 3
H S 385 Preparation and Search Strategies for Kinesiology and Health Internships 0.5
H S 430 Community Health Program Development 3
H S 464 Physical Activity Epidemiology 3
or VDPAM 428 Principles of Epidemiology and Population Health 3
H S 485A Internship in Health Studies: Community and Public Health 8-12
HD FS 270 Family Communications and Relationships 3
HD FS 449 Program Evaluation and Proposal Writing 3
or ENGL 309 Proposal and Report Writing 3
PSYCH 485 Health Psychology 3
One of the following 3
HD FS 377 Aging and the Family
or HD FS 395 Children, Families, and Public Policy

Electives: 8-12 credits

* A grade of C- or better is required.

Option 2. Exercise Science
This option prepares students for careers in exercise/fitness promotion. Students are prepared as health/fitness specialists, personal trainers, strength and conditioning specialists, and health coaches. Students find work in fitness centers, worksite health programs, medical facilities,
cardiac rehabilitation centers, and other agencies that provide fitness services. Students are eligible to sit for certification exams offered by the American College of Sports Medicine and the National Strength & Conditioning Association.

Option Requirements:

<table>

<tr>
<td>A TR 220 or H S 305</td>
<td>Basic Athletic Training or Instructor's First Aid and Cardiopulmonary Resuscitation</td>
<td>2</td>
</tr>
</tbody>
</table>

Electives: 12-16 credits

* A grade of C- or better is required.

** Option 3. Physical Activity and Health Promotion **

This option prepares students for a variety of career outlets focused on health and physical activity promotion. The coursework provides the ideal background for students interested in worksite wellness programming. Students are also well suited to pursue career opportunities in health coaching and health promotion in schools, community agencies, as well as clinical settings. This option provides ideal background training for students interested in pursuing the Physical Activity in Public Health Specialist Certification offered by the American College of Sports Medicine.

Electives: 5 credits

* A grade of C- or better is required.
** A grade of C or better is required.

Option 5. Pre-Health Professions
This option is for students interested in graduate study or for those who are preparing for professional programs in medicine, physical therapy, physician assistant, and other healthcare professions. Course work provides background in human movement while completing the requirements for entry into graduate or professional school.

Option Requirements:
BIOL 211  Principles of Biology I 3
BIOL 211L  Principles of Biology Laboratory I 1
BIOL 212  Principles of Biology II 3
BIOL 212L  Principles of Biology Laboratory II 1
KIN 242  Planning for Success in a Health Career 0.5
KIN 355  Biomechanics (*) 3
KIN 356  Sport Psychology (*) 3
or KIN 366  Exercise Psychology (*)
KIN 372  Motor Control and Learning Across the Lifespan (*) 3
9 cr. from the following 9
H S 464  Physical Activity Epidemiology 3
KIN 455  Research Topics in Biomechanics 3
KIN 458  Principles of Fitness Assessment and Exercise Prescription 4
KIN 462  Medical Aspects of Exercise 3
KIN 466  Exercise for Mental Health 3
KIN 467  Exercise and Health: Behavior Change 3
KIN 472  Neural Basis of Human Movement 3
KIN 473  Physical Dimensions of Aging 3
KIN 480  Functional Anatomy 3
Specialization Requirements: Other prerequisites as required by professional schools.
Electives: 6-14 credits

A grade of C- or better is required.

FOUR YEAR PLANS
Students must complete a 3-credit course in US diversity and a 3-credit course in international perspectives. Check the ISU homepage for a list of approved courses. You must complete a minimum of 46 credits in 300/400 level courses and a total of 124 credits for graduation. Four year plans are arranged with courses in prerequisite sequence and within the term a course is usually offered. These are SAMPLE plans - use the degree audit as "official" documentation of progress toward your degree.

Gerontology
The department participates in the interdepartmental minor in gerontology (see Index).

Health Coach Certificate
Students pursuing a bachelor’s degree in kinesiology can seek additional credentials through the Health Coach Certificate. More information on the certificate can be found at: Health Coach Certificate.

The Kinesiology Department offers two concurrent undergraduate and graduate programs.

B.S./M.A.T.R. degree in Athletic Training
Certified Athletic Trainers are allied medical health professionals who specialize in the prevention, assessment, treatment and rehabilitation of injuries to athletes and physically active individuals who are engaged in physical and athletic activities. To gain certification, candidates must graduate from a CAATE accredited athletic training education program and successfully pass the Board of Certification (BOC) examination.

In addition to BOC certification, many states also have licensure requirements to practice athletic training. The Athletic Training program at Iowa State University, accredited since 2001 has transitioned to the new M.A.T.R. degree program, which includes various athletic training clinical rotations including high school, physical therapy clinics, surgical observation experiences, and emergency room observation.

B.S./M.S. DEGREE IN DIET AND EXERCISE
A combined Bachelor of Science and Master of Science (B.S./M.S.) degree in Diet and Exercise is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FS HN), and the Department of Kinesiology. Students interested in this program must enroll as freshmen in the Pre-Diet and Exercise program. In the fall of the junior year, students will apply for admission to the B.S./M.S. program. Students not accepted into the program will continue toward completion of a B.S. degree in Dietetics or Kinesiology & Health. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of B.S./M.S. degrees in Diet and Exercise.

More information can be found at: https://fshn.hs.iastate.edu/find-your-major/diet-and-exercise/

Graduate Study
The Department of Kinesiology graduate program seeks to integrate discovery and learning by preparing graduate students to understand and create basic and applied knowledge in the study of physical activity, exercise and sport. The normal prerequisite to major graduate work is the satisfactory completion of a curriculum essentially equivalent to that required of undergraduate students in kinesiology at this university. However, it is possible for students to qualify for graduate study if undergraduate preparation has been in a related area.

Students in the M.S. and Ph.D. degrees are required to complete original research and write a thesis or dissertation. There is a non-thesis degree option for M.S. students requiring more coursework and an internship experience or other creative component. Specific information about the requirements for these degree options is available from the department office or from the department web site (http://www.kin.hs.iastate.edu/graduate/).

Learning and Leadership Sciences Minor
Learning and Leadership Sciences Minor
The Learning and Leadership Sciences minor provides an opportunity for students to engage in productive thinking, enabling them to lead in their professions and contribute to society and their communities.

The coursework builds on the curriculum of a student’s primary discipline to enhance student leadership abilities throughout their academic career and beyond. Students will enhance their abilities to engage in
productive thinking, such as critical, analytical, and creative thinking in problem-solving; discern the types of thinking required when presented with new situations; and use different types of thinking to address issues and situations as professionals and citizens. Core courses in the minor address eight competency areas that are critical for leaders: 1) understanding self and personal responsibility for learning, 2) understanding worthy team membership, 3) developing productive thinking and creative problem-solving abilities, 4) developing resiliency, 5) negotiating and resolving conflict, 6) action planning for providing service, 7) communicating, and 8) recognizing and acting on the obligation to "do" leadership every day.

Students in the Learning and Leadership Sciences Minor will ultimately achieve these learning outcomes by uncovering and practicing:

- habits of deep self-reflection about learning and application of these habits to their professional and community lives;
- effective interaction with others in professional and community settings, including abilities to listen actively, communicate clearly, resolve conflicts, and negotiate desired outcomes;
- habits of professional thinking, including accountability, initiative, innovation, resilience, tolerance, and profound respect for others.

**Nursing**

**OVERVIEW**

The Bachelor of Science in Nursing (BSN) program at Iowa State University is a RN-to-BSN program, designed for those who are already a Registered Nurse (RN), and desire to further their nursing career and education to the next level. Iowa State’s RN-to-BSN program provides interactive learning opportunities where students can apply their real-world experiences and education to inspire innovation in their places of care. RN-to-BSN students will be challenged to enhance health promotion and disease prevention, apply nursing science and evidence-based patient-centered care, focus on the culture of health for nurses, individuals, and communities, and demonstrate the continuum of care, from a nurse’s self-care to patient care to community and population health.

Effective October 12, 2020, this nursing program is a candidate for initial accreditation by the Accreditation Commission for Education in Nursing. This candidacy status expires on October 12, 2022.

**Student Learning Outcomes**

Upon graduation, students should be able to:

1. Synthesize theory and concepts from the arts and humanities, natural and social sciences, and nursing in the holistic practice of professional nursing.
2. Integrate knowledge of historical and contemporary nursing with leadership skills and principles to facilitate optimal patient and systems outcomes.
3. Translate research findings to support evidence-based, competent, safe, and effective nursing care to individuals, families, and communities in diverse settings across the lifespan.
4. Utilize current technology effectively and efficiently to communicate, manage knowledge, mitigate error, support decision making and accomplish goals related to the delivery of safe, quality care for diverse individuals, families, and the community.
5. Examine how healthcare policies, including financial and regulatory, influence healthcare systems, nursing practices and population health.
6. Incorporate principles of effective communication and collaboration when working with members of the health team, recipients of care and interested groups to improve health outcomes for individuals, groups and communities.

7. Integrate concepts of health promotion and disease management, health literacy and patient-centered care to improve population health.

8. Engage in professional, culturally competent, and ethically congruent care that reflects dignity and uniqueness of individuals and groups in diverse populations and locations.

9. Demonstrate a commitment to professionalism and model the values of advocacy, compassion, integrity, human dignity, cultural competence and social justice while embracing the concept of continuous learning.

Administered by the Department of Food Science and Human Nutrition

RN-to-BSN Admissions Criteria

Applications for the RN-to-BSN program are individually reviewed. Minimum requirements for admission to the BSN program include:

- Licensure as a Registered Nurse
- Meet all Iowa State University admission criteria for transfer students
- Official college transcripts from all colleges and universities attended
- Minimum of 2.5 cumulative GPA for all college coursework
- Achievement of minimum “C” (not C-) for all prerequisite courses listed below

<table>
<thead>
<tr>
<th>Course</th>
<th>Equivalent</th>
</tr>
</thead>
<tbody>
<tr>
<td>English Composition I and II</td>
<td>ENGL 150</td>
</tr>
<tr>
<td>Introduction to Chemistry</td>
<td>CHEM 163 or CHEM 1T</td>
</tr>
<tr>
<td>Statistics</td>
<td>STAT 101 or STAT 104</td>
</tr>
<tr>
<td>Introduction to Human Nutrition</td>
<td>FS HN 167</td>
</tr>
<tr>
<td>Introduction to Sociology</td>
<td>SOC 134</td>
</tr>
</tbody>
</table>

Admissions requirements are congruent with the Iowa Action Coalition, RN-to-BSN Task Force Recommendations.

RN-to-BSN Progression Criteria

- Must earn a “C” grade or better in all NRS courses and meet the university’s academic standards for progress toward a degree

 RN-to-BSN Graduation Requirements

- At least 32 credits earned in residence at Iowa State University, and the final 32 credits taken through Iowa State University prior to graduation.
- All general education requirements at Iowa State University must be met.

- The BSN curriculum consists of 21 credits of NRS courses, 8 credits of FS HN courses, and 3 elective credits for a total of 32 credits in addition to prerequisite coursework.
- Electives are selected by students to meet identified career interests, and total elective credits needed will vary based on individual transfer credits.
- Minimum credits for graduation is 120 credits.

**Nutritional Science (H SCI)**

Nutritional science looks at the connection between diet and health. Students learn how diet can play a crucial role in the cause, treatment, and prevention of many diseases. There are degree program options within nutritional science. The pre-health professional and research option coursework prepares students for work in research laboratories, graduate study in nutrition or biological sciences, or entrance into health professional programs, such as medical, dental, physician assistant, and pharmacy schools. Students gain a strong science education along with human nutrition expertise. Additional options in health coach and nutrition and wellness prepare students for work positions in program planning and evaluation for community, public health, non-profit, and corporate wellness programs addressing the growing public interest in nutrition, wellness, and preventative health. Students learn about the role of nutrition and healthy eating for disease prevention and wellness.

The department also offers a nutrition minor.

**Student Learning Outcomes**

Upon graduation, students should be able to:

- Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
- Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
- Facilitate and participate effectively in a group, team, or organization.
- Plan life-long learning activities with the aim of improving professional skills.
- Integrate creativity, innovation, or entrepreneurship in ways that produce value.
- Describe sociocultural competence relative to diversity, equity and/or inclusion.
- Explain how human activities impact the natural environment and how societies are affected.
• Meet program specific learning outcomes for the Nutritional Science major.

The department also offers a nutrition minor.

**Administered by the Department of Food Science and Human Nutrition**

- Pre-Health Professional and Research Option
- Health Coach Option
- Nutrition and Wellness Option

**PRE-HEALTH PROFESSIONAL AND RESEARCH OPTION**

**Total Degree Requirement: 120 cr.**

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

**International Perspectives: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications and Library: 13 cr.**

**Total Credits:** 36

**Electives:** 0-9 cr. Select from any university coursework to earn at least 120 total credits. Students planning to apply to health professional programs should review entrance requirements and select appropriate courses as electives.

Concurrent B.S. and M.S. Program: Well-qualified students in Nutritional Science, pre-health professional and research option, who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a Bachelor of Science (B.S.) degree in Nutritional Science and a Master of Science (M.S.) degree in Nutritional Sciences. For more information, refer to www.fshn.hs.iastate.edu (http://www.fshn.hs.iastate.edu)

**CURRICULUM FOR HEALTH COACH OPTION AND NUTRITION & WELLNESS OPTION**

**Total Degree Requirement:** 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

**International Perspectives:** 3 cr.

**U.S. Diversity:** 3 cr.

**Communications/Library:** 10 cr.

- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3
- LIB 160 Introduction to College Level Research 1
- SP CM 212 Fundamentals of Public Speaking 3

**Total Credits:** 10

**Humanities and Social Sciences:** 15-18 cr.

Select Humanities course from approved list 3

- PSYCH 101 Introduction to Psychology 3
- or PSYCH 230 Developmental Psychology 3
- SOC 134 Introduction to Sociology 3
- POL S 344 Public Policy 3
- FS HN 342 World Food Issues: Past and Present (this course can also meet the IP requirement) 3

If H Sci student, select additional Humanities course 3

**Mathematical Sciences:** 6-8 cr.

Select at least 3 credits from: 3-4

- MATH 140 College Algebra
- MATH 143 Preparation for Calculus
- MATH 160 Survey of Calculus
- MATH 165 Calculus I

Select at least 3 credits from: 3-4

- STAT 101 Principles of Statistics
Nutritional Science (H SCI)

**STAT 104**  Introduction to Statistics

**Total Credits**  6-8

**Physical Sciences: 5 cr.**

### Professional Practice in Dietetics

**Master of PROFESSIONAL PRACTICE IN DIETETICS (M.P.P.)**

The Department of Food Science and Human Nutrition offers a non-thesis master's degree for individuals who are interested in becoming Registered Dietitian Nutritionists. This online program is considered a professional master’s degree. Students interested in further graduate study (PhD) may require additional coursework and/or research beyond the MPP to gain admission into a doctoral program.

This 30-credit non-thesis program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Admission requirements for the MPP include successful completion of at least a Bachelor's degree and a verification statement from any ACEND accredited didactic program in dietetics (DPD). A minimum GPA of 3.0 (on a 4.0 scale) both overall and in the DPD are desired. A professional goal statement (≤750 words), three letters of recommendation from faculty, work supervisors or those who can attest to the applicant's ability to succeed in an online program in the field of dietetics are also required. The Graduate Record Examination (GRE) is not required.

More information on the program can be found here: [https://www.grad-college.iastate.edu/academics/programs/apresults.php?id=140](https://www.grad-college.iastate.edu/academics/programs/apresults.php?id=140).

### School of Education

Mary Gresham, Interim Director of the School of Education

The School of Education at Iowa State University is committed to engaging in rigorous and socially meaningful research. We are preparing leaders and practitioners across the P-20 continuum who support rich, equitable learning opportunities for all students. Supporting public education as a cornerstone of a healthy, vibrant, and just society, the School of Education strives to be a national leader in educational theory, policy, and practice, as we honor the land-grant tradition and the broader mission of the university to serve the people of Iowa.

### Undergraduate Study

The School of Education provides the professional education coursework to support the completion of the Educator Preparation Program. Program completers can then be recommended for licensure to the Iowa Board of Education Examiners. Majors offered in the School include **Elementary Education (K-6)**, **Early Childhood Education-Unified (birth through third grade, inclusive)**. The Early Childhood Education-Unified major is an interdepartmental program administered by the School of Education and the Department of Human Development and Family Studies. In addition, the School of Education offers the secondary major in Education. This secondary major is available to candidates pursuing English Education, History/Social Sciences Education, Mathematics Education, Science Education, and World Languages and Cultures Education.

Undergraduate students who are interested in teaching at the secondary level (5-12) or at the K-12 level major in a specific discipline and either pursue the secondary major in Education or complete additional required educational coursework in the School of Education and the department to complete the Educator Preparation Program. K-12 and secondary education programs include: Agriculture Education, English Education, Family and Consumer Sciences Education, Health Education, History-

---

**Note:**

- Use elective courses to total equal to or greater than 120 credits.
- Select at least 15 additional courses from: BIOL 314; FS HN 214 with Lab (FS HN 115 or 215); FS HN 242, 311, 365, 367, 403, 420, 430, 461, 463, 492, 496, 498, 499, 575; NUTR 501, 504; PHYS 131 or 231/L; PHYS 132 or 232/L.

The Department of Food Science and Human Nutrition offers a Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) in Nutritional Sciences. More information can be found here: [https://foodscienceandhumannutrition/#undergraduateminortext](https://foodscienceandhumannutrition/#undergraduateminortext).

More information on the Nutrition minor can be found here: [https://www.catalog.iastate.edu/collegeofhuman sciences/foodscienceandhumannutrition/#undergraduateminortext](https://www.catalog.iastate.edu/collegeofhuman sciences/foodscienceandhumannutrition/#undergraduateminortext).
Social Sciences Education, Mathematics Education, Music Education, Physical Education, Science Education (Biology, Chemistry, Earth Science, and Physics), and World Languages and Cultures Education (French, German, and Spanish).

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- **Decision Point 1 - Admission to the Teacher Education Program.** To access the policy, please follow this link: https://iastate.box.com/s/vnp2dt4sihtu99ljym531y1lnjkrb4e9

- **Decision Point 1 - Early Admission to the Teacher Education Program for Transfer Students.** To access the policy, please follow this link: https://iastate.box.com/s/o45gppndbjxa3j9fm9pwvwrk9cc92jzb

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer. Decision Point 3 - Recommendation for Licensure. To access the policy, please follow this link: https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosaif6oz3

All Educator Preparation Program candidates must complete the professional core coursework (information found under each program) and required pedagogy and field experience coursework for their program. In addition, all prospective teachers are required to meet general education requirements as a part of their preparation. They must complete studies in the following general education groups. General education courses may be found in many departments. Credits listed are minimum requirements. Specific departments and/or colleges may require specific coursework to meet these requirements or additional credits. Credits used to satisfy these general education requirements typically satisfy department and college general education requirements:

For Educator Preparation general education requirements, please see this link: https://iastate.box.com/s/nye3ue752tiv9t4xbpxv9zq6wgsrln

**Early Childhood Education – Unified**

The curriculum in Early Childhood Education – Unified prepares graduates to teach young children and work with their families. This program leads to careers working with young children (both those who are typically developing and those with special needs) from birth through third grade, inclusive. Program completers who apply for licensure are recommended for licensure to the Iowa Board of Educational Examiners. Individuals who are licensed may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through 3rd grade) or in home-based programs. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and the School of Education. For more information about the program, see Early Childhood Education - Unified Curriculum [https://hdfs.hs.iastate.edu/find-your-major/early-childhood-education/](https://hdfs.hs.iastate.edu/find-your-major/early-childhood-education/).

Students who enroll in the early childhood education – unified program must apply to and be accepted into the Educator Preparation Program prior to enrolling in advanced courses. Admission requirements can be found at: https://www.education.iastate.edu/educator-prep-program/admission/

Early Childhood Education majors must complete all of the required degree curriculum. This can be found at: http://catalog.iastate.edu/collegeofhumansciences/earlychildhood_education/

Candidates must receive a minimum of a “C” in all education (EDUC), human development and family studies (HD FS), special education (SP ED) courses and all content-specific pedagogy/methods courses required for program completion and endorsement completion.

Candidates must receive a minimum of a “C-” in all major department courses/content courses required for teacher program completion and endorsement completion (content coursework).

Candidates can pursue an additional endorsement in K-8 reading. Information about this endorsement can be found at: https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jgj

**Elementary Education**

The undergraduate curriculum in elementary education leads to the Bachelor of Science degree. The curriculum in elementary education is designed for candidates preparing to teach at the elementary school level. This program leads to careers in working with school-aged children in kindergarten through sixth grade. Program completers who apply for licensure are recommended for licensure to the Iowa Board of Educational Examiners. Individuals who are licensed will be qualified to teach in elementary classrooms in either public or private schools. Elementary Education majors must complete all of the required degree curriculum. This can be found at: http://catalog.iastate.edu/collegeofhumansciences/elementaryeducation/

Candidates must receive a minimum of a “C” in all education (EDUC), human development and family studies (HD FS), special education (SP ED) courses and all content-specific pedagogy/methods courses required for program completion and endorsement completion.

Candidates must receive a minimum of a “C-” in all major department courses/content courses required for teacher program completion and endorsement completion (content coursework).

In addition to pursuing a degree in Elementary Education, candidates are required to pursue an endorsement in at least one additional area.
Candidates will be prepared to teach students in grades kindergarten through eighth grade in this area. Endorsements in the following areas are available for elementary education majors:

- K-8 English/language arts
- K-12 English as a Second Language (ESL)
- K-8 Health
- K-8 Mathematics
- K-8 Science
- K-8 Social studies
- K-8 Special education (Instructional Strategist I: Mild/Moderate Disabilities K-8)

Candidates can pursue additional endorsements in any of the above listed areas and in the following areas:

- K-8 Reading
- K-12 Coaching

Information about these additional endorsements can be found at: https://iastate.app.box.com/s/m4tr3og90uwmiubz5dhv9catryr2jfqf (https://iastate.app.box.com/s/m4tr3og90uwmiubz5dhv9catryr2jfqf/)

Contact an Elementary Education academic advisor for additional information.

Elementary education majors must satisfy a world languages requirement for graduation. Students must complete two years of a foreign language in high school or one year of a foreign language in college.

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Teacher Education Program. To access the policy, please follow this link: https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1njkrb4e9 (https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1njkrb4e9/)
- Decision Point 1 - Early Admission to the Teacher Education Program for Transfer Students. To access the policy, please follow this link: https://iastate.box.com/s/o45gpndbjxa3j9fm9pwwrk9cc92jzb (https://iastate.box.com/s/o45gpndbjxa3j9fm9pwwrk9cc92jzb/)

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer. Decision Point 3 - Recommendation for Licensure. To access the policy, please follow this link: https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3 (https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3/)

**K-12 and Secondary Education**

Students wanting to pursue K-12 or Secondary Teacher Education major in the content area in which they want to focus. They then pursue one of two options depending upon their program: 1) complete the secondary major in Education or 2) complete additional coursework required to complete the Educator Preparation Program. Program completers who apply for licensure are recommended to the Iowa Board of Educational Examiners.

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Teacher Education Program. To access the policy, please follow this link: https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1njkrb4e9 (https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1njkrb4e9/)
- Decision Point 1 - Early Admission to the Teacher Education Program for Transfer Students. To access the policy, please follow this link: https://iastate.box.com/s/o45gpndbjxa3j9fm9pwwrk9cc92jzb (https://iastate.box.com/s/o45gpndbjxa3j9fm9pwwrk9cc92jzb/)

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer. Decision Point 3 - Recommendation for Licensure. To access the policy, please follow this link: https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3 (https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3/)

**Secondary Major in Education**

A secondary major in Education at Iowa State University prepares candidates to teach at the middle school and high school levels. K-12/Secondary Educator Preparation Programs eligible to pursue the secondary major in Education are:

- English Education
- History/Social Sciences Education - History
- History/Social Sciences Education - Political Science
- Mathematics Education
- Science Education – Biology
- Science Education – Chemistry
- Science Education – Earth Science
• Science Education – Physics
• World Languages and Cultures Education – French
• World Languages and Cultures Education – German
• World Languages and Cultures Education – Spanish

Secondary majors in education must complete all of the required degree curriculum. This can be found at: http://www.catalog.iastate.edu/collegeofhumansciences/educationsecondary/

Additional Endorsements and Minors
Candidates pursuing the secondary major in Education have the opportunity to pursue additional endorsements and minors:

• K-12 Coaching Endorsement
• K-12 English as a Second Language Endorsement
• 5-12 Reading Endorsement
• Additional Science Endorsements
  • 5-12 Physical Science
  • 5-12 Basic Science
• Additional Social Sciences Endorsements
  • 5-12 American Government
  • 5-12 Anthropology
  • 5-12 Economics
  • 5-12 Psychology
  • 5-12 Sociology
• 5-12 Speech and Theatre Endorsement

(See https://education.iastate.edu/future-students/find-your-major/endorsements/ for additional information)

• Learning Technologies Minor

(See https://education.iastate.edu/find-your-major/learning-technologies-minor/)

Specific program requirements can be found within each department that houses the endorsement. Information on K-12 Coaching, K-12 English as a Second Language, and 5-12 Reading can be found at: https://iastate.app.box.com/s/m4tr3og99ouwmiubz5dhv9catry72jg/ (https://iastate.app.box.com/s/m4tr3og99ouwmiubz5dhv9catry72jg/)

Curriculum in secondary major in Education
Educator Preparation Program Admission Requirements
In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

• Decision Point 1 - Admission to the Teacher Education Program. To access the policy, please follow this link: https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1njkrb4e9 (https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1njkrb4e9/)
• Decision Point 1 - Early Admission to the Teacher Education Program for Transfer Students. To access the policy, please follow this link: https://iastate.box.com/s/o45gppndbja3j9f9pwwr9cc92jz (https://iastate.box.com/s/o45gppndbja3j9f9pwwr9cc92jz/)

In order to be eligible to student teaching (EDUC 417), candidates must have completed all degree program requirements and content specific coursework.

• Decision Point 2 - Requirements Students Must Meet Prior to Student Teaching. To access the policy, please follow this link: https://iastate.box.com/s/arvh7dvr3z35548rod5so2g5throo6f (https://iastate.box.com/s/arvh7dvr3z35548rod5so2g5throo6f/)

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer.

Decision Point 3 - Recommendation for Licensure. To access the policy, please follow this link: https://iastate.box.com/s/s6l016zuuy07v7alw42d6bosai6zo (https://iastate.box.com/s/s6l016zuuy07v7alw42d6bosai6zo/)

All Educator Preparation Program candidates must complete the professional core coursework (information found under each program) and required pedagogy and field experience coursework for their program. In addition, all prospective teachers are required to meet general education requirements as a part of their preparation. They must complete studies in the following general education groups. General education courses may be found in many departments. Credits listed are minimum requirements. Specific departments and/or colleges may require specific coursework to meet these requirements or additional credits. Credits used to satisfy these general education requirements typically satisfy department and college general education requirements.

Educator Preparation General Education Requirements
• Natural Sciences: 6 credits
• Mathematics or Statistics: 3 credits
• Social Sciences: 9 credits
• Humanities: 6 credits
• Communication Skills: 9 credits that must include ENGL 150 and 250 or an equivalent
• Library Skills: LIB 160 for 1 credit
• Other:
  • HD FS 102 or PSYCH 230
  • One course in American history or government
• One course that develops interpersonal or group presentation skills

NOTE: Specific majors will provide approved options to meet these requirements.

Secondary major in Education Requirements for English Education Candidates

Educator Preparation Field Experiences:
EDUC 280L Pre-Student Teaching Experience I: Secondary Education – 0.5 credits
EDUC 380A Pre-Student Teaching Experience II: Core Experience – 2 credits
EDUC 480 Pre-Student Teaching Experience III – 2 credits
ENGL 417E Student Teaching: English and Literature – 16 credit

Educator Preparation Professional Core Coursework:
EDUC 203 A Connected World: Technology for Learning, Creating, and Collaborating – 1 credit
EDUC 204 Social Foundations of Education in the United States: Secondary – 3 credits
EDUC 303 Introduction to Educational Technology – 1 credit
EDUC 333 Educational Psychology – 3 credits
EDUC 395 Teaching Disciplinary Literacy – 3 credits
EDUC 403 Intermediate Educational Technology – 1 credit
EDUC 406 Social Justice Education and Teaching: Secondary – 3 credits
SP ED 401 Teaching Secondary Students with Exceptionalities in General Education – 3 credits

Please check departmental information in regards to specific content coursework requirements.

Secondary major in Education Requirements for History/Social Sciences Education Candidates

Educator Preparation Orientation Course Requirement:
EDUC 219 Orientation to Teacher Education: FCS, History, Math, Science and World Language and Cultures Majors – 1 credit

Educator Preparation Field Experiences:
EDUC 280J Pre-Student Teaching Experience I: Mathematics Clinic – 1 credit
EDUC 380A Pre-Student Teaching Experience II: Core Experience – 2 credits
EDUC 480 Pre-Student Teaching Experience III – 2 credits
EDUC 417 Student Teaching – 16 credits

Educator Preparation Pedagogy/Methods Coursework:
EDUC 498 Methods of Teaching History/Social Sciences – 3 credits
EDUC 426 Principles of Secondary Education – 3 credits

Please check departmental information in regards to specific content coursework requirements.

Secondary major in Education Requirements for Mathematics Education Candidates

Educator Preparation Orientation Course Requirement:
EDUC 219 Orientation to Teacher Education: FCS, History, Math, Science and World Language and Cultures Majors – 1 credit

Educator Preparation Pedagogy/Methods Coursework:
EDUC 487 Methods in Secondary School World Language Instruction – 3 credits
EDUC 426 Principles of Secondary Education – 3 credits

Please check departmental information in regards to specific content coursework requirements.

It is our expectation that students know the requirements of their academic program and develop and follow an academic plan based on their academic catalog and degree audit using their individual academic adviser as a resource in this process.

Candidates Pursuing Educator Preparation: Non-secondary major programs

Iowa State offers the following undergraduate K-12/secondary Educator Preparation Programs not associated with this secondary major:
K-12 Music Education
K-12 Physical Education Teacher Education
Agriculture Education
Family and Consumer Sciences Education

For additional information on these programs please see: https://education.iastate.edu/find-your-major/secondary-education-middle-or-high-school/

K-12 and secondary education candidates must complete a professional core course sequence. In general, the sequence includes:

**Educator Preparation Orientation Course Requirement:**
EDUC 219 Orientation to Teacher Education: FCS, History, Math, Science and World Language and Cultures Majors – 1 credit

**Educator Preparation Field Experiences:**
EDUC 280L Pre-Student Teaching Experience I: Secondary Education – 0.5 credits
EDUC 380A Pre-Student Teaching Experience II: Core Experience – 2 credits
EDUC 480 Pre-Student Teaching Experience III – 2 credits
EDUC 417 Student Teaching – 16 credits

**Educator Preparation Professional Core Coursework:**
EDUC 203 A Connected World: Technology for Learning, Creating, and Collaborating – 1 credit
EDUC 204 Social Foundations of Education in the United States: Secondary – 3 credits
EDUC 303 Introduction to Educational Technology – 1 credit
EDUC 333 Educational Psychology – 3 credits
EDUC 403 Intermediate Educational Technology – 1 credit
EDUC 406 Social Justice Education and Teaching: Secondary – 3 credits
SP ED 401 Teaching Secondary Students with Exceptionalities in General Education – 3 credits

Candidates must receive a "C" or above in all courses

*EDUC 203, EDUC 303, & EDUC 403 are the 7-12 Classroom technology requirements

Additional information can be found at: https://www.education.iastate.edu/find-majors/learning-technologies-minor/

Graduate Study

The School of Education is comprised of two graduate divisions: Higher Education and Teaching, Learning, Leadership, and Policy (TLLP).

Within these divisions, the School offers coursework and experiences for the degrees Doctor of Philosophy, Doctor of Education, Master of Science, and Master of Education with a major in education. Students can pursue graduate programs, including a Master of Arts in Teaching degree, leading to completion of a teacher preparation program and recommendation for teacher licensure are offered in secondary science and secondary mathematics. In addition, endorsements in reading and special education can also be pursued by graduate students. Graduate students interested in educational leadership may also participate in our educator preparation programs in educational leadership. Program completers may be recommended for administrative licensure for roles as principals and superintendents. The School of Education offers graduate coursework leading to a minor for masters and doctoral students in other fields of study. Several graduate certificate programs are offered through the School of Education.

Doctoral Degree Programs

The School of Education offers two doctoral degree programs: the Ph.D. and the Ed.D. Students pursuing a Ph.D. in the division of Higher Education may earn an education degree with an emphasis in higher education administration. Students pursuing a Ph.D. in the division of TLLP may earn an education degree with an emphasis in one of the following areas: educational leadership, organizations, and policy; instructional technology; mathematics education; science education; literacy; special education; or social and cultural studies of education. Specific information about the requirements of and options available within the Ph.D. degree in education are available from the School office or on the School of Education Graduate Programs (https://www.education.iastate.edu/graduate-programs/) website.

Graduates of the Ph.D. program in education are prepared to pursue careers as scholars, leaders, and administrators in various educational
settings, including public and private colleges and universities, community colleges, public and private educational agencies, non-profits, and corporate training settings.

Students in the School of Education may complete an Education Doctorate (Ed.D.) with a major in education. Students may earn an education degree with an emphasis in Community College Leadership or in P-12 Systems Level Leadership. Specific information about the requirements of the Ed.D. degree in education are available on the School of Education Graduate Programs website. Graduates of the Ed.D. program in education are prepared to pursue careers as scholar-practitioners in leadership roles in community colleges and K-12 educational systems including school districts, public and private education agencies, and state departments of education. Students who complete the K-12 Systems Level Leadership program can be recommended for Iowa licensure as a school superintendent.

Master’s Degree Programs

The School of Education offers two master’s degrees: the Master of Science and the Master of Education. In the division of Higher Education, students may earn an M.Ed in education with an emphasis in either student affairs or higher education. In the division of TLLP; students may earn an M.S. or an M.Ed. in education with an emphasis in one of the following areas: educational leadership, organizations and policy; instructional technology; mathematics education; science education; literacy; special education; or social and cultural studies of education.

Specific information about the requirements of and options available within M.S. or M.Ed. degrees in education are available from the School office or on the website School of Education Graduate Programs website https://www.education.iastate.edu/graduate-programs/

Graduates of the master’s degree programs are prepared to pursue careers as educational leaders, higher education professionals, researchers, and advanced practitioners in colleges and universities, community colleges, public and private schools, education agencies, and informal (free-choice) education settings.

Other graduate programs related to education (including Interdisciplinary Graduate Studies) may be planned for students on the basis of previous education and experiences as well as future plans and needs. For more information, students should refer to Agricultural Education and Studies, Family and Consumer Sciences Education, Kinesiology, and Interdisciplinary Graduate Studies or to graduate level course offerings within other departments.

Graduate minor in education

A minor in Education is available at both the master’s and doctoral level. Graduate students in other majors may pursue a graduate minor in Education. A minor for doctoral students requires 15 credits in education courses, while a minor for master’s students requires 9 credits. Students should identify a faculty member who will serve as the minor representative on their Program of Study Committee and work with this person to identify an appropriate set of courses to fit the student’s interests. The minor is not an appropriate option for students whose primary interests are in research methodology; the graduate certification Applied Research in the Human Sciences should be used instead. Doctoral students are reminded that a minor must be declared before the preliminary oral examination.

Graduate Teacher and Educational Leadership Preparation Programs

The School of Education offers a Masters of Arts in Teaching - Science Education and a Masters of Arts in Teaching - Mathematics Education for candidates who currently have a bachelor’s degree in a science area (or a closely related field) or in mathematics (or a closely related field), respectively. In addition, the School of Education offers a Masters of Arts in Teaching - Secondary Education that is currently available for individuals with an English degree or a history/social sciences degree interested in becoming a teacher. In these teacher preparation programs, program completers who apply for licensure are recommended for teacher licensure to the Iowa Board of Educational Examiners.

Teacher preparation programs at the graduate level are also offered in Agricultural Education (College of Agriculture and Life Sciences) and Physical Education (College of Human Sciences). The School of Education provides the professional core education coursework for these programs. Students in a graduate teacher preparation program must complete specific courses. Specific information about these programs can be found by contacting these departments.

Graduate level programs leading to recommendation for teaching endorsements, including Reading endorsements and Instructional Strategist II: Behavior Disorders/Learning Disabilities, are offered through the School of Education.

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Teacher Education Program. To access the policy, please follow this link: https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1jnkrb4e9 (https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1jnkrb4e9/)

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an
The Educator Preparation Program at Iowa State University

Educator Preparation (http://www.education.iastate.edu/educator-prep-program/): https://education.iastate.edu/current-students/educator-preparation-program/

The Educator Preparation Program at Iowa State University is a shared responsibility that spans three colleges. All candidates who are recommended by Iowa State University for licensure must be considered a program completer by meeting the requirements of the Educator Preparation Program and be recommended by their department, college, and the ISU recommending official. Students who successfully complete the requirements for any of the endorsement areas offered at ISU must demonstrate the skills, knowledge, and dispositions / professional practices required of educators.

Undergraduate Educator Preparation Programs

An undergraduate student seeking a bachelor's degree must be enrolled in the department in which he or she plans to major and must meet the graduation requirements of that department and college.

All Educator Preparation Program candidates must complete the professional core coursework (information found under each program) and required pedagogy and field experience coursework for their program. In addition, all prospective teachers are required to meet general education requirements as a part of their preparation. They must complete studies in the following general education groups. General education courses may be found in many departments. Credits listed are minimum requirements. Specific departments and/or colleges may require specific coursework to meet these requirements or additional credits. Credits used to satisfy these general education requirements typically satisfy department and college general education requirements.

For Educator Preparation general education requirements, please see this link: https://iastate.box.com/s/nye3ue752tiv9t4xpjxv99z6w6gsrln (https://iastate.box.com/s/nye3ue752tiv9t4xpjxv99z6w6gsrln/)

Currently, there are fifteen undergraduate Educator Preparation areas offered at Iowa State University. These areas and their corresponding grade levels are listed below:

- Agricultural Education (grades 5-12)
- Biology (grades 5-12)
- Chemistry (grades 5-12)
- Early Childhood Education-Unified (birth-grade 3, inclusive)
- Earth Science (grades 5-12)
- Elementary Education (grades K-6)
- English (grades 5-12)
- Family and Consumer Sciences (grades 5-12)
Health Education (grades 5-12)
History-Social Sciences (grades 5-12)
Mathematics (grades 5-12)
Music (grades K-12)
Physical Education (grades K-12)
Physics (grades 5-12)
World Languages and Cultures (French, German, and Spanish) (grades 5-12)

Endorsements Areas

Early Childhood Education

Candidates can also choose to pursue an endorsement in K-8 reading.

Elementary Education

Candidates pursuing a degree in Elementary Education are required to pursue an endorsement in at least one additional area. Endorsements in the following areas are available for elementary education majors:

- K-8 English/language arts,
- K-12 English as a Second Language (ESL)
- K-8 Health
- K-8 Mathematics
- K-8 Science
- K-8 Social studies
- K-8 Special education (Instructional Strategist I: Mild/Moderate Disabilities K-8).

Additional information about these endorsements can be found at: https://www.education.iastate.edu/find-majors/elementary-education/

Elementary Education Candidates can pursue additional endorsements in any of the above listed areas and in the following areas:

- K-8 Reading
- K-12 Coaching

Information about these additional endorsements can be found at: https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jf/

Contact an Elementary Education academic advisor for the requirements for these endorsements.

K-12 Education and Secondary Education

Candidates can choose to pursue additional endorsements. These can include any of the above listed endorsement and the following:

- K-12 Coaching
- K-12 English as a Second Language

- K-12 Agriculture/Agribusiness
- K-12 Multi-Occupations
- K-12 Reading (contact the English Education academic advisor for a list of required courses)
- Science
  - 5-12 Physical Science
  - 5-12 Basic Science
- Social Sciences
  - 5-12 American Government
  - 5-12 Anthropology
  - 5-12 Economics
  - 5-12 Psychology
  - 5-12 Sociology
- 5-12 Speech Communications and Theater
- World Languages and Cultures
  - 5-12 Chinese
  - 5-12 Russian

Information about endorsements can be found at: https://education.iastate.edu/future-students/find-your-major/endorsements/

Minors

Students in the Educator Preparation Program may also choose to pursue a minor in Learning Technologies additional information can be found at: https://www.education.iastate.edu/find-majors/learning-technologies-minor/

Post-Bachelor’s Educator Preparation Programs

Students holding an appropriate bachelor’s degree may complete the K-12 or secondary educator preparation program in order to be recommended for teacher licensure.

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Teacher Education Program. To access the policy, please follow this link: https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1njkbr4e9/
- Decision Point 1 - Early Admission to the Teacher Education Program for Transfer Students. To access the policy, please follow this link:
In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer. Decision Point 3 - Recommendation for Licensure. To access the policy, please follow this link: https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwr9cc92jzb

Candidates would be required to complete the Professional Core requirements of the program. In general, the sequence includes:

Total Credits 18

Coursework in content-specific pedagogy and field experience coursework also need to be successfully completed. Please check department information regarding to specific requirements for each program.

Graduate level programs leading to recommendation for additional teaching endorsements are offered through the School of Education. Graduate students who seek a teaching endorsement in reading or special education, but do not wish to pursue a master’s degree can incorporate the coursework in a professional certificate program. Endorsement programs include Instructional Strategist II: Behavior Disorders/Learning Disabilities, Reading K-8 and Reading 5-12.

Graduate programs are also available for those who wish to pursue educational leadership as a profession as PK-12 school principals or PK-12 superintendents. (See Educational Leadership and Policy Studies in Courses and Programs section of this catalog.)

**Master’s Programs with Teacher Preparation**

**AGRICULTURAL EDUCATION**

The Agricultural Education and Studies Department offers a Master’s of Science program that prepares Agricultural Education teachers for grades 5-12.
See coordinator for program requirements.

**Secondary MATHEMATICS**
The School of Education offers a Master’s of Education program that prepares Mathematics teachers for grades 5-12.

**Physical Education**
The Department of Kinesiology offers a Master’s of Arts in Teaching program that prepares Physical Education teachers for grades K-12.

**Secondary Education**
The School of Education offers a Master’s of Arts in Teaching program that prepares secondary teachers for grades 5-12. Currently, this program is available for English Education candidates and History/Social Sciences Education candidates.

See coordinator for program requirements.

**Secondary Sciences**
The School of Education offers a Master’s of Arts in Teaching program that prepares Secondary Science teachers for grades 5-12.

See coordinator for program requirements.

**IOWA STATE UNIVERSITY TEACHER EDUCATION STANDARDS (INTASC STANDARDS)**

**The Learner and Learning**
Standard #1: Learner Development. The teacher understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.

Standard #2: Learning Differences. The teacher uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.

Standard #3: Learning Environments. The teacher works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

**Content**
Standard #4: Content Knowledge. The teacher understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.

Standard #5: Application of Content. The teacher understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.

**Instructional Practices**
Standard #6: Assessment. The teacher understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher’s and learner’s decision making.

Standard #7: Planning for Instruction. The teacher plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.

Standard #8: Instructional Strategies. The teacher understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.

Standard #8A: Technology. The teacher integrates current and emerging technology in instruction to encourage student creativity, problem solving, collaboration, and digital literacy. Teachers practice and advocate safe, legal, and responsible use of information and technology (this standard is unique to the Iowa State University Teacher Preparation Program).

**Professional Responsibility**
Standard #9: Professional Learning and Ethical Practice. The teacher engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.

Standard #10: Leadership and Collaboration. The teacher seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

**EDUCATOR PREPARATION PROGRAM ADMISSION REQUIREMENTS**
Educator Preparation Program Candidates must have:

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Teacher Education Program. To access the policy, please follow this link: https://iastate.box.com/s/vnp2dt4sihtu99iym531y1lnjkrb4e9 (https://iastate.box.com/s/vnp2dt4sihtu99iym531y1lnjkrb4e9/)
Decision Point 1 - Early Admission to the Teacher Education Program for Transfer Students. To access the policy please follow this link: https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwwrk9cc92jzb

More information about admission requirements can be found at: https://www.education.iastate.edu/educator-prep-program/admission/

THE PROFESSIONAL CORE REQUIREMENT FOR EDUCATOR PREPARATION

Undergraduate Students
Educator Preparation Program candidates must complete certain studies related directly to the profession of teaching. All undergraduate candidates in the educator preparation program must take the following courses prior to student teaching, unless the student’s program area has an approved content-area course deemed to be equivalent. Candidates must receive a minimum of a "C" in all education (EDUC) / Curriculum Instruction (CI), Human Development and Family Studies (HD FS), Special Education (SP ED) courses and all content-specific pedagogy/methods courses required for licensure. (See program coordinator for more information).

In addition, candidates must complete all degree program discipline-specific pedagogy coursework, field experience coursework, and content-specific coursework. These requirements can be found in the home department of the major.

**CLINICAL EXPERIENCES**

The Standards for Practitioner and Administrator Preparation Programs 281—79.14(256) Teacher preparation clinical practice standard states, "The unit and its school partners shall provide field experiences and student teaching opportunities that assist candidates in becoming successful teachers in accordance with the following provisions."

This includes:

- **79.14(5)** Teacher candidates admitted to a teacher preparation program must complete a minimum of 80 hours of pre-student teaching field experiences, with at least 10 hours occurring prior to acceptance into the program.
- **79.14(7)** The unit is responsible for ensuring that the student teaching experience for initial licensure:
  
  a. Includes a full-time experience for a minimum of 14 consecutive weeks in duration during the teacher candidate’s final year of the teacher preparation program. (Iowa State University policy requires a full semester experience.)

For most programs, there are four levels for clinical experiences used to meet these requirements. Level 1 involves observation in local schools and is typically completed prior to admission to the educator preparation program. This typically occurs prior to admission to the Educator Preparation Program. Level 2 involves actively teaching in the classroom with one- to two-lesson lessons, at minimum. Level 3 involves actively teaching in the classroom with two lessons, at minimum and being observed by a supervisor during teaching. Level 4 is student teaching and involves actively teaching for a semester-long experience where the student teacher bears primary responsibility for planning and instruction within the classroom for a minimum of four weeks during the semester. Level 2, 3 and 4 field experiences involve a course fee, which ranges from $75.00 to $450.00 and are assessed to cover the costs of supervision and placement with a cooperating teacher. Course fees are increased when students teach nationally or internationally. For current course fees, consult the Schedule of Classes. For level 2, 3 and 4 field experiences, the student needs access to transportation because the placement may be within 60 miles of the university. The time commitment for clinical experiences ranges from 1/2 day for level 2 and 3 to the full day for level 4. Students complete a background check before initial placement in schools and other appropriate locations.

Specific field experience course requirements can be found in program/degree requirements.

**PROGRAM CURRICULUM**

**Undergraduate Students**

**Early Childhood Education – Unified**

The curriculum in Early Childhood Education – Unified prepares graduates to teach young children and work with their families. This program leads to careers working with young children (both those who are typically developing and those with special needs) from birth through third grade, inclusive. Program completers can be recommended for licensure to the Iowa Board of Educational Examiners. Individuals who are licensed may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through 3rd grade) or in home-based programs. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and the School of Education. For more information about the program, see Early Childhood Education – Unified Curriculum [http://www.education.iastate.edu/undergraduate-studies/early-childhood-education](http://www.education.iastate.edu/undergraduate-studies/early-childhood-education/) (https://hdfs.hs.iastate.edu/find-your-major/early-childhood-education/).

In addition to being admitted Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- **Decision Point 1 - Admission to the Teacher Education Program.** To access the policy, please follow this link: [https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1lncrb4e9](https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1lncrb4e9/)

- **Decision Point 1 - Early Admission to the Teacher Education Program for Transfer Students.** To access the policy, please follow this link: [https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwr9cc92jzb](https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwr9cc92jzb/)

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer. Decision Point 3 - Recommendation for Licensure. To access the policy, please follow this link: [https://iastate.box.com/s/sid016zuyu0r7w7aw426d6bosai6zo3](https://iastate.box.com/s/sid016zuyu0r7w7aw426d6bosai6zo3/)

All early childhood education – unified candidates must meet general education requirements in order to complete the Educator Preparation Program.
**Elementary Education**

In addition to pursuing a degree in Elementary Education, candidates are required to pursue an endorsement in at least one additional area. Candidates will be prepared to teach students in grades kindergarten through eighth grade in this area of specialization. In addition to pursuing a degree in Elementary Education, candidates are required to pursue an endorsement in at least one additional area. Candidates will be prepared to teach students in grades kindergarten through eighth grade in this area. Endorsements in the following areas are available for elementary education majors:

- K-8 English/language arts
- K-12 English as a Second Language (ESL)
- K-8 Health
- K-8 Mathematics
- K-8 Science
- K-8 Social studies
- K-8 Special education (Instructional Strategist I: Mild/Moderate Disabilities K-8)

Additional information about these endorsements can be found at: https://www.education.iastate.edu/find-majors/elementary-education/

Candidates can pursue additional endorsements in any of the above listed areas and in the following areas:

- K-8 Reading
- K-12 Coaching

Information about these additional endorsements can be found: https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2qf

Contact an Elementary Education academic advisor for additional information.

Elementary education majors must satisfy a world languages requirement for graduation. Students must complete two years of a foreign language in high school or one year of a foreign language in college.

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Teacher Education Program. To access the policy, please follow this link: https://iastate.box.com/s/vnp2dt4shti99ilym531y1lnjkrb4e9

- Decision Point 1 - Early Admission to the Teacher Education Program for Transfer Students. To access the policy, please follow this link: https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwrk9cc92jzb

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer. Decision Point 3 - Recommendation for Licensure. To access the policy, please follow this link: https://iastate.box.com/s/s6l016zuyu07v7alw426d6bosai6zo3

**K-12 and Secondary Education**

Students wanting to pursue K-12 or Secondary Teacher Education declare a major in the content area in which they want to focus.

They then pursue one of two options depending upon their program: 1) complete the secondary major in Education or 2) complete additional coursework required to complete the Educator Preparation Program.

K-12/Secondary Educator Preparation Programs eligible to pursue the secondary major in Education are:

- English Education
- History/Social Sciences Education
- Mathematics Education
- Science Education – Biology
- Science Education – Chemistry
- Science Education – Earth Science
- Science Education – Physics
- World Languages and Cultures Education – French
- World Languages and Cultures Education – German
- World Languages and Cultures Education – Spanish

Iowa State offers the following undergraduate K-12/secondary Educator Preparation Programs not associated with this secondary major:

- K-12 Music Education
- K-12 Physical Education Teacher Education
- Agriculture Education
- Family and Consumer Sciences Education

In addition to being admitted Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.
Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Teacher Education Program. To access the policy, please follow this link: https://iastate.box.com/s/vnp2dt4sihtu99iym531y1lnjkrb4e9
- Decision Point 1 - Early Admission to the Teacher Education Program for Transfer Students. To access the policy, please follow this link: https://iastate.box.com/s/o45gppndbjxa3j9fm9pwvwrk9cc92jzb
- Decision Point 3 - Recommendation for Licensure. To access the policy, please follow this link: https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3

**In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer.**

*Post-Bachelor's Students*

Students holding an appropriate bachelor's degree who wish to complete a teacher preparation program in order to pursue teacher licensure must have at least one course in each of the following five general education groups identified for undergraduate students in the preceding section: Natural Sciences, Mathematics or Statistics, Social Sciences, Humanities, and Communication Skills. Individual departments preparing teachers may require additional credits in general education. (See program coordinator for more information.)

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Teacher Education Program. To access the policy, please follow this link: https://iastate.box.com/s/vnp2dt4sihtu99iym531y1lnjkrb4e9
- Decision Point 3 - Recommendation for Licensure. To access the policy, please follow this link: https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3

*Graduate Students*

Each Master's program will determine what, if any, general education requirements Master's students must fulfill beyond a bachelor's degree from a regionally accredited institution. (See program coordinator for more information.)

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Teacher Education Program. To access the policy, please follow this link: https://iastate.box.com/s/vnp2dt4sihtu99iym531y1lnjkrb4e9
- Decision Point 3 - Recommendation for Licensure. To access the policy, please follow this link: https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3

*REGENTS ALTERNATIVE PATHWAY TO IOWA LICENSURE*

The Regents Alternative Pathway to Iowa Licensure is a collaborative program involving the three Iowa Regents' universities. The program is designed for adult learners holding a baccalaureate degree with work experience who are seeking 5-12 licensure in a high needs area. For more information: [https://iowateacherintern.org](https://iowateacherintern.org)

*Youth Development*

**Interinstitutional Graduate Program**

Iowa State University offers a Master's degree in Family and Consumer Sciences with a specialization in Youth Development. This is an interinstitutional online program offered through the Great Plains Interactive Distance Education Alliance (or GPIDEA). The student selects...
Youth Development

a home institution (Iowa State), which ultimately grants the degree. After admission to Iowa State, the student takes courses from Iowa State and the other participating institutions: Michigan State University, North Dakota State University, Texas Tech University, University of Missouri, and University of Nebraska-Lincoln.

The Master of Family and Consumer Sciences with Youth Development specialization is an online degree available focusing on developing knowledge and skills to serve today's youth. Students become immersed in a strengths-based curriculum and learn a methodology that supports youth, enabling them to grow socially, emotionally, and cognitively. The program has its roots in positive youth development. Rather than focusing solely on corrective measures, a positive youth development approach equips individuals in the second decade of life with the skillset necessary for a successful transition into adulthood.

The masters degree consists of 36 credits, 27 required credits, 6 elective credits, and 3 or more credits of creative component and/or internship (https://online.hs.iastate.edu/graduate-degrees/youth-development/). This program does not require a thesis.

Youth Development Certificates

The Youth Development certificates (https://online.hs.iastate.edu/graduate-degrees/youth-development/) are offered completely online through the Great Plains Interactive Distance Education Alliance (or GPIDEA). The student selects a home institution (Iowa State), which ultimately grants the certificate. After admission to Iowa State, the student takes courses from Iowa State and the other participating institutions: Michigan State University, North Dakota State University, Texas Tech University, University of Missouri, and University of Nebraska-Lincoln. Both are stand-alone graduate certificates available to any student with a bachelor's degree.

• 12-credit Youth Development Specialist Graduate Certificate
• 12-credit Youth Program Management and Evaluation Graduate Certificate
COLLEGE OF LIBERAL ARTS AND SCIENCES

Beate Schmittmann, Dean
Monic Behnken, Associate Dean
Arne Hallam, Associate Dean
Leslie Hogben, Associate Dean
Kent Kerby, Assistant Dean
Jo Anne Powell-Coffman, Associate Dean
Amy Slagell, Associate Dean
Zora D. Zimmerman, Associate Dean Emerita

www.las.iastate.edu/ (http://www.las.iastate.edu/)

The College of Liberal Arts and Sciences (LAS) is a world-class learning and research community. Iowa State’s most academically diverse college, LAS educates students to become global citizens, providing rigorous academic programs in the sciences, humanities and social sciences within a supportive, student-centered learning environment that emphasizes career readiness. The college also is home to the Open Option Program that prepares students for any curriculum at the University.

Learning Goals

The primary mission of the college is to promote learning in all its dimensions by providing students with ample opportunities to acquire the requisite knowledge, abilities, and skills to succeed in the world beyond the university. Through coursework within the major and in general education, students will develop skills in reasoning, analysis, and communication; achieve an understanding of the intellectual, historical, and artistic foundations of culture; and work to strengthen their abilities to interact with people, cultures, and the environment in an ethical and sensitive manner. To achieve these learning goals, the college asks students to acquire depth in learning within disciplines of their own choosing, and to acquire breadth through general education courses and electives. The breadth and depth requirements of our liberal arts and sciences degree programs prepare students for a lifetime of evolving career opportunities.

The College of Liberal Arts and Sciences offers over forty majors. Students can earn Bachelor of Arts, Bachelor of Science, Bachelor of Music, or Bachelor of Liberal Studies degrees. In collaboration with the College of Engineering, the College of Liberal Arts and Sciences also participates in a program of study leading to the Bachelor of Science in Software Engineering.

Preparation for Entering the College of Liberal Arts and Sciences

Students entering the college are expected to have high school preparation with at least 4 years of English, 3 years each of Social Studies, Mathematics and Science. Students are also encouraged to have coursework in computer applications. The study of a world language is highly encouraged; three or more years of a single world language in high school meets the world language graduation requirement in the College of Liberal Arts and Sciences.

Students often enter the College of Liberal Arts and Sciences as transfer students. Prospective transfer students are urged to contact the College of Liberal Arts and Sciences well before arriving on campus so that pre-transfer courses are appropriate to the planned major and transferable toward graduation from ISU. Early planning can improve the transfer process and support a timely graduation. Details regarding the criteria for graduation with distinction and other academic honors are available under Scholastic Recognition.

For information on articulation/transfer agreements that apply to students who have earned Associate of Arts degrees from an Iowa public community college or who have satisfied general education requirements at the University of Northern Iowa or in the College of Liberal Arts at the University of Iowa, see Articulation/Transfer Agreements in the Admission Transfer Information section of the catalog.

Transfer students in the College of Liberal Arts and Sciences may choose to graduate under the catalog in effect at the time of their graduation or under one of the five immediately preceding catalogs, provided that it covers the period of their enrollment either at Iowa State or any other accredited school. Full requirements of the chosen catalog must be met though adjustments will be made in instances where courses are no longer available or where programs have been changed. Transfer students are responsible for reviewing their transfer credit evaluation with the academic advisor during the first semester of enrollment.

Academic Advising

Each student in the College of Liberal Arts and Sciences is assigned an academic advisor in their area of study. This advisor assists the student in developing a program of study designed to meet the degree requirements while also meeting a student’s goals outside of and beyond the classroom by incorporating activities such as study abroad, internships, Honors Program and undergraduate research. Advisors are a first point of contact for referral to university and college resources and services and play a crucial role in student success.

Academic advising begins during orientation programming prior to entry and continues through a student’s graduation. Through the process of advising, students will develop academic plans that reflect their unique interests and goals as well as learn about the university resources
available to assist them academically, professionally, and personally. Advisors help students understand how their interests, skills and goals connect to fields of study and careers, including how a liberal arts education enhances their academic development.

Departments and Program of the College

Majors, minors and certificates in the College of Liberal Arts and Sciences are administered by the following departments and programs.

Departments

• Air Force Aerospace Studies
• Biochemistry, Biophysics, and Molecular Biology
• Chemistry
• Computer Science
• Ecology, Evolution, and Organismal Biology
• Economics
• English
• Genetics, Development, and Cellular Biology
• Geological and Atmospheric Sciences
• Greenlee School of Journalism and Communication
• History
• Mathematics
• Military Science (Army Reserve Officers’ Training Corps)
• Music and Theatre
• Naval Science
• Philosophy and Religious Studies
• Physics and Astronomy
• Political Science
• Psychology
• Sociology and Criminal Justice
• Statistics
• World Languages and Cultures

Cross-Disciplinary and Interdisciplinary Programs

The College of Liberal Arts and Sciences has a variety of interdisciplinary and cross-disciplinary programs that draw on faculty expertise across multiple departments. Students may enroll in courses offered by these programs, declare majors, certificates or minors where offered, or propose an Interdisciplinary Studies major.

• African and African American Studies Program
• American Indian Studies Program
• Bachelor of Liberal Studies Program
• Biological/Premedical Illustration Program
• Communication Studies
• Data Science
• Environmental Science and Environmental Studies
• Interdisciplinary Studies Program
• International Studies Program
• Leadership Studies
• Premedical and Preprofessional Health Programs
• Sustainability Program
• U.S. Latino/a Studies Program
• Women’s and Gender Studies Program

MAJORS

Students complete their degrees in the college of Liberal Arts and Sciences by meeting all university and college degree requirements as well as the specific requirements of one of the majors or programs of study below.

• Advertising, B.A.
• Anthropology, B.A., B.S.
• Biochemistry, B.S.
• Bioinformatics and Computational Biology B.S.
• Biological/Pre-Medical Illustration, B.A.
• Biology, B.S.
• Biophysics, B.S.
• Chemistry, B.A., B.S.
• Communication Studies, B.A.
• Computer Science, B.A.
• Criminal Justice, B.A.
• Data Science, B.S.
• Earth Science, B.A., B.S.
• Economics, B.S.
• English, B.A., B.S.
• Environmental Science, B.S.
• Environmental Studies (secondary major only)
• French (see World Languages and Cultures, below)
• Genetics, B.S.
• Geology, B.S.
• German (see World Languages and Cultures, below)
• History, B.A., B.S.
• Interdisciplinary Studies, B.A., B.S.
• International Studies (secondary major only)
• Journalism and Mass Communication, B.S.
• Liberal Studies, B.L.S. (a general studies degree)
• Linguistics, B.A.
• Mathematics, B.S.
• Meteorology, B.S.
• Music, B.A., B.Mus.
• Performing Arts, B.A.
• Philosophy, B.A.
• Physics, B.S.
• Political Science, B.A.
• Psychology, B.A., B.S.
• Public Relations, B.S.
• Religious Studies, B.A.
• Sociology, B.A., B.S.
• Software Engineering, B.S.
• Spanish (See World Languages and Cultures, below)
• Speech Communication, B.A.
• Statistics, B.S.
• Technical Communication, B.S.
• Women’s and Gender Studies, B.A., B.S.
• World Languages and Cultures B.A.:
  • French
  • German
  • Spanish

A secondary major must be taken in conjunction with a primary major.

**MINORS**

To add a minor to their program of study, students must work with their advisor to declare the minor and complete the requirements set by the program. In addition to University policies governing minors, LAS minors require at least 6 credits in courses numbered 300 and above, taken at ISU with a grade of C or higher. Completed minors will be recorded on the transcript.

• Advertising
• African and African American Studies
• American Indian Studies
• Anthropology
• Astronomy
• Biochemistry
• Bioinformatics and Computational Biology
• Biological/Pre-Medical Illustration
• Biology
• Chemistry
• Chinese Studies
• Classical Studies
• Communication Studies
• Computer Science
• Criminal Justice
• Data Science
• Economics
• English
• Entrepreneurship*
• Environmental Studies
• Ethics
• French
• Genetics
• Geology
• German
• Gerontology*
• History
• International Studies
• Journalism and Mass Communication
• Leadership Studies
• Linguistics
• Mathematics
• Meteorology
• Middle Eastern Studies
• Military Studies (Army Reserve Officers’ Training Corps)*
• Music
• Music Technology
• Performing Arts
• Philosophy
• Physics
• Political Science
• Psychology
• Public Relations
• Religious Studies
• Russian Studies
• Sociology
• Spanish
• Speech Communication
• Statistics
• Sustainability*
• Teaching English as a Second Language
• Technical Communication
• U.S. Latino/a Studies
• Women’s and Gender Studies
• World Film Studies

*The College of Liberal Arts and Sciences participates in these interdepartmental minors.
Certificate Programs
To add a Certificate to their program of study, students must work with their advisor to declare the certificate and complete the requirements set by the program. University policies governing Certificate Programs are found in the Degree Planning section of the catalog.

- Actuarial Science Certificate
- Computing Applications Certificate
- Data Science Certificate
- Latin American Studies Certificate
- Leadership Studies Certificate
- Science Communication Certificate

LAS College Requirements
To obtain a bachelor’s degree in any program offered by the College of Liberal Arts and Sciences, an undergraduate student must meet all university graduation requirements including:

- minimum of 120 credits
- minimum of 32 semester credits earned in residence at Iowa State University
- last 32 credits in residence
- GPA of 2.0 or better on courses taken at Iowa State University
- Information Literacy Requirement (credit for LIB 160 Introduction to College Level Research)
- Communication Proficiency Requirement (credit for ENGL 150, ENGL 250*, and upper-level coursework)
- U.S. diversity and international perspectives requirements

*The College of Liberal Arts and Sciences aligns with the University Communication Proficiency Grade Requirement. At a minimum, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250; some majors set higher requirements for communication proficiency. For other university policies governing ISU degree programs, see Academics.

Students with majors leading to Bachelor of Science or Bachelor of Arts degrees, must also meet all college and program specific requirements including:

- General Education
- World Language
- Advanced Credits
- Completion of the Major

General Education
Requirements in a major are designed to develop depth, or mastery of a specific field or discipline, while courses in general education are designed to establish breadth, or a strong, intellectual foundation to support learning for all majors.

General Education Requirements and Learning Goals
The general education areas with their minimum credit requirements for the College of Liberal Arts and Sciences are:

- Arts and Humanities—(Minimum 12 credits). The student should develop an understanding of human cultural heritage and history, and an appreciation of reasoning and the aesthetic value of human creativity.
- Mathematical Disciplines and Natural Sciences —(Minimum 11 credits, including 3 in the mathematical disciplines and 8 in the natural sciences). The student should appreciate mathematics as a valuable tool of the sciences and as an intrinsically important way of thinking, and should experience science as a rational search for understanding the structure and behavior of the natural world.
- Social Sciences—(Minimum 9 credits). The student should develop an appreciation of the principal methods of studying human behavior and an understanding of the structure and functioning of institutions.

Lists of courses approved for the three general education areas are available on the LAS College website (http://www.las.iastate.edu/students/academics/general-education/). Students may not apply the same course in more than one general education area.

Because students fulfill, in part, the learning goals of the area of their first major by taking courses in their programs of study, the minimum number of general education credits required in the area of the first major is reduced from that listed above by 3 credits. Students in Liberal Studies or Interdisciplinary Studies majors must complete the minimum requirements in all three areas.

Consistent with its breadth goal, courses with the designator of a student’s first major may not be applied to general education requirements. Courses cross-listed with a course in the student's first major may be used to satisfy either major requirements or general education requirements, but may not be used more than once. Courses taken to meet the requirements of a second major, third major or certificate may be counted in the general education groups.

Seminars and experimental courses may be acceptable as general education; advisors should consult with the LAS college office. Orientation courses, independent study courses (usually numbered 290 or 490), cooperative courses, courses numbered 500 and above, and courses taken on a satisfactory-fail (S-F) or pass-not pass (P-NP) basis cannot be applied to a general education group.

World Language Requirement
The faculty of the College of Liberal Arts and Sciences believes that undergraduate students should acquire elementary practical experience
in a second language, should be introduced to the theoretical study of language structure, and should begin to develop an understanding of a second culture through study of that culture's language. Students meet this expectation by satisfying a graduation requirement equivalent to the first year of university-level study in one world language.

Students may meet this requirement through several pathways:

- completing three or more years of high-school world language study in a single language
- passing the exam for credit at the 102 level
- receiving a passing grade in an ISU 102 world language or American Sign Language (ASL) course, an approved ISU intensive or accelerated world language course, or equivalent transfer course
- receiving a passing grade in a world language course taught in a language other than English at the 200-level or higher
- being a native speaker of a language other than English
- completing a major in any world language

Questions about the World Language Requirement and how to meet it should be directed to the College Academic Services office in 102 Catt Hall. Credits applied toward the World Language Requirement cannot be used to satisfy the general education requirements, but students who have fulfilled the World Language Requirement may apply approved courses in world languages toward the appropriate general education areas.

**Advanced Credit Requirements**

To obtain a bachelor's degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, a student must earn at least 45 credits at the 300 level or above taken at a four-year college. All such credits, including courses taken on a pass/not pass basis, may be used to meet this requirement.

**The Major**

Students must show they have achieved depth in a specialized area by completing successfully the requirements and learning goals of a major. A major comprises 24 to 50 credits in a program of study as determined by the faculty. Tracks within a major must have a common core that supports learning outcomes of the major. Some courses outside the major discipline may also be required as supporting work for the major. (See Majors, Minors and Certificates to find individual department and program requirements.)

The average grade of all courses in the major (those courses listed under major on the degree audit) must be 2.0 or higher. The major must contain at least 8 credits in courses taken at Iowa State University that are numbered 300 or above and in which the student's grade is C or higher.

Some majors have specific GPA requirements for key courses or groups of courses.

Courses with the designator of the first major listed on the degree program may not be counted in the general education groups.

The major in Interdisciplinary Studies (B.A., B.S.) is available for undergraduate students who have unique interdisciplinary educational goals. Such a major is designed by the faculty and the student and is approved only when the educational goals cannot be met by a reasonable combination of existing majors, minors, and electives.

**Double Majors**

Students may elect a second major from the departments and program areas in the College of Liberal Arts and Sciences, or from a different major field offered for the bachelor's degree in another college of the university.

When choosing an additional major, students must confirm that the additional major is allowable; currently the following Double majors are not allowed:

- Chemistry with Biochemistry;
- Biology with Animal Ecology, Biochemistry, Genetics, and Microbiology;
- Economics with Business Economics
- Any combination of Journalism and Mass Communication, Advertising, and Public Relations.

A student in the Bachelor of Liberal Studies or Bachelor of Music curricula may not add a major from the Liberal Arts and Sciences curriculum, though they may work toward a second degree in the Liberal Arts and Sciences curriculum.

Students interested in pursuing a double major should talk to their advisor about the process. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department of the primary major. If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In all cases, the student must satisfy the requirements of each major and the general education and other degree requirements for the primary major. Students with a primary major in another college who wish to take a second major in the College of Liberal Arts and Sciences must meet all requirements of the second major, but are exempt from the LAS College General Education, World Language and Advanced Credits requirements.

University policies for students wishing to double major or earn two Bachelor’s Degrees are found in the Degree Planning section of the catalog.

**Minors and Certificates**

In addition to earning a major a student may want to complete a minor or certificate to indicate a special concentration of study. University policies related to minors and certificates and lists of all minors and certificates are available in the catalog. See the Degrees, Majors, Minors...
and Certificates tab in the LAS section of the catalog for all minors and certificates offered by the college. Completed minors and certificates will be recorded on the transcript.

**Bachelor of Music Curriculum**
In addition to the major in music leading to a Bachelor of Arts degree, the LAS College offers a Bachelor of Music degree (B.Mus.). In order to pursue teacher certification and recommendation for licensure in music, students must earn the Bachelor of Music degree. Bachelor of Music students select one of the following options: music education [vocal or instrumental], performance [voice, piano, organ, string instruments, wind or percussion instrument], or composition. For details about both degrees, see Music, Degree Requirements.

**Bachelor of Liberal Studies Curriculum**
The LAS College also administers the Bachelor of Liberal Studies (B.L.S.) degree, a bachelor's degree program established by Iowa Board of Regents and offered by all three Regents institutions. The B.L.S. is a general studies degree. There is no traditional major; instead, students take coursework in three areas of distribution. With the assistance of a B.L.S. advisor, students can structure a program that meets their individual educational, vocational or personal goals. Students in the B.L.S. program are not eligible to add majors to their degree program, but they may earn a Certificate or minor by completing all of the requirements of those programs. Criteria for graduating with distinction and other academic honors with a B.L.S. degree are available under Scholastic Recognition.

For specific degree requirements, see Liberal Studies.

**Software Engineering Curriculum**
A Bachelor of Science degree in software engineering is jointly administered by the College of Liberal Arts and Sciences and the College of Engineering. The program is aimed at creating high-quality software in a systematic, controlled, and efficient manner. The specific objective of the program is to educate students on principles, processes, techniques, and tools for producing, analyzing, specifying, designing and evolving software. A broader objective is to cultivate among students intellectual curiosity, problem-solving skills, good learning habits, effective communication skills, leadership, and teamwork.

This cross-college program enables students to take a range of Software Engineering courses, as well as elective courses from both Computer Science and Computer Engineering as part of their degree program.

For specific degree requirements, see Software Engineering.

**Additional Curricular Policies**
In addition to the policies outlined in the above discussion of the curricula of the LAS College:

- Elective courses as well as general education courses may be used to meet the requirements of a minor, certificate or additional major, provided that they are taken on a graded basis.
- Courses taken on a pass/not pass basis may be counted toward the required total of 120 credits and may be used to meet the advanced credit requirement, if appropriate, but may not be used to satisfy any other graduation requirement.
- No more than 9 credits of 490 (Independent Study) courses may be counted toward graduation.
- Criteria for graduating with distinction and other academic honors are available under Scholastic Recognition.
- Students whose high school study of world languages meets the College World Language Requirement may not enroll in or receive credit for 101 or 102 in that language.
- Students are responsible for talking to their academic advisors, using the degree audit, and reviewing other University policies. See the Academics section of the catalog.

**Open Option**
Students who enter Iowa State University and want time to explore the best match between their academic interests, abilities, and career goals may do so as Open Option students. The Open Option experience is designed to help students explore majors and careers, become acquainted with the entire university, and make successful adjustments to the academic expectations of Iowa State.

Open Option students are assigned academic advisors who specialize in working with students who have not declared a major. First-year Open Option students take LAS 101 and participate in the HOME learning community. This orientation experience introduces students to campus resources as well as to all of the colleges and majors on campus.

Aided by their advisor, Open Option students select courses that allow them to explore their academic interests before committing to a specific university major. Open Option students typically declare a major during their second or third semester. In addition, students who may have started in a specific field and have discovered it is not meeting their needs may transfer into Open Option for a semester or two while they decide on a new major.

For more information, visit the Open Option webpage (https://openoption.iastate.edu/).

**Opportunities for Students**
The College of Liberal Arts and Sciences provides many opportunities for students to enhance their knowledge, skills and credentials beyond traditional academic work in their majors, minors or certificate programs.
**Honors Program**

Students enrolled in the College of Liberal Arts and Sciences are encouraged to participate in the University Honors Program.

Liberal Arts and Sciences Honors is designed to add depth, breadth and challenge to enrich students' programs of study and intellectual development. Students in Liberal Arts and Sciences Honors benefit from the resources and capabilities of a large and dynamic research university along with the intellectual community that characterizes smaller, selective liberal arts colleges. Membership in LAS Honors offers specific benefits to students such as collaborations with individual faculty members on Honors projects, extended library loan privileges, 24-hour use of the Jischke Honors Building and priority registration for classes.

LAS Honors encourages freshmen as well as more advanced students to apply. Upon graduation, students who fulfill all of the requirements of the Honors Program are recognized by a special notation on their diploma and permanent record. Honors students wear white Honors cords at graduation.

**Learning Communities**

Students in the LAS College can participate in a variety of learning community options that support student success by supporting the transition to college life. There are various kinds of learning communities both within and across majors. Most learning communities involve small groups of students who take one or more classes in common and have a staff person or peer mentor who supports students as they make connections and get engaged at ISU.

See [http://www.lc.iastate.edu/](http://www.lc.iastate.edu/) for more information.

**Teacher Preparation**

Teaching licenses are issued by the Iowa Board of Educational Examiners. The Recommending Officer for the ISU University Teacher Education Program submits each candidate file after that candidate is determined to be eligible for recommendation. Recommendations for teaching licensure are issued for a specific teaching level, e.g., grades 5-12. Subject area endorsements are listed on the candidate’s license. The College of Liberal Arts and Sciences collaborates with the School of Education to prepare students for recommendations for licensure in approved programs. Students who plan to teach in secondary schools (grades 5-12) may work toward completing an approved teacher preparation program in one of the following majors:

- Biology
- Chemistry
- Earth Science
- English
- History
- Mathematics
- Music (through the Bachelor of Music curriculum)*
- Physics
- World Languages and Cultures (Endorsements are available in French, German, and Spanish.)

Students may also prepare for recommendation for additional endorsements to their primary license in:

- English as a Second Language
- General Science
- Physical Science
- Social Studies
- Speech Communication
- World Languages and Cultures (Chinese, Latin, and Russian)

*Students in the College of Liberal Arts and Sciences who complete the approved teacher preparation program in music education (B.Mus. degree with Vocal K-12 option or Instrumental K-12 option) and meet all other requirements may be recommended for a teaching license that allows them to teach music in grades K-12.

For further information, see Educator Preparation.

**Preprofessional Programs**

Any major in the College of Liberal Arts and Sciences provides excellent preparation for entry to professional schools. Students may enter the college with a designation of Pre-Med, Pre-Law or Preprofessional Health. Most students will earn a bachelor’s degree in the major of their choosing while also completing the courses required for admission to professional schools. Some students will spend one to three years as students in the college before transferring to a professional school where they have been accepted to complete their studies.

Preprofessional students are encouraged to pursue a major that interests them and where they excel. Specialized advisors work with students to develop a program of study within their major that meets admission requirements to professional school and develops a student’s credentials for the competitive application process to professional schools. For further information, see Opportunities for Preprofessional Study.

The College of Liberal Arts and Sciences participates in a 3+3 program with the Law Schools at Drake University and at the University of Iowa which allows qualified students to complete three years at Iowa State and transfer coursework from the first year of law school to complete their bachelor’s degree requirements. Visit the Liberal Arts and Sciences Student Services office for details.
Reserve Officers' Training Corps Programs (ROTC)
The College of Liberal Arts and Sciences also offers students the opportunity to combine their academic programs with ROTC programs in Military Science (Army), Naval Science (Navy, Marine Corps), and Air Force Aerospace Studies (Air Force). See Officer Education Programs for more information.

Study Abroad and National Student Exchange
The LAS College offers many study abroad and domestic exchange program options to enhance the undergraduate experience. Every year hundreds of students expand their horizons through these programs while they stay on track for graduation.

LAS Study Abroad provides international study, work, and service opportunities for all Iowa State students. LAS supports faculty and staff to facilitate learning opportunities abroad, and partners with organizations to offer a breadth of program options.

International learning opportunities for LAS students come in varied formats, from semester-long experiences focused on language immersion to three-week long global seminars that focus on interdisciplinary subjects. Faculty-led programs are among the most sought-after by our undergraduates, as they pair faculty expertise and ISU credit with the opportunity to explore other lands and cultures. Other program types available to students are exchanges, direct-enroll and affiliate programs.

LAS students can also work with the ISU National Student Exchange program to explore options to study out-of-state at one of more than 200 universities within the United States, US Territories, and Canada.

Visit the LAS Study Abroad (https://abroad.las.iastate.edu/) office in Catt Hall or the National Student Exchange website (https://www.nse.dso.iastate.edu/) for more information.

Undergraduate Research
The LAS College has hundreds of faculty actively engaged in research and most majors have designated independent study and/or research courses. Students are encouraged to talk to faculty about how they can be involved in the process of discovery.

LAS Innovation and Entrepreneurship Academy
The College of Liberal Arts and Sciences I+E Academy (https://las.iastate.edu/students/lasinnovates/) offers a two-year program open to all LAS majors, where students engage in online, face-to-face, and interactive activities to experience and develop an innovative and entrepreneurial mindset. The program matches students with a mentor in the second year and connects students with other on campus opportunities such as ISU’s Pappajohn Center for Entrepreneurship (https://www.isupjcenter.org/) and Student Innovation Center offerings (https://sictr.iastate.edu/) where students can further develop their innovative ideas.

Career Services and Internships
LAS Career Services supports students’ career exploration, career development, and professional career search assistance. The career development process requires students to proactively plan and engage with applied learning experiences, such as internships, research, and leadership positions, throughout their time on campus. LAS Career Services strongly recommends students have 1-2 internships before entering the workforce.

LAS Career Services offers LAS 203 Professional Career Preparation, a 1 credit, satisfactory/fail course (open to undergraduate sophomores through seniors); career advising appointments; and events such as career fairs that connect students with employers. Services are available to undergraduates, graduate students, and alumni. Academic credit may be available for internships/co-op through departments and LAS Career Services.

For additional information, explore the LAS Career Services website (https://careers.las.iastate.edu/) or visit their office on the first floor of Carver Hall.

Advertising

The advertising major prepares students for careers in business and industry or for graduate education. Students majoring in advertising find career opportunities in professions requiring applied communication expertise. Graduates are qualified for positions in the creative and account sides of advertising within businesses, agencies and media. Coursework in this major focuses on writing, research, digital and emerging media, and professional abilities. Students are required to complete a capstone internship experience to practice and refine their skills.

The Greenlee School of Journalism and Communication prepares students for the field of communication. The school offers three majors:

- Advertising Bachelor of Arts (ADVRT)
- Journalism and Mass Communication Bachelor of Science (JL MC)
- Public Relations Bachelor of Science (P R)
In addition, the Greenlee School offers a 4+1 program allowing students to complete their B.A. or B.S. and earn an M.S. in journalism and mass communication in fewer semesters.

Professional skills are taught and practiced alongside academic requirements using the latest technology and leading-edge communication trends and methods.

Founded in 1905, the unit was one of the first journalism programs to be accredited in 1948 and continues to be one of the longest continuously accredited programs in the country. Accreditation is based on the principle that students need a broad-based, liberal arts education and solid core courses within the discipline. Students taking one major at the school may not seek a second major or minor in the school. All students are required to take a second major or minor outside the school as an area of expertise.

**Student Learning Outcomes**

Students who major in programs of the Greenlee School of Journalism and Communication are expected to develop competencies in 12 key areas:

- understand and apply the principles and laws of freedom of speech and press for the country in which the institution that invites ACEJMC is located, as well as receive instruction in and understand the range of systems of freedom of expression around the world, including the right to dissent, to monitor and criticize power, and to assemble and petition for redress of grievances;
- demonstrate an understanding of the history and role of professionals and institutions in shaping communications;
- demonstrate an understanding of gender, race ethnicity, sexual orientation and, as appropriate, other forms of diversity in domestic society in relation to mass communications;
- demonstrate an understanding of the diversity of peoples and cultures and of the significance and impact of mass communications in a global society;
- understand concepts and apply theories in the use and presentation of images and information;
- demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity;
- think critically, creatively and independently;
- conduct research and evaluate information by methods appropriate to the communications professions in which they work;
- write correctly and clearly in forms and styles appropriate for the communications professions which they work, and to understand the digital world.

### The Advertising Major

To receive a bachelor of arts degree in advertising, a student must earn at least 120 credits. A minimum of 72 credits must come from courses other than ADVRT, JL MC or P R. At least 50 of these credits must come from the liberal arts and sciences. Overall, at least 45 credits must be from 300-level courses or above.

The degree requirements allow for a minimum of 34 credits and a maximum of 48 credits to be taken in ADVRT, JL MC or P R. These include:

<table>

</tr>
<tr>
<td>ADVRT 499A</td>
<td>Professional Media Internship: Required</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credits** 34

Advertising majors are also required to take:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MKT 340</td>
<td>Principles of Marketing</td>
<td>3</td>
</tr>
<tr>
<td>STAT 101</td>
<td>Principles of Statistics (or another approved statistics course)</td>
<td>4</td>
</tr>
</tbody>
</table>

These additional requirements apply.

**University Requirement:** Students in all ISU majors must complete a three-credit course in U.S. Diversity, as well as a three-credit course in International Perspectives. The approved course lists are found at the following web addresses: (U.S. Diversity) http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses (http://www.registrar.iastate.edu/students/div-ip-guide/
usdiversity-courses/) and (International Perspectives) http://www.registrar.iastate.edu/students/div-guide/IntlPerspectives-current (http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/). Students must also demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

**College of LAS Requirement**: Minimum of 120 credits, including a minimum of 45 credits at the 300-level and above. You must also complete the LAS World Language requirement and any unmet ISU admission requirements.

Greenlee majors and minors cannot take ADVRT, JL MC or P R courses pass/not pass.

**Minor or Second Major**: Students are required to fulfill a secondary area of expertise. This requirement can be met by declaring a minor or a second major outside of the Greenlee School of Journalism and Communication. Students taking one major at the school may not seek a second major or minor in the school.

Juniors can apply to a concurrent degree program and earn a B.A. in advertising and an M.S. in journalism and mass communication in fewer semesters. Contact the Director of Graduate Education for more information on the Greenlee Schools’ 4+1 Program.

Minor in Advertising

Students cannot select more than one minor in the Greenlee School of Journalism and Communication. Minors in the Greenlee School are not available to Greenlee majors.

For a minor in advertising, students complete 15 credits. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Total Credits: 15

Greenlee majors and minors cannot take ADVRT, JL MC or P R courses pass/not pass.

Concurrent Undergraduate and Graduate Programs

The Greenlee School offers three concurrent degree programs:

- B.A. Advertising/M.S. Journalism and Mass Communication
- B.S. Journalism/M.S. Journalism and Mass Communication
- B.S. Public Relations/M.S. Journalism and Mass Communication

Enrollment in the Greenlee School’s concurrent degree programs enables students to complete coursework for the undergraduate and graduate programs on a five-year accelerated timeline – rather than the typical six-year timeline for the two degrees. See Journalism and Mass Communication Concurrent Undergraduate and Graduate Programs for more information on combining the B.A. in Advertising and the M.S. in Journalism and Mass Communication.

GRADUATE PROGRAMS

Master of Science

The Greenlee School of Journalism and Communication offers work for a Master of Science degree in journalism and mass communication.

Concurrent Programs

The Greenlee School’s concurrent degree programs enable interested students the opportunity to complete coursework for the undergraduate and graduate programs on a five-year accelerated timeline – rather than the typical six-year timeline for the two degrees.

Graduate Minor

The Greenlee School graduate program offers minor work for students majoring in other departments.

See Journalism and Mass Communication Graduate Programs for more information on the M.S. in Journalism and Mass Communication.
African and African American Studies

Interdepartmental Undergraduate Program

African and African American Studies, a cross-disciplinary program in the College of Liberal Arts and Sciences, offers students the opportunity to explore the African Americans’ experience and African American contributions to American culture. Students in the program analyze and learn about African American experiences through the study of history, literature, art, religion, and society. They gain knowledge and develop skills and sensitivities to help them function effectively in today’s diverse society.

African and African American Studies at Iowa State University is an expanding program. Most of the courses in the program satisfy general education requirements in the College of Liberal Arts and Sciences, the human relations requirement for teachers, and the university’s diversity requirement. Students can minor or even design their own Interdisciplinary Studies major with an emphasis in African American Studies. Relevant courses are offered through other departments.

Undergraduate Minor

A minor in African and African American Studies requires six courses in the program with a minimum of 18 credits, including AF AM 201 Introduction to African American Studies and AF AM 460 Seminar in African American Culture. The remaining credits must come from at least two departments, with at least two courses taken at the junior level or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Independent study and internship opportunities are available for credit, but do not count in the minimum requirements for the minor.

Graduate Study

Several courses can be applied to a graduate program as electives.

American Indian Studies Minor

American Indian Studies Minor

American Indian Studies is a cross-disciplinary minor in the College of Liberal Arts and Sciences that allows students to learn more about the contemporary and historical realities of native communities in North America, to appreciate the variety of native cultures and experiences, and to be prepared for an attentive lifelong learning experience in a diverse world.

Courses focus on critical thinking and the application of knowledge in complex, diverse situations. Courses in American Indian Studies thus not only provide knowledge on specific native issues, but also prepare students for careers and further studies in fields such as community development and planning, social work, law, sociology, education, history, anthropology, agriculture, resource extraction, literature, policy, engineering, or environmental issues.

Today, 80% of American Indians live outside of reservation communities. American Indian Studies students will gain the knowledge and skills they need for living and working with, in, and around native communities and people who live everywhere in North America, and, increasingly, the world.

For students who are interested in deeper knowledge on the issues, a major can be pursued through the Interdisciplinary Studies major in the College of Liberal Arts and Sciences. Faculty members also are available to provide expertise to graduate students working on specific issues that involve American Indian themes.

Most American Indian Studies courses meet the university-wide U.S. Diversity requirement.

The minor in American Indian Studies is 15 credits and includes:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AM IN 210</td>
<td>Introduction to American Indian Studies</td>
<td>3</td>
</tr>
</tbody>
</table>

And 12 additional credits of AM IN coursework, of which at least 9 credits need to be 300-level courses or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Coursework will be established in consultation with the program director through the Curriculum Change Form.

Anthropology

Overview

The ISU program in Anthropology is housed in the Department of World Languages and Cultures (http://catalog.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures/).

Anthropology students develop a well-rounded professional education in cultural anthropology, archaeology, and biological anthropology. An undergraduate major in Anthropology can serve as the nucleus for a general liberal education, or as the prerequisite for graduate training qualifying a person for positions in (1) college and university teaching, (2) research, and (3) administrative and applied positions in government, development organizations, museums, and private businesses or corporations.

Anthropology majors may choose either a bachelor of arts or a bachelor of science degree, both of which require 33 credits in anthropology. A bachelor of arts degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Area I (Arts and Humanities) or III (Social Sciences) or a combination of both. A bachelor of science degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Area IIA (Mathematics) or IIB
(Natural Sciences) or a combination of both. All students must also complete a minor or a second major as part of their degree requirements.

**Student Learning Outcomes**

Upon completion of the major in anthropology, students will be able to:

1. Explain what it means to be human through the study of culture and society, the biology and evolution of humans and other primates, and through the study of past human communities and material culture;
2. Demonstrate knowledge of the important historical and contemporary issues in the subdisciplines of archaeological, biological, and cultural anthropology;
3. Describe and evaluate local and global issues from an anthropological perspective;
4. Demonstrate an understanding of the value of cultural diversity.

**Degree Requirements**

Undergraduate students with majors in anthropology are required to take the following anthropology core courses:

- **ANTHR 201** Introduction to Cultural Anthropology 3
- **ANTHR 202** Human Origins 3
- **ANTHR 306** Culture and Interpretation 3
- **ANTHR 307** Biological Anthropology 3
- **ANTHR 308** Archaeology 3
- **ANTHR 450** Approaches in Anthropology 3

One of the following methods courses is required:

- **ANTHR 319** Skeletal Biology 3
- or **ANTHR 328** Archaeological Discovery and Analysis 3
- or **ANTHR 431** Ethnographic Methods 3

In addition to the above, 15 ANTHR choice credits are required. 15

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

- **ENGL 250** Written, Oral, Visual, and Electronic Composition 3
- or **ENGL 250H** Written, Oral, Visual, and Electronic Composition: Honors 3

Additionally, the Anthropology Program requires a grade of C or better in one of the following courses:

- **ENGL 302** Business Communication 3
- **ENGL 309** Proposal and Report Writing 3
- **ENGL 314** Technical Communication 3

The principal sub-disciplines of anthropology are represented by the following:

1. Cultural anthropology:
   - **ANTHR 201** Introduction to Cultural Anthropology 3
   - **ANTHR 230** Globalization and the Human Condition 3
   - **ANTHR 306** Culture and Interpretation 3
   - **ANTHR 309** Introduction to Culture and Language 3
   - **ANTHR 313** Kinship and Marriage in a Global Perspective 3
   - **ANTHR 322** Peoples and Cultures of Native North America 3
   - **ANTHR 323** Topics in Latin American Anthropology 3
   - **ANTHR 325** Peoples and Cultures of Africa. 3
   - **ANTHR 332** Current Issues in Native North America 3
   - **ANTHR 336** Global Development 3
   - **ANTHR 340** Magic, Witchcraft, and Religion 3
   - **ANTHR 354** War and the Politics of Humanitarianism 3
   - **ANTHR 411** Anthropology for Global Professionals 3
   - **ANTHR 418** Global Culture, Consumption and Modernity 3
   - **ANTHR 431** Ethnographic Methods 3
   - **ANTHR 434B** Internship: Cultural Anthropology 2-6
   - **ANTHR 434D** Internship: Linguistic Anthropology 2-6
   - **ANTHR 444** Cross-cultural Perspectives on Gender and Sexuality 3
   - **ANTHR 450** Approaches in Anthropology 3
   - **ANTHR 451B** Practicum in Anthropology: Cultural Anthropology 1-3
   - **ANTHR 451D** Practicum in Anthropology: Linguistic Anthropology 1-3
   - **ANTHR 490B** Independent Study: Cultural Anthropology 1-5
   - **ANTHR 490D** Independent Study: Linguistic Anthropology 1-5

2. Archaeology:
   - **ANTHR 202** Human Origins 3
   - **ANTHR 308** Archaeology 3
   - **ANTHR 315** Archaeology of North America 3
   - **ANTHR 320** Great Plains Archaeology 3
   - **ANTHR 321** World Prehistory 3
   - **ANTHR 328** Archaeological Discovery and Analysis 3
   - **ANTHR 429** Topics in Archaeological Laboratory Methods and Techniques: Archaeological Field School 4-6
   - **ANTHR 434A** Internship: Archaeology 1-6
   - **ANTHR 450** Approaches in Anthropology 3
   - **ANTHR 451A** Practicum in Anthropology: Archaeology 1-3
   - **ANTHR 427I** Field Archaeology 4
   - **ANTHR 490A** Independent Study: Archaeology 1-5

3. Biological Anthropology:

</tbody>
</table>

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check [http://www.registrar.iastate.edu/courses/div-ip-guide.html](http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses.

Students in Anthropology have the option of pursuing a B.S. or a B.A. A B.S requires six additional group requirement credits in natural science or mathematics disciplines. A B.A. requires six additional group requirement credits in social or humanities disciplines.

Anthropology B.S., B.A.

Three additional credits in ANTHR at the 300+ level 3
Graduate Programs
The department offers a master of arts degree with a major in anthropology. Graduate courses are offered in the areas of archaeology, biological anthropology, and cultural anthropology. Competence in statistics or a methodology relevant to the student’s program of study must be demonstrated. Students are required to do original field, archival, or laboratory research that will result in a scholarly thesis.

Biochemistry and Biophysics
Overview
The department of Biochemistry, Biophysics & Molecular Biology (http://www.bbmb.iastate.edu) offers majors in biochemistry in the College of Liberal Arts and Sciences and in the College of Agriculture and Life Sciences. Biochemists seek to understand life processes in terms of chemical and physical principles. Graduates in biochemistry will have a rigorous background in chemistry, biology, and physics that will prepare them for graduate studies in the chemical or biological sciences, medical and health professional training, or immediate laboratory research in biochemistry, biotechnology, or pharmacy. The biochemistry major is accredited by the American Society for Biochemistry and Molecular Biology (ASBMB). As such our learning objectives are in-line with ASBMB core concepts.

Student Learning Outcomes
Upon graduation, students should be able to:

• Demonstrate that energy is required by and transformed in biological systems.
• Demonstrate that macromolecular structure determines function and regulation.
• Demonstrate that information storage and flow are dynamic and interactive.
• Articulate the principals of biochemistry and biology within the overarching context of evolution and homeostasis.
• Use the tools and techniques required for objective measurement and quantitative analysis of biochemicals in biological systems.
• Write and orally present clear communication following the rules of the scientific method.
• Implement rigorous standards for laboratory safety and research ethics.

Degree Requirements
As majors in the College of Liberal Arts and Sciences, Biochemistry and Biophysics students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated below for each major.

**Total Credits** 15-17

These lists of courses should not be regarded as statements of fixed requirements or as complete outlines of the work necessary for the major. They are given solely for the convenience of students or advisors who wish to estimate the amount of basic study that may be needed.

All minors require at least 15 credits, including at least 6 credits in course numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

### Concurrent Programs

#### Concurrent Bachelor of Science (B.S.)/ Master of Science (M.S.) Degrees

The department offers a concurrent enrollment degree program in either Biochemistry or Biophysics that allows ISU undergraduate students to obtain both the B.S. and M.S. degrees in about five years. The program is open to undergraduate students in the College of Liberal Arts and Sciences and in the College of Agriculture and Life Sciences. The concurrent degrees can be useful to students entering various career tracks. For those considering careers as research specialists, entry positions with higher-level responsibilities, and a higher-level salary, are made possible with the M.S. degree. For those considering careers as research directors, which require advanced study, the M.S. degree provides an advantage for admission into Ph.D. programs at the most competitive and prestigious graduate schools. Similarly, the M.S. degree can be a competitive advantage for admission in to medical, dental, law, veterinary medicine, or other professional schools.

Application to the program is made near the end of the junior undergraduate (third) year. Concurrent B.S/M.S. degree students begin research for the M.S. thesis during the summer semester after their junior year and are eligible for research assistantships, which are renewable based on academic standing and satisfactory research performance. The M.S. thesis requires intensive experience in original, independent laboratory research under the close supervision of a faculty mentor. To apply, see the concurrent B.S./M.S. application instructions found on the department’s Graduate Study web page.

### Concurrent Bachelor of Science/Graduate Certificate

The Bachelor of Science /Graduate Certificate program is intended for exceptional undergraduate students majoring in Biochemistry. In this program, the student completes all of the requirements for the B.S. degree and the graduate certificate in a four-year period by combining the requirements of the two programs. The student enters the Graduate College after he/she achieves junior status and develops a plan of coursework (graduate and undergraduate) subject to the approval of the Director of Certificate (DOC). Required graduate courses are BBMB 504, 505, 506, 507, 561 and 561L. The student must satisfy the requirements of the B.S. in Biochemistry (121 credits) and the Graduate Certificate in Biochemistry (12 credits). Six credits of graduate coursework can satisfy some requirements of the B.S. degree. To apply for the B.S./Graduate Certificate, submit the application form found on the Graduate College Forms web page.

### Graduate Programs

#### Introduction

Biochemistry and Biophysics are the science and technology used to understand the mechanisms underlying biological processes at the molecular level, with an emphasis on the fundamental relationships among the chemical, physical, and biological sciences. The Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology (BBMB) administers Doctor of Philosophy (Ph.D.), Master’s (M.S.), and Graduate Certificate programs that lead to an advanced degree or certificate in these disciplines. The prerequisite to graduate study is a sound undergraduate background in biology, chemistry, mathematics, and physics.
BBMB offers Doctor of Philosophy and Master’s degrees in Biochemistry and in Biophysics that are designed to train students to independently conceive and carry out original research. BBMB also offers two graduate certificate programs in Biochemistry that provide a mechanism for formal recognition of focused graduate study in a specialized area that is less comprehensive than that required for a master’s degree. BBMB participates in the Interdepartmental majors of Bioinformatics and Computational Biology; Genetics and Genomics; Immunobiology; Molecular, Cellular, and Developmental Biology; Neuroscience; Plant Biology; and Toxicology. All graduate degree students in BBMB are required to teach as part of their training.

**Master of Science (M.S.) Degree**

The M.S. degree programs in Biochemistry and in Biophysics are useful for students who prefer to undertake research training without the longer-term commitment required for the Ph.D. degree. It is also useful for students interested more in the technical aspects of research rather than in careers as research directors. The program requires about 3 years on average to complete and the successful defense of an independent research dissertation is required. About half the time required to earn the degree is spent on advanced coursework and professional seminars, and the other half is devoted to research undertaken in the laboratory under the close supervision of a faculty mentor. Financial support is available. To apply, applicants first submit the free BBMB online application found on the department website, which is used as a screening tool.

**Doctor of Philosophy (Ph.D.) Degree**

The Ph.D. programs in Biochemistry and in Biophysics are designed to train students in the ability to independently conceive and carry out original research in the general area of the chemistry or physics of the processes of life. The programs require about 5-6 years on average to complete and the successful defense of an independent research dissertation. The majority of the time required to earn the degree is spent doing research on the dissertation project in the laboratory under the close supervision of a faculty mentor. Considerable time also is devoted to advanced coursework and professional seminars. Financial support is available. To apply, applicants first submit the free BBMB online application found on the department website, which is used as a screening tool. Students may enter the Biochemistry or Biophysics Ph.D. degree programs either as a rotation student in the fall semester or as a direct admit to a faculty research group at any time during the year.

**Graduate Minor in Biochemistry**

Graduate students in other M.S. and/or Ph.D. programs at ISU can earn a graduate minor in Biochemistry by completing 12 credits of the following courses with a grade point average of 3.0 or above: at least 6 credits from BBMB 504, 505, 506 and 507 and at least 6 credits of other BBMB 500- and 600-level courses. A student wishing to declare a minor in Biochemistry should arrange for a member of the graduate faculty in Biochemistry to serve on the POS Committee and submit the required form found on the Graduate College Forms page.

**Graduate Certificate Programs**

The graduate certificate program is designed for students who wish to continue or expand their knowledge in Biochemistry at the graduate level without the time commitment or lab experience required for a formal Master’s or Ph.D. program. A certificate program can be an attractive option for individuals who have a bachelor’s degree and are interested in broadening their expertise, or who are working in the sciences or industry and want to continue their education at the graduate level. BBMB offers two graduate certificate programs in Biochemistry: a concurrent B.S./Graduate Certificate and a Graduate Certificate. The standards of admission and the course standards to which a certificate student are held are equivalent to those expected of a master’s student. Each graduate certificate requires at least 12 graduate credits, all of which are available either on campus or on line. A graduate supervisor will be appointed to oversee the certification for each student.

If a person who completes a graduate certificate program decides to continue for a graduate degree in Biochemistry or Biophysics, program approval is required. Credits earned for the graduate certificate may be used to meet course requirements for the graduate degree program.

**Graduate Certificate in Biochemistry**

The graduate certificate in Biochemistry is designed for students who have a B.S. degree in Biochemistry or a related field and wish to advance their knowledge by taking additional coursework at the graduate level. The graduate certificate courses may be taken either on-line or on campus. Candidates for a graduate certificate in Biochemistry are admitted in the Graduate College. A total of 12 credits is required that include BBMB 504, 505, 506 and 507, plus four additional credits of BBMB coursework at the 500-level. The 12 credits earned in the graduate certificate program may be applied to meet the course requirements of a M.S. or Ph.D. program in Biochemistry at Iowa State University (ISU) if the student is accepted into one of these programs. To apply for the graduate certificate in Biochemistry, submit the ISU online application.

**Bioinformatics and Computational Biology**

Undergraduate study in BCBio is jointly administered by the Department of Computer Science, the Department of Genetics, Development, and Cell Biology, and the Department of Mathematics. The undergraduate B.S. degree is offered through the College of Liberal Arts and Sciences.
Bioinformatics and Computational Biology is an interdisciplinary science at the interfaces of the biological, informational and computational sciences. The science focuses on a variety of topics. These include gene identification, expression, and evolution; RNA, protein, and genome structure; and molecular and cellular systems and networks. The large group of participating faculty provides students with a multidimensional perspective on bioinformatics and computational biology and presents them with broad range of possibilities to get involved in research.

This major will prepare students for careers at the interfaces of biological, informational and computational sciences. BCBio graduates with a B.S. seeking direct employment will find ready markets for their talents in agricultural and medical biotechnology industries, as well as in academia, national laboratories, and clinics. Although some students find employment directly after their baccalaureate training, many students will continue their education in one of the many excellent graduate programs in bioinformatics and computational biology that now exist.

Participation in this field requires that students achieve a high level of competence not only in biology, but also in mathematics, computer science, and statistics. As a result, the program includes required courses from many different disciplines. Graduates demonstrate an above-average ability to synthesize methods from these different disciplines to solve problems.

**Student Learning Outcomes**

By completing their studies, students earning the BS degree in BCBio are expected to:

1. Develop critical thinking skills by implementing the scientific method through bioinformatics data analysis.

2. Explain and complete simple applications of the common bioinformatics and computational biology methods used for DNA, RNA, and protein analysis.

3. Understand the central dogma of biology and how bioinformatic analyses of high throughput biological next-generation sequencing proteomics datasets can help answer fundamental questions about the biology of DNA, RNA, and proteins.

4. Define systems biology and explain its importance in understanding biology; undertake basic data analyses in systems biology.

5. Identify common formats for biological data and be able to convert among different formats.

6. Summarize fundamental bioinformatics software tools, know when to apply them, and be able to use them.

7. Combine existing software tools into bioinformatic data processing pipelines.

8. Evaluate the limits of traditional algorithms and data analysis techniques as they apply to big data in biology.

9. Identify and appraise noise in high throughput biological datasets and uncertainty in the conclusions of data analysis.

10. Interpret bioinformatics and computational biology analyses individually and in collaborative learning environments.

In addition to basic degree requirements listed in the Curriculum in Liberal Arts and Sciences, BCBio majors must satisfy the following requirements:

**A. Complementary Courses for the BCBio Major**

A minimum of 4 credits from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 163 &amp; 163L</td>
<td>College Chemistry and Laboratory in College Chemistry</td>
</tr>
<tr>
<td>or</td>
<td></td>
</tr>
<tr>
<td>CHEM 177 &amp; 177L &amp; CHEM 178</td>
<td>General Chemistry I and Laboratory in General Chemistry I and General Chemistry II</td>
</tr>
<tr>
<td>or</td>
<td></td>
</tr>
<tr>
<td>CHEM 201 &amp; 201L</td>
<td>Advanced General Chemistry and Laboratory in Advanced General Chemistry</td>
</tr>
</tbody>
</table>

A minimum of 4 credits from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 231 &amp; 231L</td>
<td>Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry</td>

Total Credits: 28

Note: The following other STAT courses may be substituted for STAT 330, with permission of the BCBio Major: STAT 101, 104, 201, 231, 305, or 341

2. The Com S 227/228 course series is required for the BCBio minor. However, students transferring into the minor who have already earned credit for Com S 207/208 can substitute those courses for the Com S 227/228 series. Students will need permission of the instructors to enroll in any upper level course that requires a pre-req in Com S 227/228.

Most students pursuing a minor in Bioinformatics and Computational Biology will be biology, genetics, computer science, computer engineering, statistics, or mathematics students who have already taken some of these courses for their major. The minor must include at least
Graduate Study

Work is offered for the master of science and doctor of philosophy degrees with a major in Bioinformatics and Computational Biology (BCB). Faculty are drawn from several departments: Agronomy; Animal Science; Astronomy and Physics; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemical and Biological Engineering; Chemistry; Computer Science; Ecology, Evolution, and Organismal Biology; Electrical and Computer Engineering; Entomology; Genetics, Development and Cell Biology; Materials Science and Engineering; Mathematics; Plant Pathology; Statistics; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

The BCB program emphasizes interdisciplinary training in nine related areas of focus: Bioinformatics, Computational Molecular Biology, Structural and Functional Genomics, Macromolecular Structure and Function, Metabolic and Developmental Networks, Integrative Systems Biology, information Integration and Data Mining, Biological Statistics, and Mathematical Biology. Additional information about research areas and individual faculty members is available at: www.bcb.iastate.edu (http://www.bcb.iastate.edu).

BCB students are trained to develop an independent and creative approach to science through an integrative curriculum and thesis research projects that include both computational and biological components. First year students are appointed as research assistants and participate in BCB 697 Graduate Research Rotation, working with three or more different research groups to gain experience in both “wet” (biological) and “dry” (computer) laboratory environments. In the second year, students initiate a thesis research project under the joint mentorship of two BCB faculty mentors, one from the biological sciences and one from the quantitative/computational sciences. The M.S. and Ph.D. degrees are usually completed in two and five years, respectively.

Before entering the graduate BCB program, prospective BCB students should have taken courses in mathematics, statistics, computer science, biology, and chemistry. A course load similar to the following list would be considered acceptable:

<table>
<thead>

</tbody>
</table>

M.S. students take the above background and core courses, take at least 6 credits of advanced coursework, and may elect to participate in fewer seminars and workshops. Additional coursework may be selected to satisfy individual interests or recommendations of the Program of Study Committee. All graduate students are encouraged to teach as part of their training for an advanced degree. (For curriculum details and sample programs of study, see: www.bcb.iastate.edu (http://www.bcb.iastate.edu.).)

Biology

Interdepartmental Undergraduate Program

Iowa State University is a major center for research and education in the biological sciences. With over 200 faculty in the life sciences, students have the opportunity to learn from some of the nation’s leaders in biological research and teaching and to participate in innovative, meaningful research projects that explore frontiers of biology. Few other universities have such a wealth of faculty expertise available to undergraduate students, making Iowa State’s Biology Program the logical choice for those who want to participate in a thriving academic community.
The faculties of the Department of Ecology, Evolution, and Organismal Biology and the Department of Genetics, Development, and Cell Biology jointly offer the undergraduate biology major. This high quality academic program has the flexibility to accommodate a range of career goals while taking advantage of the university’s strengths in science and technology. A bachelor’s degree in biology provides excellent preparation for graduate study in biological disciplines ranging from the molecular to the ecological levels, and for entrance into various professional schools, such as human medicine, physical therapy, or veterinary medicine. The major is well suited for those who plan to teach biology, who wish to enter government or industrial employment in health or environmental professions, or who prefer educational breadth as an end in itself. By working with our professional and faculty advisors, it is possible to design a unique program of study that will meet student needs and objectives.

Students with special interests and aptitudes should consider combining biology with a minor or a second major in another subject, such as chemistry, environmental studies, journalism, mathematics, music, statistics, or many other subjects offered by the university.

Customizing a degree

Biology encompasses an amazing diversity of disciplines and scales of study ranging from molecules to the biosphere. The Biology major offers a rich variety of coursework addressing most of the areas of biology. The major’s curriculum requirements offer tremendous flexibility in creating an individualized program of study to facilitate achievement of a student’s career goals, while simultaneously assuring some exposure to all areas of biology and providing complementary knowledge from supporting courses in chemistry, physics, and math/statistics.

While flexibility is the hallmark of the Biology major, the breadth of the field can also be challenging. Thus, in an effort to provide more guidance to students who desire such, the major also provides five advising tracks, or areas of specialization, for students who wish to focus on subfields of biology or who have specific career goals in mind. Course plans for each area of specialization are listed on the Biology web site. The areas are:

Pre-medical and Human Health Professions—This area emphasizes preparation for further study in medical school or allied human health professions such as dentistry, optometry, genetic counseling, physical therapy, occupational therapy, physician assistant, nursing, chiropractic, and others. It also will prepare students for a broad range of careers in the biological sciences. Students are urged to determine the specific entrance requirements for the professional schools where they might study and to plan a program of study accordingly, in addition to following the basic plan.

Pre-veterinary—An eventual degree in Veterinary Medicine can lead to a wide variety of careers, including private clinical practice in small animal medicine or agricultural animal production. But, pre-veterinary students can also prepare themselves for careers in animal research, public health, laboratory animal medicine, food safety, regulatory medicine, and education. Specific requirements for entrance to the Iowa State Veterinary College or other schools should be consulted as programs of study are planned, in addition to following the basic plan.

Molecular and Cellular Biology—Students specializing in this field will explore the structure, function, and interactions of the molecules and sub-cellular features that make up living cells. This area is particularly designed for those who plan to pursue a career in research in molecular or cell biology or in related areas such as biochemistry, genetics, microbiology, developmental biology, human medicine, or veterinary medicine. Many students in this area will choose to go on to graduate school.

Ecology and Conservation Biology—Ecologists examine the interactions and relationships that living organisms have with each other and their environment. Conservation biologists study the nature and status of Earth’s biodiversity with the aim of protecting species, their habitats, and ecosystems from excessive rates of extinction and loss. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Evolution and Biodiversity—This area provides students with a sound understanding of evolutionary principles and the biological patterns that result from evolutionary change. Students have the opportunity to explore, in depth, the biodiversity found within a wide range of groups of organisms. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Other opportunities

Teacher licensure—Biology majors seeking recommendation for licensure to teach biology in secondary schools must meet requirements of the Teacher Education Program as well as those of the Biology Program. In addition, they must apply formally for admission to the teacher education program. See the section on Teacher Education for a list of licensure areas, degree requirements, and other information about this program.

Undergraduate research—Students who have interests in biological research are encouraged to become involved in the research projects of faculty members on campus. Those doing so may receive credit for the experience in BIOL 499 Undergraduate Research Experience. Making the effort to find a suitable research mentor and engaging in research work can be one of the most valuable experiences of an undergraduate education. Internship experiences are often available at
other universities, zoos, museums, governmental and non-governmental entities focused on environmental issues, and industrial or government laboratories. Students participating in such projects may receive internship credit in BIOL 494 Biology Internship.

Field trip courses – The Biology Program offers two field trip courses: BIOL 393 (North American Field Trips in Biology) and BIOL 394 (International Field Trips in Biology). In recent years field trip opportunities to the Boundary Waters area of Minnesota, Honduras, and Spain have been available. These courses involve a pre-trip seminar followed by one-week to one-month long field trip at a time when academic year classes are not in session. The classes are low enrollment and allow extensive interaction between instructors and students in locations of biological interest.

International experience–Because major discoveries in science often result from global efforts, biology majors are encouraged to include an international or study abroad component in their degree programs. This can be done by participating in international field trips originating from the ISU campus in BIOL 394 International Field Trips in Biology. In addition, many students choose to study abroad, attending a university in another country for up to a year as an exchange student. Minors in a foreign language can also add an international emphasis to a degree in biology.

Courses offered at other locations
In addition to biological science courses taught on campus, students may take courses at various remote locations and arrange to have the credits count toward the advanced courses required in the biology major. Attending a summer field station adds an important component to an undergraduate program of study.

Gulf Coast Research Laboratory–The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for marine biology courses and transfer credit to their degree programs under the number BIOL 480 Studies in Marine Biology. Written permission of the Biology Program Director is required for this arrangement.

Summer Biological Field Stations–Courses taken at summer field stations may be transferred to Iowa State University as credit in BIOL 481 Summer Field Studies. Such stations are found throughout the country and often offer courses that emphasize the adaptation of plants and animals to unique environments. See www.biology.iastate.edu for links to Iowa Lakeside Laboratory and other field stations in different biomes, e.g., marine/coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mts., etc.

Organization for Tropical Studies–Iowa State students may register for courses in tropical biology taught in Costa Rica by the Organization for Tropical Studies. Credit is transferred to Iowa State as BIOL 482 Tropical Biology. For further information, contact the Biology Student Services Office in 103 Bessey Hall.

Student Learning Outcomes
Upon graduation, students should be able to:

- Explain and apply the core biological concepts of:
  - Evolution
  - Structure and function
  - Information flow, exchange, and storage
  - Pathways and transformations of energy and matter
  - How systems are interconnected and interact
- Apply the process of science
- Use quantitative reasoning
- Use modeling and simulation
- Utilize, communicate with, and collaborate with other disciplines
- Understand the relationship between science and society

Undergraduate Study

Biology majors start their studies in the biological sciences by taking a two-semester long Principles of Biology course sequence:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 211</td>
<td>Principles of Biology I</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 211L</td>
<td>Principles of Biology Laboratory I</td>
<td>1</td>
</tr>
<tr>
<td>BIOL 212</td>
<td>Principles of Biology II</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 212L</td>
<td>Principles of Biology Laboratory II</td>
<td>1</td>
</tr>
</tbody>
</table>

During the first year, students also take BIOL 110 Introduction to Biology and BIOL 111 Opportunities in Biology, which are half-semester courses designed to introduce the student to the discipline of biology and opportunities for careers in biology. Students transferring into the Biology major take BIOL 112 in place of BIOL 110 and BIOL 111.

Students then explore, in any order depending on their interests, four upper-level core courses including: concepts of ecology in BIOL 312; the principles of genetics in BIOL 313 and BIOL 313L; cell and molecular biology in BIOL 314; and evolutionary biology in BIOL 315. Biology majors must take an additional 21 credits of advanced biological science courses at the 300 level, or above, from an approved list of courses. Many of these courses have as prerequisites BIOL 211/L and BIOL212/L, so students do not need to complete the four upper-level core courses before taking advanced courses. Of these advanced courses, at least 9 credits must be taken as BIOL courses, and a minimum of two laboratory or field courses must also be included from an approved list.

Biology majors should carefully consider their selection of upper-level courses to allow them to emphasize one, or more, of the sub-disciplines of Biology relevant to their post-baccalaureate objectives. Most biology courses numbered 300 or above can be used to satisfy the additional
credit requirement. Some courses taught in other departments can also be applied to the biology major. Advanced students should consider including 500 level courses in their programs. The Biology Program's web site has a complete listing of acceptable upper-level life science courses.

Biology majors must demonstrate competency in their understanding of the biological sciences. A 2.0 cumulative average is required in biology and advanced biology coursework. In order to graduate, a student must have a cumulative average in the major of at least 2.00.

**General requirements**

Students may earn the B.S. degree in Biology from either the College of Liberal Arts and Sciences or from the College of Agriculture and Life Sciences. Students in the College of Liberal Arts and Sciences must fulfill the foreign language and general education requirements for that college. Students in the College of Agriculture and Life Sciences must meet the general education requirements for that college. Contact the Student Services Office for details regarding differences in general education and course requirements that are specific to these colleges.

Supporting course requirements-- Understanding biology requires a basic understanding of the physical sciences and mathematics. Consequently, a minimum number of credits in general chemistry, organic chemistry, biochemistry, and physics is required. See the Biology Program Web Site for specific supporting science requirements.

The Math requirement is competency based. After demonstrating competency in algebra and trigonometry, biology majors must take two semesters of calculus; or two semesters of Statistics; or one semester of calculus and one semester of Statistics chosen from a list of approved courses available on the Biology Program Web Site and in the Biology Program Office.

**Curriculum in Biology**

Administered by the Departments of Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology. Students should consult the Biology Student Services Office, 103 Bessey (or biology@iastate.edu) for the appropriate course selections for professional or graduate school preparation.

**Total Degree Requirement: 120 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**Biology: 23.5 cr.**

2.00 GPA average required.

**Graduate Programs**

Biology is an undergraduate major only. Persons interested in graduate study in the biological sciences should apply directly to one of the life science graduate programs at Iowa State University.

**Programs**

- Bioinformatics and Computational Biology
- Ecology and Evolutionary Biology
- Genetics
- Molecular Cellular and Developmental Biology
- Neuroscience
- Plant Biology
- Toxicology
- Immunobiology
- Environmental Science
Interdisciplinary Graduate Studies

A non-thesis master's degree in Interdisciplinary Graduate Studies (biological sciences) has been established particularly for those who wish to have a more diversified program of advanced study than that generally permitted by specific departments and programs.

Chemistry

Overview

The department of Chemistry offers Bachelor of Science and Bachelor of Arts degrees in Chemistry in the College of Liberal Arts and Sciences.

Graduates holding the B.S. degree in Chemistry qualify in many fields as: teachers of Chemistry, supervisors in industry, technical sales personnel, and research chemists in federal, state, municipal, academic, or industrial laboratories. Students with high scholastic standing often continue with graduate work, where they may explore more thoroughly the specialized areas of chemistry in which they are interested.

The B.A. degree is useful for students who intend to pursue studies in parallel areas, such as secondary school teaching, to obtain additional majors, minors, or for pursuing professional school (such as medical, dental, or pharmacy school) outside of Chemistry. The B.S. degree is recommended for students who wish to pursue graduate studies or a research career in Chemistry.

Student Learning Outcomes

Upon graduation students should:

- have firm foundations in the fundamentals and application of current chemical theories.
- be able to design, carry-out, record, and analyze the results of chemical experiments.
- use modern instrumentation and classical techniques to identify and solve chemical problems as well as explore new areas of research.
- communicate the results of their work to chemists, as well as non-chemists.
- understand the ethical and environmental dimensions of problems and issues facing chemists.
- follow the proper procedures and regulations for safe storage, labeling, use of chemicals, and disposal of chemicals.
- be able to use chemical literature (perform searches for, read, evaluate, and appropriately cite publications)
- be skilled in problem solving, critical thinking, and analytical reasoning.

These skills may be applied to careers in education and industry; in professions such as law, medicine, environmental sciences, and forensic sciences. The curricula in Chemistry are approved by the American Chemical Society (ACS). Students who complete the program obtain an ACS certified baccalaureate degree provided they also take one Biochemistry course, typically BBMB 301 Survey of Biochemistry, BBMB 316 Principles of Biochemistry or BBMB 404 Biochemistry I and (http://catalog.iastate.edu/azcourses/bbmb/)BBMB 405 Biochemistry II.

Liberal arts majors who wish to transfer into Chemistry at the end of their second year may still complete all degree requirements and graduate within five years.

Undergraduate students seeking the Bachelor of Science (B.S.) degree in Chemistry have the following courses in their degree programs as minimum requirements:

<table>
<thead>

</table>

Plus a world language requirement.

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250. The Department requires a grade of C– or better in ENGL 314.

CHEM 399 Undergraduate Research or CHEM 499 Senior Research is strongly recommended. Credits earned in 399/499/490 may only be used to meet one of the advanced course requirements.

Chemistry majors seeking certification to teach Chemistry in secondary schools must meet the requirements of the College of Human Sciences as well as those of the Chemistry program. In addition, they must apply formally for admission to the teacher education program.

Undergraduate students seeking the Bachelor of Arts (B.A) degree in Chemistry have the following courses in their degree programs as minimum requirements:

One of the following sequences: 6-8

---

1. Advanced high school chemistry and strong algebra skills are necessary for success in CHEM 201. Math ACT of 24 or greater is strongly recommended.

2. Students may substitute the following courses, if necessary:
   - CHEM 201 for 177 and 178;
   - CHEM 177L for 177N or 201L.
   - CHEM 331L and 332L for 333L and 334L; however, this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.
   - CHEM 321L for 322L; however this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.

3. Required of Chemistry Learning Community Members.

4. Completion of three years of foreign language in high school fulfills this requirement.

F Class offered Fall Semester only.

S Class offered Spring Semester only.

Individuals earning a B.A. degree in Chemistry who have taken 331L, 334L and 322L can obtain American Chemical Society certification by taking an additional advanced chemistry lecture course of BBMB 301 or 404. CHEM 550 may not be used to satisfy the Advanced Chemistry requirement.
Electives

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>9 BBMB 301 (strongly recommended)</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 399 (strongly recommended, credits variable)</td>
<td>0</td>
</tr>
</tbody>
</table>

Electives: 6

The total minimum credits in Chemistry thus will be 20 to 23 depending on which advanced courses are selected. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Chemistry Minor

The Department offers a minor in chemistry which may be earned by credit in:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 177</td>
<td>General Chemistry I</td>
</tr>
<tr>
<td>CHEM 177L</td>
<td>Laboratory in General Chemistry I</td>
</tr>
<tr>
<td>or</td>
<td></td>
</tr>
<tr>
<td>CHEM 167 &amp; 167L</td>
<td>General Chemistry for Engineering Students and Laboratory in General Chemistry for Engineering</td>
</tr>
<tr>
<td>CHEM 178</td>
<td>General Chemistry II</td>
</tr>
<tr>
<td>CHEM 211</td>
<td>Quantitative and Environmental Analysis</td>
</tr>
</tbody>
</table>

Concurrent Programs

The concurrent Chemistry/MBA program is designed to be completed in five academic years, with three years of undergraduate coursework followed by two years of MBA studies alongside the remaining undergraduate courses.

Concurrent students are part of the full-time MBA program. Admission to the concurrent MBA program is competitive. You should apply during your junior year. Successful candidates demonstrate superior academic ability, strong leadership attributes, and clear career focus. Previous business coursework is not a requirement for application.

Internships, co-op experiences, extracurricular, and leadership activities are highly valued in the MBA candidate selection process. However, you aren’t required to have additional coursework in business in preparing for the MBA.

Admitted students typically have a cumulative GPA of 3.00 or above and have scored 600 or higher on the GMAT exam or GRE equivalent. If you’re interested in the concurrent MBA program, you should apply by March 15 of your junior year to be considered for scholarships and assistantships. The final application deadline is June 1.

Graduate Programs

The Department offers work for the degrees Master of Science and Doctor of Philosophy with majors in Chemistry, Analytical, Inorganic,
Organic, and Physical chemistry. Co-majors may be taken between areas within Chemistry or between one of the areas in Chemistry and another department. Courses in other areas of Chemistry as well as courses in other departments may be used to satisfy the requirement for coursework outside the major field. A Ph.D. student in Chemistry may choose an additional specialty in one of six areas: Materials Chemistry, Industrial Chemistry, Biomolecular Sciences, Chemistry Education, Chemical Instrumentation, and Forensic Chemistry. A minimum of ten credits is required for each additional specialty. A course which counts towards an additional specialty may also count toward the outside course requirement. A minor in Chemistry is available to students in other departments. The Department participates in the interdepartmental major in Toxicology.

The Department of Chemistry requires all graduate students majoring in Chemistry to teach as part of their training for an advanced degree. Prerequisite to major graduate work is the completion of undergraduate work in Chemistry, Mathematics, and Physics substantially equivalent to that required of undergraduate Chemistry majors at this institution.

Classical Studies

The cross-disciplinary Classical Studies Program engages students with the civilizations of ancient Greece and Rome and their influence, both past and present, on western and world cultures. The Classical Studies minor and Interdisciplinary Studies major include an integrated curriculum of courses in the cultures, literatures, history, archaeology, and art of ancient Greece and Rome from prehistoric times to the reign of the Emperor Constantine. Students also study Elementary Latin. Current information about the Program may be found at: http://language.iastate.edu/academic-programs/classical-studies/

Courses in Classical Studies provide background and a classical context for students whose major fields of study or career interests include History, Anthropology, English, World Languages and Cultures, Philosophy, Women's and Gender Studies, material culture, law, medicine, political science, the life sciences, and related fields.

Students interested in pursuing an Interdisciplinary Studies major or minor in Classical Studies should consult the Program Chair (see "Program Faculty" at https://language.iastate.edu/classical-studies/) or an Academic Advisor in the Department of World Languages and Cultures (https://language.iastate.edu/advising/).

Required Latin Languages Courses (6 Credits)
(100-level courses cannot count toward major credit requirements.)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LATIN 101</td>
<td>Elementary Latin I</td>
<td>3</td>
</tr>
<tr>
<td>LATIN 102</td>
<td>Elementary Latin II</td>
<td>3</td>
</tr>
</tbody>
</table>

The major requires 36 credits and permits great flexibility while maintaining academic rigor, breadth, and focus. Many courses are cross-listed with those in other departments (see course descriptions, below).

A. Required Foundation Course: (3 credits)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CL ST 273</td>
<td>Greek and Roman Mythology</td>
<td>3</td>

</tbody>
</table>

Student Learning Outcomes

Upon the completion of their program of study, students with an interdisciplinary studies major in Classical Studies will demonstrate proficiency in three goal areas: Knowledge and Evidence, Interdisciplinarity, and Cross-Cultural Literacy.

1. Knowledge and Evidence: acquisition and communication of knowledge about the ancient Greco-Roman world through the use, critical evaluation, and contextualization of diverse bodies of evidence.

2. Interdisciplinarity: integration of subdisciplines and other fields and their methodologies to understand the complexities and limitations of various bodies of evidence and connect texts and artifacts to their cultural contexts.

3. Cross-Cultural Literacy: meaningful and creative engagement with multiple perspectives, ability to think from the perspective of a different value system and imagine different everyday experiences and different social norms.

Interdisciplinary Studies Major in Classical Studies (CL ST)

Students interested in pursuing an Interdisciplinary Studies major in Classical Studies should consult the Program Chair (see "Program Faculty" at https://language.iastate.edu/classical-studies/) or an Academic Advisor in the Department of World Languages and Cultures (https://language.iastate.edu/advising/).

Notes

1. The list of acceptable courses may include courses not currently in the list above. Contact the Classical Studies Program director for information on eligible courses.

2. The general requirements for the Interdisciplinary Studies major in the College of Liberal Arts and Sciences must be met. All courses in the major must be at the 200-level or higher. At least 15 credits must be at the 300-level or higher with at least 6 credits at the 400-level or higher. An average grade of C or better must be earned in 15 credits at the 300-level or higher in the major.

3. Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors). In addition, the Department requires a grade of C or better in any course numbered between 350 and 379 in Classical Studies.

4. LATIN 490 Independent Study (1-6 credits, repeatable up to 9 credits): This option will only occasionally be available and only to students who have successfully completed intermediate-level Latin coursework elsewhere.

**Minor in Classical Studies**

The minor in Classical Studies requires 18 credits: 6 credits of Latin and 12 credits of CL ST courses taught in English. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

**a) The following set of courses in Latin: (6 credits)**

<table>
<thead>
<tr>
<th>Course Code</th>

</tbody>
</table>

**b) One of the following introductory courses: (3 credits)**

- CL ST 273 Greek and Roman Mythology (or )
- CL ST 275 The Ancient City

**c) One course in ancient history from those listed below or approved by the program committee: (3 credits)**

- CL ST 402 Greek Civilization.
- CL ST 403 Roman Civilization.

**d) Two additional courses (not used to meet other CL ST minor requirements) from those listed below or approved by the program committee: (6 credits)**

One of these classes (3 crs) must be at the 300-level or above.

The Communication Studies Program focuses on human communication, exploring the ways humans create and negotiate meaning. Communication Studies majors master a focused course of inquiry into interpersonal processes as they create and sustain relationships and impact individuals, groups, and organizations. The Communication Studies curriculum builds primarily on social science traditions in developing a liberal arts education emphasizing human communication. Students in the Communication Studies major study applied communication theory and research in interpersonal, small group, organizational, intercultural, and other contexts.

The Communication Studies (ComSt) major teaches students how to think critically, giving them the ability to examine complex communication issues, and develop and implement strategies grounded in evidence-based research. This prepares students for careers in business and industry and graduate education. Students majoring in ComSt will find their career opportunities enhanced in professions requiring applied communication expertise, e.g., human resource management, public relations, training and development, sales management, recruitment, event planning, sales, management, organizational development, business communication, law, and international and intercultural relations.

Student Learning Outcomes
Upon graduation Communication Studies majors will...

- Develop foundational knowledge of human communication
- Apply human communication strategies in a diverse world
- Evaluate and utilize evidence-based research
- Cultivate communication competence

University-wide Requirements
To meet the University’s Communication Proficiency requirement students are required to take:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

</tr>
</tbody>
</table>

A grade of C or higher is required in ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition, Honors).

Total Credits: 9

Students in all majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. (COMST 310 fulfills the international perspective requirement/COMST 210 and SP CM 323 fulfill the U.S. diversity requirement). Approved courses are listed at: http://www.registrar.iastate.edu/courses/div-ip-guide.html (http://www.registrar.iastate.edu/students/div-ip-guide/). Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

LAS College Requirements
Majors in the College of Liberal Arts and Sciences must complete the LAS World Language Requirement and the LAS General Education Requirements. In accordance with college requirements, an overall average in Communication Studies courses of C (2.0) or better is required. This means students need a 2.0 GPA in the 33 hours taken to fulfill the major requirements in Communication Studies.

The Communication Studies Major
Communication Studies majors must earn at least 120 credits, with 45 credits at the 300-400 levels, and a minimum of 33 credits in COMST.
### Core Requirements (15 credits)

<tr>
<td>COMST 211</td>
<td>Interpersonal Communication</td>
</tr>
<tr>
<td>COMST 301</td>
<td>Human Communication Theory</td>
</tr>
<tr>
<td>Plus six credits from the following:</td>
<td></td>
</tr>
<tr>
<td>COMST 310</td>
<td>Intercultural Communication</td>
</tr>
<tr>
<td>COMST 311</td>
<td>Relational Communication</td>
</tr>
<tr>
<td>COMST 313</td>
<td>Leadership Communication Theories</td>
</tr>
<tr>
<td>COMST 314</td>
<td>Organizational Communication</td>
</tr>
</tbody>
</table>
COMST 317 Small Group Communication
COMST 319 Communication Training and Development
COMST 325 Nonverbal Communication
COMST 330 Computer Mediated Communication
COMST 450 Special Topics in Communication Studies

Credits in COMST 384 Applied Organizational Communication, may not be applied toward the minor. Students must earn an overall average of C (2.0) or better in all courses taken for the minor. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Total Credits 18

Computer Science Overview
http://www.cs.iastate.edu

The undergraduate curriculum in Computer Science leading to the Bachelor of Science degree is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org. This degree equips students with a sound knowledge of the foundations of Computer Science as well as problem-solving and system design skills necessary to create robust, efficient, reliable, scalable, and flexible software systems. The B.S. degree in Computer Science prepares students for graduate study in Computer Science and for various business, industry, and government positions including computer scientists, information technologists, and software developers. The main educational objectives of the Computer Science program at Iowa State University are that its graduates demonstrate expertise, engagement, and learning within two to five years after graduation.

- Expertise: Graduated students should have the ability to establish peer-recognized expertise in the discipline. They should have the ability to articulate this expertise by formulating and solving problems of interest, by creating or deriving value through the application of technology, and by using mathematical foundations, algorithmic principles, and computer science theory in designing, implementing and evaluating computer-based systems and processes which meet the desired needs of their employers.

- Engagement: Graduated students should have the ability to be engaged in the profession through the practice of computer science in industry, academia, or the public sector. They should demonstrate effective teaming and commitment to working with others by applying communications skills and professional knowledge.

- Learning: Graduated students should have the ability to engage in sustained learning through graduate work, professional improvement opportunities, and self-study so that they can adapt to the role played by information processing in ever-changing areas of science, technology, and society.

Student Learning Outcomes

Upon graduation, students should have:

1. An ability to analyze a complex computing problem, and to apply principles of computing and other relevant disciplines to identify solutions.
2. An ability to design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. An ability to communicate effectively in a variety of professional contexts.
4. An ability to recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. An ability to function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
6. An ability to apply computer science theory and software development fundamentals to produce computing-based solutions.

Undergraduate Curriculum in Software Engineering

The Department of Computer Science, together with the Department of Electrical and Computer Engineering, also offer a curriculum leading to an undergraduate degree in Software Engineering. The Software Engineering curriculum offers emphasis areas in Software Engineering principles, process, and practice. Students may also take elective courses in Computer Engineering and Computer Science.

Degree Requirements

A student seeking a B.S. degree in Computer Science must satisfy the requirements of the University and College of Liberal Arts and Sciences (see Liberal Arts and Sciences, Curriculum) and the departmental requirements.

The departmental requirements consist of a minimum of 50 credits in Computer Science and satisfaction of written and oral requirements. Students must earn at least a C- in Math 165, Math 166, and each Computer Science course taken to fulfill the Degree Program. The LAS College requires the major must contain at least 8 credits in courses taken at Iowa State University that are numbered 300 or above and in which the student’s grade is C or higher.

### Undergraduate Minor in Computer Science

The Department of Computer Science offers an undergraduate minor in Computer Science. The minor requires at least 16 credits in computer science courses. Com S 414 cannot be used to fulfill minor requirements.
A minimum grade of C is required in Com S 227 and Com S 228. A minimum grade of C is required in both Com S 311 and the three credits of 300-level Computer Science courses and above. Students must meet all prerequisites for Computer Science courses taken to fulfill the minor. At least 6 credits of the minor must be in courses numbered 300 and above and taken at ISU with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

3 credits in ComS courses at the 300 level or above 3

Certificate in Computing Applications

Students interested in the computing applications, may want to explore the Certificate in Computing Applications; it is a cross-disciplinary course of study in the Colleges of Liberal Arts and Sciences, Engineering, and Business.

Concurrent Bachelors and Masters Degrees

The concurrent B.S./M.S. degree in Computer Science offers highly motivated and focused students the opportunity for accelerated study. Students will be allowed to double count up to 12 credits. This program will pair undergraduate students in the concurrent program with research teams of graduate students and dedicated faculty members prominent in their fields of expertise. Students that declare concurrent enrollment will be considered graduate-level students, and therefore eligible for graduate research assistantships and scholarships. Click here for application instructions (https://www.cs.iastate.edu/concurrent-bsms-computer-science/).

More information can be found here: https://www.cs.iastate.edu/cs.iastate.edu/concurrent-comajor-transfer (https://www.cs.iastate.edu/cs.iastate.edu/concurrent-comajor-transfer/)

**Graduate programs**

The department offers graduate programs leading to degrees of Master of Science (MS) and Doctor of Philosophy (PhD) with a major in Computer Science. The Doctor of Philosophy degree may also be earned with computer science as a co-major with some other discipline. Additionally, the department offers a minor for the students majoring in other disciplines. The department also offers a Master of Science (MS) in Artificial Intelligence. This program is for graduate-level students with strong quantitative backgrounds who are interested in learning AI and machine-learning techniques.

Established research areas include algorithms, artificial intelligence, computational complexity, computer architecture, bioinformatics, computational biology, computer networks, database systems, formal methods, information assurance, machine learning and neural networks, multimedia, operating systems, parallel and distributed computing, programming languages, robotics, and software engineering. There are also numerous opportunities for interdisciplinary research.

Typically, students beginning graduate work in the Department of Computer Science have completed a bachelor's degree or equivalent in Computer Science. However, some students with undergraduate majors in other areas, such as Mathematical, physical, or biological science or engineering become successful graduate students in Computer Science.

For the degree Master of Science, 31 - 34 semester credits is required. A thesis or a creative component demonstrating research and the ability to organize and express significant ideas in computer science is required.

The purpose of the doctoral program is to train students to do original research in Computer Science. Each student is also required to attain knowledge and proficiency commensurate with a leadership role in the field. The PhD requirements are governed by the student's program of study committee within established guidelines of the department and the graduate college. They include coursework (demonstrating breadth and depth of knowledge), a research skills requirement, a preliminary examination, and a doctoral dissertation and final oral examination. The department recommends that all graduate students majoring in Computer Science teach as part of their training for an advanced degree.

Computing Applications Certificate

The Certificate in Computing Applications is a cross-disciplinary course of study in the Colleges of Liberal Arts and Sciences, Engineering, and Business. It is designed for undergraduates not already enrolled in majors in Computer Science, Software Engineering, or Computer Engineering who wish to enhance their degree and employment possibilities by adding expertise in computing applications. The certificate program focuses on teaching students the essential skills required to develop and use computing applications in their subject domains. This certificate program will help students to be successful in today's workplace, ensuring they have the basic knowledge of programming languages and computer systems needed to enhance their employment opportunities.

The certificate program is offered jointly among the three colleges and their respective departments housing the majors of computer science, computer engineering, software engineering, and management information systems.

The program consists of 9 credit hours selected from the core and 12 credits hours in electives.
Enrollment in the certificate

Students should fill the form at https://www.registrar.iastate.edu/sites/default/files/uploads/forms/Curriculum%20Change%20Form%202021.pdf and bring it to Computer Science Advising Center, 1200 Communications Building.

Requirements

• 21 required credits.
• Courses applied to the certificate may not be taken on a pass not-pass basis.
• At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above.
• A minimum of 9 credits used for the certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.
• A student may not receive both an undergraduate major and a certificate of the same name.
• For students earning an Iowa State University baccalaureate degree, a certificate is awarded concurrent with or after the Iowa State University baccalaureate degree.
• A certificate is not awarded until baccalaureate requirements are finished.
• After receiving a baccalaureate degree from any accredited institution, a student may enroll at Iowa State University to earn a certificate.
• A cumulative grade point average of at least 2.00 is required in courses taken at ISU for a certificate.
• A notation of completed certificate will be made on the transcript.

Part I - Core
9-10 Credits

Students will complete either Sequence 1 or Sequence 2

Part II - Electives
12 Credits

Designated Electives for the Certificate

Students will choose one elective course from the following list of courses and are responsible for satisfying the course pre-requisites of the elective selected.

• CPR E 230 Cyber Security Fundamentals
• BCBIO 322 Introduction to Bioinformatics and Computational Biology
• L A 211 Digital Design Methods for Landscape Architecture
• C R P 251 Fundamentals of Geographic Information Systems
• STAT 301 Intermediate Statistical Concepts and Methods
• PSYCH 301 Research Design and Methodology
• SOC 302 Research Methods for the Social Sciences
• ECON 207 Applied Economic Optimization
• Any course at 300 level or above in Computer Science (COM S), Computer Engineering (CPR E), Management Information Systems (MIS), or Software Engineering (S E)

The remaining 9 credits of electives are intended to allow students to develop further computing applications expertise especially within their major. These 9 elective credits can be advanced courses in their major, courses on the above electives list, or any other coursework approved by the Computer Science Advisor on the “request for undergraduate certificate.” At least 9 of the 12 elective credits must be in courses numbered 300 or above and taken at Iowa State University.

Criminal Justice

The Criminal Justice program in the College of Liberal Arts and Sciences offers a Bachelor of Arts degree and a minor in Criminal Justice.

Your adventure begins with your academic advisor. Please contact cjsocadvising@iastate.edu for more information.

Students in this major will learn about the components of the juvenile and criminal justice systems, become acquainted with the issues affecting these systems, apply theoretical concepts to real-world phenomena, interface with criminal justice and social service providers, and plan an academic and/or applied career in criminal justice.

Student Learning Outcomes

Graduates of this program will:
• Understand theories of crime, victimization, and criminal justice (i.e., theories about social bonds, learning, social control, conflict, labeling, rehabilitation, alternatives to incarceration).
• Think critically about crime, victimization, and criminal justice (i.e., be able to apply, critique, compare, and integrate knowledge in the area).
• Understand how race/ethnicity, gender, wealth, and power are related to crime, victimization, and criminal justice.
• Understand and be able to use basic social science research methods, as well as those most relevant to the study of crime, victimization, and criminal justice.
• Be familiar with career paths in the criminal justice system, and make career choices that best fit their career interests.
• Make appropriate decisions, think creatively and be able to express themselves in written and oral communication to supervisors and clients.

Communication Proficiency

According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 150 and ENGL 250. In addition, majors must also take an advanced course in ENGL 302 or ENGL 309 or ENGL 314 with a grade of C or better.

Total Credits: 119-121

Special Topics choices: C J/POL S 320; C J/PHIL 332, 339; C J 335, 351, 352, 354, 360, 402, 404, 405, 406, 410, 451, 470, 484*; and PSYCH 383.

*May take up to 9 credits of C J 484 special topics.

Note: This is an example four-year plan. Your actual semester schedules may vary.

Criminal Justice Minor

The Criminal Justice minor offers an opportunity for students to learn about the components of the criminal and juvenile justice systems, to become acquainted with the issues and problems affecting these systems, to apply theoretical concepts to real world problems, and to plan a career in the criminal justice field.

Students who declare a minor in Criminal Justice are required to complete 18 total credits. Students may do up to nine credits of SOC 460 but only three of those credits may be applied to the minor. Nine credits must be at the 300 or 400 level. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students must have a minimum grade point average of 2.0 in courses for the minor.

Data Science

Overview

Data Science is a rapidly growing academic discipline fueled by the proliferation of rich and complex data emerging from activities in science, industry, and governments. As a result, there is strong demand for data science professionals today in Iowa as well as across the nation and globe, and this market is expected to continue to grow in the next decade. The data science programs are intended for students who wish to study the data science discipline for its own sake as well as for students studying any discipline at Iowa State University with the goal of enabling them to work in data science. The courses in the data science program are designed to provide students with the requisite background that would enable them to take jobs with significant data science components, e.g., establishing and operating data analysis pipelines. The capstone will provide an opportunity for students to apply...
data science concepts to a domain problem while working in a multi-disciplinary team setting.

The Data Science major is intended for students with strong quantitative backgrounds and has the goal of educating students on the technical fundamentals of Data Science, with a focus on developing the knowledge and skills needed to transform data into insights. The major is an excellent opportunity for individuals who want to prepare themselves for the exciting Data Scientist positions that are in high demand today.

The minor in Data Science is intended for students studying any discipline at Iowa State and is designed to give students an in-depth understanding of data science as it is applied to a variety of domains.

The certificate in Data Science is intended for students studying any discipline at Iowa State and is designed to prepare them for future work with significant data science components. The capstone will provide an opportunity for students to apply data science concepts to a domain problem while working in a multi-disciplinary team setting.

**Student Learning Outcomes for Data Science Major**

After successfully completing the program, students majoring in Data Science will demonstrate

1. an understanding of and an ability to apply the following data science concepts, tools and methods to data analysis pipelines:
   a. data acquisition
   b. data preprocessing
   c. exploratory data analysis
   d. inferential and predictive thinking, modeling and analysis
   e. computational thinking, data structures, and algorithms
2. an understanding of ethical, legal, societal, and economic concerns in the application of data science concepts
3. an ability to visualize, interpret and communicate the output of data analysis pipelines to stakeholders
4. an ability to function on multi-disciplinary teams using concepts and tools from data science

See Undergraduate Minor and Undergraduate Certificate subpages for the respective learning outcomes.

**Data Science Major**

**Purpose**

This Bachelor’s of Science degree program in Data Science is intended for students with strong quantitative backgrounds and has the goal of educating students on the technical fundamentals of data sciences, with a focus on developing the knowledge and skills needed to manage and analyze large-scale, heterogeneous data to address a wide range of problems.

**Requirements**

The B.S. in Data Science consists of 120 total credit hours including:

1. 39 credits hours in the major core, three credits of which constitute a capstone course that is expected to provide experiential learning;
2. 9 credit hours in one of eight application emphasis areas to examine applications and theory of data sciences in a specific area; and
3. 23 credit hours of foundation courses. The capstone course will provide an opportunity for students to apply data science concepts to an application area while working in a multi-disciplinary team setting.

</table>
The following courses meet the communication proficiency requirement:

LIB 160  Introduction to College Level Research  1
ENGL 150  Critical Thinking and Communication  3
ENGL 250  Written, Oral, Visual, and Electronic Composition  3

One of the following:

ENGL 302  Business Communication  3
ENGL 314  Technical Communication  3
ENGL 332  Visual Communication of Quantitative Information (cross-listed as STAT 332)

According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250. The Data Science program requires a C or higher in the upper-level ENGL course (302, 314, or 332).

All students must complete 3 credits of US Diversity and 3 credits of International Perspective courses.

To obtain a bachelor's degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, a student must earn at least 45 credits at the 300 level or above taken at a four-year college. All such credits, including courses taken on a pass/not pass basis, may be used to meet this requirement.

Four Year Plan

Arts and Humanities  3  Social Science  3
The major elective courses will come from any one application emphasis area as outlined on the Undergraduate Major page. A student must take at least 9 credits from any single application emphasis area and may choose from: Big Data; Engineering Applications; Optimization; Security; Software Analytics; Statistics; Computational Biology; and Numerical Analysis.

All students are required to take at least 45 hours of courses at the 300+ level or above. This may require taking additional electives.

Data Science Minor

Purpose

The minor in data science is intended for students studying any discipline at Iowa State and is designed to give students an in-depth understanding of data science as it is applied to a variety of domains. The minor in data science will prepare students with the technical and communication skills to enter the workforce as domain experts with data science skills.

Learning Outcomes for Data Science Minor

After completing the minor in data science, students will demonstrate:

- an ability to apply data science concepts, tools and technologies to data analysis pipelines,
- an understanding of ethical, legal, societal, and economic concerns in application of data science concepts,
- an ability to visualize, interpret and communicate the output of data analysis pipelines to stakeholders, and
- an ability to function on multi-disciplinary teams using concepts and tools from data science.

Requirements

The minor in data science requires the completion of 15 credit hours, including 9 credits from the data science core and 6 credits from approved data science electives.

At least 6 credits must be taken in courses numbered at the 300-level or above.

At least 9 credits used for the minor cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.

Courses for the minor cannot be taken on a pass/not-pass basis.

Data Science Certificate

Purpose
The certificate in data science is intended for students studying any discipline at Iowa State and is designed to prepare them for future work with significant data science components. The data science certificate is also available to students who have already earned a Baccalaureate degree from Iowa State or elsewhere. The capstone will provide an opportunity for students to apply data science concepts to a domain problem while working in a multi-disciplinary team setting. The certificate in data science will prepare students with the technical and communication skills to enter the workforce as domain experts with data science skills.

Learning Outcomes for Data Science Certificate
After completing the certificate in data science, students will demonstrate:

- an ability to apply data science concepts, tools and technologies to data analysis pipelines,
- an understanding of ethical, legal, societal, and economic concerns in application of data science concepts,
- an ability to visualize, interpret and communicate the output of data analysis pipelines to stakeholders, and
- an ability to function on multi-disciplinary teams using concepts and tools from data science.

Requirements
The certificate in data science requires the completion of 21 credit hours, including 9 credits from the data science core, 9 credits from approved data science electives, and a three-credit data science capstone experience.

At least 9 credits must be taken in courses numbered at the 300-level or above.

At least 9 credits used for the certificate cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.

Courses for the certificate cannot be taken on a pass/not-pass basis.

Course Requirements for Data Science Certificate

Core Courses (9 credits)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

Earth Science

EARTH SCIENCE

The Earth Science major is a program leading to the bachelor of arts or bachelor of science.

The bachelor of arts emphasizes an interdisciplinary field and prepares the student primarily for a career in secondary education. Apart from the required and supporting coursework listed below, the B.A. program must satisfy the requirements of the Teacher Education Program. The B.S. program provides a broad overview of geology and supporting sciences. This degree pathway is also suitable for students who may want to pursue a career in secondary education or continue on to graduate school. If a student chooses this option and is interested in secondary education, they should contact Dr. Cinzia Cervato for additional guidance.

Student Learning Outcomes

Upon graduation, students should be able to:

- Demonstrate the ability to think critically;
- Exhibit a broad understanding of Earth systems and processes;
- Demonstrate scientific literacy and its application to scientific inquiry and societal concerns;
- Demonstrate proficiency in data collection, management, and analysis including understanding sources of error and/or uncertainty;
- Demonstrate competency with geoscience-specific techniques and field methods.
- Read and critically evaluate relevant literature and information;
- Use appropriate tools from chemistry, physics, biology, mathematics, and data science to solve discipline-specific problems;
- Present information effectively in written and oral forms;
- Work in a team environment in alignment with the ISU principles of community;
- Work independently;
- Attain employment in the geosciences or related fields, or pursue graduate studies.

Earth Science, B.A.

NOTE: Course plan, sequence and credit amounts will vary depending upon which endorsement area(s) a student chooses to pursue. In addition, this plan is solely an example of one possible academic layout. This plan can and likely will be modified based on transfer credit, advanced placement (AP) credit, dual enrollment credit, "test out" credit, course offerings, schedule conflicts and entry term. It is our expectation that students know the requirements of their academic program and develop and follow an academic plan based on their academic catalog and degree audit using their individual academic advisor as a resource in this process.

Potential pathway for the B.A. in Earth Science degree:

Choose from list of approved courses available from an advisor or departmental office.
Graduate Programs

The department offers programs leading to the master of science and doctor of philosophy with majors in Geology, Earth Science, and Meteorology. Students desiring a major in the above fields normally will have a strong undergraduate background in the physical and mathematical sciences. Individuals desiring to enter a graduate program are evaluated by considering their undergraduate preparation and performance along with their expressed goals in the statement of purpose. All prospective students should reach out to individual faculty members who they wish to work with prior to applying.

Programs of study are designed on an individual basis in accordance with requirements of the Graduate College and established requirements for each departmental major. Additional coursework is normally taken in complementary areas such as aerospace engineering, agronomy (soil science), chemistry, civil and construction engineering, computer engineering, computer science, engineering mechanics, environmental science, materials engineering, mathematics, mechanical engineering, microbiology, physics, or statistics. Departmental requirements provide a strong, broad background in the major and allow considerable flexibility in the program of each individual.

A dissertation is required of all Ph.D. candidates.

M.S. students in Geology are required to complete a thesis. The M.S. in Earth Science is available to students electing the non-thesis (Creative Component) option in Geology or Meteorology.

Graduates in Geology specialize in a sub-discipline, but they comprehend and can communicate the basic principles of geology and supporting sciences. They possess the capacity for critical and independent thinking. They are able to write a fundable research proposal, evaluate current relevant literature, carry out the proposed research, and communicate the results of their research to peers at national meetings and to the general public. They work as consultants on engineering and environmental problems, explorers for new minerals and hydrocarbon resources, researchers, teachers, writers, editors, and museum curators.

Ecology, Evolution, and Organismal Biology

Within the Biological Sciences, studies of ecology, evolution, and organisms biology are essential in understanding the complex relationships of life on Planet Earth. Ecology focuses on the interactions among organisms as well as the interactions between organisms and their physical environments. Evolutionary theory addresses the origins and interrelationships of species. Organismal biology studies both the diversity of biological organisms and the structure and function of individual organisms.

Undergraduate Study

The EEOB Department offers several undergraduate majors with other departments. Students interested in the areas of ecology, evolution, and organismal biology should major in Biology, Environmental Science, or Genetics. The Biology Major is administered and offered jointly by the EEOB and GDCB departments. The faculty of EEOB, together with those in GDCB and BBMB, administer and offer the Genetics Major. Faculty in EEOB, in cooperation with faculty from other departments on campus, administer and offer the Environmental Science Major. Each of these majors are available through the College of Liberal Arts and Sciences or through the College of Agriculture and Life Sciences. Faculty in the EEOB Department also teach undergraduate courses at Iowa Lakeside Laboratory (see the Iowa Lakeside Laboratory listing).

The Biology Major, the Environmental Science Major, and the Genetics Major prepare students for a wide range of careers in biological sciences. Some of these careers include conservation of natural resources and biodiversity, human and veterinary medicine, and life science education. These majors are also excellent preparation for graduate study in systematics, ecology, biological diversity, physiology, and related fields. Faculty members in EEOB contribute to the undergraduate courses listed below. The titles and descriptions of these courses are in the Biology section of the catalog.

**Graduate Study**

The department offers graduate work leading to both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees. EEOB graduate students major in one of several interdepartmental majors including Bioinformatics and Computational Biology, Ecology and Evolutionary Biology, Environmental Science, Genetics, Interdisciplinary Graduate Studies, Neuroscience, and Toxicology. The EEOB faculty members are active in the interdepartmental graduate majors and teach a wide range of graduate courses. Faculty research programs cover a wide range of specializations including physiology and physiological ecology; microbiology; animal behavior; evolutionary genetics of plants and animals; modeling of evolutionary and ecological processes; plant and animal systematics; neurobiology; developmental biology; aquatic and wetland ecology; functional, population, community, landscape, and ecosystem ecology; and conservation biology. For further information on faculty research interests check the EEOB web site ([www.eeob.iastate.edu](http://www.eeob.iastate.edu)). Some EEOB faculty teach graduate courses at Iowa Lakeside Laboratory. Field Station courses are also available through the Gulf Coast Marine Laboratory and the Organization for Tropical Studies (see the Biology listing).

Prospective graduate students need a sound background in the physical and biological sciences, as well as in mathematics and English. Interested students should check the Graduate Program link from the EEOB web site for specific admission procedures and updates. The department and majors require submission of Graduate Record Examination (GRE) aptitude test scores. Subject area GRE scores are recommended. International students whose native language is other than English must also submit TOEFL or IELTS scores with their application.

Students who are enrolled in the interdepartmental graduate majors with EEOB affiliation are required to participate in departmental seminars, to participate in research activities, and to show adequate progress and professional development while pursuing their degree. For both the M.S. and Ph.D. degrees, it is expected that research conducted by the student will culminate in the writing and presentation of a thesis or dissertation. Requirements and guidelines for study are provided by the Graduate
College, the EEOB faculty, and the individual student's major professor and Program of Study Committee. General information about graduate study requirements can be found at the web site for the Graduate College and requirements for the interdepartmental majors can be found by following the links from the EEOB web site above. Although not a formal requirement, the EEOB faculty recommends that students pursuing the Ph.D. include teaching experience in their graduate training.

Economics Overview

www.econ.iastate.edu (http://www.econ.iastate.edu)

Economics teaches the ability to reason clearly and to address complex issues using tools and decision-making models from economics, mathematics, and statistics, as well as concepts from the biological, physical, and social sciences. The study of economics also helps students to: develop an understanding of the interactions of technology, human activity, and the environment; apply systematic approaches to making optimal choices; analyze quantitative information; and communicate concepts and findings to industry professionals, organizations, governments, and the general public.

Strong training in economic reasoning serves as a foundation for a variety of rewarding careers and for advanced study in a range of professional and academic fields. Economics majors are provided the tools of critical analysis and human relations skills that are essential for being informed citizens, finding and excelling in many career fields, and becoming lifelong learners.

In addition to the Economics major, the Department of Economics offers degrees in Business Economics and Agricultural Business.

Student Learning Outcomes

The Department of Economics at Iowa State University has general goals for its Bachelor of Science graduates. These goals are for students to be able to solve problems and think critically, engage in economic reasoning, demonstrate leadership skills, communicate effectively, make ethical decisions, understand the environmental impacts of human activities, meet the challenges of living and working in a culturally diverse and global community, develop a capacity for innovation and creativity, and value the importance of life-long learning. Regarding each of these general goals, there are more specific additional goals, namely.

1. Problem Solving/Critical Thinking:
   a. Distinguish factual statements from opinions or value judgments.
   b. Summarize, analyze, and interpret research data and policy issues.
   c. Distinguish causal relationships from correlations.
   d. Determine the accuracy of statements.
   e. Understand the usefulness of abstractions and models.
   f. Identify assumptions and detect bias.
   g. Critically evaluate their arguments and those of others.
   h. Distinguish relevant information from irrelevant information.
   i. Establish priorities.
   j. Apply a holistic approach to solving complex, issue-laden problems.

2. Economic Reasoning:
   a. Distinguish positive ('what is') from normative ('what should be') economics.
   b. Determine the opportunity cost of alternatives.
   c. Apply the concepts of comparative advantage, specialization, and exchange to analyze resource allocation issues.
   d. Identify the conditions under which markets allocate resources efficiently or markets fail.
   e. Apply marginal economic analysis to solve problems.
   f. Conduct comparative static analyses.
   g. Pose and test hypotheses.
   h. Use scientific methods to identify optimal choices among economic alternatives.
   i. Identify decision-makers, objectives, choice variables, incentives, and constraints.
   j. Understand how conclusions depend on assumptions.

3. Leadership:
   a. Organize, facilitate, and participate effectively in a group, team, or organization.
   b. Define a problem or opportunity, implement an action planning process, work toward a goal and justify actions taken.

4. Professional, Interpersonal and Cross-cultural Communications:
   a. Communicate economic and business concepts to professionals, organizations, governments, and the general public.
   b. Obtain information by accessing electronic or traditional media, listening, or by observation.
   c. Read, listen, observe and reflect.
   d. Speak and write clearly and persuasively.
   e. Prepare and present effective visual, oral, written, and electronic presentations.

5. Ethics:
   a. Define and assess their ethical perspectives, sense of moral responsibility, and values.
   b. Identify and critically evaluate contemporary ethical and moral issues in professional and private life.

6. Environmental Awareness:
   a. Explain the physical and biological interactions within ecosystems.
b. Explain how human activities impact the environment and how societies are affected by environmental change.

7. International/Multi-Cultural Awareness:
   a. U.S. Diversity – Students should achieve two of the following outcomes:
      i. Articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues.
      ii. Analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.
      iii. Analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.
      iv. Analyze how cultural diversity and cooperation among social groups affect U.S. society.
   b. International Perspectives – Students should achieve two of the following outcomes:
      i. Analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview.
      ii. Describe and analyze how cultures and societies around the world are formed, are sustained, and evolve.
      iii. Analyze and evaluate the influence of global issues in their own lives.
      iv. Describe the values and perspectives of cultures other than their own and discuss how the influence individuals’ perceptions of global issues or events.
      v. Communicate competently in a second language.

8. Entrepreneurship:
   a. Demonstrate innovation and creativity regardless of context.
   b. Identify and pursue opportunities that produce value.
   c. Be persistent in shepherding necessary resources and managing associated risk to facilitate change.

9. Life-long Learning:
   a. Articulate how continued learning after graduation will enrich their lives.
   b. Identify and participate in new areas for learning beyond the classroom and after graduation.

Degree Requirements
Economics Major, College of Liberal Arts and Sciences
The Economics major in the College of Liberal Arts and Sciences prepares students for advanced studies in Economics, Finance, and Analytics, for professional degrees such as medicine, law and business administration (MBA), and for careers in finance, business and economic research, management, insurance, brokerage, real estate, labor relations, international development, and government service. Candidates for the Bachelor of Science degree with a major in Economics must fulfill requirements established by the College of Liberal Arts and Sciences. For details of undergraduate curricula in liberal arts and sciences, see College of Liberal Arts and Sciences. A double major in Economics and Agricultural Business is permitted. A double major in Economics and Business Economics is not permitted. A major in Business Economics with a minor in Economics is not permitted. A minor in Economics cannot be combined with a major in Agricultural Business, and minors in both Agricultural Business and Economics are not permitted.

Students majoring in Economics are required to take the following courses within the General Education Area of Mathematics:

Choose one of the following pairs: 7-8

<table>
<thead>
<tr>
<th>Course Combination</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 160 &amp; ECON 207 Survey of Calculus and Applied Economic Optimization</td>
</tr>
<tr>
<td>MATH 165 &amp; ECON 207 Calculus I and Applied Economic Optimization*</td>
</tr>
<tr>
<td>MATH 165 &amp; MATH 166 Calculus I and Calculus II</td>
</tr>
</tbody>
</table>

Choose one of the following pairs: 6

<table>
<thead>
<tr>
<th>Course Combination</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 226 &amp; STAT 326 Introduction to Business Statistics I and II</td>
</tr>
<tr>
<td>STAT 341 &amp; STAT 342 Introduction to the Theory of Probability and Statistics I and II</td>
</tr>
</tbody>
</table>

Students planning to attend graduate programs in Economics or related fields are encouraged to take MATH 165 Calculus I, MATH 166 Calculus II, STAT 341 Introduction to the Theory of Probability and Statistics I, and STAT 342 Introduction to the Theory of Probability and Statistics II.

Students planning for careers in the finance industry or government sectors are encouraged to enroll in STAT 226 Introduction to Business Statistics I and STAT 326 Introduction to Business Statistics II.

Students must complete the following courses in economics:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 101</td>
<td>Principles of Microeconomics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 102</td>
<td>Principles of Macroeconomics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 301</td>
<td>Intermediate Microeconomics</td>
<td>3-4</td>
</tr>
<tr>
<td>ECON 302</td>
<td>Intermediate Macroeconomics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 371</td>
<td>Introductory Econometrics</td>
<td>4</td>
</tr>
</tbody>
</table>

Three credits of ECON 230-289, 300-389, 400-489 courses. 3
Nine credits of 400-489 level ECON courses.

ECON 492 Graduating Senior Survey

A minimum of 18 credits of economics coursework must be earned at Iowa State University. Economics majors must earn a minimum GPA of 2.0 across ECON 101 Principles of Microeconomics, ECON 102 Principles of Macroeconomics, ECON 301 Intermediate Microeconomics, and ECON 302 Intermediate Macroeconomics, with no grade in these lower than a C-.

Communication Proficiency Requirement: According to the University-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250. In addition the Economics major requires a grade of C or better in ENGL 302 or ENGL 314.

ENGL 150 Critical Thinking and Communication
ENGL 250 Written, Oral, Visual, and Electronic Composition
or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors
ENGL 302 Business Communication
or ENGL 314 Technical Communication

Students in all ISU majors must complete a three-credit course in both U.S. Diversity and in International Perspectives. The two courses may simultaneously meet the following graduation requirements: Social Science, Arts/Humanities, ECON 400-489, or Econ courses from approved list. Please discuss with our advisor.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. Three of the required 45 credits at the 300+ level must be earned in a general education group outside the group of your major. Economics majors must meet or complete the LAS world language requirement.

Four Year Plan
Bachelor of Science in Economics

Freshman

Fall | Credits | Spring | Credits
--- | --- | --- | ---
ECON 101 | 3 | ECON 102 | 3
ENGL 150 | 3 | ECON 207\(^a\) | 3
LIB 160 | 1 | Arts and Humanities | 3
MATH 160\(^a\) | 4 | Natural Science | 3
Arts and Humanities | 3 | Social Science | 3

14 | 15

Sophomore

Fall | Credits | Spring | Credits
--- | --- | --- | ---
ECON 301 | 4 | ECON 302 | 3

Minor
Economics Minor, College of Liberal Arts and Sciences

For a minor in Economics, students complete a minimum of 15 credits. The minor must include at least 9 credits that are not used to meet any other Department, College, or University requirement.

\(^a\) MATH 165 (Calculus I) and MATH 166 (Calculus II) may be substituted for MATH 160 and ECON 207.

\(^b\) STAT 341 (Introduction to Theory of Probability & Stats I) and STAT 342 (Introduction to Theory of Probability & Stats II) may be substituted for STAT 226 and 326.
Students in the undergraduate majors offered through the Department of Economics are required to participate in workshops and demonstrate competence in methods and econometrics, and two fields from the list above. Students must complete advanced courses in microeconomic and macroeconomic theory, quantitative economics, and macroeconomics. Students must complete advanced courses in microeconomic and macroeconomic theory, quantitative economics, and macroeconomics. Students must complete advanced courses in microeconomic and macroeconomic theory, quantitative economics, and macroeconomics.

Graduate Programs

Graduate Programs in Economics and Agricultural Economics

The Department of Economics offers work toward the degrees Master of Science and Doctor of Philosophy with majors in Economics and Agricultural Economics. The Department also offers minors to students with majors in other departments. For more information, visit our web site at www.econ.iastate.edu (http://www.econ.iastate.edu).

Students do not need to have an undergraduate major in Economics or Agricultural Economics to qualify for graduate work in the Department. However, students must have completed undergraduate coursework in macroeconomics, microeconomics, statistics, calculus, and matrix algebra. Some background in math courses emphasizing logic and proofs is preferred, particularly for the Ph.D.

Candidates for the degree Master of Science (thesis option) are required to complete satisfactorily 30 credits of acceptable graduate work, including preparation of a thesis.

Candidates for the degree Master of Science (non-thesis option) may fulfill requirements by satisfactorily completing 32 credits of acceptable graduate work, including preparation of a creative component.

Programs of study for the doctorate are organized by each student in consultation with the major professor and the student’s committee. Subject to staffing constraints, the Department offers coursework to support the following fields of concentration: agricultural economics, applied econometrics, environmental and resource economics, financial economics, human resources, industrial organization, international economics, and macroeconomics. Students must complete advanced courses in microeconomic and macroeconomic theory, quantitative methods and econometrics, and two fields from the list above. Students are required to participate in workshops and demonstrate competence in theory by passing qualifying examinations.

English

UNDERGRADUATE STUDY

Students in the undergraduate majors offered through the English department (https://engl.iastate.edu/) develop critical thinking, cultural awareness, effective communication, imagination, leadership, pedagogy, and agency as citizens.

In a communication-rich and globally connected world, these skills play a crucial role in every profession. Studying in English expands and deepens individual engagement in the social, cultural, artistic, scientific, technical, and environmental work of society.

Students interested in majoring in English can choose from this range of options:

- BA in English (https://engl.iastate.edu/undergraduate-students/majors/) (with possible emphases in Literature, Creative Writing, Film, Literary Editing, or Rhetoric)
- BA with a double major in English and Education (for students seeking licensure in secondary education with an opportunity to earn an ESL endorsement as well)
- BS in English (by fulfilling BA in English requirements and taking 12 additional credits in natural science, social science, or mathematics)

The Department of English also offers undergraduate majors in Speech Communication (https://engl.iastate.edu/undergraduate-students/majors/www-speechcomm-iastate-edu-2/) (involves emphasis on oral communication and civic discourse), Technical Communication (http://catalog.iastate.edu/collegeofliberalartsandsciences/technicalcommunication/) (emphasis on producing workplace and civic documents, particularly in expert or technical subjects), and Linguistics (https://catalog.iastate.edu/collegeofliberalartsandsciences/linguistics/). These diverse majors within English prepare students for careers that span law, medicine, theology, business, education, advocacy, event planning, management, marketing, publishing, nonprofit and government communication, public service, sales, and speech writing, library science, web design and communication consulting, editing, software documentation, usability and user experience, as well as scientific, technical, and environmental writing. Adding a major or minor in English to your field of study at Iowa State increases your communication, analytical, and critical thinking skills and will play a key role in your life as a student and in your life after graduation.

BA/BS in English Learning Outcomes

Students who major in English (with a BA or BS) will be able to

- analyze how texts and media reflect, shape, or challenge diverse intellectual, political, and/or cultural concerns in their eras and our own.
- understand, apply, analyze, synthesize, and evaluate content knowledge. Competencies include discipline-specific terms, history of the field, theories in the field, elements of criticism, and cultural knowledge.
• engage in critical thinking and effective communication by analyzing and interpreting information and ideas, conducting research, and making connections between and among divergent views.
• plan, prepare, present, and evaluate written, oral, visual, and electronic communication. These competencies include scholarly skills and tools; communication that is analytical, persuasive, and/or expressive; and peer and self-editing.

Students who choose the English Education Emphasis will additionally be prepared to
• understand how learners grow and develop, valuing individual differences and cultural diversity to ensure inclusive learning environments.
• apply the content area’s central concepts and structures by using a variety of instructional strategies, including technology, to encourage student creativity, problem solving, and collaboration.
• use multiple methods of assessment to engage learners in their own growth, monitor learner progress, and guide the teacher’s and learner’s decision making.
• create instructional plans that support students in meeting rigorous learning goals by drawing upon the content area knowledge, curriculum, cross-disciplinary skills, and pedagogy.
• evaluate one’s pedagogy for the effects of choices and actions on others (learners, families, other professionals, and the community).

BA and BS in English Requirements

The English major offers a flexible degree that allows students to gain experience in fields such as literature, rhetoric, creative writing, English education, film, literary editing, and professional communication. The Undergraduate Program of Study is designed so that majors can experience the broad, diverse scope of English studies and configure a course plan to match their personal interests and professional goals. Suggested degree plans for several customizations are available; therefore, students may choose and combine courses in any way that meets the requirements for the degree.

Students interested in the BA degree in English need to complete 36 credits, based on the table below. Students interested in the BS degree in English need to complete the BA requirements, plus 12 additional credits in linguistics, natural science, mathematics, social science, or selected courses in kinesiology.

For those students seeking licensure in English education, the degree plan includes certain specific requirements indicated below by an asterisk (*). More information on specific teacher licensure requirements is available in the ISU Catalog (http://catalog.iastate.edu/collegeofliberalartsandsciences/english/4yearplanenglisheducationbatext) or from the English Education Adviser, Pat Johnson.

To graduate with a major in the English department and meet the university-wide Communication Proficiency Grade Requirement, a student must have
• earned credit for, or received a grade of at least a C in ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition
• completed and earned at least a C in one of the department’s advanced communication courses
• earned at least a C or higher in each of the ENGL courses applied to the ENGL major

English majors transferring from other institutions must take at least 18 of their credits in English while at Iowa State.

Choose 4: English Electives at the 200, 300, and 400 level (does not include ENGL 250) (Students seeking teacher licensure must take 219*, 220*, 354*, and 420*).

Total Credits 36

All English majors must also complete the following requirements, which may overlap with the above requirements.

Three credits in Literature of Social and Environmental Justice (340s, 352, 355, 389)*

Nine credits in English classes with a historical perspective* (choose from the following or any 340s, 350s, 360s, or 370s course)

ENGL 201 Introduction to Literature
ENGL 225 Survey of British Literature to 1800 *
ENGL 226 Survey of British Literature since 1800
ENGL 227 Survey of American Literature to 1865
ENGL 228 Survey of American Literature since 1865 *
ENGL 237 Survey of Film History
ENGL 260 Introduction to Literary Study
ENGL 389 Postcolonial Literature
ENGL 393 The History of Children’s Literature
ENGL 395A Study and Travel: Literature
ENGL 420 History of the English Language *

Fifteen credits of major requirements must be at the 300 level. 15

Nine credits of major requirements must be at the 400 level. 9

Teacher Licensure Courses

Students seeking teacher licensure in Teacher Education should consult their advisor for a complete list of courses that meet major requirements and specialized licensure requirements (see Teacher Education section in this catalog). Among those licensure requirements are the following additional courses in English:

ENGL 353 World Literature: Western Foundations through Renaissance *
ENGL 397 Practice and Theory of Teaching Writing in the Secondary Schools *
ENGL 494 Practice and Theory of Teaching Literature in the Secondary Schools *
ENGL 417 Student Teaching *

† Arranged with instructor.

Additional course requirements outside English for students seeking teacher licensure include the following:

EDUC 203 A Connected World: Technology for Learning, Creating, and Collaborating 1
EDUC 204 Social Foundations of Education in the United States: Secondary 3
EDUC 280A Pre-Student Teaching Experience 1-2
EDUC 303 Introduction to Educational Technology 1
EDUC 403 Intermediate Educational Technology 1
EDUC 395 Teaching Disciplinary Literacy 3
EDUC 406 Social Justice Education and Teaching: Secondary 3
EDUC 426 Principles of Secondary Education 3
SP ED 401 Teaching Secondary Students with Exceptionalities in General Education
PSYCH 230 Developmental Psychology
PSYCH 333 Educational Psychology
HIST or POL S American History or Government
SP CM 212 Fundamentals of Public Speaking or THTRE 358 Oral Interpretation
EDUC 480E Pre-Student Teaching Experience III: English 1-2

Some of these courses taken to meet licensure requirements may also meet General Education requirements for the college.

ESL Endorsement Requirements

At Iowa State University, ESL is an add-on endorsement, which means that students need to be certified in another area and to take all basic teacher preparation courses. The growing number of English learners in our public schools make the ESL endorsement a useful addition to a teaching license.

To add English as a Second Language, students must earn credits in the following courses. In some cases, relevant special topics courses or experimental courses may be substituted. Some courses have prerequisites.

ENGL 219 Introduction to Linguistics 3
ENGL 220 Descriptive English Grammar 3
ENGL 425 Second Language Learning and Teaching 3
ENGL 322 Language and Society or EDUC 420 Bilingualism & The Education of Latinx Youth or EDUC 520 Bilingualism & The Education of Latinx Youth
ENGL 318 Introduction to ESL methods and materials and Introduction to Teaching ESL Literacy (ENGL/LING 318, ENGL/LING 324) 6

OR
### ENGL 324 & ENGL 325
Introduction to Teaching ESL Literacy and Teaching Methods for ESL Learners: Oral Communication Skills (ENGL/LING 324, ENGL/LING 325)

Practicum courses taken through the School of Education at ISU

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check [http://www.registrar.iastate.edu/courses/div-ip-guide.html](http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

of career paths, including teaching at the secondary or college levels, publishing, research, administration, and work in nonprofit sectors. For individuals interested in pursuing research and 4-year university teaching, the specialization in Literature provides excellent pre-PhD preparation through this program's small class sizes, research opportunities, and professionalization. The specialization in Literature and the Teaching of Reading is designed for licensed teachers who wish to take graduate literature courses and work toward a reading endorsement by taking three reading courses in Curriculum and Instruction.

The MA in Rhetoric, Composition, and Professional Communication (RCPC) (https://engl.iastate.edu/ma-coursework-program-of-study/) prepares students for careers as professional communicators, including careers in technical and business writing, web design, web usability, and technical editing. Graduates also are prepared to teach writing, including business and technical communication, at the postsecondary level. Students can choose to complete a thesis or one of two creative-component options.

The MA in TESL/Applied Linguistics (TESL/AL) (https://apling.engl.iastate.edu/ma-program-in-tesl-applied-linguistics/) prepares students for careers in teaching English to non-native speakers of English, either in the U.S. or abroad. Students with MA degrees in TESL teach adults and younger learners in a wide variety of contexts, supervise language programs, work for testing organizations, and create language teaching materials. Students admitted to the degree program can choose among optional specializations: Computer-Assisted Language Learning (CALL), Language Assessment, English for Specific Purposes (ESP), Literacy, Literature in ESL, Teaching English to L1 Spanish Learners, and Corpus and Computational Linguistics. The MA in TESL/Applied Linguistics (https://apling.engl.iastate.edu/ma-program-in-tesl-applied-linguistics/) has a language requirement that may be fulfilled in a number of ways. Students whose native language is other than English are considered to have met the language requirement after satisfying the Graduate College English requirement.

The Master of Arts (MA) degree programs require a minimum of 30 hours of graduate credit, including a final thesis or creative component (3 credits).

The Master of Fine Arts (MFA) program in Creative Writing and Environment (CWE) (https://www.engl.iastate.edu/creative-writing/mfa-program-in-creative-writing-and-environment/) cultivates in its students an interdisciplinary approach to research and writing. The program’s unique design allows writers to develop a heightened environmental imagination that finds expression in quality, publishable works of fiction, nonfiction, poetry, and drama. The program is designed to prepare students for careers as writers, teachers, editors, and environmental educators. The MFA degree requires 54 hours of graduate credit: a core of creative writing and other English courses, a book-length thesis (6 credits).
the study of literature and film that includes a diversity of authors/directors, genres, theories, and cultural-historical contexts.

- Communicate research effectively through oral and written presentations.
- Conduct independent scholarship in ways that consistently demonstrate ethical practice and professionalism.
- For graduate students who receive a teaching assistantship, develop strategies for the effective teaching of undergraduate students.

MA in Rhetoric, Composition, and Professional Communication

The RCPC program combines the pedagogy focus of a degree in rhetoric and composition with the technical skill and practicality of a degree in professional communication. Upon graduation, students will demonstrate the ability to

- understand the interplay of rhetoric, composition, and professional communication in local and global contexts.
• analyze a rhetorical situation and develop communication that responds to it effectively and ethically.
• develop communication that helps build a socially just society.
• use communication to contribute to an affirming and inclusive classroom/workplace environment.
• apply the historical and theoretical understanding necessary to assess the use of specific communication technologies within complex organizations.
• combine verbal and visual communication skills to produce effective communication in contemporary organizations.

Measures for evaluating a student’s success in meeting these objectives include

• achievement on coursework
• familiarity with useful and common software programs and technologies
• successful completion of a thesis or a creative-component project

MA in TESL/Applied Linguistics

• Demonstrate independence, reflective practices, and professionalism in teaching and assessment of English as a second language.
• Demonstrate knowledge of and confidence with the use of computer applications relevant to English language teaching.
• Formulate important research questions for guiding investigations that contribute to theory and practice in one or more areas of applied linguistics.
• Carry out research in one area of applied linguistics that will increase understanding of English language teaching.
• Evaluate research in the field to identify its contribution to theory, research, and practice in applied linguistics.
• Communicate ideas, discoveries, and findings to others in a professional and creative manner.
• Collaborate with other professionals to create and investigate new knowledge, practices, and products for English language teaching.

MFA in Creative Writing and Environment

• Demonstrate understanding of craft and professional practice through coursework, workshops, and completion of refined imaginative literary manuscripts in multiple genres.
• Identify, research, and examine—through coursework, fieldwork, and literary practice—the natural world and the environmental imagination.
• Broaden and deepen understanding of literary and theoretical traditions of the major genres and the methodologies of craft analysis and practice.

• Demonstrate knowledge of and confidence with the use of computer applications relevant to teaching, learning, research, and assessment in applied linguistics.
• Design, implement, and evaluate algorithms for automating linguistic analysis tasks based on knowledge of natural language and speech processing programming.
• Formulate important research questions for guiding investigations that contribute to theory and practice in one or more areas of applied linguistics.
• Apply principles of research methodology to design data collection and analysis procedures to address research questions in at least one area of applied linguistics.
• Interpret and evaluate findings in view of their contribution to theory, research, and practice in the relevant area.
• Communicate ideas, discoveries, and findings to others in a professional and creative manner.
• Collaborate with other professionals to create and investigate new knowledge, practices, and products.
• Demonstrate independence and professionalism in teaching and research.

PhD in Applied Linguistics and Technology

• Broaden and deepen understanding of the cultural and natural environment through significant coursework in environmental courses available at Iowa State University both within and beyond the MFA program and English department.
• Design, write, workshop, refine, and defend a significant body of publishable- or production-quality imaginative writing, including a full-length thesis manuscript, which demonstrates professional understanding and application of craft and technique, literary tradition, and the environmental imagination.
• Gain practical training and experience in creating and fostering a healthy literary community and sustaining a professional life in letters through teaching and research assistantships and internships, literary journal editorial internships and positions, as well as land stewardship, reading series, and other outreach opportunities.

PhD in Rhetoric and Professional Communication

At the time of graduation, RPC students will demonstrate an ability to

• understand theories, research methods, and concepts in rhetoric, professional communication, and multimodal composition.
• apply these theories, research methods, and concepts in scholarly activity, including research and teaching.
• use a variety of technologies and media for scholarly research and for developing audience-centered communication.
Environmental Science

Interdepartmental Undergraduate Programs

Environmental Science provides an integrated, quantitative, and interdisciplinary approach to the study of environmental systems. The magnitude and complexity of environmental problems are creating a growing need for scientists with rigorous, interdisciplinary training in environmental science. The Environmental Science program is designed to prepare students for positions of leadership in this rapidly changing discipline. Environmental Science graduates have a solid foundation in biological and physical natural sciences and the specialized training necessary for integrated analysis of environmental systems.

Undergraduate Study

The Environmental Science undergraduate major is offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Sciences. Environmental Science majors complete foundation courses in biology, chemistry, earth science, geology, physics and mathematics, plus a major consisting of an integrated core of Environmental Science courses and additional advanced course work in Environmental Science. Scientific rigor is stressed throughout the program, beginning with the foundation courses in the first two years of the curriculum. The upper level core courses emphasize a dynamic systems approach that provides a framework for integrating physical, chemical, and biological aspects of environmental systems.

Student Learning Outcomes

Upon graduation, students should be able to:

Demonstrate a broad understanding of environmental systems and issues utilizing an interdisciplinary framework to integrate ideas and concepts from biological and physical natural sciences

Demonstrate proficiency in data analysis and problem-solving of relevant environmental systems/problems

Use a systems approach to conduct integrated, quantitative, and interdisciplinary analyses and modeling of environmental systems and problems

From the College of Liberal Arts and Sciences

http://www.ensci.iastate.edu

Students seeking an Environmental Science major complete the following:

1. A foundation of approved supporting courses in science and mathematics including biology, chemistry, earth science, physics, calculus, and statistics.

2. 32 credits of course work in the major, including a required core of 20 credits.

A combined average grade of C or higher is required in courses applied in the major.

1. Environmental Science: 32 credits

Total Credits: 21-24
Students complete at least 2-7 credits in Environmental Science including ENSCI 110, 201, 250, 381, 382 and 15 additional credits of approved ENSCI coursework.

Students complete at least 12 credits in arts and humanities and 9 credits in social science from approved lists. These credits can also be used to meet the U.S. Diversity and International Perspectives requirements.

Students choose one course from the following Earth Science related courses: AGRON 182, BIOL 212, GEOL 100, GEOL 201, MTEOR 206. Students choose from one of the following Organic Chemistry options: CHEM 231 & 231L, BBMB 2221, or AGRON 259.

### Graduate Study

Contact information for the graduate program:

**Lynette Edsall**  
camelot@iastate.edu (mstolt@iastate.edu)  
515-294-1191  
https://enscigrad.iastate.edu/

The Environmental Science graduate program offers an interdepartmental curriculum leading to M.S. and Ph.D. degrees with a major in Environmental Science. Faculty from the colleges of Agriculture and Life Sciences, Engineering, and Liberal Arts and Sciences cooperate to offer courses and research opportunities covering a broad array of environmental topics. Cooperating departments include Agricultural and Biosystems Engineering; Agronomy; Animal Science; Civil, Construction and Environmental Engineering; Ecology, Evolution and Organismal Biology; and Geological and Atmospheric Sciences.

Applicants should have completed an undergraduate or master's degree in one of the biological, chemical, physical, or engineering sciences or should have equivalent preparation.

The Environmental Science Graduate Program emphasizes fundamental concepts and research, which at the same time address major environmental issues. The curriculum is designed to provide the interdisciplinary approach needed in environmental science education and research. In addition to work in their chosen area of specialization, students are afforded a broad exposure to the biological, chemical and physical aspects of environmental systems and the specialized training necessary for integrated analysis of these systems.

Information on application procedures, curriculum requirements, and faculty research areas is available on the Environmental Science Graduate Program website (https://enscigrad.iastate.edu/).
Environmental Studies

Interdepartmental Undergraduate Program

Environmental Studies deals with the relationship and interactions between humans and the environment. Students in any college at ISU may elect to take a secondary major or minor in Environmental Studies. The curriculum is designed to give students an understanding of current and emerging environmental issues and an appreciation of different perspectives regarding these issues. Courses are provided for students pursuing careers related to the environment and for others who simply want to know more about environmental issues.

Student Learning Outcomes

Upon graduation, students should be able to:

- Demonstrate a broad understanding and appreciation for a range of environmental issues spanning natural and human systems
- Demonstrate an understanding and appreciation of different perspectives regarding environmental issues
- Demonstrate an understanding of approaches used in addressing environmental problems including data analysis and problem-solving

Secondary Major

The Environmental Studies secondary major is taken in addition to a first major and provides the breadth of preparation and integrated perspective necessary to understand environmental issues. Students seeking a major in Environmental Studies complete 24 credits of ENV S coursework including:

At least one general survey course chosen from:
- ENV S 101 Environmental Geology: Earth in Crisis
- ENV S 120 Introduction to Renewable Resources
- ENV S 173 Environmental Biology
- ENV S 201 Introduction to Environmental Issues

At least one integrative/issues course chosen from:
- ENV S 160 Water Resources of the World
- ENV S 204 Biodiversity
- ENV S 324 Energy and the Environment
- ENV S 342 World Food Issues: Past and Present
- ENV S 404 Global Change
- ENV S 424 Sustainable and Environmental Horticulture Systems
- ENV S 450 Issues in Sustainable Agriculture

At least two human/societal perspectives courses chosen from:
- ENV S 293 Environmental Planning
- ENV S 320 Ecofeminism

Beyond these three requirements, any Environmental Studies course and up to six credits of approved environmental coursework outside of Environmental Studies may be applied toward the 24 credit total for the major. Regardless of their home college, Environmental Studies majors must complete at least 9 credits in natural sciences from the LAS General Education approved course list. Unless prohibited by program or college rules, courses used to fulfill requirements of the Environmental Studies major may also be used to satisfy general education and other requirements of departments and colleges. A combined average grade of C or higher is required in courses applied to the major.

Minor

Students seeking a minor in Environmental Studies complete 15 credits of approved Environmental Studies coursework including:

At least one general survey course chosen from:
- ENV S 101 Environmental Geology: Earth in Crisis
- ENV S 120 Introduction to Renewable Resources
- ENV S 173 Environmental Biology
- ENV S 201 Introduction to Environmental Issues

At least one integrative/issues course chosen from:
- ENV S 160 Water Resources of the World
- ENV S 204 Biodiversity
- ENV S 324 Energy and the Environment
- ENV S 342 World Food Issues: Past and Present
- ENV S 404 Global Change
- ENV S 424 Sustainable and Environmental Horticulture Systems
- ENV S 450 Issues in Sustainable Agriculture

At least two human/societal perspectives courses chosen from:
- ENV S 293 Environmental Planning
- ENV S 320 Ecofeminism
- ENV S 334 Environmental Ethics
- ENV S 345 Population and Society
Genetics

Genetics is the scientific study of heredity. Understanding the basis of heredity is fundamental to all aspects of the life sciences, from the most basic molecular study to applied studies of agricultural species. At Iowa State University the study of the life sciences is interdepartmental, involving faculty in the basic, agricultural, and veterinary sciences. Faculty in 20 different departments are involved in genetics research. This large group of faculty presents a broad range of possibilities for students to learn from faculty who are at the forefront of research in many areas of genetics.

UNDERGRADUATE STUDY

Undergraduate study in genetics is jointly administered by three departments: the Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology; the Department of Genetics, Development, and Cell Biology; and the Department of Ecology, Evolution, and Organismal Biology. Undergraduate degrees are offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Science. Programs of study for genetics majors leading to a B.S. degree are available.

Training in genetics may lead to employment in teaching, research, or a variety of health-related professions. Although some students find employment directly after their baccalaureate training, many students continue their education in graduate or professional programs. Students with the B.S. degree may find employment in the biotechnology, health, or food industries. Recent graduates have also developed careers in conservation biology, technical writing, science journalism, technical sales, and business.

The required course work and associated electives provide students with the foundation in basic life sciences, mathematics, chemistry, and physics that is essential for professions involving modern biological/biomedical sciences. As part of these courses students develop skills in problem solving, critical thinking, writing, and research-related activities in the biological sciences.

Specific entrance requirements for medical and health-related professions are established by the professional schools. Students interested in fulfilling pre-professional requirements for such professions as dentistry, human medicine, genetic counseling, optometry, pharmacy, physical therapy, physicians assistant, and veterinary medicine can major in genetics while fulfilling the pre-professional requirements.

Student Learning Outcomes:

Upon graduation, students earning the BS degree in Genetics are expected to have achieved the following skills and capabilities:

- Comprehensive, detailed understanding of the chemical basis of heredity.
- Comprehensive and detailed understanding of genetic methodology and how quantification of heritable traits in families and populations provides insight into cellular and molecular mechanisms.
- Understanding of how genetic concepts affect broad societal issues including health and disease, food and natural resources, environmental sustainability, etc.
- Understanding the role of genetic mechanisms in evolution.
- The knowledge required to design, execute, and analyze the results of genetic experimentation in animal and plant model systems.
- The ability to recognize the experimental rationale of genetic studies as they are described in peer-reviewed research articles and grant proposals to federal and other funding agencies.
- The ability to evaluate conclusions that are based on genetic data.
- Insight into the mathematical, statistical, and computational basis of genetic analyses that use genome-scale data sets in systems biology settings.
- Understanding the role of genetic technologies in industries related to biotechnology, pharmaceuticals, energy, and other fields.
- Communication skills required in the discipline including oral presentations of research data, published research articles, grant proposals, and poster presentations at conferences.
- Teamwork and leadership skills including group analysis of data, working together in the research laboratory, joint compositions of written reports, substantive participation in research group meetings, etc.

CURRICULUM IN GENETICS - REQUIREMENTS

Total Degree Requirement: 120 cr.

A maximum of 65 cr. from a two-year institution can be applied that may include up to 16 technical cr., up to 9 Pass-Not Pass cr. of free
Electives can be applied; a cumulative GPA of at least 2.0 is required for graduation. Program-approved lists can be found on the Genetics website.

1. Genetics and Life Sciences
A grade of C– or better is required in all Genetics and Life Science courses.

A. Courses required of all Genetics majors

**Genetics, Development and Cell Biology**

The Department of Genetics, Development and Cell Biology (GDCB) is dedicated to biological discovery and excellence in undergraduate and graduate education. The research and teaching mission of the department is to achieve a greater understanding of fundamental principles of life by focusing on basic cellular and subcellular processes, including genome dynamics, cell structure and function, cellular response to environmental and developmental signals, and molecular mechanisms of development. Recognizing that student education is of paramount importance, GDCB strives for excellence in teaching and research. GDCB plays a leading role in undergraduate and graduate training through a variety of activities, including traditional courses, undergraduate internships in research laboratories, and advanced graduate seminar and literature-based courses. Innovative approaches to learning are emphasized throughout the curriculum.

**Undergraduate Study**

The Department of GDCB offers undergraduate majors in conjunction with other departments. Students interested in the areas of genetics, development and cell biology should major in biology, genetics or bioinformatics and computational biology (BCBio). The biology major...
is administered and offered jointly by the GDCB and Ecology, Evolution and Organismal Biology (EEOB) departments. The GDCB faculty, together with those in EEOB and the Department of Biochemistry, Biophysics and Molecular Biology (BBMB), administer and offer the genetics major. Each of these majors is available through the College of Liberal Arts and Sciences or through the College of Agriculture and Life Sciences. BCBio is administered by GDCB and the Departments of Computer Science and Mathematics, and it is available through the College of Liberal Arts and Sciences.

The biology major and the genetics major prepare students for a wide range of careers in biological sciences. Training in biology or genetics may lead to employment in teaching, research, or any of a variety of health-related professions. Some of these careers include biotechnology, human and veterinary medicine, agricultural sciences and life science education. BCBio majors are prepared for careers at the interfaces of biological, informational and computational sciences in the above fields. These majors are also excellent preparation for graduate study in bioinformatics, molecular genetics, cell and developmental biology, neuroscience and related fields. Faculty members in GDCB contribute to the undergraduate courses listed below. The full descriptions of these courses can be found in the biology, genetics and BCBio sections of the catalog.

| BIOL 101 | Introductory Biology | 3 |
| BIOL 110 | Biology Major Orientation | 1 |
| BIOL 111 | Opportunities in Biology | 0.5 |
| BIOL 155 | Human Biology | 3 |
| BIOL 211 | Principles of Biology I | 3 |
| BIOL 211L | Principles of Biology Laboratory I | 1 |
| BIOL 212 | Principles of Biology II | 3 |
| BIOL 212L | Principles of Biology Laboratory II | 1 |
| BIOL 255 | Fundamentals of Human Anatomy | 3 |
| BIOL 255L | Fundamentals of Human Anatomy Laboratory | 1 |
| BIOL 256 | Fundamentals of Human Physiology | 3 |
| BIOL 256L | Fundamentals of Human Physiology Laboratory | 1 |
| BIOL 313 | Principles of Genetics | 3 |
| BIOL 313L | Genetics Laboratory | 1 |
| BIOL 314 | Principles of Molecular Cell Biology | 3 |
| BIOL 328 | Molecular and Cellular Biology of Human Diseases | 3 |
| BIOL 344 | Human Reproduction | 3 |
| BIOL 350 | Comprehensive Human Anatomy | 4 |
| BIOL 352 | Vertebrate Histology | 4 |
| BIOL 394 | International Field Trips in Biology | 1-4 |
| BIOL 423 | Developmental Biology | 3 |
| BIOL 423L | Developmental Biology Laboratory | 1 |
| BIOL 428 | Cell Biology | 3 |
| BIOL 436 | Neurobiology | 3 |
| BIOL 490 | Independent Study | 1 |
| BIOL 494 | Biology Internship | 1-3 |
| BIOL 495 | Undergraduate Seminar | 1-3 |
| BIOL 499 | Undergraduate Research Experience | 1-3 |
| GEN 110 | Genetics Orientation | 1 |
| GEN 112 | Genetics Orientation for Transfer Students | 0.5 |
| GEN 349 | The Genome Perspective in Biology | 3 |
| GEN 409 | Molecular Genetics | 3 |
| GEN 410 | Analytical Genetics | 3 |
| GEN 490 | Independent Study | 1-5 |
| GEN 491 | Undergraduate Seminar, Professional Practice in Genetics Disciplines | 1 |
| GEN 499 | Genetics Research | 1-5 |
| BCBIO 110 | BCBIO Orientation | 0.5 |
| BCBIO 322 | Introduction to Bioinformatics and Computational Biology | 3 |
| BCBIO 401 | Bioinformatics of Sequences | 3 |
| BCBIO 406 | Bioinformatics of OMICS | 3 |

**Graduate Study**

Understanding the genetic blueprint and the functions of cells is critical to virtually all aspects of biology. The basic mission of the Department of GDCB is to achieve a greater understanding of fundamental principles of life. The GDCB faculty and students conduct hypothesis-driven research into the biology of animals, plants and microbes. While research in GDCB is often based on discovery and analysis of molecular mechanisms of life processes, a true understanding of living organisms will ultimately require the integration of molecular mechanisms in the context of dynamic structural components of the living cell. Thus, research efforts within GDCB use molecular, genetic, biochemical, computational and imaging techniques to study systems at increasingly complex levels of organization.

GDCB faculty contribute to a broad but integrated array of cutting-edge research topics. Faculty implement interactive and multidisciplinary approaches that bridge conventional boundaries, and they incorporate experimental and computational biology as complementary approaches. Examples include using genetics and molecular biology to investigate the cellular basis of development, or combining biochemical and computational approaches to study basic subcellular functions, signal transduction or metabolism.

The faculty in the GDCB Department train graduate students in several interdepartmental majors/programs, including bioinformatics and computational biology; ecology and evolutionary biology; genetics and
genomics; immunobiology; plant biology; interdisciplinary graduate studies; microbiology; molecular, cellular and developmental biology; neuroscience; and toxicology. Graduate work leading to degrees in the master of science (M.S.) and doctor of philosophy (Ph.D.) is available.

Prospective graduate students need a sound background in the physical and biological sciences, as well as mathematics and English. Interested students should check the links on the GDCB website (www.gdcb.iastate.edu/) for specific admissions procedures and the latest information about individual faculty and their research programs. The interdepartmental majors and programs require submission of Graduate Record Examination (GRE) aptitude test scores. Advanced GRE scores are recommended. International students whose native language is other than English must also submit TOEFL scores with their application.

Students who are enrolled in the interdepartmental graduate majors and who have affiliations with GDCB are required to actively participate in seminars and research activities, and they are required to show adequate progress and professional development while pursuing their degree. Completion of either the M.S. or Ph.D. requires that research conducted by the student culminates in the writing and presentation of a thesis or dissertation. The Graduate College, the GDCB faculty, and the individual student’s major professor and Program of Study Committee provide requirements and guidelines for study. General information about graduate study requirements can be found at the website for the Graduate College (www.grad-college.iastate.edu/), and requirements for the interdepartmental majors can be found by following the links from the GDCB website (www.gdcb.iastate.edu/ (http://www.gdcb.iastate.edu/)). Although not a formal requirement, the GDCB faculty recommends that students pursuing the Ph.D. include teaching experience in their graduate training.

Geology

Geology

The bachelor of science major in Geology prepares the student for a professional career and/or graduate study in the geological sciences. Graduates work to understand natural processes on Earth and other planets. They are able to apply their knowledge of forces and factors that shape the Earth to reconstruct past environments and anticipate future problems. Graduates provide essential information for solving problems for resource management, environmental protection, and public health, safety, and welfare. They work as consultants on engineering and environmental problems, explorers for new minerals and hydrocarbon resources, researchers, staff members in state and U.S. geological surveys, government regulators, teachers, writers, editors, and museum curators. Graduates are able to integrate field and laboratory data and to prepare reports. They are able to make presentations that include maps and diagrams that illustrate the results of their studies.

Geology as an Additional Major: The Geology program has identified the core of 31 credits of geology courses that can complement a BS degree or major in materials engineering, civil engineering, environmental science, meteorology, or biology for students wishing to earn an additional major in geology. This pathway to earning a Geology major allows students in these academic programs with affinity to geology to complete both programs. Students should work closely with their advisors in each department to ensure that all requirements are met. These programs prepare students for careers or graduate study in the geosciences.

Student Learning Outcomes

Upon graduation, students should be able to:

- Demonstrate the ability to think critically;
- Exhibit a broad understanding of Earth systems and processes;
- Demonstrate scientific literacy and its application to scientific inquiry and societal concerns;
- Demonstrate proficiency in data collection, management, and analysis including understanding sources of error and/or uncertainty;
- Demonstrate competency with geoscience-specific techniques and field methods.
- Read and critically evaluate relevant literature and information;
- Use appropriate tools from chemistry, physics, biology, mathematics, and data science to solve discipline-specific problems;
- Present information effectively in written and oral forms;
- Work in a team environment in alignment with the ISU principles of community;
- Work independently;
- Attain employment in the geosciences or related fields, or pursue graduate studies.

Combined Degrees: A concurrent program is offered which combines a bachelor of science degree in geology and a master of science degree in geology.

Geology

Required courses for BS in Geology include:

<table>

<tr>
<td>ENGL 314</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits  9

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. At least 8 credits in the major from 300+ courses must earn grade C or better. The average grade of all courses in the major must be 2.0 or higher. You must also complete the LAS world language requirement.

FOUR YEAR PLAN

Below is a suggested pathway for new majors.

Geology, B.S.

### Minor - Geology

A minor in Geology may be earned by taking 15 credits of geology coursework, including:

<table>
<thead>
<tr>
<th>Fall Credits</th>
<th>Spring Credits</th>
<th>Summer Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOL 100</td>
<td>How the Earth Works</td>
<td>3</td>
</tr>
<tr>
<td>or GEOL 201</td>
<td>Geology for Engineers and Environmental Scientists</td>
<td>3</td>
</tr>
<tr>
<td>or GEOL 101</td>
<td>Environmental Geology: Earth in Crisis</td>
<td>3</td>
</tr>
<tr>
<td>GEOL 100L</td>
<td>How the Earth Works: Laboratory</td>
<td>1</td>
</tr>
<tr>
<td>GEOL 102</td>
<td>History of the Earth</td>
<td>3</td>
</tr>
<tr>
<td>GEOL 102L</td>
<td>History of the Earth: Laboratory</td>
<td>1</td>
</tr>
</tbody>
</table>

Although many students will take GEOL 100 as the first course in this sequence, GEOL 101 or GEOL 201 may be taken in place of GEOL 100. Note: all students must take GEOL 100L (How the Earth Works: Laboratory). The remainder of the coursework should be at the 300 level or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

### Concurrent Undergraduate and Graduate Programs

A concurrent program is offered which combines a bachelor of science degree in geology and a master of science degree in geology. This program gives well-qualified Iowa State juniors and seniors the...
opportunity to begin working on the M.S. degree before completing the B.S. degree, reducing by at least one year the normal time period necessary to complete both degrees separately. Additionally, a concurrent program exists that gives highly motivated and career-focused students the opportunity to receive a bachelor of science in geology and an M.B.A. (master of business administration). Review the department website (https://ge-at.iastate.edu/) or contact Dr. Cinzia Cervato for more information regarding these programs.

**Graduate Study**

The department offers programs leading to the master of science and doctor of philosophy with majors in Geology, Earth Science, and Meteorology. Students desiring a major in the above fields normally will have a strong undergraduate background in the physical and mathematical sciences. Individuals desiring to enter a graduate program are evaluated by considering their undergraduate preparation and performance along with their expressed goals in the statement of purpose. All prospective students should reach out to individual faculty members who they wish to work with prior to applying.

Programs of study are designed on an individual basis in accordance with requirements of the Graduate College and established requirements for each departmental major. Additional coursework is normally taken in complementary areas such as aerospace engineering, agronomy (soil science), chemistry, civil and construction engineering, computer engineering, computer science, engineering mechanics, environmental science, materials engineering, mathematics, mechanical engineering, microbiology, physics, or statistics. Departmental requirements provide a strong, broad background in the major and allow considerable flexibility in the program of each individual.

A dissertation is required of all Ph.D. candidates.

M.S. students in Geology are required to complete a thesis. The M.S. in Earth Science is available to students electing the non-thesis (Creative Component) option in Geology or Meteorology.

Graduates in Geology specialize in a subdiscipline, but they comprehend and can communicate the basic principles of geology and supporting sciences. They possess the capacity for critical and independent thinking. They are able to write a fundable research proposal, evaluate current relevant literature, carry out the proposed research, and communicate the results of their research to peers at national meetings and to the general public. They work as consultants on engineering and environmental problems, explorers for new minerals and hydrocarbon resources, researchers, teachers, writers, editors, and museum curators.

**History Overview**

The History department offers Bachelor of Arts and Bachelor of Science degrees in History, a Master of Arts degree in History, and a Ph.D. in Rural, Agricultural, Technological and Environmental History. Many history majors also pursue a minor in another discipline, a second major, or secondary teacher certification.

The department offers a variety of survey courses (200 series) for first- and second-year students as either general education courses or as introductions to advanced courses in history or other subject areas. In addition to 200-level survey courses, it offers advanced undergraduate courses in the history of Europe, Asia, Africa, Latin America, the United States, technology and science, agriculture, and other selected topics.

**Student Learning Outcomes**

Upon graduation, students should be able to:

1. Display the appropriate level of cognitive knowledge of historical themes and events based upon the student's course of study
2. Display an understanding of past cultures and social organizations, based on the course of study
3. Develop the fundamental methodological skills of the historical craft: the ability to contextualize and analyze primary source evidence; familiarity with the concepts of historical argument and interpretation, and the ability to formulate effective argumentation in written and oral forms; awareness of the basic historiography in selected research area; and the ability to conduct research and to write a historical essay based upon primary and secondary source research. Students receive an introduction to these concepts in HIST 301 The Historian's Toolbox.
4. Display a sophisticated understanding of the relationship between past events and the present. For purposes of outcomes assessment, History majors must complete three credits from the following list: HIST 495 Historiography and Research Writing; if qualified and willing, one graduate-level research seminar; or if qualified and pursuing teacher certification HIST 498 Methods of Teaching History/Social Sciences.

**Requirements for the History Major**

Minimum 36 total credits of HIST with 2.0 g.p.a. or higher including:

1. Maximum 12 credits at 200-level HIST or below
2. Minimum 24 credits 300+ level HIST including:
   - HIST 301 (minimum grade C)
   - HIST 495, EDUC 498, or HIST graduate-level research seminar (minimum grade C)
• Maximum 12 credits 300-level HIST in addition to HIST 301
• Minimum 9 credits 400-level HIST in addition to HIST 495, EDUC 498 or HIST graduate-level research seminar
• Minimum 15 credits 300+ level HIST taken at Iowa State University

Communication Proficiency requirement: History majors must receive a grade of C or better in ENGL 250 (or ENGL 250H), HIST 301 and HIST 495 or HIST 498.

The BA in History requires the equivalent of 2 years of college-level study in the same world language. Six credits of electives may be replaced by 6 additional credits of world language.

Students seeking teacher certification should contact the History Department directly for the latest information on specific course work required for certification by the State of Iowa. Course work in addition to the degree minimums may be required.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. For a history major, 15 credits of history at the 300/400 level must be taken at ISU. You must also complete the LAS world language requirement.

The BA in History requires the equivalent of 2 years of college-level study in the same world language. Six credits of electives may be replaced by 6 additional credits of world language.

Minor
The department offers a minor in History, which may be earned with 15 credits in History courses, of which at least 9 must be in courses numbered 300 or above, excluding HIST 490 Independent Study. A minimum of 9 credits numbered 300 or above must be taken at Iowa State. The College of Liberal Arts and Sciences requires students to earn a C or higher in at least 6 of the required 300-level credits. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. A student may count a maximum of 3 hours of cross-listed courses originating in another teaching department toward the minor in History. The History minor is most frequently chosen by students majoring in Political Science, English, Journalism, Computer Science, and Business.

Graduate Study
The History Department offers two graduate degrees: an M.A. in History and a Ph.D. in Rural, Agricultural, Technological and Environmental History.

Most history graduate courses are either readings seminars or research seminars. Readings seminars acquaint students with the historical literature of a field and prepare them for careers in teaching and research. Research seminars require students to conduct original historical research and to write research papers reporting the results.

The M.A. in history includes both thesis and non-thesis options. See the departmental website on the M.A. in History for a full discussion of the options and requirements. An M.A. in History serves as the basis for continued study in history, as well as preparation for careers in law, education, business, and government service. Throughout world history human beings have depended on rural and agricultural communities as well as on the technologies developed and employed by these communities to sustain lives. Iowa State’s Doctoral Program in Rural, Agricultural, Technological and Environmental History offers a scholarly community and learning environment dedicated to the close examination of pervasive and enduring questions about these basic aspects of human history. Such questions can best be answered through the multifaceted perspectives provided by rural, agricultural, technological, and environmental history. The result is a dynamic learning experience that leads to comparative and transnational analysis shaped by a broad range of methods drawn from the humanities and social/physical sciences.

The Program’s aim is to produce students who are excellent researchers and engaging teachers, capable of succeeding in a broad variety of professional positions, both inside and outside of academia.

The Ph.D. in Rural, Agricultural, Technological and Environmental History is designed for students who have completed an M.A. in history. Those who have not yet completed an M.A. will be expected to complete the degree while progressing toward the Ph.D. Thirty semester hours of graduate credit are required for the M.A. and 72 for the Ph.D. Students who continue beyond the M.A. are expected to pass preliminary examinations in four areas of specialization, complete a dissertation, and defend it orally in the Ph.D. final examination. See the departmental website on the program for a full description of requirements.

Interdisciplinary Studies
Interdisciplinary Studies Undergraduate Major
Administered by the College of Liberal Arts and Sciences
A major in interdisciplinary studies is offered in the College of Liberal Arts and Sciences for undergraduate students who have unique interdisciplinary educational goals. The student, a faculty review board, and an academic advisor design the major. Leading to either the Bachelor of Arts or the Bachelor of Science degree, the major includes 36 to 48 credits of coursework chosen to provide a coherent, carefully planned program in an area of interest that bridges two or more disciplines. This specialized area is identified on the diploma. Learning goals are individually crafted for each proposed major. All interdisciplinary studies majors must also satisfy the requirements of the liberal arts and sciences curriculum in the College of Liberal Arts and Sciences.

A degree in Interdisciplinary Studies may be particularly attractive to students who wish to develop an area of interest based upon one of the College’s cross-disciplinary programs; the faculty of the cross-disciplinary studies programs in Classical Studies and U.S. Latino/a Studies have laid out an interdisciplinary track for study in those areas.

Students have also worked with faculty to propose Interdisciplinary Studies tracks in areas of interest such as International Relations,
Ecology Studies, African American Cultural Studies, Asian Studies, and Cognitive Studies. Currently students are working with faculty to identify interdisciplinary programs of study in Climate Science and Health Science.

Learning Outcomes
As part of the proposal process students are expected to identify specific learning goals of their proposed interdisciplinary coursework. In addition to meeting the learning goals of the general education program of the College of Liberal Arts and Sciences and meeting university-wide learning goals, Interdisciplinary Studies majors graduates will be able to:

- Integrate knowledge and modes of thinking grounded in interdisciplinary inquiry
- Use methods and tools from multiple disciplines to solve problems
- Connect their learning to their professional goals

Further information about the Interdisciplinary Studies major can be obtained from the LAS College Student Academic Services office.

How to Propose an Interdisciplinary Program
A student seeking admission to the program in interdisciplinary studies develops a proposal in consultation with faculty and an advisor. The proposal will include a program of study and a letter of application that explains how the proposed major meets specific educational and learning goals. Since students are expected to earn at least 30 credits after they are admitted into the program, the proposal is ordinarily submitted to the LAS Associate Dean for Academic Programs during the sophomore or junior year. The proposal will be considered if the area of interest properly falls within the College of Liberal Arts and Sciences and if the student’s educational goals cannot be met by a more traditional combination of existing majors, minors, and electives.

Specific Requirements for the Program of Study
The interdisciplinary studies major must meet College of Liberal Arts and Sciences and University-wide requirements for graduation. In addition, the proposed major must include 36 to 48 credits of coursework chosen to lead to a distinctive set of learning outcomes and bridge two or more disciplines. A major emphasizing the humanities or communicative arts normally leads to a B.A.; a major emphasizing the natural or social sciences normally leads to a B.S. Different requirements for the B.A. and B.S. degrees are determined by the nature of the chosen field of study. Courses listed in the individualized major may come from any department of the university with the following restrictions:

1. The selection of courses needs to focus on a single theme and be consistent with the career and educational goals of the student.
2. At least one half of the courses in the major will come from departments within the College of Liberal Arts and Sciences.
3. The courses will be chosen from at least two disciplines.
4. All courses in the major must be at the 200-level or higher.
5. At least 15 credits must be at the 300-level or higher with at least 6 credits at the 400-level or higher.

An average grade of C or better must be earned in 15 credits at the 300-level or higher in the major.

To meet the English and communication proficiency requirement, a grade of C or better must be earned in ENGL 250 and in either an advanced English composition course or a course in the major with a significant writing component.

Forms and sample proposals are available here (https://iastate.box.com/s/mf3126yj7tobnjq9f4jw67jmxxm8l). Further information may be obtained from the LAS College Student Academic Services office.

Interdisciplinary Studies Major with a track in Classical Studies
Students may pursue an Interdisciplinary Studies Major with a track in Classical Studies by completing a program of study defined by faculty who work in this interdisciplinary program. Additional information is available on the Classical Studies page of the catalog.

Interdisciplinary Studies Major with a track in U.S. Latino/a Studies
Students may pursue an Interdisciplinary Studies Major with a track in U.S. Latino/a Studies (http://catalog.iastate.edu/collegeofliberalartsandsciences/uslatino-a-studies/#interdisciplinarymajortext) by completing a program of study defined by faculty who work in this cross-disciplinary program. Additional information is available on the U.S. Latino/a Studies page of the catalog.

International Studies Overview
Interdepartmental Undergraduate Secondary Major and Minor, Administered by the College of Liberal Arts and Sciences

Through a combination of coursework and study abroad, students who complete a secondary major or minor in International Studies can prepare for careers or advanced study in the international arena, such as foreign service, journalism, advocacy organizations, scientific or research institutions, business, nongovernmental development organizations (NGOs), humanitarian agencies, environmental organizations, human rights organizations, think tanks, international agriculture, and international engineering. Students in International Studies gain an understanding of global issues, learn to communicate across
cultures, develop awareness of cultural ideas and attitudes, and are well positioned to become global leaders in their chosen field.

A secondary major and a minor in International Studies are available for undergraduates. The program requirements are structured around a combination of a designated Topical Module and a Geographic Region, both selected by the student. Each student’s program of study is designed to reflect opportunities at Iowa State University as well as the academic, intellectual, and professional interests of the student.

**Student Learning Outcomes**

Upon completion of the second major in International Studies, students will be able to:

1. Read, write and speak a language other than their native language at an intermediate level to effectively communicate with people from other cultures.

2. Understand factual knowledge about world economic and political systems, events, cultures, and geography and to critically analyze global issues, especially as they relate to globalization.

3. Understand, interpret, and articulate the major processes, theories, and problems of a selected contemporary global issue within a selected world region to also recognize interconnections between local and global issues and events.

4. Live, study, work, and/or volunteer in a selected world region in order to understand, interpret and articulate major cultural values and issues and to appreciate the impact of one’s own cultural and educational experience on their perception of the world.

**Secondary Major**

A student seeking a secondary major in International Studies must successfully complete two core courses plus courses in a selected Geographic Region and Topical Module; demonstrate proficiency in a language relevant to the selected geographic region (see below); and participate in a required study, service, or work abroad program (see below).

**Requirements for the Secondary Major in International Studies:**

- INTST 235 Introduction to International Studies
- INTST 430 Seminar in International Studies
- 9 credits of coursework (at least 6 of which are numbered 300 or above) from one of the following Geographic Regions:
  - Africa and the Middle East
  - Asia
  - Latin America
  - Western Europe
  - Russia, East Europe and Central Asia
  - 9 credits of coursework (at least 6 of which are numbered 300 or above) from one of the following Topical Modules:
    - Global Environmental Issues
    - Globalization and Economic Development
    - International Issues in Science and Technology
    - International Communication
    - International Conflict
    - Social and Cultural Change

**Language Proficiency**

- Proficiency in a world language that is relevant to the selected geographic region. This can be achieved by completing the 202 level (or higher) of the language. Students whose first language is not English must still meet this requirement if their first language is not relevant to their selected geographic region.

**Study/Service/Work Abroad Experience**

- Study, service, or internship abroad for a minimum of 3 weeks, earning a minimum of 3 credits. The credits must be transferable to Iowa State.

The major must include a minimum of 12 credits not used to meet any other department, college, or university requirement.

**Minor**

A student seeking a minor in International Studies must successfully complete two core courses plus courses in a selected Geographical Region and Topical Module; demonstrate proficiency in a language relevant to the selected geographic region (see below); and participate in a required study, service, or work abroad program (see below).

**Requirements for the Minor in International Studies:**

- INTST 235 Introduction to International Studies
- INTST 430 Seminar in International Studies
- 6 credits of coursework (at least 3 of which are numbered 300 or above) from one of the following Geographic Regions:
  - Africa and the Middle East
  - Asia
  - Latin America
Western Europe
• Russia, East Europe and Central Asia
• 6 credits of coursework (at least 3 of which are numbered 300 or above) from one of the following Topical Modules:
  • Global Environmental Issues
  • Globalization and Economic Development
  • International Issues in Science and Technology
  • International Communication
  • International Conflict
  • Social and Cultural Change
• Proficiency in a world language that is relevant to the selected geographic region. This can be achieved by completing the 202 level (or higher) of the language.
• Study, service, or internship abroad for a minimum of 3 weeks, earning a minimum of 3 credits. The credits must be transferable to Iowa State.

Click here (https://iastate.box.com/shared/static/2egqdgj6k8da0qipayf.pdf) for courses approved for credit for the Geographic Regions and Topical Modules.

The minor must include a minimum of 9 credits not used to meet any other department, college, or university requirement.

**Language Proficiency**
• Proficiency in a world language that is relevant to the selected geographic region. This can be achieved by completing the 202 level (or higher) of the language or by passing an approved exam. Students whose first language is not English must still meet this requirement if their first language is not relevant to their selected geographic region.

**Study/Service/Work Abroad Experience**
• Study, service, or internship abroad for a minimum of 3 weeks, earning a minimum of 3 credits. The credits must be transferable to Iowa State.

**Journalism and Mass Communication**

http://www.greenlee.iastate.edu/

The journalism and mass communication major prepares students for careers that involve all aspects of news and information. Emphasis is placed on generating ideas, organizing, writing, editing, and presenting information for various media platforms and audiences. Students work with advisors to develop a program of study that prepares them for work in communication-specific areas including broadcast media, magazines and/or newspapers, photojournalism, science communication, visual communication, and digital media. Coursework in this major focuses on writing, research, digital and emerging media, and professional abilities. Students are required to complete a capstone internship experience to practice and refine their skills.

The Greenlee School of Journalism and Communication prepares students for the field of communication. The school offers three majors:
• Advertising Bachelor of Arts (ADVRT)
• Journalism and Mass Communication Bachelor of Science (JL MC)
• Public Relations Bachelor of Science (PR)

In addition, the Greenlee School offers a 4+1 program allowing students to complete their B.A. or B.S. and earn an M.S. in journalism and mass communication in fewer semesters.

Professional skills are taught and practiced alongside academic requirements using the latest technology and leading-edge communication trends and methods.

Founded in 1905, the unit was one of the first journalism programs to be accredited in 1948 and continues to be one of the longest continuously accredited programs in the country. Accreditation is based on the principle that students need a broad-based, liberal arts education and solid core courses within the discipline. Students taking one major at the school may not seek a second major or minor in the school. All students are required to take a second major or minor outside the school as an area of expertise.

**Student Learning Outcomes**

Students who major in programs of the Greenlee School of Journalism and Communication are expected to develop competencies in 12 key areas:
• understand and apply the principles and laws of freedom of speech and press for the country in which the institution that invites ACEJMC is located, as well as receive instruction in and understand the range of systems of freedom of expression around the world, including the right to dissent, to monitor and criticize power, and to assemble and petition for redress of grievances;
• demonstrate an understanding of the history and role of professionals and institutions in shaping communications;
• demonstrate an understanding of gender, race ethnicity, sexual orientation and, as appropriate, other forms of diversity in domestic society in relation to mass communications;
• demonstrate an understanding of the diversity of peoples and cultures and of the significance and impact of mass communications in a global society;
• understand concepts and apply theories in the use and presentation of images and information;
demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity;

- think critically, creatively and independently;
- conduct research and evaluate information by methods appropriate to the communications professions in which they work;
- write correctly and clearly in forms and styles appropriate for the communications professions, audiences and purposes they serve;
- critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness;
- apply basic numerical and statistical concepts;
- apply current tools and technologies appropriate for the communications professions in which they work, and to understand the digital world.

The Journalism and Mass Communication Major

To receive a bachelor of science degree in journalism and mass communication, a student must earn at least 120 credits. A minimum of 72 credits must come from courses other than ADVRT, JL MC or P R. At least 50 of these credits must come from the liberal arts and sciences. Overall, at least 45 credits must be from 300-level or above.

The degree requirements allow for a minimum of 34 credits and a maximum of 48 credits to be taken in ADVRT, JL MC and P R. These include:

</tbody>
</table>

These additional requirements apply:

University Requirement: Students in all ISU majors must complete a three-credit course in U.S. Diversity, as well as a three-credit course in International Perspectives. The approved course lists are found at the following web addresses: (U.S. Diversity) http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses/ and (International Perspectives) http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/. Students must also demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

College of LAS Requirement: Minimum of 120 credits, including a minimum of 45 credits at the 300-level and above. You must also complete the LAS Foreign Language requirement and any unmet ISU admission requirements.

Greenlee majors and minors cannot take ADVRT, JL MC or P R courses pass/not pass.

Minor or Second Major: Students are required to fulfill a secondary area of expertise. This requirement can be met by declaring a minor or a second major outside of the Greenlee School of Journalism and Communication.

Students taking one major at the school may not seek a second major or a minor in the school.

Juniors can apply to a concurrent degree program and earn a B.S. and an M.S. in journalism and mass communication in fewer semesters.

Contact the Director of Graduate Education for more information on the Greenlee Schools’ 4+1 Program.

These additional requirements apply:

University Requirement: Students in all ISU majors must complete a three-credit course in U.S. Diversity, as well as a three-credit course in International Perspectives. The approved course lists are found at the following web addresses: (U.S. Diversity) http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses/ and (International Perspectives) http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/. Students must also demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

College of LAS Requirement: Minimum of 120 credits, including a minimum of 45 credits at the 300-level and above. You must also complete the LAS Foreign Language requirement and any unmet ISU admission requirements.

Greenlee majors and minors cannot take ADVRT, JL MC or P R courses pass/not pass.

Minor or Second Major: Students are required to fulfill a secondary area of expertise. This requirement can be met by declaring a minor or a second major outside of the Greenlee School of Journalism and Communication.

Students taking one major at the school may not seek a second major or a minor in the school.

Juniors can apply to a concurrent degree program and earn a B.S. and an M.S. in journalism and mass communication in fewer semesters.

Contact the Director of Graduate Education for more information on the Greenlee Schools’ 4+1 Program.

Greenlee majors and minors cannot take ADVRT, JL MC or P R courses pass/not pass.

Concurrent Undergraduate and Graduate Programs

The Greenlee School offers three concurrent degree programs:

B.A. Advertising/M.S. Journalism and Mass Communication
B.S. Journalism/M.S. Journalism and Mass Communication
B.S. Public Relations/M.S. Journalism and Mass Communication

Enrollment in the Greenlee School’s concurrent degree programs enables students to complete coursework for the undergraduate and graduate programs on a five-year accelerated timeline — rather than the typical six-year timeline for the two degrees. Graduates of the concurrent degree program will be prepared to face today’s rapidly changing media environment and contribute to society by becoming a leader within the communication field. Upon completion of the undergraduate program (bachelor’s degree), students can choose between two tracks in the master’s program (master’s degree): one for students who desire specialized study in communication theory and research and one for students who wish to develop or strengthen their professional and strategic communication skills. At the master’s level, the School is well known for developing practitioners and scholars in science communication, political communication, multicultural communication and media industries. The ISU Graduate Handbook outlines policies and requirements for concurrent degree programs. Concurrent degree students must complete all academic requirements and required coursework for both degrees.

To be eligible for a concurrent degree program, currently enrolled Greenlee ADVRT, JL MC or P R students must 1) be defined as seniors by their number of cumulative ISU credits (90 credits or more) and 2) have successfully completed JL MC 201 (required of all three undergraduate majors) with a C+ or better. Before beginning graduate coursework, concurrent degree candidates must formally indicate their interest by contacting the Greenlee School’s Director of Graduate Education. Interested students must then apply to the master’s program no later than March 1 of the year prior to taking graduate coursework. Application and admissions requirements for the master’s program (https://greenlee.iastate.edu/graduate/graduate-admissions/) are the same for concurrent students as those applying to the master’s program after completing an undergraduate degree. A thesis or creative component is required for all concurrent degree students.

To receive a bachelor of science/arts degree from the Greenlee School in advertising, journalism or public relations, a student must earn at least 120 credits and complete all required courses. To receive a master’s of science degree from the Greenlee School in journalism and mass communication, a student must earn at least 32 credits and complete all required courses.

Preference for assistantships will be given to students who have completed all of their undergraduate coursework.

Student Learning Outcomes

1. To develop an understanding of the central issues and current research important to the field of journalism and communication.
2. To be familiar with the breadth and depth of the journalism and communication profession.
3. To be able to communicate acquired knowledge in the field.
4. To be aware of ethical issues that pertain to the field of journalism and communication.
5. To develop the ability to design and present an independent and meaningful research project.

Graduate Programs

Master of Science

The Greenlee School of Journalism and Communication offers work for a master of science degree in journalism and mass communication.

Majors plan a program of study in one of two tracks:

I. Academic track — The School offers advanced academic preparation in communication theory and research, leading to the master of science degree. Graduate work prepares students to use and contribute to research and scholarship in the field of communication. This track requires a thesis based on original research, which must be defended successfully before a committee at the end of the program.

Areas of research emphasis include: science and risk communication, media effects, advertising, public relations, political communication, communication technology, law and ethics, international communication, visual communication and emerging media.

II. Professional track — The School offers advanced professional study in journalism and mass communication leading to the master of science degree. Graduate work prepares students for professional careers in a variety of mass communication fields. Students with limited training or experience in journalism and mass communication may include skills courses in their programs, but the credits for those courses may not count toward the graduate degree. This track requires either a creative component which must be defended successfully before a committee at the end of the program.

All graduate students must complete 32 credits for graduation, comprised of four core classes, at least two electives outside the Greenlee School, and at least four thesis or creative component credits.
The following core courses account for 10 credits of the needed 32 credits.

Each student selects elective courses based on his/her area of emphasis and career goal, in consultation with the student's major professor and Program of Study Committee.

Student Learning Outcomes
1. To develop an understanding of the central issues and current research important to the field of journalism and communication.
2. To be familiar with the breadth and depth of the journalism and communication profession.
3. To be able to communicate acquired knowledge in the field.
4. To be aware of ethical issues that pertain to the field of journalism and communication.
5. To develop the ability to design and present an independent and meaningful research project.

Graduate Minor
The Greenlee School graduate program offers minor work for students majoring in other departments. The M.S. minor requires:

- JL MC 501, JL MC 510 and one other course in journalism and mass communication for a total of 9 credits taken within the Greenlee School.

Concurrent Programs
The Greenlee School's concurrent degree programs enable interested students the opportunity to complete coursework for the undergraduate and graduate programs on a five-year accelerated timeline – rather than the typical six-year timeline for the two degrees.

Latin American Studies Certificate
Interdepartmental undergraduate program

The certificate in Latin American Studies is a cross-disciplinary course of study in the College of Liberal Arts and Sciences and is designed for undergraduates in any major who wish to enhance their degree and employment possibilities by adding expertise in Latin America and competence in the Spanish language.

Objectives
- Provide opportunities for students to develop skills and understanding about issues concerning Latin America by bringing them into contact with faculty members from many different academic backgrounds
- Provide students with an international immersion experience where they gain cultural awareness and sensitivity
- Prepare students for work or advanced study in Latin America, such as in foreign service, journalism, advocacy organizations, scientific or research institutions
- Help students acquire proficiency in one of the principal languages of Latin America (Spanish)
- Guide students in interdisciplinary study leading to an understanding of the multi-faceted picture of the past, present, and future of Latin America

Learning Outcomes
Upon Completion of the Certificate in Latin American Studies, students will be able to:

- Demonstrate understanding of key concepts pertaining to Latin American cultural, historical and political events
- Understand, interpret and articulate the major processes, theories and problems of selected contemporary and historical issues in Latin America
- Demonstrate oral, aural, and written proficiency in Spanish equivalent to the mid-advanced level
- Effectively communicate with persons of Latin American cultures
- Become effective global citizens through knowledge and comparison of the cultures and issues of the United States and Latin American countries
- Be able to read Latin American cultural, literary, and historical texts in the target language with comprehension and analytical insight
- Demonstrate awareness of cultural values, beliefs, and ideologies of the various Latin American countries
- Demonstrate a thorough knowledge of the geography of the Latin American countries

General Requirements
Requirements for the Certificate in Latin American Studies are satisfied through formal language instruction and by completing a minimum of 21 credits at the 300 level or above. Students will take coursework in at least three different disciplines and departments (Spanish, Anthropology, and Political Science) with other possible course offerings in LAS, History, Agriculture, and Agronomy.

Course Requirements
Students will complete 6 credits of core courses:
Leadership Studies

SPAN 322  Latin American Civilization  3
or SPAN 324  Latin America Today

ANTHR 323  Topics in Latin American Anthropology  3

Students should consult with their advisor for alternative courses in the event a course is not available.

Other Requirements

Students will complete an additional 15 credits selected from the approved list of courses in Latin American Studies or courses approved by the Latin American Studies Certificate advisor at the 300 level or above.

- No more than 3 credits may be taken as a 490, independent study, and the topic must deal with Latin America.
- A minimum of 9 credits applied toward the Certificate cannot be used to meet any other departmental, college, or university requirement.
- Students may receive credit on a pre-approved basis for internships completed in Latin America. No more than 3 credits from this area may be applied to the Certificate.
- Courses taken for the Certificate may not be taken on a pass not-pass basis.
- Credits for a Certificate may be used to satisfy the credit requirement for graduation and to meet the credit requirements for courses numbered 300 and above.
- A certificate is not awarded if the baccalaureate degree is not finished.
- For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree.
- After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate.
- A cumulative grade point average of at least 2.00 is required in courses taken at ISU for a certificate.

LANGUAGE REQUIREMENT

- The minimum requirement in formal language instruction is completion of two years or the equivalent of Spanish at the university level. At ISU the completion of Spanish 202 satisfies this requirement.
- Native speakers, or those with in-field experience of another Latin American language with a level equivalent to 202 or higher can have the language requirement waived. Equivalence will normally be assessed by a faculty member/CLEP exam in the Dept. of World Languages and Cultures.
- While students are encouraged to enroll in language instruction courses (i.e., conversation and composition) above the 300 level, no more than 6 credits of language study (301,303, 304) may be applied toward fulfilling language requirements for the Certificate. Students should be aware that all 300-level literature and culture/civilization courses in the Dept. of World Languages and Cultures have prerequisites.

Study Abroad

Students are required to participate in an ISU-approved study abroad program in a Latin American country with a minimum duration of 4 consecutive weeks. The Study Abroad Office has a list of ISU-approved programs. Students may elect to participate in other study abroad programs with the approval of the Latin American Studies Advisory Committee.

Approved courses available toward the Certificate:

The decision as to whether or not a course can be counted toward the certificate is based primarily on course title and description as it appears in the current ISU course catalog. Courses which primarily deal with Spain or Portugal and their cultures do not count toward the certificate. Students should consult with the advisor for the Latin American Studies Undergraduate Certificate program before registering to be sure a particular travel course or field school offering can apply toward the certificate.

Leadership Studies

The Leadership Studies Program provides a strong foundation of coursework and experiences for undergraduate students who seek
to study, understand and apply the principles of leadership in their current activities and, eventually, in their careers. This interdisciplinary program, designed for students in all majors, consists of a 21-credit-hour leadership studies certificate, a 15-credit leadership studies minor, and a suite of leadership studies courses. Students earning either the certificate or minor in leadership studies will develop the knowledge and skills to effect positive change as they enter the public, nonprofit or private sectors. The certificate and minor are awarded by the College of Liberal Arts and Sciences and noted on the student’s transcript. To learn more about the program, visit our website: https://leadership.las.iastate.edu/.

Objectives

- Develop students’ leadership capacity—which encompasses individual-level capabilities of self-awareness, integrity and commitment; group-level capabilities of collaboration, shared purpose and handling controversy with civility; and community-level capabilities of citizenship and civic responsibility.
- Provide opportunities for students to study leadership by learning effective communication practices, organizational theories, ethical principles, an appreciation of diversity, intrapersonal development and the value of community service.
- Cultivate students’ understanding of social empowerment and social justice to create positive and sustainable change.
- Challenge students to critically examine leadership at the intrapersonal, interpersonal, team, organizational and societal levels.
- Bring students into contact with community leaders and faculty members from diverse academic departments, backgrounds and leadership experiences.
- Prepare students to undertake leadership roles in their careers and in service to their community through coursework and co-curricular engagement.

Learning Outcomes

Upon completion of the certificate or minor in leadership studies, students will be able to:

- Recognize leadership as a set of skills, knowledge and attitudes that can be learned.
- Understand traditional and emergent leadership theories and apply them in practice.
- Comprehend key concepts of communication theories, organizational theories, contemporary diversity issues and ethical principles.
- Practice and evaluate their own capacity to lead effectively within teams, organizations and diverse communities.

- Develop and implement plans for continually improving their leadership capacity.
- Demonstrate proficiencies in written and oral communication.

Leadership Studies Minor

The minor in leadership studies requires the completion of 15 credit hours through three 3-credit-hour required courses in leadership and organizational theory, and an additional 6 credit hours earned from approved leadership electives.

At least 9 credits must be taken in courses numbered at the 300-level or above. At least 9 credits used for the minor cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Courses for the minor cannot be taken on a pass/not-pass basis. A cumulative grade point average of at least 2.0 is required in courses taken for the minor.

Leadership Studies Certificate

The certificate in leadership studies requires the completion of 21 credit hours including the 9 credit leadership studies core. An additional 12 credit hours are earned from approved electives including 3 hours in communication, 6 hours in leadership, and 3 hours of a capstone experience through a course, internship or study abroad. The capstone course should focus on the scholarship of leadership in the student's field of study, whereas an internship or a study abroad should provide a leadership-in-practice experience.

At least 9 credits must be taken in courses numbered at the 300-level or above. At least 9 credits used for the certificate cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Courses for the certificate cannot be taken on a pass/not-pass basis. A cumulative grade point average of at least 2.0 is required in courses taken for the certificate.

Study abroad: Must include a leadership focus and be pre-approved by the leadership studies faculty.

Other capstones may be approved with leadership studies faculty permission if they include a significant leadership component (e.g., COMST 404 or AESHM 421 with a leadership-based project). Students wishing to take a capstone course not listed here must receive approval prior to registering for the course and must demonstrate in writing how the course includes a significant leadership component.

**Liberal Studies**

**Bachelor of Liberal Studies**

The Bachelor of Liberal Studies degree (B.L.S.) is a general studies degree in the liberal arts. It was established by the three Iowa Regent universities primarily to meet the needs of Iowans who want to earn a college degree but whose circumstances present obstacles to completing a traditional on-campus degree program. While the B.L.S. has no traditional major and students have more flexibility in choosing courses that apply to their program, the requirements for the degree are as rigorous as requirements for other degree programs offered by Iowa State University. Students earning the B.L.S. take coursework in three areas of distribution. Each distribution area may be focused on a single discipline or diversified over several disciplines. With the assistance of a B.L.S. advisor, students can structure a program that meets their individual educational, vocational or personal goals.

The B.L.S degree is a transfer-friendly degree. Work done in community colleges or other accredited colleges and universities can be applied toward the degree and can often meet requirements for the major. Up to three-fourths of the total degree requirements can be transferred from accredited institutions. The B.L.S. program has no residence requirements, but students are expected to have 30 credits from ISU earned during the junior and/or senior year.

**Admission**

Admission to the B.L.S. program is open to persons who have at least 24 semester credits of collegiate work acceptable toward graduation at ISU with a total cumulative grade point average of at least 2.00 (a C average).

**Student Learning Outcomes**

In addition to meeting the learning goals of the general education program of the College of Liberal Arts and Sciences and meeting University wide learning goals, Liberal Studies graduates should be able to:

- Use appropriate learning strategies to gain new knowledge
- Integrate knowledge and modes of thinking from multiple disciplines
- Apply their knowledge to solve problems
- Connect their learning to their professional goals

**Requirements for the B.L.S. Degree**

The B.L.S. candidate must earn a total of 120 credits in accordance with requirements listed below. Courses taken at Iowa State University on a pass/not pass basis may be counted toward graduation only as electives. No more than 9 credits of 490 (Independent Study) courses may be counted toward graduation.

**University-wide Requirements**

<table>
<thead>
<tr>
<th>Communication Proficiency: Foundation Courses</th>
<th>6</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 150 Critical Thinking and Communication</td>
<td></td>
</tr>
<tr>
<td>ENGL 250 Written, Oral, Visual, and Electronic Composition (with a grade of C or better)</td>
<td></td>
</tr>
<tr>
<td>or equivalent of ENGL 150, ENGL 250</td>

LAS General Education and LAS World Languages/Cultures

Arts and humanities*                           12
Mathematics, statistics, or computer science*   3
Natural sciences*                               8
Social sciences*                                9
World languages/Cultures**                     3-8

*A list of courses acceptable in the general education groups can be obtained from the college website (http://www.las.iastate.edu/students/academics/general-education/).

**The requirement may be met by completion of three or more years of high school study in one world language; by meeting the LAS World Language requirement; or by taking six credits from the list of International Perspectives courses, three credits of which cannot be used to satisfy another degree requirement.

Distribution Requirements and Electives

A minimum of 12 credits is required in each of three of the five distribution areas listed below. Students determine which distribution areas to include in their degree program through consultation with their Bachelor of Liberal Studies academic advisor.

Distribution Areas (Three of five below, with a minimum of 6 credits at the 300 level or above in each of the three)

- Humanities (for example, literature, philosophy, history, religion, art and music appreciation)

- Communications and arts (for example, journalism, speech, writing, drama, art, world language, communication studies, advertising, public relations)

- Natural sciences and computational disciplines (for example, chemistry, physics, biology, geological and atmospheric sciences, mathematics, statistics, computer science, data science, environmental science)

- Social sciences (for example, sociology, psychology, economics, political science, anthropology, geography)

- Professional fields (for example, business, education, family and consumer sciences, agriculture, engineering – generally courses taught outside the College of Liberal Arts and Sciences)

Electives to bring total credits to at least 120                                      Varies

Other Requirements

Included in the minimum of 120 credits needed for graduation must be the following:

- 30 credits from ISU earned during the junior/and or senior year.
- 45 upper-level (300 level or above) credits from an accredited four-year college with a grade point average of 2.0 or higher.
- A minimum grade point average of at least 2.00 (a C average).

A student earning a B.L.S. degree may declare a minor. All minors must include 6 credits taken at Iowa State University in upper-level (300 level or above) courses and must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Criteria for graduating with distinction and other academic honors with a B.L.S. degree are available under Scholastic Recognition.

Linguistics

Overview

Linguistics is a cross-disciplinary program designed to meet the needs of students interested in various aspects of language—its structure, history, varieties, meanings, and uses. The program includes courses in anthropology, communication disorders, computer science, English, psychology, and speech communication and world languages and cultures, thus providing a multi-disciplinary approach to the study of human language.

Courses in linguistics serve as background for students interested in any career that involves working with language, such as teaching English as a first and as a second language, second language studies, speech-language pathology, cross-cultural communication, linguistic anthropology, computational linguistics, and psycholinguistics.

In the College of Liberal Arts and Sciences, courses in linguistics can be applied as electives or as part of the group requirements. They may also be used in a minor or in a major. Linguistics majors earn a Bachelor of Arts.

Learning Outcomes

Students who major in Linguistics at Iowa State University will be able to

- display extensive knowledge of the primary areas of linguistics, especially syntax and phonology/phonetics.
- identify and analyze descriptive and prescriptive approaches to language description.
- display a sophisticated understanding of the hierarchical and systematic nature of human language.
- demonstrate skills in the intersection of language analysis and technology.
- develop methodological skills for carrying out linguistic analysis, including
• analyzing organized and unorganized linguistic data.
• conducting research, including carrying out literature searches and reviews, formulating testable questions, developing protocols for collecting data, and drawing conclusions based on research goals.
• formulating effective linguistic arguments in spoken and written form.
• display understanding of the ways languages change over time by appealing to examples of change in at least three languages.

**Linguistics Degree Requirements**

Majors in linguistics complete a minimum of 36 hours in linguistics with a grade of C or better in each linguistics course. Courses specifically required are:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LING 119</td>
<td>Introduction to World Languages</td>
<td>3</td>
</tr>
<tr>
<td>LING 120</td>
<td>Computers and Language</td>
<td>3</td>
</tr>
<tr>
<td>LING 207</td>
<td>Introduction to Symbolic Logic</td>
<td>3</td>
</tr>
<tr>
<td>LING 219</td>
<td>Introduction to Linguistics</td>
<td>3</td>
</tr>
<tr>
<td>LING 220</td>
<td>Descriptive English Grammar</td>
<td>3</td>
</tr>
<tr>
<td>LING 371</td>
<td>Phonetics and Phonology</td>
<td>3</td>
</tr>
<tr>
<td>LING 413</td>
<td>Psychology of Language</td>
<td>3</td>
</tr>
<tr>
<td>LING 420</td>
<td>History of the English Language</td>
<td>3</td>
</tr>
<tr>
<td>LING 437</td>
<td>Grammatical Analysis</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition, linguistics majors must choose 9 credits of elective courses. Discuss choices with the advisor. Suggested areas of further study are:

**Communication Disorders**

</tr>
</tbody>
</table>

Additional courses in linguistics may include ANTHR 309 and special topics offered through LING 319 and 320, which are repeatable for different topics. They also include courses for study abroad, especially LING 395, and independent studies through LING 490. Majors in linguistics must show proficiency in a second language equivalent to that achieved after two years of university-level study. Alternatively, majors in linguistics can demonstrate university-level study in two other languages of at least one year each.

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

For information about using linguistics courses in an interdisciplinary studies major, see Liberal Arts and Sciences, Cross-Disciplinary and Interdisciplinary Studies.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses.

**Minor in TESL (Teaching English as a Second Language)**

Minor in Teaching English as a Second Language (Minor in TESL) is for undergraduate students.

The Minor in TESL provides concentrated coursework that prepares students to teach English to nonnative speakers of English, either in community programs in the United States or in an overseas location. Students from any program may complete the minor without further studies in linguistics.

For more information, please contact Taylor Anne Barriuso (https://engl.iastate.edu/directory/taylor-anne-barriuso/), Linguistics Undergraduate Advisor.

**Concurrent B.A. in Linguistics and M.A. in TESL/Applied Linguistics**

A concurrent B.A. in Linguistics and M.A. in TESL and Applied Linguistics offers well-qualified students the opportunity for accelerated study, achieving both degrees within a 5-year time frame. A student enrolled in this program pursues a graduate M.A. degree while simultaneously completing the requirements for the B.A. in Linguistics. Completing the concurrent degree program would enable students to enter the workforce one year earlier than through the traditional M.A. degree pathway. Up to six credits can be double-counted toward the requirements for both degrees. Students applying for the concurrent degree program should be motivated, focused, and able to handle a 16+ credit hour/semester schedule.

**Eligibility (all qualifications must be met to apply):**

1. A minimum 45 credits in undergraduate program complete
2. Two years of ISU foreign language study or bilingualism demonstrated by an approved language test (completed or in progress)
3. At least 12 credits of Linguistics courses completed with a major GPA of 3.2 or higher,
4. A minimum cumulative ISU GPA of 3.0

**Timeline**

Students should know by the middle of their sophomore year if they are interested in pursuing the concurrent program. We recommend that students plan ahead, and notify the undergraduate linguistics adviser as soon as they know of their intent to apply for the concurrent degree; if possible, the linguistics adviser should be notified of intent to pursue the concurrent degrees by the end of the 4th semester.

Students should apply for concurrent enrollment by the end of the 5th semester of study (and no later than the end of the 6th semester) by filing

**Undergraduate Minor in Linguistics**

Minors in linguistics are individually tailored to the interests of the student, who consults with the linguistics advisor to develop the minor program of study. All minors must have a minimum of 15 credits in linguistics, of which 6 must be in courses numbered over 300. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. All programs must include LING 219 Introduction to Linguistics.
the Request for Concurrent Enrollment form from the Graduate College and submitting the application materials (listed below).

If accepted into the concurrent enrollment program, students should begin taking graduate courses (by the onset of the fourth year of study). Students accepted into the concurrent enrollment program will continue to work with the undergraduate linguistics adviser until the BA degree requirements are met. By the onset of the fifth year of study, students should have identified an area for their thesis/creative component and establish a program of study committee (including a major professor).

Students become full-time graduate students upon acceptance into the concurrent degree program. Students are eligible for research assistantships upon entry into the concurrent degree program, although it should be noted that these opportunities are rare. Student are eligible to apply for a teaching assistantship once all requirements for the BA degree are met; TA selection will follow the standard procedures for the department (including GRE scores).

**How to Apply**

The following components make up your application:

1. Fill out the Request for Concurrent Enrollment form from the Graduate College.
2. Write a statement of purpose, usually 1-2 pages, explaining why you want to pursue the M.A. degree.
3. Obtain three letters of recommendation.
4. Create a curriculum plan with the undergraduate linguistics adviser, who works closely with members of the graduate faculty.
5. Writing sample (which can be a paper written for an undergraduate course at ISU).
6. Submit your materials by e-mail to Teresa Smiley in the Graduate English Office at englgrad@iastate.edu.
7. GRE scores (not required for initial application; required if applying for a teaching assistantship).

The admission criteria are generally the same as those required for all graduate students in the department. Application materials are reviewed by the graduate faculty in linguistics, the department’s Director of Graduate Education (DOGE), and the department chair; their recommendations are forwarded on to the ISU Graduate College.

**BA in Linguistics**

120 credits

- 45 credits at 300+
- 36 credits in major (6 graduate credits can double count with graduate degree requirements)
- 9 credits English communication (such as ENGL 314 Technical Communication)
- 12-16 credits of foreign language
- 29 credits in general education: 9 in A&H, 9 in SS, 8 in NS, 3 in math
- Possible linguistics electives:
  - LING 305, 275, 286, 309, 318, 319, 320, 322, 324, 325, 422, 425, 300-level Spanish LING courses

**MA in TESL/Applied Linguistics**

**6 credits (including 510) can count as an elective in the BA degree**

**Graduate Minor**

A graduate minor in linguistics permits students to investigate various aspects of linguistics, emphasizing the ability to think about language in a systematic and disciplined way and to apply the methods of the field to research problems in their own disciplines. Graduate courses for the minor may be cross-listed with courses in Anthropology, Communication Disorders, Computer Science, English, Psychology, and World Languages and Cultures.

For the master’s degree, a declared minor consists of 9 credits in linguistics including two foundation courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LING 511</td>
<td>Introduction to Linguistic Analysis</td>
<td>3</td>
</tr>
<tr>
<td>One of the following:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>LING 514</td>
<td>Sociolinguistics</td>
<td>3</td>
</tr>
<tr>
<td>LING 527</td>
<td>Discourse Analysis</td>
<td></td>
</tr>
<tr>
<td>LING 537</td>
<td>Corpus Approaches to Grammatical Analysis</td>
<td></td>
</tr>
<tr>
<td>And one elective from the list of courses approved for graduate credit</td>
<td>3</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credits**

9

For the Ph.D. degree, the minor consists of 12 credits in linguistics including:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LING 511</td>
<td>Introduction to Linguistic Analysis</td>
<td>3</td>
</tr>
<tr>
<td>LING 537</td>
<td>Corpus Approaches to Grammatical Analysis</td>
<td>3</td>
</tr>
<tr>
<td>And two electives from the list of courses approved for graduate credit</td>
<td>6</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credits**

12

Additional courses beyond those listed below may be used as electives. The chair of the supervisory committee can provide information about these.

At least one member of the linguistics faculty will serve on a student’s program of study committee. A list of faculty members may be obtained from the Linguistics program website. Ph.D. candidates will write one section of the preliminary examination on an area of linguistics. Students in Teaching English as a Second Language/Applied Linguistics are not eligible for a graduate minor in linguistics.
Mathematics

The program in mathematics offers training for students planning to work in mathematics and computation for industry, to continue their studies in graduate school, or to enter secondary education teaching. Students may satisfy the major requirements in several ways, which are designed to meet these various career objectives.

Student Learning Outcomes

Our graduates will

• understand the fundamentals of a broad range of areas of mathematics, including algebra, analysis, discrete mathematics, geometry, and numerical analysis.
• demonstrate problem solving skills, critical thinking, and analytical reasoning as applied to mathematical problems and modeling.
• construct and effectively communicate rigorous arguments to demonstrate mathematical facts in oral, written, and electronic formats.
• participate in meaningful learning experiences, recognize the central role of mathematics in our society, and develop an appreciation for mathematics as a fundamental intellectual pursuit.

Curriculum

All students are required to earn credit for the following core courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 101</td>
<td>Orientation in Mathematics</td>
<td>1</td>
</tr>
<tr>
<td>MATH 165</td>
<td>Calculus I</td>
<td>4</td>
</tr>
<tr>
<td>MATH 166</td>
<td>Calculus II</td>
<td>4</td>
</tr>
<tr>
<td>MATH 201</td>
<td>Introduction to Proofs</td>
<td>3</td>
</tr>
<tr>
<td>MATH 265</td>
<td>Calculus III</td>
<td>4</td>
</tr>
<tr>
<td>One of the following:</td>
<td></td>
<td>3-4</td>
</tr>
<tr>
<td>MATH 317</td>
<td>Theory of Linear Algebra</td>
<td></td>
</tr>
<tr>
<td>MATH 407</td>
<td>Applied Linear Algebra</td>
<td></td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>19-20</td>
</tr>
</tbody>
</table>

To complete the major, leading to a Bachelor of Science degree, students must choose from one of the following four pathways:

Mathematics Major

This degree program is designed for students planning to work in industry or those who plan to continue their studies mathematics at the graduate level. Students are required to earn credit for the following courses:

One of the following: 3-4

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 266</td>
<td>Elementary Differential Equations</td>
<td></td>
</tr>
<tr>
<td>MATH 267</td>
<td>Elementary Differential Equations and Laplace Transforms</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 26-27

Additionally, the courses must include one of the following sequences:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 266</td>
<td>Elementary Differential Equations</td>
<td></td>
</tr>
<tr>
<td>&amp; MATH 403</td>
<td>and Intermediate Abstract Algebra</td>
<td></td>
</tr>
<tr>
<td>MATH 304</td>
<td>Combinatorics</td>
<td>6</td>
</tr>
<tr>
<td>&amp; MATH 314</td>
<td>and Graph Theory</td>
<td></td>
</tr>
<tr>
<td>MATH 373</td>
<td>Introduction to Scientific Computing</td>
<td>6</td>
</tr>
<tr>
<td>&amp; MATH 481</td>
<td>and Numerical Methods for Differential Equations</td>
<td></td>
</tr>
<tr>
<td>MATH 414</td>
<td>Analysis I</td>
<td>6</td>
</tr>
<tr>
<td>&amp; MATH 415</td>
<td>and Analysis II</td>
<td></td>
</tr>
<tr>
<td>MATH 435</td>
<td>Geometry I</td>
<td>6</td>
</tr>
<tr>
<td>&amp; MATH 436</td>
<td>and Geometry II</td>
<td></td>
</tr>
</tbody>
</table>

Mathematics Major with Actuarial Science Certificate

This degree program is designed for students pursuing a career as an actuary or in the financial sector. Students are required to earn credit for the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 240</td>
<td>Mathematics of Investment and Credit</td>
<td>3</td>
</tr>
<tr>
<td>MATH 341</td>
<td>Introduction to the Theory of Probability and Statistics I</td>
<td>4</td>
</tr>
<tr>
<td>MATH 414</td>
<td>Analysis I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 441</td>
<td>Life Contingencies I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 442</td>
<td>Life Contingencies II</td>
<td>3</td>
</tr>
<tr>
<td>MATH 492</td>
<td>Undergraduate Seminar</td>
<td>2</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>18</td>
</tr>
</tbody>
</table>

Additionally, students must meet the requirements for the Actuarial Science Certificate (see www.catalog.iastate.edu/collegeofbusiness/actuarialscience/#certificatetext).

Mathematics Major with Applications

This degree program is for students who want to specialize in the application of mathematics to an area of study. It is recommended for those who plan to work in industry or those who plan to continue studying their specialization area at the graduate level. Students are required to earn credit for the following courses:

One of the following: 3-4

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 266</td>
<td>Elementary Differential Equations</td>
<td></td>
</tr>
<tr>
<td>MATH 267</td>
<td>Elementary Differential Equations and Laplace Transforms</td>
<td></td>
</tr>
</tbody>
</table>
One of the following:  
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 304</td>
<td>Combinatorics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 314</td>
<td>Graph Theory</td>
<td></td>
</tr>
</tbody>
</table>

Three of the following:  
<table>

Total Credits 50.5-55

† Arranged with instructor.

Additionally, students must meet the professional teaching education requirements established by the University Teacher Education Program (see http://education.iastate.edu/undergraduate-studies/secondary-education/)

University and College Requirements

In addition to the core and pathway courses, students are also required to earn credit for the following courses:

Courses from General Education Area I - Arts and Humanities | 12
| ENGL 150 | Critical Thinking and Communication | 3
| ENGL 250 | Written, Oral, Visual, and Electronic Composition | 4 |

University and College Requirements

In addition to the core and pathway courses, students are also required to earn credit for the following courses:

Courses from General Education Area I - Arts and Humanities | 12
| ENGL 150 | Critical Thinking and Communication | 3
| ENGL 250 | Written, Oral, Visual, and Electronic Composition | 4 |

University and College Requirements

In addition to the core and pathway courses, students are also required to earn credit for the following courses:

Courses from General Education Area I - Arts and Humanities | 12
| ENGL 150 | Critical Thinking and Communication | 3
| ENGL 250 | Written, Oral, Visual, and Electronic Composition | 4 |

University and College Requirements

In addition to the core and pathway courses, students are also required to earn credit for the following courses:

Courses from General Education Area I - Arts and Humanities | 12
| ENGL 150 | Critical Thinking and Communication | 3
| ENGL 250 | Written, Oral, Visual, and Electronic Composition | 4 |
Possible choices can be found here: https://las.iastate.edu/students/academics/general-education/

Students pursuing the Mathematics Major for Teacher Preparation are required to take PSYCH 230 or HD FS 102, PYSCH 333, and earn a grade of C or better in each course.

Courses used to meet the U.S. Diversity and International Perspectives requirements can also be used to fulfill general education requirements.

Students must earn a grade of C or better.

Students must earn a grade of C- or better.

With departmental approval.

Furthermore, students must earn a minimum of 120 credits, including a minimum of 45 credits at the 300 or 400 level, and including at least 8 credits in the major at the 300/400 level with a grade of C or better. At least 55 of these credits must be earned at a four-year institution, and the last 32 credits must be earned at Iowa State University. A maximum of 16 technical credits are allowed, and a maximum of 9 P-NP credits of free electives may apply. Students must also meet the LAS World Language requirement and have a minimum 2.00 ISU cumulative Grade Point Average.

#### Undergraduate Minor

The department offers a minor in mathematics. The minor requires at least 16 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University. At least 9 credits must apply exclusively towards the minor and cannot be used to meet any other
Meteorology department, college, or university requirement. Students are required to earn credit for the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 201</td>
<td>Introduction to Proofs</td>
<td>3</td>
</tr>
<tr>
<td>MATH 265</td>
<td>Calculus III</td>
<td>4</td>
</tr>
<tr>
<td>One of the following:</td>
<td>3-4</td>

</tr>
<tr>
<td>MATH 435</td>
<td>Geometry I</td>
<td></td>
</tr>
<tr>
<td>MATH 436</td>
<td>Geometry II</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits: 16-19

Ph.D. candidates must have at least one year of supervised teaching experience. See the on-line Mathematics Graduate Handbook for specific requirements.

Meteorology Overview

Offered by the Department of Geological and Atmospheric Sciences. (https://ge-at.iastate.edu/)

The Bachelor of Science Major in Meteorology: The study of meteorology involves the description of the earth's atmosphere and the processes responsible for its behavior. Students majoring in Meteorology earn a bachelor of science. The major satisfies guidelines specified by the American Meteorological Society and meets education requirements for employment with the National Weather Service and the World Meteorological Organization. Successful preparation for professional or graduate work in Meteorology requires that the student develop and integrate a diverse range of skills and knowledge bases. These include weather observing, the physics and dynamics of the global atmosphere, application of new weather technologies, advanced mathematical tools, computer programming and modeling, and effective oral and written communication. The faculty view the senior thesis (MTEOR 499 Senior Research), in particular, as a capstone experience in which students demonstrate they have achieved this integration. Also, contemporary meteorology is an earth-system science with ties to a variety of human experiences. The electives and general education requirements of the college are further experiences that the meteorology student must integrate with their core meteorology knowledge in order to function effectively in a globally-oriented profession.

Meteorology as an Additional Major: The Meteorology program allows students in academic programs with affinity to meteorology to complete an additional major in meteorology through an accelerated pathway. Students earning a BS degree in electrical or aerospace engineering who complete the designated Meteorology coursework of at least 25 credit hours can earn an additional major in Meteorology. Students should work closely with their advisors in each department to ensure that all requirements are met. Please review the information on the department website or contact the current program head for more information and sample four-year plans to earn an additional major in Meteorology.

Student Learning Outcomes

Upon graduation, students should be able to:

- Demonstrate the ability to think critically;
- Exhibit a broad understanding of atmospheric systems and processes;
- Demonstrate scientific literacy and its application to scientific inquiry and societal concerns;

Graduate Study

The department offers programs leading to a Master of Science or Doctor of Philosophy degree in mathematics or applied mathematics, as well as minor work for students whose major is in another department.

Students desiring to undertake graduate work leading to the M.S. or Ph.D. degree should prepare themselves by taking several upper division mathematics courses.

The M.S. degree requires a student to take at least 30 credit hours and to write a creative component or thesis. Additionally, students must pass a comprehensive oral examination over their coursework and their creative component or thesis. See the online Mathematics Graduate Handbook for specific requirements.

The Ph.D. degree requires a student to take 42 credit hours of coursework in addition to research hours, pass written qualifying examinations, pass an oral preliminary exam, and perform an original research project culminating in a dissertation which is defended by an oral exam.
- Demonstrate proficiency in data collection, management, and analysis including understanding sources of error and/or uncertainty;
- Read and critically evaluate relevant literature and information;
- Use appropriate tools from chemistry, physics, biology, mathematics, and data science to solve discipline-specific problems;
- Present information effectively in written and oral forms;
- Work in a team environment in alignment with the ISU principles of community;
- Work independently;
- Attain employment in meteorology, atmospheric science or related fields, or pursue graduate studies.

## Degree Requirements

The program requires the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>

</tr>
</tbody>
</table>

**Total Credits**: 35

A grade of C or better (not C-) is required in each of the following courses to meet minimum graduation requirements for a bachelor of science degree in Meteorology:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MTEOR 206</td>
<td>Introduction to Weather and Climate</td>
<td>3</td>
</tr>
<tr>
<td>MTEOR 301</td>
<td>General Meteorology</td>
<td>4</td>
</tr>
</tbody>
</table>

Several co-op programs are available for upper-division undergraduates. Although a range of opportunities exists for men and women who terminate their studies with a bachelor of science, students who meet the necessary academic standards are encouraged to continue their studies in a graduate program. For these students, additional coursework is recommended in mathematics or physical science. Other students can choose a wide range of supporting courses that will contribute to their particular area of interest in meteorology.

**Communication Proficiency requirement**: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

</tbody>
</table>
College Requirements: Liberal Arts and Sciences (LAS) majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. You must also complete the Communication Proficiency and LAS World Language Requirements. Six semesters of one foreign language in high school satisfies the World Language requirement.

Students in all ISU majors must complete a 3-credit course in U.S. diversity and a 3-credit course in international perspectives. Discuss with your advisor how the two courses that you select can be applied to address general education requirements. Check for a list of approved courses at: http://www.registrar.iastate.edu/courses/div-ip-guide.html.

1. Students taking CHEM 177 should plan to take CHEM 178 as well.
2. Students must select at least 9 credits from a list of optional courses.
3. Students should select a humanities or social science course based on need. If these LAS requirements have been satisfied, students may select a meteorology elective or alternate course. Students should discuss possible alternate course options with their advisor.
## Concurrent Programs

**Combined Degrees:** A concurrent program is offered which combines a bachelor of science degree in meteorology and a master of science degree in meteorology. This program gives well-qualified Iowa State juniors and seniors the opportunity to begin working on the M.S. degree before completing the B.S. degree, reducing by at least one year the normal time period necessary to complete both degrees separately. Additionally, a concurrent program exists that gives students the opportunity to receive a B.S. in meteorology and an M.B.A. (master of business administration) within five years. Review the department website or contact the current program head for more information regarding these options.

**Graduate Meteorology**

The department offers programs leading to the master of science (M.S.) and doctor of philosophy (Ph.D.) in Meteorology. Students desiring a major in Meteorology normally will have a strong undergraduate background in the physical and mathematical sciences. Individuals desiring to enter a graduate program are evaluated by considering their undergraduate preparation and performance along with their expressed goals in the statement of purpose. Prospective students are encouraged to reach out to individual faculty members who they wish to work with prior to applying.

Programs of study are designed on an individual basis in accordance with the requirements of the Graduate College and established requirements for each departmental major. Additional coursework is normally taken in complementary areas such as aerospace engineering, agronomy (soil science), chemistry, civil and construction engineering, computer engineering, computer science, engineering mechanics, environmental science, materials engineering, mathematics, mechanical engineering, microbiology, physics, or statistics. Departmental requirements provide a strong, broad background in the major and allow considerable flexibility in the program of each individual.

A thesis is required of all M.S. candidates, and a dissertation is required of all Ph.D. candidates.

Course requirements for the M.S. degree include MTEOR 542 and 543, along with at least four courses from the graduate Meteorology electives (502, 504, 505, 507, 516, 518, 535, 540, 552, 568, 589, or 605) or from outside the department according to the students’ professional goals and interests, in consultation with their advisor and POS committee. Students without prior synoptic meteorology course work must complete MTEOR 511 and may substitute these credits in place of other elective courses.

Graduates in Meteorology have a good comprehension of basic principles, a capacity for critical and independent thought, and an ability to communicate effectively with scientific colleagues. They have an appropriate breadth in their understanding of meteorology with a suitable

### Minor

The department offers a minor in Meteorology which may be earned by completing 15 credits including MTEOR 111 Synoptic Applications (only 1 credit may count toward the minor), MTEOR 206 Introduction to Weather and Climate and MTEOR 301 General Meteorology. The minor must include at least 6 credits in the courses numbered 300 or above taken at Iowa State University and must include at least 9 credits that are not used to meet any other department, college or university requirement. Further information concerning programs of study, including sample degree programs, is available from the department.

---

1 Students taking CHEM 177 should plan to take CHEM 178 as well.
2 Students must select at least 9 credits from a list of optional courses.
3 Students should select a humanities or social science course based on need. If these LAS requirements have been satisfied, students may select a meteorology elective or alternate course. Students should discuss possible alternate course options with their advisor.

specialization. Graduates are able to undertake thorough research and explain the results in a scientifically reasonable fashion.

**Middle Eastern Studies Minor**

The cross-disciplinary Middle Eastern Studies Minor is designed for students who seek to explore the cultures, languages, history, society, politics, international relations, economics, technology, and environment of the Middle East, including the Arab world, North Africa, Turkey, and Iran. The Middle Eastern Studies Minor's courses provide the background and training for students whose major fields of study might include Anthropology, History, Philosophy and Religious Studies, Political Science, and World Languages and Cultures. The minor should be of special interest to students with interests in graduate studies or career interests in international business, education, translation, law, diplomacy, intelligence, the military, national security, non-governmental organizations, and/or international organizations.

**Student Learning Outcomes**

After completing the minor in Middle Eastern Studies, students will demonstrate:

- some proficiency in oral and written Arabic with an ability to comprehend authentic Arabic texts
- knowledge of the history of the Middle East from classical to modern times
- knowledge of the geographic features of the Middle East and of the major political boundaries, alliances, and power struggles that characterize the contemporary Middle East
- an understanding of cultural diversity issues in the Middle East in the context of the prevalent political, social, and cultural institutions and structures

The minor in Middle Eastern Studies requires 15 credit hours

**Required course work in core courses (9 credits total)**

**Language co-requisite:** All students pursuing the minor in Middle Eastern Studies must complete and receive a passing grade in:

ARABC 101 Elementary Arabic I and ARABC 102 Elementary Arabic II [completion of the beginning level of other languages spoken in the Middle East (e.g. Hebrew, Farsi, Kurdish, Turkish, Pashto, etc.) will be accepted in lieu of beginner Arabic upon petition to the program Directors]

**Military Studies Minor**

**Interdepartmental Minor**

The Military Studies program is designed for students interested in learning about military skills and careers. The mission of the Reserve Officers’ Training Corps (ROTC) programs is threefold. First, students are developed mentally, morally, and physically in order to make them strong leaders. Second, a desire for development in mind and character is instilled in students so they may assume the highest responsibilities of command, citizenship, and government. Finally, students are imbued with the highest ideals of duty, honor, and loyalty in order to graduate with a basic professional background and motivation toward their careers.

The Military Science, Naval Science and Air Force Aerospace departments accomplish this mission through detailed courses of instruction occurring throughout a typical student's college career. All academic courses offered by these departments focus on the development of professional military skills and their application. Each department offers courses unique to its branch of the military. Students in Army ROTC classes gain an appreciation for ground warfare and doctrine, while students in Naval Science develop an appreciation for naval surface and maritime engineering. The Air Force Aerospace Studies curriculum familiarizes students with Air Force structure and doctrine. On a broader scale, all three departments offer courses promoting leadership and sound management practices that investigate the military's role in American domestic and foreign policy, and can be employed in any career path.

Military Science, Naval Science and Air Force Aerospace courses are offered in the interdepartmental Military Studies program in the following participating departments: Military Science, Naval Science and Air Force Aerospace Studies. Students may contact any one of the three departments for additional information on the minor.
Undergraduate Minor

Undergraduate study in this program provides the student with an opportunity to develop a minor in Military Studies. The three Iowa State University ROTC programs offer over 64 credits of specialized coursework. The minor in Military Studies is open to any Iowa State University student.

Undergraduate students may minor in Military Studies by taking 15 credits of coursework from a combination of any of the three ROTC programs - regardless of whether or not a commission in the Armed Forces is tendered. At least 6 of the 15 credits must be in courses numbered 300 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

See the Military Studies Overview tab for links to the three departments.

Music

Administered by the Department of Music and Theatre

Undergraduate Study

The Department of Music and Theatre offers a strong undergraduate music program, where students study with full-time faculty professionals in a supportive environment that encourages students to become their best. Two degrees are offered in music: a bachelor of music, which is more specialized and contains fewer general education requirements; and a bachelor of arts degree with a major in music. (The Department of Music and Theatre also administers the Theatre Program, see Theatre and Performing Arts.)

The music curriculum provides:

1. A comprehensive program of professional studies for students who wish to prepare for careers in music, including teaching, performance, and composition, and for students who plan to pursue graduate studies in music.
2. Courses in music literature, theory and areas of performance for all students, regardless of major.

The department embodies the land-grant philosophy of service to the people of the state with a faculty of active scholars, teachers, and artists committed to excellence in teaching, creative/scholarly work, and arts outreach. The department is an accredited institutional member of the National Association of Schools of Music (NASM).

Student Learning Outcomes

Music graduates will understand and demonstrate:

1. Knowledge of music cultural heritage and history
2. Appreciation for musical creativity, reasoning, and the aesthetic value of music
3. Knowledge of organization and structures of music
4. Analytical skills necessary for listening, performing, and teaching
5. Skills necessary to perform music from a variety of periods, styles, and genres
6. Necessary abilities to communicate ideas musically, verbally, and in writing
7. Awareness of the diversity of musical ideas throughout the world's cultures
8. For Music Education students: success in meeting the ISU Teaching Standards as outlined by the University Teacher Education Program

Assessment measures include the continuation examination, graduating senior surveys and exit interviews, public performances, senior projects, course grades, teacher certification (for music education students), and the National Association of Schools of Music accreditation review.

Curricula Available to Music Majors

Students interested in pursuing an emphasis in music theater should see Theatre and Performing Arts.

Bachelor of Music

This curriculum leads to the degree bachelor of music. This degree is more specialized and contains fewer general education requirements than the bachelor of arts degree with a major in music. Students in this curriculum choose between options in education, performance, and composition. To obtain a bachelor of music degree, a student must earn a minimum of 122 credits, including a minimum of 32 credits in residence at Iowa State University and a minimum of 45 advanced credits in courses numbered 300 or above and must meet all of the requirements specified below.

Courses taken on a pass/not pass basis may be counted toward the required total credits, and may be used to meet the advanced credit requirement, if appropriate, but may not be used to satisfy any other graduation requirement.

### Bachelor of Arts—Music Major

A more general degree than the bachelor of music, the bachelor of arts degree requires no formal specialization. It includes more general education requirements and provides a broader course of academic study.

For the undergraduate curriculum in Liberal Arts and Sciences, major in music, leading to the degree bachelor of arts, see Liberal Arts and Sciences Degree Requirements.

Candidates for the degree bachelor of arts with a music major will normally complete 48 credits of music including the following required courses:

<table>

**Total Credits:** 48
Bachelor of arts students whose chief professional interest lies in research are encouraged to minor in world languages and cultures, history, literature, or philosophy.

**General Requirements**

**Entrance Audition.**

In order to be accepted as a music major, a prospective student must pass an entrance audition for the applied faculty in his/her performance area (piano, organ, woodwinds, strings, percussion, brass, or voice). Passing the audition is dependent on the demonstration of performance skills appropriate for college level instruction and the potential to perform at a professional level. In addition, the number of students accepted must balance with the space available in the corresponding applied studios. Once accepted, a student must complete a placement examination in keyboard skills. This examination is normally given by members of the departmental faculty the week preceding the opening of classes for fall semester.

**Seminars and Recitals.**

All music majors enrolled for applied music courses will attend a weekly 1-hour seminar in their areas, departmental recitals, and 12 recitals of their choosing each semester.

**Ensemble Requirement.**

See the options above for additional ensemble requirements.

**All Bachelor of Music students:**

Enrollment in an ensemble course, chosen from the lists below, each semester of full-time enrollment (except during student teaching) is required.

**Students in a music education options:**

At least six semesters of large ensemble and one semester of chamber music ensemble, chosen from the lists below, are required. One semester of 114A may count as a large ensemble.

**Bachelor of Music students in options other than education:**

At least 2 semesters of large ensemble and one semester of chamber music ensemble, chosen from the lists below, are required.

**Large Ensembles:**

<td>Iowa State Singers</td>
<td>1</td>
</tr>
</tbody>
</table>

**Continuation Examination**

To be approved for continuation as a music major on the junior level, and enroll in Music 319, a student must pass a continuation examination taken normally at the end of the fourth semester as a music major. Before taking this examination, the student must complete the requisite forms as well as write an essay including:

1. his/her personal goals
2. a self-assessment of his/her progress thus far
3. an assessment of what he/she expects to accomplish before graduation

The student taking the Continuation Examination performs for a Continuation Examination Committee. Requirements include the performance of three works representing different periods or styles selected by, and studied with, the applied teacher, a self-prepared piece, and sight reading. The student must display acceptable solo ability and performance techniques in at least one of the applied areas. A written evaluation will be given each student following his/her performance. This evaluation will include a candid assessment of the student’s potential to achieve his/her goals. In addition, the student may arrange to meet with members of the Continuation Examination Committee at a later date to discuss the results of his/her Continuation Examination. See Piano Proficiency below. For details and forms go to: http://www.music.iastate.edu

**Piano Proficiency Requirement**

All music majors must demonstrate proficiency in functional skills at the piano. Keyboard music majors (students whose primary instrument is piano or organ) accomplish this through courses in their curricula. All other students accomplish this by satisfactorily completing Music 228. All entering non-keyboard music majors with previous piano experience meet with the class piano instructor, usually the week before classes start in the fall semester, to determine the appropriate piano class (127, 128, 227, 228) for their initial piano enrollment. Some students are deemed to have met the piano proficiency at this time. Non-keyboard music majors with no previous piano experience should enroll in Music 127, Class Piano I. Continuous enrollment in piano classes is REQUIRED until successful completion of the piano proficiency requirement. **Important:** The piano proficiency must be met, either through completion of Music 228 or demonstration of proficiency, to pass the continuation examination. Failure to do so could delay a student’s graduation. All students must fulfill the piano proficiency requirement in order to pass the continuation examination and enroll in Music 319.
Graduation Proficiency

To be recommended for graduation, a music student should demonstrate to the music faculty mature acquaintance with performance styles, technique, and repertoire. All music majors will participate in departmental recitals to the satisfaction of the department. Candidates for the bachelor of music degree will present a graduation recital.

* According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250 (or ENGL 250H). In addition the Communication Proficiency must be certified through one of the following options:

1. Certification of writing skills, by the instructor, after completion of one of the following:
   - MUSIC 120 Introduction to Music Literature and Styles 3
   - MUSIC 383 History of Music I 3
   - MUSIC 384 History of Music II 3
   - MUSIC 472 History of American Music 3
   - MUSIC 473 Topics in Advanced Music History 3
   - MUSIC 475 Music of the Romantic Era 3
   - MUSIC 476 Music of the Twentieth Century 3

(Passing one of these courses does not automatically satisfy the requirements for Communication Proficiency.)

2. Satisfactory completion of an advanced writing course:
   - ENGL 302 Business Communication 3
   - ENGL 305 Creative Writing: Nonfiction 3
   - ENGL 314 Technical Communication 3

1 A placement examination in keyboard skills determines the student's placement in the Class Study in Piano courses. Students with a concentration in piano or organ do not take Class Study in Piano. Students not required to take four semesters of class piano will take additional music elective credits.

2 Four credits chosen from the following ensembles are required: 111, 113, 115, 141, 151, 161, 191, 321.

3 ENGL 150 recommends concurrent enrollment in LIB 160.
LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: (https://las.iastate.edu/students/academics/general-education/) All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. A list of approved courses can be found at: (http://www.registrar.iastate.edu/courses/div-ip-guide.html) The courses taken to meet these requirements may also be used to meet other requirements.

Scheduling of the general education requirements where specific courses are not indicated can be flexible. Music courses are best kept in the order/semesters indicated. (Most music courses are offered one semester each year.)

B.Mus. - organ requires a minimum of 124.5 credits, including a minimum of 45 credits at the 300/400 level. The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: (https://las.iastate.edu/students/academics/general-education/) All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives (which is satisfied with MUSIC 383). A list of approved courses can be found at: (http://www.registrar.iastate.edu/courses/div-ip-guide.html) The courses taken to meet these requirements may also be used to meet other requirements.

### Flexibility in scheduling

Many general education courses can easily be taken in different semesters than indicated. Music courses are best kept in the order/semesters indicated. (Most music courses are offered one semester each year.)

* Some advanced theory and history courses (organ major requires 2 of each) are not offered every semester. Semesters of offerings are listed in the course descriptions in the catalog at: https://www.music.iastate.edu/advising.

ENGL 150 recommends concurrent enrollment in LIB 160.

* ENGL 150 recommends concurrent enrollment in LIB 160.

### Notes:
- ENGL 150 recommends concurrent enrollment in LIB 160.
- The BM degree requires a minimum of 124.5 credits, including a minimum of 45 credits at the 300/400 level. The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: [https://las.iastate.edu/students/academics/general-education/](https://las.iastate.edu/students/academics/general-education/) All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives (which is satisfied with MUSIC 383). A list of approved courses can be found at: [http://www.registrar.iastate.edu/courses/div-ip-guide.html](http://www.registrar.iastate.edu/courses/div-ip-guide.html) The courses taken to meet these requirements may also be used to meet other requirements.

### Flexibility in scheduling.
- Many general education courses can easily be taken in different semesters than indicated. Music courses are best kept in the order/semesters indicated. (Most music courses are offered one semester each year.)
- Some advanced theory and history courses (piano major requires 1 history, 2 theory) are not offered every semester.
- Semesters of offerings are listed in the course descriptions in the catalog at: [https://www.music.iastate.edu/advising/](https://www.music.iastate.edu/advising/).

1. A placement examination in keyboard skills determines the student’s placement in the Class Study in Piano courses.
2. MUSIC 324 alternate Fall (even numbered years) / MUSIC 325 alternate Spring (odd number years – same academic year; MUSIC 360 alternate Spring (even numbered years) when 325 is not taught.
3. ENGL 150 recommends concurrent enrollment in LIB 160.

The BM degree requires a minimum of 124.5 credits, including a minimum of 45 credits at the 300/400 level. The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: (https://las.iastate.edu/students/academics/general-education/) All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives (which is satisfied with MUSIC 383). A list of approved courses can be found at: (http://www.registrar.iastate.edu/courses/div-ip-guide.html) The courses taken to meet these requirements may also be used to meet other requirements.

Flexibility in scheduling. Many general education courses can easily be taken in different semesters than indicated. Music courses are best kept in the order/semesters indicated. (Most music courses are offered one semester each year.)

Some advanced theory and history courses (voice major requires 1 history, 2 theory) are not offered every semester. Semesters of offerings are listed in the course descriptions in the catalog at: https://www.music.iastate.edu/advising/.
A placement examination in keyboard skills determines the student’s placement in the Class Study in Piano courses. Students with a concentration in piano or organ do not take Class Study in Piano.

Lab Ensemble is required every semester offered: Fall and odd springs.

These courses which appear in the same semester must be taken concurrently.

Alternate year courses: The usual semester of offering is indicated by the calendar year (odd or even) of the semester. Consult the current catalog and the department web site for up-to-date information about semesters courses are offered. Psych 230 and EDUC 333 are offered every semester; when they are taken is determined by the schedules of the alternate year music courses.

The LAS World Language requirements must be met. The U.S. diversity and international perspectives requirements are automatically met with courses required for this degree option (EDUC 406 and MUSIC 383).

Advanced theory and history courses (music education major requires 1 history, 1 theory) are not offered every semester. Semesters of offerings are listed in the course descriptions in the catalog at: https://www.music.iastate.edu/advising/ (https://www.music.iastate.edu/advising/).

Flexibility in scheduling. Many general education courses can easily be taken in different semesters than indicated. Music courses are best kept in the order/semesters indicated (Most music courses are offered one semester each year).

A placement examination in keyboard skills determines the student’s placement in the Class Study in Piano courses. Students with a concentration in piano or organ do not take Class Study in Piano. Students placing out of class piano may need to take additional elective credits to earn the required 124.5 cr. for the BM degree.

ENGL 150 recommends concurrent enrollment in LIB 160.

Alternate year course, taught in odd number years, spring semester. Some advanced theory and history courses are not offered every semester. Semesters of offerings are listed in the course descriptions in the catalog. The BM in composition requires one advanced history course (3 cr.) and 9 credits of advanced theory from the following courses: 346, 440, 446, 490B, 590I. Advanced theory courses must include 346 or 446.

The BM degree requires a minimum of 124.5 credits, including a minimum of 45 credits at the 300/400 level. The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: (https://las.iastate.edu/students/academics/general-education/) All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives (which is satisfied with MUSIC 383). A list of approved courses can be found at: (http://www.registrar.iastate.edu/courses/div-ip-guide.html) The courses taken to meet these requirements may also be used to meet other requirements.

</tbody>
</table>

† Arranged with instructor.

At least six of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above with a grade of C or higher. The minor must include at least nine credits not used to meet any other department, college, or university requirement. Students pursuing a minor in music technology must meet the audition requirements and/or prerequisites for all music courses they wish to take.

**Officer Education Programs**

Iowa State University offers Reserve Officers Training Corps (ROTC) programs for the professional training of officers for the Air Force, Army, Navy and Marines.

For specific programs and courses:

- Air Force Aerospace Studies
- Military Science
- Naval Science

The purpose of these programs is to provide an avenue for interested students to become reserve or regular officers in one of the United States military services, and the university regards this training as the foundation for possible careers in the military. The Air Force and the Navy require a period of active duty service upon completion of the ROTC program. Graduates from Army ROTC serve in either active Army, the Army Reserve, or the National Guard.

All students enrolled in advanced ROTC programs receive financial allowances, which are described under Student Financial Aid. Scholarships are also available for all services as outlined in the section on financial aid.

**Air Force Aerospace Studies Program**

The objectives of the Department of Air Force Aerospace Studies (AFAS) are to provide qualified students the opportunity to earn a commission as an active duty officer in the United States Air Force (USAF) and to build better citizens for those not interested in serving in the USAF. Entry into the Air Force Reserve Officer Training Corps (AFROTC) program is not dependent on departmental major or year in the university, and is open to all qualified students; however, it is intended for students who have at least 3 years of coursework remaining.

The curriculum is divided into two basic phases: the General Military Course (GMC) and the Professional Officer Course (POC). The GMC is introductory and open to all ISU students. The GMC consists of four consecutive one-hour courses normally taken during the freshman and sophomore years.

Selection for the POC is on a competitive basis. Cadets enrolling in this course must meet certain academic, mental, and physical requirements as well as having high moral standards. Students who have completed the GMC will compete to participate in Field Training, a two-week summer training program which provides a concentrated experience in the Air Force environment. Field Training includes officer training, career orientation, expeditionary training, an introduction to typical base functions, and physical training. Prior to entry into the POC, students must successfully complete Field Training.

Upon enrollment and acceptance into the POC, all cadets complete a contractual agreement with the Air Force, which signs them up for at least four years of active duty as an USAF officer after graduation. Qualified cadets may compete for selection for flying jobs such as pilot, combat systems operator (CSO), remotely-piloted aircraft (RPA) operator, and air battle manager (ABM).

AFROTC scholarships are available and provide payment of full tuition and fees. In addition, scholarship cadets receive a $300-$500 monthly subsistence allowance and $900 per year book allowance. Scholarships can be awarded for periods from two to five years, depending on academic major. Upon acceptance of a scholarship, complete a contractual agreement with the Air Force, which signs them up for at least four years of active duty as an USAF officer after graduation. To determine eligibility and initiate application procedures for the
scholarship program, interested students should contact the AFAS department.

Military Studies Minor
The College of Liberal Arts and Sciences offers a minor in Military Studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from one or more of the ROTC programs. At least six credits must be in courses numbered 300 or above.

Military Science Program
The Military Science Department is embedded within the College of Liberal Arts and Sciences as an interdisciplinary program, but does not offer an academic degree. The mission of the department is derived directly from regulations governing Army Reserve Officers’ Training Corps (AROTC), which are issued by the U.S. Army Cadet Command and U.S. Army Training and Doctrine Command and cannot be modifiable by this department.

Freshmen Year Learning Outcomes
The student will have a working knowledge of the following areas: The Role of the Army, Roles and Origins of the Army, Army Customs and Traditions, Branches (Jobs) in the Army and Military Operations and Tactics, U.S. Army leadership and character development.

Sophomore Year Learning Outcomes
The student will have a working knowledge of the following areas: The Role of an Officer, Role of the Officer and Noncommissioned Officer, communications, code of conduct, first aid, principles of war and military operations and tactics, and begin to apply U.S. Army leadership through observed activities and demonstrate character development traits.

Junior Year Learning Outcomes
The student will have a working knowledge of the following areas: Small Unit Training, Command and Staff Functions, Nuclear, Biological and Chemical Warfare, Law of War, Weapons, Human Behavior, Math Reasoning, Computer Science and Military Operations and Tactics; Cadets will actively analyze character development and assess leadership skills.

Senior Year Learning Outcomes
The student will have a working knowledge of the following areas: Transition to Becoming an Officer, Military Justice, Intelligence and Electronic Warfare, Army Personnel Management, Army Logistics, Post and Installation Support and Military Operations and Tactics; Cadets will internalize and adhere to the U.S. Army's profession through active leadership and congruence of character development.

The mission of the Army Reserve Officers’ Training Corps (AROTC) is to commission the future leaders of the United States Army. Since ROTC produces over 65 percent of the Army’s Officer Corps, our task is one of the most important undertakings in the Army and our country today. We seek top quality college students. We train these potential leaders, assess their abilities, and challenge them with the highest standards of profession/professionalism. Those who successfully complete the program, receive a commission as a second lieutenant in the U.S. Army. A commission as an Army officer affords the opportunity to pursue a profession in one or several of the 300 different jobs held by Army officers. Students may request to serve as an officer in either the active army, or part time in the Army Reserve or National Guard. Regardless of the method of service, officers in today’s Army can be proud to know that they are doing their share in the defense of the United States of America.

The ISU Military Science program is divided into two segments, the basic program and the advanced program. The basic program (courses numbered 101-290) is designed primarily for freshmen and sophomores. No military obligation is incurred by a person participating in the basic program. The basic program is designed to be informative and to acquaint students with the military as a profession. The basic program or an allowed substitute is a prerequisite for the advanced program. Financial assistance is available on a competitive basis.

Persons interested in Military Science should visit the department located on the second floor of the Armory (east side).

Basic Program
The basic program courses are primarily for freshmen and sophomore students and, except for persons with prior military service and basic training graduates, are required for entry into the advanced program. Each scholarship cadet in the Basic Program receives a monthly allowance for up to 10 months. The curriculum is designed to train freshmen and sophomores in individual and team skills. It also helps the Professor of Military Science identify individual leader developmental needs.

Advanced Program
The advanced program courses are for students who have completed the basic program (or received equivalent credit) and are mandatory for potential commissioning upon contracting at the beginning of their junior year. Each cadet receives a monthly allowance for up to 10 months. These courses are primarily taught to academic juniors and seniors.

Successful completion normally obligates the student to military service on active or reserve duty. In addition to the advanced program of study, a student (cadet) will be expected to pass the Army Physical Fitness Test (precondition for commissioning) each semester and continually maintain military appearance standards in both personal grooming and uniform. Physical fitness training is regularly conducted outside of class and laboratory hours in a separate course, M S 150 Army Physical
Readiness. Students are encouraged to attend and participate in this class.

Professional Military Science Education (PME) coursework outside of the military science curriculum is also a precondition to commissioning. The PME component consists of Basic Academic proficiency standards. These standards are explained to prospective students as they consider enrollment in the advanced program. Army Uniforms will be worn at least once a week. The 300-level courses are designed to prepare cadets for the Advanced Course, which is a 37 day summer internship/training program where cadets are trained to Army standards, develop leadership skills, and have their officer potential evaluated. The 400-level courses are the final preparation for commissioning as a second lieutenant in the United States Army. Students must meet academic alignment criteria and receive basic program credit before entering the advanced program.

Military Studies Minor
The College of Liberal Arts and Science offers a minor in Military Studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from one or a number of the ROTC programs. At least 6 credits must be in courses numbered 300 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Naval Science Program
The Department of Naval Science is embedded within the College of Liberal Arts and Sciences as an interdisciplinary program but does not offer an academic degree. The courses offered by the Department are developed by the Department of the Navy. The Naval Science Department and Naval ROTC (NROTC) Program develop individuals mentally, morally, and physically, and imbue in them the highest ideals of duty and loyalty, in order to commission them upon graduation as Navy and Marine Corps officers. Program graduates possess a basic professional background, are motivated towards careers in the Naval Service, and have a potential for future development in mind and character so as to assume the highest responsibilities of command, citizenship, and government. Emphasis is placed on the core values of courage, honor and commitment.

Naval Science courses are open to any ISU student who has met the course prerequisites. To participate in the Naval ROTC Program, students must apply through one of two programs: the NROTC Scholarship Program (full scholarship; which includes a book stipend, tuition, laboratory fees, uniforms, and a monthly stipend), or the College Program (non-scholarship, with limited financial assistance). Applicants for the Scholarship Program are selected through a comprehensive nationwide competition. Applicants for the College Program are selected by the Professor of Naval Science from among students already in attendance at, or selected for admission by, the university. The College Program involves limited financial assistance by application for a 2 or 3-year scholarship. Upon application, students choose between the Navy Option and Marine Corps Option, for the purposes of training focus. NROTC students pursue their studies like other university students except that they must meet certain additional requirements that will prepare them to serve as naval officers upon graduation.

A Marine Corps Option student incurs a minimum 4-year active duty military obligation as a commissioned officer after graduation; a Navy Option student incurs a minimum 5-year active duty obligation.

Further information is available from the Professor of Naval Science, Iowa State University, isunrotc@iastate.edu, 515-294-6050.

While in the NROTC Program, Scholarship Program students will participate (with pay) in at-sea training cruises during the summer. College Program students, accepted to receive a 2 or 3-year scholarship, will participate in at-sea training during the summer between their Junior and Senior year based on the specifics of their scholarship. Students are also exposed to regular and extracurricular activities that teach leadership principles and help them decide which field of the Navy or Marine Corps they wish to enter. These activities also include weekly leadership laboratory periods and opportunities for involvement in several student societies.

Undergraduate Study
Naval Science courses are primarily for those students in the NROTC program, however, other university students may also enroll. Students enrolled in the NROTC program must fulfill the following requirements:

<table>

</table>
In addition to the normal Naval Science courses, all NROTC students are required to participate in laboratory periods that supplement the various academic courses. The Leadership Lab emphasizes human relations principles, teaches basic military formations, movements, commands, courtesies, and honors, and provides practice in unit leadership. Non NROTC program students enrolled in Naval Science courses are not required to participate in laboratory periods.

For basic undergraduate curriculum requirements, see Liberal Arts and Sciences, Curriculum; or Engineering, Curricula.

Military Studies Minor

The College of Liberal Arts and Sciences offers a minor in Military Studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from one or more of the ROTC programs. At least six credits must be in courses numbered 300 or above.

Philosophy Overview

The philosophy major (33 credits) and minor (15 credits) offer Iowa State University students the opportunity to explore fundamental human questions through reflection and argumentation. Do we have free will? Can machines think? What makes actions right or wrong? What is the nature of knowledge and what can we hope to know? What does justice require, politically and economically? Philosophy classes explore answers to deep questions such as these, encouraging each student to develop and rationally defend their own views.

Philosophy offers a structured but flexible program to help students graduate on time while pursuing their interests. 200-level courses introduce students to essential questions and methods of philosophical thought. In 300-level courses, students engage in close examination of central topics in both contemporary thought and the history of philosophy. Seminars at the 400-level offer the opportunity to study topics in-depth alongside a committed team of faculty and students.

Philosophy fosters skills of communication and critical thinking that are valuable across work, family, and civic life. The program equips students to logically analyze and develop new responses to the challenges faced by humanity. It also emphasizes clarity of thought and communication as part of rigorous engagement with both abstract and applied areas of thought. These skills of logical analysis, careful reading, original thought, and clear communication are in high demand across different fields of work and post-graduate study. Philosophy majors typically achieve some of the highest scores on standardized tests such as the LSAT and GRE, and have mid-career salaries higher than many other majors.

Student Learning Outcomes

Upon graduation, students should be able to:

1. Understand central problems in key areas of philosophy, such as metaphysics, epistemology, ethics, logic, political philosophy, philosophy of language, and the philosophy of science.

2. Explain the views of historically important philosophers and place them in the context of significant philosophical movements.

3. Identify and critically evaluate arguments by developing objections and replies.

4. Communicate ideas and arguments, both orally and in writing, with clarity and precision.

5. Engage with different points of view with open-mindedness, intellectual curiosity, and a willingness to learn from the ideas and arguments of others.

Philosophy Degree Requirements

As majors in the College of Liberal Arts and Sciences, Philosophy students must meet College of Liberal Arts and Sciences and university-wide requirements for graduation in addition to those stated below for the major.

The degree program in philosophy requires a minimum of 33 credits, plus the zero credit PHIL 492 course. The following courses compose the core program of the major from which 15 credits shall be chosen. Additionally, two courses at the 400 level or above (other than PHIL 490 and PHIL 492) are required.

Ethical theory: One course required.

Logic: One course required.

PHIL 207 Introduction to Symbolic Logic 3

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check http://www.registrar.iastate.edu/courses/div-ip-guide.html for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. Three of the required 45 300+ level credits must be earned in a general education group outside the group of the major. You must also complete the LAS world language requirement.

According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

Minor in Philosophy

The department offers a minor in philosophy which may be earned by completing a total of 15 credits in philosophy. At least 9 credits must be in courses numbered 300 or above (only 3 credits of which may be in PHI 490). The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

MINOR IN ETHICS

The Department Philosophy and Religious Studies offers a minor in ethics. Ethics is the branch of human thought that addresses questions of human morality. It seeks to define right and wrong at the theoretical level and to guide action across diverse fields of practice. An ethics minor provides opportunities for students to develop an understanding of both the theoretical foundations and the practical applications of ethics. It serves students who wish to understand how ethical thought complements their chosen majors, but also students who have an interest in learning about ethics more generally.

The minor in ethics requires 15 credits; at least 6 credits must be in courses numbered 300 or above. The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

All students pursuing the minor in ethics must complete either PHIL 230 Moral Theory and Practice or PHIL 330 Ethical Theory. In addition, students must complete 6 credits of courses chosen from a list of core ethics courses (Table A below), as well as 6 credits of courses chosen from a broader list of courses with a significant ethics focus (Table A and Table B combined).

**Philosophy - Graduate Study**

The department offers work for a graduate minor in philosophy. For those taking the M.A. or M.S., the minor requirement is two courses above 300 (but not PHIL 490), each taken in conjunction with PHIL 590. For those taking the Ph.D., the requirement is four courses above 300, at least one of which is above 400 (but not PHIL 490), each taken in conjunction with PHIL 590. Interested students should ask the chair to assign a minor advisor.

The department participates in the interdepartmental program in general graduate studies.

**Physics and Astronomy**

**THE Physics Major**

Physics and astronomy are basic natural sciences which attempt to describe and provide an understanding of both our world and our universe. Physics serves as the underpinning of many different disciplines including the other natural sciences and technological areas. Graduates are proficient in the methods of rigorous scientific analysis, relevant mathematical techniques, and modern computational and laboratory methods. They have a broad knowledge of physics, including mechanics, electricity and magnetism, thermodynamics, and modern physics. They are able to communicate clearly and effectively at general and technical levels. They are prepared to pursue a wide range of careers as a professional physicist, astronomer, or science educator. They are also prepared to pursue advanced studies and careers in areas as diverse as engineering, medicine, law, and business administration. Many opportunities exist for students who terminate their studies with a bachelor's degree, especially when combined with technology studies in other areas. Students who meet the necessary scholastic standards often continue their studies in a graduate college, exploring and contributing to new developments in the field.

Faculty have approved a variety of completion pathways for the physics major for students who wish to establish a clear strength in a field of application of physics, such as computer science, science education, mechanical engineering, or even science writing. These pathways make double majors more feasible and are appropriate for students planning to enter the job market with their Bachelor's degree.

**Student Learning Outcomes**

The expected outcomes for students in the program are:

1. a broad knowledge of physics, including mechanics, electricity and magnetism, thermodynamics, wave motion and modern physics
2. proficiency in laboratory methods
3. proficiency in modern scientific computational methods
4. a sound foundation in the liberal arts including proficiency in communication skills.

**Degree Requirements**

All Physics students complete a 26 credit Physics Core, 22 credits of complementary coursework in Mathematics, and additional Advanced Coursework.

**Physics Core**

**Total Credits** 19

**The list of expected advanced courses is not a rigid requirement and substitutions will be reviewed by the department curriculum committee on recommendation of the student’s advisor when such changes will better serve the student’s needs. Faculty have approved a variety of completion pathways for the physics major for students who wish to establish a clear strength in a field of application of physics, such as computer science, science education, mechanical engineering, or even science writing. These pathways make double majors more feasible and are appropriate for students planning to enter the job market with their Bachelor’s degree. Further information concerning programs of study, including sample degree programs, is available from the department.

All physics majors are encouraged to take LAS 203 Professional Career Preparation and STAT 341 Introduction to the Theory of Probability and Statistics I. Students intending to pursue graduate study in physics or astronomy/astrophysics should complete the advanced coursework listed and should choose the option PHYS 481 Quantum Mechanics II from the list above.
Physics majors often supplement their program by completing a minor in astronomy.

In addition to meeting the requirements of the major, students in Physics meet the university-wide Communication Proficiency Grade Requirement, by earning credit for ENGL 150, a grade of C or better in ENGL 250 (or ENGL 250H) and a grade of C- or better in ENGL 302, ENGL 305, ENGL 309 or ENGL 314.

Students are also encouraged to study at least one world language.

As majors in the College of Liberal Arts and Sciences, Physics students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. You must also complete the LAS world language requirement.

1 Students must earn a minimum of two laboratory credits from PHYS 311, 311T, 450L, 450L; ASTRO 344L, 450L.
2 Recommended but not required. Highly recommended for those students planning graduate study.

The department offers a minor in physics which may be earned by completing 20 credits in physics courses chosen as follows:

| PHYS 241 Principles and Symmetries in Classical Physics I | 5 |
| PHYS 242 Principles and Symmetries in Classical Physics II | 5 |
| PHYS 321 Introduction to Modern Physics I | 3 |

One of the following

| PHYS 321L Introductory Laboratory in Modern Physics I | |
| PHYS 322L Introductory Laboratory in Modern Physics II | |
| PHYS 310 Electronic Instrumentation for Experimental Physics | |
| PHYS 311 Intermediate Laboratory | |
| PHYS 311T Intermediate Laboratory for Secondary Physics Teachers | |

Other acceptable courses

| PHYS 304 Thermal Physics | |
| PHYS 306 Physics of Wave Motion | |
| PHYS 322 Introduction to Modern Physics II | |
| PHYS 361 Classical Mechanics | |
| PHYS 362 Intermediate Mechanics | |
| PHYS 364 Electricity and Magnetism I | |
PHYS 365  Electricity and Magnetism II
PHYS 421  Ultrafast Laser Science and Spectroscopy
PHYS 432  Molecular and Cell Biophysics
PHYS 461  Physics of Biomolecules
PHYS 480  Quantum Mechanics I
PHYS 481  Quantum Mechanics II
PHYS 496  Modern Optics
*PHYS 231/231L and PHYS 232/232L may be substituted for PHYS 241 and PHYS 242

The department offers a minor in astronomy which may be earned by completing 15 credits chosen as follows:

ASTRO courses *  
<table>
<thead>
<tr>
<th>12-15</th>
</tr>
</thead>
</table>

3 credits from the following (if only 12 Astro credits)  
<table>
<thead>
<tr>
<th>3</th>
</tr>
</thead>
</table>

PHYS 304  Thermal Physics
PHYS 321  Introduction to Modern Physics I
PHYS 361  Classical Mechanics
PHYS 362  Intermediate Mechanics
PHYS 364  Electricity and Magnetism I
PHYS 365  Electricity and Magnetism II
PHYS 480  Quantum Mechanics I
PHYS 481  Quantum Mechanics II
PHYS 496  Modern Optics
AER E 351  Astrodynamics I

* must include ASTRO 344L Astronomy Laboratory and may include one of the courses ASTRO 120 The Sky and the Solar System, ASTRO 150 Stars, Galaxies, and Cosmology or ASTRO 250 Astronomy Bizarre

12 or more credits must be at the 300 level or higher. Note that only ASTRO 344L may be used to satisfy both the requirements of a physics major and an astronomy minor.

The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

**Graduate Study**

The department offers studies for the degrees master of science and doctor of philosophy with majors at both levels in astrophysics, condensed matter physics, high energy physics, nuclear physics, and physics; and minor credit courses for students majoring in other departments.

Facilities of various research groups of the department and the Ames Laboratory are available for research.

Students with bachelor’s degrees in physics or astronomy from other institutions ordinarily will qualify for graduate study at Iowa State University provided they have satisfactorily completed course work similar to that suggested for undergraduate majors here intending to go on to graduate school. In some cases, additional instruction at the intermediate level may be required.

Graduates have a broad understanding of physical science, as well as mastery of state-of-the-art methods in their area of specialization. They are able to communicate effectively to a wide range of audiences, from the general public to research colleagues. Their skills in rigorous scientific thinking prepare them for leadership in the broader community. They are skilled in carrying out research, communicating research results, and soliciting research support. They have considerable teaching experience. They have developed problem solving skills that prepare them for careers in either industry or academia.

All candidates for an advanced degree in physics are expected to complete:

<p>| |</p>
<table>
<thead>
<tr>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
</tbody>
</table>

PHYS 531  Statistical Mechanics  
PHYS 564  Advanced Classical Mechanics  
PHYS 571  Electricity and Magnetism I  
PHYS 572  Electricity and Magnetism II  
PHYS 591  Quantum Physics I  
PHYS 592  Quantum Physics II

Candidates for an advanced degree in astrophysics should complete:

<p>| |</p>
<table>
<thead>
<tr>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
</tbody>
</table>

PHYS 531  Statistical Mechanics  
PHYS 564  Advanced Classical Mechanics  
PHYS 571  Electricity and Magnetism I  
PHYS 591  Quantum Physics I  
ASTRO 505  Astrophysical Cosmology  
ASTRO 510  Observational Astrophysics

Astrophysics Ph.D. candidates must take at least three of the 580 level Astro courses, while candidates for the Research Masters must take at least two 580 level Astro courses.

A thesis is always required for all Ph.D. majors. The degree master of science is offered both with and without thesis. For all graduate majors the basic requirements for the M.S. are the same: at least 30 credits of acceptable graduate work must be completed, not less than 21 of which must be in physics or astronomy. Students choosing a M.S. degree with thesis may apply up to 8 credits of 699 but no credits of 599 toward the minimum 30 credits. Students choosing a degree without thesis should apply 2 credits of 599, but may not apply any credits of 699, toward the minimum 30 credits.
In addition to course work in the major area of study, all candidates for the Ph.D. degree must complete 9 credits of graduate course work outside this area including at least one 500 or 600 level introductory course in another area of physics. Each candidate for the Ph.D. degree is required to teach one year of elementary physics or astronomy.

Graduate students interested in a physics minor should contact the department for requirements.

Political Science

The study of political science is designed to enable students to understand the nature of politics, public values, and policy, as well as the institutions and processes that produce these outcomes.

Students completing a major in political science will understand and be able to interrelate the leading theories, literature, and approaches in the subfields of American government, political theory, international relations, comparative politics, and public policy. Graduates can analyze and formulate effective argumentation in written and oral forms, with the ability to appreciate and accommodate diverse political ideas and to collect and critique information and ideas of others in support of original arguments. Graduates appreciate the knowledge and civic responsibilities required for effective participation in political life.

The political science major is often chosen by students preparing for a career in law. Students with this goal should consult with the department in selecting courses.

Several internship options are available to the political science major, offering students the opportunity to experience practical application of the knowledge learned in academic courses.

Expected Student Learning Outcomes

Upon graduation, students should be able to:

- Understand the nature of politics, public values, and the institutions and processes of politics in their various forms.
- Understand and be able to interrelate the leading theories, literature, and approaches in the subfields of American government, political theory and methods, international relations, comparative politics, and public policy.
- Be able to analyze and formulate effective argumentation in written and oral forms, including the ability to appreciate and accommodate diverse political ideas, and to collect and critique information in ideas of others in support of original arguments.
- Appreciate the knowledge and civic responsibilities required for effective participation in political life.

Requirements for the Major:

For the purpose of defining undergraduate requirements in the Department of Political Science, the Department employs five subfields within the discipline, with the following courses in each:

I. Law, justice, and Political philosophy

To complete the major in Political Science a student must earn 33 semester credits of courses in Political Science subject to the following conditions:

1. Students must satisfactorily complete POL S 101 and POL S 301.
2. Students must complete at least 15 credits in one of the five subfields listed above (or, with departmental approval, an alternative, substantively related set of 15 POL S credits), with at least 3 credits in each of three additional subfields.
3. Political Science courses in which a student has a grade of D+ or lower will not count for the major but can be counted as electives.
4. At least 21 credits of Political Science courses must be numbered 300 or above.
5. At least 9 credits of Political Science courses must be numbered 400 or above.
6. No more than three credits of POL S 490, POL S 496, POL S 497, or POL S 499 (alone or in combination) can be used to fulfill any of these requirements.
7. At least 15 credits of Political Science coursework must be earned at Iowa State University.
8. Students must pass at least one Statistics course from among STAT 101, STAT 104, or STAT 226.
9. According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.
10. Advanced Communication Skills: Majors must earn at least a C in one course from among ENGL 302, ENGL 309, or ENGL 314.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

To complete the major in Political Science a student must earn 33 semester credits of courses in Political Science subject to the following conditions:

Total 15  15-16

Junior
Fall  Credits  Spring  Credits
POL S 301  3  Political Science Choice - 400 Level  3
In addition, the Department of Political Science offers work for a Master certificate program that requires less work than a full masters program. Management and Policy (GCPMP) for those interested in an educational major in political science and minor for students in other departments. The department also offers work for a Master of Arts degree (MA) with a Graduate Certificate of Public Study of Graduate Education for more information about applying.

The department offers a minor in political science that may be earned by completing 15 credits of coursework in political science, fulfilling all of the following criteria:

- At least 9 of the credits must be in courses numbered 300 or above.
- At least 9 of the credits must have been taken at Iowa State University.
- At least 6 of the credits must be in courses numbered 300 or above, be taken at Iowa State University, and have a minimum grade of C.
- No more than 3 credits of POL S 312, POL S 313, POL S 314, POL S 315, or POL S 490, alone or in combination, may be included.
- None of the credits may be in courses offered only on a satisfactory/fail basis.
- At least 9 of the credits must not be used to meet other department, college, or university requirement.

### BA/MA PROGRAM

The concurrent BA/MA (https://www.pols.iastate.edu/combined-b-a-m-a/) classification offers well-qualified Iowa State juniors and seniors the opportunity to start working on a master’s degree in Political Science before completing a bachelor’s degree. Contact the department’s Director of Graduate Education for more information about applying.

### Graduate Study

The department offers work for a Master of Arts degree (MA) with a major in political science and minor for students in other departments. The department also offers work for a Graduate Certificate of Public Management and Policy (GCPMP) for those interested in an educational certificate program that requires less work than a full masters program. In addition, the Department of Political Science offers work for a Master of Science in Information Assurance (MSIA) and a joint Master of Arts/Juris Doctor (MA/JD) program with the Law School of Drake University. Information with detailed requirements for all graduate degrees may be obtained at the department’s web page at https://www.pols.iastate.edu/academics/graduate/

### Master of Arts (MA)

This is a 30-credit masters degree that gives students the opportunity to explore the field of political science in order to pursue a PhD, go to law school, improve research skills, or understand politics better. The three concentration areas are American Politics, Global Politics, and Public Policy. Although it is not a formal concentration, some students have worked heavily in the area of political theory. Top students are eligible for graduate assistantships that make graduate study much more affordable and provide opportunities for assisting faculty with teaching and research. These are awarded on a merit basis. A thesis is required for this degree. The department also has a joint Master of Arts/Juris Doctor (MA/JD) program with the Law School of Drake University. Students wishing to pursue this joint degree must submit separate applications to Drake University and Iowa State University and be accepted by both institutions.

MA graduates have a broad substantive understanding of the political process and the academic study of politics. They also have in-depth knowledge of one or more subfields in political science. Graduates are skilled at conducting research and preparing thorough research summaries. They are able to identify and address complex political questions, taking into account related ethical, legal, economic, and social issues.

The prerequisites for major graduate work in the MA program normally are completion of at least 15 credits in political science, the GRE (Graduate Record Examination), one year of a foreign language (equivalent to 8 semester hours), and a course in basic statistics (equivalent to STAT 101). If the basic statistics requirement has not been met, the student may remedy the deficiency by passing equivalent courses, for which no graduate credit will be received. During their program of study, all students are expected to complete STAT 587, POL S 502, and a thesis. Additional information including detailed graduation requirements can be found at https://www.pols.iastate.edu/academics/graduate/#ma

### Master of Science in Information Assurance (MSIA)

The Master of Science in Information Assurance (MSIA) is a multi-disciplinary program designed to provide students with diverse backgrounds and interests the opportunity to obtain professional training in the emerging field of information assurance. The core of the MSIA program is built around a series of courses taught in Electrical
and Computer Engineering, Mathematics, and Computer Science that introduce students to software and hardware aspects of cryptography and computer security. The program also recognizes, however, that information assurance defined in terms of security, privacy, access, and reliability is not simply a technical problem but also involves important societal dimensions, including policy, education, ethics, and management. Recognizing that political science offers many potential intersections with information assurance (e.g., public sector management of information technology; forensics and computer crime; information technology policy and law; information technology and international relations; information warfare; etc.), students with interests in these areas are encouraged to select the Department of Political Science as their home department.

Students opting to pursue a MSIA degree through the Department of Political Science can expect to acquire skills and background knowledge relevant to a career in public policy or public sector management of information assurance technologies. The MSIA degree can also help prepare students who wish to go on to pursue a PhD in information politics and policy.

Students interested in the MSIA degree program should consider Political Science as a home department if their future career and/or educational interests lie in such areas as: institutional issues related to the Internet and information technologies; electronic government and electronic democracy; information technology, international security, and information warfare; information technology policy and law; and public administration and public sector management of information technology.

Admission requirements generally follow the same guidelines as the MA in Political Science. Degree requirements are specified by the MSIA program in cooperation with Political Science. More in-depth information on the program including detailed graduation requirements can be found at: https://www.pols.iastate.edu/academics/graduate/#msia

Master of Arts/Juris Doctorate Program (MA/JD)

The Drake Law School and the Department of Political Science at Iowa State University are co-sponsors of the Master of Arts/Juris Doctorate degree. This degree combines courses at both Iowa State University and the Drake Law School and follows most of the same requirements as a double degree. However, the student must have full admission to both schools. Detailed information for the MA/JD can be found at the ISU Political Science webpage as well as the Drake Law School website (under Joint Degree): http://www.law.drake.edu/ (http://www.law.drake.edu).

The increasing attention being focused on the solution of social problems by state and federal governments has created a need for persons with advanced training in both law and political science. The Drake Law School and the ISU Department of Political Science jointly administer a MA/JD program to provide an opportunity for students at the Drake Law School to achieve, concurrently, a JD degree in law and a MA degree in political science, and for graduate students in political science at Iowa State University to achieve a degree in law.

Successful completion of this program will enable students at Drake Law School to receive both a JD and an MA degree within a three-year period, while graduate students in political science at Iowa State University will be able to transfer a substantial number of hours to the Drake Law School toward the fulfillment of the JD requirements in a similar amount of time. Additional information including detailed graduation requirements can be found at: https://www.pols.iastate.edu/academics/graduate/#majd

Graduate MINOR

Students in other graduate programs may obtain a minor in political science by completing at least 9 credits of political science courses. Interested students should consult the Graduate College Handbook for additional information on graduate minors.

THE GRADUATE CERTIFICATE OF PUBLIC MANAGEMENT AND POLICY (GCPMP)

The Political Science Department offers a Graduate Certificate of Public Management and Policy (GCPMP). The GCPMP is a 15-credit certificate. Students who are interested in public management and policy, but unsure about committing to a full master’s degree, can aim for the certificate knowing that those courses will also count toward a master’s degree if they choose to continue on. Iowa State graduate students in other fields may want to pursue the certificate to improve their credentials on the job market if their interest overlaps with public management and policy. For example, doctoral students in higher education and education administration can earn all 9 of their “outside” credits in the GCPMP coursework, add the 6 more elective credits, and earn a GCPMP along with their PhD.

Requirements for admission are a graduate school application, an essay stating purposes for study, college transcripts, the GRE (waived for those with five or more years of public or nonprofit sector experience), three letters of recommendation, and the TOEFL for international students. More information on the program including curricular requirements can be found at: https://www.pols.iastate.edu/academics/graduate/#gcpm/ (https://www.pols.iastate.edu/academics/graduate/#gcpm).

Pre-professional Study

Pre-professional Study

Iowa State University is a great place to prepare for careers that require professional school training, such as medical school, law school or veterinary school. Requirements for admission to most professional
academic programs can be met during your studies at Iowa State University. The specific courses taken in a pre-professional program will depend primarily upon the admission requirements of the professional schools to which a student wants to apply.

In some programs where professional schools require only three years of pre-professional work, a student may, by careful planning, complete requirements for the bachelor’s degree upon transferring to Iowa State up to 32 semester credits of professional coursework. Generally these reverse transfer credits will be counted as electives, but a maximum of 24 may be used to apply to a major in Interdisciplinary Studies and a smaller number may be used to meet requirements in other majors as approved by the faculty.

All students, whether they have selected a major or not, are encouraged to identify their interest in a professional career by designating it on their application to the university. Students who have not decided on a major can enter Iowa State as pre-professional students, selecting pre-medical, pre-law, pre-professional health (PHP), Open Option, or General Undergraduate Studies Pre-Veterinary Medicine (GENPV), until they choose a major or transfer to a professional school.

Information about pre-professional program admissions requirements and career opportunities in human health or law is available in the Liberal Arts and Sciences Advising Center. Information about veterinary medicine admissions requirements and career opportunities is available from the coordinator of the pre-veterinary program in the Office of the Dean of the College of Veterinary Medicine.

- Pre-Law
- Pre-Veterinary Medicine

Pre-Health & pre-medical Advising

Iowa State University is a great place to prepare for careers in health and medicine. As a major research university with an exceptional student experience, we’re excited to help you create a competitive application for medical or professional school. Whether you are aiming for a career in human medicine, dentistry, occupational health, physical therapy, pharmacy, optometry, health information management, dietetics, hospital and health administration, medical technology, clinical lab sciences, or many others, you can find the classes and experiences you need to be prepared for the next steps in your professional training. Learn more on the Pre-health and Pre-medical Professions Advising (https://pre-health.las.iastate.edu/) website.

PRE-Law Preparation

A student planning to enter law school may pursue an undergraduate degree in any discipline. The choice of the bachelor’s degree should reflect a student’s passion and personal interests rather than be limited by a belief that law schools require a specific major. Students should complete courses that will enhance their strengths in critical thinking, analytical writing, research and oral communication. Courses from a broad range of disciplines will provide students with the knowledge base and skills to support their preparation for law school. Courses might include accounting, criminal justice, economics, English literature, history, management, mathematics, political science, psychology, philosophy and statistics. Advanced writing courses and speech communication courses will also serve students well. The American Bar Association (https://www.americanbar.org/groups/legal_education/resources/pre_law/) advises students that “taking a broad range of difficult courses from demanding instructors is excellent preparation for legal education.”

The College of Liberal Arts and Sciences participates in a 3+3 program with the Law Schools at Drake University and at the University of Iowa. Visit the Liberal Arts and Sciences Student Academic Services office for details about the 3+3 program and pre-law club, and to explore your pathway to law school.

Learn more on the Pre-Law Advising (https://pre-law.las.iastate.edu/) website.

Pre-Veterinary Medicine

Deanna Gerber (futuredvm@iastate.edu)

About 75% of all veterinarians are engaged in private practice. In a mixed practice, they diagnose and treat health problems among a variety of animals. Others specialize in one species (e.g., feline, pet bird) and still others specialize in a specific discipline within veterinary medicine (e.g., cardiology, ophthalmology). Veterinarians may also choose public and corporate practice (e.g., public health, education, research, food safety.
industry, laboratory animal medicine, aquatic animal medicine, poultry medicine, and military veterinary medicine).

The professional program requires four years at a college of veterinary medicine and leads to the doctor of veterinary medicine degree (D.V.M.). Admission to a veterinary college involves at least two years of preprofessional college education. Candidates must take courses in biology, chemistry, genetics, physics, English, humanities, social sciences, speech, anatomy and physiology, and biochemistry. (For Iowa State University see Pre-Veterinary Medicine Preparation in the Veterinary Medicine section of the catalog; for the most current information regarding applications and admission to the College of Veterinary Medicine, please refer to the College website at www.vetmed.iastate.edu/ (http://www.vetmed.iastate.edu/).)

Students may pursue their preveterinary preparation in any college at Iowa State University. A major (preveterinary medicine is not a major) should be selected that is allied to each student's vocational interests in veterinary medicine or that otherwise offers vocational satisfaction in the event that plans for entry into the College of Veterinary Medicine change. Students are encouraged to pursue a bachelor's degree; the most effective progress toward a bachelor's degree is made when a major is selected upon entry and no change occurs before graduation. However, students who have not even considered a career other than veterinary medicine may need some time to explore possibilities before selection of a major.

To assist students who have indicated interest in the preveterinary program for the College of Veterinary Medicine and are undecided about a major, an advising category is available known as GENPV (General Undergraduate Studies Pre Vet). Orientation and advising services for these students are designed to help students fulfill preveterinary course requirements, to introduce available majors and careers allied to veterinary medicine, and to introduce career options in veterinary medicine. GENPV students must select a major by the end of their second semester. Some Iowa State University majors allow, by careful planning, the opportunity for a student to earn the bachelor's degree by combining credits from three years of preprofessional study and one year of professional study in the College of Veterinary Medicine.

Psychology

Psychology Overview

For college-level requirements in undergraduate curricula leading to the degrees of bachelor of arts and bachelor of science, see College of Liberal Arts and Sciences.

An undergraduate major in psychology provides a liberal arts and science education, which also can serve as preparation for graduate study in psychology, law, or the health professions. The undergraduate major in psychology enables graduates to understand and apply the scientific principles, facts, and basic methods of psychology to their personal and professional activities. Students with a bachelor’s degree (B.A./B.S.) in psychology may qualify for a variety of positions including those in social sciences, mental health, corrections, rehabilitation, developmental disability centers, and business (management, insurance, opinion polls). Professional work as a psychologist in academic, business, clinical, government, and school settings requires graduate degrees. Depending on professional goals, a minor in another discipline may be desirable.

Student Learning Outcomes

Following the recommendations of the American Psychological Association, the undergraduate curriculum in psychology is designed to allow each student to:

1. Develop a detailed knowledge of psychology
2. Develop an understanding of scientific inquiry and demonstrate critical thinking
3. Understand the role of ethics and diversity in human behavior
4. Be able to communicate effectively in the discourse of psychology
5. Develop skills supporting employment or graduate/professional education

Degree Requirements

COMMUNICATION PROFICIENCY REQUIREMENT

According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 150</td>
<td>Critical Thinking and Communication</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 250</td>
<td>Written, Oral, Visual, and Electronic Composition</td>
<td>3</td>
</tr>
<tr>
<td>or ENGL 250H</td>
<td>Written, Oral, Visual, and Electronic Composition: Honors</td>
<td>3</td>
</tr>
</tbody>
</table>

The Department requires a C- or better in one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYCH 302</td>
<td>Research Methods in Psychology</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 302</td>

<td>3</td>
</tr>
<tr>
<td>ENGL 309</td>
<td>Proposal and Report Writing</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 314</td>
<td>Technical Communication</td>
<td>3</td>
</tr>
</tbody>
</table>

The major must include the following psychology courses each with a minimum grade of C- and an overall average of C or better:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYCH 111</td>
<td>Orientation to Psychology</td>
<td>1</td>
</tr>
<tr>
<td>or PSYCH 112</td>
<td>Psychology Learning Community Seminar</td>
<td></td>
</tr>
<tr>
<td>PSYCH 101</td>
<td>Introduction to Psychology</td>
<td>3</td>
</tr>
<tr>
<td>PSYCH 211</td>

</tr>
<tr>
<td>PSYCH 301</td>
<td>Research Design and Methodology</td>
<td>3</td>
</tr>
<tr>
<td>PSYCH 440</td>
<td>Psychological Measurement</td>
<td>3</td>
</tr>
</tbody>
</table>
The major also must include at least one course from four of the following six areas:

Area A
PSYCH 230 Developmental Psychology 3
PSYCH 335 Child and Adolescent Psychopathology 3

Area B
PSYCH 280 Social Psychology 3
PSYCH 380 Social Cognition 3

Area C
PSYCH 310 Brain and Behavior 3
PSYCH 315 Drugs and Behavior 3

Area D
PSYCH 312 Sensation and Perception 3
PSYCH 313 Learning and Memory 3
PSYCH 316 Cognitive Psychology 3
PSYCH 318 Judgment and Decision Making 3

Area E
PSYCH 360 Personality Psychology 3
PSYCH 460 General Psychopathology 3

Area F
PSYCH 250 Psychology of the Workplace 3
PSYCH 350 Human Factors in Technology 3

Three additional 3-credit courses in psychology 9

Three additional 3-credit courses in psychology must be taken. Area courses may be used to meet this requirement, but variable credit courses (PSYCH 291, PSYCH 470, PSYCH 490, PSYCH 491, and PSYCH 492) may not.

In accordance with college requirements, a C or better average is required in the courses used to satisfy the major.

Departmental requirements for the B.A. and B.S. include the following supporting courses:

6 credits in Philosophy including
PHIL 201 Introduction to Philosophy (not 207) 3
Two of the following
BIOL 101 Introductory Biology 3
or BIOL 211 Principles of Biology I 3
or BIOL 212 Principles of Biology II 3
BIOL 155 Human Biology 3
or BIOL 255 Fundamentals of Human Anatomy 3
or BIOL 256 Fundamentals of Human Physiology 3
CHEM 160 Chemistry in Modern Society 3
or CHEM 163 College Chemistry 3
PHYS 101 Physics for the Nonscientist (or higher) 3
or STAT 101 Principles of Statistics * 3-4
or STAT 104 Introduction to Statistics 3

3 credits in Mathematics from selected course list**

*  minimum grade of C-
** Popular choices include Math 104, Math 140, Math 150, Math 165, and Stat 301. See general education mathematics list for alternative options. Neither Math 105 nor Math 106 may be used to satisfy this requirement.

Students pursuing a B.S. degree also must complete
PSYCH 302 Research Methods in Psychology with a minimum grade of C- and a minimum of 10 additional credits from courses listed in the LAS General Ed Natural Sciences and Mathematical Disciplines Area as follows: six additional credits in natural sciences, one additional credit in a laboratory course, and three additional credits in mathematics. It should be noted that either Math 104 or Math 150 may be counted toward the B.S. degree requirement, but not both.

Students electing a B.A. degree also must complete an ISU approved minor, certificate or second major.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. You must also complete the LAS world language requirement.

2. The university-wide Communication Proficiency Grade Requirement requires a grade of C or better in ENGL 250.
3. Psych Requirement: C- minimum
* Choose from list of selected courses available from an advisor.

**Psychology Undergraduate Minor**

The department offers a minor in psychology. The minor requires completing 18 credits in psychology, including PSYCH 101 Introduction to Psychology and PSYCH 301 Research Design and Methodology, each with a minimum grade of C-. At least 9 of the 18 credits must be in 300 level courses (or above), but no more than three credits total may be from PSYCH 291 Introductory Research Experience, PSYCH 490 Independent Study, PSYCH 491 Research Practicum, and PSYCH 492 Fieldwork Practicum. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. In addition to an overall C average or better in courses used to satisfy the minor, a C- or better is required in each course. Contact the psychology advising office for more information.

**Graduate Study**

The department offers work for the degree of doctor of philosophy in psychology. A master of science may be earned as part of that degree.

The department offers a doctoral specialization in counseling (https://counseling.psych.iastate.edu/) psychology (APA accredited) and doctoral
areas of concentration in cognitive (https://psychology.iastate.edu/graduate-study/doctoral-programs/cognitive-psychology/) psychology and social (https://psychology.iastate.edu/graduate-study/doctoral-programs/social-psychology/) psychology.

A basic goal of graduate study in the Department of Psychology is to provide all students with a broad base of knowledge in psychological science, as well as exposure to the content and methodological skills necessary for effective performance in teaching, research and professional practice. Accordingly, graduates have an extensive knowledge of psychological principles and the conceptual and quantitative skills to conduct psychological research and to communicate the results to the scientific community, students in the classroom, and the general public. Graduates in counseling psychology are skilled in delivering services to diverse clientele in a variety of settings.

The department also participates in the interdepartmental programs in human computer interaction (http://www.vrac.iastate.edu/hci/), neuroscience (http://www.neuroscience.iastate.edu/) (http://www.neuroscience.iastate.edu/) and in the interdepartmental minor in gerontology (http://www.gerontology.iastate.edu/programs/).

A formal class and a supervised practicum in the teaching of psychology is recommended for all doctoral students whose future plans may include teaching at the college level. A 12-month internship in a training site or agency approved by the faculty is required of all doctoral students in counseling psychology.

Public Relations
PUBLIC RELATIONS
http://www.greenlee.iastate.edu (http://www.greenlee.iastate.edu/)

The public relations major provides students with the concepts, skills and expertise needed to help organizations build mutually beneficial relationships with diverse publics. The knowledge and tools students develop through the P R curriculum ensure they can enter fields such as corporate communication, government affairs, and public relations firms. Coursework in this major focuses on writing, research, digital and emerging media, and professional abilities. Students are required to complete a capstone internship experience to practice and refine their skills.

The Greenlee School of Journalism and Communication prepares students for the field of communication. The school offers three majors:

• Advertising Bachelor of Arts (ADVRT)
• Journalism and Mass Communication Bachelor of Science (JL MC)
• Public Relations Bachelor of Science (P R)

In addition, the Greenlee School offers a 4+1 program allowing students to complete their B.A. or B.S. and earn an M.S. in journalism and mass communication in fewer semesters.

Professional skills are taught and practiced alongside academic requirements using the latest technology and leading-edge communication trends and methods.

Founded in 1905, the unit was one of the first journalism programs to be accredited in 1948 and continues to be one of the longest continuously accredited programs in the country. Accreditation is based on the principle that students need a broad-based, liberal arts education and solid core courses within the discipline. Students taking one major at the school may not seek a second major or minor in the school. All students are required to take a second major or minor outside the school as an area of expertise.

Student Learning Outcomes
Students who major in programs of the Greenlee School of Journalism and Communication are expected to develop competencies in 12 key areas:

• understand and apply the principles and laws of freedom of speech and press for the country in which the institution that invites ACEJMC is located, as well as receive instruction in and understand the range of systems of freedom of expression around the world, including the right to dissent, to monitor and criticize power, and to assemble and petition for redress of grievances;
• demonstrate an understanding of the history and role of professionals and institutions in shaping communications;
• demonstrate an understanding of gender, race ethnicity, sexual orientation and, as appropriate, other forms of diversity in domestic society in relation to mass communications;
• demonstrate an understanding of the diversity of peoples and cultures and of the significance and impact of mass communications in a global society;
• understand concepts and apply theories in the use and presentation of images and information;
• demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity;
• think critically, creatively and independently;
• conduct research and evaluate information by methods appropriate to the communications professions in which they work;
• write correctly and clearly in forms and styles appropriate for the communications professions, audiences and purposes they serve; critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness;
• apply basic numerical and statistical concepts;
• apply current tools and technologies appropriate for the
  communications professions in which they work, and to understand
  the digital world.

The Public Relations Major

To receive a bachelor of science degree in public relations, a student
must earn at least 120 credits. A minimum of 72 credits must come from
courses other than ADVRT, JL MC or P R. At least 50 of these credits
must come from the liberal arts and sciences. Overall, at least 45 credits
must be from 300-level or above.

The degree requirements allow for a minimum of 34 credits and a
maximum of 48 credits to be taken in ADVRT, JL MC and P R. These
include:

<table>

These additional requirements apply:

University Requirement: Students in all ISU majors must complete
a three-credit course in U.S. Diversity, as well as a three-credit
course in International Perspectives. The approved course lists
are found at the following web addresses:(U.S. Diversity) http://
www.registrar.iastate.edu/students/div-ip-guide/usdiversity-
courses (http://www.registrar.iastate.edu/students/div-ip-guide/
usdiversity-courses/) and (International Perspectives) http://
www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current
(http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-
current/). Students must also demonstrate their communication
proficiency by earning a grade of C or better in ENGL 250.

College of LAS Requirement: Minimum of 120 credits, including a
minimum of 45 credits at the 300-level and above. You must also
complete the LAS World Language requirement and any unmet ISU
admission requirements.

Greenlee majors and minors cannot take ADVRT, JL MC or P R courses
pass/not pass.

Minor or Second Major: Students are required to fulfill a secondary area of
expertise. This requirement can be met by declaring a minor or a second
major outside of the Greenlee School of Journalism and Communication.
Students taking one major at the school may not seek a second major or
minor in the school.

Juniors can apply to a concurrent degree program and earn a B.S. in
public relations and an M.S. in journalism and mass communication in
fewer semesters. Contact the Director of Graduate Education for more
information on the Greenlee Schools’ 4+1 Program.

### Minor in Public Relations

Students cannot select more than one minor in the Greenlee School of Journalism and Communication. Minors in the Greenlee School are not available to Greenlee majors.

For a minor in public relations, students complete 15 credits including at least 6 credits in the courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

### Concurrent Undergraduate and Graduate Programs

The Greenlee School offers a 4+1 program allowing students to complete their B.A. or B.S. and earn an M.S. in journalism and mass communication in fewer semesters.

The Greenlee School offers three concurrent degree programs:
B.A. Advertising/M.S. Journalism and Mass Communication
B.S. Journalism/M.S. Journalism and Mass Communication
B.S. Public Relations/M.S. Journalism and Mass Communication

Enrollment in the Greenlee School’s concurrent degree programs enables students to complete coursework for the undergraduate and graduate programs on a five-year accelerated timeline – rather than the typical six-year timeline for the two degrees. See Journalism and Mass Communication Concurrent Undergraduate and Graduate Programs for more information on combining the B.S. in Public Relations and the M.S. in Journalism and Mass Communication.

GRADUATE PROGRAMS

Master of Science
The Greenlee School of Journalism and Communication offers work for a Master of Science degree in journalism and mass communication.

Concurrent Programs
The Greenlee School’s concurrent degree programs enable interested students the opportunity to complete coursework for the undergraduate and graduate programs on a five-year accelerated timeline – rather than the typical six-year timeline for the two degrees.

Graduate Minor
The Greenlee School graduate program offers minor work for students majoring in other departments.

See Journalism and Mass Communication Graduate Programs for more information on the M.S. in Journalism and Mass Communication.

Religious Studies

The Religious Studies major (27 credits) and minor (15 credits) offer Iowa State University students the opportunity to expand their knowledge about diverse religions in the United States and the world. The major and minor allow students to design their own unique program of study by taking courses that spark their interest. Religious Studies teaches students to explore religion objectively, critically, and empathetically. It equips students to apply academic theories and methods to understand how religions shape and are shaped by human history, culture, and society, drawing on historical, cultural, and textual analyses. As their religious literacy increases, students will develop their own ideas about the nature of religion, life’s big questions, and the wide range of human ideas, practices, and motivations.

The major in Religious Studies provides both breadth and depth. The program’s 200-level courses introduce students to the academic study of religion, providing a foundation that students build on throughout their undergraduate career. In 300-level courses, students closely investigate particular traditions, topics, or themes. In the 400-level capstone class, students reflect on the knowledge and skills they have learned in order to produce a research project that contributes to the field of Religious Studies. Throughout their undergraduate career, students have opportunities to connect their program of study to their own professional and personal goals.

The Religious Studies program provides students skills relevant to building a career based on their interests and passions. Contrary to popular myths, employers in today’s modern workplace value college graduates with liberal arts degrees. In Religious Studies, these include the “hard skills” of writing, reading, and conducting organized research. Students also gain so-called “soft skills.” These include communication strategies, learning to adapt to new environments, and the capacity to work with and understand people from diverse backgrounds. The flexibility of these skills opens up a wide range of career paths. Religious Studies graduates pursue careers in non-profits, community organizations, and people-focused industries. They apply to graduate and professional schools in areas such as law, education, and ministry. A Religious Studies degree doesn’t just help students get a job. It helps them advance and grow, both professionally and personally, well into their lives.

Student Learning Outcomes
Upon graduation, students should be able to:

1. Describe religious diversity in the United States and around the world, including diversity within traditions.
2. Identify key beliefs, doctrines, practices, and expressions of multiple religions.
3. Explain how religion has shaped and been shaped by human history, culture, and society, drawing on historical, cultural, and textual analyses.
4. Distinguish between confessional and academic understandings of religion.
5. Assess data produced by and about religious communities in an objective, critical, and empathetic manner.
6. Create and convey original insights using effective reading, research, writing, and conversation skills.

Religious Studies - Undergraduate Study

Students pursuing a major in religious studies must complete a minimum of 27 credits, including the requirements below. Students may also choose to do a senior thesis under the supervision of a religious studies faculty advisor. This option may earn 3-6 credits toward the completion of the major.

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Credits</th>

<td></td>
</tr>
</tbody>
</table>
Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. Students must also complete the LAS College requirements, including the world language requirement.

\(^1\) Laboratory science recommended.

The program offers a minor that may be earned by completing a total of 15 credits in religious studies including either RELIG 205 World Religions or RELIG 210 Religion in America. Nine hours must be in courses at the 300 level or above (no more than 3 hours of seminar and no more than 3 hours of independent study). The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

### Religious Studies - Graduate Study

Religious studies may be one of the three areas used for the interdisciplinary graduate studies master's degree.
Science Communication Certificate

The science communication certificate provides an opportunity for students to develop their public communication skills, to interface with students and faculty across disciplinary and science-public divides, and to give students an edge in the job market where successful communication with a multitude of stakeholders is essential. As a discipline, science communication brings together theory and practice to communicate scientific information to the public, with an emphasis on two-way and strategic communication with the public.

This certificate is designed to encourage students who are interested in the intersection of science and society to pursue coursework that provides them with the skills to practice public-facing science and effectively engage the public around complex and sometimes controversial scientific topics. In addition, the certificate is designed to facilitate convergence across disciplines and encourage team-based collaboration at the undergraduate level.

The certificate is open to students of any major, but may be of particular value to students who are planning to pursue science, environmental, health or agricultural communication as a career or students pursuing a career in a science, engineering, math and other technical fields interested in strengthening their communication skills.

Objectives

• Encourage students to engage with community members, other students and faculty across interdisciplinary boundaries, diverse backgrounds, and divergent interests.

• Prepare students to communicate scientific findings and technological advances in a clear and compelling manner while also encouraging inclusive communication that acknowledges others’ values and concerns.

• Cultivate students’ understanding of the origins and dynamics of science related controversies and conflicts.

• Challenge students to identify and address scientific misinformation, scientific skepticism, and science denial across social media, blogs, and other social and online networks.

• Prepare students to engage in constructive conversations with diverse audiences over contested science, environmental, health, and agricultural topics.

Student Learning Outcomes

Students who complete the proposed science communication certificate will be able to:

• Create, co-produce, and evaluate public-facing science communication

• Understand and address the ethical, social, cultural, and historical factors that influence both the public communication of science and the rise and spread of science-related controversies

• Promote public and cross-disciplinary understanding of scientific information

• Co-produce knowledge with community stakeholders through public-facing projects

• Create effective and appropriate science messages across diverse and emergent media platforms, addressed to diverse audiences

• Critically analyze science messages addressed to public audiences around science

• Identify and address misinformation across social media, blogs, and other social and online networks

• Engage in constructive conversations about contested science, environmental, health, and agricultural topics

To prepare students for the challenge of communicating effectively at the intersection of science and society, students will take a core of 12-credits from the Greenlee School of Journalism and Communication, the English Department, and the Department of Philosophy and Religious Studies and 9-credits of electives from three tracks: science in practice, science and society, and communication in practice.

The certificate requires 21 credits, where 9 of the credits taken do not fulfill any other requirements for other majors or general education. Students must complete ENGL 250 before enrolling in the certificate.

Core Courses (12 credits)

JL MC/P R/ADVRT 200-level core course TBD 3
PHIL 206 Introduction to Logic and Scientific Reasoning 3
ENGL 312 Communicating Science and Public Engagement 3
JL MC 347 Science Communication 3

Electives (9 credits)

Students will take one course from each of the three categories of electives: Science in Practice, Science and Society, and Communication in Practice.

• 6 of the 9 credits must be at the 300+ level.

• Students who engage in an internship or research experience (including those connected to courses) may seek approval from the steering committee to have this experience counted as an elective course. This experience must include a public-facing communication/outreach component, and the steering committee will decide which of the 3 categories of electives this experience would fulfill. Students who wish to count the internship toward the certificate must track their hours as well as complete a final paper about their experiences.

### Sociology

#### Undergraduate Study in Sociology

The Department of Sociology offers course work leading to either a bachelor of arts, bachelor of science, or a minor in sociology. Additionally, a bachelor of science in Agricultural & Rural Policy Studies is offered.

#### Student Learning Outcomes

Graduates of all these programs will understand and demonstrate:

1. general knowledge of sociology
2. research methods in sociology
3. critical thinking skills
4. application of sociology to pressing social issues
5. sociological and professional values
6. information technology skills
7. communication skills
8. personal and career development

Graduates understand how social institutions, communities, and organizations work and change; they can examine the causes and
consequences of conformity, deviance, and inequality. They can apply sociological understanding of human behavior to practical work situations and everyday life. Graduates can read critically, think independently, and communicate effectively about social issues and social policy.

**dEGREE rEQUIREMENTS**

As majors in the College of Liberal Arts and Sciences, Sociology students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated below for the major.

**University Requirements:**

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>International Perspective</td>
<td>3</td>
</tr>
<tr>
<td>US Diversity</td>

**Departmental requirements for sociology majors**

A program of study that meets the needs and interests of the student and department requirements will be developed in consultation with the major advisor. Students must maintain a GPA of 2.0 or higher in their core courses. Programs of study will include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC 115</td>
<td>1</td>
</tr>
<tr>
<td>SOC 134</td>
<td>3</td>
</tr>
<tr>
<td>SOC 302</td>
<td>3</td>
</tr>
<tr>
<td>SOC 401</td>
<td>3</td>
</tr>
<tr>
<td>6 credits of 200+ Sociology courses</td>
<td>6</td>
</tr>
</tbody>
</table>

| 18 credits of 300+ Sociology courses | 18 |

| **Total Credits** | 34 |

**bachelor of arts or bachelor of science degree**

In addition to the program of study above, students must select complementary courses that will lead to a bachelor of arts or bachelor of science degree. Programs leading to a bachelor of arts degree will emphasize additional coursework in groups I and III of the general education requirements. Programs leading to a bachelor of science degree will emphasize additional coursework in groups IIA and IIB of the general education requirements. Some of the possible areas of coursework include criminal justice, community (urban and rural) sociology, family sociology, sociology of work, research methods and statistics, social change and development, social inequality, social psychology and sociological theory.

**Bachelor of Arts complementary coursework:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 101 Principles of Statistics</td>
<td>4</td>
</tr>
<tr>
<td>or STAT 104 Introduction to Statistics</td>

<tr>
<td>STAT 101 Principles of Statistics</td>
<td>4</td>
</tr>
<tr>
<td>or STAT 104 Introduction to Statistics</td>
<td></td>
</tr>
<tr>
<td>At least 9 additional credits in natural science, math, or statistics</td>
<td>9</td>
</tr>
<tr>
<td>LAS approved mathematics and/or natural science courses. In addition, these courses may be used: STAT 301, STAT 401D, STAT 404, STAT 407, STAT 415, STAT 421, STAT 479; PSYCH 440; HD FS 449; ECON 308, ECON 376; C R P 451 and WGS 402. General education courses cannot be cross-listed or dual-listed with Sociology courses that count toward the major.</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credits**

| 13 |

LAS majors require a minimum of 120 credits to graduate, including a minimum of 45 credits at the 300/400 level.

Majors must complete both ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition. According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250. In addition, majors must also take an advanced course in ENGL 302 Business Communication or ENGL 309 Proposal and Report Writing or ENGL 314 Technical Communication with a grade of C or better.

### Sociology Minor

The department offers a minor in sociology which may be earned by completing 15 credits in sociology with a minimum 2.0 GPA. At least 9 of the 15 credits must be at the 300 level or higher with a minimum of 6 of those credits taken at ISU. The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

Students are required to earn credit for the following courses:

- SOC 134 Introduction to Sociology 3
- Additional 12 credits in Sociology courses 12
- 9 credits must be 300+

### Graduate Study

The Department offers study toward the Master of Science and Doctor of Philosophy degrees, with majors available in Sociology and Rural Sociology, as well as a graduate minor in Sociology for students majoring in other departments. The Department offers concentrations in a number of areas, e.g., community studies and development; sociology of families, inequality, food systems, agriculture and environment; criminal justice/criminology; methodology; social change and development; and social psychology. The Department of Sociology does not offer a non-thesis option Master’s degree program.

The Department accepts applicants for the PhD program from students who hold a Master’s degree, as well as from students who wish to enter the program directly with a Bachelor’s degree.

Contact information: Kyle Burgason, 202 East Hall, 515-294-9898 or burgason@iastate.edu.

Graduates have a broad understanding of sociology, address complex societal problems, and communicate effectively with scientific colleagues and the general public in both formal and informal settings. They understand sociological theory, conduct research, and are prepared to educate college students and contribute to public policy. Although the Department stipulates no language requirement for either the
degree master of science or the degree doctor of philosophy, specifying competence in one or more languages may be desirable in some instances.

The Department also participates in the interdepartmental graduate major in Sustainable Agriculture, and the interdepartmental graduate minor in Gerontology.

Course requirements are listed below. Information about examinations, theses and dissertations, POS committees and other requirements are available on the Department of Sociology website.

**Ph.D. Core Degree Requirements**

Although responsibility for determining the student's course work resides with the Plan of Study (POS) committee, the Department of Sociology outlines core courses that must be taken by all students. A graduate course taken elsewhere can be substituted for the Ph.D. core requirements with approval by the Director of Graduate Education (DOGE) in consultation with the student’s POS committee.

A minimum of 72 semester credits (including master's degree credits) is required for graduation.

**Required Courses for the Ph.D. Degree**

3 additional three-credit graduate-level courses in Sociology 9

A minimum of 28 total credits is required for the PhD co-major.

**Co-Major Requirements for the Graduate Program in Sustainable Agriculture**

The Graduate Program in Sustainable Agriculture (GPSA) develops student competence and expertise in the design, implementation, and evaluation of sustainable agricultural systems. The program's curriculum satisfies the formal requirements for the MS and Ph.D. degrees, as established by the ISU Graduate College, and fosters transdisciplinary and systems-level thinking.

The Department does not offer double majors in sociology.

For admission to the co-major program contact the graduate program coordinator.

**M.S. Core Degree Requirements**

Although responsibility for determining the student's course work resides with the POS committee, the Department of Sociology outlines core courses that must be taken by all students. A graduate course taken elsewhere can be substituted for the core requirements with approval by the Director of Graduate Education (DOGE) in consultation with the student’s POS Committee.

</tbody>
</table>

A minimum of 20 total credits is required for the M.S. co-major

The department does not offer double majors in sociology at the graduate level. Admission requirements to the co-major program are the same as for the major.

**Co-Major Requirements for the Graduate Program in Sustainable Agriculture**

The Graduate Program in Sustainable Agriculture (GPSA) develops student competence and expertise in the design, implementation, and evaluation of sustainable agricultural systems. The program’s curriculum satisfies the formal requirements for the MS and PhD degrees, as established by the ISU Graduate College, and fosters transdisciplinary and systems-level thinking.

**Software Engineering**

Administered by the College of Engineering and the College of Liberal Arts and Sciences.

For the undergraduate curriculum in Software Engineering (http://www.se.iastate.edu) leading to the degree Bachelor of Science. The Software Engineering Program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

A software engineer uses their expertise to design, develop, and evaluate software, configure and install computer systems, and build and maintain software systems throughout their lifecycle. Specific tasks software engineers perform evolve quickly, reflecting changes in technology, as well as the needs of employers. Software engineers work as members of teams that may include experts in engineering, marketing, manufacturing, accounting, training, and design.

The Software Engineering Program provides undergraduate students with the opportunity to learn Software Engineering fundamentals, to study applications of state-of-the-art software technologies, and to prepare for the practice of Software Engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research, and outreach programs.

**Student learning outcomes**

Graduates of the Software Engineering curriculum should have, at the time of graduation:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**PROGRAM EDUCATIONAL Objectives**

Within five years of graduation, the graduates should:

1. attain a productive career in Software Engineering or related fields;
2. attain leadership roles and become effective collaborators to advance professional and organizational goals;

3. engage in lifelong learning and professional development;

4. encourage and support diversity and inclusiveness in their workplace.

We expect that these objectives will be manifested in our graduates through the following five key attributes: (a) peer-recognized expertise, (b) engagement in professional practice, (c) sustained learning, (d) leadership and (e) teamwork.

Demonstration of expertise involves applying state-of-the-art practices for solving problems in the design, development, validation, evolution and sustainment of (software) products. Demonstration of professional engagement involves contributing locally and globally to the use of ethical, competent, and creative practices in industry, academia or the public sector. Demonstration of sustained learning involves the ability to adapt to rapid technological, environmental, and organizational changes through self-study and group study and through opportunities of professional development or graduate study. Demonstration of leadership involves the ability to take initiative, and to facilitate the advancements of individuals and the community by influencing others and by having a widespread, positive impact on critical issues and projects. Finally, demonstration of teamwork involves the ability to work with collaborators who have varied expertise, and with diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the College of Engineering and the College of Liberal Arts and Sciences provide opportunities for each student to have experience with broadening activities. Students have the opportunity to gain practical industry experience in the cooperative education and internship program. Students have the opportunity to participate in advanced research activities. Through international exchange programs, students learn about engineering practices in other parts of the world.

Curriculum in Software Engineering

Degree requirements leading to the degree Bachelor of Science in Software Engineering.

Total credits required: 125 cr. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Engineering Basic Program GPA, or Software Engineering Core GPA). See also Engineering Basic Program and Special Programs. Note: Pass/Not Pass credits cannot be used to meet graduation requirements.

International Perspectives: 3 cr. 1
U.S. Diversity: 3 cr. 1
Communication Proficiency/Library requirement:

Optional Co-op/Internships
Co-op (S E 398) or internship (S E 396) is optional

Transfer Credit Requirements
The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a Bachelor of Science in Software Engineering. These 30 credits must include S E 491 Senior Design Project I and Professionalism and S E 492 Senior Design Project II. The Software Engineering degree program requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S Diversity and International Perspectives courses may not be taken Pass/Not Pass.
2. Choose from approved lists (http://www.se.iastate.edu/academics/).
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Engineering Basic Program.

See also: A 4-year plan of study grid showing course template by semester.

Note: International Perspectives and U.S. Diversity courses are used to meet the General Education Electives (http://www.se.iastate.edu/academics/).

*Total credits required - 125 credits. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU Cumulative GPA, Engineering Basic Program GPA, or Software Engineering Core GPA). See also Basic Program and Special Programs.*

**Engineering Basic Program** - A minimum GPA of 2.00 is required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Engineering Basic Program GPA)

Must receive a C or better grade in required English classes.

Must receive a C- or better grade in MATH 165, MATH 166, COM S 227, and COM S 228.

**General Educational Elective courses** to be selected in consultation with Software Engineering Academic Advisors from a list of approved courses. They must include courses that satisfy university and college general education requirements. These courses include courses or categories of courses such as International Perspectives and U.S. Diversity, World Language, Arts and Humanities, and Social Sciences. Pass/Not Pass credit is not accepted.

Software Engineering Electives and Supplemental Electives must be selected from the program-approved list (http://www.se.iastate.edu/academics/).

**Software Engineering Core** (A minimum GPA of 2.00 is required for this set of courses, including any transfer courses but transfer course grades will not be calculated into the Software Engineering Core GPA)

**Students** who take the 4-credit lab courses CPR E 288, CPR E 308, and CPR E 381 instead of the corresponding 3-credit alternatives can apply the additional credits toward Supplemental Electives. The total number of credits required in the Software Engineering Program remains the same for all students.

The Software Engineering Program has established concurrent undergraduate and graduate programs with the Department of Computer Science, the Department of Electrical and Computer Engineering, and the Ivy College of Business. Please visit https://se.iastate.edu/academics/ for details.

### Speech Communication Overview

Speech Communication, a major in the Department of English, helps students develop their understanding and appreciation of the human communication process and enhances their oral and written communication practice. Speech Communication students develop an awareness of the importance of oral communication and listening for success in their personal, civic, and professional lives; become familiar with behavioral research in persuasion; understand how language is used to create social change; develop competent delivery skills; assess the
quality of arguments; evaluate information found in research and public discourse; and cultivate rhetorical sensitivity in order to better connect with individuals and audiences. In this way, the program contributes to the humanistic, aesthetic, and critical development of liberally educated students in order to prepare them for full and effective participation in society.

**Undergraduate Study**
The cross-disciplinary program in speech communication offers courses designed for all students as part of their general education and as a complement to their professional training. It also offers a major or minor in speech communication as well as an additional endorsement for secondary teachers who already have an endorsement in another content area.

Students who major or minor in speech communication will prepare themselves for a wide variety of employment opportunities in business, industry and government, as well as in non-profit and educational organizations. With their effective oral communication, listening, teamwork, problem-solving and leadership skills, speech communication students find positions in general business management: human resources, benefits, financial services, retail, sales and marketing and serve various organizations as recruiters, trainers, promotions managers, communication specialists, community outreach personnel and event planners. The program also prepares students for the study of law, theology, and for graduate level work in speech communication and related disciplines.

The program participates in the interdisciplinary program in Linguistics. Speech Communication also offers a core course and several optional courses in the undergraduate certificate program in Leadership Studies.

**Learning Outcomes**
Students who major in Speech Communication will be able to

- understand and apply technical vocabularies, theories, and perspectives to analyze contemporary problems and one's own communication practice.
- speak and listen well and have the self-confidence to become an active leader in communities.
- recognize persuasive strategies, assess reasoning, and perform research in the discipline.

**Speech Communication Major**
A student electing to major in speech communication must earn at least 120 credits with 45 credits at the 300/400 level. A minimum of 33 of those credits must be earned in Speech Communication courses where the student earns a grade of C or better. Our flexible curriculum with few prerequisites can help you meet the 33 hour requirement in a timely way.

**Core Requirements (18 credits)**

</table>
Speech Communication Education

Students working toward a primary teaching endorsement in another discipline may add a speech communication endorsement as an additional area. Coursework prepares students to teach speech, dramatic arts, and media at the secondary school level. In addition, they prepare to direct co-curricular and extracurricular activities such as drama, speech and debate.

Each student seeking an additional endorsement in speech communication must meet a 28-29 hour requirement by taking the following courses:

SP CM 110  Listening  3
or COMST 211  Interpersonal Communication
SP CM 212  Fundamentals of Public Speaking  3
SP CM 310  Rhetorical Analysis  3
or THTRE 455  Directing for the Stage
SP CM 313  Communication in Classrooms and Workshops  3
or THTRE 251  Acting Foundations
SP CM 322  Argumentation, Debate, and Critical Thinking  3
SP CM 495A  Independent Study: Directing Speech Activities  1
SP CM 495B  Independent Study: Teaching Speech  3
THTRE 358  Oral Interpretation  3
JL MC 101  Mass Media and Society  3

One of the following  3
THTRE 255  Introduction to Theatrical Production  4
THTRE 360  Stagecraft  4
THTRE 455  Directing for the Stage (if not previously used)  3

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. You must also complete the LAS world language requirement.

Speech Communication choices include SP CM 305, 312, 313, 322, 323, 324, 350 (also ENGL 350), and 417. Note: Students must earn a C or better in all Speech Communication courses used to meet the 33 credits required for the major.

Speech Communication Minor

Students from any major can complement their studies with a Speech Communication Minor (https://engl.iastate.edu/undergraduate-students/minors/#spcm). The requirements for a minor in speech communication may be fulfilled by credit in SP CM 212 Fundamentals of Public Speaking plus at least 15 additional hours from the lists above, of which 9 credits are in courses numbered 300 or above taken at Iowa State University. The
minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

**Graduate Study**

The program offers courses for a graduate minor in speech communication as well as supporting work for other disciplines. The requirements for a graduate minor (https://engl.iastate.edu/graduate-students/) in Speech Communication include:

- **SP CM 310** Rhetorical Analysis 3
- Plus 9 additional hours selected from the following 9
  - SP CM 323 Gender and Communication
  - SP CM 416 History of American Public Address
  - SP CM 417 Campaign Rhetoric
  - SP CM 504 Seminar
  - SP CM 513 Teaching Fundamentals of Public Speaking
  - SP CM 547 The History of Rhetorical Theory from the Classical Era to the Present
  - SP CM 548 Cultural and Critical Theories of Communication and Rhetoric
  - SP CM 590 Special Topics
  - SP CM 592 Core Studies in Rhetoric, Composition, and Professional Communication

The Program of Speech Communication also participates in the interdepartmental program leading to a master's degree in Interdisciplinary Graduate Studies.

**Statistics**

**Overview of Statistics**

The curriculum in liberal arts and sciences with a major in statistics is designed to prepare students for (1) entry level statistics positions in business, industry or commerce, nonprofit institutions, and in state or federal government; (2) graduate study in statistics. Entry-level positions include the following types of work: statistical design, data visualization, analysis and interpretation of experiments and surveys; data processing and analysis using modern computation facilities and statistical computing systems; application of statistical principles and methods in commercial areas such as finance, insurance, industrial research, marketing, manufacturing, sports analytics, and quality control and in nonprofit organizations such as large health study institutions.

Given the application of statistical work to a broad range of fields, all students majoring in statistics are advised to obtain at least a minor in a field of application. Some common minors earned by statistics majors are Economics, General Business, and Mathematics. Students preparing for positions in data analysis should consider a minor or certificate in Data Science. Students preparing for a career in the field of actuarial science should consider a certificate in Actuarial Science. Students intending to do pursue graduate study in Statistics are strongly advised to complete at least a minor in Mathematics (https://catalog.iastate.edu/collegeofliberalartsandsciences/mathematics/#undergraduateminortext) including credit in MATH 414 Analysis I.

Many Statistics majors earn a second major or degree in a field of application or in Mathematics. Your academic advisor can assist you in developing your course of study including other majors.

**Student Learning Outcomes**

Students completing the undergraduate degree in statistics should have a broad understanding of the discipline of statistics. Upon graduation, students should be able to:

- design observational studies and experiments in order to efficiently collect data to help answer questions about the world around them.
- analyze data arising from observational studies and experiments in order to help answer questions about the world around them.
- use modern statistical computing to aid in the collection and analysis of data.
- explain and apply the mathematical and theoretical basis for probability and statistical inference to help answer questions about the world around them.
- effectively communicate statistical findings using oral, visual and written formats.
- effectively respond to ethical issues associated with data collection, data analysis, and communication of statistical findings.

**Undergraduate Major**

The requirements for the undergraduate major in statistics are:

<table>

Completion of one of the following options:

**Option I**
- MATH 165 Calculus I
- MATH 166 Calculus II
- MATH 265 Calculus III

**Option II**
- MATH 165 Calculus I
- MATH 166H Calculus II, Honors
- MATH 265H Calculus III, Honors

Credit in one of the following:
- MATH 207 Matrices and Linear Algebra
- MATH 317 Theory of Linear Algebra

Credit in one of the following:
- COM S 107 Windows Application Programming
- COM S 127 Introduction to Computer Programming
- COM S 207 Fundamentals of Computer Programming
- COM S 227 Object-oriented Programming

Credit in one of the following (with a grade of C- or higher):
- ENGL 302 Business Communication
- ENGL 302H Business Communication: Honors
- ENGL 314 Technical Communication
- ENGL 314H Technical Communication: Honors

In addition to the above coursework, students earning the B.S. in Statistics must complete the Curriculum in Liberal Arts and Sciences.

### Undergraduate Minor

The department offers a minor in statistics which may be earned by satisfying the following requirements:

- Credit in one introductory level course in statistics, chosen from the following list: STAT 101, STAT 104, STAT 201, STAT 226, STAT 231, STAT 305, STAT 322, STAT 330.
- Credit in one intermediate level course in statistics, chosen from the following list: STAT 301, STAT 326.
- At least 9 additional credits in statistics courses, chosen from the following list: STAT 341, STAT 342, STAT 347, STAT 361, STAT 471, STAT 472, STAT 473, STAT 474, STAT 475, STAT 476, STAT 477, STAT 478, STAT 482, STAT 483, STAT 484, STAT 486.

Courses selected to satisfy the minor must include at least 9 credits that are not used to meet any other department, college or university requirement other than the credit requirement for graduation and credit requirement for courses numbered 300 or above.
Courses selected to satisfy the minor must include at least 6 credits in courses numbered 300 and above taken at ISU with a grade of C or higher.

**Graduate Study**

The department offers graduate programs leading to both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees with a major in statistics. Graduate work leading to a minor in statistics is available for students majoring in other programs, at both the M.S. and Ph.D. levels. The Ph.D. degree is also offered as a co-major with other graduate programs. The department participates in inter-disciplinary graduate programs in Bioinformatics and Computational Biology, Ecology and Evolutionary Biology, Genetics, Human Computer Interaction, Nutritional Sciences, and Wind Energy Science, Engineering, and Policy.

Graduates of the M.S. program have an understanding of basic statistical theory and methods. Elective courses in the M.S. program provide an opportunity for students to emphasize particular areas of statistical methods or application in their program. Students complete a minimum of 34 semester credits, including work on a capstone project resulting in a written creative component under the direction of an individual major professor and presented in a final oral examination.

Graduates of the Ph.D. program in statistics have studied advanced theory and methods, and have demonstrated the ability to conduct independent research resulting in an original contribution to the discipline. Candidates for the Ph.D. degree in statistics complete a minimum of 72 semester credits, including at least 18 credits given for research activity, pass an oral preliminary examination, and submit a written dissertation containing original research that is defended in a final oral examination. Dissertation research is typically conducted in close collaboration with a major professor and usually results in publishable material. The department does not offer specific program tracks or areas of emphasis, but the diversity of elective courses and research areas of faculty allow students to tailor their individual programs to reflect areas of particular interest.

Graduates of co-major Ph.D. programs in statistics and an applied scientific discipline have mastered basic statistical theory and have studied advanced methodology. Students complete a minimum of 72 semester credits for courses in statistics and the chosen scientific discipline. Students conduct research that is a combination of statistical methodology and the scientific discipline. Co-major professors work with the student to prepare for an oral preliminary examination and conduct research leading to a single dissertation project that produces an original contribution to at least one of the two disciplines that is defended in a final oral examination.

Graduates of co-major Ph.D. programs in statistics and an area of theoretical mathematics have mastered basic statistical methods and have studied advanced statistical theory. Students complete a minimum of 72 semester credits. Co-major professors assist the student in preparing a dissertation that represents original research that makes a contribution at the interface of statistical theory and a sub-discipline of mathematics. The dissertation is defended in a final oral examination.

**Teaching English as a Second Language (TESL) Minor**

The Minor in TESL prepares students to teach English to nonnative speakers of English, either in community programs in the United States or in overseas locations. The Minor provides understanding of how languages work (ENGL/LING 219) and practical and theoretical applications in how English is taught to those who do not speak English natively (ENGL/LING 322, ENGL/LING 324, ENGL/LING 325, and ENGL/LING 425). The TESL Minor prepares students to cross cultural boundaries to learn about, interact with, and assist speakers of other languages in learning English, the leading global language today. A TESL Minor will help students become global citizens through interacting with and teaching those from around the world who come to the United States and by giving students skills that will allow them to live and work in other countries. All classes listed are requirements for the Minor in TESL (15 credits). A C or better is required in each course used to satisfy the minor. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Contact Taylor Anne Barriuso barriuso@iastate.edu for more information.

**Technical Communication**

The Technical Communication major (and minor) prepares students for careers that involve writing and designing a wide range of texts, including online content. The major prepares students to make scientific, business, and technical information clear and usable for their intended audiences. Courses emphasize research, critical thinking, collaboration (with other content developers and subject-matter experts), organization, writing, editing, and design. Some students double major in Technical Communication and a technical or scientific field. Technical Communication is also often a second major or minor for students who major in English (http://catalog.iastate.edu/collegeofliberalartsandsciences/english/).
BS in Technical Communication Learning Outcomes

Students who major in Technical Communication will be able to

• compose a wide range of print and online documents for use in business, schools, and communities.
• understand technical and scientific information and strategies for producing texts to communicate that information to others.
• describe and use the theories that assess print and online documents, collaboration, organizational activities, and various technologies.
• demonstrate mastery of concepts from organizational culture and visual communication, including collaborative writing and clear professional/technical documentation.
• identify specific audience needs in rapidly changing digital and print environments.
• identify and create user-friendly interfaces; understand and put into practice strategies to enable the optimal usability of documents.

Technical Communication Major Requirements

Majors develop advanced skills in multiple aspects of technical communication and apply their knowledge of technical communication to a specific discipline. Technical communication majors must take 33 credits within the major and 6 hours in a designated area of concentration related to science, technology, or design (an acceptable minor will also fulfill this requirement).

Total Credits 33

Technical Communication Major Requirements

Technical Communication majors are required to have, in addition to ISUComm foundation courses (ENGL 150 and ENGL 250), at least 33 credits in TComm (including 6 credits in a designated area of concentration). Majors transferring from other institutions must take at least 18 of their credits in TComm while in residence at Iowa State.

To graduate with a major in Technical Communication and meet the university-wide Communication Proficiency Grade Requirement, a student must have credit for ENGL 150 Critical Thinking and Communication and earn at least a C (not C-) in ENGL 250 Written, Oral, Visual, and Electronic Composition as well as in each of the courses taken to fulfill the program of study, including one advanced communication course.

Designated Area of Concentration Courses

The Designated Area of Concentration (DAC) is a student-designed grouping of related courses in a technical, scientific, or design field that will meet the student's professional or academic interests. Courses for the 6-credit DAC must be taken outside the English Department and approved by the Technical Communication Program Advisor. A second major or a minor in areas such as computer science, social science, natural science, entrepreneurial studies, design studies, engineering studies, or another technical, scientific, or design field may substitute for the DAC.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check http://www.registrar.iastate.edu/courses/div-ip-guide.html for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. You must also complete the LAS world language requirement.

<tr>
<td>ENGL 542 Document Design and Editing</td>
<td></td>
</tr>
<tr>
<td>ENGL 549 Multimedia and Interaction Design</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credits**: 15

Nine of the 15 credits must be 300 level or above and students must earn a grade of C (not C-) or higher in each course taken in the minor. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students may design their minor programs around their own interests but are encouraged to work with the Technical Communication Program Advisor.

Note: Students should check the ISU catalog to be sure that they meet prerequisites if they intend to register for 400+ courses.

### Theatre and Performing Arts Overview

[www.music.iastate.edu/theatre](http://www.music.iastate.edu/theatre/)

The Theatre and Performing Arts program:
• Utilizes a flexible, interdisciplinary curriculum dedicated to empowering the citizen artist.
• Focuses on undergraduate experiences, high impact learning, interdisciplinary and cross-community collaboration, and exceptional professional preparation and training.
• Engages in collaborative, innovative practices in both classroom and production settings.
• Empowers students to take an active role in an interconnected system of artistic community engagement and creative momentum.
• Is dedicated to individualized student-centered programming that is ambitious, relevant, and rigorous.

ISU Theatre impacts hundreds of students from majors throughout the university in our classes, productions and studios. Our students are compassionate, enthusiastic, aware, ambitious, dependable, dedicated, disciplined and generous. The Theatre and Performing Arts program offers a wide variety of courses that support the student’s individual interests and specialization. Our curriculum is flexible, interdisciplinary and dedicated to fostering the citizen artist.

The major in performing arts offers the undergraduate student a cross-disciplinary core including 26 credits in three categories: Theatre, Music and Dance. Students also select a 21-24 credit emphasis in one or more of the following areas of focus:

- Acting/Directing
- Dance
- Musical Theatre
- Theatre Studies
- Theatrical Design and Technology

Additional professional development occurs within two required professional internships in which students can practice the skills and passions developed throughout their individualized plans of study. Preparation for these internships include various impactful experiences in theatre and the performing arts here at Iowa State. This work is vital for students to gain a practical understanding of the rigors of the field.

ISU Theatre and Performing Arts focuses solely on the undergraduate student artist, offering students many opportunities to participate in production experiences throughout the academic year. Students implement the theories and principles explored in the classroom with experiential learning though public performances. These productions vary in scope, taking place in the 435-seat proscenium space at Fisher Theatre as well as in other intimate and “found” venues both on and off campus. Performing arts majors must maintain a 2.0 GPA to participate in production activities. Scholarships and employment opportunities are available to both incoming and current students on a yearly basis. All areas of ISU Theatre and Performing Arts, including classes and productions, are open to all students regardless of major. Visit here (https://www.music.iastate.edu/how-get-involved-theatre-and-performing-arts/) to learn about scholarships and all of the ways to get involved with Theatre and the Performing Arts at ISU.

In addition to building a solid foundation in theatre, Performing Arts graduates enter the world as empathetic citizen artists prepared to engage in civic life and meet the challenges of the work force or graduate school with strong skills in leadership, collaboration, and critical thinking.

**Student Learning Outcomes**

Upon graduation, students should be able to:

- Recognize the ways in which theatre and performing arts can reflect and change communities and culture.
- Apply collaboration principles to the creation of performing arts.
- Analyze dramatic literature and performances from dramaturgical, performative, sensory, aesthetic, and community perspectives.
- Organize and integrate resources - including human (self and others), technology, and systems - to solve abstract and practical problems.
- Compare and critique performing arts theory, practice, literature, design, performance, and one’s own process and work within cultural and historical contexts.

**Bachelor of Arts - Performing Arts Major (Perf)**

All performing arts majors must complete both the performing arts core and at least one of the emphases listed below. A Minimum GPA of 2.00 in both the major core and the chosen emphasis is required to graduate.

As a major in the College of Liberal Arts and Sciences, students must meet LAS College and university-wide degree requirements.

**Total Credits: 122**
Please see the Department advisors for more information about suggested Four Year Plans for the Emphases in Dance and Theatre Studies. Students in all ISU majors must complete a three-credit course in U.S. Diversity and a three-credit course in International Perspectives. Consult the catalogue for a list of approved courses. Discuss with your advisor how these two courses can be applied to your graduation plan.

Performing Arts Minor
To complete the minor in Performing Arts, students must take at least 15 credits of either Theatre or Performing Arts courses. Six credits must be 300 level or higher. THTRE 224, 250, 290, 301, 469, 490, and 499 do not count toward the Performing Arts minor. The minor must include at least 9 credits that are not used to meet any other department, college or university requirement. The following classes are required:

PERF 105 Performing Arts Seminar (3 semesters) R
THTRE 255 Introduction to Theatrical Production 4
THTRE 263 Script Analysis 3

U.S. Latino/a Studies Program
Latinos/as/x are the largest and fastest growing culturally diverse population in the United States, representing dynamic and thriving American realities.

U.S. Latino/a Studies at Iowa State University is a cross-disciplinary, coalition-building program that offers well-structured and creative coursework to students interested in the arts, cultures, economies, histories, politics, religions, and literatures of Latino/a/x communities throughout the United States. It facilitates the study of a vast array of communities and individuals with roots in the Caribbean and Latin America, and long-established U.S. citizen communities such as Chicanos/as, Mexican Americans, Tejanos, Californios, Cuban-Americans, Dominican-Americans, and Puerto Ricans on the island and on the mainland.

The program aims to serve as a hub that connects classes, service and outreach opportunities across colleges, schools, and departments. Consequently, students can discover a stimulating field of critical and academic research, engage in an exciting platform on which to link different fields of study, and become part of outreach/community networks in which they will grow to become outstanding, conscientious leaders in their respective careers.
The Program in U.S. Latino/a Studies is well suited to careers in Education, Psychology, History, Sociology, Business, Journalism, Spanish Language and Cultures, Women's and Gender Studies, and Agriculture. A U.S. Latino/a Studies minor, or a double major with a Latino/a Studies track in Interdisciplinary Studies, strengthens student profiles as they compete for jobs on the global market because they have attained an in-depth experience of local and global experiences of Latin America and the Caribbean, as well as a sophisticated understanding of diversity and inclusion.

The US LS Program offers course work that meets the ISU U.S. Diversity requirement and also offers a 15 credit Minor (https://usls.las.iastate.edu/minor/).

Interdisciplinary Studies Major, Track in U.S. Latino/a Studies

In addition to meeting the general requirements for the Interdisciplinary Studies major, students wishing to complete a track in U.S. Latino/a Studies must complete a minimum of 36 credits in the area of U.S. Latino/a Studies including US LS 211 (Introduction to U.S. Latino/a Studies) and an experiential learning course (US LS 325 or US LS 499). At least 15 of the 36 credits must be in courses numbered 300 and above and 6 credit hours must be earned at the 400-level. Students must also meet the upper-level communication proficiency requirement by taking English 302 or 314. Students can work with the US LS program director and an Interdisciplinary Studies advisor to explore options within this individualized major program.

**Required Courses (36 credits)**

</table>

**Total Credits** 36

**Notes:**
1. The list of acceptable courses may include courses not currently listed. Contact the Director of US Latino/a Studies for information on eligible courses.
2. The student must have an average grade of C in courses applied to the major.
3. Fulfillment of the world language requirement with Spanish is strongly recommended, but not required. Students pursuing multiple majors can apply up to nine (9) credits of approved Spanish courses (304, 322, 324,445) to both the US LS and their other major.

U.S. Latino/a Studies Minor

The minor in US Latino/a Studies requires a minimum of 15 credit hours including US LS 211 (Introduction to U.S. Latino/a Studies) and an experiential learning course (US LS 325 or US LS 499). University policy indicates that minors must include at least 9 credits that are not applied to any other degree requirement.

**Required course work**

</tr>
</tbody>
</table>

**Total Credits** 15

**Notes:**
1. A limit of six (6) credits of approved Spanish courses (304, 322, 324, 445) may be substituted for US LS courses.
2. A maximum of 3 credit hours of US LS 490 (Independent Study) may applied toward the minor.

Women's and Gender Studies Overview

The Women's and Gender Studies Program is a cross-disciplinary program in the College of Liberal Arts and Sciences. The program offers students opportunities to analyze issues concerning women, gender, and
sexuality in diverse cultural contexts and to investigate a variety of disciplines from feminist perspectives. The field of women's and gender studies creates an understanding that interrelated factors—e.g., race, ethnicity, class, age, disability, gender identity, religion, national origin, and sexual orientation—inform knowledge of women's history, culture, and social roles.

Women's and Gender Studies seeks to improve critical thinking and to provide students with the intellectual means to question prevailing assumptions. It encourages students to explore the contexts and ideological origins of knowledge and to examine the relationship between knowledge and power in society. By promoting social justice and inclusion, this area of study focuses on the connections between personal experience and political activity, and validates student contributions and voices.

Graduates from this program are skilled in critical thinking, research methods, and effective communication. Because they have developed a thorough understanding of gender, race, and class, graduates work effectively with employers, colleagues, and clients to analyze and solve complex social problems. Women's and Gender Studies students also acquire strong backgrounds for careers in areas such as counseling, education, human resources, international development, public policy, politics, business, and law. The program includes core and cross-listed courses in anthropology, history, economics, English, history, health and human performance, political science, psychology, religion, sociology, speech communication, and world languages and cultures.

**Student Learning Outcomes**

Through student-driven discussions, based on engagement with critical and cultural texts by feminist scholars and activists, the Women's and Gender Studies Program curriculum will help students develop the necessary skills to:

- Increase awareness of women's history and experiences that affect representations of gender in contemporary society
- Explore forms of social inequality through feminist theories and concepts
- Understand how intersecting identities shape individuals and their life experiences
- Analyze gender dynamics in different types of relationships

**Degree Requirements**

**Women's and Gender Studies (B.A., B.S.)**

An undergraduate major requires a minimum 2.00 GPA in the 34 credits of core and cross-listed courses. Women's and Gender Studies' majors must satisfy the following requirements:

---

1. 16 credits selected from Women's and Gender Studies core courses (WGS).

A. Required core courses:

<table>
<thead>
<tr>
<th>Course</th>

</tbody>
</table>

**Total Credits** 16

B. The remaining 18 credits of required coursework can be chosen from one of the following Areas of Emphasis: 1) Communication and Cultural Representation; 2) Identities and Sexualities; 3) Leadership and Social Justice; or students can work with their advisor to identify the set of courses that support their personal and professional goals.

1) Communication and Cultural Representation

Courses in this field offer diverse perspectives on how media and communication represent and shape culture in the US and around the world. Students engage with feminist literature, philosophy, art, and other expressions of culture in society. These themes are used to examine how the lives and roles of women have changed throughout history.

</tbody>
</table>
2) Identities and Sexualities

This area highlights the growing emphasis in Women's and Gender Studies on how experiences and societal narratives shape and are impacted by gender identities and sexualities. Courses explore power relations, oppression, privilege, and resistance as ways of understanding these social identities. Students will learn about how issues of race, class, gender, sexuality, and other axes of difference intersect and enable political resistance.

3) Leadership and Social Justice

Courses in this area of specialization provide students with the tools and theories needed to become successful change agents, activists, and community organizers. These courses explore how social movements can transform communities, cultural norms, and global systems. Students will engage with critiques and the context of movements such as transnational feminism, Black Lives Matter, LGBTQIA+ Pride, and #MeToo.

A minor or second major is recommended. The typical degree awarded is a Bachelor of Arts; students interested in a Bachelor of Science degree in Women's and Gender Studies need to complete 12 credits in addition to the general education requirements across the areas of natural science, mathematics, and social science.

Communication Proficiency requirement:
The Women's and Gender Studies major requires credit for ENGL 150; ENGL 250 (or ENGL 250H) (with a grade of C or better, per the university-wide Communication Proficiency Grade Requirement); and WGS 301 or WGS 401 or WGS 402 (with a grade of C or better).

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check
LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. You must also complete the LAS foreign language requirement.

Minor

Undergraduate students may minor in Women's and Gender Studies by taking 15 semester hours of Women's and Gender Studies classes, including the following:

| WGS 201 Introduction to Women's and Gender Studies | 3       |
| WGS 301 International Perspectives on Women and Gender | 3       |

One 400-level WGS course and 6 additional credits in WGS; at least 9 of the additional credits must be at the 300-400 level.

University policy requires that at least 9 credits used for the minor stand alone and are not used to meet any other requirement. All WGS courses for the minor require a grade of C (not C-) or higher.

Any student can declare a major or minor in Women's and Gender Studies or choose to co-major in another program. Students interested in a minor or major in Women's and Gender Studies should contact the director or the undergraduate advisor in the program.

Graduate Study

The graduate minor in Women's and Gender Studies is designed to provide students with knowledge of theories and methods within a variety of approaches in feminist scholarship. The program seeks to integrate and synthesize knowledge from many disciplines and to offer students opportunities for systematic study of gender and women's experiences and perspectives in all knowledge fields. Students will be prepared to take a leadership role in supporting gender equity and diversity in their careers in education, social service work, business, law, public policy, governmental and non-governmental organizations, and research.

The graduate minor requires 12 credits for students enrolled in a master’s or a doctoral degree program. Students are required to take either WGS 501 Contemporary Feminist Theories or WGS 502 Advanced Seminar in Feminist Research Methods; taking both is strongly recommended. Students will also take two or three electives selected from the list of core and cross-listed Women's and Gender Studies courses approved for graduate study. At least one member of the Women's and Gender Studies faculty will serve on the program of study.
for doctoral students. A list of eligible faculty members may be obtained from the Director of the Women's and Gender Studies Program.

World Film Studies Minor

World Film Studies

The World Film Studies undergraduate minor is an interdisciplinary, cross-cultural program in the department of World Languages and Cultures that provides coursework in the history, theory, and aesthetics of world cinemas. Upon completion of the World Film Studies minor students will

1) demonstrate solid skills of formal film analysis and knowledge of the essential theoretical concepts of cinema studies;

2) become familiar with prominent film directors, influential cinematic works, and cinematic traditions across the world;

3) gain an understanding of the evolution of cinema as an art form; understand the relations between cinema and other arts;

4) acquire knowledge and understanding of cinema as a mode of cultural expression and communication; develop new perspectives on U.S. culture and cinema through comparison with other world cultures and cinemas.

A student seeking an undergraduate minor in World Film Studies must successfully complete a minimum of 15 credits, which must include WFS 278 Introduction to Global Film or ENGL 237 Survey of Film History and 12 credits selected from the following list of electives. Of these, at least 6 credits must be from courses taught in the department of World Languages and Cultures. The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

Curricular note: no more than 6 credits of each repeatable course (FRNCH 326 and FRNCH 378) may be applied to the minor. Both WLC 278 and ENGL 237 (6 credits max) may count toward the minor.

World Languages and Cultures Overview

World language study should be an integral part of an academic program for most students. The theoretical understanding of and practical experience in language underlie many intellectual disciplines that try to meet the complex problems of contemporary society. Courses offered by the Department of World Languages and Cultures are designed to develop students’ understanding of a second culture through the language spoken by that culture.

The Department of World Languages and Cultures offers a major in World Languages and Cultures (Bachelor of Arts) with concentrations in French, German and Spanish and a major in Anthropology (Bachelor of Arts or Bachelor of Science). Minors are offered in Anthropology, Chinese Studies, French, German, Russian Studies, Spanish, as well as Middle Eastern Studies and World Film Studies. Additionally, instruction is offered in American Sign Language, Arabic, Italian, and Classical Latin.

The Department also houses the College of Liberal Arts and Sciences’ Cross Disciplinary Studies Programs in American Indian Studies, Classical Studies, International Studies, and U.S. Latino/a Studies.

The Department also offers faculty-led summer study abroad programs in Costa Rica, France, Germany, Greece, Italy, and Spain; and semester study abroad programs in Spain. Programs and exchanges in other areas of the world are offered through study abroad providers. Information concerning these programs can be obtained directly from the Department.

See the Placement Policies subpage for information on language placement.

Students at all levels of world language study will have access to the Language Studies Resource Center, located in 3142 Pearson. The Resource Center contains an extensive collection of world language materials, including audio-visual materials, electronic resources, music, books, language specific software and hardware, and other course-related materials.

Materials fees: Each student enrolled in a 100- through 200- level world language course is assessed a materials and professional support fee of $25.00 per course. If a student drops a course subject to the fee by the 15th day of the semester the fee for that course will not be assessed.

Options

The Department offers a major in World Languages and Cultures with two options, leading to the Bachelor of Arts degree:
Option 1: Languages and Cultures with a Concentration in French Studies, German Studies, or Spanish Studies;

Option 2: Languages and Cultures for Professions (as a second major only) with a Concentration in French, German, or Spanish.

A full statement of requirements for majors and minors may be obtained from the Department. For a complete statement of all the college degree requirements, see Liberal Arts and Sciences Degree Requirements.

Current and detailed information about the Department is available online at www.language.iastate.edu (http://www.language.iastate.edu).

Language and literature courses numbered 300 and above are principally taught in the target language; courses numbered in the 270s, 370s, and 470s are taught in English. For courses taught in English about Ancient Greek and Rome, see Classical Studies. Students may not take intermediate (200 level) courses for credit after successfully completing any advanced (300/400 level) course, except those in the 370 series or courses taught in English translation. Students who have successfully completed any course in the intermediate (200 level) sequence may not take a lower-numbered course in that sequence for a grade.

Languages and Cultures for Professions (LCP)

Students with primary majors in the College of Business, the College of Engineering, or the College of Agriculture and Life Sciences are encouraged to complete an LCP second major option in World Languages and Cultures with a concentration in French, German, Spanish, or an LCP minor option in those languages plus Chinese Studies or Russian. The primary objective of the LCP option is to provide learning environments within which students can achieve global literacy, linguistic proficiency, and inter-cultural competence. In the LCP curriculum, students will learn how professions are shaped by social and cultural forces and, alternatively, how professions shape society. In courses on contemporary culture and society, students will identify and analyze issues dealing with the complex interrelationships of languages and cultures and consider how they may affect their chosen profession. Students will experience living and working in diverse cultural settings through study abroad and internship opportunities offered through the LCP program and/or in collaboration with the Colleges of Business, Engineering, and Agriculture and Life Sciences. Students enrolled in the LCP second major option may receive non-graded academic credit for the successful completion of internships (WLC courses numbered 499 in each language area).

For the LCP second major option, students will complete 30 credits within their language concentration beyond the fourth-semester level, selected from the list of approved LCP core courses and electives designated for their respective college curricula in either Business, Engineering, or Agriculture and Life Sciences. Students may only enroll in the LCP option as a second major and may not graduate with the LCP option in the WLC major alone.

Students in the College of Business may combine course work in the International Business (IB) Secondary Major with course work in LCP by selecting from a list of approved options. Students should consult their academic advisor in the College of Business and the WLC advisor for coursework and international experience that fulfill requirements in both the IB and LCP major options.

Student Learning Outcomes

Upon the completion of their program of studies in the Department of World Languages and Cultures, majors with a concentration in French, German, or Spanish will demonstrate proficiency in five goal areas: Communication, Cultures, Connections, Comparisons, and Communities. Using their concentration language, students will be able to:

1. COMMUNICATION: understand, interpret, and present information, to negotiate meaning, and to communicate in spoken or written conversations to share information, reactions, feeling, and opinions to various audiences of listeners, readers, or viewers.

2. CULTURES: investigate, explain, and reflect on the relationship between the practices and the perspectives of the cultures studied.

3. CONNECTIONS: demonstrate their ability to build, reinforce, and expand their knowledge of other disciplines and to access and evaluate information from diverse perspectives, while also developing critical thinking to solve problems creatively.

4. COMPARISONS: investigate, explain, and reflect on the nature of language as well as the concept of culture through comparisons of their own culture with other cultures and the language studied.

5. COMMUNITIES: demonstrate an ability to use the language both within and beyond the classroom and to interact and collaborate in their community and the globalized world while also setting goals and reflecting on their progress in using languages for enjoyment, enrichment, and advancement.

Graduates will achieve both linguistic proficiency and cultural literacy through the study of the language and culture of their program. Linguistic proficiency entails the ability to function effectively in the target language and the ability to communicate competently with native speakers of the target language. Students of Latin and Ancient Greek demonstrate proficiency by becoming able to read the languages and to translate from these languages into clear and idiomatic English. Cultural literacy includes a general knowledge of the culture's history, familiarity with its literature, and basic knowledge of its social and political institutions.

Placement Policies

Students who have had formal training in world languages offered at Iowa State may obtain credit by passing appropriate examinations. Students with native fluency in languages taught at Iowa State may not
enroll in or take the Exam for Credit in elementary or intermediate courses (100 and 200 level) in their native language. Students are considered to have native fluency if their ethnic first language as indicated on the matriculation form is the language in which they wish to enroll. Students are also considered to have native fluency if they have had substantial attendance at a secondary school or university where the language of instruction is the language in which they wish to enroll at ISU. Students with native fluency may be eligible to enroll in literature and civilization courses in their native language at the 300 level or above; such students must also consult the department office to determine eligibility for advanced composition and conversation courses (300 level and above). Students who have completed three or more years of high-school world language study may not enroll in or receive credit for 101-102 in those languages; credit may be obtained by passing the appropriate Exam for Credit or by completing an advanced sequence (200-level or higher) in that language. Students who complete an approved sequence of courses in a single language at the 200- or 300-level (e.g., 201 and 202 or 301 and 302) with a grade of C- or higher are eligible to receive credit for 101 and 102 in that same language if they have not received credit for a 101 or 102 course in the language. Students who complete a 102 course with a grade of C- or higher are eligible to receive credit for 101 in that same language if they have not received credit for 101 in the same language. Students should contact the department after completion of the course sequence to receive credit. Courses in the 101-102 level may not be taken on a remedial basis.

Students who have completed two years but less than three years of a single high-school world language may not enroll in a 101 course in that language. These students may enroll in either a 102 course in that language, or in the case of Spanish, SPAN 097 Accelerated Spanish Review. Before enrolling in either SPAN 097 Accelerated Spanish Review or a 102 language course, students are recommended to take the online placement test available at www.language.iastate.edu (http://www.language.iastate.edu). After completing the online placement test, students who believe that they have extenuating circumstances may appeal to the Department of World Languages and Cultures in order to request enrollment in a 101 language course.

SPAN 097 Accelerated Spanish Review is designed for students who need additional work in the language at the first-year level (101-102) and are not planning to continue their language study at the second-year 201-202 level. Students who complete with a passing grade will have fulfilled the LAS world language requirement. Students who have completed SPAN 097 Accelerated Spanish Review and wish to pursue further study in Spanish at the 201-202 level may enroll in 102.

Students with disabilities who need to satisfy the world language requirement may direct questions to their academic advisor, the Department of World Languages and Cultures, or the Disability Resources Office.

Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is not normally available.

American Sign Language (ASL)
Courses primarily for undergraduate students

ASL 101: American Sign Language I
(4-0) Cr. 4. F.S.
Introduction to American Sign Language (ASL). Development of expressive and receptive skills including vocabulary, grammar, usage, and cultural information. Note: Distinct from “Signed English”. ASL is a natural language with its own rules of grammar and usage.
Meets U.S. Diversity Requirement

ASL 102: American Sign Language II
(4-0) Cr. 4. S.
Prereq: ASL 101
Introduction to American Sign Language (ASL) II continues development of expressive and receptive skills introduced in American Sign Language I, including vocabulary, grammar, usage, and cultural information. Distinct from “Signed English”. ASL is a natural language with its own rules of grammar and usage.
Meets U.S. Diversity Requirement

ASL 201: Intermediate American Sign Language I
(4-0) Cr. 4. F.
Prereq: ASL 102 or equivalent.
Development of fluency for intermediate conversational skills. Review of grammar and varying grammatical forms for both structured and unstructured social situations such as sharing opinions, discussing weekend activities, and exchanging views on current topics.

ASL 202: Intermediate American Sign Language II
(4-0) Cr. 4. S.
Prereq: ASL 201 or equivalent.
A continuation and further application of language principles learned in ASL 201, to deepen ability to actively engage in dialogue both in structured and unstructured social situations. Further fluency in intermediate conversational skills will be developed, particularly in the areas of semantic equivalence and dialogic/monologic register.
ASL 275: Topics in Deaf Culture  
(3-0) Cr. 3.  
Focus on contemporary topics in Deaf Culture, Communities, and History.  
Readings and discussion from a wide range of sources. Topics vary according to faculty interest.  
Meets U.S. Diversity Requirement

ASL 490: Independent Study  
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.  
Prereq: 6 credits in ASL and permission of department chair  
Designed to meet the needs of students in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 6 credits of ASL 490 may be counted towards graduation.

Arabic (Arabc)  
Courses primarily for undergraduate students

ARABC 101: Elementary Arabic I  
(4-0) Cr. 4. F.  
Beginning level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture. Attention to the use of the Arabic alphabet.

ARABC 102: Elementary Arabic II  
(4-0) Cr. 4. S.  
Prereq: ARABC 101 or placement by department exam.  
Continuation of ARABC 101. Beginning level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture.  
Meets International Perspectives Requirement.

ARABC 195: Study Abroad  
Cr. arr. Alt. SS., offered irregularly.  
Prereq: ARABC 102 or equivalent  
Supervised instruction in Arabic language and culture, formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Arabic.

ARABC 201: Intermediate Arabic I  
(4-0) Cr. 4. F.  
Prereq: ARABC 102 or placement by department exam  
Intermediate level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture.  
Meets International Perspectives Requirement.

ARABC 202: Intermediate Arabic II  
(4-0) Cr. 4.  
Prereq: ARABC 201 or placement by department exam  
Continuation of Arabic 201. Intermediate level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture.  
Meets International Perspectives Requirement.

ARABC 295: Study Abroad  
Cr. arr. Alt. SS., offered irregularly.  
Prereq: ARABC 102 or equivalent  
Supervised instruction in Arabic language and culture, formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Arabic.

Courses primarily for undergraduate students

CHIN 101: Elementary Mandarin Chinese I
(4-0) Cr. 4. F.
Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters. For students whose native language is not Chinese.

CHIN 102: Elementary Mandarin Chinese II
(4-0) Cr. 4. S.
Prereq: CHIN 101
Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters. For students whose native language is not Chinese.
Meets International Perspectives Requirement.

CHIN 201: Intermediate Mandarin Chinese I
(4-0) Cr. 4. F.
Prereq: CHIN 101
Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, intensification of character acquisition. For students whose native language is not Chinese.
Meets International Perspectives Requirement.

CHIN 202: Intermediate Mandarin Chinese II
(4-0) Cr. 4. S.
Prereq: CHIN 201
Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, intensification of character acquisition. For students whose native language is not Chinese.
Meets International Perspectives Requirement.

CHIN 272: Introduction to Chinese Culture
(3-0) Cr. 3. S.
Interdisciplinary introduction to Chinese society and culture from earliest times to the present. Topics include ancient literature, philosophy, religion, art, architecture, customs, transition to a modern society, social changes, urban life, popular culture, and contemporary values and ideas.
Meets International Perspectives Requirement.

CHIN 301: Advanced Mandarin Chinese I
(3-0) Cr. 3. F.
Prereq: CHIN 202 or equivalent
Continuing development of speaking, writing, reading, and listening skills beyond intermediate level. Expansion of cultural literacy through a variety of texts from the humanities, social sciences, mass media and business. Native speakers of Chinese by instructor's permission only.
Meets International Perspectives Requirement.

CHIN 302: Advanced Mandarin Chinese II
(3-0) Cr. 3. S.
Prereq: CHIN 301 or equivalent
Continuing development of speaking, writing, reading, and listening skills beyond intermediate level. Expansion of cultural literacy through a variety of texts from the humanities, social sciences, mass media and business. Native speakers of Chinese by instructor's permission only.
Meets International Perspectives Requirement.
CHIN 304: Chinese for Global Professionals
(4-0) Cr. 4. S.
Prereq: CHIN 202 or equivalent
Introduction to professional language and culture in China and Chinese-speaking regions in Asia. Development of all four language skills, focusing on practical applications in the professional contexts. Development of global awareness and cross-cultural understanding. Preparation for internships.
Meets International Perspectives Requirement.

CHIN 370: Chinese Literature in English Translation
(3-0) Cr. 3. Repeatable. F.
Prereq: ENGL 150 or equivalent
Topics may include traditional prose, poetry, novel and drama; twentieth-century fiction and film. All readings and class discussions in English. Meets International Perspectives Requirement.

CHIN 375: China Today
(3-2) Cr. 3-4. Repeatable. S.
Prereq: ENGL 250 or equivalent
Focusing on contemporary society, culture, literature and the arts. All readings, discussions, and papers in English. Topics vary from year to year.
Meets International Perspectives Requirement.

CHIN 378: Chinese Film and Society
Cr. 3. S.
Prereq: ENGL 150 or equivalent
Survey of Chinese cinematic history from 1896 to the present against the background of China's constant sociocultural transformation; emphasis on narrative themes, film history, and film criticism. Topics vary according to faculty interest. Taught in English.
Meets International Perspectives Requirement.

CHIN 403: Seminar in Chinese Language and Culture
(3-0) Cr. 3.
Prereq: CHIN 302 or equivalent
Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese.
Meets International Perspectives Requirement.

CHIN 403A: Seminar in Chinese Language and Culture: Translating Contemporary Chinese Texts
(3-0) Cr. 3.
Prereq: CHIN 302
Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese.
Meets International Perspectives Requirement.

CHIN 403B: Seminar in Chinese Language and Culture: Topics on Business and Professions
(3-0) Cr. 3.
Prereq: CHIN 302 or equivalent
Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese.
Meets International Perspectives Requirement.

CHIN 403C: Seminar in Chinese Language and Culture: Reading Chinese Texts
(3-0) Cr. 3.
Prereq: CHIN 302 or equivalent
Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese.
Meets International Perspectives Requirement.

CHIN 490: Independent Study
Cr. 1-6. Repeatable.
Prereq: 6 credits in Chinese and permission of department chair
Designed to meet student needs in areas beyond current course offerings or to accommodate the desire to integrate a study of literature or language with special issues in major fields.

CHIN 499: Internship in Chinese
Cr. 1-3. Repeatable, maximum of 6 credits.
Prereq: 9 credits of Chinese at the 300 level; permission of advisor and WLC Internship Coordinator
Work experience using Chinese in the public or private sector, combined with academic work under faculty supervision. Offered on a satisfactory-fail basis only. No more than 3 credits may apply toward the Chinese minor or LCP minor.
French (Frnch)

World Languages and Cultures majors with a concentration in French have two options:

WLC Option I: French Studies

Under WLC Option I, students with a concentration in French Studies must complete at least 30 credits beyond the intermediate level (FRNCH 201 Intermediate French I - FRNCH 202 Intermediate French II).

Major option in French Studies (30 credits total)

A. Required Core Courses (9 credits)

C. Communication Proficiency Requirements: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors). In addition, the Department requires a grade of C or better in any course numbered between 370 and 379 taught by the Department of World Languages and Cultures (with the exception of Anthropology courses) or the interdepartmental program in Classical Studies.

Curricular Notes: Majors must enroll in FRNCH 370, FRNCH 375, FRNCH 378 and/or FRNCH 476 for 4 credits in French. No more than 12 credits from FRNCH 370 French Studies in English, FRNCH 375 Francophone Studies in English, FRNCH 378 French and/or Francophone Film Studies in English and/or FRNCH 476 French Culture and Society in English may be counted for the French major. Credit from French 395 "Université Sorbonne Paris Nord" or an approved study abroad program may be applied to the major. Students may enroll in the Languages and Cultures for Professions (LCP) Option in French as a Second Major only. They may not graduate with the Second Major in LCP alone.

Minor in French

The French minor requires at least 15 credits of courses taught in French beyond the elementary level (FRNCH 101 Elementary French I – FRNCH 102 Elementary French II). A least six credits must be in the required core: French 301 and French 302. At least three credits must be chosen from the list of approved additional courses: French 304, 305, 320, 326, 340. Credit from French 395 "Université Sorbonne Paris Nord" or an approved study abroad program may be applied to the minor. French 370, 375, 378, and 476 cannot count toward the minor.

Additional Courses (at least 14 credits)
FRNCH 305: French Conversation 3
FRNCH 326: Studies in French or Francophone Film 3
FRNCH 340: Cultural Expressions in the French-Speaking World 3
FRNCH 370: French Studies in English 3-4
FRNCH 378: French and/or Francophone Film Studies in English 3-4
FRNCH 476: French Culture and Society in English 3-4

Curricular Notes: Majors must enroll in FRNCH 370, FRNCH 378 and/or FRNCH 476 for 4 credits in French. No more than 12 credits from FRNCH 370 French Studies in English, FRNCH 378 French and/or Francophone Film Studies in English and/or FRNCH 476 French Culture and Society in English may be counted for the French major. Credit from an approved study abroad program may be applied to the major. Students may enroll in the Languages and Cultures for Professions (LCP) Option in French as a Second Major only. They may not graduate with the Second Major in LCP alone.

Courses primarily for undergraduate students

FRNCH 101: Elementary French I
(4-0) Cr. 4. F.S.S.
Beginning level development of reading, writing, listening comprehension, and speaking in French, within the context of French culture.

FRNCH 102: Elementary French II
(4-0) Cr. 4. S.S.S.
Prereq: FRNCH 101
Beginning level development of reading, writing, listening comprehension, and speaking in French, within the context of French culture. Meets International Perspectives Requirement.

FRNCH 201: Intermediate French I
(4-0) Cr. 4. F.
Prereq: FRNCH 102
Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture. Meets International Perspectives Requirement.

FRNCH 202: Intermediate French II
(4-0) Cr. 4. S.
Prereq: FRNCH 201
Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture. Meets International Perspectives Requirement.

FRNCH 301: French Writing and Grammar
(3-0) Cr. 3. F.
Prereq: FRNCH 202
Emphasis on developing language proficiency and skills in reading and writing. Selective review of grammar within the context of cultural and literary prose. Meets International Perspectives Requirement.

FRNCH 302: Reading and Writing French
(3-0) Cr. 3. S.
Prereq: FRNCH 301
Readings in French prose, theater and poetry. Introduction to close reading and analysis. Development of reading and writing skills for upper-level courses. Meets International Perspectives Requirement.

FRNCH 304: French for Global Professionals
(3-0) Cr. 3.
Prereq: FRNCH 202

FRNCH 305: French Conversation
(3-0) Cr. 3.
Prereq: Credit or concurrent enrollment in FRNCH 301
Intensive conversational and listening practice emphasizing contemporary France and the Francophone world. Native or near-native speakers are not eligible to enroll. Meets International Perspectives Requirement.

FRNCH 320: France Today
(3-0) Cr. 3.
Prereq: FRNCH 202
Selected topics dealing with contemporary French society and culture. Meets International Perspectives Requirement.

FRNCH 326: Studies in French or Francophone Film
(3-0) Cr. 3. Repeatable.
Prereq: FRNCH 301
In-depth study of a selected filmmaker, genre, or movement. Emphasis on analytical interpretation and relationship between film and French or Francophone culture, history, and society. Counts toward World Film Studies Minor. Meets International Perspectives Requirement.
FRNCH 340: Cultural Expressions in the French-Speaking World
(3-0) Cr. 3. Repeatable.
Prereq: Credit or concurrent enrollment in FRNCH 302
Cultural approaches to selected topics, genres, movements, or voices in French language, literatures, and media. Emphasis on close reading and discussion.
Meets International Perspectives Requirement.

FRNCH 370: French Studies in English
(3-0) Cr. 3-4. Repeatable.
Prereq: For fourth credit, 6 credits in French at 300 level.
Author, genre, or period study in French or Francophone history, literature, or culture. Three credits: readings, discussions and papers in English; open to all students. Four credits: required for French concentration credit, supplementary readings and written course work in French.
Meets International Perspectives Requirement.

FRNCH 370F: Studies in English Translation: French Topics on Women and Gender Studies
(Cross-listed with WGS). (3-0) Cr. 3. Repeatable.
Topics vary according to faculty interest. Readings, discussions, and papers in English.
Meets International Perspectives Requirement.

FRNCH 378: French and/or Francophone Film Studies in English
(2-2) Cr. 3-4. Repeatable.
Prereq: For fourth credit, 6 credits in French at 300 level.
Analysis and interpretation of film in French society. Topics vary according to faculty interest. Film directors, genres, movements (e.g. The New Wave), historical survey, aesthetics, and cinematography. Three credits: readings, discussions and papers in English; open to all students. Four credits: required for French concentration credit, supplementary readings and written course work in French. Counts toward World Film Studies Minor.
Meets International Perspectives Requirement.

FRNCH 476: French Culture and Society in English
(3-0) Cr. 3-4. S.
Key moments and themes in French society and culture up to the modern era. Subjects vary according to faculty interest. Readings, discussions, and papers in English.
Meets International Perspectives Requirement.

FRNCH 490: Independent Study
Cr. 1-6. Repeatable, maximum of 9 credits.
Prereq: Permission of French staff and department chair
Designed to meet the needs of students who wish to focus on areas other than those in which courses are offered. No more than 9 credits in Frnch 490 may be counted toward graduation.

FRNCH 499: Internship in French
Cr. 1-3. Repeatable, maximum of 3 credits. F.S.S.
Prereq: 9 credits of French at the 300 level; permission of advisor and WLC Internship Coordinator.
Work experience using French language skills in the public or private sector, combined with academic work under faculty supervision. Offered on a satisfactory-fail basis only. No more than 3 credits of Frnch 499 may be applied to the major.

FRNCH 590: Special Topics in French
Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level French

FRNCH 590A: Special Topics in French: Literature or Literary Criticism
Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level French

FRNCH 590B: Special Topics in French: Linguistics
Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level French

FRNCH 590C: Special Topics in French: Language Pedagogy
Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level French

FRNCH 590D: Special Topics in French: Civilization
Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level French

Courses primarily for graduate students, open to qualified undergraduate students

FRNCH 590: Special Topics in French
Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level French

German (Ger)
WLC Option I: German Studies
Under WLC Option I, students with a concentration in German must complete at least 30 credits beyond the intermediate level (GER 201 (https://currentcatalog.registrar.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures/) - GER 202 (https://currentcatalog.registrar.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures/)) level. Students electing the German Studies option may count a maximum of two of the following courses towards the major:

- GER 370 German Studies in English 3-4
- GER 371 The Holocaust in Text, Image, and Memory 3-4
- GER 375 Grimm's Tales 3-4
- GER 378 German Film and Media Studies 3-4
A. German Studies Required Core Courses: (22 credits)

### GER 101: Elementary German I

(4-0) Cr. 4. F.SS.
Beginning level development of reading, writing, listening comprehension, and speaking in German within the context of German culture. For beginning-level learners who have little or no prior exposure to German.

### GER 102: Elementary German II

(4-0) Cr. 4. S.SS.
Prereq: GER 101
Beginning level development of reading, writing, listening comprehension, and speaking in German within the context of German culture. For beginning level learners with only one semester of German (or exposure equivalent to two years or less in high school.).
Meets International Perspectives Requirement.

### GER 201: Intermediate German I

(4-0) Cr. 4. F.
Prereq: GER 102
Intermediate level development of reading, writing, listening comprehension, and speaking in German within the context of German culture. Intensive review of basic grammar covered in the first-year German class (or equivalent high school courses) while exploring cultural topics and themes.
Meets International Perspectives Requirement.

### GER 202: Intermediate German II

(4-0) Cr. 4. S.
Prereq: GER 201
Intermediate level development of reading, writing, listening comprehension, and speaking in German within the context of German culture. Emphasis on intermediate level grammar and communication about topics and themes beyond the personal realm.
Meets International Perspectives Requirement.

### GER 301: Reading

(3-0) Cr. 3. F.
Prereq: GER 202
Emphasis on reading with further development of grammar using a variety of texts.
Meets International Perspectives Requirement.

### GER 302: Composition

(3-0) Cr. 3. S.
Prereq: GER 202
Emphasis on writing skills, with further development of grammar and reading skills using a variety of current and historical materials.
Meets International Perspectives Requirement.

### GER 304: German for Global Professionals

(3-0) Cr. 3. F.
Prereq: GER 202
Communication in business and professional contexts in German-speaking countries. Development of effective communication strategies and project management in the workplace. Cultural contexts of business and professional practice. Preparation for internships.
Meets International Perspectives Requirement.

### GER 305: Conversation

(3-0) Cr. 3. S.
Prereq: GER 202 minimum, GER 301 recommended
Intensive conversational and listening practice in German.
Meets International Perspectives Requirement.

### GER 320: Germany Today

(3-0) Cr. 3. S.
Prereq: GER 301 or GER 304
Selected topics dealing with contemporary German society and culture. Introduction to materials, resources, and forms of communication available on the Internet, and in other electronic and print media.
Meets International Perspectives Requirement.
GER 330: German Literature and Culture
(3-0) Cr. 3. Repeatable. F.
Prereq: GER 301 or permission of instructor
Selected readings in German literature from Classicism to present. Emphasis on techniques of reading and analysis of literary texts. No more than six credits of Ger 330 may be counted toward the major. Meets International Perspectives Requirement.

GER 370: German Studies in English
(3-0) Cr. 3-4. Repeatable, maximum of 6 credits.
Prereq: Sophomore classification. For fourth credit, 6 credits in German at the 300 level
Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Three credits: English, open to all students. Four credits: Required for German concentration credit, supplementary readings and compositions in German. Meets International Perspectives Requirement.

GER 370G: Studies in English Translation: German Topics on Women or Feminism
(Cross-listed with WGS). (3-0) Cr. 3-4. Repeatable, maximum of 6 credits.
Prereq: Sophomore classification. For fourth credit, 6 credits in German at the 300 level
Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Three credits: English, open to all students. Four credits: Required for German concentration credit, supplementary readings and compositions in German. Meets International Perspectives Requirement.

GER 371: The Holocaust in Text, Image, and Memory
(3-0) Cr. 3-4.
Prereq: Sophomore classification. For fourth credit, 6 credits in German at the 300 level
Examination of such topics as the origins and expressions of Anti-Semitism in central Europe, the political events and structures of the Holocaust, the reality of ghettos and concentration camps, the impact of technological modernization on the Final Solution, and resistance to the Nazis. Materials will include non-fictional texts, literature, art, and music. Three credits: English, open to all students. Four credits: required for German major credit, supplementary readings and compositions in German. Four credits: required for German concentration credit, supplementary readings and compositions in German. Meets International Perspectives Requirement.

GER 375: Grimms’ Tales
(3-0) Cr. 3-4.
Prereq: Sophomore classification. For fourth credit, 6 credits in German at the 300 level
Emphasis on the Grimm tales: theoretical approaches to the tales from the late 19th and early 20th centuries; perversions of these traditional tales by the National Socialists (Nazis). Readings in contemporary Grimm scholarship. Taught in English. Three credits: English, open to all students. Four credits: required for German concentration credit, supplementary readings and compositions in German. Meets International Perspectives Requirement.

GER 378: German Film and Media Studies
(3-0) Cr. 3-4. S.
Prereq: Sophomore classification. For fourth credit, 6 credits in German at the 300 level
Analysis and interpretation of film or media in German society. Study of media production and reception within multicultural and global contexts. Thematic emphases based on faculty and student interest including: 1) film directors, genres, movements (e.g. New German Cinema), aesthetics, and cinematography or 2) media studies (e.g. television, mass press, popular culture). Three credits: English, open to all students. Four credits: required for German concentration credit, supplementary readings and compositions in German. Counts towards the World Film Studies Minor. Meets International Perspectives Requirement.

GER 395: Study Abroad
Cr. 1-10.
Prereq: 2 years university-level German
Supervised instruction in language and culture of Germany; formal class instruction at level appropriate to student's training, augmented by practical living experience. Meets International Perspectives Requirement.

GER 476: Topics in German Cultural Studies
(3-0) Cr. 3-4. S.
Prereq: Sophomore classification. For fourth credit, six credits in German at the 300-level courses instructed in German
Key topics and themes in German history and culture up to the modern era. Three credits: Taught in English, open to all students. Four credits: Required for German concentration credit, supplementary readings and compositions in German. Meets International Perspectives Requirement.
GER 490: Independent Study
Cr. 1-6. Repeatable, maximum of 9 credits.
Prereq: 6 credits in German and permission of department chair
Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits of Ger 490 may be counted toward graduation.

GER 499: Internship in German
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.
Prereq: 9 credits of German at the 300 level; permission of advisor and the World Languages and Cultures Internship coordinator
Work experience using German language skills in the public or private sector, combined with academic work under faculty supervision. Available only to majors and minors. Offered on a satisfactory-fail basis only. Ger 499 may be repeated to a maximum of 6 credits. No more than 3 credits of Ger 499 may be applied to the major.

GER 590: Special Topics in German
Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level German

GER 590A: Special Topics in German: Literature or Literary Criticism
Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level German

GER 590B: Special Topics in German: Linguistics
Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level German

GER 590C: Special Topics in German: Language Pedagogy
Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level German

GER 590D: Special Topics in German: Civilization
Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level German

Courses primarily for undergraduate students
LATIN 101: Elementary Latin I
(3-0) Cr. 3. F.
Grammar and vocabulary of classical Latin, within the context of Roman culture; reading knowledge through texts adapted from classical authors.

LATIN 102: Elementary Latin II
(3-0) Cr. 3. S.
Prereq: LATIN 101
Grammar and vocabulary of classical Latin, within the context of Roman culture; reading knowledge through texts adapted from classical authors. Meets International Perspectives Requirement.

LATIN 490: Independent Study
Cr. 1-6. Repeatable, maximum of 9 credits.
Prereq: 9 credits in Latin and permission of department chair
Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits in Latin 490 may be counted toward graduation.

Portuguese (Port)
Courses primarily for undergraduate students
PORT 101: Elementary Portuguese I
Cr. 4.
An introduction to the Portuguese language through the communicative approach within the context of Luso-Brazilian culture.

PORT 102: Elementary Portuguese II
Cr. 4.
Prereq: PORT 101
An introduction to the Portuguese language through the communicative approach within the context of Luso-Brazilian culture. Meets International Perspectives Requirement.

PORT 111: Intensive Beginning Portuguese
Cr. 3.
A communicative approach to grammar and vocabulary within the context of Luso-Brazilian culture for students whose native language is not Portuguese. Taught in Portuguese.

PORT 112: Elementary Portuguese, Accelerated II
Cr. 3.
Prereq: PORT 111
An introduction to the Portuguese language through the communicative approach within the context of Luso-Brazilian culture. Meets International Perspectives Requirement.

Italian (ITAL)
Courses primarily for undergraduate students
ITAL 107: Intensive Beginning Italian
Cr. 4. F.S.
A communicative approach to grammar and vocabulary within the context of Italian culture for students whose native language is not Italian. Taught in Italian.

Latin (Latin)
For courses in Latin literature taught in English, see Classical Studies.
PORT 375: Brazil Today
Cr. 3. F.
Prereq: None
A survey of social, political, economic, and cultural topics relevant to contemporary Brazil. Includes an introduction to Portuguese language.
None
Meets International Perspectives Requirement.

Russian Studies (Rus)
Minors in Russian Studies are required to complete RUS 201 and RUS 202. The remaining 9 credits must be at the 300 level and above, including at least 3 credits in the Russian curriculum (courses taught in English or Russian).

Russian Studies Minor Option 1: Russian Studies.
9 credits at the 300 level may be selected from the following courses:

Courses primarily for undergraduate students
RUS 101: Introduction to Russian Language and Culture I
(4-0) Cr. 4. F.
Introduction to the Russian language (focusing on the development of speaking, listening, reading and writing skills) and Russian culture.
### RUS 102: Introduction to Russian Language and Culture II

(4-0) Cr. 4. S.

**Prereq:** RUS 101

Continuation of RUS 101. Introduction to the Russian language (focusing on the development of speaking, listening, reading and writing skills) and Russian culture.

Meets International Perspectives Requirement.

### RUS 201: Intermediate Russian I

(4-0) Cr. 4. F.

**Prereq:** RUS 102

Thorough review of grammar and growth of vocabulary. Selected readings. Continued use of the four basic skills.

Meets International Perspectives Requirement.

### RUS 202: Intermediate Russian II

(4-0) Cr. 4. S.

**Prereq:** RUS 201

Thorough review of grammar and growth of vocabulary. Selected readings. Continued use of the four basic skills.

Meets International Perspectives Requirement.

### RUS 301: Composition and Conversation

(3-0) Cr. 3. F.

**Prereq:** RUS 202

Thorough study of the Russian language, with emphasis on strengthening proficiency in writing, speaking, reading, and listening. Increased focus on syntax and word formation.

Meets International Perspectives Requirement.

### RUS 304: Russian for Global Professionals

(3-0) Cr. 3. F.

**Prereq:** RUS 102

Communication in business and professional contexts in Russian-speaking countries. Development of effective communication strategies and project management in the workplace. Cultural contexts of business and professional practice.

Meets International Perspectives Requirement.

### RUS 314: Reading Russian Literary and Cultural Texts

(3-0) Cr. 3. Repeatable.

**Prereq:** RUS 102

Selected readings in Russian literature and culture. Emphasis on techniques of reading and analysis of literary and cultural texts.

Meets International Perspectives Requirement.

### RUS 370: Russian Studies in English Translation

(3-0) Cr. 3. Repeatable.

Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English.

Meets International Perspectives Requirement.

### RUS 370A: Russian Studies in English Translation: Topics in Russian Literature

(3-0) Cr. 3. Repeatable, maximum of 9 credits.

Focus on Russian literature. Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English.

Meets International Perspectives Requirement.

### RUS 370B: Russian Studies in English Translation: Russian Fairy Tales

(3-0) Cr. 3. Repeatable, maximum of 9 credits.

Focus on Russian fairy tales. Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English.

Meets International Perspectives Requirement.

### RUS 370R: Studies in English Translation: Russian Topics on Women or Feminism

(Cross-listed with WGS). (3-0) Cr. 3. Repeatable.

Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English.

Meets International Perspectives Requirement.

### RUS 375: Russia Today

(3-0) Cr. 3. Repeatable.

A survey of social, political, economic, and cultural topics relevant to contemporary Russia. Readings, discussions and papers in English.

Meets International Perspectives Requirement.

### RUS 378: Russian Film Studies in English

(3-0) Cr. 3.

Analysis and interpretation of cinema in Russia and the Soviet Union. Topics vary according to faculty interest. Film directors, genres, movements, historical survey, aesthetics, and cinematography. Readings, discussions and papers in English.

Meets International Perspectives Requirement.

### RUS 395: Study Abroad

Cr. 1-6. Repeatable.

Supervised instruction in language and culture of Russia; formal class instruction at level appropriate to student's training, augmented by practical living experience.

Meets International Perspectives Requirement.
RUS 490: Independent Study
Cr. 1-6. Repeatable.
Prereq: 6 credits in Russian and permission of department chair
Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits of Rus 490 may be counted toward graduation.

RUS 499: Internship in Russian
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 9 credits of Russian at the 300 level; permission of advisor and WLC Internship Coordinator
Work experience using Russian language skills in the public or private sector combined with academic work under faculty supervision. Available only to minors. No more than 3 credits may be applied to the minor.

RUS 590: Special Topics in Russian
Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level Russian

RUS 590A: Special Topics in Russian: Literature or Literary Criticism
Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level Russian

RUS 590B: Special Topics in Russian: Linguistics
Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level Russian

RUS 590C: Special Topics in Russian: Language Pedagogy
Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level Russian

RUS 590D: Special Topics in Russian: Civilization
Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level Russian

Courses primarily for graduate students, open to qualified undergraduate students
RUS 590: Special Topics in Russian
Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level Russian

Spanish (Span)
Go to Spanish Minor

World Languages and Cultures majors with a concentration in Spanish have two options:

WLC Option I: Hispanic Studies
Under WLC Option I, students with a concentration in Spanish must complete a minimum of 30 credits beyond the intermediate (SPAN 201 Intermediate Spanish I - SPAN 202 Intermediate Spanish II) level.

A. Hispanic Studies Required Core Courses: (12 cr.)

<table>

<tr>
<td>SPAN 314</td>
<td>Textual and Media Analyses</td>
<td>3</td>
</tr>
<tr>
<td>SPAN 352</td>
<td>Spanish Pronunciation</td>
<td>3</td>
</tr>
</tbody>
</table>

B. Additional Courses: Students must take at least 15 credits chosen from a, b, and c below (minimum of 3 credits from each section).

a) At least 3 credits of literary studies chosen from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN 330</td>
<td>Studies in Spanish Literature</td>
<td>3</td>
</tr>
<tr>
<td>SPAN 332</td>
<td>Studies in Latin American Literature</td>
<td>3</td>
</tr>
</tbody>
</table>

b) At least 3 credits of cultural studies chosen from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN 304</td>
<td>Spanish for Global Professionals</td>
<td>3</td>

<tr>
<td>SPAN 324</td>
<td>Latin America Today</td>
<td>3</td>
</tr>
<tr>
<td>SPAN 326</td>
<td>Studies in Hispanic Art or Film</td>
<td>3</td>
</tr>
</tbody>
</table>

C. Students must take at least 6 credits of language, literature and/or culture at the 400 level, chosen from the following (each repeatable to 6 credits):

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN 351</td>
<td>Introduction to Spanish-English Translation</td>
<td>3</td>
</tr>

<tr>
<td>SPAN 463</td>
<td>Contemporary Spanish Linguistics</td>
<td>3</td>
</tr>
<tr>
<td>SPAN 499</td>
<td>Internship in Spanish</td>
<td>1-3</td>
</tr>
</tbody>
</table>

Students may apply up to 6 credits of SPAN 395 Study Abroad to section a, b, or c above (appropriate section based upon course content and assigned by the WLC advisor).

C. Students must take at least 6 credits of language, literature and/or culture at the 400 level, chosen from the following (each repeatable to 6 credits):
D. Study Abroad: The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-speaking country. Under Option I, any student who chooses not to participate in a department-approved program will be required to take 3 additional elective credits of Spanish at or above the SPAN 321 level (for a total of 33 credits beyond the intermediate 201-202 level).

E. Communication Proficiency Requirements: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors). In addition, the Department requires a grade of C or better in any course numbered between 370 and 379 taught by the Department of World Languages and Cultures (with the exception of Anthropology courses) or the interdepartmental program in Classical Studies. Such a course will also fill an LAS Area I (Arts and Humanities) requirement.

WLC Option II: Language and Cultures for Professions

Under WLC Option II students with a concentration in Spanish must complete a minimum of 30 credits beyond the intermediate (SPAN 201 Intermediate Spanish I-SPAN 202 Intermediate Spanish II) level.

I. Languages and Cultures for Professions (Colleges of Agriculture and Life Sciences, Business, and Engineering)

Students with a primary major in the Colleges of Agriculture and Life Sciences, Business, or Engineering pursuing the second major option in Spanish are required to take at least 30 credits beyond the intermediate (SPAN 201 Intermediate Spanish I-SPAN 202 Intermediate Spanish II) level.

A. Required LCP Core Courses: (12 Credits)

<table>
<thead>
<tr>
<th>Course Code</th>

</tr>
<tr>
<td>SPAN 463</td>
<td>Contemporary Spanish Linguistics</td>
<td>3</td>
</tr>
</tbody>
</table>

D. Additional three credits taken at the 300-level or higher.

*Additional credit from an approved study abroad program may be applied to the major.

**SPAN 321 Spanish Civilization and SPAN 322 Latin American Civilization may be substituted.

Curricular Notes: students may only enroll in the Languages and Cultures for Professions (LCP) Option as a second major. They may not graduate with the second major in LCP alone.

Minor in Spanish

The Spanish minor: Option 1: Hispanic Studies, Option 2: Languages and Cultures for Professions

Option 1: The Spanish minor in Hispanic Studies requires at least 15 credits, 12 of which must be at the 300 level or higher. The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-speaking country. Any student who chooses not to participate in a department-approved study abroad program will be required to take 3 additional elective credits of Spanish at the 300 level or higher.

Option 2: Language and Cultures for Professions. The Spanish minor in Languages and Cultures for Professions requires the following courses (12 credits):
The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-speaking country. Any student who chooses not to participate in a department-approved study abroad program will be required to take 3 additional credits in culture chosen from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN 321</td>
<td>Spanish Civilization</td>
<td>3</td>
</tr>
<tr>
<td>SPAN 322</td>
<td>Latin American Civilization</td>
<td>3</td>
</tr>
<tr>
<td>SPAN 323</td>
<td>Spain Today</td>
<td>3</td>
</tr>
<tr>
<td>or SPAN 324</td>
<td>Latin America Today</td>
<td></td>
</tr>
</tbody>
</table>

Note: students taking either SPAN 321 Spanish Civilization or SPAN 323 Spain Today must take either SPAN 322 Latin American Civilization or SPAN 324 Latin America Today; students taking either SPAN 322 Latin American Civilization or SPAN 324 Latin America Today must take either SPAN 321 Spanish Civilization or SPAN 323 Spain Today.

**Courses primarily for undergraduate students**

**SPAN 097: Accelerated Spanish Review**
(3-2) Cr. 0. F.S.

*Prereq: Two years but less than three years of high-school Spanish*

For students who require additional review at the first year (101-102) level. Course components include a compact review of 101 and the essential elements of 102. Course completed with a passing grade fulfills the LAS foreign language requirement. Not recommended for students who wish to continue language at the second year (201-202) level without completing 102.

**SPAN 101: Elementary Spanish I**
(4-0) Cr. 4. F.S.S.

A communicative approach to grammar and vocabulary within the context of Hispanic culture. For students whose native language is not Spanish.

**SPAN 102: Elementary Spanish II**
(4-0) Cr. 4. S.S.S.

*Prereq: SPAN 101, SPAN 97 or placement by departmental exam*

Continuation of Spanish 101. A communicative approach to grammar and vocabulary within the context of Hispanic culture. For students whose native language is not Spanish.

Meets International Perspectives Requirement.

**SPAN 195: Study Abroad**
Cr. 3. SS.

Supervised instruction in Spanish and Hispanic culture; formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Spanish. Consult the department regarding equivalency with SPAN 101 or 102.

Meets International Perspectives Requirement.

**SPAN 201: Intermediate Spanish I**
(4-0) Cr. 4. F.

*Prereq: SPAN 102 or placement by departmental exam*

Intensive review of basic grammar and conversation. For students whose native language is not Spanish. Practice in oral and written communication. Development of fluency with idiomatic expressions. Selected readings on culture and literature.

Meets International Perspectives Requirement.

**SPAN 202: Intermediate Spanish II**
(4-0) Cr. 4. S.

*Prereq: SPAN 201 or placement by departmental exam*

Continuation of Spanish 201. Intensive review of basic grammar. Practice in oral and written communication. Development of fluency with idiomatic expressions. Selected readings on culture and literature. For students whose native language is not Spanish.

Meets International Perspectives Requirement.

**SPAN 295: Study Abroad**
Cr. 3. SS.

*Prereq: SPAN 102 or equivalent*

Supervised instruction in Spanish and Hispanic culture; formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Spanish. Consult the department regarding equivalency with Span 201 or 202.

Meets International Perspectives Requirement.
SPAN 297: Intensive Intermediate Spanish  
(4-0) Cr. 4. F.S.  
Prereq: 4 years of high school Spanish, two years of Spanish at a community college, Spanish 201, or equivalent by placement  
Bridge course between 200- and 300-level Spanish courses that focuses on application of advanced grammatical concepts within the context of Hispanic culture. Accelerated review of SPAN 201 and SPAN 202 designed for students who want to continue at the 300 level. Taught in Spanish for students whose native language is not Spanish. Meets International Perspectives Requirement.

SPAN 303: Spanish Conversation and Composition  
(3-0) Cr. 3. F.S.  
Prereq: SPAN 202 or placement by departmental exam  
Intensive oral practice and improvement of oral proficiency. Application of specific grammatical concepts for development of conversational and writing skills within the context of Hispanic culture. Taught in Spanish. Meets International Perspectives Requirement.

SPAN 303A: Spanish Conversation and Composition: through Culture  
(3-0) Cr. 3. F.S.  
Prereq: SPAN 202 or placement by departmental exam  
Intensive oral practice and improvement of oral proficiency. Application of specific grammatical concepts for development of conversational and writing skills within the context of Hispanic culture. Taught in Spanish. For students whose native language is not Spanish. Meets International Perspectives Requirement.

SPAN 303B: Spanish Conversation and Composition: for Professionals  
(3-0) Cr. 3. F.S.  
Prereq: SPAN 202 or placement by departmental exam  
Intensive oral practice and improvement of oral proficiency. Application of specific grammatical concepts for development of conversational and writing skills within the context of Hispanic culture. Taught in Spanish. Meets International Perspectives Requirement.

SPAN 304: Spanish for Global Professionals  
(3-0) Cr. 3. F.S.  
Prereq: SPAN 202 or placement by departmental exam (SPAN 303B recommended)  
Introduction to professional communication within a cultural context. Grammar review as needed. Individual projects will focus on special interests. Taught in Spanish. Meets International Perspectives Requirement.

SPAN 314: Textual and Media Analyses  
(3-0) Cr. 3. F.S.  
Prereq: SPAN 303A or 303B  

SPAN 321: Spanish Civilization  
(3-0) Cr. 3.  
Prereq: One course at the 300 level  

SPAN 322: Latin American Civilization  
(3-0) Cr. 3.  
Prereq: One course at the 300 level  

SPAN 323: Spain Today  
(3-0) Cr. 3.  
Prereq: One course at the 300 level  
A survey of social, political, economic, and cultural topics relevant to contemporary Spain. Taught in Spanish. Meets International Perspectives Requirement.

SPAN 324: Latin America Today  
(3-0) Cr. 3.  
Prereq: One course at the 300 level  
A survey of social, political, economic, and cultural topics relevant to contemporary Latin America. Taught in Spanish. Meets International Perspectives Requirement.

SPAN 326: Studies in Hispanic Art or Film  
(Dual-listed with SPAN 526). (3-0) Cr. 3.  
Prereq: One course at the 300 level  

SPAN 330: Studies in Spanish Literature  
(3-0) Cr. 3.  
Prereq: SPAN 314  
Introduction to Spanish literature and techniques of literary criticism from the earliest times through the present. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish. Meets International Perspectives Requirement.
SPAN 332: Studies in Latin American Literature
(3-0) Cr. 3.
*Prereq: SPAN 314*
Introduction to Latin American literature and techniques of literary criticism from the earliest times through the present. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 351: Introduction to Spanish-English Translation
(Cross-listed with LING, US LS). (3-0) Cr. 3. F.S.
*Prereq: SPAN 303A or SPAN 303B or SPAN 304*
Introduction to the theory, methods, techniques, and problems of translation. Consideration of material from business, literature, and the social sciences. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 352: Spanish Pronunciation
(Cross-listed with LING). (3-0) Cr. 3. F.S.
*Prereq: SPAN 303A or SPAN 303B or SPAN 304*
An introductory study of the articulation, classification, distribution, and regional variations of the sounds of the Spanish language. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 354: Introduction to Spanish-English Interpretation
(Dual-listed with SPAN 554). (Cross-listed with LING). (3-0) Cr. 3. F.S.
*Prereq: SPAN 351*
Introduction to the theory, methods, techniques, and problems of consecutive and simultaneous interpretation. Consideration of material from business, agriculture, law, design, medicine, literature, advertisement, and sports. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 370: Hispanic Topics in English Translation
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English. May not be counted as a prerequisite.
Meets International Perspectives Requirement.

SPAN 370A: Hispanic Topics in English Translation: Agriculture
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Topics vary according to faculty interest. Knowledge and understanding of major cultural, ethical, sociopolitical and economic issues directly related to agriculture and agribusiness in Latin America, Spain, and/or Equatorial Guinea. Readings, discussions, and papers in English. May not be counted as a prerequisite.

SPAN 370S: Studies in English Translation: Hispanic Topics on Women or Feminism
(Cross-listed with WGS). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English. May not be counted as a prerequisite.
Meets International Perspectives Requirement.

SPAN 395: Study Abroad
Cr. 1-10. Repeatable.
*Prereq: 2 years university-level Spanish or equivalent*
Supervised instruction in Spanish and Hispanic culture; formal class instruction at level appropriate to students' training, enhanced by practical living experience.
Meets International Perspectives Requirement.

SPAN 401: Advanced Composition and Grammar
(Dual-listed with SPAN 501). (3-0) Cr. 3. F.
*Prereq: SPAN 314 and one course at the 320-level or above*
Advanced study of Spanish grammar and syntax. Students' writing of compositions incorporates an advanced understanding of grammar, syntax, and principles of organization of thought and ideas. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 440: Seminar on the Literatures and Cultures of Spain
(Dual-listed with SPAN 540). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
*Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (Recommended SPAN 330 and SPAN 331)*
Discussion and analysis of selected topics in Spanish literature and culture from the Middle Ages to the Present. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 441: Seminar on Cervantes and the Golden Age
(Dual-listed with SPAN 541). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
*Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (SPAN 330 recommended)*
Discussion and analysis of selected works of Cervantes within the social and cultural context of the Golden Age. Taught in Spanish.
Meets International Perspectives Requirement.
SPAN 445: Seminar on the Literatures and Cultures of Latin America  
(Dual-listed with SPAN 545). (3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (SPAN 332 and SPAN 333 recommended)  
Discussion and analysis of selected topics in Latin American literature and culture from Pre-Colonial times to the Present. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 462: Contrastive Analysis of Spanish/ English for Translators  
(Cross-listed with LING). (3-0) Cr. 3.  
Prereq: SPAN 351  
Linguistic study of the major differences between the Spanish and English grammatical systems and their applications in the translation of Spanish to English. Taught in Spanish.

SPAN 463: Contemporary Spanish Linguistics  
(Dual-listed with SPAN 563). (Cross-listed with LING). (3-0) Cr. 3.  
Repeatable, maximum of 6 credits.  
Prereq: SPAN 352  
Study of various topics related to the Spanish language. Topics may include bilingualism, historical linguistics and dialectology, Spanish in the U.S., language assessment, computer-assisted language learning and instruction, and second language acquisition. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 490: Independent Study  
Cr. 1-6. Repeatable, maximum of 6 credits.  
Prereq: 6 credits in Spanish and permission of department chair  
Designed to meet the needs of students in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 6 credits in Span 490 may be counted toward graduation.

SPAN 499: Internship in Spanish  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.  
Prereq: 9 credits of Spanish at the 300 level; permission of advisor and WLC Internship Coordinator  
Work experience using Spanish language skills in the public or private sector, combined with academic work under faculty supervision. Up to 3 credits may apply toward the major. Available only to majors and minors.

SPAN 501: Advanced Composition and Grammar  
(Dual-listed with SPAN 401). (3-0) Cr. 3. F.  
Prereq: SPAN 314 and one course at the 320-level or above  
Advanced study of Spanish grammar and syntax. Students' writing of compositions incorporates an advanced understanding of grammar, syntax, and principles of organization of thought and ideas. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 526: Studies in Hispanic Art or Film  
(Dual-listed with SPAN 326). (3-0) Cr. 3.  
Prereq: 6 credits in Spanish literature or culture at 400 level  
Survey of major currents and figures in Spanish and Latin American art and/or film.

SPAN 540: Seminar on the Literatures and Cultures of Spain  
(Dual-listed with SPAN 440). (3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (Recommended SPAN 330 and SPAN 331)  
Discussion and analysis of selected topics in Spanish literature and culture from the Middle Ages to the Present. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 541: Seminar on Cervantes and the Golden Age  
(Dual-listed with SPAN 441). (3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (SPAN 330 recommended)  
Discussion and analysis of selected works of Cervantes within the social and cultural context of the Golden Age. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 545: Seminar on the Literatures and Cultures of Latin America  
(Dual-listed with SPAN 445). (3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (SPAN 332 and SPAN 333 recommended)  
Discussion and analysis of selected topics in Latin American literature and culture from Pre-Colonial times to the Present. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 554: Introduction to Spanish-English Interpretation  
(Dual-listed with SPAN 354). (Cross-listed with LING). (3-0) Cr. 3. F.S.  
Prereq: SPAN 351  
Introduction to the theory, methods, techniques, and problems of consecutive and simultaneous interpretation. Consideration of material from business, agriculture, law, design, medicine, literature, advertisement, and sports. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 590: Special Topics in Spanish  
Cr. 1-4. Repeatable.  
Prereq: Permission of instructor; 6 credits of 400 level Spanish

SPAN 590A: Special Topics in Spanish: Literature or Literary Criticism  
Cr. 1-4. Repeatable.  
Prereq: Permission of instructor; 6 credits of 400 level Spanish
SPAN 590B: Special Topics in Spanish: Linguistics
Cr. 1-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level Spanish

SPAN 590C: Special Topics in Spanish: Language Pedagogy
Cr. 1-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level Spanish

SPAN 590D: Special Topics in Spanish: Civilization
Cr. 1-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level Spanish

Courses primarily for graduate students, open to qualified undergraduate students

SPAN 501: Advanced Composition and Grammar
(Dual-listed with SPAN 401). (3-0) Cr. 3. F.
Prereq: SPAN 314 and one course at the 320-level or above
Advanced study of Spanish grammar and syntax. Students’ writing of compositions incorporates an advanced understanding of grammar, syntax, and principles of organization of thought and ideas. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 526: Studies in Hispanic Art or Film
(Dual-listed with SPAN 326). (3-0) Cr. 3.
Prereq: 6 credits in Spanish literature or culture at 400 level
Survey of major currents and figures in Spanish and Latin American art and/or film.

SPAN 540: Seminar on the Literatures and Cultures of Spain
(Dual-listed with SPAN 440). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (Recommended SPAN 330 and SPAN 331)
Discussion and analysis of selected topics in Spanish literature and culture from the Middle Ages to the Present. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 541: Seminar on Cervantes and the Golden Age
(Dual-listed with SPAN 441). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (SPAN 330 recommended)
Discussion and analysis of selected works of Cervantes within the social and cultural context of the Golden Age. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 545: Seminar on the Literatures and Cultures of Latin America
(Dual-listed with SPAN 445). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (SPAN 332 and SPAN 333 recommended)
Discussion and analysis of selected topics in Latin American literature and culture from Pre-Colonial times to the Present. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 554: Introduction to Spanish-English Interpretation
(Dual-listed with SPAN 354). (Cross-listed with LING). (3-0) Cr. 3. F.S.
Prereq: SPAN 351
Introduction to the theory, methods, techniques, and problems of consecutive and simultaneous interpretation. Consideration of material from business, agriculture, law, design, medicine, literature, advertisement, and sports. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 590: Special Topics in Spanish
Cr. 1-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level Spanish

WLC 107: Introduction to Swahili
Cr. 1. Alt. S., offered irregularly.
Prereq: None
Basics of grammar and vocabulary within the context of the cultures where Swahili is spoken. For students whose native language is not Swahili. Taught in Swahili. Offered on-line. No

WLC 119: Introduction to World Languages
(Cross-listed with LING). (3-0) Cr. 3.
Study of language diversity and the personal, social and political effects of diversity. Language families, attitudes toward language and language use, language and culture, multilingualism, foreign language learning, written codes, official languages, and language policy.
Meets International Perspectives Requirement.

WLC 205: World Religions
(Cross-listed with RELIG). (3-0) Cr. 3. F.S.SS.
An introduction to religious studies – the academic study of religion. Religions from around the world will be discussed, including their myths, rituals, beliefs, values, and social forms.
Meets International Perspectives Requirement.
WLC 210: Introduction to Asian American Studies
(Cross-listed with ANTHR). (3-0) Cr. 3.
An interdisciplinary and chronological examination of Asian American immigration experiences from the early 19th century to the 21st century. Focus on how these immigration histories are accompanied by changing racial constrictions. Discussion of racial stereotyping, the model minority myth, identity development, and efforts for social justice.
Meets U.S. Diversity Requirement

WLC 270: Cultures in Transition
(3-0) Cr. 3.
An interdisciplinary introduction to a world region in a state of rapid social and cultural transition. Discussion of the history, social and political institutions, arts, economy, agriculture, and environment of the new nations.
Meets International Perspectives Requirement.

WLC 352: Religions of India
(Cross-listed with RELIG). (3-0) Cr. 3.
Prereq: Credit in ENG 250
Study of texts, practices, beliefs, historical development, and mutual influence of a variety of the religious traditions of India. Emphasis on Vedic religion and the diversity of traditions of Classical Hinduism; survey of Buddhist, Jain, Sikh, and South Asian Islamic traditions.
Meets International Perspectives Requirement.

WLC 353: Buddhism
(Cross-listed with PHIL, RELIG). (3-0) Cr. 3. S.
Prereq: PHIL 201 or PHIL 230
Central Buddhist positions and arguments on topics such as personal and social ethics, moral psychology, metaphysics, and the relationship between Buddhist thought and the sciences. Differences between Buddhist and Western approaches to philosophy.
Meets International Perspectives Requirement.

WLC 358: Islam
(Cross-listed with RELIG). (3-0) Cr. 3.
Prereq: Credit in ENG 250
An introduction to Islamic religion, culture, and society from its origins to the present. Topics include the Quran, the Prophet Muhammad, Islamic theology and philosophy, Islamic history, and Islam in America.
Meets International Perspectives Requirement.

WLC 359: The Quran
(Cross-listed with RELIG). (3-0) Cr. 3.
Prereq: Credit in ENG 250
A study of the Quran, the sacred text of Islam, with attention to its history, its major themes, and the diverse ways it is interpreted and applied.
Meets International Perspectives Requirement.

WLC 370: Topics in World Languages and Cultures in English Translation
(3-0) Cr. 3. Repeatable, maximum of 9 credits.
Topics vary according to faculty interest. Author, genre or period study, women’s writing, cinema, or cultural studies of a non-English speaking world culture or cultures. Readings, discussion, and written work in English.
Meets International Perspectives Requirement.

WLC 370A: Topics in World Languages and Cultures in English Translation: Global Sustainability
(3-0) Cr. 3. Repeatable, maximum of 9 credits.
Topics vary according to faculty interest. Author, genre or period study, women’s writing, cinema, or cultural studies of a non-English speaking world culture or cultures. Readings, discussion, and written work in English.
Meets International Perspectives Requirement.

WLC 370B: Topics in World Languages and Cultures in English Translation: Middle East
(3-0) Cr. 3. Repeatable, maximum of 9 credits.
Topics vary according to faculty interest. Author, genre or period study, women’s writing, cinema, or cultural studies of a non-English speaking world culture or cultures. Readings, discussion, and written work in English.
Meets International Perspectives Requirement.

WLC 370C: Topics in World Languages and Cultures in English Translation: Global Urban Cultures
(3-0) Cr. 3. Repeatable, maximum of 9 credits.
Topics vary according to faculty interest. Author, genre or period study, women’s writing, cinema, or cultural studies of a non-English speaking world culture or cultures. Readings, discussion, and written work in English.
Meets International Perspectives Requirement.

WLC 417: Student Teaching
Cr. 8-12. F.S.
Prereq: minimum GPA of 2.5; Admission to teacher education, approval of coordinator during semester before student teaching
Evaluation of instruction, lesson planning, and teaching in the liberal arts and sciences.

WLC 417G: Student Teaching: World Language
(Dual-listed with WLC 517G). (Cross-listed with EDUC). Cr. arr. Repeatable. F.S.
Prereq: Minimum GPA of 2.5; Admitted to Educator Preparation Program, approval of coordinator during semester before student teaching
Evaluation of instruction, lesson planning, and teaching in world languages, secondary grades.
WLC 484: Technology, Globalization and Culture
(Dual-listed with WLC 584). (Cross-listed with M E, MKT). (3-0) Cr. 3. F.
Prereq: Junior or senior classification for M E 484; graduate classification for M E 584. MKT 484: MKT 340. MKT 584: Restricted to College of Business graduate classification. Open to other graduate classifications with approval of College of Business Graduate office.
Cross-disciplinary examination of the present and future impact of globalization with a focus on preparing students for leadership roles in diverse professional, social, and cultural contexts. Facilitate an understanding of the threats and opportunities inherent in the globalization process as they are perceived by practicing professionals and articulated in debates on globalization. Use of a digital forum for presenting and analyzing globalization issues by on-campus and off-campus specialists.
Meets International Perspectives Requirement.

WLC 486: Methods in Elementary School World Language Instruction
(Cross-listed with EDUC, LING). (3-0) Cr. 3. F.
Prereq: 25 credits in a world language
Planning, implementation, and assessment of standards-based, student-centered, and thematic instruction in the elementary (K-8) classroom. Special emphasis on K-8 students' communicative skills, cultural knowledge, and content learning.

WLC 487: Methods in Secondary School World Language Instruction
(Cross-listed with EDUC, LING). (3-0) Cr. 3. F.
Prereq: 25 credits in a world language, Admitted to Educator Preparation Program, OPI
Theories and principles of contemporary world language learning and teaching. Special emphasis on designing instruction and assessments for active learning.

WLC 491: Experiences Abroad: Learning to Think Globally
(Cross-listed with INTST). (1-0) Cr. 1. Repeatable, maximum of 2 credits.
Prereq: Minimum of 3 cr. study abroad and/or internship abroad
Students returning from study abroad gain perspective on the personal, academic, and professional impact of their time spent abroad through readings and discussions. Students will be expected to make one presentation about the culture they experienced to an audience outside ISU. Offered on a satisfactory-fail basis only.

WLC 517G: Student Teaching: World Language
(Dual-listed with WLC 417G). (Cross-listed with EDUC). Cr. arr. Repeatable. F.S.
Prereq: Minimum GPA of 2.5; Admitted to Educator Preparation Program, approval of coordinator during semester before student teaching
Evaluation of instruction, lesson planning, and teaching in world languages, secondary grades.

WLC 584: Technology, Globalization and Culture
(Dual-listed with WLC 484). (Cross-listed with M E, MKT). (3-0) Cr. 3. F.
Prereq: Junior or senior classification for M E 484; graduate classification for M E 584. MKT 484: MKT 340. MKT 584: Restricted to College of Business graduate classification. Open to other graduate classifications with approval of College of Business Graduate office.
Cross-disciplinary examination of the present and future impact of globalization with a focus on preparing students for leadership roles in diverse professional, social, and cultural contexts. Facilitate an understanding of the threats and opportunities inherent in the globalization process as they are perceived by practicing professionals and articulated in debates on globalization. **Graduate Programs**

**Graduate Minor**

The Department of World Languages and Cultures offers course work leading to a graduate minor in French, German, Russian Studies or Spanish. The graduate minor in each of these languages is designed to provide an opportunity for graduate students to further their knowledge of that language to complement work in their major disciplines. The graduate minor provides formal recognition of student achievement and expertise in one of the languages above. Graduate minor credits are also offered in Greek.

**Prerequisites**

Graduate students who wish to minor in one of the languages above must have 400-level proficiency in that language. When this is not the case, the student may be required to take a language course below the 400-level, which would not count towards the graduate minor requirements.

**Course Requirements**

For the M.A. or M.S.: Three courses in the language of the minor. No more than three credits may be in courses numbered 401, 402, and 403.

For the Ph.D.: Four courses in the language of the minor which must include at least one three credit course at the 500 level. No more than three credits may be in courses numbered 401, 402, or 403.

At least two courses for the M.A. and the Ph.D. minors must be taken in residence at Iowa State University. Papers written for these courses are expected to have a content and depth commensurate with the graduate status of the student.
INTERDISCIPLINARY PROGRAMS

Interdepartmental programs are available at both graduate and undergraduate levels. An interdepartmental program is an administrative structure usually not functioning as a department, ordinarily headed by a supervisory committee, and offering a degree with major(s) in that subject area. Interdepartmental programs have been officially approved and may offer courses.

See individual programs for information regarding admission and academic requirements.

Entrepreneurship Minor

Are you a problem-solver, innovator, or change maker? Do you want to make an impact in your community or change the world? By minoring in entrepreneurship, you can sharpen your creative thinking and problem solving skills, develop an entrepreneurial mindset, start your own business, develop a new product, or become an innovator in an established company. The interdisciplinary Entrepreneurship Minor was designed to complement any major area of study by introducing knowledge and skills needed to create value through recognizing and developing opportunities. Although the minor introduces some fundamental concepts from accounting, finance, marketing, and management, it does not attempt to substitute for any business courses in these areas.

Interdepartmental Undergraduate Minor

A minor in entrepreneurship is available to all undergraduate students at ISU. The minor requires at least 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students must follow college-specific rules in selecting courses. The college representatives to the supervisory committee will be responsible for advising students in their college, and will inform students about the details of the college rules. Students with declared majors have priority over students with declared minors in courses with space constraints.

Non-business students with an Entrepreneurship minor are not permitted to major in Entrepreneurship. Business students interested in entrepreneurship may choose to major in Entrepreneurship (https://catalog.iastate.edu/collegeofbusiness/entrepreneurship/#undergraduatemajor), or pursue the Entrepreneurship minor.

A student seeking a minor in entrepreneurship must successfully complete a minimum of 15 credits in courses approved for use in the entrepreneurship program, including the following:

Required Courses (6 credits):

<table>

<td>Social Entrepreneurship</td>
<td></td>
</tr>
</tbody>
</table>

ENTSP 310 Entrepreneurship and Innovation is the introductory course and provides an overview of the entire field.

ENTSP 313 Feasibility Analysis and Business Planning emphasizes developing an idea for a new venture, conducting a feasibility study, researching the potential market, analyzing the competition, and preparing a formal business plan.

ENTSP 320 Corporate Entrepreneurship, Innovation and Technology Management introduces and examines state-of-the-art approaches to product innovation and technology development in today’s large and established organizations.

ENTSP 410 Social Entrepreneurship discusses issues related to the role of social entrepreneurship in helping to solve social problems, including innovation, opportunity recognition, planning and the launch of new non-profit organizations.

Elective Courses (6 credits):

Select TWO entrepreneurship-oriented electives from an approved course list (see below). Students are encouraged to take electives within their major college.

Experiential Learning (3 credits):

Students will engage in the process(es) of entrepreneurship to earn experiential learning credits. Students will either take a course that has been designated as an experiential learning course, or use some other experiential learning activity as the basis to receive credits through an independent study.

Detailed information about the Entrepreneurship minor, the list of approved electives, as well as information about the experiential learning options are available online at: https://ivybusiness.iastate.edu/entrepreneurship-minor/

FOR IVY COLLEGE OF BUSINESS STUDENTS ONLY: Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only, and
Graduate Certificate

A graduate certificate in Entrepreneurship and Innovation offers post-undergraduate students the opportunity to learn the basics of starting a business. The certificate requires 4 courses (12 credits). The two required core courses are offered online by the Ivy College of Business. Elective courses are available across campus.

The graduate certificate in Entrepreneurship and Innovation focuses on strategies and resources for launching new ventures and helps students understand the role of innovation in entrepreneurship.

This interdisciplinary certificate provides a solid foundation in entrepreneurship and innovation through required core courses ENTSP 566 Entrepreneurship and New Venture Startup and MGMT 583 Formulating and Implementing Innovation Strategies. At the same time, the program enables students to follow their own interests through electives offered by partners across campus.

For more information about the graduate certificate in Entrepreneurship and Innovation, please visit: https://ivybusiness.iastate.edu/ei-certificate/

Contacts
Entrepreneurship Faculty and Advisors

Faculty and advisors in each college are available to answer questions about the Entrepreneurship minor and course requirements. Please visit the link below for the contact in your college.

Feed Technology Minor

The agricultural economy is heavily dependent on feed technology. The Midwest is one of the largest feed production and grain processing regions in the world. Feed manufacturing is also a global business with a growing demand for qualified technical professionals.

Feed technology includes the areas of grain handling and storage, animal nutrition, feed formulation, feed manufacturing, biosecurity, and feed safety and quality. The Feed Technology minor (15 credits) covers the breadth of all these topics so that you can:

- Understand animal nutrition, feed mill operations management and their application to feed quality, safety, and profitability;
- Identify chemical, biological and physical hazards in grain and feed;
- Know practical ways to monitor, manage and mitigate hazards in grain handling and feed manufacturing facilities; and
- Be familiar with the importance, scope and trends of the global animal feed industry.

The minor requires 15 credits and must include at least 9 credits that are not used to meet any other department, college, or university requirement. Below is the list of courses used in the minor.

Honors Program

Honors Program

The University Honors Program brings together some of Iowa State University’s brightest and most motivated students to take advantage of both intellectual and social opportunities. Honors scholars gain early exposure to research and leadership as well as benefit from creating an individualized educational path adding breadth and depth to their academic experience.

Students in the First-Year Honors Program (https://www.honors.iastate.edu/program/fhp/) typically enroll in five Honors credits in their first term (Engl 250H, Lib 160, Honors 121) and may opt to participate in the First-Year Mentor Program (https://www.honors.iastate.edu/program/fhp/first-year-mentor-program/), a two-credit research experience during their second term. In the University Honors Program, students receive a variety of academic opportunities to help them optimize their undergraduate experience. They create individualized programs of study with opportunities to incorporate independent study and research. Grants (https://www.honors.iastate.edu/scholarships/research-grants/) are available to support Honors student research. Students who complete their work in the University Honors Program receive a notation on their transcript.

All Honors students take at least two Honors courses and two Honors seminars (listed as HON 321-324), complete an independent research or creative project (https://www.honors.iastate.edu/program/uhp/project/), and maintain an overall GPA of 3.5 or higher. Most Honors requirements also fulfill requirements for graduation. Depending on the college of their primary major, students may need to fulfill additional requirements (https://www.honors.iastate.edu/program/uhp/college-reqs/).

Honors credit for a course (https://www.honors.iastate.edu/program/uhp/courses/) is denoted by an "H" on the transcript and can be earned
in the following ways: enrollment in an Honors section of a class, contracting an Honors Component within a class, enrollment in a 500-level graduate course.

Honors seminars (https://www.honors.iastate.edu/program/uhp/seminars/) are one- or two-credit special topic classes offered only to Honors students. With enrollment generally limited to 17 students, these seminars promote a crucial atmosphere of intellectual exchange and a high level of student involvement in learning.

Oversight of Honors students’ progress is carried out by the Honors Program staff in coordination with the undergraduate colleges. Each college’s Honors committee approves its students’ programs of study and project proposals. The University Honors Program Committee is responsible for the program’s curricular oversight. The Honors Program Office is located at 2130 Jischke Honors Building. For additional information, visit www.honors.iastate.edu or contact honors@iastate.edu.

HONORS PROGRAM
The Iowa State University Honors Program is designed for students who have demonstrated the ability and motivation to assume more than the usual responsibility for their undergraduate education. The program enables honors students to gain the maximum benefit from their undergraduate education. Students who graduate in the Honors Program receive the honors designation on their transcripts and diplomas.

Special educational opportunities. Students in the Honors Program determine their educational objectives and devise an individualized program of study to meet them. An honors program may include substitutions for required courses, a combination of courses from several departments to form a new major or minor, Honors courses or seminars, independent study and research, and other forms of innovation.

Other benefits. Members of the Honors Program have 24-hour access to the Jischke Honors Building as a quiet place to study, use the computers, and visit with other honors students. Students also have off-campus opportunities such as attending honors semesters and conferences. Members receive extended loan privileges at the Library, priority scheduling, and the opportunity to apply for research funds.

ISU students who have a cumulative grade-point average of at least 3.5 become eligible to apply for admission to the Honors Program during their second semester in residence and continue to be eligible as long as they have at least 48 semester credits remaining before graduation. Transfer students with a G.P.A. of 3.5 or higher and more than 60 credits remaining are also eligible to apply.

FIRST-YEAR HONORS PROGRAM
Entering first-year students with outstanding high school records and academic ability may be eligible to participate in the First-Year Honors Program (FHP). The FHP, which introduces students to an honors education, consists of honors sections of English 250 and Library 160, an FHP seminar, and honors advisors. Students may also choose to participate in the Honors Mentor Program, which introduces students to scholarship and research. Participants are matched with faculty members conducting research in an areas of mutual interest. Admission to the FHP is limited, and is based on past academic achievement, potential, and interest in an honors education.

Further information concerning the University Honors Program and the First-Year Honors Program can be obtained from the Honors Program Office, 2130 Jischke Honors Building or www.honors.iastate.edu (http://www.honors.iastate.edu).

HON 121: First-Year Honors Seminar
(0-2) Cr. 1. F.
Prereq: Membership in the First-Year Honors Program
Orientation to Iowa State University and to the University Honors Program. Offered on a satisfactory-fail basis only.

HON 290: Special Problems
Cr. arr.
Prereq: Membership in and permission of the University Honors Program
Independent study on topics of an interdisciplinary nature. Intended primarily for freshmen and sophomores. Offered on a satisfactory-fail basis only.

HON 290H: Honors
Cr. 1-2. F.S.
Prereq: Membership in and permission of the University Honors Program
Independent study on topics of an interdisciplinary nature. Intended primarily for freshmen and sophomores. Offered on a satisfactory-fail basis only.

HON 290U: Undergraduate Research
Cr. arr. F.S.
Prereq: Membership in and permission of the University Honors Program
Independent study on topics of an interdisciplinary nature. Intended primarily for freshmen and sophomores. Offered on a satisfactory-fail basis only.

HON 302: Honors Leadership Seminar
(1-2) Cr. 2. F.
Prereq: Selection as a leader of a First-Year Honors Seminar
For students serving as leaders of First-Year Honors Seminars, under faculty supervision. Development of teaching and leadership skills within the context of an Honors education experience. Offered on a satisfactory-fail basis only.
HON 321: University Honors Seminars
Cr. 1-2. F.
Prereq: Membership in the University Honors Program
Interdisciplinary seminars on topics to be announced in advance. Offered on a satisfactory-fail basis only.

HON 322: University Honors Seminars
Cr. 1-2. S.
Prereq: Membership in the University Honors Program
Interdisciplinary seminars on topics to be announced in advance. Offered on a satisfactory-fail basis only.

HON 323: University Honors Seminars
Cr. 1-2. F.
Prereq: Membership in the University Honors Program
Interdisciplinary seminars on topics to be announced in advance. Offered on a satisfactory-fail basis only.

HON 324: University Honors Seminars
Cr. 1-2. S.
Prereq: Membership in the University Honors Program
Interdisciplinary seminars on topics to be announced in advance. Offered on a satisfactory-fail basis only.

HON 490: Independent Study
Cr. arr. Repeatable. F.S.
Prereq: Membership in and permission of the University Honors Program
Independent study on topics of an interdisciplinary nature. Intended primarily for juniors and seniors.

Iowa Lakeside Laboratory
Interinstitutional Program
Iowa Lakeside Laboratory is run cooperatively by the Iowa Lakeside Laboratory Consortium whose members include Drake University, Iowa State University, the University of Northern Iowa, and the University of Iowa. Lakeside courses can be taken for credit through all Consortium members. Students should check with their advisors to determine whether Lakeside courses can be used to satisfy major or minor requirements or college or university general education requirements.

The Laboratory was established in 1909 for the conservation and study of the rich flora and fauna of northwest Iowa, especially those of the Iowa Great Lakes region with its numerous lakes, wetlands, and prairies. Its campus is located on approximately 140 acres of restored prairie, wetland, and gallery forest along the west shore of West Okoboji Lake. Lakeside’s mission is to provide undergraduate and graduate students an opportunity to get hands-on experience working with a variety of natural and human environments through its field-oriented summer courses and to provide research facilities and support for graduate students and faculty working on research projects in northwestern Iowa. Each summer, Iowa Lakeside Laboratory offers students a unique educational experience: small, full-immersion, field-oriented courses in the natural sciences (archaeology, ecology, environmental science, hydrology, evolution, geology, soils, taxonomy). All courses meet all day from Monday through Friday. The majority of courses run for 4 weeks. Enrollments in most courses are limited to 8 to 10 students.

Courses are taught at the undergraduate (sophomore and junior) and the senior/graduate level. Students obtain one credit for each week (40 hours) in class. One and two week courses are also available, including courses designed especially for teachers. Weather permitting, students normally spend at least part of each day doing field work, either as part of their class work or working on individual or group projects. Because some courses are offered intermittently, the current Iowa Lakeside Laboratory summer brochure or the Lakeside Lab Website (www.lakesidelab.org (http://www.lakesidelab.org)) should be consulted for the list of courses being offered in a given summer session. The Lakeside Lab Website (www.lakesidelab.org (http://www.lakesidelab.org)) also contains additional information about the Laboratory and about each course being offered.

Research projects by undergraduates, graduate students and faculty can be done either on the campus or at many nearby natural areas. Undergraduate and graduate students are strongly encouraged to do independent projects at Lakeside and graduate students are welcome to use it as a base for their thesis and dissertation research. Laboratory space and other facilities are available for long-term or short-term research projects.

Teaching and research facilities include eight laboratory buildings, a library, and a lecture hall. Living accommodations include cottages, motel-style units, and a large mess hall. All students are encouraged to stay at Lakeside while they are taking courses to take full advantage of its educational, professional, and social life.

Financial Aid
Iowa Lakeside Laboratory Scholarships are available to both undergraduates and graduate students. All scholarships cover room and board. Information about how to apply for Iowa Lakeside Laboratory Scholarships is included on the Website (www.lakesidelab.org (http://www.lakesidelab.org)). Students should also consult the Student Financial Aid Office for other scholarship, work study, and loan programs for which they are eligible.

Registration
Students can only enroll in Iowa Lakeside Lab courses by submitting an Iowa Lakeside Lab Registration and Scholarship form and Housing form to the Iowa Lakeside Laboratory Administrative Office. These forms are found on the Iowa Lakeside Laboratory Website:(www.lakesidelab.org (http://www.lakesidelab.org)).
Sustainability Minor

Overview of The minor in sustainability

Sustainability is often defined as "meeting the needs of today without compromising the ability of future generations to meet their own needs."

The minor in sustainability at Iowa State University is available to any ISU student who wants to further learn about sustainability issues affecting humans today and in the future.

The interdisciplinary minor in sustainability exposes students to ideas and issues related to a sustainable, balanced and ethical future for the planet and its inhabitants. The minor is at the interplay between environmental, social and economic factors in improving the quality of human life within the capacity of supporting ecosystems.

The minor will help students understand the dynamics of biological population growth and decline in the natural world, predator-prey models, over-exploitation of natural resources, energy balances, and much more. Students also will study how human behavior affects the natural world and the ability of earth to sustain life and understand how the decisions they make as consumers, workers, resource owners, citizens and policymakers affect human welfare in this and future generations.

Student Learning Outcomes

As a result of their coursework for the sustainability program students will be able to:

- articulate why some environmental, social and economic profiles are sustainable and others are not.
- apply sustainable practices in their personal and professional lives.

The colleges of Agriculture and Life Sciences, Design, Engineering, and Liberal Arts and Sciences sponsor the minor in sustainability.

Requirements for the minor in sustainability

The minor in sustainability may be earned by completing a total of 15 credits including two required courses and nine elective credits from an approved list. Of the nine elective credits, at least six credits must be at the 300 level or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Required courses:

- SOC 220 Globalization and Sustainability 3
- ANTHR 230 Globalization and the Human Condition 3

Emphasis Electives:

- A B E 325 Biorenewable Systems 3
- A B E 380 Principles of Biological Systems Engineering 3
- A B E 388 Sustainable Engineering and International Development 3
- A B E 480 Engineering Analysis of Biological Systems 3
- AGRON 120 Introduction to Renewable Resources 3
- AGRON 160 Water Resources of the World 3
- AGRON 342 World Food Issues: Past and Present 3
- AGRON 404 Global Change 3
- AGRON 450 Issues in Sustainable Agriculture 3
- ANTHR 336 Global Development 3
- ARCH 345 Building Science and Technology I 2
- ARCH 346 Building Science and Technology II 3
- ARCH 346L Building Science and Technology II Lab 2
- ARCH 347 Building Science and Technology III 3
- ARCH 347L Building Science and Technology III Lab 2
- ARCH 348 Building Science and Technology IV 3
- ARCH 348L Building Science and Technology IV Lab 2
- ARCH 445 Building Science and Technology V 2
- ARCH 558 Sustainability and Green Architecture 3
- ARCH 575 Contemporary Urban Design Theory 3
- ARCH 597 Seminar on the Built Environment III: Theory 3
- ARTIS 460 Sustainable Design and Fabrication of Furniture 3
- ARTIS 465 Artists, Designers and Sustainable Development 3

</table>
A strong and reputable basic science education during the first two years of the professional curriculum prepares veterinary students for a wide range of clinical experience during the last two years of the educational program. Fourth year students may choose to enhance their education by earning clinical elective credits at approved government agencies, research laboratories, veterinary practices and other university hospitals. Outstanding research programs in infectious diseases, food safety, neuroscience, immunoparasitology, evidence-based medicine, and many other areas provide opportunities for qualified students to participate in research.

Concurrent DVM/MS, DVM/PhD, DVM/MPH and DVM/MBA programs are available for qualified students who wish to obtain both veterinary and graduate degrees. Students must have a bachelor’s degree or a minimum of 128 semester credits in undergraduate and professional curricula in order to participate in the concurrent DVM/graduate degree program. Admission to the concurrent degree program is subject to the approval of the deans of the College of Veterinary Medicine and the Graduate College.

The college is an important recruiting center for employers seeking veterinarians for private practice; industry; educational institutions; international agencies; federal, state and local governments; the armed forces; departments of public health; zoological gardens; and other related fields of professional activity. Graduates are highly sought after and typically have multiple employment offers upon graduation. Career services and an online job board are available for students.

**Pre-veterinary Medicine Preparation**

**Admission Requirements**

The College of Veterinary Medicine seeks students with diverse backgrounds and encourages students to enroll in baccalaureate programs in the college of their choice. While a Bachelor’s degree is not required for admissions to the College of Veterinary Medicine, students must have a strong science foundation found in the required pre-veterinary coursework (https://vetmed.iastate.edu/future-dvm-students/apply-to-the-college/pre-veterinary-requirements/course/).

Veterinarians have varied career options. When deciding on an undergraduate major, the student should consider the area of veterinary medicine which interests them. For example, those who desire a career in clinical practice may wish to pursue a degree in biological science, animal science, agricultural economics, business, social science or humanities. Students with an interest in zoo or wildlife veterinary medicine may want to look at animal ecology, environmental studies or zoology. Future researchers may wish to consider genetics, molecular biology, microbiology, or biochemistry. Students who desire a career in public health (USDA, FDA, etc) or government (legislative/policy) may find benefit in any of the biological sciences or in political science. A degree in education may be valuable to those who envision themselves...
as educators in a College of Veterinary Medicine. These examples are only suggestions and are but a few of the many possibilities.

For the most current information regarding applications and admission to the College of Veterinary Medicine, please refer to the College web site at [www.vetmed.iastate.edu/](http://www.vetmed.iastate.edu/).

Applicants for admission to the College of Veterinary Medicine must have attended an accredited college or university and have completed 55 semester credits prior to the end of the spring term of the year in which the applicant seeks to be admitted to the College of Veterinary Medicine.

All science requirements should be fulfilled by the time of application or scheduled for completion by the end of the fall term in which the applicant applies. However, if necessary, the applicant may complete up to two required science courses after the fall term providing a transcript with the courses and grades listed is postmarked by July 1 of the year the applicant would enter. There is no maximum number of non-science required courses that may be completed but the deadline of having a transcript with these course grades posted by July 1 also applies. The July 1 deadline for transcripts and grades is firm.

Required courses must be completed with a grade of C (2.00) or better. A grade of C- (1.67) does not fulfill the requirement.

Credits earned must include the following Iowa State semester course offerings or their equivalents:

**English Composition 6 cr.**
One year of composition or writing emphasis courses. May include business or technical writing. Two of the following courses would fulfill the requirement.

- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3
- ENGL 302 Business Communication 3
- ENGL 309 Proposal and Report Writing 3
- ENGL 314 Technical Communication 3

**Oral Communications 3 cr.**
May include public speaking, interpersonal communication, group or organizational communication or speaking emphasis courses. One of the courses below will fulfill the requirement.

- SP CM 212 Fundamentals of Public Speaking 3
- AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences 3
- SP CM 312 Business and Professional Speaking 3
- COMST 214 Professional Communication 3

**General Chemistry with Laboratory** 7 cr.
One year series for science majors with one semester lab.

**Biochemistry** 3 cr.
One semester (no lab required). One of the courses below will fulfill the requirement. Must be metabolic biochemistry and cannot be biochemistry of proteins and enzymes alone.

- BBMB 301 Survey of Biochemistry 3
- BBMB 316 Principles of Biochemistry 3
- BBMB 404 Biochemistry I 3
- BBMB 420 Mammalian Biochemistry 3

**General Physics with Laboratory** 4 cr.
First semester of a two-semester series with lab. Must include mechanics, fluids, heat and thermodynamics, vibrations, waves and sound. The second semester of Physics will not fulfill this requirement.

Genetics * 3 cr.
Must include Mendelian and molecular genetics. A general genetics course is preferred, but animal breeding/livestock improvement courses will be accepted. One of the courses below will fulfill the requirement.

- BIOL 313  Principles of Genetics  3
- GEN 320  Genetics, Agriculture and Biotechnology  3
- AN S 352  Genetic Improvement of Domestic Animals  3

Mammalian Anatomy or Physiology* 3 cr.
Human anatomy or physiology will also fulfill this requirement (no lab required). Must be an overview of all organ systems. If you take an Anatomy and/or Physiology I course, you must also take the second course, Anatomy and/or Physiology II, in order to fulfill the requirement. One of the courses below will fulfill the requirement.

- B M S 329  Anatomy and Physiology of Domestic Animals  3
- B M S 447  Introduction to Human Gross Anatomy  4
- B M S 538  Principles of Physiology  4
- AN S 214  Domestic Animal Physiology  3
- BIOL 155  Human Biology  3
- BIOL 255  Fundamentals of Human Anatomy  3
- BIOL 335  Principles of Human and Other Animal Physiology  3
- BIOL 351  Comparative Chordate Anatomy  5

Humanities or Social Sciences 6 cr.
Electives 8 cr.
Total Credits Required 60 cr.

Courses above marked with an asterisk (*) are the required science courses. The required science course GPA is calculated from these courses.

Credits in the previously specified courses will normally be earned on the traditional four-letter grading system with A as the highest grade and D as the lowest passing grade. All required courses must be completed with a grade of C (2.0) or better. It is generally expected that required courses have been completed within the past eight (8) years. AP or CLEP credits must be documented by original scores submitted to the College of Veterinary Medicine. CLEP credits may be accepted only for arts, humanities and social sciences. Credits in the preceding specified courses will not be accepted if earned under the pass-not pass grading system or similar options. Please see COVID-19 exceptions (https://vetmed.iastate.edu/sites/default/files/COVID-19-ImpactStatementRevised-10-23-2020.pdf).

Application and Admission
Applicants must apply using the Veterinary Medical College Application Service (VMCAS). The VMCAS application may be found online at the VMCAS website (https://www.aavmc.org/becoming-a-veterinarian/how-to-apply/).

Those applying through VMCAS also need to complete the ISU Supplemental Application (https://vetmed.iastate.edu/future-dvm-students/apply-to-the-college/application-requirements/supplemental-application/) found at the College of Veterinary Medicine website. The deadline for filing the VMCAS and Supplemental Application is typically mid-September.

A list of courses in progress at the time of submission and/or scheduled for completion by the end of spring term should be entered in the VMCAS application. Undergraduate college credits must average at least 2.50 on a 4.00 marking system for the application to be eligible for review. The preceding scholastic requirements are minimum and do not assure admission even though these requirements have been fulfilled.

Admission to the College of Veterinary Medicine is on a competitive and selective basis. GPA, animal, veterinary, research and other employment experiences, essays, recommendations and personal development (leadership, citizenship, volunteerism, etc.) are given consideration in the selection of candidates.

Approximately 60 positions are reserved for Iowa residents. The remaining positions are allotted to the following: Professional Program in Veterinary Medicine with the University of Nebraska-Lincoln (∼26), contract with the State of North Dakota (∼4) and the non-resident applicant pool (∼71). The non-resident applicant pool includes international applicants. Consideration is given equally to all applicants without regard to race, color, national origin, gender, religion, disability, or age, political beliefs, or marital or familial status.

For further information on these programs and contracts, please visit the College of Veterinary Medicine at https://vetmed.iastate.edu/future-dvm-students/.

Curriculum in Veterinary Medicine
Graduation Requirements
To be awarded the degree doctor of veterinary medicine, candidates must have passed all required courses in the curriculum in veterinary medicine, earned a minimum 2.0 grade-point average in the veterinary medicine curriculum, and earned at least 4 elective credits during the VM1-3 years. Candidates must also have given a grand rounds presentation (VC S 495 Grand Rounds Presentations).

## Fourth Year

The fourth year of the veterinary medical curriculum is designed to be flexible yet provide a broad based clinical education involving all domestic species of animals. All students participate in rotations that are considered fundamental to any species orientation that the student might choose. In addition, students choose one of four options for additional study, including the Small Animal, Equine, Mixed Animal, or Food Animal Options. Students may obtain clinical elective credits by repeating on-campus rotations or participating in approved off-campus preceptorships at government, private or public agencies; other universities; or private veterinary practices.

The following rotations are required of all fourth year students in addition to the requirements of the track they choose. A complete listing of track-specific requirements can be found at: http://vetmed.iastate.edu/:

## Reinstatement

Any student who voluntarily withdraws from the College of Veterinary Medicine or who is dismissed from the College of Veterinary Medicine, after having successfully completed one or more semesters forfeits his/her standing and must make written application for reinstatement to this college a minimum of 60 days prior to the opening of the semester for which they seek to re-enter. Any student who voluntarily withdraws from the College of Veterinary Medicine prior to completion of one semester must re-apply for admission to the college in the general applicant pool.
functional activities of cells, tissues, organs, and body systems relevant to veterinary medicine.

An understanding of drug action is essential for rational drug therapy. The general pharmacology courses provide students with a background in basic pharmacology to include pharmacodynamics, toxicology, and the clinical application of drugs. Special emphasis is placed on chemical agents and therapeutic practices specific to veterinary medicine.

**Graduate Programs**

The department offers Master of Science and Doctor of Philosophy degrees with a major in Biomedical Sciences and specializations in Anatomy, Physiology, Pharmacology, and Cell Biology. Up to 10 credits of dual-listed veterinary courses may be applied for major graduate credit.

The objective of the department is to prepare graduate students for successful careers in biomedical research and professional service. The department is part of interdepartmental programs in neuroscience, toxicology, and molecular, cellular, and developmental biology. The combined Ph.D./DVM program is an option offered by the department.

Departmental research facilities allow for training in experimental anatomy, pharmacology, and physiology. Graduate studies are supervised by faculty members recognized in their areas of expertise. Current areas of research include: Alzheimer’s disease, aquatic animal health, calcium and mineral homeostasis, diabetes mellitus, glia-neuron signaling, neurophysiology of pain, neurotoxicology, physiology and pharmacology of nematode ion-channels, Parkinson’s disease, pharmacology of schistosomiasis, pharmacology of salmonellosis, physiology and pharmacology of thalamic neurons, physiology of the retina, Spinal Muscular Atrophy, and study of neural stem cells.

**Pharmacology and Toxicology Minor**

**Pharmacology and Toxicology - Undergraduate Minor**

The interdisciplinary pharmacology and toxicology minor is intended to significantly increase the number of ISU graduates who can:

- Understand, use and define key terms and concepts related to pharmacology and toxicology;
- Apply concepts and standard practices in pharmacology and toxicology to solving practical problems relevant to these fields;
- Analyze scientific data in pharmacology and toxicology;
- Synthesize detailed and accurate descriptions of current knowledge on key topics in pharmacology and toxicology;
- Make informed decisions about current controversies in pharmacology and toxicology, using appropriate scientific methods and ethical reasoning.

The minor in Pharmacology and Toxicology may be earned by completing the following courses. All minors require at least 15 credits; 9 credits of the courses listed in the minor must not be used to meet any other department, college, or university requirement except the credit requirement for graduation. There are three required courses for all Pharmacology and Toxicology undergraduate minors: TOX 401, B M S 439, and one physiology course selected from B M S 329, B M S 438 or BIOL 335. The remaining credits are fulfilled by any of the electives listed below.

**Required Core Courses:**

Veterinary Clinical Sciences

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The curriculum of veterinary clinical sciences explores the preventive health care, and diagnosis and treatment of diseases of companion and competitive athletic animals. Veterinary specialists lead didactic and laboratory based learning in the clinical sciences. Experiential based courses conducted through the Veterinary Medical Center during the fourth year provide the student an opportunity to participate in the application of clinical skills and knowledge.

Graduate Study

The department offers work for the degree master of science with major in veterinary clinical science, and minor work for students majoring in other departments. Within the veterinary clinical sciences major, the student may specialize in veterinary medicine, surgery, or theriogenology. The D.V.M. degree or equivalent is prerequisite to a major graduate work.

Both thesis and nonthesis options are available and require the completion of a minimum of 30 graduate credits and a final examination.

World languages and cultures requirements may be established by the student’s program of study committee.

Veterinary Diagnostic and Production Animal Medicine

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

Courses in veterinary diagnostic and production animal medicine provide students with basic and advanced skills in diagnostics, reproduction, medicine, surgery, production, welfare, and health management of the major livestock species. Students in the fourth year of the curriculum in veterinary medicine may elect to take advanced courses in beef, dairy, swine, poultry or small ruminant production medicine. Elective courses may include preceptorships in private practices, at other veterinary schools, in research and disease control laboratories, or in related agribusinesses.

Production animal medicine emphasizes the integration of veterinary medicine with nutrition, genetics, economics, food safety, and other disciplines, enabling graduates to acquire and use a broad knowledge base to support the health and improve the production and efficiency of the food supply chain.

Graduate Study in Veterinary Preventive Medicine

Veterinary Preventive Medicine is a multidisciplinary program focused on the study of health and disease in populations. The various disciplines represented in the program are unified by a common approach based on the application of epidemiological methods to problem solving in populations. Through their research and course work, students will learn to understand and apply a variety of disciplines, principles, and techniques to population health issues involving environmental, ecological, nutritional, genetic, infectious, or non-infectious diseases.

Graduate study in Veterinary Preventive Medicine will provide valuable skills and experience to persons interested in public health, food safety, emerging infectious diseases, zoo or wildlife health, and livestock health. A degree in Veterinary Preventive Medicine may be valuable for individuals considering a future in the biological or pharmaceutical industries, government regulatory agencies, public veterinary practice, international service agencies responsible for population health or progressive private practice.

Veterinary Preventive Medicine is an interdepartmental major administered by the Department of Veterinary Diagnostic and Production Animal Medicine (VDPAM) with participating faculty from colleges and departments across the University and collaborators from the National Animal Disease Center (USDA:ARS) and the National Veterinary Services Laboratories (USDA:APHIS) located in Ames, Iowa.

Both thesis and non-thesis options are available and require the completion of a minimum of 30 graduate credits for thesis and 36 graduate credits for non-thesis and a final examination.

Program of Study: Master of Science in Veterinary Preventive Medicine (Thesis Option) 30 credits

Graduate Certificate in Veterinary Preventive Medicine

Veterinary Diagnostic and Production Animal Medicine offers a graduate certificate for DVMs, concurrent DVM students and non-DVMs in allied animal industries in Veterinary Preventive Medicine.

Students in this program are able to select courses that focus in areas of animal welfare, diagnostics, food safety, evidence-based medicine, surgery, pathology, microbiology, epidemiology, public health, statistics and production medicine.

The purpose of the graduate certificate in Veterinary Preventive Medicine for industry professionals is to address the continued and advanced needs of animal health professionals. The certificate enables professionals to gain recognition for a skill set that includes epidemiology, risk assessment, production medicine and animal welfare. A graduate certificate may be used to increase knowledge in a new or emerging area of interest to the candidate. As such, it may be used to formally gain recognition for retraining to meet the needs of today’s food production systems.

The graduate certificate for concurrent DVM students is designed to give additional skills to students planning on working with populations of animals. Using a combination of on-line and dual listed graduate level courses, the program is designed to enable DVM students to complete the certificate while studying for their DVM degree. Students enrolled in any US-based DVM program are able to complete a graduate certificate at ISU using a combination of on-line and transfer graduate level courses.

The graduate certificate is an additional qualification awarded by Iowa State University after successful completion of 15 graduate level credits. A graduate certificate is different from continuing education as the certificate includes an academic transcript from Iowa State University. Students complete the same courses graduate students do with the same expectations for all assignments and exams.

The program is available as a strictly on-line (off campus) delivery method or as a combination of classroom-based and on-line course offerings providing maximum flexibility in scheduling.

Veterinary Microbiology and Preventive Medicine

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The Department of Veterinary Microbiology and Preventive Medicine provides instruction on pathogenic bacteria, fungi, and viruses and their interaction with host animal species. Principles and applications of infectious diseases, immunity to disease, diagnostic methods for infectious diseases, and vaccinology are covered. Principles and applications of epidemiology, public health, preventive veterinary medicine, regulatory veterinary medicine and food safety are also emphasized.

Graduate Study

The department offers opportunities for the degree doctor of philosophy with a major in veterinary microbiology. A specialization in preventive medicine is an option for this degree. Graduates in the Veterinary
Microbiology and Preventive Medicine programs have a broad understanding of the fundamental processes involved in infectious diseases, pathogenesis and immunology. They are able to effectively establish research programs, which involve complex biological systems and disease syndromes. They are also prepared to address microbial-based social, ethical and environmental problems. Graduates acquire effective written and oral communication skills which lead to successful research and teaching careers in the medical and veterinary sciences. The department also offers work towards the master of science with majors in veterinary microbiology or veterinary preventive medicine. A non-thesis master’s option is available for majors in preventive medicine. Courses are open for students majoring in other graduate programs.

Prerequisite to graduate study is completion of coursework in general microbiology, biology, biochemistry, mathematical sciences, and physics. Candidates for the majors in veterinary microbiology should possess an undergraduate degree in biomedical science with emphasis in medical microbiology or the D.V.M. degree. Candidates for the major in preventive medicine should possess the D.V.M. degree.

The department also participates in the interdepartmental majors and programs in genetics, immunobiology, and MCDB (molecular, cellular, and developmental biology; see Index).

Each graduate student must demonstrate proficiency in English composition within two semesters in residence.

**Veterinary Pathology**

**Professional Program of Study**

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The Department of Veterinary Pathology offers a systematic study of basic disease mechanisms with emphasis on the changes in gene expression, cells, tissues, organs, and body fluids associated with disease. The theory and practice of veterinary pathology, veterinary clinical pathology, veterinary parasitology, veterinary toxicology, and related disciplines provide the basis for accurate diagnosis and a rational approach to the treatment and prevention of animal diseases.

**Graduate Study**

The department offers work for the degree master of science and doctor of philosophy with a major in veterinary pathology. The majority of students choose an area of specialization in veterinary anatomic pathology, veterinary clinical pathology, or veterinary parasitology (http://vetmed.iastate.edu/vpath/academics/graduate-program (http://vetmed.iastate.edu/vpath/academics/graduate-program/)). The master of science degree is available on a thesis or nonthesis basis in the veterinary pathology major with or without an area of specialization.

For the ACVP training track (residency) of the anatomic or clinical pathology graduate program designed to train veterinary pathologists, the student must have a funded position within the Department of Veterinary Pathology. If the student does not have a funded position or is not enrolled in the departmental degree program, enrollment in courses pertaining to the residency program and activities that support the residency program must have the approval of the Department Chair of Veterinary Pathology and the head of the departmental residency training program.

Graduates have a broad understanding of the mechanistic basis of disease pathogenesis. They are able to communicate with clinicians, other scientists, and other colleagues on scientific matters, and with the general public on related science policy matters. Graduates are able to address complex problems facing the agricultural and biomedical sciences, and comparative medicine, and are able to make appropriate diagnoses and investigations of animal diseases. They consider ethical, social, legal and environmental issues, and are skilled at carrying out research, communicating research results, and writing concise and competitive grant proposals.

Collaborative work is recommended in other departments in the College of Veterinary Medicine or departments or programs in other colleges. The department participates in the interdepartmental programs in Immunobiology (www.immunobiology.iastate.edu/ (http://www.immunobiology.iastate.edu/)), Toxicology (www.toxicology.iastate.edu/ (http://www.toxicology.iastate.edu/)), Genetics (www.genetics.iastate.edu/ (http://www.genetics.iastate.edu/)), and Molecular, Cellular, and Developmental Biology (www.mcdb.iastate.edu/ (http://www.mcdb.iastate.edu/)).

A veterinary degree (doctor of veterinary medicine or equivalent) is required for training in Veterinary Anatomic Pathology and Veterinary Clinical Pathology. Other specializations do not require the veterinary degree. A minimum score of 550 paper-based (213 computer-based; 79 internet based) is required on the TOEFL examination for students whose native language is not English. A foreign language requirement will be determined by the student’s program of study committee with the approval of the departmental chair. The Graduate English Examination is a graduate college requirement for native English speakers.

The M.S. thesis degree in veterinary pathology, with or without an area of specialization, requires a minimum of 30 graduate credits. Following completion of all other requirements, a comprehensive final examination is administered covering all graduate work including the thesis. The examination is typically oral, but a written component may be specified by the program of study committee. The degree candidate must submit a thesis, including at least one manuscript suitable for publication, to the
committee members and departmental chair at least two weeks prior to the final examination. The departmental requirement for graduate courses includes:

3 credits of basic biological sciences (biochemistry, genetics, cell biology)

† Arranged with instructor.

The M.S. nonthesis degree in veterinary pathology, with or without an area of specialization, requires a minimum of 40 graduate credits including at least 10 graduate credits earned outside the department. Every nonthesis master's degree program requires evidence of individual accomplishment demonstrated by completion of a creative component, special report, or scientific study. A minimum of 3 credits of such independent work (V PTH 599 Creative Component Research) and a practical diagnostic examination (V PTH 606 Diagnostic Interpretation) corresponding to the area of specialization are required on every program of study. The final examination is comprehensive and consists of written and oral questions. The departmental requirement for graduate courses includes those for the M.S. thesis degree plus additional courses corresponding to the area of degree emphasis of specialization. Contact the department for a more complete list of requirements and information on areas of specialization.

The Ph.D. degree in veterinary pathology, with or without an area of specialization, requires a minimum of 72 graduate credits including at least 12 graduate credits earned outside the department. The preliminary examination, consisting of written and oral components, is comprehensive and not restricted to the content of graduate courses. The degree candidate must submit a dissertation, including at least two manuscripts suitable for publication, to the committee members and departmental chair at least two weeks prior to the final examination. The final examination is primarily a defense of the dissertation, but it may include questions on other areas of specialized knowledge. The department also offers a combined DVM/Ph.D. program designed for completion of courses for the Ph.D. degree in Veterinary Pathology simultaneously with study in the professional curriculum in the College of Veterinary Medicine. Contact the department for a more complete list of requirements for the Ph.D. degree and information on areas of specialization.
The degrees master of arts, master of science, and doctor of philosophy are research oriented. In many fields master’s degrees are also awarded without a thesis, but a written report of independent study, called a creative component, is generally required. Coursework only degrees are available for those individuals interested in advanced study directed toward meeting vocational or professional objectives. Information on available for those individuals interested in advanced study directed toward meeting vocational or professional objectives. Information on the creative component, is generally required. Coursework only degrees are available for those individuals interested in advanced study directed toward meeting vocational or professional objectives. Information on other types of Master’s degrees can be found in the Graduate College Handbook, Appendix E (https://www.grad-college.iastate.edu/handbook/appendix.php?id=E).

The Graduate College Handbook (https://www.grad-college.iastate.edu/handbook/) lists policies and procedures of the Graduate College.
extended to members of the research, instructional, or extension staffs at the rank of assistant professor with approval of the college dean and the Dean of the Graduate College. Staff members at the rank of professor or associate professor cannot become candidates for graduate degrees from ISU.

Distance Education
Iowa State offers many graduate degree and certificate programs off-campus. For a listing of the degree programs, registrations for courses, and more information about distance education, consult the Iowa State University Web site at http://www.distance.iastate.edu (http://www.distance.iastate.edu/).

Other information about graduate requirements is available in the Graduate College Handbook at http://www.grad-college.iastate.edu/publications/gchandbook/homepage.html. (http://www.grad-college.iastate.edu/publications/gchandbook/homepage.html)

Graduate Courses Taken by Undergraduates
Certain graduate-level courses listed in the ISU Catalog may be used in the program of study even though they were taken for undergraduate credit by the student as an undergraduate at Iowa State University.

The following conditions must be met:

1. With approval of the student’s Program of Study Committee, up to 6 graduate credits a student earned as an ISU undergraduate may be used to meet the requirements of the graduate degree.
2. Grades of B or better are required in the courses that led to these credits.
3. These credits must have been earned when the student was classified as an undergraduate, not as a nondegree undergraduate (special) student.
4. These credits could have been used to meet undergraduate degree requirements.
5. For students in concurrent undergraduate and graduate status, these credits (up to 6) may be in addition to the 6 credits identified on the Transfer of Courses for Concurrent B.S./Graduate (http://www.grad-college.iastate.edu/common/forms/) form.

Courses Taken as a Nondegree Undergraduate Student
A person classified as a “nondegree undergraduate” student may not use courses taken under that status in a graduate degree program. A student who has received the baccalaureate degree must register as a graduate student if they are to receive graduate credit for courses.

Graduate Majors
A complete list of all graduate majors can be found on the Graduate College website, https://www.grad-college.iastate.edu/academics/programs/apprograms.php, with links to admission requirements and program websites.

The Graduate College oversees the admission of students to pursue a graduate degree or credential or to take graduate courses in nondegree student status. The Office of Admissions and the various graduate programs partner with the Graduate College to sustain an admissions process that respects institutional standards and the diverse needs of faculty and students across all realms of advanced study and scholarship. The Graduate College sets baseline admission requirements for the university and makes admission decisions. Graduate programs share specific admissions requirements to prospective students via their websites and the Graduate College Program Pages (https://www.grad-college.iastate.edu/academics/programs/apprograms.php).

Application process
All application materials for graduate study are submitted via the online application.

The Graduate College establishes dates to open and close applications for particular academic terms. Graduate programs may establish deadlines earlier than the date on which the application closes by which applicants must submit all required materials to be considered for admission.

Departments and programs convey recommendations concerning admission to the Graduate College. Final decisions regarding admission rest with the Dean of the Graduate College. The Graduate College, or the Office of Admissions acting on behalf of the Graduate College, will seek to ensure the authenticity of application materials. Graduate programs are expected to uphold ethical practices as they evaluate applicants by using principles of holistic review. Official letters to applicants to report the outcomes of their applications are sent from the Dean of the Graduate College.

Application requirements
Required Application Documents

1. Online graduate application
2. Unofficial transcripts from all previously attended institutions for undergraduate and post-baccalaureate study
   a. Official transcripts are only required from applicants admitted to the Graduate College. Electronic copies provided by the applicant are not considered official.
3. Applicants whose first language is not English must submit a valid, official test report from the Test of English as a Foreign Language (TOEFL) or from an approved alternative examination. Applicants
who otherwise would need to submit scores are exempt if they hold baccalaureate or higher degrees from countries where the only official language is English.

4. A statement of purpose for each major to which the applicant is applying.

5. Additional documents such as letters of recommendation, résumé/curriculum vitae (CV), statement of purpose, writing samples, publications, portfolio, etc. may be required by programs.

**Admission standards and requirements**

A baccalaureate degree, or equivalent from a suitably accredited college or university is required. Evidence of a conferred baccalaureate is needed by the start of the second semester of graduate study. Any exceptions to this admission standard must be approved by the Dean of the Graduate College.

A cumulative grade point average of 3.00 on a 4.00 scale, or equivalent, in undergraduate work or in previous graduate work is expected. Recommendations from graduate programs to admit applicants who do not meet this standard will be reviewed by the Graduate College. The GPA may also be met through one of the following:

- Undergraduate degree with GPA greater than 3.00 (on a 4.00 scale)
- Completed 9 to 14 credits of graduate coursework with grade B or better in all courses
- Completed 15 or more credits of graduate coursework with GPA above 3.00 and no F grades

Minimum scores for tests of English are shown below. Graduate programs may set higher minima for applicants to their programs.

Students whose first language is English or those who earned degree from countries where the only official language is English are exempt from the language proficiency requirements.

Applicants whose native language is not English must demonstrate proficiency in English equivalent to a Test of English as a Foreign Language (TOEFL) score of at least 550 on the paper-based test, or 79 on the internet-based test as a part of the admissions process. International students may also submit IELTS (International English Language Testing System) scores in lieu of the TOEFL. The ISU Graduate College minimum is 6.5.

**Special applicants**

**Non-degree seeking** - Nondegree seeking graduate students are those who are not seeking a graduate degree. There is a limit to the number of courses taken in this status that may be used to satisfy graduate degree requirements. Non-degree seeking students are not eligible for financial aid.

**Re-admission** - Previous applicants to the Graduate College who did not enroll within one academic year of admission must submit a new application and pay the required fee because the prior application is no longer valid.

**Re-entry** - Applicants who previously were active students within the Graduate College, have not registered for four or more consecutive fall and spring semesters, and seek readmission to the same degree program should submit a re-entry application through the reinstatement process.

**In-Session** - Current graduate students who seek to pursue additional graduate degrees should complete an in-session status change application. The DOGE or DOCS (or designee) is responsible for approving the admission to the new major and submitting the form to the Graduate College.

**Registration**

Registration processes are administered through the Office of the Registrar. Policies regarding tuition, fees, and residency should be directed to the Registrar.

All students who attend classes at ISU must register and pay assessed tuition and fees. The ISU Office of the Registrar’s website at http://www.registrar.iastate.edu/ is the official source of information about registration for all students at ISU. Specific dates for registration are listed:

- on the Registrar’s Web page,
- on the University Calendar, and
- in the Iowa State Daily

Registration for summer session should be completed during the spring at the same time as registration for fall semester. All students are encouraged to register for courses on the Web through AccessPlus. Detailed instructions are provided at http://www.registrar.iastate.edu/students/registration.

For complete information on registration, see the ISU Schedule of Classes or the Registration Web site at http://www.registrar.iastate.edu/students.

**Full-Time Status**

During the academic year, graduate students not on assistantship must be registered for a minimum of nine credits to be considered full-time students or five credits to be considered half-time students. Students on an assistantship appointment during the academic year are considered full-time.
CREDIT LIMITS

Registration in credit courses is limited to a maximum of 15 credits per semester (10 credits for summer session) for graduate students, per Board of Regents. See the Graduate College Handbook Ch.2.1.2 (https://www.grad-college.iastate.edu/handbook/chapter.php?id=2) at for more details.

Doctoral Post Prelim (Required Registration)

Even when Ph.D. graduate students have completed coursework, they are required to register and pay tuition and fees after successfully passing their preliminary oral examination, whether or not university facilities and equipment are used or staff is consulted—either in person or in absentia.

After the preliminary oral examination is passed (with either full or conditional pass) and if university facilities, equipment, and staff time are used, the Ph.D. candidate must register for the appropriate number of credits in the major program and pay the appropriate graduate tuition and fees. The Ph.D. candidate may register for GR ST 681 Required Registration and pay the Doctoral Required Registration tuition and fees if all other coursework is completed.

The Ph.D. candidate must be aware that registration for GR ST 681 is allowed only after the Ph.D. candidate passes the preliminary oral examination; is required only in the fall and spring semesters, and not during the summer term; is not allowed after the completion of the final oral examination; and does not defer student loans.

If students take the final examination during the interim between terms (including the first day of classes), registration can be for the term either before or after the examination is held.

Auditing

Audit registration means taking courses without receiving formal credit. Audit provisions are as follows: Instructors must approve ALL audits; students must register for audits by day 10 of the semester; changes to or from an audit must be made in the first 10 days of the semester; students are assessed tuition and fees as though they were taking the course for credit; and the course DOES NOT count in determining full-time student status.

Audited courses do not appear on the student’s permanent record unless the “Request for Audit(s) to Appear on Transcript” form is completed and signed by the student, course instructor, and major professor. Copies of this form, which are available from the Graduate College or from the Graduate College’s web site at https://www.grad-college.iastate.edu/student/forms/ must be filed with the Graduate College, 1137 Pearson Hall.

After the fifth class day, if a student changes a regular course to an audit, that course will appear on the student’s permanent record as a drop. Audits are not acceptable as registration for loan deferments or for meeting visa requirements.

Grading

Grades are the permanent official record of a student’s academic performance. Iowa State uses A through F grading for most courses. S, P, and NP grades are given in some courses. The standard four-point scale is used to calculate a grade point average.

Grade Point Average (GPA)

All courses taken as a graduate student will be calculated into the graduate GPA, except for Creative Component/Research (599 and 699) credits, which are not used in the calculation of the GPA. The GPA is determined by dividing the number of grade points earned by the total number of ISU cumulative hours. The grade given when an incomplete (I) is resolved is figured into the cumulative grade point average, but not into a particular semester’s average. Marks of I, S, P, NP, T, and X are not counted in the grade point average; a mark of F (even if taken S/F) is counted in the grade point average. In the case of repeated courses, only the grade achieved the most recent time the course is taken is used in computing the grade point average. (However, grades in courses that are noted as repeatable courses in the catalog, such as certain repeatable seminars, will all be used in calculating the grade point average.)

Grading Research and Creative Component Credits

Creative Component/Research credits may be graded as A, B, C, D, I, S, or F. Plus and minus grades are optional. These credits are not calculated in a student’s GPA.

Pass (P)/Not Pass (NP) Course Credit

Pass/Not Pass courses are those that a student, with the approval of the major professor, may take for personal enrichment, but not for satisfying prerequisites or deficiencies in the undergraduate background. P/NP marks may not be used in a POS (except for the Spring 2020 semester), nor do P/NP marks contribute to the student’s GPA. Full credit for P/ NP courses is used in calculating tuition assessment and credit load limitations. For more information, see the Graduate College Handbook.

Satisfactory/Fail (S/F) Grading

S/F grading is not the same as P/NP grading. S/F grading is by instructor option; all students in a particular course receive S/F grading. P/NP grading is generally a student option. A P mark is equivalent to at least a C grade whereas an S mark is equivalent to at least a B grade at the graduate level. No special registration procedures are required for S/F grading. An S mark in a course taken S/F is not counted in the grade point average, but an F mark in a course taken S/F is counted in the grade point average and is equivalent to an F in a regularly graded (A-F) course. No more than 20 percent of the total credits (excluding creative
Grievances about Grades
A graduate student who feels that a course grade has been unjustly assigned, and whose attempts to resolve the matter with the instructor have failed, may appeal through the grievance procedures described in Ch.9.5.1. of the Graduate College Handbook (https://www.grad-college.iastate.edu/handbook/chapter.php?id=9#9.5).

Probation
If a graduate student does not maintain a cumulative 3.00 grade point average on all coursework taken, exclusive of research credit, they may be placed on academic probation by the Dean of the Graduate College. Grades earned by graduate students in undergraduate courses are included in the calculation of the grade point average. Academic probation judgments are made on the basis of grades in coursework only. New, first-term, degree seeking graduate students who fall below a 3.00 GPA at the end of their first semester will be given a one term grace period to bring their grades back to a 3.00 GPA. These students will receive a warning letter from the Graduate College.

While on academic probation a student will not be admitted to candidacy for a degree and, if appointed to a graduate assistantship, the student will not receive a graduate tuition scholarship unless approval is given by the student’s home department’s academic college. If a student is to qualify for a tuition scholarship, they must be removed from probation by the tenth class day of the term.

To ensure that registration does not take place without a review by the program, the Graduate College places a hold on future registrations by a student on probation. Before the student registers for each term, the program must review the student’s record and recommend in writing if the Graduate College should permit further registration. Before graduation is approved, the student must complete all courses listed on the program of study with a minimum grade of C and have achieved a 3.00 GPA or greater.

Oral english certification test - teaching assistantships
New teaching assistants (TAs) whose native language is not English are evaluated for their ability to communicate effectively in English before their assistantship assignments are made. The Oral English Certification Test (OECT) are given before the beginning of each semester. The testing dates are announced on the International Teaching Assistants (ITA) program website. Registration for the test is held online through links posted on the ITA program homepage, https://cce.grad-college.iastate.edu/speaking/english-180-courses (https://cce.grad-college.iastate.edu/speaking/english-180-courses/), two to three weeks before the test is administered. TAs and faculty with questions about OECT testing should contact the Center for Communication Excellence (CCE) in the Graduate College. A prospective teaching assistant who does not pass these tests is required to successfully complete coursework and be retested. English 180 is a series of communication courses designed to help new teaching assistants. Students focus on pronunciation, listening, question-handling, teaching and lecturing skills, and analyzing the culture of U.S. university life. Because enrollment is restricted, TAs cannot register for the courses online through AccessPlus. TAs must go to the CCE, 1137 Pearson Hall, immediately after they receive the test scores to obtain permission to enter the course by completing a course add slip.
Changes in graduate program or status

Students who have been admitted to a graduate program and to the Graduate College may request to transfer at a later date to another major or degree. Because graduate students are admitted to particular programs, transfers require the approval of both the receiving program and the Graduate College. Students seeking transfer to another major or degree should first discuss their wishes with the new program DOGE (Director of Graduate Education) to determine requirements and interest by the new program. When a student receives a favorable preliminary response from the new program, they should fill out the student portion of the "Transfer From One Major/Degree/Certificate to Another" form and submit it to their current DOGE. The current DOGE will fill out the Current Program Information adding any comments they believe the new program should consider and forward the form to the proposed new program. This form is available from the Graduate College website at https://www.grad-college.iastate.edu/student/forms/.

The receiving program will generally give the student the same consideration and employ the same admissions standards that are used for original applications for admission and will expect the same application materials (transcripts, letters of recommendation, test scores, etc.). During this process, the new and old programs and the Graduate College are authorized and encouraged to seek and disclose information related to the student's overall fitness for studies in the receiving program. Programs are authorized to inquire into the student’s prior conduct at the university, both with the prior program and with the Dean of Students.

Upon program action (acceptance or denial), the request to transfer form must be sent to the Graduate College for approval. Students desiring to transfer from a degree-seeking status to a nondegree-seeking status need to fill out the "Transfer From One Major/Program/Department to Nondegree" form available at https://www.grad-college.iastate.edu/student/forms/ and send it to the Graduate College. Students desiring to transfer from nondegree-seeking status to a degree-seeking status must be admitted by a program through the regular graduate admission process. Students who are in interdepartmental majors should complete the Home Department form to change departments.

Curriculum Change from Active Graduate to Active Undergraduate Status

Individuals who are in good standing in the Graduate College and who wish to transfer to an undergraduate curriculum must contact the graduate classification officer (1137 Pearson Hall). The classification officer will consult with the student and determine the proper course of action.

Curriculum Change from Inactive Graduate to Active Undergraduate Status

Individuals who were admitted to the Graduate College more than one year ago and who do not have active graduate status but who wish to change their status from inactive graduate to active undergraduate must follow the same procedures required of reentering undergraduate students and must begin the process by filing a completed "Undergraduate Reentry" form with the Office of the Registrar. When considering reinstatement, the undergraduate college may consider the student’s overall fitness for studies including information about the student’s conduct, employment, and education since the student’s last enrollment.

Individuals who do not have active graduate status and who first enrolled less than one year ago should first see the classification officer in the Graduate College.

Undergraduate Admission to Concurrent Graduate Degree/Certificate Programs

Several programs provide opportunities for qualified ISU juniors and seniors majoring in those curricula to apply for admission to both a bachelor's and master's degrees.

The graduate degree will be awarded only at the same time as, or after, the undergraduate degree is conferred. For a complete listing of the concurrent degree programs, consult Ch.4.3.2 (https://www.grad-college.iastate.edu/handbook/chapter.php?id=4#4.3) of the Graduate College Handbook.

Interested students must adhere to the following process:

- Complete the “Concurrent Enrollment for Undergraduate Student Wishing to Pursue a Graduate Certificate or Degree” form on the Graduate College website.
- Take the form to the interested graduate program along with three letters of recommendation, and any other application materials required by the program, as listed on the Program’s Admissions Requirement page here (http://www.grad-college.iastate.edu/academics/programs/apprograms.php).
- After the program has made an admissions decision and signed the form, it must be taken in order to the other areas (the program DOGE, undergraduate department, undergraduate college, and Graduate College).
The Graduate College will make the final decision if the student is admissible and notify all parties including the Office of Admissions on the outcome of its evaluation.

Students interested in a research career may apply for graduate research assistantships during their last two years of study. Students should contact the graduate programs about applying early in their undergraduate careers. For more information about seeking admission to concurrent undergraduate/graduate degree programs that are not pre-approved by the Graduate College, or "individualized programs", the application process, and transferring credits, consult Ch. 4.3.2 of the Graduate College Handbook.

**GRADUATE STUDENTS IN CONCURRENT UNDERGRADUATE PROGRAMS**

Graduate students interested in enrolling in a concurrent undergraduate program should contact the Office of Admissions (100 Enrollment Services Center) to obtain admission information (even if the student has been previously admitted as an undergraduate). An "Application for Graduate Student Wishing to Pursue a Concurrent Undergraduate Degree" form should be obtained from the Graduate College Web site at www.grad-college.iastate.edu/common/forms/index.php (http://www.grad-college.iastate.edu/common/forms/) and circulated for the appropriate approvals.

- Official enrollment and fee payment will be as a graduate student.
- The graduate degree or graduate certificate will be awarded only at the same time as, or after, the undergraduate degree is conferred.
- Students interested in a research career may be able to apply for a graduate research assistantship while in a concurrent degree or graduate certificate program.
- Students in concurrent degree programs may, subject to Program of Study Committee approval, count up to 6 ISU credits taken during their concurrent enrollment toward both a bachelor's degree and a graduate certificate or master's degree that requires up to 41 credits. For master's degree programs that require at least 42 credits, students may instead count up to 12 ISU credits taken during their concurrent enrollment toward both their undergraduate degree and their master's degree, upon program and Program of Study Committee approval.
- For students pursuing a concurrent undergraduate bachelor's degree and a graduate certificate, at least 12 graduate credits cannot be double counted and a maximum of 6 graduate credits can be double counted for both the bachelor's degree and the graduate certificate (when the graduate certificate requires more than 12 credits).
- A student in a bachelor's and master's concurrent degree program cannot be on a Ph.D. track during the concurrent program.

**Veterinary Medicine Students in Concurrent Graduate Degree/Certificate Programs**

Students may be concurrently enrolled in the professional curriculum leading to the D.V.M. degree and in a graduate program leading to the M.S. or Ph.D. degree after completion of 90 undergraduate semester credits. The graduate program may be in the College of Veterinary Medicine or in another college.

Interested students must adhere to the following process:

- Complete a "Concurrent Enrollment for Graduate/Veterinary Medicine Degrees" form available on the web site at www.grad-college.iastate.edu/common/forms/index.php (http://www.grad-college.iastate.edu/common/forms/). This is a combination application/concurrent form.
- Submit the "Concurrent Enrollment Request" form to the Graduate College after appropriate signatures are obtained.
- Signed approvals on the concurrent form are required from the graduate program, the College of Veterinary Medicine, and the Graduate College. On admittance, the student receives an admission notification from the Office of Admissions. Consult Ch. 4.3.2 of the Graduate College Handbook.

**Concurrent Master’s Degrees**

By special request, students may complete two degree programs that lead to two concurrently awarded master's degrees by following these requirements:

- Complete and submit a "Two Concurrent Graduate Degrees (https://iastate.box.com/s/h1k4448srpzxf052xl35bfnkwy8xqrs/)" form to the Graduate College,
- File separate Program of Study Committee (POSC) forms for each degree,
- File separate "Application for Graduation" forms for each degree, if applicable
- File separate "Final Oral Exam Request" forms for each degree, if applicable, and
- Pass separate final oral examinations (if applicable) and complete a separate "Graduate Student Approval Form" for each degree.

Two awarded master’s degrees require at least 22 hours of non-overlapping graduate credit in each major. If the two degrees are thesis or non-thesis degrees, they require two terminal projects (theses or creative components, respectively). Coursework-only degrees do not require a final project. These two degrees do not have to be awarded during the same term, since requirements for each are completed separately.
**Master’s Degrees**

General requirements for all master’s degrees are as follows:

**General Requirements**
The Graduate College Handbook outlines the general requirements for completion of a graduate degree at ISU. Faculty in a major field have the responsibility for establishing educational objectives for their graduate program, including specific course requirements and research requirements appropriate to the master’s programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student’s program of study (POS) committee beyond those listed in the Graduate College Handbook as deemed appropriate to the goals of the major program.

Faculty and graduate students are active participants in the academic programs of Iowa State University. As active participants, they have a collective impact on the success of those programs and of the university in fulfilling its mission. Each graduate program is encouraged to implement a mechanism for responding to feedback from graduate students as a valuable resource for continuing improvement.

**Appointment of the Student’s Program of Study (POS) Committee**

New graduate students at ISU may be assigned a temporary academic advisor by the major program in the first semester of the student’s residence. This faculty member guides the student in selection of a field of study and in development of a graduate program of study until the major professor and POS committee are selected. After the POS committee has been selected, it guides and evaluates the student during the remainder of graduate study.

A thesis master’s POS committee consists of at least three members of the graduate faculty. It must include two members, including the major professor, from the major or program. The committee must include member(s) from different fields of emphasis so as to ensure diversity of perspectives. A term member of the graduate faculty may participate in the direction of a student’s master’s research as a co-major professor if a member of the graduate faculty serves as a co-major professor and jointly accepts responsibility for the direction of a program of study. A non-thesis master’s degree needs a minimum of one committee member. Programs may establish requirements for more than one member.

For more information on duties and makeup of the committee as well as changes to the committee makeup, see Ch.6 (https://www.grad-college.iastate.edu/handbook/chapter.php?id=6) of the Graduate College Handbook.

Program of Study. The student and major professor develop the program of study with the consultation and approval of the POS committee. This agreement between the student and the Graduate College should be submitted as early as possible for approval. It is recommended that the committee be formed and the POS form submitted as early as the second semester of graduate study. In no case can the committee and program of study be formed later than the term before the final oral examination for master’s students.

Residency. There is no on-campus residency requirement for the master’s degree.

Credits. Unless otherwise noted, at least 30 credits of acceptable graduate work must be completed in all master’s programs. At least 22 graduate credits must be earned from Iowa State University.

Transfer Credits. At the discretion of the POS committee, and with the approval of the program and the Graduate College, graduate credits earned as a graduate student at another institution or through a distance education program offered by another institution may be transferred if the grade was B or better. Such courses must have been accepted toward an advanced degree at that institution and must have been taught by individuals having graduate faculty status at the institution. If a student wishes to transfer credits from graduate courses taken at or through another university as an undergraduate student, it is the student’s responsibility to provide verification by letter from that institution that these graduate courses were not used to satisfy undergraduate requirements for a degree.

A transcript must accompany the POS in order to transfer credits. The POS committee may ask for other materials, such as a course outline or accreditation of the institution, to evaluate the course. Transfer courses not completed when the POS is submitted must be completed the term before the student graduates. A transcript must then be submitted for review and final approval.

Research credits earned at another institution are generally not transferred. In rare circumstances, the transfer of S or P marks may be accepted for research credits only. It is the responsibility of the POS committee to obtain a letter from the responsible faculty member at the other institution stating that research credits recommended for transfer with S or P marks are considered to be worthy of a B grade or better. Audits may be listed on the program of study, but do not carry credit.

Major. A major is an approved area of study leading to a graduate degree. The exact number of credits in a major is not prescribed.

Minor. Students may request a minor in any program approved to grant a graduate degree and in programs approved to offer only a minor. A student may not minor and major in the same field. Requirements for declared minors are determined by the minor program and the faculty member representing the minor field on the student’s POS committee.

The minor subject area must be tested at the final oral examination and cannot be placed on the transcript after graduation unless it was approved on the program of study, listed on all examination reports, and
recorded on the Graduate Student Approval Form. A minor cannot be added to a degree that has already been received.

**Specific Master’s Degrees**

The number of credits in a major for a master’s degree will vary according to various degrees. General credit requirements for all master’s degrees include: a minimum of 30 graduate credits is required for all master’s programs at ISU; at least 22 graduate credits must be earned at ISU; any transfer of graduate credits from another institution must be recommended in the program of study by the POS committee; and graduate credit earned as a graduate student will be approved for transfer only if a B grade or better was earned. A transcript must accompany the POS form. A complete listing of specific master’s degrees can be found in Appendix D (https://www.grad-college.iastate.edu/handbook/appendix.php?id=D) of the Graduate College Handbook. A complete listing of all master’s degrees can also be found online, http://www.grad-college.iastate.edu/academics/gradprograms/index.php. (http://www.grad-college.iastate.edu/academics/gradprograms/)

**Master’s Double Degree Programs**

A double degree requires fulfillment of the requirements for two graduate majors for which two differently named master’s degrees and two diplomas are granted at the same time. For double degrees with a thesis or creative component, the final project (thesis or creative component) must integrate subject area from both majors.

The requirements for all students who are interested in pursuing double degree programs are listed below:

- The interested student must obtain the “Double Graduate Degree Request” (https://www.grad-college.iastate.edu/documents/forms/Double_Graduate_Degree_Request.pdf) form and submit it to the Graduate College for approval.
- Only one “Double Graduate Degree Committee Appointment” (https://www.grad-college.iastate.edu/documents/forms/Double_Degree_Committee_Appointment.pdf) form and one “Double Graduate Degree Program of Study” (https://www.grad-college.iastate.edu/documents/forms/Double_Degree_POS.pdf) form need to be submitted for the two degrees.
- For double degrees involving a creative component, there must be at least two graduate faculty members on the double degree POS committee. For double degrees involving a thesis, there must be at least three graduate faculty members on the double degree POS committee. Such POS committees for double degrees must include co-major professors from each of the majors.
- Although specific degree programs may require more, the program of study must include at least 48 hours of non-overlapping graduate credit (24 for each major) in the two degrees, and no less than 75% of the sum of the credits from each separate degree.
- If one or both of the degrees has a thesis or creative component, one final oral examination must be held covering the combined thesis or creative component. One thesis is submitted to satisfy the requirements of both degrees.
- If a thesis or non-thesis is combined with a coursework only degree, the thesis/non-thesis project should include information for both degrees.
- Only one “Graduate Student Approval Form” (https://secure.grad-college.iastate.edu/graduate-approval/exam/) signed by the DOGE from both programs needs to be submitted to the Graduate College.
- All forms should clearly indicate that the student is enrolled in a double degree program.

**Drake University Law School/Iowa State University Combined Degree**

To provide training in the complementary fields of law and political science with a minimum amount of academic duplication, special arrangements for a combined degree program have been approved with the Drake University Law School. ISU and Drake offer a combined J.D./M.A. in political science. Drake Law School students are permitted to transfer the equivalent of nine semester credits of specified law courses to ISU for credit for the political science program. Because of the difference in grading systems, the Law School grades are transferred as passes, provided the student has achieved a grade of C or better in those courses at Drake. Applicants for the combined program must meet the regular entrance requirements of, and be admitted to, both the Drake Law School and the ISU Graduate College.

**Doctor of Philosophy**

**General Requirements**

The degree doctor of philosophy is strongly research oriented. The primary requirements for the degree are:

- high attainment and proficiency of the candidate in their chosen field
- development of a dissertation which is a significant contribution to knowledge and which shows independent and creative thought and work
- successful passing of detailed examinations over the field of the candidate’s major work, with a satisfactory showing of preparation in related courses. General requirements for Ph.D. candidates follow.

The Graduate College Handbook outlines the general requirements for completion of a Ph.D. degree at ISU. Faculty in a major field have the responsibility for establishing educational objectives for their graduate program, including specific course requirements and research requirements appropriate to the Ph.D. programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student’s program of study (POS) committee.
beyond those listed in the Graduate College Handbook as deemed appropriate to the goals for the major program.

Faculty and graduate students are active participants in the academic programs of Iowa State University. As active participants, they have a collective impact on the success of those programs and of the university in fulfilling its mission. Each graduate program is encouraged to implement a mechanism for responding to feedback from graduate students as a valuable resource for continuing improvement.

**Appointment of the Student’s Program of Study (POS) Committee**

The POS committee for a doctoral program consists of at least five members of the graduate faculty. It must include at least three members, including the major professor, from within the student’s major or program. The committee must include members from different fields of emphasis so as to ensure diversity of perspectives. A term member of the graduate faculty may participate in the direction of a student's dissertation research as a co-major professor if a member of the graduate faculty serves as a co-major professor and jointly accepts responsibility for direction of the dissertation.

**Changes to POS committee**

Recommendations for changes in the POS committee must have the approval of the student, major professor, DOGE, and all committee members involved in the change (committee members who are retired, resigned, or not employed at ISU do not have to sign) before seeking approval of the Graduate College. These changes must be approved by the Dean of the Graduate College before the preliminary or final oral examination is held. For more information on changes to the committee and to the Program of Study, see Ch. 6 of the Graduate College Handbook.

**Program of Study**

The student and the major professor develop the program of study with the consultation and approval of the POS committee. Early selection of a major professor, appointment of a POS committee, and development of a program of study are very important. It is recommended that the committee be formed as early as the second semester of graduate study. In no case can the committee be formed later than the term before the preliminary oral examination.

**Credits**

A minimum of 72 graduate credits must be earned for a Ph.D. degree. At least 36 graduate credits, including all dissertation research credits, must be earned at Iowa State University. There is no specific university requirement regarding the number of credits to be taken inside or outside the major/program.

**Transfer Credits**

At the discretion of the POS committee, and with the approval of the program and the Graduate College, graduate credits earned as a graduate student at another institution or through a distance education program offered by another institution may be transferred if the grade was B or better. Such courses must have been acceptable toward an advanced degree at that institution and must have been taught by individuals having graduate faculty status at that institution. If a student wishes to transfer credits from graduate courses taken at or through another university as an undergraduate student, it is the student's responsibility to provide verification by letter from that institution that those graduate courses were not taken to satisfy undergraduate requirements for a degree.

A transcript must accompany the POS in order to transfer credits. The POS committee may ask for other materials, such as a course outline or accreditation of the institution, to evaluate the course. Transfer courses not completed when the POS is submitted must be completed before the term in which the student graduates. A transcript must then be submitted for review and final approval.

Research credits earned at another institution are generally not transferred. In rare circumstances, the transfer of S or P marks may be accepted for research credits only. It is the responsibility of the POS committee to obtain a letter from the responsible faculty member at the other institution stating that research credits recommended for transfer with S or P marks are considered to be worthy of a B grade or better.

**Major**

A major is the area of study or academic concentration in which a student chooses to qualify for the award of a graduate degree. Majors are listed on the Graduate College website here: https://www.grad-college.iastate.edu/academics/programs/apprograms.php. Opportunities also exist for majoring in more than one area of study (co-major programs).

**Minor**

Students may request a minor in any program approved to grant a graduate degree so long as the graduate program offers a minor and in programs approved to offer only a minor. Requirements for declared minors are determined by the minor program and the faculty member representing the minor field on the student's POS committee. The minor subject area must be tested at the preliminary oral and final oral examinations. A minor cannot be added to a program of study after the preliminary oral examination has been taken, nor can a minor be placed on the transcript after graduation, unless it was approved on the program of study, listed on all examination reports, and recorded on the Graduate Student Approval form. A student may not minor and major in the same field. A minor cannot be added to a degree that has already been awarded.
Time Limits
The Graduate College's time-to-degree limit for all graduate students, both master's and Ph.D., is seven years. **Graduate programs may establish more restrictive time-to-degree limits.** For example, at the program's discretion, a student beginning a Ph.D. degree program at ISU with a master's degree could be expected to complete the program within three or four or five years, while a student beginning a Ph.D. degree program without the master's degree could be expected to complete the program within five or six or seven years. This is an option that would be enforced at the department level. Requests to extend the seven-year time limit will be considered in situations involving medical or other extenuating circumstances. Cases in which the student leaves ISU during their graduate career and later returns are dealt with individually by the POS committee and the Graduate College.

The inclusion in the program of study/committee (POSC) of coursework that is beyond the time limits (“expired” courses) must be justified in the Expired Course Petition found on the Graduate College student forms page. This petition must be submitted in conjunction with the POSC form.

Preliminary Examination
The Graduate College requires a preliminary oral examination of Ph.D. degree students; most programs add a written portion to the preliminary oral examination. The Ph.D. degree preliminary oral examination rigorously tests a graduate student's knowledge of major, minor, and supporting subject areas as well as the student's ability to analyze, organize, and present subject matter relevant to the field. A “Request for Preliminary Examination” form must be submitted to the Graduate College by the major professor at least two weeks before the proposed date of the examination.

The following conditions should be met before the “Request for Preliminary Examination” form is submitted to the Graduate College:

- admitted to full admission status in a Ph.D. granting program,
- POSC approved no later than 3 months before the preliminary oral examination,
- English requirement met,
- not on probation,
- time limit not exceeded (see Chapter 4 (https://www.grad-college.iastate.edu/handbook/chapter.php?id=4&search=preliminary%20oral%20exam&section=4.4#ttd)),
- qualifying examination (if required by program) passed,
- registration for a minimum of one credit, or for Examination Only (GR ST 681B) if no course work is needed, during the term in which the preliminary oral examination is taken

A preliminary oral examination will not be scheduled for a student on academic probation. Upon successful completion of the preliminary oral examination, the student is admitted to candidacy for the Ph.D. degree. If the graduate student fails all or part of the preliminary oral examination, the committee provides two options: gives a not pass and allows the student to retake the examination after six months or gives a not pass and does not allow the student to retake the examination. Six months must elapse between the first attempt and the next. The entire POS committee must be convened for the preliminary oral examination. The preliminary oral examination must be passed at least six months prior to the final oral examination. An exception to the rule is allowed if a request signed by the major professor(s) and the program's DOGE is approved by the Dean of the Graduate College.

Dissertation
A doctoral dissertation must demonstrate conclusively the ability of the author to conceive, design, conduct, and interpret independent, original, and creative research. It must attempt to describe significant original contributions to the advancement of knowledge and must demonstrate the ability to organize, analyze, and interpret data. In most instances, a dissertation includes a statement of purpose, a review of pertinent literature, a presentation of methodology and results obtained, and a critical interpretation of conclusions in relation to the findings of others. When appropriate, it involves a defense of objectives, design, and analytical procedures. Dissertation research should be worthy of publication and should appear in appropriate professional journals or in book form.

Responsibility for writing and editing of the dissertation rests with the student, under the supervision of the major professor, and not with the Graduate College. The Graduate College does not permit joint authorship of dissertations. It is the responsibility of the major professor to supervise the preparation of preliminary and final drafts of the dissertation, so as to assure the highest level of quality when the student presents the dissertation to the committee for final approval. Copies of the dissertation must be submitted to the POS committee at least two weeks before the final oral examination.

All theses and dissertations will be submitted electronically after the final oral examination is held. Please refer to the Graduate College Dissertation/Thesis website (http://www.grad-college.iastate.edu/current/thesis/) for requirements, fees, and other pertinent information.

Shortly after the submission of the “Application for Graduation” form, a one-time, nonrefundable thesis fee is billed by the university accounting system. In addition, a graduation fee will be assessed by the Registrar’s Office. This fee is nonrefundable if a student does not cancel their graduation by the Graduate College's cancellation deadline.

Final Oral Examination
The Ph.D. final oral examination, conducted after the dissertation is finished, is oral and often limited to a defense of the dissertation. To
receive the degree at the end of a given semester, the student must hold
the final oral examination before the final oral examination deadline for
the semester.

The candidate is responsible for initiating the “Request for Final Oral
Examination” form, which must be submitted to the Graduate College
at least three weeks before the examination. The entire POS committee
must be convened for the final oral examination. For more information
on the final oral examination, see Ch. 7.1.2 of the Graduate College
Handbook.

Graduate Student Approval Form for Graduation
The Graduate College requires final approval from the student’s program
with submission of a “Graduate Student Approval Form (https://
secure.grad-college.iastate.edu/graduate-approval/exam/),” signed by
the major professor(s) and the DOGE(s), including co-major DOGE if
applicable, after the student has passed the final oral examination and
completed any necessary changes on the dissertation/thesis requested
by the committee. A paper dissertation/thesis signature page is not
required.

• The form is electronically routed to the major professor or program
to give to the student after the final oral exam request is received and
approved by the Graduate College.

• The Graduate Student Approval Form must be completely routed and
approved by the published deadline each term.

• After the Graduate Student Approval Form has been electronically
signed, a dissertation/thesis student must upload their
final dissertation/thesis to ProQuest. A non-thesis student must
submit their creative component to the ISU Digital Repository.

• Once the signed Graduate Student Approval Form has been received
by the Graduate College, a student's dissertation, thesis, or creative
component will be reviewed for final approval.

• Final clearance of academic requirements will be made when current
term grades have been submitted and evaluated by the Graduate
College.

All incompletes from previous terms must be completed by the deadline
for completion of the Graduate Student Approval Form. An incomplete,
non-report, or failing grade that a student receives for the term of
graduation will result in removal from that term’s graduation list. The
student will need to complete a new Application for Graduation and
Graduate Student Approval Form for the new term of graduation.

If a conditional pass was recommended at the final oral examination, the
major professor and the committee members, if so specified, must notify
the Graduate College that the conditions have been met by submitting
the Preliminary or Final Oral Exam Conditions Met Memo (https://
www.grad-college.iastate.edu/common/forms/files/Preliminary%20or
%20Final%20Oral%20Exam%20Conditions%20Met%20Memo.pdf) no later
## GRADUATE PROGRAMS

The Graduate College Handbook outlines the general requirements for completion of a graduate degree or credential at ISU. Faculty in a major field have the responsibility for establishing educational objectives for their graduate program, including specific course requirements and research requirements appropriate to the doctoral, master’s, and certificate programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student’s program of study (POS) committee beyond those listed in the Graduate College Handbook as deemed appropriate to the goals of the major program.

Faculty and graduate students are active participants in the academic programs of Iowa State University. As active participants, they have a collective impact on the success of those programs and of the university in fulfilling its mission. Each graduate program is encouraged to implement a mechanism for responding to feedback from graduate students as a valuable resource for continuing improvement.

### Academic Program definitions

- **Program** - administrative infrastructure supporting the curriculum.
- **Curriculum** - the requirements for a major, certificate, or minor.
- **Major** - subject area of study that results in a named baccalaureate, masters, or doctoral degree upon completion of a set of requirements. A major appears on the academic transcript.
- **Certificate** - an academic credential in a focused area of study. A certificate appears on the academic transcript and may be earned concurrently with a degree or on its own.
- **Minor** - an academic area of emphasis that is in addition to a major. A minor appears on the academic transcript and must be earned in conjunction with a degree.

### Ph.D. Programs

A complete list of Ph.D. Programs can also be found on https://www.grad-college.iastate.edu/academics/programs/apprograms.php.

- Aerospace Engineering (http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=2)

Graduate Minors

Minors are available in many disciplinary and interdepartmental graduate programs. Some programs offer only a minor. In other programs, students may declare either a major or a minor. Programs offering a major are not required to offer a minor. A student may not major and minor in the same discipline for a single degree or across multiple degrees. To illustrate, a student earning a Ph.D. in computer science may not minor in statistics for their Ph.D. program if they are also pursuing an MS in statistics.

Graduate Minor Only Programs

The following programs are available as minor only. These minors do not have an associated graduate major.

Applied Scientific Computing (http://asc.aere.iastate.edu/)
Criminal Justice (https://soc-cj.iastate.edu/)
French (http://catalog.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures/)
German (http://catalog.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures/)
Linguistics (https://apling.engl.iastate.edu/)
Philosophy
Russian (http://catalog.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures/)
Spanish (http://catalog.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures/)
Speech Communication (http://www.engl.iastate.edu/graduate-students/)
Women's and Gender Studies (https://womensstudies.las.iastate.edu/graduate/)
INTERDISCIPLINARY GRADUATE PROGRAMS

See individual programs for information regarding admission and academic requirements; or see the Graduate College or specific program page for more information.

Cyber Security
Interdepartmental Graduate Major

Iowa State University has been offering courses in cyber security since 1995 and has one of the largest programs in the country. Graduate degrees can be obtained in a traditional on campus setting or as an online program. For information on the Engineering-LAS Online Learning program visit www.elo.iastate.edu. (http://www.elo.iastate.edu)

Students graduating from the major will help to fill the need for well-educated system security specialists in the government, private sector, and academia. The program objectives identified as being critical to the accomplishment of this mission are:

1. Impart and enhance knowledge about information infrastructure security
2. Expand and develop the ability to engineer complex systems
3. Instill and nurture social awareness, and the ability to function in a team
4. Instill and nurture a sense of ethics
5. Develop an understanding of strategic and policy issues

We offer 4 different graduate degree options:

1. Masters of Science with thesis
2. Masters of Science without thesis
3. Masters of Engineering (coursework only)
4. Graduate certificate

Graduate Certificate:

A graduate certificate in Cyber Security is offered, which consists of four courses (12 credits): The graduate certificate is targeted for off-campus students as a way to either supplement their education or as way to try out online education courses. All of the certificate courses will transfer into the MS or MENG degree in Cyber Security.

Total Credits 12

For additional information students should visit https://www.cyio.iastate.edu/. (http://www.iac.iastate.edu)

Master of Science with & without thesis:

The degree Master of Science with a major in Cyber Security is under a cooperative arrangement with various home departments including Electrical and Computer Engineering, Political Science, Information Systems and Business Analytics, and Mathematics.

The degree Master of Science with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component and is intended for students interested in a career in cybersecurity.

Students interested in the interdepartmental major apply and are admitted to both a home department (the department that is most closely aligned with the student’s research interest and background) and to the program. The home department sets the admission standards, course requirements, and thesis standards. (Note: Electrical and Computer Engineering is the only home department for off-campus students pursuing the Master of Science in Cyber Security).

The program is broadly based and uses courses in the various departments. The program will consist of 24 course credits with 6 credits of research work for a Master of Science with thesis. A non-thesis Master of Science will consist of 27 credits of courses and 3 credits of creative component. The courses are divided into three categories: core, electives, and thesis research. A student’s Program of Study Committee in consultation with the student, determines the elective courses to be taken and the acceptability of transfer credits. The major professor will be selected from the discipline where the student is admitted (home department).

The basic prerequisite for admission to this program is a baccalaureate degree in engineering, mathematics, computer science, management information systems, political science, or closely related field. The GRE or GMAT examination may be required based on the standards of the home department. If the GRE or GMAT is not required it will be considered in admissions decisions if offered. Potential students with baccalaureate degrees in the physical sciences, statistics, or other related fields will be considered on an individual basis, possibly with provisional admission.
Master of Engineering:

The Master of Engineering (MENG) in Cyber Security degree is only offered to off-campus students. This program is designed to assist all individuals who already have a bachelor's degree in computing or related areas to pursue an in-depth study in information assurance. The Master of Engineering program is based on coursework credits only (a thesis or creative component is not required). Courses are offered via our Engineering-LAS Online Learning streaming media online education program. (Note: Electrical and Computer Engineering is the only home department for the Master of Engineering in Cyber Security).

A coursework only Master of Engineering degree in Cyber Security consists of 30 credits. The courses are divided into two categories: core and electives. (Note: Students pursuing the MENG do not have a program of study committee and the major professor is the Cyber Security, Director of Graduate Education (DoGE)

Students interested in the MENG in Cyber Security degree apply and are admitted to Cyber Security (CYBSC) with Ecpe as the home department. The admission requirements for students entering the program without work experience are the same as the admission requirements for the Ecpe department. For students with 3 or more years of work experience in a computer related position the GRE and GPA minimum may be waived. Students with an undergraduate degree in a non computing field that have at least 3 years of work experience in an information technology field may be admitted to the program.

Dietetics - Graduate Program

Interinstitution Graduate Program

Iowa State University offers a master’s degree in Family and Consumer Sciences with a specialization in Dietetics. This is an interinstitutional online program offered through the Great Plains Interactive Distance Education Alliance (or GPIDEA). The student selects a home institution (Iowa State), which ultimately grants the degree. After admission to Iowa State, the student takes courses from Iowa State and the other participating institutions: Colorado State University, Kansas State University, North Dakota State University, Oklahoma State University, South Dakota State University, University of Kansas Medical Center, and University of Nebraska-Lincoln.

The department cooperates in the interinstitution Master of Family and Consumer Sciences program to offer a specialization in Dietetics. The Master of Family and Consumer Sciences-Dietetics is designed for the Registered Dietitian or Registration-eligible Dietitian. The 36-credit program is non-thesis and seeks to develop research skills, stimulate independent thought, and provide up-to-date knowledge in foods, nutrition, and foodservice/business management. This program prepares individuals to integrate and apply the principles from the biomedical sciences, human behavior, and management to design and lead effective food and nutrition programs in a variety of settings. Students may build a program of study from offerings of the partner institutions such as human nutrition, nutrient metabolism, biostatistics, health promotion/disease prevention, foodservice systems management, food science, lifespan nutrition, wellness, entrepreneurship, nutrition education, nutritional assessment and food safety. The online program is tailored for credentialed, practicing dietetics professionals who seek to enhance their knowledge in a specific area of dietetics practice or retool for new career opportunities in dietetics practice. A special project or creative component is required as part of the 36 required credits.

Admission procedures: Admission to the MFCS-Diet program requires exactly the same procedures as admission to the Graduate College. See the Graduate College Admission section of this catalog.

Registration: Students choosing to receive their degree from Iowa State University complete all the admissions, registration, and fee payment processes through ISU.

Ecology and Evolutionary Biology

Interdepartmental Graduate Major

The Ecology and Evolutionary Biology (EEB) interdepartmental major is offered through ten departments -- Agronomy; Ecology, Evolution and Organismal Biology; Entomology; Genetics, Development and Cell Biology; Geological and Atmospheric Sciences; Horticulture; Mathematics; Natural Resource Ecology and Management; Plant Pathology; Statistics, and World Languages and Cultures. Faculty in these departments cooperate to offer courses and direct research leading to MS and PhD degrees with a major in Ecology and Evolutionary Biology.

The EEB major is designed for students interested in the study of mechanisms controlling the composition, structure, and functional processes of ecological systems and the mechanisms that regulate the pattern and rate of evolutionary change within and among species. Applicants should have completed an undergraduate or master of science or arts degree in one of the biological, physical, or mathematical sciences. Applicants also should have taken undergraduate courses in both basic ecology and evolution.

The EEB curriculum includes a core course, seminar courses, and an extended field trip. Cooperating departments provide courses and research opportunities in the following areas:

- Conservation and Restoration Ecology;
- Environmental Statistics, Stochastic Modeling, and Quantitative Ecology and Evolution;
- Evolutionary Ecology;
- Landscape Ecology, Modeling, and Spatial Dynamics;
• Natural Resources Ecology and Management;
• Physiological and Behavioral Ecology;
• Population, Community, and Ecosystems Ecology;
• Population, Quantitative, and Evolutionary Genetics; and
• Systematics, biodiversity, and biogeography.

In addition, offerings are available in the ethics and practice of research in the biological sciences as well as in science communication (both written and oral).

Students majoring in EEB are trained for careers focused on basic or applied ecology and evolutionary biology in a variety of settings, including academia, government, industry, and private organizations. Graduates have a broad understanding of ecology and evolutionary biology, experience designing and conducting research, writing grant proposals, and communicating effectively with scientific colleagues at meetings and through publications.

Information on admission procedures (https://eeb.iastate.edu/admissions/), academic requirements (https://eeb.iastate.edu/academics/), and faculty research areas (https://www.eeb.iastate.edu/people/faculty/) is available on the EEB website (http://www.eeb.iastate.edu/).

Engineering Management

Engineering Management Master’s Degree

The Engineering Management Program focuses on developing an individual’s engineering, science and management skills so they can succeed in a technology driven environment. There is a growing need for engineers that can build multi-disciplinary design teams, then lead those teams to solve technical and business challenges. The Iowa State University Master of Engineering in Engineering Management Program is designed to train leaders who can meet both the technical and managerial challenges in developing modern complex engineered systems. The program can be completed on line or in residence, part-time or full-time.

Admission Requirements

To be considered for admission, the applicant should have a bachelor’s degree in engineering or related field from a college, university, or technical school of recognized standing. Non-engineering backgrounds will be considered on a case-by-case basis. High academic achievement or other persuasive evidence of professional accomplishments is expected for admission to the program. The GRE is not required.

Applicants for admission to this program apply through the ISU Graduate College. Each applicant must submit:

• Application and application fee
• Official academic transcripts
• Three letters of recommendation
• Resume

Applications should be submitted as early as possible before the beginning of the semester for which admission is sought. Individuals may also take up to nine credits at Iowa State as a non-degree seeking student and then transfer them to the program when they are admitted. (https://www.elo.iastate.edu/admission-and-enrollment (https://www.elo.iastate.edu/admission-and-enrollment/))

The Master of Engineering in Engineering Management Program at Iowa State University is focused on supporting working professionals so teaching or research assistantships typically are not available.

Forensic Sciences Certificate

The forensic sciences graduate certificate program complements a program of study at Iowa State University that leads to any graduate degree in an established academic major. The forensic sciences certificate is also recommended for students who wish to strengthen their interdisciplinary skills. Coursework for the certificate is at the graduate level, however qualified undergraduates may also enroll by admission to the Graduate College as a certificate student for a minimum of one semester. Completion of the certificate is noted on the student’s transcript and via a certificate provided by the Registrar.

Learning Outcomes

Upon completion of the graduate certificate in forensic sciences, students will be:

• Educated in a diverse array of topics that contribute to the interdisciplinary field of forensic science.
• Well informed about the needs for research and development in forensic science.
• Able to propose a research project related to forensic science.
• Informed about forensic science as a career choice.
• Aware of the possibility of offering expertise to law enforcement agencies within the community.
• Aware that forensic sciences can be used as an educational tool in post-graduate capacity as a professor/teacher, parent, or community volunteer.

Requirements

• 12 credits of coursework and seminars at Iowa State University with a total GPA of 3.0 or higher.
• Attendance at all events hosted by the NIST Center for Excellence in Statistics and Applications in Forensic Evidence (CSAFE) at Iowa State.
• Attendance at a national or regional scientific meeting devoted to forensic science.
• Completion of the certificate within three contiguous calendar years.

Coursework

• 1 graduate credit seminar course in forensic science: ANTHR 541. This seminar will be offered each fall semester. In this seminar, you will report on the off-campus conference you attend, and also on your research.
• 1 graduate credit of independent study: ANTHR 542. You will choose a topic in forensics, ask the Director of Certificate Studies (DOCS) for approval, research it in the literature and write a paper on it. You will present this research project to the seminar group.

• At least 10 graduate credits from among the courses listed in the Certificate Electives course list. From this list, you may not choose any courses offered toward your academic major, and you must choose courses from at least two different departments entirely outside of your department or program. No credits may be transferred to ISU from other institutions.

All Certificate candidates are required to take ANTHR 541 (1 credit) and ANTHR 542 (1 credit). In addition, choose 10 credits from the following list of Certificate Electives:

Genetics and Genomics

Graduate Major

Work is offered for the master of science and doctor of philosophy degrees with a major in Genetics and Genomics in fourteen cooperating
departments: Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Ecology, Evolution and Organismal Biology; Entomology; Food Science and Human Nutrition; Genetics, Development and Cell Biology; Horticulture; Materials Science and Engineering; Plant Pathology and Microbiology; Natural Resource Ecology and Management; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

Students are admitted by the approval of the Chair after review by the Genetics and Genomics Admissions Committee. Students are admitted either to participate in research rotations with several faculty before deciding on a major professor and laboratory, or by direct admission into a specific lab and department. First year students participating in rotations with Genetics and Genomics faculty will take GENET 697 Graduate Research Rotation.

The diversity of faculty in the Genetics and Genomics major ensures a broad, well-balanced education from the best instructors, while offering flexibility in choice of research area. Genetics and Genomics faculty have strengths in many areas, from fundamental studies at the molecular, cellular, organismal, and population levels, to research with immediate practical application. Ongoing research projects span all the major areas of theoretical and experimental genetics, including genomics, molecular studies of gene regulation, gene mapping, genetics of disease, transposable element studies, developmental genetics, quantitative and statistical genetics, computational molecular biology, evolutionary genetics, and population genetics.

**Undergraduate Preparation**

Undergraduates wishing to prepare for graduate study in Genetics and Genomics should elect courses in basic biology, chemistry at least through organic chemistry, one year of college-level physics, mathematics at least through calculus, at least one thorough course in basic transmission and molecular genetics, one semester of upper level statistics and one semester of upper level biochemistry. Incoming students who have not completed an upper level statistics course and an upper level biochemistry course prior to beginning in the program will take STAT 587 Statistical Methods for Research Workers and BBMB 404 Biochemistry I during their first year of graduate training. A waiver may be requested for these courses by providing appropriate documentation (catalog description and syllabus) to the curriculum committee showing completion of an upper level statistics and upper level biochemistry course equivalent to STAT 587 Statistical Methods for Research Workers and BBMB 404 Biochemistry I.

See information from the College of Agriculture and Life Sciences or the College of Liberal Arts and Sciences for information on a bachelor of science degree in Genetics.

All Ph.D. candidates take a core curriculum comprising one course each from the following four categories and attend seminars and workshops as described:

<table>

</table>

Students will give two research presentations (GENET 690 Graduate Student Seminar in Genetics), attend one genetics and genomics faculty seminar series (GENET 691 Faculty Seminar in Genetics), and participate in two Workshops in Genetics and Genomics (GENET 591 Workshop in Genetics) during their graduate training. First-year graduate students will take GENET 692 Conceptual Foundations of Genetics.

Students may elect a computational molecular biology specialty within the genetics major. This requires that the research project be in the field of computational molecular biology. IGG majors will be expected to complete all of the courses required for the genetics and genomics major, except that one semester of BCB 690 Student Seminar in Bioinformatics and Computational Biology can be substituted for GENET 690 Graduate
Student Seminar in Genetics. Students will be expected to take additional courses in the area of specialization.

M.S. students will take the above core courses and seminars with the following changes: participate in one Workshop in Genetics (GENET 591 Workshop in Genetics) and present their research once (GENET 690 Graduate Student Seminar in Genetics). Additional coursework may be selected to satisfy individual interests or departmental requirements.

The course designator Genet applies to graduate courses taught by the interdepartmental major in Genetics and Genomics.

Students wishing to minor in genetics and genomics must submit a complete application to the graduate program. Requirements for the successful completion of a minor at the Ph.D. or M.S. levels are: completion of three of the four categories of the common-core required lecture courses listed above. One semester of Seminar in Genetics is recommended.

One member of the POS committee must be a Genetics faculty member.

Student Outcomes: Most students awarded doctoral degrees continue their training as postdoctoral associates at major research institutions in the U.S. or abroad in preparation for research and/or teaching positions in academia, industry, or government. A few go directly to permanent research positions in industry. Many students awarded master's degrees continue their training as doctoral students; however, some choose research support positions in academia, industry, or government. A more thorough list of outcomes is available at our web site.

Human Computer Interaction

Interdepartmental Graduate Program

Human Computer Interaction is an interdepartmental graduate program that seeks to improve the way individuals and groups use computers through an understanding of the social and cognitive aspects of the design and use of computational devices. Students in the program learn about cognitive psychology, graphic design principles, the impacts of technology on society, evaluating system usability, and cutting edge computer programming for computational perception and language parsing.

Student research projects have explored the latest in virtual reality studies, improving natural interaction through touch screens and 3D camera gesture controls, virtual engineering using force feedback devices, and many other projects at the bleeding edge of technological innovation. Graduates of the program have gone to work at many of the largest technology firms in the US and abroad while others have gone on to positions in academia.

Degrees are offered for the Master of Science (MS) and Doctor of Philosophy (PhD) degrees with a major in Human Computer Interaction (HCI). A Graduate Certificate and an Online Master of Human Computer Interaction (M.HCI) degree are also offered; these degrees are especially targeted for the benefit of students working in business and industry wanting education in this field. The graduate program in Human Computer Interaction (HCI) welcomes applicants from a diverse collection of technical and creative fields whose unifying characteristic is the desire to develop new ways to bridge the gap between human and machine. The students must demonstrate skill in software development and proficiency in high-level, object-oriented programming. These skills can be acquired after admission to the program. Other entrance requirements will include an undergraduate degree and transcripts, test scores and other indicators that the applicant can be successful at the graduate level. All students admitted to the PhD program on campus must secure a graduate assistantship.

Program requirements can be found on the program’s webpage (http://www.vrac.iastate.edu/hci/) and in the Human Computer Interaction Graduate Student Handbook.

All programs of study for the PhD must include:

1. one core course of their choice from each of the categories of Implementation, Design, Evaluation and Phenomena, if not completed as part of the student’s Masters program
2. two more courses of their choice from a list of recommended electives
3. a minimum of nine research credits.

The MS degree calls for 30 credits of course work including appropriate credit for the Master’s thesis. MS students must take one core course of their choice from each of the categories of Implementation, Design, Evaluation and Phenomena. In addition to these courses, MS students will be required to take a minimum of 3 research credits.

The Online M.HCI program is most appropriate for individuals with a bachelor’s degree in a scientific, engineering, business, or artistic discipline, who are pursuing a professional career, and who already have a strong base of information technology skills. Requirements for the Online M.HCI Program include taking four courses, one each from the Design, Implementation, Phenomena and Evaluation categories. However, M.HCI students must take two additional courses of their choice from the list of core courses or the list of recommended electives. M.HCI students will therefore be required to take a total of six courses (18 credits) and the remaining four courses (12 credits) would be electives of your choosing.
Requirements for the HCI Graduate Certificate program include three core HCI courses plus one elective.

Information on applications procedures and specific requirements of the major can be obtained on the program webpage: http://www.vrac.iastate.edu/hci/

Immunobiology
Immunobiology Interdepartmental Graduate Program

Work is offered for the master of science and doctor of philosophy degrees with a major in Immunobiology. Faculty are drawn from twelve university departments along with researchers from the National Animal Disease Center. Participating departments include: Animal Science; Biochemistry, Biophysics, and Molecular Biology; Biomedical Sciences; Chemical & Biological Engineering; Entomology; Food Science and Human Nutrition; Kinesiology; Natural Resource Ecology & Management; Veterinary Clinical Sciences; Veterinary Diagnostic & Production Animal Medicine; Veterinary Microbiology & Preventative Medicine; and Veterinary Pathology. The diversity of faculty expertise ensures a broad education while offering flexibility in choice of specialization. Ongoing research projects include areas such as: antibody and cell-mediated immunity, gene expression, immunoochemistry, immunogenetics, immunomodulation, immunophysiology, mucosal immunity and nutritional immunology. Additional information about program faculty members is available at: www.immunobiology.iastate.edu.

Students may enter the Immunobiology program in one of two ways; prospective students may apply directly to the major, or current ISU graduate students may be admitted as a co-major or minor in Immunobiology. Ph.D. students admitted into the Interdepartmental Immunobiology major will take IMBIO 697 Graduate Research Rotation during their first two semesters. From these rotations the student will select a major professor and join a home department. Affiliating with a major professor is done by the end of the second semester.

Before entering the Immunobiology program, prospective students should have a strong background in the biological sciences; typically including work in immunology, genetics and biochemistry. Prior research experience is highly encouraged.

Immunobiology students should include in their program of study a core of courses which will provide a broad coverage of the basic program in immunobiology. Formal courses should include immunology, biochemistry, and statistics. Additional coursework may be selected to satisfy individual interests or departmental requirements.

Graduates of the Immunobiology program will have a broad understanding of the interdisciplinary field of immunobiology and will be able to effectively integrate the principles of immunology with related disciplines. They are able to effectively communicate with scientific colleagues and the general public in both formal and informal settings. Graduates are able to integrate theory and research to address complex problems facing scientific professionals studying animal and human health, taking into account related ethical, social, legal and environmental issues. They are skilled at carrying out research, communicating research results, and writing persuasive grant proposals.

Graduate Study in Immunobiology
Curriculum Requirements for Immunobiology Doctoral Students

Ph.D. candidates majoring in Immunobiology must take at least 72 graduate credits. This 72 credits includes the below core course requirements and applicable research credits earned. Credits taken during a student’s M.S. program in Immunobiology at Iowa State University will count towards their Ph.D. in Immunobiology.

Ph.D. students should take each of the following:

<table>
<thead>
<tr>
<th>Course Code</th>

Curriculum Requirements for Immunobiology Master's Students

All M.S. students majoring in Immunobiology are required to complete a minimum of 30 graduate credits. These 30 credits includes core course requirements and applicable research credits earned. The requirements for M.S. students are the same as that for Ph.D. students with the exception of the elective credits. M.S. students are required to take at least one course from the list of electives as opposed to the two course minimum for Ph.D. students.

Curriculum Requirements for a Minor in Immunobiology at the PhD Level

Graduate students studying at Iowa State University with an interest in completing an Immunobiology minor for their Ph.D. studies are required to take a total of 12 credit hours of coursework including core courses and approved electives.

Students must be approved for the minor by the Immunobiology program and must follow Graduate College guidelines for POS Committee membership.

Graduate students wishing to seek a minor in Immunobiology are encouraged to contact the Immunobiology Interdepartmental Graduate Program Coordinator for further information. Inquiries can be submitted to: idgp@iastate.edu.

Immunobiology Minor Curriculum at the Ph.D. Level
Includes:

One course from each of the following two categories:

**Category A:**
- V MPM 520 Principles of Immunology (3)
- V MPM 575 Immunology (3)

**Category B:**
- V MPM 615 Molecular Immunology (3)
- V MPM 629 Advanced Topics in Cellular Immunology (2)

One enrollment in the following:
- IMBIO 602 Current Topics Workshop in Immunology (1)

Minimum of 2 courses from any of the following approved electives:
- BBMB 545 Molecular Signaling (3)
- GDCB 528 Advances in Molecular Cell Biology (3)
- MICRO 408 Virology (3)
- MICRO 554 Virology (1)
- V MPM 540 Livestock Immunogenetics (2)
- V MPM 608 Molecular Virology (3)
- V MPM 625 Mechanisms of Bacterial Pathogenesis (3)
- V MPM 629 Advanced Topics in Cellular Immunology (2)
- V PTH 655 Cellular and Molecular Pathology I (3)
- V PTH 656 Cellular and Molecular Pathology II (3)

Interdisciplinary Graduate Studies

The degree Master of Science or Master of Arts with a major in Interdisciplinary Graduate Studies (IGS) is available to graduate students who wish to have a more diversified program of advanced study than generally permitted for students who specialize in a single subject. The program is open to any qualified graduate student but is most useful to those who wish to improve their subject matter competence in more than one discipline.

Those who elect to pursue the Interdisciplinary Graduate Studies Program are allowed to take courses in three different graduate subject matter areas, each subject contributing a minimum of nine (9) semester credits toward the 35 graduate credits required for the degree. Courses which may be used for credit toward this degree are selected from those listed in the Iowa State University Catalog.

Both thesis and non-thesis options are available. In the thesis option, the student, with the guidance of a major professor, develops and reports in writing a research study. In the non-thesis option, a creative component is required in which the student demonstrates independent creativity such as a written report of laboratory, field, or library research, a project in fine arts, or some other original contribution. A minimum of three (3) and maximum of five (5) credits in either IGS 599 Creative Component or IGS 699 Thesis Research may be counted toward the total 35 semester credits.

The student, in consultation with their Program of Study Committee, will decide on the choice of option (i.e., thesis or non-thesis). The Program of Study Committee also aids the student in planning and approving a program of study and selecting appropriate courses.

A student majoring in Interdisciplinary Graduate Studies may participate in any one of the following areas of specialization:

- Arts and Humanities (http://igs.grad-college.iastate.edu/areas-of-specialization/arts-and-humanities/)
- Biological and Physical Sciences (http://igs.grad-college.iastate.edu/areas-of-specialization/biological-and-physical-sciences/)
- Community Development (http://igs.grad-college.iastate.edu/areas-of-specialization/community-development/)
• International Development Studies (http://igs.grad-college.iastate.edu/areas-of-specialization/international-development-studies/)
• Social Sciences (http://igs.grad-college.iastate.edu/areas-of-specialization/social-sciences/)

Because of the interdisciplinary nature of the Interdisciplinary Graduate Studies Program, students are expected to demonstrate that they can relate in a significant way at least two of the three chosen areas of study. This is usually done in the written work for the thesis research or creative component. In their final oral examination, students also are expected to be able to discuss the relationship among the three areas of study.

Molecular, Cellular, and Developmental Biology

MCDB Interdepartmental Graduate Program

Work is offered for the doctor of philosophy degree with a major in Molecular, Cellular, and Developmental Biology. Faculty are drawn from sixteen university departments along with researchers from the National Animal Disease Center. Participating departments include: Agronomy; Animal Science; Biochemistry, Biophysics & Molecular Biology; Biomedical Sciences; Chemistry; Chemical & Biological Engineering; Ecology, Evolution, & Organismal Biology; Entomology; Food Science & Human Nutrition; Genetics, Development & Cell Biology; Horticulture; Kinesiology; Physics & Astronomy; Plant Pathology; Veterinary Microbiology & Preventive Medicine; and Veterinary Pathology.

Facilities and qualified faculty are available in these departments for conducting fundamental research in the various aspects of molecular, cellular, and developmental biology. Ongoing research projects include molecular and cellular studies of viral, prokaryotic, fungal, plant, and animal systems. Additional information about the program and faculty is available at: www.mcdb.iastate.edu (http://www.mcdb.iastate.edu/).

Prospective students are admitted by the MCDB program following receipt of a complete application and after review by the MCDB Admissions Committee. Students are admitted either to participate in research rotations with several faculty before deciding on a major professor and laboratory, or by direct admission into a specific lab and department. Ph.D. students typically enter via rotation and are required to complete a minimum of three research lab rotations with faculty of interest and take MCDB 697 Graduate Research Rotation during their first two semesters. At the end of their second semester, students on rotation must select a major professor from the faculty participating in the program. Current ISU graduate students may be admitted as a co-major or minor with MCDB.

Before entering the MCDB program, prospective students should have a strong background in the biological sciences; typically including work in biological sciences (two years), organic chemistry (one year), physics (one year), and mathematics (through one year of calculus). Prior research experience is highly encouraged.

Undergraduate Study

A special program in Molecular, Cellular, and Developmental Biology is not offered for the baccalaureate. Undergraduates wishing to prepare for graduate study in molecular, cellular, and developmental biology should elect courses in biochemistry, biology, genetics, microbiology; and mathematics through calculus; chemistry through organic; and one year of physics.

The following are recommended to undergraduates desiring an introduction to this area:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 313</td>
<td>Principles of Genetics</td>
<td>3</td>

<td>Cell Biology</td>
<td>3</td>
</tr>
</tbody>
</table>

Curriculum Requirements for MCDB

Ph.D. candidates majoring in MCDB must take at least 72 graduate credits. These 72 credits include the core course requirements (below) and applicable research credits earned.

Additional coursework may be selected by the student in consultation with their Program of Study (POS) Committee to meet departmental requirements and to satisfactorily prepare the student for their research project.

Graduate credits of B or better earned in another Iowa State program, or at another institution, may be transferred at the discretion of the POS Committee and with the approval of the MCDB Program and the ISU Graduate College.

Additional information relating to credits required for graduate degrees can be found in the ISU Graduate College Handbook (http://www.grad-college.iastate.edu/common/handbook/).

MCDB Core Curriculum requirements include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BBMB 404</td>
<td>Biochemistry I</td>
<td>3</td>
</tr>
<tr>
<td>BBMB 405</td>
<td>Biochemistry II</td>

<td>3</td>
</tr>
</tbody>
</table>

*Footnote: GDCB 545 - Plant Molecular, Cellular, and Developmental Biology may be used to fulfill any one of the required component areas.

In addition to the above course requirements, MCDB graduate students are required to take:

1. Two semesters of research seminar every year.

   Fall semester students will enroll in 1) a "for credit" research seminar series offered by the student’s home department, 2) a workshop comprised of a research seminar series, or 3) another ISU research seminar series, typically chosen from one of the following departments: Agronomy, Animal Science; Biochemistry, Biophysics & Molecular Biology; Biomedical Sciences; Chemistry; Chemical & Biological Engineering; Ecology, Evolution, & Organismal Biology; Entomology; Food Science & Human Nutrition; Genetics, Development & Cell Biology; Horticulture; Kinesiology; Physics & Astronomy; Plant Pathology; Veterinary Microbiology & Preventive Medicine; and Veterinary Pathology. (Options 2 and 3 are subject to approval by the POS committee).

   Spring semester register for MCDB 698, Seminar in Molecular, Cellular, and Developmental Biology. In seminar, students will make journal and research presentations and attend MCDB seminars. Three semesters of MCDB 698 are required. Beyond this requirement, students must enroll in additional semesters of MCDB 698 or enroll in seminar series as described above for fall semesters.

2. One credit hour of ethics training.

   GR ST 565  | Responsible Conduct of Research in Science and Engineering | 1       |

*Not required, but highly recommended for MCDB graduate students:*

<table>
<thead>
<tr>

<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BCB 544</td>
<td>Fundamentals of Bioinformatics</td>
<td>4</td>
</tr>
</tbody>
</table>

Non-native English speakers must pass the English Requirement as established by the university. Depending on the results of this exam additional courses may be required to meet English proficiency standards.

MCDB graduate students need to teach one semester as part of their training for an advanced degree. Students whose first language is not English must take and pass the Oral English Certification Test (OECT) to be eligible to teach.

**Curriculum Requirements for Graduate Students Seeking a MCDB Minor**

Graduate students studying at Iowa State University with an interest in completing a MCDB minor for their Ph.D. are required to complete the following curriculum requirements.

Students must be approved for the minor by the MCDB program and must follow Graduate College guidelines for POS Committee membership.

Graduate students wishing to seek a minor in MCDB are encouraged to contact the MCDB Interdepartmental Graduate Program Coordinator for further information. Inquiries can be submitted to idgp@iastate.edu.

**MCDB Minor Curriculum at the Ph.D. Level Includes:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BBMB 404</td>
<td>Biochemistry I</td>
<td>3</td>
</tr>
<tr>

**One course in each of two of the following three areas: A) Cellular Biology, B) Developmental Biology, & C) Molecular Biology.**

A. Cellular Biology
Advances in Molecular Cell Biology
- Plant Molecular, Cell and Developmental Biology
- Cell Biology
- Molecular Signaling

B. Developmental Biology
- Advances in Developmental Biology
- Plant Molecular, Cell and Developmental Biology

C. Molecular Biology
- Microbial Genetics and Genomics
- Advanced Molecular Genetics
- Plant Molecular, Cell and Developmental Biology
- Molecular Virology

*Footnote: GDCB 545 - Plant Molecular, Cellular, and Developmental Biology may be used to fulfill any one of the required component areas.

In addition to the above course requirements, MCDB graduate minors are required to register once for:
- Seminar in Molecular, Cellular, and Developmental Biology

Neuroscience

Neuroscience Interdepartmental Graduate Program
Work is offered for the master of science and doctor of philosophy degrees with a major in neuroscience. Cooperating departments include Animal Science; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemical and Biological Engineering; Chemistry; Ecology, Evolution and Organismal Biology; Food Science and Human Nutrition; Genetics, Development and Cell Biology; Kinesiology; Psychology; Veterinary Clinical Sciences; and Veterinary Diagnostic and Production Animal Medicine.

The diversity of faculty in the Interdepartmental Neuroscience major provides students with a variety of research opportunities and reflects the structure of contemporary neuroscience which has become a diverse and inter-disciplinary field. Facilities and faculty are committed to research in the following areas: neuronal membrane functions, signal transduction, neuroanatomy, neurodegenerative diseases, neuroendocrinology, neurotoxicology, neuropathology, developmental neurobiology, neurogenetics, computational neuroscience, neural networks, behavioral neuroscience, tissue engineering, neuroregeneration and brain repair.

Additional information about program faculty members is available at: www.neuroscience.iastate.edu (http://www.neuroscience.iastate.edu/).

An undergraduate or advanced degree in one of the basic or applied sciences is ordinarily a prerequisite for admission to the program. Typical program disciplines include majors in biochemistry, biology, biomedical sciences, human medicine, immunology, neurobiology, physiology, pharmacology, psychology, veterinary medicine, or zoology. Appropriate undergraduate coursework includes mathematics, chemistry, physics, and biological sciences. Prior research experience is highly encouraged. The submission of GRE General Test scores is required for admission.

Prospective students are admitted by the Neuroscience program following an internal application process and after review by the Neuroscience Admissions Committee. Students are admitted either to participate in research rotations with several faculty before deciding on a major professor and laboratory, or by direct admission into a specific lab and department. Ph.D. students typically enter via rotation and M.S. students typically enter via a direct admit. Those students entering through a rotation admit are required to complete a minimum of three research lab rotations with faculty of interest. At the end of their second semester students on rotation must select a major professor from the faculty participating in the program.

Curriculum Requirements for Neuroscience Graduate Students

Ph.D. candidates majoring in Neuroscience must take at least 72 graduate credits. These 72 credits include the below core course requirements and applicable research credits earned. Credits taken during a student’s M.S. program in Neuroscience at Iowa State University will count towards their Ph.D. in Neuroscience.

Students seeking an M.S. degree must take a total of 30 credits, with not less than 22 credits earned at ISU. M.S. students have the same core requirements as Ph.D. students.

Additional coursework for both Ph.D. and M.S. degrees is selected by the student in consultation with his/her POS Committee to meet departmental requirements and to satisfactorily prepare the student for their research project.

Graduate credits of B or better earned at another institution may be transferred at the discretion of the POS Committee and with the approval of the Neuroscience Program and the ISU Graduate College.

Additional information relating to credits required for graduate degrees can be found in the ISU Graduate College Handbook (http://www.grad-college.iastate.edu/common/handbook/).
All students majoring in Neuroscience are required to complete a core curriculum consisting of:

<table>
<thead>
<tr>
<th>Course</th>

Nutritional Sciences

Graduate Program

The Interdepartmental Graduate Program in Nutritional Sciences (IGPNS), administered through the Graduate College, under the auspices of the Chairs of Food Science and Human Nutrition (FS HN) and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. M.S. and Ph.D. degrees in Nutritional Sciences will be offered with three specializations: Animal Nutrition, Human Nutrition, or Biochemical & Molecular Nutrition.

The following undergraduate course work is recommended of all applicants who are applying to the IGPNS, but may be modified depending upon the student’s area of emphasis. Recommended course work includes organic chemistry with laboratory, physics, analytical chemistry, a nutrition course that requires biochemistry or organic chemistry as a prerequisite, and a course in biology/physiology or anatomy. Under certain circumstances students can be admitted or provisionally admitted with course work deficiencies. Students with an undergraduate degree will be generally admitted into the M.S. program and upon completion, they can then apply for admission into the Ph.D. program. However, exceptional students with experience can apply directly to the Ph.D. program.

The general requirements of the Nutritional Sciences degree at the MS level, in addition to those of Graduate College, are:

<table>

Successful completion and defense of thesis

Research conducted by the faculty and students of the major represents both basic and applied aspects of plant physiology, biochemistry and molecular biology. The experimental approaches represented in the major span the range of complexity from molecular studies, to cellular, organismal and the ecological level (crop monocultures and natural populations). Graduates have a broad understanding of basic, functional plant biology with emphases on fundamental biology, biochemistry, and molecular biology. They are able to address complex research and policy problems in agriculture, biotechnology, and basic plant biology.

All M.S. candidates take a core curriculum comprising courses recommended from the following four categories, attend research seminars, research credits (PLBIO 699 Research), annual Loomis Distinguished Lecture in Plant Biology and mini-symposium and retreats. Students will take additional courses of interest as directed by their Program of Study (POS) Committee members.

A total of 36 credits including a minimum of 16 course credits are required for a M.S.

Students are expected to complete the course work established by the Program of Study (POS) committee based on specialization with a minimum of 30 graduate-level semester credits, not less than 22 of which must be earned at Iowa State University.

The general requirements of the Nutritional Sciences degree at the PhD level, in addition to those of the Graduate College, are:

- Completion of all requirements of the MS degree in Nutritional Sciences
- 3 additional credits of graduate-level biochemistry (6 credits total including those for the M.S.), graduate-level statistics (STAT 471 Introduction to Experimental Design), and physiology (if not taken for the M.S.)
- Additional graduate-level courses in the field of study as deemed appropriate by the POS Committee and specialization, and additional teaching assistant requirements (FS HN 590C Special Topics: Teaching).

Satisfactory completion of a preliminary examination, a written dissertation, seminar presentation of dissertation research, and defense of the dissertation is also required. Overall a minimum of 72 graduate-level semester credits, no less than 36 of which must be earned at Iowa State University.

## Plant Biology
(Interdepartmental Graduate Major)

The Interdepartmental Plant Biology major (IPB) coordinates graduate education and research in the areas of plant biology including but not limited to plant biochemistry, plant cellular and molecular biology and plant physiology. Graduate study in IPB, leading to the M.S. and Ph.D. Degrees, is offered through eight participating departments: Agronomy, Biochemistry, Biophysics & Molecular Biology, Chemical and Biological Engineering, Chemistry, Ecology, Evolution and Organismal Biology, Genetics Development & Cell Biology, Horticulture, and Plant Pathology.
All Ph.D. candidates take a core curriculum comprising courses recommended from the following four categories, attend research seminars, research credits (PLBIO 699 Research), annual Loomis Distinguished Lecture in Plant Biology and mini-symposium and retreats. Students will take additional courses of interest as directed by their Program of Study (POS) Committee members.

A total of 72 credits including a minimum of 24 course credits are required for a Ph.D.

- **STAT 587** Statistical Methods for Research Workers 4
- **BBMB 404** Biochemistry I 3
  or
  - **BBMB 504** Amino Acids and Proteins
  - **BBMB 505** Bioenergetics and Metabolism
- **GDCB 513** Plant Metabolism 2

Four seminar presentations *

One of the following

- **BBMB 405** Biochemistry II
- **GDCB 511** Advanced Molecular Genetics
- **GDCB 545** Plant Molecular, Cell and Developmental Biology

Take additional courses from the following

- **AGR 516** Crop Physiology
- **GR 529** Preparing Publishable Thesis Chapters
- **PLBIO 513** Plant Metabolism 2
- **PLBIO 545** Plant Molecular, Cell and Developmental Biology 3
- **PLBIO 696** Research Seminar 1

**PLBIO 699** Research arr

**AGR 625** Genetic Strategies in Plant Breeding

**BBMB 405** Biochemistry II

**BBMB 545** Molecular Signaling

**BBMB 675** Nucleic Acid Structure and Function

**BIOL 454** Plant Anatomy

**BIOL 474** Plant Ecology

**EEOB 563** Molecular Phylogenetics

**EEOB 566** Molecular Evolution

**GDCB 510** Transmission Genetics

---

**Requirements for students seeking Plant Biology as Minor:**

- **STAT 587** Statistical Methods for Research Workers 4
- **BBMB 404** Biochemistry I 3
  or
  - **BBMB 504** Amino Acids and Proteins
  - **BBMB 505** Bioenergetics and Metabolism

9 credits from the following

- **AGR 516** Crop Physiology
- **GDCB 513** Plant Metabolism
- **GDCB 545** Plant Molecular, Cell and Developmental Biology

In addition to the required core courses, a wide selection of courses is available to IPB graduate students for broadening their scientific education. Decisions about which courses are taken and when they are taken are made by the student, initially in consultation with his or her temporary advisor, and then with his or her major advisor and eventually with the POS Committee, which also serves as the Thesis or Dissertation Committee.

---

**Seed Technology and Business**

(Interdepartmental Graduate Major)

The Graduate Program in Seed Technology and Business (STB) offers students advanced study in the seed science and technology and business management appropriate for application in the seed sector. The STB program is focused on preparing students for seed-related management roles by training the next generation of seed leaders. The program is offered by departments in the Ivy Colleges of Business and Agriculture and Life Sciences: Accounting, Agronomy, Finance, Horticulture, Agricultural Biosystems Engineering, Management Information Systems, Management, Marketing and Plant Pathology. This multidisciplinary program offers a focused online curriculum for a Master of Science in Seed Technology and Business, along with Graduate Certificates in Seed Science and Technology and in Seed Business Management.
Online Graduate Program in Seed Technology & Business

The curriculum offers a set of scientific and technical courses that are focused on seed, with a set of basic management courses, similar to those in the core courses of an MBA program. The business courses will use examples drawn from the seed industry. A creative component is required for the Master of Science degree.

Prerequisite for the program is a bachelor's degree in business, agriculture, other biological discipline, or related degrees. Graduate training in these disciplines will also be considered.

Graduates of the Graduate Program in Seed Technology and Business will be prepared for roles in management and leadership within private and public seed and seed-related organizations.

All of the courses listed below are required for the Master of Science degree. The pace of the course sequence is designed to allow the students with work and other commitments to participate. Students will complete the creative component under the guidance of their Program of Study Committee. In many cases, the creative component topic will be associated with the student's work.

Graduates of the Master of Science curriculum will be prepared for roles in management and leadership within seed related organizations, private and public.

Graduate certificate courses may be applied to the Master of Science in Seed Technology and Business. Those interested in these graduate certificates should contact the Program for details.

Information on application procedures and specific requirements of the major can be obtained at our website: http://www.seedgrad.iastate.edu or by writing to seedgrad@iastate.edu.//seedgrad@iastate.edu.

Toxicology

toxmajor@iastate.edu (//toxmajor@iastate.edu)

Interdepartmental Graduate Major

Toxicology is the science of studying the adverse effects of substances on living organisms. Students observe, gather data and predict risks and outcomes in populations. Whole organism research and cellular and molecular approaches are used to determine toxicant exposure and mechanisms. Work is offered for the degrees doctor of philosophy and master of science. Students majoring in toxicology will be affiliated with one of the following cooperating departments: Agricultural and Biosystems Engineering; Animal Science; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemistry; Entomology; Food Science and Human Nutrition; Genetics, Development and Cell Biology; Geological and Atmospheric Sciences; Natural Resource Ecology and
Management; Physics; Plant Pathology and Microbiology; Veterinary Diagnostic and Production Animal Medicine; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

The prerequisites for entrance into the graduate toxicology major include an undergraduate degree in a relevant area of study; for example, chemical engineering, biology, biochemistry, chemistry, ecology, entomology, food science and technology, microbiology, nutritional science, zoology, or veterinary medicine. Minimum undergraduate coursework should include the following or their equivalent:

- 1 year of college mathematics, including calculus
- 1 year of inorganic chemistry with quantitative analysis
- 1 course in physics
- 1 year of organic chemistry
- 2 years of biological sciences including 1 course in physiology

Other courses that are considered desirable in undergraduate preparation include: biochemistry, physical chemistry, qualitative analysis, and some specialized courses such as histology or advanced physiology.

Facilities and faculty are available for fundamental research in such areas as agricultural toxicology, drug discovery and prevention, ecotoxicology, environmental fate and effects of chemicals, insect toxicology, aquatic toxicology, food safety, nutritional toxicology, mycotoxins, neurotoxicology, cellular and molecular toxicology, reproductive toxicology, and veterinary toxicology.

Ph.D. and M.S. Students should register for TOX 689 (R) every fall and spring semester during their training.

Students majoring in toxicology will be affiliated with a cooperating department. All Ph.D. students take a core curriculum consisting of:

<table>

</tr>
</tbody>
</table>

One member of the student’s program of study committee will be a member of the toxicology faculty.

Most students awarded doctoral degrees continue their training as postdoctoral associates at major research institutions in the U.S. or abroad in preparation for research and/or teaching positions in academia, industry, the military, veterinary research, or government environmental and public health institutions. A few go directly to permanent research positions in industry. Many students awarded master’s degrees continue their training as doctoral students; however, some choose research support positions (i.e., technician, chemist, research associate) in academia, industry, or government. A more thorough list of outcomes is available at our Web site.

Graduates of the Toxicology major will be able to carefully design, execute and analyze experiments that extend the knowledge of toxicology and closely related sciences. They will be able to clearly communicate research findings, and thoroughly evaluate the literature of toxicology, contributing significantly to the advancement of the field.
Transportation

Interdepartmental Graduate Major

Work is offered for the degree master of science with a major in transportation under a cooperative arrangement with various departments including Civil, Construction and Environmental Engineering (CCEE), Community and Regional Planning (CRP), and Logistics, Operations and Management Information Systems (LOMIS). Opportunities are afforded for research in such areas as modeling and performance of transportation systems, highway safety and information systems, remote sensing, environmental analysis, techniques for urban and regional transportation system planning, environmental and social policy analysis of transportation systems, transportation policy analysis, analysis of transportation technologies, commodity distribution, public administration of the transportation planning process, regional development and transportation system interrelationships, transportation economics and finance, and planning for logistics management.

Students majoring in transportation will develop a program of study under the guidance of a program of study committee selected by the student in consultation with and approved by the chair of the faculty supervisory committee. For administrative purposes, the student’s home department will be the department originally admitting the student. A major professor may be selected from any of the three participating departments. A student must designate at least one member of the POS committee from his or her home department, and at least one member from outside the home department.

A student must complete at least 34 credits of acceptable work including preparation of a 6 credit thesis or a 2-3 credit creative component. A structured minor requires 12 credits of approved transportation courses and a thesis or creative component on a transportation related topic.

A required core includes:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>C E 551</td>
<td>Urban Transportation Planning Models</td>
<td>3</td>
</tr>
<tr>
<td>C E 691</td>
<td>Seminar in Transportation Planning</td>
<td>1</td>
</tr>
<tr>
<td>STAT 587</td>
<td>Statistical Methods for Research Workers</td>
<td>4</td>
</tr>
<tr>
<td>One course from all three cooperating departments (CRP, CCEE, and LOMIS)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Detailed requirements are available from the chair of the supervisory committee.

Graduate students pursuing a major in any of the cooperating departments who have an interest in transportation are encouraged to consider a formal declared minor in transportation. Students considering a declared minor should consult with the chair of the supervisory committee about the requirements for it.

Students typically focus their program of study to support a career in one of five areas: transportation consulting, regional and statewide transportation planning, transportation service operations and management, transportation policy and economic analysis, and transportation planning and operation for local and state governments. Graduates will have specific knowledge in one or more of these focus areas and the skills to conduct research and analysis of transportation issues. These skills allow graduates to be productive immediately in positions related to a focus area or to continue in more advanced transportation graduate work.

Wind Energy Science, Engineering and Policy

Graduate Study

Wind Energy Science, Engineering and Policy (WESEP) is an interdisciplinary Ph.D. program that prepares graduates for wind energy related careers in industry, academia, and government institutions. WESEP is a unique integration of engineering, science, and policy-related disciplines that provides students with an opportunity for breadth and depth in their program of study.

Students take a set of 11 courses and participate each semester in a one-credit seminar course. Of the 11 courses, two courses are introductory wind energy courses, eight are core courses, and one is an advanced specialization course in wind energy. The seminar course will address research methods and communications in science and engineering. Students are also required to pass a qualifying examination in the first 18 months of their program, a preliminary examination generally taken by the end of year three, and a final oral defense with written dissertation to complete the program.

Of the eight core courses, students select five courses from a primary thrust area, providing disciplinary depth, and three courses from a secondary thrust area, providing interdisciplinary breadth. Students can take additional courses within the other thrust areas as needed for their research, but this requirement ensures students are research-capable in two thrust areas.

WESEP Thrust areas

- Wind resource characterization and aerodynamics of wind farms
- Wind energy conversion system and grid operations
- Manufacturing, construction, and supply chain
- Turbine reliability & health monitoring
- Economics, policy and public perception

Admission Requirements

Applicants should have an undergraduate GPA of at least 3.0 (B average) and a B.S. degree from a calculus-based undergraduate curriculum. A
calculus-based undergraduate curriculum is one in which students take the equivalent of two years of calculus, covering differential and integral calculus, multivariable and vector calculus, and differential equations, and one year of physics, covering mechanics, thermodynamics, electric circuits, electromagnetics, and optics. The GRE is not required. Applicants who do not meet these general standards will be evaluated on an individual basis.
ACCT 215: Legal Environment of Business
(3-0) Cr. 3. F.S.SS.
Prereq: Sophomore classification
General history, structure, and principles of the US legal system. The legal
system, as an agency of social control and tool for resolving disputes.
The court systems, Constitution, torts, crimes, intellectual property,
contracts, property rights, employment law, basic business entity law,
bankruptcy, administrative agencies, environmental law and agency law.

ACCT 284: Financial Accounting
(3-0) Cr. 3. F.S.SS.
Introduction to the basic concepts and procedures of financial
accounting from a user perspective. The course examines the accounting
cycle, business terminology, basic control procedures, and the
preparation and evaluation of financial reports, with an emphasis on
financial statement analysis.

ACCT 285: Managerial Accounting
(3-0) Cr. 3. F.S.SS.
Prereq: ACCT 284
Understanding of fixed and variable costs and their role in planning,
control and performance evaluation. Examination of alternative costing
methods. Making decisions by identifying and developing relevant
information. Development of spreadsheet skills.

ACCT 301: The Accounting Cycle
(1-0) Cr. 1. F.S.SS.
Prereq: ACCT 284
Interactive computer-based analysis of the accounting cycle including
transactions and financial statements. Preparation of journal entries and
adjusting entries and completion of the closing process.

ACCT 315: Business Data Streams and Issues
(Cross-listed with MIS). Cr. 3. Alt. F., offered even-numbered years. Alt. S.,
offered odd-numbered years. SS.
Prereq: COM S 113, MIS 301, ACCT 284
Identification of open data sources and other private data sources.
Develop methods of data access, collection, and sharing; develop
methods to validate and standardize data sources; develop methods to
assess data worthiness (risk).

ACCT 383: Intermediate Managerial Accounting
(3-0) Cr. 3. F.S.
Prereq: ACCT 285 or ACCT 501; and ACCT 301
Generation, communication and use of information to assist
management with planning, control, and decision making in
manufacturing and service organizations. Includes cost concepts and
relevance to decision situations, operational and capital budgeting, and
performance evaluation. Emphasis on developing effective teamwork
skills as well as spreadsheet capabilities.

ACCT 384: Accounting Information Systems and Analytics
(3-0) Cr. 3.
Prereq: ACCT 285 or ACCT 501; ACCT 301 and MIS 301
Concepts and procedures underlying creating, sharing, reporting, storing,
and analyzing accounting data. Information technology internal controls
and audit techniques. Trends in accounting information systems.

(3-0) Cr. 3. F.S.
Prereq: ACCT 284 and ACCT 301
The conceptual framework of financial accounting. Communication of
financial information on the income and retained earnings statements,
statement of cash flows, and the balance sheet. Accounting concepts
relating to current and operational assets of the firm.

ACCT 387: Intermediate Financial Accounting II
(3-0) Cr. 3. F.S.
Prereq: Minimum of C- in ACCT 386
Financial accounting and reporting practices for business entities.
Generally accepted accounting principles (GAAP) relative to firm
liabilities, equity, income, taxes, employee benefits, leases, accounting
changes and cash flows. Discussion of current issues in financial
accounting.

ACCT 416: Business Law
(Dual-listed with ACCT 516). (3-0) Cr. 3. F.S.
Prereq: ACCT 215
Continuation of 215. The Uniform Commercial Code as applied to sales
contracts and negotiable instruments. Property law, wills and estates,
insurance, secured transactions, corporation law, partnership law and
antitrust law.

ACCT 483: Application and Communication in Managerial Accounting
(Dual-listed with ACCT 583). Cr. 3.
Prereq: ACCT 383 or ACCT 581
Business simulation focusing on generation and communication of
information to assist management with financial decision-making.
Emphasis on developing teamwork, written communication, data
visualization, and oral presentation skills.
ACCT 484: Advanced Accounting Information Systems  
(Dual-listed with ACCT 584). (3-0) Cr. 3.  
Prereq: ACCT 384  
Advanced accounting information systems concepts; database design and information retrieval, internal controls within computerized accounting information systems, financial reporting in an electronic environment.

ACCT 485: Principles of Federal Income Tax  
(3-0) Cr. 3. F.S.  
Prereq: Minimum of C- in ACCT 386 or ACCT 501  
Introduction to the fundamentals of federal income taxation and concepts applicable to all tax entities. Addresses issues related to the measurement and recognition of income, deductions, gains, and losses, taxation of property transactions, and basis / cost recovery concepts. Includes coverage of tax law policy objectives, tax implications of business and investment decisions, tax versus financial reporting treatment of common business transactions, and ethical issues related to tax compliance and planning.

ACCT 487: Volunteer Income Tax Assistance  
(Dual-listed with ACCT 587). (2-2) Cr. 3. Repeatable, maximum of 6 credits. S.  
Prereq: ACCT 285 or ACCT 501  
Introduction to and field work in the preparation of individual income tax returns (state and federal). Basic coverage of filing and residency status, taxable income, exemptions, deductions, and credits. Tax software usage and online filing.

ACCT 488: Governmental and Non-profit Institution Accounting  
(Dual-listed with ACCT 588). (3-0) Cr. 3.  
Prereq: ACCT 386  
Accounting and financial reporting principles of local and state governments, including universities, schools, and hospitals. In addition, accounting and financial reporting of non-profit organizations will be addressed. Financial statements of local governmental units and the university are explored.

ACCT 489: Corporate Social Responsibility Reporting  
(Dual-listed with ACCT 589). (3-0) Cr. 3. S.  
Prereq: ACCT 386 or ACCT 501  
Theory and practice of social and environmental reporting, the role of the corporation in society, and the mechanisms by which society might hold corporations accountable for their actions.

ACCT 490: Independent Study  
Cr. 1-3. Repeatable. F.S.S.S.  
Prereq: ACCT 285, senior classification, permission of instructor

ACCT 495: Advanced Financial Accounting Problems  
(Dual-listed with ACCT 595). (3-0) Cr. 3.  
Prereq: ACCT 387  
Accounting for business combinations and affiliated companies, intercompany transactions, and consolidated financial statements; Partnership accounting; Segment and Interim Reporting; Multinational accounting.

ACCT 496: Accounting in the Global Economy  
(Dual-listed with ACCT 596). (3-0) Cr. 3.  
Prereq: ACCT 386 or ACCT 501  
Financial reporting issues in a global environment, including introduction to International Financial Reporting Standards (IFRS) and the potential for the use of IFRS in the U.S. Accounting and managerial issues faced by multinational corporations. Technical issues such as transfer pricing, inflation accounting and taxation will be discussed.

ACCT 497: Introduction to Auditing  
(3-0) Cr. 3. F.S.  
Prereq: ACCT 384, ACCT 387 and STAT 326  
The conceptual framework of auditing. Professional ethics. External reporting concepts. Audit methodology including risk analysis, internal control, procedures for gathering evidence and the role of statistical sampling in auditing.

ACCT 498: Capstone in Accounting  
(2-0) Cr. 2. F.  
Prereq: ACCT 383, ACCT 384, ACCT 387, credit or enrollment in ACCT 485  
Integrative studies in accounting. Development of critical thinking, ethical reasoning, professional research and teamwork skills. Written, visual, and oral communication with corporate stakeholders.

Courses primarily for graduate students, open to qualified undergraduates:

ACCT 501: Financial Accounting  
(3-0) Cr. 3.  
Prereq: Enrollment in MBA program or departmental permission  
A general introduction to financial accounting information. Topics covered include the use and analysis of financial information, the regulatory environment, the role of International Financial Reporting Standards (IFRS), and the use of the internet and electronic spreadsheets as a means of accessing and analyzing financial data.
ACCT 515: Accounting Analytics
Cr. 3. F.
Prereq: ACCT 384 or instructor permission
Applications and skills for performing data analytics in accounting contexts. Explores conceptual framework for providing data-driven insights and recommendations. Includes hands-on experiences working with different types of data and the latest analysis tools.

ACCT 516: Business Law
(Dual-listed with ACCT 416). (3-0) Cr. 3. F.S.
Prereq: ACCT 215
Continuation of 215. The Uniform Commercial Code as applied to sales contracts and negotiable instruments. Property law, wills and estates, insurance, secured transactions, corporation law, partnership law and antitrust law.

ACCT 571: Real Estate Law
(3-0) Cr. 3.
Prereq: Enrollment in the MRED or instructor permission.
Fundamentals of real estate finance and development from a legal perspective and in a transactional setting. Topics include land acquisition and finance, choice of entity, tax aspects, management, disposition of real property, and recent legal developments. Legal responsibilities of owners, designers, and contractors are also examined by highlighting typical contractual relationships in place throughout the design and construction process.

ACCT 581: Accounting for Decision Making
(3-0) Cr. 3.
Prereq: Graduate Classification

ACCT 582: Corporate Governance and Top Management
(Cross-listed with MGMT). (3-0) Cr. 3.
Prereq: MGMT 503 or permission
Duties, structure, and functioning of top management teams and corporate boards of directors. CEO/board tenure and succession planning, top management compensation, board committee composition, assessment of CEO and board performance, theories of corporate governance, management of the corporate strategic agenda, governance codes, international governance, and chairman/CEO duality. Case studies and contemporary issues discussed.

ACCT 583: Application and Communication in Managerial Accounting
(Dual-listed with ACCT 483). Cr. 3.
Prereq: ACCT 383 or ACCT 581
Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, data visualization, and oral presentation skills.

ACCT 584: Advanced Accounting Information Systems
(Dual-listed with ACCT 484). (3-0) Cr. 3.
Prereq: ACCT 384
Advanced accounting information systems concepts; database design and information retrieval, internal controls within computerized accounting information systems, financial reporting in an electronic environment.

ACCT 585: Taxes and Business Strategy
(3-0) Cr. 3.
Prereq: ACCT 485
Integration of concepts from accounting, finance, and economics to determine how taxes affect business decisions. Provides students with a conceptual framework for thinking about business tax planning and applies it to various common business decisions.

ACCT 586: Advanced Federal Taxation
(3-0) Cr. 3.
Prereq: ACCT 485
Advanced coverage of federal taxation including issues related to the taxation of corporations, partnerships, estates and trusts, and their owners. Includes coverage of rules, concepts, background, and planning opportunities related to a number of common transactions involving these entities.

ACCT 587: Volunteer Income Tax Assistance
(Dual-listed with ACCT 487). (2-2) Cr. 3. Repeatable, maximum of 6 credits. S.
Prereq: ACCT 285 or ACCT 501
Introduction to and field work in the preparation of individual income tax returns (state and federal). Basic coverage of filing and residency status, taxable income, exemptions, deductions, and credits. Tax software usage and online filing.

ACCT 588: Governmental and Non-profit Institution Accounting
(Dual-listed with ACCT 488). (3-0) Cr. 3.
Prereq: ACCT 386
Accounting and financial reporting principles of local and state governments, including universities, schools, and hospitals. In addition, accounting and financial reporting of non-profit organizations will be addressed. Financial statements of local governmental units and the university are explored.
ACCT 589: Corporate Social Responsibility Reporting
(Dual-listed with ACCT 489). (3-0) Cr. 3. S.
Prereq: ACCT 386 or ACCT 501
Theory and practice of social and environmental reporting, the role of the corporation in society, and the mechanisms by which society might hold corporations accountable for their actions.

ACCT 590: Special Topics
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: Permission of instructor
For students wishing to do individual research in a particular area of accounting.

ACCT 591: Fraud Examination and Prevention
(3-0) Cr. 3.
Prereq: ACCT 497 or ACCT 501
Principles and methodology of fraud detection and deterrence. Addresses the causes and elements of fraud, asset theft, corruption, financial statement mis-representation, internal controls for fraud prevention, investigative evidence gathering, and legal aspects of fraud.

ACCT 592: Financial Statement Analysis
(3-0) Cr. 3.
Prereq: ACCT 386 or ACCT 501
Presentation and analysis of financial statement information from the point of view of the primary users of such data: owners and creditors. Topics include the financial reporting system, the primary financial statements, effects of accounting method choice on reported financial data, and firm valuation.

ACCT 595: Advanced Financial Accounting Problems
(Dual-listed with ACCT 495). (3-0) Cr. 3.
Prereq: ACCT 387
Accounting for business combinations and affiliated companies, intercompany transactions, and consolidated financial statements; Partnership accounting; Segment and Interim Reporting; Multinational accounting.

ACCT 596: Accounting in the Global Economy
(Dual-listed with ACCT 496). (3-0) Cr. 3.
Prereq: ACCT 386 or ACCT 501
Financial reporting issues in a global environment, including introduction to International Financial Reporting Standards (IFRS) and the potential for the use of IFRS in the U.S. Accounting and managerial issues faced by multinational corporations. Technical issues such as transfer pricing, inflation accounting and taxation will be discussed.

ACCT 597: Advanced Auditing and Assurance Services
(3-0) Cr. 3.
Prereq: ACCT 497
A study of advanced auditing and assurance issues. Topics include auditor independence, audit risk analysis, internal control evaluation and reporting, fraud detection, data analytic applications in auditing, audit reporting, auditors' legal liability, and non-financial information assurance.

(3-0) Cr. 3. F.
Prereq: ACCT 386 or ACCT 501

ACCT 599: Creative Component
Cr. 2.
Prereq: Admission to the Master of Accounting Program
This course prepares students to complete their creative component project option in the Master of Accounting degree.

Actuarial Science (ACSCI)

Any experimental courses offered by ACSCI can be found at: registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

ACSCI 401: Loss Models I
(3-0) Cr. 3.
Prereq: STAT 341
Probability distributions used to model uncertain events in actuarial practice. Aggregate models, evaluating the effect of various coverage modifications such a deductibles and limits. Construction of empirical models, calculations of common risk measures, and calculations of commonly used severity and frequency models. Various methods for estimating distributional parameters and their properties.

ACSCI 402: Credibility Theory
(3-0) Cr. 3.
Prereq: ACSCI Theory
Bayesian estimation, including conjugate priors, posterior distributions, and the Poisson-gamma model. Credibility theory, including limited fluctuation credibility, applying Bayesian analysis for both discrete and continuous models, Buhlmann and Buhlmann-Straub models, and their relationship to Bayesian models. Simulating discrete and continuous random variables and the bootstrap method for estimating mean squared error.
Advertising (ADVRT)

Any experimental courses offered by ADVRT can be found at:
registrar.iastate.edu/faculty-staff/courses/explistings/(http://
www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

ADVRT 230: Advertising Principles
(3-0) Cr. 3.
Historical, social, economic and legal aspects of advertising. Evaluations
of advertising research, media, strategy and appeals. Study of the
creation of advertising.

ADVRT 301: Research and Strategic Planning for Advertising and Public
Relations
(Cross-listed with P R). (3-0) Cr. 3.
Prereq: ADVRT 230 or P R 220
The use of primary and secondary research for situations, organizations
and the public. Formation and development of strategic plans for public
relations and advertising students.

ADVRT 334: Advertising Creativity
(2-1) Cr. 3.
Prereq: JL MC 110; Minimum of C+ in JL MC 201; ADVRT 301/P R 301
Development and execution of creative advertising materials.
Copywriting, art direction and computer applications. Creative strategy
development, execution and evaluation.

ADVRT 335: Advertising Media Planning
(3-0) Cr. 3.
Prereq: ADVRT/P R 301
Concepts of media planning and selection in the development, execution
and evaluation of advertising campaigns. Characteristics and capabilities
of the advertising media. Utilization of market segmentation, consumer
buying and media audience databases.

ADVRT 336: Advertising Account Management
(3-0) Cr. 3.
Prereq: JL MC 110; Minimum of C+ in JL MC 201; ADVRT/P R 301
Fundamentals of account management with emphasis on leadership,
sales techniques, relationship building, presentation skills, and strategic
thinking. Includes aspects of agency communications, team building,
client management, evaluating creative concepts and media plans, and
developing strategic proposals and campaign recommendations.

ADVRT 390: Professional Skills Development
F.S.
Prereq: Minimum of C in JL MC 201; other vary by topic. Instructor
permission for non-majors.
Check with Greenlee School for course availability.

ADVRT 391: Short Course Intensive
Focused short courses on timely concepts. Check with Greenlee School
for course availability. Offered on a satisfactory-fail basis only.

ADVRT 434: Advertising Campaigns
(3-0) Cr. 3. F.S.
Prereq: Minimum of C+ in ADVRT 334 or ADVRT 336, and major status
Development of advertising campaigns including primary and secondary
research, target audience analysis, campaign strategy, media planning,
budgeting and creative execution.

ADVRT 435: Advertising Competition
Prereq: Permission of instructor, Junior/senior standing strongly
recommended
Preparation of materials for regional and national competitions.

ADVRT 436: Advertising Portfolio Practicum
(3-0) Cr. 3. S.
Prereq: Minimum of C+ in ADVRT 334, non-majors with instructor permission
Advanced advertising writing and design. May include campaign
development for competitions. Other projects include creative
development in a variety of media for an online portfolio.

ADVRT 490: Independent Study in Communication
Cr. arr.
Prereq: Junior classification and contract with supervising professor to
register
Projects during which students may study problems associated with
a medium, a professional specialization, a philosophical or practical
concern, a reportorial method or writing technique, or a special topic
in their field. Credit is not given for working on student or professional
media without an accompanying research component. No more than
3 credits of ADVRT/JLMC/PR 490 may be used toward a degree in the
Greenlee School.

ADVRT 497: Special Topics in Communication
Prereq: Junior classification. See Schedule of Classes for possible pre-
requisites.
Seminars or one-time classes on topics of relevance to students in
communication.
ADVRT 499: Professional Media Internship
Cr. 1-3. F.S.SS.
Prereq: JL MC majors: JL MC 110 and minimum of C+ in JL MC 302 or JL MC 303; ADVRT majors: JL MC 110, ADVRT/P R 301 and minimum of C+ in JL MC 201; P R majors: JL MC 110, ADVRT/P R 301 and minimum of C+ in P R 321.
All students, formal faculty advisor approval.
See ADVRT/JL MC/P R 499A or 499B. Offered on a satisfactory-fail basis only.

ADVRT 499A: Professional Media Internship: Required
Cr. 3. F.S.SS.
Prereq: JL MC majors: JL MC 110 and minimum of C+ in JL MC 302 or JL MC 303; ADVRT majors: JL MC 110, ADVRT/P R 301 and minimum of C+ in JL MC 201; P R majors: JL MC 110, ADVRT/P R 301 and minimum of C+ in P R 321.
All students, formal faculty advisor approval.
Initial, required internship. A 400-hour (for 3 credits) internship in the student's specialization. Assessment based on employer evaluations, student reports and faculty reviews. Available only to Greenlee School majors. Offered on a satisfactory-fail basis only.

ADVRT 499B: Professional Media Internship: Optional
Cr. 1-3. F.S.SS.
Prereq: JL MC majors: JL MC 110 and minimum of C+ in JL MC 302 or JL MC 303; ADVRT majors: JL MC 110, ADVRT/P R 301 and minimum of C+ in JL MC 201; P R majors: JL MC 110, ADVRT/P R 301 and minimum of C+ in P R 321.
All students, formal faculty advisor approval.
Optional internship in the student's specialization. Assessment based on employer evaluations, student reports and faculty reviews. Available only to Greenlee School majors. Offered on a satisfactory-fail basis only.

Aerospace Engineering (AER E)

Any experimental courses offered by AER E can be found at: registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

AER E 160: Aerospace Engineering Problems With Computer Applications Laboratory
(2-2) Cr. 3. F.S.
Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

AER E 160H: Aerospace Engineering Problems With Computer Applications Laboratory: Honors
(2-2) Cr. 3. F.S.
Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

AER E 161: Numerical, Graphical and Laboratory Techniques for Aerospace Engineering
(2-2) Cr. 3. F.S.
Prereq: Credit or enrollment in AER E 160 or equivalent course
Computer-based problem solving using Matlab(R), with emphasis on numerical methods. Introduction to solid modeling and aerospace design using SolidWorks.

AER E 161H: Numerical, Graphical and Laboratory Techniques for Aerospace Engineering: Honors
(2-2) Cr. 3. F.S.
Prereq: AER E 160 or equivalent course
Computer-based problem solving using Matlab(R), with emphasis on numerical methods. Introduction to solid modeling and aerospace design using SolidWorks.

AER E 192: Aerospace Seminar
Cr. R. S.
Vectors, differentiation, integration, matrices, and systems of linear equations.

Cr. R. S.
Vectors, differentiation, integration, matrices, and systems of linear equations.

AER E 261: Introduction to Performance and Design
(3-0) Cr. 3. F.S.
Prereq: MATH 166, PHYS 231, PHYS 231L, credit or enrollment in AER E 161
Aerodynamics of the airplane, lift and drag, drag polar, propulsion characteristics of turbojets and piston props, level flight, range, endurance, climbing flight, turning flight, take-off and landing, design examples.
AER E 265: Scientific Balloon Engineering and Operations
(Cross-listed with MTEOR) (0-2) Cr. 1. Repeatable. F.
Engineering aspects of scientific balloon flights. Integration of science mission objectives with engineering requirements. Operations team certification. FAA and FCC regulations, communications, and command systems. Flight path prediction and control.

AER E 290: Aerospace Engineering Independent Study: Independent Study
Cr. 1-2. Repeatable.
Prereq: Sophomore classification, approval of the department

AER E 290A: Aerospace Engineering Independent Study: Flight ground instruction
Cr. 1-2. Repeatable.
Prereq: Sophomore classification, approval of the department

AER E 290B: Aerospace Engineering Independent Study: In-flight training
Cr. 1-2. Repeatable.
Prereq: AER E 301

AER E 290C: Aerospace Engineering Independent Study: Other
Cr. 1-2. Repeatable.
Prereq: AER E 301

AER E 294: Make to Innovate I
Cr. 1. Repeatable, maximum of 3 credits. F.S.
Prereq: Restricted to Freshman and Sophomore classifications, Instructor permission required.
Multidisciplinary projects to engage students in the fundamentals of engineering, project management, systems engineering, teamwork, and oral and visual communication. Students will define and attain their team objectives and milestones that are approved by the instructor. Can only be used toward graduation in these cases. To make credit deficiencies in 100 or 200 level courses. No more than 2 credits of Aer E 294X can be used to make-up credit deficiencies in 100 or 200 level courses. Cannot be used in any category or technical electives in the Aer E curriculum

AER E 301: Flight Experience
Cr. R. F.S.
Prereq: Credit or enrollment in AER E 355
Two hours of in-flight training and necessary ground instruction. Course content prescribed by the Aerospace Engineering Department. Ten hours of flight training certified in a pilot log book can be considered by the course instructor as evidence of satisfactory performance in the course. Offered on a satisfactory-fail basis only.

AER E 310: Aerodynamics I: Incompressible Flow
(3-0) Cr. 3. F.S.
Prereq: Grade of C- or better in AER E 261 and MATH 265

AER E 311: Aerodynamics II: Compressible Flow
(3-0) Cr. 3. F.S.
Prereq: AER E 310, M E 231

AER E 321: Flight Structures Analysis
(3-0) Cr. 3. F.S.
Prereq: E M 324, Credit or enrollment in MATH 266 or 267

AER E 322: Aerospace Structures Laboratory
(1-2) Cr. 2. F.S.
Prereq: Credit or enrollment in AER E 321

AER E 331: Flight Control Systems I
(3-0) Cr. 3. F.S.
Prereq: AER E 355
Linear system analysis. Control system designs using root-locus and frequency response methods. Applications in flight control systems.
AER E 344: Aerodynamics and Propulsion Laboratory
(2-2) Cr. 3. F.S.
Prereq: AER E 310; Coreq: AER E 311
Similitude and dimensional analysis. Measurement uncertainty analysis.
Pressure and velocity measurement methods and instruments. Pressure
distribution around a circular cylinder. Aerodynamic performance of low-
speed airfoils. Airfoil wake flow; Boundary layer flow. Flow visualization
techniques for supersonic flows and de Laval nozzles.

AER E 351: Astrodynamics I
(3-0) Cr. 3. F.S.
Prereq: M E 345
Introduction to astrodynamics. Two-body Keplerian satellite and
planetary motion. Geocentric and extraterrestrial trajectories and
applications. Ballistic missiles.

AER E 355: Aircraft Flight Dynamics and Control
(3-0) Cr. 3. F.S.
Prereq: AER E 261, MATH 267, M E 345
Aircraft rigid body equations of motion, linearization, and modal analysis.
Longitudinal and lateral-directional static and dynamic stability analysis.
Flight handling characteristics analysis. Longitudinal and lateral-
directional open loop response to aircraft control inputs. Aircraft flight
handling qualities.

AER E 361: Computational Techniques for Aerospace Design
(2-2) Cr. 3. F.S.
Prereq: AER E 310, MATH 267, E M 324, M E 345
Advanced programming, workstation environment, and development of
computational tools for aerospace analysis and design. Technical report
writing.

AER E 362: Aerospace Systems Integration
(3-0) Cr. 3. F.S.
Prereq: ENGL 250, Junior standing in Aerospace Engineering or permission of
instructor
Emphasis on impact of component interfaces in aerospace systems.
Understand how changes in variables associated with individual
components impact the performance of the aerospace system. Solving
aerospace engineering problems and presenting solutions through
reports. Specific integration challenges include: capturing implicit
disciplinary interactions (e.g. structures/aerodynamics, propulsion/
aerodynamics, etc.), propagating tolerances through the system (i.e.
uncertainty modeling), balancing component attributes in the system
objective.

AER E 381: Introduction to Wind Energy
(3-0) Cr. 3. S.
Prereq: MATH 166, PHYS 231, PHYS 231L
Basic introduction to the fundamentals of Wind Energy and Wind Energy
conversion systems. Topics include but not limited to various types of
wind energy conversion systems and the aerodynamics, blade and tower
structural loads, kinematics of the blades and meteorology.

AER E 396: Summer Internship
Cr. R. Repeatable. SS.
Prereq: Permission of department and Engineering Career Services
Professional work period of at least 10 weeks during the summer.
Students must register for this course prior to commencing work. Offered
on a satisfactory-fail basis only.

AER E 398: Cooperative Education
Cr. R. Repeatable. F.S.
Prereq: Permission of department and Engineering Career Services.
Professional work period. One semester per academic or calendar year.
Students must register for this course prior to commencing work. Offered
on a satisfactory-fail basis only.

AER E 407: Applied Formal Methods
(Dual-listed with AER E 507). (Cross-listed with COM S). Cr. 3. S.
Prereq: AER E 361 for AER E majors. COM S 311 for COM S majors. AER E 361
or COM S 311, or an equivalent course, plus instructor permission for other
majors.
Introduction to the fundamentals of formal methods, a set of
mathematically rigorous techniques for the formal specification,
validation, and verification of safety- and security-critical systems. Tools,
techniques, and applications of formal methods with an emphasis on
real-world use-cases such as enabling autonomous operation. Build
experience in writing mathematically analyzable specifications from
English operational concepts for real cyberphysical systems, such as
aircraft and spacecraft. Review capabilities and limitations of formal
methods in the design, verification, and system health management of
today's complex systems.

AER E 411: Aerospace Vehicle Propulsion
(3-0) Cr. 3. F.S.
Prereq: AER E 311, AER E 344
Atmospheric propulsion system performance and cycle analysis.
Momentum theorem, thrust and propulsive efficiency. Thermodynamics
of compressible flow with heat and work addition. Components and
principles of turbojet, ramjet, and turbofan aircraft engines. Introduction
to rocket engines.
AER E 412: Spacecraft Electric Propulsion
(3-0) Cr. 3. S.
Prereq: AER E 311

AER E 415: Rocket Propulsion
(3-0) Cr. 3. F.S.
Prereq: AER E 311 and AER E 344
Components and principles of liquid rocket engines, solid rocket motors, and hybrid rocket motors. Rocket flight performance and rocket staging. Combustion and thermochemistry. Rocket cooling and nozzle heat transfer. Introduction to nuclear thermal propulsion and electric propulsion systems. Applications to spacecraft.

AER E 417: Experimental Mechanics
(Dual-listed with AER E 517). (Cross-listed with E M). (2-2) Cr. 3. Alt. F., offered even-numbered years.
Prereq: E M 324; MAT E 273
Introduction to fundamental concepts for force, displacement, stress and strain measurements for structures and materials applications. Strain gage theory and application. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro- and nano-scale regimes. Selected laboratory experiments.

AER E 421: Advanced Flight Structures
(2-2) Cr. 3. F.S.
Prereq: AER E 321, MATH 266 or MATH 267
Analysis of indeterminate flight structures including finite element laboratory. Static analysis of complex structural components subject to thermal and aerodynamic loads. Analytical and finite element solutions for stresses and displacements of membrane, plane stress, plate structures. Buckling of beams, frames, and plate structures. Introduction to vibration of flight structures. Steady state and transient structural response using normal modal analysis.

AER E 422: Vibrations and Aeroelasticity
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: E M 324 or AER E 321

AER E 423: Composite Flight Structures
(2-2) Cr. 3. S.
Prereq: E M 324; MAT E 273
Fabrication, testing and analysis of composite materials used in flight structures. Basic laminate theory of beams, plates and shells. Manufacturing and machining considerations of various types of composites. Testing of composites for material properties, strength and defects. Student projects required.

AER E 426: Design of Aerospace Structures
(Dual-listed with AER E 526). (2-2) Cr. 3. F.
Prereq: E M 324
Detailed design and analysis of aerospace vehicle structures. Material selection, strength, durability and damage tolerance, and validation analysis. Design for manufacturability.

AER E 432: Flight Control Systems II
(3-0) Cr. 3. F.
Prereq: AER E 331

AER E 433: Spacecraft Dynamics and Control
(3-0) Cr. 3. F.
Prereq: M E 345
Three-dimensional rotational kinematics and attitude dynamics of a rigid body in space. Classical stability analysis of spinning spacecraft with or without energy dissipation. Attitude dynamics, stability, and control of spacecraft in a circular orbit in the presence of gravity-gradient torques. Introduction to spacecraft attitude determination and control systems (ADCS) with emphasis on modern attitude determination algorithms. Simulation of spacecraft attitude dynamics and control problems of practical interest using programming and analysis software.

AER E 442: V/STOL Aerodynamics and Performance
(3-0) Cr. 3. F.
Prereq: AER E 261
Introduction to the aerodynamics, performance, stability, control and critical maneuvering characteristics of V/STOL vehicles. Topics include hovercrafts, jet flaps, ducted fans and thrust vectored engines.
AER E 445: Experimental Flow Mechanics and Heat Transfer  
(Dual-listed with AER E 545). (3-0) Cr. 3. F.  
**Prereq:** AER E 310 or M E 335 or A B E 378  
Similitude and dimensional analysis. Measurement uncertainty analysis; Fluid mechanical apparatus: wind tunnel and water tunnels. Various experimental techniques widely used for fluid mechanics, aerodynamics, heat transfer, and combustion studies: Pressure gauge and transducers; Pitot tube; hot wire anemometry; Shadowgraph and Schlieren Photography; laser Doppler velocimetry; particle image velocimetry (PIV); advanced PIV techniques (stereo PIV, 3-D PIV, Tomographic PIV, Holograph PIV and microscopic PIV); laser induced fluorescence; pressure sensitive painting, temperature sensitive painting; molecular tagging velocimetry; molecular tagging thermometry. Extensive applications and laboratory experiments will be included.

AER E 446: Computational Fluid Dynamics  
(3-0) Cr. 3. F.  
**Prereq:** AER E 311, AER E 361 and proficiency in at least one programming language  

AER E 448: Fluid Dynamics of Turbomachinery  
(Cross-listed with M E). (3-0) Cr. 3. S.  
**Prereq:** AER E 311 or M E 335  
Applications of principles of fluid mechanics and thermodynamics in performance analysis and design of turbomachines. Conceptual and preliminary design of axial and radial flow compressors and turbines using velocity triangles and through-flow approaches.

AER E 451: Astrodynamics II  
(3-0) Cr. 3. F.S.  
**Prereq:** AER E 351  
Orbit determination and prediction using Gibb’s and Gauss’ methods. Advanced orbit maneuvers, triple-, and fixed-impulse; universal variables; Kepler’s problem. Earth gravity field models and gravity harmonics, orbit perturbations, advanced dynamics, variational methods, relative orbital mechanics, and Clohessy-Wiltshire equations.

AER E 452: Introduction To Systems Engineering And Analysis  
(Cross-listed with I E). Cr. 3. SS.  
**Prereq:** Junior Classification in an Engineering Major  
Principles of systems engineering to include problem statement formulation, stakeholder analysis, requirements definition, system architecture and concept generation, system integration and interface management, verification and validation, and system commissioning and decommissioning operations. Introduction to discrete event simulation processes. Students will work in groups to propose, research, and present findings for a systems engineering topic of current relevance.

AER E 461: Modern Design Methodology with Aerospace Applications  
(2-2) Cr. 3. F.S.  
**Prereq:** AER E 361, AER E 311, AER E 321, AER E 322, AER E 344, AER E 351, AER E 355  
Introduction to modern engineering design methodology. Computational constrained optimal design approach including selection of objective function, characterization of constraint system, materials and strength considerations, and sensitivity analyses. The class contains two focus sections. One section assigns design projects in Aeronautics, and the other assigns design projects in Astronautics.

AER E 462: Design of Aerospace Systems  
(1-4) Cr. 3. F.S.  
**Prereq:** AER E 461  
Fundamental principles used in engineering design of aircraft, rockets, and space systems. Preliminary design of aerospace vehicles. Engineering Ethics. The class contains two focus sections. One section assigns design projects in Aeronautics, and the other section assigns design projects in Astronautics.

AER E 463: Introduction to Multidisciplinary Design Optimization  
(Dual-listed with AER E 563). (3-0) Cr. 3. F.  
**Prereq:** senior standing in College of Engineering or permission of instructor  
Introduction to the theory and methods of Multidisciplinary Design Optimization (MDO), including system coupling, system sensitivity methods, decomposition methods, MDO formulations (such as multi-discipline feasible (MDF), individual discipline feasible (IDF) and all-at-once (AAO) approaches, and MDO search methods.

AER E 464: Spacecraft Systems  
(3-0) Cr. 3. S.  
**Prereq:** AER E 351  
An examination of spacecraft systems including attitude determination and control, power, thermal control, communications, propulsion, guidance, navigation, command and data handling, and mechanisms. Explanation of space and operational environments as they impact spacecraft design. Includes discussion of safety, reliability, quality, maintainability, testing, cost, legal, and logistics issues.
AER E 466: Multidisciplinary Engineering Design
(Cross-listed with A B E, B M E, CPR E, E E, ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S.
Prereq: Student must be within two semesters of graduation; permission of instructor.
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

AER E 467: Multidisciplinary Engineering Design II
(Cross-listed with ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable, maximum of 2 times. Alt. F., offered irregularly. Alt. S., offered irregularly. Prereq: Student must be within two semesters of graduation or receive permission of instructor.
Build and test of a conceptual design. Detail design, manufacturability, test criteria and procedures. Application of design tools such as CAD and CAM and manufacturing techniques such as rapid prototyping. Development and testing of a full-scale prototype with appropriate documentation in the form of design journals, written reports, oral presentations and computer models and engineering drawings.

AER E 468: Large-Scale Complex Engineered Systems (LSCES)
(Dual-listed with AER E 568). (Cross-listed with I E). (3-0) Cr. 3. S.
Prereq: senior standing in College of Engineering or permission of AerE 468 instructor
Introduction to the theoretical foundation and methods associated with the design for large-scale complex engineered systems, including objective function formation, design reliability, value-driven design, product robustness, utility theory, economic factors for the formation of a value function and complexity science as a means of detecting unintended consequences in the product behavior.

AER E 480: Ultrasonic Nondestructive Evaluation
(Cross-listed with E M). (3-0) Cr. 3. S.
Prereq: E M 324, MATH 266 or MATH 267, PHYS 232 and PHYS 232L
Introduction to stress/strain, Hooke's law, and elastic wave propagation in two dimensions in isotropic media. Ultrasonic plane-wave reflection and transmission; and simple straight-crested guided waves. Transducer construction, behavior, and performance. Simple signal analysis and discrete signal processing. The last few weeks of the course are devoted to case studies.

AER E 481: Advanced Wind Energy: Technology and Design
(3-0) Cr. 3. S.
Prereq: AER E 381 or senior classification in engineering or junior in engineering with a course in fluid mechanics
Advanced topics in wind energy, emphasis on current practices. Theoretical foundations for horizontal and vertical axis wind turbine. Design codes for energy conversion systems design, aerodynamic and structural load estimation, wind resource characterization wind farm design, optimization.

AER E 483: Aeroacoustics
(Dual-listed with AER E 583). Cr. 3.
Prereq: AER E 311 or M E 335; and MATH 266 or MATH 267
Noise metrics, Linear wave equation and its solution in 1-, 2-, and 3-D using Green’s functions. Propagation of sound in free and confined spaces. Aerodynamic noise sources in engineering machines: aircraft engine noise, airframe noise, wind turbine noise, etc.

AER E 490: Aerospace Engineering Independent Study
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490A: Aerospace Engineering Independent Study: Aero and/or Gas Dynamics
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490B: Aerospace Engineering Independent Study: Propulsion
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490C: Aerospace Engineering Independent Study: Aerospace Structures
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490D: Aerospace Engineering Independent Study: Flight Dynamics
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490E: Aerospace Engineering Independent Study: Spacecraft Systems
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490F: Aerospace Engineering Independent Study: Flight Control Systems
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department
AER E 490G: Aerospace Engineering Independent Study: Aeroelasticity
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490H: Aerospace Engineering Independent Study: Independent Study, Honors
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490I: Aerospace Engineering Independent Study: Design
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490K: Aerospace Engineering Independent Study: Wind Engineering
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490M: Aerospace Engineering Independent Study: Intelligent Systems and Autonomy
Cr. 1-6. Repeatable. F.S.SS.
Prereq: Junior or senior classification, approval of department

AER E 490O: Aerospace Engineering Independent Study: Other
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 494: Make to Innovate II
Cr. 2-3. Repeatable, maximum of 3 times. F.S.
Prereq: Restricted to Junior or Senior classifications, Instructor permission required.
Multidisciplinary projects to engage students in the fundamentals of engineering, project management, systems engineering, teamwork, and oral and visual communication. Students will define and attain their team objectives and milestones that are approved by their instructors. Maximum of 6 credits may count toward graduation as Technical Elective.

AER E 499: Senior Project
Cr. 1-2. Repeatable. F.S.
Prereq: Senior classification, credit or enrollment in AER E 491
Development of aerospace principles and concepts through individual research and projects. Written report.

Courses primarily for graduate students, open to qualified undergraduates:

AER E 501: Advanced Engineering Analysis
(3-0) Cr. 3. F.
Prereq: Math 267 or equivalent
Linear ordinary differential equations with variable coefficients; hyperbolic, parabolic, and elliptic equations; tensors. None

AER E 507: Applied Formal Methods
(Dual-listed with AER E 407). (Cross-listed with COM S). Cr. 3. S.
Prereq: AER E 361 for AER E majors. COM S 311 for COM S majors. AER E 361 or COM S 311, or an equivalent course, plus instructor permission for other majors.
Introduction to the fundamentals of formal methods, a set of mathematically rigorous techniques for the formal specification, validation, and verification of safety- and security-critical systems. Tools, techniques, and applications of formal methods with an emphasis on real-world use-cases such as enabling autonomous operation. Build experience in writing mathematically analyzable specifications from English operational concepts for real cyberphysical systems, such as aircraft and spacecraft. Review capabilities and limitations of formal methods in the design, verification, and system health management of today’s complex systems.

AER E 511: Wind Energy System Design
(Cross-listed with WESEP). (3-0) Cr. 3.
Prereq: WESEP 501 and WESEP 502
Advanced design, control, and operation of wind plants. Topics include electromechanical energy conversion systems, aerodynamic and aeroelastic loads, optimal control of wind farms, life cycle management strategies, tall tower design, and prediction of component residual life.

AER E 514: Advanced Mechanics of Materials
(Cross-listed with E M). (3-0) Cr. 3. F.
Prereq: E M 324
AER E 517: Experimental Mechanics
(Dual-listed with AER E 417). (Cross-listed with E M). (2-2) Cr. 3. Alt. F., offered even-numbered years.
Prereq: E M 324; MAT E 273
Introduction to fundamental concepts for force, displacement, stress and strain measurements for structures and materials applications. Strain gage theory and application. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro- and nano-scale regimes. Selected laboratory experiments.

AER E 521: Airframe Analysis
(3-0) Cr. 3. F.
Prereq: AER E 421 or E M 424
Analysis of static stresses and deformation in continuous aircraft structures. Various analytical and approximate methods of analysis of isotropic and anisotropic plates and shells.

AER E 522: Design and Analysis of Composite Materials
(3-0) Cr. 3. F.
Prereq: E M 324
Composite constituent materials, micro-mechanics, laminate analysis, hygro-thermal analysis, composite failure, joining of composites, design of composite beams and plates, honeycomb core, manufacturing of composites, short fiber composites, and demonstration laboratory.

AER E 524: Numerical Mesh Generation
(3-0) Cr. 3. F.
Prereq: MATH 385, proficiency in programming
Introduction to modern mesh generation techniques. Structured and unstructured mesh methods, algebraic and PDE methods, elliptic and hyperbolic methods, variational methods, error analysis, Delaunay triangulation, data structures, geometric modeling with B-spline and NURBS surfaces, surface meshing.

AER E 525: Finite Element Analysis
(Cross-listed with E M). (3-0) Cr. 3. S.
Prereq: E M 425, MATH 385
Variational and weighted residual approach to finite element equations. Emphasis on two- and three-dimensional problems in solid mechanics. Isoparametric element formulation, higher order elements, numerical integration, imposition of constraints and penalty, convergence, and other more advanced topics. Use of two- and three-dimensional computer programs. Dynamic and vibrational problems, eigenvalues, and time integration. Introduction to geometric and material nonlinearities.

AER E 526: Design of Aerospace Structures
(Dual-listed with AER E 426). (2-2) Cr. 3. F.
Prereq: E M 324
Detailed design and analysis of aerospace vehicle structures. Material selection, strength, durability and damage tolerance, and validation analysis. Design for manufacturability.

AER E 531: Automatic Control of Flight Vehicles
(3-0) Cr. 3. S.
Prereq: AER E 331
Applications of classical and modern linear control theory to automatic control of flight vehicles. Spacecraft attitude control. Control of flexible vehicles. Linear-quadratic regulator design applications.

AER E 532: Compressible Fluid Flow
(Cross-listed with M E). (3-0) Cr. 3. S.
Prereq: AER E 310, 311 or equivalent

AER E 538: Foundations of Engineering Education
(Cross-listed with ENGR, HG ED). Cr. 3. F.
Prereq: Engineering graduate students or instructor permission required
Introduction to the field of engineering education, with an emphasis on engineering education history, existing challenges, teaching and learning pedagogies and theories, research opportunities, and research methodologies. The course goal is to develop students as scholars and to have students think critically about engineering and education. Students will apply the knowledge gained from this course to propose a research project related to their own discipline. The proposal is intended to help students learn and apply the key elements of engineering education research. This course is intended for students with a variety of interests and career goals, including those interested in learning to conduct engineering education research, exploring research discoveries about teaching and learning, and engaging with the engineering education community.

AER E 541: Incompressible Flow Aerodynamics
(3-0) Cr. 3. F.
Prereq: AER E 310 or M E 335 or equivalent
AER E 545: Experimental Flow Mechanics and Heat Transfer  
(Dual-listed with AER E 445). (3-0) Cr. 3. F.  
**Prereq: AER E 310 or M E 335 or A B E 378**  
Similitude and dimensional analysis. Measurement uncertainty analysis; Fluid mechanical apparatus: wind tunnel and water tunnels. Various experimental techniques widely used for fluid mechanics, aerodynamics, heat transfer, and combustion studies: Pressure gauge and transducers; Pitot tube; hot wire anemometry; Shadowgraph and Schlieren Photography; laser Doppler velocimetry; particle image velocimetry (PIV); advanced PIV techniques (stereo PIV, 3-D PIV, Tomographic PIV, Holograph PIV and microscopic PIV); laser induced fluorescence; pressure sensitive painting, temperature sensitive painting; molecular tagging velocimetry; molecular tagging thermometry. Extensive applications and laboratory experiments will be included.

AER E 546: Computational Fluid Mechanics and Heat Transfer I  
(Cross-listed with M E). (3-0) Cr. 3. F.  
**Prereq: AER E 310 or M E 335, and programming experience**  

AER E 547: Computational Fluid Mechanics and Heat Transfer II  
(Cross-listed with M E). (3-0) Cr. 3. S.  
**Prereq: AER E 546 or equivalent**  
Application of computational methods to current problems in fluid mechanics and heat transfer. Methods for solving the Navier-Stokes and reduced equation sets such as the Euler, boundary layer, and parabolized forms of the conservation equations. Introduction to relevant aspects of grid generation and turbulence modeling.

AER E 551: Orbital Mechanics  
(3-0) Cr. 3. F.  
**Prereq: AER E 351**  

AER E 556: Guidance and Navigation of Aerospace Vehicles  
(3-0) Cr. 3. F.  
**Prereq: AER E 331**  

AER E 563: Introduction to Multidisciplinary Design Optimization  
(Dual-listed with AER E 463). (3-0) Cr. 3. F.  
**Prereq: senior standing in College of Engineering or permission of instructor**  
Introduction to the theory and methods of Multidisciplinary Design Optimization (MDO), including system coupling, system sensitivity methods, decomposition methods, MDO formulations (such as multi-discipline feasible (MDF), individual discipline feasible (IDF) and all-at-once (AAO) approaches, and MDO search methods.

AER E 564: Fracture and Fatigue  
(Cross-listed with E M, M E, M S E). (3-0) Cr. 3. Alt. F., offered even-numbered years.  
**Prereq: E M 324 and either MAT E 216 or MAT E 273 or MAT E 392. Undergraduates: Permission of instructor**  
Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue.

AER E 565: Systems Engineering and Analysis  
(Cross-listed with E E, I E). (3-0) Cr. 3.  
**Prereq: Coursework in basic statistics**  
Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life-cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test evaluation, and systems engineering planning and organization. Not available for degrees in industrial engineering.

AER E 566: Avionics Systems Engineering  
(Cross-listed with E E). (3-0) Cr. 3. S.  
**Prereq: E E 565**  
Avionics functions. Applications of systems engineering principles to avionics. Top-down design of avionics systems. Automated design tools.

AER E 568: Large-Scale Complex Engineered Systems (LSCES)  
(Dual-listed with AER E 468). (Cross-listed with I E). (3-0) Cr. 3. S.  
**Prereq: senior standing in College of Engineering or permission of AerE 468 instructor**  
Introduction to the theoretical foundation and methods associated with the design for large-scale complex engineered systems, including objective function formation, design reliability, value-driven design, product robustness, utility theory, economic factors for the formation of a value function and complexity science as a means of detecting unintended consequences in the product behavior.
AER E 569: Mechanics of Composite and Combined Materials
(Cross-listed with E M, M S E). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: E M 324

AER E 570: Wind Engineering
(Cross-listed with E M). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: A B E 378, M E 345
Atmospheric circulations, atmospheric boundary layer wind, bluff-body aerodynamics, aeroelastic phenomena, wind-tunnel and full-scale testing, wind-load code and standards, effect of tornado and thunderstorm winds, design applications.

AER E 572: Turbulence
(Cross-listed with CH E). (3-0) Cr. 3.
Prereq: AER E 541 or M E 538

AER E 573: Random Signal Analysis and Kalman Filtering
(Cross-listed with E E, M E). (3-0) Cr. 3.
Prereq: AER E 331 or M E 411 or MATH 341

AER E 574: Optimal Control
(Cross-listed with E E, M E). (3-0) Cr. 3. S.
Prereq: E E 577

AER E 575: Introduction to Robust Control
(Cross-listed with E E, M E). (3-0) Cr. 3.
Prereq: E E 577

AER E 576: Digital Feedback Control Systems
(Cross-listed with E E, M E). (3-0) Cr. 3. F.
Prereq: E E 475 or AER E 432 or M E 411 or MATH 415; and MATH 267

AER E 577: Linear Systems
(Cross-listed with E E, M E, MATH). (3-0) Cr. 3. F.
Prereq: E E 324 or AER E 331 or M E 370 or M E 411 or MATH 341

AER E 578: Nonlinear Systems
(Cross-listed with E E, M E, MATH). (3-0) Cr. 3. S.
Prereq: E E 577

AER E 581: Perturbation Methods
(3-0) Cr. 3. F.
Prereq: MATH 267
AER E 583: Aeroacoustics
(Dual-listed with AER E 483). Cr. 3.
Prereq: AER E 311 or M E 335; and MATH 266 or MATH 267

AER E 590: Aerospace Engineering Independent Study: Special Topics
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590A: Aerospace Engineering Independent Study: Aero and/or Gas Dynamics
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590B: Aerospace Engineering Independent Study: Propulsion
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590C: Aerospace Engineering Independent Study: Aerospace Structures
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590D: Aerospace Engineering Independent Study: Flight Dynamics
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590E: Aerospace Engineering Independent Study: Spacecraft Systems
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590F: Aerospace Engineering Independent Study: Flight Control Systems
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590G: Aerospace Engineering Independent Study: Aeroelasticity
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590H: Aerospace Engineering Independent Study: Viscous Aerodynamics
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590I: Aerospace Engineering Independent Study: Design
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590J: Aerospace Engineering Independent Study: Hypersonics
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590K: Aerospace Engineering Independent Study: Computational Aerodynamics
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590L: Aerospace Engineering Independent Study: Optimization
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590M: Aerospace Engineering Independent Study: Non Destructive Evaluation
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590N: Aerospace Engineering Independent Study: Wind Engineering
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 591: Graduate Student Seminar Series
Cr. R. Repeatable.
Presentation of professional topics by department graduate students. Development of presentation skills used in a professional conference setting involving question and answer format.

AER E 599: Creative Component
Cr. 1-5. Repeatable.

Courses for graduate students:

AER E 640: Stability of Fluid Flow
(3-0) Cr. 3.
Prereq: AerE 541
Theoretical methods of stability analysis; linear analysis of exchange of stability and over stability; bifurcation of equilibria; most dangerous modes and pattern formation; shear flow stability theorems. Physical mechanisms. Tollmein-Schlichting waves, disintegration of capillary jets, Benard convection, Taylor-Couette flow, centrifugal instability, double diffusion.

AER E 647: Advanced Computational Fluid Dynamics
(Cross-listed with M E). (3-0) Cr. 3. S.
Prereq: AER E 547

AER E 651: Space Trajectory Optimization
Cr. 3. Alt. S., offered odd-numbered years.
Prereq: AER E 551, or AER E 351
Classical methods and recent advances in space trajectory optimization. Primer vector theory, introduction to direct and indirect methods for trajectory optimization, the problem of multi gravity assist with deep space maneuvers (MGADSM), optimization of the MGADSM using evolutionary algorithms, hidden genes genetic algorithms for trajectory optimization, and shape-based methods for trajectory design.

AER E 690: Aerospace Engineering Independent Study: Advanced Topics
Cr. 1-5. Repeatable.

AER E 690A: Aerospace Engineering Independent Study: Aero and/or Gas Dynamics
Cr. 1-5. Repeatable.

AER E 690B: Aerospace Engineering Independent Study: Propulsion
Cr. 1-5. Repeatable.
AER E 690C: Aerospace Engineering Independent Study: Aerospace Structures
Cr. 1-5. Repeatable.

AER E 690D: Aerospace Engineering Independent Study: Flight Dynamics
Cr. 1-5. Repeatable.

AER E 690E: Aerospace Engineering Independent Study: Spacecraft Systems
Cr. 1-5. Repeatable.

AER E 690F: Aerospace Engineering Independent Study: Flight Control Systems
Cr. 1-5. Repeatable.

AER E 690G: Aerospace Engineering Independent Study: Aeroelasticity
Cr. 1-5. Repeatable.

AER E 690H: Aerospace Engineering Independent Study: Viscous Aerodynamics
Cr. 1-5. Repeatable.

AER E 690I: Aerospace Engineering Independent Study: Design
Cr. 1-5. Repeatable.

AER E 690J: Aerospace Engineering Independent Study: Hypersonics
Cr. 1-5. Repeatable.

AER E 690K: Aerospace Engineering Independent Study: Computational Aerodynamics
Cr. 1-5. Repeatable.

AER E 690L: Aerospace Engineering Independent Study: Non Destructive Evaluation
Cr. 1-5. Repeatable.

AER E 690M: Aerospace Engineering Independent Study: Wind Engineering
Cr. 1-5. Repeatable.

AER E 697: Engineering Internship
Cr. R. Repeatable.
Prereq: Permission of DOGE (Director of Graduate Education), graduate classification
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

AER E 699: Research
Cr. arr. Repeatable.

Courses primarily for undergraduates:

AF AM 201: Introduction to African American Studies
(3-0) Cr. 3. F.S.
An interdisciplinary introduction to the study of African American culture. Includes history, the social sciences, literature, religion, and the arts, as well as conceptual frameworks for investigation and analysis of the African American experience.
Meets U.S. Diversity Requirement

AF AM 310: Africa to 1880
(Cross-listed with HIST). Cr. 3.
Prereq: Sophomore classification
Survey of the history of African societies, cultures and civilizations from earliest times to 1880. Evolution of states across the continent; social, economic, political, and cultural developments; nature and consequences of African interactions and relationship with Europeans.
Meets International Perspectives Requirement.

AF AM 311: Africa under Colonial Rule
(Cross-listed with HIST). (3-0) Cr. 3.
Prereq: 3 credits of 200-level HIST at Iowa State, and sophomore classification.
Development of Africa from imposition of colonial rule to independence, including processes of European domination, African reaction and resistance, emergence of nationalism, and dismantling of colonialism.
Meets International Perspectives Requirement.

AF AM 325: Peoples and Cultures of Africa.
(Cross-listed with ANTHR). (3-0) Cr. 3.
Prereq: 201 or 306 recommended.
Survey of diverse African culture areas across the continent and globally; local level description and analysis of individuals as members of African communities; regional, national and global scales of identification.
Meets International Perspectives Requirement.

AF AM 330: Ethnic and Race Relations
(Cross-listed with SOC). (3-0) Cr. 3. F.S.SS.
Prereq: SOC 134
Analysis of ethnic and race relations, particularly in America; emphasis on the sociology and psychology of race and ethnic relations.
Meets U.S. Diversity Requirement

African and African American Studies (AF AM)

Any experimental courses offered by AF AM can be found at:
registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)
AF AM 334: Africana Religions
(Cross-listed with RELIG). (3-0) Cr. 3. F.
Prereq: Prior course work in Religious Studies or African American Studies recommended.
A focused study of the religious histories and cultures of West Africans and their descendants in the Americas. Topics include West African traditions, Christianity, Islam, and indigenous Afro-Caribbean religions, with attention to their gendered, theological, and cultural dimensions. Meets U.S. Diversity Requirement

AF AM 335: Race, Ethnicity, and the US Criminal Justice System
(Cross-listed with CJ). Cr. 3.
Prereq: CJ 240 or AF AM 201
Empirical and theoretical readings on the intersection of race, ethnicity, crime, and the criminal justice system in contemporary society. Topics include, but are not limited to racial and ethnic relations in society, media, violence, policing, and disparity and discrimination in crime and punishment. Criminological theories of racial and ethnic antagonism. Meets U.S. Diversity Requirement

AF AM 347: Studies in African American Literature
(Cross-listed with ENGL). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: ENGL 250
Literature by African Americans, which may include study of individual authors, movements, themes, genres. Meets U.S. Diversity Requirement

AF AM 350: Women of Color in the U.S
(Cross-listed with WGS). (3-0) Cr. 3. S.
Prereq: 3 credits in WGS or AF AM
Economic, social, political and cultural roles of Women of Color in the U.S. Includes literary, philosophical, and artistic expressions. Myths and realities explored. Meets U.S. Diversity Requirement

AF AM 353: History of African Americans I
(Cross-listed with HIST). (3-0) Cr. 3. S.
Prereq: Sophomore classification
Examines African roots of black culture and the African American experience in the United States from the colonial period through the Civil War. Topics include Atlantic Slave Trade, slavery and American identity, abolition, the emergence of Black Nationalism, and black participation in the Civil War. Meets U.S. Diversity Requirement

AF AM 354: History of African Americans II
(Cross-listed with HIST). (3-0) Cr. 3. S.
Prereq: Sophomore classification
Explores African American political thought and political action from Reconstruction to the present. Topics include rise of Jim Crow segregation, urban migration, Garvey movement, Harlem Renaissance, Depression and world wars, Pan-Africanism, civil rights, Black Power, and black feminism. Meets U.S. Diversity Requirement

AF AM 406: Seminar in African American Culture
(Cross-listed with HIST, US LS). (3-0) Cr. 3.
Prereq: Sophomore classification
Intensive study of a selected topic in African-American Studies in one or more disciplines. Selected readings of various authors, movements, eras, or genres. Primary and secondary source materials. Meets U.S. Diversity Requirement

AF AM 473: Civil Rights and Ethnic Power
Comparative history of the civil rights and ethnic power movements (African American, Chicano, American Indian, Puerto Rican, among others) in the U.S. from World War II to the present. Topics include institutional foundations, leadership, gender and racial dynamics, and the convergences and divergences of these differing ethnic struggles for rights. Meets U.S. Diversity Requirement

AF AM 490: Independent Study
Cr. 1-3. Repeatable, maximum of 3 times.

Agricultural Education and Studies (AGEDS)

Any experimental courses offered by AGEDS can be found at: registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

AGEDS 110: Professional Development in Agricultural Education and Studies: New Student Seminar
(1-0) Cr. 1. F.S.
Introduction to professional and educational development within university, college, department and major. Development of Resumes and Cover Letters. Career planning and assessment of professional goals.
AGEDS 111: Dean’s Leadership Seminar  
(1-0) Cr. 1. F.  
Prereq: Permission of the Associate Dean for Academic Programs, College of Agriculture and Life Sciences  
Introduction to leadership in agriculture and the life sciences, problem solving applied to current case studies, global perspective required by leaders, and designing programs to respond to societal needs in the agricultural and life sciences.

AGEDS 112: Agriculture Biotechnology Colloquium  
(1-0) Cr. 1. S.  
Prereq: Enrollment as an agricultural excellence scholar  
The scientific basis of biological and social sciences in agriculture.

AGEDS 113: Access to Success Seminar I  
Cr. 1. Repeatable. F.S.  
Career skills, learning strategies, and social and academic integration techniques to student members of Step Forward Learning Community. Utilization of campus resources, encouragement of self-exploration, and development of academic skills. Offered on a satisfactory-fail basis only.

AGEDS 116: Initial Field Experience in Agricultural Education  
(1-2) Cr. 1. F.  
Prereq: AGEDS majors only.  
Field experience in a formal education setting designed to explore teaching as a career through guided observation and interviews, reflection, and on-campus dialogue.

AGEDS 211: Early Field Based Experience  
(1-0) Cr. 1. Repeatable, maximum of 3 credits. F.S.S.  
Prereq: AGEDS 110  
Forty hours on-site in an agricultural setting. Students will have an opportunity outside the classroom for career guidance, role modeling, and reflection on their observations that they can apply to their courses and other educational experiences.

AGEDS 211A: High School Agriculture Programs  
(1-0) Cr. 1. Repeatable, maximum of 3 credits. F.S.S.  
Prereq: AGEDS 110  
Forty hours on-site in an agricultural setting. Students will have an opportunity outside the classroom for career guidance, role modeling, and reflection on their observations that they can apply to their courses and other educational experiences.

AGEDS 211C: Agricultural Industries and Agencies  
(1-0) Cr. 1. Repeatable, maximum of 3 credits. F.S.S.  
Prereq: AGEDS 110  
Forty hours on-site in an agricultural setting. Students will have an opportunity outside the classroom for career guidance, role modeling, and reflection on their observations that they can apply to their courses and other educational experiences.

AGEDS 215: Professional Development in Agricultural Education and Studies: Career Seminar  
(1-0) Cr. 1. F.S.  
Prereq: Sophomore classification in AG ST or AGLSE, Credit for or enrollment in AGEDS 110  
Career preparation including assessments, networking, interviewing skills and related life skill development. Survey of current issues in agriculture that impact career goals.

AGEDS 310: Foundations of Agricultural Education Programs  
(3-0) Cr. 3. F.S.  
Historical development of agricultural education programs. Philosophic premises, program goals and objectives. Educational and social issues impacting the implementation of agricultural education programs.

AGEDS 311: Presentation and Sales Strategies for Agricultural Audiences  
(3-0) Cr. 3. F.S.  
Utilizing instructional methods, techniques, and problem solving, presentation and sales strategies with agricultural audiences.

AGEDS 312: Science With Practice  
(1-6) Cr. 3. Repeatable. F.S.  
Prereq: College of Agriculture and Life Sciences majors only  
A planned learning experience wherein each student and faculty mentor develops a learning agreement that encompasses specific activities and expectations. Students are engaged in reflective activities that include journals, micro-reflections, formal presentations, and a comprehensive portfolio.

AGEDS 315: Personal, Professional, and Entrepreneurial Leadership in Agriculture  
(3-0) Cr. 3. F.S.  
Leadership principles and strategies to influence and motivate team members to achieve personal, professional, and entrepreneurial goals in production agriculture, agricultural education, and agricultural organizations.
AGEDS 327: Survey of Agriculture and Life Sciences Communication
(3-0) Cr. 3. F.S.
Prereq: ENGL 250 or equivalent.
Development of written, oral, visual and electronic communications relevant to agriculture and life sciences. Students develop a set of communication skills applicable to agriculture and life science contexts and for various audiences.

AGEDS 388: Agricultural Mechanics Applications
(2-3) Cr. 3. Repeatable, maximum of 2 times. F.S.SS.
Introduction to SMAW (Arc), GMAW (Mig), GTAW (Tig), Oxy-Fuel welding, Oxy-Fuel cutting, and Plasma cutting theories and applications. Emphasis will be on theoretical foundation of welding, safety, welding skill development, and management of equipment, and materials. Introduction to small engines and applications. Emphasis will be on theory of operating systems, maintenance, troubleshooting, failure analysis, and safety.

AGEDS 398: Cooperative Education
Cr. R. F.S.SS.
Prereq: Permission of the department cooperative education coordinator; junior classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

AGEDS 401: Planning Agriculture and Life Sciences Education Programs
(Dual-listed with AGEDS 501). (3-0) Cr. 3. F.
Prereq: AGEDS 310
Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.

AGEDS 402: Methods of Teaching in Agriculture and Life Sciences
(Dual-listed with AGEDS 502). (3-0) Cr. 3. F.
Prereq: Concurrent enrollment in AGEDS 401
Topics include: principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.

AGEDS 412: Internship in Agricultural Education and Studies
Cr. 2-6. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Junior classification in AGEDS and permission of instructor
A supervised two to twelve week learning experience in an approved learning setting with application to educational, agricultural, communications and/or environmental practices and principles.

AGEDS 414: Developing Agricultural Education Programs in Non-Formal Settings
(2-0) Cr. 2. S.
Basic concepts in planning, conducting, and evaluating educational programs in non-formal settings. Includes programming for youth and adults in Extension, agricultural industry, and related agencies.

AGEDS 416: Pre-Student Teaching Experience in Agricultural Education
Cr. 1. F.S.
Prereq: AGEDS 211, AGEDS 402 and admission to teacher education program
A forty hour field-based experience in an approved secondary agricultural education program. Concurrent enrollment in 417 is required.

AGEDS 417: Supervised Teaching in Agriculture and Life Sciences
Cr. 1-16. Repeatable. F.S.
Prereq: AGEDS 211, AGEDS 402 and admission to teacher education program
Supervised teaching in public schools.

AGEDS 450: Farm Management and Operation
(2-4) Cr. 3. Repeatable, maximum of 9 credits. F.S.SS.
Prereq: Econ 235, Econ 230, junior classification
Participation in the management and operation of a diversified Iowa farm. The class is responsible for the plans, records, and decisions for buying and selling the farm’s livestock, crops, and equipment. Special speakers on current topics. May be taken for credit 3 times at different times of the year with permission of the instructor.

AGEDS 451: Agricultural Law
(3-0) Cr. 3. S.
Prereq: Senior classification
The legal framework impinging upon decision-making by firms, families, and individuals, real and personal property, contracts, secured transactions, negotiable instruments, debtor-creditor relations, bankruptcy, farm income tax organization of firms, intergenerational property transfers, trusts and farm estate planning, civil and criminal liabilities, environmental law, federal and state regulatory powers.

AGEDS 461: Technology Transfer and the Role of Agricultural and Extension Education
(Dual-listed with AGEDS 561). (3-0) Cr. 3. S.
Impact of agricultural and extension education processes on development and their role in the transfer of agricultural technology. Utilizing situational analysis techniques to analyze and solve problems in international agricultural education programs.
Meets International Perspectives Requirement.
AGEDS 475: Agri-Marketing and Communications Competition
(2-0) Cr. 1-2. Repeatable, maximum of 6 credits. F.S.
Prereq: Admission by invitation.
Specialized training in communication and agricultural marketing knowledge and skills in preparation for intercollegiate competition. Maximum of 6 credits can be applied toward graduation.

AGEDS 488: Methods of Teaching Agricultural Mechanics
(2-3) Cr. 3. F.S.
Methods and management techniques in agricultural mechanics laboratories. Emphasis will be on safety, mechanical skills development and management of students, facilities, equipment, and materials.

AGEDS 490: Independent Study in Agricultural Education and Studies
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Junior or senior classification, permission of instructor

AGEDS 490A: Philosophy, Curriculum, and Methods
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Junior or senior classification, permission of instructor

AGEDS 490B: Leadership, Evaluation, and Administration
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Junior or senior classification, permission of instructor

AGEDS 490C: Business, Industry, and Production Agriculture
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Junior or senior classification, permission of instructor

AGEDS 490D: Extension and International Agriculture
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Junior or senior classification, permission of instructor

AGEDS 490E: Instructional Technology
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Junior or senior classification, permission of instructor

AGEDS 490F: Environmental Issues
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Junior or senior classification, permission of instructor

AGEDS 490G: Entrepreneurship
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Junior or senior classification, permission of instructor

AGEDS 490H: Independent Study in Agricultural Education and Studies, Honors
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Junior or senior classification, permission of instructor

AGEDS 490I: Communications
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Junior or senior classification, permission of instructor

AGEDS 496: Agricultural Travel Course
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Limited enrollment. Extended field trips to study agriculture and education related topics. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

AGEDS 496A: International
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Limited enrollment. Extended field trips to study agriculture and education related topics. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.
Meets International Perspectives Requirement.

AGEDS 496B: Domestic
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Limited enrollment. Extended field trips to study agriculture and education related topics. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

AGEDS 499: Undergraduate Research
Cr. arr. F.S.SS.
Prereq: Permission of instructor, advisor, and departmental chair
Research experience in agricultural education and studies with application to selected problems.

Courses primarily for graduate students, open to qualified undergraduates:

AGEDS 501: Planning Agriculture and Life Sciences Education Programs
(Dual-listed with AGEDS 401). (3-0) Cr. 3. F.
Prereq: AGEDS 310
Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.

AGEDS 502: Methods of Teaching in Agriculture and Life Sciences
(Dual-listed with AGEDS 402). (3-0) Cr. 3. F.
Prereq: Concurrent enrollment in AGEDS 401
Topics include: principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.
AGEDS 510: Introduction to Research in Agricultural Education  
(3-0) Cr. 3. S.  
Prereq: Graduate classification  
Determining your research focus; developing research problems and objectives; reviewing the literature and establishing a theoretical framework; establishing procedures for data collection and analysis; ethical issues.

AGEDS 511: Professional Agricultural Presentation Practices  
(3-0) Cr. 3. F.S.S.  
Prereq: Graduate Classification  
The identification and use of key planning, delivery and evaluation of presentations using audience engagement techniques focused on research-based principles and field-based practices of professional presenters in agriculture and the life sciences.

AGEDS 517: Student Teacher Education Practicum  
Cr. 2-6. F.S.  
Prereq: AGEDS 590B, AGEDS 501, AGEDS 502 Admission to the University Teacher Education program  
Supervised 5th-12th grade public and private schools teaching practicum for graduate students in Masters degree teacher certification program. NA

AGEDS 520: Instructional Methods for Adult and Higher Education in Agriculture and Natural Resources  
(3-0) Cr. 3. S.  
Prereq: Graduate classification  
Theory and practice of adult education. Teaching and learning in formal and non-formal instructional programs for adult learners.

AGEDS 524: Program Development and Evaluation in Agricultural and Extension Education  
(3-0) Cr. 3. F.  
Prereq: Graduate classification  
Theories and practice of program planning for nonformal education. Addresses use of program logic modeling and considers critical theories of planning to address power and interests in program development, needs assessment, and evaluation.

AGEDS 533: Introduction to Learning Theory in Agricultural Education  
(3-0) Cr. 3. S.  
Prereq: Graduate classification  
Introduction to a variety of theoretical perspectives of learning and how they may be used within the context of agricultural education. Emphasis will be on the major domains of learning, developmental considerations, basic assumptions, concepts, and principles of various learning theories; understanding how each theoretical perspective may be used in both formal and non-formal educational settings.

AGEDS 550: Foundations of Agricultural Education  
(3-0) Cr. 3. F.  
Prereq: Graduate classification  
Philosophical premises, ethical principles, historical development, contextual applications, and knowledge bases for agricultural education.

AGEDS 561: Technology Transfer and the Role of Agricultural and Extension Education  
(Dual-listed with AGEDS 461). (3-0) Cr. 3. S.  
Impact of agricultural and extension education processes on development and their role in the transfer of agricultural technology. Utilizing situational analysis techniques to analyze and solve problems in international agricultural education programs. Meets International Perspectives Requirement.

AGEDS 568: Qualitative Interviews and Focus Groups  
(3-0) Cr. 3. S.  
Prereq: Graduate Status  
Understanding the role of interviews in agricultural education research, basis for theory of meaning, and variations of interview technique among qualitative traditions. Development of facilitation technique for individual interviews; and focus groups. Transcription and basic qualitative analysis. Use of interview findings to prepare manuscripts.

AGEDS 590: Special Topics in Agricultural Education  
Cr. 1-3. Repeatable. F.S.S.S.  
Prereq: 12 credits in agricultural education  
AGEDS 590A: Curriculum  
Cr. 1-3. Repeatable. F.S.S.S.  
Prereq: 12 credits in agricultural education  
AGEDS 590B: Methods  
Cr. 1-3. Repeatable. F.S.S.S.  
Prereq: 12 credits in agricultural education  
AGEDS 590C: Philosophy  
Cr. 1-3. Repeatable. F.S.S.S.  
Prereq: 12 credits in agricultural education  
AGEDS 590D: Evaluation  
Cr. 1-3. Repeatable. F.S.S.S.  
Prereq: 12 credits in agricultural education  
AGEDS 590E: Administration  
Cr. 1-3. Repeatable. F.S.S.S.  
Prereq: 12 credits in agricultural education  
AGEDS 590F: Leadership  
Cr. 1-3. Repeatable. F.S.S.S.  
Prereq: 12 credits in agricultural education
AGEDS 590G: Guidance
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 12 credits in agricultural education

AGEDS 590I: Instructional Technology
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 12 credits in agricultural education

AGEDS 590J: Extension
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 12 credits in agricultural education

AGEDS 590K: International Agriculture
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 12 credits in agricultural education

AGEDS 590L: Program Planning
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 12 credits in agricultural education

AGEDS 590M: Biotechnology Workshop
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 12 credits in agricultural education

AGEDS 593: Workshop in Agricultural Education
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 12 credits in agricultural education

AGEDS 593A: Curriculum
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 12 credits in agricultural education

AGEDS 593B: Methods
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 12 credits in agricultural education

AGEDS 593C: Evaluation
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 12 credits in agricultural education

AGEDS 593D: Administration
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 12 credits in agricultural education

AGEDS 593E: Leadership
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 12 credits in agricultural education

AGEDS 593F: Extension
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 12 credits in agricultural education

AGEDS 593G: Program Planning
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 12 credits in agricultural education

AGEDS 593H: Instructional Technology
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 12 credits in agricultural education

AGEDS 593I: Biological Technology Workshop
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 12 credits in agricultural education

AGEDS 599: Creative Component
Cr. arr. Repeatable. F.S.SS.
For nonthesis masters degree programs.

Courses for graduate students:

AGEDS 615: Seminar in Agricultural Education
(1-0) Cr. 1. Repeatable. F.S.SS.
Offered on a satisfactory-fail basis only.

AGEDS 615A: Writing for publication
(1-0) Cr. 1. Repeatable. F.S.SS.
Offered on a satisfactory-fail basis only.

AGEDS 615B: Ethics
(1-0) Cr. 1. Repeatable. F.S.SS.
Offered on a satisfactory-fail basis only.

AGEDS 615C: Grant writing
(1-0) Cr. 1. Repeatable. F.S.SS.
Offered on a satisfactory-fail basis only.

AGEDS 615D: Career planning
(1-0) Cr. 1. Repeatable. F.S.SS.
Offered on a satisfactory-fail basis only.

AGEDS 615E: Contemporary issues
(1-0) Cr. 1. Repeatable. F.S.SS.
Offered on a satisfactory-fail basis only.

AGEDS 617: Professional Internship for Agricultural Educators
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Permission of instructor
Analysis of the roles and activities of professionals in agricultural education. Supervised professional field-based experience in public and private settings. Offered on a satisfactory-fail basis only.

AGEDS 625: Leadership, Administration, Supervision and Management of Agricultural Education Programs
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: Graduate classification
Principles and best practices for leading, administering, supervising, and managing agricultural education programs. Analyzing selected case studies that apply theory to practice in agricultural situations.
AGEDS 699: Research
Cr. arr. Repeatable.

Agricultural and Biosystems Engineering (A B E)

Any experimental courses offered by A B E can be found at:
registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

A B E 102: Learning Communities
Cr. 0.5. F.
8 week learning communities course focusing on student success, engineering, and department curriculum. Building community within the ABE Department. Offered on a satisfactory-fail basis only.

A B E 110: Experiencing Agricultural and Biosystems Engineering (0-2) Cr. 1. S.
Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of agricultural and biosystems engineering. Report writing, co-ops, internships, careers, registration planning.

A B E 160: Systematic Problem Solving and Computer Programming (2-2) Cr. 3. S.
Prereq: Credit or enrollment in MATH 143 or MATH 165
Introduction to principles of dynamics, statics, and mass and energy conservation. Introduction to algorithmic thinking; use of spreadsheet programs and computer programming language(s) to solve engineering problems. Only one of ENGR 160, A B E 160, AER E 160, C E 160, CH E 160, CPR E 185, E E 148, M E 160, and S E 185 may count towards graduation.

A B E 170: Engineering Graphics and Introductory Design (2-2) Cr. 3.
Applications of multi-view drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports.

A B E 201: Preparing for Workplace Seminar (Cross-listed with TSM). (1-0) Cr. 1. F.S.
Prereq: Sophomore classification in AE, AST, BSE, or I TEC
8 week course. Professionalism in the context of the engineering/technical workplace. Development of intrapersonal and interpersonal qualities including talent assessment; key workplace competency demonstration; leadership practice assessment; preparation of resume; cover letter preparation and behavioral-based interviewing; readiness for internship attainment.

A B E 216: Fundamentals of Agricultural and Biosystems Engineering (2-2) Cr. 3. F.
Prereq: A B E 160 or permission of the instructor
Application of mathematics and engineering sciences in agricultural and biosystems engineering. Emphasis is on solving engineering problems.

A B E 218: Project Management & Design in Agricultural and Biosystems Engineering (1-2) Cr. 2. S.
Prereq: A B E 216
Engineering design process with emphasis on criteria and constraints, ideation, and analysis. Fundamental principles of project management including project management software. Open-ended project(s) to apply core principles using concepts from prerequisite courses.

A B E 217: Engineering Applications of Parametric Solid Modeling (1-2) Cr. 1. F.S.
Prereq: A B E 170 or TSM 116 or equivalent
8 week-course. Creating, editing, and documenting part and assembly models using Solidworks.

A B E 272: Parametric Solid Models, Drawings, and Assemblies Using Creo Parametric (1-2) Cr. 1. F.S.
Prereq: A B E 170 or TSM 116 or equivalent
8 week-course. Applications of Creo Parametric software. Create solid models of parts and assemblies. Utilize the solid models to create design documentation (standard drawing views, dimensions, and notes) and for the geometric analysis of parts and assemblies.

A B E 273: CAD for Process Facilities and Land Use Planning (1-2) Cr. 1. F.S.
Prereq: ENGR 170 or TSM 116 or equivalent.
8-week course. Application of 2-D AutoCAD software to create and interpret 2-D drawings and 3-D models of facilities. Topics include geometric construction, design documentation: (using views, dimension, notes), and AutoCAD specific features (i.e. Layers, Blocks, Standards, Styles).

A B E 316: Applied Numerical Methods for Agricultural and Biosystems Engineering (2-2) Cr. 3. F.S.
Prereq: A B E 160; MATH 266 or MATH 267
Computer aided solution of engineering problems by use of numerical techniques and mathematical models. Systems analysis and optimization applicable to agricultural and biological systems.
A BE 325: Biorenewable Systems
(Cross-listed with TSM). (3-0) Cr. 3. F.
Prereq: CHEM 163 or higher; MATH 140 or higher
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

A BE 327L: Animal Production Systems Design Lab
(0-2) Cr. 1. F.
Prereq: Credit or enrollment in TSM 327
Engineering analysis of Livestock and Poultry production systems as related to applications of Precision Livestock Farming Technology (PLFT), economic and environmental management, and manure and nutrient management. Focus on the design of animal production systems based on ASABE/NRCS Standards and Local Codes. Concrete and earthen manure storages and open-lot runoff management structures; utilization of RUSLE-2 and P-index in the development of comprehensive nutrient management plans; making economic and environmental management decisions related to improving production, gaseous emissions reporting, and odor mitigation.

A BE 340: Functional Analysis of Soil, Crop, and Machine Systems
(2-2) Cr. 3. F.
Prereq: A BE 216

A BE 342: Agricultural Tractor Power
(2-3) Cr. 3. S.
Prereq: Ch E 381 or M E 231
Thermodynamic principles and construction of tractor engines. Fuels, combustion, and lubrication. Kinematics and dynamics of tractor power applications; drawbar, power take-off and traction mechanisms.

A BE 363: Agri-Industrial Applications of Electric Power and Electronics
(3-2) Cr. 4. F.S.
Prereq: A BE 216

A BE 378: Mechanics of Fluids
(2-2) Cr. 3. F.S.
Prereq: C E 274

A BE 380: Principles of Biological Systems Engineering
(2-2) Cr. 3. S.
Prereq: A BE 316
Engineering analysis of biological systems, through the study of mass, energy, and information transport. Quantification and modeling of biological interactions, biological activities and bioreactor operations. Includes laboratory experiences on biological materials characterization, unit operation for bioprocesses and fermentation for producing bioproducts.

A BE 388: Sustainable Engineering and International Development
(Cross-listed with C E, E E). (2-2) Cr. 3. F.
Prereq: Junior classification in engineering
Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report. Meets International Perspectives Requirement.

A BE 396: Summer Internship
Cr. R. Repeatable. SS.
Prereq: Permission of department and Engineering Career Services
Professional work period of at least 10 weeks during the summer. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

A BE 398: Cooperative Education
Cr. R. Repeatable. F.S.
Prereq: A BE 218 and permission of department and Engineering Career Services
Professional work period. One semester per academic or calendar year. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.
A B E 403: Modeling, Simulation, and Controls for Agricultural and Biological Systems
(Dual-listed with A B E 503). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: A B E 316, and A B E 363, and MATH 266 or MATH 267
Modeling and simulation of dynamic systems with modern software tools including Matlab Simulink and Modelica. Introduction to state variable methods of system analysis. Analysis of several engineering systems. Introduction to classical control theory. Term project required for graduate credit.

A B E 404: Instrumentation for Agricultural and Biosystems Engineering
(Dual-listed with A B E 504). (2-2) Cr. 3. F.
Prereq: A B E 316 and A B E 363
Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/ A conversion, signal filtering and process control. Sensors and theory of operation applied to practical monitoring and control problems. Data collection, analysis, and calibration of sensors and data acquisition systems. Individual project required for graduate credit.

A B E 410: Electronic Systems Integration for Agricultural Machinery
(Dual-listed with A B E 510). Cr. 3. S.
System architecture and design of electronics used in agricultural machinery and production systems. Emphasis on information technology and systems integration for automated agriculture processes. Design of Controller Area Network (CAN BUS) communication systems and discussion of relevant standards (ISO 11783 and SAE J1939). Application of technologies for sensing, distributed control, and automation of agricultural machinery will be emphasized.

A B E 413: Fluid Power Engineering
(Cross-listed with M E). (2-2) Cr. 3. F.
Prereq: Credit or enrollment in E M 378 or M E 335, A B E 216 or M E 270

A B E 415: Agricultural & Biosystems Engineering Design I
(1-2) Cr. 2. F-S.
Prereq: A B E 316 (majors only)
Engineering design process with emphasis on team delivery of: clearly defined deliverables; criteria and constraints; wide-field ideation; discipline-appropriate analysis methods; identification and application of relevant standards.

A B E 416: Agricultural & Biosystems Engineering Design II
(1-2) Cr. 2. F-S.
Prereq: A B E 415
Final execution of the engineering design process with emphasis on team delivery of: oral and written communication in completion of the client-agreed deliverables.

A B E 418: Fundamentals of Engineering Review
(1-0) Cr. 1.
Prereq: senior classification.
8 week course. Review of core concepts covered in the Fundamentals of Engineering examination with emphasis on statics, dynamics, fluid mechanics, heat transfer, electric circuits, and engineering economics. Open to all College of Engineering seniors, however focus is on the general exam, not discipline specific exams.

A B E 424: Air Pollution
(Dual-listed with A B E 524). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 231 and PHYS 231L or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424A: Air Pollution: Air quality and effects of pollutants
(Dual-listed with A B E 524A). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 231 and PHYS 231L or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424B: Air Pollution: Climate change and causes
(Dual-listed with A B E 524B). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 231 and PHYS 231L or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424C: Air Pollution: Transportation Air Quality
(Dual-listed with A B E 524C). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: C E 524A; PHYS 231 and PHYS 231L or CHEM 178; MATH 166 or 3 credits in statistics. Senior classification or above.

A B E 424D: Air Pollution: Off-gas treatment technology
(Dual-listed with A B E 524D). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: C E 524A, C E 524B; Either PHYS 231 and PHYS 231L or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above.
A B E 424E: Air Pollution: Agricultural sources of pollution
(Dual-listed with A B E 524E). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 231 and 231L or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 431: Design and Evaluation of Soil and Water Conservation Systems
(Dual-listed with A B E 531). (2-3) Cr. 3. F.
Prereq: E M 378 or CH E 356

A B E 432: Nonpoint Source Pollution and Control
(Dual-listed with A B E 532). (3-0) Cr. 3.
Prereq: A B E 431 or C E 372
Characteristics and mechanisms of non-point source (NPS) pollution in agricultural and urban watersheds, modeling of NPS pollution for terrestrial and aquatic systems, statistical tools to assess environmental datasets, strategies to control and manage NPS pollution of water bodies, and integrated watershed management. Graduate students are required to develop/deliver lecture models on assigned topics and/or complete additional assignments.

A B E 437: Watershed Modeling and Policy
(Dual-listed with A B E 537). (2-2) Cr. 3.
Prereq: C E 372 or equivalent
A project-based course on watershed-scale models for improving water quality. Legislative and judicial basis of the Total Maximum Daily Load (TMDL) program; approaches to TMDL development; principles and techniques for implementation; stakeholder engagement strategies. Hands-on experiences with GIS-interfaced models, data sources, calibration/validation, statistical assessment of model results, and simulation using multiple tools. In addition to other assignments, graduate students will present case studies of TMDLs using different modeling tools.

A B E 451: Food and Bioprocess Engineering
(Dual-listed with A B E 551). (3-0) Cr. 3. S.
Prereq: A B E 216 and credit or enrollment in M E 436 or CH E 357; or FS HN 351 and MATH 266 or MATH 267
Application of engineering principles and mathematical modeling to the quantitative analysis of transport phenomena in food and bioprocesses. Physical/chemical characteristics of foods and biological materials and systems, flow processes, thermal processes, cooling/freezing processes, dehydration processes and separation processes.

A B E 466: Multidisciplinary Engineering Design
(Cross-listed with AER E, B M E, CPR E, E E, ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S.
Prereq: Student must be within two semesters of graduation; permission of instructor.
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

A B E 469: Engineering for Grain Storage, Preservation, Handling, and Processing Systems
(Dual-listed with A B E 569). (2-3) Cr. 3. S.
Prereq: A B E 216
Cereal grain and oilseed production, properties, and quality assessment. Design of storage systems, drying systems, material handling, and size reduction systems. Design of cereal grain processing systems, including dry milling, wet milling, flour milling, feed milling, and fermentation facilities. Additional learning activities required for graduate credit.

A B E 472: Controlled Environments for Animals and Plants
(Dual-listed with A B E 572). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: A B E 216, M E 231
Principles and design of environmental control systems for animal and plant facilities. Insulation, heat and mass transfer, fans, ventilation, air distribution, heating and cooling equipment, and controls. Individual projects required for graduate credit.
A B E 478: Wood Frame and Agri-Industrial Structures 
(Dual-listed with A B E 578). (3-0) Cr. 3. Alt. S., offered odd-numbered years. 
Prereq: E M 324

A B E 480: Engineering Analysis of Biological Systems 
(Dual-listed with A B E 580). (Cross-listed with ENSCI, GLOBE). (2-2) Cr. 3. F. 
Prereq: A B E 380 or permission of the instructor
Systems-level quantitative analysis of various biological systems, including applications in foods, feeds, biofuels, bioenergy, and other bio-based systems. Introduction to techno-economic analysis and life-cycle assessment of these systems at multiple production scales. Applying these tools to evaluate and improve cost and sustainability performance. Students enrolled in ABE 580 will be required to conduct additional learning activities.

A B E 490: A B E Independent Study 
Cr. 1-5. Repeatable.
Independent Study.

Cr. 1-5. Repeatable.
Independent Study.

A B E 490B: A B E Independent Study: Biorenewable Resources 
Cr. 1-5. Repeatable. F.S.SS.
Independent study.

A B E 490E: A B E Independent Study: Environmental Bioprocessing Engineering 
Cr. 1-5. Repeatable. F.S.SS.
Independent study in environmental bioprocessing engineering.

A B E 490F: A B E Independent Study: Food Engineering 
Cr. 1-5. Repeatable. F.S.SS.
Independent study in food engineering.

A B E 490G: A B E Independent Study: General Topics in A B E 
Cr. 1-5. Repeatable. F.S.SS.
Independent study in general A B E topics.

A B E 490H: A B E Independent Study: Honors 
Cr. 1-5. Repeatable.
Guided instructing in agricultural and biosystems engineering for honors students.

A B E 490L: A B E Independent Study: Land & Water Resources Engineering 
Cr. 1-5. Repeatable.
Guided instruction in land and water resources engineering.

A B E 490M: A B E Independent Study: Advanced Machinery Systems Engineering 
Cr. 1-5. Repeatable.
Guided instruction in advance machinery systems engineering.

A B E 495: Agricultural and Biosystems Engineering Department Study Abroad Preparation or Follow-up 
(Cross-listed with TSM). Cr. 1-2. Repeatable. F.S.SS. 
Prereq: Permission of instructor
Preparation for, or follow-up of, study abroad experience (496). For preparation, course focuses on understanding the tour destination through readings, discussions, and research on topics such as the regional industries, climate, crops, culture, economics, food, geography, government, history, natural resources, and public policies. For follow-up, course focuses on presentations by students, report writing, and reflection. Students enrolled in this course intend to register for 496 the following term or have had taken 496 the previous term. Meets International Perspectives Requirement.

A B E 496: Agricultural and Biosystems Engineering Department Study Abroad 
(Cross-listed with TSM). Cr. 1-4. Repeatable. F.S.SS. 
Prereq: Permission of instructor
Tour and study at international sites relevant to disciplines of industrial technology, biological systems engineering, agricultural systems technology, and agricultural engineering. Location and duration of tours will vary. Trip expenses paid by students. Pre-trip preparation and/or post-trip reflection and reports arranged through 495. Meets International Perspectives Requirement.

Courses primarily for graduate students, open to qualified undergraduates:
A B E 503: Modeling, Simulation, and Controls for Agricultural and Biological Systems
(Dual-listed with A B E 403). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: A B E 316, and A B E 363, and MATH 266 or MATH 267
Modeling and simulation of dynamic systems with modern software tools including Matlab Simulink and Modelica. Introduction to state variable methods of system analysis. Analysis of several engineering systems. Introduction to classical control theory. Term project required for graduate credit.

A B E 504: Instrumentation for Agricultural and Biosystems Engineering
(Dual-listed with A B E 404). (2-2) Cr. 3. F.
Prereq: A B E 316 and A B E 363
Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering and process control. Sensors and theory of operation applied to practical monitoring and control problems. Data collection, analysis, and calibration of sensors and data acquisition systems. Individual project required for graduate credit.

A B E 506: Applied Computational Intelligence
(2-2) Cr. 3. Alt. F., offered even-numbered years.
Prereq: A B E 316 or equivalent, MATH 166, STAT 305
Applications of biologically inspired computational intelligence tools for data mining, system modeling, and optimization for agricultural, biological and other engineered systems. Introduction to Artificial Neural Networks, Support Vector Machines, Fuzzy Logic, Genetic Algorithms, Bayesian and Decision Tree learning. Fundamental Machine Vision techniques will be introduced in the first part of course and be integrated into the lab exercises for learning different computational intelligence techniques. MATLAB will be used throughout the course for algorithm implementation.

A B E 510: Electronic Systems Integration for Agricultural Machinery
(Dual-listed with A B E 410). Cr. 3. S.
System architecture and design of electronics used in agricultural machinery and production systems. Emphasis on information technology and systems integration for automated agriculture processes. Design of Controller Area Network (CAN BUS) communication systems and discussion of relevant standards (ISO 11783 and SAE J1939). Application of technologies for sensing, distributed control, and automation of agricultural machinery will be emphasized.

A B E 511: Bioprocessing and Bioproducts
(3-0) Cr. 3. S.
Prereq: A B E 216 or equivalent, CHEM 167 or higher, BIOL 173 or higher, senior or graduate classification
Unit operations for production of bio-based, fermented fuels, beverages, chemicals, pharmaceuticals, and coproducts. Taxonomy, metabolism, kinetics, and modeling of aerobic and anaerobic fermentation systems. Mass/energy balances, pretreatments, liquefaction, saccharification, separations, and process integration.

A B E 515: Integrated Crop and Livestock Production Systems
(Cross-listed with AGRON, AN S, SUSAG). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: SUSAG 509
Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

A B E 524: Air Pollution
(Dual-listed with A B E 424). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 231 and PHYS 231L or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 524A: Air Pollution: Air quality and effects of pollutants
(Dual-listed with A B E 424A). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 231 and PHYS 231L or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 524B: Air Pollution: Climate change and causes
(Dual-listed with A B E 424B). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 231 and PHYS 231L or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 524C: Air Pollution: Transportation Air Quality
(Dual-listed with A B E 424C). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: C E 524A; PHYS 231 and PHYS 231L or CHEM 178; MATH 166 or 3 credits in statistics. Senior classification or above.
Agricultural and Biosystems Engineering (A B E)

A B E 524D: Air Pollution: Off-gas treatment technology
(Dual-listed with A B E 424D). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: C E 524A, C E 524B; Either PHYS 231 and PHYS 231L or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

A B E 524E: Air Pollution: Agricultural sources of pollution
(Dual-listed with A B E 424E). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 231 and 231L or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 531: Design and Evaluation of Soil and Water Conservation Systems
(Dual-listed with A B E 431). (Cross-listed with ENSCI). (2-3) Cr. 3. F.
Prereq: E M 378 or CH E 356

A B E 532: Nonpoint Source Pollution and Control
(Dual-listed with A B E 432). (Cross-listed with ENSCI). (3-0) Cr. 3. F.
Prereq: A B E 431 or C E 372
Characteristics and mechanisms of non-point source (NPS) pollution in agricultural and urban watersheds, modeling of NPS pollution for terrestrial and aquatic systems, statistical tools to assess environmental datasets, strategies to control and manage NPS pollution of water bodies, and integrated watershed management. Graduate students are required to develop/deliver lecture models on assigned topics and/or complete additional assignments.

A B E 533: Erosion and Sediment Transport
(Cross-listed with ENSCI, NREM). (2-3) Cr. 3. Alt. F., offered even-numbered years.
Prereq: C E 372 or GEOL/ENSCI/MTEOR 402, MATH 166 or equivalent
Soil erosion processes, soil loss equations and their application to conservation planning, sediment properties, initiation of sediment motion and over land flow, flow in alluvial channels and theory of sediment transport, channel stability, reservoir sedimentation, wind erosion, BMPs for controlling erosion.

A B E 537: Watershed Modeling and Policy
(Dual-listed with A B E 437). (Cross-listed with ENSCI). (2-2) Cr. 3.
Prereq: C E 372 or equivalent
A project-based course on watershed-scale models for improving water quality. Legislative and judicial basis of the Total Maximum Daily Load (TMDL) program; approaches to TMDL development; principles and techniques for implementation; stakeholder engagement strategies. Hands-on experiences with GIS-interfaced models, data sources, calibration/validation, statistical assessment of model results, and simulation using multiple tools. In addition to other assignments, graduate students will present case studies of TMDLs using different modeling tools.

A B E 551: Food and Bioprocess Engineering
(Dual-listed with A B E 451). (3-0) Cr. 3. S.
Prereq: A B E 216 and credit or enrollment in M E 436 or CH E 357; or FS HN 351 and MATH 266 or MATH 267
Application of engineering principles and mathematical modeling to the quantitative analysis of transport phenomena in food and bioprocesses. Physical/chemical characteristics of foods and biological materials and systems, flow processes, thermal processes, cooling/freezing processes, dehydration processes and separation processes.

A B E 556: GIS Programming and Automation
(Dual-listed with A B E 556). (Cross-listed with C R P). (3-0) Cr. 3. F.
Prereq: C R P 351 or equivalent or permission of instructor
Introduction to automated geoprocessing in Geographic Information Systems using Python. Focus on learning scripting language and object-oriented programming, automation of custom-designed geoprocessing scripts, and application toward student research and/or interests.

A B E 569: Engineering for Grain Storage, Preservation, Handling, and Processing Systems
(Dual-listed with A B E 469). (2-3) Cr. 3. S.
Prereq: A B E 216
Cereal grain and oilseed production, properties, and quality assessment. Design of storage systems, drying systems, material handling, and size reduction systems. Design of cereal grain processing systems, including dry milling, wet milling, flour milling, feed milling, and fermentation facilities. Additional learning activities required for graduate credit.

A B E 572: Controlled Environments for Animals and Plants
(Dual-listed with A B E 472). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: A B E 216, M E 231
Principles and design of environmental control systems for animal and plant facilities. Insulation, heat and mass transfer, fans, ventilation, air distribution, heating and cooling equipment, and controls. Individual projects required for graduate credit.
A B E 578: Wood Frame and Agri-Industrial Structures
(Dual-listed with A B E 478). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: E M 324

A B E 580: Engineering Analysis of Biological Systems
(Dual-listed with A B E 480). (2-2) Cr. 3. F.
Prereq: A B E 380 or permission of the instructor
Systems-level quantitative analysis of various biological systems, including applications in foods, feeds, biofuels, bioenergy, and other bio-based systems. Introduction to techno-economic analysis and life-cycle assessment of these systems at multiple production scales. Applying these tools to evaluate and improve cost and sustainability performance. Students enrolled in ABE 580 will be required to conduct additional learning activities.

A B E 590: Special Topics in Agricultural & Biosystems Engineering
Cr. 1-3. Repeatable.
Guided instruction and self-study on special topics relevant to agricultural and biosystems engineering.

Courses for graduate students:

A B E 601: Graduate Seminar
(Cross-listed with TSM). (1-0) Cr. 1. F.
Keys to starting a successful graduate research project. Effective literature review, formulating research questions, and setting goals. Practicing effectively communicating research and science. Effective strategies for scholarly writing, professional development, responding to feedback, peer-reviewing, successful publishing in journals, and curating scholarly output.

A B E 610: Foundations of Sustainable Agriculture
(Cross-listed with AGRON, ANTHR, SOC, SUSAG). (3-0) Cr. 3. F.
Prereq: Graduate classification, permission of instructor
Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

A B E 694: Teaching Practicum
(Cross-listed with TSM). Cr. 1-3. F.S.
Prereq: Graduate classification and permission of instructor
Mentored experience for graduate students teaching or assisting all or part of an undergraduate course offered by the Agricultural and Biosystems Engineering department. Includes 100 - 400 level TSM and ABE courses.

A B E 697: Engineering Internship
Cr. R. Repeatable.
Prereq: Permission of department chair, graduate classification
One semester and one summer maximum per academic year professional work period.

A B E 699: Research
Cr. arr. Repeatable.
Research.

A B E 699B: Research: Biosystems Engineering
Cr. arr. Repeatable.
Guided graduate research in biosystems engineering.

A B E 699C: Research: Computer Aided Design
Cr. arr. Repeatable.
Guided graduate research in computer-aided design.

A B E 699E: Research: Environmental Systems
Cr. arr. Repeatable.
Guided graduate research in environmental systems.

A B E 699F: Research: Food Engineering
Cr. arr. Repeatable.
Guided graduate research in food engineering.

A B E 699O: Research: Occupational Safety
Cr. arr. Repeatable.
Guided graduate research in occupational safety.

A B E 699P: Research: Power and Machinery Engineering
Cr. arr. Repeatable.
Guided graduate research in power and machinery engineering.

A B E 699Q: Research: Structures
Cr. arr. Repeatable.
Guided graduate research in structures.

A B E 699R: Research: Process Engineering
Cr. arr. Repeatable.
Guided graduate research in process engineering.

A B E 699S: Research: Environment and Natural Resources
Cr. arr. Repeatable.
Guided graduate research in environment and natural resources.
A B E 699U: Research: Waste Management
Cr. arr. Repeatable.
Guided graduate research in waste management.

Agronomy (AGRON)

Any experimental courses offered by AGRON can be found at:
registrar.iastate.edu/faculty-staff/courses/explistings/ (http://
www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

AGRON 105: Leadership Experience
Cr. R.
A participatory experience in activities or completion of a course that
enhances the development of leadership and group-dynamic skills. See
advisor for departmental requirements.

AGRON 110: Professional Development in Agronomy: Orientation
Cr. 1. F.
Orientation to college life, the profession of agronomy, and the agronomy
curriculum.

AGRON 120: Introduction to Renewable Resources
(Cross-listed with ENV S, NREM). (3-0) Cr. 3. F.S.
Overview of soil, water, plants, and animals as renewable natural
resources in an ecosystem context. History and organization of resource
management. Concepts of integrated resource management.

AGRON 140: Climate and Society
(Cross-listed with ENV S, GEOL, MTEOR). Cr. 3. F.S.
The climate system of our planet. How nature and our actions alter the
existing energy balance leading to climate change. Past climates on
our planet. The influence of climate on society and resource availability
during the Holocene (~ 11,000 years ago to present) with focus on
changes post industrial revolution. Significant climate events that have
altered our way of life in the past. Projected changes in future climate and
potential impacts on society, environment and resources. Adaptation to and
mitigation of climate change.
Meets International Perspectives Requirement.

AGRON 160: Water Resources of the World
(Cross-listed with ENV S, GEOL, MTEOR). (3-0) Cr. 3. S.
Study of the occurrence, history, development, and management of world
water resources. Basic hydrologic principles including climate, surface
water, groundwater, and water quality. Historical and current perspectives
on water policy, use, and the role of water in society and the environment.
Meets International Perspectives Requirement.

AGRON 180: Global Agriculture in a Changing World
(3-0) Cr. 3. F.
A scientific investigation of the global distribution of climate, soils and
agricultural production and consumption. Physical processes that
connect natural resources to agriculture and the environment. How global
change drives increasing demand for agricultural production.
Meets International Perspectives Requirement.

AGRON 181: Introduction to Crop Science
(3-0) Cr. 3. F.S.
Basic structure and function of plants, origin and classification, growth
and development. Fundamentals of photosynthesis, plant water use,
plant nutrition and genetics that regulate plant growth, development and
responses to the environment.

AGRON 182: Introduction to Soil Science
Prereq: Chem 163
(3-0) Cr. 3. F.S.
Introduction to physical, chemical, and biological properties of soils; soil
formation, classification and global distribution; soil health, soils and
humanity and sustainable land management.

AGRON 183: Basic Skills for Agronomists
(0-3) Cr. 1. F.
Developing the skills that agronomists employ in their work with
crops, soil, and the environment through activities involving tools and
methodologies used by agronomists. Enrollment is restricted to first-year
students majoring in agronomy.

AGRON 206: Introduction to Weather and Climate
(Cross-listed with MTEOR). (3-0) Cr. 3. F.S.
Basic concepts in weather and climate, including atmospheric
measurements, radiation, stability, precipitation, winds, fronts,
forecasting, and severe weather. Applied topics include global warming,
ozone depletion, world climates and weather safety.

AGRON 210: Professional Development in Agronomy: Career Planning
Cr. R.
Career planning, résumé and cover letter preparation. See advisor for
departmental requirements.

AGRON 217: Weed Identification
(1-2) Cr. 1. F.S.
Prereq: BIOL 101 or equivalent
Half-semester course. Identification of important weeds of agricultural,
horticultural and native habitats. Principles of plant taxonomy and
classification. Field trips.
AGRON 259: Organic Compounds in Plants and Soils
(3-0) Cr. 3. S.
Prereq: CHEM 163, BIOL 212, MATH 140, AGRON 182
Structure, function, and transformations of organic compounds significant in plant and soil environments.

AGRON 270: Geospatial Technologies
(Cross-listed with ENSCI). Cr. 3. F.
Concepts and tools for acquiring, managing, analyzing, and displaying geographic information, including GIS, remote sensing, spatial analysis, and cartography. Focus on applications in biological, ecological, environmental, and agricultural sciences.

AGRON 279: Field Exploration of Agronomy
(2-3) Cr. 3. F.
Prereq: AGRON 181 or equivalent and AGRON 182 or equivalent
Field-based investigation of Iowa's agronomic systems. Application of principles learned in introductory soils, crops and agronomy courses. For students majoring in agronomy.

AGRON 280: Crop Development, Production and Management
(3-0) Cr. 3. F.S.
Prereq: AGRON 181 or equivalent and AGRON 182 or equivalent
Overview of crops and cropping systems in the context of global and US agriculture. Focus on agronomic principles, constraints and opportunities as they apply to various locations in Iowa, the USA and the world.

AGRON 281: Crop Physiology
(3-0) Cr. 3. S.
Prereq: Agron 181 or equivalent
Science governing plant growth and development in the context of cropping and genetic improvements.

AGRON 282: Soil Conservation and Land Use
(3-0) Cr. 3. F.S.
Prereq: Agron 182 or equivalent
Principles of soil conservation and land use with emphasis on best management practices and use of soil maps and databases such as Web Soil Survey.

AGRON 283: Pesticide Application Certification
(Cross-listed with ENT, FOR, HORT). (2-0) Cr. 2. S.
Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

AGRON 298: Cooperative Education
Cr. R. F.S.S.S.
Prereq: Permission of faculty member or student's advisor, sophomore classification
Students register for this course in order to retain full-time status while on a professional work experience. Students must register for this course prior to commencing each work period. Offered on a satisfactory-fail basis only.

AGRON 310: Professional Development in Agronomy: Work Experience
Cr. R.
Professional work experience in agronomy. See advisor for departmental requirements.

AGRON 311: Professional Internship in Agronomy
(1-0) Cr. 1. F.
Prereq: Permission of advisor
A supervised learning experience in a professional setting related to crop production, plant breeding, soil science or environmental science. For students majoring in Agronomy.

AGRON 316: Crop Structure-Function Relationships
(3-0) Cr. 3. F.S.
Prereq: BIOL 212 AGRON 281 recommended
Basic principles concerning the growth, development, and production of crop communities in relation to their environment.

AGRON 317: Principles of Weed Science
(3-0) Cr. 3. F.

AGRON 320: Genetics, Agriculture and Biotechnology
(Cross-listed with GEN). (3-0) Cr. 3. F.S.
Prereq: BIOL 212
Transmission and molecular genetics with an emphasis on applications in agriculture, the structure and expression of the gene, how genes behave in populations and how recombinant DNA technology can be used to improve agriculture. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 320 and Biol 313 and 313L.

AGRON 330: Crop and Seed Identification Laboratory
(0-4) Cr. 2. F.
Prereq: AGRON 181 or equivalent
Identification, agronomic and binomial classification of crops, weeds, and diseases. Analysis of crop seed samples for contaminants of weed and other crop seeds.
AGRON 331: Intercollegiate Crops Team
(0-6) Cr. 2. Repeatable. F.S.
Prereq: Permission of instructor. AGRON 330 recommended
Intensive training in preparation for intercollegiate competition in national crops contests.

AGRON 334: Forage Crop Management
(3-0) Cr. 3. S.
Prereq: AGRON 181 or equivalent
Production and management of forage crops; concepts applied to yield, quality, and stand persistence; systems of forage utilization including grazing, hay, and silage.

AGRON 338: Seed Science and Technology
(Cross-listed with HORT). (2-3) Cr. 3. F.
Prereq: AGRON 181 (or equivalent) or HORT 221; BIOL 212
Seed production, maturation, dormancy, vigor, deterioration, and related aspects of enhancement, conditioning, storage, and quality evaluation. Aspects of the seed industry and regulation of seed marketing.

AGRON 342: World Food Issues: Past and Present
(Cross-listed with ENV S, FS HN). (3-0) Cr. 3. F.S.S.
Prereq: Junior classification
Issues associated with global agricultural and food systems including ethical, social, economic, environmental, and policy contexts. Investigation of various causes and consequences of overnutrition/undernutrition, global health, poverty, hunger, access, and distribution. Meets International Perspectives Requirement.

AGRON 351: Turfgrass Establishment and Management
(Cross-listed with HORT). (3-0) Cr. 3. F.
Prereq: HORT 221 or AGRON 181 (or equivalent) or BIOL 211
Principles and practices of turfgrass propagation, establishment, and management. Specialized practices relative to professional lawn care, golf courses, athletic fields, highway roadsides, and seed and sod production. The biology and control of turfgrass pests.

AGRON 351L: Turfgrass Establishment and Management Laboratory
(Cross-listed with HORT). (0-3) Cr. 1. F.
Prereq: Credit or enrollment in HORT 351
Those enrolled in the horticulture curriculum are required to take 351L in conjunction with 351 except by permission of the instructor.

AGRON 354: Soils and Plant Growth
(Cross-listed with HORT). (3-0) Cr. 3. F.S.
Prereq: AGRON 182 or equivalent and BIOL 101
Effects of chemical, physical, and biological properties of soils on plant growth, with emphasis on nutritive elements, pH, organic matter maintenance, and rooting development.

AGRON 354L: Soils and Plant Growth Laboratory
(Cross-listed with HORT). (0-3) Cr. 1. F.S.
Prereq: Agron or Hort major with credit or enrollment in AGRON 354
Laboratory exercises in soil testing that assess a soil's ability to support nutritive requirements for plant growth.

AGRON 360: Environmental Soil Science
(Cross-listed with ENSCI). (3-0) Cr. 3. S.
Prereq: AGRON 182 (or equivalent) or ENSCI 250 or GEOL 201
Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.

AGRON 370: Field Experience in Soil Description and Interpretation
(0-3) Cr. 1. Repeatable, maximum of 4 times. F.S.
Prereq: AGRON 182 or equivalent and permission of instructor
Description and interpretation of soils in the field and laboratory, emphasizing hands-on experience. Evaluation of soil information for land use. Students may participate in intercollegiate judging contests.

AGRON 392: Systems Analysis in Crop and Soil Management
(2-3) Cr. 3. F.
Prereq: AGRON 316 and AGRON 354
Management strategies at the level of the farm field. Emphasis will be on participatory learning activities.

AGRON 398: Cooperative Education
Cr. R. F.S.S.
Prereq: Permission of faculty member or student's advisor; junior classification
Student register for this course in order to retain full-time status while on a professional work experience. The student must register for this course prior to commencing each work period. Offered on a satisfactory-fail basis only.

AGRON 404: Global Change
(Dual-listed with AGRON 504). (Cross-listed with ENSCI, ENV S, MTEOR).
(3-0) Cr. 3. F.S.
Prereq: Four courses in physical or biological sciences or engineering; junior standing
Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change.
AGRON 405: Environmental Biophysics
(Dual-listed with AGRON 505). (Cross-listed with ENSCI, MTEOR). (3-0) Cr.
3. Alt. S., offered odd-numbered years.
Prereq: MATH 165 and some exposure to computer programming (any
language)
The movement of energy and mass among the soil, vegetation, and
atmosphere. The heat and water budget of humans, other animals, plants,
and plant communities. Relevance to weather and climate, the effect of
climate change on organisms, and remote sensing.

AGRON 406: World Climates
(Cross-listed with ENSCI, MTEOR). (3-0) Cr. 3. S.
Prereq: AGRON 206/MTEOR 206
Distribution and causes of different climates around the world. Effects
of climate and climate variations on human activities including society,
economy and agriculture. Current issues such as climate change and
international efforts to assess and mitigate the consequences of a
changing climate. Semester project and in-class presentation required.
Meets International Perspectives Requirement.

AGRON 407: Mesoscale Meteorology
(Dual-listed with AGRON 507). (Cross-listed with MTEOR). (3-0) Cr. 3. Alt.
S., offered even-numbered years.
Prereq: Math 166 and Mteor 443
Arritt, Gallus. Physical nature and practical consequences of mesoscale
atmospheric phenomena. Mesoscale convective systems, fronts, terrain-
forced circulations. Observation, analysis, and prediction of mesoscale
atmospheric structure.

AGRON 410: Professional Development in Agronomy: Senior Forum
(1-0) Cr. 1. F.S.
Prereq: Senior classification, AGRON 210
Development of an appropriate content for professionalism. Topics
include professional certification, ethics, and maintaining an active
network of information sources and professional contacts in support
of lifelong learning. Student interpretation, writings, presentations, and
discussions.

AGRON 421: Introduction to Plant Breeding
(Cross-listed with HORT). (3-0) Cr. 3. F.
Prereq: GEN 320 or BIOL 313
Fundamental principles of plant breeding and cultivar development,
breeding methods for self-pollinated, cross-pollinated and clonal crops.

AGRON 425: Crop and Soil Modeling
(Dual-listed with AGRON 525). (3-0) Cr. 3. F.
Prereq: MATH 165 or equivalent; AGRON 316 or AGRON 354 or equivalent.
Understanding basic crop physiology and soil processes through the
use of mathematical and statistical approaches. Structure of crop
models, dynamics and relationship among components such as leaf-level
photosynthesis, canopy architecture, root dynamics and soil carbon and
nitrogen pools.

AGRON 450: Issues in Sustainable Agriculture
(Cross-listed with ENV S). (3-0) Cr. 3. F.
Agricultural science as a human activity; contemporary agricultural
issues from agroecological perspective. Comparative analysis of
intended and actual consequences of development of industrial
agricultural practices.

AGRON 452: GIS for Geoscientists
(Dual-listed with AGRON 552). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3.
F.S.
Introduction to geographic information systems (GIS) using ArcGIS Pro
with particular emphasis on geoscientific data. Emphasizes typical GIS
operations and analyses in the geosciences to prepare students for
advanced GIS courses.

AGRON 459: Environmental Soil and Water Chemistry
(Dual-listed with AGRON 559). (Cross-listed with ENSCI). (3-3) Cr. 4. F.
Prereq: Two semesters of college-level chemistry, MATH 140, AGRON 182 (or
equivalent) or AGRON 360; GEOL 100 and AGRON 354 recommended
An introduction to the chemical properties of soils, chemical reactions
and transformations in soils and surface waters, and their impact on
the environment. Topics include solution chemistry in soils and surface
waters, solid-phase composition of soils, reactions at the solid-solution
interface, and applications to contemporary environmental issues.

AGRON 463: Soil Formation and Landscape Relationships
(Dual-listed with AGRON 563). (Cross-listed with ENSCI). (3-0) Cr. 3. F.
Prereq: AGRON 182 (or equivalent) or AGRON 260
Relationships between soil formation, geomorphology, and environment.
Soil description, classification, geography, mapping, and interpretation for
land use. Two weekend field trips. Credit for one of AGRON 463 or AGRON
463I may be applied for graduation.

AGRON 477: Soil Physics
(Dual-listed with AGRON 577). (Cross-listed with ENSCI). (3-0) Cr. 3. S.
Prereq: AGRON 182 or equivalent and MATH 166 recommended
The physical soil system: the soil components and their physical
interactions; transport processes involving water, air, and heat.
AGRON 484: Organic Agricultural Theory and Practice
(Dual-listed with AGRON 584). (Cross-listed with HORT). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: 9 cr. in biological or physical sciences
Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture.
Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

AGRON 485: Soil and Environmental Microbiology
(Dual-listed with AGRON 585). (Cross-listed with ENSCI, MICRO). (2-3) Cr. 3. F.
Prereq: AGRON 182 or equivalent; MICRO 201 and MICRO 201L recommended
The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

AGRON 488: GIS for Geoscientists II
(Dual-listed with AGRON 588). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: GIS course, such as GEOL 452, CRP 451, CRP 452, NREM 345, NREM 446, AE 408 or equivalent
GIS course with focus on the spatial analysis and modeling of raster data and triangulated irregular network (TIN) data. Uses ArcGIS and various extensions, such as Spatial Analyst, 3D Analyst, and ArcScene. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 588) a class project.

AGRON 490: Independent Study
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.S.S.
Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation
Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490E: Independent Study: Entrepreneurship
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.S.S.
Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation
Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490G: Independent Study: General
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.S.S.
Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation
Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490H: Independent Study: Honors
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.S.S.
Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation
Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490Z: Independent Study: Service Learning
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.S.S.
Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation
Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 491: Seed Science Internship Experience
(Cross-listed with HORT). Cr. 1-2. Repeatable, maximum of 1 times.
Prereq: AGRON 338, advanced approval and participation of employer and instructor
A professional work experience and creative project for seed science secondary majors. The project requires the prior approval and participation of the employer and instructor. The student must submit a written report.

AGRON 493: Workshop in Agronomy
Cr. arr. Repeatable, maximum of 4 times.
Prereq: Permission of instructor
Workshop experience in crops, soils, or agricultural meteorology.

AGRON 496: Agricultural Travel Course
Cr. arr. Repeatable.
Prereq: Permission of instructor
Limited enrollment. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on crop and livestock production. Location and duration of tours will vary. Tour expenses paid by students. Check with department for current offerings.

AGRON 496A: International Tour
Cr. arr. Repeatable.
Prereq: Permission of instructor
Limited enrollment. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on crop and livestock production. Location and duration of tours will vary. Tour expenses paid by students. Check with department for current offerings. Meets International Perspectives Requirement.
AGRON 496B: Domestic Tour
Cr. arr. Repeatable.
Prereq: Permission of instructor
Limited enrollment. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on crop and livestock production. Location and duration of tours will vary. Tour expenses paid by students. Check with department for current offerings.

AGRON 497: Agroecology Field Course
(3-0) Cr. 3. F.
Prereq: Jr. or Sr. classification with at least 8 credits in Agronomy
A one-week intensive class, offered off-campus. Student will visit farms within the Midwest and analyze the sustainability of each farm.

AGRON 498: Cooperative Education
Cr. R. F.S.S.
Prereq: Permission of faculty member or student's advisor; senior classification
Students register for this course in order to retain full-time status while on a professional work experience. Students must register for this course prior to commencing each work period. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

AGRON 500: Orientation Seminar
(2-0) Cr. 1. F.
Prereq: Agronomy graduate students only
An introduction to Iowa and U.S. agriculture for scholars in agronomic majors. Field trips when possible. Departmental role in the functioning of research, teaching, and extension in fulfilling the charge given the land-grant university.

AGRON 501: Crop Growth and Development
(3-0) Cr. 3. F.S.
Prereq: AGRON 181 or equivalent, MATH 140, CHEM 163, BIOL 101
Physiological processes in crop growth, development and yield: photosynthesis, respiration, water relations, mineral nutrition, assimilate partitioning, seedling vigor, light interception and canopy growth, root growth, reproduction and yield.

AGRON 502: Chemistry, Physics, and Biology of Soils
(3-0) Cr. 3. F.Alt. S., offered odd-numbered years.
Prereq: AGRON 181 or equivalent, AGRON 182 or equivalent, BIOL 101, CHEM 163, MATH 140
Soil chemical, physical, and biological properties that control processes within the soil, their influence on plant/soil interactions, and soil classification. Basic concepts in soil science and their applications.

AGRON 503: Climate and Crop Growth
(3-0) Cr. 3. F.S.
Prereq: AGRON 181 or equivalent and MATH 140
Applied concepts in climate and agricultural meteorology with emphasis on the climate-agriculture relationship and the microclimate-agriculture interaction and crop risk management. Basic meteorological principles are also presented to support these applied concepts.

AGRON 504: Global Change
(Dual-listed with AGRON 404). (Cross-listed with ENSCI, MTEOR). (3-0) Cr. 3. F.S.
Prereq: Four courses in physical or biological sciences or engineering; junior standing
Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change.

AGRON 505: Environmental Biophysics
(Dual-listed with AGRON 405). (Cross-listed with ENSCI, MTEOR). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: MATH 165 and some exposure to computer programming (any language)
The movement of energy and mass among the soil, vegetation, and atmosphere. The heat and water budget of humans, other animals, plants, and plant communities. Relevance to weather and climate, the effect of climate change on organisms, and remote sensing.

AGRON 506: Crop Genetics
(Cross-listed with HORT). Cr. 3. F.
Introduction to plant reproductive systems, gene segregation and linkage analysis, molecular nature of genes and how genes confer phenotypes, mutation and biotechnology, quantitative inheritance and population genetics to prepare students for subsequent courses in crop improvement. Enrollment is restricted to off-campus MS in Plant Breeding students.

AGRON 507: Mesoscale Meteorology
(Dual-listed with AGRON 407). (Cross-listed with MTEOR). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: Math 166 and Mteor 454
The physical nature and practical consequences of mesoscale atmospheric phenomena. Mesoscale convective systems, fronts, terrain-forced circulations. Observation, analysis, and prediction of mesoscale atmospheric structure. Semester project and in-class presentation required.
AGRON 508: Biophysical Crop Ecology
(3-0) Cr. 3. Alt. S., offered even-numbered years.
The physics behind how humans use plant photosynthesis to convert energy from the sun into useful products. Techniques for quantifying and predicting ecological interactions in the soil-plant-atmosphere continuum.

AGRON 509: Agroecosystems Analysis
(Cross-listed with SOC, SUSAG). (3-4) Cr. 4. F.
Prereq: Senior or above classification; permission of instructor
Experiential, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing both field visits and classroom activities. Focus on understanding multiple elements, perspectives (agronomic, economic, ecological, social, etc.), and scales of operation.

AGRON 510: Crop Improvement
(Cross-listed with STB). (3-0) Cr. 3.
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.
A study of agriculture from its origins with the domestication of crop plants through basic genetics, demonstrating the challenges and elements of breeding strategies intended to manage gene x environmental interactions. Elements of biotechnology including use of molecular markers, development of genetically modified cultivars, gene mapping, cloning, and gene editing will be covered. Methods to measure the effectiveness of plant breeding (genetic gain) and the impact of improved agronomic practices contributing to increased agricultural productivity will be covered. Use of intellectual property protection, and the conservation and utilization of exotic genetic resources.

AGRON 511: Crop Improvement
(3-0) Cr. 3. F.S.
Prereq: AGRON 181 or equivalent, MATH 140, CHEM 163, BIOL 101
Basic principles in the genetic improvement of crop plants. Methods of cultivar development in self-pollinated and cross-pollinated crop species.

AGRON 512: Soil-Plant Environment
(3-0) Cr. 3. S.
Prereq: AGRON 502. Recommended AGRON 501
Soil properties and their impact on soil/plant relationships. Soil structure, aeration, moisture, and nutrients will be discussed in the context of soil fertility and environmental quality management.

AGRON 513: Quantitative Methods for Agronomy
(3-0) Cr. 3. F.S.
Prereq: AGRON 181 or equivalent, MATH 140, STAT 104
Quantitative methods for analyzing and interpreting agronomic information. Principles of experimental design, hypothesis testing, analysis of variance, regression, correlation, and graphical representation of data. Use of SAS and Excel for organization, analyzing, and presenting data.

AGRON 514: Integrated Pest Management
(3-0) Cr. 3. F.S.
Prereq: AGRON 181 or equivalent, AGRON 501, MATH 140, CHEM 163, BIOL 101; AGRON 502 and AGRON 503 recommended
Principles and practices of weed science, entomology, and plant pathology applied to crop production systems. Biology, ecology and principles of integrated crop pest management.

AGRON 515: Integrated Crop and Livestock Production Systems
(Cross-listed with A B E, AN S, SUSAG). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: SUSAG 509
Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

AGRON 516: Crop Physiology
(3-0) Cr. 3. S.
Investigation of Molecular, whole plant, and plant community processes essential to biomass production and seed formation, and analysis of molecular approaches to overcome the limitations imposed on these processes by the environment.

AGRON 518: Microwave Remote Sensing
(Cross-listed with E E, MTEOR). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: Math 265
Microwave remote sensing of Earth’s surface and atmosphere using satellite-based or ground-based instruments. Specific examples include remote sensing of atmospheric temperature and water vapor, precipitation, ocean salinity, and soil moisture.
AGRON 519: Herbicide Physiology and Biochemistry
(2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: AGRON 316 (or equivalent) and AGRON 317
Herbicide mechanisms of action, selectivity, uptake, and translocation.
Specific sites of herbicide action as they affect plant physiology.
Herbicide resistance in weeds and crops. Implications of herbicides on weed management.

AGRON 520: Plant Breeding Methods
Cr. 3. F.
Prereq: AGRON 506
Breeding methods used in the genetic improvement of self-pollinated, cross-pollinated and clonal crops.

AGRON 521: Principles of Cultivar Development
(3-0) Cr. 3. S.
Prereq: AGRON 421 and STAT 401
Theoretical and practical exploration of breeding methods to develop clonal, pureline, inbred and hybrid cultivars. Principles and strategies to set breeding objectives, parental selection and germplasm management, population development, generation advancements, multiple trait selection, experimental designs in breeding programs; seed production and certification. Introduce tools available to a breeder.

AGRON 522: Field Methods in Plant Breeding
(0-6) Cr. 1-2. Alt. SS., offered odd-numbered years.
Prereq: AGRON 521
Field experience in planning and conducting plant breeding research for germplasm and cultivar development. Offered on a satisfactory-fail basis only.

AGRON 523: Molecular Plant Breeding
(2-2) Cr. 3. S.
Prereq: AGRON 421 or AGRON 521, GDCB 542A
Plant breeding in the era of sequenced genomes and transformation. High throughput genomic technologies will be presented in relation to various applications in plant breeding.

AGRON 524: Applied Plant Molecular Genetics & Biotechnology
Cr. 3. F.
Prereq: AGRON 506
Basic principles and applied techniques used in the genetic improvement of crop plants. Discussion of structure and function of genes that control traits of value. Types of molecular markers, analysis of quantitatively inherited traits, genome mapping, analyses of databases.

AGRON 525: Crop and Soil Modeling
(Dual-listed with AGRON 425). (3-0) Cr. 3. F.
Prereq: MATH 165 or equivalent; AGRON 316 or AGRON 354 or equivalent.
Understanding basic crop physiology and soil processes through the use of mathematical and statistical approaches. Structure of crop models, dynamics and relationship among components such as leaf-level photosynthesis, canopy architecture, root dynamics and soil carbon and nitrogen pools.

AGRON 526: Field Plot Technique
(3-2) Cr. 4. S.
Prereq: STAT 401
Planning experiments for agricultural research, analysis of data, and concepts in data interpretation.

AGRON 528: Quantitative Genetics for Plant Breeding
(3-0) Cr. 3. S.
Prereq: AGRON 506 or AGRON 513
An introduction to the application of quantitative genetics to plant breeding programs.

AGRON 530: Ecologically Based Pest Management Strategies
(Cross-listed with ENT, PL P, SUSAG). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

AGRON 531: Crop Ecology and Management
(3-0) Cr. 3. F.
Prereq: AGRON 501, AGRON 502, AGRON 503; AGRON 512 and AGRON 514 recommended
Ecological principles underlying crop production systems. Crop production in the context of management approaches, system resources and constraints, and interactions. Emphasis on the ecology of row and forage crops common to the Midwest. Required course for the Master of Science in Agronomy degree program.

AGRON 532: Soil Management
(3-0) Cr. 3. F.
Prereq: AGRON 501, AGRON 503, AGRON 512. Recommended AGRON 513
Evaluates the impact of various soil management practices on soil and water resources. Combines and applies basic information gained in Agron 502 and Agron 512. Emphasizes the agronomic, economic, and environmental effects of soil management strategies. Required course for the Master of Science in Agronomy degree program.
AGRON 533: Crop Protection
(3-0) Cr. 3. F.S.
Prereq: AGRON 514
Integrated management systems for important crop pests. Cultural, biological and chemical management strategies applicable to major crops grown in the Midwest. Required course for the Master of Science in Agronomy degree program.

AGRON 534: Seed and Variety, Testing and Technology
(Cross-listed with STB). (2-0) Cr. 2.
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.
The components of seed quality and how they are assessed in the laboratory, including traits derived from modern biotechnology. The impact of new technologies on seed quality testing. Variety maintenance procedures and breeder seed. Variety identification: phenotype and grow-out trials, isozyme testing, and DNA marker testing. Procedures for evaluating varieties. The variance tests appropriate for fixed effects analysis of variance. Statistical inference and stratification for yield trials. Use of strip plot testing.

AGRON 536: Quantitative Methods for Seed
(Cross-listed with STB). (2-0) Cr. 2. F.
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.
Quantitative Methods for analyzing and interpreting agronomic and business information for the seed industry. Principles of experimental design and hypothesis testing, regression, correlation, analysis of variance, and graphical representation of data. Use of spreadsheets and statistical software for manipulating, analyzing and presenting data.

AGRON 537: Quantitative Analytics for Plant Breeding
Cr. 3. F.S.
Prereq: AGRON 181, Math 140
Methods to quantify consequences of decisions based on analytical methods used in crop genetic improvement and cultivar development.

AGRON 538: Seed Physiology and the Environment
(Cross-listed with HORT). (2-0) Cr. 2. Alt. F., offered even-numbered years.
Prereq: AGRON 316; CHEM 231 or CHEM 331
Physiological aspects of seed development, maturation, longevity, dormancy, and germination of agronomic and horticultural crops and their interactions with field and storage environments. Emphasis on current literature and advanced methodology.

AGRON 539: Seed Conditioning and Storage
(Cross-listed with STB). (2-0) Cr. 2.
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.
The technical operations which may be carried out on a seed lot from harvest until it is ready for marketing and use. The opportunities for quality improvement and the risks of deterioration which are present during that time. Analysis of the costs of and benefits of operations. Evaluation of equipment based on benefits to the customer and producer. Interpretation of the role of the conditioning plant and store as a focal points within the overall operations of a seed company.

AGRON 544: Host-Pest Interactions
Cr. 3. S.
Incorporation of the principles of integrated pest management and crop protection. Management systems (biological, cultural, chemical) and strategies which practice principles of weed science, plant pathology, and entomology.

AGRON 546: Strategies for Diversified Farming Systems
(Cross-listed with HORT, SUSAG). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: SUSAG 509
Project-focused engagement in food and farming systems using tools and perspectives drawn from multiple disciplines. Includes a field component.

AGRON 547: Seed Production
(Cross-listed with STB). (2-0) Cr. 2.
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.
Survey of crop production; including management of soil fertility, planting dates, populations, weed control, and insect control. Analysis of the principles of seed multiplication and the key practices which are used to ensure high quality in the products. Field inspection procedures and production aspects that differ from other crop production. Foundation seed production. Analysis of the typical organization of field production tasks. Survey of the differences in seed production strategies between crops and the impact of these differences on seed production.

AGRON 551: Growth and Development of Perennial Grasses
(Cross-listed with HORT). (2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: Junior or senior or graduate classification or permission of instructor
Selected topics on anatomy, morphology, and physiology relative to growth and development of perennial grasses. Emphasis on growth and development characteristics peculiar to grasses and variations of such characteristics under natural and managed conditions.
AGRON 552: GIS for Geoscientists  
(Dual-listed with AGRON 452). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3.  
F.S.  
Introduction to geographic information systems (GIS) using ArcGIS Pro  
with particular emphasis on geoscientific data. Emphasizes typical GIS  
operations and analyses in the geosciences to prepare students for  
advanced GIS courses.

AGRON 553: Soil-Plant Relationships  
(Cross-listed with ENSCI). (3-0) Cr. 3. S.  
Prereq: AGRON 354  
Composition and properties of soils in relation to the nutrition and growth  
of plants.

AGRON 554: Advanced Soil Management  
(2-0) Cr. 2. Alt. F., offered odd-numbered years.  
Prereq: AGRON 354, MATH 165  
Implications of soil management on the soil environment and root  
activity. Effect of soil physical properties on soil erosion.

AGRON 555: Environmental Soil Mineralogy  
(Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: AGRON 473, CHEM 178. Recommend: GEOL 311  
Structure and behavior of clay minerals, humic substances and biochar  
in soil environments, with emphasis on reactions and environmental  
implications.

AGRON 556: Agroecosystem Ecology  
(3-0) Cr. 3. Alt. F., offered odd-numbered years.  
Prereq: 3 credits in chemistry and 6 credits in biology; Recommended: ENSCI  
382, ENSCI 553, or upper-level coursework in nutrient cycles  
Major, biologically important agroecosystem nutrient cycles as linked  
to energy (carbon) and water. Effects of agricultural production  
and management on cycling within systems and transfer among system at  
local, regional and global scales will be emphasized.

AGRON 559: Environmental Soil and Water Chemistry  
(Dual-listed with AGRON 459). (Cross-listed with ENSCI). (3-3) Cr. 4. F.  
Prereq: Two semesters of college-level chemistry, MATH 140, AGRON 182 (or  
equivalent) or AGRON 360; GEOL 100 and AGRON 354 recommended  
An introduction to the chemical properties of soils, chemical reactions  
and transformations in soils and surface waters, and their impact on  
the environment. Topics include solution chemistry in soils and surface  
waters, solid-phase composition of soils, reactions at the solid-solution  
interface, and applications to contemporary environmental issues.

AGRON 561: Population and Quantitative Genetics for Breeding  
(Dual-listed with AGRON 465). (Cross-listed with ENSCI). (3-0) Cr. 3. F.  
Prereq: STAT 587  
Population and quantitative genetics for plant and animal genetics. Study  
of the genetic basis and analysis of variation in quantitative traits in  
domestic or experimental populations using phenotypic and molecular  
marker data, including estimation of heritability and other genetic  
parameters, linkage analysis and mapping of quantitative trait loci,  
and the impact of inbreeding, heterosis, and genotype-by-environment  
interaction.

AGRON 563: Soil Formation and Landscape Relationships  
(Dual-listed with AGRON 463). (Cross-listed with ENSCI). (3-0) Cr. 3. F.  
Prereq: AGRON 182 (or equivalent) or AGRON 260  
Relationships between soil formation, geomorphology, and environment.  
Soil description, classification, geography, mapping, and interpretation for  
land use. Two weekend field trips. Credit for one of AGRON 463 or AGRON  
463I may be applied for graduation.

AGRON 570: Risk Assessment for Food, Agriculture and Veterinary  
Medicine  
(Cross-listed with TOX, VDPAM). (3-0) Cr. 3. Alt. F., offered odd-numbered  
years.  
Prereq: Statistics 300-level or higher.  
Risk assessment principles as applied to biological systems. Exposure  
and effects characterization in human and animal health and ecological  
risk assessment. Risk analysis frameworks and regulatory decision-  
making. Introduction to quantitative methods for risk assessment using  
epidemiological and distributional analysis. Uncertainty analysis.

AGRON 575: Soil Formation and Transformation  
(Cross-listed with ENSCI). (1-0) Cr. 1. F.  
Prereq: AGRON 463 or equivalent  
A one-week intensive field class examining the pedology of Iowa under  
natural and transformed con.

AGRON 577: Soil Physics  
(Dual-listed with AGRON 477). (Cross-listed with ENSCI). (3-0) Cr. 3. S.  
Prereq: AGRON 182 or equivalent and MATH 166 recommended  
The physical soil system: the soil components and their physical  
interactions; transport processes involving water, air, and heat.

AGRON 578: Laboratory Methods in Soil Physics  
(Cross-listed with ENSCI). (0-3) Cr. 1. S.  
Prereq: concurrent enrollment in AGRON 477 or AGRON 577  
Methods of measuring soil physical properties such as texture, density,  
and water content, and transport of heat, water, and gases.
AGRON 581: Experience in Plant Science Extension and Outreach
(Cross-listed with ENT, HORT, PL P). Cr. 1. Alt. SS., offered odd-numbered years.
A supervised learning experience in several extension delivery methods used in the plant sciences. Participation in Iowa State University-based extension programs that may include field crop, horticulture, or Master Gardener programming.

AGRON 584: Organic Agricultural Theory and Practice
(Dual-listed with AGRON 484). (Cross-listed with HORT, SUSAG). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: 9 cr. in biological or physical sciences
Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture.
Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

AGRON 585: Soil and Environmental Microbiology
(Dual-listed with AGRON 485). (Cross-listed with ENSCI, MICRO). (2-3) Cr. 3. F.
Prereq: AGRON 182 or equivalent; MICRO 201 and MICRO 201L recommended
The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

AGRON 588: GIS for Geoscientists II
(Dual-listed with AGRON 488). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: GIS course, such as GEOL 452, CRP 451, CRP 452, NREM 345, NREM 446, AE 408 or equivalent
GIS course with focus on the spatial analysis and modeling of raster data and triangulated irregular network (TIN) data. Uses ArcGIS and various extensions, such as Spatial Analyst, 3D Analyst, and ArcScene. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 588) a class project.

AGRON 590: Special Topics
Cr. arr. Repeatable.
Prereq: 15 credits in agronomy
Literature reviews and conferences on selected topics in crops, soils, or agricultural meteorology according to needs and interest of student.

AGRON 591: Agronomic Systems Analysis
(3-0) Cr. 3. S.
Prereq: AGRON 511, AGRON 513, AGRON 531, AGRON 532, AGRON 533
Analysis of cropping systems from a problem-solving perspective. Case studies will be used to develop the students' ability to solve agronomic problems.

AGRON 592: Current Issues in Agronomy
(3-0) Cr. 3. F.S.
Prereq: AGRON 501, AGRON 503, AGRON 511, AGRON 512, AGRON 513, AGRON 514
Critical analysis and discussion of agricultural practices, programs, and policies of current interest to the field of agronomy. Leadership skill development through consideration of technical, social, and ethical components underlying controversial topics. Enhancement of communication proficiency through debate and writing in order to define problems, articulate possible solutions, and propose appropriate courses of action. Required course for the Master of Science in agronomy degree program.

AGRON 593: Workshop in Agronomy
Cr. arr. Repeatable.
Prereq: Graduate classification

AGRON 594: Agronomy MS Practicum
(1-0) Cr. 1. SS.
Prereq: AGRON 501, AGRON 502, AGRON 503, AGRON 514 or current enrollment. Recommended: AGRON 511, AGRON 512, AGRON 513
Practical field and laboratory experiences integrating coursework in climatology, crops, and soils. Includes lectures, labs and field tours.

AGRON 595: Seed Quality, Production, and Research Management
(Cross-listed with STB). (3-0) Cr. 3.
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.
Advanced survey of the organization, staff capabilities and management characteristics typical in seed production and crop improvement in seed enterprises. Analysis of the use of quality information in the management of seed operations and sales. Process management applications for seed. Production planning for existing capacity. Analysis of the manager’s tasks in the annual cycle and how the tasks of these managers relate to the general categories of business management roles. Difference in management strategies used with different situations and groups of employees.

AGRON 599: Creative Component
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.
AGRON 599A: Agricultural Meteorology
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599B: Crop Production and Physiology
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599C: Plant Breeding
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599D: Soil Chemistry
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599E: Soil Fertility
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599F: Soil Management
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599G: Soil Microbiology and Biochemistry
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599H: Soil Morphology and Genesis
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599I: Soil Physics
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599J: Seed Science
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599K: Weed Science
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599L: Agronomy
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

Courses for graduate students:

AGRON 600: Seminar
(1-0) Cr. 1. Repeatable, maximum of 6 times. F.S.
Reports and discussion of recent literature and research.

AGRON 600A: Seminar: Plant Breeding
(1-0) Cr. 1. Repeatable, maximum of 6 times. S.
Instruction and practice in giving scientific presentations related to the fields of plant breeding, genetics, or genomics, with an emphasis on effective communication and presentation techniques.

AGRON 600B: Seminar: Soils
(1-0) Cr. 1. Repeatable, maximum of 6 times. S.
Reports and discussion of recent literature and research.
AGRON 600C: Seminar: Crop Production and Physiology
(1-0) Cr. 1. Repeatable, maximum of 6 times. F.S.
Reports and discussion of recent literature and research.

AGRON 601: Agronomic Science Presentations
(3-0) Cr. 2. S.
Prereq: graduate status in agronomic science, permission of instructor.
Experience in critical communications in exchange of ideas through oral and poster presentations and scientific questioning/evaluation.

AGRON 605: Boundary-Layer Meteorology
(Cross-listed with MTEOR). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: MTEOR 443 or equivalent-level course in engineering fluids
Atmospheric boundary-layer structure and dynamics. Diurnal and seasonal variations, turbulent fluxes and turbulence kinetic energy. Measurements and empirical relations for wind and temperature near the ground. Numerical simulation and applications to wind energy.

AGRON 610: Foundations of Sustainable Agriculture
(Cross-listed with A B E, ANTHR, SOC, SUSAG). (3-0) Cr. 3. F.
Prereq: Graduate classification, permission of instructor
Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

AGRON 621: Advanced Plant Breeding
(3-0) Cr. 3. S.
Prereq: AGRON 521, AGRON 525, AGRON 561, GEN 410
Genetics of breeding populations, means of genotypes and breeding populations, mapping quantitative trait loci, variation in breeding populations, genetic design, genotype by environment interaction, selection in breeding populations, recurrent selection, marker-assisted selection, best linear unbiased prediction, genome-wide association studies, genomic selection, heterosis and hybrid prediction, and multiple traits.

AGRON 625: Genetic Strategies in Plant Breeding
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: AGRON 521 and GDCB 510
Evaluation of genetic, molecular, and cellular approaches to crop improvement; gene transfer methods. Application and role of basic plant biology in breeding programs and processes; genome structure and function, gene isolation, expression, regulation, and modification. Integration of molecular and cellular methods in breeding strategies; analysis of alternative breeding methods, regulatory and ethical issues.

AGRON 677: Advanced Soil Physics
(2-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: AGRON 577 and MATH 266; COM S 207 recommended
The flow and distribution of water, chemicals, and heat in soils. Physical principles and applications.

AGRON 693: Entrepreneurship for Graduate Students in Science and Engineering
(Cross-listed with BCB, E E, ENGR, GENET, M E). (3-0) Cr. 1. Repeatable, maximum of 2 credits. F.S.
Prereq: Graduate student status and completion of at least one semester of graduate coursework.
Understanding key topics of starting a technology based company, from development of technology-led idea to early-stage entrepreneurial business. Concepts discussed include: entrepreneurship basics, starting a business, funding your business, protecting your technology/business IP. Subject matter experts and successful, technology-based entrepreneurs will provide real world examples from their experience with entrepreneurship. Learn about the world class entrepreneurship ecosystem at ISU and Central Iowa. Offered on a satisfactory-fail basis only.

AGRON 696: Research Seminar
(Cross-listed with BBMB, FOR, GDCB, HORT, PLBIO). Cr. 1. Repeatable. Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only.

AGRON 698: Agronomy Teaching Practicum
Cr. 1-2. Repeatable. F.S.SS.
Prereq: Graduate classification in agronomy and permission of instructor
Graduate student experience in the agronomy teaching program. Offered on a satisfactory-fail basis only.

AGRON 699: Research
Cr. arr. Repeatable.

AGRON 699A: Agricultural Meteorology
Cr. arr. Repeatable.

AGRON 699B: Crop Production and Physiology
Cr. arr. Repeatable.

AGRON 699C: Plant Breeding
Cr. arr. Repeatable.

AGRON 699D: Soil Chemistry
Cr. arr. Repeatable.

AGRON 699E: Soil Fertility
Cr. arr. Repeatable.

AGRON 699F: Soil Management
Cr. arr. Repeatable.
AGRON 699G: Soil Microbiology and Biochemistry
Cr. arr. Repeatable.

AGRON 699H: Soil Morphology and Genesis
Cr. arr. Repeatable.

AGRON 699I: Soil Physics
Cr. arr. Repeatable.

AGRON 699J: Plant Physiology
Cr. arr. Repeatable.

AGRON 699K: Seed Science
Cr. arr. Repeatable.

AGRON 699L: Weed Science
Cr. arr. Repeatable.

Air Force Aerospace Studies (AFAS)

Any experimental courses offered by AFAS can be found at:
registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

AFAS 103: Introductory Leadership Laboratory with Physical Training
(0-4) Cr. 2. Repeatable, maximum of 4 credits. F.S.
Prereq: Membership as a cadet in AFROTC
Instruction for new cadets on Air Force customs and courtesies; drill and ceremonies, issuing military commands, studying the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers while also using basic military training skills and instruction to develop confidence, leadership, and communication skills through physical fitness. Full participation in all events will be determined based on student's physical and medical eligibility. Offered on a satisfactory-fail basis only.

AFAS 141: Foundations of the United States Air Force
(1-0) Cr. 1. S.
A continuation of 141. Topics expand Air Force history and heritage by examining the various functions of airpower and the organizational/command structures used to employ them. Introduces leading theories of warfare and conflict, basic principles and tenets of Air Force doctrine to guide future war planners. The course places emphasis on leadership and team building, further study of interpersonal communication, and above all, ethical decision making in the context of a military environment.

AFAS 203: Basic Leadership Laboratory with Physical Training
(0-4) Cr. 2. Repeatable, maximum of 4 credits. F.S.
Prereq: Membership as a cadet in AFROTC
Instruction and critique of cadets on Air Force customs and courtesies, drill and ceremonies, and issuing military commands in preparation for AFROTC summer Field Training while also using basic military training skills and instruction to develop confidence, leadership, and communication skills through physical fitness. Full participation in all events will be determined based on student's physical and medical eligibility. Offered on a satisfactory-fail basis only.

AFAS 251: Team and Leadership Fundamentals
Cr. 1. F.
Measuring character through self-assessment and its importance for leadership and team building. The importance of listening and communication for mission accomplishment. Leadership, team building, and problem solving skills in the context of Air Force core values.

AFAS 252: Team and Leadership Fundamentals II
Cr. 1. S.
Defining leadership through the lens of human relations, conflict and stress management, and ethical decision making. The importance of leveraging diversity and collaborative relationships with negotiating and resiliency techniques in the context of Air Force core values.

AFAS 303: Intermediate Leadership Laboratory with Physical Training
(0-4) Cr. 2. Repeatable, maximum of 4 credits. F.S.
Prereq: Membership as a cadet in AFROTC
Mid-level management of leadership experience involving planning and controlling of most AFROTC military activities. Students will help senior leadership to prepare and present briefings and other oral and written communications; provide interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets; and use advanced military training skills and instruction to develop confidence, leadership, and communication skills through physical fitness. Full participation in all events will be determined based on student's physical and medical eligibility. Offered on a satisfactory-fail basis only.
AFAS 341: Air Force Leadership Studies I
(3-0) Cr. 3. F.
Presents the complex issues of leadership and management in the U.S. Air Force; a large and diverse organization. The theoretical aspects of leadership, management, communications, motivation and problem-solving are examined and studied against the backdrop of the U.S. Air Force.

AFAS 342: Air Force Leadership Studies II
(3-0) Cr. 3. S.
Prereq: AFAS 341
A continuation of AFAS 341. Examines the theoretical aspects of leadership, management, communications, and supervisory skills while studying them against the backdrop of the U.S. Air Force.

AFAS 403: Advanced Leadership Laboratory with Physical Training
(0-4) Cr. 2. Repeatable, maximum of 6 credits. F.S.
Prereq: Membership as a cadet in AFROTC
Advanced leadership experience involving the planning and controlling of all upper-level AFROTC military activities. Students will prepare and present briefings and other oral and written communications; provide interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets; and use advanced military training skills and instruction to develop confidence, leadership, and communication skills through physical fitness. Full participation in all events will be determined based on student’s physical and medical eligibility. Offered on a satisfactory-fail basis only.

AFAS 441: National Security Studies
(3-0) Cr. 3. F.
Traces constitutional roots of authority and responsibilities to the Air Force officer, to include development of national security and strategy that defines US military policy and priorities. Applies legislation, joint doctrine, and relationships of operational and administrative authority concepts in the US military in the context of regional studies.

AFAS 442: Preparation for Active Duty
(3-0) Cr. 3. S.
Explores the range of professional, personal and social support structures available to US Air Force officers on active duty. Examines practical supervision tools to manage expectations, career development, and disciplinary action leading to the oath of office and acceptance of a commission in the US Air Force.

AFAS 483: Situational Leadership Laboratory with Physical Training
Cr. 2. Repeatable, maximum of 4 times. F.S.
Prereq: AFAS 403
Situational leadership laboratory is for extended cadets that have completed the AFROTC curriculum but have not finished their degree. This provides an opportunity to continue growing as a leader in supervisory and mentorship positions while assisting the cadre with planning and controlling of all upper-level AFROTC military activities. Extended cadets will have the opportunity to work directly with cadre on special projects and duties that further prepare them for life as an active duty officer. Full participation in all events will be determined based on student’s physical and medical eligibility. Offered on a satisfactory-fail basis only.

American Indian Studies (AM IN)

Any experimental courses offered by AM IN can be found at: registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

AM IN 201: Native People in American Culture
(3-0) Cr. 3. F.S.S.
Perceptions and realities of Native people living in and responding to American society and culture. Topics include representations, contemporary Native identity, literature, the arts, history, film, and issues of diversity.

Meets U.S. Diversity Requirement

AM IN 205: American Indians in the Movies
(3-0) Cr. 3. Alt. S.S., offered irregularly.
Examines the role of American Indians in the movie industry. Explores the development of American Indian characters and filmmaking, and the relevance for Native communities, through feature films and academic analysis. One focus is a comparison of non-Native and Native films in form, content, and message, and the changing character of Native representation in both.

Meets U.S. Diversity Requirement

AM IN 210: Introduction to American Indian Studies
(3-0) Cr. 3. F.S.S.
Introduction to the multidisciplinary aspects of American Indian Studies. Topics include the relevant events and ideas defining the contemporary American Indian experience, on and off reservation, in the United States. Sovereignty, identity, jurisdiction, taxes, economic development, education, and other issues are addressed.

Meets U.S. Diversity Requirement
AM IN 225: American Indians of Iowa
(Cross-listed with ANTHR). Cr. 3. F.
Cultures and histories of Native people who have called the present state of Iowa home; primary focus on the period between 1700 CE and the present; Native interactions with Spanish, French, British, and American people.
Meets U.S. Diversity Requirement

AM IN 240: Introduction to American Indian Literature
(Cross-listed with ENGL). (3-0) Cr. 3. F.
Prereq: Credit in or exemption from ENGL 150
Appreciation of oral and written forms of American Indian literatures. Tropes and techniques in oral, visual and written texts. Focus on the role of American Indians in interdisciplinary approaches to modern social and environmental issues as expressed in literary works.
Meets U.S. Diversity Requirement

AM IN 310: Contemporary Topics in American Indian Studies
(3-0) Cr. 3. Alt. F., offered irregularly. Alt. S., offered irregularly.
Prereq: AM IN 210 recommended
Examines contemporary issues and important topics affecting Native communities overall.
Meets U.S. Diversity Requirement

AM IN 311: Federal Indian Law and Policy
(3-0) Cr. 3.
Prereq: AM IN 210 recommended
Examines the impact of federal American Indian policies on Native communities, especially contemporary Indian Country and communities. Topics include sovereignty, recognition, the role of the Supreme Court, specific policies like allotment, and other relevant issues.
Meets U.S. Diversity Requirement

AM IN 312: American Indian Education
(3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: AM IN 210 recommended
Examines current and historical issues in American Indian education. Topics include traditional education, changes to formal education, tribal colleges and universities, current school systems, and other relevant topics.
Meets U.S. Diversity Requirement

AM IN 313: Native Land, Water, and Resources
(Cross-listed with NREM). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: AM IN 210 recommended
Examines Native land rights, water rights, and natural resources. Topics may include Native relations to landscapes, cultural resources and infrastructure projects, land rights, water usage agreements, and resource policies as they apply to on- and off-reservation Native communities.
Meets U.S. Diversity Requirement

AM IN 315: Archaeology of North America
(Cross-listed with ANTHR). (3-0) Cr. 3. S.
Prereq: ANTHR 202
Prehistory and early history of North America as reconstructed from archaeological evidence; peopling of the New World; culture-historical sequences of major culture areas; linkages of archaeological traditions with selected ethnohistorically known Native American groups.
Meets U.S. Diversity Requirement

AM IN 320: Great Plains Archaeology
(Cross-listed with ANTHR). (3-0) Cr. 3. F.
Prereq: ANTHR 202
Prehistoric societies of the Great Plains region of North America, from initial occupation to European contact; emphasis on sociocultural changes, continuities, and adaptations to changing environments using archaeological, ecological, ethnographic information.
Meets U.S. Diversity Requirement

AM IN 322: Peoples and Cultures of Native North America
(Cross-listed with ANTHR). (3-0) Cr. 3.
Prereq: ANTHR 201 or AM IN 210
Origin, distribution, and pre-contact life of the indigenous peoples of North America. Survey of culture areas; language families, social and political systems, ecological and economic adaptations, religion and spirituality; impact of European contact; cultural resilience and revitalization in contemporary American Indian life.
Meets U.S. Diversity Requirement

AM IN 324: Health and Native American Communities
(Cross-listed with ANTHR). (3-0) Cr. 3.
Prereq: ENGL 250
Overview of historic and contemporary health and health care in Native Communities. Indian Health Service and specific regulations. Consideration of both cultural and scientific approaches to medicine. Specific health issues (e.g., diabetes, alcoholism, depression, etc.) in American Indian communities.
Meets U.S. Diversity Requirement
AM IN 332: Current Issues in Native North America
(Dual-listed with AM IN 532). (Cross-listed with ANTHR). (3-0) Cr. 3.
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.
Meets U.S. Diversity Requirement

AM IN 332A: Current Issues in Native North America: Gender and Family
(Dual-listed with AM IN 532A). (Cross-listed with ANTHR). (3-0) Cr. 3.
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.
Meets U.S. Diversity Requirement

AM IN 332B: Current Issues in Native North America: Indigenous Ecologies and Geographies
(Dual-listed with AM IN 532B). (Cross-listed with ANTHR). (3-0) Cr. 3.
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.
Meets U.S. Diversity Requirement

AM IN 332C: Current Issues in Native North America: Cultural and Political Movements
(Dual-listed with AM IN 532C). (Cross-listed with ANTHR). (3-0) Cr. 3.
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.
Meets U.S. Diversity Requirement

AM IN 332D: Current Issues in Native North America: Regional Focus
(Dual-listed with AM IN 532D). (Cross-listed with ANTHR). (3-0) Cr. 3.
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.
Meets U.S. Diversity Requirement

AM IN 346: American Indian Literature
(Cross-listed with ENGL). (3-0) Cr. 3.
Prereq: ENGL 250
Survey of literature by Native Americans from pre-Columbian tales and songs to contemporary novels and poetry.
Meets U.S. Diversity Requirement

AM IN 426: Topics in Native American Architecture
(Cross-listed with ARCH). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: Junior classification
History, theory, and principles of Native American/Indian architecture, landscape architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment History, Theory, Culture. A maximum of 6 credits of ARCH 426 may be applied to degree program.
Meets U.S. Diversity Requirement

AM IN 490: Independent Study
Cr. arr. Repeatable, maximum of 9 credits.
Prereq: 6 credits in American Indian studies; permission of instructor and program director
Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 6 credits in AM IN 490 may be counted toward graduation. If more than 3 credits in AM IN 490 are taken, they must be from different instructors.

American Sign Language (ASL)

Any experimental courses offered by ASL can be found at:
registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

ASL 101: American Sign Language I
(4-0) Cr. 4. F.S.
Introduction to American Sign Language (ASL). Development of expressive and receptive skills including vocabulary, grammar, usage, and cultural information. Note: Distinct from “Signed English”. ASL is a natural language with its own rules of grammar and usage.
Meets U.S. Diversity Requirement

ASL 102: American Sign Language II
(4-0) Cr. 4. S.
Prereq: ASL 101
Introduction to American Sign Language (ASL) II continues development of expressive and receptive skills introduced in American Sign Language I, including vocabulary, grammar, usage, and cultural information. Distinct from “Signed English”. ASL is a natural language with its own rules of grammar and usage.
Meets U.S. Diversity Requirement
ASL 107: Introduction to the Deaf-World  
(1-0) Cr. 1.  
Nature and significance of the Deaf-World as a cultural and linguistic minority.  
Meets U.S. Diversity Requirement

ASL 201: Intermediate American Sign Language I  
(4-0) Cr. 4. F.  
Prereq: ASL 102 or equivalent.  
Development of fluency for intermediate conversational skills. Review of grammar and varying grammatical forms for both structured and unstructured social situations such as sharing opinions, discussing weekend activities, and exchanging views on current topics.

ASL 202: Intermediate American Sign Language II  
(4-0) Cr. 4. S.  
Prereq: ASL 201 or equivalent.  
A continuation and further application of language principles learned in ASL 201, to deepen ability to actively engage in dialogue both in structured and unstructured social situations. Further fluency in intermediate conversational skills will be developed, particularly in the areas of semantic equivalence and dialogic/monologic register.

ASL 275: Topics in Deaf Culture  
(3-0) Cr. 3.  
Focus on contemporary topics in Deaf Culture, Communities, and History. Readings and discussion from a wide range of sources. Topics vary according to faculty interest.  
Meets U.S. Diversity Requirement

ASL 305: ASL Classifiers and Depiction  
(3-0) Cr. 3.  
Prereq: ASL 201  
Focused analysis, documentation, discussion, and increased development of classifiers and depiction in ASL. Investigation in how these grammatical features are deliberately incorporated into conversational, presentational, scientific, and artistic language production.

ASL 325: Deaf Peoples: Pre-World War II  
(3-0) Cr. 3. F.  
Prereq: ASL 202 or instructor’s permission.  
Perspectives on and treatment of deaf people as individuals and groups prior to World War II. Taught in American Sign Language.  
Meets U.S. Diversity Requirement

ASL 490: Independent Study  
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.  
Prereq: 6 credits in ASL and permission of department chair  
Designed to meet the needs of students in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 6 credits of ASL 490 may be counted towards graduation.

Animal Ecology (A ECL)  
Any experimental courses offered by A ECL can be found at: registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

A ECL 231: Principles of Wildlife & Fisheries Conservation  
Cr. 3. S.  
Prereq: BIOL 211, BIOL 212, NREM 120  
Introduction to the principles of wildlife and fisheries management. Case studies will be explored along with assessment methods used to understand management including conservation of populations, species and communities, as well as habitat preservation and restoration.

A ECL 312: Ecology  
(Cross-listed with BIOL, ENSCI). (3-3) Cr. 4. F.SS.  
Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L  
Fundamental concepts and principles of ecology dealing with organisms, populations, communities, and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

A ECL 312I: Ecology  
(Cross-listed with ENSCI, IA LL). Cr. 4. SS.  
An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.

A ECL 321: Fish Biology  
(2-3) Cr. 3. S.  
Prereq: A ECL 365  
Biology, ecology, and evolution of fishes. Emphasis on structure, physiology, and behavior, including a focus on the conservation and management of fishes and their habitats. Laboratory focus on fish morphology, survey methods, identification, distribution, habits, and habitats of fishes.
A ECL 326I: Ornithology
(Cross-listed with IA LL). Cr. 2. SS.
The biology, ecology, and behavior of birds with emphasis on field studies of local avifauna. Group projects stress techniques of population analysis and methodology for population studies.

A ECL 333: Fisheries Techniques
(Cross-listed with NREM). (1-3) Cr. 2. F.
Prereq: BIOL 212
Introduction to techniques used in the collection and interpretation of fish population data in the field and in the lab. Course objectives include an understanding of population survey methodology and improving student critical thinking and teamwork skills. Laboratory focuses on field trips and hands-on sampling experience.

A ECL 365: Vertebrate Biology
(Cross-listed with BIOL). (3-2) Cr. 4. F.
Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L
Evolution, biology, and classification of fish, amphibians, reptiles, birds, and mammals. Emphasis on a comparative analysis of the structure and function of organ systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates.

A ECL 366: Natural History of Iowa Vertebrates
(2-3) Cr. 3. S.
Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L
Vertebrate fauna of Iowa, including fishes, amphibians, reptiles, birds, and mammals. Species identification, habitat requirements, community structure and assessment, conservation issues that include historical population changes and value of wild animals to the region's ecological and economic health.

A ECL 371: Ecological Methods
(Cross-listed with BIOL). (2-3) Cr. 3. F.
Prereq: A ECL 312; STAT 101 or STAT 104
Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations.

A ECL 401: Intro to Aquatic Animal Medicine
(Cross-listed with B M S). (1-2) Cr. 1. S.
8-week course. Introductory course with focus on fin fish production, health and medicine. Course content will help define future roles for veterinarians, producers, and service providers. Emphasis will be placed on water-evaluation, anatomy, pathology, infectious diseases, nutrition, regulatory constraints in production, food safety, biosecurity and current research. Field trip to aquaculture facility.

A ECL 404I: Behavioral Ecology
(Cross-listed with IA LL). Cr. 4. Alt. SS., offered even-numbered years.
Prereq: Two semesters of biology
Animal coloniality, courtship, territoriality, predator defense, habitat selection, foraging, mating systems, and parental care will be examined in the field in order to evaluate various ecological and evolutionary theories of animal behavior.

A ECL 406: Wildlife Camp
Cr. 3. F.
Prereq: BIOL 211 and permission of instructor; restricted to Animal Ecology majors
Introduction to methods and career options in wildlife research and management through field work. Two-week field work experience followed by on-campus reflection, analysis and presentation of field data.

A ECL 415: Ecology of Freshwater Invertebrates, Plants, and Algae
(Dual-listed with A ECL 515). (2-3) Cr. 3. F.
Prereq: A ECL 312
Identification, biology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphases on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment.

A ECL 418: Stream Ecology
(Dual-listed with A ECL 518). (Cross-listed with ENSCI). (2-3) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: A ECL 486
Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

A ECL 419I: Vertebrate Ecology and Evolution
(Cross-listed with IA LL). Cr. 4. SS.
Field and laboratory study of representative vertebrates of northwestern Iowa. Observations and experimentation emphasize ecological histories by integrating concepts of functional morphology, behavioral ecology, and evolutionary biology.

A ECL 420I: Amphibians and Reptiles
(Cross-listed with IA LL). Cr. 2. Alt. SS., offered even-numbered years.
Prereq: Two semesters of biology
Ecology, behavior, and conservation biology of amphibians and reptiles with emphasis on their anatomy and morphology; temperature and water regulation; locomotion; life history; reproduction; population and community ecology; and conservation.
A ECL 425: Aquatic Insects
(Dual-listed with A ECL 525). (Cross-listed with ENT). (2-3) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: BIOL 312 or equivalent
Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

A ECL 440: Fishery Management
(Dual-listed with A ECL 540). (2-3) Cr. 3. F.
Prereq: A ECL 312, A ECL 321, A ECL 333; STAT 101 or STAT 104; credit or enrollment in A ECL 486
Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries.

A ECL 442: Aquaculture
(Dual-listed with A ECL 542). (3-0) Cr. 3. S.
Prereq: BIOL 211 and BIOL 212.
Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, diseases, and marketing.

A ECL 451: Wildlife Ecology and Management
(2-3) Cr. 3. S.
Prereq: A ECL 371
Ecological theory and practice of wildlife management, including, population ecology, habitat management, and current issues in the field. Course involves a series of case studies addressing actual wildlife issues using field and quantitative methods.

A ECL 454: Principles of Wildlife Disease
(Dual-listed with A ECL 554). (3-0) Cr. 3. S.
Prereq: Junior standing and at least 10 credits in biological sciences at the 300+ level
Ecological and epidemiological aspects of diseases as they relate to wildlife populations. Topics to be covered include: major classes of disease; detection, description, monitoring, and management of disease; characteristics and interactions between disease agents and wildlife hosts; relationships among wildlife, domestic animal, and human health.

A ECL 455: International Wildlife Issues
(3-0) Cr. 3. F.
Prereq: A ECL 365, A ECL 312 or graduate standing; NREM 120
Biological, political, social, and economic factors affecting the management of international wildlife resources. Meets International Perspectives Requirement.

A ECL 457: Herpetology
(Cross-listed with BIOL). (2-0) Cr. 2. F.
Prereq: BIOL 351 or BIOL 365
Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

A ECL 457L: Herpetology Laboratory
(Cross-listed with BIOL). (0-3) Cr. 1. F.
Prereq: BIOL 351 or BIOL/A ECL 365; concurrent registration in BIOL 457 or A ECL 457
Laboratory to accompany Biology/Animal Ecology 457. Focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

A ECL 458: Ornithology
(Cross-listed with BIOL). (2-0) Cr. 2. S.
Prereq: A ECL 365 or BIOL 351
Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation.

A ECL 458L: Ornithology Laboratory
(Cross-listed with BIOL). (0-3) Cr. 1. S.
Prereq: BIOL 351 or AECL/BIOL 365. Concurrent enrollment in AECL/BIOL 458 is required.
Laboratory complements lecture topics with emphasis on external anatomy, identification and distribution of Midwest birds, and field trips.

A ECL 459: Mammalogy
(Cross-listed with BIOL). (2-0) Cr. 2. S.
Prereq: BIOL 351 or A ECL 365
Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation.

A ECL 459L: Mammalogy Laboratory
(Cross-listed with BIOL). (0-3) Cr. 1. S.
Prereq: BIOL 351 or BIOL/AECL 365; concurrent enrollment in AECL 459 or BIOL 459 required.
Laboratory focus on identification, survey methods, distribution, habits, and habitats of mammals. Several field trips.
A ECL 471: Introductory Conservation Biology
(Cross-listed with BIOL). Cr. 3. S.
Prereq: BIOL 312
Examination of conservation issues from a population and community perspective. The role of genetics, demography, and environment in determining population viability, habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

A ECL 480: Studies in Marine Biology
Cr. 1-8. Repeatable. SS.
Courses taken at Gulf Coast Research Laboratory and other marine biological stations are transferred to Iowa State University under this number.

A ECL 486: Aquatic Ecology
(Dual-listed with A ECL 586). (Cross-listed with BIOL, ENSCI). (3-0) Cr. 3. F.
Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301
Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.

A ECL 486L: Aquatic Ecology Laboratory
(Dual-listed with A ECL 586L). (Cross-listed with BIOL, ENSCI). (0-3) Cr. 1. F.
Prereq: Concurrent enrollment in BIOL 486
Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

A ECL 489: Population Ecology
(Dual-listed with A ECL 589). (Cross-listed with BIOL). (2-2) Cr. 3. Alt. F., offered even-numbered years.
Prereq: BIOL 312, STAT 101 or STAT 104, a course in calculus, or graduate standing
Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

Courses primarily for graduate students, open to qualified undergraduates:

A ECL 515: Ecology of Freshwater Invertebrates, Plants, and Algae
(Dual-listed with A ECL 415). (2-3) Cr. 3. F.
Prereq: A ECL 312
Identification, biology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphasis on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment.

A ECL 516: Avian Ecology
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: A ECL 365, A ECL 312, or graduate standing
Current topics and theories including avian breeding and foraging ecology, population biology, community structure, habitat selection, field methodologies, and data interpretation.

A ECL 518: Stream Ecology
(Dual-listed with A ECL 418). (Cross-listed with ENSCI). (2-3) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: A ECL 486
Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

A ECL 520: Fisheries Science
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: A ECL 312, A ECL 321
Concepts, approaches, and techniques for assessment of recreational and commercial fisheries. Scope will range from individual fish to entire ecosystems, both freshwater and marine.

A ECL 523I: Fish Ecology
(Cross-listed with IA LL). Cr. 2. Alt. SS., offered even-numbered years.
Basic principles of fish interaction with the biotic and abiotic environment. Field methods, taxonomy, and biology of fish with emphasis on the fish fauna of northwestern Iowa.

A ECL 525: Aquatic Insects
(Dual-listed with A ECL 425). (Cross-listed with ENT). (2-3) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: BIOL 312 or equivalent
Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

A ECL 526I: Advanced Field Ornithology
(Cross-listed with IA LL). Cr. 2. Alt. SS, offered even-numbered years.
Prereq: Concurrent registration in IA LL 326I
Field study of birds of the upper Midwest; extended field trip to Minnesota and Wisconsin; individual or group project.
A ECL 531: Conservation Biology  
(Cross-listed with EEOB). (3-0) Cr. 3. Alt. S., offered even-numbered years.  
**Prereq:** BIOL 312; BIOL 313 or graduate standing  
Examination of conservation issues from a population and a community perspective. Population-level analysis will focus on the role of genetics, demography, and environment in determining population viability. Community perspectives will focus on topics such as habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

A ECL 531I: Conservation Biology  
(Cross-listed with EEOB, IA LL). Cr. 4. Alt. SS., offered even-numbered years.  
**Prereq:** IA LL 312I  
Population-and community-level examination of factors influencing the viability of plant and animal populations from both demographic and genetic perspectives; assessment of biodiversity; design and management of preserves.

A ECL 535I: Restoration Ecology  
(Cross-listed with EEOB, ENSCI, IA LL). Cr. 2. Alt. SS., offered even-numbered years.  
**Prereq:** A course in ecology  
Ecological principles for the restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations. Emphasis on the restoration of prairie and wetland vegetation.

A ECL 540: Fishery Management  
(Dual-listed with A ECL 440). (2-3) Cr. 3. F.  
**Prereq:** A ECL 312, A ECL 321, A ECL 333; STAT 101 or STAT 104; credit or enrollment in A ECL 486  
Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries.

A ECL 542: Aquaculture  
(Dual-listed with A ECL 442). (3-0) Cr. 3. S.  
**Prereq:** BIOL 211 and BIOL 212  
Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, diseases, and marketing.

A ECL 551: Behavioral Ecology  
(2-2) Cr. 3. Alt. F., offered odd-numbered years.  
**Prereq:** a course in ecology or animal behavior  
The study of how an animal's behavior affects its ability to survive and reproduce in its environment. Course topics, such as foraging behavior, sexual selection, parental care, etc., represent the interface of ecology, evolution, and behavior.

A ECL 554: Principles of Wildlife Disease  
(Dual-listed with A ECL 454). (3-0) Cr. 3. S.  
**Prereq:** Graduate classification  
Ecological and epidemiological aspects of disease as they relate to wildlife populations. Topics to be covered include: major classes of disease; detection, description, monitoring, and management of disease; characteristics and interactions between disease agents and wildlife hosts; relationship among wildlife, domestic animal, and human health.

A ECL 573: Techniques for Biology Teaching  
(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.  
The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573A: Techniques for Biology Teaching: Animal Biology  
(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.  
The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573G: Techniques for Biology Teaching: Limnology  
(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.  
The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573I: Techniques for Biology Teaching: Insect Ecology  
(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.  
The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573W: Techniques for Biology Teaching: Project WET  
(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.  
The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.
**A ECL 586: Aquatic Ecology**
(Dual-listed with A ECL 486). (Cross-listed with EEOB, ENSCI). (3-0) Cr. 3. F.
Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301
Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.

**A ECL 586L: Aquatic Ecology Laboratory**
(Dual-listed with A ECL 486L). (Cross-listed with EEOB, ENSCI). (0-3) Cr. 1. F.
Prereq: Concurrent enrollment in BIOL 486
Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

**A ECL 589: Population Ecology**
(Dual-listed with A ECL 489). (Cross-listed with EEOB). (2-2) Cr. 3. Alt. F., offered even-numbered years.
Prereq: BIOL 312, STAT 101 or STAT 104, a course in calculus, or graduate standing
Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

**A ECL 590: Graduate Independent Study**
(Cross-listed with ANTHR, EEOB, IA LL). Cr. 1-4. Repeatable. SS.
Prereq: Graduate classification and permission of instructor

**A ECL 590I: Special Topics: Graduate Independent Study**
(Cross-listed with ANTHR, EEOB, IA LL). Cr. 1-4. Repeatable. SS.
Prereq: Graduate classification and permission of instructor

**A ECL 599: Creative Component**
Cr. arr.
Prereq: Nonthesis M.S. option only

Courses for graduate students:

**A ECL 611: Analysis of Populations**
(2-2) Cr. 3. Alt. F., offered even-numbered years.
Prereq: BIOL 312; STAT 401; a course in calculus
Quantitative techniques for analyzing vertebrate population data to estimate parameters such as density and survival. Emphasis on statistical inference and computing.

**A ECL 698: Animal Ecology Teaching Practicum**
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Graduate classification in animal ecology and permission of instructor
Graduate student experience in the animal ecology teaching program. Offered on a satisfactory-fail basis only.

**A ECL 699: Research**
Cr. arr. Repeatable.

**A ECL 699I: Research**
(Cross-listed with ANTHR, EEOB, GDCB, IA LL). Cr. 1-4. Repeatable.

**Animal Science (AN S)**

Any experimental courses offered by AN S can be found at: registrar.iastate.edu/faculty-staff/courses/explistings/

Courses primarily for undergraduates:

**AN S 101: Working with Animals**
(1-2) Cr. 2. F.S.SS.
An introductory course in skills for proper care, handling, and management of domestic animals. Terminology and skills in working with animals, identification, life-cycle management practices, and animal health management are introduced and examined.

**AN S 110: Orientation in Animal Science and ISU**
(2-0) Cr. 1. F.S.
Orientation to the university and Department of Animal Science. Challenges and opportunities available to the professional animal agriculturalist. Professional goal setting, portfolio development, and development of interpersonal skills in the context of pursuing a career in animal science.

**AN S 114: Survey of the Animal Industry**
(2-0) Cr. 2. F.S.
Principles of management and care of domestic animals, including genetics, nutrition, and reproduction. Service of domestic animals to society in terms of food, shelter, protection, fuel and emotional well-being. Basic biology, industry structure, management practices and production systems.

**AN S 116: Practicum in Safe Equine Handling and Welfare**
(0-3) Cr. 1. F.S.S.
Development of best practices for safe horse handling and practical equine health care tasks. Course will focus on equine welfare and human safety as well as provide training in necessary every day skills needed to own a horse or to work at a horse farm. Certificate of Safe Equine Handling and Welfare available upon course completion.
AN S 190: Livestock Handling, Safety and Welfare
Cr. 2.
Prereq: AN S 101
Understanding of animal perception to develop best care practices involved in handling of livestock species (beef, sheep, swine, dairy, equine, poultry). Intensive development of skills associated with handling and moving healthy and compromised livestock in respect to human and animal welfare. Integration of scientific and theoretical knowledge of biosecurity and animal-human interactions as it related to livestock handling and movement.

AN S 199: Marketing and Management of Livestock Events
(0-2) Cr. 1. Repeatable. F.S.
Prereq: Credit or enrollment in AN S 101 or AN S 114
Management and coordination of livestock shows, sales and events, including program planning, staff and volunteer management, time management, publicity and promotion for fairs, shows, clinics, expos, and other events. Offered on a satisfactory-fail basis only. A maximum of two credits of AnS 199 may be applied toward the total credits required for graduation.

AN S 199A: Marketing and Management of Livestock Events: Beef
(0-2) Cr. 1. Repeatable. F.S.
Prereq: Credit or enrollment in AN S 101 or AN S 114
Management and coordination of livestock shows, sales and events, including program planning, staff and volunteer management, time management, publicity and promotion for fairs, shows, clinics, expos, and other events. Offered on a satisfactory-fail basis only. A maximum of two credits of AnS 199 may be applied toward the total credits required for graduation.

AN S 199E: Marketing and Management of Livestock Events: Horses
(0-2) Cr. 1. Repeatable. F.S.
Prereq: Credit or enrollment in AN S 101 or AN S 114
Management and coordination of livestock shows, sales and events, including program planning, staff and volunteer management, time management, publicity and promotion for fairs, shows, clinics, expos, and other events. Offered on a satisfactory-fail basis only. A maximum of two credits of AnS 199 may be applied toward the total credits required for graduation.

AN S 207: The Art and Heritage of Livestock
(3-0) Cr. 3.
Using art as a venue to understand the legacy and heritage of livestock production and livestock’s contribution to civilization and society; livestock’s contributions to warfare, social class, industry, economies, etc.; history of the impact of livestock on painting, poetry, music, sculpture, advertising, pop culture, movies, religion and sports in society.

AN S 210: Career Preparation in Animal Science
(0-2) Cr. 1. F.S.
Prereq: Sophomore classification in An S
Life skill development emphasized in the context of career preparation. Assist students with career goal clarification, interview skills, resume and cover letter preparation. Internship development, job shadowing, and exploration of career option.

AN S 211: Issues Facing Animal Science
(0-2) Cr. 1. F.S.
Prereq: AN S 114, sophomore classification
Overview of the factors that define contemporary ethical and scientifically based issues facing animal agriculture. Life skill development (including interactive skills, communication ability, organization, information gathering, and leadership skills) emphasized in the context of issues study. Offered on a satisfactory-fail basis only.

AN S 214: Domestic Animal Physiology
(3-0) Cr. 3. F.S.
Prereq: BIOL 212, CHEM 163 or CHEM 177
Introduction to anatomy and physiology of the muscular, renal, skeletal, neural, mammary, cardiovascular, respiratory, immune, endocrine, reproductive, and digestive systems of domestic animals.

AN S 214L: Domestic Animal Anatomy and Physiology Lab
(0-2) Cr. 1. F.S.
Basic anatomy of domestic animals.

AN S 216: Equine Science
(2-2) Cr. 3. F.S.S.
Prereq: AN S 101 or AN S 114; one course in biology
Introduction to contemporary concepts, and basic practices and decisions necessary when managing horses through stages of their lives.

AN S 217: Equine Farm Practicum
(1-2) Cr. 2. F.
Prereq: Credit or experience equivalent to AnS 116 and credit or concurrent enrollment in AN S 216
Intensified management of the equine farm. Provide students with experiential learning in all phases of horse production and management. Students assist with general farm management, horse health care, weekly farm management, and related topics.

AN S 223: Poultry Science
(2-2) Cr. 3. F.
Prereq: AN S 101, AN S 114
Introduction to modern production trends with a focus on broiler, layer, and turkey industries. Topics covered include breeds, handling, management, physiology, nutrition, genetics, health & disease, and products. Weekly labs meet off campus.
AN S 224: Companion Animal Science  
(2-2) Cr. 3. S.  
**Prereq:** Course in biology  
Introduction of students to contemporary concepts, and basic practices and decisions necessary when caring for the companion animal through stages of its life.

AN S 225: Swine Science  
(2-2) Cr. 3. F.S.  
**Prereq:** AN S 101, AN S 114  
Introduction to principles, practices and decisions necessary when raising swine through the vertically integrated production cycle. Only AN S 280 and AN S 280L or AN S 225 may count toward graduation.

AN S 226: Beef Cattle Science  
(2-2) Cr. 3. F.S.  
**Prereq:** AN S 101, AN S 114  
Introduction to principles, practices and decisions necessary when raising beef cattle through the vertically integrated production cycle.

AN S 228: Laboratory Animal Science  
Cr. 3. F.  
**Prereq:** AN S 101, AN S 114; recommended: AN S 214.  
Introduction to the species, uses, biology, facilities, care, and diseases of animals used in research.

AN S 229: Sheep Science  
(2-2) Cr. 3. S.  
**Prereq:** AN S 101, AN S 114  
Introduction to principles, practices and decisions necessary when raising sheep through their production cycle.

AN S 235: Dairy Cattle Science  
(2-2) Cr. 3. F.  
**Prereq:** AN S 101, AN S 114  
Introduction to principles, practices and decisions necessary when raising dairy cattle through the vertically integrated production cycle.

AN S 270: Foods of Animal Origin  
(2-0) Cr. 2. F.S.SS.  
**Prereq:** BIOL 212, CHEM 163 or CHEM 177  
Principles, practices and issues impacting the production, processing and preservation of safe, wholesome, nutritious, and palatable meat, dairy, and egg products. Product evaluation, classification, value, and utilization.

AN S 270L: Foods of Animal Origin Laboratory  
(0-2) Cr. 1. F.S.  
**Prereq:** Credit or current enrollment in AN S 270  
Determination of composition and quality of meat, eggs and milk based on industry and USDA standards. Fundamentals of processing foods of animal origin to add value, maintain quality and ensure safety.

AN S 280: Basic Swine Science  
(2-0) Cr. 2.  
**Prereq:** AN S 101 AN S 114  
Basic disciplines and concepts involved in swine production including; industry structure, trends and statistics; production phases and buildings; genetic improvement; reproduction; nutrition; health and biosecurity; nutrient management; marketing and meat quality and career opportunities in the swine industry. Only AN S 280 and AN S 280L or AN S 225 may count toward graduation.

AN S 305: Livestock Evaluation  
(0-6) Cr. 3. F.  
**Prereq:** Junior classification; AN S 270L recommended  
Fall semester leads to 475A or D. Breeding animal and market animal evaluation of beef, swine and sheep using contemporary techniques and tools. Communication and decision-making skills are practiced in the context of making selection decisions.

AN S 306: Equine Evaluation  
(0-6) Cr. 3. F.  
**Prereq:** sophomore classification or permission of instructor  
Detailed visual evaluation of conformation and performance of the equine athlete. Decision-making skills are practiced in the context of making selection choices. Development of written and oral communication skills as students defend their judgments. Industry trends will be addressed.

AN S 313: Exercise Physiology of Animals  
(3-0) Cr. 3. F.S.  
**Prereq:** AN S 214, BIOL 211, one course in chemistry  
Physiological adaptations to athletic training in canine and equine athletes. Topics of emphasis include exercise-related adaptations in metabolism, locomotion, the cardiovascular system, musculoskeletal system, and endocrine system. The roles of nutrition and conditioning programs are assessed.

AN S 317: Fundamentals of Equine Behavior and Training  
(0-6) Cr. 1-3.  
Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. A maximum of 4 credits of An S 317 may be applied toward graduation.
AN S 317A: Fundamentals of Equine Behavior and Training: Young Horses at Halter
(0-6) Cr. 1. F.
Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. A maximum of 4 credits of An S 317 may be applied toward graduation.

AN S 317B: Fundamentals of Equine Behavior and Training: Yearlings
(0-6) Cr. 3.
Prereq: Permission of instructor
Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. A maximum of 4 credits of An S 317 may be applied toward graduation.

AN S 317C: Fundamentals of Equine Behavior and Training: Two-year olds and older
(0-6) Cr. 3.
Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. A maximum of 4 credits of An S 317 may be applied toward graduation.

AN S 319: Animal Nutrition
(3-0) Cr. 3. F.S.
Prereq: AN S 214, course in organic chemistry or biochemistry
Structure and function of organic and inorganic nutrients. Digestion, absorption, metabolism and utilization of nutrients for maintenance and productive functions. Essential nutritive requirements of domestic livestock, poultry, and companion animals. Sources of nutrients, application of energy systems and concepts, and regulation of feed intake in animals.

AN S 320: Animal Feeds and Feeding
(2-2) Cr. 3. F.S.
Prereq: AN S 319
Composition, physical properties, and storage and processing of feedstuffs. Nutrient requirements of and diet formulation, and preparation systems for food and companion animal species at varying stages of age, activity or production. Manual and computer methodologies for diet formulation.

AN S 324: Food Processing for Companion Animals
(3-0) Cr. 3. F.
Prereq: AN S 319, Junior Classification
Food processing and nutrition for carnivorous companion animals. Topics covered include meat processing and meat preservation for companion animal diets, regulatory standards, cutting edge technologies for processing meat for companion animals, dietary needs of carnivorous companion animals, effect of different processing methods on safety and nutrient bioavailability.

AN S 331: Domestic Animal Reproduction
(3-0) Cr. 3. F.S.
Prereq: AN S 214 or BIOL 255 256 or BIOL 335 or B M S 329
Comparative anatomy, physiology, and endocrinology of domestic mammalian animal reproduction. Techniques for the control and manipulation of reproductive processes.

AN S 332: Laboratory Methods in Animal Reproduction
(0-2) Cr. 1. F.S.
Prereq: Credit or enrollment in AN S 331
Reproductive anatomy with emphasis on the physiology of normal reproductive function; ways to control and improve reproduction; principles of semen collection and artificial insemination; pregnancy testing.

AN S 332A: Laboratory Methods in Animal Reproduction: Livestock, Companion, and Laboratory Animals
(0-2) Cr. 1. F.S.
Prereq: Credit or enrollment in AN S 331.
Comparative reproductive anatomy with emphasis on the physiology of normal reproductive function; ways to control and improve reproduction; principles of semen collection and artificial insemination; pregnancy testing.

AN S 332E: Laboratory Methods in Animal Reproduction: Equine
(0-2) Cr. 1. S.
Prereq: Credit or enrollment in AN S 331.
Reproductive anatomy with emphasis on the physiology of normal reproductive function; breeding season management; ways to control and improve reproduction; semen collection, evaluation, and processing; artificial insemination; pregnancy testing; parturition in the mare, foal care.
AN S 333: Embryo Transfer and Related Technologies
(3-0) Cr. 3. F.

Prereq: AN S 331 or AN S 332
Application of embryo transfer and related technologies to genetic improvement of mammalian livestock. Techniques for control of female reproduction, embryo collection and transfer, embryo cryopreservation, and embryo manipulation. Gender selection. Economic and genetic aspects of embryo transfer.

AN S 334: Embryo Transfer Laboratory
(0-3) Cr. 1. F.

Prereq: Credit or concurrent enrollment in AN S 333; or AN S 332; permission of instructor
Selected laboratory exercises related to embryo transfer such as synchronization of estrus, superovulation, detection of estrus, artificial insemination, embryo collection, embryo evaluation, microscopy, embryo cryopreservation, in vitro fertilization, embryo sexing, rectal palpation, and ultrasonography will be demonstrated and/or performed.

AN S 335: Dairy Cattle Evaluation
(0-6) Cr. 3. S.

Prereq: Sophomore classification
Evaluation of breeding dairy replacement animals and lactating for dairy cows. Emphasis placed on familiarity with anatomical terms/structures, the use of comparative terminology, decision-making skills, and presentation of oral reasons. Trips to dairy cattle farms. Livestock handling. (Introduction and skills development course for AN S 475B.)

AN S 336: Domestic Animal Behavior and Well-Being
(2-2) Cr. 3. F.

Prereq: One course in physiology
Understand how managed animals cope and perceive the environment. Principles of behavior and well-being relative to animal care, management and housing. Methods to objectively assess animal well-being. Awareness of animal protection through education/assessments, audits and law.

AN S 337: Lactation
(3-0) Cr. 3. S.

Prereq: AN S 214

AN S 345: Growth and Development of Domestic Animals
(3-0) Cr. 3. S.

Prereq: AN S 214; Course(s) in nutrition, genetics, meat science and/or biochemistry recommended
Basic principles of animal growth and development covered at the tissue, cellular and molecular level. Emphasis placed on skeletal muscle, adipose, bone, and immune system growth and development. The effects of genetics, nutrition, and pharmaceuticals on growth.

AN S 352: Genetic Improvement of Domestic Animals
(2-2) Cr. 3. F.S.

Prereq: One course in statistics, BIOL 211, course in genetics
Principles of qualitative and quantitative genetics applied to improve domestic animal populations. Impact of selection and mating schemes in achieving breeding program goals. Applications and impacts of biotechnological advancements in genetics and genomics.

AN S 360: Fresh Meat Science and Applied Muscle Biology
(3-0) Cr. 3. F.

Prereq: AN S 270; a course in organic or biochemistry
Impact of muscle structure, composition, rigor mortis, inspection, fabrication, handling, packaging and cooking on the palatability, nutritional value, yields, market value, and safety of fresh meat.

AN S 373A: Poultry Products Technology
Cr. 3. SS.

Prereq: CHEM 163 or 177 or equivalent required; BIOL 211 or 212 or equivalent recommended.
Basic principles of meat-producing and egg-laying poultry management, meat science, product functionality, egg quality, and food safety, product quality, product functionality, and food safety. 2-week course. Enrollment restricted to participants in the Midwest Poultry Consortium Center of Excellence Scholarship/Internship program.

AN S 373B: Applied Avian Physiology
Cr. 3. SS.

Prereq: CHEM 163 or 177 or equivalent required; BIOL 212 or equivalent recommended.
Introduction of industry-relevant aspects of avian physiology with emphasis on behavior, neurology, muscle, cardiovascular, immunology, digestive, endocrinology, and reproductive systems for egg and meat producing birds. Focus on avian physiology and relevance to production management and outcomes. 2-week course. Enrollment restricted to participants in the Midwest Poultry Consortium Center of Excellence Scholarship/Internship program.
AN S 373C: Avian Health
Cr. 3. SS.
Prereq: CHEM 163 or 177 or equivalent required; BIOL 212 or equivalent recommended.
Identification, diagnosis, management, and prevention of diseases in commercial poultry. 2-week course. Enrollment restricted to participants in the Midwest Poultry Consortium Center of Excellence Scholarship/Internship program.

AN S 373D: Poultry Nutrition
Cr. 3. SS.
Prereq: CHEM 163 or 177 or equivalent required; BIOL 211 or 212 or equivalent recommended.
Commercial poultry-specific nutrition with an emphasis on species and age-specific diet formulation, ingredient selection, feed production, and production system. Use of feed additives and production outcomes. 2-week course. Enrollment restricted to participants in the Midwest Poultry Consortium Center of Excellence Scholarship/Internship program.

AN S 380A: Swine Breeding and Gestation Management
Cr. 1. S.
Prereq: AN S 225, or AN S 280 and AN S 280L
Concepts related to: reproductive physiology and endocrinology of boars and sows; genetic selection programs; development programs for future replacement gilts and boars; semen collection, evaluation, and preparation; detection of estrus and artificial insemination; pregnancy diagnosis; feeding and housing programs for gestating sows; environmental management; records; diseases, and development of quality assurance programs for identifying and solving reproductive problems.

AN S 380B: Contemporary Issues in the Swine Industry
Cr. 1. S.
Prereq: AN S 225, or AN S 280 and AN S 280L
Evaluation of issues facing today's swine industry including: welfare, nutrient management, and food safety and security. Development of skills needed for effective community relations such as media interviews and message points.

AN S 380C: Employee Management for the Swine Industry
Cr. 1. F.
Prereq: AN S 225, or AN S 280 and AN S 280L
Effective employee management in swine production units. Principles, policies, and practices related to procurement, development, maintenance, and utilization of employees.

AN S 380D: Farrowing Management
Cr. 1. S.SS.
Prereq: AN S 225, or AN S 280 and AN S 280L
Advanced integration and application of reproductive management concepts during farrowing and lactation. Identification of production trends; formulation of strategies to improve productivity, and parturition and neonatal management.

AN S 380E: Swine Feed Mill Management
Cr. 1. F.
Prereq: AN S 225, or AN S 280 and AN S 280L
Principles of feed manufacturing, equipment operation, feed and ingredient quality assurance and regulatory compliance in a modern feed milling operation. Overview of feed mill regulations and safety.

AN S 380F: Marketing and Risk Management in the Swine Industry
Cr. 1. S.
Prereq: AN S 225, or AN S 280 and AN S 280L
A comprehensive view of industry structure and trends and marketing options available in the swine industry. Management of risk between markets and/or contracts.

AN S 380G: Swine Nursery and Finishing Management
Cr. 1. SS.
Prereq: AN S 225, or AN S 280 and AN S 280L
Overview of the critical management, housing, and financial considerations relevant to the successful operation of a swine nursery, grow-finish, or wean to finish enterprise, including nutrient requirements; building and facility management; and marketing.

AN S 380I: Pork Export Markets
Cr. 1. SS.
Prereq: AN S 225, or AN S 280 and AN S 280L
Introduction to global markets; cultural preferences and customs associated with the global swine industry. International trade regulations, potential impact of foreign animal diseases and bioterrorism affecting the U.S. swine industry.

AN S 380J: Pork Product Quality and Safety
Cr. 1. S.
Prereq: AN S 225, or AN S 280 and AN S 280L
Pre- and post-harvest affecting pork product quality and safety. Overview of pork harvesting process and traits and characteristics of quality pork products.
AN S 380K: Swine Nutrition
Cr. 1. F.
Prereq: AN S 225, or AN S 280 and AN S 280L; AN S 319
Principles of developing and implementing a swine feeding program. Fundamentals of feeding pigs including nutrients; factors affecting nutrient recommendations; feeding systems and management; feed ingredients, and formulation of swine diets.

AN S 382: Swine Environment Management
(1-0) Cr. 1.
Prereq: AN S 225 or 280 and 280L. Recommended TSM 210.
Response of swine to thermal environment, ventilation system design and analysis, heating and cooling systems, and examples of various designs for all phases of production. Troubleshooting ventilation systems and energy analysis of production units.

AN S 383: Swine Manure and Nutrient Management
(1-0) Cr. 1.
Prereq: An S 225 or An S 280 and An S 280L.
Function, application, and advantages and disadvantages of nutrient management systems. Manure production rates, manure handling systems, storage and manure management planning for land application and odor mitigation strategies.

AN S 384: Swine Health and Biosecurity
(1-0) Cr. 1.
Prereq: AN S 225 or An S 280 and An S 280L. Recommended a course in microbiology.
Overview of standard biosecurity protocols and identification of behavior and clinical signs of illness in pigs. Treatment administration and prevention methods. Introduction to immune system function and basic swine disease transmission.

AN S 399: Animal Science Internship
Cr. arr. Repeatable. F.S.SS.

AN S 399A: Animal Science Internship: Graded Internship Experience
Cr. 2-6. Repeatable. F.S.SS.
Prereq: Permission of the instructor
Learning experience focused on professional development for a career related to animal science. Journal, presentation, and scientific component.

AN S 399B: Animal Science Internship: Supervised Internship Experience
Cr. R. Repeatable. F.S.SS.
Prereq: Permission of the instructor
Learning experience focused on professional development for a career related to animal science. Journal, presentation, and scientific component. This course is designed for those students who are completing a semester long internship located off campus.

AN S 411: Addressing Issues in Animal Science
(0-2) Cr. 1. F.S.
Prereq: Senior classification in An S
Life skill development emphasized in the context of exploring one's perspective of the most pressing moral and scientific issues facing animal agriculture. Clarification and communication of personal conclusions in small and large group settings expected.

AN S 415: Equine Systems Management
(2-2) Cr. 3. F.S.
Prereq: AN S 216, AN S 319, AN S 320, AN S 331
Identification and development of financial and production goals in a horse business. Scientific approach to make decisions in management of enterprises in the horse industry.

AN S 419: Advanced Animal Nutrition
(2-0) Cr. 2. F.
Prereq: AN S 319
Detailed consideration of digestion, metabolism, and assimilation of nutrients. Recent advances and developments in basic nutrition.

AN S 424: Companion Animal Systems Management
(2-2) Cr. 3. S.
Prereq: AN S 224, AN S 319, AN S 320, AN S 331, AN S 352
Decisions facing the administrator of a companion animal enterprise. Financial and business goal identification, problem clarification, and resource allocation to manage the companion animal system.

AN S 425: Swine Systems Management
(2-2) Cr. 3. F.
Prereq: AN S 225, AN S 270, AN S 270L, AN S 319, AN S 320, AN S 331, AN S 352; ECON 230 or equivalent recommended
Decisions facing the administrator of a swine enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the swine enterprise.

AN S 426: Beef Cattle Systems Management
(2-2) Cr. 3. F.S.
Prereq: AN S 226, AN S 270, AN S 270L, AN S 320; ECON 230 or equivalent
Decisions facing the administrator of a beef cow-calf or feedlot enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the beef enterprise. Computer aided study.
AN S 429: Sheep Systems Management
(2-2) Cr. 3. S.
Prereq: AN S 229, AN S 319, AN S 320, AN S 331, AN S 352; AGRON 334 recommended; ECON 230 or equivalent recommended
Decisions facing the administrator of a sheep enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the sheep enterprise.

AN S 434: Dairy Systems Management
(3-0) Cr. 3. F.
Prereq: AN S 235, AN S 331, AN S 320, AN S 337, AN S 352
The scientific foundation of dairy cattle management. The impact of dairy farm management practices on the biological processes of the cow. Integrates concepts from the disciplines of lactation, reproduction, nutrition, genetics, and animal health.

AN S 435: Applied Dairy Farm Evaluation
(2-2) Cr. 3. S.
Prereq: AN S 434; ECON 230 or equivalent recommended
Evaluate nutrition, reproduction, milk quality, breeding, and related management practices of commercial dairy herds in a case study format. Students will apply knowledge gained in the classroom to commercial dairy farm situations and develop skills in information gathering, decision making, problem solving, and interpersonal communications.

AN S 441: International Animal Agriculture
(Cross-listed with GLOBE). (3-0) Cr. 3. S.
Prereq: One course from AN S 223, AN S 225, AN S 226, AN S 229, AN S 235
An overview of animal agriculture with emphasis in developing countries. Historical, economic, environmental, and political considerations will be assessed and evaluated. Issues related to gender, resilience and sustainability for different production systems including alternative livestock species, will be investigated. The role of animal source foods in attainment of global food security will be discussed. Meets International Perspectives Requirement.

AN S 460: Science and Technology of Value Added Meat Products
(Dual-listed with AN S 560). (2-2) Cr. 3. S.
Prereq: AN S 270
Physical, chemical and biological properties of meat important to achieving value-added meat product characteristics. Ingredients, technology and equipment used for processing, preservation and safety of cured meats, loaf products and fresh, cooked, dry and semi-dry sausage products.

AN S 473A: Poultry Enterprise Management
Cr. 3. SS.
Prereq: CHEM 163 or 177 or equivalent required; BIOL 211 or 212 or equivalent recommended
Business and management aspects of the poultry industry. Emphasis on personal interactions, effective communication, interview skills, poultry management, writing a business plan, and business decisions. 2-week course. Enrollment restricted to participants in the Midwest Poultry Consortium Center of Excellence Scholarship/Internship program.

AN S 473B: Breeder Flock and Hatchery Management
Cr. 3. SS.
Prereq: CHEM 163 or 177 or equivalent required; BIOL 211 or 212 or equivalent recommended.
Topics associated with the management of poultry breeder flocks and hatcheries: nutrition, lighting management, reproductive physiology, and husbandry for breeder flocks. Embryology, incubation techniques, biosecurity, and hatchery management. 2-week course. Enrollment restricted to participants in the Midwest Poultry Consortium Center of Excellence Scholarship/Internship program.

AN S 475: Intercollegiate Judging Training and Competition
(0-4) Cr. 1-2. Repeatable. F.S.
Prereq: permission of instructor
Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

AN S 475A: Intercollegiate Judging Training and Competition: Meat Animals
(0-4) Cr. 1-2. Repeatable. F.S.
Prereq: permission of instructor
Specialized training in evaluation and grading of livestock. Maximum of 6 credits may be applied toward graduation.

AN S 475B: Intercollegiate Judging Training and Competition: Dairy Cattle
(0-4) Cr. 1-2. Repeatable. F.S.
Prereq: permission of instructor
Specialized training in evaluation and grading of dairy cattle, in particular heifers and lactating dairy cows. Development and advancement of decision-making skills, comparative techniques, and presentation of oral reasons. Maximum of 6 credits may be applied toward graduation.

AN S 475C: Intercollegiate Judging Training and Competition: Meats
(0-4) Cr. 1-2. Repeatable. F.S.
Prereq: permission of instructor
Specialized training in evaluation and grading of livestock/meat products. Maximum of 6 credits may be applied toward graduation.
AN S 475D: Intercollegiate Judging Training and Competition: Meat Animal Evaluation
(0-4) Cr. 1-2. Repeatable. F.S.
Prereq: permission of instructor
Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

AN S 475E: Intercollegiate Judging Training and Competition: Horses
(0-4) Cr. 1-2. Repeatable. F.S.
Prereq: permission of instructor
Specialized training in evaluation of horses. Emphasis placed on familiarity with anatomical terms/structures, the use of comparative terminology, and decision making skills. Maximum of 6 credits may be applied toward graduation.

AN S 475F: Intercollegiate Judging Training and Competition: Management Systems
(0-4) Cr. 1-2. Repeatable. F.S.
Prereq: permission of instructor
Specialized training in evaluation of livestock/domesticated animal production management plans. Maximum of 6 credits may be applied toward graduation.

AN S 480: Animal Industry Leadership Fellows
Cr. 1. Repeatable. F.S.
Prereq: A. AN S 226; permission of instructor C. AN S 225; permission of instructor
Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.

AN S 480A: Animal Industry Leadership Fellows: Beef
Cr. 1. Repeatable. F.S.
Prereq: AN S 226; permission of instructor
Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.

AN S 480C: Animal Industry Leadership Fellows: Pork
Cr. 1. Repeatable. F.S.
Prereq: AN S 225; permission of instructor
Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.

AN S 480G: Animal Industry Leadership Fellows: Poultry
Cr. 1. Repeatable. F.S.
Prereq: AN S 223; permission of instructor
Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. Central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.

AN S 489: Issues in Food Safety
(Cross-listed with FS HN, HSP M, VDPAM). (1-0) Cr. 1. S.
Prereq: Credit or enrollment in FS HN 101 or FS HN 272 or HSP M 233; FS HN 419 or FS HN 420; FS HN 403
Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

AN S 490: Independent Study
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490A: Independent Study: Animal Science
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.
AN S 490B: Independent Study: Dairy Science
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.
Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490C: Independent Study: Meat Science
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.
Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490D: Independent Study: Companion Animal Science
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.
Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490E: Independent Study: Equine Science
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.
Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490G: Independent Study: Poultry Science
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.
Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490H: Independent Study: Honors
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.
Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490I: Independent Study: Entrepreneurship
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.
Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 493: Workshop in Animal Science
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Workshop in livestock production. Includes current concepts in breeding, nutrition, reproduction, meats, and technologies that impact the animal industry.

AN S 495: Agricultural Travel Course Preparation
Cr. R. Repeatable. F.S.
Prereq: Permission of instructor
Limited enrollment. Students enrolled in this course will also register for Agron 495 and intend to register in Agron 496 and An S 496 the following term. Topics will include the agricultural industries, climate, crops, culture, history, livestock, marketing, soils, and preparation for travel to locations to be visited. Information normally available 9 months before departure.

AN S 496: Agricultural Travel Course
Cr. arr. Repeatable.
Prereq: Permission of instructor, 30 college credits
Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on livestock and crop production. Locations and duration of tours will vary. Summer tour will usually visit a northern location and winter tour will usually visit a southern location. Information usually available 9 months before departure. Tour expenses paid by students.

AN S 496A: Agricultural Travel Course: International Tour
Cr. arr. Repeatable.
Prereq: Permission of instructor, 30 college credits
Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on livestock and crop production. Locations and duration of tours will vary. Summer tour will usually visit a northern location and winter tour will usually visit a southern location. Information usually available 9 months before departure. Tour expenses paid by students.

Meets International Perspectives Requirement.
AN S 496B: Agricultural Travel Course: Domestic tour
Cr. arr. Repeatable.
Prereq: Permission of instructor, 30 college credits
Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on livestock and crop production. Locations and duration of tours will vary. Summer tour will usually visit a northern location and winter tour will usually visit a southern location. Information usually available 9 months before departure. Tour expenses paid by students.

AN S 497: Undergraduate Teaching Experiences in Animal Science
Cr. 1-2. Repeatable, maximum of 4 credits. F.S.SS.
Prereq: Permission of instructor
Development of oral and written communication skills of technical concepts in animal science. Emphasis on organizational skills, conducting activities and interpersonal communication skills. Responsibilities in a class under direct supervision of a faculty member. A maximum of 4 credits of An S 497 may be applied toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

AN S 500: Applied Data Science and Statistics using Statistical Software in Animal Sciences
(2-0) Cr. 1. F.
Prereq: Credit or enrollment in STAT 587 or equivalent
Introduction to using SAS and R for solving research problems, including organization of data files, transfer of files between different formats, data editing, identifying confounded data, developing statistical models, and techniques for analysis of designed experiments. (1 credit each for 500A and 500B).

(2-0) Cr. 1. F.
Prereq: Credit or enrollment in STAT 587 or equivalent
First half semester course. Introduction to using SAS for solving research problems, including organization of data files, transfer of files between different formats, data editing, identifying confounded data, developing statistical models, and techniques for analysis of designed experiments.

(2-0) Cr. 1. F.
Prereq: Credit or enrollment in STAT 587 or equivalent
Second half semester course. Introduction to using R for data science and statistics to solve research problems, including data entry, data management, merging files, outputting new datasets and reports, data visualization, developing statistical models, and techniques for analysis of designed experiments.

AN S 501: Survey of Animal Disciplines
(1-0) Cr. 1. F.
Required for Animal Science graduate students. Orientation to departmental and graduate school policies and procedures. Discussion of programs of research and outreach in Animal Science. Issues impacting the animal industry. Offered on a satisfactory-fail basis only.

AN S 515: Integrated Crop and Livestock Production Systems
(Cross-listed with A B E, AGRON, SUSAG). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: SUSAG 509
Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

AN S 517: Gut Microbiome: Implications for Health and Diseases
(Cross-listed with FS HN, MICRO, V MPM). Cr. 3. F.
Prereq: 2-3 credits in microbiology and/or immunology.
Explore current research on gut microbiome including modern tools used to study the gut microbiome. Examine the linkages between gut microbiome and health status, diseases, and manipulation of gut microbiome to improve health.

AN S 518: Digestive Physiology and Metabolism of Non Ruminants
(Cross-listed with NUTRS). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: AN S 419 or NUTRS 501
Digestion and metabolism of nutrients. Nutritional requirements and current research and feeding programs for poultry and swine.

AN S 520: Digestive Physiology and Metabolism of Ruminants
(Cross-listed with NUTRS). (2-2) Cr. 3. Alt. S., offered even-numbered years.
Prereq: AN S 419 or NUTRS 501
Digestive physiology and nutrient metabolism in ruminant and preruminant animals.
AN S 533: Physiology and Endocrinology of Animal Reproduction
(2-0) Cr. 2. Alt. S., offered odd-numbered years.
Prereq: General physiology course
Development of structure and function of the reproductive system. Physiologic and endocrine aspects including puberty, gametogenesis, estrous cycle, pregnancy, maternal recognition, fertilization and early embryonic development.

AN S 536: Perinatology
(2-0) Cr. 2. S.
Prereq: One course in physiology; one course in biochemistry
Regulation of metabolism and development in the mammalian fetus and neonate is explored in a comparative manner. Emphasis will be on the dynamic changes in these relationships occurring at birth.

AN S 537: Topics in Animal Behavior, Welfare
(3-0) Cr. 3.
Prereq: permission of instructor; M.S. or Ph.D. student
Each semester, the students’ focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit.

AN S 537A: Topics in Animal Behavior, Welfare: Animal Behavior
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: permission of instructor; M.S. or Ph.D. student
Each semester, the students’ focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit.

AN S 537B: Topics in Animal Behavior, Welfare: Contemporary Issues
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: permission of instructor; M.S. or Ph.D. student
Each semester, the students’ focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit.

AN S 537C: Topics in Animal Behavior, Welfare: Animal Welfare
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: permission of instructor; M.S. or Ph.D. student
Each semester, the students’ focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit.

AN S 537D: Topics in Animal Behavior, Welfare: Immune and Stress
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: permission of instructor; M.S. or Ph.D. student
Each semester, the students’ focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit.

AN S 540: Livestock Immunogenetics
(Cross-listed with MICRO, V MPM). (2-0) Cr. 2. Alt. S., offered odd-numbered years.
Prereq: AN S 561 or MICRO 575 or V MPM 520
Basic concepts and contemporary topics in genetic regulation of livestock immune response and disease resistance.

AN S 549: Advanced Vertebrate Physiology I
(Cross-listed with KIN, NUTRS). (4-0) Cr. 4. F.
Prereq: recommended: an undergraduate physiology course and a biochemistry course
Overview of mammalian physiology. Cell biology, endocrinology, cardiovascular, respiratory, immune, digestive, skeletal muscle and reproductive systems.

AN S 556: Current Topics in Genome Analysis
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: BBMB 405 or GDCB 510
Introduction to principles and methodology of molecular genetics useful in analyzing and modifying large genomes.

AN S 560: Science and Technology of Value Added Meat Products
(Dual-listed with AN S 460). (2-2) Cr. 3. S.
Prereq: AN S 270
Physical, chemical and biological properties of meat important to achieving value-added meat product characteristics. Ingredients, technology and equipment used for processing, preservation and safety of cured meats, loaf products and fresh, cooked, dry and semi-dry sausage products.

AN S 561: Population and Quantitative Genetics for Breeding
(Cross-listed with AGRON). (4-0) Cr. 4. F.
Prereq: STAT 587
Population and quantitative genetics for plant and animal genetics. Study of the genetic basis and analysis of variation in quantitative traits in domestic or experimental populations using phenotypic and molecular marker data, including estimation of heritability and other genetic parameters, linkage analysis and mapping of quantitative trait loci, and the impact of inbreeding, heterosis, and genotype-by-environment interaction.
AN S 562: Methodologies for Population/Quantitative Genetics
(2-0) Cr. 2. S.
Prereq: AN S 561, STAT 402
Basic theory for genetic analysis of animal breeding data. Course A (1st half semester) covers linear models, selection index methods, and basic theory for best linear unbiased prediction. Course B (2nd half semester) best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters.

AN S 562A: Methodologies for Population/Quantitative Genetics: Linear Models and Genetic Prediction
(2-0) Cr. 2. S.
Prereq: AN S 561, STAT 402
Basic theory for genetic analysis of animal breeding data. Course A (1st half semester) covers linear models, selection index methods, and basic theory for best linear unbiased prediction. Course B (2nd half semester) best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters.

AN S 562B: Methodologies for Population/Quantitative Genetics: Advanced Genetic Prediction & Parameter Estimation
(2-0) Cr. 2. S.
Prereq: AN S 561, STAT 402
Basic theory for genetic analysis of animal breeding data. Course A (1st half semester) covers linear models, selection index methods, and basic theory for best linear unbiased prediction. Course B (2nd half semester) best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters.

AN S 563: Advanced Processed Meats Technology
Cr. 3. S.
Prereq: AN S 270 or equivalent, or at least two undergraduate courses in biology, food science, microbiology or culinology
Quality, and sensory attributes of fresh meats and how they develop and how they are evaluated. The study of ante and postmortem factors impacting quantity, composition, structure, and chemistry of red meat and poultry muscle/meat. Students cannot receive credit for both AN S 570 and AN S 573

AN S 569: Reproductive and Developmental Toxicology
(Cross-listed with TOX). Cr. 2. Alt. F., offered even-numbered years.
Prereq: BBMB 301, BIOL 258 or AN S 331
Chemical agents that target developmental and reproductive systems in animals and humans, both male and female. The influence that timeline of developmental in utero and what part of reproductive organ have on outcome of environmental exposures will be developed. The physiological changes due to exposure, and mechanistic pathways activated by xenobiotics will be defined and the consequences of these changes will be explored.

AN S 570: Advanced Meat Science and Applied Muscle Biology
(2-2) Cr. 3. Alt. S., offered even-numbered years.
Prereq: AN S 460
Ante and postmortem factors impacting composition, structure, and chemistry of red meat and poultry muscle/meat, the conversion of muscle to meat, and the sensory and nutritional attributes of fresh meats. Oral research reports and a research proposal.

AN S 571: Advanced Meat Processing Principles and Technology
(2-2) Cr. 3. Alt. F., offered even-numbered years.
Prereq: AN S 460 or AN S 570
Physical/chemical relationships during processing. Effects of modern technology, non-meat additives and preservation techniques on quality and safety of processed meat. Laboratory demonstration of principles and technology.

AN S 573: Fresh Meat Science and Technology
Cr. 3. F.
Prereq: AN S 270 or equivalent, or minimum two undergraduate courses in biology, food science, microbiology or culinology
Quality, and sensory attributes of fresh meats and how they develop and how they are evaluated. The study of ante and postmortem factors impacting quantity, composition, structure, and chemistry of red meat and poultry muscle/meat. Students cannot receive credit for both AN S 570 and AN S 573

AN S 590: Special Topics
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590A: Special Topics: Animal Breeding
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.
AN S 590B: Special Topics: Animal Nutrition
Cr. 1-3. Repeatable. F.S.S.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590C: Special Topics: Meat Animal Production
Cr. 1-3. Repeatable. F.S.S.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590D: Special Topics: Dairy Production
Cr. 1-3. Repeatable. F.S.S.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590E: Special Topics: Meat Science
Cr. 1-3. Repeatable. F.S.S.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590F: Special Topics: Physiology of Reproduction
Cr. 1-3. Repeatable. F.S.S.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590G: Special Topics: Muscle Biology
Cr. 1-3. Repeatable. F.S.S.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590H: Special Topics: Poultry Nutrition
Cr. 1-3. Repeatable. F.S.S.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590I: Special Topics: Poultry Products
Cr. 1-3. Repeatable. F.S.S.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590J: Special Topics: Experimental Surgery
Cr. 1-3. Repeatable. F.S.S.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590K: Special Topics: Professional Topics
Cr. 1-3. Repeatable. F.S.S.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590L: Special Topics: Teaching
Cr. 1-3. Repeatable. F.S.S.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590M: Special Topics: Molecular Biology
Cr. 1-3. Repeatable. F.S.S.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590N: Special Topics: Ethology
Cr. 1-3. Repeatable. F.S.S.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 599: Creative Component
Cr. 1-8. F.S.S.
Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AN S 599A: Creative Component: Animal Breeding and Genetics
Cr. 1-8. F.S.S.
Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AN S 599B: Creative Component: Animal Nutrition
Cr. 1-8. F.S.S.
Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.
AN S 599C: Creative Component: Animal Physiology  
Cr. 1-8. F.S.S.  
Prereq: Nonthesis M.S  
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AN S 599D: Creative Component: Animal Science  
Cr. 1-8. F.S.S.  
Prereq: Nonthesis M.S  
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AN S 599E: Creative Component: Meat Science  
Cr. 1-8. F.S.S.  
Prereq: Nonthesis M.S  
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

Courses for graduate students:

AN S 603: Seminar in Animal Nutrition  
(1-0) Cr. 1. Repeatable. F.S.  
Prereq: Permission of instructor  
Discussion of current literature; preparation and submission of abstracts.

AN S 618: Vitamins and Minerals  
(Cross-listed with NUTRS). Cr. 2. Alt. S., offered even-numbered years.  
Prereq: Biochemistry, physiology, basic nutrition  
Understanding molecular aspects of vitamin and mineral metabolism and homeostasis in humans and animals. An in-depth examination of the chemistry of vitamins and minerals, including genetic mutations, proteins involved in absorption and excretion, and their necessity in biological processes.

AN S 619: Advanced Nutrition and Metabolism - Protein  
(Cross-listed with NUTRS). (2-0) Cr. 2. F.  
Prereq: BBMB 405  
Digestion, absorption, and intermediary metabolism of amino acids and protein. Regulation of protein synthesis and degradation. Integration of cellular biochemistry and physiology of mammalian protein metabolism.

AN S 620: Advanced Nutrition and Metabolism - Energy  
(Cross-listed with NUTRS). (2-0) Cr. 2. Alt. S., offered odd-numbered years.  
Prereq: BBMB 405  
Energy constituents of feedstuffs and energy needs of animals as related to cellular biochemistry and physiology. Interpretations of classical and current research.

AN S 633: Seminar in Animal Reproduction  
(1-0) Cr. 1. Repeatable. F.  
Prereq: Permission of instructor  
Discussion of current literature and preparation of reports and seminars on selected topics concerning animal physiology.

AN S 652: Animal Breeding Strategies  
(2-0) Cr. 2.  
Prereq: AN S 561  
Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester) Prediction of response to selection, selection index theory, multiple trait selection, inbreeding, crossbreeding, and marker-assisted selection. Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Each topic may be taken only one time for academic credit.

AN S 652A: Animal Breeding Strategies: Breeding Goals and Response to Selection  
(2-0) Cr. 2.  
Prereq: AN S 561  
Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester) Prediction of response to selection, selection index theory, multiple trait selection, inbreeding, crossbreeding, and marker-assisted selection. Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Each topic may be taken only one time for academic credit.

AN S 652B: Animal Breeding Strategies: Design and Evaluation of Animal Breeding Programs  
(2-0) Cr. 2.  
Prereq: AN S 561  
Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester) Prediction of response to selection, selection index theory, multiple trait selection, inbreeding, crossbreeding, and marker-assisted selection. Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Each topic may be taken only one time for academic credit.

AN S 653: Applied Animal Breeding Strategies  
(3-0) Cr. 3. F.  
Prereq: AN S 561 recommended  
Industrial applications of breeding systems, selection methods, and new genetic technologies. One or more field trips to an industry breeding company.
AN S 655: Advanced Computational Methods in Animal Breeding and Genetics
(3-1) Cr. 2. Alt. F., offered odd-numbered years.
Prereq: AN S 500, AN S 562, Com S 207
Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications. Course A (1st half semester) Strategies for handling large sets and for prediction using best linear unbiased prediction using a formal language and utility programs. Course B (2nd half semester) Strategies for estimation of genetic parameters and for use of non-linear models for genetic analysis of categorical and survival type data.

AN S 655A: Computational Strategies for Predicting Breeding Values
(3-1) Cr. 2. Alt. F., offered odd-numbered years.
Prereq: AN S 500, AN S 562, COM S 207
Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications. Strategies for handling large sets and for prediction using best linear unbiased prediction using a formal language and utility programs.

AN S 655B: Computational Strategies for Genetic Parameter Estimation
(3-1) Cr. 2. Alt. F., offered odd-numbered years.
Prereq: AN S 500, AN S 562, COM S 207
Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications. Strategies for estimation of genetic parameters and for use of non-linear models for genetic analysis of categorical and survival type data.

AN S 656: Statistical Methods for Mapping Quantitative Trait Loci
(2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: AN S 562, STAT 447
Statistical methods for mapping quantitative trait loci in out-bred populations. Methods based on modeling covariances between relatives. Likelihood based methods using half-sib and full-sib families and extended pedigrees. Bayesian methods applied.

AN S 658: Seminar in Animal Breeding and Genetics
(1-0) Cr. 1. Repeatable. F.S.
Presentation of current research related to animal breeding and genetics.

AN S 670: Molecular Biology of Muscle
(Cross-listed with KIN). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: BBMB 405, BBMB 420
Ultrastructure of muscle; chemistry, structure, function, and molecular biology of muscle proteins. Molecular aspects of muscle contraction, development and turnover. Cytoskeletal proteins and dynamics.

AN S 684: Seminar in Meat Science
(1-0) Cr. 1. Repeatable. S.
Prereq: Permission of instructor
Discussion and evaluation of current topics in research publications in meat science.

AN S 685: Seminar in Muscle Biology
(1-0) Cr. 1. Repeatable. S.
Prereq: Permission of instructor
Reports and discussion of recent literature and current investigations.

AN S 695: Seminar in Animal Science
(1-0) Cr. 1. Repeatable. S.
Reports and discussion of current issues and research in animal science.
One credit is required for all M.S. degree candidates with graduate majors in the Department of Animal Science, and two credits are required for all Ph.D. candidates with graduate majors in the Department of Animal Science. Offered on a satisfactory-fail basis only.

AN S 699: Research
Cr. arr. Repeatable.

AN S 699A: Research: Animal Breeding
Cr. arr. Repeatable.

AN S 699B: Research: Animal Nutrition
Cr. arr. Repeatable.

AN S 699C: Research: Meat Animal Production
Cr. arr. Repeatable.

AN S 699D: Research: Dairy Production
Cr. arr. Repeatable.

AN S 699E: Research: Meat Science
Cr. arr. Repeatable.

AN S 699F: Research: Physiology of Reproduction
Cr. arr. Repeatable.

AN S 699G: Research: Muscle Biology
Cr. arr. Repeatable.

AN S 699H: Research: Poultry Nutrition
Cr. arr. Repeatable.

AN S 699I: Research: Poultry Products
Cr. arr. Repeatable.

AN S 699J: Research: Animal Ethology
Cr. arr. Repeatable.

Anthropology (ANTHR)

Any experimental courses offered by ANTHR can be found at:
registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)
Courses primarily for undergraduates:

**ANTHR 201: Introduction to Cultural Anthropology**  
(3-0) Cr. 3. F.S.SS.  
Introduction to the core concepts, theories, and methods of cultural anthropology with an emphasis on understanding human cultural diversity in global society from an anthropological perspective.  
Meets International Perspectives Requirement.

**ANTHR 202: Human Origins**  
(3-0) Cr. 3. F.S.  
Human biological and cultural evolution; survey of the evidence from fossil primates, the human fossil record and the archaeological record, as well as living primates; introduction to research methods in archaeology and biological anthropology.

**ANTHR 210: Introduction to Asian American Studies**  
(Cross-listed with WLC). (3-0) Cr. 3.  
An interdisciplinary and chronological examination of Asian American immigration experiences from the early 19th century to the 21st century. Focus on how these immigration histories are accompanied by changing racial constructions. Discussion of racial stereotyping, the model minority myth, identity development, and efforts for social justice.  
Meets U.S. Diversity Requirement.

**ANTHR 220: Globalization and Sustainability**  
(Cross-listed with ENV S, GLOBE, M E, MAT E, SOC). (3-0) Cr. 3. F.S.  
An introduction to understanding the key global issues in sustainability. Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Cannot be used for technical elective credit in any engineering department.  
Meets International Perspectives Requirement.

**ANTHR 225: American Indians of Iowa**  
(Cross-listed with AM IN). Cr. 3. F.  
Cultures and histories of Native people who have called the present state of Iowa home; primary focus on the period between 1700 CE and the present; Native interactions with Spanish, French, British, and American people.  
Meets U.S. Diversity Requirement

**ANTHR 230: Globalization and the Human Condition**  
(3-0) Cr. 3. F.S.  
An introduction to understanding key global issues in the contemporary world. Focuses on social relations, cultural practices and political-economic linkages among Africa, the Americas, Asia, Europe and the Pacific.  
Meets International Perspectives Requirement.

**ANTHR 306: Culture and Interpretation**  
(3-0) Cr. 3. S.  
Prereq: ANTHR 201  
Disciplinary and interdisciplinary approaches to the interpretation of contemporary and historical cultures, their contexts, and meanings.  
Meets International Perspectives Requirement.

**ANTHR 307: Biological Anthropology**  
(2-2) Cr. 3. S.  
Prereq: ANTHR 202  
Human evolution as known from fossil evidence, comparative primate studies, and genetic variations in living populations. Laboratory-tutorial sessions include study and discussion of human osteology, fossil hominids, simple Mendelian traits, and bio-ethics in applied biological anthropology.

**ANTHR 308: Archaeology**  
(2-2) Cr. 3. F.  
Prereq: ANTHR 202  
Methods and techniques for the recovery and interpretation of archaeological evidence, its role in reconstructing human behavior and past environments. Laboratory sessions include experience in the interpretation of archaeological evidence, the use of classification systems, and prehistoric technologies such as ceramics and stone tools.

**ANTHR 309: Introduction to Culture and Language**  
(Cross-listed with LING). (3-0) Cr. 3.  
Prereq: ANTHR 201 recommended  
Introduction to study of language, culture and society from an anthropological perspective. Focus on language and thought, ethnography of speaking, discourse and narrative, writing and literacy, and media communication. Discussion of key theories and methods of linguistic anthropology.  
Meets International Perspectives Requirement.

<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Prerequisites</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTHR 313</td>
<td>Kinship and Marriage in a Global Perspective</td>
<td>3</td>
<td>Prereq: ANTHR 201 recommended</td>
<td>Comparative and historical overview of the family, marriage and kinship. Examination of cross-cultural differences in the construction and functioning of family and kin relations; role of kinship in structuring individual and collective activities; current critical and theoretical issues in kinship studies, especially integrating work on gender and sexuality. Meets International Perspectives Requirement.</td>
</tr>
<tr>
<td>ANTHR 315</td>
<td>Archaeology of North America</td>
<td>3</td>
<td>Prereq: ANTHR 202</td>
<td>Prehistory and early history of North America as reconstructed from archaeological evidence; peopling of the New World; culture-historical sequences of major culture areas; linkages of archaeological traditions with selected ethnohistorically known Native American groups. Meets U.S. Diversity Requirement</td>
</tr>
<tr>
<td>ANTHR 317</td>
<td>Primate Behavior, Ecology, and Evolution</td>
<td>3</td>
<td>Prereq: ANTHR 202 or basic biology course recommended</td>
<td>An overview of the primates (prosimians, monkeys, and apes) with a focus on their behavior from an ecological and evolutionary perspective. Topics include: methods in primatological research; survey of the living primates; biological and social adaptations of primates; interactions between primates and their environment; and primate conservation.</td>
</tr>
<tr>
<td>ANTHR 319</td>
<td>Skeletal Biology</td>
<td>3</td>
<td>Prereq: ANTHR 307 or college level biology</td>
<td>Comprehensive study of the skeletal anatomy, physiology, genetics, growth, development and population variation of the human skeleton. Applications to forensic anthropology, paleopathology and bioarchaeology are introduced.</td>
</tr>
<tr>
<td>ANTHR 320</td>
<td>Great Plains Archaeology</td>
<td>3</td>
<td>Prereq: ANTHR 202</td>
<td>Prehistoric societies of the Great Plains region of North America, from initial occupation to European contact; emphasis on sociocultural changes, continuities, and adaptations to changing environments using archaeological, ecological, ethnographic information. Meets U.S. Diversity Requirement</td>
</tr>
<tr>
<td>ANTHR 321</td>
<td>World Prehistory</td>
<td>3</td>
<td>Prereq: ANTHR 202 recommended</td>
<td>An introduction to archaeological sites from around the world including the Near East, Africa, Europe, Mesoamerica, and North and South America. Emphasis is on the interpretation of material cultural remains in reconstructing past societies.</td>
</tr>
<tr>
<td>ANTHR 322</td>
<td>Peoples and Cultures of Native North America</td>
<td>3</td>
<td>Prereq: ANTHR 201 or AM IN 210</td>
<td>Origin, distribution, and pre-contact life of the indigenous peoples of North America. Survey of culture areas; language families, social and political systems, ecological and economic adaptations, religion and spirituality; impact of European contact; cultural resilience and revitalization in contemporary American Indian life. Meets U.S. Diversity Requirement</td>
</tr>
<tr>
<td>ANTHR 323</td>
<td>Topics in Latin American Anthropology</td>
<td>3</td>
<td>Prereq: ANTHR 201 or ANTHR 306 recommended</td>
<td>Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.</td>
</tr>
<tr>
<td>ANTHR 323A</td>
<td>Latin American Anthropology: Violence and Memory</td>
<td>3</td>
<td>Prereq: ANTHR 201 or ANTHR 306 recommended</td>
<td>Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered. Meets International Perspectives Requirement.</td>
</tr>
<tr>
<td>ANTHR 323B</td>
<td>Latin American Anthropology: Social movements and Democracy</td>
<td>3</td>
<td>Prereq: ANTHR 201 or ANTHR 306 recommended</td>
<td>Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered. Meets International Perspectives Requirement.</td>
</tr>
</tbody>
</table>
ANTHR 323C: Latin American Anthropology: Race, Class and Gender
(Dual-listed with ANTHR 523C). (Cross-listed with US LS). (3-0) Cr. 3.
Repeatable, maximum of 9 credits. S.
Prereq: ANTHR 201 or ANTHR 306 recommended
Exploration of key contemporary and historical issues in Latin American
Anthropology; discussion of current anthropological approaches to
studying Latin American social issues in a global context. Topics vary
each time offered.
Meets International Perspectives Requirement.

ANTHR 323D: Latin American Anthropology: Regional Focus
(Dual-listed with ANTHR 523D). (Cross-listed with US LS). (3-0) Cr. 3.
Repeatable, maximum of 9 credits. S.
Prereq: ANTHR 201 or ANTHR 306 recommended
Exploration of key contemporary and historical issues in Latin American
Anthropology; discussion of current anthropological approaches to
studying Latin American social issues in a global context. Topics vary
each time offered.
Meets International Perspectives Requirement.

ANTHR 323E: Latin American Anthropology: Culture and Sport
(Dual-listed with ANTHR 523E). (Cross-listed with US LS). (3-0) Cr. 3.
Repeatable, maximum of 9 credits.
Prereq: ANTHR 201 or ANTHR 306 recommended
Exploration of key contemporary and historical issues in Latin American
Anthropology; discussion of current anthropological approaches to
studying Latin American social issues in a global context. Topics vary
each time offered.
Meets International Perspectives Requirement.

ANTHR 324: Health and Native American Communities
(Cross-listed with AM IN). (3-0) Cr. 3.
Prereq: ENGL 250
Overview of historic and contemporary health and health care in
Native Communities. Indian Health Service and specific regulations.
Consideration of both cultural and scientific approaches to medicine.
Specific health issues (e.g., diabetes, alcoholism, depression, etc.) in
American Indian communities.
Meets U.S. Diversity Requirement

ANTHR 325: Peoples and Cultures of Africa
(Cross-listed with AF AM). (3-0) Cr. 3.
Prereq: 201 or 306 recommended.
Survey of diverse African culture areas across the continent and globally;
local level description and analysis of individuals as members of African
communities; regional, national and global scales of identification.
Meets International Perspectives Requirement.

ANTHR 328: Archaeological Discovery and Analysis
(2-2) Cr. 3. Repeatable, maximum of 9 credits. S.
Prereq: ANTHR 308
Identification, analysis, and interpretation of animal bones recovered from
archaeological sites, emphasizing taphonomy, paleoecology, and faunal
exploitation.

ANTHR 332: Current Issues in Native North America
(Dual-listed with ANTHR 532). (Cross-listed with AM IN). (3-0) Cr. 3.
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended
Exploration of key contemporary and historical issues in Native North
America; discussion of current anthropological approaches to studying
Native North America in a global context. Topics vary each time offered.
Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count
toward graduation.
Meets U.S. Diversity Requirement

ANTHR 332A: Current Issues in Native North America: Gender and Family
(Dual-listed with ANTHR 532A). (Cross-listed with AM IN). (3-0) Cr. 3.
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended
Exploration of key contemporary and historical issues in Native North
America; discussion of current anthropological approaches to studying
Native North America in a global context. Topics vary each time offered.
Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count
toward graduation.
Meets U.S. Diversity Requirement

ANTHR 332B: Current Issues in Native North America: Indigenous
Ecologies and Geographies
(Dual-listed with ANTHR 532B). (Cross-listed with AM IN). (3-0) Cr. 3.
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended
Exploration of key contemporary and historical issues in Native North
America; discussion of current anthropological approaches to studying
Native North America in a global context. Only 9 credits of ANTHR/AM IN
332A, 332B, 332C, 332D may count toward graduation.
Meets U.S. Diversity Requirement

ANTHR 332C: Current Issues in Native North America: Cultural and
Political Movements
(Dual-listed with ANTHR 532C). (Cross-listed with AM IN). (3-0) Cr. 3.
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended
Exploration of key contemporary and historical issues in Native North
America; discussion of current anthropological approaches to studying
Native North America in a global context. Topics vary each time offered.
Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count
toward graduation.
Meets U.S. Diversity Requirement
ANTHR 332D: Current Issues in Native North America: Regional Focus
(Dual-listed with ANTHR 532D). (Cross-listed with AM IN). (3-0) Cr. 3.
*Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended*
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.
Meets U.S. Diversity Requirement

ANTHR 335: Peoples and Cultures of the Middle East
(3-0) Cr. 3.
*Prereq: ANTHR 201 or ANTHR 306 recommended*
Anthropological approaches to the study of Middle East cultures. Survey of major culture areas, discussion of economic, political, and social and religious issues and systems. Examination of contemporary social movements.
Meets International Perspectives Requirement.

ANTHR 336: Global Development
(Dual-listed with ANTHR 536). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
*Prereq: ANTHR 201 or ANTHR 306*
Cross-cultural analysis of current development practices from an anthropological perspective; focus on international aid, development institutions, agrarian reform, indigenous knowledge, humanitarianism and human rights; introduction to main theories of political and economic anthropology.
Meets International Perspectives Requirement.

ANTHR 340: Magic, Witchcraft, and Religion
(Dual-listed with ANTHR 540). (Cross-listed with RELIG). (3-0) Cr. 3. S.
*Prereq: ANTHR 201 or ANTHR 306*
Survey of global religious belief and practice from an anthropological perspective. Emphasis on myth and ritual, shamanism, magic, witchcraft, beliefs in spirits, conceptions of the soul, mind and body relationships, and healing and therapeutic practices. Discussion of religious response to dramatic political and social change; effects of globalization on religious practice.
Meets International Perspectives Requirement.

ANTHR 354: War and the Politics of Humanitarianism
(Cross-listed with POL S). (3-0) Cr. 3. S.
*Prereq: POL S 121, POLS 235, ANTHR 210, or ANTHR 230*
Humanitarianism as a system of thought and a system of intervention in conflict and post-conflict situations. Role of humanitarian organizations and actors in addressing human suffering caused by conflict or war. Military action as a form of humanitarian intervention.
Meets International Perspectives Requirement.

ANTHR 369: Ancient Egypt
(Cross-listed with CL ST). (3-0) Cr. 3.
Archaeology and culture of Ancient Egypt from prehistory to Late Antiquity. Exploration of literature, religion, social history, government, and architecture. Discussion of major archaeological sites and methods; examination of interaction with other ancient near eastern and Mediterranean civilizations. Meets International Perspectives Requirements.
Meets International Perspectives Requirement.

ANTHR 376: Classical Archaeology
(Cross-listed with CL ST). (3-0) Cr. 3.
Chronological survey of the material culture of the ancient Graeco-Roman world and the role of archaeological context in understanding the varied aspects of ancient Greek or Roman culture. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.
Meets International Perspectives Requirement.

ANTHR 376A: Classical Archeology: Bronze Age and Early Iron Age Greece
(Cross-listed with CL ST). (3-0) Cr. 3.
An examination of the material culture of Bronze Age and Early Iron Age Greece (ca 3000-700 BCE) and the role of archaeological context in understanding the varied aspects of the cultures that flourished in the region. Primary focus on the urbanized palatial centers that emerged on the island of Crete (Minoan) and in mainland Greece (Mycenaean). Topics include the emergence of social complexity, cultural and technological changes, religious systems, and methods of interpretation.
Meets International Perspectives Requirement.

ANTHR 376B: Classical Archeology: Archaic through Hellenistic Greece (ca 700-30 BCE)
(Cross-listed with CL ST). (3-0) Cr. 3.
An examination of the material culture of ancient Greece from ca. 700-30 BCE and the role of archaeological context in understanding the varied aspects of Greek culture found in cities, rural areas, and sanctuaries during the Archaic, Classical, and Hellenistic periods. Topics include urbanization and the rise of the polis, sanctuaries and their offerings, engagement with the wider Mediterranean, and developments in the ways that the Greeks conceptualized and represented their world.
Meets International Perspectives Requirement.
ANTHR 376C: Classical Archaeology: Roman Archaeology (ca 1000 BCE-400 CE)
(Cross-listed with CL ST). (3-0) Cr. 3.
An examination of major developments in architecture, sculpture, painting, and other arts of the ancient Roman world and the role of archaeological context in understanding various aspects of Roman culture. Topics include art in the service of social ideology and political propaganda; interactions between the Etruscans, Greeks, and Romans; and the relationship between Rome and its provinces.
Meets International Perspectives Requirement.

ANTHR 411: Anthropology for Global Professionals
(Dual-listed with ANTHR 511). (3-0) Cr. 3. F.
Prereq: ANTHR 201 or ANTHR 306
Theory and methods for conducting ethnographic research in academic and non-academic settings; application of anthropological knowledge to contemporary cultural, political, economic, environmental and spatial issues; development of skills necessary for professional practice as an anthropologist.
Meets International Perspectives Requirement.

ANTHR 418: Global Culture, Consumption and Modernity
(Dual-listed with ANTHR 518). (3-0) Cr. 3. F.
Prereq: ANTHR 201 or ANTHR 306 recommended
Cross-cultural study of the impact of globalization, with an emphasis on economic consumption and the movement of goods, ideas, and peoples across cultural and national boundaries.
Meets International Perspectives Requirement.

ANTHR 419: Topics in Cultural Anthropology
(3-0) Cr. 3.
Prereq: ANTHR 306
In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. Each section may be taken once for credit up to 9 credits. No more than 9 credits of ANTHR 419 courses may be applied towards graduation.

ANTHR 419A: Topics in Cultural Anthropology: Theory
(3-0) Cr. 3.
Prereq: ANTHR 306
In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. No more than 9 credits of ANTHR 419 courses may be applied towards graduation.

ANTHR 419B: Topics in Cultural Anthropology: Methods
(3-0) Cr. 3.
Prereq: ANTHR 306
In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. No more than 9 credits of ANTHR 419 courses may be applied towards graduation.

ANTHR 419C: Topics in Cultural Anthropology: Regional Focus
(3-0) Cr. 3.
Prereq: ANTHR 306
In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. No more than 9 credits of ANTHR 419 courses may be applied towards graduation.

ANTHR 419D: Topics in Cultural Anthropology: Others
(3-0) Cr. 3.
Prereq: ANTHR 306
In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. No more than 9 credits of ANTHR 419 courses may be applied towards graduation.

ANTHR 424: Forensic Anthropology
(Dual-listed with ANTHR 524). (2-2) Cr. 3. Alt. S., offered irregularly.
Prereq: ANTHR 202 or ANTHR 307; ANTHR 319 recommended
Comprehensive study of forensic anthropology, a specialized subfield of biological anthropology. Emphasis is placed on personal identifications from extremely fragmentary, comingled, burnt, cremated and incomplete skeletal remains. All parameters of forensic study are included as they pertain to anthropology, including human variation, taphonomy, entomology, archaeology, pathology, epidemiology; genetics and the non-biological forensic disciplines. An appreciation for the wide range of medicolegal and bioethical issues will also be gained.

ANTHR 425: Professional Preparation in Anthropology
(1-0) Cr. 1. F.
Prereq: Junior classification in anthropology or permission from the instructor
Instruction and guidance in the development of professional skills needed for success in academic and non-academic anthropological careers. Topics will include strategies for internship and job searches, creating resumes and CVs, composing personal statements and cover letters, and developing contacts and sources. Offered on a satisfactory-fail basis only.
**ANTHR 427I: Field Archaeology**  
(Cross-listed with IA LL). Cr. 4. SS.  
Nature of cultural and environmental evidence in archaeology and how they are used to model past human behavior and land use; emphasis on Iowa prehistory; basic reconnaissance surveying and excavation techniques.

**ANTHR 429: Topics in Archaeological Laboratory Methods and Techniques: Archaeological Field School**  
(Dual-listed with ANTHR 529). Cr. 4-6. SS.  
*Prereq: ANTHR 202 or ANTHR 308*  
Summer field school for training in archaeological reconnaissance and excavation techniques; documentation and interpretation of archaeological evidence.

**ANTHR 431: Ethnographic Methods**  
(Dual-listed with ANTHR 531). (3-0) Cr. 3.  
Hands-on training in ethnographic field methods; students will carry out research projects in socio-cultural anthropology, learning a variety of investigative research techniques commonly used in social sciences.

**ANTHR 434: Internship**  
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.  
*Prereq: Junior or senior standing*  
Supervised practice in government agencies, museums, and business organizations. Offered on a satisfactory-fail basis only. Not more than 6 credits of internship experience may count towards the major. No credits in Anthr 434 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor.

**ANTHR 434A: Internship: Archaeology**  
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.  
*Prereq: Junior or senior standing*  
Supervised practice in government agencies, museums, and business organizations. Offered on a satisfactory-fail basis only. Not more than 6 credits of internship experience may count towards the major. No credits in Anthr 434 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor.

**ANTHR 434B: Internship: Cultural Anthropology**  
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.  
*Prereq: Junior or senior standing*  
Supervised practice in government agencies, museums, and business organizations. Offered on a satisfactory-fail basis only. Not more than 6 credits of internship experience may count towards the major. No credits in Anthr 434 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor.

**ANTHR 434C: Internship: Biological Anthropology**  
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.  
*Prereq: Junior or senior standing*  
Supervised practice in government agencies, museums, and business organizations. Offered on a satisfactory-fail basis only. Not more than 6 credits of internship experience may count towards the major. No credits in Anthr 434 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor.

**ANTHR 434D: Internship: Linguistic Anthropology**  
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.  
*Prereq: Junior or senior standing*  
Supervised practice in government agencies, museums, and business organizations. Offered on a satisfactory-fail basis only. Not more than 6 credits of internship experience may count towards the major. No credits in Anthr 434 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor.

**ANTHR 434E: Internship: Biological Anthropology**  
(Cross-listed with ANTHR 538). Cr. 3. S.  
*Prereq: ANTHR 202 or ANTHR 307*  
Primate behavior and ecology in evolutionary perspective: biological and social adaptations of prosimians, monkeys, and apes. Introduction to the Order Primates, basic evolutionary concepts, and techniques of behavioral observation. Focus on theory and methods current in Primatology, including applied conservation biology.

**ANTHR 438: Primate Evolutionary Ecology and Behavior**  
(Dual-listed with ANTHR 538). Cr. 3. S.  
*Prereq: ANTHR 202 or ANTHR 307*  
Primate behavior and ecology in evolutionary perspective: biological and social adaptations of prosimians, monkeys, and apes. Introduction to the Order Primates, basic evolutionary concepts, and techniques of behavioral observation. Focus on theory and methods current in Primatology, including applied conservation biology.

**ANTHR 444: Cross-cultural Perspectives on Gender and Sexuality**  
(Dual-listed with ANTHR 544). (Cross-listed with WGS). (3-0) Cr. 3. S.  
*Prereq: ANTHR 201 or WGS 201 recommended*  
Cross-cultural examination of gender and sexuality. Emphasis on global and transnational perspectives. Topics will include varied gender and sexual expressions, status and roles, intersectionality in global or transnational contexts, and the examination of systems of oppression cross-culturally.  
Meets International Perspectives Requirement.

**ANTHR 445: Biological Field School**  
(Dual-listed with ANTHR 545). Cr. 4-6. SS.  
*Prereq: ANTHR 202 or BIOL 101*  
Summer field school for training in behavioral and ecological methods for primatologists. Proposal, data collection and analyses, and presentation of research topic in primatology.

**ANTHR 450: Approaches in Anthropology**  
(3-0) Cr. 3. F.  
*Prereq: ANTHR 306*  
Examination of key approaches to anthropology and its interrelated subfields with a focus on major theoretical and analytical contributions.
ANTHR 451: Practicum in Anthropology
Cr. 1-3. Repeatable, maximum of 9 credits. F.S.S.
Prereq: ANTHR 201 or ANTHR 202 or ANTHR 308
Application of methods under actual laboratory and field conditions, including basic data management, synthesis, and analysis.

ANTHR 451A: Practicum in Anthropology: Archaeology
Cr. 1-3. Repeatable, maximum of 9 credits. F.S.S.
Prereq: ANTHR 201 or ANTHR 202 or ANTHR 308
Application of methods under actual laboratory and field conditions, including basic data management, synthesis, and analysis.

ANTHR 451B: Practicum in Anthropology: Cultural Anthropology
Cr. 1-3. Repeatable, maximum of 9 credits. F.S.S.
Prereq: ANTHR 201 or ANTHR 202 or ANTHR 308
Application of methods under actual laboratory and field conditions, including basic data management, synthesis, and analysis.

ANTHR 451C: Practicum in Anthropology: Biological Anthropology
Cr. 1-3. Repeatable, maximum of 9 credits. F.S.S.
Prereq: ANTHR 201 or ANTHR 202 or ANTHR 308
Application of methods under actual laboratory and field conditions, including basic data management, synthesis, and analysis.

ANTHR 451D: Practicum in Anthropology: Linguistic Anthropology
Cr. 1-3. Repeatable, maximum of 9 credits. F.S.S.
Prereq: ANTHR 201 or ANTHR 202 or ANTHR 308
Application of methods under actual laboratory and field conditions, including basic data management, synthesis, and analysis.

ANTHR 482: Topics in Biological Anthropology
(Dual-listed with ANTHR 582). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.
Prereq: ANTHR 307
In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 482B: Topics in Biological Anthropology: Primate Cognition
(Dual-listed with ANTHR 582B). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.
Prereq: ANTHR 307
In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 482C: Topics in Biological Anthropology: Primate Conservation
(Dual-listed with ANTHR 582C). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.
Prereq: ANTHR 307
In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 482D: Topics in Biological Anthropology: Population Genetics and Human Evolution
(Dual-listed with ANTHR 582D). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.
Prereq: ANTHR 307
In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 490: Independent Study
Cr. 1-5. Repeatable, maximum of 9 credits.
Prereq: 9 credits in anthropology
No more than 9 credits of Anthr 490 may be counted toward graduation.

ANTHR 490A: Independent Study: Archaeology
Cr. 1-5. Repeatable, maximum of 9 credits.
Prereq: 9 credits in anthropology
No more than 9 credits of Anthr 490 may be counted toward graduation.

ANTHR 490B: Independent Study: Cultural Anthropology
Cr. 1-5. Repeatable, maximum of 9 credits.
Prereq: 9 credits in anthropology
No more than 9 credits of Anthr 490 may be counted toward graduation.

ANTHR 490C: Independent Study: Biological Anthropology
Cr. 1-5. Repeatable, maximum of 9 credits.
Prereq: 9 credits in anthropology
No more than 9 credits of Anthr 490 may be counted toward graduation.
ANTHR 490D: Independent Study: Linguistic Anthropology
(Cross-listed with LING). Cr. 1-5. Repeatable, maximum of 9 credits.
Prereq: 9 credits in anthropology.
No more than 9 credits of Anthr 490 may be counted toward graduation.

ANTHR 490H: Independent Study: Honors
Cr. 1-5. Repeatable, maximum of 9 credits.
Prereq: 9 credits in anthropology
No more than 9 credits of Anthr 490 may be counted toward graduation.

ANTHR 490I: Iowa Lakeside Laboratory
(Cross-listed with IA LL, NREM). Cr. 1-6. Repeatable, maximum of 9 credits.
Prereq: 8 credits in biology and permission of instructor
Research opportunities for undergraduate students in the biological sciences. No more than 9 credits in Biol 490 may be counted toward graduation and of those, only 6 credits may be applied to the major.

Courses primarily for graduate students, open to qualified undergraduates:

ANTHR 503: Biological Anthropology and Archaeology
(3-0) Cr. 3.
Prereq: ANTHR 307 and ANTHR 308
History of biological anthropology and archaeology, current developments and theoretical issues related to major events in human biocultural evolution and world prehistory.

ANTHR 509: Agroecosystems Analysis
(Cross-listed with AGRON, SOC, SUSAG). (3-4) Cr. 3. F.
Prereq: Senior or above classification
Experiential, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing field visits, with some classroom activities. Focus on understanding multiple elements, perspectives (agronomic, economic, ecologic, social, etc.) and scales of operation.

ANTHR 510: Theoretical Dimensions of Cultural Anthropology
(3-0) Cr. 3. F.
Prereq: 6 credits in anthropology
Survey of historical and current developments in topical and theoretical approaches to sociocultural anthropology. Examination and assessment of controversies; new research directions and theoretical approaches.

ANTHR 511: Anthropology for Global Professionals
(Dual-listed with ANTHR 411). (3-0) Cr. 3. F.
Prereq: ANTHR 201 or ANTHR 306
Theory and methods for conducting ethnographic research in academic and non-academic settings; application of anthropological knowledge to contemporary cultural, political, economic, environmental and spatial issues; development of skills necessary for professional practice as an anthropologist.
Meets International Perspectives Requirement.

ANTHR 513: Kinship and Marriage in a Global Perspective
(Dual-listed with ANTHR 313). (3-0) Cr. 3. S.
Prereq: ANTHR 201 recommended
Comparative and historical overview of the family, marriage and kinship. Examination of cross-cultural differences in the construction and functioning of family and kin relations; role of kinship in structuring individual and collective activities; current critical and theoretical issues in kinship studies, especially integrating work on gender and sexuality.
Meets International Perspectives Requirement.

ANTHR 515: Archaeology of North America
(Dual-listed with ANTHR 315). (3-0) Cr. 3. S.
Prereq: ANTHR 202
Prehistory and early history of North America as reconstructed from archaeological evidence; peopling of the New World; culture-historical sequences of major culture areas; linkages of archaeological traditions with selected ethnohistorically known Native American groups.
Meets U.S. Diversity Requirement

ANTHR 518: Global Culture, Consumption and Modernity
(Dual-listed with ANTHR 418). (3-0) Cr. 3. F.
Prereq: ANTHR 201 or ANTHR 306 recommended
Cross-cultural study of the impact of globalization, with an emphasis on economic consumption and the movement of goods, ideas, and peoples across cultural and national boundaries.
Meets International Perspectives Requirement.

ANTHR 519: Skeletal Biology
(Dual-listed with ANTHR 319). (2-2) Cr. 3. S.
Prereq: ANTHR 307 or college level biology
Comprehensive study of the skeletal anatomy, physiology, genetics, growth, development and population variation of the human skeleton. Applications to forensic anthropology, paleopathology and bioarchaeology are introduced.
ANTHR 520: Great Plains Archaeology  
(Dual-listed with ANTHR 320). (3-0) Cr. 3. F.  
**Prereq:** ANTHR 202  
Prehistoric societies of the Great Plains region of North America, from initial occupation to European contact; emphasis on sociocultural changes, continuities, and adaptations to changing environments using archaeological, ecological, ethnographic information.  
Meets U.S. Diversity Requirement

ANTHR 521: World Prehistory  
(Dual-listed with ANTHR 321). (3-0) Cr. 3. S.  
**Prereq:** ANTHR 202 recommended  
An introduction to archaeological sites from around the world including the Near East, Africa, Europe, Mesoamerica, and North and South America. Emphasis is on the interpretation of material cultural remains in reconstructing past societies.

ANTHR 522: Peoples and Cultures of Native North America  
(Dual-listed with ANTHR 322). (3-0) Cr. 3.  
**Prereq:** ANTHR 201 or AM IN 210  
Origin, distribution, and pre-contact life of the indigenous peoples of North America. Survey of culture areas; language families, social and political systems, ecological and economic adaptations, religion and spirituality; impact of European contact; cultural resilience and revitalization in contemporary American Indian life.  
Meets U.S. Diversity Requirement

ANTHR 523: Topics in Latin American Anthropology  
(Dual-listed with ANTHR 323). (3-0) Cr. 3. Repeatable, maximum of 9 credits. S.  
**Prereq:** ANTHR 201 or ANTHR 306 recommended  
Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.  
Meets International Perspectives Requirement.

ANTHR 523A: Latin American Anthropology: Violence and Memory  
(Dual-listed with ANTHR 323A). (3-0) Cr. 3. Repeatable, maximum of 9 credits. S.  
**Prereq:** ANTHR 201 or ANTHR 306 recommended  
Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.  
Meets International Perspectives Requirement.

ANTHR 523B: Latin American Anthropology: Social movements and Democracy  
(Dual-listed with ANTHR 323B). (3-0) Cr. 3. Repeatable, maximum of 9 credits. S.  
**Prereq:** ANTHR 201 or ANTHR 306 recommended  
Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.  
Meets International Perspectives Requirement.

ANTHR 523C: Latin American Anthropology: Race, Class and Gender  
(Dual-listed with ANTHR 323C). (3-0) Cr. 3. Repeatable, maximum of 9 credits. S.  
**Prereq:** ANTHR 201 or ANTHR 306 recommended  
Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.  
Meets International Perspectives Requirement.

ANTHR 523D: Latin American Anthropology: Regional Focus  
(Dual-listed with ANTHR 323D). (3-0) Cr. 3. Repeatable, maximum of 9 credits. S.  
**Prereq:** ANTHR 201 or ANTHR 306 recommended  
Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.  
Meets International Perspectives Requirement.

ANTHR 523E: Latin American Anthropology: Culture and Sport  
(Dual-listed with ANTHR 323E). (3-0) Cr. 3. Repeatable, maximum of 9 credits.  
**Prereq:** ANTHR 201 or ANTHR 306 recommended  
Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.  
Meets International Perspectives Requirement.
ANTHR 524: Forensic Anthropology  
(Dual-listed with ANTHR 424). (2-2) Cr. 3. Alt. S., offered irregularly.  
Prereq: ANTHR 202 or ANTHR 307, ANTHR 319 recommended  
Comprehensive study of forensic anthropology, a specialized subfield of biological anthropology. Emphasis is placed on personal identifications from extremely fragmentary, comingled, burnt, cremated and incomplete skeletal remains. All parameters of forensic study are included as they pertain to anthropology, including human variation, taphonomy, entomology, archaeology, pathology, epidemiology; genetics and the non-biological forensic disciplines. An appreciation for the wide range of medicolegal and bioethical issues will also be gained.

ANTHR 529: Topics in Archaeological Laboratory Methods and Techniques: Archaeological Field School  
(Dual-listed with ANTHR 429). Cr. 4-6. SS.  
Prereq: ANTHR 202 or ANTHR 308  
Summer field school for training in archaeological reconnaissance and excavation techniques; documentation and interpretation of archaeological evidence.

ANTHR 531: Ethnographic Methods  
(Dual-listed with ANTHR 431). (3-0) Cr. 3.  
Hands-on training in ethnographic field methods; students will carry out research projects in socio-cultural anthropology, learning a variety of investigative research techniques commonly used in social sciences.

ANTHR 532: Current Issues in Native North America  
(Dual-listed with ANTHR 332). (Cross-listed with AM IN). (3-0) Cr. 3.  
Prereq: ANTHR 201 or ANTHR 306, ANTHR 322 or AM IN 210 recommended  
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.  
Meets U.S. Diversity Requirement

ANTHR 532A: Current Issues in Native North America: Gender and Family  
(Dual-listed with ANTHR 332A). (Cross-listed with AM IN). (3-0) Cr. 3.  
Prereq: ANTHR 201 or ANTHR 306, ANTHR 322 or AM IN 210 recommended  
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.  
Meets U.S. Diversity Requirement

ANTHR 532B: Current Issues in Native North America: Indigenous Ecologies and Geographies  
(Dual-listed with ANTHR 332B). (Cross-listed with AM IN). (3-0) Cr. 3.  
Prereq: ANTHR 201 or ANTHR 306, ANTHR 322 or AM IN 210 recommended  
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.  
Meets U.S. Diversity Requirement

ANTHR 532C: Current Issues in Native North America: Cultural and Political Movements  
(Dual-listed with ANTHR 332C). (Cross-listed with AM IN). (3-0) Cr. 3.  
Prereq: ANTHR 201 or ANTHR 306, ANTHR 322 or AM IN 210 recommended  
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.  
Meets U.S. Diversity Requirement

ANTHR 532D: Current Issues in Native North America: Regional Focus  
(Dual-listed with ANTHR 332D). (Cross-listed with AM IN). (3-0) Cr. 3.  
Prereq: ANTHR 201 or ANTHR 306, ANTHR 322 or AM IN 210 recommended  
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.  
Meets U.S. Diversity Requirement

ANTHR 536: Global Development  
(Dual-listed with ANTHR 336). (3-0) Cr. 3. Alt. F., offered odd-numbered years.  
Prereq: ANTHR 201 or ANTHR 306  
Cross-cultural analysis of current development practices from an anthropological perspective; focus on international aid, development institutions, agrarian reform, indigenous knowledge, humanitarianism and human rights; introduction to main theories of political and economic anthropology.  
Meets International Perspectives Requirement

ANTHR 538: Primate Evolutionary Ecology and Behavior  
(Dual-listed with ANTHR 438). Cr. 3. S.  
Prereq: ANTHR 202 or ANTHR 307  
Primate behavior and ecology in evolutionary perspective: biological and social adaptations of prosimians, monkeys, and apes. Introduction to the Order Primates, basic evolutionary concepts, and techniques of behavioral observation. Focus on theory and methods current in Primatology, including applied conservation biology.
ANTHR 540: Magic, Witchcraft, and Religion
(Dual-listed with ANTHR 340). (Cross-listed with RELIG). (3-0) Cr. 3. S.
Prereq: ANTHR 201 or ANTHR 306
Survey of global religious belief and practice from an anthropological perspective. Emphasis on myth and ritual, shamanism, magic, witchcraft, beliefs in spirits, conceptions of the soul, mind and body relationships, and healing and therapeutic practices. Discussion of religious response to dramatic political and social change; effects of globalization on religious practice.
Meets International Perspectives Requirement.

ANTHR 541: Seminar in Forensic Sciences
(1-0) Cr. 1. Repeatable. S.
Prereq: One 200-level science course or graduate classification
Seminars by professional criminalists, research scientists, Certificate students, and educators. Emphasis on opportunities for research and development, citizen involvement, and educational outreach related to forensic science. Weekly report required.

ANTHR 542: Independent Research and Presentation in Forensic Science
(1-0) Cr. 1. S.
Prereq: Enrollment in the Graduate Certificate in Forensic Sciences
Research topic approved by course instructor. Written and oral reports required. Oral report given in forensics seminar, Chem 540.

ANTHR 544: Cross-cultural Perspectives on Gender and Sexuality
(Dual-listed with ANTHR 444). (Cross-listed with WGS). (3-0) Cr. 3. S.
Prereq: ANTHR 201 or WGS 201 recommended.
Cross-cultural examination of gender and sexuality. Emphasis on global and transnational perspectives. Topics will include varied gender and sexual expressions, status and roles, intersectionality in global or transnational contexts, and the examination of systems of oppression cross-culturally.
Meets International Perspectives Requirement.

ANTHR 545: Biological Field School
(Dual-listed with ANTHR 445). Cr. 4-6. SS.
Prereq: ANTHR 202 or BIOL 101
Summer field school for training in behavioral and ecological methods for primatologists. Proposal, data collection and analyses, and presentation of research topic in primatology.

ANTHR 582: Topics in Biological Anthropology
(Dual-listed with ANTHR 482). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.
Prereq: ANTHR 307
In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 582A: Topics in Biological Anthropology: Paleoanthropology
(Dual-listed with ANTHR 482A). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.
Prereq: ANTHR 307
In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 582B: Topics in Biological Anthropology: Primate Cognition
(Dual-listed with ANTHR 482B). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.
Prereq: ANTHR 307
In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 582C: Topics in Biological Anthropology: Primate Conservation
(Dual-listed with ANTHR 482C). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.
Prereq: ANTHR 307
In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 582D: Topics in Biological Anthropology: Population Genetics and Human Evolution
(Dual-listed with ANTHR 482D). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.
Prereq: ANTHR 307
In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 590: Graduate Independent Study
(Cross-listed with A ECL, EEOB, IA LL). Cr. 1-4. Repeatable. SS.
Prereq: Graduate classification and permission of instructor

ANTHR 590I: Special Topics: Graduate Independent Study
(Cross-listed with A ECL, EEOB, IA LL). Cr. 1-4. Repeatable. SS.
Prereq: Graduate classification and permission of instructor
ANTHR 591: Orientation to Anthropology  
(1-0) Cr. 1. F.  
Prereq: Admission to the Anthropology Graduate Program  
Introduction to the Anthropology program, including the requirements for successful degree completion, department administrative procedures, ethics in anthropology and current trends in the four subfields of anthropology. Required of graduate students. Offered on a satisfactory-fail basis only.  

ANTHR 599: Creative Component  
Cr. 1-5. Repeatable, maximum of 5 credits. F.S.S.  
Prereq: Graduate classification, permission of major professor  
Individually directed study applying anthropological methods and theory to a practical research problem; for students electing the nonthesis degree option.

Courses for graduate students:  

ANTHR 610: Foundations of Sustainable Agriculture  
(Cross-listed with A B E, AGRON, SOC, SUSAG). (3-0) Cr. 3. F.  
Prereq: Graduate classification, permission of instructor  
Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

ANTHR 699: Research  
Cr. arr. Repeatable.

ANTHR 699I: Iowa Lakeside Laboratory (Same as IA LL 699I.)  
(Cross-listed with A ECL, EEOB, GDCB, IA LL). Cr. arr. Repeatable.

Apparel, Events, and Hospitality Management (AESHM)  

Any experimental courses offered by AESHM can be found at: registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)  

Courses primarily for undergraduates:  

AESHM 111: Professional Development for AESHM  
(1-0) Cr. 1. F.S.  
Prereq: Concurrent with AESHM 111L  
Introduction to professional experiences within AESHM and CHS Career Services including CyHire. Coursework includes resume development, daily habits for success including stress management, intrapersonal skills with a wellness focus, interpersonal skills and leadership, business etiquette, and professional ethics.

AESHM 111L: AESHM Program Orientation, Careers, and Learning Community  
Cr. 1. F.S.  
Prereq: Concurrent enrollment or credit in AESHM 111  
Orientation to policies and procedures of department and program. Overview of career areas in major and minor options, including entrepreneurship. Exploration of undergraduate research, independent studies, study abroad, and field studies. Coverage of goal setting, curriculum planning, degree audits, and registration. Peer mentor interaction in academic, extracurricular, and service learning arranged component.

AESHM 170: Supervised Work Experience I  
Cr. 1. Repeatable, maximum of 2 times. F.S.S.  
Prereq: Advisor permission required; freshman classification or permission  
Supervised work experience with a cooperating firm or organization. Offered on a satisfactory-fail basis only. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 170D: Supervised Work Experience I: Hospitality  
Cr. 1. Repeatable, maximum of 2 times. F.S.S.  
Prereq: Advisor permission required  
Supervised work experience with a cooperating firm or organization. Offered on a satisfactory-fail basis only. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 170F: Supervised Work Experience I: Event Management  
Cr. 1. Repeatable, maximum of 2 times. F.S.S.  
Prereq: Advisor permission required  
Supervised work experience with a cooperating firm or organization. Offered on a satisfactory-fail basis only. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 170N: Supervised Work Experience I: Apparel  
Cr. 1. Repeatable, maximum of 2 times. F.S.S.  
Prereq: Advisor permission required; freshman classification  
Supervised work experience with a cooperating firm or organization. Offered on a satisfactory-fail basis only. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 170P: Supervised Work Experience I: Event Management  
Cr. 1. Repeatable, maximum of 2 times. F.S.S.  
Prereq: Advisor permission required  
Supervised work experience with a cooperating firm or organization. Offered on a satisfactory-fail basis only. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 175: Financial Applications for Retail and Hospitality Industries  
(2-0) Cr. 2. S.  
Using an online delivery method, students will learn basic mathematical concepts, calculations and formulas commonly used in the apparel and hospitality industries. Emphasis on problem solving, critical/creative thinking, and mathematical interpretation of calculations and formulas used within the apparel and hospitality industries.
AESHM 175D: Financial Applications for Retail and Hospitality Industries: Hospitality Management
(2-0) Cr. 2. S.
Using an online delivery method, students will learn basic mathematical concepts, calculations and formulas commonly used in the apparel and hospitality industries. Emphasis on problem solving, critical/creative thinking, and mathematical interpretation of calculations and formulas used within the hospitality industries.

AESHM 175N: Financial Applications for Retail and Hospitality Industries: Retail Merchandising
(2-0) Cr. 2. S.
Using an online delivery method, students will learn basic mathematical concepts, calculations and formulas commonly used in the apparel and hospitality industries. Emphasis on problem solving, critical/creative thinking, and mathematical interpretation of calculations and formulas used within the apparel industries.

AESHM 180: First Year Student Field Study
Cr. 1-2. Repeatable, maximum of 2 times. F.S.
Prereq: Permission of instructor
Study of and tours of regional areas of interest to A M D, HSP M, or EVENT majors. Trip to regional location under supervision of faculty member. Locations vary. Journal entries and final report/analysis are required. Cost associated with trip.

AESHM 180E: First Year Student Field Study: Hospitality and Event Management
Cr. 1-2. Repeatable, maximum of 2 times. F.S.
Prereq: Permission of instructor
Study of and tours of regional areas of interest to majors in the HSP M and EVENT majors. Trip to regional location under supervision of faculty member. Locations vary. Journal entries and final report/analysis are required. Cost associated with trip.

AESHM 180N: First Year Student Field Study: Apparel, Merchandising, and Design
Cr. 1-2. Repeatable, maximum of 2 times. F.S.
Prereq: Permission of instructor
Study of and tours of regional areas of interest to A M D majors. Trip to regional location under supervision of faculty member. Locations vary. Journal entries and final report/analysis are required. Cost associated with trip.

AESHM 211: Leadership Experiences and Development (LEAD)
(3-0) Cr. 3. S.
Introduction to leadership behaviors. Development and utilization of leadership behaviors to positively impact school life, community life, and work life.

AESHM 222: Creativity on Demand
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Learn to use creativity strategies to solve everyday problems related to personal and professional lives. Application of creative thinking techniques to view things from different perspectives; identify unique opportunities; and generate and evaluate original ideas.

AESHM 238: Human Resource Management
(3-0) Cr. 3. F.S.
Prereq: A M D 275 or AESHM 270, or AESHM 287 or concurrent enrollment; sophomore classification
Principles and practices of human resource management relevant to human science-related organizations. Emphasis on the entry-level manager’s role.

AESHM 270: Supervised Work Experience II
Cr. 1-2. Repeatable, maximum of 2 times. F.S.SS.
Prereq: Minimum 2.0 GPA; Advisor permission required; sophomore classification
Supervised work experience with a cooperating firm or organization. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 270D: Supervised Work Experience II: Hospitality
Cr. 1-2. Repeatable, maximum of 2 times. F.S.SS.
Prereq: Minimum 2.0 GPA; Advisor permission required; sophomore classification; 6 cr in AESHM or HSP M, credits in AESHM 170
Supervised work experience with a cooperating firm or organization. No more than 12 credits total from AESHM 170, AESHM 270, and 470 may be applied toward graduation.

AESHM 270F: Supervised Work Experience II: Event Management
Cr. 1-2. Repeatable, maximum of 2 times. F.S.SS.
Prereq: Minimum 2.0 GPA; Advisor permission required; 6 cr in AESHM, HSP M, or EVENT; employer location should be different than employer location used for AESHM 170 and 470.
Supervised work experience with a cooperating firm or organization. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 270N: Supervised Work Experience II: Apparel
Cr. 1-2. Repeatable, maximum of 2 times. F.S.SS.
Prereq: Minimum 2.0 GPA; Advisor permission required. Sophomore AMD classification
Supervised work experience with a cooperating firm or organization. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.
AESHM 272: Fashion Show Production and Promotion  
(2-2) Cr. 1-3. Repeatable, maximum of 4 credits. F.S.  
Prereq: Application and instructor permission  
Planning and production of fashion show including developing budgets,  
public relations, advertising, fund-raising, choreography, staging, lighting,  
and food. Promotion of fashion show and similar events. Maximum of 4  
credits can be applied to graduation.

AESHM 280: Orientation to U.S. Field Study  
Cr. R. Repeatable, maximum of 2 times. F.S.  
Orientation to the field study location during the semester preceding the  
trip.

AESHM 281: Orientation to International Field Study  
Cr. 1. Repeatable, maximum of 2 times. F.S.  
Orientation to the field study location during the semester preceding the  
trip.

AESHM 287: Principles of Management in Human Sciences  
(3-0) Cr. 3. F.S.  
Introduction to management concepts and principles with application to  
human sciences-related businesses and organizations. Includes service  
quality management, professionalism, and social responsibility.

AESHM 311: Seminar on Careers and Internships  
(1-0) Cr. 1. F.S.  
Prereq: AESHM 111. Sophomore classification. Good academic standing  
Orientation to AESHM internship policies, professional expectations  
and responsibilities. Coursework includes career planning including  
entrepreneurship, internship search strategies and resources, résumés  
and cover letters, professional branding, portfolios, networking, interview  
skills, leadership skills, and ethical dilemmas in the workplace.

AESHM 311E: Seminar on Careers and Internships: Event Management  
and Hospitality Management  
(1-0) Cr. 1. F.S.  
Prereq: AESHM 111; Sophomore classification.  
Internship and career planning, professional expectations and  
responsibilities. Résumé development, business letters/professional  
correspondence, interviewing techniques, and business etiquette.

AESHM 311N: Seminar on Careers and Internships: Apparel,  
Merchandising, and Design  
(1-0) Cr. 1. F.S.  
Prereq: AESHM 111; Sophomore classification.  
Internship and career planning, professional expectations and  
responsibilities. Résumé development, cover letters, interviewing  
techniques, and business etiquette.

AESHM 340: Hospitality and Apparel Marketing Strategies  
(3-0) Cr. 3. F.S.  
Prereq: ECON 101  
Application of marketing principles to the hospitality-, events-, and  
apparel-related industries. Emphasis on the role of marketing in an  
an organization's overall strategic planning. Development and evaluation  
techniques available to hospitality, events, apparel, and related  
businesses, including advertising, sales promotion, packaging, and public  
relations.

AESHM 342: Aesthetics of Consumer Experience  
(3-0) Cr. 3. F.S.  
Prereq: Sophomore classification  
Design principles, aesthetic concepts, and research applied to consumer  
experiences, with an emphasis on hospitality and retail environments  
and events. Influence of individual differences and cultural patterns on  
aesthetic preferences.  
Meets U.S. Diversity Requirement

AESHM 365: Event, Hospitality, and Retail Risk Management  
(3-0) Cr. 3. SS.  
Overview and management of hazards and risks in the planning, design,  
operation, and evaluation stages of events, hospitality organizations, and  
apparel/retail environments.

AESHM 380: U.S. Field Study  
(Dual-listed with AESHM 580). Cr. 1-3. Repeatable, maximum of 3 times.  
F.S.SS.  
Prereq: 9 credits in A M D, AESHM, EVENT, and/or HSP M; sophomore  
classification; minimum 2.0 GPA. Permission by application  
Study and tours of areas of interest to majors in the AESHM Department.  
Trip to location under supervision of faculty member. Locations and  
lengths of trip vary. Final projects, reports, journal entries, and analysis  
are required. May be combined with AESHM 280.

AESHM 380D: U.S. Field Study: Hospitality Management  
(Dual-listed with AESHM 580D). Cr. 1-3. Repeatable, maximum of 3 times.  
F.S.SS.  
Prereq: 9 credits in AESHM or HSP M; sophomore classification; minimum 2.0  
GPA; AESHM 280 or concurrent enrollment; permission by application  
Study and tours of areas of interest to majors in the Hospitality  
Management program. Trip to location under supervision of faculty  
member. Locations and lengths of trip vary. Final projects, reports, journal  
entries, and analysis are required. May be combined with AESHM 280.
AESHM 380F: U.S. Field Study: Event Management
(Dual-listed with AESHM 580F). Cr. 1-3. Repeatable, maximum of 3 times.
F.S.S.S.
Prereq: 9 credits in EVENT, AESHM, or HSP M; sophomore classification;
minimum 2.0 GPA; AESHM 280 or concurrent enrollment; permission by
application
Study and tours of areas of interest to majors in the majors in the Event
Management program. Trip to location under supervision of faculty
member. Locations and lengths of trip vary. Final projects, reports, journal
entries, and analysis are required. May be combined with AESHM 280.

AESHM 380N: U.S. Field Study: Apparel, Merchandising, and Design
(Dual-listed with AESHM 580N). Cr. 1-3. Repeatable, maximum of 3 times.
F.S.S.S.
Prereq: 9 credits in A M D or AESHM; sophomore classification; minimum 2.0
GPA; AESHM 280 or concurrent enrollment; permission by application
Study and tours of areas of interest to majors in the Apparel,
Merchandising, and Design program. Trip to location under supervision of
faculty member. Locations and lengths of trip vary. Final projects, reports,
journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 381: International Field Study
(Dual-listed with AESHM 581). Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 9 credits in A M D, AESHM, EVENT, and/or HSP M; sophomore
classification; minimum 2.0 GPA. Permission by application
Study and tours of areas of interest to majors in the AESHM Department.
Trip to location under supervision of faculty member. Locations and
lengths of trip vary. Final projects, reports, journal entries, and analysis
are required. May be combined with AESHM 281.
Meets International Perspectives Requirement.

AESHM 381D: International Field Study: Hospitality Management
(Dual-listed with AESHM 581D). Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 9 credits in AESHM and/or HSP M; sophomore classification;
minimum 2.0 GPA; AESHM 281 or concurrent enrollment; permission by
application
Study and tours of areas of interest to majors in the Hospitality
Management program. Trip to location under supervision of faculty
member. Locations and lengths of trip vary. Final projects, reports, journal
entries, and analysis are required. May be combined with AESHM 281.
Meets International Perspectives Requirement.

AESHM 381F: International Field Study: Event Management
(Dual-listed with AESHM 581F). Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 9 credits in AESHM, EVENT, and/or HSP M; sophomore classification;
minimum 2.0 GPA; AESHM 281 or concurrent enrollment; permission by
application
Study and tours of areas of interest to majors in the Event Management
major. Trip to location under supervision of faculty member. Locations
and lengths of trip vary. Final projects, reports, journal entries, and
analysis are required. May be combined with AESHM 281.
Meets International Perspectives Requirement.

AESHM 381N: International Field Study: Apparel, Merchandising, and Design
(Dual-listed with AESHM 581N). Cr. 1-3. Repeatable, maximum of 3 times.
F.S.S.S.
Prereq: 9 credits in A M D and/or AESHM; sophomore classification; minimum 2.0
GPA; AESHM 281 or concurrent enrollment; permission by application
Study and tours of areas of interest to majors in the Apparel,
Merchandising, and Design major. Trip to location under supervision of
faculty member. Locations and lengths of trip vary. Final projects, reports,
journal entries, and analysis are required. May be combined with AESHM 281.
Meets International Perspectives Requirement.

AESHM 398: Cooperative Education
Cr. R. Repeatable. F.S.S.S.
Prereq: Permission of advisor; junior classification
Required of all cooperative education students seeking full-time status.
Students register for this course prior to commencing each work period.

AESHM 421: Developing Global Leadership: Maximizing Human Potential
(3-0) Cr. 3. S.
Development of leadership in a global environment. Focus on global
concerns that impact on the well-being of individuals, families, and
communities. Strategies for working with individuals, families and
communities in other countries and cultures. Taking local action on
global issues. Participation in a service activity.
Meets International Perspectives Requirement.

AESHM 470: Supervised Professional Internship
Cr. 3-6. Repeatable. F.S.S.S.
Prereq: AESHM 311 (all majors), EVENT 271 (Event Management majors),
AESHM 211 (Hospitality Management majors)
Supervised work experience with a cooperating firm or organization,
documentation of experience, and completion of an internship project.
Coursework includes weekly self-reflection and topics related to current
issues and career advancement. Employer/location should be different
from employer/location used for AESHM 170 and AESHM 270. No more
than 12 credits from AESHM 170, AESHM 270, and AESHM 470 may be
applied toward graduation.
AESHM 470F: Supervised Professional Internship: Event Management  
Cr. 3-6. Repeatable. F.S.SS.  
Prereq: Permission by application; junior classification.  
Supervised and structured practical industry work experience with a cooperating firm or organization. This course if offered for a grade. Maximum number of credits given in a semester is 6. No more than 12 credits from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 470N: Supervised Professional Internship: Apparel  
Cr. 3-6. Repeatable. F.S.SS.  
Prereq: AESHM 311, 9 credits in A M D and minimum 2.0 GPA; permission by application; junior or senior classification; employer/location should be different than employer/location for AESHM 170 and 270  
Supervised work experience with a cooperating firm or organization. No more than 12 credits from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 472: Fashion Show Management  
(2-2) Cr. 2-3. Repeatable, maximum of 5 credits. F.S.  
Prereq: Permission of instructor  
Provide leadership and communicate direction for planning and production of fashion show, including developing budgets, publicity, advertising, fundraising, choreography, staging, lighting, and food. Maximum of 5 credits can be applied to graduation.

AESHM 474: Entrepreneurship in Human Sciences  
(3-0) Cr. 3. F.S.  
Prereq: A M D 275 or AESHM 287 or ACCT 284 or 3 cr in MKT or permission of instructor  
Comprehensive approach to entrepreneurship including concepts of innovation, creativity, opportunity assessment, and business planning. Focus on human sciences-related businesses: retail, service, hospitality, event, food-related, family-owned, rural, and community businesses. Interaction with entrepreneurs, market research, feasibility analysis, business proposals, and business/community outreach and consulting.

AESHM 490H: Independent Study: Honors  
Cr. 2-4. Repeatable. F.S.SS.  
Prereq: Permission of instructor required. Full membership in Honors Program required.

AESHM 497: Cooperative Education  
Cr. R. Repeatable. F.S.SS.  
Prereq: Permission of advisor; senior or graduate classification  
Required of cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduates:

AESHM 501: Introduction to Scholarly Research for Graduate Students  
Cr. 1. F.S.SS.  
Focus on the basics of developing scholarly research, including definition and purpose of research and the components of research reporting. Emphasis on standards for each section of research reports. Tips for research reporting and processes of research development. An introduction to ethical standards. Required of all new AESHM graduate students. Offered on a satisfactory-fail basis only.

AESHM 510: Quantitative Research Methods in Apparel, Events, and Hospitality  
Cr. 3. Alt. S., offered odd-numbered years. Alt. SS., offered odd-numbered years.  
Prereq: STAT 587 or equivalent; Graduate standing in the Department; Permission of instructor  
Overview of quantitative research methods in apparel and hospitality fields. Topics include types of quantitative research design, sampling design, measurement, validity issues, power and precision analysis, methods of data gathering and analysis techniques, and interpretation of statistical results. Use of statistical packages. Development of research plan.

AESHM 511: Seminar  
Cr. 1-3. Repeatable, maximum of 6 times.  
Prereq: 6 graduate credits in A M D, AESHM, or HSP M. Permission of instructor  
Discussion of scholarship and current issues. Topics vary.

AESHM 512: Qualitative Research Methods in Apparel, Events, and Hospitality  
Cr. 3. Alt. SS., offered even-numbered years.  
Prereq: Graduate status  
Introduction to and hands-on experiences with a variety of qualitative research methods specific to apparel, events and hospitality research. Students will develop skills at research design, data, collection, analysis, and write-up for qualitative inquiry.

AESHM 570: Practicum  
Cr. 1-3. Repeatable, maximum of 2 times. F.S.SS.  
Prereq: 6 graduate credits in program area; permission of instructor  
Supervised experience related to career objective. Proposal must be approved semester before placement.

AESHM 570A: Apparel Merchandising and Design  
Cr. 1-3. Repeatable, maximum of 2 times. F.S.SS.  
Prereq: 6 graduate credits in program area; permission of instructor  
Supervised experience related to career objective. Proposal must be approved semester before placement.
AESHM 570B: Hospitality Management
Cr. 1-3. Repeatable, maximum of 2 times. F.S.S.S.
Prereq: 6 graduate credits in program area; permission of instructor
Supervised experience related to career objective. Proposal must be approved semester before placement.

AESHM 574: Entrepreneurship in Human Sciences
(3-0) Cr. 3. F.S.
Prereq: A M D 275 or AESHM 287 or ACCT 284 or 3 cr in MKT or permission of instructor
Comprehensive approach to entrepreneurship including concepts of innovation, creativity, opportunity assessment, and business planning. Focus on human sciences-related businesses: retail, service, hospitality, event, food-related, family-owned, rural, and community businesses. Interaction with entrepreneurs, market research, feasibility analysis, business proposals, and business/community outreach and consulting.

AESHM 580: U.S. Field Study
(Dual-listed with AESHM 380). Cr. 1-3. Repeatable, maximum of 3 times. F.S.S.S.
Prereq: 9 credits in A M D, AESHM, EVENT, and/or HSP M; sophomore classification; minimum 2.0 GPA. Permission by application
Study and tours of areas of interest to majors in the AESHM Department. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 580D: U.S. Field Study: Hospitality Management
(Dual-listed with AESHM 380D). Cr. 1-3. Repeatable, maximum of 3 times. F.S.S.S.
Prereq: 9 credits in AESHM or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 280 or concurrent enrollment; permission by application
Study and tours of areas of interest to majors in the Hospitality Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 580F: U.S. Field Study: Event Management
(Dual-listed with AESHM 380F). Cr. 1-3. Repeatable, maximum of 3 times. F.S.S.S.
Prereq: 9 credits in EVENT, AESHM, or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 280 or concurrent enrollment; permission by application
Study and tours of areas of interest to majors in the Event Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 580N: U.S. Field Study: Apparel, Merchandising, and Design
(Dual-listed with AESHM 380N). Cr. 1-3. Repeatable, maximum of 3 times. F.S.S.S.
Prereq: 9 credits in AESHM and/or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 280 or concurrent enrollment; permission by application
Study and tours of areas of interest to majors in the Apparel, Merchandising, and Design program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 581: International Field Study
(Dual-listed with AESHM 381). Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 9 credits in A M D, AESHM, EVENT, and/or HSP M; sophomore classification; minimum 2.0 GPA. Permission by application
Study and tours of areas of interest to majors in the AESHM Department. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.
Meets International Perspectives Requirement.

AESHM 581D: International Field Study: Hospitality Management
(Dual-listed with AESHM 381D). Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 9 credits in AESHM and/or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 281 or concurrent enrollment; permission by application
Study and tours of areas of interest to majors in the Hospitality Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.
Meets International Perspectives Requirement.

AESHM 581F: International Field Study: Event Management
(Dual-listed with AESHM 381F). Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 9 credits in AESHM, EVENT, and/or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 281 or concurrent enrollment; permission by application
Study and tours of areas of interest to majors in the Event Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.
Meets International Perspectives Requirement.
AESHM 581N: International Field Study: Apparel, Merchandising, and Design
(Dual-listed with AESHM 381N). Cr. 1-3. Repeatable, maximum of 3 times. F.S.SS.
Prereq: 9 credits in A M D and/or AESHM; sophomore classification; minimum 2.0 GPA; AESHM 281 or concurrent enrollment; permission by application
Study and tours of areas of interest to majors in the Apparel, Merchandising, and Design major. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.
Meets International Perspectives Requirement.

Courses for graduate students:

AESHM 611: Seminar
Cr. 1-3. Repeatable. 
Prereq: 6 graduate credits in AESHM, A M D, or HSP M. Permission of instructor
Scholarship and current issues. Topics vary.

AESHM 670: Teaching Practicum
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 6 graduate credits in program area; permission of instructor
Supervised experience in the university classroom. Proposal must be approved semester before placement.

AESHM 670A: Teaching Practicum: Apparel Merchandising and Design
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 6 graduate credits in program area; permission of instructor
Supervised experience in the university classroom. Proposal must be approved semester before placement.

AESHM 670B: Teaching Practicum: Hospitality Management
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 6 graduate credits in program area; permission of instructor
Supervised experience in the university classroom. Proposal must be approved semester before placement.

Apparel, Merchandising and Design (A M D)

Any experimental courses offered by A M D can be found at: registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

A M D 120: Apparel Construction Techniques
(3-0) Cr. 3. SS.
Assemble components and completed garments with the use of basic sewing equipment. Learn basic construction techniques, applications and vocabulary. Students will need access to a home sewing machine, iron, computer and the internet. Not available for credit for A M D majors.

A M D 121: Apparel Assembly Processes
(2-4) Cr. 4. F.S.
Prereq: A M D 204 concurrent recommended
Principles of garment and textile-related product assembly taught using industrial machines and production equipment. Construction techniques build in complexity in the development, assembly, and analysis of component parts and complete garments.

A M D 131: Fashion Products and Markets
(3-0) Cr. 3. F.

A M D 165: Dress, Appearance, and Diversity in U.S. Society
(3-0) Cr. 3. F.S.
Examination of dress and appearance practices and experiences of marginalized identities and communities in the United States. Introduction to fashion- and dress-related theories, culture and identity concepts, and social justice concepts and issues in regards to dress, appearance, and fashion in the fashion industry.
Meets U.S. Diversity Requirement

A M D 178: Introduction to Apparel Design Studio
(1-4) Cr. 3. F.S.
Introduction to the elements and principles of design in fashion and apparel including skill development in fashion illustration, technical drawing, and fabric rendering using traditional media. Application of written and verbal presentations to communicate fashion and apparel design concepts and terminology. Fashion presentation and introduction to portfolio development.

A M D 204: Textile Science
(3-2) Cr. 4. F.S.
Prereq: A M D 131
Textile fibers, yarns, fabrication, coloration, and finishes. Quality and performance application to textile products. Lab work included.
A M D 206: Design Selective Advancement
Cr. R. Repeatable, maximum of 2 times. F.S.
Prereq: Completion or enrollment in A M D 121, A M D 131, A M D 165, A M D 178, and A M D 204 with subset 2.5 GPA, 2.0 cumulative GPA (including transfer work), and enrollment in major
Project review and skill assessment related to 2-dimensional and 3-dimensional visualization, apparel assembly, basic product knowledge, design problem solving, illustration, textiles. Grade point averages are part of scoring process. Offered on a satisfactory-fail basis only.

A M D 210: Computer Applications in Digital Design
(2-2) Cr. 3. F.S.
Prereq: A M D 245
Applications of skills in Photoshop, Illustrator, InDesign, Google Sketchup, Excel, and website development. Introduction to digital product design and line development. Focus on elements and principles of design. Introduction to digital portfolio development for design and merchandising. In-class demonstrations and online lectures.

A M D 225: Patternmaking I: Drafting and Flat Pattern
(1-4) Cr. 3. F.S.
Application of patternmaking tools and their functions, measurement techniques, pattern labeling, and patternmaking communication documents. Sloper drafting and flat pattern manipulation methods for women's apparel. Design and construction of original garments using drafted slopers and flat pattern manipulation methods to enable the analysis of fit.

A M D 231: Product Development and Manufacturing
(3-2) Cr. 4. F.S.
Prereq: A M D 204
Analysis of apparel product development, sourcing, and manufacturing processes. Focus on materials and specifications relative to quality, performance, cost, and price. Applications of software for PLM.

A M D 245: Aesthetics and Brand Image
(3-0) Cr. 3. F.S.
Prereq: A M D 131, A M D 165, A M D 204 or concurrent
Elements and principles of design. Analysis of sensory, expressive, and symbolic aspects that build brand image, with a focus on fashion products and promotional settings.

A M D 257: Museum Studies
(3-0) Cr. 3. F.
Prereq: Sophomore standing
Overview of museums including history, functions, and philosophy. Collection and curatorial practices. Funding and governance issues. Hands-on object research and exhibit development. Required field trip.

A M D 275: Retail Merchandising
(3-0) Cr. 3. F.S.
Prereq: 3 credits in Math
Principles of merchandising as applied to retail-, service-, events-, and hospitality-related businesses. Study of the planning, development, and presentation of apparel- and hospitality-related products, services, and experiences. Industry and market research, planning of new offerings, and development of promotional and competitive strategies for various retail formats.

A M D 278: Fashion Illustration
(0-6) Cr. 3. F.S.
Prereq: A M D 178, A M D 210 or concurrent enrollment, A M D 245 or concurrent enrollment. Permission of instructor.
Development of fashion plates and focused apparel lines/collections. Proficiency in drawing the fashion figure, technical drawings/flats, and apparel using a variety of media. Continuation of fashion presentation and portfolio development.

A M D 290: Independent Study
Cr. 1-2. Repeatable, maximum of 4 credits. F.S.SS.
Prereq: Freshmen or Sophomore Classification; Permission of instructor, advisor, and department chair.
Independent study on topics of special interest to the student, facilitated by approved faculty member. Total number of A M D 290 and A M D 490 credits applied to graduation cannot exceed 9 credits.

A M D 290R: Independent Study: Professional Practice
Cr. 1-2. Repeatable, maximum of 4 credits. F.S.SS.
Prereq: Freshmen or Sophomore Classification; Permission of instructor, advisor, and department chair.
Experiences in teaching assistantship for first-year and second-year students. Total number of A M D 290 and A M D 490 credits applied to graduation cannot exceed 9 credits.

A M D 305: Quality Assurance of Textiles and Apparel
(Dual-listed with A M D 505). (2-2) Cr. 3. F.
Prereq: A M D 204, A M D 231, one course in natural science; STAT 101, or STAT 226, or STAT 587

A M D 310: Computer Aided Apparel Patternmaking
(0-6) Cr. 3. F.S.
Prereq: A M D 210, A M D 225; Permission of instructor.
Introduction to the computer-aided patternmaking software related to pattern modification, pattern drafting, grading, marker making, and 3-D virtual fitting.
A M D 321: Computer Integrated Textile and Fashion Design
(0-6) Cr. 3. F.S.
Prereq: A M D 210, A M D 278 or concurrent enrollment. Permission of instructor

A M D 325: Patternmaking II: Draping
(0-6) Cr. 3. F.S.
Prereq: A M D 206, A M D 225; permission of instructor.
Principles of patternmaking through basic draping techniques on industry standard body forms. Apparel design through analysis of fit and design; problem solving and interaction of fabric characteristics with style features.

A M D 328: Apparel, Merchandising, and Design Seminar
Cr. 1-3. Repeatable. F.S.S.S.
Focus on artisanal textile, apparel, or surface and structural design techniques. Design processes for specialty fabrics and markets. Topics vary by term. Maximum of 6 credits can be applied toward graduation.

A M D 328T: Apparel, Merchandising, and Design Seminar: Fashion Trend Forecasting
Cr. 1-3. F.S.
Focus on artisanal textile, apparel, or surface and structural design techniques. Design processes for specialty fabrics and markets. Topics vary by term. Maximum of 6 credits can be applied toward graduation.

A M D 328Y: Apparel, Merchandising, and Design Seminar: Styling
Cr. 1-3.
Focus on artisanal textile, apparel, or surface and structural design techniques. Design processes for specialty fabrics and markets. Topics vary by term. Maximum of 6 credits can be applied toward graduation.

A M D 329: Digital Textile Printing for Apparel Design
(2-2) Cr. 3. F.S.
Prereq: A M D 321; A M D 325 or concurrent. Permission of instructor
Overview of the use of digital printing in the textile and apparel industry, color matching, repeat print patterns, engineered prints, and creation of apparel prototypes.

A M D 354: Fashion History I: Prehistoric to Mid-19th Century
(3-0) Cr. 3. F.
Prereq: 3 credits from Hist or Art H
Survey of history of dress from ancient times up to the American Civil War; focus on European and North American dress. Emphasis on connection of dress to the social, cultural, environmental, and technological contexts of the Western world.
Meets International Perspectives Requirement.

A M D 356: Fashion History II: Mid-19th Century to the Present
(3-0) Cr. 3. S.
Prereq: 3 credits HIST or ART H; A M D 204 recommended.
Survey of major design and technological developments from the American Civil War through the present. Emphasis on fashion as a system of design and production, culture of consumption, fashion change, and trends in art, society, and culture.

A M D 362: Cultural Perspectives of Global Dress
(3-0) Cr. 3. S.
Prereq: A M D 165 or 3 credits in anthropology, psychology, or sociology.
Analysis of multiple factors related to dress in selected societies, including technology, cultural identity, aesthetics, social organization, ritual, stability and change. Applications to fair trade and social responsibility.
Meets International Perspectives Requirement.

A M D 372: Sourcing and Global Issues
(3-0) Cr. 3. F.S.
Prereq: A M D 231, A M D 275; ECON 101 or ECON 102 recommended
Evaluation of key issues facing textile and apparel industries in global markets considering ethical, economic, political, social, and professional implications. Sourcing strategies in a global environment. Corporate and consumer social responsibility and sustainability.
Meets International Perspectives Requirement.

A M D 375: Omni-Channel Retailing
(3-0) Cr. 3. S.
Prereq: 3 credits in marketing or A M D 275 or AESHM 287
A customer-centric view of marketing with a focus on the retailer-customer relationship and omni-channel strategies. Analysis and evaluation of integrated retail applications and strategies using digital media, including store formats, e-commerce, catalog, mobile, crowdsourcing, and social media.

A M D 376: Merchandise Planning and Buying
(3-2) Cr. 4. F.S.
Prereq: A M D 275; COM S 113; 3 credits from ACCT 284, MATH 104, MATH 105, MATH 140, MATH 150, or equivalent.
Calculations and computer application in the planning and control of merchandise. Emphasis on retail math as it pertains to assortment planning, the six-month buying plan process, and other buying concepts and strategies. Online modules.
A M D 377: Visual Presentation and Promotions
(3-0) Cr. 3. F.S.
Prereq: A M D 245 or AESHM 342; A M D 210, AESHM 340 or MKT 340
Principles of visual aspects of brand development and management; emphasis on branding, visual merchandising, design/layout of retail spaces. Includes applications such as visual communication and documentation using Adobe Creative Suite(R), hands-on display projects, and brand case studies.

A M D 393: Apparel, Merchandising, and Design Workshop
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.
Prereq: A M D Junior or Senior Classification and Permission of Instructor.
Intensive 2- to 8-week workshop exploration. Topics vary each time offered. Maximum of 6 credits applied to graduation.

A M D 404: Innovative Textiles
(Dual-listed with A M D 504). (2-2) Cr. 3. S.
Prereq: A M D 204, CHEM 163 and CHEM 163L or equivalent

A M D 415: Technical Design Processes
(2-2) Cr. 3. F.
Prereq: A M D 225; A M D 231
Garment development and analysis of fit, performance, quality, cost. Exploration of alternative materials, construction methods, grading; specifications and portfolio development.

A M D 426: Creative Design Processes
(1-4) Cr. 3. S.
Prereq: A M D 206, A M D 321, A M D 325 or concurrent
Exploration of the creative process and sources of inspiration with emphasis on wearable art; experimentation of advanced design problem solving, alternative materials, fabric manipulation, and pattern-making techniques.

A M D 431: Apparel Production Management
(2-2) Cr. 3. S.
Prereq: A M D 231; A M D 121 recommended; A M D 372 or concurrent.
Procedures and experiences related to application and use of process controls: method analysis, work measurement, costing, pricing, and production planning. Resource management, technology applications, and quality assurance.

A M D 457: Textile Conservation and Collection Management
(Dual-listed with A M D 557). (3-0) Cr. 3. Alt. F., offered irregularly. Alt. S., offered irregularly.
Prereq: A M D 204
Condition assessment, repair, and stabilization of textiles and apparel in museum collections. Dry and aqueous cleaning. Examination of storage and exhibition techniques, materials, and conditions. Experience with cataloging and management practices.

A M D 458: Queer Fashions: History, Culture, and the Industry
(Dual-listed with A M D 558). (Cross-listed with WGS, WGS). (3-0) Cr. 3. S.
Prereq: A M D 165; or 3 credits in Women's and Gender Studies or Sociology; or permission of instructor
Focus on analyzing the dressed and undressed body of individuals in the queer community in various cultural contexts with a focus on material culture. Disentangle concepts related to gender and sexuality and the changing definitions and representations of individuals who identify in the queer community focusing on appearance, fashion, and the body. Historic and current representations of fashion, styles, and appearances will be analyzed and discussed. Attention to how sexuality and gender intersect with and/or shape other identities including race, ability, body size, and class. Examine the complex structures, systems, and ideologies that uphold discrimination and unequal distribution of power and resources as related to the course material. Attention will mostly be given to North American perspectives. We will use material culture to explore how objects related to fashioning the body reveal stories about the owners and consumers.

A M D 467: Consumer Studies in Apparel and Fashion Products
(3-0) Cr. 3. F.
Prereq: A M D 165; AESHM 340 or MKT 340; STAT 101 or STAT 104 or STAT 226;
Application of concepts and theories from the social sciences to the study of consumer behavior related to dress, textile and apparel products, and retail experiences. Experience in conducting consumer research.

A M D 475: Retail Information Analysis
(2-2) Cr. 3. F.S.
Prereq: A M D 376
Evaluation of information needed to make effective retail decisions. Use of technology in analyzing and interpreting retail systems data. Application of concepts related to forecasting, consumer demand, assortment planning, market research, data mining, database interface, pattern recognition, supply-chain/logistics management, retail technology applications.
AMD 490: Independent Study
Cr. arr. Repeatable. F.S.S.S.
Prereq: 6 credits in AMD. Permission of the instructor, advisor, and department chair
Independent Study. Maximum of 9 credits of both AMD 290 and AMD 490 can be applied toward graduation.

AMD 490A: Independent Study: Textile Science
Cr. arr. Repeatable. F.S.S.S.
Prereq: 6 credits in AMD. Permission of the instructor, advisor, and department chair

AMD 490B: Independent Study: Historical, Cultural, and Museum Studies of Dress and Textiles
Cr. arr. Repeatable. F.S.S.S.
Prereq: 6 credits in AMD. Permission of the instructor, advisor, and department chair

AMD 490C: Independent Study: Textile and Apparel Design
Cr. arr. Repeatable. F.S.S.S.
Prereq: 6 credits in AMD. Permission of the instructor, advisor, and department chair

AMD 490E: Independent Study: Merchandising, Aesthetics, and Entrepreneurship
Cr. arr. Repeatable. F.S.S.S.
Prereq: 6 credits in AMD. Permission of the instructor, advisor, and department chair

AMD 490F: Independent Study: Sociological, Psychological, and Consumer Behavioral Aspects of Dress
Cr. arr. Repeatable. F.S.S.S.
Prereq: 6 credits in AMD. Permission of the instructor, advisor, and department chair

AMD 490H: Independent Study: Honors
Cr. arr. Repeatable. F.S.S.S.
Prereq: 6 credits in AMD. Permission of the instructor, advisor, and department chair

Cr. arr. Repeatable. F.S.S.S.
Prereq: 6 credits in AMD. Permission of the instructor, advisor, and department chair

AMD 490R: Independent Study: Professional Practice
Cr. arr. Repeatable, maximum of 2 times. F.S.S.S.
Prereq: 6 credits in AMD. Permission of the instructor, advisor, and department chair.

AMD 490S: Independent Study: Production and Quality Assurance
Cr. arr. Repeatable. F.S.S.S.
Prereq: 6 credits in AMD. Permission of the instructor, advisor, and department chair

AMD 490W: Independent Study: Fashion Show, Fashion Public Relations and Marketing
Cr. arr. Repeatable. F.S.S.S.
Prereq: Prereq: 6 credits in AMD. Permission of the instructor, advisor, and department chair

AMD 495: Senior Design Studio
(Dual-listed with AMD 595). (0-6) Cr. 3. F.
Prereq: AMD 310, AMD 325 and AMD 329. Permission of instructor.
Creation of an apparel line from target market research to prototypes through the use of manual techniques and CAD technologies. The line is to be included in a professional portfolio and pieces submitted to a juried exhibition.

AMD 496: Soft-Goods Product Development and Prototyping
(3-0) Cr. 3. S.
Prereq: AMD 231, AMD 245, AMD 275, AMD 321
Capstone soft-good innovative product development course focusing on product development through design thinking and practice. Applying consumer, aesthetic, and quantitative trend information to develop value-added soft-good products and product lines for diverse target markets. Integrated course with industry partner(s) with development of a prototype and presentation for portfolio integration.

AMD 499: Undergraduate Research
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: Senior classification, 15 credits in AMD. Permission of instructor, advisor, and department chair
Research experience in textiles and clothing with application to a selected problem.

Courses primarily for graduate students, open to qualified undergraduates:

AMD 504: Innovative Textiles
(Dual-listed with AMD 404). (2-2) Cr. 3. S.
Prereq: AMD 204, CHEM 163 and CHEM 163L or equivalent
A M D 505: Quality Assurance of Textiles and Apparel
(Dual-listed with A M D 305). (2-2) Cr. 3. F.
Prereq: A M D 204, A M D 231, one course in natural science; STAT 101, or STAT 226, or STAT 587

A M D 510: Foundation of Scholarship in Apparel, Merchandising, and Design
(3-0) Cr. 3. F.
Prereq: Graduate classification or permission of instructor
Overview of scholarship in apparel, merchandising, and design with emphasis on current and future directions. Fundamentals of writing literature reviews. Examination of ethical issues in scholarship and academic life. Introduction to creativity, sustainability, and entrepreneurship.

A M D 521: Digital Technologies in Textile and Apparel
(3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: Research Methods course. Permission of instructor.
Digital technologies in textile and apparel design. Theories and practices connected to technology in apparel fields. Technologies explored in this class may include digital textile design and printing, 3D body scanning, avatar development for digital fitting or other advanced technologies used in the textile and apparel industries.

A M D 525: Experimental Patternmaking
Cr. 3. Alt. F., offered even-numbered years.
Prereq: AMD 121 or equivalent, AMD 225 or equivalent, AMD 510 or taking concurrently, permission of instructor
Research, analyze, and apply experimental patternmaking techniques to original garments suitable for entry into a juried competition/exhibitions. Compare, contrast, and organize a framework of research patternmaking principles through content analysis or other appropriate research techniques. Documentation of learning and design process.

A M D 539: Digital Textile Design and Theory
Cr. 3. Repeatable. Alt. S., offered even-numbered years.
Focus on artisanal textile, apparel, or surface and structural design techniques. Design processes for specialty fabrics and markets. Topics vary by term.

A M D 545: Consumer Experience and Retail Branding
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: One course in design elements and principles, psychology, consumer behavior, or marketing
Examination of hedonic nature of consumer experience and its application to experiential design and branding of retail/hospitality establishments. Emphasis on consumer behavior, environmental psychology, and marketing literature.

A M D 554: Dress History Research Methods
Cr. 3. Alt. S., offered odd-numbered years.
Using a variety of sources and methods of analysis, students will develop their ability to read and interpret primary and secondary sources and to understand the methodology underpinnings and process of constructing dress history.

A M D 557: Textile Conservation and Collection Management
(Dual-listed with A M D 457). (3-0) Cr. 3. Alt. F., offered irregularly. Alt. S., offered irregularly.
Prereq: A M D 204
Condition assessment, repair, and stabilization of textiles and apparel in museum collections. Dry and aqueous cleaning. Examination of storage and exhibition techniques, materials, and conditions. Experience with cataloging and management practices.

A M D 558: Queer Fashions: History, Culture, and the Industry
(Dual-listed with A M D 458). (3-0) Cr. 3. S.
Prereq: A M D 165; or 3 credits in Women's and Gender Studies or Sociology; or permission of instructor
Focus on analyzing the dressed and undressed body of individuals in the queer community in various cultural contexts with a focus on material culture. Disentangle concepts related to gender and sexuality and the changing definitions and representations of individuals who identify in the queer community focusing on appearance, fashion, and the body. Historic and current representations of fashion, styles, and appearances will be analyzed and discussed. Attention to how sexuality and gender intersect with and/or shape other identities including race, ability, body size, and class. Examine the complex structures, systems, and ideologies that uphold discrimination and unequal distribution of power and resources as related to the course material. Attention will mostly be given to North American perspectives. We will use material culture to explore how objects related to fashioning the body reveal stories about the owners and consumers.
A M D 565: Sustainability: Theory and Practical Application
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: 3 credits in research methods; basic knowledge of apparel industry and product development; permission of instructor.
Overview of current sustainability theory, research, and methodology. Emphasis on the evaluation and discussion of current sustainability literature and sustainable practice of apparel, textiles, and related products and services through people, processes, and the environment. Development and presentation of original scholarly and creative design work under various sustainability frameworks.

A M D 567: Consumer Behavior and Apparel
(3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: A M D 467 or MKT 447; STAT 401
Application of concepts and theories from the social sciences to the study of consumer behavior. Experience in conducting research; manuscript writing.

A M D 572: Sourcing and Global Issues
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: A course in merchandising, marketing, or economics
Evaluation of textile and apparel industries in global markets considering ethical, economic, political, social, and professional implications. Sourcing strategies in a global environment. Corporate and consumer social responsibility and sustainability. Experience in conducting research using secondary data.
Meets International Perspectives Requirement.

A M D 576: Industry Applications in Merchandising and Management
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: A M D 376 or equivalent; A M D 275 or equivalent; or permission of instructor
Using the case study method, students apply merchandising theory, principles, and practices to industry scenarios. Emphasis on problem solving, creative thinking, data analysis, and data interpretation involved in business operations. Focus on the development of leadership skills while functioning in small and large groups.

A M D 577: E-Commerce for Apparel and Hospitality Companies
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: Course in marketing or permission of instructor
Analysis of technology and consumer trends, industry practices, and marketing strategies for e-commerce including big data, data mining, and social media. Evaluation and development of apparel or hospitality company websites. Theory application to the development of multi-channel business strategies.

A M D 590: Special Topics
Cr. arr. Repeatable.
Prereq: Permission of director of graduate education, advisor, and instructor(s)
Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590A: Special Topics: Textile Science
Cr. arr. Repeatable.
Prereq: Permission of director of graduate education, advisor, and instructor(s)
Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590B: Special Topics: Historical, Cultural, and Museum Studies of Dress and Textiles
Cr. arr. Repeatable.
Prereq: Permission of director of graduate education, advisor, and instructor(s)
Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590C: Special Topics: Textile and Apparel Design
Cr. arr. Repeatable.
Prereq: Permission of director of graduate education, advisor, and instructor(s)
Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590E: Special Topics: Merchandising, Aesthetics, and Entrepreneurship
Cr. arr. Repeatable.
Prereq: Permission of director of graduate education, advisor, and instructor(s)
Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590F: Special Topics: Sociological, Psychological, and Consumer Behavioral Aspects of Dress
Cr. arr. Repeatable.
Prereq: Permission of director of graduate education, advisor, and instructor(s)
Individually designed A M D-related projects that reflect the special interests of the student.
Cr. arr. Repeatable. F.S.SS.  
Prereq: Permission of director of graduate education, advisor, and instructor(s)  
Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590S: Special Topics: Production and Quality Assurance  
Cr. arr. Repeatable. F.S.SS.  
Prereq: Permission of director of graduate education, advisor, and instructor(s)  
Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590W: Special Topics: Fashion Show, Fashion Public Relations and Marketing  
Cr. arr. Repeatable. F.S.SS.  
Prereq: Permission of director of graduate education, advisor, and instructor(s)  
Individually designed A M D-related projects that reflect the special interests of the student.

A M D 595: Senior Design Studio  
(Dual-listed with A M D 495). (0-6) Cr. 3. F.  
Creation of an apparel line from target market research to prototypes through the use of manual techniques and CAD technologies. The line is to be included in a professional portfolio and pieces submitted to a juried exhibition.

A M D 599: Creative Component  
Cr. arr. Repeatable.  
Prereq: 9 graduate credits in A M D

Courses for graduate students:

A M D 611: Seminar  
Cr. 1-3. Repeatable.  
Prereq: 6 graduate credits in A M D. Permission of instructor  
Discussion of scholarship and current issues. Topics vary.

A M D 625: Design Theory and Process  
(2-4) Cr. 4. Alt. S., offered even-numbered years. Alt. SS., offered even-numbered years.  
Prereq: Permission of instructor.  
Analysis and application of design theory and creative processes, including strategies for solving aesthetic, functional, and/or technology-focused design problems. Creation and dissemination of design scholarship.

A M D 665: Social Science Theories of Appearance  
(3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: 6 credits in sociology or psychology  
Analysis of social science theories and concepts applicable to appearance research. Emphasis on qualitative research and philosophy of knowledge, including postmodern, symbolic interaction, semiotic, and feminist theories. Collection and analysis of qualitative data.

A M D 676: Merchandising Theory and Research Applications  
(3-0) Cr. 3. Alt. F., offered even-numbered years.  
Prereq: A M D 275 or equivalent; statistics course recommended.  
Review of current merchandising theory, research, and methodology. Emphasis on the evaluation and discussion of current and seminal merchandising literature, understanding research processes, interpretation of findings, assessing implications of research for future directions in merchandising, and the development and presentation of original scholarly work.

A M D 690: Advanced Topics  
Cr. arr. Repeatable.  
Prereq: Enrollment in doctoral program, permission of instructor; and approval of D.O.G.E

A M D 699: Research  
Cr. arr. Repeatable.

Arabic (ARABC)

Any experimental courses offered by ARABC can be found at: registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

ARABC 101: Elementary Arabic I  
(4-0) Cr. 4. F.  
Beginning level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture. Attention to the use of the Arabic alphabet.

ARABC 102: Elementary Arabic II  
(4-0) Cr. 4. S.  
Prereq: ARABC 101 or placement by department exam.  
Continuation of ARABC 101. Beginning level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture. Meets International Perspectives Requirement.
ARABC 195: Study Abroad
Cr. arr. Alt. SS., offered irregularly.
Supervised instruction in Arabic language and culture, formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Arabic.

ARABC 201: Intermediate Arabic I
(4-0) Cr. 4. F.
Prereq: ARABC 102 or placement by department exam
Intermediate level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture.
Meets International Perspectives Requirement.

ARABC 202: Intermediate Arabic II
(4-0) Cr. 4.
Prereq: ARABC 201 or placement by department exam
Continuation of Arabic 201. Intermediate level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture.
Meets International Perspectives Requirement.

ARABC 295: Study Abroad
Cr. arr. Alt. SS., offered irregularly.
Prereq: ARABC 102 or equivalent
Supervised instruction in Arabic language and culture, formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Arabic.

ARABC 375: Arab Culture
Cr. 3. S.
Survey of contemporary Arab culture in the Middle East and North Africa as reflected in history, language, the arts, and social institutions with attention to the Arab Diaspora. Taught in English.
Meets International Perspectives Requirement.

ARABC 490: Independent Study
Cr. 1-6. Repeatable.
Prereq: Permission of Arabic staff and department Chair
Independent study with focus on areas other than those in which courses are offered. No more than 6 credits in ARABC 490 may be counted toward graduation.

Architecture (ARCH)

Any experimental courses offered by ARCH can be found at:
registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

ARCH 201: Architectural Design I
(1-15) Cr. 6. F.
Prereq: Completion of the pre-professional program and admission into the professional program in Architecture.
Introduction to architectural design including design process, drawing conventions, methods of design analysis, and model making using both analog and digital tools. Studio projects focus on formal and volumetric principles of pattern and composition, investigations of site conditions, and understanding of scale. Field trips to relevant architectural sites.

ARCH 201H: Architectural Design I, Honors
(1-15) Cr. 6-7. F.
Prereq: Completion of the pre-professional program and admission into the professional program in Architecture
Introduction to architectural design including design process, drawing conventions, methods of design analysis, and model making using both analog and digital tools. Studio projects focus on formal and volumetric principles of pattern and composition, investigations of site conditions, and understanding of scale. Field trips to relevant architectural sites.

ARCH 202: Architectural Design II
(1-15) Cr. 6. S.
Prereq: ARCH 201; MATH 145; PHYS 131 and 131L
Continuation of fundamental architectural design exploration. Studio projects focus on the generation of ideas based on experience and systematic analysis of tectonics. Emphasis on design development through detail, materiality, and spatial relationships. Students work in groups and individually. Representational methods expand on architectural conventions through experimentation. Field trips to relevant architectural sites.

ARCH 202H: Architectural Design II, Honors
(1-15) Cr. 6-7. S.
Prereq: ARCH 201, MATH 145; and PHYS 131 and 131L
Continuation of fundamental architectural design exploration. Studio projects focus on the generation of ideas based on experience and systematic analysis of tectonics. Emphasis on design development through detail, materiality, and spatial relationships. Students work in groups and individually. Representational methods expand on architectural conventions through experimentation. Field trips to relevant architectural sites.

ARCH 220: Contemporary Architecture
(3-0) Cr. 3. F.
Survey of global architectural ideas and practices from 1990 to the present. Emphasis will be given to recent movements and architectural manifestations, as well as close examinations of socio-cultural conditions for contemporary practice.
ARCH 221: Histories and Theories of Architecture to 1750  
(3-0) Cr. 3. F.  
Survey of architectural ideas, theories, and practices before 1750.  
Emphasis on the mutually formative relationship between architecture  
and the social, cultural, economic, and political forces, nationally and  
globally, in which it is produced.  
Meets International Perspectives Requirement.

ARCH 230: Design Communications I  
(2-2) Cr. 3. F.  
Prereq: Admission to the professional program in architecture  
Investigations of various design media and their applications to design.  
Exercises to develop representational skills and perceptual sensitivity.

ARCH 231: Advanced Design Representation  
Cr. 3. Alt. F., offered irregularly. S.  
Prereq: ARCH 230; Junior, Senior or graduate standing  
Advanced investigations of various design media and their applications  
to design. Emphasis on careful consideration of media, mixed-media  
strategies and development of craft.

ARCH 301: Architectural Design III  
(1-15) Cr. 6. F.  
Prereq: ARCH 202  
Consideration of landscape as a constructed, cultural artifact. Projects  
address the perceptual aspects and strategies of situation and location;  
examination of environmental phenomena and patterns of use and  
settlement as revealed and affected by the architectural artifact.  
Development of a critical design process is stressed.

ARCH 301H: Architectural Design III, Honors  
(1-15) Cr. 6-7. F.  
Prereq: ARCH 202  
Consideration of landscape as a constructed, cultural artifact. Projects  
address the perceptual aspects and strategies of situation and location;  
examination of environmental phenomena and patterns of use and  
settlement as revealed and affected by the architectural artifact.  
Development of a critical design process is stressed.

ARCH 302: Architectural Design IV  
(1-15) Cr. 6. S.  
Prereq: ARCH 301 and minimum 2.0 GPA in previous studio courses  
Design for housing in an urban context that demonstrates a synthetic  
understanding of diverse scales of use and occupation as shaped by  
user requirements, site conditions, and principles for inclusive design.  
Consideration of regulatory requirements and measurable environmental  
impacts of the proposal on its site.

ARCH 302H: Architectural Design IV, Honors  
(1-15) Cr. 6-7. S.  
Prereq: ARCH 301 and minimum 2.0 GPA in previous studio courses  
Design for housing in an urban context that demonstrates a synthetic  
understanding of diverse scales of use and occupation as shaped by  
user requirements, site conditions, and principles for inclusive design.  
Consideration of regulatory requirements and measurable environmental  
impacts of the proposal on its site.

ARCH 321: History of the American City  
(3-0) Cr. 3.  
Prereq: Sophomore classification  
Study of the development of the built environment and urban condition  
in the United States from the colonial period to today. Primary attention  
is given to urban spatial organization, built form, technological change,  
regulatory and funding patterns, and social categories such as class,  
race, and gender. Credit counts toward fulfillment of History, Theory,  
Culture requirements.  
Meets U.S. Diversity Requirement

ARCH 322: Histories and Theories of Architecture after 1750  
(3-0) Cr. 3. S.  
Prereq: Sophomore Classification  
Survey of architectural ideas, theories and practices from 1750 to 1990.  
Emphasis on the mutually formative relationship between architecture  
and the social, cultural, economic, and political forces, nationally and  
globally, in which it is produced.  
Meets International Perspectives Requirement.

ARCH 334: Computer-aided Architectural Design  
(2-2) Cr. 3.  
Exploration of current and potential applications of computing in  
architectural design. Projects engage digital design methods, data and  
media workflows.

ARCH 335: Three-Dimensional Studio  
(1-4) Cr. 3. Repeatable, maximum of 6 credits.  
This course deals with three dimensional problems in visual invention,  
organization, and expression emphasizing creative manipulation  
of tools, materials, and techniques as means for three-dimensional  
thinking. Projects cover the additive (modeling), subtractive (carving),  
substitutional (casting) as well as constructive techniques.
ARCH 345: Building Science and Technology I
(Dual-listed with ARCH 545). (2-0) Cr. 2. F.
Prereq: Undergraduate: Admission to the professional program in architecture; concurrent enrollment in ARCH 345L; graduate: Admission to the M. Arch. program and concurrent enrollment in ARCH 505 and ARCH 595; concurrent enrollment in ARCH 545L.
First course in a sequence focused on architectural building technologies. Lectures and labs cover: environmental forces and systems (solar orientation, climate, daylighting, natural ventilation, human comfort and occupancy patterns), materials and assemblies (drawing conventions, building codes, and physical properties of materials) and fundamental structural principles (forces/loads, equilibrium, and stability) to understand impact of the built environment on human health, safety, and welfare at building scales.

ARCH 345L: Building Science and Technology I Lab
(0-2) Cr. 1. F.
Prereq: Admission to the professional program in architecture; concurrent enrollment in ARCH 345.
Laboratory to accompany Arch 345 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 346: Building Science and Technology II
(Dual-listed with ARCH 546). (3-0) Cr. 3. S.
Prereq: Undergraduate: ARCH 345, ARCH 345L, MATH 145, and PHYS 131 and 131L; concurrent enrollment in ARCH 346L. Graduate: ARCH 505, ARCH 545, ARCH 545L, and ARCH 595; concurrent enrollment in ARCH 506, ARCH 546L and ARCH 596.
Second course in a sequence focused on architectural building technologies. Lectures and labs cover: environmental systems (heat transfer in the building envelope, passive heating and cooling, daylighting, thermal comfort, analytical guidelines and building energy calculation methods), materials & assemblies (building envelope systems, accessibility, egress, and material properties), and structural systems (structural system selection/comparison, and design and analysis of “form-active” compression and tension structures) to understand impact of the built environment on human health, safety, and welfare at building scales.

ARCH 346L: Building Science and Technology II Lab
(0-4) Cr. 2. S.
Prereq: ARCH 345, ARCH 345L, MATH 145 and PHYS 131 and 131L; concurrent enrollment in ARCH 346.
Laboratory to accompany Arch 346 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 347: Building Science and Technology III
(Dual-listed with ARCH 547). (3-0) Cr. 3. F.
Prereq: Undergraduate: ARCH 346, ARCH 346L; concurrent enrollment in ARCH 347L. Graduate: ARCH 506, ARCH 546, ARCH 546L, and ARCH 596 or advanced standing in the M.Arch program; concurrent enrollment in ARCH 601 and ARCH 547L.
Third course in a sequence focused on architectural building technologies. Lectures and labs cover: multistory building framing, assembly, and enclosure systems, sizing and selecting structural framing components (foundations, columns, beams, etc.), and an environmental design process that demonstrates the ability to integrate climate into the control of thermal, luminous, ventilative and acoustic environments. Introduction to plumbing and rain water collection systems to understand the impact of the built environment on human health, safety, and welfare at building scales and to assess those technologies against performance objectives of projects.

ARCH 347L: Building Science and Technology III Lab
(0-4) Cr. 2.
Prereq: ARCH 346, ARCH 346L; concurrent enrollment in ARCH 347.
Laboratory to accompany Arch 347 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 348: Building Science and Technology IV
(Dual-listed with ARCH 548). (3-0) Cr. 3. S.
Prereq: Undergraduate: ARCH 347, ARCH 347L; concurrent enrollment in ARCH 348L. Graduate: ARCH 547, ARCH 547L and ARCH 601; concurrent enrollment in ARCH 548L.
Fourth course in a sequence focused on architectural building technologies. Lectures and labs cover: ability to demonstrate active environmental HVAC control systems design, use and design of mechanical, electrical, plumbing, fire safety, transportation, and conveying systems and subsystems, constructed building assemblies and details (building envelope details for waterproofing and enclosure, advanced material properties, costs, and serviceability), and structural design for multi-story structures (design and documenting various framing patterns, integration with other building systems, and lateral stability strategies for wind and seismic) to understand the impact of the built environment on human health, safety, and welfare at building scales and to assess those technologies against performance objectives of projects.

ARCH 348L: Building Science and Technology IV Lab
(0-4) Cr. 2. S.
Prereq: ARCH 347, ARCH 347L; concurrent enrollment in ARCH 348.
Laboratory to accompany Arch 348 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.
ARCH 371: Human Behavior and Environmental Theory  
(3-0) Cr. 3.  
Prereq: Completion of the pre-professional program and admission into the professional program in architecture  
Exploration of theories that describe social structure and order and the manner in which individuals and societies organize themselves and structure their environment.

ARCH 401: Architectural Design V  
(1-15) Cr. 6. F.  
Prereq: ARCH 302  
Projects showing students' ability to integrate knowledge of sound building design into a comprehensive architectural proposal that reflects sustainable design principles. Consideration of site, structure, building envelope, environmental controls, life safety, and methods to measure building performance. Projects typically are closely connected to the physical, environmental, and social context of their sites.

ARCH 401H: Architectural Design V, Honors  
(1-15) Cr. 6-7. F.  
Prereq: ARCH 302  
Projects showing students' ability to integrate knowledge of sound building design into a comprehensive architectural proposal that reflects sustainable design principles. Consideration of site, structure, building envelope, environmental controls, life safety, and methods to measure building performance. Projects typically are closely connected to the physical, environmental, and social context of their sites.

ARCH 402: Architectural Design VI  
(1-15) Cr. 6. S.  
Prereq: Minimum grade of C in ARCH 401.  
An examination of the relationship between architecture and the city. Studio projects stress analysis and interpretation of the diverse forces and conditions that impact and inform architecture in the urban environment. Urban design project. Study abroad option.

ARCH 402H: Architectural Design VI, Honors  
(1-15) Cr. 6-7. S.  
Prereq: Minimum grade of C in ARCH 401.  
An examination of the relationship between architecture and the city. Studio projects stress analysis and interpretation of the diverse forces and conditions that impact and inform architecture in the urban environment. Urban design project. Study abroad option.

ARCH 403: Architectural Design VII  
(1-15) Cr. 6. F.  
Prereq: ARCH 402  
Advanced studio as incubator for examining progressive agendas within or beyond the discipline of architecture. Innovative research that is academically rigorous, critically informed, speculative, and design-led is encouraged. Projects and creative outputs vary per studio instructor.

ARCH 403H: Architectural Design VII, Honors  
(1-15) Cr. 6-7. F.  
Prereq: ARCH 402  
Advanced studio as incubator for examining progressive agendas within or beyond the discipline of architecture. Innovative research that is academically rigorous, critically informed, speculative, and design-led is encouraged. Projects and creative outputs vary per studio instructor.

ARCH 404: Architectural Design VIII  
(1-15) Cr. 6. S.  
Prereq: ARCH 403  
Advanced forum for architectural research and/or design. Choice of thematic studios or student initiated research and design. Experimentation and innovation are encouraged. DSN S 446 or DSN S 546, for 6 cr. each time taken, can be substituted for this class and be taken up to a maximum of 12 credits.

ARCH 404H: Architectural Design VIII, Honors  
(1-15) Cr. 6-7. S.  
Prereq: ARCH 403  
Advanced forum for architectural research and/or design. Choice of thematic studios or student initiated research and design. Experimentation and innovation are encouraged. DSN S 446 or DSN S 546, for 6 cr. each time taken, can be substituted for this class and be taken up to a maximum of 12 credits.

ARCH 417: Big and Tall: A History of Construction  
(Dual-listed with ARCH 517). (3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: For Arch 417, Junior or Senior Classification, for Arch 517, Graduate classification  
History, theory, and principles of construction from ancient times through today. Analytic project or term paper and weekly readings with discussion questions. Credit counts toward fulfillment of History, Theory, Culture requirements.
ARCH 420: Topics in American Architecture  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
*Prereq: Junior classification*  
History, theory, and principles of American architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements. A maximum of 6 credits of ARCH 420 may be applied to degree program.  
Meets U.S. Diversity Requirement

ARCH 422: Topics in Medieval Architecture  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
*Prereq: Junior classification*  
History, theory, and principles of medieval architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements. A maximum of 6 credits of ARCH 422 may be applied to degree program.  
Meets International Perspectives Requirement

ARCH 423: Topics in Renaissance to Mid-Eighteenth Century Architecture  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
*Prereq: Junior classification*  
History, theory, and principles of renaissance to mid-eighteenth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements. A maximum of 6 credits of ARCH 423 may be applied to degree program.  
Meets International Perspectives Requirement

ARCH 424: Topics in Nineteenth Century Architecture  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
*Prereq: Junior classification*  
History, theory, and principles of nineteenth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements. A maximum of 6 credits of ARCH 424 may be applied to degree program.

ARCH 425: Topics in Twentieth Century and Contemporary Architecture  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
*Prereq: Junior classification*  
History, theory, and principles of twentieth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements. A maximum of 6 credits of ARCH 425 may be applied to degree program.

ARCH 426: Topics in Native American Architecture  
(Cross-listed with AM IN). (3-0) Cr. 3. Repeatable, maximum of 6 credits.  
*Prereq: Junior classification*  
History, theory, and principles of Native American/American Indian architecture, landscape architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture. A maximum of 6 credits of ARCH 426 may be applied to degree program.  
Meets U.S. Diversity Requirement

ARCH 427: History, Theory, and Criticism of Chinese Architecture  
(Dual-listed with ARCH 527). (3-0) Cr. 3. F.  
*Prereq: For Arch 427, Senior classification, for Arch 527, Graduate classification*  
The history and theoretical concept of Chinese built environment with emphasis on the morphology of built form and its relationship to art, landscape design, and urban structure. Credit counts toward fulfillment of History, Theory, Culture.

ARCH 429: Topics in Italian Architecture  
(3-0) Cr. 3. S.  
*Prereq: Junior classification*  
History, theory and principles of Italian architecture considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 431: Analytical Drawing  
(1-6) Cr. 3. Repeatable, maximum of 12 credits. F.S.  
Exploration of 2- and 3-dimensional representations. Emphasis on on-site freehand sketching, perspective and orthographic drawing, rendering of shadows and textures, and use of diverse media.

ARCH 432: Advanced Computer Lighting and Rendering  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Exploration of the computer as a design and communication tool. Emphasis on lighting and rendering techniques.

ARCH 433: Digital Fabrication  
(Dual-listed with ARCH 533). (3-0) Cr. 3. Repeatable, maximum of 6 credits. F.S.  
*Prereq: ARCH 433: ARCH 230; ARCH 301; Junior, Senior or equivalent skills. ARCH 533: Graduate Classification and ARCH 601 or equivalent skills.*  
Exploration of the computer as a design and manufacturing tool. Emphasis on developing digital fabrication technologies and workflows.
ARCH 434: Advanced Computer-aided Architectural Design  
(1-4) Cr. 3.  
Specialized investigations of the computer as a design tool. Development of computer software and workflows for architectural and environmental problem solving.

ARCH 436: Advanced Design Media  
(Dual-listed with ARCH 536). (2-2) Cr. 3. Repeatable, maximum of 6 credits. F.S.  
Special topics in design media applications.

ARCH 437: Architectural Photography  
(3-0) Cr. 3.  
Emphasis on use of the camera and lighting in photographing drawings and interior and exterior building environments.

ARCH 439: Computational Design Theory  
(Dual-listed with ARCH 539). (3-0) Cr. 3.  
Prereq: ARCH 220, ARCH 221, and ARCH 322 or senior classification or graduate standing.  
Seminar discussion of critical readings and theories surrounding computational design; This course surveys the history and development of digital computing and its use in design from early thought experiments, to computer-aided design systems, to present day artificial intelligences and robotics. The potentials and consequences of emerging computational design systems are discussed.

ARCH 445: Building Science and Technology V  
(2-0) Cr. 2. F.  
Prereq: ARCH 348, ARCH 348L; concurrent enrollment in ARCH 445L.  
Final course in a sequence of architectural building technology courses comprising environmental systems, materials/assembly, and building structures topics. Using both lectures and labs, the three interrelated modules each emphasize a particular building technology subject with an overall focus on synthesizing and integrating building technologies together in sustainable design strategies. Topics include: integration of active environmental control and service systems into the design of larger scale buildings, the development of construction details for building shell and interiors, and the design and analysis of various long-span structural systems. Environmental modeling and simulation to develop the ability to integrate measurable outcomes of building performance.

ARCH 445L: Building Science and Technology V Lab  
(0-2) Cr. 1. F.  
Prereq: ARCH 348, ARCH 348L; concurrent enrollment in ARCH 445.  
Laboratory to accompany Arch 445 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 482: Professional Practice  
(Dual-listed with ARCH 582). (3-0) Cr. 3. F.  
Prereq: Junior classification and ARCH 371  
Emphasis on the circumstances and opportunities of the professional practice of architecture: practice as profession, process, organization, business, and evolving models of practice.

ARCH 486: Urban Design Explorations  
(3-0) Cr. 3. S.  
An investigation of urban design realities in its contemporary form as part of International study abroad program in Rome. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 490: Independent Study  
Cr. 1-9. Repeatable.  
Prereq: Written approval of instructor and department chair on required form  
Independent investigation.

ARCH 490A: Independent Study: Design Communications.  
Cr. 1-9. Repeatable.  
Prereq: Written approval of instructor and department chair on required form  
Independent investigation.

ARCH 490B: Independent Study: Design  
Cr. 1-9. Repeatable.  
Prereq: Written approval of instructor and department chair on required form  
Independent investigation.

ARCH 490C: Independent Study: Building Science and Technology  
Cr. 1-9. Repeatable.  
Prereq: Written approval of instructor and department chair on required form  
Independent investigation.

ARCH 490D: Independent Study: Architectural History  
Cr. 1-9. Repeatable.  
Prereq: Written approval of instructor and department chair on required form  
Independent investigation.

ARCH 490E: Independent Study: Behavioral Studies  
Cr. 1-9. Repeatable.  
Prereq: Written approval of instructor and department chair on required form  
Independent investigation.

ARCH 490F: Independent Study: Practice  
Cr. 1-9. Repeatable.  
Prereq: Written approval of instructor and department chair on required form  
Independent investigation.

ARCH 490H: Independent Study: Honors  
Cr. 1-9. Repeatable.  
Prereq: Written approval of instructor and department chair on required form  
Independent investigation.
Courses primarily for graduate students, open to qualified undergraduates:

ARCH 505: Architectural Design and Media I: Mapping, Programming, Building
(0-12) Cr. 6. F.
Prereq: Admission to the M Arch program. Concurrent enrollment in ARCH 545, ARCH 545L and ARCH 595.
An introduction to comprehensive architectural design projects that focuses on three interrelated design skills: mapping, programming and building. Projects establish a framework for designing buildings that considers multiple factors such as environmental forces, construction methods, building codes, urban regulations, social relationships, and cultural values.

ARCH 506: Architectural Design and Media II: Materiality and Representation
(0-12) Cr. 6. S.
Prereq: ARCH 505, ARCH 545, ARCH 545L, ARCH 595 and concurrent enrollment in ARCH 546, ARCH 546L, and ARCH 596
Small-scale architectural design projects that investigate design representation through analogue and digital means. The projects explore different representation strategies to help students develop an understanding of the particular modes of architectural representation that advance the designer's knowledge of space as a complex interaction between materials with inherent physical characteristics, mobile socializing bodies, and changing environmental cycles.

ARCH 507: Architectural Design and Media III: Design in Detail
(0-10) Cr. 5. SS.
Prereq: ARCH 506, ARCH 546, ARCH 546L, ARCH 596 and concurrent enrollment in ARCH 581
Design projects that emphasize the multi-faceted role of the architectural detail in the design process through first, understanding the historical specificity of building construction and detailing; second, utilizing working drawing as a mode of communication; and third, designing with details.

ARCH 517: Big and Tall: A History of Construction
(Dual-listed with ARCH 417). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: For Arch 417, Junior or Senior Classification, for Arch 517, Graduate classification
History, theory, and principles of construction from ancient times through today. Analytic project or term paper and weekly readings with discussion questions. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 521: Celluloid Cities, Urbanism in Film
(3-0) Cr. 3.
Prereq: Junior classification
Urban theory and history as manifested in popular films and videos, both fiction and documentary. Term projects require students to make short videos. (Experience with video-making not necessary.) Credits counts towards fulfillment of History, Theory, Culture requirement.

ARCH 522: Complex Adaptive Systems Theory for the Design of Built Environments
(3-0) Cr. 3.
Prereq: Graduate or Senior Classification
The principles of complex adaptive systems theory are studied and then applied towards the design of resilient and responsive built environments. Topics cover a broad spectrum, including urban informalities, tactical approaches, the capacity of digital infrastructures to coordinate distributed human practices, and emergent phenomena. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 525: Meaning and Form in Architecture
(3-0) Cr. 3.
Prereq: Graduate or Senior classification
Seminar on critical analysis of meaning and form in architecture and human-made environment in various cultural contexts examined from historical and theoretical perspectives. Analytic term paper and weekly readings with discussion questions. Credit counts toward fulfillment of History, Theory, Culture requirements. Meets International Perspectives Requirement.

ARCH 527: History, Theory, and Criticism of Chinese Architecture
(Dual-listed with ARCH 427). (3-0) Cr. 3. F.
Prereq: For Arch 427, Senior classification, for Arch 527, Graduate classification
The history and theoretical concept of Chinese built environment with emphasis on the morphology of built form and its relationship to art, landscape design, and urban structure. Credit counts toward fulfillment of History, Theory, Culture. Meets International Perspectives Requirement.

ARCH 528: Topical Studies in Architecture
(3-0) Cr. 2-3. Repeatable, maximum of 6 times.

ARCH 528A: Studies in Architecture: Culture
(3-0) Cr. 2-3. Repeatable, maximum of 6 times.
Prereq: ARCH 220, ARCH 221, ARCH 322 or senior classification or graduate standing
Topical offerings change by semester. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 528B: Studies in Architecture: Technology
(3-0) Cr. 2-3. Repeatable, maximum of 6 times.
ARCH 528C: Studies in Architecture: Communications  
(3-0) Cr. 2-3. Repeatable, maximum of 6 times.

ARCH 528E: Studies in Architecture: Practice  
(3-0) Cr. 2-3. Repeatable, maximum of 6 times.

ARCH 530: Formworks  
(3-0) Cr. 3. F.S.  
Studies and activities showing fabrication as a means of speculation and  
discourse about materiality. Focus is given to the concepts and values  
embedded in materials and how we build at various scales.

ARCH 531: Drawing Culture  
(3-0) Cr. 3.  
Prereq: ARCH 220, ARCH 221, ARCH 322 or senior classification or graduate standing  
Exploration of theories and practices that center on drawing as a  
fundamental means of knowing.

ARCH 533: Digital Fabrication  
(Dual-listed with ARCH 433). (3-0) Cr. 3. Repeatable, maximum of 6 credits. F.S.  
Prereq: ARCH 433: ARCH 230; ARCH 301; Junior, Senior or equivalent skills.  
ARCH 533: Graduate Classification and ARCH 601 or equivalent skills.  
Exploration of the computer as a design and manufacturing tool.  
Emphasis on developing digital fabrication technologies and workflows.

ARCH 534: Topics in Computer-aided Architectural Design  
(1-4) Cr. 3. Repeatable, maximum of 6 credits. F.  
Emphasis on advanced, exploratory approaches to design computing.  
Projects highlight experimentation and integration of multiple media types.

ARCH 535: Advanced Three-Dimensional Studio  
(1-4) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: ARCH 335 or Graduate classification  
Advanced investigation of sculptural expression with emphasis on individual projects.

ARCH 536: Advanced Design Media  
(Dual-listed with ARCH 436). (2-2) Cr. 3. Repeatable, maximum of 6 credits. F.S.  
Special topics in design media applications.

ARCH 539: Computational Design Theory  
(Dual-listed with ARCH 439). (3-0) Cr. 3.  
Prereq: ARCH 220, ARCH 221, and ARCH 322 or senior classification or graduate standing.  
Seminar discussion of critical readings and theories surrounding computational design; This course surveys the history and development of digital computing and its use in design from early thought experiments, to computer-aided design systems, to present day artificial intelligences and robotics. The potentials and consequences of emerging computational design systems are discussed.

ARCH 540: Regimes of Perception  
(3-0) Cr. 3. F.S.  
Exploration of theories, methodologies, and apparatuses of projection as a spatial and material practice. Readings and discussions accompany assignments for projection through drawing, fabrication, and performance.

ARCH 545: Building Science and Technology I  
(Dual-listed with ARCH 345). (2-0) Cr. 2. F.  
Prereq: Undergraduate: Admission to the professional program in architecture; concurrent enrollment in ARCH 345L; graduate: Admission to the M. Arch. program and concurrent enrollment in ARCH 505 and ARCH 595; concurrent enrollment in ARCH 545L.  
First course in a sequence focused on architectural building technologies. Lectures and labs cover: environmental forces and systems (solar orientation, climate, daylighting, natural ventilation, human comfort and occupancy patterns), materials and assemblies (drawing conventions, building codes, and physical properties of materials) and fundamental structural principles (forces/loads, equilibrium, and stability) to understand impact of the built environment on human health, safety, and welfare at building scales.

ARCH 545L: Building Science and Technology I Lab  
(0-6) Cr. 3. F.  
Prereq: Admission to the M. Arch. program and concurrent enrollment in ARCH 505 and ARCH 595; concurrent enrollment in ARCH 545. Laboratory to accompany Arch 545 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format. Readings and project presentations.
ARCH 546: Building Science and Technology II
(Dual-listed with ARCH 346). (3-0) Cr. 3. S.
Prereq: Undergraduate: ARCH 345, ARCH 345L, MATH 145, and PHYS 131 and 131L; concurrent enrollment in ARCH 346L. Graduate: ARCH 505, ARCH 545, ARCH 545L, and ARCH 595; concurrent enrollment in ARCH 506, ARCH 546L and ARCH 596.
Second course in a sequence focused on architectural building technologies. Lectures and labs cover: environmental systems (heat transfer in the building envelope, passive heating and cooling, daylighting, thermal comfort, analytical guidelines and building energy calculation methods), materials & assemblies (building envelope systems, accessibility, egress, and material properties), and structural systems (structural system selection/comparison, and design and analysis of “form-active” compression and tension structures) to understand impact of the built environment on human health, safety, and welfare at building scales.

ARCH 546L: Building Science and Technology II Lab
(0-4) Cr. 2. S.
Prereq: ARCH 345, ARCH 345L, MATH 145 and PHYS 131 131L; concurrent enrollment in ARCH 546.
Laboratory to accompany Arch 546 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 547: Building Science and Technology III
(Dual-listed with ARCH 347). (3-0) Cr. 3. F.
Prereq: Undergraduate: ARCH 346, Arch 346L; concurrent enrollment in ARCH 347L. Graduate: ARCH 506, ARCH 546, ARCH 546L, and ARCH 596 or advanced standing in the M.Arch program; concurrent enrollment in ARCH 601 and ARCH 547L.
Third course in a sequence focused on architectural building technologies. Lectures and labs cover: multistory building framing, assembly, and enclosure systems, sizing and selecting structural framing components (foundations, columns, beams, etc.), and an environmental design process that demonstrates the ability to integrate climate into the control of thermal, luminous, ventilative and acoustic environments. Introduction to plumbing and rain water collection systems to understand the impact of the built environment on human health, safety, and welfare at building scales and to assess those technologies against performance objectives of projects.

ARCH 547L: Building Science and Technology III Lab
(0-2) Cr. 1. F.
Prereq: ARCH 506, ARCH 546, ARCH 546L, and ARCH 596 or advanced standing in the M.Arch program; concurrent enrollment in ARCH 547 and ARCH 601.
Laboratory to accompany Arch 547 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 548: Building Science and Technology IV
(Dual-listed with ARCH 348). (3-0) Cr. 3. S.
Prereq: Undergraduate: ARCH 347, Arch 347L; concurrent enrollment in ARCH 348L. Graduate: ARCH 547, ARCH 547L and ARCH 601; concurrent enrollment in ARCH 548L.
Fourth course in a sequence focused on architectural building technologies. Lectures and labs cover: ability to demonstrate active environmental HVAC control systems design, use and design of mechanical, electrical, plumbing, fire safety, transportation, and conveying systems and subsystems, constructed building assemblies and details (building envelope details for waterproofing and enclosure, advanced material properties, costs, and serviceability), and structural design for multi-story structures (design and documenting various framing patterns, integration with other building systems, and lateral stability strategies for wind and seismic) to understand the impact of the built environment on human health, safety, and welfare at building scales and to assess those technologies against performance objectives of projects.

ARCH 548L: Building Science and Technology IV Lab
(0-2) Cr. 1. S.
Prereq: ARCH 547, ARCH 547L and ARCH 601; concurrent enrollment in ARCH 548.
Laboratory to accompany Arch 548 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 558: Sustainability and Green Architecture
(3-0) Cr. 3.
Prereq: Graduate or Senior classification
Issues of sustainability as related to living patterns and city design, population, pollution and use and availability of natural resources for the built environment. Issues of green and sustainable architecture as related to critical thinking about methods of building material selection and systems, the environment of the United States and the world, and examples of green or sustainable building designs.
ARCH 567: Preservation, Restoration, Rehabilitation, Cultural Heritage, and Technology
(3-0) Cr. 3.
Prereq: Senior classification
Standards and procedures—including the use of current digital technologies—for preserving, restoring, reconstructing, and rehabilitating existing buildings following the guidelines of the National Park Service and the National Trust for Historic Preservation. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 568: Historic Preservation
(3-0) Cr. 3. F.
Prereq: Senior classification
The history and theory of the Historic Preservation movement including an overview of the National Trust for Historic Preservation; the National Register of the Historic Places; the National Park Service; federal programs, funding sources, preservation law, national landmarks, and historic districts. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 571: Design for All People
(Cross-listed with GERON). (3-0) Cr. 3. S.
Prereq: Graduate or Senior classification
Principles and procedures of inclusive design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of History, Theory, Culture requirements. Meets U.S. Diversity Requirement

ARCH 575: Contemporary Urban Design Theory
(3-0) Cr. 3.
Prereq: Graduate or Senior classification
Current urban design theory and its application to urban problems. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 576: Study Abroad Options
Cr. 1-12. Repeatable, maximum of 12 credits. SS.
Special topics in environmental design, architectural history and contemporary practice. Travel to relevant countries. General cultural and historical studies, topical projects and individual inquiry. Courses may be taught by departmental faculty or faculty from approved Iowa State Study Abroad programs. See current offerings for detailed syllabus. Meets International Perspectives Requirement.

ARCH 581: Making and Material Practice
(1-12) Cr. 5. SS.
Prereq: ARCH 506, ARCH 546, ARCH 546L, and ARCH 596
Planning and execution of a project serving a community need. Learning occurs through both theory and active involvement in on-site work. Projects connect previous coursework to practical applications and community involvement.

ARCH 582: Professional Practice
(Dual-listed with ARCH 482). (3-0) Cr. 3. F.
Prereq: Junior classification and ARCH 371
Emphasis on the circumstances and opportunities of the professional practice of architecture: practice as profession, process, organization, business, and evolving models of practice.

ARCH 590: Special Topics
Cr. 1-5. Repeatable.
Prereq: Written approval of instructor and department chair on approved form
Investigation of architectural issues having a specialized nature.

ARCH 595: Seminar on the Built Environment I: History
(3-0) Cr. 3. F.
Prereq: Admission to the M. Arch. program and concurrent enrollment in ARCH 505, ARCH 545, and ARCH 545L
Introduction to historical canons and traditions of architecture and urbanism. Discussion of the relationship between historical inquiry and contemporary practice. Students learn skills in critical thinking, visual analysis, and research methods. Course sessions develop thematically with interdisciplinary readings, group discussions, student presentations, and research projects.

ARCH 596: Seminar on the Built Environment II: Landscape and Society
(3-0) Cr. 3. S.
Prereq: ARCH 505, ARCH 545, ARCH 545L, ARCH 595 and concurrent enrollment in ARCH 506, ARCH 546, and ARCH 546L
Introduction to landscape as artifact and multi-disciplinary knowledge-base for design thinking. Literatures and methods of environmental psychology, cultural geography, landscape and architectural history and theory, site and circulation design as intersection of built infrastructural, natural, and social systems. Emphasis on sensory perception, and human movement; investigations of climate, environmental conditions, and values toward consumption and sustainability in everyday experience of the built environment.
ARCH 597: Seminar on the Built Environment III: Theory
(3-0) Cr. 3. F.
Prereq: Graduate or Senior classification
Multidisciplinary overview of contemporary theories concerned with the production of the built environment. Particular attention to urbanism as a discourse that relates social interactions and power structures to material space. Credit counts toward fulfillment of History, Theory, Culture requirements.
Meets International Perspectives Requirement.

ARCH 598: Seminar on the Built Environment IV: Topical Study
(3-0) Cr. 3. S.
Prereq: Graduate or Senior classification
A research seminar which considers a topic within contemporary discourses on the built environment outside of Europe and North America. The topic will be studied from multiple perspectives highlighting the historical and theoretical relationships between architecture, global cultures, geography, landscape, and urban planning. Credit counts toward fulfillment History, Theory, Culture requirements.

Courses for graduate students:

ARCH 601: Sustainable Building Design
(0-12) Cr. 6. F.
Prereq: ARCH 507, ARCH 546, ARCH 546L, and ARCH 596 and concurrent enrollment in ARCH 547 and ARCH 547L
Design projects that are developed through integrative design strategies that explore the relationship between buildings and environmental forces to maximize non-wasteful, efficient use of resources such as energy, water and building materials. Projects will include investigations of the impact of solar energy, airflow, building materials, passive and active systems and wall sections on spatial quality and form making while demonstrating synthesis of user requirements, regulatory requirements, site conditions, and accessible design. Design decisions will be quantitatively validated through energy modeling and performance simulation.

ARCH 602: Communities, Architecture and the Environment
(0-12) Cr. 6. S.
Prereq: ARCH 601, ARCH 547 ARCH 547L, ARCH 597 and concurrent enrollment in ARCH 548 ARCH 548L
Design projects that explore the relationships between architectural, cultural, and environmental landscapes. Emphasis on regional sites, socio-economic conditions, and sustainable design and planning practices at multiple scales. Projects stress engagement with local circumstances and stakeholders; systemic interconnections and strategies; and the application of interdisciplinary research.

ARCH 603: Integrative Design
(0-12) Cr. 6. F.
Prereq: ARCH 602, ARCH 548 ARCH 548L
Rigorous examination of architecture's relationship with culture and technology. Studio projects stress the interpretation of contextual and historical considerations while demonstrating broad integration and consideration of environmental stewardship, technical documentation, accessibility, site conditions, life safety, environmental systems, structural systems, and building envelope systems and assemblies. This course fulfills the Graduate College Creative Component Requirement.

ARCH 604: Design Studio Options
(0-12) Cr. 6. Repeatable, maximum of 12 credits. S.
Prereq: ARCH 602
Design studio selected by the students, which may include but is not limited to: independent design study, interdisciplinary design studio, study abroad, and design build. DSN S 546 for 6 cr. may be substituted for this course.

ARCH 690: Independent Design Study
(1-15) Cr. 6. Repeatable.
Prereq: Admission to the M. S. in Arch. program
Independent architectural design projects commensurate with student interests requiring approval of Architecture Graduate Committee.

ARCH 698: Graduate Seminar
Cr. R. Repeatable. F.S.
Prereq: Admission to the M. Arch. or M. S. in Arch. programs
Special topics and guest speakers.

ARCH 699: Research
(1-18) Cr. 3-9. Repeatable.
Research.

Art Education (ARTED)

Any experimental courses offered by ARTED can be found at:
registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

ARTED 209: Methods of Teaching in and Through Art
(0-4) Cr. 2. F.S.
Prereq: Sophomore level
Methods of teaching in and through visual art are experienced and applied in this course. Art-centered and interdisciplinary art education methods for K-8 teaching are designed to develop creativity, authentic expression, collaboration, aesthetic sensitivity and pluralistic, global perspectives.
ARTED 211: Introduction to Art Education
(0-6) Cr. 3. F.S.
Prereq: Sophomore level
Teaching methods for K-12 art education. Hands-on discipline-specific and integrated art activities are experienced and designed; emphasis is on creativity, artistic and human diversity, community building, and development of thinking skills in holistic, pluralistic art education.

ARTED 490: Independent Study
Cr. arr. F.

Art History (ART H)

Any experimental courses offered by ART H can be found at: registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

ART H 280: History of Art I
(3-0) Cr. 3. F.
Development of the visual arts including painting, sculpture, architecture, and crafts, from the prehistoric through Gothic periods.
Meets International Perspectives Requirement.

ART H 281: History of Art II
(3-0) Cr. 3. S.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century.
Meets International Perspectives Requirement.

ART H 281H: History of Art II: Honors
(3-0) Cr. 3. S.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century.
Meets International Perspectives Requirement.

ART H 292: Introduction to Visual Culture Studies
(3-0) Cr. 3.
An introduction to various topics in visual culture studies, including significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture.
Meets U.S. Diversity Requirement

ART H 293: Origins and Evolution of Modern Design
(3-0) Cr. 3.
History of designed artifacts, their creators, and their cultural environments in Europe and America from the beginning of the Industrial Revolution to the present.

ART H 382: Art and Architecture of Asia
(3-0) Cr. 3.
Introduction to histories of art and architecture in Asia before the modern era. Cultures may include China, Korea, Japan, and India. Art traditions of Asia are explored in relation to their cultural, historical, and religious contexts.
Meets International Perspectives Requirement.

ART H 383: Greek and Roman Art
(Cross-listed with CL ST). (3-0) Cr. 3.
Greek art from Neolithic to Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

ART H 383H: Greek and Roman Art: Honors
(Cross-listed with CL ST). (3-0) Cr. 3-4.
Greek art from Neolithic to Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

ART H 384: Art of Islam
(3-0) Cr. 3.
Historical survey of the painting, sculpture, crafts, and architecture of the various civilizations of the Islamic world.
Meets International Perspectives Requirement.

ART H 384H: Art of Islam, Honors
(3-0) Cr. 3-4.
Historical survey of the painting, sculpture, crafts, and architecture of the various civilizations of the Islamic world.
Meets International Perspectives Requirement.

ART H 385: Renaissance Art
(3-0) Cr. 3.
European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

ART H 385H: Renaissance Art, Honors
(3-0) Cr. 3-4.
European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.
ART H 386: American Art to 1945  
(3-0) Cr. 3.  
Survey of American art from the early colonial period to 1945, with emphasis on historical and cultural issues that underlie art production in the United States.  
Meets U.S. Diversity Requirement

ART H 388: Modern Art and Theory  
(3-0) Cr. 3.  
Visual arts and critical theory of the late 19th and early 20th centuries, including Expressionism, Cubism, Futurism, Suprematism, Dada, and Surrealism.

ART H 395: Art and Theory Since 1945  
(3-0) Cr. 3.  
Visual arts and critical theory after 1945, including Abstract Expressionism, Pop Art, and Performance Art.  
Meets U.S. Diversity Requirement

ART H 396: History of Photography  
(3-0) Cr. 3.  
Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an art historical perspective, emphasizing causative factors, cultural influences, and major masters and schools.

ART H 460: The World on Display  
(3-0) Cr. 3.  
Survey of world’s fairs and other international exhibitions, focusing on their displays of art, manufacturing, luxury goods and industrial products, and relating to overarching discourses of nationalism, colonialism, and political supremacy as they were articulated within the exhibitions.

ART H 486: Art History Field Study  
Cr. R. Repeatable.  
Prereq: Concurrent enrollment in an art history course and permission of instructor  
Study and tours of museums, galleries, artist and/or designer studios and other areas of interest within art history. Offered on a satisfactory-fail basis only.

ART H 487: Nineteenth-Century Art  
(3-0) Cr. 3.  
European and American art and architecture from 1780 to 1900 focusing on the major movements of western Europe, including Neoclassicism, Romanticism, Realism, Impressionism, and Post-Impressionism.

ART H 489: History of Comics  
(Dual-listed with ART H 589). (3-0) Cr. 3.  
An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to present.

ART H 489H: History of Comics: Honors  
(3-0) Cr. 3-4.  
An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to present.

ART H 490: Independent Study  
Cr. 1-6. Repeatable.  
Prereq: Written approval of instructor and department chair on required form before the semester of enrollment  
Student must have completed art history coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ART H 490H: Independent Study, Honors  
Cr. 1-6. Repeatable.  
Prereq: Written approval of instructor and department chair on required form before the semester of enrollment  
Student must have completed art history coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ART H 491: Art History in Europe Seminar  
(1-0) Cr. 1.  
Prereq: Permission of instructor and planned enrollment in ART H 492  
Cultural and historical aspects of art and design in Western Europe in preparation for study abroad. Area of study varies each time offered. Offered on a satisfactory-fail basis only.  
Meets International Perspectives Requirement.

ART H 492: Art History in Europe  
(Dual-listed with ART H 592). (3-0) Cr. 3.  
Prereq: For ART H 492: ART H 491 or equivalent, permission of instructor; For ART H 592: Graduate classification, permission of instructor  
International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered.  
Meets International Perspectives Requirement.

ART H 494: Women/Gender in Art  
(Cross-listed with WGS). (3-0) Cr. 3.  
Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.  
Meets U.S. Diversity Requirement
ART H 497: Museum/Gallery Internship  
Cr. 1-6. Repeatable, maximum of 6 credits.  
Prereq: Written approval of supervising instructor on required form in advance of semester of enrollment.  
Supervised experience with a cooperating museum or gallery or art center. Offered on a satisfactory-fail basis only.

ART H 498: Selected Topics in Art History  
(Dual-listed with ART H 598). (3-0) Cr. 3. Repeatable, maximum of 9 credits.  
Specialized study in the history or criticism of art and/or design.

ART H 499: Visual Culture Studies Writing and Methods Seminar  
(3-0) Cr. 3.  
Sustained exploration of topics related to Visual Culture Studies. Course incorporates introduction to methods central to the field of visual culture studies, writing exercises, and guided instruction in the process of conducting research and reporting results of the research process. Course will result in an original paper.

Courses primarily for graduate students, open to qualified undergraduates:

ART H 501: Issues in Visual and Material Culture Seminar  
(3-0) Cr. 3.  
Prereq: Permission of instructor  
Issues and debates that pertain to the study of visual objects and material artifacts in their cultural context. Examination of the role of visual and material culture studies as both relate to allied disciplines including, but not limited to: anthropology, art history, design history, design studies, and new media studies.

ART H 586: Museum/Gallery Internship  
Cr. 1-6. Repeatable, maximum of 6 credits.  
Prereq: Graduate classification and permission of instructor. Written approval in advance of semester of enrollment.  
Supervised experience with a cooperating museum or gallery or art center. Offered on a satisfactory-fail basis only.

ART H 587: Nineteenth Century Art  
(3-0) Cr. 3.  
Prereq: Graduate classification or permission of instructor  
European and American art and architecture from 1780 to 1900, focusing on the major movements of western Europe, including Neoclassicism, Romanticism, Realism, Impressionism, and Post-Impressionism.

ART H 588: Modern Art and Theory  
(3-0) Cr. 3.  
Prereq: Graduate classification or permission of instructor  
Visual arts and critical theory of the late 19th and early 20th centuries, including Expressionism, Cubism, Futurism, Suprematism, Dada and Surrealism.

ART H 589: History of Comics  
(Dual-listed with ART H 489). (3-0) Cr. 3.  
An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to present.

ART H 590: Special Topics  
Cr. arr.  
Prereq: Graduate classification; written approval of instructor and department chair on required form in advance of semester of enrollment.  
Independent Study in Art History.

ART H 592: Art History in Europe  
(Dual-listed with ART H 492). (3-0) Cr. 3.  
Prereq: For ART H 492: ART H 491 or equivalent, permission of instructor; For ART H 592: Graduate classification, permission of instructor  
International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Meets International Perspectives Requirement.

ART H 594: Women/Gender in Art  
(Cross-listed with WGS). (3-0) Cr. 3.  
Prereq: Graduate classification or permission of instructor  
Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.

ART H 595: Art and Theory Since 1945  
(3-0) Cr. 3.  
Prereq: Graduate classification or permission of instructor  
Visual arts and critical theory after 1945, including Abstract Expressionism, Pop Art, and Performance Art.

ART H 596: History of Photography  
(3-0) Cr. 3.  
Prereq: Graduate classification or permission of instructor  
Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an art historical perspective, emphasizing causative factors, cultural influences, and major masters and schools.

ART H 597: Green Art: Earthworks and Beyond  
(3-0) Cr. 3.  
Prereq: Graduate classification or permission of instructor  
Seminar covering aspects of art and design based on ecological principles, including earthworks, land-based art, recycled/reused objects, ecofeminism, ephemerality, and green design.
ART H 598: Selected Topics in Art History
(Dual-listed with ART H 498). (3-0) Cr. 3. Repeatable, maximum of 9 credits.
Specialized study in the history or criticism of art and/or design.

Astronomy and Astrophysics (ASTRO)

Any experimental courses offered by ASTRO can be found at:
registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

ASTRO 102: North Star Astronomy
Cr. 1. F.S.
An entirely web-based course covering topics in observing the sky and navigation by the stars for students with little or no previous experience. The course combines material on common naked-eye phenomena, such as daily and seasonal variations in the sky, with information on how these helped navigators determine where they are on Earth. The course "lectures" are on-line, interactive units with build in exercises, hands-on (offline) activities and layers of help. Graded homework and quizzes are administered via Canvas. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.

ASTRO 103: Evening Star
Cr. 1. F.S.
An entirely web-based course covering topics in celestial mechanics ("Rocket science!") for students with little or no previous experience. It combines the geography of the solar system with discussion of methods of traveling to the other planets. The course "lectures" are on-line, interactive units with built-in exercises, hands-on (offline) activities, and layers of help. Graded homework and quizzes are administered via Canvas. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.

ASTRO 106: Earth and Space Science for Elementary Education Majors
(Cross-listed with GEOL). (2-0) Cr. 2. F.S.
Prereq: Major in elementary or early childhood education.
Fundamental concepts of Earth and Space Science, including the solar system, weather and climate, water and soils, plate tectonics, and geologic hazards. Online course format.

ASTRO 106L: Earth and Space Science for Elementary Education Majors: Laboratory
(Cross-listed with GEOL). (0-2) Cr. 1. F.S.
Prereq: Restricted to elementary and early childhood education majors; to be taken concurrently with GEOL 106/ASTRO 106
Inquiry-based lab exploring fundamental concepts of Earth and Space Science, including the solar system, weather and climate, water and soils, plate tectonics, and geologic hazards. Must be taken concurrently with GEOL/ASTRO 106.

ASTRO 120: The Sky and the Solar System
(3-0) Cr. 3. F.S.S.
For the nonscientist. A survey of our view of the universe, and the exploration of the solar system and beyond. The sky: constellations; motions of the Sun, Moon, and planets; seasons and the calendar; eclipses. The solar system: origin and evolution; characteristics of the Sun, planets, satellites, comets, meteorites, and asteroids. The detection and characterization of other solar systems, and the search for life in the universe. Extensive use of the planetarium is included. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.

ASTRO 125L: The Sky and the Solar System Laboratory
(0-2) Cr. 1. F.S.
Prereq: Concurrent or previous enrollment in ASTRO 120
Laboratory course to accompany Astro 120. Students carry out practical exercises involving naked eye and telescopic observing to explore and reinforce ideas covered in Astro 120. Activities based on a sky-simulation computer program and other weather-independent exercises are also included.

ASTRO 150: Stars, Galaxies, and Cosmology
(3-0) Cr. 3. F.S.
For the nonscientist. A survey of astronomy with a focus on the universe beyond our solar system. Basic observational astronomy and the history of astronomy. Stellar astronomy: motions, distances, sizes, spectra; types of stars; variability; binary systems. Stellar evolution: the birth, life, and death of stars, including supernovae, neutron stars, and black holes. The structure and evolution of the Milky Way Galaxy. Other galaxies, clusters of galaxies, quasars. Theories of the origin of the universe.

ASTRO 250: Astronomy Bizarre
(3-0) Cr. 3. S.
Prereq: ASTRO 120 or ASTRO 150
ASTRO 290: Independent Study  
Cr. 1-4. Repeatable.  
Prereq: Permission of instructor

ASTRO 342: Introduction to Solar System Astronomy  
(3-0) Cr. 3. F.  
Prereq: PHYS 222 or (PHYS 232 and 232L) or PHYS 242  
An introduction to the physics of the Solar System and the planetary systems discovered around other stars. General characteristics of planetary systems: dynamics, thermodynamics, internal and surface structure of planets and minor bodies, physics of their atmosphere. Discovery techniques and characterization of extrasolar planets, and planetary systems formation models. "Grand tour" of the Solar System, using data and imagery from probes and telescopes that have visited these worlds. The origin and evolution of life on Earth, and the ongoing search for life in the Solar System and elsewhere in the universe.

ASTRO 344L: Astronomy Laboratory  
(1-6) Cr. 3. F.  
Prereq: PHYS 222 or (PHYS 232 and 232L) or PHYS 242  
Experiments in optical astronomy. Observational techniques, ranging from stellar photometry to CCD imaging. Data processing and analysis techniques. Astronomical software packages and online databases and resources. Available instruments include a variety of small telescopes and astronomical CCD cameras.

ASTRO 346: Introduction to Astrophysics  
(3-0) Cr. 3. S.  
Prereq: PHYS 222 or (PHYS 232 and 232L) or PHYS 242  
An exploration of the universe beyond our Solar System, with emphasis on the astrophysics of stars and galaxies. Observable properties of stars, physics of stellar atmospheres and interiors. Birth, evolution and death of stars, to understand the past and future of our Sun, the Milky Way galaxy and the other galaxies in the universe. Basic concepts of cosmology, dark matter and dark energy. Use of computer models to calculate the structure and evolution of stars and protostars, and to analyze actual astronomical data obtained by professional astronomers.

ASTRO 405: Astrophysical Cosmology  
(Dual-listed with ASTRO 505). (3-0) Cr. 3. S.  
Prereq: ASTRO 346 or permission of instructor  
Introduction to modern cosmology and large-scale structure; mathematical and observational fundamentals associated with the origin, structure, and evolution of the Universe. Scale of the Universe, Hubble's Law, the cosmic microwave background, Big Bang nucleosynthesis, the origin of elements, dark energy and the accelerating universe, and dark matter. For senior undergraduates and graduate students in all areas of physics.

ASTRO 450: Undergraduate Research  
Cr. 1-6. Repeatable. F.S.S.  
Prereq: Permission of instructor  
Research under supervision of astronomy faculty.

ASTRO 450L: Undergraduate Research  
Cr. 1-6. Repeatable. F.S.S.  
Prereq: ASTRO 344L and permission of instructor  
Laboratory or observational project under supervision of astronomy faculty.

ASTRO 490: Independent Study  
Cr. 1-4. Repeatable, maximum of 9 credits.  
Prereq: 6 credits in astronomy, permission of instructor  
No more than 9 credits of Astro 490 may be counted toward graduation.

ASTRO 490H: Independent Study: Honors  
Cr. 1-4. Repeatable, maximum of 9 credits.  
Prereq: 6 credits in astronomy, permission of instructor  
No more than 9 credits of Astro 490 may be counted toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

ASTRO 505: Astrophysical Cosmology  
(Dual-listed with ASTRO 405). (3-0) Cr. 3. S.  
Prereq: ASTRO 346 or permission of instructor  
Introduction to modern cosmology and large-scale structure; mathematical and observational fundamentals associated with the origin, structure, and evolution of the Universe. Scale of the Universe, Hubble's Law, the cosmic microwave background, Big Bang nucleosynthesis, the origin of elements, dark energy and the accelerating universe, and dark matter. For senior undergraduates and graduate students in all areas of physics.

ASTRO 510: Observational Astrophysics  
(2-3) Cr. 3. Alt. F., offered odd-numbered years.  
Prereq: ASTRO 405 or ASTRO 505 or permission of instructor  
Techniques in optical and near-IR astronomy, including spectroscopy and CCD photometry. Emphasis on projects involving proficiency in the use of research telescopes and modern instrumentation. Project topics range from photometric studies of pulsating and binary star systems to deep CCD imaging of faint nebulae and galaxies.
**ASTRO 580: Stellar Astrophysics**

(3-0) Cr. 3. Alt. S., offered odd-numbered years.

*Prereq: ASTRO 405 or ASTRO 505 or permission of the instructor*

**ASTRO 582: High Energy Astrophysics**

(3-0) Cr. 3. Alt. F., offered even-numbered years.

*Prereq: ASTRO 405 or ASTRO 505 or permission of the instructor*

Interactions of high-energy particles, non-thermal radiation processes, spectral evolution of non-thermal systems, cosmic rays, active galactic nuclei, pulsars, neutrinos, measurement techniques for relativistic charged particles, high energy photons, and neutrinos.

**ASTRO 584: Galactic Astronomy**

(3-0) Cr. 3. Alt. S., offered even-numbered years.

*Prereq: ASTRO 405 or ASTRO 505 or permission of the instructor*

Overall structure of our Galaxy and the interstellar medium. Physical processes in the interstellar medium (e.g., heating and cooling mechanisms, turbulence). Observational techniques for studying the interstellar medium. Kinematics and chemical evolution of the Galaxy.

**ASTRO 586: Extragalactic Astronomy**

(3-0) Cr. 3. Alt. F., offered odd-numbered years.

*Prereq: ASTRO 405 or ASTRO 505 or permission of the instructor*

Galaxy evolution, dynamics of external galaxies, evolution and classification of galaxies, groups and clusters of galaxies, extragalactic radio sources, quasars, structure formation, cosmological models and their observational consequences.

**ASTRO 590: Special topics**

Cr. arr. Repeatable.

**ASTRO 599: Creative Component**

Cr. arr.

*Prereq: Permission of instructor*

Individually directed study of research-level problems for students electing the nonthesis M.S. option in astronomy.

**Courses for graduate students:**

**ASTRO 650: Advanced Seminar**

(1-0) Cr. 1. Repeatable. F.S.

Topics of current interest in astronomy and astrophysics. Offered on a satisfactory-fail basis only.

**ASTRO 675: Advanced Stellar Astrophysics**

(3-0) Cr. 3. Alt. S., offered even-numbered years.

*Prereq: ASTRO 580 or permission of instructor*

**ASTRO 699: Research**

Cr. arr. Repeatable.

**Athletic Training (A TR)**

*Any experimental courses offered by A TR can be found at: registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)*

**Courses primarily for undergraduates:**

A TR 217: Clinical Practicum in Athletic Training I

Cr. 1. S.

*Prereq: A TR 221, Permission of Athletic Training Program Director*

Athletic training clinical experiences for pre-athletic training students. Offered on a satisfactory-fail basis only.

A TR 218: Orientation to Athletic Training Clinical Experience

(0-2) Cr. 0.5. Repeatable, maximum of 1 credits. F.S.

Pre-athletic training clinical experience designed to orientate students to the athletic training profession prior to enrolling in athletic training course sequence. Students will observe athletic trainers in various athletic training clinical sites. Open to pre-athletic training students only. Offered on a satisfactory-fail basis only.

A TR 219: Anatomy Clinical Practicum

(0-2) Cr. 1. S.

Athletic training clinical experiences designed to review human anatomical structures including origin, insertion, action, innervations of muscles. Students will gain experience with palpation of these structures to help identify location of anatomical landmarks. Students will also gain experience identifying bones, ligaments, and tendons. Open to athletic training students only.
A TR 220: Basic Athletic Training
(1-2) Cr. 2.
Prereq: BIOL 155 or BIOL 255 and BIOL 256
Introduction to methods of prevention and immediate care of athletic injuries. Basic information concerning health supervision of athletes, and some basic wrapping and strapping techniques for common injuries. Non A TR majors only.

A TR 221: Pre-Athletic Training Clinical Practicum
(0-3) Cr. 1. F.
Prereq: Credit or enrollment in A TR 222
Athletic training clinical observation experiences to accompany A TR 222. Utilize knowledge to evaluate, analyze and demonstrate appropriate taping, wrapping and basic skill techniques. Open to students interested in the athletic training option. Offered on a satisfactory-fail basis only.

A TR 223: Preseason Clinical Experience Practicum
(0-3) Cr. 1. F.
Prereq: Permission of Athletic Training Program Director
Athletic training clinical experiences for athletic training students during pre-season intercollegiate football. Clinical experiences include: Professional Rescuer CPR, AED certification, emergency splinting and spineboarding, medical record keeping and HIPPA regulations, environmental conditions, prevention of injury screening strategies, athletic training room and education program policies and procedures, review of athletic taping techniques, acute injury management, mouthpiece formation, and anatomy review. Offered on a satisfactory-fail basis only.

A TR 228: Basic Orthopedic Assessment and Evaluation Principles
Cr. 2. F.
Prereq: BIOL 255, BIOL 255L, BIOL 256, BIOL 256L, Permission of Athletic Training Program Director
Assessment procedures and evaluation techniques for upper and lower body orthopedic conditions and injuries. Includes an overview of mechanisms of injury, general musculoskeletal disorders, spine or neurological dysfunction.

A TR 229: Clinical Practicum in Athletic Training II
Cr. 1. F.
Prereq: Concurrent enrollment in A TR 228. Permission of Athletic Training Program Director.
Pre-Athletic training clinical experiences designed to orientate students to the assessment and evaluation principles of upper and lower body orthopedic conditions and injuries. Pre-athletic training students will observe athletic trainers in various athletic training clinical sites. Concurrent enrollment in A TR 228. Offered on a satisfactory-fail basis only.

A TR 328: Athletic Injuries Clinical Practicum
Cr. 1.
Prereq: Permission of athletic training program director
Athletic training clinical experiences for pre-athletic training students. Clinical experiences include: prevention of injury screening strategies, athletic training room and education program policies and procedures, review of athletic taping techniques, acute injury management, and anatomy review. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

A TR 501: Bracing, Wrapping, and Taping Techniques
(0-3) Cr. 1.
Prereq: Acceptance into Athletic Training program
Methods to select, fabricate, and/or customize prophylactic, assistive, and restrictive devices, material, and techniques into plan of care (durable medical equipment, orthotic devices, taping, bracing, splinting, protective padding, and casting). Methods of taping and wrapping for injury care, prevention of injury, and return to play. Exposure to different brands of bracing, how to fit a brace, and their use as well as casting techniques. Discussions of when to refer for prosthetics and overview of gait training.

A TR 502: Emergency Care Procedures in Athletic Training
(3-0) Cr. 3. SS.
Prereq: Acceptance into Athletic Training program
Overview of medical emergencies and other critical incidents that may occur. Evaluate and manage patients with acute conditions including triaging conditions and internal/external hemorrhage. Cardiac, respiratory, and cervical spine compromise. Conditions related to environment, fractures, dislocations, and wound care and closure. Concussion/brain injury with consideration of established protocols including: comprehensive examination, recognition, and treatment, implementation of a plan of care, referral, and return to participation.

A TR 505: Therapeutic Modalities and Clinical Interventions
(2-2) Cr. 3. F.
Prereq: A TR 502, A TR 520, acceptance into Athletic Training program
Knowledge and skills to utilize a variety of therapeutic modalities. Detailed understanding of the psychological and physiological process of pain, healing and a problem-based approach to apply theories, principles, and techniques of thermal, electrical, mechanical, light, and alternative therapies (laser, cryotherapy). Incorporation interventions (for pre-, post-, and non-surgical conditions) designed to address a patients’ identified impairments, activity limitations, injuries, and participation restrictions. Home care to include self-treatment, soft tissue techniques.
A TR 509: Athletic Training Clinical Education I
Cr. 1. SS.
Prereq: Acceptance into Athletic Training program
Clinical experiences under the direct supervision of a clinical preceptor. Techniques and clinical skills provided in both the clinical and classroom settings including: Special Olympics, emergency department rotation, environmental conditions, off season practice and conditioning sessions, biometrics/physiological monitoring systems and translation of data into effective preventative measures, clinical interventions, and performance enhancement. Offered on a satisfactory-fail basis only.

A TR 510: Evaluation Methods and Treatment Techniques - Lower Body
(2-2) Cr. 3. F.
Prereq: A TR 502, A TR 520, acceptance into Athletic Training program
Proper methods of musculoskeletal evaluation of the lower extremity. Evaluate and manage patient(s) with acute conditions including triaging conditions that are life threatening or otherwise emergent. Obtain a medical history, proper methods of documentation, patient overview (including ICF model), identification of comorbidities, assessment of function, selection and use of special tests and measures assessing patient’s clinical presentation, clinical practice decisions, evaluation of all results to determine a plan of care, including referral when warranted. Selection and incorporations of interventions designed to address a patient’s identified impairments, activity limitations, and participation restriction.

A TR 513: Evaluation Methods and Treatment Techniques - Upper Body
(3-0) Cr. 3. S.
Prereq: A TR 510, A TR 521, acceptance into Athletic Training program
Proper methods of musculoskeletal evaluation of the upper extremity including spine. Evaluate and manage patient(s) with acute conditions. Obtaining a medical history, methods of documentation, assessment of function, selection and use of special tests and measures assessing patient’s clinical presentation, determine a plan of care, including referral when warranted. Selection and incorporations of interventions designed to address a patient’s identified impairments, activity limitations, and participation restrictions, using ICF model for clinical practice decisions. Review of concussion evaluation, protocols, and return to play following a head injury/concussion.

A TR 515: Evidence-based Practice in Athletic Training
(2-0) Cr. 2. SS.
Prereq: A TR 522, A TR 545, acceptance into Athletic Training program
Principles of evidence-based practice, search for evidence, grading and evaluating literature. Use of systems of quality assurance and improvement to enhance patient care, search, retrieve, and incorporating the use of contemporary principles and practices information from health informatics for clinical decisions and communication with patients/clients, family members, coaches, administrators, other healthcare providers, consumers, payors, and/or policy makers. Use of the International Classification of Functioning, Disability, and Health (ICF) as a framework for delivery and communication about patient care.

A TR 519: Athletic Training Clinical Education II
Cr. 3. F.
Prereq: A TR 510, A TR 521, acceptance into Athletic Training program
Clinical experiences under the supervision of a clinical preceptor with client/patient populations in competitive, recreational, individual and team activities, with foundational behaviors of professional practice. Real client/patient interactions as well as assessment of clinical component procedures and policies. Clinical hours occur in a variety of settings with patients and the student will complete the clinical hours that may extend prior to and/or beyond the academic semester end date. Clinical opportunities provide a basis for evaluating the athletic training student’s clinical progression through the program. Offered on a satisfactory-fail basis only.

A TR 520: Athletic Training Seminar A - An Introduction to Athletic Training
(1-0) Cr. 1. SS.
Prereq: Acceptance into Athletic Training program
Introduction to athletic training program and an overview of policies and procedures, and program handbook. History of athletic training, professional domains, electronic health records, ethics, cultural competence, social justice, HIPPA, and FERPA confidentiality, and professionalism.

A TR 521: Athletic Training Seminar B - Diagnostic Imaging and Lab Principles
(1-0) Cr. 1. F.
Prereq: A TR 502, A TR 520, acceptance into Athletic Training program
Procedures on obtaining via the appropriate physician and medical staff the necessary and appropriate diagnostic tests or labs to facilitate diagnosis, referral, and treatment planning. Using evidence to inform practice and utilize systems of quality assurance and improvement to enhance patient care. Communicate and collaborate with other medical interprofessionals including radiologists, x-ray technicians, medical laboratory scientists and clinical lab technicians for best patient care and outcomes.
A TR 522: Athletic Training Seminar C - Interprofessional Collaboration and Leadership
(1-0) Cr. 1. S.
Prereq: A TR 510, 521, acceptance into Athletic Training program
Explore other allied health care professions and interprofessional collaboration for optimal patient care and referral. Total patient care and how different professions can impact the care will be explored and discussed. Participation in roundtable discussions with other interprofessional health professions and students are exposed to foundational behaviors of professional practice including but not limited to: communication, work/family balance, ethics, mentorship, leadership, professional involvement, and promotion of the profession.

A TR 523: Athletic Training Seminar D - Advanced Topics in Athletic Training
(1-0) Cr. 1. SS.
Prereq: A TR 522, A TR 545, acceptance into Athletic Training program
Advanced clinical experiences and specialty training and exposure to cupping, ART, Graston, or ASTM technique for soft tissue mobilization and dry needling. Case study analysis utilizing previous coursework including individual self-assessment of clinical skills. Extra course fee may be needed to cover the cost of training.

A TR 524: Athletic Training Seminar E - Professional Development in Athletic Training
(2-0) Cr. 1. S.
Prereq: A TR 515, A TR 550, and permission of the Athletic Training Program Director
Assess the athletic training students' mastery of knowledge and clinical skills in athletic training, prepare students for employment, continuing education, and self-assessment. Utilizes a case study approach covering all of the domains of athletic training and demonstrates interprofessional and interdisciplinary connections. Review of all of the athletic training domains via specific exams (written, simulation and computer based) will be utilized to prepare the student to challenge the BOC examination.

A TR 529: Athletic Training Clinical Education III
Cr. 3. S.
Prereq: A TR 510, A TR 521, A TR 519, acceptance into Athletic Training program
Clinical experiences under the supervision of a clinical preceptor with client/patient populations in competitive, recreational, individual and team activities, high and low intensity activities with foundational behaviors of professional practice. Real client/patient interactions as well as assessment of clinical component procedures and policies. Clinical hours occur in a variety of settings with patients and the student will complete the clinical hours that may extend prior to and/or beyond the academic semester end date. Clinical opportunities provide a basis for evaluating the athletic training student's clinical progression through the program. Offered on a satisfactory-fail basis only.

A TR 539: Athletic Training Clinical Education IV
Cr. 1. SS.
Prereq: A TR 522, A TR 545, A TR 529, acceptance into Athletic Training program
General medicine clinical experiences under the direct supervision of a clinical preceptor. Advanced issues in the athletic training profession with emphasis on practical application and professional development, and collaboration with other health care professionals. Utilization of evidenced based research and approaches to clinical practice with emphasis placed on lab reports, imaging results, life-span issues, and diverse patient populations including non-sport client/patient populations, different sexes and throughout the lifespan (pediatric, adult, elderly). Foundational behaviors of professional practice and emphasis will focus on evaluation, treatment, rehabilitation, and clinical skills. Offered on a satisfactory-fail basis only.

A TR 545: Therapeutic Exercise and Rehabilitation Interventions
(2-2) Cr. 3. S.
Prereq: A TR 510, A TR 521, acceptance into Athletic Training program
Therapeutic and corrective exercise, joint mobilization, soft tissue techniques, movement training (including gait training), motor control/ proprioceptive activities, task-specific functional training, home and self-care including self-treatment and exercise, cardiovascular training. Pre-, post-, and non-surgical conditions and addressing activity limitations, patient goals, participation restrictions, quality assurance and quality improvement, patient reported outcomes, and return to play guidelines.
A TR 549A: Athletic Training Clinical Education Study Abroad: Preparing for the Experience
Cr. 1. S.
Prereq: In addition to the study abroad application requirements, students must be accepted into their intended program, junior classification or graduate student majoring in Athletic Training, minimum GPA of 3.0, and completion of A TR 220, or A TR 228 and A TR 229.
Preparation for a study abroad experience that is focused on the discipline of athletic training in another country. Pre-travel for A TR 549B study abroad experience.
Meets International Perspectives Requirement.

A TR 549B: Athletic Training Clinical Education Study Abroad
Cr. 2. SS.
Prereq: Accepted to study abroad by the A TR Program Director and passing A TR 549A.
First-person perspective into the athletic training profession in another country as well as provide enrichment experiences related to the history and culture of that country. Follow-up course and experience of one credit A TR 549A which was intended to prepare the student for the study abroad experience.
Meets International Perspectives Requirement.

A TR 550: Pharmacological Issues in Athletic Training
(2-0) Cr. 2. SS.
Prereq: A TR 522, A TR 545, acceptance into Athletic Training program
General medical and pharmacological issues generally found in the field of athletic training. Medications used to treat medical conditions and the ability to educate patients regarding appropriate pharmacological agents for the management of their condition, including indications, contraindications, dosing, interactions, and adverse reactions. Administration of medications by the appropriate route upon the order of a physician or other provider with legal prescribing authority. Educate clients/patients about effects, participation consequences, risks of misuse and abuse of alcohol, performance-enhancing drugs/substances; and over the counter, prescription and recreational drugs including drug testing policies and procedures.

A TR 559: Athletic Training Clinical Education V
Cr. 5. F.
Course monitors student progression of athletic training proficiencies, acquiring clinical skills under the direct supervision of a clinical preceptor. Field experience provides additional athletic training experiences and clinical responsibilities for a minimum of two 8 week rotations under the direct supervision of a clinical preceptor. Required to complete a minimum of 25 hrs per week of field clinical experience. Clinical experience may extend beyond the academic semester end date and the clinical hours are a component of this course. Offered on a satisfactory-fail basis only.

A TR 560: General Medical and Behavioral Health Issues
(3-0) Cr. 3. SS.
Prereq: A TR 522, A TR 545, acceptance into Athletic Training program
Medical issues generally observed in the athletic training profession. Development and implementation of wellness strategies to mitigate the risk for long-term health conditions across the lifespan and in an active population. Topics including dermatology, mental illness, neurological disorders, pulmonary disease, respiratory infections, viral infections, autoimmune disorders, oncology, gastrointestinal conditions and sexually transmitted infections. Identify, refer, give support to patients with behavioral health conditions and interact with other healthcare providers.

A TR 569: Athletic Training Immersion Clinical Education VI
Cr. 5. S.
Prereq: Permission of Athletic Training Program Director
Cumulative clinical experience to gain a more in-depth experience in the field of athletic training. Student selects a field or site experience that meets their professional goals. Field experience is designed to provide immersive and additional athletic training experiences for a minimum of 10 weeks under the direct supervision of a certified athletic trainer. Site approved by the preceptor and A TR program director prior to beginning the immersion clinical experience. Required to complete a minimum of 25 hours per week of field experience. Clinical experience may extend beyond the academic semester end date and the clinical hours are a component of this course. Offered on a satisfactory-fail basis only.

A TR 570: Injury Intervention, Rehabilitation and Patient Care
(2-2) Cr. 3. F.
Prereq: A TR 515, A TR 550, A TR 560 and acceptance into Athletic Training program
Basic understanding of injury and sport psychology and its application to the overall health and well-being of athletic and general population clients. Psychological, social, socio-economical, and environmental factors that influence a client/patient and in their injury susceptibility, reaction, immediate care, and adherence to rehabilitation will be explored. Assessment and intervention techniques to promote and facilitate rehabilitation in a variety of professional settings and with patients from different backgrounds and social issues that may impact a patient. Overview of special populations (adolescent, female, special populations of athletes/physically active patients). Foundational behaviors of professional practice and working with other allied health care professionals in the overall health and well-being of a patient will be explored.
A TR 575: Athletic Training Organization and Administration
(3-0) Cr. 3. S.
*Prereq: Concurrently enrolled in A TR 569.*
Knowledge and skills necessary for the administration aspect of an athletic training program. Course content includes but is not limited to: PPEs, how to manage physical, human, and financial resources in the delivery of healthcare services. Discussion of patient and insurance management, working relationships with interprofessional members of the health care team, policies and procedures for guidance in the daily operation of athletic training services including EAP or other critical incidents (concussion or other brain injuries), patients in behavioral health crisis, record keeping, athletic training facility design, resume development, and administrative/leadership skills and mentoring.

Athletics (ATH)

Courses primarily for undergraduates:

ATH 101: Intercollegiate Athletics
Cr. 1. Repeatable, maximum of 4 credits. F.S.
*Prereq: Permission of head coach*
Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101B: Intercollegiate Athletics: Basketball (men)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
*Prereq: Permission of head coach*
Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101C: Intercollegiate Athletics: Basketball (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
*Prereq: Permission of head coach*
Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101D: Intercollegiate Athletics: Cross Country (men)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
*Prereq: Permission of head coach*
Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101E: Intercollegiate Athletics: Cross Country (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
*Prereq: Permission of head coach*
Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101F: Intercollegiate Athletics: Football (men)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
*Prereq: Permission of head coach*
Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101G: Intercollegiate Athletics: Golf (men)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
*Prereq: Permission of head coach*
Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101J: Intercollegiate Athletics: Gymnastics (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
*Prereq: Permission of head coach*
Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101K: Intercollegiate Athletics: Softball (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
*Prereq: Permission of head coach*
Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101M: Intercollegiate Athletics: Swimming/Diving (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
*Prereq: Permission of head coach*
Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.
ATH 101O: Intercollegiate Athletics: Tennis (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101P: Intercollegiate Athletics: Track and Field (men)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101Q: Intercollegiate Athletics: Track and Field (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101R: Intercollegiate Athletics: Volleyball (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101S: Intercollegiate Athletics: Wrestling (men)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101T: Intercollegiate Athletics: Golf (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101U: Intercollegiate Athletics: Soccer (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

Biochemistry, Biophysics, and Molecular Biology (BBMB)

Any experimental courses offered by BBMB can be found at:
registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

BBMB 101: Introduction to Biochemistry
(1-0) Cr. 1. F.
Foundational principles of the molecules and chemistry of life, including structure and function of biological molecules: protein, lipids, nucleic acids, and carbohydrates. Survey of modern biotechnology frontiers. For students majoring in Biochemistry or Biophysics or considering one of these majors.

BBMB 102: Introduction to Biochemistry Laboratory
(0-2) Cr. 1. S.
Prereq: Credit or enrollment in CHEM 177 and CHEM 177L or CHEM 201 and CHEM 201L
Topics in the scientific background of biochemistry, such as macromolecules, metabolism, and catalysis. Laboratory experimentation covers biochemical concepts and the study of bio-molecules including proteins, lipids and nucleic acids. A significant component is practice in scientific communication. For students majoring in biochemistry, agricultural biochemistry or biophysics or considering one of these majors.

BBMB 110: Biochemistry Learning Community Orientation
Cr. 1. F.
Prereq: Co-enrollment with BBMB 101 highly recommended.
Biochemistry & Biophysics Learning Community serving an overview of the program of study, academic planning, and university resources. Survey of careers and research in biotechnology and medicine. Introductions to ISU research and faculty. Offered on a satisfactory-fail basis only.
BBMB 111: Biochemistry Learning Community
Cr. 1. S.
Prereq: Enrollment in BBMB102 is highly recommended.
Biochemistry & Biophysics Learning Community serving an overview of career-development and research resources, including research opportunities, internships, lab skills, and leadership roles. Introductions to ISU research and faculty. Offered on a satisfactory-fail basis only.

BBMB 120: The Biochemistry of Beer
(Cross-listed with FS HN). (2-0) Cr. 2. F.
An introduction to the major classes of biomolecules, basic biochemical concepts, enzymology, metabolism and genetic engineering as they apply to the production and flavor of beer. All aspects of the biochemistry of beer will be covered, including the malting of barley, starch conversion, yeast fermentation and the chemical changes that occur during the aging of beer. Intended for non-majors. Natural science majors are limited to elective credit only.

BBMB 120L: Biochemistry of Beer Laboratory
(Cross-listed with FS HN). Cr. 1.
Prereq: Credit or enrollment for credit in BBMB 120
An introduction to biochemical methods related to the production of beer. Laboratory exercises related to water chemistry, mash enzymology, hop compound extraction and analysis, and yeast biology will be performed. Closely follows the material being taught in BBMB 120. Natural science majors are limited to elective credit only.

BBMB 121: Medicines, Drugs and You
Cr. 2. S.
Prereq: One year of high school chemistry or CHEM 50 and biology.
An introduction to how medicines treat disease, what drug molecules look like, how they function, how they can be toxic, modern therapeutics ranging from over-the-counter pain relievers, antibiotics and anti-depressants, to anti-cancer chemotherapies. The differences between drugs and supplements. Intended for students of all majors.

BBMB 201: Chemical Principles in Biological Systems
(2-0) Cr. 2. S.
Prereq: Credit or enrollment in CHEM 332
Survey of chemical principles as they apply to biological systems including: water, organic chemistry of functional groups in biomolecules and biochemical cofactors, weak bonds and their contribution to biomolecular structure, oxidation-reduction reactions and redox potential, thermodynamic laws and bioenergetics, chemical equilibria and kinetics, inorganic chemistry in biological systems, data presentation. The subjects will be taught using molecules from biological systems as examples. Intended for majors in biochemistry, biophysics or agricultural biochemistry.

BBMB 221: Structure and Reactions in Biochemical Processes
(3-0) Cr. 3. F.S.
Prereq: CHEM 163, CHEM 167, or CHEM 177
Fundamentals necessary for an understanding of biochemical processes. Primarily for students in agriculture. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry. Credit for both BBMB 221 and Chem 231 may not be applied toward graduation.

BBMB 301: Survey of Biochemistry
(3-0) Cr. 3. S.S.
Prereq: CHEM 231 or CHEM 331
A survey of biochemistry: structure and function of amino acids, proteins, carbohydrates, lipids, and nucleic acids; enzymology; metabolism; biosynthesis; and selected topics. Course offered online. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry.

BBMB 303: General Biochemistry
Cr. 3. F.
Prereq: CHEM 331 or equivalent
Survey of biochemistry: structure and function of amino acids, proteins, carbohydrates, lipids and nucleic acids; enzyme activity; metabolism; DNA replication; RNA transcription; protein translation; with case studies examining industrial uses. Not acceptable for a credit towards a major in biochemistry, biophysics or agricultural biochemistry. Only one of 301, 303(X), or 316 may count toward graduation.

BBMB 312: Experimental Research Skills in Biochemistry
Cr. 2. F.S.
Prereq: BBMB 102; credit or concurrent enrollment in CHEM 178 or CHEM 201
Inquiry-based introduction to biochemical techniques such as protein purification, enzymatic assays, solution preparation, hypothesis formation and testing, data analysis, high-throughput methodology, research record keeping, technical writing and scientific communication.

BBMB 316: Principles of Biochemistry
(3-0) Cr. 3. F.S.
Prereq: CHEM 231 or CHEM 331; BIOL 212; BIOL 313 and BIOL 314 strongly recommended.
Understanding biological systems at the molecular level; chemistry of biological macromolecules, enzyme function and regulation, metabolic pathways; integration of metabolism in diverse living systems. For students in biology and related majors who do not require the more rigorous treatment of biochemistry found in BBMB 404/405. Course offered online. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry.
BBMB 404: Biochemistry I
(3-0) Cr. 3. F.S.S.
Prereq: CHEM 332, BIOL 313, BIOL 314 strongly recommended
A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical and nutritional sciences. First semester of a two-semester series with BBMB 405. Chemistry of amino acids, proteins, carbohydrates, and lipids, vitamins; protein structure and function; enzymology; carbohydrate metabolism. Credit for both BBMB 420 and the BBMB 404 - 405 sequence may not be applied toward graduation.

BBMB 405: Biochemistry II
(3-0) Cr. 3. F.S.S.
Prereq: BBMB 404
A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical, and nutritional sciences. Metabolism of carbohydrates, amino acids, nucleotides and lipids; formation, turnover, and molecular relationships among DNA, RNA, and proteins; genetic code; regulation of gene expression; selected topics in the molecular physiology of plants and animals. Course available online. Credit for both BBMB 420 and the BBMB 404 - BBMB 405 sequence may not be applied toward graduation.

BBMB 411: Techniques in Biochemical Research
(2-8) Cr. 4. F.
Prereq: Credit or enrollment in BBMB 404 or BBMB 504 and BBMB 505; CHEM 211
Laboratory experimentation and techniques for studying biochemical, including: chromatographic methods; electrophoresis; spectrophotometry; enzyme purification; enzyme kinetics; and characterization of carbohydrates, proteins, lipids, and nucleic acids. Scientific communication and technical writing are emphasized.

BBMB 420: Mammalian Biochemistry
(3-0) Cr. 3. F.
Prereq: CHEM 332, BIOL 314
Structure and function of proteins; enzymology; biological oxidation; chemistry and metabolism of carbohydrates, lipids, amino acids and nucleic acids; protein synthesis and the genetic code; relationship of biochemistry to selected animal diseases. Biochemistry of higher animals emphasized. Not acceptable for credit toward a major in agricultural biochemistry or biochemistry. Acceptable for credit toward a major in biophysics. Credit for both BBMB 420 and the BBMB 404 - 405 sequence may not be applied toward graduation.

BBMB 430: Procaryotic Diversity and Ecology
(Dual-listed with BBMB 530). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: MICRO 302, MICRO 302L
Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

BBMB 440: Laboratory in Microbial Physiology, Diversity, and Genetics
(Cross-listed with MICRO). (2-6) Cr. 4. F.S.
Prereq: MICRO 302, MICRO 302L, CHEM 332, BIOL 313L
Fundamental techniques and theory for studying the cellular mechanisms, genetic processes and diversity of microbial life. Experimental techniques will include isolation and physiological characterization of bacteria that inhabit different environments as well as an emphasis on genetic and molecular techniques to understand antibiotic resistance processes and mechanisms. Also included are techniques for phylogenetic characterization, measuring gene expression, and genetic manipulation of bacteria. Essential components for the effective communication of scientific results are also emphasized.

BBMB 445: Molecular Signaling
(Dual-listed with BBMB 545). (2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: BBMB 405 or BBMB 420; or BBMB 506 and BBMB 507
Molecular mechanisms of cellular signaling including receptor activation, desensitization and cross talk, signal transduction pathways, nuclear receptors, growth factor and extracellular matrix activators, protein kinases, caspase and transcription factor downstream signals, and lipids, gases and cyclic nucleotides as regulators of cell signaling. Course content includes current literature, student and instructor presentations and, for BBMB 545 students only, research proposal writing and review.

BBMB 461: Molecular Biophysics
(Dual-listed with BBMB 561). (2-0) Cr. 2. S.
Prereq: Credit or enrollment in MATH 166, CHEM 178, PHYS 232 or PHYS 132.
Physical methods for the study of molecular structure and organization of biological materials. X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy. Registration for the graduate credit commits the student to graduate-level examinations, which differ from undergraduate-level examinations in the number and/or difficulty of questions.

BBMB 490: Independent Study
Cr. 1-3. Repeatable. F.S.S.
Prereq: College of Agriculture: junior or senior classification and permission of instructor; College of Liberal Arts and Sciences: permission of instructor. Independent study with a faculty mentor. No more than 9 credits of BBMB 490 may count toward graduation.
BBMB 490H: Independent Study, Honors
Cr. 1-3. Repeatable. F.S.S.
Prereq: College of Agriculture: junior or senior classification and permission of instructor; College of Liberal Arts and Sciences: permission of instructor
Independent study with a faculty mentor. No more than 9 credits of BBMB 490 may count toward graduation.

BBMB 499: Undergraduate Research
Cr. 1-5. Repeatable. F.S.S.
Prereq: Permission of faculty member with whom student proposes to work.
Independent research under faculty guidance.

Courses primarily for graduate students, open to qualified undergraduates:

BBMB 504: Amino Acids and Proteins
(2-0) Cr. 2. F.S.
Prereq: CHEM 332 or equivalent
Protein structure and chemistry including protein folding, examples of enzyme functions and mechanisms, methods of protein expression, purification, and analysis, and elementary enzyme kinetics.

BBMB 505: Bioenergetics and Metabolism
(2-0) Cr. 2. F.
Prereq: CHEM 211, CHEM 332; a previous course in biochemistry is strongly recommended
Examination of catabolic pathways involved in the oxidation of organic and inorganic molecules, and energy metabolism involving inputs from light or other non-light sources. Central metabolism and glycolysis, fermentation, aerobic and anaerobic respiration, photosynthesis.

BBMB 506: Membrane Biochemistry
(2-0) Cr. 2.
Prereq: CHEM 332 or equivalent
Analysis of the structure, function, and synthesis of membranes. Bacterial and eukaryotic membrane characteristics. Membrane transport and signaling mechanisms. Analysis of the structure and function of lipids and membrane proteins.

BBMB 507: Biochemistry of Nucleic Acids
(2-0) Cr. 2. S.
Prereq: CHEM 332 or equivalent
Analysis of the chemical structure, function, synthesis, and metabolism of nucleic acids. Chemical characterization of nucleotides, polynucleotides, DNA, and RNA. Analysis of transcription, translation, and the genetic code.

BBMB 510: Molecular Biology and Biochemistry of RNA
(2-0) Cr. 2. F.
Prereq: BIOL 313, BBMB 405, BBMB 502, BBMB 506 and 507 or Gen 409, or equivalent
Biochemical processes that define structure and function of nucleic acids. Emphasis on the molecular processes that take place during synthesis, processing, and function of different RNA species; review of recent advances in RNA research.

BBMB 530: Procaryotic Diversity and Ecology
(Dual-listed with BBMB 430). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: MICRO 302, MICRO 302L
Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

BBMB 532: Enzyme Kinetics and Mechanisms
Cr. 2. Alt. S., offered odd-numbered years.
Prereq: BBMB 504
Advanced concepts of enzyme kinetics and catalysis. Experimental methods for determining kinetic and chemical reaction mechanisms. Enzyme structure/function relationships and the role of dynamics in catalysis.

BBMB 542A: Introduction to Molecular Biology Techniques: DNA Techniques
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.
Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

BBMB 542B: Introduction to Molecular Biology Techniques: Protein
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, VDPAM). Cr. 1. Repeatable. S.SS.
Prereq: Graduate classification
Techniques. Includes: fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, Immunophenotyping, and monoclonal antibody production. Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

BBMB 542C: Introduction to Molecular Biology Techniques: Cell Techniques
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.
Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.
BBMB 542D: Introduction to Molecular Biology Techniques: Plant Transformation
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.
Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. Offered on a satisfactory-fail basis only.

BBMB 542E: Introduction to Molecular Biology Techniques: Proteomics
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.
Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only.

BBMB 542F: Introduction to Molecular Biology Techniques: Metabolomics
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.
Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only.

BBMB 542G: Introduction to Molecular Biology Techniques: Genomic
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.
Offered on a satisfactory-fail basis only.

BBMB 545: Molecular Signaling
(Dual-listed with BBMB 445). (2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: BBMB 405 or BBMB 420; or BBMB 506 and BBMB 507
Molecular mechanisms of cellular signaling including receptor activation, desensitization and cross talk, signal transduction pathways, nuclear receptors, growth factor and extracellular matrix activators, protein kinases, caspase and transcription factor downstream signals, and lipids, gases and cyclic nucleotides as regulators of cell signaling. Course content includes current literature, student and instructor presentations and, for BBMB 545 students only, research proposal writing and review.

BBMB 5461: Laboratory in Molecular Biophysics
(1-3) Cr. 2. S.
Prereq: Credit or enrollment in BBMB 461/BBMB 561
Practice in methods of X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy as applied to macromolecules.

BBMB 569: Structural Bioinformatics
(Cross-listed with BCB, COM S, CPR E, GDCB). (3-0) Cr. 3. F.
Prereq: BCB 567, BBMB 316, GEN 409, STAT 430

BBMB 590: Special Topics
Cr. arr.
By arrangement.

BBMB 593: Workshop in Biochemistry and Biophysics
Cr. 1. Repeatable. F.S.
Prereq: Permission and signature of course administrator required.
Workshops in selected topics in biochemistry and biophysics. Credit in this course does not meet the requirement for advanced graduate electives in Biochemistry. Spring only: BBMB Undergraduate Research Symposium participation. Scheduled class meetings are required in addition to attending the symposium.

Courses for graduate students:

BBMB 615: Molecular Immunology
(Cross-listed with MICRO, V MPM). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: BBMB 405 or BBMB 506 and BBMB 507
Current topics in molecular aspects of immunology. T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control and activate immune function.
BBMB 661: Advanced Topics in Neuroscience  
(Cross-listed with GDCB, KIN, NEURO). (3-0) Cr. 3. Repeatable. Alt. S., offered even-numbered years.  
**Prereq:** NEURO 556 (or comparable course) or permission of instructor  
Students will present three journal articles and two overview lectures on topics in neuroscience that are related but outside of their own research interest.

BBMB 675: Nucleic Acid Structure and Function  
(2-0) Cr. 2. Alt. F., offered even-numbered years.  
**Prereq:** BBMB 405 or BBMB 506 and BBMB 507  
In-depth discussion of nucleic acid properties, structures and structure/function relationships. Interactions between nucleic acids and proteins will be emphasized.

BBMB 681: Advanced Seminar  
Cr. 1. Repeatable. F.S.  
**Prereq:** Permission of instructor  
Student presentations.

BBMB 682: Departmental Seminar  
Cr. R. F.S.  
**Prereq:** Permission of instructor  
Faculty, staff and invited guest research seminar.

BBMB 696: Research Seminar  
(Cross-listed with AGRON, FOR, GDCB, HORT, PLBIO). Cr. 1. Repeatable. Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only.

BBMB 698: Seminar in Molecular, Cellular, and Developmental Biology  
(Cross-listed with GDCB, MCDB, MICRO, V MPM). (2-0) Cr. 1-2. Repeatable.  
Student and faculty presentations.

BBMB 699: Research  
Cr. arr. Repeatable. F.S.  
**Prereq:** Permission of instructor

Bioinformatics and Computational Biology (BCB)  
Any experimental courses offered by BCB can be found at:
registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

BCB 490: Independent Study  
Cr. 1-5. Repeatable, maximum of 9 credits. F.S.SS.  
**Prereq:** Permission of instructor

Courses primarily for graduate students, open to qualified undergraduates:

BCB 523: Mathematical Modeling in Biology  
(Cross-listed with MATH). (3-0) Cr. 3. F.  
**Prereq:** required: MATH 266 or equivalent, recommended: MATH 265 or equivalent  
Introduction to mathematical techniques for modeling and simulation, parameter identification, and analysis of biological systems. Applications drawn from many branches of biology and medicine. Apply differential equations, difference equations, and dynamical systems theory to a wide array of biological problems.

BCB 544: Fundamentals of Bioinformatics  
(Cross-listed with COM S, CPR E, GDCB). (4-0) Cr. 4. Alt. F., offered odd-numbered years.  
**Prereq:** MATH 165 or STAT 401 or equivalent  
A practical, hands-on overview of how to apply bioinformatics to biological research. Recommended for biologists desiring to gain computational molecular biology skills. Topics include: sequence analysis, genomics, proteomics, phylogenetic analyses, ontology enrichment, systems biology, data visualization and emergent technologies.

BCB 546: Computational Skills for Biological Data  
(Cross-listed with EEOB). Cr. 3. F.  
**Prereq:** Graduate student status or permission of the instructor  
Computational skills necessary for biologists working with big data sets. UNIX commands, scripting in R and Python, version control using Git and GitHub, and use of high performance computing clusters. Combination of lectures and computational exercises.

BCB 567: Bioinformatics Algorithms  
(Cross-listed with COM S, CPR E). (3-0) Cr. 3.  
**Prereq:** COM S 228; COM S 230; credit or enrollment in BIOL 315, STAT 430  
Biology as an information science. A review of the algorithmic principles that are driving the advances in bioinformatics and computational biology.

BCB 568: Statistical Bioinformatics  
(Cross-listed with COM S, GDCB, STAT). (3-0) Cr. 3. S.  
**Prereq:** BCB 567 or (BIOL 315 and one of STAT 430 or STAT 483 or STAT 583), credit or enrollment in GEN 409  
Statistical models for sequence data, including applications in genome annotation, motif discovery, variant discovery, molecular phylogeny, gene expression analysis, and metagenomics. Statistical topics include model building, inference, hypothesis testing, and simple experimental design, including for big data/complex models.
BCB 569: Structural Bioinformatics
(Cross-listed with BBMB, COM S, CPR E, GDCB). (3-0) Cr. 3. F.
Prereq: BCB 567, BBMB 316, GEN 409, STAT 430

BCB 570: Systems Biology
(Cross-listed with COM S, CPR E, GDCB, STAT). (3-0) Cr. 3. S.
Prereq: BCB 567 or COM S 311, COM S 228, GEN 409, STAT 430 or STAT 483 or STAT 583

BCB 585: Fundamentals of Predictive Plant Phenomics
(Cross-listed with GDCB, M E). Cr. 4. F.
Principles of engineering, data analysis, and plant sciences and their interplay applied to predictive plant phenomics. Transport phenomena, sensor design, image analysis, graph models, network data analysis, fundamentals of genomics and phenomics. Multidisciplinary laboratory exercises.

BCB 590: Special Topics
Cr. arr. Repeatable.
Prereq: Permission of instructor

BCB 593: Workshop in Bioinformatics and Computational Biology
(1-0) Cr. 1. Repeatable. F.S.
Current topics in bioinformatics and computational biology. Lectures by off-campus experts. Students read background literature, attend preparatory seminars, attend all lectures, meet with lecturers.

BCB 598: Cooperative Education
Cr. R. Repeatable. F.S.S.
Prereq: Permission of the program chair
Off-campus work periods for graduate students in the field of bioinformatics and computational biology.

BCB 599: Creative Component
Cr. arr.

Courses for graduate students:

BCB 660: Selected Topics in Bioinformatics and Computational Biology
(3-0) Cr. 1-4. Repeatable, maximum of 4 times. F.S.S.
Prereq: Permission of Instructor
Topics of interest in the major research areas of computational molecular biology, including genomics, structural genomics, functional genomics, and computational systems biology.

BCB 690: Student Seminar in Bioinformatics and Computational Biology
Cr. 1. Repeatable. S.
Student research presentations.

BCB 691: Faculty Seminar in Bioinformatics and Computational Biology
(1-0) Cr. 1. Repeatable. Faculty research series.

BCB 693: Entrepreneurship for Graduate Students in Science and Engineering
(Cross-listed with AGRON, E E, ENGR, GENET, M E). (3-0) Cr. 1. Repeatable, maximum of 2 credits. F.S.
Prereq: Graduate student status and completion of at least one semester of graduate coursework.
Understanding key topics of starting a technology based company, from development of technology-led idea to early-stage entrepreneurial business. Concepts discussed include: entrepreneurship basics, starting a business, funding your business, protecting your technology/business IP. Subject matter experts and successful, technology-based entrepreneurs will provide real world examples from their experience with entrepreneurship. Learn about the world class entrepreneurship ecosystem at ISU and Central Iowa. Offered on a satisfactory-fail basis only.

BCB 697: Graduate Research Rotation
Cr. arr. Repeatable. F.S.S.
Graduate research projects performed under the supervision of selected faculty members in the Bioinformatics and Computational Biology major.

BCB 699: Research
Cr. arr. Repeatable.

Bioinformatics and Computational Biology (BCBIO)

Any experimental courses offered by BCBIO can be found at: registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:
BCBIO 110: BCBIO Orientation  
(1-0) Cr. 0.5. F.  
First 8 weeks. Orientation to the area of bioinformatics and computational biology. For students considering a major in BCBIO. Specializations and career opportunities. Offered on a satisfactory-fail basis only.

BCBIO 322: Introduction to Bioinformatics and Computational Biology  
(Cross-listed with BIOL, GEN). (3-0) Cr. 3. F.  
Prereq: BIOL 212  
Genome sequencing, assembly, structural and functional annotation, and comparative genomics. Investigating these topics will develop skills in programming and scripting (Perl and/or Python), the use of biological databases, sequence alignment, similarity search, identification of sequence patterns, construction of phylogenetic trees, and comparative genomics.

BCBIO 401: Bioinformatics of Sequences  
(Cross-listed with BIOL, COM S, GEN). (3-0) Cr. 3. F.  
Prereq: BCBIO 322, basic programming experience (e.g. COM S 127, COM S 227 or permission of instructor). MATH 160 or MATH 165; and STAT 101 or STAT 104; and MATH 166 or STAT 301.  
Application of computer science and statistics to molecular biology with a significant problem-solving component, including hands-on programming using Python to solve a variety of biological problems. String algorithms, sequence alignments, homology search, pattern discovery, genotyping, genome assembly, genome annotation, comparative genomics, protein structure.

BCBIO 406: Bioinformatics of OMICS  
(Cross-listed with BIOL, COM S, GEN). (3-0) Cr. 3. S.  
Prereq: BIOL 212  
Introduction to cutting edge OMICS analyses including transcriptome, proteome, metabolome, DNA-protein interactome, protein-protein interactome and methylome. Genomic analysis including transcriptome analysis, cancer genomics, comparative genomics, and regulatory network analysis.

BCBIO 423: Mathematical Modeling in Biology  
(Dual-listed with BCBIO 423). (Cross-listed with MATH). (3-0) Cr. 3. F.  
Prereq: required: MATH 266 or equivalent, recommended: MATH 265 or equivalent  
Introduction to mathematical techniques for modeling and simulation, parameter identification, and analysis of biological systems. Applications drawn from many branches of biology and medicine. Apply differential equations, difference equations, and dynamical systems theory to a wide array of biological problems.

BCBIO 442: Bioinformatics and Computational Biology Techniques  
(0.2-0.5) Cr. 0.5. Repeatable, maximum of 2 credits. S.SS.  
Prereq: BIOL 314 recommended  
Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. Offered on a satisfactory-fail basis only.

BCBIO 442A: Bioinformatics and Computational Biology Techniques: Sequence Database Searching  
(0.2-0.5) Cr. 0.5. Repeatable, maximum of 2 credits. S.SS.  
Prereq: BIOL 314 recommended  
Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. Offered on a satisfactory-fail basis only.

BCBIO 442B: Bioinformatics and Computational Biology Techniques: Protein Structure Databases, Visualization, and Prediction  
(0.2-0.5) Cr. 0.5. Repeatable, maximum of 2 credits. S.SS.  
Prereq: BIOL 314 recommended  
Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. Offered on a satisfactory-fail basis only.

BCBIO 442C: Bioinformatics and Computational Biology Techniques: Phylogenetic Analysis  
(0.2-0.5) Cr. 0.5. Repeatable, maximum of 2 credits. S.SS.  
Prereq: BIOL 314 recommended  
Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. Offered on a satisfactory-fail basis only.

BCBIO 442D: Bioinformatics and Computational Biology Techniques: Microarray Analysis  
(0.2-0.5) Cr. 0.5. Repeatable, maximum of 2 credits. S.SS.  
Prereq: BIOL 314 recommended  
Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. Offered on a satisfactory-fail basis only.
BCBIO 490: Independent Study
Cr. 1-5. Repeatable, maximum of 9 credits. F.S.SS.
Prereq: BCBIO 322, junior or senior classification, permission of instructor
Independent research projects for undergraduate students in bioinformatics and computational biology. Students in the College of Liberal Arts and Sciences may use no more than 9 credits of BCBIO 490 and 491 toward graduation.

BCBIO 491: Team Research Projects.
Cr. 1-5. Repeatable, maximum of 9 credits. F.S.SS.
Prereq: BCBIO 322, junior or senior classification, permission of instructor
Research projects in bioinformatics and computational biology done by teams of students. Students in the College of Liberal Arts and Sciences may use no more than 9 credits of BCBIO 490 and 491 toward graduation.

Biological/Pre-Medical Illustration (BPM I)

Any experimental courses offered by BPM I can be found at:
registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

BPM I 323: Scientific Illustration Principles and Techniques
(Cross-listed with ARTIS). (0-6) Cr. 3. Repeatable.
Prereq: DSN S 131, ARTIS 230, or equivalent, and 3 credits in biological sciences; or permission of the instructor
Studio basics and professional techniques in black & white, continuous tone, and color. Introduction to professional practice and principles of communicating science through art. Emphasis on tools, materials, and rendering.

BPM I 326: Illustration and Illustration Software
(Cross-listed with ARTIS). (0-6) Cr. 3. Repeatable.
Prereq: ARTIS 323/BPM I 323, or permission of the instructor
An introduction to digital illustration software. Application of painting, drawing and image making techniques using vector and raster based programs.

BPM I 327: Illustration as Communication
(Cross-listed with ARTIS). (0-6) Cr. 3.
Prereq: ARTIS 326/BPM I 326, or permission of the instructor
Investigation of illustration as a form of communication. Emphasis on problem solving, effective composition, and advancement of rendering skills.

BPM I 337: Application of Scientific Illustration Techniques
(Cross-listed with ARTIS). (0-6) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: ARTIS 327
Rendering techniques applied to different types of biological and scientific subjects emphasizing communication. The use of traditional and digital media. Term project required.

BPM I 395: Field Illustration
Cr. 1-3. Repeatable, maximum of 6 credits. S.SS.
Prereq: Permission of instructor
A combination seminar and field trip course emphasizing nature interpretation, field sketching techniques and preparation of a final illustration based on field experience.

BPM I 398: Cooperative Education
Cr. R. F.S.SS.
Prereq: Permission of the program cooperative education coordinator, junior classification
Required of all cooperative education students. Students must register for these courses prior to commencing each work period.

BPM I 435I: Illustrating Nature I Sketching
(Cross-listed with IA LL). Cr. 2. SS.
Sketching plants, animals and terrain. Visual communication, development of a personal style, and integration of typographic and visual elements on a page will be emphasized.

BPM I 436I: Illustrating Nature II Photography
(Cross-listed with IA LL). Cr. 2. SS.
Beginning to intermediate technical and compositional aspects of color photography of natural areas and their plants and animals.

BPM I 490: Independent Study
Cr. 1-3. Repeatable, maximum of 3 credits.
Prereq: Written approval of instructor and advisory committee chair on required form in advance of semester of enrollment

BPM I 491: Portfolio Design and Professional Development
Cr. 2. S.
Prereq: BPMI 337, junior or senior classification in the BPMI curriculum.
Portfolio and professional preparation including identity package development, writing and speaking. Career-readiness, professional practice, leadership, networking, exploring research subfields within scientific visualization. Creating print and digital visual materials, learning approaches for entering the field, and developing business practice skills. Final portfolio materials presented at the end of the term.

BPM I 494: Special Topics in Illustration
Cr. 1-3. Repeatable.
Intensive exploration of illustration techniques in a studio or field setting.
BPM I 497: Illustration Internship
Cr. 1-6. Repeatable, maximum of 6 credits.
Prereq: Junior or senior classification in BPM I, written approval of supervising instructor and advisory committee chair on required form in advance of semester of enrollment
Offered on a satisfactory-fail basis only.

Biology (BIOL)

Any experimental courses offered by BIOL can be found at:
registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

**BIOL 101: Introductory Biology**
(3-0) Cr. 3. F.S.S.
Life considered at cellular, organism, and population levels. Function and diversity of the living world. Presentation of basic biological principles as well as topics and issues of current human interest. Does not satisfy biology major requirements.

**BIOL 110: Biology Major Orientation**
Cr. 1. F.
Student orientation to the Biology program. Introduction to degree requirements, university policies and deadlines, campus resources, academic success strategies, degree planning, and registration procedures. Community building through the Biology Education Success Teams Learning Community. Required for first-year direct from high school Biology majors. Offered on a satisfactory-fail basis only.

**BIOL 111: Opportunities in Biology**
(1-0) Cr. 0.5. S.
Prereq: Direct-from-high school students only
Orientation to opportunities in Biology. Introduction to biological science disciplines, career awareness, and professional development opportunities. Required for first-year direct from high school Biology majors. Offered on a satisfactory-fail basis only.

**BIOL 112: Transfer Student Orientation**
Cr. 1. F.S.
Prereq: Serves: Internal and external transfer students (emphasis on external transfers)
Orientation to the Biology major for students transferring from other academic institutions. Reviews university resources, academic success strategies, degree requirements, opportunities for campus involvement, and professional development. Required for all new transfer students and recommended for major changes. Online with on-campus activities. Offered on a satisfactory-fail basis only.

**BIOL 155: Human Biology**
(3-0) Cr. 3. F.S.
A survey course of human biology, including principal structures and functions of the body systems and the diseases and disorders associated with them. Designed to meet general education requirements in natural science. Not recommended for those seeking a career in the allied health professions or for students majoring in life science. Does not satisfy biology major requirements.

**BIOL 173: Environmental Biology**
(Cross-listed with ENV S). (3-0) Cr. 3. F.S.
An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Does not satisfy biology major requirements.

**BIOL 201: Introduction to Environmental Issues**
(Cross-listed with ENSCI, ENV S). (2-0) Cr. 2. F.
Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

**BIOL 204: Biodiversity**
(Cross-listed with ENV S). (4-0) Cr. 2. S.
Prereq: One course in life sciences
Survey of the major groups of organisms and biological systems. Definition, measurements, and patterns of distribution of organisms. Sources of information about biodiversity. Does not satisfy biology major requirements. Half semester course.

**BIOL 211: Principles of Biology I**
(3-0) Cr. 3. F.S.
Prereq: High school biology
Introduction to the nature of life, including the diversity of microbial, plant, and animal life; the nature of heredity; evolution; and principles of ecology. Intended for life science majors.

**BIOL 211L: Principles of Biology Laboratory I**
(0-3) Cr. 1. F.S.
Prereq: Credit or enrollment in BIOL 211
Laboratory to accompany 211.

**BIOL 212: Principles of Biology II**
(3-0) Cr. 3. F.S.
Prereq: High School Biology; high school chemistry or credit or enrollment in CHEM 163 or CHEM 177
Introduction to the chemical, molecular, and cellular basis of life; form and function of microbial, plant, and animal life. Intended for life science majors.
BIOL 212L: Principles of Biology Laboratory II
(0-3) Cr. 1. F.S.
Prereq: credit or enrollment in BIOL 212
Laboratory to accompany 212.

BIOL 251: Biological Processes in the Environment
(Cross-listed with ENSCI). (3-0) Cr. 3. S.
Principles of Biology from the level of macromolecules to the biosphere.
Biological processes that affect environmental systems: including metabolism, energy pathways, biochemical reactions in cells, plant and microbial structure and function, element and water cycles.

BIOL 255: Fundamentals of Human Anatomy
(3-0) Cr. 3. F.
Prereq: High School Biology and Chemistry, or BIOL 101
An introduction to human anatomy, beginning with cells and tissues, surveying all body systems, relating form to function. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider Biol 351 for their anatomy background. Does not satisfy biology major requirements.

BIOL 255L: Fundamentals of Human Anatomy Laboratory
(0-3) Cr. 1. F.
Prereq: Credit or enrollment in BIOL 255
Investigation of human anatomy using models and dissections of preserved organs and model mammals. Pre-Medical students should consider 351 for their anatomy background. Does not satisfy biology major requirements.

BIOL 256: Fundamentals of Human Physiology
(3-0) Cr. 3. S.
Prereq: High School Biology and Chemistry, or BIOL 101, or BIOL 255 (recommended)
An introduction to human physiology, studying the function of all body systems. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic and immune, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider 355 for their physiology background. Does not satisfy biology major requirements.

BIOL 256L: Fundamentals of Human Physiology Laboratory
(0-3) Cr. 1. S.
Prereq: Credit or enrollment in BIOL 256
Student-conducted experiments investigating concepts of human physiology with computer data acquisition and analysis. Interpretation of experimental results and preparation of lab reports. Pre-Medical students should consider 335 for their anatomy and physiology background. Does not satisfy biology major requirements.

BIOL 307: Women in Science and Engineering
(Cross-listed with WGS, WISE). (3-0) Cr. 3. F.
Prereq: 200 level course in science, engineering or women’s studies; ENGL 250
The interrelationships of women and science and engineering examined from historical, sociological, philosophical, and biological perspectives. Factors contributing to under-representation; feminist critiques of science; examination of successful strategies. Does not satisfy biology major advanced credit requirements.

Meets U.S. Diversity Requirement

BIOL 312: Ecology
(Cross-listed with A ECL, ENSCI). (3-3) Cr. 4. F.S.S.
Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L
Fundamental concepts and principles of ecology dealing with organisms, populations, communities, and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

BIOL 313: Principles of Genetics
(Cross-listed with GEN). (3-0) Cr. 3. F.S.S.
Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L
Introduction to the principles of transmission and molecular genetics of plants, animals, and bacteria. Recombination, structure and replication of DNA, gene expression, cloning, quantitative genetics, and population genetics. Students may receive graduation credit for no more than one of the following: Gen 260, Gen 313 and 313L, Gen 320, Biol 313 and 313L, and Agron 320.

BIOL 313L: Genetics Laboratory
(Cross-listed with GEN). (0-3) Cr. 1. F.S.
Prereq: Credit or enrollment in BIOL 313
Laboratory to accompany 313. Students may receive graduation credit for no more than one of the following: Biol 313 and 313L, Gen 313 and 313L, Gen 320, and Agron 320.

BIOL 314: Principles of Molecular Cell Biology
(3-0) Cr. 3. F.S.
Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L
Integration of elementary principles of metabolism, bioenergetics, cell structure, and cell function to develop a molecular view of how the cell works.

BIOL 315: Biological Evolution
(3-0) Cr. 3. F.S.
Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L
The mechanisms of evolution. Topics in microevolution: population genetics, natural selection, genetic variation, and adaptation. Macroevolution: speciation, extinction, phylogeny, and major evolutionary patterns.
BIOL 322: Introduction to Bioinformatics and Computational Biology
(Cross-listed with BCBIO, GEN). (3-0) Cr. 3. F.
**Prereq:** BIOL 212
Genome sequencing, assembly, structural and functional annotation, and comparative genomics. Investigating these topics will develop skills in programming and scripting (Perl and/or Python), the use of biological databases, sequence alignment, similarity search, identification of sequence patterns, construction of phylogenetic trees, and comparative genomics.

BIOL 328: Molecular and Cellular Biology of Human Diseases
Cr. 3. F.
**Prereq:** BIOL 212
Survey of molecular, genetic, and cellular aspects of human diseases. Fundamental concepts of cell biology and how they are linked to the pathologies of different classes of human diseases. Recent scientific advances with an emphasis on new methods of diagnosis and treatment.

BIOL 335: Principles of Human and Other Animal Physiology
(3-0) Cr. 3. S.
**Prereq:** BIOL 211, BIOL 212
Introduction to physiology of metabolic function in mammals and other animals. Metabolic processes and their interactions with various subsystems, approached from an organismal perspective. Integration of cellular, gastrointestinal, cardiovascular, respiratory, and renal processes, relevant to their control and integration at the nervous and endocrine system levels. Functional aspects of organismal physiology, energy and water balances, physiology of rest exercise, and environmental stress.

BIOL 335L: Principles of Human and Other Animal Physiology Laboratory
(0-3) Cr. 1. S.
Optional laboratory to accompany Biology 335. Student-conducted experiments investigating concepts of physiology.

BIOL 336: Ecological and Evolutionary Animal Physiology
Cr. 3.
**Prereq:** BIOL 211, BIOL 212
Study of mechanisms by which animals perform life-sustaining functions; the evolution and adaptive significance of physiology traits, the diversity of physiological mechanisms, and how physiology and ecology interact.

BIOL 344: Human Reproduction
(Cross-listed with WGS). (3-0) Cr. 3. Alt. S., offered even-numbered years.
**Prereq:** BIOL 212
Biology of human reproduction, including reproductive systems, hormones, and endocrinology of pregnancy, presented from a clinically-oriented perspective. Reviews health-related conditions such as infertility, sexually-transmitted diseases, and complicated pregnancy.

BIOL 349: The Genome Perspective in Biology
(Cross-listed with GEN). (2-2) Cr. 3. S.
**Prereq:** GEN 313 or GEN 320
Analysis of genome, RNA, and protein data using computer technology to answer biological questions on topics ranging from microbial diversity to human health. An introduction for students in the life sciences to the fields of genomics, bioinformatics and systems.

BIOL 350: Comprehensive Human Anatomy
(3-3) Cr. 4. F.
**Prereq:** Credit in BIOL 211 and BIOL 212
Comprehensive survey of human anatomy, emphasizing structural and functional relationships of major organ systems. Compartmental study of normal anatomy; practical clinical application of anatomical regions. Laboratory using 3-dimensional software to study anatomy in augmented reality. Recommended for pre-medical and pre-health professional students.

BIOL 351: Comparative Chordate Anatomy
(3-4) Cr. 5. S.
**Prereq:** BIOL 212, junior classification
The evolution of chordates as reflected in the anatomy of extinct and living forms. Lecture topics include the history and diversity of chordates, comparisons of anatomic structures among major groups, and the adaptive significance of anatomic structures. Laboratory involves dissection of representative species.

BIOL 352: Vertebrate Histology
(3-3) Cr. 4. Alt. S., offered odd-numbered years.
**Prereq:** BIOL 212
Microanatomy of animal cells, tissues, and organs; histology from a functional perspective; ultra-structure of cells, the four primary tissues, and different anatomical organs, focusing on function and clinical significance.

BIOL 353: Introductory Parasitology
(Cross-listed with MICRO, V PTH). (3-0) Cr. 3. S.
**Prereq:** BIOL 212
Biology and host-parasite relationships of major groups of animal parasites, and techniques of diagnosing and studying parasites.

BIOL 354: Animal Behavior
(3-0) Cr. 3. F.
**Prereq:** BIOL 212
Ethological and sociobiological approaches to animal behavior. Genetic and developmental aspects of behavior, biological rhythms, orientation (including navigation, migration), communication, and social behavior (mating, aggression, parental care).
BIOL 354L: Laboratory in Animal Behavior
(0-3) Cr. 1. F.
Prereq: Credit or enrollment in BIOL 354
Laboratory techniques for observation, description and analysis of animal activities; independent projects.

BIOL 355: Plants and People
(3-0) Cr. 3. S.
Prereq: Credit in BIOL 211 and BIOL 211L
Uses of plants and fungi by humans and the importance of plants in the past, present, and future. Discussion of fruits, vegetables, grains, herbs, spices, beverages, oils, fibers, wood, medicines, and drugs, in the context of their agricultural, cultural, and economic roles in modern societies. Emphasis on origins and worldwide diversity of culturally important plants, their characteristics, and uses.

BIOL 356: Dendrology
(Cross-listed with FOR). (2-2) Cr. 3. F.
Prereq: BIOL 211
Identification and ecology of North American woody plant species. Importance of woody plants in timber production and wildlife habitat. Historical conditions of North American forest regions will also be addressed.

BIOL 357: Biology of Plants
Cr. 3. F.
Prereq: BIOL 211 and BIOL 212 (BIOL 211L and 212L recommended)
Study of the general biology of plants, including plant cells and functions, basic anatomy of tissues, meristems, and organs; adaptive morphological features. Review of processes of photosynthesis, respiration, basic plant metabolic functions, and plant reproduction. Survey of evolutionary aspects of all major groups of land plants, and relationships of plants to their environment. Intended for Biology and other life science undergraduate majors.

BIOL 358: Bee Biology, Management, and Beekeeping
(Cross-listed with ENT). (3-0) Cr. 3. F.
Prereq: Introductory (200-level) biology coursework or permission of an instructor
Bee diversity and evolution, ecology, role as pollinators, behavior, anatomy, and development. Management of bees as agricultural pollinators and honey producers, focusing on honey bees. Working with live bee hives and demonstration of practical beekeeping skills will occur during several field trips to local hives.

BIOL 364: Invertebrate Biology
Cr. 3-4. F.
Prereq: BIOL 211, 212
Emphasis on diversity, development, physiology, and behavior of invertebrate organisms- the “spineless wonders” of the world. Laboratory involves hands-on study and investigation of living invertebrates.

BIOL 365: Vertebrate Biology
(Cross-listed with A ECL). (3-2) Cr. 4. F.
Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L
Evolution, biology, and classification of fish, amphibians, reptiles, birds, and mammals. Emphasis on a comparative analysis of the structure and function of organ systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates.

BIOL 366: Plant Systematics
(2-4) Cr. 4. S.
Prereq: BIOL 211
Introduction to plant phylogenetic systematics, plant classification, survey of flowering plant families, and identification and field study of local plants.

BIOL 370: GIS for Ecology and Environmental Science
(Cross-listed with ENSCI). Cr. 1-6. Repeatable. F.S.
Prereq: Six credits in biological and/or physical sciences, and permission of instructor.
Introduction to geographic information systems (GIS) with emphasis on ecological and environmental applications. No prior GIS experience required. Guided, individualized study of topics based on student background and interest. For students with prior experience, topics and activities are selected to build upon any previous experience and minimize duplication to previous GIS coursework. Potential topics include: basic concepts of GIS, data structures, database management, spatial analysis, modeling and visualization of ecological and environmental data. Case studies in ecological and environmental applications using ArcGIS. Offered on a satisfactory-fail basis only.

BIOL 371: Ecological Methods
(Cross-listed with A ECL). (2-3) Cr. 3. F.
Prereq: A ECL 312; STAT 101 or STAT 104
Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations.
BIOL 381: Environmental Systems I: Introduction to Environmental Systems
(Dual-listed with EEOB 581). (Cross-listed with ENSCI, ENV S). Cr. 3-4. F.
Prereq: 12 credits of natural science including biology and chemistry
Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

BIOL 382: Environmental Systems II: Analysis of Environmental Systems
(Dual-listed with EEOB 582). (Cross-listed with ENSCI). (2-2) Cr. 3. S.
Prereq: ENSCI 381
Continuation of EnSci 381. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

BIOL 393: North American Field Trips in Biology
Cr. 1-4. Repeatable.
Prereq: Two courses in the biological sciences and by approval of application
Extended field trips, usually during break periods, to North American locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule.

BIOL 393A: North American Field Trips in Biology: Pre-trip Seminar
(1-0) Cr. 1. Repeatable.
Prereq: Two courses in the biological sciences and by approval of application
Discussion of relevant biological and cultural topics during semester preceding extended field trips to North American locations of interest to biologists.

BIOL 393B: North American Field Trips in Biology: North American Field trip
Cr. 1-3. Repeatable.
Prereq: Two courses in the biological sciences and by approval of application
Extended field trip under supervision of faculty member, usually during break periods, to North American locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule. Report required.

BIOL 394: International Field Trips in Biology
Cr. 1-4. Repeatable.
Prereq: Two courses in the biological sciences and by approval of application
Extended field trips, usually during break periods, to international locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule. Meets International Perspectives Requirement.

BIOL 394A: International Field Trips in Biology: Pre-trip Seminar
(1-0) Cr. 1. Repeatable.
Prereq: Two courses in the biological sciences and by approval of application
Discussion of relevant biological and cultural topics during semester preceding extended field trip to international locations of interest to biologists. Meets International Perspectives Requirement.

BIOL 394B: International Field Trips in Biology: Field Trip to International Location
Cr. 1-3. Repeatable.
Prereq: Two courses in the biological sciences and by approval of application
Extended field trips, under supervision of faculty member, usually during break periods, to international locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule. Meets International Perspectives Requirement.

BIOL 401: Bioinformatics of Sequences
(Cross-listed with BCBIO, COM S, GEN). (3-0) Cr. 3. F.
Prereq: BCBIO 322, basic programming experience (e.g. COM S 127, COM S 227 or permission of instructor). MATH 160 or MATH 165; and STAT 101 or STAT 104; and MATH 166 or STAT 301.
Application of computer science and statistics to molecular biology with a significant problem-solving component, including hands-on programming using Python to solve a variety of biological problems. String algorithms, sequence alignments, homology search, pattern discovery, genotyping, genome assembly, genome annotation, comparative genomics, protein structure.

BIOL 402: Introduction to Pathology
(Cross-listed with V PTH). (3-0) Cr. 3. F.
Prereq: BIOL 211 and BIOL 212 with labs
Introductory exploration of pathology as a medical discipline. This includes study of disease mechanisms via an introduction to general pathology topics (cell degeneration, necrosis, disturbances of growth, disturbances of blood flow, inflammation, neoplasia) and organ system-specific response to injury.

BIOL 406: Bioinformatics of OMICS
(Cross-listed with BCBIO, COM S, GEN). (3-0) Cr. 3. S.
Prereq: BIOL 212
Introduction to cutting edge OMICS analyses including transcriptome, proteome, metabolome, DNA-protein interactome, protein-protein interactome and methylome. Genomic analysis including transcriptome analysis, cancer genomics, comparative genomics, and regulatory network analysis.
BIOL 414: Life History and Reproductive Strategies
(Dual-listed with EEOB 514). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: BIOL 315 or equivalent recommended.
Evolution of ecological adaptations at the individual, population, and species level. Emphasis is on evolutionary mechanisms and adaptive strategies related to life histories and reproduction; age and size at maturity; lifespan and senescence; offspring size/number trade-offs; sex and mating systems; sex determination and sex ratios.

BIOL 421: Biological Principles of Aging
(Dual-listed with EEOB 521). (3-0) Cr. 3. SS.
Prereq: BIOL 211 and BIOL 212
Basic biological principles of aging. Course modules include an introduction to the aging process, body systems and normal aging, and environment and the biology of aging. In addition, disorders and diseases of aging, prevention and treatment and exercise and aging topics will be covered.

BIOL 423: Developmental Biology
(3-0) Cr. 3. S.
Prereq: BIOL 313
Principles of embryogenesis and animal development. Establishment of body axes, organ and limb development, and specification of cell fates. Emphasis on cell signaling and the control of gene expression within the context of a developing organism. Medically relevant subjects will be discussed, including stem cells, cancer biology, fertilization, and cloning.

BIOL 423L: Developmental Biology Laboratory
(0-3) Cr. 1. Repeatable, maximum of 4 times. S.
Prereq: Credit or enrollment in BIOL 423 or permission of the instructor.
Experiments and explorations illustrating fundamental principles of multicellular development.

BIOL 428: Cell Biology
(3-0) Cr. 3. S.
Prereq: BIOL 314
Cell structure and function in health and disease. Emphasis on cellular dynamics, transport, organelle biogenesis and signaling, and how defects in these processes disrupt cell function.

BIOL 430: Principles of Plant Physiology
(3-0) Cr. 3. S.
Prereq: BIOL 212; CHEM 231 or CHEM 332
An overview of classical and current concepts, principles, and approaches regarding the basic mechanisms of plant function underlying growth, development, and survival of plants. Topics covered include environmental and developmental signals, plant hormone action, signal transduction, mineral nutrition, water relations, metabolism, and photosynthesis.

BIOL 434: Endocrinology
(Dual-listed with EEOB 534). (3-0) Cr. 3. S.
Prereq: BIOL 211, BIOL 212
Chemical integration of vertebrate organisms. The structure, development, and evolution of the endocrine glands and the function and structure of their hormones.

BIOL 436: Neurobiology
(3-0) Cr. 3. F.
Prereq: BIOL 212
Basic principles of brain function and development. Signaling of nerve cells, synaptic transmission, structure/function of ion channels and receptors, memory and synaptic plasticity, movement and central control, sensation and sensory processing, construction of neural circuits, early brain development, complex brain functions in health and disease.

BIOL 451: Plant Evolution and Phylogeny
(Dual-listed with EEOB 551). (3-3) Cr. 4. Alt. F., offered even-numbered years.
Prereq: BIOL 315 or equivalent.
Survey of land plant evolution; phylogenetic comparison of anatomical, reproductive, and life history specializations. Relationships among bryophytes, lycophytes, pteridophytes, gymnosperms, and angiosperms emphasizing significant evolutionary changes documented by paleobotanical, morphological, and molecular studies.

BIOL 454: Plant Anatomy
(3-0) Cr. 4. Alt. F., offered odd-numbered years.
Prereq: BIOL 212L; BIOL 366 recommended
Characteristics of cell and tissue types in vascular plants. Anatomy of developing and mature stems, roots, and leaves, including secondary (woody) growth. Introduction to the special anatomy of flowers and seeds.

BIOL 455: Bryophyte and Lichen Biodiversity
(Dual-listed with EEOB 555). (2-3) Cr. 3. S.
Prereq: BIOL 211, BIOL 211L
Introduction to the biology and ecology of mosses, liverworts, and lichens. Emphasis on identification and diversity of local representatives of these three groups of organisms. Required field trips and service-learning.

BIOL 456: Principles of Mycology
(Cross-listed with MICRO). (2-3) Cr. 3. F.
Prereq: 10 credits in biological sciences
Morphology, diversity and ecology of fungi; their relation to agriculture and industry and human health.
Biology (BIOL)

Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

BIOL 457: Herpetology
(Cross-listed with A ECL). (2-0) Cr. 2. F.
Prereq: BIOL 351 or BIOL 365
Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

BIOL 457L: Herpetology Laboratory
(Cross-listed with A ECL). (0-3) Cr. 1. F.
Prereq: BIOL 351 or BIOL/A ECL 365; concurrent registration in BIOL 457 or A ECL 457
Laboratory to accompany Biology/Animal Ecology 457. Focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation.

BIOL 458: Ornithology
(Cross-listed with A ECL). (2-0) Cr. 2. S.
Prereq: A ECL 365 or BIOL 351
Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation.

BIOL 458L: Ornithology Laboratory
(Cross-listed with A ECL). (0-3) Cr. 1. S.
Prereq: BIOL 351 or AECL/BIOL 365. Concurrent enrollment in AECL/BIOL 458 is required.
Laboratory complements lecture topics with emphasis on external anatomy, identification and distribution of Midwest birds, and field trips.

Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation.

BIOL 459: Mammalogy
(Dual-listed with EEOB 559). (Cross-listed with A ECL). (2-0) Cr. 2. S.
Prereq: BIOL 351 or A ECL 365
Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation.

BIOL 459L: Mammalogy Laboratory
(Cross-listed with A ECL). (0-3) Cr. 1. S.
Prereq: BIOL 351 or BIOL/AECL 365; concurrent enrollment in AECL 459 or BIOL 459 required.
Laboratory focus on identification, survey methods, distribution, habits, and habitats of mammals. Several field trips.

Biology, evolution, ecology, and conservation of populations. Emphasis on genetics, demography, and environment in determining population viability, habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

BIOL 462: Evolutionary Genetics
(Cross-listed with GEN). (3-0) Cr. 3. F.
Prereq: BIOL 315
The population and quantitative genetic basis of evolutionary processes. The role of genetic variation in natural selection and the influences of random processes on evolutionary change. The determinants of phenotype.

BIOL 464: Wetland Ecology
(Dual-listed with EEOB 564). (Cross-listed with ENSCI). (3-0) Cr. 3. S.
Prereq: 15 credits in biological sciences.

BIOL 465: Macroevolution
(Dual-listed with EEOB 565). Cr. 3. Alt. S., offered even-numbered years.
Prereq: BIOL 315
The history and diversity of life on earth; evolutionary patterns and processes above the species level. Diversity from a phylogenetic perspective. Empirical exercises include: phylogeny estimation, ancestral states, estimating diversification rates, evaluating the tempo and mode of evolution, biogeographic patterns, and trait associations across the tree of life.

BIOL 471: Introductory Conservation Biology
(Cross-listed with A ECL). Cr. 3. S.
Prereq: BIOL 312
Examination of conservation issues from a population and community perspective. The role of genetics, demography, and environment in determining population viability, habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

BIOL 472: Community Ecology
(3-0) Cr. 3. S.
Prereq: BIOL 312
The effect of interspecific interactions on the structure and dynamics of natural and managed communities; including concepts of guild structure and trophic web dynamics and their importance to the productivity, diversity, stability, and sustainability of communities. The implications of interspecific interactions in the management of wild species will be emphasized with illustrative case histories of interactions between plants, invertebrates, and vertebrates.

BIOL 474: Plant Ecology
(3-0) Cr. 3. S.
Prereq: BIOL 312
Principles of plant population and community ecology.
**BIOL 476: Functional Ecology**  
(Dual-listed with EEOB 576). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
*Prereq: BIOL 312*  
The nature of adaptations to physical and biotic environments.  
Biophysical, biomechanical, and physiological bases of the structure, form, growth, distribution, and abundance of organisms.

**BIOL 480: Studies in Marine Biology**  
Cr. 1-8. Repeatable.  
Courses taken at Gulf Coast Research Laboratory and other marine biological stations are transferred to Iowa State University under this number.

**BIOL 481: Summer Field Studies**  
Cr. 1-8. Repeatable.  
Courses taken at summer biological field stations are transferred to Iowa State University under this number. See www.biology.iastate.edu for links to field stations located in different biomes: coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mountains.

**BIOL 482: Tropical Biology**  
Cr. 1-4. Repeatable, maximum of 8 credits.  
*Prereq: One year of college biology; knowledge of Spanish desirable but not required*  
Students registering for courses taught by the Organization for Tropical Studies will receive credit for this ISU course when requesting a transfer of credits.

**BIOL 483: Environmental Biogeochemistry**  
(Cross-listed with ENSCI, GEOL). Cr. 3. Alt. S., offered odd-numbered years.  
*Prereq: Combined 12 credits in biology, chemistry, and physics.*  
An exploration of biological, physical and geochemical impacts on the structure and function of ecosystems from local to global scales. Emphasis on the cycles of carbon, nitrogen, phosphorus, sulfur, and metals, and how these have been impacted by human activity. Topics may include biological feedbacks to climate change, microbial physiology and redox reactions, plant/soil feedbacks, terrestrial/aquatic linkages, early Earth processes and the origins of life.

**BIOL 484: Ecosystem Ecology**  
(Cross-listed with ENSCI). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
*Prereq: Combined 12 credits in biology, chemistry, and physics.*  
Introduction of the study of ecosystems and the biological and physical factors that influence their properties and dynamics. Conceptual foundations for ecosystem studies. Interactions among organisms, biological diversity, and ecosystem attributes. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems. Global change issues.

**BIOL 486: Aquatic Ecology**  
(Dual-listed with EEOB 586). (Cross-listed with A ECL, ENSCI). (3-0) Cr. 3. F.  
*Prereq: BIOL 312 or EnSci 381 or EnSci 402 or NREM 301*  
Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.

**BIOL 486L: Aquatic Ecology Laboratory**  
(Dual-listed with EEOB 586L). (Cross-listed with A ECL, ENSCI). (0-3) Cr. 1. F.  
*Prereq: Concurrent enrollment in BIOL 486*  
Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

**BIOL 487: Microbial Ecology**  
(Dual-listed with EEOB 587). (Cross-listed with ENSCI, GEOL, MICRO).  
(3-0) Cr. 3. F.  
*Prereq: Six credits in biology and 6 credits in chemistry*  
Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized.

**BIOL 488: Identification of Aquatic Organisms**  
(0-3) Cr. 1. F.S.  
On-line taxonomic and identification exercises to accompany 486. Instruction and practice in the identification of algae, aquatic macrophytes, zooplankton, and benthos.

**BIOL 489: Population Ecology**  
(Dual-listed with EEOB 589). (Cross-listed with A ECL). (2-2) Cr. 3. Alt. F., offered even-numbered years.  
*Prereq: BIOL 312, STAT 101 or STAT 104, a course in calculus, or graduate standing*  
Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

**BIOL 490: Independent Study**  
Cr. 1. Repeatable, maximum of 9 credits. F.S.SS.  
*Prereq: Permission of instructor.*  
Independent study opportunities for undergraduate students in the biological sciences. No more than 9 credits in Biol 490 may be counted toward graduation and, of those, only 2 credits may be applied toward the Biology advanced course requirement.
Biomedical Engineering (B M E)

Any experimental courses offered by B M E can be found at:
registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

B M E 220: Introduction to Biomedical Engineering
(Cross-listed with CH E). (3-0) Cr. 3. S.
*Prereq: BIOL 212, ENGR 160 or equiv, MATH 166, CHEM 167 or CHEM 177, PHYS 232, PHYS 232L*
Engineering analysis of basic biology and engineering problems associated with living systems and health care delivery. The course will illustrate biomedical engineering applications in such areas as: biotechnology, biomechanics, biomaterials and tissue engineering, and biosignal and image processing, and will introduce the basic life sciences and engineering concepts associated with these topics.

B M E 341: BioMEMs and Nanotechnology
(Cross-listed with E E). (3-0) Cr. 3.
*Prereq: B M E 220*
Overview of Micro-Electro-Mechanical-System (MEMS) technologies for bioengineering, fundamentals of microfluidic device design, fabrication, and characterization, survey of microfluidic functional building blocks for lab-on-a-chip applications including mixers, valves, channels, and chambers. Topics of nanotechnology in bioengineering, nanoscale building block technologies for bioengineering including self-assembling, surface chemical treatment, nano-imprinting, nano-particles, nano-tubes, nano-wires, and stimuli-responsive biomaterials.

B M E 352: Molecular, Cellular and Tissue Biomechanics
(3-0) Cr. 3.
*Prereq: B M E 220, E M 324, MAT E 273*
Introduction to the anatomy of the musculoskeletal system and connective tissue. Range of movement, joint dislocation, bone deformity and fracture. Application of continuum mechanics to both living and non-living systems. Laws of motion, free-body diagrams and simple force analysis of musculoskeletal system. Biomechanical response of soft and hard tissues with emphasis on microstructure and mechanical properties. Applications to bioengineering design.

B M E 440: Biomedical Applications of Chemical Engineering
(Cross-listed with CH E). (3-0) Cr. 3.
*Prereq: CH E 210 or CH E 220, MATH 266 or MATH 267, PHYS 232*
Applications of material and energy balances, transport phenomena, chemical reaction engineering, and thermodynamics to problems in biomedical engineering and applied physiology; survey of biomedical engineering; biomaterials; biomedical imaging.
B M E 447: Biomedical Design and Manufacturing
(Cross-listed with I E). (3-0) Cr. 3.
Prereq: Undergraduate students with three semesters or less before graduation while graduate standing for graduate students
Exploration of biology, materials, body mechanics, manufacturing, quality control, and ethics and the intersection of these subjects as they relate to biomedical manufacturing. Study of medical data (CT, MRI, etc.) processing, biomedical design, 3D bioprinting and additive manufacturing concepts.

B M E 450: Biosensors
(Cross-listed with E E). (3-0) Cr. 3.
Prereq: B M E 220
Overview of biosensors and bioanalytical challenges; designing for performance including various analytical problems, ion-selective membranes, characteristics of enzymes and basics of bioaffinity sensing; fundamentals of bioselective layers including depositing films and membranes, surfaces for immobilization and bioselective agents; survey of different biosensing technologies including electroanalytical, biomembrane, optical, and acoustic-wave based sensors.

B M E 450L: Biosensors Laboratory
(Cross-listed with E E). (0-3) Cr. 1.
Prereq: B M E 220, concurrent enrollment in B M E 450
Laboratory course accompanying B M E 450. Design, fabrication, and characterization of various electrical, chemical, polymer, optical and acoustic sensors.

B M E 456: Biomaterials
(Cross-listed with MAT E). (3-0) Cr. 3. F.
Prereq: CHEM 178 and MAT E 216 or MAT E 273 or MAT E 392
Presentation of the basic chemical and physical properties of biomaterials, including metals, ceramics, and polymers, as they are related to their manipulation by the engineer for incorporation into living systems. Role of microstructure properties in the choice of biomaterials and design of artificial organs, implants, and prostheses.

B M E 466: Multidisciplinary Engineering Design
(Cross-listed with A B E, AER E, CPR E, E E, ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S.
Prereq: Student must be within two semesters of graduation; permission of instructor.
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

B M E 490: Independent Study
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.
Prereq: permission of chair for the bioengineering minor
Investigation of biomedical engineering topics of special interest to student and supervising faculty member with a final written report.

Biomedical Sciences (B M S)

Any experimental courses offered by B M S can be found at:
registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for professional curriculum students:

B M S 329: Anatomy and Physiology of Domestic Animals
(3-0) Cr. 3. S.
Prereq: BIOL 212, BIOL 212L
Survey of body systems of domestic animals. Provides a medical science orientation particularly useful to students in a preveterinary medicine curriculum.

B M S 330: Principles of Morphology I
(Dual-listed with B M S 530). (4-6) Cr. 6. F.
Prereq: 10 credits in biological science and permission of the instructor
Anatomy of the dog and cat: from basics to clinical application.

B M S 331: Principles of Morphology II
(Dual-listed with B M S 531). (2-6) Cr. 4. S.
Prereq: First-year classification in veterinary medicine. B M S 330
Comparative and topographic anatomy of horse, ruminants, pig, and chicken.

B M S 333: Biomedical Sciences I
(Dual-listed with B M S 533). (5-3) Cr. 6. F.
Prereq: First-year classification in veterinary medicine
Microscopic anatomy and physiology of cells, tissues, cardiovascular system, respiratory system, and urinary system.

B M S 334: Biomedical Sciences II
(Dual-listed with B M S 534). (5-3) Cr. 6. S.
Prereq: First-year classification in veterinary medicine
Microscopic anatomy and physiology of the digestive system, endocrine system, and reproductive system.

B M S 335: Molecular and Cellular Basis of Disease
(1-0) Cr. 1. F.
Descriptions of molecular and cellular biology especially as it pertains to veterinary medicine. Discussions of cellular components, cellular functions and anomalies thereof. Emphasis placed on divergences relevant to companion animals and livestock.
**B M S 336: Veterinary Nutrition**  
(2-0) Cr. 2. F.  
Introduce basic biochemical aspects of metabolism and function of energy, protein, fat, minerals and vitamins in the diet. Determine nutrient requirements of food animals, pets, and horses under various physiological states. Understand fate of various nutrients in simple stomached animals, ruminants, and cecal fermenters. Discuss clinical nutrition problems specific to each species.

**B M S 337: Neuroanatomy**  
(Dual-listed with B M S 537). (2-2) Cr. 3. S.  
Prereq: First-year classification in veterinary medicine  
Neuroanatomy of domestic animals.

**B M S 339: Clinical Foundations I**  
(Cross-listed with V C S). (0-2) Cr. 1. F.  
Prereq: First-year classification in veterinary medicine  
Canine physical examination; basic behavior, animal handling and restraint; medical record keeping.

**B M S 345: Case Study I**  
(0-2) Cr. 1. F.  
Prereq: First-year classification in veterinary medicine  
Clinical applications of basic sciences taught concurrently in the fall semester of the first year curriculum in veterinary medicine.

**B M S 346: Case Study II**  
(0-1) Cr. 1. S.  
Prereq: First-year classification in veterinary medicine  
Clinical applications of basic sciences taught concurrently in the spring semester of the first year curriculum in veterinary medicine.

**B M S 354: General Pharmacology**  
(Dual-listed with B M S 554). (Cross-listed with TOX). (3-0) Cr. 3. S.  
Prereq: B M S 549 and B M S 552; BBMB 404, BBMB 405  
General principles; drug disposition; drugs acting on the nervous, cardiovascular, renal, gastrointestinal, and endocrine systems.

**B M S 401: Intro to Aquatic Animal Medicine**  
(Cross-listed with A ECL). (1-2) Cr. 1. S.  
8-week course. Introductory course with focus on fin fish production, health and medicine. Course content will help define future roles for veterinarians, producers, and service providers. Emphasis will be placed on water-evaluation, anatomy, pathology, infectious diseases, nutrition, regulatory constraints in production, food safety, biosecurity and current research. Field trip to aquaculture facility.

**B M S 403: Behavior of Domestic Animals**  
(1-0) Cr. 1. Alt. F., offered even-numbered years.  
Prereq: Classification in veterinary medicine  
Normal and abnormal behavior of domestic animals.

**B M S 438: Principles of Physiology**  
(Dual-listed with B M S 538). (4-0) Cr. 4. F.  
Prereq: 538: Graduate Student Standing or Permission of Instructor. 438: BIOL 212, BIOL 212L  
Principles of neurophysiology, endocrine and reproductive physiology, muscle physiology, cardiovascular, respiratory, renal, and digestive physiology, and regulation of body fluid.

**B M S 439: Principles of Pharmacology**  
(Dual-listed with B M S 539). (4-0) Cr. 4. S.  
Prereq: A physiology course: B M S 329, BIOL 335 or equivalent; All non-graduate students must seek permission of the instructor in charge to register for B M S 539.  
General principles of drug actions; drug disposition; drug acting on, cardiovascular, respiratory, renal, gastrointestinal, and endocrine systems; anti-inflammatory and antibiotic drug; anti-cancer drugs; anesthetics CNS stimulants; lifestyle drugs; drug addiction, abuse and dependence; drugs in sport; drugs for obesity; biopharmaceuticals and gene therapy; drug development.

**B M S 443: Pharmacology and Therapeutics**  
(Dual-listed with B M S 543). (3-0) Cr. 3. F.  
Prereq: B M S 354  
Pharmacology and therapeutic uses of fluids, antimicrobial and antiparasitic drugs, clinical use of veterinary drugs, and adverse drug reactions.

**B M S 447: Introduction to Human Gross Anatomy**  
(Dual-listed with B M S 547). (2.5-6) Cr. 4. F.  
Prereq: Graduate standing and previous biology coursework or instructor permission.  
Examination of gross anatomy and neuroanatomy of the human. Laboratories will center on regional anatomy study through human cadaver dissection in addition to models, virtual learning solutions, radiologic imaging and case studies.

**B M S 448: Principles of Human Gross Anatomy**  
Cr. 4. Repeatable, maximum of 2 times. S.SS.  
Prereq: BIOL 255 or equivalent AND an introductory biology course.  
BMS 448 will be a laboratory-centered course that focuses on prosected human cadavers to develop an in-depth understanding of human anatomical function. The course will follow a regional approach and stress relationships between neighboring anatomical structures. During laboratory sessions, students teams will study anatomy from multiple individuals to gain an appreciation for anatomical variation and effects on the body from aging, disease, etc. Additional laboratory activities include study in osteology, radiograph interpretation and case studies. Only one offering of BMS 448 may count towards graduation.
B M S 490: Independent Study  
Cr. 1-5. Repeatable. F.S.S.  
*Prereq: Permission of instructor*

B M S 490H: Independent Study, Honors  
Cr. 1-5. Repeatable. F.S.S.  
*Prereq: Permission of instructor*

B M S 496: International Experience  
Cr. 1-12. Repeatable. S.  
*Prereq: Classification in veterinary medicine or permission of the instructor*  
International Preceptorships and Study Abroad Group programs. Opportunities for students to be involved in applied clinical, production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

Courses primarily for graduate students, open to qualified undergraduates:

B M S 501: Selected Research Methods in Biomedical Sciences  
(0-8) Cr. 3. F.S.S.  
*Prereq: Graduate classification, permission of a BMS faculty member*  
Experience in biomedical techniques in selected BMS laboratories that include but is not limited to cytochemical methods, molecular biological techniques, extracellular and intracellular unit recording, microiontophoresis, microinjection, spectrophotofluorometric analysis of chemicals, use of radioisotopes, radioimmunoassay, Ca2+ imaging, confocal microscopy, fluorescence microscopy, and immunocytochemistry.

B M S 502: Methods in Biomedical Sciences  
(0-6) Cr. 3. S.  
*Prereq: Graduate Student Status or Permission of the Instructor*  
Provides laboratory experience in the application of methods in biomedical sciences, including animal physiology and pharmacology laboratory techniques; human physiology recordings and urinalysis; pharmacokinetics; basic techniques in analytical laboratory; basic pathology, immunology, bacteriology, and virology laboratory techniques.

B M S 503: Fundamentals of Biomedical Sciences  
Cr. 1. F.  
*Prereq: Admission to B M S Graduate Program*  
Institutional training essential for biomedical research, orientation to institutional career services and communication resources, professional development activities and practice with critical evaluation of data presentation and interpretation in biomedical literature.

B M S 531: Principles of Morphology II  
(Dual-listed with B M S 331). (2-6) Cr. 4. S.  
*Prereq: First-year classification in veterinary medicine. B M S 330*  
Comparative and topographic anatomy of horse, ruminants, pig, and chicken.

B M S 533: Biomedical Sciences I  
(Dual-listed with B M S 333). (5-3) Cr. 6. F.  
*Prereq: First-year classification in veterinary medicine or graduate student status*  
Microscopic anatomy and physiology of cells, tissues, cardiovascular system, respiratory system, and urinary system.

B M S 534: Biomedical Sciences II  
(Dual-listed with B M S 334). (5-3) Cr. 6. S.  
*Prereq: First-year classification in veterinary medicine or graduate student status*  
Microscopic anatomy of the immune system and integument. Microscopic anatomy and physiology of the digestive system, endocrine system, and reproductive system.

B M S 535: Molecular and Cellular Basis of Disease  
Cr. 1. S.  
*Prereq: First-year classification in veterinary medicine or graduate student status*  
Descriptions of molecular and cellular biology, especially as it pertains to veterinary medicine. Discussions of cellular components, cellular functions and anomalies thereof. Emphasis placed on divergences relevant to companion animals and livestock.

B M S 537: Neuroanatomy  
(Dual-listed with B M S 337). (2-2) Cr. 3. S.  
*Prereq: 10 credits in biological science and permission of the instructor*  
Neuroanatomy of domestic animals.

B M S 538: Principles of Physiology  
(Dual-listed with B M S 438). (4-0) Cr. 4. F.  
*Prereq: 538: Graduate Student Standing or Permission of Instructor. 438: BIOL 212, BIOL 212L*  
Principles of neurophysiology, endocrine and reproductive physiology, muscle physiology, cardiovascular, respiratory, renal, and digestive physiology, and regulation of body fluid.
B M S 539: Principles of Pharmacology  
(Dual-listed with B M S 439). (4-0) Cr. 4. S.  
Prereq: A physiology course: B M S 329, BIOL 335 or equivalent; All non-graduate students must seek permission of the instructor in charge to register for B M S 539.  
General principles of drug actions; drug disposition; drug acting on cardiovascular, respiratory, renal, gastrointestinal, and endocrine systems; anti-inflammatory and antibiotic drug; anti-cancer drugs; anesthetics CNS stimulants; lifestyle drugs; drug addiction, abuse and dependence; drugs in sport; drugs for obesity; biopharmaceuticals and gene therapy; drug development.

B M S 542: Introduction to Molecular Biology Techniques  
(Cross-listed with EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.SS.  
Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

B M S 542A: Introduction to Molecular Biology Techniques: DNA Techniques  
(Cross-listed with BBMB, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.  
Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

B M S 542B: Introduction to Molecular Biology Techniques: Protein  
(Cross-listed with BBMB, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.SS.  
Prereq: Graduate classification  
Techniques. Includes: fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, Immunophenotyping, and monoclonal antibody production. Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

B M S 542C: Introduction to Molecular Biology Techniques: Cell Techniques  
(Cross-listed with BBMB, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.  
Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.

B M S 542D: Introduction to Molecular Biology Techniques: Plant Transformation  
(Cross-listed with BBMB, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.  
Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. Offered on a satisfactory-fail basis only.

B M S 542E: Introduction to Molecular Biology Techniques: Proteomics  
(Cross-listed with BBMB, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.  
Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only.

B M S 542F: Introduction to Molecular Biology Techniques: Metabolomics  
(Cross-listed with BBMB, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.  
Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only.

B M S 542G: Introduction to Molecular Biology Techniques: Genomic  
(Cross-listed with BBMB, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.  
Offered on a satisfactory-fail basis only.

B M S 543: Pharmacology and Therapeutics  
(Dual-listed with B M S 443). (3-0) Cr. 3. F.  
Prereq: B M S 354  
Pharmacology and therapeutic uses of fluids, antimicrobial and antiparasitic drugs, clinical use of veterinary drugs, and adverse drug reactions.

B M S 547: Introduction to Human Gross Anatomy  
(Dual-listed with B M S 447). (2.5-6) Cr. 4. F.  
Prereq: Graduate standing and previous biology coursework or instructor permission.  
Examination of gross anatomy and neuroanatomy of the human. Laboratories will center on regional anatomy study through human cadaver dissection in addition to models, virtual learning solutions, radiologic imaging and case studies.

B M S 554: General Pharmacology  
(Dual-listed with B M S 354). (Cross-listed with TOX). (3-0) Cr. 3. S.  
Prereq: B M S 549 and B M S 552; BBMB 404, BBMB 405  
General principles; drug disposition; drugs acting on the nervous, cardiovascular, renal, gastrointestinal, and endocrine systems.

B M S 556: Cellular, Molecular and Developmental Neuroscience  
(Cross-listed with GDCB, NEURO). (3-0) Cr. 3. Alt. F., offered odd-numbered years.  
Prereq: BIOL 335 or BIOL 436; physics recommended  
Fundamental principles of neuroscience including cellular and molecular neuroscience, nervous system development, and regulatory systems.
B M S 575: Cell Biology
(Cross-listed with TOX). (3-0) Cr. 3. F.
Prereq: 10 credits in biological sciences and graduate student standing or permission of instructor
A multi-instructor course covering major topics in cell structure and function, including: universal features of prokaryotic and eukaryotic cells, types of utilization and conversion of energy, genetic control of cell shape and functionality, internal organization of cells, communication between cells and their environment, development of multicellular systems. Students have to write a term paper.

B M S 590: Special Topics
Cr. 1-7. Repeatable. F.S.SS.
Prereq: Permission of instructor

B M S 590A: Anatomy
Cr. 1-7. Repeatable. F.S.SS.
Prereq: Permission of instructor

B M S 590B: Physiology
Cr. 1-7. Repeatable. F.S.SS.
Prereq: Permission of instructor

B M S 590C: Pharmacology
Cr. 1-7. Repeatable. F.S.SS.
Prereq: Permission of instructor

B M S 590D: Cell biology
Cr. 1-7. Repeatable. F.S.SS.
Prereq: Permission of instructor

B M S 599: Creative Component
Cr. 1-3. F.S.SS.
Prereq: Enrollment in BMS graduate program, and permission of instructor.
Creative component for non-thesis Master of Science degree.

Courses for graduate students:

B M S 688: Research Review
Cr. 1. Repeatable. F.
Prereq: Enrollment in BMS graduate program.
A forum for B M S students to gain experience in the critical exchange of ideas through oral presentation and discussion of scientific information.

B M S 690: Advanced Topics
Cr. 1-5. Repeatable. F.S.SS.
Prereq: Permission of instructor

B M S 690A: Anatomy
Cr. 1-5. Repeatable. F.S.SS.
Prereq: Permission of instructor

B M S 690B: Physiology
Cr. 1-5. Repeatable. F.S.SS.
Prereq: Permission of instructor

B M S 690C: Pharmacology
Cr. 1-5. Repeatable. F.S.SS.
Prereq: Permission of instructor

B M S 690D: Cell biology
Cr. 1-5. Repeatable. F.S.SS.
Prereq: Permission of instructor

B M S 698: Seminar
Cr. arr. Repeatable. F.S.SS.
Prereq: Enrollment in BMS graduate program.

B M S 698A: Seminar: Attendance
Cr. 1. Repeatable. F.S.
Prereq: Enrollment in BMS graduate program.

B M S 698B: Seminar: Attendance and Presentation
(1-0) Cr. 1. Repeatable. F.S.SS.
Prereq: Enrollment in B M S graduate program.
Attendance and presentation required. Offered on a satisfactory-fail basis only.

B M S 698C: Seminar: Attendance and Report
Cr. 1. Repeatable. F.S.
Prereq: Enrollment in BMS graduate program.
Attendance to all B M S seminars and written reports are required.

B M S 699: Research
Cr. arr. Repeatable. F.S.SS.
Prereq: Enrollment in BMS graduate program.

B M S 699A: Research: Anatomy
Cr. arr. Repeatable. F.S.SS.
Prereq: Enrollment in BMS graduate program.

B M S 699B: Research: Physiology
Cr. arr. Repeatable. F.S.SS.
Prereq: Enrollment in BMS graduate program.

B M S 699C: Research: Pharmacology
Cr. arr. Repeatable. F.S.SS.
Prereq: Enrollment in BMS graduate program.

B M S 699D: Research: Cell biology
Cr. arr. Repeatable. F.S.SS.
Prereq: Enrollment in BMS graduate program.
Business Administration (BUSAD)

Any experimental courses offered by BUSAD can be found at:
registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

BUSAD 102: Business Learning Team Orientation
(1-0) Cr. 1. F.S.
A required orientation for all College of Business Students involved with a Business Learning Team. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines and registration procedures. Includes a consideration of various business majors and careers, tools for success in college including writing skills and presentations from employers, alumni and current students. Only one of BusAd 102 or BusAd 103 may be counted towards graduation.

BUSAD 103: Orientation
(1-0) Cr. 1. F.S.
A required orientation for all College of Business students. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines, and registration procedures. Includes group advising for course selection and registration. Only one of BUSAD 102 or BUSAD 103 may be counted toward graduation.

BUSAD 203: Professional Development in Business
(1-0) Cr. 1.
Prereq: BUSAD 102 or 103
Designed to develop prepared, professional and engaged students directly aligned with current workplace competencies: individual and team strengths, professional branding, developing and implementing a professional job/internship search, resume and other professional job seeking communications, interviewing, evaluating offers, and networking. Team presentations will be a requirement of this course.

BUSAD 250: Applied Principles of Business
(3-0) Cr. 3.
Prereq: COM S 113
Introduction to the functional areas of business and how the functional areas are integrated for the purpose of implementing business strategy. Introduces students to decision making tools (spreadsheets and databases) that are integral to business decision making. Includes application exercises to all functional areas of business.

BUSAD 292: Entrepreneurship & Innovation Learning Community (EILC) Seminar
(1-0) Cr. 1.
Topics related to entrepreneurship and entrepreneurial thinking. Presentations by entrepreneurs and faculty, field trips, business concept development.

BUSAD 391: Professional Experiential Learning
Cr. 1. Repeatable, maximum of 6 credits.
Prereq: 12 credits from College of Business; written approval of Career Services Internship Coordinator on required form prior to the learning experience.
Supervised work experience in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 391A: Professional Experiential Learning: Domestic Internship
Cr. 1. Repeatable, maximum of 6 credits.
Prereq: 12 credits from College of Business; written approval of Career Services Internship Coordinator on required form prior to the learning experience.
Supervised work experience in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 391B: Professional Experiential Learning: International Internship
Cr. 1. Repeatable, maximum of 6 credits.
Prereq: 12 credits from College of Business; written approval of Career Services Internship Coordinator on required form prior to the learning experience.
Supervised work experience in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 391C: Professional Experiential Learning: Domestic Travel and Study
Cr. 1. Repeatable, maximum of 6 credits.
Prereq: 12 credits from College of Business; written approval of Career Services Internship Coordinator on required form prior to the learning experience.
Supervised travel and study in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 391D: Professional Experiential Learning: International Travel and Study
Cr. 1. Repeatable, maximum of 6 credits.
Prereq: 12 credits from College of Business; written approval of Career Services Internship Coordinator on required form prior to the learning experience.
Supervised travel and study in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 398: Cooperative Education
Cr. R. Repeatable, maximum of 3 times.
Prereq: Permission of department
Required of all cooperative education students engaged in full-time internship/co-op. Students must register for this course prior to commencing each work period. No more than three credits may be taken in addition to BusAd 398 during any given semester. Offered on a satisfactory-fail basis only.
BUSD 490: Independent Study
Cr. 1-3. Repeatable.
Prereq: Professional program in Business; permission of instructor; for 490H: Admission to the Business Honors Program

BUSD 490A: Independent Study: International Business
Cr. 1-3. Repeatable.
Prereq: Professional program in Business; permission of instructor

BUSD 490E: Independent Study: Entrepreneurship
Cr. 1-3. Repeatable.
Prereq: senior classification, permission of instructor

BUSD 490G: Independent Study: General
Cr. 1-3. Repeatable.
Prereq: Professional program in Business; permission of instructor

BUSD 490H: Independent Study: Honors
Cr. 1-3. Repeatable.
Prereq: Admission to the Business Honors Program

BUSD 491: Okoboji Entrepreneurship Institute
Cr. 1-3.
Prereq: Selection to Okoboji Entrepreneurship Institute
Advanced study of entrepreneurship that includes a team-based entrepreneurial simulation, seminars with successful entrepreneurs and business community leaders, a formal pitch presentation, and networking and mentoring in an immersive experiential environment. Students must apply and be selected for participation. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

BUSD 501: Strategic Management
(Cross-listed with STB). (2-0) Cr. 2.
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.
Critical analysis of current practice and case studies in strategic management with an emphasis on integrative decision making. Strategy formulation and implementation will be investigated in the context of complex business environments.

BUSD 502: Quantitative Business Analysis and Decision Making
(3-0) Cr. 3.
Prereq: Enrollment in MBA program or departmental permission
Introduction to the sources and statistical analysis of data as well as optimization models for use in making business decisions. Data collection, descriptive and inferential statistics including hypothesis testing, analysis of variance, multiple regression, linear programming and simulation.

BUSD 503: Information Systems
(Cross-listed with STB). (2-0) Cr. 2.
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.
Introduction to a broad variety of information technology (IT) topics, including current and emerging developments in information technology (IT), IT strategy in the context of corporate strategy, and IT planning and development of enterprise architectures. Cases, reading, and discussions highlight the techniques and tactics used by managers to cope with strategic issues within an increasingly technical and data-driven competitive environment.

BUSD 504: Marketing and Logistics
(Cross-listed with STB). (3-0) Cr. 3.
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.
Integration of the business functions concerned with the marketing and movement of goods along the supply chain with the primary goal of creating value for the ultimate customer. Coordination of marketing, production, and logistics activities within the firm and with outside suppliers and customers in the supply chain.

BUSD 507: Organizational Behavior
(Cross-listed with STB). (2-0) Cr. 2.
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.
Understanding human behavior in organizations, and the nature of organizations from a managerial perspective. Special emphasis on how individual differences, such as perceptions, personality, and motivation, influence individual and group behavior in organizations and on how behavior can be influenced by job design, leadership, groups, and the structure of organizations.
BUSAD 508: Accounting and Finance
(Cross-listed with STB). (3-0) Cr. 3.
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.
Survey of fundamental topics in accounting and finance. Financial statement reporting and analysis for agriculture firms, corporate governance issues related to financial reporting, (e.g., Sarbanes-Oxley). Basic tools and techniques used in financial management, including stock and bond valuation. How to assess and use capital budgeting methods to evaluate proposed firm investments.

BUSAD 509: International Seed Business Practices, Policies, & Regulation
(Cross-listed with STB). (3-0) Cr. 3.
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.
Cultural, financial, economic, political, legal/regulatory environments shaping an organization's international business strategy. Topics include entry (and repatriation) of people, firms, goods, services, and capital. Special attention to the institutions of seed regulation and policy. Ethical issues facing managers operating in an international context.

BUSAD 590: Special Topics in Business
(3-0) Cr. 3. Repeatable.
Prereq: Enrollment in MBA program or departmental permission.
A special topics course covering contemporary issues in business. Topics vary by semester.

BUSAD 591: Professional Experiential Learning
Cr. 1-5. Repeatable.
Prereq: Graduate standing; written approval of supervising instructor and department chair on required form prior to the learning experience.
Academically supervised travel and/or work experiences in a business related discipline.

BUSAD 592: MBA Professional Skills Development
Cr. R.
Prereq: Admission to Full-time MBA Program
Provides first-year MBA students with tools necessary to develop and implement a successful internship and career search, and to develop professional skills critical for success in the competitive business environment. Topics include career search strategy, resume and cover letter development, interviewing, strategic networking, salary negotiation, impression management, team skills development, presentation skills development, and business etiquette. Required for all full-time MBA students. Offered on a satisfactory-fail basis only.

BUSAD 594: MBA Professional Skills Development II
Cr. R.
Prereq: BUSAD 592
A second course designed to improve the professional skills of first-year MBA students. Emphasis on building effective communications and networking skills. Students will participate in professional workshops, company visits, executive speaker seminars, service learning projects, business case competitions, and related activities. Offered on a satisfactory-fail basis only.

BUSAD 598: Cooperative Education
Cr. R.
Prereq: Permission of instructor
Professional work experience. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

BUSAD 599: Creative Component
Cr. 3.
Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.

BUSAD 599A: Creative Component: Accounting
Cr. 3.
Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.

BUSAD 599C: Creative Component: Finance
Cr. 3.
Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.

BUSAD 599E: Creative Component: Management
Cr. 3.
Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.

BUSAD 599F: Creative Component: Marketing
Cr. 3.
Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.

BUSAD 599I: Creative Component: Agribusiness
Cr. 3.
Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.

BUSAD 599J: Creative Component: General Business
Cr. 3.
Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.
BUSAD 599K: Creative Component: Management Information Systems  
Cr. 3.  
**Prereq:** Graduate classification, permission of supervisory committee chair  
Preparation and writing of creative component.

BUSAD 599L: Creative Component: Supply Chain Management  
Cr. 3.  
**Prereq:** Graduate classification, permission of supervisory committee chair  
Preparation and writing of creative component.

Courses for graduate students:

BUSAD 644: Business Research Methods  
(3-0) Cr. 3. F.  
**Prereq:** In PhD program in the College of Business or consent of instructor  
A survey of the wide variety of research methods used in business. Methods will be presented and discussed with emphasis on applicability in different research situations.

BUSAD 699: Research  
Cr. 3-6. Repeatable. F.S.SS.  
**Prereq:** Graduate classification, permission of major professor  
Research.

Chemical Engineering (CH E)

*Any experimental courses offered by CH E can be found at: [http://www.registrar.iastate.edu/faculty-staff/courses/explistings/](http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)*

Courses primarily for undergraduates:

CH E 104: Chemical Engineering Learning Community  
Cr. R. F.  
**Prereq:** Enrollment in Chemical Engineering Learning Team  
(1-0) Curriculum in career planning and academic course support for Freshmen learning team.

CH E 160: Chemical Engineering Problems with Computer Applications Laboratory  
(2-2) Cr. 3. F.S.  
**Prereq:** MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

CH E 202: Chemical Engineering Seminar  
(1-0) Cr. 1. F.  
Professionalism in the context of the engineering/technical workplace. Introduction to chemical engineering career opportunities. Process and workplace safety. Development and demonstration of key workplace competencies: teamwork, professionalism and ethical responsibility, ability to engage in life-long learning, and knowledge of contemporary issues. Resumes; professional portfolios; preparation for internship experiences. Restricted to CHE majors.

CH E 204: Chemical Engineering Continuing Learning Community  
Cr. R.  
**Prereq:** Enrollment in Chemical Engineering Learning Team  
Curriculum and career planning, academic course support for learning community.

CH E 205: Chemical Engineering Progress Assessment  
Cr. R. F.S.  
**Prereq:** CHEM 178, MATH 166; credit or enrollment in CH E 160  
Assessment of proficiency in general chemistry, calculus (including infinite series and applications of derivatives and integrals), and material balances, and an ability to use the principles of science and mathematics to identify, formulate, and solve engineering problems. Offered on a satisfactory-fail basis only.

CH E 210: Material and Energy Balances  
(3-0) Cr. 3. F.S.  
**Prereq:** Chem 178, Math 166, CH E 160  
Introduction to chemical processes. Physical behavior of gases, liquids, and solids. Application of material and energy balances to chemical engineering equipment and processes.

CH E 220: Introduction to Biomedical Engineering  
(Cross-listed with B M E). (3-0) Cr. 3. S.  
**Prereq:** BIOL 212, ENGR 160 or equiv, MATH 166, CHEM 167 or CHEM 177, PHYS 232, PHYS 232L  
Engineering analysis of basic biology and engineering problems associated with living systems and health care delivery. The course will illustrate biomedical engineering applications in such areas as: biotechnology, biomechanics, biomaterials and tissue engineering, and biosignal and image processing, and will introduce the basic life sciences and engineering concepts associated with these topics.

CH E 310: Computational Methods in Chemical Engineering  
(3-0) Cr. 3. F.S.  
**Prereq:** CH E 160, CH E 205, CH E 210, MATH 265  
Numerical methods for solving systems of linear and nonlinear equations, ordinary differential equations, numerical differentiation and integration, and nonlinear regression using chemical engineering examples.
CH E 325: Chemical Engineering Laboratory I
(0-4) Cr. 2. F.S.
Prereq: CH E 357, CH E 381; credit or enrollment in ENGL 314 or ENGL 309 or ENGL 312 or JL MC 347
Experiments covering fundamental material and energy balances, momentum and energy transport operations, and thermodynamics. Computer applications.

CH E 356: Transport Phenomena I
(3-0) Cr. 3. F.S.
Prereq: CH E 205, CH E 210, PHYS 231, PHYS 231L; credit or enrollment in MATH 267
Momentum and mechanical energy balances. Incompressible and compressible fluid flow. Applications to fluid drag, piping system design, filtration, packed beds and settling.

CH E 357: Transport Phenomena II
(3-0) Cr. 3. F.S.
Prereq: CH E 356
Conduction and diffusion, convective heat and mass transfer, boiling and condensation, radiation, and design of heat exchange equipment. Introduction to diffusion.

CH E 358: Separations
(3-0) Cr. 3. F.S.
Prereq: CH E 310, CH E 357, CH E 381
Diffusion and mass transfer in fluids. Analysis and design of continuous contacting and multistage separation processes. Binary and multicomponent distillation, absorption, extraction, evaporation, membrane processes, and simultaneous heat and mass transfer.

CH E 381: Chemical Engineering Thermodynamics
(3-0) Cr. 3. F.S.
Prereq: CH E 202, MATH 267, PHYS 232, CHEM 325; credit or enrollment in CH E 310, PHYS 232L
Application of thermodynamic principles to chemical engineering problems. Thermodynamic properties of fluids, phase equilibria, and chemical reaction equilibria.

CH E 382: Chemical Reaction Engineering
(3-0) Cr. 3. F.S.
Prereq: CH E 310, CH E 381; credit or enrollment in CH E 357
Kinetics of chemical reactions. Design of homogeneous and heterogeneous chemical reactors.
CH E 410: Electrochemical Engineering
(Dual-listed with CH E 510). (3-0) Cr. 3. F.
Prereq: CH E 357, CH E 381, CH E 382
Electrochemical engineering principles in thermodynamics, electrode kinetics, charge and mass transport; modeling and simulation; electrocatalysis; electrochemical reactions; applications of electrochemical engineering in fuel cells, batteries and electrolyzers.

CH E 415: Biochemical Engineering
(Dual-listed with CH E 515). (3-0) Cr. 3.
Prereq: CH E 357, CHEM 331; BBMB 301 or BBMB 303 or BBMB 404
Application of basic chemical engineering principles in biochemical and biological process industries such as enzyme technology and fermentation.

CH E 420: Chemical Process Safety
(3-0) Cr. 3. F.S.
Prereq: CH E 357, CH E 381
Application of transport phenomena, thermodynamics, and chemical kinetics to the study of safety, health, and loss prevention. Government regulations, industrial hygiene, relief sizing, runaway reactions, toxic release, and dispersion models will be used. Fires, explosions, risk assessment, hazard identification, case studies, accident investigations, and design considerations will be studied.

CH E 421: Process Control
(3-0) Cr. 3. F.S.
Prereq: CH E 358, CH E 382, Math 267
Control of industrial chemical processes. Device applications and limitations. Dynamics of chemical process components and process control systems.

CH E 426: Chemical Engineering Laboratory II
(0-4) Cr. 2. F.S.
Prereq: CH E 325, CH E 358, CH E 382
Experiments in heat and mass transfer, staged operations, chemical reactor performance, unit processes. Computer applications. Only one of Ch E 426 or 427 may count toward graduation.

CH E 427: Biological Engineering Laboratory
(0-4) Cr. 2. S.
Prereq: CH E 325, CH E 358, CH E 382; BBMB 301 or BBMB 303 or BBMB 404
Experiments on biological applications in chemical engineering. Only one of CH E 426 or CH E 427 may count toward graduation.

CH E 430: Process and Plant Design
(2-4) Cr. 4. F.S.
Prereq: CH E 358, CH E 382
Synthesis of chemical engineering processes, equipment and plants. Cost estimation and feasibility analysis.

CH E 440: Biomedical Applications of Chemical Engineering
(Dual-listed with CH E 540). (Cross-listed with BM E). (3-0) Cr. 3.
Prereq: CH E 210 or CH E 220, MATH 266 or MATH 267, PHYS 232
Applications of material and energy balances, transport phenomena, chemical reaction engineering, and thermodynamics to problems in biomedical engineering and applied physiology; survey of biomedical engineering; biomaterials; biomedical imaging.

CH E 447: Polymers and Polymer Engineering
(Dual-listed with CH E 547). (3-0) Cr. 3.
Prereq: CHEM 331; CH E 382 or MAT E 351
Chemistry of polymers, addition and condensation polymerization. Physical and mechanical properties, polymer rheology, production methods. Applications of polymers in the chemical industry.

CH E 490: Undergraduate Research/Independent Study
(0-18) Cr. 1-6. Repeatable, maximum of 6 credits.
Prereq: Permission of department
Investigation of topics of special interest to student and faculty with a final written report or presentation. Election of course and topic must be approved in advance by Department with completion of Study Proposal. No more than 6 credits of ChE 490 may be counted towards technical electives.

CH E 490H: Undergraduate Research/Independent Study, Honors
(0-18) Cr. 1-6. Repeatable, maximum of 6 credits.
Prereq: Permission of Department
Investigation of topics of special interest to student and faculty with a final written report or presentation. Election of course and topic must be approved in advance by Department with completion of Study Proposal. No more than 6 credits of Ch E 490 may be counted towards technical electives.

Courses primarily for graduate students, open to qualified undergraduates:

CH E 506: Environmental Chemodynamics
(Dual-listed with CH E 406). (3-0) Cr. 3.
Prereq: CHE 357, CH E 381
Examines the mechanisms and rates of chemical transport across air, water, and soil interfaces. Applications of transport and thermodynamic fundamentals to movement of chemicals in the environment.
CH E 508: Surface and Colloid Chemistry 
(Dual-listed with CH E 408). (3-0) Cr. 3.
Prereq: CH E 381
Examines the factors underlying interfacial phenomena, with an emphasis on the thermodynamics of surfaces, structural aspects, and electrical phenomena. Application areas include emulsification, foaming, detergency, sedimentation, fluidization, nucleation, wetting, adhesion, flotation, and electrophoresis.

CH E 510: Electrochemical Engineering
(Dual-listed with CH E 410). (3-0) Cr. 3. F.
Prereq: CH E 357, CH E 381, CH E 382
Electrochemical engineering principles in thermodynamics, electrode kinetics, charge and mass transport; modeling and simulation; electrocatalysis; electrochemical reactions; applications of electrochemical engineering in fuel cells, batteries and electrolyzers.

CH E 515: Biochemical Engineering
(Dual-listed with CH E 415). (3-0) Cr. 3.
Prereq: CH E 357, CHEM 331; BBMB 301 or BBMB 303 or BBMB 404
Application of basic chemical engineering principles in biochemical and biological process industries such as enzyme technology and fermentation.

CH E 540: Biomedical Applications of Chemical Engineering
(Dual-listed with CH E 440). (3-0) Cr. 3.
Prereq: CH E 210 or CH E 220, MATH 266 or MATH 267, PHYS 232
Applications of material and energy balances, transport phenomena, chemical reaction engineering, and thermodynamics to problems in biomedical engineering and applied physiology; survey of biomedical engineering; biomaterials; biomedical imaging.

CH E 542: Polymeric Biomaterials
(3-0) Cr. 3.
Prereq: CHEM 331 or a polymers class
Polymeric biomaterials, overview of biomaterial requirements, different classes of polymers used as biomaterials, specific bioapplications of polymers.

CH E 545: Analytical and Numerical Methods
(3-0) Cr. 3. F.
Prereq: CH E 358, MATH 267
Analysis of equipment and processes by analytic and/or numerical solution of descriptive differential equations. Operational and series techniques, boundary value problems, numerical interpolation and approximation, integration techniques.

CH E 547: Polymers and Polymer Engineering
(Dual-listed with CH E 447). (3-0) Cr. 3.
Prereq: CHEM 331; CH E 382 or MAT E 351
Chemistry of polymers, addition and condensation polymerization. Physical and mechanical properties, polymer rheology, production methods. Applications of polymers in the chemical industry.

CH E 554: Integrated Transport Phenomena
(4-0) Cr. 4. F.
Prereq: CH E 357, CH E 381, Math 267, credit or enrollment in CH E 545
Conservation equations governing diffusive and convective transport of momentum, thermal energy and chemical species. Transport during laminar flow in conduits, boundary layer flow, creeping flow. Heat and mass transport coupled with chemical reactions and phase change. Scaling and approximation methods for mathematical solution of transport models. Diffusive fluxes; conservation equations for heat and mass transfer; scaling and approximation techniques; fundamentals of fluid mechanics; unidirectional flow; creeping flow; laminar flow at high Reynolds number; forced-convection heat and mass transfer in confined and unconfined laminar flows.

CH E 562: Bioseparations
(3-0) Cr. 3.
Prereq: CH E 357 or advanced standing in a science major
Principles and techniques for separation and recovery of biologically-produced molecules, especially proteins. Relationship between the chemistry of biological molecules and efficient separation and preservation of biological activity. Includes centrifugation and filtration, membrane processing, extraction, precipitation and crystallization, chromatography, and electrophoresis.

CH E 572: Turbulence
(Cross-listed with AER E). (3-0) Cr. 3.
Prereq: AER E 541 or M E 538

CH E 583: Advanced Thermodynamics
(3-0) Cr. 3. F.
Prereq: CH E 381
Application of thermodynamic principles to chemical engineering problems. Thermodynamic properties of non-ideal fluids and solutions; phase and chemical-reaction equilibria/stability.
CH E 587: Advanced Chemical Reactor Design
(3-0) Cr. 3. S.
Prereq: CH E 382
Analysis of complex reactions and kinetics. Fixed bed, fluidized bed, and other industrial reactors. Analysis and design of non-ideal flow mixing, and residence times. Heterogeneous reactors.

CH E 590: Independent Study
Cr. 2-6. Repeatable.
Investigation of an approved topic on an individual basis.

CH E 595: Special Topics
Cr. 2-3. Repeatable.

CH E 595A: Special Topics: Separations
Cr. 2-3. Repeatable.

CH E 595B: Special Topics: Advanced Control Theory
Cr. 2-3. Repeatable.

CH E 595C: Special Topics: Crystallization
Cr. 2-3. Repeatable.

CH E 595D: Special Topics: Thermodynamics
Cr. 2-3. Repeatable.

CH E 595E: Special Topics: Protein Engineering/Bioseparations
Cr. 2-3. Repeatable.

CH E 595F: Special Topics: Biological Engineering
Cr. 2-3. Repeatable.

CH E 595G: Special Topics: Materials and Biomaterials
Cr. 2-3. Repeatable.

CH E 595H: Special Topics: Surfaces
Cr. 2-3. Repeatable.

CH E 595I: Special Topics: Combinatorial Design
Cr. 2-3. Repeatable.

CH E 599: Creative Component
Cr. arr. Repeatable.

Courses for graduate students:

CH E 601: Seminar
Cr. R. Repeatable. F.S.
Offered on a satisfactory-fail basis only.

CH E 625: Metabolic Engineering
(3-0) Cr. 3.
Prereq: CH E 382, CHEM 331
Principles of metabolic engineering. Emphasis on emerging examples in biorenewables and plant metabolic engineering. Overview of biochemical pathways, determination of flux distributions by stoichiometric and labeling techniques; kinetics and thermodynamics of metabolic networks; metabolic control analysis; genetic engineering for overexpression, deregulation, or inhibition of enzymes; directed evolution; application of bioinformatics, genomics, and proteomics.

CH E 632: Multiphase Flow
(Cross-listed with M E). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: M E 538
Single particle, multiparticle and two-phase fluid flow phenomena (gas-solid, liquid-solid and gas-liquid mixtures); particle interactions, transport phenomena, wall effects; bubbles, equations of multiphase flow. Dense phase (fluidized and packed beds) and ducted flows; momentum, heat and mass transfer. Computer solutions.

CH E 642: Principles and Applications of Molecular Simulation
(3-0) Cr. 3.
Prereq: CH E 545

CH E 688: Catalysis and Catalytic Processes
(3-0) Cr. 3.
Prereq: CH E 382
Principles and applications of heterogeneous and homogeneous catalysis. Adsorption. Reaction kinetics and mass transfer effects. Catalyst characterization. Industrial catalytic processes.

CH E 692: Independent Study
Cr. 2-6. Repeatable.
Investigation of an approved topic on an individual basis. Election of course and topic must be approved in advance by Program of Study Committee.

CH E 695: Advanced Topics
Cr. arr. Repeatable.

CH E 695A: Advanced Topics: Separations
Cr. arr. Repeatable.

CH E 695B: Advanced Topics: Advanced Statistical Modeling and Control
Cr. arr. Repeatable.
CH E 695C: Advanced Topics: Crystallization
Cr. arr. Repeatable.

CH E 695D: Advanced Topics: Thermodynamics
Cr. arr. Repeatable.

CH E 695E: Advanced Topics: Protein Engineering/Bioseparations
Cr. arr. Repeatable.

CH E 695F: Advanced Topics: Biological Engineering
Cr. arr. Repeatable.

CH E 695G: Advanced Topics: Materials and Biomaterials
Cr. arr. Repeatable.

CH E 695H: Advanced Topics: Surfaces
Cr. arr. Repeatable.

CH E 695I: Advanced Topics: Combinatorial Design
Cr. arr. Repeatable.

CH E 695J: Advanced Topics: Polymeric and Nanostructured Materials
Cr. arr. Repeatable.

CH E 695K: Advanced Topics: Biomaterials and Tissue Engineering
Cr. arr. Repeatable.

CH E 695L: Advanced Topics: Catalysis, Reaction Engineering, and Renewable Energy
Cr. arr. Repeatable.

CH E 697: Engineering Internship
Cr. R. Repeatable. F.S.S.
Prereq: Permission of major professor, graduate classification
One semester and one summer maximum per academic year professional work period.

CH E 698: Chemical Engineering Teaching Practicum
(1-0) Cr. 1. F.S.S.
Prereq: Graduate student classification and permission of instructor
Offered on a satisfactory-fail basis only.

CH E 698A: Chemical Engineering Teaching Practicum: Teaching Practicum
(1-0) Cr. 1. F.
Prereq: Graduate student classification and permission of instructor
Discussions intended to foster the development of graduate students as teaching assistants and future chemical engineering instructors. Topics include classroom and laboratory instruction, grading, and developing a teaching philosophy. Offered on a satisfactory-fail basis only.

CH E 698B: Chemical Engineering Teaching Practicum: Teaching Experience
(1-0) Cr. 1. Repeatable. F.S.S.
Prereq: CH E 698A
Participation in the instruction of a CH E course under the mentorship of a CBE faculty member. Typical activities may include lecture preparation and delivery, laboratory instruction, design of assessments, problem-solving sessions, office hours, and grading. Offered on a satisfactory-fail basis only.

CH E 699: Research
Cr. arr. Repeatable.

Chemistry (CHEM)

Any experimental courses offered by CHEM can be found at: registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

CHEM 050: Preparation for College Chemistry
(3-0) Cr. 0. F.S.
Prereq: 1 year high school algebra
An in-depth active learning experience designed to impart the fundamental concepts and principles of chemistry, with an emphasis on mathematics skills and logical thinking. For students intending to enroll in general chemistry and who have not taken high school chemistry or who have not had a high school college preparatory chemistry course who need a review of chemical problem solving and chemical concepts. Credit for Chem 50 does not count toward graduation.

CHEM 101: Chemistry Learning Community Orientation
(1-0) Cr. 1. F.S.
Prereq: Member of the Chemistry Learning Community.
Integration of first year and transfer students into the chemistry program. Introduction and overview of degree requirements and support services on campus, assistance with transition to college and community life, and team-building and leadership activities. Offered on a satisfactory-fail basis only.

CHEM 101A: Chemistry Learning Community Orientation: On-Campus Orientation
(1-0) Cr. 1. F.
Prereq: Member of the Chemistry Learning Community.
Integration of first year and transfer students into the chemistry program. Introduction and overview of degree requirements and support services on campus, assistance with transition to college and community life, and team-building and leadership activities. Offered on a satisfactory-fail basis only.
CHEM 101B: Chemistry Learning Community Orientation: Professional Development Opportunities  
(1-0) Cr. 1. S.  
*Prereq: Member of the Chemistry Learning Community.*  
Integration of first year and transfer students into the chemistry program. Introduction and overview of degree requirements and support services on campus, assistance with transition to college and community life, and team-building and leadership activities. Offered on a satisfactory-fail basis only.

CHEM 102L: Physical Sciences for Elementary Education  
(Cross-listed with PHYS). (1-4) Cr. 3. F.S.  
*Prereq: MATH 195 or MATH 140*  
Physical science principles for future elementary teachers. Emphasis on experiments that address current elementary science education standards and that are appropriate for their future students to do, such as measurements of mass, length, time, light from atoms, charge and current, motion due to forces, energy and work, heat, waves, optics, building bridges and making musical instruments, studying states of matter and chemical reactions.

CHEM 110: Cutting-Edge Chemistry: Research and Career Opportunities  
(1-0) Cr. 1. F.  
Overview of careers in chemistry: industrial, governmental, and academic careers; literature and compound search instruction; professional ethics; and an introduction to joining a research lab. For students majoring or minoring in chemistry or chemistry-related fields. Offered on a satisfactory-fail basis only.

CHEM 160: Chemistry in Modern Society  
(3-0) Cr. 3. F.S.  
Aspects of chemistry visible to a non-scientist in our society. A survey of selected areas of chemistry with emphasis on the interface between chemistry and other fields of human activity.

CHEM 163: College Chemistry  
(4-0) Cr. 4. F.S.SS.  
*Prereq: 1 year of high school algebra and geometry and Chem 50 or 1 year of high school chemistry; and credit or enrollment in CHEM 163L*  
A general survey of chemistry with an emphasis on conceptual problems for those who are not physical and biological science or engineering majors. Nomenclature, chemical reactions, stoichiometry, atomic structure, periodic properties, chemical bonding, states of matter, solutions, thermochemistry, acid-base theory, oxidation-reduction reactions, basic chemical kinetics, and chemical equilibrium. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 163L: Laboratory in College Chemistry  
(0-3) Cr. 1. F.S.SS.  
*Prereq: Credit or enrollment for credit in CHEM 163*  
Laboratory to accompany CHEM 163. Must be taken with CHEM 163. Only one of Chem 163L, CHEM 167L, and CHEM 177L may count toward graduation.

CHEM 167: General Chemistry for Engineering Students  
(4-0) Cr. 4. F.S.  
*Prereq: 1 year of high school chemistry or CHEM 50 and Math 140 or high school equivalent.*  
Principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 167L: Laboratory in General Chemistry for Engineering  
(0-3) Cr. 1. F.S.  
*Prereq: Credit or enrollment for credit in CHEM 167*  
Laboratory to accompany 167. Only one of Chem 163L, 167L, and 177L may count toward graduation.

CHEM 177: General Chemistry I  
(4-0) Cr. 4. F.S.SS.  
*Prereq: MATH 140 or high school equivalent, and CHEM 50 or 1 year high school chemistry, and credit or enrollment in CHEM 177L. Chemistry and biochemistry majors may consider taking CHEM 201*  
The first semester of a two semester sequence which explores chemistry at a greater depth and with more emphasis on concepts, problems, and calculations than 163. Recommended for physical and biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry courses. Principles and quantitative relationships, stoichiometry, chemical equilibrium, acid-base chemistry, thermochemistry, rates and mechanism of reactions, changes of state, solution behavior, atomic structure, periodic relationships, chemical bonding. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 177L: Laboratory in General Chemistry I  
(0-3) Cr. 1. F.S.SS.  
*Prereq: Credit or enrollment for credit in CHEM 177*  
Laboratory to accompany 177. 177L must be taken with 177. Only one of Chem 163L, 167L, and 177L may count toward graduation.
CHEM 177N: Laboratory in General Chemistry I
(0-3) Cr. 1. F.
Prereq: Credit or enrollment for credit in CHEM 177. For chemistry and biochemistry majors
Laboratory to accompany CHEM 177. CHEM 177N must be taken with CHEM 177. Only one of Chem 163L, CHEM 167L, and CHEM 177N may count toward graduation.

CHEM 178: General Chemistry II
(3-0) Cr. 3. F.S.SS.
Prereq: CHEM 177, CHEM 177L, or CHEM 167
Continuation of 177. Recommended for physical or biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry courses.

CHEM 178L: Laboratory in College Chemistry II
(0-3) Cr. 1. F.S.SS.
Prereq: CHEM 177L and credit or enrollment for credit in CHEM 178
Laboratory to accompany 178. 178L is not a necessary co-requisite with 178.

CHEM 201: Advanced General Chemistry
(5-0) Cr. 5. F.
Prereq: Co-enrollment in MATH 165 or credit, one year of high school chemistry, and one year high school physics or advanced chemistry. Co-enrollment in CHEM 201L.
A one-semester course in general chemistry designed to give students an in-depth, broad-based view of modern chemistry, and, in part, to facilitate participation in independent undergraduate research. Topics include stoichiometry, atomic and molecular structure, chemical bonding, kinetics, chemical equilibria, and thermodynamics. Discussion of current trends in various chemical disciplines, which may be given by guest experts in chemistry, biochemistry, and chemical engineering, will help the student appreciate the scope of the chemical sciences and how research is carried out. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 201L: Laboratory in Advanced General Chemistry
(0-3) Cr. 1. F.
Prereq: Credit or enrollment for credit in CHEM 201
Laboratory to accompany 201. Introductory lab experience in synthesis and analysis to prepare students for research activities. 201L must be taken with 201. Only one of 163L, 167L, 177L, 177N or 201L may count toward graduation.

CHEM 211: Quantitative and Environmental Analysis
(2-0) Cr. 2. F.S.
Prereq: CHEM 163 and CHEM 163L, CHEM 201 and CHEM 201L; or credit or enrollment in CHEM 178; and concurrent enrollment in CHEM 211L
Theory and practice of elementary volumetric, chromatographic, electrochemical and spectrometric methods of analysis. Chemical equilibrium, sampling, and data evaluation. Emphasis on environmental analytical chemistry; the same methods are widely used in biological and materials sciences as well.

CHEM 211L: Quantitative and Environmental Analysis Laboratory
(0-6) Cr. 2. F.S.
Prereq: Credit or enrollment for credit in CHEM 211
Introductory laboratory experience in volumetric, spectrometric, electrochemical and chromatographic methods of chemical analysis.

CHEM 231: Elementary Organic Chemistry
(3-0) Cr. 3. F.S.SS.
Prereq: CHEM 163, CHEM 163L, or CHEM 177, CHEM 177L or CHEM 167; credit or enrollment in CHEM 231L
A survey of modern organic chemistry including nomenclature, structure and bonding, and reactions of hydrocarbons and important classes of natural and synthetic organic compounds. For students desiring only an elementary course in organic chemistry. Students in physical or biological sciences and premedical or preveterinary curricula should take the full year sequence 331 and 332 (with the accompanying laboratories 331L and 332L). Only one of Chem 231 and 331 or BBMB 221 may count toward graduation.

CHEM 231L: Laboratory in Elementary Organic Chemistry
(0-3) Cr. 1. F.S.SS.
Prereq: Credit or enrollment for credit in CHEM 231; CHEM 163L or CHEM 177L
Laboratory to accompany 231. 231L must be taken with 231. Only one of Chem 231L and 331L may count toward graduation.

CHEM 298: Cooperative Education
Cr. R. Repeatable. F.S.SS.
Prereq: Permission of the Department cooperative education coordinator; sophomore classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

CHEM 299: Undergraduate Research (for Freshmen and Sophomores)
Cr. arr. Repeatable, maximum of 6 credits.
Prereq: Permission of staff member with whom student proposes to work
CHEM 301: Inorganic Chemistry
(2-0) Cr. 2. S.
Prereq: CHEM 324
Atomic and molecular structure and bonding principles; molecular shapes and symmetry; acids and bases; solid-state structures and properties; inorganic chemistry of H, B, C.

CHEM 316: Instrumental Methods of Chemical Analysis
(2-0) Cr. 2. F.
Prereq: CHEM 211, CHEM 211L, Math 166, and concurrent enrollment in CHEM 316L; PHYS 222 recommended
Quantitative and qualitative instrumental analysis. Operational theory of instruments, atomic and molecular absorption and emission spectroscopy, electroanalysis, mass spectrometry, liquid and gas chromatography, electrophoresis. Literature of chemical analysis.

CHEM 316L: Instrumental Analysis Laboratory
(0-6) Cr. 2. F.
Prereq: Credit or enrollment in CHEM 316
Advanced laboratory experience in UV-visible spectrophotometry, atomic absorption and emission spectroscopy, electrochemistry, gas and liquid chromatography, electrophoresis, mass spectrometry, and other instrumental methods.

CHEM 321L: Laboratory in Physical Chemistry
(1-3) Cr. 2. S.
Prereq: Credit or enrollment in CHEM 324 or CHEM 325.
Error analysis; use of computers for interfacing to experiments and for data analysis; thermodynamics, infrared and optical spectroscopy, lasers. Not applicable towards the B.S. degree in Chemistry. Only one of Chem 321L and 322L may count toward graduation.

CHEM 322L: Laboratory in Physical Chemistry
(1-6) Cr. 3. S.
Prereq: CHEM 324 or CHEM 325.
Error analysis; use of computers for interfacing to experiments and for data analysis; thermodynamics, surface science, infrared and optical spectroscopy, lasers. Only one of Chem 321L and 322L may count toward graduation.

CHEM 324: Introductory Quantum Mechanics
(3-0) Cr. 3. F.S.
Prereq: CHEM 178, MATH 166; PHYS 222 recommended.
Quantum mechanics, atomic and molecular structure, spectroscopy, kinetic theory of gases, chemical kinetics.

CHEM 325: Chemical Thermodynamics
(3-0) Cr. 3. F.S.
Prereq: CHEM 178, MATH 166; PHYS 222 recommended.
Classical thermodynamics 1st, 2nd, and 3rd laws with applications to gases and interfacial systems, multicomponent, multiphase equilibrium of reacting systems, surface chemistry, and electrochemical cells. Students taking a two-semester physical chemistry sequence are advised to take 324 first; in the spring semester, a molecular-based section of this course, stressing statistical thermodynamics, is offered for which knowledge of 324 is useful.

CHEM 326: Chemical Kinetics
Cr. 1. S.
Prereq: CHEM 167, 177, 178, or 201; MATH 166; CHEM 324 and 325 are recommended.
Kinetic theory, rate laws, temperature dependence of rate constants, transition-state theory, reaction mechanisms, kinetic isotope effects, catalysts, Michaelis-Menten kinetics, and Marcus theory.

CHEM 331: Organic Chemistry I
(3-0) Cr. 3. F.S.S.
Prereq: CHEM 178 or CHEM 201, enrollment in CHEM 331L highly recommended
The first half of a two semester sequence. Modern organic chemistry including nomenclature, synthesis, structure and bonding, reaction mechanisms. For students majoring in physical and biological sciences, premedical and pre-veterinary curricula, chemistry and biochemistry. Students desiring only one semester of organic chemistry should take 231 and 231L, not 331. Only one of Chem 231 and 331 may count toward graduation.

CHEM 331L: Laboratory in Organic Chemistry I
(0-3) Cr. 1. F.S.S.
Prereq: CHEM 177L; credit or enrollment for credit in CHEM 331
Laboratory to accompany 331. Chemistry and biochemistry majors are encouraged to take 333L. Only one of Chem 231L and 331L may count toward graduation.

CHEM 332: Organic Chemistry II
(3-0) Cr. 3. F.S.S.
Prereq: CHEM 331; enrollment in CHEM 332L highly recommended
Continuation of 331. Modern organic chemistry including nomenclature, synthesis, structure and bonding, reaction mechanisms, natural products, carbohydrates and proteins. For students majoring in physical and biological sciences, premedical and pre-veterinary curricula, chemistry and biochemistry.
CHEM 332L: Laboratory in Organic Chemistry II
(0-3) Cr. 1. F.S.S.
Prereq: CHEM 331L; credit or enrollment for credit in CHEM 332
Laboratory to accompany 332. Chemistry and biochemistry majors are encouraged to take 334L.

CHEM 333L: Laboratory in Organic Chemistry I (for Chemistry and Biochemistry Majors)
(0-6) Cr. 2. F.
Prereq: Credit or enrollment for credit in CHEM 331
Laboratory to accompany 331 for chemistry and biochemistry majors.

CHEM 334L: Laboratory in Organic Chemistry II (for Chemistry and Biochemistry Majors)
(0-6) Cr. 2. S.
Prereq: CHEM 333L, credit or enrollment for credit in CHEM 332
Laboratory to accompany 332 for chemistry and biochemistry majors.

CHEM 398: Cooperative Education
Cr. R. Repeatable. F.S.S.
Prereq: Permission of the Department cooperative education coordinator; junior classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

CHEM 399: Undergraduate Research
Cr. arr.
Prereq: Permission of instructor with whom student proposes to work and junior or senior classification
A comprehensive research report, describing the work performed, the justification or purpose of the research work, the results obtained, and including appropriate literature references/citations must be submitted to the undergraduate chemistry office and the research faculty member. Reports must contain a title, abstract, introduction, procedural details (experimental, computational, or theoretical), results, discussion, and references. No more than six total credits of Chem 399 and Chem 499 may count toward graduation. Credits earned in 399/499/490 may only be used to meet one of the advanced course requirements for the B.S. degree.

CHEM 401L: Inorganic Chemistry Laboratory
(0-3) Cr. 1. S.
Prereq: CHEM 402
Preparation and characterization of inorganic and organometallic compounds by modern techniques. For students majoring in chemistry or biochemistry.

CHEM 402: Advanced Inorganic Chemistry
(3-0) Cr. 3. F.
Prereq: CHEM 301; CHEM 331 recommended
Chemistry of the d and f metals. Structure, bonding, electronic spectra, and reaction mechanisms. Aspects of organometallic solid state and bioinorganic chemistry.

CHEM 490: Independent Study
Cr. arr.
Prereq: Completion of 6 credits in chemistry at the 300 level or higher and permission of instructor
No more than 9 credits of Chem 490 may count toward graduation.

CHEM 498: Cooperative Education
Cr. R. F.S.S.
Prereq: Permission of the Department cooperative education coordinator; senior classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

CHEM 499: Senior Research
Cr. 2-3. Repeatable, maximum of 6 credits.
Prereq: Permission of instructor with whom student proposes to work; B average in all chemistry, physics, and mathematics courses
Research in chosen area of chemistry. This course should be elected for two consecutive semesters. For students majoring in chemistry. A comprehensive and formal research report/senior thesis, describing the work performed, the justification or purpose of the research work, the results obtained, and including appropriate literature references/citations must be submitted to the undergraduate chemistry office and the research faculty member. Reports must contain a title, abstract, introduction, procedural details (experimental, computational, or theoretical), results, discussion, and references. No more than six total credits for Chem 399 and 499 may count toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

CHEM 501L: Inorganic Preparations
(0-3) Cr. 1. F.
Prereq: CHEM 402
Preparation and characterization of inorganic and organometallic compounds by modern research techniques.

CHEM 502: Advanced Inorganic Chemistry
(3-0) Cr. 3. F.
Prereq: CHEM 402; CHEM 331 recommended
Chemistry of the main group (s, p) and transition (d, f) metals. Structure, bonding, electronic spectra, and reaction mechanisms. Aspects of organometallic, solid state, bioinorganic, and nano chemistry.
CHEM 505: Physical Inorganic Chemistry
(3-0) Cr. 3. F.
Prereq: CHEM 402 or CHEM 502 and CHEM 324
Elementary group theory and molecular orbital theory applied to inorganic chemistry. Spectroscopic methods of characterization of inorganic compounds and organometallic compounds.

CHEM 511: Advanced Analytical Chemistry
(3-0) Cr. 3. F.
Prereq: CHEM 316 and CHEM 316L
General methods of quantitative inorganic and organic analysis. Aqueous and nonaqueous titrimetry; selective reagents; sampling and sample dissolution; modern instrumentation; sensors; atomic and molecular microscopy; bioanalytical methods; data evaluation; chemometrics; and analytical literature.

CHEM 512: Electrochemical Methods of Analysis
(3-0) Cr. 3. F.
Prereq: CHEM 316 and CHEM 316L; Recommended but not Required CHEM 324, and CHEM 322L

CHEM 513: Analytical Molecular and Atomic Spectroscopy
(3-0) Cr. 3. S.
Prereq: CHEM 316 and CHEM 316L, CHEM 324, CHEM 322L
Introduction to physical optics and design of photometric instruments. Principles of absorption, emission, fluorescence, and Raman spectroscopy. Error and precision of optical methods. Ultraviolet, visible, and infrared methods of qualitative and quantitative organic and inorganic analysis.

CHEM 516: Analytical Separations
(3-0) Cr. 3. F.
Prereq: CHEM 316 and CHEM 316L, CHEM 324, CHEM 322L
Principles and examples of inorganic and organic separation methods applied to analytical chemistry. Solvent extraction, volatilization, ion exchange, liquid and gas chromatography, and electrophoresis.

CHEM 531: Organic Synthesis I
(3-0) Cr. 3. S.
Prereq: CHEM 332
Survey of organic functional group transformations.

CHEM 532: Organic Synthesis II
(2-0) Cr. 2. F.
Prereq: CHEM 531
Synthesis of complex organic compounds including natural products.

CHEM 537: Physical Organic Chemistry I
(3-0) Cr. 3. F.
Prereq: CHEM 332
Survey of reactive intermediates including cations, anions, carbenes, and radicals.

CHEM 538: Physical Organic Chemistry II
(3-0) Cr. 3. S.
Prereq: CHEM 537
Molecular structure, stereochemistry, introduction to reaction mechanisms, thermodynamic and kinetic data, linear free energy relationships, isotope effects, orbital symmetry.

CHEM 550: Safety in the Chemical Laboratory
(1-0) Cr. 1. S.
Prereq: CHEM 332L
Introduction to laboratory safety and chemical hygiene. Use of engineering controls and personal protective equipment. Chemical storage and waste disposal practices. Handling hazardous chemicals. Radiation safety and laser safety. Offered on a satisfactory-fail basis only.

CHEM 555: Teaching College Chemistry
(2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: Graduate or senior classification.
Methods of instruction, strategies and techniques for effective teaching and learning along with practice teaching in undergraduate chemistry recitation and laboratory courses. Cooperative learning, guided-inquiry, learning cycles, conceptual change, models and modeling, concept maps, visualization, computer simulations, web-based delivery systems, and learning theories.

CHEM 561: Fundamentals of Quantum Mechanics
(4-0) Cr. 4. F.
Prereq: CHEM 324
Schroedinger equation and exact solutions; square wells and barriers; harmonic oscillator; the hydrogen atom; atomic orbitals; operators including angular momenta; time-independent and time-dependent perturbation theory; Schroedinger and Heisenberg representations; unitary operators; interaction picture, density matrix.

CHEM 562: Fundamentals of Atomic and Molecular Quantum Mechanics
(3-0) Cr. 3. S.
Prereq: CHEM 561, credit or enrollment in CHEM 583
Variational method, many electron atoms; addition of angular momentum, self-consistent field method for open and closed shells, linear combinations of atomic orbitals, origin of chemical bonding, many-electron diatomic and polyatomic molecules, treatments of electron correlation, approximation methods.
CHEM 563: Statistical Mechanics
(3-0) Cr. 3. S.
*Prereq: CHEM 325*
Microscopic and macroscopic properties, laws of thermodynamics, ensembles and distribution functions, applications to gases, solids, and chemical equilibrium.

CHEM 564: Molecular Spectroscopy and Structure
(3-0) Cr. 3. Alt. S., offered even-numbered years.
*Prereq: CHEM 505 or CHEM 562*
Maxwell's field equations, interaction of light with matter including time-dependent perturbation theory, microwave, vibrational (infra-red, Raman) and electronic spectroscopies, symmetry derived selection rules, special lineshapes and introduction to nonlinear and coherent laser spectroscopies.

CHEM 571: Solid-State Chemistry
(2-0) Cr. 2. Alt. S., offered even-numbered years.
*Prereq: CHEM 301, CHEM 324*
Structural principles, synthetic strategies, analytical methods, and chemical bonding issues applied to solids. Atomic packings and networks, short-range vs. long-range order, defects; phase diagrams, reactive fluxes, chemical transport; diffraction, spectroscopy; energy bands and their bonding interpretations.

CHEM 572: Spectrometric Identification of Organic Compounds
(2-3) Cr. 3. F.
*Prereq: CHEM 332*
Principles of infrared, ultraviolet, nuclear magnetic resonance, and mass spectroscopy as applied to organic chemistry.

CHEM 573: Nanochemistry
(2-0) Cr. 2. Alt. S., offered odd-numbered years.
*Prereq: CHEM 301, CHEM 324*
Synthesis, characterization, properties and applications of nanoscale materials (∼ 0.5-500 nm), relationship with molecular, meso and bulk compounds. Chemistry of solid surfaces, zero-, one- and two-dimensional (0D, 1D, 2D) nanostructures, semiconductor quantum dots, plasmonic nanoparticles, carbon nanomaterials, porous nanomaterials, potential health and safety impacts.

CHEM 574: Organometallic Chemistry of the Transition Metals
(2-0) Cr. 2. Alt. S., offered odd-numbered years.
*Prereq: CHEM 301, CHEM 332*
Transition metal complexes with ligands such as cyclopentadienyl, olefins, acetylenes, benzenes, and carbon monoxide. Coverage of structure, bonding, reactivity, fundamental mechanisms, and homogeneous catalysis.

CHEM 575: Diffraction and Crystal Structure
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
*Prereq: CHEM 324*
Fundamentals of structure determination for single crystals emphasizing symmetry, diffraction geometry and instrumentation, sample preparation and handling, data collection strategies, methods of structure solution and refinement, presentation of results, and crystallographic databases.

CHEM 576: Surface Chemistry
(3-0) Cr. 3. Alt. F., offered even-numbered years.
*Prereq: CHEM 324*
Gas-surface interactions and techniques of characterization. Idealized surface lattices, surface tension, Wulff plots, work function, adsorbate-adsorbate interactions, 2D phase diagrams, diffusion, thin film growth, adsorption and desorption mechanisms/energetics/kinetics, adsorption isotherms, vacuum techniques, electron- and ion-based spectroscopies for surface analysis (including AES, FIM, XPS, UPS, EXAFS, EELS, SIMS, LEED and STM).

CHEM 577: Mass Spectrometry
(3-0) Cr. 3. S.
Basic physics, instrumentation, chemical and biological applications of mass spectrometry.

CHEM 578: Chemical Kinetics and Mechanisms
(2-0) Cr. 2. Alt. S., offered even-numbered years.
*Prereq: CHEM 324*
Rates and mechanisms; reversible, consecutive, and competing reactions; chain mechanisms; kinetic isotope effects; very rapid reactions; acid-base catalysis, theories of unimolecular reactions; transition state and Marcus theories.

CHEM 579: Introduction to Research in Chemistry
Cr. R. F.
Introduction to the various areas of research in chemistry at Iowa State University.

CHEM 580: Introduction to Computational Quantum Chemistry
(3-0) Cr. 3. Alt. F., offered odd-numbered years.
*Prereq: CHEM 324*
Basic principles of quantum mechanics, schrodinger equation. Hartree-Fock/molecular orbital theory, introduction to group theory, introduction to modern methods of computational chemistry; applications include molecular structure, potential energy surfaces and their relation to chemical reactions; molecular spectroscopy, photochemistry, solvent effects and surface chemistry.
CHEM 583: Chemical Group Theory
(1-0) Cr. 1. F.
Prereq: CHEM 324
Basic concepts and theorems, representation theory; point groups, molecular orbitals, molecular states, molecular vibrations, rotation group and angular momenta; space groups and crystals; permutation group, antisymmetry, and spin states.

CHEM 599: Nonthesis Research
Cr. arr.
Prereq: Permission of instructor concerned

Courses for graduate students:

CHEM 600: Seminar in Inorganic Chemistry
(1-0) Cr. 1. Repeatable, maximum of 3 times. F.S.
Prereq: Permission of instructor

CHEM 601: Selected Topics in Inorganic Chemistry
(2-0) Cr. 1-2. F.S.
Prereq: Permission of instructor
Topics such as molecular structure and bonding; organometallic compounds; physical techniques of structure determination; nonaqueous solutions; Zintl phases; transition-metal oxides; free-radical reactions; electron transfer reactions; metal-metal bonding; and bioinorganic chemistry of nucleic acids.

CHEM 611: Seminar in Analytical Chemistry
(1-0) Cr. 1. Repeatable. F.S.
Prereq: Permission of instructor

CHEM 619: Special Topics in Analytical Chemistry
(2-0) Cr. 1-2. Repeatable. F.S.
Prereq: Permission of instructor
Raman spectroscopy, sensors, spectroelectrochemistry, capillary electrophoresis, analytical plasmas, chemometrics and bioanalytical chemistry.

CHEM 631: Seminar in Organic Chemistry
(1-0) Cr. 1. Repeatable. F.S.
Prereq: Permission of instructor

CHEM 632: Selected Topics in Organic Chemistry
(2-0) Cr. 1-2. Repeatable. F.S.
Prereq: CHEM 537
Topics of current interest in organic chemistry such as spectroscopy, physical organic chemistry, photochemistry, organometallic chemistry, mechanisms of oxidations and reductions, modern organic synthesis, reactive intermediates, bioorganic chemistry, and polymers.

CHEM 660: Seminar in Physical Chemistry
(1-0) Cr. 1. Repeatable. S.
Prereq: Permission of instructor

CHEM 667: Special Topics in Physical Chemistry
(2-0) Cr. 1-2. F.S.
Prereq: Permission of instructor
Advanced and recent developments in physical chemistry are selected for each offering.

CHEM 699: Research
Cr. arr. Repeatable.
Prereq: Permission of instructor

Chinese (CHIN)

Any experimental courses offered by CHIN can be found at:
registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)

Courses primarily for undergraduates:

CHIN 101: Elementary Mandarin Chinese I
(4-0) Cr. 4. F.
Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters. For students whose native language is not Chinese.

CHIN 102: Elementary Mandarin Chinese II
(4-0) Cr. 4. S.
Prereq: CHIN 101
Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters. For students whose native language is not Chinese.
Meets International Perspectives Requirement.

CHIN 201: Intermediate Mandarin Chinese I
(4-0) Cr. 4. F.
Prereq: CHIN 102
Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, intensification of character acquisition. For students whose native language is not Chinese.
Meets International Perspectives Requirement.

CHIN 202: Intermediate Mandarin Chinese II
(4-0) Cr. 4. S.
Prereq: CHIN 201
Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, intensification of character acquisition. For students whose native language is not Chinese.
Meets International Perspectives Requirement.
CHIN 272: Introduction to Chinese Culture
(3-0) Cr. 3. S.
Interdisciplinary introduction to Chinese society and culture from earliest
times to the present. Topics include ancient literature, philosophy,
religion, art, architecture, customs, transition to a modern society, social
changes, urban life, popular culture, and contemporary values and ideas.
Meets International Perspectives Requirement.

CHIN 301: Advanced Mandarin Chinese I
(3-0) Cr. 3. F.
Prereq: CHIN 202 or equivalent
Continuing development of speaking, writing, reading, and listening skills
beyond intermediate level. Expansion of cultural literacy through a variety
of texts from the humanities, social sciences, mass media and business.
Native speakers of Chinese by instructor’s permission only.
Meets International Perspectives Requirement.

CHIN 302: Advanced Mandarin Chinese II
(3-0) Cr. 3. S.
Prereq: CHIN 301 or equivalent
Continuing development of speaking, writing, reading, and listening skills
beyond intermediate level. Expansion of cultural literacy through a variety
of texts from the humanities, social sciences, mass media and business.
Native speakers of Chinese by instructor’s permission only.
Meets International Perspectives Requirement.

CHIN 304: Chinese for Global Professionals
(4-0) Cr. 4. S.
Prereq: CHIN 202 or equivalent
Introduction to professional language and culture in China and Chinese-
speaking regions in Asia. Development of all four language skills,
focusing on practical applications in the professional contexts.
Development of global awareness and cross-cultural understanding.
Preparation for internships.
Meets International Perspectives Requirement.

CHIN 370: Chinese Literature in English Translation
(3-0) Cr. 3. Repeatable. F.
Prereq: ENGL 150 or equivalent
Topics may include traditional prose, poetry, novel and drama; twentieth-
century fiction and film. All readings and class discussions in English.
Meets International Perspectives Requirement.

CHIN 375: China Today
(3-2) Cr. 3-4. Repeatable. S.
Prereq: ENGL 250 or equivalent
Focusing on contemporary society, culture, literature and the arts. All
readings, discussions, and papers in English. Topics vary from year to
year.
Meets International Perspectives Requirement.

CHIN 378: Chinese Film and Society
Cr. 3. S.
Prereq: ENGL 150 or equivalent
Survey of Chinese cinematic history from 1896 to the present against the
background of China’s constant sociocultural transformation; emphasis
on narrative themes, film history, and film criticism. Topics vary according
to faculty interest. Taught in English.
Meets International Perspectives Requirement.

CHIN 403: Seminar in Chinese Language and Culture
(3-0) Cr. 3.
Prereq: CHIN 302 or equivalent
Critical understanding of authentic texts at the advanced level through
reading, translation, and/or application in professional contexts;
consolidation of existing language skills, in-depth analysis of cultural
issues, and development of professional language proficiency. Taught in
Chinese.
Meets International Perspectives Requirement.

CHIN 403A: Seminar in Chinese Language and Culture: Translating
Contemporary Chinese Texts
(3-0) Cr. 3.
Prereq: CHIN 302
Critical understanding of authentic texts at the advanced level through
reading, translation, and/or application in professional contexts;
consolidation of existing language skills, in-depth analysis of cultural
issues, and development of professional language proficiency. Taught in
Chinese.
Meets International Perspectives Requirement.

CHIN 403B: Seminar in Chinese Language and Culture: Topics on
Business and Professions
(3-0) Cr. 3.
Prereq: CHIN 302 or equivalent
Critical understanding of authentic texts at the advanced level through
reading, translation, and/or application in professional contexts;
consolidation of existing language skills, in-depth analysis of cultural
issues, and development of professional language proficiency. Taught in
Chinese.
Meets International Perspectives Requirement.
CHIN 403C: Seminar in Chinese Language and Culture: Reading Chinese Texts  
(3-0) Cr. 3.  
Prereq: CHIN 302 or equivalent  
Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese.  
Meets International Perspectives Requirement.

CHIN 490: Independent Study  
Cr. 1-6. Repeatable.  
Prereq: 6 credits in Chinese and permission of department chair  
Designed to meet student needs in areas beyond current course offerings or to accommodate the desire to integrate a study of literature or language with special issues in major fields.

CHIN 499: Internship in Chinese  
Cr. 1-3. Repeatable, maximum of 6 credits.  
Prereq: 9 credits of Chinese at the 300 level; permission of advisor and WLC Internship Coordinator  
Work experience using Chinese in the public or private sector, combined with academic work under faculty supervision. Offered on a satisfactory-fail basis only. No more than 3 credits may apply toward the Chinese minor or LCP minor.

Civil Engineering (C E)  
Any experimental courses offered by C E can be found at: registrar.iastate.edu/faculty-staff/courses/explistings/ (http://www.registrar.iastate.edu/faculty-staff/courses/explistings/)  
Courses primarily for undergraduates:

C E 111: Fundamentals of Surveying I  
(2-3) Cr. 3. F.S.  
Prereq: MATH 165, C E 160, C E 170  

C E 120: Civil Engineering Learning Community  
(1-0) Cr. 1. F.S.  
Integration of first-year students into the Civil Engineering program. Assignments and activities involving teamwork, academic preparation, study skills, and preparation for entry into the Civil Engineering profession. Completed both individually and in learning teams under the direction of faculty and peer mentors.

C E 160: Engineering Problems with Computational Laboratory  
(2-2) Cr. 3. F.S.  
Prereq: Credit or enrollment in MATH 165  
Engineering approach to solving problems and presenting results with applications to examples in civil, construction, and environmental engineering, such as problems in statics. Dimensions and units. Data processing, graphing, and curve fitting. Formulating and solving fundamental and practical engineering problems with spreadsheets and a structured programming language. Only one of ENGR 160, A B E 160, AER E 160, C E 160, CH E 160, CPR E 185, E E 185, I E 148, M E 160, and S E 185 may count towards graduation.

C E 170: Graphics for Civil Engineering  
(0-4) Cr. 2. F.S.  
Prereq: Satisfactory scores on mathematics placement assessments; credit or enrollment in MATH 143 or MATH 145  
Integration of fundamental graphics, computer modeling, and engineering design. Applications of multiview drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process. Freehand and computer methods.

C E 190: Introduction to Undergraduate Research in Civil and Environmental Engineering  
(Cross-listed with ENV E). Cr. 2. Repeatable, maximum of 4 times.  
Prereq: Permission of instructor  
Introduction to research, focusing on sub-disciplines of civil and environmental engineering. Research questions, hypotheses, literature reviews, experimental design, data collection, data analysis, and presentation. Topics chosen to introduce students to water resources, environmental engineering, transportation engineering, geotechnical/materials engineering, or structural engineering. Repeatable but only two credits may count toward graduation in C E.

C E 206: Engineering Economic Analysis and Professional Issues in Civil Engineering  
(3-0) Cr. 3. F.S.  
Prereq: MATH 166, ENGL 250; C E 120 or equivalent; ECON 101 recommended  
Engineering/managerial analysis of the economic aspects of project proposals. Alternative sources of funds; time value of money; expenditure of capital funds and methods of evaluating alternative projects. Professionalism, licensure, liability, ethics, leadership, risk analysis, social responsibility, creative and critical thinking, and applications/impacts of regulations in civil engineering.
C E 274: Engineering Statics
(3-0) Cr. 3. F.S.SS.
Prereq: PHYS 231 and PHYS 231L, credit or enrollment in MATH 166
Vector analysis; analysis of force systems; resultant in two and three dimensions; free-body diagrams; equilibrium; analysis of trusses, frames, and machines; friction, belts and pulleys; shear and bending moment in beams, centroid and center of mass; second moments of areas.

C E 306: Project Management for Civil Engineers
(2-3) Cr. 3. F.S.
Prereq: C E 120 or ENV E 120 and C E 170 or ENV E 190
Project management, including work breakdown structures, cost estimating, scheduling, and project control. Civil engineering project life cycle, including planning, design, construction, and maintenance processes. Techniques in interpretation of contract documents, plan reading, and in estimating quantities.

C E 326: Principles of Environmental Engineering
(2-2) Cr. 3. F.S.
Prereq: CHEM 167 or CHEM 177 and CHEM 178, MATH 166, credit or enrollment in E M 378
Introduction to environmental problems, water quality indicators and requirements, potable water quality and quantity objectives, water sources and treatment methods; water pollution control objectives and treatment methods; survey of solid and hazardous waste management and air pollution control.

C E 332: Structural Analysis I
(2-2) Cr. 3. F.S.
Prereq: E M 324
Loads, shear, moment, and deflected shape diagrams for beams and framed structures. Deformation calculations. Approximate methods. Application of consistent deformation methods to continuous beams and frames. Application of displacement or slope deflection methods to continuous beams and frames without sway. Influence lines for determinate and indeterminate structures. Computer applications to analyze beams and frames. Validation of computer results.

C E 333: Structural Steel Design I
(3-1) Cr. 3. F.S.
Prereq: C E 332, E M 327

C E 334: Reinforced Concrete Design I
(2-2) Cr. 3. F.S.
Prereq: C E 332, E M 327
ACI design methods for structural concrete members. Emphasis on the analysis and design for flexure of singly reinforced and doubly reinforced sections, T-section, one-way slabs, short columns, and isolated footings. Analysis and design for shear, and serviceability. Bond, anchorage, and development of reinforcement.

C E 355: Principles of Transportation Engineering
(3-0) Cr. 3. F.S.
Prereq: C E 111
Introduction to planning, design, and operations of transportation facilities. Road user, vehicle and roadway characteristics. Technological, economic and environmental factors. Asset management, transportation planning, capacity analysis, traffic control, geometric design, traffic safety.

C E 360: Geotechnical Engineering
(3-3) Cr. 4. F.S.
Prereq: E M 324, credit or enrollment in GEOL 201 or CON E 241
Introduction to geotechnical engineering and testing. Identification and classification tests, soil water systems, principles of settlement, stresses in soils, and shear strength testing; slope stability, retaining walls, bearing capacity.

C E 372: Engineering Hydrology and Hydraulics
(3-0) Cr. 3. F.S.
Prereq: E M 378, a course in statistics from the approved department list
The hydrologic cycle: precipitation, infiltration, runoff, evapotranspiration, groundwater, and streamflow. Hydrograph analysis, flood routing, frequency analysis and urban hydrology. Applied hydraulics including pipe and channel flow with design applications in culverts, pumping, water distribution, storm and sanitary sewer systems. Design project required.

C E 382: Design of Concretes
(2-3) Cr. 3. F.S.
Prereq: E M 274
Physical and chemical properties of bituminous, portland, and other cements; aggregate properties and blending; mix design and testing of concretes; admixtures, mixing, handling, placing and curing; principles of pavement thickness design.

C E 383: Design of Portland Cement Concrete
(0-2) Cr. 1. F.S.
Prereq: E M 274
For Con E students only. Physical and chemical properties of portland cement and p.c. concrete. Mix design and testing of p.c. concrete. Credit for both C E 382 and C E 383 may not be applied for graduation.
C E 388: Sustainable Engineering and International Development
(Cross-listed with A B E, E E). (2-2) Cr. 3. F.
Prereq: Junior classification in engineering
Multi-disciplinary approach to sustainable engineering and international
development, sustainable development, appropriate design and
engineering, feasibility analysis, international aid, business development,
philosophy and politics of technology, and ethics in engineering.
Engineering-based projects from problem formulation through
implementation. Interactions with partner community organizations or
international partners such as nongovernment organizations (NGOs).
Course readings, final project/design report.
Meets International Perspectives Requirement.

C E 395: Global Perspectives in Transportation
Cr. 3. Repeatable, maximum of 2 times. S.
Background on historical civil engineering design and construction.
Impacts of historical, cultural, social, economic, ethical, environmental,
and political conditions on the design and construction of various
infrastructure projects outside the United States. Global road safety and
intermodal operations. Addressing transportation problems in a large
metropolitan area.
Meets International Perspectives Requirement.

C E 396: Summer Internship
Cr. R. Repeatable. SS.
Prereq: Permission of department and Engineering Career Services
Summer professional work period. Students must register for this course
prior to commencing work. Offered on a satisfactory-fail basis only.

C E 398: Cooperative Education (Co-op)
Cr. R. Repeatable. F.S.
Prereq: Permission of department and Engineering Career Services
Professional work period. One semester per academic or calendar year.
Students must register for this course before commencing work. Offered
on a satisfactory-fail basis only.

C E 403: Program and Outcome Assessment
Cr. R. F.S.
Prereq: Verification of undergraduate application for graduation by the end
of the first week of class. Permission of instructor for students who are
scheduled for summer graduation
Assessment of C E Curriculum and educational objectives. Assessments
to be reviewed by the CE Department to incorporate potential
improvements. Offered on a satisfactory-fail basis only.

C E 413: Applied and Environmental Geophysics
(Dual-listed with C E 513). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3. Alt.
S., offered odd-numbered years.
Prereq: GEOL 100 or GEOL 201, algebra and trigonometry
Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-
penetrating radar techniques for shallow subsurface investigations
and imaging. Data interpretation methods. Lab emphasizes computer
interpretation packages. Field work with seismic - and resistivity-imaging
systems and radar.

C E 417: Land Surveying
(2-3) Cr. 3. S.
Prereq: C E 111
Legal principles affecting the determination of land boundaries,
public domain survey systems. Locating sequential and simultaneous
conveyances. Record research, plat preparation, and land description.
Study of selected court cases.

C E 420: Environmental Engineering Chemistry
(Dual-listed with C E 520). (Cross-listed with ENSCI). (2-3) Cr. 3. F.
Prereq: C E 326, CHEM 178
Principles of chemical and physical phenomena applicable to the
treatment of water and wastewater and natural waters; including
chemical equilibria, reaction kinetics, acid-base equilibria, chemical
precipitation, redox reactions, and mass transfer principles. Individual
laboratory practicals and group projects required.

C E 421: Environmental Biotechnology
(Dual-listed with C E 521). (2-2) Cr. 3. F.
Prereq: C E 326
Fundamentals of biochemical and microbial processes applied to
environmental engineering processes, role of microorganisms in
wastewater treatment and bioremediation, bioenergetics and kinetics,
metabolism of xenobiotic compounds, waterborne pathogens and
parasites, and disinfection. Term paper and oral presentation.

C E 424: Air Pollution
(Dual-listed with C E 524). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 231 and PHYS 231L or CHEM 178 and either MATH 166 or
3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D
and E.

C E 424A: Air Pollution: Air quality and effects of pollutants
(Dual-listed with C E 524A). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 231 and PHYS 231L or CHEM 178 and either MATH 166 or
3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D
and E.
C E 424B: Air Pollution: Climate change and causes
(Dual-listed with C E 524B). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 231 and PHYS 231L or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 424C: Air Pollution: Transportation Air Quality
(Dual-listed with C E 524C). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: C E 524A; PHYS 231 and PHYS 231L or CHEM 178; MATH 166 or 3 credits in statistics. Senior classification or above.

C E 424D: Air Pollution: Off-gas treatment technology
(Dual-listed with C E 524D). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: C E 524A, C E 524B; Either PHYS 231 and PHYS 231L or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above.

C E 424E: Air Pollution: Agricultural sources of pollution
(Dual-listed with C E 524E). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 231 and 231L or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 428: Water and Wastewater Treatment Plant Design
(2-2) Cr. 3. S.
Prereq: C E 326
Physical, chemical and biological processes for the treatment of water and wastewater including coagulation and flocculation, sedimentation, filtration, adsorption, chemical oxidation/disinfection, fixed film and suspended growth biological processes and sludge management. Design project.

C E 439: Seismic Methods in Geology, Engineering, and Petroleum Exploration
(Dual-listed with C E 539). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered even-numbered years.
Prereq: GEOL 100 or GEOL 201, algebra and trigonometry
Physics of elastic-wave propagation. Seismic surveys in environmental imaging, engineering, and petroleum exploration. Reflection and refraction techniques. Data collection, processing, and geological interpretation. Field work with state-of-the-art equipment.

C E 446: Bridge Design
(Dual-listed with C E 546). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: C E 333, C E 334

C E 448: Building Design
(Dual-listed with C E 548). (2-2) Cr. 3. Alt. S., offered even-numbered years.
Prereq: C E 333, C E 334

C E 449: Structural Health Monitoring
(Dual-listed with C E 549). (3-0) Cr. 3.
Prereq: Senior classification in Engineering or permission of instructor
Introductory and advanced topics in structural health monitoring (SHM) of aeronautical, civil, and mechanical systems. Topics include sensors, signal processing in time and frequency domains, data acquisition and transmission systems, design of integrated SHM solutions, nondestructive evaluation techniques, feature extraction methods, and cutting-edge research in the field of SHM. Graduate students will have a supervisory role to assist students in 449 and an additional design project or more in-depth analysis and design.

C E 451: Urban Transportation Planning Models
(Dual-listed with C E 551). (3-0) Cr. 3. F.
Prereq: C E 355 and a course in statistics from the approved departmental list
Urban transportation planning context and process. Project planning and programming. Congestion, mitigation, and air quality issues. Transportation data sources. Travel demand and network modeling. Use of popular travel demand software and applications of geographic information systems.

C E 453: Highway Design
(2-2) Cr. 3. F.
Prereq: C E 306, C E 355
Introduction to highway planning and design. Design, construction, and maintenance of highway facilities. Level-of-service, stopping sight distance, highway alignment, earthwork and pavement design. Design project, oral reports and written reports. Computer applications.
C E 460: Foundation Engineering  
(3-0) Cr. 3. F.S.  
**Prereq: C E 360**  

C E 462: Site Evaluations for Civil Engineering Projects  
(Dual-listed with C E 562). (2-3) Cr. 3.  
**Prereq: C E 360 or instructor approval**  
Identification and mapping of engineering soils from aerial photos, maps, and soil surveys. Planning subsurface investigations, geomaterials prospecting, geotechnical hazards, geomorphology, in situ testing and sampling, geophysical site characterization, instrumentation and monitoring, interpretation of engineering parameter values for design.

C E 467: Geomaterials Stabilization  
(Dual-listed with C E 567). (2-2) Cr. 3.  
**Prereq: C E 360, C E 382 or C E 383, or instructor approval**  
Soil and aggregate physical, chemical and biological stabilization procedures. Stabilization analysis and design. Ground modification and compaction methods. Geosynthetics application and design.

C E 473: Groundwater Hydrology  
(Dual-listed with C E 573). (3-0) Cr. 3. F.  
**Prereq: C E 372**  

C E 483: Pavement Analysis and Design  
(Dual-listed with C E 583). (3-0) Cr. 3. S.  
**Prereq: C E 360 and C E 382**  
Analysis, behavior, performance, and structural design of pavement systems. Topics include climate factors, rehabilitation, life cycle design economics, material and system response, pavement foundations and traffic loadings. Development of models for and analysis of pavement systems. Use of transfer functions relating pavement response to pavement performance. Evaluation and application of current and evolving pavement design practices and procedures. Mechanistic-based pavement design techniques and concepts. Analysis of the effects of maintenance activities on pavement performance and economic evaluation of pavement systems. Design project.

C E 484: Advanced Design of Concretes  
(Dual-listed with C E 584). (2-3) Cr. 3.  
**Prereq: C E 382**  
Asphalt binder characterization, fundamentals of asphalt rheology, asphalt materials behavior under loading and temperature effects. High-strength, lightweight, fiber-reinforced, and self-consolidating portland cement concretes, mix design, properties, advanced performance testing. Design project.

C E 485: Civil Engineering Design  
(2-2) Cr. 3. F.S.  
**Prereq: C E 206, C E 306, C E 326, C E 333 or C E 334, C E 355, C E 360, C E 372, C E 382, SP CM 212. Course enrollment limited to final graduating semester.**  
The civil engineering design process, interacting with the client, identification of the engineering problems, development of a technical proposal, identification of design criteria, cost estimating, planning and scheduling, codes and standards, development of feasible alternatives, selection of best alternative, and oral presentation.

C E 488: Sustainable Civil Infrastructure Systems  
(Dual-listed with C E 588). (3-0) Cr. 3. F.  
**Prereq: Junior or higher classification in engineering or science**  
Sustainable planning, life cycle analysis, appropriate engineering design, investment levels and overall rating of civil engineering infrastructure systems, including highway, bridge, airport, rail, dam, power and port facilities. Complementary assessment of future civil infrastructure sustainability impacts and challenges in relation to autonomous and electric vehicle development. Overview regarding US and global availability and supply of critical infrastructure commodities (e.g., cement, stone, metals, phosphorus, uranium, etc.). Directed course readings and multiple project/design reports.

C E 489: Pavement Preservation and Rehabilitation  
(Dual-listed with C E 589). Cr. 3. F.S.  
**Prereq: C E 382**  
Overview of pavement preservation and pavement rehabilitation techniques. Overview and selection of materials used in pavement preservation and rehabilitation strategies. Evaluating suitability of pavement preservation and pavement rehabilitation strategies based on existing structure, pavement distresses and non-condition factors. Use of recycled pavement materials in pavement reconstruction techniques.

C E 490: Independent Study  
Cr. 1-3. Repeatable. F.S.SS.  
**Prereq: Permission of instructor**  
Independent study in any phase of civil engineering. Pre-enrollment contract required. No more than 6 credits of C E 490 may be counted towards engineering topics electives.
C E 490H: Independent Study: Honors
Cr. 1-3. Repeatable. F.S.S.
Prereq: Permission of instructor
Independent study in any phase of civil engineering. Pre-enrollment contract required. No more than 6 credits of C E 490H may be counted towards engineering topics electives.

Courses primarily for graduate students, open to qualified undergraduates:

C E 501: Preconstruction Project Engineering and Management
(3-0) Cr. 3.
Prereq: Credit or enrollment in CON E 422 or C E 306 or graduate standing
Application of engineering and management control techniques to construction project development from conceptualization to notice to proceed. Emphasis is on managing complex projects using 5-dimensional project management theory.

C E 502: Construction Project Engineering and Management
(3-0) Cr. 3.
Prereq: Credit or enrollment in CON E 422 or C E 594A or permission of instructor
Application of engineering and management control techniques to complex construction projects. Construction project control techniques, project administration, construction process simulation, quality management, and productivity improvement programs.

C E 503: Construction Finance and Business Management
(3-0) Cr. 3.
Prereq: Credit or enrollment in CON E 422 or C E 594A or permission of instructor

C E 505: Design of Construction Systems
(3-0) Cr. 3.
Prereq: C E 333, C E 360, CON E 322, CON E 340; or graduate standing
Advanced design of concrete formwork and falsework systems. Design for excavation and marine construction including temporary retaining structures and cofferdams. Aggregate production operations, including blasting, crushing, and conveying systems. Rigging system design.

C E 506: Case Histories in Construction Documents
(3-0) Cr. 3.
Prereq: Graduate standing or permission of instructor
Study of cases involving disputes, claims, and responsibilities encountered by management in construction contract documents. Analysis of methods of resolving differences among the owner, architect, engineer, and construction contractor for a project.

C E 510: Information Technologies for Construction
(3-0) Cr. 3.
Prereq: Graduate standing or permission of instructor
Information technologies including microcomputer based systems, management information systems, automation technologies, computer-aided design, and expert systems and their application in the construction industry. Overview of systems acquisition, communications, and networking.

C E 513: Applied and Environmental Geophysics
(Dual-listed with C E 413). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: GEOL 100 or GEOL 201, algebra and trigonometry
Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar.

C E 520: Environmental Engineering Chemistry
(Dual-listed with C E 420). (Cross-listed with ENSCI). (2-3) Cr. 3. F.
Prereq: C E 326, CHEM 178
Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions, and mass transfer principles. Individual laboratory practicals and group projects required.

C E 521: Environmental Biotechnology
(Dual-listed with C E 421). (Cross-listed with ENSCI). (2-2) Cr. 3. F.
Prereq: C E 326
Fundamentals of biochemical and microbial processes applied to environmental engineering processes, role of microorganisms in wastewater treatment and bioremediation, bioenergetics and kinetics, metabolism of xenobiotic compounds, waterborne pathogens and parasites, and disinfection. Term paper and oral presentation.
C E 522: Water Pollution Control Processes
(Cross-listed with ENSCI). (2-2) Cr. 3.
Prereq: C E 421 or C E 521
Fundamentals of biochemical processes, aerobic growth in a single CSTR, multiple events in complex systems, and techniques for evaluating kinetic parameters; unit processes of activated sludge system, attached growth systems, stabilization and aerated lagoon systems, biosolids digestion and disposal, nutrient removal, and anaerobic treatment systems.

C E 523: Physical-Chemical Treatment Process
(Cross-listed with ENSCI). (2-2) Cr. 3.
Prereq: C E 520
Material and energy balances. Principles and design of physical-chemical unit processes; including screening, coagulation, flocculation, chemical precipitation, sedimentation, filtration, lime softening and stabilization, oxidation, adsorption, membrane processes, ion exchange and disinfection; recovery of resources from residuals and sludges; laboratory exercises and demonstrations; case studies in mineral processing and secondary industries.

C E 524: Air Pollution
(Dual-listed with C E 424). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 231 and PHYS 231L or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 524A: Air Pollution: Air quality and effects of pollutants
(Dual-listed with C E 424A). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 231 and PHYS 231L or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 524B: Air Pollution: Climate change and causes
(Dual-listed with C E 424B). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 231 and PHYS 231L or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 524C: Air Pollution: Transportation Air Quality
(Dual-listed with C E 424C). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: C E 524A; PHYS 231 and PHYS 231L or CHEM 178; MATH 166 or 3 credits in statistics. Senior classification or above.

C E 524D: Air Pollution: Off-gas treatment technology
(Dual-listed with C E 424D). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: C E 524A, C E 524B; Either PHYS 231 and PHYS 231L or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

C E 524E: Air Pollution: Agricultural sources of pollution
(Dual-listed with C E 424E). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 231 and 231L or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 528: Solid and Hazardous Waste Management
(Cross-listed with ENSCI). (3-0) Cr. 3.
Prereq: C E 326 or background courses in both environmental chemistry and microbiology; junior or higher standing
Evaluation, characterization, assessment, planning and design of solid and hazardous waste management systems, regulatory requirements, material characterization and collection, minimization and recycling, energy and materials recovery, composting, off-gas treatment, incineration, stabilization, and landfill design. Design of treatment and disposal systems, including physical, chemical, and biological treatment, solidification, incineration, secure landfill design, and final disposal site closure plus restoration.

C E 532: Structural Analysis II
(3-0) Cr. 3. F.
Prereq: C E 332
Analysis of indeterminate structural problems by the consistent deformation and generalized direct displacement methods. Direct stiffness method for 2-D frames, grids, 3-D frames. Special topics for the stiffness method.

C E 533: Structural Steel Design II
(3-0) Cr. 3.
Prereq: C E 333
C E 534: Reinforced Concrete Design II
(2-2) Cr. 3.
Prereq: C E 334

C E 535: Prestressed Concrete Structures
(3-0) Cr. 3.
Prereq: C E 334
Design of prestressed concrete structures, review of hardware, stress calculations, prestress losses, section proportioning, flexural design, shear design, deflections, and statically indeterminate structures.

C E 539: Seismic Methods in Geology, Engineering, and Petroleum Exploration
(Dual-listed with C E 439). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered even-numbered years.
Prereq: GEOL 100 or GEOL 201, algebra and trigonometry
Physics of elastic-wave propagation. Seismic surveys in environmental imaging, engineering, and petroleum exploration. Reflection and refraction techniques. Data collection, processing, and geological interpretation. Field work with state-of-the-art equipment.

C E 541: Dynamic Analysis of Structures
(3-0) Cr. 3.
Prereq: E M 345 and credit or enrollment in C E 532

C E 542: Structural Analysis by Finite Elements
(3-0) Cr. 3.
Prereq: C E 532

C E 545: Seismic Design
(3-0) Cr. 3.
Prereq: C E 333, C E 334

C E 546: Bridge Design
(Dual-listed with C E 446). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: C E 333, C E 334

C E 548: Building Design
(Dual-listed with C E 448). (2-2) Cr. 3. Alt. S., offered even-numbered years.
Prereq: C E 333, C E 334

C E 549: Structural Health Monitoring
(Dual-listed with C E 449). (3-0) Cr. 3.
Prereq: Senior classification in Engineering or permission of instructor
Introductory and advanced topics in structural health monitoring (SHM) of aeronautical, civil, and mechanical systems. Topics include sensors, signal processing in time and frequency domains, data acquisition and transmission systems, design of integrated SHM solutions, nondestructive evaluation techniques, feature extraction methods, and cutting-edge research in the field of SHM. Graduate students will have a supervisory role to assist students in 449 and an additional design project or more in-depth analysis and design.

C E 551: Urban Transportation Planning Models
(Dual-listed with C E 451). (3-0) Cr. 3. F.
Prereq: C E 355 and a course in statistics from the approved departmental list
Urban transportation planning context and process. Project planning and programming. Congestion, mitigation, and air quality issues. Transportation data sources. Travel demand and network modeling. Use of popular travel demand software and applications of geographic information systems.

C E 552: Traffic Safety, Operations, and Maintenance
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: C E 355
Engineering aspects of highway traffic safety. Reduction of crash incidence and severity through highway design and traffic control. Accident analysis. Safety in highway design, maintenance, and operation.
C E 553: Traffic Engineering  
(3-0) Cr. 3. F.  
Prereq: C E 355  
Driver, pedestrian, and vehicular characteristics. Traffic characteristics; highway capacity; traffic studies and analyses. Principles of traffic control for improved highway traffic service. Application of appropriate computing software and tools.

C E 556: Transportation Data Analysis  
(3-0) Cr. 3.  
Prereq: C E 355, a Statistics course at the 300 level or higher  
Analysis of transportation data, identification of data sources and limitations. Static and dynamic data elements such as infrastructure characteristics, flow and operations-related data elements. Spatial and temporal extents data for planning, design, operations, and management of transportation systems. Summarizing, analyzing, modeling, and interpreting data. Use of information technologies for highways, transit, and aviation systems.

C E 557: Transportation Systems Analysis  
(3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: C E 355, 3 credits in statistics or probability  
Travel studies and analysis of data. Transportation systems forecasts and analyses. Statewide, regional, and local transportation system planning. Network level systems planning and operations. Optimization of systems.

C E 558: Transportation Systems Development and Management  
(3-0) Cr. 3.  
Prereq: C E 355  
Study of designated problems in traffic engineering, transportation planning, and development. Forecasting and evaluation of social, economic, and environmental impacts of proposed solutions; considerations of alternatives. Formulation of recommendations and publication of a report. Presentation of recommendations in the host community.

C E 559: Transportation Infrastructure/Asset Management  
(3-0) Cr. 3.  
Prereq: C E 355  
Engineering management techniques for maintaining and managing infrastructure assets. Systematic approach to management through value engineering, engineering economics, and life cycle cost analysis. Selection and scheduling of maintenance activities. Analysis of network-wide resource needs. Project level analysis.

C E 560: Fundamentals of Soil Mechanics  
(3-0) Cr. 3.  
Prereq: C E 360 or instructor approval  
Nature of soil deposits, seepage, settlement and secondary compression, consolidation theories and analysis, failure theories, stress paths, introduction to critical state soil mechanics, constitutive models, soil strength under various drainage conditions, liquefaction of soil, pore pressure parameters, selection of soil parameters.

C E 561: Applied Foundation Engineering  
(3-0) Cr. 3.  
Prereq: C E 460 or instructor approval
