The Iowa State University Catalog

The Iowa State University Catalog is a one-year publication which lists all academic policies, and procedures.

The catalog also includes the following: information for fees; curriculum requirements; first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

New courses developed and offered since catalog publication can be found on the Web at http://www.registrar.iastate.edu/faculty-staff/courses/explistings.

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.

ABOUT THE CATALOG

The Iowa State University Catalog is a one-year publication, which lists all academic policies, and procedures. Versions prior to 2011 were two-year publications and available in hard copy as well as online.

The catalog also includes information for fees; curriculum requirements; first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

New programs may be offered in the term (semester or summer session) following final approval by the Board of Regents, State of Iowa and any required accrediting bodies. New courses developed and offered since catalog publication are called experimental courses. A list can be found on the Web at www.registrar.iastate.edu/faculty-staff/courses/explistings/.

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.

Updates to the Catalog

The curriculum process is governed by the Faculty Senate. The ad hoc committee, Faculty Senate Curriculum Committee (http://www.facsen.iastate.edu/councils/academicaffairs/curriculum/) considers new curricula proposals, changes and discontinuations to the catalog. Additional information may be in the college governance documents.

The curriculum approval process generally consists of a proposal from the department/program level, approved by the department/program curriculum committee (if applicable), college curriculum committee, and the dean. Additional approvals are needed from the Graduate College if the program proposal is a graduate program.

The program proposal is submitted to the Faculty Senate Curriculum committee for review. The Academic Affairs Committee reviews the proposal before passing it onto the Faculty Senate. The Board of Regents, State of Iowa approves all new programs and majors. For additional information about the approval process, see the link to Faculty Senate/ Faculty Handbook Curriculum Approvals – Section 10.8. See the Office of the Provost (http://www.provost.iastate.edu/) web site for more information.

Catalog updates are generally processed with approvals from department, college, and Faculty Senate Curriculum Committee (http://www.facsen.iastate.edu/councils/academicaffairs/curriculum/) representatives. Editing begins in late February with course changes due to the Office of the Registrar by June 1. Curriculum and other general information is due to the Office of the Registrar by December 1. Publication is the following February.

See the catalog editing website (http://www.registrar.iastate.edu/catalog-editing/) for more details on how to make changes to the catalog.
Accreditation

Iowa State University is accredited by the Higher Learning Commission.

Higher Learning Commission
230 South LaSalle St., Suite 7-500
Chicago, IL 60604-1411
(800) 621-7440; (312) 263-0456
Fax: (312) 263-7462

www.hlcommission.org (https://www.hlcommission.org)

The laws of the United States and of the State of Iowa provide for resident academic instruction, research, and extension education, and for the management of Iowa State University of Science and Technology. The university and two other state educational institutions of higher learning are governed by the Board of Regents, State of Iowa, which is composed of nine members nominated by the Governor of Iowa and confirmed by the Senate of Iowa. The immediate regulation and direction of the academic, research, and extension activities of the university are delegated by the Board of Regents, State of Iowa, to the president and faculty of the university. The board appoints an executive director with overall responsibility for the administration of the central office of the board located in Urbandale, Iowa.

Officers of Administration

Wendy Wintersteen, Ph.D.
President of the University

Jonathan A. Wickert, Ph.D.
Senior Vice President and Provost

Pamela Elliott Cain, B.S., CPA
Senior Vice President for Operations and Finance

Toyia K. Younger, Ph.D.
Senior Vice President for Student Affairs

Kristen Constant, Ph.D.
Vice President and Chief Information Officer

Kristi Darr, M.B.A.
Vice President of University Human Resources

John D. Lawrence, Ph.D.
Vice President for Extension and Outreach

Peter K. Dorhout, Ph.D.
Vice President for Research

Sharon Perry-Fantini, Ph.D.
Vice President for Diversity, Equity and Inclusion

Daniel Robison, Ph.D.
Dean of the College of Agriculture and Life Sciences

David P. Spalding, M.B.A.
Dean of the Ivy College of Business

Interim Vice President for Economic Development and Industry Relations

Luis Rico-Gutierrez, M.S.
Dean of the College of Design

W. Samuel Easterling, Ph.D.
Dean of the College of Engineering

Laura D. Jolly, Ph.D.
Dean of the College of Human Sciences

Beate Schmittmann, Ph.D.
Dean of the College of Liberal Arts and Sciences

Dan Grooms, D.V.M., Ph.D.
Dean of the College of Veterinary Medicine

William R. Graves, Ph.D.
Dean of the Graduate College

Hilary T. Seo, M.S.
Dean of the Library

Dawn Bratsch-Prince, Ph.D.
Associate Provost for Faculty

Ann Marie VanDerZanden, Ph.D.
Associate Provost for Academic Programs

Sharron Evans, J.D.
Associate Vice President for Student Affairs and Dean of Students
Office of Admissions
Executive Director of Admissions and New Student Programs
Katharine Johnson Suski

Admission
When to Apply
Applicants for the fall semester are encouraged to apply during the fall of the year preceding their entry to Iowa State University. Applications for other terms should be submitted well in advance of the desired entry date.

Application deadlines are available at www.admissions.iastate.edu. (http://www.admissions.iastate.edu/)

Completed applications for admission to the professional curriculum in the College of Veterinary Medicine, together with the required supporting transcripts, must be received by an established deadline. See College of Veterinary Medicine, Application and Admission.

How to Apply
Applications for admission are available online at www.admissions.iastate.edu. (http://www.admissions.iastate.edu/)

Iowa State University operates on a rolling admissions basis. Admission of applicants for fall semester begins in July of the preceding year. Admission for other terms begins approximately 12 months prior to the beginning of the term. Admission offers are issued for a specific term and are valid only for the term specified.

Undergraduate Admission Directly from High School
Admission decisions are made by admissions officers in accordance with the entrance requirements as set forth in the Iowa Administrative Code as well as the admission policies established by the Faculty Senate.

Students who seek admission must meet the following requirements and also any special requirements for the college or curriculum of their choice.

Applicants must submit an application for admission and the appropriate application fee (see www.admissions.iastate.edu (http://www.admissions.iastate.edu/) for current application fee information). In addition applicants must have their secondary school provide an official final transcript of their academic record, including cumulative grade point average and certification of graduation.

Applicants must also arrange to have their ACT or SAT scores reported to Iowa State directly from the testing agency. U.S. citizen and immigrant applicants who will not graduate from an approved U.S. high school and whose primary language is not English must meet university communication proficiency requirements. This can be accomplished by achieving satisfactory scores on the TOEFL, IELTS, PTE, ACT, or SAT. In addition to these tests, the Duolingo English Test (DET) may be used for undergraduates only. Detailed information concerning test score requirements can be found at http://www.admissions.iastate.edu/intl (http://www.admissions.iastate.edu/intl/).

Applicants may be required to submit additional information or data to support their applications.

A. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve a Regent Admission Index (RAI) score of at least 245 will be offered admission. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve less than a 245 RAI score will be considered for admission on an individual basis.

The RAI score will be calculated for each applicant based upon the mathematical formula listed below:

Regent admission Index Formula:

\[
\text{RAI Score} = \frac{(\text{ACT composite score} \times 3) + (\text{Cumulative GPA} \times 30) + (\text{Number of years of core courses in high school} \times 5)}{60}
\]

Note: For purposes of calculating the RAI, SAT scores will be ACT composite equivalents; high school GPA is expressed on a 4-point scale; and number of high school courses completed in the core subject areas is expressed in terms of years or fractions of years of study.

Applicants from high schools that do not present all of the factors required for calculation of the RAI score will be considered for admission on an individual basis.

A. Applicants who are admitted with less than a 245 RAI score may be required to participate in the first-year Smart Start Program as a condition of their enrollment.

B. Nonresidents of Iowa, including international students, may be held to higher academic standards, but must meet at least the same requirements as resident applicants.

C. Applicants who are graduates of nonapproved high schools will be considered for admission in a manner similar to applicants from approved high schools, but additional emphasis will be given to scores earned on standardized examinations.

D. Applications may be considered from students who did not graduate with their high school classes. They will be required to submit all academic data to the extent that it exists and achieve scores on
standardized examinations which will demonstrate that they are adequately prepared for academic study.

E. Students with satisfactory academic records may be admitted, on an individual basis, for part-time university study while enrolled in high school or during the summers prior to high school graduation.

F. Exceptional students may be admitted as full-time students before completing high school. Early admission is provided to serve persons whose academic achievement and personal and intellectual maturity clearly suggest readiness for college-level study.

Special ACT/SAT Waiver for Fall 2022 US Freshman Applicants
Because the pandemic has limited opportunities for students to take the ACT or SAT, Fall 2022 US freshman applicants are not required to submit ACT or SAT scores to be considered for admission. Applicants who do not provide their test scores will be considered for admission based on an individual review of their academic records with emphasis given to the high school cumulative GPA and core courses.

High School Preparation
Graduation from an approved high school shall ordinarily precede entrance into Iowa State University.

Students who wish to enter Iowa State University directly from high school (or transfer from another college or university with less than 24 semester hours of graded transferable college credit) must meet the level of academic performance described above and show evidence of the following high school preparation:

English/Language Arts
Four years, emphasizing writing, speaking, and reading, as well as an understanding and appreciation of literature

Mathematics
Three years, including one year each of algebra, geometry, and advanced algebra

Science
Three years, including at least two years of courses which emphasize elements of biology, chemistry, or physics

Social Studies
Two years

Additional Requirements for the College of Liberal Arts and Sciences and the College of Engineering
In addition to the high school preparation requirements described above, students applying to the College of Liberal Arts and Sciences must have completed an additional year of social studies, for a total of three years, and two years of a single foreign language. Students applying to the College of Engineering must have completed two years of a single foreign language.

Students who do not meet the high school course preparation requirements listed here, but who are otherwise well qualified, may be admitted after individual review of their applications.

Undergraduate Admission - Nondegree Undergraduate
Students who wish to attend Iowa State University to take undergraduate courses but who do not plan to seek an undergraduate degree from Iowa State University should apply as nondegree undergraduate students. Credit taken under the nondegree undergraduate classification is applicable for undergraduate degree purposes for those who are later admitted as degree-seeking undergraduate students. Nondegree undergraduates who have already earned an undergraduate degree may not enroll in graduate credits. To take courses listed as available for graduate credit, a student must enroll as a nondegree graduate and pay graduate fees. Credit obtained under the nondegree undergraduate classification may not be applied toward a graduate degree.

With the exception of IEOP, nondegree applicants are held to the same standards of admission as degree-seeking applicants, including English language proficiency.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as nondegree undergraduate students in the College of Liberal Arts and Sciences.

Reentering Students - Undergraduate and Graduate
Reentering undergraduate students are those who have previously attended Iowa State University and are returning after an absence of at least one full year. See Index, Reentry Students.

International students need to reapply after an absence of one full semester, exclusive of summer session. International reentries must also contact the International Students and Scholars office to request the necessary visa application forms.

Reentering graduate students do not need to complete a reentry form but should notify their program and the Office of the Registrar of their intent to reenter Iowa State University. Graduate students returning after 24 months will need to complete the reinstatement process. See Index, Reentry Students.

Undergraduate Admission by Transfer from Other Educational Institutions
Students who seek admission must meet the following requirements and also any special requirements for the college and curriculum of their choice.

Applicants must submit an application for admission, and the appropriate application fee (see www.admissions.iastate.edu (http://www.admissions.iastate.edu/) for current application fee information). Applicants must also request that each institution they have attended send an official transcript of record to the Office of Admissions. Failure to
provide transcripts from all colleges or universities attended may result in denial of the application or dismissal from the university. If less than 24 semester hours of graded transferable college credit is completed prior to entry at Iowa State University, applicants must also request that their official high school transcript and ACT or SAT scores be sent to the Office of Admissions. Other transfer applicants are encouraged to provide high school academic information. Students who do not do so may be asked to take course placement examinations during orientation.

U.S. citizen and immigrant applicants who have not graduated from an approved U.S. high school and whose primary language is not English must meet the university's English communication requirement. This can be accomplished by achieving satisfactory scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), Duolingo English Test (DET), ACT or SAT. Refer to https://www.admissions.iastate.edu/intl/transfer (https://www.admissions.iastate.edu/intl/transfer/) for minimum score requirements for each examination.

**A.** Transfer applicants with a minimum of 24 semester hours of graded transferable credit from regionally accredited colleges or universities will be admitted provided they have achieved a minimum 2.25 transfer grade point average (on a 4.00 grading scale) for all college work previously attempted. Applicants who have earned an associate’s degree will be required to have earned a minimum 2.00 transfer grade point average.

Some programs may require a transfer grade point average higher than this minimum. Higher academic standards may be required of students who are not residents of Iowa, including international students.

Applicants who have not maintained the grade point average required by Iowa State University for specific programs or who are under academic suspension from the last college attended generally will be denied admission.

**B.** In addition to meeting the minimum transfer grade point average requirement described above, applicants who have completed fewer than 24 semester hours of graded transferable college credit prior to their enrollment at Iowa State must also meet the admission requirements for students entering directly from high school.

**C.** Transfer applicants under disciplinary suspension will not be considered for admission until information concerning the reason for the suspension has been received from the college assigning the suspension. Applicants granted admission under these circumstances will be admitted on probation.

**D.** Transfer applicants from colleges and universities not regionally accredited will be considered for admission on an individual basis, taking into account all available academic information.

---

**Transfer Credit Practices**

Iowa State University endorses the Joint Statement on Transfer and Award of Academic Credit approved by the American Council on Education (ACE) and the American Association of Collegiate Registrars and Admissions Officers (AACRAO). The current issue of Transfer Credit Practices of Designated Educational Institutions, published by AACRAO is an example of a reference used in determining transfer credit.

The acceptance and use of transfer credit are subject to limitations in accordance with the educational policies of Iowa State University.

**A. Students from regionally accredited colleges and universities.**

Credit earned at regionally accredited colleges and universities is acceptable for transfer, except for the following, which may not be accepted, or may be accepted to a limited extent:

—credit in courses determined by Iowa State University to be of a developmental, vocational, or technical nature

—credit in courses or programs in which the institution granting the credit is not directly involved.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor’s degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits must be completed at Iowa State University.

**B. Students from colleges and universities which have candidate status.**

Credit earned at colleges and universities which have become candidates for accreditation by a regional association is acceptable for transfer in a manner similar to that from regionally accredited colleges and universities if the credit is applicable to the bachelor’s degree at Iowa State University.

Credit earned at the junior and senior classification from an accredited two-year college which has received approval by a regional accrediting association for change to a four-year college may be accepted by Iowa State University.

**C. Students from colleges and universities not regionally accredited.**

Courses completed at colleges and universities that are not regionally accredited will be evaluated according to the recommendations made by the American Association of Collegiate Registrars and Admissions Offices or the American Council on Education.

In determining the acceptability of transfer credit from private colleges in Iowa which do not have regional accreditation, the Regent Committee on Educational Relations, upon request from such institutions, evaluates the...
nature and standards of the academic program, faculty, student records, library, and laboratories.

In determining the acceptability of transfer credit from colleges in states other than Iowa which are not regionally accredited, acceptance practices indicated in the current issue of Transfer Credit Practices of Designated Educational Institutions will be used as a guide. For institutions not listed in the publication, guidance is requested from the designated reporting institution of the appropriate state.

D. Students from foreign colleges and universities.

Transfer credit from foreign educational institutions may be granted after a determination of the type of institution involved, its recognition by the educational authorities of the foreign country, and an evaluation of the content, level, and comparability of the study to courses and programs at Iowa State University. Credit may be granted in specific courses or assigned to general areas of study. Extensive use is made of professional journals and references which describe the educational systems and programs of individual countries.

Additional Transfer Credit Policies

A. Students with credit obtained during military service.

Credit will be awarded for successful completion of technical or specialized schools attended while on active duty with the armed forces to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication The ACE National Guide.

B. Students with credit obtained through non-college sponsored instruction.

Credit will be awarded for successful completion of learning acquired from participation in formal courses sponsored by associations, business, government, industry, and unions to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication The National Guide to College Credit for Workforce Training.

C. Students with credit obtained through correspondence courses.

Although Iowa State does not offer correspondence courses, college level courses taken by correspondence from accredited colleges or universities are acceptable for transfer at the undergraduate level if the courses taken are those that do not require laboratory study.

D. College Level Examination Program (CLEP).

Iowa State University will award credit for each of the following 15 examinations: Financial Accounting, Principles of Accounting, American Government, Biology, Calculus, French Language, German Language, Humanities, Principles of Macroeconomics, Principles of Microeconomics, Natural Sciences, Introductory Psychology, Social Sciences and History, Introductory Sociology, Spanish Language.

Application of CLEP credit to a degree program varies with the department, so students should consult with their department before they register for CLEP examinations. Additional information is available at www.admissions.iastate.edu/cbe/ (http://www.admissions.iastate.edu/cbe/cbe_clep.php).

E. Students with “test-out” credit.

Students who have earned credit at other colleges or universities through Advanced Placement (AP), College Level Examination Program (CLEP), or International Baccalaureate (IB) examinations may qualify for credit at Iowa State University. Scores from these examinations should be sent directly to the Office of Admissions; credit will be awarded provided the scores satisfy Iowa State’s requirements.

Credit earned at another college through locally designed test-out examinations may transfer to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at that institution.

F. Credit for prior learning.

Credit for prior learning applies to learning acquired from, but not limited to, credit by examination (e.g., Advanced Placement Exam (AP), College Level Exam (CLEP), International Baccalaureate (IB), Departmental Exams, etc.), credit that has been recommended by non-degree granting institutions, and ACE-recommend military coursework and/or experience. Credit awarded for prior learning is documented, evaluated, and appropriate for the level of degree awarded. Iowa State University does not award credit for work or life experience nor does it award credit for a service member’s military occupational experience.

Iowa State University will allow a maximum of 60 credits of prior learning to satisfy a student’s undergraduate degree requirements, of which no more than 32 credits may come from the credit by examination.

Articulation/Transfer Agreements

A. Iowa Regent Universities General Education Articulation Agreement.

Iowa State University participates in an articulation agreement with the other two Iowa Regent universities concerning the acceptance of their general education programs into the Iowa State University College of Liberal Arts and Sciences. Under the terms of this agreement, students who have satisfied general education requirements at the University of Northern Iowa or in the College of Liberal Arts at the University of Iowa
may transfer to Iowa State's College of Liberal Arts and Sciences with their general education requirements met (with the possible exception of the foreign language, diversity, and library requirements).

B. Associate of Arts (A.A.) Articulation Agreement with Iowa public community colleges.

Students who plan to enter the College of Liberal Arts and Sciences or the Ivy College of Business at Iowa State University with an associate of arts degree from an Iowa public community college, and who have at least a 2.00 cumulative grade point average, will be considered to have met the general education requirements of that college. Ivy College of Business students will still be required to take an ethics and a global course to satisfy general education requirements unless they are taken as part of the associate of arts degree.

C. Associate of Science (A.S.) Articulation Agreement with Iowa public community colleges.

Students who plan to enter the College of Liberal Arts and Sciences at Iowa State University with an associate of science degree from an Iowa public community college, and who have at least 60 prescribed semester credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be enrolled at junior level status upon entry to Iowa State University, College of Liberal Arts and Sciences. Transfer students with AS degrees will have their transfer credits evaluated course-by-course to determine how the courses will be applied to their intended Iowa State major/degree program requirements.

D. Career-technical credit from Iowa public community colleges.

Iowa State University will accept up to 16 semester (24 quarter) credits earned in career-technical courses where the sending Iowa public community college will accept such courses toward its associate of arts or associate in science degree. Certain career-technical courses at Iowa community colleges may be articulated to Iowa State University as academic credit. The credit hours earned in these articulated courses would transfer in addition to the 16 semester hour career-technical maximum. Please refer to the course equivalency guides on the Web (www.admissions.iastate.edu/equiv (https://www.admissions.iastate.edu/equiv/)) or contact the Office of Admissions for more information.

E. AP and CLEP credit from Iowa public colleges and universities.

Iowa State University has an agreement with the Iowa public colleges and universities which allows credit earned through AP and CLEP examinations to transfer directly to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at the sending institution.

On-line Transfer Articulation System (TRANSIT)

TRANSIT is Iowa State's online system, which displays how credits from a community college or another university may transfer to a degree program at Iowa State. In TRANSIT, prospective or current students can generate a transfer credit evaluation showing how their courses and degrees from a community college or university transfer to Iowa State University. In addition, students can request an unofficial degree audit, which will display how their transfer courses are applied within a particular Iowa State major/degree program. TRANSIT is easy to use and can be accessed by going to http://transit.iastate.edu.

Transfer of Credits

Credits presented from another institution are evaluated initially by the Office of Admissions to determine whether the courses are acceptable for transfer credit. In addition, credits applied toward a particular degree will be determined by the student’s college, based on relevance to the students’ program requirements as well as the level of performance deemed necessary for successful progress in that program. For example, courses that are deemed important to a program but were earned with less than a C grade may or may not be approved for a program. This policy also applies to students already enrolled at Iowa State University and to new transfer students. Grades earned in courses transferred to Iowa State University will not be used in calculating a transfer student’s Iowa State cumulative grade point average.

A student who has earned an associate’s degree and is admitted as a transfer from another college or university is required to have at least a 2.00 cumulative grade-point average for all transferable work taken elsewhere. If, due to special circumstances, a student is admitted with less than a 2.00 average, that student will have a transfer quality-point deficiency.

This deficiency will be added to any deficiency accumulated at Iowa State University and will be used to determine whether satisfactory progress toward a degree is being made. To graduate, students must earn sufficient quality points above a 2.00 at Iowa State University to offset any quality-point deficiency, including a transfer quality-point deficiency.

Students should consult with their academic advisors and the Office of Admissions before taking coursework at other colleges and universities to be certain the credits will transfer and will be applicable to their program of study. Students who believe that any transfer credits have not been correctly evaluated should consult with their academic advisor and with the Office of Admissions. Questions concerning how transfer credits are applied toward a degree program should be referred to the academic advisor and college office.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor’s degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits before receiving
a degree from Iowa State University must be completed at Iowa State University.

Iowa State University students who attend one of the other Iowa Regent universities under the Regent Universities Student Exchange Program will have the credits earned at the other university counted as resident credit and grades received included in their Iowa State University cumulative grade point average, even if the credits are included in the last 32 semester credits. For information on applying to the program see Index, Regent Universities Student Exchange Program (http://catalog.iastate.edu/azindex/).

Credit by Examination (CBE)

It is Iowa State University policy to grant academic credit by examination in many of the undergraduate courses listed in the university bulletin. Credit is awarded primarily in the introductory level classes in mathematics, natural, physical, and social sciences, and the liberal arts. Students with superior high school backgrounds or those with college-level proficiency in certain subject areas are strongly encouraged to investigate and attempt testing in the CBE programs available.

Types of Credit By Examination Programs (CBE)

Students may earn academic credit in any of six ways and have that credit recorded on their academic record when they enroll. Programs accepted at Iowa State include the Advanced Placement (AP) Program, the International Baccalaureate (IB) Examinations, the Global Assessment Certificate (GAC), Cambridge International AS and A Level Subject examinations, departmental examinations, and the College Level Examination Program (CLEP). Iowa State's policies for awarding credit for each of these programs may be found at www.admissions.iastate.edu/cbe (http://www.admissions.iastate.edu/cbe/).

Advanced Placement (AP) Program of the College Board

This program allows students, while still in high school, to take examinations for credit at the college level. Iowa State University awards credit or advanced placement through the Advanced Placement Program in art, biology, chemistry, computer science, economics, English, environmental science, foreign languages, geography, government and politics, history, mathematics, music, physics, psychology and statistics. High school counselors and teachers will assist with testing arrangements.

Generally, students scoring 3 or better on the exams will be considered for course credit based on departmental review of the exams. In some departments, only scores of 4 or better will be considered for credit.

Detailed information concerning the Advanced Placement Program can be found at https://apstudent.collegeboard.org/home (https://apstudent.collegeboard.org/home/).

International Baccalaureate Examinations

The International Baccalaureate (IB) Program, offered at many high schools in the United States and abroad, allows students the opportunity to take examinations for credit at the college level. These examinations are offered at standard and higher levels.

Iowa State University awards credit for most higher level examinations and some standard level examinations. Students must receive a minimum score of 4 to qualify for academic credit in most subject areas. Some departments require higher scores. Official IB examination results must be sent directly to the Office of Admissions from the International Baccalaureate Americas Office. Results listed on high school transcripts are not considered official.

Detailed information concerning the IB Program can be found at http://ibo.org/iba/. Course equivalencies and minimum scores required by Iowa State can be at https://www.admissions.iastate.edu/cbe/ib.php

Global Assessment Certificate

The Global Assessment Certificate (GAC) is a university preparation program that provides students with the academic knowledge, skills, and confidence to thrive in an English-language bachelor's degree program as well as preparation for the ACT university admissions test. Students who complete all three levels of the GAC and provide official confirmation of their completion/graduation by submitting a GAC Academic Transcript can earn university credit for GAC coursework. Details regarding transfer credit for the GAC can be reviewed at https://www.admissions.iastate.edu/cbe.

Cambridge international AS and A level subjects

Cambridge Advanced offers college preparatory courses worldwide. At the conclusion of course studies and examinations, an official GCE Certificate must be received in order to award transfer credits. Official AS- and A-Level examination certificates must be sent directly to the Office of Admissions. Results listed on school transcripts are not considered official. Course equivalencies can be found at https://www.admissions.iastate.edu/cbe.

Departmental Examinations

Students may take locally constructed departmental examinations for undergraduate credit in specified subject areas for which they and the department feel they have the necessary preparation. These exams are generally administered by the department which offers the course (for exceptions, see CLEP offerings below). Students interested in taking departmental (or CLEP) examinations should contact the appropriate department for specific information on the course covered by the exam and the exam itself. A nonrefundable fee is charged for each departmental examination requested.

If an acceptable exam score is achieved, a grade of T will be reported to the Office of the Registrar. The T grade represents performance equivalent to a C or better in the course. T grades are not used in
computing students' grade point averages; however, the credit does become part of their official academic record and may be applied toward their graduation requirements.

Most examinations for credit are prepared by the departments offering the courses. In some cases, the examination used is part of the College Level Examination Program (CLEP), where the content of the CLEP test has been judged to be an equivalent to the content of the course.

**College Level Examination Program**

CLEP is available on computer only and Iowa State University only accepts the CLEP tests listed in this section. Up to six semester credit hours in each of these three CLEP general tests is awarded: Social Sciences and History, Humanities, and Natural Sciences. In addition, the College of Engineering does not allow credit earned from CLEP Social Sciences and History, Humanities, and Natural Sciences tests to be used in their students' degree programs.

CLEP tests accepted at Iowa State University include American Government, Financial Accounting (engineering majors should consult with their academic advisor before registering for this examination), Biology (not for biology or engineering majors), Calculus, Introductory Psychology, Introductory Sociology, Principles of Macroeconomics, and Principles of Microeconomics.

In addition, Iowa State University will award up to 9 semester credit hours for CLEP French Language, up to 9 semester credit hours for CLEP German Language, and up to 9 semester credit hours for CLEP Spanish Language.

For more information on required scores and credit that will be awarded, please refer to the Credit by Exam website [www.admissions.iastate.edu/cbe](https://www.admissions.iastate.edu/cbe/).

Information about testing centers and registration can be found at [https://clep.collegeboard.org/search/test-centers](https://clep.collegeboard.org/search/test-centers/). For information on whether to take any of the CLEP tests, contact your academic advisor.

Additional information on the CLEP exam is available at [https://clep.collegeboard.org/](https://clep.collegeboard.org/).

**Policies and Procedures Governing CBE Tests**

1. Departmental and CLEP tests are offered to newly admitted or currently enrolled students at Iowa State University. Former and future students will receive credit only if they enroll sometime during the twelve months immediately following the test(s).

2. Permission to take a departmental examination is obtained from the department. Students may be denied permission because (a) the nature of the course is such that proficiency cannot be measured by such a test, (b) the student does not appear to have adequate background to pass the examination for the course, or (c) the student would not otherwise be allowed to enroll in the course. Students may appeal such a denial to the dean of the college in which the department is administered and subsequently to the provost.

3. Students may ordinarily attempt a CBE test only once in any course or area. Under special circumstances a retest may be taken upon approval of the department in which the course is offered.

4. Credit by examination will not be granted if it duplicates courses previously passed or failed.

5. Departmental examinations and CLEP subject tests cover only a single course and students may not test out of independent study or special topic courses.

6. There is a nonrefundable fee for all departmental tests. The fee is set by the Board of Regents, State of Iowa, and is subject to change.

7. Departmental examinations are usually given just prior to, or within two weeks of, the beginning of fall and spring semesters. For more information, students should contact the department that offers the class. CLEP tests are given throughout the year.

8. Credit for the CLEP examinations Social Sciences and History, Humanities, and Natural Sciences is not evaluated as equivalent to any specific course and cannot be used in place of specific course requirements for the major. All colleges (except Engineering, which does not accept these tests) allow these CLEP credits to be used for either general requirements (not in Liberal Arts and Sciences) or elective credit. Students are responsible for checking with their academic advisors to determine whether such credit is to their benefit.

9. Listed below are policies for transferring CBE from another college or university to Iowa State University:

   a. AP or CLEP credit which is earned at an Iowa public college or university may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution. AP or CLEP credit which is earned at any other college or university may not be transferred directly to Iowa State. However, the scores from these examinations may be sent to Iowa State University from the testing agency, and credit will be awarded based on Iowa State's AP and CLEP policies.

   b. IB credit earned at another college or university may not be transferred directly to Iowa State University. However, the scores from IB examinations may be sent to Iowa State from the testing agency, and credit will be awarded based on Iowa State's IB policies.

   c. Credit earned at another college or university through local test-out examinations may be transferred directly to Iowa State University.
University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution.

d. Credit earned at another college or university for GAC or Cambridge Advanced exams may not be transferred directly to Iowa State University. However, the official GAC Academic Transcript or officially certified copies of GCE AS or A Level examination certificates may be submitted directly to Iowa State University from the respective testing authority, and credit will be awarded based on Iowa State’s policies.

10. Credit earned from CBE will be posted to the student’s academic record at the end of the term. CBE credits will be counted toward the projected year in school classification used to establish registration start dates.

11. Some professional programs do not accept T (test-out) credit in preprofessional courses. Students who anticipate applying to such programs should inquire about the acceptability of such credit before registering for such CBE tests.

12. Credit established at Iowa State University will usually transfer to other colleges and universities; however, the final decision rests with the institution reviewing the transcript.

Student Housing and Dining
Department of Residence (DOR)

Welcome to your Cyclone Home! The university provides housing for almost 9,000 students in university owned on-campus residence halls and apartments.

- Single (non-family) student housing is available in all residence halls and the Frederiksen Court and University Village apartment communities.
- Family housing is available to students and their partners, children, and other relatives in the Schilletter Village apartments.

While newly-admitted freshmen 18 and under are assigned to the halls, all halls and apartments have a diverse mix of freshmen, sophomores, juniors, seniors, and graduate students making on-campus housing a great place to live and learn. Visit http://housing.iastate.edu/ for details.

ISU Dining

With 26 locations, a fresh meal or snack is right around the corner! We offer flexible meal plans for students living both on and off-campus. Our dining centers serve a wide variety of fresh-made items and are a great place for a sit-down meal. Locations like our cafes, restaurants and markets are perfect for coffee breaks, meals and snacks when you’re on the go. Our culinary team is ready to serve you!

If you’re living in Birch-Welch-Roberts, Barton-Lyon-Freeman, Maple, Willow, Larch, Geoffroy, Buchanan, Eaton, Martin, Helser or Friley Halls, you can choose any of the following plans! A quick explanation of each plan is below and you can learn even more on our website. (https://www.dining.iastate.edu/meal-plans/residence-halls/)

- **Cardinal and Cyclone Plans:** These are anytime plans, you never have to worry about counting meals! Just pop into a dining center whenever you’d like. The convenience and flexibility of these plans are perfect for a busy student’s lifestyle. We even added more dining dollars to our Cardinal plan for a total of $100 dining dollars per semester for all your snacks!
- **Gold Plan:** This is a declining meal balance plan. You have 200 meals of dining center meals each semester you need to keep track of.
- **CyFlex:** This is our hybrid plan and combines the functionality of the other two types of plans above.

- **Dining Dollars**: These spend dollar-for-dollar and are intended for things like snacks and convenience items.
- **Flex Meals**: Use these at any campus location when you want a full meal - they're perfect for restaurants and you can even use them to get a friend into a dining center.
- **GET & Go**: These locations are on the east and west sides of campus (UDCC and Conversations). You'll get a hot entree, two sides and a drink. This service uses one of your dining center swipes and you can use these locations up to 10 times per week. It doesn't use a Flex Meal or Dining Dollars.

Are you a Frederiksen Court or SUV resident? You can choose from the plans above or from the apartment plans that are located here (https://www.dining.iastate.edu/meal-plans/apartments-off-campus/)

Questions about choosing a plan? Email us at dining@iastate.edu
TUITION, FEES AND EXPENSES

Tuition And Fees
Tuition and fees are based on the number of credits in which a student is enrolled as of 5:00 p.m. on the 10th day of class. Maximum charges start at 12 credits for undergraduate and veterinary medicine students. Maximum charges start at 9 credits for graduate students.

Students who are not residents of Iowa pay a higher tuition rate each semester. Nondegree undergraduate students and noncollegiate students pay the same fees as undergraduates. Tuition and fees are assessed in accordance with regulations of the Board of Regents, State of Iowa. Information about these regulations are found in this catalog under Admissions and Registrar.

All tuition, fees, expenses, and policies are subject to change without notice by Iowa State University and the Board of Regents, State of Iowa. For the most current and complete information see http://www.registrar.iastate.edu/fees/

Residency Classification for Admission and Tuition Purposes
These criteria are contained in the Policy Manual, Board of Regents, State of Iowa and or the Iowa Administrative Code: Board of Regents, State of Iowa. For additional information regarding the administrative code addressing residency classification: Section 681–1.4 "Classification of residents and nonresidents for admission, tuition, and fee purposes" https://www.legis.iowa.gov/docs/aco/chapter/681.1.pdf (Chapter 1, pg. 4).

GENERAL INFORMATION
A. A person enrolling at one of the three state universities shall be classified as a resident or nonresident for admission, tuition, and fee purposes by the registrar or someone designated by the registrar. The decision shall be based upon information furnished by the student and other relevant information.

B. In determining resident or nonresident classification, the issue is essentially one of why the person is in the state of Iowa. If the person is in the state primarily for educational purposes, that person will be considered a nonresident. For example, it may be possible that an individual could qualify as a resident of Iowa for such purposes as voting, or holding an Iowa driver’s license, and not meet the residency requirements as established by the Board of Regents, State of Iowa, for admission, tuition, and fee purposes.

C. The registrar, or designated person, is authorized to require written documents, affidavits, verifications, or other evidence deemed necessary to determine why a student is in Iowa. The burden of establishing that a student is in Iowa for other than educational purposes is upon the student. A student may be required to file any or all of the following:

1. A statement from the student describing employment and expected source of support
2. A statement from the student’s employer
3. A statement from the student’s parents verifying nonsupport and the fact that the student was not listed as a dependent on tax returns for the past year and will not be so listed in future years
4. A statement from the student’s spouse related to sources of family support, length of residence in Iowa, and reasons for being in the state of Iowa
5. Supporting statements from persons who might be familiar with the family situation
6. Iowa state income tax return.

D. Applications for resident classification for a given semester or session are due no later than the fifteenth class day of that semester or session. Applications received after the fifteenth class day of that semester or session will be considered for the next semester or session. Appeals of any nonresident classification decision resulting from applications for resident classifications are due no later than midterm of that semester or session. Change of classification from nonresident to resident will not be made retroactive beyond the term in which application for resident classification is made.

E. A student who gives incorrect or misleading information to evade payment of nonresident fees shall be subject to serious disciplinary action and must also pay the nonresident fees for each term previously attended.

F. Review committee. These regulations shall be administered by the registrar or someone designated by the registrar. The decision of the registrar or designated person may be appealed to a university review committee. The finding of the review committee may be appealed to the Board of Regents, State of Iowa.

GRADUATE ASSISTANTS
Graduate students appointed to a graduate assistantship appointment of 1/4-time or more for at least 3 months in fall and spring terms and for 4 weeks in summer term, are assessed tuition at the full-time resident (in-state) rate for the fall and spring term. Nonresident students with graduate assistantships of 1/4-time or more retain their nonresidency classification, but are assessed resident tuition and fees as long as the graduate assistantship is continued.
The spouse of a 1/4-time or more graduate assistant who is a nonresident is eligible for resident tuition and fees during the period of the assistantship appointment. Iowa residency is not granted, but a waiver of nonresident tuition and fees is in effect. When the graduate assistantship ends, the tuition and fee waiver for the spouse is terminated. (Board of Regents, State of Iowa, Minutes March 15, 1995, p. 801).

The graduate student must request the resident tuition assessment by midterm of the term in question. The benefit will not be granted retroactively.

**GUIDELINES**

The following guidelines are used in determining the resident classification of a student for admission, tuition, and fee purposes:

1. A financially dependent student whose parents move from Iowa after the student is enrolled remains a resident provided the student maintains continuous enrollment. A financially dependent student whose parents move from Iowa during the senior year of high school will be considered a resident provided the student has not established domicile in another state.

2. In deciding why a person is in the state of Iowa, the person's domicile will be considered. A person who comes to Iowa from another state and enrolls in any institution of postsecondary education for a full program or substantially a full program shall be presumed to have come to Iowa primarily for educational reasons rather than to establish a domicile in Iowa.

3. A student who was a former resident of Iowa may continue to be considered a resident provided absence from the state was for a period of less than 12 months and provided domicile is reestablished. If the absence from the state is for a period exceeding 12 months, a student may be considered a resident if evidence can be presented showing that the student has long-term ties to Iowa and reestablishes an Iowa domicile. A person or the dependent of a person whose domicile is permanently established in Iowa, who has been classified as a resident for admission, tuition, and fee purposes, may continue to be classified as a resident so long as domicile is maintained, even though circumstances may require extended absence of the person from the state. It is required that a person who claims Iowa domicile while living in another state or country will provide proof of the continual domicile as evidence that the person:

   (1). Has not acquired domicile in another state;

   (2). Has maintained a continuous voting record in Iowa; and

   (3). Has filed regular Iowa resident income tax returns during absence from the state.

4. A student who moves to Iowa may be eligible for resident classification at the next registration following 12 consecutive months in the state provided the student is not enrolled as more than a half-time student (6 credits for an undergraduate or professional student, 5 credits for a graduate student) in any academic year term, is not enrolled for more than 4 credits in a summer term for any classification, and provides sufficient evidence of the establishment of an Iowa domicile.

5. A student who has been a continuous student and whose parents move to Iowa may become a resident at the beginning of the next term provided the student is dependent upon the parents for a majority of financial assistance.

6. A person who has been certified as a refugee or granted asylum by the appropriate agency of the United States, who enrolls as a student at a university governed by the Board of Regents, State of Iowa, may be accorded immediate resident status for admission, tuition, and fee purposes where the person:

   (1). Comes directly to the state of Iowa from a refugee facility or port of debarkation, or

   (2). Comes to the state of Iowa within a reasonable time and has not established domicile in another state.

Any refugee or individual granted asylum not meeting these standards will be presumed to be a nonresident for admission, tuition, and fee purposes and thus subject to the usual method of proof of establishment of Iowa residency.

7. An alien who has immigrant status establishes Iowa residency in the same manner as a United States citizen.

8. At the Regent institutions, American Indians who have origins in any of the original people of North America and who maintain a cultural identification through tribal affiliation or community recognition with one or more of the tribes or nations connected historically with the present state of Iowa, including the Iowa, Kickapoo, Menominee, Miami, Missouri, Ojibwa (Chippewa), Omaha, Otoe (Otto), Ottawa (Odawa), Potawatomi, Sac and Fox (Sauk, Meskwaki), Sioux, and Winnebago (HoCak/Ho-Chunk), will be assessed Iowa resident tuition and fees. (Board of Regents, State of Iowa, Minutes October 15-16, 1997, p. 299)

**Section B below is under revision. For current information, go to https://www.registrar.iastate.edu/students/in-state-tuition-benefit**.

B. Additional guidelines are used in determining the resident classification of a veteran, qualified military person, and dependent children and spouses of a veteran or qualified military person for purposes of admission and undergraduate tuition and mandatory fees:
1. A person who is stationed on active duty at the Rock Island arsenal as a result of military orders, or the dependent child or spouse of such person, is entitled to resident status for purposes of undergraduate tuition and mandatory fees. However, if the arrival of the person under orders is subsequent to the beginning of the term in which the dependent child or spouse is first enrolled, nonresident fees will be charged in all cases for the dependent child or spouse until the beginning of the next term in which the dependent child or spouse is enrolled. If the qualified military person is transferred, deployed, or restationed while the person's spouse or dependent child is enrolled in an institution of higher education under the control of the board of regents, the spouse or dependent child shall continue to be classified as a resident under this subparagraph until the close of the fiscal year in which the spouse or dependent child is enrolled.

2. A veteran who is domiciled or moves to the state of Iowa and who is eligible for benefits, or has exhausted benefits under the federal Post-9/11 Veterans Educational Assistance Act of 2008, is entitled to resident status for purposes of undergraduate tuition and mandatory fees. The dependent child or spouse of a veteran who meets these requirements is entitled to resident status for undergraduate tuition. However, if the arrival of the veteran in Iowa is subsequent to the beginning of the term in which the dependent child or spouse is first enrolled, nonresident fees will be charged in all cases for the dependent child or spouse until the beginning of the next term in which the dependent child or spouse is enrolled.

3. A person who is moved into the state as the result of military or civil orders from the government for other than educational purposes, or the dependent child or spouse of such a person, is entitled to resident status. However, if the arrival of the person under orders is subsequent to the beginning of the term in which the dependent child or spouse is first enrolled, nonresident fees will be charged in all cases until the beginning of the next term in which the dependent child or spouse is enrolled. Legislation, effective July 1, 1977, requires that military personnel who claim residency in Iowa (home of record) will be required to file Iowa resident income tax returns.

**FACTS**

A. The following circumstances, although not necessarily conclusive, have probative value in support of a claim for resident classification:

1. Reside in Iowa for 12 consecutive months, and be primarily engaged in activities other than those of a full-time student, immediately prior to the beginning of the term for which resident classification is sought.
2. Reliance upon Iowa resources for financial support.
3. Domicile in Iowa of persons legally responsible for the student.
4. Former domicile in the state and maintenance of significant connections therein while absent.
5. Acceptance of an offer of permanent employment in Iowa.
6. Military orders, if for other than educational purposes.
7. Other facts indicating the student's domicile will be considered by the universities in classifying the student.

B. The following circumstances, standing alone, do not constitute sufficient evidence of domicile to affect classification of a student as a resident under these regulations:

1. Voting or registration for voting.
2. Employment in any position normally filled by a student.
3. The lease of living quarters.
4. Admission to a licensed practicing profession in Iowa.
5. Automobile registration.
6. Public records; for example, birth and marriage records, Iowa driver's license.
7. Continuous presence in Iowa during periods when not enrolled in school.
8. Ownership of property in Iowa, or the payment of Iowa taxes.

**Fee Payment**

The Accounts Receivable Office bills students for tuition, room, meal plan, and various other university charges. A statement of new charges is available on the first of each month on Access Plus and each student will receive an email message at that time at their Iowa State e-mail address telling them that their bill is available. It is the student's responsibility to ensure that the university has a correct e-mail address and to regularly check their Iowa State e-mail account. Students who do not receive a billing statement before the term begins or are unable to use AccessPlus to view their bill, should contact the Accounts Receivable Office to learn the amount of their account balance due. Failure to receive a billing statement or view their account on AccessPlus will not exempt students from late penalties or from having a hold placed on their registration.

Payments for fall semester are due August 20. Payments for spring semester are due January 20. Payments for summer semester are due May 20.

Students may pay their university bill by direct debit through AccessPlus. They may also pay by mail by sending a check or money order (along with the bottom portion of the billing statement printed from AccessPlus) to Iowa State University, Treasurer's Office, 1220 Beardshear Hall, 515 Morrill Road, Ames, IA 50011-2103. Payments may also be made in person by taking the personal check or certified funds to the drop box that is located behind the Student Answer Center on the ground floor of Beardshear Hall.
Credit Type - Audits and zero credit courses: Assessed according to contact hours; maximum charge for zero credit courses is three credit hours.

Credit Type - Partial credits: (.5) assessed on the next larger whole number of credits, e.g., 6.5 credits is assessed as 7 credits.

Credit Type - R credit: Assessed for the minimum fee only if no other credits are taken.

Deferred Billing Plan (payment over three months): This $20 administrative charge (fall, spring, and summer) is assessed to those students who do not pay their full tuition, room and board charges on or before August 20 for fall semester, January 20 for spring semester, and May 20 for summer session. This permits students to spread payment over three installments. The administrative fee helps defray the extra IT and mailing costs involved in carrying and billing the charges over a longer period of time, as well as the extra personnel required in the Treasurer’s Office to handle the traffic involved with three tuition payments per semester instead of one.

Iowa State University offers a deferment option for employees of businesses and organizations that provide tuition reimbursement programs. To enroll in the Employer Reimbursement Deferment Plan, please complete our online form found on AccessPlus in the following location: AccessPlus>Student tab>Account/U-Bill>Empl Reimb Defer. With successful enrollment in the deferment plan prior to each semester, all applicable charges will be due 30 days after grades are presented.

A non-deferrable $35 enrollment fee will be assessed to the student U-Bill after successful enrollment into the deferment plan. Students will be responsible for payment of any non-deferred charges on their U-Bill in accordance with statement due dates.

Iowa State University employees will need to submit a tuition reimbursement request prior to the posted deadline, via AccessPlus>Employee tab>Tuition Reimburse, and obtain approval through University Human Resources. For additional information about eligibility requirements and semester application periods for the Tuition Reimbursement Program, please visit University Human Resources’ website (https://www.hr.iastate.edu/benefits/addbenefits/).

For more information about the Employer Reimbursement Deferment Plan, contact Holly Hohanshelt in the Accounts Receivable Office at (515) 294-4786 or hho@iastate.edu.

Installment Payment Plan: This administrative charge is assessed to those who elect the Iowa State University Installment Plan. This plan will allow students to pay tuition, room, board, fees, and accounts receivable costs in twelve equal monthly installments. The $50 annual application fee will defray the extra IT and mailing costs associated with carrying the charges over a longer period of time, as well as the bank fees associated with the direct debit of payments.

Past Due Accounts: If students have past due accounts receivable charges prior to the beginning of classes, they may be dropped from enrollment if these past due charges are not paid by the Friday before the first day of class. Students that are subject to being dropped will be notified via their Iowa State e-mail account.

Refunds: Refunds are available for students who cancel or withdraw their registration within the appropriate time period. To cancel their registration, students must notify the Office of the Registrar before the first day of the semester to avoid tuition assessment. Beginning on the first day of the semester, it will be necessary for students to formally withdraw from the university to terminate their registration. More information about canceling registration and withdrawing from classes can be found at http://www.registrar.iastate.edu/registration/responsibilities.shtml. (http://www.registrar.iastate.edu/registration/responsibilities.shtml/)

Tuition adjustments for all students are made for withdrawals of registration according to the following schedule:

<table>
<thead>
<tr>
<th>Withdrawal Date/Student Pays</th>
<th>100%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Before first day of classes: 0%</td>
<td></td>
</tr>
<tr>
<td>During class days 1-5: 10%</td>
<td></td>
</tr>
<tr>
<td>During class days 6-10: 25%</td>
<td></td>
</tr>
<tr>
<td>During class days 11-15: 50%</td>
<td></td>
</tr>
<tr>
<td>During class days 16-20: 75%</td>
<td></td>
</tr>
<tr>
<td>After the twentieth day of classes: 100%</td>
<td></td>
</tr>
</tbody>
</table>

Students who wish to appeal tuition and fee assessment for withdrawals should contact the Scheduling & Fees area of the Office of the Registrar. Decisions of the Office of the Registrar will be based on the existence of extenuating circumstances beyond the control of the student.

Students who wish to appeal the decision of the Office of the Registrar must do so in writing within 10 calendar days after receiving the decision. Such appeals will then be reviewed by the Tuition Appeals Review Committee. Students who wish to appeal the decision of the Tuition Appeals Review Committee may make a request to do so in writing to the Office of the Provost.

Fee refund for students with a reduction in credits below full-time: 100 percent if change is made through the 10th day of classes. No adjustment is made after the 10th day of classes. Prorated adjustments in the tuition adjustment schedule are made for summer session courses, or any courses which are less than one semester in length (79 days).

Workshop and Short Courses Refunds: Students who drop workshops or short courses of one or two weeks on or before the first class meeting
receive a 100% tuition adjustment for the course. No tuition adjustment will be made after the first day of classes. Students who drop three-week courses receive a 100% adjustment if they drop on or before the first day of classes, a 90% adjustment if they drop on the second day of classes, and no adjustment after the second day of classes.

**Veterans and Eligible Dependents Receiving Educational Assistance**

In accordance with the requirements of the Servicemembers Improved Transition through Reforms for Ensuring Progress Act (SIT-REP Act, December 31, 2018), the University will not impose any late fee, deny access to classes or facilities, or assess any other penalty to a Veteran or eligible dependent due to a late payment from the Veterans Administration (VA).

This policy is only applicable to Veterans or eligible dependents who are receiving educational assistance under Chapters 31 (VR&E) or 33 (Post 9/11 and Fry Scholarship) of title 38, United States Code (U.S.C.).

In accordance with the SIT-REP Act, students receiving VA educational benefits from Chapter 31 or 33 must provide a certification of eligibility for entitlement of educational assistance to the Office of the Registrar.

Nothing in this policy precludes the University from assessing a late fee, denial of access, or any other penalty in relation to payments due the University that are not covered under the SIT-REP Act.

For purposes of this policy, the following terms will be defined as:

- **Late Fee:** A financial penalty, equal to 1% of the outstanding balance, charged to discourage late payment of university bills.
- **Denial of Access:** To prohibit entry, participation, or attendance to an event or facility otherwise afforded to all registered students.
- **Any Other Penalty:** Any other fee, prohibition, or assessment levied upon a student for failure to pay required tuition and fees.

**Student Financial Aid**

The Office of Student Financial Aid helps families afford Iowa State University. Scholarships, grants, loans, and part-time employment opportunities are available to assist students and families in meeting college expenses. For more information see:

http://www.financialaid.iastate.edu
STUDENT SERVICES

Dean of Students Office
www.dso.iastate.edu (http://www.dso.iastate.edu/)
1010 Student Services Building
(515) 294-1020

The Dean of Students Office (DSO) at Iowa State University uses an integrated approach to support student-centered learning through personal, community and academic development culminating in a transformative experience. Reporting through the Division of Student Affairs, the DSO provides numerous opportunities for students to engage in learning beyond the classroom. The fourteen departments and two programs that comprise the DSO collaborate to create and support a common community experience for Iowa State University students. Our common goal across all areas within the DSO is to support student success.

Helping Cyclones Succeed

Student Conduct (O SC)
www.studentconduct.dso.iastate.edu (http://www.studentconduct.dso.iastate.edu/)
The Student Counseling Service (SCS) assists students in enhancing their academic success and personal well-being with a staff of professional psychologists and counselors. Services are available to help students sort through their feelings, strengths, and options to develop new perspectives and coping skills.

Services include:

- One-on-one counseling for any issue of personal concern, such as depression, anxiety, stress management, relationship issues, identity issues, and other forms of personal challenge. Students may also receive therapeutic services to deal with more severe mental health issues.
- Couples counseling for ISU students and their partners during times of relationship difficulty.
- Eating disorders assessment and treatment for students concerned with eating or body image issues. Students receiving treatment for eating disorders might also work with physicians, nutritionists, and personal trainers as their needs require.
- Substance abuse assessments to help students determine the nature and extent of their alcohol or other drug use and the impact of this use on their well being. Counselors offer recommendations and referrals for any concerns identified through the assessment.
- Career counseling to assist students having difficulty choosing a major or making decisions about their future after college.
- Group counseling is offered to facilitate personal growth and social skills learning. A list of the current semester’s groups is available on the SCS web site.
- A variety of outreach programs are also available.

Counseling services are offered at no cost to ISU students. However, a nominal fee for testing may be required. Nominal fees are also charged for uncanceled missed appointments. Counseling is strictly confidential. SCS staff will not release any information to anyone outside of the Student Counseling Service without the written permission of the client unless an imminent harm condition exists.

In addition to providing counseling and outreach services to students, SCS provides training and consultation to faculty and staff to assist them in addressing the psychological needs of students.

SCS hours are Monday through Friday 8 a.m. - 5 p.m. The Student Counseling Service phone number is 515-294-5056.

**Thielen Student Health Center**

Thielen Student Health Center is a full-service medical clinic in Ames, Iowa, that specializes in students. The clinic is staffed with physicians, advanced registered nurse practitioners and nurses. The medical team is available to care for your primary health care needs.

The clinic offers a full range of medical services including illness and injury care, women's health, allergy and travel care, immunizations, mental health care, laboratory and x-ray services, physical therapy and a full-service pharmacy. After hour service is available for urgent or emergency problems at McFarland Urgent Care Clinic or Mary Greeley Medical Center Emergency Room.

The Prevention Services department provides campus-wide leadership for a comprehensive approach to reduce health risks for students. In collaboration with our campus and community partners, they strive to foster a healthy campus environment and support the academic success of our students. Areas of focus include high-risk drinking and sexual and interpersonal violence.

The mission of the Thielen Student Health Center is to promote the optimal health of our university community by providing high quality, accessible, affordable and accountable health care that encompasses prevention, wellness and education and to support the academic success of the Iowa State University students while building healthy habits for a lifetime.
We provide an inclusive, non-judgmental environment for our diverse student body and are conveniently located on the corner of Sheldon Avenue and Union Drive, right across from State Gym.

Student Health receives no funding from the state of Iowa and relies on the health fee for approximately 50% of its operating budget. Please note that the health fee is not health insurance. All students are encouraged to maintain adequate health insurance coverage while enrolled at Iowa State University. Those taking 4 or fewer credits may still access services by paying the health fee. Spouses/domestic partners of students who opt to pay the health fee also have access to services.

Clinic hours:
Monday, 8 a.m.-6 p.m.; Tuesday, Thursday and Friday, 8 a.m.-5 p.m.;
Wednesday, 9 a.m.-5 p.m.; Saturday, 9 a.m.-12 noon. Hours vary during breaks and summer session. Patients are seen by appointment. Please call 515-294-5801.

The University Library
http://www.lib.iastate.edu/
Dean of the Library Services: Hilary Seo
General Information (515) 294-3642

The University Library provides extensive research collections, services and information literacy instruction/information for all students. Facilities consist of the main Parks Library, the Veterinary Medical Library, Design Reading Room, and a remote library storage building.

The library’s extensive collections include electronic and print resources that support research and study for all undergraduate and graduate programs. Nationally recognized collections support the basic and applied fields of biological and physical sciences. Library holdings include more than 2,858,448 volumes and approximately 121,125 current serial titles. The library has access to 447,689 electronic books.

The library’s instruction program includes an undergraduate information literacy course as well as a wide variety of subject-based seminars on effective use of library resources for undergraduate and graduate students.

The library website provides access to local and web-based resources including electronic journals and books, local collections, online indexes, electronic course reserves and guides, and a broad range of subject research guides. Assistance in using this vast body of electronic resources is available at the Help Desk on the first floor, on the library website through the Ask Us! link, and through individually arranged appointments with librarian liaisons. The Digital Repository @ Iowa State provides free, public access to the research and scholarship of Iowa State’s faculty, students and staff.

A limited number of semiprivate study rooms available for graduate students, intended for research and other scholarly activities that require extensive use of library material, are available. Parks Library has group study rooms, multi-media production studios, a presentation room and collaborative multi-media study areas. The library has over 232 public computers and a laptop checkout program with over 100 Apple and Windows laptops, iPads, Apple Pencils, and iPad chargers that may be checked out from the Tech Lending room (Rm 117 Parks Library). Also located in Parks Library - ITS Solution Center, Online Learning Hub, and The Bookends Café.

Career Services Offices
Agriculture and Life Sciences: 15 Curtiss Hall
Business: 1320 Gerdin Business Building
Design: 297 College of Design
Engineering: 3200 Marston Hall
Graduate Business: 1420 Gerdin Business Building
Human Sciences: 131 MacKay Hall
Liberal Arts and Sciences: 150 Carver Hall
Veterinary Medicine: 2270A Veterinary Medicine Complex

Career Services is a coordinated network of career services offices offering a broad range of programs and services for undergraduate, professional, and graduate students, faculty, staff, alumni, and employers. These services include career exploration, career development, experiential learning, and professional career search assistance programs. The goal is to provide constituents with life-long skills to assist with career development and exploration.

Programs and services are offered including online registration, position listing and interview scheduling; résumé referral; coordination of co-op and internship programs; workshops and seminars on career exploration, résumé preparation, letter writing, job search techniques, interview skills, applying to graduate and professional schools, and adjusting to the first job.

Each year career services sponsors multiple career fairs, which bring to the ISU campus hundreds of employers. The career services offices also coordinate on-campus interview opportunities. Each college career services office serves as a point of entry for students, alumni, and employers to the entire ISU network of coordinated, decentralized career services.

In addition to the college-based career services offices, the Career Exploration Service provides a variety of services to students who are unsure about their major or future career path. Students can work one-on-one with a trained career counselor, use the many books and electronic resources in the Career Exploration Center, or enroll in UST 104, Personal Career Development.
Additional information on career services is available at http://www.career.iastate.edu/.

Child Care

Child Care Administration, a unit of Human Resource Services, supports Iowa State University families by linking them with programs and services that can help meet their child care needs. The university child care coordinator is available to assist families in accessing services available both on the campus and in the community.

Child care programs located on campus include:

• Center for Child Care Resources: Assistance in locating campus and community child care services, 100 University Village, Suite 1010, 515-294-8833 or 1-800-437-8599

• University Community Childcare, Family Resource Center, 100 University Village, 515-294-9838

• The Comfort Zone: Childcare for kids who don't feel so good, 100 University Village, 515-294-3333.

• Flex-Care: Part time care for children of ISU students, 100 University Village, 515-294-9838.

• University Child Care Center at Veterinary Medicine, 1700 Christensen Drive, 515-294-2273.

• ISU Child Development Laboratory School, Palmer HDFS Building, 515-294-3040.

For more information about child care options, contact the university child care coordinator at 515-294-8827.
STUDENT LIFE

Memorial Union
The Memorial Union completes the college experience by developing leadership, community, and career readiness.

Memorial Union Student Engagement is committed to helping students learn inside and outside the classroom by offering countless ways to get involved at Iowa State through leadership, service, arts, entertainment and recreation activities.

Student Engagement includes: the Workspace (arts studio), the Maintenance Shop (entertainment venue), CyBowl & Billiards (recreation center/bowling alley), Cyclone Cinema, leadership and service programs, art galleries in the MU, and management of the recognition of over 900 campus and student organizations. For a complete list of recognized organizations, visit http://www.stuorg.iastate.edu.

The staff provides assistance to student and campus organization leaders, members and advisors on an individual or group basis. Available on the Student Engagement website are resources for student and campus organizations including the event authorization process, publicity and promotion ideas, constitution writing guidelines, and officer
Student Life

transition information. MU Student Engagement is home to the Student Consultants that provide hands on support for students interested in leadership and service opportunities and student organization officers looking to better their clubs. In addition, Student Engagement offers a 3-credit course called Leadership ISU, where students learn leadership capacity through a series of activities and seminars, as well as many other leadership conferences and retreats. Reservations for the Lynn Fuhrer Lodge are managed by this office as well.

MU Student Engagement coordinates the Co-Curricular Transcript (CCT), an online system to help students manage their experiences, achievements and involvement while as an Iowa State student. Faculty and staff can add verified entries while students can add their own self-managed entries as well. Entries are added to one of the following categories: Campus Involvement, Community Service, Honors and Awards, Internships and Study Abroad, Leadership Experience, On Campus Employment, Publications, Recreational Activities, Research, and Seminars and Workshops. From there students can create customized and comprehensive transcripts to use when applying for jobs, internships, scholarships, graduate school or leadership opportunities.

Annual events include: Fall ClubFest & Spring ClubFest (organization involvement fairs), WelcomeFest (Ames and ISU opportunity fairs), ISU AfterDark (substance-free alternative program- six times per year), Iowa Student Leadership Experience (one-day leadership conference), and Winterfest (celebration of all things winter).

More information is available at the Memorial Union Student Engagement, located in the East Student Office Space in the MU (across from Panda Express); online at www.studentengagement.iastate.edu (https://studentengagement.iastate.edu/) or by calling (515) 294-8081.

Lectures
www.lectures.iastate.edu/ (http://www.lectures.iastate.edu/)

The Committee on Lectures, funded by Student Government, brings to campus dozens of distinguished speakers in national and international affairs, the sciences, and the arts. In addition to giving formal lectures, many speakers meet with students for small-group discussions. Through the Lectures Program, students have access to a broad range of presentations, including popular culture, educational and economic topics, social issues, music and comedy, and technological and scientific development. Past speakers include writer Ta-Nehisi Coates, physicist Michio Kaku, activist Edward Snowden, attorney Gloria Allred, U.S. Rep. Katie Porter, and U.S. Senator Ben Sasse. The Committee on Lectures also co-sponsors events hosted by student organizations and academic units.

Students are encouraged to contact the Lectures Program office and become involved in the planning of these events.

Honor Societies
Honor societies at Iowa State University provide opportunities for students who excel in the classroom and want to network with others in their major. Members of these honor societies are eligible for transcript recognition through the Office of the Registrar. The complete list of honor societies (https://www.stuorg.iastate.edu/organizations/12/type/) can be found on the student organization website.
EXCHANGE PROGRAMS & STUDY ABROAD

Regent Universities Student Exchange Program

Iowa State University students may take courses at either of the other two Regent universities for Iowa State resident credit. Regular, degree-bound students in good standing at any of the three Regent universities may attend another Regent university for a maximum of two semesters, and the credits earned at the other university will be counted as resident credit at the home institution. Approval for participation and credit in the exchange program must be obtained well in advance of registration since the department head must approve the acceptance of such credits if these are to apply to the major, and to ensure complete processing of the application between the cooperating universities within specified dates for enrollment. Detailed information and application forms for the exchange program are available from the Office of the Registrar.

National Student Exchange (NSE)

Iowa State University is a member of National Student Exchange. The NSE Consortium has 200 colleges and universities throughout North America providing academic and experiential exchange opportunities. Iowa State students with a cumulative GPA of at least 2.50 are eligible to apply. Credits earned as an NSE participant will be recorded on the students Iowa State transcript. Approval for credit in the NSE program should be sought from a student's academic advisor in advance of application. Detailed information and applications forms are available from:

National Student Exchange
1080 Hixson-Lied Student Success Center
(515) 294-6479
nse@iastate.edu

www.dso.iastate.edu/nse (http://www.dso.iastate.edu/nse/)

Study Abroad

Studying abroad helps prepare students to meet the challenges of an increasingly interdependent global community. It’s an adventure that challenges the student academically and provides real opportunities to interact with other cultures, languages, and lifestyles. The skills students gain while studying abroad will make them top candidates for internship placements and full-time positions post-graduation.

As a leading international university, Iowa State has a major commitment to study abroad, and the Study Abroad Center (SAC) is the central administrative office responsible for providing these opportunities.

We offer advising on study abroad, international internships, volunteer opportunities, and scholarships.

With over 50 study abroad programs available, from one week to an academic year in length and in nearly every major, students are able to find a program that meets their needs and interests so they can discover for themselves why study abroad is the most exciting academic adventure.

Exchange Programs offer students the opportunity to study abroad at a partner university while paying Iowa State tuition.

Semester in Australia, Germany, Ireland, Italy, New Zealand, Scotland and Wales offers unlimited placement opportunities for students to study at some of our most popular destinations for the fall, spring, or summer.

Programs led by our faculty offer Iowa State courses around the world. Short-term options can take you from the Antarctica to Uganda and to more than 40 other destinations.

For additional information, contact or stop by the Study Abroad Center. No appointment necessary!

www.studyabroad.iastate.edu (http://www.studyabroad.iastate.edu)
STUDENT RECORDS

Student Records

Iowa State University maintains various records concerning students, to document their academic progress as well as to record their interactions with university staff and officials. In order that their right to privacy be preserved and to conform with federal law, the university has established certain policies to govern the handling of student records. All policies conform with FERPA, the Family Educational Rights and Privacy Act (also known as the Buckley Amendment).

Student Addresses

Students have the responsibility to notify the Office of the Registrar each time their information changes. Student information changes can be made through the Address Change link on the Student tab in AccessPlus (https://accessplus.iastate.edu/frontdoor/login.jsp).

Iowa State employees (e.g., Graduate Assistants, student employees, etc.) must also report an address change to the office of University Human Resource Services (http://www.hrs.iastate.edu/hrs/). Information changes can be made through the Personal Information application in Workday (https://workday.iastate.edu/).

When Records May Be Withheld

The appropriate university official may request that a student's record not be released if that student is delinquent in an account with the university or an affiliated organization. The effect of this action is that a transcript will not be released and registration will be withheld.

The appropriate official may also request that records be withheld in instances when official disciplinary action has been taken against a student. Authorization for these actions is supported by The Iowa Code and The Iowa Administrative Code.

In order for such an action to be rescinded, the Office of the Registrar must receive written authorization from the official who originally requested the action, indicating that the student has met the obligation. Further information about this policy can be obtained from the Office of the Registrar.

Review and Challenge of Records

A student may challenge the accuracy of handling of records maintained by the university on grounds that the records are inaccurate, misleading, or otherwise violate the privacy or other rights of the student. The university has established the following procedures to provide an opportunity for the student to correct or delete inaccurate records, or to insert into the record a written explanation of the content. Students who question their records should discuss the issue first with the individual staff person who established or maintains the records. Presumably most issues can be resolved at this level. If a satisfactory resolution cannot be reached, the student should submit the question to the head of the department in which the record is maintained.

The department head will discuss the issue with the staff person and the student challenging the record. If resolution cannot be reached after meeting with the department head, the student may submit the question to the dean or director to whom the department head is responsible. The dean or director will investigate, and will respond in writing.

If the record has not been reconciled through these measures, the student may direct a written request to the president of the university. The president will convene an Ad Hoc Hearing Panel of Access and Confidentiality of Educational Records, composed of two faculty members, two students, and one administrator, appointed by the president for a period of one year, with the president or a designee serving as nonvoting chairperson. The student shall be given an opportunity to present to the panel evidence relevant to the issues raised, and the panel will issue a written response.

Posting Grades and Test Scores

Instructors who wish to inform students of their performance may post grades and test scores on a secure course website as long as individual students may only access their own grades. The test scores or course grades of students may not be posted in any public location (World Wide Web or hard copy posting) unless the instructor posts the information using a code for each student that is known only by the instructor and the student.

Release of Grades

Students who choose to release their grades to parents or other trusted third parties may do so using the AccessPlus third party system. Reports of a student’s grades are not routinely sent to the student’s parents. Parents of students under 18 years of age may obtain grades by writing to the Office of the Registrar. The grades of other students will be sent to their parents only with written permission of the student, or by establishing dependency as outlined in item 9 under Confidential Information.

ISUCard and Identification Number

Each student is assigned a random university identification number on entry to the university. This number appears on the ISUCard that is provided to each student at the time of first registration. The ISUCard, may be required for some services and/or activities. At the time the ISUCard is issued each student also selects a university password, which is required for electronic access to personal student information.
Loss of an ISUCard should be reported immediately to the ISUCard Office, where the lost card will be invalidated and replaced for a charge. Disciplinary sanctions may be imposed for improper use of the ID card or attempts to obtain, by fraudulent means, any form of identification.

Social Security Number
Social security numbers are collected from prospective and current students, for administrative coordination and record identification purposes only. Although procedures have been established by the registrar for assignment of an alternative number upon request, students who wish to be employed on campus, desire to claim federal educational tax benefits, or are applying to receive financial aid, are required by law to provide their social security numbers for administrative use. The social security number is a confidential record and is maintained as such by the university in accordance with the Family Educational Rights and Privacy Act.

Policy on Student Names
Iowa Regent universities have a common policy regarding student names and name changes. The name on the student record should be the student's complete and legal name; however, we understand and respect that not all students identify with their legal name. If a student does not have the official legal documentation required in the standard Name Change Policy to support their legal name change, the Office of the Registrar will work with the student to still process the name change. In evaluating and processing all name change requests, the university reserves the right to require adequate and appropriate documentation as warranted. After a name change, a current student must obtain a new ISUCard; a replacement fee may apply.

Consumer information
The Higher Education Opportunity Act of 2008 (HEOA) requires that postsecondary institutions participating in federal student aid programs make certain disclosures to enrolled and prospective students, parents, employees, and the public. The consumer information policy is available at https://web.iastate.edu/about/consumer/. Students without electronic access can obtain the information from the Office of the Registrar, 214 Enrollment Services Center, 515-294-1840 or from the Office of Admissions, 100 Enrollment Services Center, 515-294-5836. A paper copy of the information will be provided upon request.

Iowa State University Online Directory Information
The ISU Online Directory (https://www.info.iastate.edu/) differentiates between verified and guest users:

**Verified Users** - those accessing the directory from an on-campus server or via Iowa State University’s virtual private network (VPN) or other authenticated means.

Information available for display to verified users include:
- Name
- Major
- Classification
- ISU Email Address

**Guest Users** - those who are external, unauthenticated individuals.

Information available for display to guest users include:
- Name
- Major
- Classification

Guest users do not have access to view Iowa State University email address, but they do have the ability to send an email to the student via a webform.

Public Information at Iowa State University
Online directory information and public information may be released to the public upon request, except in cases where the student has suppressed the release of their information. Iowa State reserves the right to review and respond to the requests for release of public information on a case-by-case basis. While FERPA may authorize the release of student information, it does not obligate a school official to do so. See list below for specific types of public data.

**Online Directory Information**
- Name
- Major
- Classification
- ISU Email Address (for verified users)

**Other Public Information**
- Hometown
- Dates of Attendance at ISU
- Expected date of graduation
- College
- Awards and academic honors
- Iowa State degree(s) and date(s) awarded
- Previous educational institutions attended, degrees received, dates of attendance
- Full-time or part-time status
Students can withhold public information through the Address Change link on the Student tab in Access Plus (https://accessplus.iastate.edu/frontdoor/login.jsp).

Confidential Information

With the exception of the information noted above, all student records are considered to be confidential and are open only to school officials. A school official is a person employed by the university in administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the university has contracted; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility. Iowa State University's notification of rights under FERPA can be found at http://www.registrar.iastate.edu/policies (http://www.registrar.iastate.edu/policies/).

The following policies govern access to student records:

1. Each type of student record is the responsibility of a designated school official, and only that person or the dean or director to whom that person reports has authority to release the record. The following is a list of the responsible officials:

   a. Academic records: registrar
   b. Admissions records: director of admissions
   c. Financial aid records: director of student financial aid
   d. Student financials: director of accounts receivable
   e. Traffic and security records: director, ISU Department of Public Safety
   f. Medical records: director, Thielen Student Health Center
   g. Counseling records and test scores: director, Student Counseling Service
   h. Actions of Academic Standards Committees: college deans
   i. Disciplinary records: assistant dean of students, office of student conduct
   j. Residence hall records: director of residence
   k. Placement records: college placement officers
   l. Evaluations for admission to ISU graduate or professional programs: deans or department chairs
   m. Special academic programs: faculty member in charge of the program and the dean of the college
   n. Student employment: director of university human resources

2. The designated official may release records to other school officials who have a legitimate need for the information. A list of those persons who normally have access to each type of student record is available in 214 Enrollment Services Center.

3. All student records are reviewed periodically. Information concerning the frequency of review and expurgation of specific records is available in 214 Enrollment Services Center.

4. Students have the right to review upon request any records that pertain directly to them, and may obtain a copy of the record for a fee. This provision does not apply to records to which the student has waived their right to review (e.g. letters of recommendation), nor does it apply to medical and counseling records.

5. A student may waive the right to review a specific record by submitting in writing a statement to this effect to the official responsible for that record.

6. A file containing copies of records pertinent to advising is maintained on each student for use by the student's advisor. This file may be maintained in hard copy or electronic format. Ordinarily this file is kept in the possession of the advisor, but for convenience it may be stored elsewhere such as in the dean's office or department office. When the student changes majors, or changes advisors within the same major, the file is transferred to the new advisor. Under the university's student records policy, the student is considered to have the right of access to this file.

7. Medical and counseling records shall be released at the written request of the student to medical or psychological professionals outside the university or to university officials.

8. University personnel who have access to student records in the course of carrying out their university responsibilities shall not be permitted to release the record to persons outside the university, unless authorized in writing by the student or unless one of the exceptions stated earlier is involved.

9. Confidential information may be released by students to their parents or other trusted third parties through the AccessPlus third party system. Confidential information may also be released by obtaining the student's written consent or by having the parent establish the student's dependency as defined by the Internal Revenue Code of 1954, section 152, by furnishing a certified copy of the parent's most recent federal income tax return.

10. The officials responsible for custody of student records will maintain records of requests and disclosures of personally identifiable nonpublic information. The records of requests, whether granted or not, shall include the person or agency requesting the information and the purpose of the release. These records of requests and disclosures will be available to the student on request. Records of requests and disclosures are not necessary for requests made by the student, by school officials
in carrying out their official responsibilities, by persons employed by agencies and offices conducting audits and accreditations of university programs, or any of the other exceptions listed previously.

For the purposes of FERPA, Iowa State University defines Directory Information to include both Online Directory and Other Public Information as defined above.

It is the policy of the university to respect the privacy of students; therefore, only lists containing Directory Information may be made available to members of the public when deemed appropriate and necessary, and in accordance with all applicable Iowa State policies and procedures. While FERPA allows for the release of such information, it does not obligate the university to do so; Iowa State University reserves the right to review and respond to requests for release of information on a case-by-case basis.

Directory Information will be provided at a cost. A sub-set of Directory Information is available via the Online Directory (https://www.info.iastate.edu/); please note that the Online Directory differentiates between verified and guest users and displays information accordingly. More information on this can be found in the Public Information section of the University Catalog.

**Disclosures Permitted by FERPA**

Iowa State University retains the discretion to disclose Directory and Confidential Information as indicated in Section 4 (http://www.registrar.iastate.edu/policies/) of Iowa State University’s Notification of Rights Under FERPA. Specifically, the university may disclose to the public or to specific individuals, Directory and Confidential Information for reasons of safety if the disclosure meets the criteria under Section 4 (http://www.registrar.iastate.edu/policies/).
ACADEMICS

Classification

Classification (year in school) is determined by the number of credits completed and reported to the registrar, and is based on credit hours earned, not merely credit hours attempted. The grades F and NP and the marks I and X do not contribute toward credit hours earned and thus are not considered in determining year in school. See Grades for information about the grading system at Iowa State University.

Classification in all colleges except Veterinary Medicine is as follows:

**Sophomore**: 30 credit hours earned

**Junior**: 60 credit hours earned

**Senior**: 90 credit hours earned

Students who have a bachelor's degree and are working toward another undergraduate degree, licensure, or admission to a specific graduate or professional program, are typically classified as a senior.

Transfer students without a degree are classified on the basis of credits accepted by Iowa State University.

Veterinary medicine students are promoted from the first- to the second-, third-, and fourth-year classes based upon satisfactory completion of the required courses for each year. To be promoted to the second-year class, students must have a cumulative grade-point average of at least 1.67 for all courses in the first year of the veterinary medicine curriculum. To be promoted to the third- and fourth-year classes, students must have a cumulative grade point average of at least 2.00 for all courses in the professional curriculum.

A student, who is attending Iowa State and decides not to work toward an undergraduate degree, will be classified as a special (nondegree) student. Admission requirements and academic standards regulations are the same as regular students. Credits taken as a special (nondegree) student are applicable for undergraduate degree purposes if the student is admitted later as a regular undergraduate. Credits obtained as an undergraduate special student may not, however, be applied toward a graduate degree.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as special (nondegree) students in the College of Liberal Arts and Sciences and usually are not permitted to enroll in academic courses until they have satisfied requirements for admission as regular students. Permission to enroll in one academic course may be granted under special circumstances.

Degree Planning

ISU Degree Audit

In addition to being properly registered, students are responsible for knowing the requirements for their degree and planning their schedule to meet those requirements. One way to monitor progress toward a degree is with the ISU degree audit.

Students may access their ISU degree audit through AccessPlus (https://accessplus.iastate.edu/frontdoor/login.jsp). The degree audit shows courses that have been completed, courses in which the student is currently enrolled, and graduation requirements that need to be completed for the student’s curriculum.

Students should use the degree audit information to help them review progress towards their degree(s), plan their course of study to complete degree requirements, and select courses for the next term. Graduation evaluators in the Office of the Registrar use the degree audit during the term a student will graduate to determine if the student will meet all degree requirements upon successful completion of the courses on the student’s schedule that term.

In addition, through AccessPlus, students may request a degree audit for any major available at Iowa State. The audit results will show how their completed and in-progress course work applies toward other majors or options offered at the University.

For further information about how completed courses fulfill degree requirements or how other courses will apply toward their degree requirements, students should see their advisor.

Catalog in Effect

A student may choose to graduate under the catalog in effect at the time of graduation or a catalog for the previous six years, provided it covers a period of the student’s enrollment at an accredited college or university. Full requirements of the chosen catalog must be met except that adjustments will be made in instances where courses are no longer available or where programs have been changed.

Bachelor’s Degree

To receive a degree, a student must meet the requirements of the curriculum in which the degree is to be awarded. Verification that the student has met those requirements is made by the dean of the college, who also has the authority to waive a requirement under exceptional circumstances.

A minimum of 120-semester credits and a cumulative grade point average of at least 2.00 in all work taken at Iowa State University is required for graduation.
A student admitted as a transfer student from another college or university is required to have a 2.25 cumulative grade point average at the time of entrance. A transfer student who has earned an associate’s degree is required to have a 2.00 cumulative grade point average at the time of entrance. A student may, however, be admitted with a quality-point deficiency, and will be required to earn sufficient quality-points above a 2.00 at Iowa State to offset the quality-point deficiency at the time of entrance.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor’s degree from Iowa State University. There is no limit to the number of credits that may be transferred from a four-year institution.

To qualify for a bachelor’s degree, a student must take a minimum of 32 credits in residence at Iowa State University. Also required is that the last 32 credits must be taken in residence, although under special circumstances, with prior written approval of the student’s major department, six of the last 32 credits may be transferred and applied toward a degree at Iowa State University.

A student who takes work at another college or university after having been enrolled at Iowa State must submit transcripts of all work attempted to the Office of Admissions at Iowa State. This work must average a 2.00 or the deficiency of quality points will be assessed against the student. Failure to submit such transcripts will be grounds for dismissal.

In unusual circumstances, the Academic Standards Committees of the respective colleges may review and give further consideration to the records of students who, except for grade-point average, have satisfactorily completed all graduation requirements. If the appropriate college Academic Standards Committee considers that the educational and professional needs of such a student have been satisfactorily met, or can be satisfactorily met by imposing further conditions, the committee may recommend to the dean of the college that the student be graduated or that a supplemental program be accepted in place of the fully unqualified grade point average. The college Academic Standards Committee chairperson reports such exceptional actions to the Faculty Senate Committee on Academic Standards and Admissions.

Two Bachelor’s Degrees
Students may receive two bachelor’s degrees if the degree requirements for each major are met, including those for general education requirements, and the total number of semester credits earned is at least 30 more than the requirements of the major requiring the greater number of credits. This rule applies whether or not the degrees are awarded at the same time. Students should have an academic advisor in each major, with one advisor being designated as the registration advisor. Students should request approval to pursue two degrees by completing the Curriculum Change Form (https://www.registrar.iastate.edu/sites/default/files/uploads/forms/Curriculum%20Change%20Form%202021%20%2021.pdf). Each advisor will have access to the student’s information after this form has been processed. The appropriate department and college must approve each degree program.

Students who have earned advanced degrees and wish to earn a second Bachelor’s Degree may be eligible for a college waiver of certain basic and general education requirements. Students should contact the department offering the major for advice and appropriate planning.

Double Major
A double major is a program for a single degree in which all requirements for two or more majors have been met. The majors may be in different colleges or within the same college or department. The diploma and permanent record will designate all majors that are completed at the same time.

To declare a double major, students should complete the Curriculum Change Form (https://www.registrar.iastate.edu/sites/default/files/uploads/forms/Curriculum%20Change%20Form%202021%20%2021.pdf). This form, available from advisors and classification offices, should be completed at least one term prior to graduation. One major should be designated as primary and the other secondary for purposes of record keeping, but the student’s rights and responsibilities are the same in both majors. The advisor of the primary major will serve as the student’s registration advisor, but both advisors will have access to the student’s information. Degree programs must be approved for each major by the appropriate department and college. One of the majors may subsequently be canceled using the same form.

Students in the College of Engineering are able to earn a degree with a second major as long as the second major is within another college, meets all requirements of the additional programs and contains a minimum of 15 additional credits beyond the requirements for a B.S. degree in engineering for each additional area of study. A student with multiple curricula within the College of Engineering is permitted to earn only multiple degrees. All requirements for each curricula must be met plus an additional 30 credits for each curricula being pursued beyond the curriculum which requires the most credits.

Students with a primary major in another college who wish to take a second major in the College of Liberal Arts and Sciences are not required to meet the Liberal Arts and Sciences General Education requirements. They must, however, meet all requirements for the major, including complementary courses. Students in the B.L.S. curriculum in the College of Liberal Arts and Sciences do not have majors.

Second Major Completed after the Bachelor’s Degree
After receiving a bachelor’s degree, a person may wish to complete all requirements for another major. Approval of the department of the second major is needed before study for the program is begun. At the
completion of the program a notation will be made on the permanent record (transcript), but no change will be made on the diploma received at the time of graduation. A degree program must be approved for the second major by the department and by the dean’s office.

**Changing Major**

A student’s freedom to change their major, and the procedure that should be followed, depend on the student’s academic standing and on policies of individual colleges as approved by the provost.

If students have never been dismissed and reinstated, they may change their major by consulting first with their advisor. Procedures for changing their major are as follows:

1. If the change involves majors within the same college, they should check with the college office to obtain instructions as to how to make the change.
2. If the change involves majors in different colleges, they should obtain a Curriculum Change Form (https://www.registrar.iastate.edu/sites/default/files/uploads/forms/Curriculum%20Change%20Form%201%2021.pdf) and their file from their advisor, present these materials to the student services office of their present college, then to the student services office of the college to which they are transferring, and finally to the office of their new major.
3. Students on academic probation (P) may be restricted by rules outlined in the section on Additional Academic Standards Regulations.
4. Students who have been reinstated may not transfer to another college within the university during the first term following reinstatement, and they may not at any time transfer back to the college that originally dismissed them without the permission of the academic standards committee of that college.

**Undergraduate Minor**

To declare a minor, students must submit a completed Request for a Minor form to their college office at least one term before graduation. The minor may be from the catalog under which the student is graduating or a later catalog.

Requirements for an undergraduate minor are specified by many departments and programs in the university; a record of completion of such requirements appears on a student’s transcript. Specific requirements and/or restrictions are available from the department or program offering the minor.

An undergraduate minor has the following requirements and understandings:

1. All minors require at least 15 credits, including at least 6 credits taken at Iowa State University in courses numbered 300 or above.
2. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.
3. Credits used to meet the minor requirements may also be used to satisfy the credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.
4. Some students may have to exceed the graduation credit requirement set by their college in order to meet the requirements of both the minor and the curriculum/major.
5. Courses taken for a minor may not be taken on a pass-not pass basis.

**Undergraduate Certificate**

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for an undergraduate major. The requirements of the certificate program will determine if an associate or baccalaureate degree is required for the award of the certificate.

An undergraduate certificate has the following requirements and understandings:

1. A student has received either an associate of arts (AA) or associate of science (AS) degree or a baccalaureate degree from any accredited institution or will earn an ISU baccalaureate degree at the same time or before the requirements for the certificate are completed.
2. Admissions Criteria
   a. Students earning a certificate with a baccalaureate degree must meet all ISU admission requirements for either freshman (https://www.admissions.iastate.edu/freshman) or transfer students (https://www.admissions.iastate.edu/transfer)
   b. Students earning a certificate without an ISU baccalaureate degree apply as a non-degree seeking student and will be asked by Admissions if their intent is to declare a certificate. Students must have earned an associate of arts, an associate of science, or baccalaureate degree prior to being admitted to the certificate program. Students should refer to the admissions website (https://www.admissions.iastate.edu/nondegree/undergraduate_requirements) for admission requirements for nondegree undergraduate students. Students must meet any additional admission requirements for the certificate.
3. Requirements for Certificates
   a. A minimum of 20 credits, with at least 12 credits taken at ISU which are applied towards the undergraduate certificate requirements. All prerequisite requirements for the certificate must be met as part of fulfilling the requirements for the certificate.
b. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above.

c. The certificate must include at least 9 credits that are not used to meet any other department, college, or university requirement. Credits used to meet the certificate requirements may be used to satisfy the credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.

d. Courses taken for a certificate may not be taken on a pass-not pass basis.

e. A cumulative grade point average of at least 2.00 is required in all courses taken at ISU towards the certificate.

f. A student may not receive both an undergraduate major and a certificate of the same name.

4. Awarding of Certificates

   a. The following criteria must be met prior to the award of a certificate:

      i. For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree.

      ii. For students that have received a baccalaureate, associate of arts, or an associate of science degree from any accredited institution, a certificate is awarded upon completion of the certificate requirements.

   b. A notation of a completed certificate will be made on a student’s transcript and a printed certificate will be awarded.

Communication Proficiency Policy

Basic Principles: The faculty of Iowa State University believe that all educated people should be able to communicate effectively in a variety of settings and media, including electronic. Consequently, Iowa State University graduates are expected to develop competence in three interrelated areas of communication: written, oral, and visual.

This communication competence can best be achieved through the following five principles:

- Communication instruction and practice are distributed over the student’s entire undergraduate experience, both in and out of the classroom, from the first year through the senior year.
- Communication instruction and practice are distributed across the curriculum, both in communication courses and in courses in the student’s major.
- Active learning and higher-order thinking are fostered through communication.
- Faculty across the university share responsibility for the student’s progress in communication practices.
- Both faculty and students engage in ongoing assessment for continuous improvement of the student’s communication practices.

Iowa State University’s communication curriculum, based on these five principles, seeks to enrich the student’s understanding of the various subjects studied as well as prepare the student to communicate successfully in professional, civic, and private life.

Foundation Courses

To ensure that broad communication competence is addressed and developed at the beginning of a university career, all students will earn six credits in the two-course introductory sequence (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition), normally taken in the first and second years. Students will focus on writing and critical reading, with complementary instruction in visual, oral, and electronic communication; they will concentrate on civic and cultural themes; and they will enter work in a communication portfolio to document their current level of proficiency.

Communication Proficiency Grade Requirement: At a minimum, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250; some majors/degree programs may set higher requirements for communication proficiency.

Upper-Level Curricula

Continuing development of communication skills will be directed by the student’s major department. Using the university’s basic principles as a guide, each department will specify a set of intended learning outcomes and design communication experiences by which students in the major can achieve the desired level of communication proficiency.

Departments may select from or combine a variety of communication options that best match their faculty, students, and curriculum:

- designated communication-intensive courses that integrate written, oral, and visual communication into a course in the major;
- a sequence of courses within the major that incorporates communication tasks of increasing complexity;
- linked courses—one in communication, one in the major—that integrate readings and assignments;
- advanced composition course(s) appropriate to the student’s major and offering instruction in written, oral, and visual communication;
- communication-intensive activities within or beyond course work, such as communication portfolios, discipline or course-specific student tutoring, community service projects, internships, electronic presentations, informational fairs, juried competitions, entrepreneurial projects, newsletters, Web sites.

Departments will retain the authority for regularly assessing the degree to which their students achieve the specified learning outcomes and for
making curricular improvements based on departmental assessment data.

Non-Native Speakers of English: Students admitted to the university who are graduates from non-U.S. high schools and whose first language is not English are required to take the English Placement Test before the beginning of their first semester of enrollment as students at Iowa State. This requirement includes freshmen as well as those who have transferred credit from other institutions. The test is administered by the English Department and is offered before the beginning of each semester. Students whose performance on this placement examination is satisfactory will follow the regular university communication proficiency requirements. Students who have deficiencies will enroll in special English classes, as determined by the test results.

U.S. Diversity and International Perspective Requirements

One of Iowa State University's goals is to prepare its students to meet the challenges of responsible citizenship and effective professional roles in a culturally diverse global community. To help achieve this goal, all undergraduate students must fulfill graduation requirements in two areas: U.S. Diversity and International Perspectives. The specific standards used to certify students' fulfillment of these requirements vary from major to major, but all require three credits of course work (or the equivalent in some alternative academic experience) for each of the requirements. In most cases, courses used to meet the U.S. Diversity and International Perspectives requirements can also be used to fulfill general education requirements of the student's college or requirements of the student's major. Students should consult with advisors for details of the requirements in particular majors.

The focus of the U.S. Diversity requirement is the multicultural society of the United States. Courses or alternative academic work used to meet the requirement address significant manifestations of human diversity and provide students with insights that enhance their understanding of diversity among people in the U.S.

List of approved U.S. Diversity Courses (https://www.registrar.iastate.edu/students/div-ip-guide/archived/2022-2023-u-s--diversity-list/)

Through completion of the U.S. Diversity requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:

• articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues.

• analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.

• analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.

• analyze the perspectives of groups and individuals affected by discrimination

• analyze how cultural diversity and cooperation among social groups affect U.S. society.

The focus of the International Perspectives requirement is the global community. Its objective is to promote students' understanding of cultural diversity and interdependence on a global scale. A period of immersion in a foreign culture is often a particularly effective way of meeting these objectives, so Iowa State University encourages the use of study-abroad experiences as a means of fulfilling the International Perspectives requirement. International students, because they are "studying abroad" from their home country's perspective, are normally deemed to have met the International Perspectives requirement. The International Perspective requirement shall be waived for U.S. military veterans who have completed at least three months of service stationed outside of the United States.

List of approved International Perspectives Courses (https://www.registrar.iastate.edu/students/div-ip-guide/archived/2022-2023-ip-list/)

Through completion of the International Perspectives requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:

• analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview.

• describe and analyze how cultures and societies around the world are formed, are sustained, and evolve.

• analyze and evaluate the influence of global issues in their own lives.

• describe the values and perspectives of cultures other than their own and discuss how they influence individuals' perceptions of global issues and/or events.

• communicate competently in a second language.

Academic Grievances and Appeals

Students who believe a faculty member (in his or her academic capacity) has behaved unfairly or unprofessionally may have their grievance reviewed through the procedure described below. A student may not initiate an academic grievance more than one year following completion
of the course, and may not initiate the grievance of a course grade beyond midterm of the semester following completion of the course.

Prior to initiating a formal grievance, a student may wish to discuss the situation informally with the Dean of Students or designee, who can offer advice as to the most effective way to deal with it.

Grievances arising out of classroom or other academic situations should be resolved, if at all possible, with the student and the instructor involved. If resolution cannot be reached, or if the grievance involves sexual or racial harassment and the student prefers not to deal directly with the instructor, the student should discuss the grievance with the instructor’s department chair and submit it in writing to him or her. The department chair will investigate the grievance, including discussing it with the instructor involved and/or referring it to a departmental grievance committee. The department chair should respond in writing within five class days of receipt of the written notice of the grievance.

If the student is not satisfied with the resolution of the grievance proposed by the department chair, the student may appeal within 45 calendar days in writing to the dean of the instructor’s college. (In the case of a grievance involving a Graduate College policy or procedure, an appeal of the chair’s decision should be directed to the Dean of the Graduate College rather than to the dean of the instructor’s college.)

The dean will hear the explanations of the department chair and instructor, and should respond to the student in writing within ten class days of receipt of the written notice of the appeal. If the grievance cannot be resolved with the dean, the student may forward within 45 calendar days a written appeal to the provost, who will convene a Committee to Review Student Grievances (see below) to consider the appeal within fifteen calendar class days of receipt of the written notice of the appeal.

Within ten calendar days following the convening of the committee, the provost will make a decision with regard to the grievance and will transmit this decision in writing to the grievant, the dean, the department chair, and the instructor. An appeal of the provost’s decision may be made within 45 calendar days to the president of the university. The time limit specified at each level may be extended by mutual agreement of all parties concerned.

The Committee to Review Student Grievances is composed of faculty members named by the president of the Faculty Senate and students named by the president of the Student Government. The provost may serve as a chairperson for the committee, or may designate another chairperson for a specific grievance hearing. A minimum of two faculty members, two students, and the chairperson shall constitute a quorum for the convening committee.

**Attendance and Absences**

**Class Attendance**

In order to attend a given class, a student must be registered for that class for credit or audit. Exceptions to this policy are at the discretion of the instructor of the course. See Index, Validating Enrollment for regulations concerning attendance to validate students’ enrollment in a class.

Students are expected to attend class meetings as scheduled. Each instructor sets his or her policy with respect to class attendance, and excuses for absence from class are handled between the student and instructor. The instructor is expected to announce his or her policy at the beginning of the course.

Additional information regarding discretionary accommodation for disability and religion are available at http://www.hrs.iastate.edu/AAO/eod/reasonaccom.shtml (http://www.hrs.iastate.edu/AAO/eod/reasonaccom.shtml/)

**Veteran Attendance**

In accordance with the requirements of the Servicemembers Improved Transition through Reforms for Ensuring Progress Act (SIT-REP Act, December 31, 2018), the University will not deny access to classes or facilities to a Veteran or eligible dependent due to a late payment from the Veterans Administration. This is only applicable to Veterans or eligible dependents who are receiving educational assistance under Chapter 31 (VR&E) or 33 (Post 9/11 and Fry Scholarship) of title 38, United States Code (U.S.C.). For the purposes of this policy, “Denial of Access” shall be defined as “to prohibit the entry, participation, or attendance to an event or facility otherwise afforded to all registered students.” More information about this policy is available at https://catalog.iastate.edu/tuitionfees/#feepaymenttext.

Students who receive benefits from the Veterans Administration required by the V.A. to attend class regularly to maintain their V.A. eligibility. If the instructor knows that a student receiving V.A. benefits is not attending class, the instructor is obligated to notify the Office of the Registrar and a notification will be forwarded to the Veterans Administration. More information about veteran benefits is available at http://www.veterans.iastate.edu. (http://www.registrar.iastate.edu/veterans/)

**Field Trips/Curricular-Related Activities**

Trips away from campus as part of a course are often appropriate educational experiences. They may not, however, take place during the first or last week of the semester, nor may they extend over more than two consecutive class days (Monday -Friday); these regulations may be waived only by special permission of the dean of the college in which the course is offered. Students should consult with instructors whose classes will be missed. If a mutually satisfactory agreement between
thee instructors and the student cannot be reached, the student cannot be required to attend the curricular-related activity or be penalized by the instructor for missing the curricular-related activity.

Special fees are often charged to cover the costs of field trips. Field trip fees are noted in the Schedule of Classes (http://classes.iastate.edu/).

**Excusable Absences for Non-Curricular Reasons**

Students who miss class for non-curricular reasons are responsible for completing all assigned course requirements in a timely manner. Instructors should provide timely opportunities for students to make-up or replace missed scheduled examinations and/or assignments resulting from an excusable absence. While instructors are free to change the format of make-up examinations or assignments, students will be evaluated by the same standards as other members of the class.

In all cases, the person responsible for the event or activity should provide participants with a letter explaining the proposed absence and its duration including travel times for off-campus events and activities. Students must provide this documentation to instructors at least 10 days in advance of the activity or event, except when such notice is not possible.

Course instructors retain final authority regarding student absences and how they impact course grades and the acceptability of a student's work toward passing their course. If a student must miss, for any reason, a portion of a course that, in the considered opinion of the course instructor, is critical to the student's ability to meet the course objectives, the instructor must recommend alternative actions to the student, which may include dropping the class.

**Extra-Curricular Activities as a Representative of the University**

Students may seek to or be asked to participate as an Iowa State University representative in non-credit events (competitions, conferences, presentations, programs, and performances) scheduled by academic or athletic units of the university at times that conflict with scheduled classes.

Instructors shall excuse students who miss class while representing Iowa State University in official department-or university-sponsored activities, including:

- academic or professional conferences and workshops
- intercollegiate athletic, academic, and judging competitions
- musical, theatrical, dance and other artistic performances
- presentations or programs given to external audiences

**Other Extra-Curricular Activities**

Instructors will determine whether other absences not officially sponsored by a unit of the University (e.g., conference attendance, job interviews), will be treated as excused.

**Military Service**

Instructors shall excuse absences due to performing required National Guard or other United States military service obligations (other than annual training). When a student is called to active duty for more than two weeks, instructors should meet with the student and the student's advisor to discuss the situation and academic options. University procedures are in place for such situations and should be followed.

**Court Appearances**

Instructors shall excuse absences due to officially mandated court appearances including jury duty.

**Examinations and Evaluation**

**Evaluation Procedures**

It is university policy that the instructor shall inform the students at the beginning of each course of the evaluation procedures planned for use in the course.

**Retention of Records**

Records of all graded work must be retained by the instructors until midterm of the semester following completion of a course or until all pending appeals and incompletes are resolved, whichever is later. Instructors leaving the university must file records of all graded work with their department office before departure.

**Examinations**

Examinations are one of the most common ways instructors assess student performance. In order that examinations can be a useful part of the educational process, the following policies have been instituted:

1. One purpose of examinations is to help students’ learning. Therefore, examinations should be evaluated as soon as possible after they are given and the results should be made available to the students in a timely way to enhance learning.

2. All tests and examinations administered between the beginning of the term and final examination week shall be held during a regularly scheduled lecture or laboratory class period for that course. A department may obtain approval to administer a separately scheduled examination if all of the following criteria are met:
   a. The course is multi-sectioned.
   b. A common departmentally developed examination will be administered to all students in all sections at the same time.
3. At the end of the semester, a week is set aside for final examinations or other term evaluations, with a two-hour period normally scheduled for each course. The following policies govern the responsibilities of students and faculty members during this week:

a. Final exams may not be given at a time other than that for which the exam is scheduled by the registrar. An instructor may not give a final exam prior to final exam week nor change the time of offering of the final examination as it appears in the final exam schedule. Permission to change the time for which an exam is scheduled may be given only by the dean of the college. If the instructor elects not to give a final exam in a course of two or more credits, the class is required to meet at the scheduled final exam period for other educational activity such as a review of the course or feedback on previous exams.

b. Final exam periods are determined according to the regularly scheduled meeting time of the class. However, certain courses are assigned special group exam times so that several sections of the same course may be tested together. The criteria for establishing special group exams are similar to those listed for separately scheduled exams listed in number 2 above. If this results in conflicting group examination periods, students should inform the instructor in charge of the first of the two conflicting courses as listed on the final exam schedule within the special groups in question; that instructor is responsible for arranging a special examination or making some other adjustment.

c. Evening courses with lectures scheduled at 6:00 p.m. or later should give their examinations during finals week from 7:00-9:00 p.m. on the day the class normally meets. If this exam conflicts with an evening group exam, the instructor responsible for the latter must arrange a special examination for any students who have a conflict.

d. If unusual circumstances involve the need for students to change the time of their final examination, they must obtain the approval of the instructor of the course.

e. If a student has three examinations scheduled on the same calendar day and wishes to change one to another day, the instructor of the course having the smallest number of students is responsible for arranging an alternate examination time for the student unless make-up exam times are available in one of the other courses.

f. All faculty members and teaching assistants with instructional or grading responsibilities are considered to be on duty throughout the entire final examination week and are expected to be available to students during that week for discussion of any matters pertaining to the final examination and final grade or to other aspects of the course.

**Prep Week**

For each Fall and Spring semester, the last full week of classes before final examinations is designated as Prep Week. The intent of this policy is to establish a one-week period of substantial and predictable study time for undergraduate students. During the Prep Week period, regular lectures are expected to continue, including the introduction of new content, as deemed appropriate by the instructor. The restrictions established by this Prep Week policy are:

- Due dates for mandatory graded submissions of any kind that fall within Prep Week must be listed on the syllabus provided at the start of the course.

- Mandatory final examinations may not be given during the Prep Week period except for laboratory courses or courses that meet weekly and for which there is no contact during the normal final examination week.

- Registered ISU Student Organizations may not hold any meetings, functions, or sponsored events during the Prep Week period. Any exception to these restrictions must be authorized in advance by Office of the Dean of Students.

**Scholastic Recognition**

The university recognizes those students who are doing exceptionally well in several ways, including the following.
1. **Dean's List.** Each semester the university issues a dean’s list made up of those students who have carried at least 12 credit hours of graded or S-F courses with a 3.50 grade-point average or above for the semester. Courses taken on a P-NP basis do not count as part of the 12-credit hour requirement. No dean’s list is issued for summer school. The list can be viewed from the Office of the Registrar website (http://www.registrar.iastate.edu).

2. **Top 2 Percent.** Each spring semester, undergraduate students in the top 2% of their class (freshman, sophomore, junior, and senior) within their college, based on cumulative grade point average, are recognized. In addition to a congratulatory letter from the university president, a notation of the accomplishment is recorded on the student's permanent record.

3. **Graduation with Distinction.** Undergraduates who have a cumulative grade point average of 3.50 or higher (based on a 4.0 scale) are eligible to graduate “with distinction” provided they have completed the following criteria for their degree. The student’s distinction will be based upon their cumulative grade point average after all degree requirements have been satisfied.

   These students are recognized as follows:
   - Summa Cum Laude: cumulative grade point average of 3.90 or higher.
   - Magna Cum Laude: cumulative grade point average of 3.70 to 3.89.
   - Cum Laude: cumulative grade point average of 3.50 to 3.69.

   The recognition appears on the student's official transcript and diploma.

   **Candidates for a bachelor's degree** may graduate "with distinction" provided they have completed 60 semester credits of coursework at Iowa State University at the time of graduation, including a minimum of 50 graded credits.

   **Candidates for the bachelor of liberal studies degree** may graduate "with distinction" provided that they have (a) completed 45 semester credits of coursework at the three Iowa Regent universities at the time of graduation, and (b) earned at least a 3.50 cumulative grade point average at ISU. The graduation with distinction recognition will be based on their combined grade point average for coursework taken at the three Iowa Regent universities.

   **Candidates for the bachelor of science in nursing degree** may graduate "with distinction" provided that they have completed 32 semester credits of coursework at ISU at the time of graduation.

   **Honors Program.** Students who are full members of the University Honors Program prior to Fall Semester 2011 must have a cumulative grade point average of 3.35 or higher at the beginning of their final term. Students becoming full members during Fall Semester 2011 or later need a cumulative grade point average of 3.5 at the beginning of their final term. In addition to meeting the appropriate grade point requirement, students will have completed an approved honors program of study and an honors project prior to graduation. This recognition appears on the student's permanent record and diploma, and in the commencement program.

**Graduation**

Seniors must file a graduation application with the Graduation Office, 210 Enrollment Services Center. Students will be notified of their graduation status approximately mid semester of their graduation term. For graduation application instructions and deadlines, go to the Graduation and Commencement website (http://www.graduation.iastate.edu/).

Iowa State University commencement ceremonies are held at the end of fall and spring semesters. Undergraduate students expected to graduate at the end of summer semester are invited to participate in the spring ceremony preceding their graduation term or the fall ceremony following their graduation term. In addition to the formal University commencement ceremony, the undergraduate colleges host graduation activities take place at the end of fall and spring semesters. For more information see www.registrar.iastate.edu/graduation/ (http://www.registrar.iastate.edu/graduation/)

Verification of satisfactory final grades will be completed approximately two weeks after the end of the semester and diplomas will be mailed to all successful degree candidates. Students must ensure the following before they can graduate:

1. **Registration for the term has been completed and the date of graduation is correct on the degree audit printout.**

2. **Sufficient credits, acceptable toward graduation, have been earned to meet the minimum requirements for their curriculum. (Some examples of credit not acceptable toward graduation are: elective credits beyond those allowed in a curriculum, credits earned in passing the same course more than once, more than four credits of Athletics 101, and credit in two courses for which the catalog states that only one may count toward graduation.)**

3. **They have achieved a set of communication competencies established by the department as appropriate for the major.**

4. **A cumulative grade point average of at least 2.00 was earned in all work taken at Iowa State; and student has met all special grade point average requirements established by their college, department, or program in specified courses.**
   a. **Students admitted from another college or university with a quality-point deficiency, must have earned sufficient quality points above a 2.00 at Iowa State to offset their transfer grade point deficiency.**
b. Students who have taken work at another college or university prior to or after having been a student at Iowa State, must have submitted a transcript of all such college study attempted to the Office of Admissions. This work must average 2.00 or the deficiency of quality points will be assessed against the student. Failure to submit such a transcript is grounds for dismissal.

5. Incompletes in courses required for graduation have been removed by midterm of the term of graduation.

6. At least 32 credits have been earned in residence at Iowa State University, and the final 32 credits were taken at Iowa State. (Six of the last 32 credits may be transferred to Iowa State, with prior permission of their major department.) Iowa State University must receive an official transcript of all transfer work by midterm of the term of graduation.

7. Outstanding financial obligations owed the university have been paid in full. Students who owe an outstanding obligation to the university will have a hold placed on their records and they will not receive their transcripts. If students have questions about this policy, they should contact the graduation area of the Office of the Registrar.

Posthumous Degrees and Certificates of Attendance
If a deceased student was very close to earning their degree at the time of their passing (e.g., within 18 credits for an undergraduate degree), the degree can be awarded posthumously. In the case of a student pursuing a graduate degree that requires the completion of a research project and the writing of a thesis or dissertation, the project must be substantially completed and a draft version of the thesis or dissertation must be passed upon by the Program of Study Committee.

Inquiries relative to the possibility of a posthumous degree for a deceased student should be referred to the Dean of the student’s college. If the Dean supports awarding the posthumous degree, the recommendation must be forwarded to the Provost for consideration and final decision.

Certificates of Attendance do not require a minimum period of attendance, and academic degree requirements are not relevant.

Academic Conduct
Class Attendance
In order to attend a given class, a student must be registered for that class for credit or audit. Exceptions to this policy are at the discretion of the instructor of the course. See Validating Enrollment for regulations concerning attendance to validate students’ enrollment in a class.

Students are expected to attend class meetings as scheduled. Each instructor sets their policy with respect to class attendance, and excuses for absence from class are handled between the student and instructor. The instructor is expected to announce their policy at the beginning of the course.

Veteran Attendance
Students who receive benefits from the Veterans Administration are required by the V.A. to attend class regularly to maintain their V.A. eligibility. If the instructor knows that a student receiving V.A. benefits is not attending class, the instructor is obligated to notify the Office of the Registrar and a notification will be forwarded to the Veterans Administration. More information about veteran benefits is available at http://www.veterans.iastate.edu/.

Field Trips/Curricular-Related Activities
Trips away from campus as part of a course are often appropriate educational experiences. They may not, however, take place during the first or last week of the semester, nor may they extend over more than two consecutive class days (Monday -Friday); these regulations may be waived only by special permission of the dean of the college in which the course is offered. Students should consult with instructors whose classes will be missed. If a mutually satisfactory agreement between the instructors and the student cannot be reached, the student cannot be required to attend the curricular-related activity or be penalized by the instructor for missing the curricular-related activity.

Special fees are often charged to cover the costs of field trips. Field trip fees are noted in the Schedule of Classes (http://classes.iastate.edu/).

Excusable Absences for Non-Curricular Reasons
Students who miss class for non-curricular reasons are responsible for completing all assigned course requirements in a timely manner. Instructors should provide timely opportunities for students to make-up or replace missed scheduled examinations and/or assignments resulting from an excusable absence. While instructors are free to change
the format of make-up examinations or assignments, students will be evaluated by the same standards as other members of the class.

In all cases, the person responsible for the event or activity should provide participants with a letter explaining the proposed absence and its duration including travel times for off-campus events and activities. Students must provide this documentation to instructors at least 10 days in advance of the activity or event, except when such notice is not possible.

Course instructors retain final authority regarding student absences and how they impact course grades and the acceptability of a student’s work toward passing their course. If a student must miss, for any reason, a portion of a course that, in the considered opinion of the course instructor, is critical to the student’s ability to meet the course objectives, the instructor must recommend alternative actions to the student, which may include dropping the class.

Extra-Curricular Activities as a Representative of the University

Students may seek to or be asked to participate as an Iowa State University representative in non-credit events (competitions, conferences, presentations, programs, and performances) scheduled by academic or athletic units of the university at times that conflict with scheduled classes.

Instructors shall excuse students who miss class while representing Iowa State University in official department-or university-sponsored activities, including:

- academic or professional conferences and workshops
- intercollegiate athletic, academic, and judging competitions
- musical, theatrical, dance and other artistic performances
- presentations or programs given to external audiences

Other Extra-Curricular Activities

Instructors will determine whether other absences not officially sponsored by a unit of the University (e.g., conference attendance, job interviews), will be treated as excused.

Military Service

Instructors shall excuse absences due to Veteran or military service obligations (including service-related medical appointments, military orders dictating appointments, and National Guard Service obligations). When a student’s military or veteran obligations are for more than two weeks, the student should meet with their advisor to discuss the situation and academic options and work with their instructors to discuss potential accommodations. University procedures are in place for such situations and should be followed. In all instances, students have a responsibility to communicate with their instructors to ensure they are continuing to meet course expectations and requirements. Faculty, staff, and students are encouraged to utilize the Military-Affiliated Student Center and review information at veterans.iastate.edu (https://www.veterans.iastate.edu/).

Court Appearances

Instructors shall excuse absences due to officially mandated court appearances including jury duty.

Academic MISCONDUCT

Academic misconduct is any action or attempted action that may result in creating an unfair academic advantage for oneself or an unfair academic advantage or disadvantage for any other member or members of the academic community. Such behavior is disparaging to the university and students found responsible for academic misconduct can face a number of disciplinary sanctions such as a disciplinary reprimand, conduct probation, deferred suspension, suspension, or expulsion. Instances of academic misconduct ultimately affect all students and the entire university community by degrading the value of degrees when some are obtained dishonestly, and by impacting the grades of students working honestly.

Examples of academic misconduct include, but are not limited to the following:

1. **Obtaining or use of unauthorized information**: It is a violation to obtain or use unauthorized assistance or prohibited materials and texts, tools, or study aids, unapproved use of cell phones, internet, or other electronic devices, unauthorized collaboration or copying on a test or assignment. Other examples may include working with another student on a take-home test or homework when not specifically permitted to do so by the instructor, looking at your notes or other work during an examination when not specifically permitted to do so, unauthorized sharing of questions or answers with another student or students whether in the classroom, via group chat or messages or another internet platform, or where posted by another student at an online academic warehouse (Course Hero, Chegg, Study Blue, etc.).

2. **Misrepresentation, falsification or fabrication of information**: It is a violation for students to misrepresent or falsify coursework. Examples of this may include purchasing or downloading for use a paper from a term paper service or online academic warehouse, working jointly on a project and then submitting it as one’s own, requesting, hiring, or otherwise encouraging someone to take a course, exam, test, or complete assignments on your behalf or for another student.

Students may not engage in or submit falsified or fabricated course work such as falsifying research, inventing or falsely altering data,
citing fictitious references, falsely recording or reporting attendance, hours, or engagement in activities such as internships, externships, field experiences, clinical activities.

It is additionally a violation for students to tamper with or attempt to alter grades, academic records, or an instructor’s evaluation of work by altering materials or documents, tampering with evaluation tools, or other means of interfering.

3. Plagiarism: Plagiarism is a form of misrepresentation. Students may not present the work, words, theories, data, expressed ideas, or artistry of another person or persons as their own, neither word-for-word nor paraphrasing of another person’s work. It is a violation for students to reproduce another person’s paper, work or artistry, even with modifications, and submit it as their own. Students may not use another person’s work or words (including unpublished material) without appropriate source documentation or citation.

It is a violation for students to submit substantially the same work to satisfy requirements for one course or academic requirement that has been submitted in satisfaction of requirements for another course or academic requirement without permission of the instructor of the course for which the work is being submitted.

4. Other academic misconduct: Students are prohibited from any action that helps another student engage in academic misconduct. Examples may include providing or selling coursework or materials to another person where this is not permitted or where they plan to use it in an unauthorized manner or otherwise submit it as their own work; unauthorized provision or discussion of exam questions or answers with students that will be taking the same or similar exam; posting coursework created by an instructor without their permission at an online academic warehouse (Course Hero, Chegg, Quizlet, etc.); taking an exam/completing an assignment for someone else; or otherwise seeking to acquire, selling, bribing, paying or accepting payment for unauthorized academic work or assistance that contributes to academic misconduct.

Students are prohibited from the recording and/or sale or dissemination (including posting) of instructional content without the express permission of the instructor(s) or through an approved accommodation coordinated via Student Accessibility Services.

Students, faculty, and staff who would like more information are encouraged to visit the Student Conduct (https://www.studentconduct.dso.iastate.edu/) website for resources pertaining to academic integrity.

---

**Reporting Academic Misconduct and Academic Outcomes**

Academic misconduct is a violation of the behavior expected of a student in an academic setting as well as a student conduct violation. A student found responsible for academic misconduct is subject to appropriate academic penalty, to be determined by the instructor of the course, as well as sanctions under the university Student Code of Conduct (https://www.policy.iastate.edu/policy/SDR/). If an instructor believes that a student has behaved dishonestly in a course, the following steps are recommended:

1. Contact the student to indicate there are concerns with the coursework; this can be done via email or another appropriate student learning platform.

2. Provide the student an opportunity to respond and indicate whether they admit or deny responsibility.
   a. Where students request to meet, instructors can facilitate this as plausible (in-person or virtual), involving the relevant and appropriate instructors for the referral (e.g., teaching assistant for the course and/or supervising faculty.)
   b. In cases involving multiple students, it recommended that meetings are with individuals.

3. If they deny responsibility, do not assign a grade for the assignment or course (leave grade as N for grade processing) until the Office of Student Conduct has shared the student disciplinary conclusions.

4. If they admit the misconduct, you may assign a grade according to your discretion and what you may have outlined in your syllabus.

5. Refer the case and information to the Office of Student Conduct via their website reporting form, including related materials such as exams, coursework, reports, websites, external resources, syllabi, summary of the interaction with student(s), and other relevant information, as requested.

In cases involving denial of responsibility, when an outcome is determined by the Office of Student Conduct, both the student and the instructor will be notified of the disciplinary process conclusions.

For questions regarding the process, contact the Office of Student Conduct.

---

**Response to Classroom Disruption**

Should any student officially enrolled for credit or audit in a class disrupt the instructor’s ability to ensure a safe learning environment, control the class agenda, and/or deliver the approved curriculum, the instructor has the right to ask that the disruptive action cease immediately. The instructor may find it useful to include general guidelines about disruptive behavior on the course syllabus; and in the event of a classroom or learning environment disruption, the instructor may, if they find it necessary, explain to the student and the class why the particular
action is deemed disruptive. The responsible student should cease the disruption and utilize non-disruptive means for expressing disagreement or concern. If the disruption continues, the instructor can pursue various forms of intervention as discussed in more detail in the Faculty Handbook. (http://www.provost.iastate.edu/)

Additional guidance and resources for managing classroom disruption are available from CELT (https://www.celt.iastate.edu/teaching/effective-teaching-practices/classroom-behavior/).

**Course Ownership**

**Ownership of Course-related Presentations**
The presenter owns course-related presentations, including lectures. Individuals may take written notes or make other recordings of the presentations for educational purposes, but specific written permission to sell or post the notes or recordings for sale or subscription must be obtained from the presenter. Selling notes by students without the required permission is a violation of the Student Conduct Code (https://www.policy.iastate.edu/policy/SDR/#4225).

**Recording and Transmission of Classes**
Recordings and transmission of classes may take place for a variety of legitimate reasons, including providing educational opportunities for those who cannot attend classes on campus, assisting students with disabilities that impair classroom note taking, and giving the instructor feedback on their classroom performance.

Because the lectures of faculty represent their intellectual labors, individuals are expected to obtain permission to make recordings of lectures and other classroom interactions. Recordings may be used for the purposes of the particular class, although in some cases, and with permission of faculty, the recordings may be preserved and used for other classes as well.

**Grading**

**Grading System**
Grades represent the permanent official record of a student’s academic performance. The grading system at Iowa State University operates according to regulations outlined on the Grade Policies tab. The following provides quality points assigned for each letter grades:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.67</td>
</tr>
<tr>
<td>B+</td>
<td>3.33</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.67</td>
</tr>
<tr>
<td>C+</td>
<td>2.33</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>C</td>
<td>2.00</td>
</tr>
<tr>
<td>C-</td>
<td>1.67</td>
</tr>
<tr>
<td>D+</td>
<td>1.33</td>
</tr>
<tr>
<td>D</td>
<td>1.00</td>
</tr>
<tr>
<td>D-</td>
<td>0.67</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>P</td>
<td>Passing mark obtained under the Pass-Not Pass system.*</td>
</tr>
<tr>
<td>NP</td>
<td>Non-passing mark obtained under the Pass-Not Pass system.*</td>
</tr>
<tr>
<td>S</td>
<td>Satisfactory completion of a course offered on a Satisfactory-Fail grading basis. May also be reported to indicate satisfactory performance in R (required-credit) courses, and in courses numbered 290, 490, 590, and 690.</td>
</tr>
<tr>
<td>T</td>
<td>Satisfactory performance (equivalent to a grade of C or better in courses numbered 100-499, and a grade of B or better in courses numbered 500-699) in a special examination for academic credit.</td>
</tr>
<tr>
<td>X</td>
<td>The course was officially dropped by the student after the first week of the term.</td>
</tr>
<tr>
<td>N</td>
<td>No report was submitted by the instructor. An N is not a recognized grade or mark, it merely indicates the instructor has not submitted a grade and that a grade report has been requested. A nonreport (N) will automatically change to a grade of ‘F’ after one calendar year whether or not the undergraduate student enrolled during that period. If the N is outstanding at the time of graduation, it will be converted to a grade of ‘F’. Undergraduate students will not graduate with N on their permanent record. Repeating a course will not resolve the N.</td>
</tr>
</tbody>
</table>
Incomplete. An incomplete mark may be assigned when the student is passing at the time of the request, but special circumstances beyond the student’s control prevent completion of the course. In general, failing the final exam or project or not submitting course work as a result of inadequate preparation or learning are not valid excuses.***

*See Pass Not Pass Grading.

***See Incomplete Marks in the Grade Policies tab.

Policy Information

Grades represent the permanent official record of a student’s academic performance. The grading system at Iowa State operates according to the following regulations:

1. Student performance or status is recorded by the grades and marks described below. A student’s grade point average is calculated on the basis of credits earned at Iowa State with the grades and quality points shown below. Credits earned with P, S, or T are not used in calculating the grade point average but may be applied toward meeting degree requirements. A cumulative grade point average of 2.00 is required for a bachelor’s degree.

2. Students who want to protest a grade submitted by an instructor should follow the procedures described in the section, Academic Grievances and Appeals.

3. Incomplete Marks - If the instructor and student agree that an Incomplete is appropriate, they should complete an Incomplete (I) Contract (downloadable from the Office of the Registrar forms (http://www.registrar.iastate.edu/forms/) website) to document the reason for the I, the requirements for resolving it, and the date by which it must be resolved, not to exceed one calendar year or the student’s graduation term (whichever is earlier). If the student is not available to sign the Incomplete (I) Contract, the instructor must document the conditions for the Incomplete by communicating directly with the student by e-mail or postal mail. A copy of this communication must be retained by the instructor until after the I is resolved in case there are any questions in the future regarding the terms of the Incomplete. The instructor also needs to enter the Incomplete (I) electronically as part of the end of term final grade submission.

   Resolving an Incomplete: When a student completes the requirements specified on the Incomplete Contract, the instructor submits the appropriate grade, which becomes part of the student’s cumulative, but not term, grade-point average. The grade does not replace the I on the record. The I remains on the record for the applicable term.

   A final course grade, once submitted to the registrar, may not be changed to an Incomplete except to correct an error at the request of the instructor, and with the approval of the instructor’s department head and the dean of the instructor’s college. The Incomplete (I) Contract should be used by the instructor to document the conditions for the Incomplete as specified above. The Grade Report to the Registrar form should be completed and forwarded by the instructor to his/her Dean for approval. The Dean will forward the Grade Report form to the Office of the Registrar if approved.

   Incompletes in all courses must be resolved by the middle of the student’s term of graduation. Repeating a course will not resolve an I mark. A mark of I will automatically change to a grade of F after one calendar year (whether or not the student was enrolled during the period).

4. To change a grade or mark already reported to the registrar, the instructor submits the Grade Report to the Registrar form. This form is used for resolving an I with a grade, for correcting an instructor error, or for the late report of a grade.

5. Midterm Grades. The registrar will collect C-, D+, D, D- and F midterm grades and nonattendance notifications from the instructor and report this information to students and their advisors using AccessPlus. In addition to submitting the midterm grades, the instructor is responsible for informing the class of the basis on which they were calculated.

   The purpose of midterm grades is to provide the student and advisor with a timely warning that the student’s academic performance to that point in the course may be lower than desirable. Students who receive midterms are encouraged to discuss their academic performance with the course instructor and their advisor.

6. Grades in all courses attempted remain on each student’s record. If a course is repeated, the record will show the grade obtained on the initial attempt as well as grades received on subsequent attempts.

7. The cumulative grade point average is calculated by dividing the total number of quality points earned by the total number of credits in all courses attempted. Grades of S, P, NP, and T are not counted in calculating the grade point average.

8. Repeating Courses.
The most recent grade for a course a student repeats will be used to compute the student’s cumulative grade point average rather than the previous grade(s), up to a limit of 18 credits. (This could result in a lowered grade point average if the second grade is lower than the first, or even loss of credit if the grade is lowered to an F.) All grades will remain on the student’s record.

Students may repeat any course for which an F grade, an NP grade, or any passing grade was received. A course initially taken for a grade must be repeated as a graded course. A course initially taken as Pass/Not Pass may be repeated as a graded or Pass/Not Pass course.

Beyond the 18 credit limit of repeats, all grades will be included in computing the cumulative grade point average. Please refer to items #1 and #7 above regarding how to calculate the grade point average.

Courses should be repeated as soon as possible, preferably within three semesters in residence, because of changes that occur with course updating, change in course number, or revision in the number of credits.

Approval to repeat a course in which the course number or number of credits has changed must be noted on a Designation of Repeated Course form, which can be obtained from departmental offices. This form must be signed by the head of the department offering the course and by the student’s advisor, and then taken to the Office of the Registrar. Deadlines for filing repeated course forms for full-semester and half-semester courses are published in the university calendar.

Transfer students may repeat courses at Iowa State University for which a D or F was received at another institution. They must process a Designated Repeat Form indicating they are repeating the course to reduce a transfer deficiency. Such repeated credits will count toward the 18-credit request limit and will affect only their transfer deficiency.

A student who has earned an F at Iowa State University may repeat the course at another institution and the credits earned may be applied toward graduation at Iowa State, but the grade earned will not be used in computing a cumulative grade point average.

Repeated courses may affect any federal financial aid. See the Financial Aid website (http://www.financialaid.iastate.edu/) for further information.

**Pass-Not Pass Grading**

Students may choose to attempt a maximum of 9 semester credit hours on a Pass-Not Pass basis, meaning that only a P or NP will be recorded as their final grade in the course. The purpose of P-NP grading is to encourage students to broaden their education by taking courses outside the usual program of study for their major and minor disciplines. The following policies apply:

1. Undergraduate students who are not on academic probation (P) at the beginning of the semester are eligible. A special (nondegree) student must obtain approval from their academic advisor and college dean.
2. Only elective courses may be taken on a P-NP basis. In specific majors, some restrictions may apply, so students should consult with their academic advisor.
3. Except for restrictions on its own undergraduate majors, a department may not deny the availability of any of its course offerings on a P-NP basis.
4. Courses offered on a satisfactory-fail basis may not be taken P-NP.
5. Students should register for a P-NP course in the same manner and at the same time that they register for their other courses. Students should then change to P-NP by processing a schedule change form with their academic advisor’s signature in the P-NP approval section of the form.
6. Students who elect to change back to a graded basis should process the change using the P-NP section of the schedule change form.
7. Changes to or from a P-NP basis may not be done after the last day to drop (usually the Friday of week 10 of the term) without college approval. Changes from a P-NP basis to a Graded basis that occur after the last day to drop will still count against a student’s 9 maximum allowable P-NP credits.
8. Registration on a P-NP basis is not indicated on the instructor’s class list. Students will receive a P if their grade is D minus or better and an NP if their grade was F.
9. Neither P (earned grade of D minus or better) nor NP (earned grade of F) is counted in calculating a student’s grade point average (GPA).
10. When students change their curriculum, any P credits that they have accumulated will be accepted by the new department if such credits are in courses normally accepted by the department.
11. Credits taken on a P-NP basis at another institution and transferred to Iowa State may be applied as electives in a student’s degree program if the credits are otherwise acceptable in that program. The number of P-NP transfer credits that can be accepted depends on the number permitted by the institution from which the student is transferring. If a student transfers more than nine semester P-NP credits, no additional Iowa State P-NP credits can be applied to the student’s degree program.

**Examinations**

Examinations are one of the most common ways instructors assess student performance. In order that examinations can be a useful part of the educational process, the following policies have been instituted:

1. One purpose of examinations is to help students’ learning. Therefore, examinations should be evaluated as soon as possible after they are
given and the results should be made available to the students in a timely way to enhance learning.

2. All tests and examinations administered between the beginning of the term and final examination week shall be held during a regularly scheduled lecture or laboratory class period for that course. A department may obtain approval to administer a separately scheduled examination if all of the following criteria are met:
   a. The course is multi-sectioned.
   b. A common departmentally developed examination will be administered to all students in all sections at the same time.
   c. The test scores will be used as a basis for a uniform grading procedure for all sections of the course. Requests to hold separately scheduled examinations must be made to the registrar and approved by the provost in time to be announced in the Schedule of Classes to allow students to plan in advance. Only under unusual circumstances will a course be approved for separately scheduled examinations if the deadline is past to include notification in the Schedule of Classes. Whenever a separately scheduled examination is administered, a regular class meeting during that week shall be omitted.

3. At the end of the semester, a week is set aside for final examinations or other term evaluations, with a two-hour period normally scheduled for each course. The following policies govern the responsibilities of students and faculty members during this week:
   a. Final exams may not be given at a time other than that for which the exam is scheduled by the registrar. An instructor may not give a final exam prior to final exam week nor change the time of offering of the final examination as it appears in the final exam schedule. Permission to change the time for which an exam is scheduled may be given only by the dean of the college. If the instructor elects not to give a final exam in a course of two or more credits, the class is required to meet at the scheduled final exam period for other educational activity such as a review of the course or feedback on previous exams.
   b. Final exam periods are determined according to the regularly scheduled meeting time of the class. However, certain courses are assigned special group exam times so that several sections of the same course may be tested together. The criteria for establishing special group exams are similar to those listed for separately scheduled exams listed in number 2 above. If this

results in conflicting group examination periods, students should inform the instructor in charge of the first of the two conflicting courses as listed on the final exam schedule within the special groups in question; that instructor is responsible for arranging a special examination or making some other adjustment.

c. Evening courses with lectures scheduled at 6:00 p.m. or later should give their examinations during finals week from 7:00-9:00 p.m. on the day the class normally meets. If this exam conflicts with an evening group exam, the instructor responsible for the latter must arrange a special examination for any students who have a conflict.

d. If unusual circumstances involve the need for students to change the time of their final examination, they must obtain the approval of the instructor of the course.

e. If a student has three examinations scheduled on the same calendar day and wishes to change one to another day, the instructor of the course having the smallest number of students is responsible for arranging an alternate examination time for the student unless make-up exam times are available in one of the other courses.

f. All faculty members and teaching assistants with instructional or grading responsibilities are considered to be on duty throughout the entire final examination week and are expected to be available to students during that week for discussion of any matters pertaining to the final examination and final grade or to other aspects of the course.

Prep Week

For each Fall and Spring semester, the last full week of classes before final examinations is designated as Prep Week. The intent of this policy is to establish a one-week period of substantial and predictable study time for undergraduate students. During the Prep Week period, regular lectures are expected to continue, including the introduction of new content, as deemed appropriate by the instructor. The restrictions established by this Prep Week policy are:

- Due dates for mandatory graded submissions of any kind that fall within Prep Week must be listed on the syllabus provided at the start of the course.
- Mandatory final examinations may not be given during the Prep Week period except for laboratory courses or courses that meet weekly and for which there is no contact during the normal final examination week.
- No in-class quizzes or exams may be given on the Thursday and Friday of Prep Week. Quizzes/exams that are administered outside of class such as take-home exams, online exams, or exams given in the testing centers must: 1) open no later than Wednesday at noon
Grading of Prep Week, and 2) only cover material presented on or before the Tuesday of Prep Week.

Exceptions to this policy include the following:

- Classes that only meet on Thursdays or Fridays
- Lab components of courses
- Half-semester courses
- Make-up exams due to excused absences
- Regularly used formative assessments intended to enhance student engagement and guide course delivery

All other exceptions require approval by the Office of the Senior Vice President and Provost.

- Registered ISU Student Organizations may not hold any meetings, functions, or sponsored events during the Prep Week period. Any exception to these restrictions must be authorized in advance by the Office of the Senior Vice President for Student Affairs.

Instructors are reminded that most students are enrolled in several courses each semester, and the widespread violation of this policy can cause student workloads to be excessive as students begin their preparation for final examinations.

Students are reminded that their academic curriculum is their principal reason for being in college and they have a responsibility to study in a timely fashion throughout the entire semester.

Policy approved by Faculty Senate, Senior Vice President and Provost, and President, 2013; Amended and approved by Faculty Senate, Senior Vice President and Provost, and President, 2017.

Scholastic Recognition

The university recognizes those students who are doing exceptionally well in several ways, including the following.

1. **Dean's List.** Each semester the university issues a dean's list made up of those students who have carried at least 12 credit hours of graded or S-F courses with a 3.50 grade-point average or above for the semester. Courses taken on a P-NP basis do not count as part of the 12-credit hour requirement. No dean's list is issued for summer school. The list can be viewed from the Office of the Registrar website (http://www.registrar.iastate.edu).

2. **Top 2 Percent.** Each spring semester, undergraduate students in the top 2% of their class (freshman, sophomore, junior, and senior) within their college, based on cumulative grade point average, are recognized. In addition to a congratulatory letter from the university president, a notation of the accomplishment is recorded on the student's permanent record.

3. **Graduation with Distinction.** Undergraduates who have a cumulative grade point average of 3.50 or higher (based on a 4.0 scale) are eligible to graduate "with distinction" provided they have completed the following criteria for their degree. The student's distinction will be based upon their cumulative grade point average after all degree requirements have been satisfied.

   These students are recognized as follows:

   - Summa Cum Laude: cumulative grade point average of 3.90 or higher.
   - Magna Cum Laude: cumulative grade point average of 3.70 to 3.89.
   - Cum Laude: cumulative grade point average of 3.50 to 3.69.

   The recognition appears on the student's official transcript and diploma.

**Candidates for a bachelor's degree** may graduate "with distinction" provided they have completed 60 semester credits of coursework at Iowa State University at the time of graduation, including a minimum of 50 graded credits.

**Candidates for the bachelor of liberal studies degree** may be graduated with distinction provided they (a) have completed 45 semester credits of coursework at the three Iowa Regent universities at the time of graduation, (b) have earned at least a 3.50 cumulative grade point average at ISU, and (c) their combined grade point average for coursework taken at the three Iowa Regent universities meets the honors cutoff specified above.

**Candidates for the bachelor of science in nursing degree** may graduate "with distinction" provided they (a) have completed 32 semester credits of coursework at ISU at the time of graduation, and (b) have earned the appropriate grade point requirement as outlined above.

**Honors Program.** Students who are full members of the University Honors Program need a cumulative grade point average of 3.50 at the beginning of their final term. In addition to meeting the appropriate grade point requirement, students will have completed an approved honors program of study and an honors project prior to graduation. This recognition appears on the student's permanent record, diploma, and in the commencement program.

Evaluation Procedures

It is university policy that the instructor shall inform the students at the beginning of each course of the evaluation procedures planned for use in the course.

Retention of Records

Records of all graded work must be retained by the instructors until midterm of the semester following completion of a course or until all pending appeals and incompletes are resolved, whichever is later.
Instructors leaving the university must file records of all graded work with their department office before departure.

**Academic Standing**

**Academic Standards Regulations**

Each college has an academic standards committee that is responsible for monitoring the academic progress of all undergraduate students in that college, based on policies and minimum requirements set by the Faculty Senate Committee on Academic Standards and Admissions and ratified by the Faculty Senate. Individual college faculties may, with the approval of the Faculty Senate Committee on Academic Standards and Admissions, set additional program admission and curriculum requirements that are more stringent than those established for the university. These additional requirements must be reviewed at least every third catalog by the college academic standards committee to determine if the requirements should be continued. Requirements approved by the college academic standards committees will then be forwarded to the Faculty Senate Committee on Academic Standards and Admissions for final approval. The college committees are responsible for actions involving individual students with respect to placing students on academic probation, dismissing students from the university for unsatisfactory academic progress, and reinstating student who have been dismissed.

**Changing colleges:** A student on academic probation (P) may transfer to another program in the university before period 3 begins (before the last day to drop a course.) For students on academic probation (P), transfer during period 3 (after the last day to drop a course) can only occur under exceptional circumstances and with the approval of the chair of the new program and the dean of the new college.

**Withdrawal:** A student on academic probation (P) who withdraws during period 3 will be academically dismissed at the end of the term the student withdraws, except under extenuating circumstances as judged by the college academic standards committee.

**Reinstated students:** Reinstated students should also see the section on Reinstatement.

**Veterinary Medicine:** Additional rules for minimum satisfactory progress are in effect.

**Special (nondegree) students:** Students matriculated in this classification category are governed by the regular academic progress regulations. Furthermore, by special action of their college academic standards committee, additional standards may be required.

**Academic Progress**

For questions concerning interpretation and application of the rules governing academic progress, students should contact the chair or secretary of their college academic standards committee in their college office.

The university's academic standards rules are presented below. In addition to taking action based on these rules, a college academic standards committee may also place a student on academic probation or dismiss a student from enrollment in the university when, in the college committee's judgment, the student's academic performance or progress toward a degree is exceptionally deficient. Likewise, a college committee may, under exceptional circumstances, exempt individual students from the application of these rules. Students who participate in the Regent Universities Student Exchange Program, or in a similar program where the credit taken at the other school will be considered as resident credit and the grades included in the student's ISU cumulative grade point average, are subject to Iowa State University's academic standards.

**Maintaining Satisfactory Progress**

Continued enrollment at Iowa State University depends upon an undergraduate student maintaining satisfactory academic progress toward attaining a degree. To assist students in maintaining satisfactory progress, Iowa State University has adopted academic standards designed to provide early identification of students who are experiencing academic difficulty, and to provide timely intervention through academic advising and academic support programs.

Academic standing at Iowa State University is dependent upon the total number of credits a student has attempted or earned, the student's semester grade point average (GPA), the student's cumulative ISU GPA, and the student's transfer GPA (if below 2.00.)

**Academic Warning**

While a warning (W) is the least severe of the negative academic actions, it serves as a reminder that future academic performance below 2.00 could result in more serious consequences. In fact, a student on warning whose subsequent term GPA is below a 2.00 will be placed on probation (P) the following term.

Students who receive an academic warning are required to develop a plan for academic improvement in consultation with their academic advisor or the Academic Success Center. A student who is subject to both academic warning and academic probation will be placed on academic probation. The academic warning is not a part of the student's permanent academic record.

Students will receive an academic warning (W) at the end of any fall or spring semester when they earn a GPA of 1.00 – 1.99 for that semester. At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on academic warning status:

- Students will be placed on academic probation if they earn less than a 2.00 GPA for the next fall or spring semester, or
• They will be removed from warning status if they earn at least a 2.00 semester GPA for the next fall or spring semester and they are not subject to academic probation based on cumulative GPA (over 75 credits).

See Summer Academic Standards Regulations section for how summer grades affect warning, probation, or dismissal status.

Academic Probation
Students are placed on academic probation status as a warning that their academic progress is not satisfactory and that they should take steps to improve their academic performance to avoid dismissal from the university. Academic probation is an indication of very serious academic difficulty. Students may be placed on academic probation as a result of either semester GPA, cumulative GPA, or both. Academic probation status is not a part of the student’s permanent academic record.

Students on academic probation and warning are required to meet with their advisor and to complete the Academic Intervention Self Assessment form, which can be accessed here: http://www.dso.iastate.edu/asc/ai/students/

Students will be placed on academic probation (P) at the end of a semester/term for either of the following two reasons:

1. Semester GPA: Students who earn less than a 1.00 at the end of any fall or spring semester, or less than a 2.00 two consecutive semesters, will be placed on academic probation. Students will not be placed on academic probation at the end of the summer term due to summer term GPA only.

2. Cumulative GPA: Students with 75 or more credits attempted or earned, whichever is greater, will be placed on academic probation at the end of any fall or spring semester or summer term when their cumulative GPA is less than 2.00. Students with 75 or more credits attempted or earned who have a transfer GPA < 2.00 will be placed on academic probation at the end of any fall or spring semester or summer term when their combined transfer/ISU cumulative GPA is less than 2.00.

At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on academic probation status:

• Students will be academically dismissed if they fail to earn at least a 2.00 semester GPA.

• Students will continue on academic probation if they earn at least a 2.00 semester GPA but are subject to continued academic probation based on their cumulative GPA (over 75 credits).

• Students will be removed from probation if they earn at least a 2.00 semester GPA and are not subject to continued academic probation based on their cumulative GPA (over 75 credits).

See Academic Dismissal for dismissal policy.

See Summer Academic Standards Regulations section for how summer grades affect warning, probation, or dismissal status.

Academic Dismissal
Students who do not meet the requirements of their academic probation are academically dismissed from the university. Each College Academic Standards Committee is responsible for final decisions regarding the academic status of students in that college, and any appeals to academic dismissal actions are considered by the college committee. Once dismissed, students are not allowed to reenroll at Iowa State University until they have been academically reinstated. (See section on reinstatement.) Academic dismissal is placed on the student’s academic record as a permanent notation. The official transcript of a student who has been dismissed includes a “Not Permitted to Register” notation.

Summer Academic Standards Regulations
Students who are newly placed or continued on academic probation (P) at the end of the previous semester may enroll for the summer term without being in jeopardy of academic dismissal from the university at the end of that summer term.

Summer Combined Term GPA:
All students who attend summer session will have their academic status reassessed at the end of the summer based on the combined (not averaged) grade summaries of their previous graded term of attendance and summer term. Academic status (warning or probation) after summer session will be based on the resulting combined term GPA. The academic status resulting from the summer combined term GPA supersedes the academic status at the end of the previous term.

For students who have remaining designated repeat credits, courses taken in the previous semester and repeated in summer will be calculated as designated repeats in the combined term GPA.

The combined term GPA (summer plus preceding term) will not appear on the student’s grade report or permanent record.

Summer term GPA alone cannot determine academic status. Students who initiate enrollment at Iowa State during the summer will not be placed on warning or probation regardless of their academic performance.

Summer Cumulative GPA:
A student who was on academic probation (P) at the beginning of summer term based only on cumulative GPA, who raises his or her
cumulative GPA to over a 2.0 at the end of the summer term shall be removed from probation status at the end of the summer term.

A student with 75 or more credits attempted or earned, whichever is greater, will be placed on academic probation (P) at the end of the summer term if his or her cumulative GPA is less than 2.00.

A student with 75 or more credits attempted or earned who has a transfer GPA less than 2.00 will be placed on academic probation (P) at the end of any summer term if his or her combined transfer/ISU cumulative GPA is less than 2.00.
REGISTRATION

Registration/Enrollment
In order to register for classes students must first accept their offer of admission by the university. Registration and the payment of assessed fees are required of all who attend classes. Enrollment is not complete until fees are paid, including room and board fees for those living in residence halls.

Registration is a process by which students become officially enrolled in classes for a given term. The process involves consultation between the student and the student’s academic advisor. All undergraduate students are assigned an academic advisor based on their major/curriculum. A new advisor assignment is made when a student changes majors/curricula.

Students who attend classes must complete registration and pay their assessed fees. Registration is not complete until all fees are paid, including board and room fees for those living in residence halls.

Disabled students who need assistance with any phase of registration should contact the Student Disability Resources office.

Validating Enrollment
To validate their enrollment in each course at the beginning of the semester, students must attend the first or second meeting (first meeting if the class meets only once a week). Students who add a course after the term begins must attend the next class meeting. The instructor has the option to offer a registered place in the course to another student when a registered student fails to attend and has not obtained prior approval of the instructor. Students who do not validate their enrollment must drop the course or they will receive an F grade.

Enrollment Status
Enrollment status is defined for certification purposes as either full-time or half-time.

Full-time status, fall or spring semester
Undergraduates: 12 credits
Graduates: 9 credits
Professional: 12 credits

Three-quarters status, fall or spring semester
Undergraduates: 9 credits
Graduates: 7 credits
Professional: 9 credits

Half-time status, fall or spring semester
Undergraduates: 6 credits
Graduates: 5 credits
Professional: 6 credits

Full-time status, summer semester
Undergraduates: Summer status depends on the number of weeks a student is enrolled.
Graduates: Summer status depends on the number of weeks a student is enrolled.
Professional: 8 credits

Always contact the Office of the Registrar to verify a student's status for a summer session. Additional enrollment status information is available on the Office of the Registrar webpage (https://www.registrar.iastate.edu/students/verification-proof-of-enrollment/fulltimestatus/).

With the exception of enrollment certification for veterans’ benefits, credit hours are rounded up to the next whole number. For example, credit load of 11.5 credits is rounded up to 12 credits. Contact the Office of the Registrar for more information.

Registration Responsibilities
The registration process includes advising, enrollment in courses, and schedule changes. In addition to the student, this process may involve the student’s advisor, the student services staff of the student’s college; and the dean of the college. Each is responsible for knowing and following the academic policies and procedures.

Student
• knowing and adhering to university policies and procedures that apply to registration and schedule changes
• checking the accuracy of his/her schedule on AccessPlus, including schedule adjustments (i.e., adds, drops, section changes)
• knowing the degree requirements of his or her major and/or curriculum
• planning course schedules to meet those requirements; and monitoring the accuracy of the degree audit.

Advisor
• consulting with advisees during the advising/registration period
• providing information about student’s major and curriculum requirements
• providing guidance in the student’s course selection
• assisting in monitoring the degree audit for accuracy
• notifying the college student services office with corrections to the degree audit.

College Student Services Staff
• assisting new and reentering students with the registration process
• resolving unusual scheduling problems
• updating the degree audit or solving problems concerning the degree audit.

Dean

• making decisions with respect to requests for deviations from university policies, deadlines, etc.

Students and staff should check with the college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

Class Schedule Planner
The Class Schedule Planner is an application that allows students to plan their schedules using courses displayed in the Schedule of Classes. Students can select courses and/or sections they want to take for a particular term, as well as block out unavailable class days and times. Based on those selections, Class Schedule Planner can return all possible schedules to the student in a color coded grid format.

Though it is a Web-based application, the Class Schedule Planner does not require authentication (no user ID, PIN, or password). Therefore, it is essential that students understand this is a planner and as such, it does not register them in courses and cannot be used to complete their registration. The application requires that the user have Java on their computer. The first screen of the Planner provides information about how to use the planner and simple instructions for downloading the Java application. A useful Help link also has been provided. The Class Schedule Planner is available at http://classes.iastate.edu/planner (http://classes.iastate.edu/planner/).

Using AccessPlus Registration
Students enter the system via AccessPlus by using university ID and password. A registration access number (RAN) also is needed, if required by their college.

The registration system provides messages after each entry indicating whether each request has been processed. Students also may review their current schedules at any time during registration. Students are held accountable for all changes made to their schedules.

All students are encouraged to register for courses through the AccessPlus registration system. However, students who are unable to use the system may register in person by processing their signed Registration Worksheet in the Registrar’s Student Scheduling Office, 10 Enrollment Services Center.

Registration System Abuse
Using the AccessPlus registration system is a privilege, which may be revoked if abuse is detected. Abuse includes, but is not limited to, creating and using an automated program to search for course openings and/or enrolling in a section with the intent of reserving space in that particular section for another student. The Office of the Registrar, college office, and/or advisors have the right to determine abuse and revoke privileges for any type of registration system abuse.

Registration Process
To register for classes, students need the following materials and information:

• Registration Worksheet, available for download at www.registrar.iastate.edu/forms/ (http://www.registrar.iastate.edu/forms/).
• A RAN (registration access number) if required by their college.
• Course information from the Online Schedule of Classes at http://classes.iastate.edu/ (http://classes.iastate.edu).
• Other departmental information applicable to their curriculum, available from their advisor.

Students are expected to do the following in the advising and registration process:

1. Meet with their advisor, who will provide the following:
   a. degree audit
   b. guidance in course selection
   c. Registration Authorization form, with RAN, if applicable.

2. Choose specific sections of each course. Students are responsible for choosing their course sections. In most cases advisors will not be involved in selecting meeting times.

3. Review their registration start date/time information and any registration hold information on AccessPlus (https://accessplus.iastate.edu/frontdoor/login.jsp), under Current Information. Students in those colleges which require a four-digit registration access number (RAN) should meet with their advisor in advance of their start date, to obtain their Registration Authorization Card on which the RAN is printed.

4. Register for courses using the AccessPlus (https://accessplus.iastate.edu/frontdoor/login.jsp) registration system.

Making Schedule Changes
Students may make most schedule changes through the first five days of class using the AccessPlus (https://accessplus.iastate.edu/frontdoor/login.jsp) registration system. For courses with permission requirements and/or after the first week of classes, a Schedule Change form will be needed.

The Schedule Change form can be found in AccessPlus, under the Student tab, within Registrar Forms located in the menu on the left column.
Procedures for schedule changes vary by the time period of the semester. The effective date of a schedule change is the date when the change is entered into the registration system.

**Schedule change periods for full term courses are as follows:**

**Period 1 ends on the fifth day of classes in the fall and spring semesters.** Schedule changes during period 1 do not require advisor signatures. Instructor or departmental approval may be required for adds or section changes for some courses during period 1. Course drops during this period do not count toward a student’s ISU course drop limit, and will not appear on a student’s permanent record. Schedule changes during period 1 may be processed through the AccessPlus registration system or by submission of a digital Schedule Change form.

**Period 2 ends the Friday of week 10 in the fall and spring semesters.** It is important for students to make well-informed decisions when adjusting their course schedules, particularly because such decisions often have financial and/or academic implications. To best support students’ decision-making process, period 2 schedule changes require signatures of advisor and instructor and are processed utilizing the digital Schedule Change form.

For students who wish to add or change sections of a course, or adjust course credit hours, the signatures grant permission for a student to make the requested change.

In most cases, the decision to drop a course rests with the student; as such, this signature is not one of permission, but rather to indicate a conversation has occurred between the student and the advisor and instructor.

Course drops after period 1 count toward a student’s ISU drop limit and appear as an X on the permanent record. A section change does not require a drop.

Drops and other schedule changes that are judged to be beyond the student’s control may be processed as administrative actions if approved by the college dean. Administrative drops do not count toward a student’s ISU drop limit and do not appear as an X on the permanent record. The effective date of an administrative action is the date it is approved by the college dean or authorized representative.

**Period 3 is anytime after period 2.** Schedule changes during this period are permitted only for extenuating circumstances, may require a written statement of support from the instructor and the student, and must be approved by the dean of the student’s college or authorized representative.

**Half-Semester and Partial Term Courses**

Specific deadlines for adding and dropping half-semester courses are published in the university calendar. Prorated adjustments to add and drop deadlines are made for other partial term courses. To find out specific deadlines for partial term courses, contact the Registrar’s Student Scheduling Office, 10 Enrollment Services Center, 294-2331.

**R-Credit Courses (required courses)**

Processing a scheduling change for a required course is usually considered administrative. There is no fee for administrative schedule changes. Administrative drops do not count toward a student’s ISU drop limit and do not appear as an X on the permanent record. To make a Period 3 R-credit drop administrative requires approval of the college dean.

**Dates and Deadlines**

Dates for registration are published in the university calendar (http://www.event.iastate.edu/) (choose the Academic calendar link), and at www.registrar.iastate.edu/calendar/ (http://www.registrar.iastate.edu/calendar/).

Students are assigned a registration start date and time, which is the first day and time they can use the registration system. Any delay in registration may reduce course selection options. A list of start dates by classification is available at http://www.registrar.iastate.edu/calendar/registration-start-dates (http://www.registrar.iastate.edu/calendar/registration-start-dates/).

Students may choose to delay their registration until a later date; however, courses will begin to fill on the first day of registration. Any delay in registration may reduce course selection options. A list of start dates by classification is available at http://www.registrar.iastate.edu/calendar/registration-start-dates (http://www.registrar.iastate.edu/calendar/registration-start-dates/).

Continuing students register for the following term during the middle of the current term. For example, registration for spring term begins the middle of fall term; registration for summer session is completed during the previous spring at the same time as registration for fall semester.

A late registration fee is assessed for registration initiated on or after the first day of classes for fall and spring terms. This fee is not charged for the summer term. If registration is not initiated by the end of the fifth day of classes, students must obtain written permission from their advisors, the instructors for the courses they plan to take, as well as approval from the dean of the college in which they are registered. During the summer session, these approvals must be obtained in order to register after the third day of classes.

Students may not enroll in courses with time conflicts without the approval of the instructors concerned.

Students who participate in off-campus experiences for which they receive Iowa State University credit must register for that credit during...
the term when the experience is taking place, whether or not they are taking courses on campus during that time.

**Withdrawal of Admission to the University**

New undergraduate students who wish to withdraw their admission to the university prior to the first day of classes must initiate their withdrawal by completing the Admissions Office's Application Change Form: https://www.admissions.iastate.edu/forms/change_application.php.

**Cancellation/Withdrawal - Currently Enrolled Students**

Students who decide not to attend classes before the date class work begins must cancel their registration (http://www.registrar.iastate.edu/students/cancel-withdraw/) to avoid tuition and fees assessment. Students who decide not to attend classes beginning the first day of class or later must withdraw from the university (http://www.registrar.iastate.edu/students/withdrawal/).

**Course Information**

**Prerequisite.** A prerequisite indicates the specific academic background or general academic maturity considered necessary by the faculty for the student to be ready for maximum success in the course. For more information, see Information About Courses (http://catalog.iastate.edu/informationaboutcourses/), Course Prerequisite.

**Permission Required courses/sections.** To register for these sections, students must obtain authorization on a Request for Schedule Change or Restriction Waiver form and process the approved form in the Registrar’s Student Scheduling Office, 10 Enrollment Services Center.

**Restricted courses/sections.** Some courses or sections are restricted to students who meet specified criteria including curriculum/major, college, and/or year in school. In addition, some sections may be restricted to new students to ensure that sufficient spaces are available when new students register during summer orientation. A department may waive a restriction for a student who has extenuating circumstances. The student must obtain the authorization from the department on a Request for Schedule Change or Restriction Waiver form. The form is processed in the Registrar’s Student Scheduling Office, 10 Enrollment Services Center.

Classrooms are listed for each course in the Online Schedule of Classes at http://classes.iastate.edu/ and on the student’s class schedule on AccessPlus, beginning approximately 3 weeks prior to the start of the term.

**Cancelled courses/sections.** In some cases, courses or sections may be cancelled due to low enrollment or departmental staffing considerations. Students who are registered for a cancelled course or section will be notified by the Office of the Registrar, the department, and/or on their AccessPlus schedule.

Textbook information. A link to textbook information, including the ISBN and retail price for assigned textbooks, is available from the Schedule of Classes. Textbook information for Iowa State University courses is posted as close to the start of registration as possible. Students may purchase textbooks from any source they choose.

**Credit Limits**

For fall and spring semesters, the credit limit is 18 credits for undergraduates and 15 credits for graduate students. For summer session, the limits are 12 credits for undergraduates and 10 credits for graduate students. A student may be required to drop credits before adding another course. In some cases, the college dean may approve a higher or lower credit limit for individual students. Students may request a change in their credit limit by contacting their advisor. Advisors should notify the student's college student services office if the credit limit needs to be changed.

**Registration Holds**

Students with holds on their registration will not have access to registration until the initiating offices have released the holds. Those who attempt to register before the holds have been released will receive a message indicating which offices have placed holds on their registration. Prior to their registration, students may check for holds on AccessPlus.

**Drop Limit**

Undergraduate students are limited in the number of courses they may drop during their academic career. (This refers to drops processed after the fifth day of classes of each semester.)

- All students are allowed to drop a maximum of five courses during their undergraduate career.
- Students in the College of Veterinary Medicine are allowed to drop a maximum of four courses.
- Courses dropped during their first term at Iowa State are not included in this limit, nor does the summer count as a first term for this purpose.
- Lecture and laboratory courses which are offered as separate courses, but are required to be taken concurrently are considered as one course drop. Students should work with their advisor to adjust their drop limit accordingly.

Exceptions to the drop limit may be made for courses that must be dropped for reasons beyond the student's control. These exceptions are granted only by the dean or other authorized person in the student's college.

The number of drops students have left is indicated on their grade report (available on AccessPlus) each term. Students are responsible for not
exceeding their limit. At the instructor’s discretion, students who attempt
to drop a course beyond the limit without special permission by the dean
of the student’s college will continue to be enrolled in the course and will
receive a grade at the end of the term.

Auditing
To audit a course means to enroll in the course without receiving credit
for the course. The instructor of the course approves the audit request.

Students are assessed tuition and fees as though they are taking the
course for credit, but the audited course does not count in determining
full-time student status. However, an audited course does count towards
the maximum allowable credits per semester. Audited courses do not
apply toward V.A. benefits.

Graduate students: See Graduate College, Registration for audit policies.

Changing status to audit: Changing a course from credit to audit requires
dropping the course for credit and adding it as an audit on a schedule
change request form. After day 5 of the semester, the drop will count
toward the total allowable ISU drops. See Making Schedule Changes. The drop
appears on the student’s permanent record.

Rights and privileges: Once enrolled in an audited course, auditors have
the same rights and privileges as any student taking the course for credit.
Their names appear on the class list with a notation that they are auditing
the course. Audited courses do not appear on the student’s permanent
record except by special request from the student. A request form can be
downloaded from the Office of the Registrar website at www.registrar.iastate.edu/forms (http://
www.registrar.iastate.edu/forms/).

Audit Deadlines and Required Signatures
In addition to the deadlines provided below, note that instructors must
approve all audits.

Full semester courses:
Adding an audit—day 10 deadline:
- Through day 5 of classes: instructor approval required.
- Day 6-10: instructor, advisor approval required.
- After day 10: only with extenuating circumstances, instructor, advisor,
college approval required.

Changing status, from credit to audit—day 10 deadline:
- Through day 5 of classes: instructor approval required.
- Day 6-10: instructor, advisor, college approval required.
- After day 10: only with extenuating circumstances, instructor, advisor,
college approval required.

Changing status from audit to credit—day 5 deadline:
- Through day 5 of classes: instructor approval required.
- After day 5: instructor, advisor, college approval required.

Partial semester or summer courses:
Deadlines are determined based on the length of the course. For
deadlines concerning partial term or summer courses, contact the
Scheduling & Fees Office, 515-294-2331.

Reinstatement
The procedures delineated in this section apply to students who were
dismissed from Iowa State for academic reasons. Students who left Iowa
State in good academic standing and who are seeking reentry should see Index, Reentry for more information.

1. Reinstatement is not automatic. Students who have been dismissed
for academic reasons should contact the dean’s office in the college
they wish to enter for instructions specific to that college.
The college Academic Standards Committee reviews each petition
and other relevant information, and reinstatement is based upon
that review. As part of the petition process, students must submit a
plan for academic success that identifies the causes of their poor
academic performance and demonstrates that they have taken
actions to avoid or eliminate these causes.

2. Students can only be reinstated after at least one academic semester
(fall or spring) has elapsed since they were academically dismissed.
Winter session and summer session are not considered semesters.

3. Students who have been dismissed from enrollment two or more
times are not eligible for reinstatement until at least two academic
semesters (fall and spring) have elapsed since their last academic
dismissal. Winter session and summer session are not considered
semesters.

4. Students who were dismissed by one college and subsequently
reinstated by another college cannot transfer back to the original
college unless permission is granted by the Academic Standards
Committee of the original college. This procedure applies regardless
of the student’s academic standing when the transfer is requested.

5. To be considered for reinstatement to the university, students must
submit a petition to the Academic Standards Committee of the
college in which they desire to enroll at least 45 days before the
beginning of the semester. Students who have not been enrolled for a
period of 12 or more months or who are international students must
also file a reentry form prior to their return. For more information
see the Reentry web site at http://www.registrar.iastate.edu/
info/reentry.html (http://www.registrar.iastate.edu/students/
reentry/). (Students dismissed for the second time and requesting
reinstatement in the College of Liberal Arts and Sciences must
submit their petition 70 days before the beginning of the semester.)

6. Juniors and seniors with extenuating circumstances may request a
waiver of their required semesters of absence as identified in number
2 and 3 above. The petition requesting early reinstatement must be
submitted through procedures specified by their college’s Academic Standards Committee.

7. As a condition of reinstatement, students will reenter on academic probation and must accept whatever additional requirements are stipulated by the college Academic Standards Committee. Examples include full- or part-time status, specified credit hours, specific courses, specific GPAs, restriction on choice of major, and required counseling.

Student Appeal
Students may appeal a decision regarding their academic status if they believe that new information can be provided or extenuating circumstances exist that would alter the application of any rule in this section. The appeal should be made in writing to the Academic Standards Committee of the college in which the student is enrolled. The written appeal must include the reasons for the appeal and the evidence to substantiate these reasons.

The student should initiate the appeal process by contacting the secretary of the college Academic Standards Committee in the administrative office of her or his college immediately upon receipt of notification of the committee’s action, and at least ten calendar days before the beginning of the semester. The secretary will then inform the student of the deadline for submission of the written appeal.

If the student is dissatisfied with the committee’s action, he or she may submit an appeal in writing to the dean of her or his college within seven calendar days after they are notified of the committee’s action. The dean must respond in writing within seven calendar days of receipt of the appeal.

If the issue is not resolved within the college, further appeals may be made in writing to the provost and subsequently to the president of the university. Appeals beyond the college level will, however, be considered only if based on one or both of the following contentions: (a) appropriate procedures were not followed at the college level; (b) academic rules were not applied correctly at the college level.

Academic Renewal
Students who are returning to Iowa State University to pursue an undergraduate degree after an extended absence may request permission to remove one or more of their complete academic terms from future degree and GPA considerations.

1. Eligibility. To be eligible for academic renewal consideration, students must meet these requirements:
   a. Students must not have enrolled at Iowa State University for four or more consecutive calendar years.
   b. Students must not have graduated from Iowa State University.
   c. Students must have demonstrated satisfactory academic performance as evidenced by earning a GPA of at least 2.00 over a minimum of 12.00 credit hours taken after returning to the university. If more than one semester is taken to reach 12.00 credit hours, the combined GPA of all semesters/terms of enrollment after returning to the university must be 2.00 or greater.

2. Conditions. Academic renewal is based on the following conditions:
   a. All courses and credits that were taken during the chosen terms will be removed from consideration for GPA and degree requirements. Students may not combine courses from multiple terms to comprise the semester(s) or quarter(s) dropped. Degree requirements met during the dropped terms will ordinarily have to be repeated.
   b. Renewal may be applied only to academic terms completed prior to the students’ extended absence.
   c. All courses and grades for the chosen terms will remain on the students’ academic record.
   d. Designated repeats, drops and P/NP options will be reinstated for the terms dropped.
   e. Students who have used all of their drop options will be given one extra drop.
   f. Students may be granted only one academic renewal.

3. Procedures.
   a. Students should discuss their desire to pursue academic renewal with an advisor in the college they wish to enter.
   b. The student must complete the Academic Renewal Petition form available from www.registrar.iastate.edu/forms (http://www.registrar.iastate.edu/forms/).
   c. After the form is signed by the student and academic advisor, it is submitted to the Records area in the Office of the Registrar, 214 Enrollment Services Center.

Returning/Reentry to the University
U.S. students who have been absent from Iowa State University less than 12 months may be admitted as a returning student. If more than 12 months have elapsed since last enrolled, a U.S. student must apply for reentry to the university. All international students must apply for reentry regardless of the time away from the university.

Returning Students
U.S. undergraduate and U.S. non-degree undergraduate students planning to return to Iowa State University after an absence of less than 12 months do not complete a reentry form; however, international undergraduate and international non-degree undergraduate students planning to return to Iowa State University after an absence of less than 12 months must complete a reentry form.
Returning U.S. undergraduate students and graduate students should contact the Office of the Registrar at 515-294-2331 or reentry@iastate.edu to have their records updated and registration access created. Students should contact their advisors to select courses and begin the registration process.

International undergraduate students must complete a reentry form regardless of the length of their absence. Forms are available from http://www.registrar.iastate.edu/forms/. International Students must also complete the Returning to ISU electronic form for the International Students and Scholars Office in order to receive their new I-20 or DS-2019. The form can be found under the F-1 or J-1 Student Services tab in Cystart at https://cystart.its.iastate.edu. If you have questions or concerns in regards to your documents, please contact the International Students and Scholars Office at 515-294-1120 or isso@iastate.edu.

Returning students who want to change their curricula should follow the same procedure as in-school students. Students who were dropped from enrollment at Iowa State University must obtain reinstatement by the Academic Standards Committee of the college that they wish to reenter. (See Reinstatement/Renewal for policies that apply to requests for reinstatement).

Reentry Students
Undergraduate and nondegree undergraduate (special) students who plan to attend Iowa State University after an absence of twelve months or more must complete a reentry form. Forms are available from http://www.registrar.iastate.edu/forms/.

Students with a bachelor’s degree who plan to take supporting graduate level coursework prior to applying for graduate degree admission should request a nondegree graduate admission application.

Students who have previously attended Iowa State University only as nondegree (special) students and who now seek to earn an undergraduate degree should request an undergraduate application.

International Students must also complete the Returning to ISU electronic form for the International Students and Scholars Office in order to receive their new I-20 or DS-2019. The form can be found under the F-1 or J-1 Student Services tab in Cystart at https://cystart.its.iastate.edu. If you have questions or concerns in regards to your documents, please contact the International Students and Scholars Office at 515-294-1120 or isso@iastate.edu.

The reentry form should be completed and returned to the Office of the Registrar, 10 Enrollment Services Center, well in advance of the term of reentry. Students who have attended another college or university since enrollment at Iowa State University must have an official transcript(s) of all course work attempted sent to the Office of Admissions, 100 Enrollment Services Center.

Reentering students must also contact their departmental office/advisor to prepare a class schedule. Reentry must be approved prior to registration.

Iowa State University requests the information on the reentry form for the purpose of making a reentry decision. The university reserves the right not to approve reentry if the student fails to provide the required information.

Graduate Students
Returning graduate students that have been enrolled in the last 24 months and are looking to continue in the same program, should contact the Office of the Registrar at 515-294-2331 or reentry@iastate.edu to have their records updated and have registration access created. Students should contact their major professor to select courses and begin the registration process.

Reentering graduate students that have not been enrolled in the last 24 months, or are looking to come back in a different program than previously enrolled, please go to the Returning Graduate Students (https://www.grad-college.iastate.edu/common/forms/inactive-to-active/) website and follow the instructions for your specific situation. Please contact the Graduate College at 515-294-4531 if you have question on returning to the Graduate College.

International students also need to contact International Students and Scholars Office, 3248 Memorial Union, Ames, IA 50011-1130, phone: 515-294-1120, fax: 515-294-8263, or email: intlserv@iastate.edu to find out any steps that need to be taken prior returning.

Reentry Approval Process
Generally, a request to reenter Iowa State University will be approved within the Office of the Registrar. However, the Office of the Registrar will refer the reentry form to the college to which a student plans to return if the student: (a) desires to change curriculum; (b) has a previous Iowa State University cumulative grade point average below 2.00; (c) was dropped from the university for unsatisfactory academic progress or was not otherwise in good standing; or (d) since leaving Iowa State University, has completed additional college study with less than a 2.00 grade point average.

Information About Courses
A-Z Courses (http://catalog.iastate.edu/azcourses/)

Course Numbers
The courses in each department are numbered from 1 to 699, according to the following groups:

• 1-99 Courses not carrying credit toward a degree (zero credit).
• 100-299 Courses primarily for freshman and sophomore students.
• 300-499 Courses primarily for junior and senior students.
• 500-599 Courses primarily for graduate students, but open to qualified undergraduates.
• 600-699 Courses for graduate students.

Off-campus courses - Residential Credit
Iowa State University faculty teach distance learning courses online by video conferencing and streaming media. Courses are the same as those offered on campus, carry residential credit, and are taught by Iowa State faculty. Credit earned becomes a part of the academic record at Iowa State University and may be used to meet degree requirements the same as credit earned on campus.

Priority Enrollment
High demand for courses in certain areas has necessitated enrollment management for some courses. When enrollment priority is established for a course, first consideration is given to students whose curriculum/major explicitly requires the course.

Course Fees
Courses for which course fees are assessed are designated in the Schedule of Classes. Course fees may be assessed for such extraordinary costs as materials fees (which may include consumable materials or equipment replacement), field trip expenses, developmental course fees, and camp fees. In some cases, course fee amounts vary from term to term. Additional information on camp fees and developmental course fees may be found in the fees webpage at https://www.registrar.iastate.edu/fees/othfee/.

Independent Study
Most departments offer opportunities for independent study through a 490 course listing. Usually a minimum of 6 to 10 credits of coursework in the department is required before independent study is permitted. Students who are interested in this kind of experience in a particular department should check the catalog to determine the department’s prerequisites to register for 490. 490H sections are reserved for students in the University Honors Program.

Students should check with the department about procedures, in addition to meeting the prerequisites, for registering for 490. A written plan of study is prepared in advance with a faculty member who has agreed to supervise the student’s work, to evaluate progress and the final product, and to assign a grade. Initiation of the plan of study should occur prior to the semester in which enrollment is desired. Both the student and the instructor should agree on the number of credits for which the student will enroll, the amount and kind of work the student do for that credit, and the system by which the student will be graded (A-F or S/F). Students should not expect to register for or add 490 credit without an instructor’s permission. Some colleges and/or departments have limits on the number of credits of 490 that may be applied toward graduation.

Credits and Contact Hours
The academic value of each course is stated in semester credits. Each credit is normally earned by attending one (50-minute) hour of lecture per week for the entire 16-week semester, or by attending a laboratory or studio period of two or three hours per week. As a guideline, undergraduate students typically will be expected to spend two hours in preparation outside of class for each lecture hour; additional outside work may be required for laboratory or studio classes. The Office of the Registrar will maintain a table of faculty-approved credit-contact hour equivalencies for the types of instruction (e.g. lecture, studio, internships, research courses) offered by the institution: https://www.registrar.iastate.edu/faculty-staff/oferinginfo/define (https://www.registrar.iastate.edu/faculty-staff/oferinginfo/define/).

Courses offered for less than a full semester (e.g. summer terms or compressed formats) will fulfill the same contact hour requirements as full-semester courses having the same credit hours. For example, a student enrolled in a one-credit course offered in an 8-week (half-semester) format should expect two hours of lecture and four hours of out of class preparation per week. Similarly, a course offered in hybrid or online format is expected to meet the same contact hour requirement, and offer equivalent student-faculty/student-student interaction and class preparation time, as the same course taught in a traditional format.

Each course states the number of semester credits assigned to the course, preceded in parentheses by the number of hours in class (contact hours) expected of the student. The first of the two contact-hour numbers indicates the number of lecture class hours per week for the semester. The second is the number of laboratory or studio hours required per week. Laboratory and studio hours may include some time devoted to lectures. For example, COM S 227 Object-oriented Programming is listed as (3-2) Cr. 4. In that case, the course is 4 semester credits, 3 hours of lecture and two hours of laboratory each week.

The term “Cr. arr.” means that the amount of credit is arranged in advance between the student and the instructor. The credit to be earned depends on the amount of work expected of the student, in accordance with the policy that some combination of teacher-student contact and outside work by the student involving at least three hours per week for the semester is required for each credit.

The term “Cr. R.” means that the course is required in a certain curriculum or as cognate to one or more other courses. It is also used for cooperative education courses and for some optional inspection trips, study tours, and professional development courses for which numerical credit is not granted. An R credit course does not carry numerical credit toward a student’s degree, but it does apply toward the
degree. The R credit course is generally listed on the degree program as a requirement for a specific curriculum/major that must be completed prior to graduation. R credit courses may be graded using the A-F grading scale or the satisfactory/fail grading scale. All R credit courses are assigned a numerical value for purposes of enrollment certification.

Requests by students to drop an R credit course will be processed as an administrative drop during period 2 and thus will not be counted against the student's drop limit and will not appear on the student's transcript. (See Schedule Changes.)

Credit Involving a Paid Activity

Students may obtain credit for an activity, either on- or off-campus, for which they are also paid, provided the activity is academically relevant. This policy does not apply to registrations for R credit.

In order for an activity to be defined as academically relevant, prior arrangements for receiving credit must be made with a faculty member in an appropriate department.

The arrangements must include agreement on (1) the academic objectives which the activity is expected to achieve, and (2) the procedure by which the student's learning will be assessed.

Semester of Offering

Within each course description may be found one or more of the following letters: F. S. SS., indicating which term—fall, spring, summer session—of the academic year the course is offered. "Alt." is the abbreviation for alternate. If there is sufficient demand, courses may be offered more frequently than announced. Insufficient demand or unforeseen staffing problems may result in the cancellation of announced offerings. Students are advised to refer to the Schedule of Classes or consult with departments for up-to-date course schedule information.

Course Prerequisite

A prerequisite indicates the specific academic background or general academic preparedness considered necessary for the student to be ready to undertake the course. Prerequisites are usually stated in terms of specific courses, but equivalent preparation is usually acceptable.

An instructor may, however, direct a student whose background does not meet the stated prerequisite, or its equivalent, to drop the course. Conversely, an instructor may waive the prerequisite (or approval may be given following the appropriate departmental process) for a course for which they are responsible. Thus, permission of the instructor (or departmental process) is understood to be an alternate to the stated prerequisites.

It is university policy that the department or instructor informs enrolled students who have not met the prerequisite requirements that they must drop the course. Instructors have the right to neither accept, nor grade the work of a student who does not meet the stated prerequisite, or its equivalent (as determined by the process established in the department offering the course). Notification should be done as soon as possible and prior to the first day of class whenever possible. For students enrolled after the first day of class, notification must be given as soon as possible.

Some courses have been approved by their colleges to use administrative drops to enforce prerequisites. In such cases, the department shall inform the enrolled students who have not met the prerequisite requirements that they must drop the course or provide evidence of equivalent preparation to be reviewed by the department. Notification should be done prior to the first day of class for students enrolled prior to the first day of class. For students enrolled after the first day of class, notification must be given as soon as possible. After such notification (via email or Canvas announcement), the student must drop the course within 3 business days, or initiate a review of their equivalent preparation. This timeframe should be indicated to the student during the notification process. If a student does not drop the course or have a successful review of an equivalent, the department or instructor may contact their college student services office to initiate an administrative drop to remove the student from the course. Additionally, students whose request to waive the prerequisite is denied, will be administratively dropped from the course. Administrative drops will be completed by the 10th day of the semester in most cases. Course prerequisites are listed in the Schedule of Classes as well as in the Courses and Programs section of this publication.

Cross-listed Courses

A course, including its complete description, may be listed in two or more departments. The participating department or departments are noted in parentheses. Credit for the course may be obtained through any of the cross-listed departments.

Dual-listed Courses

Dual-listed courses permit undergraduate and graduate students to be in the same class while receiving credit for either undergraduate or graduate level work.

Credit in the graduate course is not available to students who have received credit in the corresponding undergraduate course. Both graduates and undergraduates receive the same amount of credit for the course, but additional work is required of all graduate students taking the course under the graduate-level course number. This extra work may take the form of additional reading, projects, examinations, or other assignments as determined by the instructor. The instructor must be a member of the Graduate Faculty or a Graduate Lecturer. Each dual-listed course is designated in the catalog with the phrase "Dual-listed with," although the student's official transcript of credits, both graduate and undergraduate, does not identify dual-listed courses as such. There is a limit to the number of dual-listed course credits that may be used to meet the requirement for an advanced degree. (For information about
procedures for requesting permission to offer dual-listed courses, faculty should consult the Graduate Faculty Handbook.)

Entry Level Courses

Resources for Course Information
http://catalog.iastate.edu/azcourses/
http://classes.iastate.edu

Experimental course listings: courses not published in the catalog. (https://www.registrar.iastate.edu/faculty-staff/courses/explistings/)
The following courses are suitable for first year students. Course numbers that begin with 0 (e.g., MATH 010) may incur an additional "developmental course" fee. See the Tuition and Fees web site for more information about other fees (http://www.registrar.iastate.edu/fees/othfee/).

A B E 160: Systematic Problem Solving and Computer Programming
(2-2) Cr. 3. S.
Prereq: Credit or enrollment in MATH 143 or MATH 165
Introduction to principles of dynamics, statics, and mass and energy conservation. Introduction to algorithmic thinking; use of spreadsheet programs and computer programming language(s) to solve engineering problems. Only one of ENGR 160, A B E 160, AER E 160, C E 160, CH E 160, CPR E 185, E E 185, I E 148, M E 160, and S E 185 may count towards graduation.

A B E 170: Engineering Graphics and Introductory Design
(2-2) Cr. 3.
Applications of multi-view drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports.

A M D 131: Fashion Products and Markets
(3-0) Cr. 3. F.

A M D 165: Dress, Appearance, and Diversity in U.S. Society
(3-0) Cr. 3. F.S.
Examination of dress and appearance practices and experiences of marginalized identities and communities in the United States. Introduction to fashion- and dress-related theories, culture and identity concepts, and social justice concepts and issues in regards to dress, appearance, and fashion in the fashion industry.
Meets U.S. Diversity Requirement

ADVRT 230: Advertising Principles
(3-0) Cr. 3.
Historical, social, economic and legal aspects of advertising. Evaluations of advertising research, media, strategy and appeals. Study of the creation of advertising.

AER E 160: Aerospace Engineering Problems With Computer Applications Laboratory
(2-2) Cr. 3. F.S.
Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

AF AM 201: Introduction to African American Studies
(3-0) Cr. 3. F.S.
An interdisciplinary introduction to the study of African American culture. Includes history, the social sciences, literature, religion, and the arts, as well as conceptual frameworks for investigation and analysis of the African American experience.
Meets U.S. Diversity Requirement

AFAS 141: Foundations of the United States Air Force
(1-0) Cr. 1. F.
No-commitment exploratory course introducing the United States Air Force and the Air Force Reserve Officer Training Corps program. Topics include Air Force heritage and culture, professional military officerhip values and expectations, and future career opportunities with an emphasis on cultivating leadership and communication skills.

AGRON 120: Introduction to Renewable Resources
(Cross-listed with ENV S, NREM). (3-0) Cr. 3. F.S.
Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

AGRON 180: Global Agriculture in a Changing World
(3-0) Cr. 3. F.
A scientific investigation of the global distribution of climate, soils and agricultural production and consumption. Physical processes that connect natural resources to agriculture and the environment. How global change drives increasing demand for agricultural production.
Meets International Perspectives Requirement.
AGRON 206: Introduction to Weather and Climate
(Cross-listed with MTEOR). (3-0) Cr. 3. F.S.
Basic concepts in weather and climate, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety.

AM IN 201: Native People in American Culture
(3-0) Cr. 3. F.S.SS.
Perceptions and realities of Native people living in and responding to American society and culture. Topics include representations, contemporary Native identity, literature, the arts, history, film, and issues of diversity.
Meets U.S. Diversity Requirement

AM IN 210: Introduction to American Indian Studies
(3-0) Cr. 3. F.S.SS.
Introduction to the multidisciplinary aspects of American Indian Studies. Topics include the relevant events and ideas defining the contemporary American Indian experience, on and off reservation, in the United States. Sovereignty, identity, jurisdiction, taxes, economic development, education, and other issues are addressed.
Meets U.S. Diversity Requirement

AN S 101: Working with Animals
(1-2) Cr. 2. F.S.SS.
An introductory course in skills for proper care, handling, and management of domestic animals. Terminology and skills in working with animals, identification, life-cycle management practices, and animal health management are introduced and examined.

AN S 114: Survey of the Animal Industry
(2-0) Cr. 2. F.S.
Principles of management and care of domestic animals, including genetics, nutrition, and reproduction. Service of domestic animals to society in terms of food, shelter, protection, fuel and emotional well-being. Basic biology, industry structure, management practices and production systems.

ANTHR 201: Introduction to Cultural Anthropology
(3-0) Cr. 3. F.S.SS.
Introduction to the core concepts, theories, and methods of cultural anthropology with an emphasis on understanding human cultural diversity in global society from an anthropological perspective.
Meets International Perspectives Requirement

ANTHR 202: Human Origins
(3-0) Cr. 3. F.S.
Human biological and cultural evolution; survey of the evidence from fossil primates, the human fossil record and the archaeological record, as well as living primates; introduction to research methods in archaeology and biological anthropology.

ANTHR 230: Globalization and the Human Condition
(3-0) Cr. 3. F.S.
An introduction to understanding key global issues in the contemporary world. Focuses on social relations, cultural practices and political-economic linkages among Africa, the Americas, Asia, Europe and the Pacific.
Meets International Perspectives Requirement.

ARCH 221: Histories and Theories of Architecture to 1750
(3-0) Cr. 3. F.
Survey of architectural ideas, theories, and practices before 1750. Emphasis on the mutually formative relationship between architecture and the social, cultural, economic, and political forces, nationally and globally, in which it is produced.
Meets International Perspectives Requirement.

ART H 280: History of Art I
(3-0) Cr. 3. F.
Development of the visual arts including painting, sculpture, architecture, and crafts, from the prehistoric through Gothic periods.
Meets International Perspectives Requirement.

ART H 292: Introduction to Visual Culture Studies
(3-0) Cr. 3.
An introduction to various topics in visual culture studies, including significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture.
Meets U.S. Diversity Requirement

ASTRO 103: Evening Star
Cr. 1. F.S.
An entirely web-based course covering topics in celestial mechanics ("Rocket science!") for students with little or no previous experience. It combines the geography of the solar system with discussion of methods of traveling to the other planets. The course "lectures" are online, interactive units with built-in exercises, hands-on (offline) activities, and layers of help. Graded homework and quizzes are administered via Canvas. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.
ASTRO 120: The Sky and the Solar System
(3-0) Cr. 3. F.S.S.S.
For the nonscientist. A survey of our view of the universe, and the exploration of the solar system and beyond. The sky: constellations; motions of the Sun, Moon, and planets; seasons and the calendar; eclipses. The solar system: origin and evolution; characteristics of the Sun, planets, satellites, comets, meteorites, and asteroids. The detection and characterization of other solar systems, and the search for life in the universe. Extensive use of the planetarium is included. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.

ASTRO 150: Stars, Galaxies, and Cosmology
(3-0) Cr. 3. F.S.
For the nonscientist. A survey of astronomy with a focus on the universe beyond our solar system. Basic observational astronomy and the history of astronomy. Stellar astronomy: motions, distances, sizes, spectra; types of stars; variability; binary systems. Stellar evolution: the birth, life, and death of stars, including supernovae, neutron stars, and black holes. The structure and evolution of the Milky Way Galaxy. Other galaxies, clusters of galaxies, quasars. Theories of the origin of the universe.

BBMB 101: Introduction to Biochemistry
(1-0) Cr. 1. F.
Foundational principles of the molecules and chemistry of life, including structure and function of biological molecules: protein, lipids, nucleic acids, and carbohydrates. Survey of modern biotechnology frontiers. For students majoring in Biochemistry or Biophysics or considering one of these majors.

BIOL 101: Introductory Biology
(3-0) Cr. 3. F.S.S.S.
Life considered at cellular, organism, and population levels. Function and diversity of the living world. Presentation of basic biological principles as well as topics and issues of current human interest. Does not satisfy biology major requirements.

BIOL 155: Human Biology
(3-0) Cr. 3. F.S.
A survey course of human biology, including principal structures and functions of the body systems and the diseases and disorders associated with them. Designed to meet general education requirements in natural science. Not recommended for those seeking a career in the allied health professions or for students majoring in life science. Does not satisfy biology major requirements.

BIOL 173: Environmental Biology
(Cross-listed with ENV S). (3-0) Cr. 3. F.S.
An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Does not satisfy biology major requirements.

BIOL 211: Principles of Biology I
(3-0) Cr. 3. F.S.
Prereq: High school biology
Introduction to the nature of life, including the diversity of microbial, plant, and animal life; the nature of heredity; evolution; and principles of ecology. Intended for life science majors.

BIOL 211L: Principles of Biology Laboratory I
(0-3) Cr. 1. F.S.
Prereq: Credit or enrollment in BIOL 211
Laboratory to accompany 211.

BIOL 212: Principles of Biology II
(3-0) Cr. 3. F.S.
Prereq: High School Biology; high school chemistry or credit or enrollment in CHEM 163 or CHEM 177
Introduction to the chemical, molecular, and cellular basis of life; form and function of microbial, plant, and animal life. Intended for life science majors.

BIOL 212L: Principles of Biology Laboratory II
(0-3) Cr. 1. F.S.
Prereq: credit or enrollment in BIOL 212
Laboratory to accompany 212.

BIOL 255: Fundamentals of Human Anatomy
(3-0) Cr. 3. F.
Prereq: High School Biology and Chemistry, or BIOL 101
An introduction to human anatomy, beginning with cells and tissues, surveying all body systems, relating form to function. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider Biol 351 for their anatomy background. Does not satisfy biology major requirements.

BIOL 255L: Fundamentals of Human Anatomy Laboratory
(0-3) Cr. 1. F.
Prereq: Credit or enrollment in BIOL 255
Investigation of human anatomy using models and dissections of preserved organs and model mammals. Pre-Medical students should consider 351 for their anatomy background. Does not satisfy biology major requirements.
**BUSAD 102: Business Learning Team Orientation**  
(1-0) Cr. 1. F.S.  
A required orientation for all College of Business Students involved with a Business Learning Team. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines and registration procedures. Includes a consideration of various business majors and careers, tools for success in college including writing skills and presentations from employers, alumni and current students. Only one of BusAd 102 or BusAd 103 may be counted towards graduation.

**BUSAD 103: Orientation**  
(1-0) Cr. 1. F.S.  
A required orientation for all College of Business students. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines, and registration procedures. Includes group advising for course selection and registration. Only one of BUSAD 102 or BUSAD 103 may be counted toward graduation.

**C E 160: Engineering Problems with Computational Laboratory**  
(2-2) Cr. 3. F.S.  
*Prereq: Credit or enrollment in MATH 165*  
Engineering approach to solving problems and presenting results with applications to examples in civil, construction, and environmental engineering, such as problems in statics. Dimensions and units. Data processing, graphing, and curve fitting. Formulating and solving fundamental and practical engineering problems with spreadsheets and a structured programming language. Only one of ENGR 160, A B E 160, AER E 160, C E 160, CH E 160, CPR E 185, E E 185, I E 148, M E 160, and S E 185 may count towards graduation.

**C E 170: Graphics for Civil Engineering**  
(0-4) Cr. 2. F.S.  
*Prereq: Satisfactory scores on mathematics placement assessments; credit or enrollment in MATH 143 or MATH 145*  
Integration of fundamental graphics, computer modeling, and engineering design. Applications of multiview drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process. Freehand and computer methods.

**C R P 201: The North American Metropolis**  
(3-0) Cr. 3. F.S.  
Examination of the evolution of American urban centers from the colonial era to the present. Considers the demographic changes and social movements underway in urban America and explores how an understanding of the history of cities provides us with knowledge that we can use to improve our cities today.

Meets U.S. Diversity Requirement

**C R P 251: Fundamentals of Geographic Information Systems**  
Cr. 3. F.  
Fundamentals of the concepts, models, functions and operations of Geographic Information Systems (GIS). Principals of spatial problems, spatial questions and hypotheses and their solutions based on spatial data, GIS tools and techniques. Integration of concepts and applications through lectures and facilitated labs. Applications from a variety of areas including design; physical, social, and human science; engineering; agriculture; business and medicine, landscape architecture, architecture, urban planning, geology, forestry, biology, and ecology.

**CH E 160: Chemical Engineering Problems with Computer Applications Laboratory**  
(2-2) Cr. 3. F.S.  
*Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165*  

**CHEM 050: Preparation for College Chemistry**  
(3-0) Cr. 0. F.S.  
*Prereq: 1 year high school algebra*  
An in-depth active learning experience designed to impart the fundamental concepts and principles of chemistry, with an emphasis on mathematics skills and logical thinking. For students intending to enroll in general chemistry and who have not taken high school chemistry or who have not had a high school college preparatory chemistry course who need a review of chemical problem solving and chemical concepts. Credit for Chem 50 does not count toward graduation.

**CHEM 160: Chemistry in Modern Society**  
(3-0) Cr. 3. F.S.  
Aspects of chemistry visible to a non-scientist in our society. A survey of selected areas of chemistry with emphasis on the interface between chemistry and other fields of human activity.
CHEM 163: College Chemistry
(4-0) Cr. 4. F.S.SS.
Prereq: 1 year of high school algebra and geometry and Chem 50 or 1 year of high school chemistry; and credit or enrollment in CHEM 163L
A general survey of chemistry with an emphasis on conceptual problems for those who are not physical and biological science or engineering majors. Nomenclature, chemical reactions, stoichiometry, atomic structure, periodic properties, chemical bonding, states of matter, solutions, thermochemistry, acid-base theory, oxidation-reduction reactions, basic chemical kinetics, and chemical equilibrium. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 163L: Laboratory in College Chemistry
(0-3) Cr. 1. F.S.SS.
Prereq: Credit or enrollment for credit in CHEM 163
Laboratory to accompany CHEM 163. Must be taken with CHEM 163. Only one of Chem 163L, CHEM 167L, and CHEM 177L may count toward graduation.

CHEM 167: General Chemistry for Engineering Students
(4-0) Cr. 4. F.S.
Prereq: 1 year of high school chemistry or CHEM 50 and Math 140 or high school equivalent.
Principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 177: General Chemistry I
(4-0) Cr. 4. F.S.SS.
Prereq: MATH 140 or high school equivalent, and CHEM 50 or 1 year high school chemistry, and credit or enrollment in CHEM 177L. Chemistry and biochemistry majors may consider taking CHEM 201
The first semester of a two semester sequence which explores chemistry at a greater depth and with more emphasis on concepts, problems, and calculations than 163. Recommended for physical and biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry courses. Principles and quantitative relationships, stoichiometry, chemical equilibrium, acid-base chemistry, thermochemistry, rates and mechanism of reactions, changes of state, solution behavior, atomic structure, periodic relationships, chemical bonding. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 177L: Laboratory in General Chemistry I
(0-3) Cr. 1. F.S.SS.
Prereq: Credit or enrollment for credit in CHEM 177
Laboratory to accompany 177. 177L must be taken with 177. Only one of Chem 163L, 167L, and 177L may count toward graduation.

CHEM 177N: Laboratory in General Chemistry I
(0-3) Cr. 1. F.
Prereq: Credit or enrollment for credit in CHEM 177. For chemistry and biochemistry majors
Laboratory to accompany CHEM 177. CHEM 177N must be taken with CHEM 177. Only one of Chem 163L, CHEM 167L, and CHEM 177N may count toward graduation.

CHEM 178: General Chemistry II
(3-0) Cr. 3. F.S.SS.
Prereq: CHEM 177, CHEM 177L, or CHEM 167
Continuation of 177. Recommended for physical or biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry courses.

CHEM 178L: Laboratory in College Chemistry II
(0-3) Cr. 1. F.S.SS.
Prereq: CHEM 177L and credit or enrollment for credit in CHEM 178
Laboratory to accompany 178. 178L is not a necessary co-requisite with 178.

CHEM 201: Advanced General Chemistry
(5-0) Cr. 5. F.
Prereq: Co-enrollment in MATH 165 or credit, one year of high school chemistry, and one year high school physics or advanced chemistry. Co-enrollment in CHEM 201L.
A one-semester course in general chemistry designed to give students an in-depth, broad-based view of modern chemistry, and, in part, to facilitate participation in independent undergraduate research. Topics include stoichiometry, atomic and molecular structure, chemical bonding, kinetics, chemical equilibria, and thermodynamics. Discussion of current trends in various chemical disciplines, which may be given by guest experts in chemistry, biochemistry, and chemical engineering, will help the student appreciate the scope of the chemical sciences and how research is carried out. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHIN 101: Elementary Mandarin Chinese I
(4-0) Cr. 4. F.
Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters. For students whose native language is not Chinese.

CHIN 201: Intermediate Mandarin Chinese I
(4-0) Cr. 4. F.
Prereq: CHIN 102
Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, intensification of character acquisition. For students whose native language is not Chinese.
Meets International Perspectives Requirement.
C J 240: Introduction to the U.S. Criminal Justice System  
(3-0) Cr. 3. F.  
Provides systematic overview of law, police organization and behavior, prosecution and defense, sentencing, the judiciary, community corrections, penology, and capital punishment. The course demonstrates the role of discretion in all of these agencies as well as the sociological influences of age, race, gender, and social class on criminal justice system processes.

CL ST 273: Greek and Roman Mythology  
(3-0) Cr. 3.  
Survey of the legends, myths of the classical world with emphasis on the principal gods, and heroes, and their relation to ancient social, psychological, and religious practices; some attention may be given to important modern theories. 
Meets International Perspectives Requirement.

COM S 101: Orientation  
Cr. R. F.S.  
Required orientation class for all incoming students in the Computer Science major. Topics include academic planning and policies, campus resources, and supports. Opportunity to connect with other computer science peers, faculty, alumni, and employers. Offered on a satisfactory-fail basis only. Offered on a satisfactory-fail basis only.

COM S 103: Computer Literacy and Applications  
Cr. 4. F.S.SS.  
Introduction to computer literacy and applications. Literacy: Impact of computer technology in today’s societies, hardware, software, software programming, database and information systems, communication and networks, digital media technology, computer security and safety, ethics and privacy. Applications: In-depth hands-on experience with the operating systems, Microsoft word processing, spreadsheets, database management and presentation software. No prior computer experience necessary. Offered online only.

COM S 104: Brief Introduction to Computer Programming for Non-Majors  
(1.5-1) Cr. 2. F.S.  
Offered first 8 weeks and last 8 weeks. Use of personal computer and workstation operating systems and beginning programming. Project-oriented approach to computer operation and programming, including use of tools to aid in programming. Topics from computer history, using basic Windows and Unix tools, program structure, expression, variables, decision and logic, and iteration. No prior computer experience necessary.

COM S 107: Windows Application Programming  
(3-0) Cr. 3. F.S.  
Introduction to computer programming for non-majors using a language such as the Visual Basic language. Basics of good programming and algorithm development. Graphical user interfaces.

COM S 113: Introduction to Spreadsheets and Databases  
(2-2) Cr. 3. F.S.SS.  
Using Microsoft Excel spreadsheets and Microsoft Access databases to input, store, process, manipulate, query, and analyze data for business and industrial applications. Credit in Com S 113 may not be applied toward graduation in the SE and CPR E majors.

COM S 207: Fundamentals of Computer Programming  
(Cross-listed with MIS). (3-1) Cr. 3. F.S.SS.  
Prereq: MATH 150 or placement into MATH 140 or higher  
An introduction to computer programming using an object-oriented programming language. Emphasis on the basics of good programming techniques and style. Extensive practice in designing, implementing, and debugging small programs. Use of abstract data types. Interactive and file I/O. This course is not designed for computer science, software engineering, and computer engineering majors. Credit may not be applied toward graduation for both Com S 207/MIS 207 and Com S 227.

COM S 227: Object-oriented Programming  
(3-2) Cr. 4. F.S.S.  
Prereq: Credit or Enrollment in MATH 143 or higher; COM S 127 or CPR E 185 or S E 185 or E E 285 or DS 201  
Computer programming using objects as the mechanism for modularity, abstraction, and code reuse. Instance variables, methods, and encapsulation. Review of control structures for conditionals and iteration. Developing algorithms on strings, arrays, and lists. Recursion, searching, and sorting. Text parsing and file I/O. Interfaces, inheritance, polymorphism, and abstract classes. Exception handling. Tools for unit testing and debugging. Emphasis on a disciplined approach to specification, code development, and testing. Course intended for Com S majors. Credit may not be applied toward graduation for both Com S 207 and 227.
COM S 228: Introduction to Data Structures  
(3-1) Cr. 3. F.S.SS.  
*Prereq: Minimum of C- in COM S 227, credit or enrollment in MATH 165*  
An object-oriented approach to data structures and algorithms. Object-oriented analysis, design, and programming, with emphasis on data abstraction, inheritance and subtype polymorphism, and generics. Abstract data type specification and correctness. Collections including lists, stacks, queues, trees, heaps, maps, hash tables, and graphs. Big-O notation and algorithm analysis. Searching and sorting. Graph search and shortest path algorithms. Emphasis on object-oriented design, writing and documenting medium-sized programs. This course is designed for majors.

COMST 101: Introduction to Communication Studies  
(3-0) Cr. 3.  
An introduction to communication theory, the development and functions of communication, and a survey of verbal, nonverbal, interpersonal, small group, organizational, and intercultural communication.

COMST 211: Interpersonal Communication  
(3-0) Cr. 3.  
Application of major principles related to interpersonal communication theories, concepts, and research. Emphasis on using interpersonal communication skills effectively.

CPR E 131: Introduction to Computer Security Literacy  
(Cross-listed with CYBSC). (1-0) Cr. 1.  
Basic concepts of practical computer and Internet security: passwords, firewalls, antivirus software, malware, social networking, surfing the Internet, phishing, and wireless networks. This class is intended for students with little or no background in information technology or security. Basic knowledge of word processing required. Offered on a satisfactory-fail basis only.

CPR E 185: Introduction to Computer Engineering and Problem Solving I  
(2-2) Cr. 3.  
*Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165*  

DANCE 270: Dance Appreciation  
(3-0) Cr. 3. F.S.  
Introduction to the many forms and functions of dance in world cultures. Develop abilities to distinguish and analyze various dance styles. No dance experience required.  
Meets International Perspectives Requirement.

DES 230: Design Thinking  
(3-0) Cr. 3.  
Introduction to design thinking processes, toolkits, and mindsets, and its interaction with art, design, and technology. Emphasis on interdisciplinary practices.

DS 201: Introduction to Data Science  
Cr. 3. F.S.Alt. SS., offered irregularly.  
*Prereq: 1-1/2 Years of High School Algebra*  
Data Science concepts and their applications; domain case studies with applications in various fields; overview of data analysis; major components of data analysis pipelines; computing concepts for data science; descriptive data analysis; hands-on data analysis experience; communicating findings to stakeholders, and ethical issues in data science.

DSN S 102: Design Studio I  
(1-6) Cr. 4.  
A foundation design studio exploring two and three-dimensional design. Emphasis on fundamental skills and ideas shared across design disciplines. Creative processes, visual order, materials, and critical thinking are investigated through studio projects. Lectures and discussions cover the topics introduced in studios.

DSN S 115: Design Collaborative Seminar  
(1-0) Cr. 1.  
*Prereq: Member of Design Collaborative Learning Community*  
Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy. Offered on a satisfactory-fail basis only.

DSN S 131: Drawing I  
(1-6) Cr. 4.  
An introduction to methods of visual thinking and drawing through studio experiences and lectures. All design fields utilize visual communication and drawing. Focus on the use of drawing as a method for creative problem solving, design development and visual communication. Explore, from observation and imagination, the use of fast sketching and in-depth drawing, using various scales, mediums and processes.
DSN S 183: Design in Context
(3-0) Cr. 3.
Explores designed media, objects, places, spaces, structures, and systems as products of varied and often intersecting contexts. Using historical and contemporary case studies, investigates how cultural, economic, environmental, spatial, social, and temporal contexts, among others, affect design. Explores in particular how design addresses complex and multifaceted problems.

DSN S 232: Digital Design Communications
(3-0) Cr. 3.
Introductory investigations of various digital design media to develop multi-dimensional problem solving, digital communication skills and perceptual sensitivity. Open to all university majors.

E E 185: Introduction to Electrical Engineering and Problem-Solving I
(2-2) Cr. 3. F.S.
Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

ECON 101: Principles of Microeconomics
(3-0) Cr. 3. F.S.SS.

ECON 101L: Laboratory in Principles of Microeconomics
(0-2) Cr. 1. F.
Prereq: Concurrent enrollment in the appropriate section of ECON 101
Discussion of material typically covered in Econ 101. Application of economic principles to real world problems. Economic principles and basic business management concepts applied to decision-making in agribusiness operations.

ECON 102: Principles of Macroeconomics
(3-0) Cr. 3. F.S.SS.
Prereq: ECON 101 recommended

ECON 235: Introduction to Agricultural Markets
(3-0) Cr. 3. F.S.
Prereq: ECON 101
Basic concepts and economics principles related to markets for agricultural inputs and products. Overview of current marketing problems faced by farms and agribusinesses, farm and retail price behavior, structure of markets, food marketing channels, food quality and food safety, and the role of agriculture in the general economy. The implications of consumer preferences at the farm level. Introduction to hedging, futures, and other risk management tools.

EDUC 204: Social Foundations of Education in the United States: Secondary
(3-0) Cr. 3. F.S.SS.
Introduction to the historical and contemporary landscape of schooling in the United States. Emphasis is placed on topics and tensions in the relationship between school and society (e.g. equity of access to education and competing purposes of education) and the implications of these topics and tensions for teaching and learning at the secondary level in public schools. For prospective teachers in an ISU Secondary Educator Preparation program; open to students who are considering teaching and/or work in education as a career path.

EDUC 205: Social Foundations of Education in the United States: Early Childhood and Elementary Education
Cr. 3. F.S.
Introduction to the historical and contemporary landscape of schooling in the United States. Emphasis on topics and tensions in the relationship between school and society (e.g., equity of access to education and competing purposes of education) and the implications of these topics and tensions for teaching and learning in public schools. Students in K-12 education, secondary, education, or a non-education major should take EDUC 204.
EDUC 219: Orientation to Teacher Education: FCS, History, Math, Science and World Language and Cultures Majors
Cr. 1. F.S.
Prereq: Students seeking teacher licensure in Family and Consumer Sciences, History, Mathematics, Science and World Language and Cultures in grades 5-12.
Overview of mathematics, science, family and consumer sciences and history, and world language and cultures secondary education (grades 5-12), teacher licensure requirements in Iowa and other states. Program and career planning. Offered on a satisfactory-fail basis only.

ENGL 099S: Strategies for Nonnative Speakers of English: Academic Speaking and Pronunciation
Cr. 0. F.S.
Prereq: Recommendation of English Department; placement in sections L and R is determined by examination; section S is open to all interested international students. Available P/NP to graduate students at their department's option

ENGL 101B: English for Native Speakers of Other Languages: Academic English
(3-0) Cr. 3. F.S.
Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.)
For undergraduates: Completion of ENGL 101 requirement prepares students for ENGL 150. For graduates: Completion of ENGL 101 satisfies the English requirement of the Graduate College. ENGL 101 courses are limited to students who are nonnative speakers of English. Credit from ENGL 101 does not count toward graduation.

ENGL 101C: English for Native Speakers of Other Languages: Academic English II--Undergraduates
(3-0) Cr. 3. F.S.
Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.)
For undergraduates: Completion of ENGL 101 requirement prepares students for ENGL 150. For graduates: Completion of ENGL 101 satisfies the English requirement of the Graduate College. ENGL 101 courses are limited to students who are nonnative speakers of English. Credit from ENGL 101 does not count toward graduation.

ENGL 150: Critical Thinking and Communication
(3-0) Cr. 3. F.S.S.
Prereq: Concurrent enrollment in LIB 160 is recommended.
Application of critical reading and thinking abilities to topics of civic and cultural importance. Introduction of basic oral, visual, and electronic communication principles to support writing development. Initiation of communication portfolio.

ENGL 201: Introduction to Literature
(3-0) Cr. 3.
Prereq: Credit in or exemption from 150
Study of selected examples of drama, poetry, short fiction, and the novel drawn from both British and American literature. Recommended for nonmajors.

ENGL 214: Introduction to Technical Communication
Cr. 3. F.
Prereq: ENGL 150
A broad introduction to the culture of professional work as a technical communicator, with particular emphasis on principles and best practices for developing and managing technical information and digital media. Examination of user-centered design, the history of the discipline, cross-cultural communication, and the ethics of communicating complex information to lay audiences. Study and practice of team-based collaboration, project management, and technical editing.

ENGL 225: Survey of British Literature to 1800
(3-0) Cr. 3.
Prereq: ENGL 250
Representative works of British literature from the origins to 1800 in historical, cultural, and literary contexts. Will include multiple genres.

ENGL 226: Survey of British Literature since 1800
(3-0) Cr. 3.
Prereq: ENGL 250
Representative works from 1800 to the present in historical, cultural, and literary contexts. Will include multiple genres and may include texts that reflect and/or critique the impact and legacy of the British empire on its former colonies, i.e., postcolonial literature.

ENGL 237: Survey of Film History
(2-3) Cr. 3. F.
Prereq: Credit in or exemption from 150
A survey of the history of film, both U.S. and international, from the beginnings in the late nineteenth century to the present. Class meets two hours per week for lecture and discussion. Lab meets up to 3 hours for film screenings.

ENGL 240: Introduction to American Indian Literature
(Cross-listed with AM IN). (3-0) Cr. 3. F.
Prereq: Credit in or exemption from ENGL 150
Appreciation of oral and written forms of American Indian literatures. Tropes and techniques in oral, visual and written texts. Focus on the role of American Indians in interdisciplinary approaches to modern social and environmental issues as expressed in literary works. Meets U.S. Diversity Requirement
ENGL 250: Written, Oral, Visual, and Electronic Composition
(3-0) Cr. 3. F.S.SS.
Prereq: ENGL 150 or exemption from ENGL 150; sophomore classification or exemption from ENGL 150; credit for or concurrent enrollment in LIB 160
Analyzing, composing, and reflecting on written, oral, visual, and electronic (WOVE) discourse within academic, civic, and cultural contexts. Emphasis on supporting a claim and using primary and secondary sources. Continued development of communication portfolio. The University requires a minimum grade of C in ENGL 250 to meet the Communication Proficiency graduation requirement; some majors/degree programs may set higher standards.

ENGL 275: Analysis of Popular Culture Texts
(Cross-listed with SP CM). (3-0) Cr. 3. F.S.
Prereq: Credit in or equivalent of 250
Analysis of how information and entertainment forms persuade and manipulate audiences. Study of several forms that may include newspapers, speeches, television, film, advertising, fiction, and magazines. Special attention to verbal and visual devices.

ENGR 160: Engineering Problems with Computer Applications Laboratory
(2-2) Cr. 3. F.S.SS.
Prereq: MATH 143 or satisfactory scores on mathematics placement examinations

ENT 201: Introduction to Insects
(2.7-0) Cr. 1. F.S.SS.
Biological and ecological aspects of insects. Offered online only. 5 weeks.

ENT 211: Insects and Society
(2.7-0) Cr. 2. F.S.
Prereq: ENT 201
The importance of insects in human well-being. Insect-human interactions. Primarily for non-science and non-agriculture majors. Offered online only. 11 weeks.

ENT 214: Insects in Forensic Science
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: none
Introduction to the use of insects as evidence in court and how they can assist in solving crimes. Topics covered include basic insect biology, systematics, behavior, with emphasis on applications of forensic entomology.

ENT 220: Introduction to Forensic Science
(Cross-listed with C J). (3-0) Cr. 3. S.
Study of fundamental forensic science techniques and procedures covering types of physical, chemical, and biological evidence and how this information is used in the legal system. Assessment of crime scenes and various forensic specialties will be introduced.

ENV S 101: Environmental Geology: Earth in Crisis
(Cross-listed with GEOL). (3-0) Cr. 3. F.S.SS.
Exploration of the interactions between humans and the geologic environment, and the consequences of those interactions, on local to global scales. Discussion of water, soil, mineral, and energy resources, pollution, climate change, and natural hazards such as earthquakes, volcanism, mass wasting, and flooding.

ENV S 120: Introduction to Renewable Resources
(Cross-listed with AGRON, NREM). (3-0) Cr. 3. F.S.
Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management. Does not satisfy biology major requirements.

ENV S 173: Environmental Biology
(Cross-listed with BIOL). (3-0) Cr. 3. F.S.
An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution.

EVENT 210: Introduction to Environmental Issues
(Cross-listed with BIOL, ENSCI). (2-0) Cr. 2. F.
Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

EVENT 171: Introduction to Event Management
(3-0) Cr. 3. F.S.
Overview of the event management industries. Techniques and procedures required for producing successful and sustainable events.
FRNCH 101: Elementary French I  
(4-0) Cr. 4. F.S.S.  
Beginning level development of reading, writing, listening comprehension, and speaking in French, within the context of French culture.

FRNCH 201: Intermediate French I  
(4-0) Cr. 4. F.  
Prereq: FRNCH 102  
Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture.  
Meets International Perspectives Requirement.

FS HN 101: Food and the Consumer  
(3-0) Cr. 3. F.S.S.  
Prereq: High school biology and chemistry or 3 credits each of biology and chemistry  

FS HN 167: Introductory Human Nutrition and Health  
(3-0) Cr. 3. F.S.S.  
Prereq: High school biology or 3 credits of biology  
Understanding and implementing present day knowledge of nutrition. The role of nutrition in the health and well being of the individual and family.

FS HN 220: American Food and Culture  
(3-0) Cr. 3. F.S.  
American cuisine reflects the history of the U.S. It is the unique blend of diverse groups of people from around the world, including indigenous Native American Indians, Africans, Asians, Europeans, Pacific Islanders, and South Americans. Explore factors that impact the American Cuisine of today including diverse ethnic and cultural group influences, historical events related to food diversity in the U.S., and agriculture and industrial impacts on food production. Practical knowledge and basic food preparation techniques related to the U.S. food system and trends. Class sessions will include lectures, class discussions and Tasting Immersion activities.  
Meets U.S. Diversity Requirement

GEOL 100: How the Earth Works  
(3-0) Cr. 3. F.S.S.  
How does the earth work, what is it made of, and how does it change through time? Plate tectonics, Earth materials, landforms, structures, climate, and natural resources. Emphasis on the observations and hypotheses used to interpret earth system processes. Students may also enroll in Geol 100L.

GEOL 100L: How the Earth Works: Laboratory  
(0-2) Cr. 1. F.S.  
Prereq: Credit or enrollment in GEOL 100  
Students will gain understanding of how Earth processes affect their lives and how they affect the Earth, and of the complex nature of the Earth and its processes. They will gain a deep knowledge of the methods used to understand the time scales and rates of Earth processes also through an applied research experience on groundwater and surface water.

GEOL 101: Environmental Geology: Earth in Crisis  
(Cross-listed with ENV S). (3-0) Cr. 3. F.S.S.  
Exploration of the interactions between humans and the geologic environment, and the consequences of those interactions, on local to global scales. Discussion of water, soil, mineral, and energy resources, pollution, climate change, and natural hazards such as earthquakes, volcanism, mass wasting, and flooding.

GEOL 105: Gems and Gemstones  
(2-0) Cr. 1. F.  
Offered in second half of the semester. Introduction to gems and gemstones, physical and optical properties of gems and gemstones, explanation of where gems come from and how they are found, how to distinguish between synthetic and naturally occurring gems, how the value of gems are determined, and the history of famous gems.

GEOL 108: Introduction to Oceanography  
(Cross-listed with ENV S). (3-0) Cr. 3. F.  
Introduction to the study of oceans and the processes that helped shape them. A major focus is on how the oceans work, with special attention on geological, chemical, and biological processes. Ocean circulation and its influence on climate. Life of the oceans. Use and misuse of ocean resources. Anthropogenic impacts on the oceanic environment.

GEOL 111: Geological Disasters  
(Cross-listed with ENV S). (1-0) Cr. 1. F.S.S.  
Introduction to the catastrophic geologic processes with the potential to devastate human populations that continue to expand into regions at greatest risk from geologic hazards. Selected case studies and discussion of plate tectonics, climate, and earth processes explain the driving forces behind natural hazards such as earthquakes, tsunamis, volcanic eruptions, landslides, and floods.

GEOL 201: Geology for Engineers and Environmental Scientists  
(2-2) Cr. 3. F.  
Introduction to Earth materials and processes with emphasis on engineering and environmental applications.
GER 101: Elementary German I
(4-0) Cr. 4. F.S.S.
Beginning level development of reading, writing, listening comprehension, and speaking in German within the context of German culture. For beginning-level learners who have little or no prior exposure to German.

GER 201: Intermediate German I
(4-0) Cr. 4. F.
Prereq: GER 102
Intermediate level development of reading, writing, listening comprehension, and speaking in German within the context of German culture. Intensive review of basic grammar covered in the first-year German class (or equivalent high school courses) while exploring cultural topics and themes. Meets International Perspectives Requirement.

GLOBE 201: Introduction to Global Resource Systems
(3-0) Cr. 3. F.S.
A systematic analysis of natural, physical, and socio-economic resources. Examine ways communities prioritize, save, use, and invest in community resources to address their needs and wants in a sustainable way, and the global implications of resource systems decisions. Assessed service-learning component.

H S 105: First Aid and Emergency Care
(1-2) Cr. 2. F.S.SS.
Discussion and application of the basic techniques of utilizing bloodborne pathogen safety measures, administering first aid and cardiopulmonary resuscitation. ARC layperson certification available.

H S 110: Personal and Consumer Health
(3-0) Cr. 3. F.S.
Physical, mental, emotional and social aspects of health as a basis for understanding and promoting health, and preventing poor health conditions. Study of personal responsibility on the long-term benefits of maintaining a high level of wellness and health. Identification and mitigation of negative lifestyle habits.

H SCI 110: Orientation and Human Sciences Career Exploration
(2-0) Cr. 2. F.S.
Orientation and adjustment to the university and college; review of policies and procedures; academic resources; and course selection and planning. Comprehensive approach to career development; intensive self-analysis; and in-depth examination of majors in Human Sciences. Required for all students declared as an Undecided major in the College of Human Sciences.

H SCI 150: Dialogues on Diversity
(1-0) Cr. 1. F.S.
An exploration of diversity within the context of the Iowa State University community through understanding human relations issues. Meets U.S. Diversity Requirement

HD FS 102: Individual and Family Development, Health, and Well-being
(3-0) Cr. 3. F.S.SS.
Overview of life-span developmental tasks (physical, cognitive, language, social, emotional) examined from various theoretical perspectives. Discussion of topics related to family diversity, individual/family health and well-being and reciprocal relationships as affected by external factors.

HD FS 183: Personal Finance in Early Adulthood
(1-0) Cr. 1. F.S.SS.
Introduction to basic concepts and budgeting practices for management of resources and prevention of financial problems commonly associated with college, including credit and student loans. Offered on a satisfactory-fail basis only.

HD FS 223: Child Development and Health
(3-0) Cr. 3. S.
Typical and atypical development of children prenatal through middle childhood. Examination of healthy development and potential impact of health issues in children. Discussion of influence of the family and society on development. Either HD FS 223 or HD FS 224, but not both, may be applied toward graduation.

HD FS 239: Consumer Issues
(3-0) Cr. 3. F.S.
Introduction to factors affecting consumer decisions of individuals and families, including housing, healthcare, and personal finances. Emphasis on accessibility and affordability; community contexts for families; and consumer protection, legislation and regulation, and consumer fraud. Meets U.S. Diversity Requirement

HD FS 240: Literature for Children
(3-0) Cr. 3. F.S.
Evaluation of literature for children, including an emphasis on diversity and inclusion; cultural competence. Roles of literature in the overall development of children. Literature selection and use in the home and educational settings. Meets U.S. Diversity Requirement
HD FS 276: Human Sexuality
(3-0) Cr. 3. F.S.SS.
Behavioral, biological, and psychological aspects of human sexuality within the social context of family, culture, and society. Role of sexuality in human development. Critical analysis of media and research. Communication and decision-making skills relating to sexuality issues and relationships.
Meets U.S. Diversity Requirement

HIST 201: Introduction to Western Civilization I
(3-0) Cr. 3. F.
Western civilization from ancient Mediterranean world to 1500. Social and cultural developments; economic and political ideas and institutions; problems of historical change and continuity.
Meets International Perspectives Requirement.

HIST 207: Chinese Civilization
(3-0) Cr. 3.
Origins, development, decline and transformation of China from earliest times to 1911.
Meets International Perspectives Requirement.

HIST 211: Ancient Empires: From Sargon to Caesar
Cr. 3. F.
Development of empires in the Near East and Mediterranean from the Akkadians to the fall of Rome. Discussion of the Hittites, Assyrians, Persians, Athenians, Macedonians (including the conquests of Alexander the Great), Carthaginians, and Romans; examination of imperialism as well as the social, cultural, and economic consequences of empire.
Meets International Perspectives Requirement.

HIST 221: Survey of United States History I
(3-0) Cr. 3. F.
Colonial foundations: revolution, confederation, and constitution; nationalism and democracy; sectional disunity, Civil War, and reunion.

HIST 280: Introduction to History of Science I
(3-0) Cr. 3.
Ideas of nature from ancient Greece to the seventeenth-century scientific revolution.
Meets International Perspectives Requirement.

HORT 121: Home Horticulture
(3-0) Cr. 3. F.
Growing plants in and around the home including requirements for growing indoor plants, plant propagation, landscape design, and maintaining trees, lawns, flower, fruit, and vegetable gardens. Recitation includes demonstrations and hands-on activities that illustrate principles of designing, growing and maintaining plants for both indoor and outdoor gardens.

HSP M 101: Introduction to the Hospitality Industry
(3-0) Cr. 3. F.S.
Introduction to the foodservice, lodging, and tourism components of the hospitality industry. Background information, current issues, and future challenges in various segments of the industry.

I E 148: Information Engineering
(2-2) Cr. 3. F.S.
Prereq: Credit or enrollment in MATH 143

INTST 235: Introduction to International Studies
(3-0) Cr. 3. F.S.S.
Overview of international studies, emphasizing cultural, geographic, economic, and political characteristics of major world areas and nations. Meets International Perspectives Requirement.

ITAL 107: Intensive Beginning Italian
Cr. 4. F.S.
A communicative approach to grammar and vocabulary within the context of Italian culture for students whose native language is not Italian. Taught in Italian.

JL MC 101: Mass Media and Society
(3-0) Cr. 3. F.S.SS.
Communication theory models and their application to the mass media; the mass communication process; organization, characteristics and responsibilities of the mass media; media literacy process.

JL MC 110: Orientation to Journalism and Communication
(1-0) Cr. 1. F.S.
Orientation to professional and pre-professional opportunities, writing for the mass media and curriculum requirements in the Greenlee School. Basic media writing preparation. Offered on a satisfactory-fail basis only.

JL MC 240: Principles of Journalism
Cr. 3. F.S.
Analysis of journalism industry and specific audiences served by print, electronic, visual and digital media. Introduction to core values of journalism and guiding principles that encompass literacy, ethics, law, history, the economy and cultural and societal implications.
Entry Level Courses

**JL MC 242: Visual Principles for Mass Communicators**  
(3-0) Cr. 3. F.S.  
Understanding and analysis of the visual message. Visual perception, visual communication theory, design syntax, design elements and how they are applied in mass communication.

**KIN 252: Introduction to the Discipline of Kinesiology**  
(1-0) Cr. 1. F.S.  
Relevant societal issues and research within the discipline of Kinesiology (the study of movement) are addressed.

**KIN 253: Orientation and Learning Community in Kinesiology and Health**  
(1-0) Cr. 1. F.S.  
Prereq: Concurrent enrollment or credit in KIN 252  
Overview of ISU policies and procedures, academic advising operations, degree requirements, program of study planning, and campus resources. Students will have out-of-class activities and work with faculty, staff and mentors to explore careers in Kinesiology and complete assignments related to identification & development of their skills and interests. Department of Kinesiology students only. Offered on a satisfactory-fail basis only.

**L L S 112: Foundations of Learning and Productive Team Membership**  
(2-0) Cr. 2. F.  
Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

**LAS 101: Orientation for Open Option and Preprofessional Students**  
(1-0) Cr. 1. F.  
Introduction to all undergraduate colleges. Provides information about university resources and services, assists with a successful academic transition to the university, and helps initiate the process of identifying academic major(s) and eventual career paths. Required of all first-year students in Open Option and Preprofessional Programs. Offered on a satisfactory-fail basis only.

**LATIN 101: Elementary Latin I**  
(3-0) Cr. 3. F.  
Grammar and vocabulary of classical Latin, within the context of Roman culture; reading knowledge through texts adapted from classical authors.

**LD ST 122: Leading with Purpose**  
(1-0) Cr. 1. F.S.  
Designed for emerging student leaders. Basic leadership skills covering personal skills development, goal achievement, values-based behaviors and mission statement development.

**LD ST 270: Campus Leadership Development**  
(3-0) Cr. 3. F.S.S.  
Introduce effective leadership practices for emerging leaders. Engage in experiential campus leadership opportunities.

**LIB 160: Introduction to College Level Research**  
(1-0) Cr. 1. F.S.S.  
Prereq: For students placed in ENGL 101: Completion of ENGL 101 requirement.  
Eight-week course required for undergraduate degree. Provides a foundation for college level research. Students will develop the critical thinking skills necessary to successfully navigate the research process: developing a research question, searching strategically, evaluating sources, and using information ethically. To be taken as early as possible in the student’s undergraduate career. See course descriptions of ENGL 150 and ENGL 250 for requirements related to LIB 160. Offered on a satisfactory-fail basis only.

**LING 119: Introduction to World Languages**  
(Cross-listed with WLC). (3-0) Cr. 3.  
Study of language diversity and the personal, social and political effects of diversity. Language families, attitudes toward language and language use, language and culture, multilingualism, foreign language learning, written codes, official languages, and language policy. Meets International Perspectives Requirement.

**LING 120: Computers and Language**  
(Cross-listed with ENGL). (3-0) Cr. 3.  
Introduction to the use of linguistic knowledge in computer applications today and the basic computational techniques used in such applications. The development of these techniques throughout the history of computational linguistics. How the study of language has contributed to the advancement of technology and how certain computational problems have influenced the way linguists study language.
M E 160: Mechanical Engineering Problem Solving with Computer Applications
(2-2) Cr. 3. F.S.
Prereq: M E majors only. MATH 143 or MATH 145; credit or enrollment in MATH 165.

Introduction to the field of Mechanical Engineering through problem-solving in a range of topics including statics, mechanics of materials and thermo-fluids. Techniques to professionally present and communicate solutions. Use of MATLAB computer programming to aid problem solving, including curve fitting and graphing. Only one of ENGR 160, A B E 160, AER E 160, C E 160, CH E 160, CPR E 185, E E 185, I E 148, M E 160, and S E 185 may count toward graduation.

M E 170: Engineering Graphics and Introductory Design
(2-2) Cr. 3. F.S.
Prereq: Satisfactory scores on mathematics placement assessments; credit or enrollment in MATH 143 or MATH 145

Integration of fundamental graphics, computer modeling, and engineering design. Applications of multiview drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports. Freehand and computer methods.

M S 101: Introduction to Military Science
(1-0) Cr. 1. F.
Prereq: Concurrent enrollment in M S 101L required

Examines the role of a Cadet in the Army Reserve Officer Training Corps and a Lieutenant in the United States Army. The course explores a military culture whose ultimate success is determined by the character and proficiency of its leaders. Instruction introduces students to the cultural heritage and history of the U.S. Army. Students will begin to understand the structure of the U.S. Army and how it functions as an organization and institution. The curriculum promotes the development of students’ communication skills to enhance their ability to transmit ideas. The class examines how the Army’s cultural values drive the development of leadership in the Officer Corps. Hands-on activities enable students to gain insight on the skills and abilities required of cadets and officers interacting with civilians and soldiers.

M S 101L: Basic Leadership Laboratory I
(0-2) Cr. 1. F.
Prereq: Concurrent enrollment in M S 101 required

Uses basic military training, missions and scenarios to provide a hands-on method of developing confidence and leadership skills. Students observe and participate in the rotation through various levels of leadership positions at the platoon and squad level within the Army command structure. This concept provides a constant learning environment as they learn to communicate effectively and work as a team while assigned to positions at various levels within the organization. Marching, rifle firing, and tactical patrolling; students gain confidence through rappelling and construction/use of rope bridges; and increase professional knowledge in areas such as first aid, water survival, personal physical fitness, and land navigation. Teaching locations include the ISU Armory, Camp Dodge (National Guard Facility), Pammel Woods (ISU campus), and ISU fitness centers. Full participation in all events will be determined based on students’ physical and medical eligibility.

M S 150: Army Physical Readiness
(0-3) Cr. 1. Repeatable. F.S.

This lab is designed to use basic military skills and instruction to develop confidence, leadership, and physical fitness. The team approach is utilized in the instruction and application of Army physical fitness requirements. Students will learn various Army physical fitness techniques as well as how to conduct physical fitness sessions. Teaching locations include Lied Recreation Center, Beyer Hall, State Gym as well as around campus. Full participation in all events will be determined based on students physical and medical eligibility.

MATH 010: High School Algebra
(4-0) Cr. 0. F.S.

For students who do not have adequate facility with topics from high school algebra or do not meet the algebra admission requirement. The course is divided into tracks of one- and two-semester lengths. For most students a diagnostic exam will determine which track must be taken. Students will receive a grade in MATH 25 or MATH 30 respectively depending on the level of material covered. Satisfactory completion of MATH 30 is recommended for students planning to take MATH 140, MATH 143, MATH 145, MATH 150, or MATH 151, while MATH 25 is sufficient for MATH 104, MATH 105, MATH 195, STAT 101 or STAT 105. Students must complete MATH 30 to remove a deficiency in the algebra admission requirement. Topics include signed numbers, polynomials, rational and radical expressions, exponential and logarithmic expressions, and equations. Offered on a satisfactory-fail basis only.
MATH 101: Orientation in Mathematics
(1-0) Cr. 1. F.
A required orientation for all first-year and transfer students in mathematics. Provides information about campus resources and opportunities available to students, assists with transition to the University, and academic planning. Offered on a satisfactory/fail basis only. Offered on a satisfactory-fail basis only.

MATH 104: Introduction to Probability
(3-0) Cr. 3. F.S.S.S.
Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry
Permutations, combinations, probability, expected value, and applications. Either MATH 104 or MATH 150 may be counted toward graduation, but not both.

MATH 105: Introduction to Mathematical Ideas
(3-0) Cr. 3. F.S.S.S.
Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry.
Introduction to the use of basic mathematics to solve real-world problems in the areas of voting issues, measuring power in situations where people have different numbers of votes, apportionment, fair division, and elementary game theory. No prior background in politics or history is necessary for this course.

MATH 140: College Algebra
(3-1) Cr. 3. F.S.S.S.
Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry; or MATH 30.
Coordinate geometry, quadratic and polynomial equations, functions, graphing, rational functions, exponential and logarithmic functions, inverse functions, quadratic inequalities, systems of linear equations. Prepares students for MATH 160.

MATH 143: Preparation for Calculus
(4-0) Cr. 4. F.S.
Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry; or MATH 140.
Preparation for MATH 160 and MATH 165. Functions, graphing, basic trigonometry, logarithms, exponentials. Emphasis on co-variational reasoning. Only one of MATH 143 and MATH 145 may count toward graduation.

MATH 145: Applied Trigonometry
(3-0) Cr. 3. F.S.
Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry; or minimum of C- in MATH 140.
Mathematical ideas regarding the conception of space. General trigonometry, with an emphasis on the calculation of lengths, areas, and angles. The Law of Sines and the Law of Cosines. Polar, cylindrical, and spherical coordinate systems. Conic sections and quadric surfaces. Only one of MATH 143 and MATH 145 may count toward graduation.

MATH 150: Discrete Mathematics for Business and Social Sciences
(2-1) Cr. 3. F.S.S.S.
Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry
Linear equations and inequalities, matrix algebra, linear programming, discrete probability. Either MATH 104 or MATH 150 may be counted toward graduation, but not both.

MATH 160: Survey of Calculus
(4-0) Cr. 4. F.S.
Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of geometry; or minimum of C- in MATH 140; or minimum of C- in MATH 143
Analytic geometry, derivatives and integrals of elementary functions, simple differential equations, and applications. Will not serve as a prerequisite for MATH 265 or MATH 266. Only one of MATH 151, MATH 160, or the sequence MATH 165-MATH 166 may be counted towards graduation.

MATH 165: Calculus I
(4-0) Cr. 4. F.S.S.S.
Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of geometry, 1 semester of trigonometry, or minimum of C- in MATH 143
Differential calculus, applications of the derivative, introduction to integral calculus. Only one of MATH 151 or MATH 160 or the sequence MATH 165-MATH 166 may be counted towards graduation.

MATH 166: Calculus II
(4-0) Cr. 4. F.S.S.S.
Prereq: Minimum of C- in MATH 165 or high math placement scores
Integral calculus, applications of the integral, parametric curves and polar coordinates, power series and Taylor series. Only one of MATH 151, MATH 160, or the sequence MATH 165-MATH 166 may be counted towards graduation.
MATH 195: Mathematics for Elementary Education I
(2-2) Cr. 3. F.S.
Prereq: Satisfactory performance on placement assessment, 2 years high school algebra, 1 year of high school geometry, enrollment in elementary education or early childhood education
Whole number operations through analysis of properties, theoretical and hands-on models, mathematical analysis of elementary students’ thinking; standard and non-standard algorithms; structure of the decimal system; linear measurement; two- and three-dimensional measurement, shapes and spatial sense; number theory; algebra as it relates to elementary curricula/teaching profession. Students in the College of Liberal Arts and Sciences may not count MATH 195 toward General Education Requirements.

MATH 265: Calculus III
(4-0) Cr. 4. F.S.SS.
Prereq: Minimum of C- in MATH 166 or MATH 166H
Geometry of space and vectors, multivariable differential calculus, multivariable integral calculus, vector calculus.

MATH 267: Elementary Differential Equations and Laplace Transforms
(4-0) Cr. 4. F.S.SS.
Prereq: Minimum of C- in MATH 166 or MATH 166H
Same as MATH 266 but also including Laplace transforms and power series solutions to ordinary differential equations.

MICRO 101: Microbial World
(3-0) Cr. 3. F.
Prereq: High school biology or equivalent
Introduction to the importance of viruses, bacteria, fungi, archaea and parasites both to humans and to the biosphere. Topics include past and present microbial impact on humans and society, ecology and diversity of microbes, biotechnology and microbial impact on the biosphere.

MICRO 201: Introduction to Microbiology
(2-0) Cr. 2. F.S.
Prereq: One semester of college-level biology
Selected topics in microbiology with emphasis on the relationship of microorganisms to human and animal health, agricultural technology, and the environment. With written petition to the chair of the supervisory committee, students who obtain a grade of B or better may substitute 201 for Micro 302 in advanced courses.

MICRO 201L: Introductory Microbiology Laboratory
(0-3) Cr. 1. F.S.
Prereq: Credit or enrollment in MICRO 201 or MICRO 302
Basic microbiology laboratory techniques for non-microbiology majors. Credit for either Micro 201L or 302L, but not both, may be applied toward graduation.

MTEOR 107: Severe and Hazardous Weather
(2-0) Cr. 1. F.
Understanding of atmospheric processes that play a role in creating severe and hazardous weather. Focus on thunderstorms, tornadoes, hurricanes, floods, blizzards, ice storms, and temperature extremes. Impacts on lives and property.

MTEOR 140: Climate and Society
(Cross-listed with AGRON, ENV S, GEOL). Cr. 3. F.S.
The climate system of our planet. How nature and our actions alter the existing energy balance leading to climate change. Past climates on our planet. The influence of climate on society and resource availability during the Holocene (~ 11,000 years ago to present) with focus on changes post industrial revolution. Significant climate events that have altered our way of life in the past. Projected changes in future climate and potential impacts on society, environment and resources. Adaption to and mitigation of climate change.
Meets International Perspectives Requirement.

MTEOR 206: Introduction to Weather and Climate
(Cross-listed with AGRON). (3-0) Cr. 3. F.S.
Basic concepts in weather and climate, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety.

MUSIC 101: Fundamentals of Music
(1-2) Cr. 2. F.S.
Prereq: Ability to read elementary musical notation
Notation, recognition, execution and analysis of scales, intervals, triads, and rhythm; key signatures; time signatures; transposition. Open to non-majors only.

MUSIC 102: Introduction to Music Listening
(3-0) Cr. 3. F.S.SS.
Expansion of the music listening experiences for the general student through greater awareness of differences in techniques of listening, performance media, and materials of the art. The course focuses on the elements of music: rhythm, melody, harmony, form, and style, and how these elements are used in musics of different cultures and time periods. Ability to read or perform music not required.
Meets International Perspectives Requirement.

MUSIC 111: Wind Ensemble
(0-3) Cr. 1. Repeatable. F.S.
Prereq: Open to all students by audition
Emphasis on significant extended compositions for wind and percussion instruments. Performances include formal concerts on campus and the annual tour.
MUSIC 112: Concert Band  
(0-2) Cr. 1. Repeatable. F.S.  
**Prereq:** Open to all students who have performed on a wind or percussion instrument in high school band or orchestra  
Repertoire includes the broad spectrum of band music. Two concerts are presented each semester.

MUSIC 113: Jazz Ensemble  
(0-2) Cr. 1. Repeatable. F.S.  
**Prereq:** Open to all students by audition  
Designed to explore various styles and trends in contemporary jazz.

MUSIC 114A: Marching and Pep Bands: Marching Band  
(0-5) Cr. 1. Repeatable. F.  
Membership determined by audition and band application. Auditions held for woodwind, brass, percussion, flag, and twirler positions. Presentation of pre-game and half time shows at each home football game; additional performances are also scheduled on and off campus. Audition information is listed on the band website (www.music.iastate.edu/org/marching). Students may not be concurrently enrolled in MUSIC 114A and 114C.

MUSIC 115: Symphonic Band  
(0-3) Cr. 1. Repeatable. F.S.  
**Prereq:** Open to all students by audition  
Stresses high quality wind literature. Performances include formal concerts on campus.

MUSIC 118: Applied Music: Non-majors  
(0.5-0) Cr. 1-2. Repeatable. F.S.  
**Prereq:** Audition, permission of instructor  
Applied music for the general student.

MUSIC 141: Lyrica Women’s Choir  
(0-3) Cr. 1. Repeatable. F.S.  
**Prereq:** Open to all female students by audition  
Large chorus; emphasis on fundamental vocal and choral skills, wide variety of literature. Campus concerts each semester.

MUSIC 151A: Oratorio Chorus: Cantamus Women’s Choir  
(0-3) Cr. 1. Repeatable. F.S.  
**Prereq:** Open to all students by audition  
Advanced skills required, high quality literature. Campus concerts each semester, some concerts in conjunction with orchestras. Men’s and women’s choirs separately and in combination.

MUSIC 151B: Oratorio Chorus: Statesmen Men’s Choir  
(0-3) Cr. 1. Repeatable. F.S.  
**Prereq:** Open to all students by audition  
Advanced skills required, high quality literature. Campus concerts each semester, some concerts in conjunction with orchestras. Men’s and women’s choirs separately and in combination.

MUSIC 161: Iowa State Singers  
(0-5) Cr. 1. Repeatable. F.S.  
**Prereq:** Open to all students by audition  
Concert choir specializing in performance of advanced music literature, Renaissance through contemporary. Campus concerts, annual spring tour.

MUSIC 181: Symphony Orchestra  
(0-4) Cr. 1. Repeatable. F.S.  
**Prereq:** Open to all students by audition  
Reading, preparation, and performance of standard repertoire. Five or six concerts annually plus occasional off-campus appearances.

N S 111: Introduction to Naval Science  
(3-0) Cr. 3. F.  
Introduction to the organization, regulations, and capabilities of the US Navy, with emphasis on mission and principal warfare components.

NREM 120: Introduction to Renewable Resources  
(Cross-listed with AGRON, ENV S). (3-0) Cr. 3. F.S.  
Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

P R 220: Principles of Public Relations  
(3-0) Cr. 3.  
Introduction to public relations in business, government and non-profit organizations; functions, processes, and management; ethics, public opinion and theory.

PHIL 201: Introduction to Philosophy  
(3-0) Cr. 3. F.S.SS.  
It has been rumored that the unexamined life is not worth living. Philosophy is an attempt to begin examining life by considering such questions as: What makes us human? What is the world ultimately like? How should we relate to other people? Is there a god? How can we know anything about these questions? Understanding questions of this kind and proposed answers to them is what this course is all about.

PHIL 206: Introduction to Logic and Scientific Reasoning  
(3-0) Cr. 3. F.  
Basic principles of critical reasoning and argument evaluation. A consideration of basic forms of argumentation in science and everyday life. Application to contemporary issues and controversies.
PHIL 207: Introduction to Symbolic Logic  
(Cross-listed with LING). (3-0) Cr. 3. F.S.  
Introduction to fundamental logical concepts and logical symbolism.  
Development of natural deduction through first order predicate logic  
with identity. Applications to arguments in ordinary English and to  
philosophical issues. Linguistics majors should take LING/PHEL 207 as  
early as possible.

PHIL 230: Moral Theory and Practice  
(3-0) Cr. 3. F.S.S.  
Investigation of moral issues in the context of major ethical theories of  
value and obligation; e.g., punishment, abortion, economic justice, job  
discrimination, world hunger, and sexual morality. Emphasis on critical  
reasoning and argument analysis.

PHIL 235: Ethical Issues in a Diverse Society  
(3-0) Cr. 3. F.S.  
This course will examine a range of arguments on diversity issues. Topics  
will include: the social status of women, the moral status of sexuality and  
homosexuality, the nature and role of racism in contemporary society, the  
relationship between biology, gender roles and social status, and various  
proposals for change from a variety of political perspectives.  
Meets U.S. Diversity Requirement

PHYS 050: Preparation for Introductory Physics  
Cr. 0. F.S.  
**Prereq:** 1 year high school algebra  
An in-depth active learning experience designed to impart the  
fundamental concepts and principles of physics, with an emphasis on  
applied mathematical techniques and logical thinking. For students  
intending to enroll in classical physics (PHYS 231/232) who have not  
taken high school physics, who have not had a high school college  
preparatory physics course, or who need a review of physics problem  
solving and physics concepts. Credit for Phys 50 does not count toward  
graduation.

PHYS 101: Physics for the Nonscientist  
(3-0) Cr. 3. F.S.  
Survey of the principal areas of both classical and modern physics.  
Emphasis on the nature of the physical universe and the application of  
physical principles to life in the modern world. Not suitable to meet a  
general physics requirement for natural science majors.

PHYS 115: Physics for the Life Sciences  
(4-0) Cr. 4. F.S.  
**Prereq:** high school: 1 1/2 yr. algebra, 1 yr. geometry, 1 semester trigonometry  
Emphasis on basic physics principles applied to biological problems.  
Topics include mechanics, fluids, therodynamics, heat, light, sound,  
electricity and magnetism. A coordinated laboratory, Physics 115  
laboratory is available.

PHYS 131: General Physics I  
(4-0) Cr. 4. F.S.S.  
**Prereq:** 1 1/2 years of high school algebra, 1 year of geometry, 1 semester of  
trigonometry  
General background in physical concepts, principles, and methods  
for those who do not plan advanced study in physics or engineering.  
Mechanics, fluids, heat and thermodynamics, vibrations, waves, sound.

PHYS 131L: General Physics I Laboratory  
(0-2) Cr. 1. F.S.S.  
**Prereq:** Phys 131  
Laboratory experiments in elementary kinematics, work and energy,  
conservation laws, rotational motion, waves and fluids.

PHYS 132: General Physics II  
(4-0) Cr. 4. F.S.S.  
**Prereq:** Phys 131  
General background in physical concepts, principles, and methods  
for those who do not plan advanced study in physics or engineering.  
Electricity and magnetism, ray and wave optics, topics in modern physics.

PHYS 132L: General Physics II Laboratory  
(0-2) Cr. 1. F.S.S.  
**Prereq:** Credit or enrollment in PHYS 132.  
Laboratory experiments in Electricity and Magnetism, Wave and Optics.

PHYS 198: Physics of Music  
(2-2) Cr. 3. F.  
Introductory level course on sound for nonphysics majors. Properties of  
pure tones and harmonics; human perception of sound; room acoustics;  
scales; production, and analysis of musical by voice, string, woodwind,  
brass, and percussion instruments. Not suitable to meet a general  
physics requirement for natural science majors

PHYS 231: Introduction to Classical Physics I  
(4-0) Cr. 4. F.S.S.  
**Prereq:** Proficiency in algebra, trigonometry, vector manipulation, and topics  
covered in MATH 165, and credit or enrollment in MATH 166.  
For engineering and science majors. 3 hours of lecture each week  
plus 3 recitations every two weeks. Elementary mechanics including  
kinematics and dynamics of particles, work and energy, linear and  
angular momentum, conservation laws, rotational motion, oscillations,  
gravitation. Heat, thermodynamics, kinetic theory of gases; waves and  
sound.
PHYS 231L: Introduction to Classical Physics I Laboratory
Cr. 1. F.S.
Prereq: Proficiency in algebra, trigonometry, vector manipulation, and topics covered in MATH 165, and credit or enrollment in MATH 166. Credit of enrollment in PHYS 231.
Laboratory experiments in elementary kinematics, work and energy, conservation laws, and rotational motion.

PHYS 232: Introduction to Classical Physics II
(4-0) Cr. 4. F.S.SS.
Prereq: PHYS 231 or PHYS 241, MATH 166
3 hours of lecture each week plus 1 recitation each week. Fluid dynamics. Electric forces and fields. Electrical currents; DC circuits. Magnetic forces and fields; LR, LC, LCR circuits; Maxwell's equations; wave optics.

PHYS 232L: Introduction to Classical Physics II Laboratory
(0-2) Cr. 1. F.S.SS.
Prereq: Credit or enrollment in PHYS 232.
Laboratory experiments in fluid dynamics, electric forces and fields, electrical currents, DC circuits, magnetic forces and fields, and wave optics.

PHYS 241: Principles and Symmetries in Classical Physics I
(4.5-1) Cr. 5. F.
Prereq: Proficiency in algebra, trigonometry, vector manipulation, and topics covered in MATH 165, and credit or enrollment in MATH 166.
Covers all of mechanics; Kinematics and dynamics of particles, work and energy, linear and angular momentum, conservation laws, rotational motion, oscillations, gravitation, and extremum principles. Topics in kinetic theory, thermodynamics, waves and sound.

POL S 111: Introduction to American Government
(3-0) Cr. 3. F.S.SS.
Fundamentals of American democracy; constitutionalism; federalism; rights and duties of citizens; executive, legislative, and judicial branches of government; elections, public opinion, interest groups, and political parties.

POL S 121: Introduction to International Politics
(3-0) Cr. 3. F.S.
Dynamics of interstate relations pertaining to nationalism, the nation state; peace and war; foreign policy making; the national interest; military capability and strategy; case studies of transnational issues, such as population, food, energy, and terrorism.
Meets International Perspectives Requirement.

POL S 125: Democracy and Dictatorship: Introduction to Comparative Politics
(3-0) Cr. 3. F.S.
Interactions between governments and citizens in countries outside the US. Causes of democracy, dictatorship, and economic and social development.
Meets International Perspectives Requirement.

PSYCH 101: Introduction to Psychology
(3-0) Cr. 3. F.S.SS.
Fundamental psychological concepts derived from the application of the scientific method to the study of behavior and mental processes. Applications of psychology.

PSYCH 102: Laboratory in Introductory Psychology
(0-2) Cr. 1. F.S.
Prereq: Credit or enrollment in PSYCH 101
Laboratory to accompany 101.

PSYCH 111: Orientation to Psychology
Cr. 1. F.S.
Program requirements and degree/career options. Required of psychology majors. Offered on a satisfactory-fail basis only.

PSYCH 131: Academic Learning Skills
(1-0) Cr. 1. F.S.
Evidence-based approach to learning and applying academic skills such as time management, note-taking, reading, test preparation, goal setting and motivation, and well-being. Hybrid course structured in a team-based learning format.

PSYCH 230: Developmental Psychology
(3-0) Cr. 3. F.S.SS.
Life-span development of physical traits, cognition, intelligence, language, social and emotional behavior, personality, and adjustment.

PSYCH 250: Psychology of the Workplace
(3-0) Cr. 3.
Survey of theories and research methods of psychology applied to the workplace. Consideration of employee selection, training, performance evaluation, leadership, work groups, employee motivation, job attitudes and behaviors, organizational culture, organizational development, human factors, and job design from the scientist-practitioner approach.

PSYCH 280: Social Psychology
(3-0) Cr. 3. F.S.SS.
Individual human behavior in social contexts. Emphasis on social judgments and decisions, attitudes, perceptions of others, social influence, aggression, stereotypes, and helping.
RELIG 205: World Religions
(Cross-listed with WLC). (3-0) Cr. 3. F.S.SS.
An introduction to religious studies – the academic study of religion.
Religions from around the world will be discussed, including their myths, rituals, beliefs, values, and social forms.
Meets International Perspectives Requirement.

RELIG 210: Religion in America
(3-0) Cr. 3. F.S.SS.
Introductory study of the major beliefs, practices, and institutions of American Judaism, Catholicism, Protestantism, and Islam with emphasis on the diversity of religion in America, and attention to issues of gender, race, and class.
Meets U.S. Diversity Requirement

RELIG 220: Introduction to the Bible
(3-0) Cr. 3. F.S.
Basic overview of the contents of the Old and New Testament in light of their ancient socio-historical background, and with attention to a variety of interpretations and relevance to modern American society.

RELIG 332: Catholicism
(3-0) Cr. 3. F.
An explanation of the beliefs, spirit, and practices of Roman Catholicism, including its understanding of God, sacramentality, the human person, and community, and its relationship to other forms of Christianity and other world religions.

RUS 101: Introduction to Russian Language and Culture I
(4-0) Cr. 4. F.
Introduction to the Russian language (focusing on the development of speaking, listening, reading and writing skills) and Russian culture.

RUS 201: Intermediate Russian I
(4-0) Cr. 4. F.
Prereq: RUS 102
Thorough review of grammar and growth of vocabulary. Selected readings. Continued use of the four basic skills.
Meets International Perspectives Requirement.

S E 101: Software Engineering Orientation
Cr. R.
Introduction to the procedures, policies, and resources of Iowa State University and the Software Engineering Program. Offered on a satisfactory-fail basis only.

S E 185: Problem Solving in Software Engineering
(2-2) Cr. 3.
Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

SOC 115: Orientation to Sociology
(1-0) Cr. 1. F.S.
Orientation to sociology. A familiarization with University and LAS College requirements and procedures. Occupational tracks and career options open to sociology; introduction to career planning. Recommended during first semester of freshman year, or as soon as possible after transfer into the department. Offered on a satisfactory-fail basis only.

SOC 134: Introduction to Sociology
(3-0) Cr. 3. F.S.SS.
Social interaction and group behavior with emphasis on the scientific study of contemporary U.S. society, including issues relating to socialization, inequality, and changing rural and urban communities. Analysis of relationships among the institutions of family, religion, political participation, work, and leisure.

SOC 219: Sociology of Intimate Relationships
(3-0) Cr. 3. F.S.SS.
Prereq: SOC 134
Analysis of intimate relationships among couples using a sociological perspective. Attention is given to singlehood, dating and courtship; sexuality; mate selection, cohabitation, and marriage. Relationship quality, communication, conflict and dissolution of these types of relationship will also be explored.

SOC 235: Social Problems and American Values
(3-0) Cr. 3. F.S.
Prereq: SOC 134
Sociological concepts, theories and methods to analyze the causes and consequences of social problems. Social problems discussed may include crime, substance abuse, income inequalities, discrimination, poverty, race relations, health care, family issues, and the environment. How American culture and values shape societal conditions, public discourse and policy.
Meets U.S. Diversity Requirement
SOC 241: Youth and Crime
(Cross-listed with CJ). (3-0) Cr. 3. F.
An examination of delinquency that focuses on the relationship between youth as victims and as offenders, social and etiological features of delinquency, the role of the criminal justice system, delinquents' rights, and traditional and alternative ways of dealing with juvenile crime.

SP CM 110: Listening
(3-0) Cr. 3. F.S.
Theory, principles, and competency development in comprehensive, therapeutic, critical, consumer, and appreciative listening. The impact of listening in relationships and partnerships.

SP CM 212: Fundamentals of Public Speaking
(3-0) Cr. 3. F.S.SS.
Theory and practice of basic speech communication principles applied to public speaking. Practice in the preparation and delivery of extemporaneous speeches.

SP CM 216: America Speaks: Great Speakers and Speeches in US History
Cr. 3.
Survey of great speeches examined within their political and cultural contexts. Analysis of the rhetorical strategies of diverse speakers with an emphasis on texts from social movements in the United States.
Meets U.S. Diversity Requirement

SP CM 275: Analysis of Popular Culture Texts
(Cross-listed with ENGL). (3-0) Cr. 3. F.S.
Prereq: Credit in or equivalent of 250
Analysis of how information and entertainment forms persuade and manipulate audiences. Study of several forms that may include newspapers, speeches, television, film, advertising, fiction, and magazines. Special attention to verbal and visual devices.

SP ED 250: Education of the Exceptional Learner
(3-0) Cr. 3. F.S.
Prereq: EDUC 205
An overview of students with diverse learning needs, including students with disabilities, English Learners, students who are at risk, and gifted learners. Emphasis is on early identification; educational programming and implications; and legal foundations. Includes Individual Education Programs, Least Restrictive Environment, Functional Behavioral Assessment, and Behavior Intervention Plans.

SPAN 097: Accelerated Spanish Review
(3-2) Cr. 0. F.S.
Prereq: Two years but less than three years of high-school Spanish
For students who require additional review at the first year (101-102) level. Course components include a compact review of 101 and the essential elements of 102. Course completed with a passing grade fulfills the LAS foreign language requirement. Not recommended for students who wish to continue language at the second year (201-202) level without completing 102.

SPAN 101: Elementary Spanish I
(4-0) Cr. 4. F.S.
A communicative approach to grammar and vocabulary within the context of Hispanic culture. For students whose native language is not Spanish.

SPAN 102: Elementary Spanish II
(4-0) Cr. 4. S.SS.
Prereq: SPAN 101, SPAN 97 or placement by departmental exam
Continuation of Spanish 101. A communicative approach to grammar and vocabulary within the context of Hispanic culture. For students whose native language is not Spanish.
Meets International Perspectives Requirement.

SPAN 201: Intermediate Spanish I
(4-0) Cr. 4. F.
Prereq: SPAN 102 or placement by departmental exam
Intensive review of basic grammar and conversation. For students whose native language is not Spanish. Practice in oral and written communication. Development of fluency with idiomatic expressions. Selected readings on culture and literature.
Meets International Perspectives Requirement.

SPAN 297: Intensive Intermediate Spanish
(4-0) Cr. 4. F.S.
Prereq: 4 years of high school Spanish, two years of Spanish at a community college, Spanish 201, or equivalent by placement
Bridge course between 200- and 300-level Spanish courses that focuses on application of advanced grammatical concepts within the context of Hispanic culture. Accelerated review of SPAN 201 and SPAN 202 designed for students who want to continue at the 300 level. Taught in Spanish for students whose native language is not Spanish.
Meets International Perspectives Requirement.
SPAN 303: Spanish Conversation and Composition
(3-0) Cr. 3. F.S.
Prereq: SPAN 202 or placement by departmental exam
Intensive oral practice and improvement of oral proficiency. Application of specific grammatical concepts for development of conversational and writing skills within the context of Hispanic culture. Taught in Spanish. Meets International Perspectives Requirement.

STAT 101: Principles of Statistics
(3-2) Cr. 4. F.S.SS.
Prereq: 1 1/2 years of high school algebra
Statistical concepts in modern society; descriptive statistics and graphical displays of data; the normal distribution; data collection (sampling and designing experiments); elementary probability; elements of statistical inference; estimation and hypothesis testing; linear regression and correlation; contingency tables. Credit for only one of the following courses may be applied toward graduation: STAT 101, STAT 104, STAT 105, STAT 201, or STAT 226.

STAT 104: Introduction to Statistics
(2-2) Cr. 3. F.S.SS.
Prereq: 1 1/2 years of high school algebra
Statistical concepts and their use in science; collecting, organizing and drawing conclusions from data; elementary probability; binomial and normal distributions; regression; estimation and hypothesis testing. For students in the agricultural and biological sciences. Credit for only one of the following courses may be applied toward graduation: STAT 101, STAT 104, STAT 105, STAT 201, or STAT 226.

THTRE 106: Introduction to the Performing Arts
(3-0) Cr. 3. F.S.SS.
An audience oriented, broad-based, survey of the performing arts which emphasizes theatre and includes segments on television, radio and podcasts, film, dance, and music.

THTRE 110: Theatre and Society
(3-0) Cr. 3. F.S.
An introduction to Theatre focusing on its relationship with society throughout history.

THTRE 251: Acting Foundations
(3-0) Cr. 3. F.S.
Theory and practice in fundamentals of acting.

TSM 115: Solving Technology Problems
(2-2) Cr. 3. F.S.
Prereq: Credit or enrollment for credit in MATH 140 or higher
Solving technology problems using modern hardware and software tools for data-driven solutions. Problem solving cycle, unit conversion, unit factor method, SI and engineering units, significant figures, data collecting and cleaning, error analysis, data visualization, curve fitting, and computer coding fundamentals (data types, flow control, I/O handling, visualization, debugging). Strong emphasis on critical thinking, systematic problem solving, and effective communication.

TSM 116: Introduction to Design in Technology
(2-2) Cr. 3. F.S.
Use of parametric solid modeling software to create three dimensional solid models and document parts and assemblies. Includes national and international standards for documentation, design projects, and teamwork. Rapid prototyping design creation, 3D printing, assemblies, rendering, and detailing technical drawings.

U ST 104: Personal Career Development
(2-0) Cr. 2. F.S.
Comprehensive approach to personal career development providing students with the skills and structure to make informed choices about their major and career path. Self-exploration of interests, skills, values, and personality as related to the world of work using a variety of techniques; exploration of majors and occupations; model for major and career decision-making and career goal implementation; exposure to effective job search and interviewing skills and resources.

US LS 211: Introduction to U.S. Latino/a Studies
(3-0) Cr. 3. F.S.
History and current lives of the Latino/a peoples in the United States, including Mexican, Cuban, Puerto Rican, Dominican, and South and Central Americans, as well as information specific to Iowa Latino/as, will be covered. Through readings, class discussions, writing assignments, and guest speakers, students will acquire accurate information and a solid understanding of the US Latino/a population and cultural perspectives. Elements of Latino/a culture to be covered include historical, sociological, educational, psychological, economic, and political facets.
Meets U.S. Diversity Requirement

WGS 160: Gender Justice
(2-0) Cr. 1. F.S.
Half semester course. Examines the socialization process in the United States and how our perspectives are formed. An introduction to patriarchy, sexism, and ally development are explored. Skills to enhance communication and understanding among women and men will be developed. Offered on a satisfactory-fail basis only.
Meets U.S. Diversity Requirement
**WGS 201: Introduction to Women's and Gender Studies**
(3-0) Cr. 3.
Introduction to the interdisciplinary field of Women's and Gender Studies. Contemporary status of women in the U.S. and worldwide from social, economic, historical, political, philosophical and literary perspectives. Analysis of intersection of gender, race, class, and sexuality. Subject matter includes work, health, sexuality, and violence. Foundation for the other courses in the program.
Meets U.S. Diversity Requirement

**W F S 278: Introduction to Global Film**
(3-0) Cr. 3. F.
Introduction to the cinema of non-English speaking regions and cultures of the world through representative subtitled films, lectures, and readings. Topics vary according to faculty interest. Emphasis on selected national cinemas and film as a mode of cultural expression as well as on diverse cultural contexts of cinema.
Meets International Perspectives Requirement.

**WLC 210: Introduction to Asian American Studies**
(Cross-listed with ANTHR). (3-0) Cr. 3.
An interdisciplinary and chronological examination of Asian American immigration experiences from the early 19th century to the 21st century. Focus on how these immigration histories are accompanied by changing racial constructions. Discussion of racial stereotyping, the model minority myth, identity development, and efforts for social justice.
Meets U.S. Diversity Requirement

The following experimental courses (courses that are new and not yet published in the catalog) are also available:

**JL MC 140X. Identity, Diversity and the Media.** (3-0) Cr. 3. Understand perspectives and biases within journalism, advertising and public relations content, including content shared through social-media platforms. Analyze content generated by others. Topics include media literacy, source evaluation, portrayals of diverse groups, identification of diverse sources and strategies for reducing bias in media work.
Meets U.S. Diversity Requirement.

**U ST 123X. Introduction to Iowa State University.** (1-0) Cr. R. Foundation of knowledge, skills, and expectations all students need to navigate the university. Resources for academic success, integration into ISU community and culture.
Satisfactory-Fail.

**WLC 101X. Becoming a Global Professional.** (1-0) Cr. 1. Introduction to the fields of study, faculty and degree programs in World Languages and Cultures. Focus on guidance for early career exploration and planning in languages and cultures with an emphasis on global professions.

**Credits**
The academic value of each course is stated in semester credits. Each credit is normally earned by attending one (50-minute) hour of lecture or recitation per week for the entire semester, or by attending a laboratory or studio period of two or three hours per week. As a guideline, undergraduate students typically will be expected to spend two hours in preparation outside of class for each lecture or recitation hour; additional outside work may be required for laboratory or studio classes.

**Contact Hours**
Each course states the number of semester credits assigned to the course, preceded in parentheses by the number of hours in class (contact hours) expected of the student. The first of the two contact-hour numbers indicates the number of lecture or recitation class hours per week for the semester. The second is the number of laboratory or studio hours required per week. Laboratory and studio hours may include some time devoted to lectures and recitations. For example, COM S 227 Introduction to Object-oriented Programming is listed as (3-2) Cr. 4. In that case, the course is 4 semester credits, 3 hours of lecture and two hours of laboratory each week.

**Semester Offering**
The expected term a course is to be offered is indicated by the abbreviations F (Fall) S (Spring) SS (Summer). The notations are for planning purposes and do not guarantee a course will be offered in a particular term. Always check the Schedule of Classes (http://classes.iastate.edu) for availability and specific offering times.
PLAN OF STUDY - SOAR IN 4

Four Year Graduation Guarantee

Iowa State University's Soar in 4: Four-Year Graduation Guarantee provides the opportunity for students to take a proactive approach towards completing their undergraduate degree in four years (or eight semesters). Through careful planning with their academic advisors, students can complement their undergraduate degree with experiences such as study abroad, internship, and service learning. By graduating in four years, students can reduce their tuition costs and accelerate their entry into the job market or advanced education compared to students who take more than eight semesters to graduate. The program encourages students to work collaboratively with their academic advisor to make strategic academic decisions about which courses to take each semester.

Students wanting to graduate in four years under the Soar in 4: Four-Year Graduation Guarantee are expected to:

- Keep in close contact with their Iowa State academic advisor, who will guide students’ academic decisions and keep students up-to-date with university policies and procedures.
- Take required courses at the times they are available.
- Maintain student registration at ISU during off-campus experiences.
- Register for classes promptly and monitor academic progress on a regular basis by reviewing the degree audit with their advisor.

Iowa State University will provide the academic advising services and degree-audit mechanisms to assist students in accurately monitoring progress toward graduation. ISU is also responsible for providing class space in the courses required for the student’s respective major in order to complete a bachelor’s degree within eight consecutive semesters.

Additional information about the Four-Year Graduation Guarantee can be found at:

http://www.provost.iastate.edu/academic-programs/soarin4

Four-year (eight-semester) templates for ISU programs of study

Iowa State University offers over 100 majors in six undergraduate colleges. All but two programs, architecture and landscape architecture, may be completed in four years. ISU’s bachelor degree programs require from 120 to 144 credits; therefore, students must average between 15 and 18 credits per semester. To assist students in creating their own personal four-year academic plans, eight-semester templates are provided for all programs of studies covered by the Soar in 4 program.

COLLEGES AND CURRICULA

ACADEMIC PROGRAM DEFINITIONS

• Program - administrative infrastructure supporting the curriculum.
• Curriculum - the requirements for a major, certificate, or minor.
• Major - subject area of study that results in a named baccalaureate, masters, or doctoral degree upon completion of a set of requirements. A major appears on the academic transcript.
• Secondary major - a major that can only be earned concurrent with a primary major. A secondary major appears on the academic transcript.
• Option - credits within an undergraduate major in which students choose coursework focused on a subset of the subject area of study. The remainder of the degree requirements are common to all students in the major. Options have also been called specializations, tracks, emphasis areas, focus areas, etc. An option does not appear on the academic transcript.
• Certificate - an academic credential in a focused area of study. A certificate appears on the academic transcript and may be earned concurrent with a degree or on its own.
• Minor - an academic area of emphasis that is in addition to a major. A minor appears on the academic transcript and must be earned concurrent with a degree.

UNIVERSITY REQUIREMENTS

Undergraduate Degree Requirements

Iowa State University offers a wide variety of undergraduate majors housed in six colleges. The requirements for all majors include the following university-wide requirements for graduation:

• Communication Proficiency
• U.S. Diversity
• International Perspectives
• LIB 160 Introduction to College Level Research
• Minimum of 120-semester credits
• Cumulative grade point average of at least 2.00 in all coursework taken at ISU

See Degree Planning for university-wide requirements for the bachelor’s degree.

COLLEGES

• College of Agriculture and Life Sciences
• Ivy College of Business
• College of Design
• College of Engineering

• College of Human Sciences
• College of Liberal Arts and Sciences

The College of Veterinary Medicine offers the Doctor of Veterinary Medicine degree.

For a listing of the majors offered by the Graduate College, see the Graduate Programs list in this catalog.

UNDERGRADUATE MAJORS

See Degree Planning for university-wide requirements for the bachelor’s degree.

Major - subject area of study that results in a named baccalaureate, masters, or doctoral degree upon completion of a set of requirements. A major appears on the academic transcript.

Secondary major - a major that can only be earned in conjunction with a primary major. A secondary major appears on the academic transcript.

Option - credits within an undergraduate major in which students choose coursework focused on a subset of the subject area of study. The remainder of the degree requirements are common to all students in the major. Options have also been called specializations, tracks, emphasis areas, focus areas, etc. An option does not appear on the academic transcript.

Undergraduate Secondary Majors

See Degree Planning for university-wide requirements for the bachelor’s degree.

Secondary major - a major that can only be earned in conjunction with a primary major. A secondary major appears on the academic transcript.

  • Education Secondary
  • Environmental Studies
  • Interdisciplinary Design
  • International Agriculture
  • International Business
  • Interdisciplinary Studies

  • Seed Science (http://catalog.iastate.edu/interdisciplinaryprograms/undergraduate/seedscience/)

UNDERGRADUATE CERTIFICATES

See Degree Planning for university-wide requirements for an undergraduate certificate.

Certificate - an academic credential in a focused area of study. A certificate appears on the academic transcript and may be earned concurrently with a degree or on its own.

  • Actuarial Science
  • Beef Cattle Production Management
  • Computing Applications
  • Dairy Cattle Production Management
  • Data Science
  • Equine Science and Management
  • Health Coach
  • Integrated Studio Arts
  • Latin American Studies
  • Leadership Studies
  • Merchandising (*)
  • Occupational Safety
  • Poultry Production Management
  • Professional Sales
  • Science Communication
  • Soil Science (*)
  • Swine Production Management

Certificates may be earned at the same time as an ISU baccalaureate degree or after the completion of a baccalaureate degree from any accredited institution. Those marked with a (*) may also be earned after the completion of an associate of arts (AA) or associate of science (AS) degree from any accredited institution.

Iowa State University also offers certificates from the Graduate College.

UNDERGRADUATE MINORS

See Degree Planning for university-wide requirements for an undergraduate minor.

Minor - an academic area of emphasis that is in addition to a major. A minor appears on the academic transcript and must be earned in conjunction with a degree.

**PRE-PROFESSIONAL STUDY**

Requirements for admission to most professional academic programs can be met by study at Iowa State University. Pre-professional programs such as pre-law or pre-med are not degree-granting majors, but rather tracks for students who plan to attend professional school (e.g., dental, medical, optometry, physical therapy, law, or veterinary medicine) after their undergraduate studies. Students can major in any field, and they will work with an advisor who helps with course sequencing and academic preparation for application to professional schools.

For more details, explore the Pre-professional section of the catalog and explore the links below.

**Tracks**

- Pre-Health & Pre-Medicine (https://pre-health.las.iastate.edu/)
  - Dentistry (https://pre-health.las.iastate.edu/health-professions/dentistry/)
  - Human Medicine (https://pre-health.las.iastate.edu/health-professions/human-medicine/)
  - Optometry (https://pre-health.las.iastate.edu/health-professions/optometry/)
  - Pharmacy (https://pre-health.las.iastate.edu/health-professions/pharmacy/)
  - Physical Therapy (https://pre-health.las.iastate.edu/health-professions/physical-therapy/)
  - Physician’s Assistant (https://pre-health.las.iastate.edu/health-professions/physicians-assistant/)
- Pre-Law
- Pre-Veterinary Medicine
Students enrolled in the College of Agriculture and Life Sciences receive a broad-based education that includes: communications, biological, physical, and social sciences, humanities, and technical subject matter. Graduates of the College are prepared for diverse career opportunities because of the well-balanced education they have received. Opportunities for graduates of the College of Agriculture and Life Sciences include: agribusiness and industry, production agriculture, biological and environmental sciences, value-added processing, natural resource management, rural development, public agencies, education, animal and human health professions, graduate studies and professional schools.

**Advising**

Each student in the College of Agriculture and Life Sciences works closely with an academic advisor who is associated with the major in which the student is enrolled.

The advisors assist students in making personal adjustments to university life, offer suggestions on academic and co-curricular choices, and provide information on career choices. Advisors make a special effort to adjust course schedules in accordance with students' interests and capabilities.

All entering students are strongly encouraged to participate in the summer orientation program in which they will have the opportunity to meet and work with academic advisors in planning their first semester schedule of classes.

A student may wish to prepare for admission to a professional program such as law, medicine, or veterinary medicine while pursuing a bachelor of science degree in the College of Agriculture and Life Sciences. This may be accomplished through several majors; however, it is recommended that the student work closely with an academic advisor.

**Degree Requirements FOR ALL CALS MAJORS**

All undergraduate majors in the College of Agriculture and Life Sciences (CALS) lead to a bachelor of science degree.

### High School Preparation

Requirements for students entering from high school or transferring with less than 24 college credits into the College of Agriculture and Life Sciences include four years of English; three years of mathematics which must include one year each of algebra, geometry, and advanced algebra; three years of science which must include one year each of Biology and chemistry, or Biology and physics, or chemistry and physics; and two years of social studies. No foreign language is required for admission to the College of Agriculture and Life Sciences.

### College Requirements

To graduate with a degree from the College of Agriculture and Life Sciences a student must complete, while at Iowa State University, a minimum of 18 credits from the College's departmental offerings, program offerings, and cross-listed program offerings. Twelve or more of those 18 credits must be 300-level or above. Some majors within the College may have more restrictive requirements.

Each major has specific degree requirements for graduation based on the major and college student learning outcomes. College of Agriculture and Life Sciences course requirements for the four areas listed below provide the foundation for successful achievement of both major and college student learning outcomes.

The College of Agriculture and Life Sciences course requirements for all majors are:

<table>
<thead>
<tr>
<th>Interpersonal and public communication skills</th>
<th>10 credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>6 credits of English composition with grades of C or better</td>
<td></td>
</tr>
<tr>
<td>3 credits of speech fundamentals with grades of C or better</td>
<td></td>
</tr>
<tr>
<td>1 credit of LIB 160 Introduction to College Level Research</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Mathematical, physical, and life sciences from college-approved lists</th>
<th>17 credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>3 credits of mathematics</td>
<td></td>
</tr>
<tr>
<td>3 credits of statistics</td>
<td></td>
</tr>
<tr>
<td>5 credits of physical science (e.g., chemistry, geological and atmospheric sciences, physics)</td>
<td></td>
</tr>
<tr>
<td>6 credits of life sciences including BIOL 101 Introductory Biology, or BIOL 211 Principles of Biology I, or BIOL 212 Principles of Biology II, or BIOL 251 Biological Processes in the Environment and 3 additional credits of life sciences</td>
<td></td>
</tr>
</tbody>
</table>
Personal development from approved lists 15 credits

- 3 credits of ethics (college list)
- 3 credits of humanities (college list)
- 3 credits of social sciences (college list)
- 3 credits of U.S. diversity (university list)
- 3 credits of international perspectives (university list)

Students pursuing a primary major in another college and taking a second major in the College of Agriculture and Life Sciences must fulfill the core course requirements of the College of Agriculture and Life Sciences, and all the requirements of the second major.

**Student Learning Outcomes**

All students graduating with majors within the College of Agriculture and Life Sciences are expected to be able to do the following (college-level outcomes) at the time of graduation:

**Professional, Interpersonal and Cross-cultural Communications**
- Speak and write clearly and persuasively.
- Prepare effective visual, oral, written and electronic presentations.
- Effectively read, listen, observe and reflect.

**Problem-Solving/Critical Thinking**
- Apply a holistic approach to solving complex issue-laden problems.
- Apply a rational and objective process to:
  - Distinguish verifiable facts from value claims,
  - Determine the accuracy of statements,
  - Identify assumptions and detect bias,
  - Distinguish relevant from irrelevant information,
  - Prioritize needs.
- Summarize, analyze, and interpret research data and policy issues.

**Leadership**
- Organize, facilitate, and participate effectively in a group, team, or organization.
- Define a problem or opportunity, implement an action plan, work towards a goal and justify actions taken.

**Entrepreneurship**
- Demonstrate innovativeness and creativity.
- Identify and pursue opportunities that produce value.
- Be persistent in shepherding necessary resources and managing associated risk to facilitate change.

**Life-long learning**
- Articulate how continued learning after graduation will enrich their lives.
- Identify and participate in new areas for learning beyond the classroom and after graduation.

**Ethics**
- Define and assess their ethical perspective, moral responsibility, and values.
- Identify and critically evaluate contemporary ethical and moral issues in professional and private life.

**Environmental Awareness**
- Explain the physical and biological interactions within ecosystems.
- Explain how human activities impact the environment and how societies are affected by environmental change.

**International/Multi-Cultural Awareness (University Outcomes)**
- **U.S. Diversity** – Students should achieve three of the following outcomes:
  - Identify the experiences and contributions of underrepresented or marginalized groups and how they have shaped the history and culture of the United States;
  - Understand the analytical concepts of culture, ethnicity, race, gender, sexuality and/or religion and be able to apply these concepts to an analysis of the United States;
  - Analyze systemic oppression and personal prejudice and their impact on marginalized communities and the broad U.S. society; and
  - Evaluate important aspects of diversity, equity and inclusion so they can live, work and collaborate with others in the 21st century United States.
- **International Perspectives** – Students should achieve two of the following outcomes:
  - Analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview;
  - Describe and analyze how cultures and societies around the world are formed, are sustained, and evolve;
  - Analyze and evaluate the influence of global issues in their own lives;
  - Describe the values and perspectives of cultures other than their own and discuss how they influence individuals’ perceptions of global issues and/or events; and
  - Communicate competently in a second language.

In addition to the College level learning outcomes, each major within the college has additional discipline-specific outcomes that apply to graduates of that major.

**Electives**

Students use electives in addition to degree requirements to broaden their education or to strengthen an area of specialization. Electives may be used to meet the requirements for a double major (see statement on double majors in this catalog).
Other Requirements

- Those who wish to change their major, or who decide to graduate with a double major, must be enrolled for the last two semesters in the major in which they expect to graduate.
- Students in ROTC may apply ROTC credits toward elective requirements. No more than 9 credits of 490 coursework from any Iowa State University major may be applied toward graduation, although some individual majors may establish a more restrictive use of 490 credits toward fulfillment of graduation requirements.

Graduate Study

Graduate study in agriculture and life sciences is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Various departments in the College of Agriculture and Life Sciences also participate in the following graduate-level interdepartmental offerings:

- Ecology and Evolutionary Biology
- Environmental Science
- Genetics and Genomics
- Immunobiology
- Microbiology
- Molecular, Cellular, and Developmental Biology
- Neuroscience
- Nutritional Sciences
- Plant Biology
- Seed Technology and Business
- Sustainable Agriculture
- Technology and Social Change (interdepartmental minor)
- Toxicology

Departments in the College

Departments are the administrative units that offer undergraduate and graduate majors, minors and certificates in addition to their efforts in research, outreach and service. These are the departments in the College of Agriculture and Life Sciences:

- Agricultural and Biosystems Engineering (joint with the College of Engineering)
- Agricultural Education and Studies
- Agronomy
- Animal Science
- Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology (joint with the College of Liberal Arts and Sciences)
- Ecology, Evolution, and Organismal Biology (joint with the College of Liberal Arts and Sciences)
- Economics (joint with the College of Liberal Arts and Sciences)
- Entomology
- Food Science and Human Nutrition (joint with the College of Human Sciences)
- Genetics, Development and Cell Biology (joint with the College of Liberal Arts and Sciences)
- Horticulture
- Natural Resource Ecology and Management
- Plant Pathology and Microbiology
- Sociology and Criminal Justice (joint with the College of Liberal Arts and Sciences)
- Statistics (joint with the College of Liberal Arts and Sciences)

UNDERGRADUATE Majors, MINORS and CERTIFICATES

An undergraduate major is a subject area of study that results in a named baccalaureate degree upon completion of a set of requirements. All majors in the College of Agriculture and Life Sciences result in a Bachelor of Science degree.

A student has many majors from which to choose. Each major is unique although some courses are common across majors in the first two years. This is helpful to students in that they may transfer from one major to another before the second year with little loss of credits.

Options within a major further define some majors and specify certain required coursework. All majors are designed to help students achieve the learning outcomes and succeed in their chosen professions.

Primary Majors

Agricultural Business
Agricultural and Life Sciences Education
Agricultural and Rural Policy Studies
Agricultural Studies
Agricultural Systems Technology
Agronomy
Animal Ecology
Animal Science
Biochemistry
Biology
Culinary Food Science
Dairy Science
Diet and Exercise
Dietetics
Environmental Science
Food Science
Forestry
Genetics
Global Resource Systems
Horticulture
Industrial Technology
Microbiology
Nursing
Nutritional Science

Secondary Majors*
Environmental Studies
International Agriculture
Seed Science (http://catalog.iastate.edu/interdisciplinaryprograms/undergraduate/seedscience/)

*A secondary major must be taken in conjunction with a primary major.

Minors
An undergraduate minor is an academic area of emphasis in addition to a major consisting of at least 15 credits. It must be earned concurrent with a major.

Agricultural Business
Agricultural and Life Sciences Education
Agricultural Systems Technology
Agronomy
Animal Ecology
Animal Science
Biochemistry
Biology
Culinary Food Science
Entrepreneurial Studies*
Environmental Studies
Feed Technology*
Food and Society
Food Safety*
Food Science
Forestry
Genetics
Global Health*
Horticulture
Industrial Technology
Insect Science
International Agriculture
Landscape Management
Learning and Leadership Sciences*
Meat Science
Microbiology
Nutrition
Sustainability*

*The College of Agriculture and Life Sciences participates in these interdepartmental minors.

Certificates
An undergraduate certificate is an academic credential in a focused area of study consisting of at least 20 credits. It may be earned concurrent with a major or on its own.

Beef Cattle Production Management
Equine Science and Management
Poultry Production Management
Swine Production Management
Occupational Safety

Special Programs
Agriculture Exploration
Agriculture Exploration is a starting place for students who wish to pursue careers in the life sciences, food science, natural resources, production agriculture, business, or communications but who are unsure of which majors to choose. Students entering this program will be advised in the Student Services Office until they select their majors.

Preveterinary Medicine
Students in the College of Agriculture and Life Sciences may complete the requirements for admission to the College of Veterinary Medicine by enrolling in any major within the college. Because a solid foundation in the sciences is basic to the program in veterinary medicine, those majors that emphasize the sciences are usually more compatible with veterinary medicine.

New students direct from high school who are undecided about choice of major may enroll as a general preveterinary studies (Gen PV) student. These students will also enroll in an orientation course, which describes the various college majors. By the end of their first semester, a Gen PV student must select a major. Transfer students, however, must select a major prior to enrolling in their first semester classes.

Enrollment as a Gen PV student does not guarantee admission into the College of Veterinary Medicine (veterinary school). See the College of Veterinary Medicine section of this catalog for specific admissions requirements.

Students accepted into the College of Veterinary Medicine without a bachelor of science degree have an opportunity, with careful planning, to complete the requirements for a bachelor of science degree in an individual curriculum within the College of Agriculture and Life Sciences after admission into the College of Veterinary Medicine. This may be done by completing the prescribed course of study established by an individual major. Students also may meet degree requirements of an individual major through the College of Agriculture and Life Sciences
Honors Program
The College of Agriculture and Life Sciences Honors Program provides an opportunity for students of high ability to maximize their educational experience by individualizing their program of study. (See statement on Honors Program in the Colleges and Curricula section of this catalog). For more information, contact the chair of the College of Agriculture and Life Sciences Honors Committee, or a department Honors contact person.

Off-Campus Programs
Online courses, certificates, and graduate programs from the College of Agriculture and Life Sciences are designed for working professionals and recent graduates alike giving students anywhere in the world the opportunity to enhance their careers and advancing in their profession. Students learn from the same faculty and in the same classes as our resident students. Start your adventure with one of our online certificates or programs to advance your career.

- Master’s Programs: Agricultural Education, Agronomy, Plant Breeding, Seed Technology and Business
- Graduate Certificates: Agronomy, Biochemistry, Food Safety and Defense, Meat Science, Seed Science and Technology, Seed Business Management
- Undergraduate BS: Agricultural Studies Hybrid Online/Campus
- Undergraduate Certificates: Swine Science, Occupational Safety

Study Abroad and International Travel Opportunities
Agriculture and life sciences are part of a highly interconnected global system; decisions made in one sector have profound impacts worldwide. It is important for students to develop an understanding and appreciation for the global system and the role that U.S. agriculture plays in providing a safe and predictable food supply for a growing world population. The College of Agriculture and Life Sciences provides study abroad and international internship opportunities on all seven continents. Students can enroll in CALS travel courses, spend a semester or more at a partner university abroad or develop an independent academic opportunity like research, service learning or working abroad. Travel ranges from two weeks to a year and students travel to over 30 countries annually. For additional information, contact the Office of Global Programs in the College of Agriculture and Life Sciences.

Internships and Cooperative Education Programs
Practical work experience can provide a unique learning opportunity that complements academic coursework. This experience is provided through internships or cooperative education programs. For additional information, contact a departmental advisor or internship coordinator.

Agricultural Business
The Department of Economics offers coursework for a Bachelor of Science degree in Agricultural Business. The major in Agricultural Business prepares students for advanced studies (e.g., Masters or Ph.D. in Agricultural Economics, Law School, MBA, etc) and for careers in agricultural finance, management in agricultural supply and marketing industries, commodity merchandising and research, business research and management, farm and ranch operations, commercial farm management and appraisal, agricultural sales and marketing, agricultural reporting and public relations, agricultural extension, international activities, and government service. A minor in Agricultural Business is also possible.

Customization of the Agricultural Business major is possible. Students may request to pursue one of three Business Options in Finance, Marketing, or Supply Chain Management. Electing a Business Option does not change the overall requirements of the Agricultural Business major. Eligibility and coursework requirements for Business Options are maintained and approved by the Department of Economics and details are available on the department website.

Student Learning Outcomes
The Department of Economics at Iowa State University has general goals for its Bachelor of Science graduates. These goals are for students to be able to solve problems and think critically, engage in economic reasoning, demonstrate leadership skills, communicate effectively, make ethical decisions, understand the environmental impacts of human activities, meet the challenges of living and working in a culturally diverse and global community, develop a capacity for innovation and creativity, and value the importance of life-long learning. Regarding each of these general goals, there are more specific additional goals, namely:

1. Problem Solving/Critical Thinking:
   a. Distinguish factual statements from opinions or value judgments.
   b. Summarize, analyze, and interpret research data and policy issues.
   c. Distinguish causal relationships from correlations.
   d. Determine the accuracy of statements.
e. Understand the usefulness of abstractions and models.
f. Identify assumptions and detect bias.
g. Critically evaluate their arguments and those of others.
h. Distinguish relevant information from irrelevant information.
i. Establish priorities.
j. Apply a holistic approach to solving complex, issue-laden, problems.

2. Economic Reasoning:
a. Distinguish positive (‘what is’) from normative (‘what should be’) economics.
b. Determine the opportunity cost of alternatives.
c. Apply the concepts of comparative advantage, specialization, and exchange to analyze resource allocation issues.
d. Identify the conditions under which markets allocate resources efficiently or markets fail.
e. Apply marginal economic analysis to solve problems.
f. Conduct comparative static analyses.
g. Pose and test hypotheses.
h. Use scientific methods to identify optimal choices among economic alternatives.
i. Identify decision-makers, objectives, choice variables, incentives, and constraints.
j. Understand how conclusions depend on assumptions.

3. Leadership:
a. Organize, facilitate, and participate effectively in a group, team, or organization.
b. Define a problem or opportunity, implement an action planning process, work toward a goal and justify actions taken.

4. Professional, Interpersonal and Cross-cultural Communications:
a. Communicate economic and business concepts to professionals, organizations, governments, and the general public.
b. Obtain information by accessing electronic or traditional media, listening, or by observation.
c. Read, listen, observe and reflect.
d. Speak and write clearly and persuasively.
e. Prepare and present effective visual, oral, written, and electronic presentations.

5. Ethics:
a. Define and assess their ethical perspectives, sense of moral responsibility, and values.
b. Identify and critically evaluate contemporary ethical and moral issues in professional and private life.

6. Environmental Awareness:
a. Explain the physical and biological interactions within ecosystems.
b. Explain how human activities impact the environment and how societies are affected by environmental change.

7. International/Multi-Cultural Awareness:

U.S. Diversity – Students should achieve two of the following outcomes:
a. Articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues.
b. Analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.
c. Analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.
d. Analyze how cultural diversity and cooperation among social groups affect U.S. society.

International Perspectives – Students should achieve two of the following outcomes:
a. Analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview.
b. Describe and analyze how cultures and societies around the world are formed, are sustained, and evolve.
c. Analyze and evaluate the influence of global issues in their own lives.
d. Describe the values and perspectives of cultures other than their own and discuss how the influence individuals’ perceptions of global issues or events.
e. Communicate competently in a second language.

8. Entrepreneurship:
a. Demonstrate innovation and creativity regardless of context.
b. Identify and pursue opportunities that produce value.
c. Be persistent in shepherding necessary resources and managing associated risk to facilitate change.

9. Life-long Learning:
a. Articulate how continued learning after graduation will enrich their lives.
b. Identify and participate in new areas for learning beyond the classroom and after graduation.

Curriculum in Agricultural Business
The major in Agricultural Business requires a minimum of 120 credits and a 2.00 minimum GPA. Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits. In addition, at most 9 P-NP credits of free electives can be applied toward the degree, and a minimum of 18 credits must be earned from courses taught by the Department of Economics at ISU.

International Perspective (http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/): 3 cr.
3 cr. from approved list.
U.S. Diversity (http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses/): 3 cr.
3 cr. from approved list.

**Communication/Library: 13 cr.**

a. Select six credits from ACCT 285 or any 300-489 ACCT, FIN, MKT, MGMT, MIS, or SCM courses.

b. Students majoring in Economics or adding the Finance Business Option must take STAT 326. Students must take at least 1 STAT course from Iowa State for graduation.

Agricultural Business Minor

The Department of Economics offers a minor in Agricultural Business. The minor requires at least 15 credits, including 6 credits in courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other Department, College, or University requirement. Courses to be included in the minimum of 15 credits include the following:

<table>
<thead>
<tr>
<th>Course</th>

</tr>
</tbody>
</table>

ECON 301 Intermediate Microeconomics 3-4

Three credits of ECON courses from: 230-289, 300-389, 400-489 courses.

See Master of Science or Ph.D. in Agricultural Economics.

Agricultural and Life Sciences Education

OVERVIEW

Administered by the Department of Agricultural Education and Studies

For undergraduate curricula in agricultural and life sciences education, and agricultural studies, leading to the degree of bachelor of science, see College of Agriculture and Life Sciences, Curricula.

The department offers two curricula for students desiring to enter careers in agriculture and related fields. These curricula are agricultural and life sciences education and agricultural studies. The agricultural and life sciences education curriculum prepares persons for careers as agricultural education instructors, and educational specialists for industry, nonprofit organizations, and governmental agencies. The agricultural and life sciences education curriculum has two options, teacher certification and communications. The agricultural studies curriculum has two options, production and management and multidisciplinary. Graduates are prepared for careers in production agriculture and agricultural industry. Graduates of both curricula accept positions in agricultural business, industry, agencies, and production agriculture.

Student Learning Outcomes

Graduates will have a broad base of agricultural knowledge, and will be skilled in decision-making, planning, organizing, presenting, and evaluating information. Through the successful completion of the required coursework, active participation in clubs and organizations, and the acquisition of technical skills and experiences associated with work experiences, internships, and international travel, graduates of our baccalaureate programs meet the university, college, and departmental outcomes in the following nine areas:

1. professional, interpersonal, and cross-cultural communications
2. problem solving and critical thinking
3. leadership
4. entrepreneurship
5. life-long learning
6. ethics
7. environmental awareness
8. U.S. diversity
9. international perspectives.

More information regarding the departmental learning outcomes can be found at www.ageds.iastate.edu/. (http://www.ageds.iastate.edu/)

**Curriculum in Agricultural and Life Sciences Education**

Administered by the Department of Agricultural Education and Studies. Students majoring in Agricultural Education choose between two options: Teacher Certification or Communications.

**Teacher Certification Option**

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA. Teacher certification requires 2.5 GPA at particular points in the program of study, and a minimum grade of C- in selected courses.

**University Requirements:**

Minor - Agricultural and Life Sciences Education

The department offers a minor in agricultural and life sciences education which may be earned by completion of a minimum of 15 credits in agricultural education and studies courses, with a minimum of two courses at the 400 level. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. A minor will not meet state licensure requirements for teaching high school agriculture. Courses that can be taken for a minor are:

| AGEDS 211 Early Field Based Experience | 1       |
| AGEDS 310 Foundations of Agricultural Education Programs | 3       |
| AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences | 3       |
| AGEDS 312 Science With Practice | 3       |
| AGEDS 315 Personal, Professional, and Entrepreneurial Leadership in Agriculture | 3       |
| AGEDS 327 Survey of Agriculture and Life Sciences Communication | 3       |
| AGEDS 388 Agricultural Mechanics Applications | 3       |
| AGEDS 402 Methods of Teaching in Agriculture and Life Sciences | 3       |
| AGEDS 412 Internship in Agricultural Education and Studies | 2-6     |
| AGEDS 414 Developing Agricultural Education Programs in Non-Formal Settings | 2       |
| AGEDS 450 Farm Management and Operation | 3       |
| AGEDS 451 Agricultural Law | 3       |
| AGEDS 461 Technology Transfer and the Role of Agricultural and Extension Education | 3       |
| AGEDS 488 Methods of Teaching Agricultural Mechanics | 3       |
| AGEDS 490 Independent Study in Agricultural Education and Studies | 1-3     |
| AGEDS 496 Agricultural Travel Course | 1-3     |
| AGEDS 499 Undergraduate Research | arr†     |

† Arranged with instructor.

Visit the departmental website at www.AgEds.iastate.edu/. (http://www.AgEds.iastate.edu/.html)
Graduate Study
The department offers the degrees of master of science and doctor of philosophy, with a major in agricultural education; a specialization in agricultural extension education; opportunities for emphasis in international agricultural education; and a minor for students majoring in other curricula. Graduate students who have earned a bachelor’s degree in an agricultural discipline may plan a course of study that leads to teacher certification. Candidates pursuing the master of science degree may do so by completing either a thesis or nonthesis program of study.

Students have an opportunity to develop competence in disciplinary foundations and ethics, program planning, learning theory, instructional methods, program leadership and administration, program evaluation, research methodologies, data analysis and interpretation, writing for publication, and grant proposal writing.

The department also cooperates in the international development studies option of the General Graduate Studies Program. Courses and workshops are offered, both on and off campus, for extension educators, teachers, and industry and government personnel.

Agricultural Studies

OVERVIEW
Administered by the Department of Agricultural Education and Studies

For undergraduate curricula in agriculture and life sciences education, and agricultural studies, leading to the degree of bachelor of science, see College of Agriculture and Life Sciences, Curricula.

The department offers two curricula for students desiring to enter careers in agriculture and related fields. These curricula are agriculture and life sciences education and agricultural studies. The agricultural and life sciences education curriculum prepares persons for careers as agricultural education instructors, and educational specialists for industry, nonprofit organizations, and governmental agencies. The agriculture and life sciences education curriculum has two options, teacher certification and communications. The agricultural studies curriculum has two options, production and management and multidisciplinary. Students are prepared for careers in production agriculture and agricultural industry. Graduates of both curricula accept positions in agricultural business, industry, agencies, and production agriculture.

Student Learning Outcomes
Graduates will have a broad base of agricultural knowledge, and will be skilled in decision making, planning, organizing, presenting, and evaluating information. Through the successful completion of the required coursework, active participation in clubs and organizations, and the acquisition of technical skills and experiences associated with work experiences, internships, and international travel, graduates of our baccalaureate programs meet the university, college, and departmental outcomes in the following nine areas:

1. professional, interpersonal, and cross-cultural communications
2. problem solving and critical thinking
3. leadership
4. entrepreneurship
5. life-long learning
6. ethics
7. environmental awareness
8. U.S. diversity
9. international perspectives.

More information regarding the departmental learning outcomes can be found at [www.ageds.iastate.edu/](http://www.ageds.iastate.edu/)

Curriculum in Agricultural Studies
Administered by the Department of Agricultural Education and Studies. Students are encouraged to develop one or more areas of concentration in agricultural sciences and economics.

Production and Management Option

Total Degree Requirement: 120 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Select one CALS area, including 6 credits at 300-400 level taken at Iowa State * 15

Select one other area, including 6 credits at 300-400 level taken at Iowa State * 15

**Total Credits** 53

* An individual course may only apply towards one area.

**Other Required Course:**
Electives: Select courses to get to 120 credits.

**Prevetinary Studies**

Preparation for admission to veterinary medicine may be accomplished through the agricultural studies curriculum.

Agricultural Studies, B.S.

Production and Management Option
Agricultural and Rural Policy Studies

This undergraduate degree emphasizes the application of social science knowledge to issues related to agriculture and society. The interdisciplinary major draws largely on courses from sociology, political science and economics. Its goal is to prepare students to become leaders in addressing complex issues related to the social and human dimensions of agriculture at both the local and global level. Students will learn social science concepts and skills to understand, analyze and...
communicate complex ideas, information and data related to agricultural systems.

Internships are an important part of the Agricultural & Rural Policy Studies major. The curriculum offers the flexibility needed to accommodate the special interests and needs of each student.

**Student Learning Outcomes**
The curriculum is designed to provide students with the following skills and competencies:

1. Recognize, analyze and evaluate the critical human and social factors (e.g. practices, policies, laws, institutions) impacting agriculture.
2. Understand the social dimensions of agriculture and its connections with food and environmental systems.
3. Develop problem solving, critical thinking, and leadership skills to positively influence human impacts on agriculture.
4. Understand the perspectives of diverse stakeholders and develop strategies to communicate clearly and effectively to a range of audiences.

Students will develop the necessary skills to become effective leaders with companies, local, national and international non-governmental organizations (NGOs), and government agencies that work on agricultural, food and environmental related issues. Graduates can work as public policy analysts, government relations, public relations, program analyst, program specialists, marketing, sales, agriculture, educators, and executive directors.

**Curriculum in Agricultural & Rural Policy Studies**
Administered by the Department of Sociology

**Total Degree Requirement: 128 cr.**
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**International Perspective: 3 cr.**
**U.S. Diversity: 3 cr.**

**Communications Proficiency (C or better):**

- 6 credits of English Composition
- Three credits of Speech Fundamentals
- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3
- SP CM 212 Fundamentals of Public Speaking 3
- or AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences
- P R 305 Publicity Methods 3

**Communication/Library:**

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in sociology and rural sociology and minor work for students majoring in other departments. For M.S. and Ph.D. departmental requirements, see Program of Graduate Study for Degrees in Sociology and Rural Sociology, available from the department office. The department offers concentrations in a number of areas, e.g., community studies and development; sociology of families, inequality, food systems, agriculture and environment; methodology; social change and development; criminology; the economy, organizations and work; and social psychology. The Department of Sociology does not offer a nonthesis master’s program.
Graduates have a broad understanding of sociology, address complex societal problems, and communicate effectively with scientific colleagues and the general public in both formal and informal settings. They understand sociological theory, conduct research, and are prepared to educate college students and contribute to public policy. Although the department stipulates no language requirement for either the degree master of science or the degree doctor of philosophy, specifying competence in one or more languages may be desirable in some instances.

The department also participates in the interdepartmental program in interdepartmental majors in sustainable agriculture, transportation and water resources, and interdepartmental minors in gerontology (see Index).

Agricultural Systems Technology

The Department of Agricultural and Biosystems Engineering offers a bachelor of science degree in Agricultural Systems Technology (AST). Students majoring in AST choose between two options: Agricultural and Biosystems Management or Machine Systems. The department also offers a minor in Agricultural Systems Technology.

Successful AST graduates gain knowledge, skills, and abilities in solving technical problems, understanding the design process, excelling in authentic leadership, being aware of safety issues, having a quality orientation, effectively managing projects, and having a systems-thinking perspective. This translates to a holistic approach where AST graduates apply science, technology and engineering principles to manage complex agricultural and other production systems, including how the constituent sub-systems are interrelated and the broader impact of these systems.

Graduates find careers within a variety of agricultural industries, businesses, and organizations in the fields of agricultural machinery; off-road equipment; food, feed and grain processing; water quality; biorenewable resources; precision agriculture; or livestock production systems.

Common job duties of AST Agricultural and Biosystems Management graduates include:

- technical support
- operations management
- production supervision
- grain elevator management

Common job duties of AST Machine Systems graduates include:

- precision agriculture support
- testing or sales management
- technical support
- maintenance supervision

Student Learning Outcomes

Upon graduation, all AST students should be able to:

1. Apply knowledge of mathematics, science, and applied engineering to identify and solve applied science and technology problems
2. Develop and conduct experiments, and analyze and interpret resulting data
3. Evaluate and adapt systems, components, processes to meet specified needs
4. Function effectively on multi-disciplinary teams
5. Communicate effectively, ethically, and professionally in written, oral, and other formats to technical and non-technical audiences
6. Understand the potential impacts and limitations of solutions in global and societal contexts
7. Recognize the need for, and demonstrate an ability to, engage in lifelong learning
8. Effectively apply modern scientific and technical tools necessary for professional practice to address contemporary issues in applied engineering and technology

Upon graduation, AST students in the agricultural and biosystems management (ABM) option should be able to:

1. Design, implement, and evaluate best practices for the management of global and natural resource systems
2. Integrate and utilize agricultural and biosystems applied engineering and technology to address contemporary issues in bio-based industries
3. Evaluate the factors impacting the complex systems that sustain water, air, soils, food, and feed

Upon graduation, AST students in the machine systems (MS) option should be able to:

1. Specify, manage, and test machine systems in the context of a complete agricultural, biological production or processing system
2. Use and apply the technology of machine systems including power and information flows, function and interaction with biological materials
3. Perform an energy and cost analyses of complete machine systems to ensure the success and sustainability of an enterprise

- At least nine (9) credits that are not used to meet any other department, college, or university requirement.

### Agronomy Undergraduate Study

Agronomy is the science and technology of producing plants that serve humans, using practices essential for maintaining and improving life. The Department of Agronomy offers a major leading to a degree of bachelor of science (BS) in agronomy. Graduates have the theoretical and practical knowledge needed for efficient and sustainable crop production. They are skilled in critical thinking, problem solving, communicating, and working effectively with others. They understand the ethical, cultural, and environmental dimensions of issues facing agronomists globally.

An agronomy major prepares students for employment in crop production and soil management, yield forecasting, precision farming, plant breeding, agricultural business and industry, agricultural service organizations, environmental and natural resource management, and farm management. Graduates pursue careers in the seed, fertilizer, and agricultural chemical industries as field agronomists, crop and soil management specialists, research technicians, sales and marketing specialists, and production managers. State and federal agencies
employ agronomists as extension specialists, county extension directors, environmental and natural resource specialists, research associates, soil surveyors, soil conservationists, grain inspectors, integrated pest managers, land appraisers, agricultural lenders, and other science-based professionals.

An agronomy major also prepares students for graduate school. We offer a concurrent BS/MBA degree. About a quarter of our students immediately continue into research-based MS and PhD programs. As an undergraduate, there are many opportunities to be involved in research.

Department of Agronomy website - http://www.agron.iastate.edu/ (http://www.agron.iastate.edu/)

Student Learning Outcomes

Upon graduation, students should be able to:

KNOWLEDGE: Graduates of our bachelor’s degree program will demonstrate knowledge of the scientific principles and practices needed for success as an agronomist.

INTEGRATION AND PROBLEM-SOLVING: Graduates of our bachelor’s degree program will integrate knowledge and skills to systematically assess, critically analyze, and sustainably manage agronomic systems.

PROFESSIONALISM AND CAREER READINESS: Graduates of our bachelor’s degree program will demonstrate professional skills and career readiness.

COMMUNICATION: Graduates of our bachelor’s degree program will communicate and engage effectively with diverse audiences.

DIVERSE WORLDVIEWS: Graduates of our bachelor’s degree program will demonstrate knowledge of diverse worldviews that affect agronomic practices.

ETHICAL, ENVIRONMENTAL, AND ECOLOGICAL ASPECTS: Graduates of our bachelor’s degree program will demonstrate knowledge of the ethical, environmental, and ecological aspects of agronomic practices.

Curriculum in Agronomy

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr., 9 P-NP cr. of free electives; 2.00 minimum GPA. A minimum of 15 credits of agronomy courses must be earned at Iowa State and not transferred from other institutions.

International Perspective: 3 cr.
3 cr. from approved International Perspective list: http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current (http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/)

U.S. Diversity: 3 cr.
3 cr. from approved U.S. Diversity list: http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses (https://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses/)

Communication/Library: 13 cr.
6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Supporting Sciences: 15 cr.
Courses cannot be used to fulfill any other agronomy requirements. At least 9 cr. must be in courses numbered 300 or above.

This requirement can be met in one of three ways:

a. Complete at least 3 credits in basic or mathematics-intensive discipline (ACCT, BBMB, BIOL, CHEM, COM S, ECON, All Engineering, GEOL, GEN, MATH, MTEOR, PHYS, STAT) as well as at least 6 additional credits in BIOL, BBMB, ENSCI, ENT, GEOL, HORT, GEN, MICRO, NREM, PL P, TSM. The other 6 credits can be a combination of the above department's courses and/or AGRON.

b. Complete the courses needed to fulfill a certificate or second major that complements the student's academic and professional goals.

c. By the end of the third semester before graduation, petition the Agronomy Curriculum Committee with a specific set of courses designed around "keeper of the land," "builder of genetic diversity," "explorer of plant life," "developer of bio-energy," "confronter of world hunger," or "designer of sustainable systems."

### Minor - Agronomy

A minor in agronomy is earned by taking 18 credits consisting of the following:

- 6 credits of required courses
- 3-6 credits of foundation courses
- 6-9 credits of supporting courses

At least 9 credits must be taken at Iowa State University with at least 6 credits numbered 300 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Students minoring in agronomy can take the following courses: AGRON 331, AGRON 370, AGRON 490, AGRON 496; but only one (1) credit from these courses can be used in the minor program.

**Required Courses (6 credits):**

<table>

### SOIL SCIENCE CERTIFICATE

**Purpose**

The certificate in soil science will prepare students with the skills needed for successful careers in the field of soil science. Soil science has key roles in achieving goals of sustainability as demonstrated by the functions of soil and their ecosystem services. Namely, soil is an important factor in addressing issues of food scarcity, water management, climate change, biodiversity loss, and human health. Students who complete the Iowa State University soil science certificate program will qualify for federal employment as a soil scientist. In addition, students completing the certificate will have met the educational component of the Soil Science Society of America’s requirements for certification as a professional soil scientist and all U.S. states’ educational criteria for licensure as a professional soil scientist.

**Requirements**

The certificate in soil science requires the completion of 31 credit hours, including a foundation course in soil science, 15 credits in supporting biological, physical, or Earth sciences, as well as 13 credits from approved categories of soil science courses.

At least 9 credits must be taken in soil science courses numbered at the 300-level or above.

At least 9 credits used for the certificate cannot be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.

Courses for the certificate cannot be taken on a pass/not-pass basis.

**Course Requirements for Soil Science Certificate**

**Foundation:** 3 credits of required core course.

AGRON 182  Introduction to Soil Science 3

**Supporting Biological, Physical, or Earth Sciences:** Choose 15 credits from approved list consisting of courses from the following designators:
Soil Science: Choose 13 credits with at least 2 credits from each of the following categories.

Soil Physical Properties or Soil Water Relationships (2 credits)

The Soil Science Certificate may be earned at the same time as an ISU baccalaureate degree or after the completion of an associate of arts (AA) or associate of science (AS) degree or a baccalaureate degree from any accredited institution.

Information on the concurrent Agronomy bachelors degree and MBA can be located here (https://www.ivybusiness.iastate.edu/full-time-concurrent-mba/).

Graduate Study

Introduction

Agronomy is the science and technology of producing plants that serve humans, using practices essential for maintaining and improving life. The Department of Agronomy administers Master of Science (MS) and Doctor of Philosophy (PhD) degree programs in four different graduate majors that emphasize different disciplines of agronomy. These majors are: Agricultural Meteorology; Crop Production and Physiology; Plant Breeding; and Soil Science. A fifth graduate major, Agronomy, offers both an MS and a Graduate Certificate through distance education suitable for professionals working in industry or government, as well as a graduate minor for on-campus students.

Admission

To be fully admitted, prospective graduate students must have an undergraduate GPA of at least a 3.00 GPA (4.00 scale) or rank in the upper one-half of their undergraduate class. Non-native English speakers must take the Test of English as a Foreign Language (TOEFL). Students applying to the Agricultural Meteorology and Plant Breeding graduate majors must take the Graduate Record Examination (GRE). For all of the majors except Agronomy, a faculty member of the graduate major must agree to be the major professor before the student is admitted.

Program of Study

The academic courses used to satisfy requirements for a graduate degree compose a student’s Program of Study (POS). The POS must be approved by the student’s POS Committee. For the MS in Agronomy, the POS Committee must be composed of at least two faculty who are both members of the Graduate Major in Agronomy. For the other four majors at the MS degree level, at least three faculty must serve on a POS Committee. Two of the three must be members of the major, and at least one must be a member of a different graduate major. At the PhD level the POS Committee must have at least five members, of which at least three must be faculty in the major, and at least one a member of a different graduate major. If the student is pursuing a graduate minor, either as part of an MS or PhD, a graduate faculty member representing the minor must serve on the POS Committee.

Agronomy

The POS for the MS in Agronomy is fixed and consists of the following:

<table>

</tr>
</tbody>
</table>

† Arranged with instructor.
All Other Degrees

The courses in each student’s POS will vary depending on the major and the student’s interests. Only a maximum of three 400–level courses or one 300–level and two 400–level courses may be included on the POS. If a 300–level course is listed on the POS it cannot be an AGRON course.

Agricultural Meteorology

Students with a major in Agricultural Meteorology must include AGRON 698 in their POS. Students are encouraged to include the following courses: AGRON 505, AGRON 577; MTEOR 605; a modeling course such as AGRON 508, AGRON 518, AGRON 525, AGRON 677, GEOL 516, or MTEOR 552; and a course in statistics.

Crop Production and Physiology

The Graduate Major in Crop Production and Physiology has defined five Core Areas.

Core Area 1 (molecular biology / biochemistry): BBMB 404, BBMB 405, BBMB 542A–G, BBMB 607, and PLBIO 545.

Core Area 2 (growth and development): AGRON525, AGRON551, BIOL 454, BIOL 428, and GDCB 528.

Core Area 3 (plant physiology and metabolism): AGRON 508, AGRON 516, AGRON 525, AGRON 538, AGRON 553, AGRON 556, BBMB 645, and PLBIO 513.

Core Area 4 (crop ecology and management): AGRON 509, AGRON 515, AGRON 530, AGRON 553, AGRON 556, BIOL 472, BIOL 474, EEOB 570, EEOB 582, EEOB 584, HORT 524, PL P 577, and PL P 594.

Core Area 5 (statistics / quantitative methods): AGRON 526, STAT 587, STAT 402, STAT 407, STAT 505, STAT 512, CRP 551, and NREM 546.

To major in Crop Production and Physiology, at least one course from three of the Core Areas must be included in the POS for the MS. For the PhD, at least one course from each of the Core Areas must be included. A single course cannot be used for more than one Core Area. Students are also encouraged to consider AGRON 698.

Plant Breeding

The Graduate Major in Plant Breeding has both a resident and distance–education MS program. The following courses are recommended for students with a major in Plant Breeding: AGRON 521, AGRON 522, AGRON 523, AGRON 524, AGRON 528, AGRON 561, AGRON 600A, AGRON 698, GEN 510, STAT 587, and STAT 402. For the distance program, the following courses are recommended: AGRON 501, AGRON 506, AGRON 513, AGRON 520, AGRON 521, AGRON 523, AGRON 524, AGRON 528, AGRON 544, and AGRON 599. Resident students pursuing the PhD also often include AGRON 621 and AGRON 625 in their POS.

Soil Science

Students pursuing a major in Soil Science may specialize in one of six areas: soil chemistry; soil fertility; soil management; soil microbiology and biochemistry; soil morphology and genesis; or soil physics. If a specialization is chosen, the major professor must be in the designated specialty area. For the PhD, the POS must include one credit of AGRON 600B. Students are also encouraged to consider including AGRON 698 in their POS.

Master of Science

The general requirements for an MS degree include:

- a minimum of 30 credits from academic courses and research activities;
- at least 22 credits earned at ISU;
- two–thirds or more of earned credits related to the major; and
- completion of a final oral examination.

Both non–thesis and thesis options for an MS degree in Agricultural Meteorology, Crop Production and Physiology, Plant Breeding, and Soil Science are available. Students in the Agronomy major must choose the non–thesis option.

Students in Agricultural Meteorology working towards the MS must meet with their POS Committee at least twice. Besides the final oral examination, an additional meeting must be held near the beginning of the graduate program. At this meeting the student will introduce the area of research to be pursued, potential research questions and methods, and a proposed POS. The student must also present a short written report on how the proposed research will help them master established Enduring Understandings in Agricultural Meteorology.

Creative Component

If the non–thesis MS degree is chosen, then the student must:

1. register for at least two credits of AGRON 599 that will be used to complete a “creative component;” and
2. pass a comprehensive final oral examination.

The creative component is work that presents “substantial evidence of individual accomplishment.” The POS Committee and the student will specify the creative component, how it will be documented, and how it will be evaluated. The POS Committee also has flexibility in determining the format of the final oral examination. For Agricultural Meteorology, the final oral exam must include an evaluation of the student’s mastery of the Enduring Understandings in Agricultural Meteorology.

Thesis

In the thesis option the student must:

1. pursue a research project culminating in a written thesis; and
2. pass a comprehensive final oral examination.

A minimum of three research credits of AGRON 699 must be listed on the POS to account for work on an MS thesis. The thesis is submitted to the POS Committee prior to the final oral examination. During the final oral examination, the student will present and defend the thesis in the presence of the POS Committee. Students in Agricultural Meteorology must also demonstrate mastery of the Enduring Understandings in
Agricultural Meteorology. The presentation (also called the "exit seminar") is open to the general public. Only POS Committee members may attend the examination that follows the presentation.

**Doctor of Philosophy**

The general requirements for a PhD degree include:

- a minimum of 72 credits from academic courses and research activities;
- at least 36 of these credits earned at ISU;
- completion of a preliminary oral examination;
- a written PhD dissertation; and
- completion of a comprehensive final oral examination.

The 72 credits can include the credits earned in pursuit of an MS degree. If an MS was earned at another institution, those courses earned at the other institution can be listed along with the ISU courses, but only if the POS Committee determines that the courses are appropriate. Students in Agricultural Meteorology working towards the PhD must meet with their POS Committee at least three times. Besides the final oral examination and another for the preliminary exam, an additional meeting must be held near the beginning of the graduate program. At this meeting the student will introduce the area of research to be pursued, potential research questions and methods, and a proposed POS. If a student will pursue a PhD without first completing an MS, then during the first meeting of the POS Committee the student must also present a short written report that illustrates connections between the Enduring Understandings in Agricultural Meteorology and their planned research.

**Qualification Exam**

**Agricultural Meteorology**

Students in Agricultural Meteorology must take and pass a qualification exam once they have decided to pursue a PhD. The qualification exam must be passed before taking the preliminary exam. The format of the qualification exam is as follows. The student will produce a written report that demonstrates their knowledge of the Enduring Understandings in Agricultural Meteorology. If the student has come from another university the report must present research completed at ISU and not at the previous institution (such as a thesis). This report will be submitted to all of the faculty in the major. The student will then make an oral presentation to faculty and other students in the major that summarizes and defends the written report. After the oral presentation, the faculty will meet to determine whether or not the student passed the exam, and whether the student can re-take the exam if the student failed. The faculty will provide written feedback to the student, suggesting areas where improvement is needed and a course of action. The qualification exam can be taken only two times during a student's graduate career at ISU. If a student who had entered the PhD program without an MS degree takes the qualification exam and fails the exam, the student can: take the qualification exam again, if so allowed by the faculty; or continue their graduate career in pursuit of an MS degree. In the latter case, the student could take the qualification exam one more time after an MS degree has been completed.

**All Other Majors**

A qualification exam is not required for students in the Crop Production and Physiology, Plant Breeding, or Soil Science majors.

**Preliminary Exam**

All students pursuing a PhD must take and pass a preliminary oral examination.

**Agricultural Meteorology**

For students in Agricultural Meteorology the preliminary exam consists of a defense of the student's proposed dissertation research to the POS Committee. Besides an oral defense, the student must also submit a written report on their proposed research. If the student fails the preliminary exam, the POS Committee must also decide if the student can re-take the exam. The preliminary exam can only be taken twice.

**Crop Production and Physiology**

Students in Crop Production and Physiology may be asked to take a written preliminary examination. If a student fails the written preliminary examination, the POS Committee may require the student to retake the exam, to answer additional written questions, or proceed with the oral examination. The nature of the preliminary oral exam is determined by the student's POS Committee.

**Plant Breeding**

Students in Plant Breeding must pass a uniform written preliminary examination that consists of five questions, each from one of five topical areas. Faculty members in Plant Breeding evaluate each answer. Evaluators assign a pass or fail grade to the answer. If an evaluator assigns a failing grade to a question, the evaluator shall clearly indicate the strengths and weaknesses of the answer and provide written information (e.g., references, rationale) to the student which clearly outlines an acceptable response to the question. Failure to provide such written information may invalidate that grade and be considered sufficient cause to exclude the grade in the overall evaluation of the student's answer. Students who receive two pass grades for a question will have successfully completed that topic, and students must pass each topic to pass the exam. If two valid grades are not in agreement (e.g., one passing grade and one failing grade), additional faculty members will evaluate the answer until there are two valid assessments that are in agreement. Students who do not pass a topic have the opportunity to repeat that topic on the next regularly scheduled exam date. The number of attempts for each topic has not been specified. The examination is offered the last Thursday and Friday of each January and September when one or more students have signed up to take the exam. Students may choose to attempt questions for all five topics, or for subsets of the topics. If a student decides to attempt
questions for only certain topics, the student must specify which topics in writing at least one month prior to the scheduled exam date. The nature of the preliminary oral exam is determined by the student’s POS Committee.

**Soil Science**

Students in Soil Science must pass a written preliminary examination. Exam questions are authored by members of the POS Committee. The format of each question is left open and they may be formulated as open— or closed—book problems. A reasonable period for completion may be set by the author of the question. The student’s responses are formally scored or ranked only by the POS Committee member who authored the question. A copy of the student’s responses to all questions is submitted to all POS Committee members at least one week before the student’s preliminary oral examination. When the student submits a request to schedule the preliminary oral examination, the student’s major professor certifies by signing the form that the student has satisfactorily completed a written preliminary exam. The nature of the preliminary oral exam is determined by the student’s POS Committee.

**Doctoral Dissertation and Final Oral Examination**

All students must include at least three AGRON 699 credits in their POS for work on their PhD dissertation. During the required final oral examination, a student presents and defends the dissertation. This presentation (also called the “exit seminar”) is open to the general public. Only POS Committee members may attend the examination that follows the presentation.

**GRADUATE CERTIFICATE IN AGRONOMY FOR DISTANCE STUDENTS**

The Graduate Certificate in Agronomy is for distance students and is comprised of the first six courses in the MS in Agronomy curriculum. All six courses are required for certificate completion.

</tr>
</tbody>
</table>

AGRON 521 Principles of Cultivar Development 3
AGRON 553 Soil-Plant Relationships 3

However, one substitution is allowed with the approval of the faculty member serving as the minor representative on the POS Committee.

**Animal Ecology**

Administered by the Department of Natural Resource Ecology and Management

The Animal Ecology curriculum provides its majors with an understanding of ecological principles and processes and their applications to natural resource management. This major is oriented toward students desiring a general and flexible program in environmental biology and for those planning graduate study. Graduates find employment as aquaculturists, aquatic ecologists, wildlife biologists, fisheries biologists, resource managers, and ecologists for industry, environmental consulting firms, natural resource and environmental agencies and organizations, zoos, and as educators. Graduates are able to communicate and work effectively in the multidisciplinary arena of ecology and natural resource management. Additionally, they recognize the importance of ethics in their field of study and are sensitive to cultural diversity and broad environmental concerns.

Students majoring in Animal Ecology may select from one or more of four options: Fisheries and Aquatic Sciences, Interpretation of Natural Resources, Preveterinary and Wildlife Care, or Wildlife. Each option has specific outcomes expectations that include (1) the scope of the specialization and its relationships to broader aspects of animal ecology, biotic resource management, and other allied scientific disciplines and professions, (2) career opportunities and requirements, and (3) knowledge and skills appropriate for employment at technical and practitioner levels in each discipline.

All options require three months (400 hours) of relevant work experience or study at a biological station prior to graduation. The latter may be accomplished at the university’s affiliate field stations: Rod and Connie French Conservation Camp in Montana, Iowa Lakeside Laboratory at West Lake Okoboji, and Gulf Coast Research Laboratory at Ocean Springs, Mississippi. Information on these laboratories is available from the Department of Natural Resource Ecology and Management Student Services Center.

Preveterinary medicine preparation may be achieved while satisfying degree requirements in animal ecology.

Additional education and training can lead to other opportunities in such areas as research and management, natural resources planning and administration, teaching, and environmental consulting, among others. Graduate training is necessary for many specialized positions within the
fields of animal ecology. Students preparing for graduate study should consult with their academic advisor concerning appropriate coursework.

Students wishing to be certified by the American Fisheries Society or The Wildlife Society need to consult with their advisors in selecting required courses in their respective programs. The formal application then needs to be completed and submitted for review by their professional societies. Certification in either society has many professional benefits and may be required or recommended for employment by federal and state agencies and private industry.

Students seeking certification to teach biology in secondary schools must meet requirements of the College of Human Sciences as well as those of the Animal Ecology curriculum. In addition, they must apply formally for admission to the teacher education program (see Teacher Education Program). Students with an interest in careers in outdoor writing are encouraged to obtain a minor or a second major in journalism (see Journalism and Communication, Courses and Programs). Students who wish to pursue a job as a conservation officer may wish to minor in criminal justice (see Criminal Justice).

**Student Learning Outcomes**

Upon graduation, students should be able to:

1. Identify, explain and critically evaluate their own beliefs, values and actions in relation to professional and societal standards of ethics.

   For any given situation, graduates identify, critically evaluate, and state their own beliefs and values as they relate to professional and societal ethical standards, for any given situation. They elaborate on how those values and beliefs impact their actions, and they explain which specific canons or principles of a professional code of ethics are applicable to a particular situation.

2. Anticipate, analyze and evaluate natural resource issues and opportunities, explaining the ecological, economic, and social consequences of natural resource actions at various scales and over time.

   In the case of existing natural resource issues, graduates explain the ecological, economic, and social consequences that reasonably could be expected to occur as the result of actions taken to address the issue. The explanation includes considerations of the geographic area influenced by the issue as well as the time frame over which the consequences can be expected to occur. In the case of evolving circumstances, graduates predict natural resource issues that may arise as a result of the circumstances and explain the ecological, economic and social consequences of those issues.

3. Actively seek the input and perspectives of diverse stakeholders regarding natural resource problems and issues.

   Graduates identify the comprehensive list of individuals or groups who may be impacted by particular natural resource problems and issues. They are well versed in techniques for seeking and incorporating input and perspectives from those people, and they incorporate those inputs and perspectives into the decision-making process.

4. Assess, analyze, synthesize, and evaluate information fairly and objectively.

   Not all information is equally sound or applicable in a particular situation. Graduates evaluate the validity and importance of information obtained from any source. Once evaluated, they use the information appropriately in the solution of natural resource problems.

5. Work effectively, both individually and with others, on complex, value-laden natural resource problems that require holistic problem-solving approaches.

   Effective solution of natural resource problems often involves input from diverse constituencies with diverse value scales. When working individually, graduates incorporate those values into the solution of problems. Graduates work effectively with diverse individuals and groups to reach consensus on problem solutions.

6. Formulate and evaluate alternative solutions to complex problems and recommend and defend best alternatives.

   The natural resource base with which we deal is capable of providing numerous goods and services to numerous publics. Graduates formulate multiple alternatives, as well as action plans, to achieve stakeholder objectives. They evaluate each of the feasible alternatives in terms of biological possibility, economic feasibility and social acceptability. They recommend best alternatives based on the stakeholders’ objectives, and they justify their recommendations on the basis of sound science.

7. Communicate clearly and effectively with all audiences using appropriate oral, visual, electronic, and written techniques.

   Graduates utilize the best form, or forms, of communication for effectively conveying information to, or seeking input from, a particular audience. They are proficient in all forms of communication, and adjust their style or technique of communication to suit different audiences.

8. Recognize and interpret resource problems and opportunities across spatial scales from local to global.

   Graduates recognize where resource problems and opportunities can or could exist, and they evaluate and interpret these for others. They evaluate and interpret for individual landowners at a very local scale as well as for problems that span multiple ownerships, regions and ecosystems.
9. Appreciate cultural diversity and understand the impact of the global distribution of people and wealth on natural resource use and valuation.

Different cultures, population densities, and income classes value and use natural resources in very different ways. Because natural resources often are used simultaneously by different groups, it is important for graduates to be able to account for those differing uses and valuations when making management decisions about natural resources.

10. Exercise leadership skills as professionals and engaged citizens

Graduates organize, facilitate, and participate effectively in groups, teams, or organizations. They define problems or opportunities, implement action planning processes, work toward goals and justify actions taken.

11. Demonstrate creativity and innovation in identifying and pursuing opportunities that produce environmental, social, or economic value.

Graduates display creativity in a variety of situations, and identify opportunities to promote understanding of natural resource issues. They demonstrate persistence when working with individuals who have diverse interests in order to build consensus and facilitate accomplishing stated objectives.

12. Exercise life-long learning skills developed before graduation.

Graduates articulate why life-long learning is important. Graduates find answers to their questions as they arise throughout life. They are capable of determining what they need to know to effectively deal with an issue or situation, and they know how to obtain the necessary knowledge. They have learned how to learn in the absence of teachers.

CURRICULUM IN ANIMAL ECOLOGY

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.
U.S. Diversity: 3 cr.
Communications Proficiency (with grade of C or better):
6 cr. of English composition

3 cr. of speech fundamentals

Communication/Library 16 cr.

To complete degree program in four years students must maintain an average of 16 credits per semester.

Initial math course is determined on the basis of high school math and placement test scores. A non-credit course (Math 10) maybe be required at additional costs.

In scheduling coursework, students should pay attention to courses with limited offerings, (e.g., offered only on alternate years) and to course sequences (i.e., where a course serves as a prerequisite for another course). It is critical that students take A ECL 371 fall semester of the junior year and A ECL 451 fall semester of the senior year.

**Minor - Animal Ecology**

The department offers a minor in animal ecology that may be earned by taking 15 credits in the department including:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>A ECL 312</td>
<td>Ecology</td>
<td>4</td>
</tr>
<tr>
<td>A ECL 365</td>
<td>Vertebrate Biology</td>
<td>4</td>
</tr>
<tr>
<td>NREM 120</td>
<td>Introduction to Renewable Resources</td>
<td>3</td>
</tr>
</tbody>
</table>

Plus four additional credits of Animal Ecology or NREM courses at the 300 level or above.

The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

**Animal Science**

The Department of Animal Science Undergraduate Program intends for its graduates to be able to explain the symbiotic relationship of animals and humans, to contribute to the solution of complex problems of animal enterprise management, and to apply their knowledge and skills in a technically demanding global community. Graduates of our program will be knowledgeable about sustainable animal production practices that also ensure animal health and well-being and stewardship of natural resources.

To enable learners to pursue a wide array of career interests, the department offers learning experiences ranging from the basic to the applied sciences. Learner outcomes for these goals, for each of our courses, and other information defining the program can be found at our web site: https://www.ans.iastate.edu/undergraduate-students. Our program is designed to provide career skills appropriate to job market needs. Our faculty goals include providing superior academic advising to enable students to fulfill their objectives.

**Student Learning Outcomes**

Learning outcomes for the Animal and Dairy Science majors dictate that, upon completion of the program, graduates will:

- Demonstrate a comprehensive knowledge of animal science, animal management, and agribusiness
- Exhibit effective communication skills
- Integrate information to solve problems
- Effectively employ skills as a self –learner
- Participate as team leaders and team builders
- Demonstrate awareness of contemporary issues that drive change in animal industries

The department offers the degrees bachelor of science in animal science and bachelor of science in dairy science. A double major in animal and dairy science is not permitted. However, combining either the animal science or dairy science majors with other curricula is permitted. A limit of 6 credits each in Intercollegiate Judging (Animal Science 475), or any independent study course (490 courses) can be applied toward a degree. A limit of 4 credits of Undergraduate Teaching Experience (Animal Science 497) can be applied toward a degree.

The department offers a minor in Animal Science and a minor in Meat Science. Certificates in Beef Cattle Production Management, Swine Production Management, Poultry Production Management, and Equine Management are also offered. Both the animal science curricula and dairy science curricula allow complementary work toward admission to veterinary medical school and other professional schools, which may be done while satisfying requirements for the bachelor of science degree. A program that combines bachelor of science and master of science in animal science is offered. In addition, a program that combines a bachelor of science and master of business administration is offered.

The Department facilitates student participation in the Midwest Poultry Consortium and the Swine Science Online program to offer additional training in poultry and swine production, respectively.

**Curriculum in Animal Science**

Students majoring in animal science will complete the degree requirements listed below. If desired, a student may also choose a specialized option. To earn a degree in Animal Science from Iowa State University a minimum of 15 credits in Animal Science must be earned from courses taught in the Animal Science department at ISU. A minimum of 15 credits of animal science coursework must be earned at Iowa State University.

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.
International Perspectives
Approved International Perspectives course 3

U.S. Diversity
Approved U. S. Diversity course 3

Communications Proficiency (with a C or better)
English composition 6
Speech fundamentals 3

Total Credits 9

Communication/Library
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
LIB 160 Introduction to College Level Research 1

One course from the following: 3
SP CM 212 Fundamentals of Public Speaking
AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences
AGEDS 327 Survey of Agriculture and Life Sciences Communication
COMST 214 Professional Communication

One course from the following: 3
ENGL 302 Business Communication
ENGL 309 Proposal and Report Writing
ENGL 312 Communicating Science and Public Engagement
ENGL 314 Technical Communication

Total Credits 13

Humanities and Social Sciences
Approved Humanities course 3
Approved Social Science course 3

Total Credits 6

Ethics
Approved Ethics course 3

Mathematical Sciences
One course from the following: 3-4
MATH 140 College Algebra
MATH 150 Discrete Mathematics for Business and Social Sciences
MATH 160 Survey of Calculus
MATH 165 Calculus I

One course from the following: 3-4
STAT 101 Principles of Statistics
STAT 104 Introduction to Statistics

Total Credits 6-8

Physical Sciences
A minimum of 8 credits are required. These requirements are specific to option and are listed with each option below.

Biological Sciences
BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
BIOL 212 Principles of Biology II 3
BIOL 212L Principles of Biology Laboratory II 1
BIOL 313 Principles of Genetics 3
or GEN 320 Genetics, Agriculture and Biotechnology
MICRO 201 Introduction to Microbiology 3-4
& 201L and Introductory Microbiology Laboratory
or MICRO 302 Biology of Microorganisms
& 302L and Microbiology Laboratory

Total Credits 14-15

Business
One course from the following: 3
ACCT 284 Financial Accounting
ECON 101 Principles of Microeconomics
ECON 102 Principles of Macroeconomics

Total Credits 3

Animal Science Core
AN S 101 Working with Animals 2
AN S 110 Orientation in Animal Science and ISU 1
AN S 114 Survey of the Animal Industry 2
AN S 210 Career Preparation in Animal Science 1
AN S 211 Issues Facing Animal Science 1
AN S 214 Domestic Animal Physiology 3
AN S 214L Domestic Animal Anatomy and Physiology Lab 1
AN S 319 Animal Nutrition 3
AN S 320 Animal Feeds and Feeding 3
AN S 331 Domestic Animal Reproduction 3
AN S 352 Genetic Improvement of Domestic Animals 3
AN S 411 Addressing Issues in Animal Science 1

Total Credits 24

General Animal Science
CHEM 163 College Chemistry
& 163L and Laboratory in College Chemistry
or CHEM 177 General Chemistry I
& 177L and Laboratory in General Chemistry I

**Important Note:** This is only one of many equally-sound schedule sequences.

Free electives and specified group electives are often chosen to complement the student’s career focus. The student’s academic advisor assists with developing scheduling schemes that prepare students individually for careers in the animal industry. They are explained fully in AN S 110 and through appointments with the student’s advisor.

**Credits: 17-15**

**Important Note:** This is only one of many equally-sound schedule sequences.

* Credits currently required for application to Veterinary Medicine program at ISU (55 credits)
  - General Chemistry with lab (7)
  - Organic Chemistry with lab (4)
  - Biochemistry (3)
  - General Physics with lab (4)
  - General Biology with lab (8)
  - Genetics/Animal Breeding (3)
  - Mammalian Anatomy and/or Physiology (3)
  - English Composition (6)
  - Oral Communication (3)
  - Humanities and/or Social Sciences (6)
  - Other Electives (8)

**Minors: Animal Science and Meat Science**

All minors require at least 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

The department offers a minor in Animal Science. The minor requires:

<table>
<thead>

AN S 235  Dairy Cattle Science
AN S 270  Foods of Animal Origin
& 270L  and Foods of Animal Origin Laboratory

One course from the following: 3
AN S 313  Exercise Physiology of Animals
AN S 319  Animal Nutrition
AN S 331  Domestic Animal Reproduction
AN S 345  Growth and Development of Domestic Animals
AN S 352  Genetic Improvement of Domestic Animals

One course from the following: 2-3
AN S 319  Animal Nutrition
AN S 320  Animal Feeds and Feeding
AN S 331  Domestic Animal Reproduction
AN S 324  Food Processing for Companion Animals
AN S 336  Domestic Animal Behavior and Well-Being
AN S 337  Lactation
AN S 345  Growth and Development of Domestic Animals
AN S 352  Genetic Improvement of Domestic Animals
AN S 360  Fresh Meat Science and Applied Muscle Biology
AN S 419  Advanced Animal Nutrition

Total Credits 16-17

A total of 9 credits must be earned at Iowa State University in animal science coursework that meets a degree requirement for the B.S. degree in animal science. Students interested in the Animal Science minor should contact an Animal Science advisor.

Minor - Meat Science
The department offers a minor in Meat Science. The minor requires:

- AN S 270  Foods of Animal Origin 2
- AN S 270L  Foods of Animal Origin Laboratory 1
- AN S 360  Fresh Meat Science and Applied Muscle Biology 3
- AN S 460  Science and Technology of Value Added Meat Products 3

One course from the following: 1
- AN S 489  Issues in Food Safety
- AN S 490C  Independent Study: Meat Science

5-6 Credits from the following 5-6
- AN S 324  Food Processing for Companion Animals
- FS HN 305  Food Quality Management and Control
- FS HN 311  Food Chemistry
- FS HN 403  Food Laws and Regulations
- FS HN 406  Sensory Evaluation of Food
- FS HN 410  Food Analysis

FS HN 412  Food Product Development
FS HN 420  Food Microbiology
FS HN 471  Food Processing
MICRO 407  Microbiological Safety of Foods of Animal Origins

Total Credits 15-16

Students majoring in Animal Science will not be allowed to count the 9 required credits (270, 270L, 360, 460) toward their Animal Science degree. Students interested in the Meat Science minor should contact an Animal Science advisor.

The Department of Animal Science offers certificates in:

- Beef Cattle Production Management
- Dairy Cattle Production Management
- Equine Science and Management
- Poultry Production Management
- Swine Production Management

All certificates require at least 24 credits, including at least 18 credits at the 300 or 400 level. At least 9 credits must be unique to the certificate and will not be applied to a major, minor, or another certificate. All courses applied to the certificate must be taken for a grade. A cumulative GPA of 2.0 is required to complete the program and receive the certificate.

**Beef Cattle Production Management**

**Foundation Course (3 credits)**
- AN S 226  Beef Cattle Science 3

**Fundamental Disciplines in Animal Science (9 credits)**
- AN S 320  Animal Feeds and Feeding 3
- AN S 331  Domestic Animal Reproduction 3
- AN S 352  Genetic Improvement of Domestic Animals 3

**Expertise Expansion (3 credits)**
- AGRON 280  Crop Development, Production and Management 3
- AGRON 334  Forage Crop Management 3
- AN S 333  Embryo Transfer and Related Technologies 3
- AN S 336  Domestic Animal Behavior and Well-Being 3
- AN S 345  Growth and Development of Domestic Animals 3
- AN S 360  Fresh Meat Science and Applied Muscle Biology 3
- TSM 327  Animal Production Systems 3
- TSM 455  Feed Processing and Technology 3
- TSM 457  Feed Safety, Ingredient Quality and Analytics 3
- VDPAM 487  Livestock Disease Prevention 3
Course fulfills the Animal Science degree discipline expansion requirement unless designated as a unique course in the certificate.

**Enterprise Management (3 credits)**

### Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in animal breeding and genetics; meat science; animal physiology; animal science; and an interdepartmental program in nutritional sciences which has an option in animal nutrition. Minor work is offered in these areas to students taking major work in other departments.

A strong undergraduate program is required for students interested in graduate study. Fundamental training in biology, chemistry, mathematics, and statistics is requisite to a satisfactory graduate program. Graduate programs in animal science include supporting work in areas such as agricultural engineering, agronomy; anatomy; biochemistry; chemistry; economics; environmental science; food science and human nutrition; genetics; microbiology; physics; physiology; and statistics. Students may choose graduate programs involving a co-major with one of these areas. Graduate work in meat science is offered as a co-major in animal science and food science and human nutrition.

The department also cooperates in the interdepartmental program in professional agriculture and interdepartmental majors in genetics, immunobiology, microbiology, MCDB (molecular, cellular, and developmental biology), neuroscience, nutritional sciences, and toxicology (see Index (http://catalog.iastate.edu/azindex/)).

The foreign language requirement, if any, is established on an individual basis by the program-of-study committee appointed to guide the work of the student.

### Biochemistry (AGLS)

The department of Biochemistry, Biophysics & Molecular Biology (http://www.bbmb.iastate.edu) offers majors in biochemistry in the College of Liberal Arts and Sciences and in the College of Agriculture and Life Sciences. Biochemists seek to understand life processes in terms of chemical and physical principles. Graduates in biochemistry will have a rigorous background in chemistry, biology, and physics that will prepare them for graduate studies in the chemical or biological sciences, medical and health professional training, or immediate laboratory research in biochemistry, biotechnology, or pharmacy. The biochemistry major is accredited by the American Society for Biochemistry and Molecular Biology (ASBMB). As such our learning objectives are in-line with ASBMB core concepts.

#### Student Learning Outcomes

Upon graduation, students should be able to:

- Demonstrate that energy is required by and transformed in biological systems.
- Demonstrate that macromolecular structure determines function and regulation.
- Demonstrate that information storage and flow are dynamic and interactive.
- Articulate the principals of biochemistry and biology within the overarching context of evolution and homeostasis.
- Use the tools and techniques required for objective measurement and quantitative analysis of biochemicals in biological systems.
- Write and orally present clear communication following the rules of the scientific method.
- Implement rigorous standards for laboratory safety and research ethics.

#### Biochemistry Major in the College of Agriculture and Life Sciences

As majors in the College of Agriculture and Life Sciences, Biochemistry students must meet College of Agriculture and Life Sciences and University-wide requirements for graduation in addition to those stated below the major.

These lists of courses should not be regarded as statements of fixed requirements or as complete outlines of the work necessary for the major. They are given solely for the convenience of students or advisors who wish to estimate the amount of basic study that may be needed.

All minors require at least 15 credits, including at least 6 credits in course numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

See also the B.S./M.S. program under Concurrent Undergraduate and Graduate Programs.

**Concurrent Bachelor of Science (B.S.)/ Master of Science (M.S.) Degrees**

The department offers a concurrent enrollment degree program in either Biochemistry or Biophysics that allows ISU undergraduate students to obtain both the B.S. and M.S. degrees in about five years. The program is open to undergraduate students in the College of Liberal Arts and Sciences and in the College of Agriculture and Life Sciences. The concurrent degrees can be useful to students entering various career tracks. For those considering careers as research specialists, entry positions with higher-level responsibilities, and a higher-level salary, are made possible with the M.S. degree. For those considering careers as research directors, which require advanced study, the M.S. degree provides an advantage for admission into Ph.D. programs at the most competitive and prestigious graduate schools. Similarly, the M.S. degree can be a competitive advantage for admission in to medical, dental, law, veterinary medicine, or other professional schools.

Application to the program is made near the end of the junior undergraduate (third) year. Concurrent B.S/M.S. degree students begin research for the M.S. thesis during the summer semester after their junior year and are eligible for research assistantships, which are renewable based on academic standing and satisfactory research performance. The M.S. thesis requires intensive experience in original, independent laboratory research under the close supervision of a faculty mentor. To apply, see the concurrent B.S./M.S. application instructions found on the department's Graduate Study web page (https://www.bbmb.iastate.edu/graduate-study/).

**Concurrent Bachelor of Science/Graduate Certificate**

The Bachelor of Science /Graduate Certificate program is intended for exceptional undergraduate students majoring in Biochemistry. In this program, the student completes all of the requirements for the B.S. degree and the graduate certificate in a four-year period by combining the requirements of the two programs. The student enters the Graduate College after he/she achieves junior status and develops a plan of coursework (graduate and undergraduate) subject to the approval of the Director of Certificate (DOC). Required graduate courses are BBMB 504, 505, 506, 507, 561 and 561L. The student must satisfy the requirements of the B.S. in Biochemistry (121 credits) and the Graduate Certificate in Biochemistry (12 credits). Six credits of graduate coursework can satisfy some requirements of the B.S. degree. To apply for the B.S./Graduate Certificate, submit the application form found on the Graduate College Forms web page.

Biochemistry and Biophysics are the science and technology used to understand the mechanisms underlying biological processes at the molecular level, with an emphasis on the fundamental relationships among the chemical, physical, and biological sciences. The Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology (BBMB) administers Doctor of Philosophy (Ph.D.), Master's (M.S.), and Graduate Certificate programs (https://www.bbmb.iastate.edu/graduate-study/) that lead to an advanced degree or certificate in these disciplines. The
prerequisite to graduate study is a sound undergraduate background in biology, chemistry, mathematics, and physics.

BBMB offers Doctor of Philosophy and Master’s degrees in Biochemistry and in Biophysics that are designed to train students to independently conceive and carry out original research. BBMB also offers two graduate certificate programs in Biochemistry that provide a mechanism for formal recognition of focused graduate study in a specialized area that is less comprehensive than that required for a master’s degree. BBMB participates in the Interdepartmental majors of Bioinformatics and Computational Biology; Genetics and Genomics; Immunobiology; Molecular, Cellular, and Developmental Biology; Neuroscience; Plant Biology; and Toxicology. All graduate degree students in BBMB are required to teach as part of their training.

Master’s (M.S.) Degree

The M.S. degree programs in Biochemistry and in Biophysics are useful for students who prefer to undertake research training without the longer-term commitment required for the Ph.D. degree. It is also useful for students interested more in the technical aspects of research rather than in careers as research directors. The program requires about 3 years on average to complete and the successful defense of an independent research dissertation is required. About half the time required to earn the degree is spent on advanced coursework and professional seminars, and the other half is devoted to research undertaken in the laboratory under the close supervision of a faculty mentor. Financial support is available. To apply, applicants first submit the free BBMB online application found on the department website, which is used as a screening tool.

NOTE: Students interested in a research career are encouraged to consider the Ph.D. track. Students may enter the Biochemistry or Biophysics M.S. degree program as a direct admit to a faculty research group at any time during the year.

Doctor of Philosophy (Ph.D.) Degree

The Ph.D. programs in Biochemistry and in Biophysics are designed to train students in the ability to independently conceive and carry out original research in the general area of the chemistry or physics of the processes of life. The programs require about 5-6 years on average to complete and the successful defense of an independent research dissertation. The majority of the time required to earn the degree is spent doing research on the dissertation project in the laboratory under the close supervision of a faculty mentor. Considerable time also is devoted to advanced coursework and professional seminars. Financial support is available. To apply, applicants first submit the free BBMB online application found on the department website, which is used as a screening tool. Students may enter the Biochemistry or Biophysics Ph.D. degree programs either as a rotation student in the fall semester or as a direct admit to a faculty research group at any time during the year.

Minor in Biochemistry

Graduate students in other M.S. and/or Ph.D. programs at ISU can earn a graduate minor in Biochemistry by completing 12 credits of the following courses with a grade point average of 3.0 or above: at least 6 credits from BBMB 504, 505, 506 and 507 and at least 6 credits of other BBMB 500- and 600-level courses. A student wishing to declare a minor in Biochemistry should arrange for a member of the graduate faculty in Biochemistry to serve on the POS Committee and submit the required form found on the Graduate College Forms page.

Graduate Certificate in Biochemistry

The graduate certificate in Biochemistry is designed for students who have a B.S. degree in Biochemistry or a related field and wish to advance their knowledge by taking additional coursework at the graduate level. The graduate certificate courses may be taken either on-line or on campus. Candidates for a graduate certificate in Biochemistry are admitted in the Graduate College. A total of 12 credits is required that include BBMB 504, 505, 506 and 507, plus four additional credits of BBMB coursework at the 500-level. The 12 credits earned in the graduate certificate program may be applied to meet the course requirements of a M.S. or Ph.D. program in Biochemistry at Iowa State University (ISU) if the student is accepted into one of these programs. To apply for the graduate certificate in Biochemistry, submit the ISU online application.

Biology

Interdepartmental Undergraduate Program

Iowa State University is a major center for research and education in the biological sciences. With over 200 faculty in the life sciences, students have the opportunity to learn from some of the nation’s leaders in biological research and teaching and to participate in innovative, meaningful research projects that explore frontiers of biology. Few other universities have such a wealth of faculty expertise available to undergraduate students, making Iowa State’s Biology Program the logical choice for those who want to participate in a thriving academic community.

The faculties of the Department of Ecology, Evolution, and Organismal Biology and the Department of Genetics, Development, and Cell Biology jointly offer the undergraduate biology major. This high quality academic program has the flexibility to accommodate a range of career goals while taking advantage of the university’s strengths in science and technology. A bachelor’s degree in biology provides excellent preparation for graduate study in biological disciplines ranging from the molecular to the ecological levels, and for entrance into various professional schools, such as human medicine, physical therapy, or veterinary medicine. The
major is well suited for those who plan to teach biology, who wish to enter government or industrial employment in health or environmental professions, or who prefer educational breadth as an end in itself. By working with our professional and faculty advisors, it is possible to design a unique program of study that will meet student needs and objectives.

Students with special interests and aptitudes should consider combining biology with a minor or a second major in another subject, such as chemistry, environmental studies, journalism, mathematics, music, statistics, or many other subjects offered by the university.

Customizing a degree

Biology encompasses an amazing diversity of disciplines and scales of study ranging from molecules to the biosphere. The Biology major offers a rich variety of coursework addressing most of the areas of biology. The major’s curriculum requirements offer tremendous flexibility in creating an individualized program of study to facilitate achievement of a student’s career goals, while simultaneously assuring some exposure to all areas of biology and providing complementary knowledge from supporting courses in chemistry, physics, and math/statistics.

While flexibility is the hallmark of the Biology major, the breadth of the field can also be challenging. Thus, in an effort to provide more guidance to students who desire such, the major also provides five advising tracks, or areas of specialization, for students who wish to focus on subfields of biology or who have specific career goals in mind. Course plans for each area of specialization are listed on the Biology web site. The areas are:

Pre-medical and Human Health Professions—This area emphasizes preparation for further study in medical school or allied human health professions such as dentistry, optometry, genetic counseling, physical therapy, occupational therapy, physician assistant, nursing, chiropractic, and others. It also will prepare students for a broad range of careers in the biological sciences. Students are urged to determine the specific entrance requirements for the professional schools where they might study and to plan a program of study accordingly, in addition to following the basic plan.

Pre-veterinary—An eventual degree in Veterinary Medicine can lead to a wide variety of careers, including private clinical practice in small animal medicine or agricultural animal production. But, pre-veterinary students can also prepare themselves for careers in animal research, public health, laboratory animal medicine, food safety, regulatory medicine, and education. Specific requirements for entrance to the Iowa State Veterinary College or other schools should be consulted as programs of study are planned, in addition to following the basic plan.

Molecular and Cellular Biology—Students specializing in this field will explore the structure, function, and interactions of the molecules and sub-cellular features that make up living cells. This area is particularly designed for those who plan to pursue a career in research in molecular or cell biology or in related areas such as biochemistry, genetics, microbiology, developmental biology, human medicine, or veterinary medicine. Many students in this area will choose to go on to graduate school.

Ecology and Conservation Biology—Ecologists examine the interactions and relationships that living organisms have with each other and their environment. Conservation biologists study the nature and status of Earth’s biodiversity with the aim of protecting species, their habitats, and ecosystems from excessive rates of extinction and loss. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Other opportunities

Teacher licensure—Biology majors seeking recommendation for licensure to teach biology in secondary schools must meet requirements of the Teacher Education Program as well as those of the Biology Program. In addition, they must apply formally for admission to the teacher education program. See the section on Teacher Education for a list of licensure areas, degree requirements, and other information about this program.

Undergraduate research—Students who have interests in biological research are encouraged to become involved in the research projects of faculty members on campus. Those doing so may receive credit for the experience in BIOL 499 Undergraduate Research Experience. Making the effort to find a suitable research mentor and engaging in research work can be one of the most valuable experiences of an undergraduate education. Internship experiences are often available at other universities, zoos, museums, governmental and non-governmental entities focused on environmental issues, and industrial or government laboratories. Students participating in such projects may receive internship credit in BIOL 494 Biology Internship.

Field trip courses—The Biology Program offers two field trip courses: BIOL 393 (North American Field Trips in Biology) and BIOL 394 (International Field Trips in Biology). In recent years field trip opportunities to the Boundary Waters area of Minnesota, Honduras, and Spain have been available. These courses involve a pre-trip seminar.
followed by one-week to one-month long field trip at a time when academic year classes are not in session. The classes are low enrollment and allow extensive interaction between instructors and students in locations of biological interest.

International experience—Because major discoveries in science often result from global efforts, biology majors are encouraged to include an international or study abroad component in their degree programs. This can be done by participating in international field trips originating from the ISU campus in BIOL 394 International Field Trips in Biology. In addition, many students choose to study abroad, attending a university in another country for up to a year as an exchange student. Minors in a foreign language can also add an international emphasis to a degree in biology.

**Courses offered at other locations**

In addition to biological science courses taught on campus, students may take courses at various remote locations and arrange to have the credits count toward the advanced courses required in the biology major. Attending a summer field station adds an important component to an undergraduate program of study.

Gulf Coast Research Laboratory--The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for marine biology courses and transfer credit to their degree programs under the number BIOL 480 Studies in Marine Biology. Written permission of the Biology Program Director is required for this arrangement.

Summer Biological Field Stations--Courses taken at summer field stations may be transferred to Iowa State University as credit in BIOL 481 Summer Field Studies. Such stations are found throughout the country and often offer courses that emphasize the adaptation of plants and animals to unique environments. See www.biology.iastate.edu (http://www.biology.iastate.edu/) for links to Iowa Lakeside Laboratory and other field stations in different biomes, e.g., marine/coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mts., etc.

Organization for Tropical Studies--Iowa State students may register for courses in tropical biology taught in Costa Rica by the Organization for Tropical Studies. Credit is transferred to Iowa State as BIOL 482 Tropical Biology. For further information, contact the Biology Student Services Office in 103 Bessey Hall.

**Student Learning Outcomes**

Upon graduation, students should be able to:

- Explain and apply the core biological concepts of:
  - Evolution
  - Structure and function
  - Information flow, exchange, and storage
  - Pathways and transformations of energy and matter
  - How systems are interconnected and interact
  - Apply the process of science
  - Use quantitative reasoning
  - Use modeling and simulation
  - Utilize, communicate with, and collaborate with other disciplines
  - Understand the relationship between science and society

**Undergraduate Study**

Biology majors start their studies in the biological sciences by taking a two-semester long Principles of Biology course sequence:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 211</td>
<td>Principles of Biology I</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 211L</td>
<td>Principles of Biology Laboratory I</td>
<td>1</td>
</tr>
<tr>
<td>BIOL 212</td>
<td>Principles of Biology II</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 212L</td>
<td>Principles of Biology Laboratory II</td>
<td>1</td>
</tr>
</tbody>
</table>

During the first year, students also take BIOL 110 Introduction to Biology and BIOL 111 Opportunities in Biology, which are half-semester courses designed to introduce the student to the discipline of biology and opportunities for careers in biology. Students transferring into the Biology major take BIOL 112 in place of BIOL 110 and BIOL 111.

Students then explore, in any order depending on their interests, four upper-level core courses including: concepts of ecology in BIOL 312; the principles of genetics in BIOL 313 and BIOL 313L; cell and molecular biology in BIOL 314; and evolutionary biology in BIOL 315. Biology majors must take an additional 21 credits of advanced biological science courses at the 300 level, or above, from an approved list of courses. Many of these courses have as prerequisites BIOL 211L and BIOL212/L, so students do not need to complete the four upper-level core courses before taking advanced courses. Of these advanced courses, at least 9 credits must be taken as BIOL courses, and a minimum of two laboratory or field courses must also be included from an approved list.

Biology majors should carefully consider their selection of upper-level courses to allow them to emphasize one, or more, of the sub-disciplines of Biology relevant to their post-baccalaureate objectives. Most biology courses numbered 300 or above can be used to satisfy the additional credit requirement. Some courses taught in other departments can also be applied to the biology major. Advanced students should consider including 500 level courses in their programs. The Biology Program's web site has a complete listing of acceptable upper-level life science courses.

Biology majors must demonstrate competency in their understanding of the biological sciences. A 2.0 cumulative average is required in biology and advanced biology coursework. In order to graduate, a student must have a cumulative average in the major of at least 2.00.
General requirements

Students may earn the B.S. degree in Biology from either the College of Liberal Arts and Sciences or from the College of Agriculture and Life Sciences. Students in the College of Liberal Arts and Sciences must fulfill the foreign language and general education requirements for that college. Students in the College of Agriculture and Life Sciences must meet the general education requirements for that college. Contact the Student Services Office for details regarding differences in general education and course requirements that are specific to these colleges.

Supporting course requirements—Understanding biology requires a basic understanding of the physical sciences and mathematics. Consequently, a minimum number of credits in general chemistry, organic chemistry, biochemistry, and physics is required. See the Biology Program Web Site for specific supporting science requirements.

The Math requirement is competency based. After demonstrating competency in algebra and trigonometry, biology majors must take two semesters of calculus; or two semesters of Statistics; or one semester of calculus and one semester of Statistics chosen from a list of approved courses available on the Biology Program Web Site and in the Biology Program Office.

Given the important role of communications in the modern sciences, biology majors must demonstrate communication competency by earning a minimum of C in ENGL 250 Written, Oral, Visual, and Electronic Composition or equivalent composition courses and in one advanced writing course numbered ENGL 302 through ENGL 316, or JL MC 347, or SP CM 212. (Students in the College of Agriculture and Life Sciences are required to earn a C or better in ENGL 150, as well.)

Curriculum in Biology

Administered by the Departments of Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology. Students should consult the Biology Student Services Office, 103 Bessey (or biology@iastate.edu) for the appropriate course selections for professional or graduate school preparation.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Biology: 23.5 cr.

2.00 GPA average required.

**Graduate Programs**

Biology is an undergraduate major only. Persons interested in graduate study in the biological sciences should apply directly to one of the life science graduate programs at Iowa State University.

**Programs**

- Bioinformatics and Computational Biology
- Ecology and Evolutionary Biology
- Genetics
- Molecular Cellular and Developmental Biology
- Neuroscience
- Plant Biology
- Toxicology
- Immunobiology
- Environmental Science

**Interdisciplinary Graduate Studies**

A non-thesis master's degree in Interdisciplinary Graduate Studies (biological sciences) has been established particularly for those who wish to have a more diversified program of advanced study than that generally permitted by specific departments and programs.

**Community Development**

Interinstitutional Graduate Program

http://www.agonline.iastate.edu/programs/community-development-ms

Community Development deals with challenges faced by communities in the United States and other countries, particularly those in rural areas. Global economic restructuring and the devolution of government services have produced an environment in which Community Developers are called on to think and act in innovative ways.

Community Development is a progressive field, actively promoting positive social, economic, cultural and environmental change. It encourages people to see the “whole picture,” engaging citizens in democratic decision making and action.

In the Great Plains IDEA Community Development Master’s degree program, a diverse faculty from several institutions teaches critical thinking, ethical consideration, careful planning and involvement of all stakeholders. A Master’s degree in Community Development equips the student with a breadth of perspective and depth of cutting-edge material in the field.

The Great Plains IDEA online Master’s program is ideal for Community Development students and practitioners. Students seeking a professional career in Community Development can attain the necessary knowledge base without commuting or relocating. Community Development practitioners who wish to augment their training can use the skill set gained through the Community Development Master’s degree to work most effectively in, or to advance beyond, their current position.

A Master’s degree in Community Development is ideal for professionals in a wide variety of fields:

- Community and Regional Planning
- Sociology
- Economics
- Political science
- Geography
- Local Planning Departments
- Community Economic Development Organizations
- Cooperative Extension Services
- Housing Agencies
- Parks & Recreation
- Tribal Programs
- Non-Profit Organizations focusing on Community Enhancement

Students select one university to be their "home institution", this is the university to which you apply, enroll and pay tuition. Students must meet the admissions requirements of the home institution. Contact the Campus Coordinators Casey Smith and Michelle Zander at agonlineservice.iastate.edu or 800-747-4478 for more information.

**Participating Institutions:**

- Iowa State University
- Kansas State University
- University of Nebraska
- North Dakota State University
- South Dakota State University

Community Development is an inter-institutional distance education program offered through the Web. The student selects a home institution,
which grants the degree. After admission at the home institution, the student may take courses from any of the teaching institutions: Iowa State University, Kansas State University, University of Nebraska, North Dakota State University, and South Dakota State University.

At Iowa State University, Community Development is an area of specialization within the Interdisciplinary Graduate Studies degree program that consists of 37 semester credits for completion of the program. A thesis or creative component is required. A computer with minimum specifications, Web access, an email address and program forms are required for participating in the program.

**Registration**

Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU. See http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=70 (http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=70 for program requirements) for program requirements.

**Culinary Food Science (AGLS)**

The Culinary Food Science degree program is a food science-based degree in which students develop basic culinary skills along with knowledge of the accompanying sciences. As a graduate, you’ll combine food product development skills and entrepreneurial talents with scientific and technological knowledge.

The department also offers a culinary food science minor (http://catalog.iastate.edu/previouscatalogs/2022-2023/collegeofagricultureandlifesciences/foodscienceandhumannutrition/#undergraduateminortext).

**Student Learning Outcomes**

Upon graduation, students should be able to:

- Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
- Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
- Facilitate and participate effectively in a group, team, or organization.
- Plan life-long learning activities with the aim of improving professional skills.
- Integrate creativity, innovation, or entrepreneurship in ways that produce value.
- Describe sociocultural competence relative to diversity, equity and/or inclusion.
- Explain how human activities impact the natural environment and how societies are affected.

- Meet program specific learning outcomes for the Culinary Food Science major.

**Administered by the Department of Food Science and Human Nutrition**

**Total Degree Requirement: 120 cr.**

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

**International Perspectives: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications and Library: 10 cr.**

**Total Credits:** 16-17 14-15

---

**Notes:**
- Choose elective courses to total equal to or greater than 120 credits.
- Planned course offerings may change and students need to check the online Schedule of Classes each term to confirm course offerings: [https://classes.iastate.edu](https://classes.iastate.edu/).
- This sequence is only an example. The number of credits taken each semester should be based on the individual student's situation.
- Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

More information on the Culinary Food Science minor can be found here: [www.catalog.iastate.edu/collegeofagricultureandlifesciences/foodscienceandhumannutrition/#undergraduateminortext](http://www.catalog.iastate.edu/collegeofagricultureandlifesciences/foodscienceandhumannutrition/#undergraduateminortext).

### Dairy Science

Students majoring in Dairy Science will complete the degree requirements listed here. If desired, a student may also include the specialized option in pre-veterinary medicine. A minimum of 15 credits of animal science coursework must be earned at Iowa State University.

### Student Learning Outcomes

- Demonstrate a comprehensive knowledge of dairy science, dairy management, and agribusiness.
- Exhibit effective communication skills
- Integrate information to solve problems
- Effectively employ skills as a self-learner
- Participate as team leaders and team builders
- Demonstrate awareness of contemporary issues that drive change in animal industries

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

### International Perspectives

- Approved International Perspectives course 3

### U.S. Diversity

- Approved U.S. Diversity course 3

### Communications Proficiency

**Important Note:** This is only one of many equally-sound schedule sequences.

Free electives and specified group electives are often chosen to complement the student's career focus. The student's academic advisor assists with developing scheduling schemes that prepare students individually for careers in the animal industry. They are explained fully in AN S 110 and through appointments with the student's advisor in Dairy Science. Typical career areas include Advanced Degree in Dairy Science, Business and Finance, Agriculture Promotion and Information, Dairy Food Industry, Agricultural Sales and Marketing, International Agriculture, Animal Production and General Agribusiness and Pre-Veterinary Medicine.

Dairy Science, B.S. - pre-veterinary medicine option

## Diet and Exercise (AGLS)

### Overview

Diet and Exercise, B.S./M.S.
Administered by the Department of Food Science and Human Nutrition and Department of Kinesiology.

This is an accelerated program with concurrent enrollment in the undergraduate and graduate degree programs. Courses included have been approved as meeting the academic requirements of the Didactic Program in Dietetics (DPD) in preparation for admission to accredited dietetics internship programs; the DPD is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. There is a $30 fee for the verification statement of completion of the accredited dietetics program. Additionally, courses are included to meet the American College of Sports Medicine (ACSM) requirements for certification at the level of Certified Exercise Physiologist.

### Student Learning Outcomes

Upon graduation, students should be able to:

- Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
- Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
- Facilitate and participate effectively in a group, team, or organization.
- Plan life-long learning activities with the aim of improving professional skills.
- Integrate creativity, innovation, or entrepreneurship in ways that produce value.
- Describe sociocultural competence relative to diversity, equity and/or inclusion.
- Explain how human activities impact the natural environment and how societies are affected.
- Meet program specific learning outcomes for the Diet & Exercise major.

### Degree Requirements

**Total Degree Requirements: 122 cr. for bachelor's degree and 34-38 cr. for master's degree**

**International Perspectives: 3 cr.**

**U.S. Diversity: 3 cr.**

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements.

#### Communications and Library: 10 cr.

Total Credits: 20-22

Acceptance into the BS/MS PROGRAM is required BEFORE spring semester of the THIRD year.

Humanities and Ethics: 6-9 cr.

Select 6 credits from approved Humanities list

Select 3 credits from approved Ethics list

Note: If ethics course is on the humanities list, it can meet both requirements.

Diet and Exercise remaining undergraduate courses to complete the bachelor's degree requirements: 42 cr.

Planned course offerings may change, and students need to check the online Schedule of Classes each term to confirm course offerings: http://classes.iastate.edu/. This sequence is only an example.

Dietetics (AGLS)

Dietitians are nutrition experts who strive for optimal health and nutrition of individuals and the population. The curriculum for the dietetics program as well as the diet and exercise program meet the academic requirements of the Didactic Program in Dietetics and prepares students for a career in the field of dietetics. The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency for the Academy of Nutrition and Dietetics.

Student Learning Outcomes

Upon graduation, students should be able to:

- Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
- Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
- Facilitate and participate effectively in a group, team, or organization.
- Plan life-long learning activities with the aim of improving professional skills.
- Integrate creativity, innovation, or entrepreneurship in ways that produce value.
- Describe sociocultural competence relative to diversity, equity and/or inclusion.
- Explain how human activities impact the natural environment and how societies are affected.
- Meet program specific learning outcomes for the Dietetics major.

Administered by the Department of Food Science and Human Nutrition

The dietetics undergraduate curriculum meets the academic requirements as the Didactic Program in Dietetics and is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. Graduates of the program are eligible to apply for admission to accredited supervised practice programs/dietetics internships. There is a $30 fee for the verification statement of completion of the accredited dietetics program.
Total Degree Requirement: 120 cr.
Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.
Communications and Library: 10 cr.
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
LIB 160 Introduction to College Level Research 1
SP CM 212 Fundamentals of Public Speaking 3
Total Credits 10

Humanities and Social Sciences: 6-12 cr.
Select Humanities course from approved list 3
If H Sci student, select:
- Additional Humanities course 6
- Additional Humanities or Social Science course

Ethics: 3 cr.
FS HN 342 World Food Issues: Past and Present 3

Mathematical Sciences: 6-8 cr.
Select at least 3 credits from:
- MATH 140 College Algebra 3-4
- MATH 143 Preparation for Calculus
- MATH 160 Survey of Calculus
- MATH 165 Calculus I
Select at least 3 credits from:
- STAT 101 Principles of Statistics 3-4
- STAT 104 Introduction to Statistics
Total Credits 6-8

Physical Sciences: 9 cr.
Select from:
- CHEM 163 College Chemistry 3
- CHEM 163L and Laboratory in College Chemistry
- CHEM 171 General Chemistry I
- CHEM 171L and Laboratory in General Chemistry I
- CHEM 231 Elementary Organic Chemistry 3
- CHEM 231L Laboratory in Elementary Organic Chemistry 1
Total Credits 9

Biological Sciences: 17-18 cr.
BBMB 301 Survey of Biochemistry 3
BIOL 212 Principles of Biology II 3
BIOL 212L Principles of Biology Laboratory II 1
BIOL 255 Fundamentals of Human Anatomy 3
BIOL 255L Fundamentals of Human Anatomy Laboratory 1
Select at least 3 credits from:
- BIOL 256 Fundamentals of Human Physiology 3-4
- MICRO 201 Introduction to Microbiology 2
- MICRO 201L Introductory Microbiology Laboratory 1
Total Credits 17-18

Food Science and Human Nutrition: 42-43 cr.
FS HN 110 Professional and Educational Preparation 1
FS HN 167 Introductory Human Nutrition and Health 3
FS HN 214 Scientific Study of Food 3
FS HN 215 Advanced Food Preparation Laboratory 1-2
or FS HN 115 Food Preparation Laboratory
FS HN 265 Nutrition for Active and Healthy Lifestyles 3
FS HN 340 Foundations of Dietetic Practice 1
FS HN 360 Advanced Nutrition and the Regulation of Metabolism in Health and Disease 3
FS HN 361 Nutrition and Health Assessment 2
FS HN 362 Nutrition and Health Throughout the Lifecycle 3
FS HN 367 Medical Terminology for Health Professionals 1
FS HN 411 Food Ingredient Interactions and Formulations 2
FS HN 430 U.S. Health Systems and Policy 2
FS HN 445X Strategies for Personal Food Waste Reduction 1
FS HN 461 Medical Nutrition and Disease I 4
FS HN 463 Community Nutrition and Health 3
FS HN 464 Medical Nutrition and Disease II 3
FS HN 466 Nutrition Counseling and Education Methods 3
COMST 450B Special Topics in Communication Studies: Health Communication 3
Total Credits 42-43

Management: 12 cr.
HSP M 380 Food Production Management 3
HSP M 380L Food Production Management Experience 3
HSP M 391 Foodservice Systems Management I 3
Dietetics, B.S. (http://catalog.iastate.edu/previouscatalogs/2022-2023/collegeofhumansciences/dietetics/)

Note: This sequence is only an example, and the number of credits taken each semester should be based on the individual student’s situation.

Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

More information on minors offered through Food Science and Human Nutrition can be found here: http://catalog.iastate.edu/collegeofagricultureandlifesciences/foodscienceandhumannutrition/undergraduateminortext.

The Department of Food Science and Human Nutrition offers a Master of Professional Practice in Dietetics (M.P.P.). More information on the program can be found here: http://catalog.iastate.edu/collegeofhumansciences/professionalpracticeindietetics/.

### Entomology

#### Undergraduate Minors

All minors require at least 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

#### Minor - Insect Science

The department offers a minor in Insect Science that may be earned by completing ENT 370 Insect Biology and 12 credits in courses selected from an approved list supplied by the department.

#### Minor - Global Health

The Global Health minor is a transdisciplinary program designed for students who seek a broad and flexible set of skills for understanding contemporary health challenges and broad-based thinking in finding solutions. Humans are at the core of Global Health, which is viewed and addressed through an understanding of disease, disease transmission, health and well-being. Global health incorporates all cultures and places and integrates knowledge of health’s social, anthropological, historical, biological, and ecological dimensions. The program cultivates capacities to deal with complex problems across disciplines and social constructs.
how to identify the critical issues, ask the right questions, and create solutions that are meaningful, lasting and effective.

**Requirements of the Global Health minor**

The Global Health minor will consist of selecting courses that have at their core a focus on health, disease transmission, and social aspects that pertain to health. The minor will require a minimum of 15 credit hours with all students required to take Global Health (V MPM/MICRO/GLOBE 360) and Insects and Our Health (ENT/MICRO 374). The remaining credits to fulfill the minor will come from courses listed in two tracks:

- 1. Biological sciences of health
- 2. Social sciences aspects of health

Students must select a minimum of three credits from each of the two tracks, and an additional three credits from either track. Students may petition to take courses not on the approved list, providing these courses can be shown to include substantial study related to global health.

**Required for Global Health minor:**

**Graduate Study**

The department offers work for the master of science and doctor of philosophy degrees with a major in entomology. Studies at the Ecosystem, Organismal, and Subcellar levels occur in the following areas:

- aquatic entomology, biological control, chemical ecology, ecology, host plant resistance, insecticide toxicology, medical/veterinary entomology, pathology, pest management, physiology, population genetics, or systematics.

Graduates have a broad understanding of entomology and related disciplines, and an in-depth command of their area of concentration. They are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex problems facing entomology or toxicology professionals, taking into account related ethical, social, legal, economic, and environmental issues. They are skilled in research methods, data analyses, and interpretation of results. They also are skilled in working effectively with their colleagues, and writing concise and persuasive grant proposals. They have an understanding of and can critically evaluate current entomological literature.

Prerequisite to the entomology major and to minor graduate work in the department is completion of at least two years of zoological courses, for part of which credit in other closely allied biological sciences may be substituted. Specific course requirements for advanced degrees depend partly upon previous training and experience in the major field of specialization.

Any student receiving the M.S. in entomology shall have at least one course in insect physiology, one course in insect systematics, two courses of ENT 590 Special Topics (selected from topics A through D, F through I, M and N, inclusive), and at least 1 credit of ENT 600 Seminar.

Any student receiving the Ph.D. in entomology shall have at least one course in insect physiology, one course in insect systematics, four additional courses of ENT 590 Special Topics (selected from topics A through D and F through I, M through N inclusive), and at least 1 credit of ENT 600 Seminar. At least one 590 must be taken from each of these subgroups: Population (C, D, N); Organismal (A, B, F, M); and Suborganismal (G, I).

In addition, Ph.D. students majoring either in Entomology or Toxicology shall have two semesters of teaching experience, taken as ENT 590K Special Topics: Teaching Experience. both semesters or ENT 590K Special Topics: Teaching Experience. one semester and ENT 590L Special Topics: Extension Internship. the other semester.

A student can receive a Ph.D. minor in Entomology by taking 3 Entomology courses (500 level and above) for a total of 9 credits to be determined by the student's POS committee and approved by the Entomology Director of Graduate Education.

An option for an emphasis in molecular Entomology is available. Any student receiving the M.S. in entomology with an emphasis in molecular entomology is required to take:
<table>

Entomology participates in the interdepartmental majors in ecology and evolutionary biology; genetics; microbiology; molecular, cellular and developmental biology; sustainable agriculture; and in the interdepartmental major and minor in toxicology (see Index).

The Federal Corn Insects and Crop Genetics Research Unit is available for advanced study in certain phases of entomological research.

More information about the department, such as current research, faculty resumes, physical facilities, and graduate students can be viewed on the department's website at www.ent.iastate.edu (http://www.ent.iastate.edu). Curriculum assessment for the department can be viewed here: http://www.ent.iastate.edu/assessment (http://www.ent.iastate.edu/assessment/).

**Environmental Science**

**Interdepartmental Undergraduate Programs**

Environmental Science provides an integrated, quantitative, and interdisciplinary approach to the study of environmental systems. The magnitude and complexity of environmental problems are creating a growing need for scientists with rigorous, interdisciplinary training in environmental science. The Environmental Science program is designed to prepare students for positions of leadership in this rapidly changing discipline. Environmental Science graduates have a solid foundation in biological and physical natural sciences and the specialized training necessary for integrated analysis of environmental systems.

**Undergraduate Study**

The Environmental Science undergraduate major is offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Sciences. Environmental Science majors complete foundation courses in biology, chemistry, earth science, geology, physics and mathematics, plus a major consisting of an integrated core of Environmental Science courses and additional advanced course work in Environmental Science. Scientific rigor is stressed throughout the program, beginning with the foundation courses in the first two years of the curriculum. The upper level core courses emphasize a dynamic systems approach that provides a framework for integrating physical, chemical, and biological aspects of environmental systems.

**Student Learning Outcomes**

Upon graduation, students should be able to:

Demonstrate a broad understanding of environmental systems and issues utilizing an interdisciplinary framework to integrate ideas and concepts from biological and physical natural sciences

Demonstrate proficiency in data analysis and problem-solving of relevant environmental systems/problems
Use a systems approach to conduct integrated, quantitative, and interdisciplinary analyses and modeling of environmental systems and problems.

College of Agriculture and Life Sciences

Students seeking an Environmental Science major complete the following:

1. A foundation of approved supporting courses in science and mathematics including biology, chemistry, earth science, physics, calculus, and statistics.

2. 32 credits of course work in the major, including a required core of 20 credits.

A combined average grade of C or higher is required in courses applied in the major.

### 1. Environmental Science: 32 credits

1. Students complete at least 27 credits in Environmental Science including ENSCI 110, 201, 250, 381, 382, and 15 additional credits of approved ENSCI coursework.

2. Students complete at least 15 credits in humanities and social science including at least 3 credits each in ethics, humanities, social science, U.S. Diversity, and International Perspectives from approved lists.

3. Students choose one course from the following Earth Science related courses: AGRON 182, BIOL 212, GEOL 100, GEOL 201, MTEOR 206. Students choose from one of the following Organic Chemistry options: CHEM 231 & 231L, CHEM 331 & 331L, BBMB 221, or AGRON 259.

**Graduate Study**

Contact information for the graduate program:

- Lynette Edsall: camelot@iastate.edu (mstolt@iastate.edu)
- 515-294-1191
- https://enscigrad.iastate.edu/

The Environmental Science graduate program offers an interdepartmental curriculum leading to M.S. and Ph.D. degrees with a major in Environmental Science. Faculty from the colleges of Agriculture
and Life Sciences, Engineering, and Liberal Arts and Sciences cooperate to offer courses and research opportunities covering a broad array of environmental topics. Cooperating departments include Agricultural and Biosystems Engineering; Agronomy; Animal Science; Civil, Construction and Environmental Engineering; Ecology, Evolution and Organismal Biology; and Geological and Atmospheric Sciences.

Applicants should have completed an undergraduate or master's degree in one of the biological, chemical, physical, or engineering sciences or should have equivalent preparation.

The Environmental Science Graduate Program emphasizes fundamental concepts and research, which at the same time address major environmental issues. The curriculum is designed to provide the interdisciplinary approach needed in environmental science education and research. In addition to work in their chosen area of specialization, students are afforded a broad exposure to the biological, chemical and physical aspects of environmental systems and the specialized training necessary for integrated analysis of these systems.

Information on application procedures, curriculum requirements, and faculty research areas is available on the Environmental Science Graduate Program website (https://enscigrad.iastate.edu/).

Food Science (AGLS)

Food science is a degree program focused on food issues from the time crops leave the field until consumers buy the food products. Food scientists apply basic science (chemistry, biology, physics) to improve processing, preservation, and safety of food and to develop new food products. The food science major is approved by the Institute of Food Technologists.

Student Learning Outcomes

Upon graduation, students should be able to:

• Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
• Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
• Facilitate and participate effectively in a group, team, or organization.
• Plan life-long learning activities with the aim of improving professional skills.
• Integrate creativity, innovation, or entrepreneurship in ways that produce value.
• Describe sociocultural competence relative to diversity, equity and/or inclusion.
• Explain how human activities impact the natural environment and how societies are affected.
• Meet program specific learning outcomes for the Food Science major.

The department also offers a food science minor.

Administered by the Department of Food Science and Human Nutrition

Courses listed below are required.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.
Communications and Library: 10 cr.

* Choose elective courses to total equal to or greater than 120 credits.

**Note:** This sequence is only an example. The number of credits taken each semester should be based on the individual student’s situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point considerations.

More information on the Food Science, Food Safety, and Food Society minors can be found here: [http://catalog.iastate.edu/collegeofagricultureandlifesciences/foodscienceandhumannutrition/#undergraduateminortext](http://catalog.iastate.edu/collegeofagricultureandlifesciences/foodscienceandhumannutrition/#undergraduateminortext).

The Department of Food Science and Human Nutrition offers a Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) in Food Science and Technology. More information can be found here: [https://www.grad-college.iastate.edu/academics/programs/apresults.php?id=50](https://www.grad-college.iastate.edu/academics/programs/apresults.php?id=50).

### Food Science and Human Nutrition

The Department of Food Science and Human Nutrition is jointly administered by the College of Agriculture and Life Sciences and the College of Human Sciences. All curricula offered by the department are available to students in either college. These majors include:
• Culinary food science
• Dietetics
• Diet and exercise
• Food science
• Nutritional science
• Nursing

Visit the department web site at: www.fshn.hs.iastate.edu (http://www.fshn.hs.iastate.edu).

Undergraduate Study

Culinary Food Science
Culinary food science is an interdisciplinary degree combining a strong food science foundation with acquisition of culinary skills. The program includes chemistry, organic chemistry, biology, microbiology, and biochemistry as well as quantity food production, fine dining management, and food safety and sanitation. Internship experience in the food industry or culinary business is required. Culinary food science graduates are qualified to work as managers and specialists in food research, product development, culinary applications, and food marketing and sales. For more information: https://fshn.hs.iastate.edu/find-your-major/culinary-food-science/

Dietetics
The Didactic Program in Dietetics (DPD) is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. The dietetics undergraduate curriculum meets the academic requirements as the DPD. Additionally, the curriculum for concurrent Bachelor’s and Master’s degrees in diet and exercise meets the academic requirements of the DPD. Graduates of the program are eligible to apply for admission to accredited dietetics internships/supervised practice programs. Upon successful completion of the experience program, graduates are eligible to take the national examination administered by the Commission on Dietetic Registration to become a Registered Dietitian (RD) / Registered Dietitian Nutritionist (RDN) and to practice in the field of dietetics. There is a $30 fee for a statement of verification of completion of the DPD. For information about verification statements policies, see the dietetics program website: https://fshn.hs.iastate.edu/find-your-major/dietetics/.

The dietetics program includes study in basic sciences, nutrition, and food science with applications to medical dietetics, nutrition counseling and education, and community nutrition. Foodservice management is also an important aspect of the program. Graduates work in clinical settings, consulting, food companies, food services, sports or athletic programs, corporate wellness programs, care facilities for patients from neonatal to geriatric, and community or school health programs.

Diet and Exercise
A program for concurrent Bachelor of Science and Master of Science (BS/MS) degrees in diet and exercise (https://fshn.hs.iastate.edu/find-your-major/diet-and-exercise/) is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FSHN), within the College of Agriculture and Life Sciences and College of Human Sciences, and the Department of Kinesiology within the College of Human Sciences. Students interested in this program enroll as prediet and exercise students. In the fall of the third year, students apply for admission to the BS/MS program. Students not accepted into the program can continue toward completion of the BS degree in dietetics or kinesiology and health. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of BS/MS degrees in diet and exercise.

Food Science
Food science is a discipline in which the principles of biological and physical sciences are used to study the nature of foods, the causes of their deterioration, and the principles underlying the processing and preparation of food. It is the application of science and technology to the provision of a safe, wholesome, and nutritious food supply. Biotechnology and toxicology interrelate with food science in the area of food safety. In the food industry, food scientists work in research and development of products or processes, production supervision, quality control, marketing and sales, test kitchens and recipe development, product promotion and communication. Food scientists also work in government regulatory agencies and academic institutions.

The food science major is approved by the Institute of Food Technologists, the national professional organization of food science. Career options include quality control/assurance; production supervision; management and sales; research careers in the food industry, government, or academia; business; journalism; food product formulation and recipe development; food promotion and communication; and consumer services in government and industry. For more information: https://fshn.hs.iastate.edu/find-your-major/food-science/

Students in food science have the opportunity to pursue a Master of Business Administration (http://www.fshn.hs.iastate.edu/undergraduate-programs/food-science/)(MBA) concurrently with the Bachelor of Science (BS) degree in food science. The program is designed so students can earn both the BS in food science and MBA in five years, to meet the needs of students who are interested in management careers in the food industry. Students apply for admission to the MBA program in the spring of the third year. The program for concurrent BS in food science/MBA degrees is a rigorous 5-year program, and admission is very selective.
Nutritional Science
Nutritional science looks at the connection between diet and health. Students learn how diet can play a crucial role in the cause, treatment, and prevention of many diseases. There are degree program options within nutritional science. The pre-health professional and research option coursework prepares students for work in research laboratories, graduate study in nutrition or biological sciences, or entrance into health professional programs, such as medical, dental, physician assistant, and pharmacy schools. Students gain a strong science education along with human nutrition expertise. Additional options in health coach and nutrition and wellness prepare students for work positions in program planning and evaluation for community, public health, non-profit, and corporate wellness programs addressing the growing public interest in nutrition, wellness, and preventative health. Students learn about the role of nutrition and healthy eating for disease prevention and wellness. For more information: https://fshn.hs.iastate.edu/find-your-major/nutritional-science/

Nursing
The Bachelor of Science in Nursing (BSN) program at Iowa State University is a RN-to-BSN program, designed for those who are already a Registered Nurse (RN), and desire to further their nursing career and education to the next level. Iowa State’s RN-to-BSN program provides interactive learning opportunities where students can apply their real-world experiences and education to inspire innovation in their places of care. RN-to-BSN students will be challenged to enhance health promotion and disease prevention, apply nursing science and evidenced-based patient-centered care, focus on the culture of health for nurses, individuals, and communities, and demonstrate the continuum of care, from a nurse’s self-care to patient care to community and population health.

Effective October 12, 2020, this nursing program is a candidate for initial accreditation by the Accreditation Commission for Education in Nursing. This candidacy status expires on October 12, 2022.

For more information and RN-to-BSN learning outcomes: https://fshn.hs.iastate.edu/find-your-major/nursing/

Departmental Learning Outcomes

Students will be able to: 1) demonstrate a high level of technical competence in their chosen field, perform successfully in a graduate program, supervised practice program or entry-level professional position; 2) communicate effectively as professionals; 3) successfully solve complex problems on their own and as members of a team; 4) correctly interpret and critically evaluate research literature as well as data from professional practice; 5) critically evaluate information related to food science and nutrition issues appearing in the popular press; 6) prepare and deliver effective presentations, orally and in writing, of technical information to professionals and to the general public; 7) thoughtfully discuss ethical, social, multicultural, and environmental dimensions of issues facing professionals in their chosen field. For more information: https://fshn.hs.iastate.edu/staff-and-faculty/resources/outcomes-assessment/learning-outcomes/.

Communication Proficiency is certified by a grade of C or better in 6 credits of coursework in composition (ENGL 150 (http://catalog.iastate.edu/previouscatalogs/2022-2023/search/?P=ENGL%20150) Critical Thinking and Communication and ENGL 250 (http://catalog.iastate.edu/previouscatalogs/2022-2023/search/?P=ENGL%20250) Written, Oral, Visual, and Electronic Composition or other communication-intensive courses) and a grade of C or better in 3 credits of coursework in oral communication.

Minors - Undergraduate

The department offers minors in:

- culinary food science
- food and society
- food safety (interdepartmental minor)
- food science
- nutrition

All minors require at least 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Prerequisites: Students must complete prerequisite requirements for courses included in the minor.

Minor in Culinary Food Science

**Graduate Study**

The Food Science and Human Nutrition (FSHN) Department offers coursework for the degrees master of science and doctor of philosophy. Degree options include:

- food science and technology (https://fshn.hs.iastate.edu/graduate-students/graduate-programs/food-science-and-technology/) (MS and PhD)

- meat science (http://www.ans.iastate.edu/section/meat/?pg=degree) (MS and PhD; co-major in animal science)

- nutritional sciences (https://fshn.hs.iastate.edu/graduate-students/graduate-programs/interdepartmental-graduate-program-in-nutritional-sciences/) (MS and PhD; interdepartmental graduate program)

- family and consumer sciences/dietetics (https://online.hs.iastate.edu/graduate-degrees/dietetics/) (MS only)

- diet and exercise (https://fshn.hs.iastate.edu/graduate-students/graduate-programs/diet-and-exercise/) (BS/MS)

- nutritional sciences (BS/MS)

Prerequisite to major work is a baccalaureate degree in food science, nutrition, other physical/biological sciences or engineering that is substantially equivalent to those at Iowa State University.

Students taking major work for the degree doctor of philosophy either in food science and technology or in nutritional sciences may choose minors from other fields including anthropology, biorenewable resources and technology, chemistry, biochemistry, economics, education, journalism, microbiology, psychology, physiology, statistics, toxicology, or other related fields.

The interdepartmental graduate program in nutritional sciences, administered through the Graduate College, under the auspices of the Chairs of FSHN and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. Graduate students will be able to select from three specializations: animal nutrition, human nutrition, or molecular/biochemical nutrition. The two main departments are FSHN and Animal Science, whereas other departments (such as Kinesiology; Biochemistry, Biophysics, and Molecular Biology; Agronomy; and Statistics) may also be involved.

The department participates in an online Master of Family and Consumer Sciences/Dietetics in conjunction with Colorado State University, Kansas State University, North Dakota State University, Oklahoma State University, South Dakota State University, University of Kansas Medical Center, and University of Nebraska through the Great Plains Interactive Distance Education Alliance. Students who are registered dietitians and are eligible for admission to the FSHN Master’s degree program may be admitted.

The department offers work for concurrent B.S. and M.S. degree programs that allow students to obtain both the B.S. and M.S. degrees in 5 years. The programs are available to students majoring in nutritional science or pre-diet and exercise, and students progress toward M.S. degrees in nutritional sciences or diet and exercise, respectively. Students interested in these programs should contact the department for details. Application for admission to the Graduate College should be made during
the junior year. Students begin research for the M.S. thesis or creative component during the summer after their junior year and are eligible for research assistantships.

Students graduating with advanced degrees in nutritional sciences and in food science and technology will demonstrate competency in their chosen discipline. Measurable outcomes will include the ability to: 1) design, conduct, and interpret research; 2) apply theoretical information to solve practical problems; 3) prepare and communicate discipline-specific information in written and oral forms to scientific and lay audiences; 4) facilitate learning in the classroom; and 5) submit a paper for publication in a peer-reviewed journal; and 6) secure professional-level positions in academia, industry, government, or health care.

Minors - Graduate

The department offers coursework for graduate minors in:

- food science/technology (https://fshn.hs.iastate.edu/graduate-students/graduate-programs/food-science-and-technology/)
- nutritional sciences (https://fshn.hs.iastate.edu/graduate-students/graduate-programs/interdepartmental-graduate-program-in-nutritional-sciences/)

Food Science and Technology Graduate Minor students must complete the following:

- 9 to 12 credits. Students without a background in food chemistry, food engineering/processing, and/or food microbiology are required to take FSHN 511, 513, and/or 514, respectively, in which case the graduate minor will constitute up to 12 credits.
- 9 credits of graduate level food science coursework as approved by the POS committee.
- Maximum of 3 credits at the 400 level.

Nutritional Sciences Graduate Minor students must complete the following:

- 9 to 12 credits are required. Students who have not taken FSHN 360 or its equivalent (advanced nutrition with a biochemistry perquisite) will need to take FSHN 360, in which case the Nutrition Graduate minor will constitute 12 credits.
- 9 credits of graduate level nutrition courses as approved by the POS Committee.
- NUTRS 501

Certificate - Undergraduate

Health Coach (https://kin.hs.iastate.edu/current-students/academics/health-coach-certificate/)

The undergraduate health coach certificate provides a rigorous academic and theoretical background in three components of health (nutrition, exercise and motivational coaching) required to prepare workers for the challenges of being a health coach.

Certificates - Graduate

Food Safety and Defense (http://www.fshn.hs.iastate.edu/graduate-program/food-safety-defense/)

The department offers an online 12-13 credit Graduate Certificate in Food Safety and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas State University and the University of Missouri through the Great Plains Interactive Distance Education Alliance. Students may be admitted if qualified for admission to the food science master's degree program.

Forestry

Administered by the Department of Natural Resource Ecology and Management.

The forestry curriculum offers courses dealing with the management of forest ecosystems for multiple benefits including biodiversity, recreation, water, wilderness, wildlife, and wood and fiber. Conservation and preservation of natural resources are emphasized. The department offers work for the Bachelor of Science degree with a major in forestry and options in forest ecosystem management, interpretation of natural resources, urban and community forestry, or natural resource conservation and restoration. Students select at least one of these options, all of which lead to a professional degree in forestry (Bachelor of Science). The forestry major has been accredited by the Society of American Foresters (SAF) since 1935. The Council for Higher Education Accreditation recognizes SAF as the specialized accrediting body for forestry education in the United States. The primary goal of the undergraduate curriculum in forestry is to educate foresters to be capable of scientifically managing the nation's forest lands and related ecosystems - private and public.

Graduates understand and can apply scientific principles associated with forests, forest ecosystem management, and wood and non-wood products. Graduates are able to communicate effectively and work well in teams. They are capable of preparing and delivering effective oral and written communication of scientific and technical decisions to professional and lay audiences. They are proficient in technical skills such as measurements, computer usage, inventory, economic analysis, data and situation analysis, and ecosystem assessment. They recognize the importance of ethics in forestry and are sensitive to cultural diversity and broad environmental concerns.

Graduates of the forest ecosystem management option are skilled at understanding how forests function and how forests can be managed
to produce desired goods (wood, fiber, recreation, wildlife habitat) and services (clean water, carbon sequestration, wilderness) in the long-run. They are skilled at interpretation of interactions and effects of abiotic and biotic factors in forests and quantification of bio-physical, social, and economic outputs from forest ecosystems. They are skilled at complex decision-making involving private and public forest resources where ethical, legal, social, economic, and ecological dimensions are explicitly considered.

Graduates of the interpretation of natural resources option are skilled at communicating with the public about the values associated with forest ecosystems and providing educational programs for all ages.

Graduates of the urban and community forestry option are able to combine biological, social, legal, and economic expertise to effectively manage trees or forests in an urban setting. They are skilled at decision-making related to site assessment, and long-term management of urban trees and forests to achieve multiple goals.

Graduates of the natural resource conservation and restoration option are skilled at assessing the natural functions of the environment and human impacts. They are skilled at interpretation of forest and other natural environments and making decisions relating to their conservation and preservation.

In consultation with their advisor, students can select elective courses related to the forest ecosystem management option to emphasize forest ecology; wildlife, wilderness, and recreation management; water quality and erosion protection; quantitative-analytical techniques; business and marketing; and other areas related to natural resource management. Elective courses in the urban and community forestry option can be selected to emphasize plant health, policy and planning, ecology, hydrology, sociology, business administration, or horticulture/design. Elective courses related to the natural resource conservation and restoration option can be selected to emphasize, ecology, wildlife, recreation, nature interpretation, landscape design, sociology and ethics of conservation and preservation. Elective courses in the interpretation of natural resources option can be selected to emphasize natural history, animal ecology, and environmental education.

Many private firms as well as national, regional, state, and local agencies seek forestry graduates to fill positions in management of natural resources for commodity and non-commodity multiple benefits. Graduates in forestry are prepared to be involved with evolving forestry systems, such as agroforestry and urban forestry. Wood processing industries, such as composite products, plywood, particle board, lumber, and pulp and paper offer professional opportunities in fiber procurement and marketing.

With advanced graduate study, the range of professional job opportunities for a person with a B.S. in forestry is expanded.

Opportunities include research and education as well as more specialized managerial and administrative positions with private firms and public agencies.

During fall semester of the second year of study (sophomore year, typically), forestry students are required to enroll in the department’s integrated forestry modules consisting of:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>FOR 201</td>
<td>Forest Biology</td>
<td>2</td>
</tr>
<tr>
<td>FOR 202</td>
<td>Sustainable Materials: Wood Utilization</td>
<td>2</td>
</tr>
<tr>
<td>FOR 203</td>
<td>Resource Measurements/Evaluation</td>
<td>2</td>
</tr>
<tr>
<td>FOR 204</td>
<td>Forest Ecosystem Decision-Making</td>
<td>2</td>
</tr>
<tr>
<td>FOR 205</td>
<td>Integrated Forestry Laboratory</td>
<td>3</td>
</tr>
<tr>
<td>FOR 206</td>
<td>Fall Forestry Camp</td>
<td>4</td>
</tr>
</tbody>
</table>

That semester, consisting entirely of forestry coursework, is designed to give students an early understanding of the many aspects of forestry and how they are interrelated. In addition to work in the classroom, students will spend time in laboratory and field work each week. A 3-week off-campus fall camp during the semester will reinforce concepts learned both in the classroom and during laboratory/field sessions. Transfer students should check with the department for counsel on timing their completion of the integrated forestry modules.

**Student Learning Outcomes**

Upon graduation, students should be able to:

1. Identify, explain and critically evaluate their own beliefs, values and actions in relation to professional and societal standards of ethics.

For any given situation, graduates identify, critically evaluate, and state their own beliefs and values as they relate to professional and societal ethical standards, for any given situation. They elaborate on how those values and beliefs impact their actions, and they explain which specific canons or principles of a professional code of ethics are applicable to a particular situation.

2. Anticipate, analyze and evaluate natural resource issues and opportunities, explaining the ecological, economic, and social consequences of natural resource actions at various scales and over time.

In the case of existing natural resource issues, graduates explain the ecological, economic, and social consequences that reasonably could be expected to occur as the result of actions taken to address the issue. The explanation includes considerations of the geographic area influenced by the issue as well as the time frame over which the consequences can be expected to occur. In the case of evolving circumstances, graduates predict natural resource issues that may arise
as a result of the circumstances and explain the ecological, economic and social consequences of those issues.

3. Actively seek the input and perspectives of diverse stakeholders regarding natural resource problems and issues.

Graduates identify the comprehensive list of individuals or groups who may be impacted by particular natural resource problems and issues. They are well versed in techniques for seeking and incorporating input and perspectives from those people, and they incorporate those inputs and perspectives into the decision-making process.

4. Assess, analyze, synthesize, and evaluate information fairly and objectively.

Not all information is equally sound or applicable in a particular situation. Graduates evaluate the validity and importance of information obtained from any source. Once evaluated, they use the information appropriately in the solution of natural resource problems.

5. Work effectively, both individually and with others, on complex, value-laden natural resource problems that require holistic problem-solving approaches.

Effective solution of natural resource problems often involves input from diverse constituencies with diverse value scales. When working individually, graduates incorporate those values into the solution of problems. Graduates work effectively with diverse individuals and groups to reach consensus on problem solutions.

6. Formulate and evaluate alternative solutions to complex problems and recommend and defend best alternatives.

The natural resource base with which we deal is capable of providing numerous goods and services to numerous publics. Graduates formulate multiple alternatives, as well as action plans, to achieve stakeholder objectives. They evaluate each of the feasible alternatives in terms of biological possibility, economic feasibility and social acceptability. They recommend best alternatives based on the stakeholders’ objectives, and they justify their recommendations on the basis of sound science.

7. Communicate clearly and effectively with all audiences using appropriate oral, visual, electronic, and written techniques.

Graduates utilize the best form, or forms, of communication for effectively conveying information to, or seeking input from, a particular audience. They are proficient in all forms of communication, and adjust their style or technique of communication to suit different audiences.

8. Recognize and interpret resource problems and opportunities across spatial scales from local to global.

Graduates recognize where resource problems and opportunities can or could exist, and they evaluate and interpret these for others. They, evaluate and interpret for individual landowners at a very local scale as well as for problems that span multiple ownerships, regions and ecosystems.

9. Appreciate cultural diversity and understand the impact of the global distribution of people and wealth on natural resource use and valuation.

Different cultures, population densities, and income classes value and use natural resources in very different ways. Because natural resources often are used simultaneously by different groups, it is important for graduates to be able to account for those differing uses and valuations when making management decisions about natural resources.

10. Exercise leadership skills as professionals and engaged citizens

Graduates organize, facilitate, and participate effectively in groups, teams, or organizations. They define problems or opportunities, implement action planning processes, work toward goals and justify actions taken.

11. Demonstrate creativity and innovation in identifying and pursuing opportunities that produce environmental, social, or economic value.

Graduates display creativity in a variety of situations, and identify opportunities to promote understanding of natural resource issues. They demonstrate persistence when working with individuals who have diverse interests in order to build consensus and facilitate accomplishing stated objectives.

12. Exercise life-long learning skills developed before graduation.

Graduates articulate why life-long learning is important. Graduates find answers to their questions as they arise throughout life. They are capable of determining what they need to know to effectively deal with an issue or situation, and they know how to obtain the necessary knowledge. They have learned how to learn in the absence of teachers.

Curriculum in Forestry

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency (with a C or better):

**Total Credits:** 16
* To complete degree program in 4 years students must maintain an average of 16 credits per semester.

** Initial math course is determined on the basis of high school math and placement test scores. A non-credit math course (MATH 10) may be required at additional course.

*** In scheduling coursework, students should pay particular attention to courses with limited offerings (e.g., offered only on alternate years) and to course sequences (i.e., where a course serves as a prerequisite for another course).

Note: In addition to coursework listed above, students must complete departmental requirements for Practical Work Experience requirement (NREM 104). See https://www.nrem.iastate.edu/workexperience

Forestry Minor
The department offers a minor in forestry which can be earned by completion of a minimum of 15 credits in forestry courses. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students wishing to emphasize management and environmental aspects of forestry must select at least 15 credits from the following courses:

Iowa State University the study of the life sciences is interdepartmental, involving faculty in the basic, agricultural, and veterinary sciences. Faculty in 20 different departments are involved in genetics research. This large group of faculty presents a broad range of possibilities for students to learn from faculty who are at the forefront of research in many areas of genetics.

Genetics
Genetics is the scientific study of heredity. Understanding the basis of heredity is fundamental to all aspects of the life sciences, from the most basic molecular study to applied studies of agricultural species. At

UNDERGRADUATE STUDY
Undergraduate study in genetics is jointly administered by three departments: the Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology; the Department of Genetics, Development, and Cell Biology; and the Department of Ecology, Evolution, and Organismal Biology. Undergraduate degrees are offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Science. Programs of study for genetics majors leading to a B.S. degree are available.

Training in genetics may lead to employment in teaching, research, or a variety of health-related professions. Although some students find employment directly after their baccalaureate training, many students continue their education in graduate or professional programs. Students with the B.S. degree may find employment in the biotechnology, health, or food industries. Recent graduates have also developed careers in conservation biology, technical writing, science journalism, technical sales, and business.

The required course work and associated electives provide students with the foundation in basic life sciences, mathematics, chemistry, and physics that is essential for professions involving modern biological/biomedical sciences. As part of these courses students develop skills in problem solving, critical thinking, writing, and research-related activities in the biological sciences.

Specific entrance requirements for medical and health-related professions are established by the professional schools. Students interested in fulfilling pre-professional requirements for such professions as dentistry, human medicine, genetic counseling, optometry, pharmacy, physical therapy, physicians assistant, and veterinary medicine can major in genetics while fulfilling the pre-professional requirements.

Student Learning Outcomes:

Upon graduation, students earning the BS degree in Genetics are expected to have achieved the following skills and capabilities:

- Comprehensive, detailed understanding of the chemical basis of heredity.
- Comprehensive and detailed understanding of genetic methodology and how quantification of heritable traits in families and populations provides insight into cellular and molecular mechanisms.
- Understanding of how genetic concepts affect broad societal issues including health and disease, food and natural resources, environmental sustainability, etc.
- Understanding the role of genetic mechanisms in evolution.
- The knowledge required to design, execute, and analyze the results of genetic experimentation in animal and plant model systems.
- The ability to recognize the experimental rationale of genetic studies as they are described in peer-reviewed research articles and grant proposals to federal and other funding agencies.
- The ability to evaluate conclusions that are based on genetic data.
- Insight into the mathematical, statistical, and computational basis of genetic analyses that use genome-scale data sets in systems biology settings.
- Understanding the role of genetic technologies in industries related to biotechnology, pharmaceuticals, energy, and other fields.
- Communication skills required in the discipline including oral presentations of research data, published research articles, grant proposals, and poster presentations at conferences.
- Teamwork and leadership skills including group analysis of data, working together in the research laboratory, joint compositions of written reports, substantive participation in research group meetings, etc.

**CURRICULUM IN GENETICS - REQUIREMENTS**

**Total Degree Requirement: 120 cr.**

A maximum of 65 cr. from a two-year institution can be applied that may include up to 16 technical cr.; up to 9 Pass-Not Pass cr. of free electives can be applied; a cumulative GPA of at least 2.0 is required for graduation. Program-approved lists can be found on the Genetics website.

### 1. Genetics and Life Sciences

A grade of C– or better is required in all Genetics and Life Science courses.

#### A. Courses required of all Genetics majors

</tbody>
</table>
### 5. International Perspectives: 3 cr. from university approved list

This course can satisfy both the university requirement for International Perspectives and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

### 6. U.S. Diversity: 3 cr. from university approved list

This course can satisfy both the university requirement for U.S. Diversity and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

### 7. Communications/Information Literacy

#### A. Courses required of all Genetics majors

Grades of C or better are required in ENGL 250 and advanced writing. (The College of Agriculture and Life Sciences requires a C or better in ENGL 150, as well.)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>

<tr>
<td>LIB 160</td>
<td>Introduction to College Level Research</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>One advanced English writing course from program approved list</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credits** 10

#### B. Course required of majors in the College of Agriculture and Life Sciences only.

A grade of C or better is required by the college.

- **SP CM 212**  Fundamentals of Public Speaking 3
- or **AGEDS 311**  Presentation and Sales Strategies for Agricultural Audiences 3

**Total Credits** 3

### 8. General Education electives

Courses from college approved lists that also appear on university approved lists of U.S. Diversity or International Perspectives courses can be used to satisfy both requirements.

#### A. College of Agriculture and Life Sciences

- Humanities course from college approved list 3
- Social Science course from college approved list 3
- Ethics course from college approved list 3

**Total Credits** 9

#### B. College of Liberal Arts and Sciences

- Humanities courses from college approved list; one of these should be a Science/Humanities bridge course from program approved list 12
- Social Science courses from college approved list 9

Students must have completed 3 years of a single world language in high school or take 4-8 credits of World Languages at the university level.

**Total Credits** 21

Global Resource Systems

The Global Resource Systems undergraduate major employs a truly interdisciplinary and systemic approach to understanding complex global resource issues. Students develop a core set of technical competencies in a resource area selected from the majors, minors and certificates offered by the College of Agriculture and Life Sciences. Students choose a world region in which to specialize, develop competency in a relevant world language, and participate in a significant cross-cultural internship experience. They carry out a senior project related to their resource specialization within the context of the world region. The undergraduate experience culminates with a senior capstone course, where students work with real-world clients to address global resource challenges.

Multidisciplinary themes are developed in the context of the physical, biological and socio-economic factors affecting global resource systems. In this context, resource systems include natural, food and agricultural, environmental, cultural and human, political and institutional, financial and built, public health and social resources. Graduates of this program have transnational leadership skills and are successful integrators of various specializations on a team. They are skilled in applying a systemic perspective and developing solutions to complex global resource systems problems using innovativeness and creativity. Future professionals communicate effectively and demonstrate environmental awareness, exhibit an ethical perspective, and display clear analysis of how cultural diversity impacts work both here and abroad. They also recognize opportunities for learning after graduation.

A degree in Global Resource Systems opens the door to employment opportunities in the many businesses and organizations that require globally competent employees.

Student Learning Outcomes

Upon graduation, students should be able to:

Understand sustainable global resource systems by summarizing factors of biological, physical, and social resources in global systems and predicting the consequences of the utilization and distribution of global resources and their systems; develop an attitude of curiosity to continue lifelong learning.

Apply global competency skills by recognizing diverse cultures, reflecting on the value of cultures on global resource systems, and employing skills needed to work in different cultures.

Design ethical and innovative solutions to global challenges by using information literacy skills to define global challenges and creating sustainable solutions to global challenges.

Use communication and leadership skills by communicating effectively with diverse audiences using written, oral, visual, and electronic skills and participating effectively as leaders in teams and organizations.

Curriculum in Global Resource Systems

Administered by a supervisory committee in the College of Agriculture and Life Sciences. Students choose a region of the world to develop an expertise; they choose a language to learn and develop proficiency through the intermediate level; they choose and possess an area of technical expertise by completing an additional major, minor or certificate program offered through the College of Agriculture and Life Sciences; they complete a required internship in an international setting; and they select and complete a senior research project with faculty mentoring.

Total Degree Requirement: 129 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

3 cr. from approved list

U.S. Diversity: 3 cr.

3 cr. from approved list

Global Resource Systems

Plus three credit hours from approved humanities list 3

Total Credits 6

Ethics: 3 cr.

3 cr. from approved list

Life Sciences: 7 cr.

BIOL 211 Principles of Biology I 4
& 211L and Principles of Biology Laboratory I

or BIOL 212 Principles of Biology II
& 212L and Principles of Biology Laboratory II

Plus 3 cr. from approved life sciences list at 300-level or higher 3

Mathematical Sciences: 6 cr.

MATH 140 College Algebra (or higher; except Math 195, 196) 3

STAT 101 Principles of Statistics 3-4
or STAT 104 Introduction to Statistics

Total Credits 6-7

Global Competency: 15-31 cr.

16 cr. of 100 and 200 level of a single WLC language; 15 cr. in global competency courses from an approved list with up to 3 cr. may be earned from a travel course.

Physical Sciences: 8 cr.

One of the following: 5

CHEM 163 College Chemistry
& 163L and Laboratory in College Chemistry
or CHEM 177 General Chemistry I
& 177L and Laboratory in General Chemistry I

One course from the following:

AGRON 182 Introduction to Soil Science
AGRON 282 Soil Conservation and Land Use
AGRON 206 Introduction to Weather and Climate
GEOL 101 Environmental Geology: Earth in Crisis
GEOL 160 Water Resources of the World

Total Credits 8

GLOBE 110 Orientation 1

3 credits of GLOBE 211

GLOBE 211 Issues in Global Resource Systems (Each offering is 1 cr., must be repeated for 3 cr.)

GLOBE 201 Introduction to Global Resource Systems 3

GLOBE 320 Global Resource Systems Internship Preparation 1

GLOBE 303 Agricultural, Food and Natural Global Resource Systems 3

GLOBE 304 Socio-Economic Global Resource Systems 3

GLOBE 401 Senior Project 3

GLOBE 402 Responses to Global Resource System Challenges 3

One of the following: 3-6

GLOBE 321 Internship - Global
GLOBE 322 Internship - United States

Total Credits 23-26

Technical Concentration: 15-18 cr.

Satisfied by any of the majors, minors or certificates offered through the College of Agriculture and Life Sciences.

Electives:

Sufficient coursework to ensure a total of not less than 129 credits

Horticulture

To meet the educational needs of a student population with interests ranging from plant physiology to landscape design/installation to fruit and vegetable production to golf course/athletic field construction and management, considerable flexibility is built into the horticulture curriculum. The diversity of interests and need for flexibility are reflected in the impressive array of horticulture courses offered.

The Department of Horticulture offers six options within the horticulture major:

1. Greenhouse Plant Production
2. Horticultural Food Crop Production and Management
3. Landscape Design, Installation, and Management
4. Public Horticulture
5. Horticulture Research
6. Turfgrass Management

Graduates possess the technical knowledge and skills to become professional horticulturists. They understand principles of life science, plant growth and development, and are familiar with cultural and management practices for a wide assortment of horticultural crops. They are able to work and communicate effectively with fellow horticultural professionals and other citizens who share an interest in horticulture. Graduates also understand the ethical and environmental dimensions of problems and issues facing horticultural professionals.

A degree in horticulture opens the door to employment opportunities with production nurseries, seed companies, interior landscaping firms, greenhouses, garden centers, conservatories, landscape design/installation firms, public gardens and arboretas, orchards and vineyards, food processing companies, vegetable farms, fertilizer cooperatives, agricultural chemical companies, golf courses, sports fields, sod production companies, and lawn care businesses. Several allied plant-science industries also provide employment opportunities in the areas of sales, management, and communication. Opportunities exist for careers in research, teaching, extension, and business after obtaining advanced training in graduate school.

Student Learning Outcomes

Upon graduation, students should be able to:

1. Acquire, integrate, and apply knowledge of plant science to manage systems.
2. Demonstrate interdisciplinary knowledge and competency in managing horticulture systems.
3. Synthesize knowledge and use insight and creativity to better understand and improve plant systems.
4. Appreciate and communicate the diverse impacts of horticulture on people.
5. Demonstrate professionalism and proficiency in skills that relate to horticulture.

Degree Requirements

Students majoring in horticulture will select an option in which to specialize before reaching junior standing and will fulfill the requirements described below under Options.

Total Degree Requirement: 129 credits

Only 65 credits from a two-year institution may apply which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

Biological Sciences: 18 cr.

**Total Credits** 18

**Communications Proficiency (with a grade of C or better)**
- 6 credits of English composition (see approved courses below)
- 3 credits of speech fundamentals (see approved courses below)

**Communication/Library: 13 cr.**
- ENGL 150  Critical Thinking and Communication 3
- ENGL 250  Written, Oral, Visual, and Electronic Composition 3
- LIB 160  Introduction to College Level Research 1
- ENGL 302  Business Communication or ENGL 309  Proposal and Report Writing or ENGL 314  Technical Communication 3
- One of the following:
  - SP CM 212  Fundamentals of Public Speaking 3
  - AGEDS 311  Presentation and Sales Strategies for Agricultural Audiences
- COMST 214  Professional Communication

**Total Credits** 13

**Ethics: 3 cr.**
- 3 cr. from approved list

**Humanities and Social Sciences: 6 cr.**
- Approved Humanities course
- Approved Social Science course

**Total Credits** 6

**International Perspective: 3 cr.**
- 3 cr. from approved list

**Total Credits** 3

**U.S. Diversity: 3 cr.**
- 3 cr. from approved list

**Total Credits** 3

**Life Sciences: 6 cr.**
- BIOL 211  Principles of Biology I
- Approved Life Sciences course

**Total Credits** 6

**Mathematical Sciences: 6 cr.**
- Select one course from the following:
  - MATH 140  College Algebra
  - MATH 150  Discrete Mathematics for Business and Social Sciences
  - MATH 165  Calculus I
- AND select one of the following:
  - STAT 101  Principles of Statistics
  - STAT 104  Introduction to Statistics
  - STAT 226  Introduction to Business Statistics I
  - STAT 301  Intermediate Statistical Concepts and Methods

**Total Credits** 6

**Physical Sciences: 11 cr.**
- Complete one of the following:
  - CHEM 163  College Chemistry & 163L  and Laboratory in College Chemistry & CHEM 17/General Chemistry I & 177L  and Laboratory in General Chemistry I
- AND complete one course from the following:
  - AGRON 259  Organic Compounds in Plants and Soils
  - CHEM 178  General Chemistry II & 178L  and Laboratory in College Chemistry II
  - CHEM 331  Organic Chemistry I & 331L  and Laboratory in Organic Chemistry I
  - PHYS 101  Physics for the Nonscientist
  - PHYS 115  Physics for the Life Sciences
  - PHYS 131  General Physics I & 131L  and General Physics I Laboratory
- AND complete one course from the following:
  - BBMB 221  Structure and Reactions in Biochemical Processes
  - CHEM 231  Elementary Organic Chemistry & 231L  and Laboratory in Elementary Organic Chemistry
CHEM 331  Organic Chemistry I
& 331L  and Laboratory in Organic Chemistry I
Total Credits 11-14

Horticultural Sciences: Minimum of 30 cr.
HORT 110  Professional and Educational Development in Horticulture.  1
HORT 221  Principles of Horticulture Science  3
HORT 321  Horticulture Physiology  3
HORT 445  Horticulture Management and Administration  2
Select 21 cr. hours from courses within selected option.  21
Total Credits Minimum of 30

Soil Sciences: 3 cr.
AGRON 182  Introduction to Soil Science  3
Total Credits 3

Electives
No more than 4 cr. of Hort 490 may count toward graduation.

Options
Greenhouse Plant Production
The following courses are required to meet the Horticulture requirement:
HORT 240  Trees, Shrubs, and Woody Vines for Landscaping  3
HORT 322  Plant Propagation  3
HORT 330  Herbaceous Ornamental Plants  3
HORT 331  Hydroponic Crop Production  2
HORT 332  Greenhouse and Nursery Operations and Management  4
HORT 434  Floriculture Crop Production  3
HORT 435  Landscape Plant Production  3
Other recommended courses are:
HORT 391  Horticultural Management Experience
HORT 424  Sustainable and Environmental Horticulture Systems
HORT 476  Horticultural Postharvest Technology
HORT 233  House Plants and Interiorscaping
Required for option:
ACCT 284  Financial Accounting  3
And select 9 cr. hours from the following:
ACCT 215  Legal Environment of Business
ACCT 285  Managerial Accounting
ACCT 416  Business Law

HORT 261  Introduction to Weather and Climate
COM S 103  Computer Literacy and Applications
ECON 101  Principles of Microeconomics
ECON 102  Principles of Macroeconomics
ECON 230  Farm Business Management
ECON 234  Small Business Management
ECON 334  Entrepreneurship in Agriculture
ENV S 461I  Introduction to GIS
ENTSP 313  Feasibility Analysis and Business Planning
MGMT 310  Entrepreneurship and Innovation
MGMT 370  Management of Organizations
MGMT 371  Organizational Behavior
MKT 340  Principles of Marketing
MKT 442  Sales Management
MKT 447  Consumer Behavior
TSM 270  Principles of Injury Prevention and Safety

Horticultural Food Crop Production and Management
The following courses are required to meet the Horticulture requirement:
HORT 276  Understanding Grape and Wine Science  3
HORT 376  Fundamentals of Field Production of Horticultural Food Crops
HORT 461  Fruit Crop Production and Management  3
HORT 471  Vegetable Production and Management Lab  1
HORT 476  Horticultural Postharvest Technology  3
Other recommended courses:
HORT 322  Plant Propagation
HORT 331  Hydroponic Crop Production
HORT 332  Greenhouse and Nursery Operations and Management
HORT 338  Seed Science and Technology
HORT 391  Horticultural Management Experience
HORT 484  Organic Agricultural Theory and Practice
Required for option:
ACCT 284  Financial Accounting  3
And select 9 cr. hours from the following:
ACCT 215  Legal Environment of Business
ACCT 285  Managerial Accounting
ACCT 416  Business Law
COM S 103  Computer Literacy and Applications
ECON 101  Principles of Microeconomics

Turfgrass Management

The following courses are required to meet the Horticulture requirement:

- **HORT 240**: Trees, Shrubs, and Woody Vines for Landscaping (3 credits)
- **HORT 351**: Turfgrass Establishment and Management (3 credits)
- **HORT 351L**: Turfgrass Establishment and Management Laboratory (1 credit)
- **HORT 451**: Professional Turfgrass Management (2 credits)
- **HORT 453**: Sports Turf Management (3 credits)
- **HORT 454**: Turf & Landscape Irrigation (3 credits)
- **HORT 551**: Growth and Development of Perennial Grasses (2 credits)

Other recommended courses:

- **HORT 330**: Herbaceous Ornamental Plants
- **HORT 322**: Plant Propagation
- **HORT 391**: Horticultural Management Experience
- **HORT 424**: Sustainable and Environmental Horticulture Systems

Required for option:

- **ACCT 284**: Financial Accounting (3 credits)

And select 9 cr. hours from the following:

- **ACCT 285**: Managerial Accounting
- **ACCT 416**: Business Law
- **AGRON 206**: Introduction to Weather and Climate
- **AGRON 360**: Environmental Soil Science
- **AGRON 459**: Environmental Soil and Water Chemistry
- **COM S 103**: Computer Literacy and Applications
- **ECON 234**: Small Business Management
- **ECON 334**: Entrepreneurship in Agriculture
- **ENSCI 461I**: Introduction to GIS
- **ENV S 201**: Introduction to Environmental Issues
- **ENV S 324**: Energy and the Environment
- **HSP M 101**: Introduction to the Hospitality Industry
- **HSP M 289**: Contemporary Club Management
- **MGMT 370**: Management of Organizations
- **MGMT 371**: Organizational Behavior
- **TSM 270**: Principles of Injury Prevention and Safety
- **TSM 324**: Soil and Water Conservation Management
### Horticulture, B.S. - Horticulture Food Crop Production and Management

#### Minors

The Department of Horticulture offers two minors: 1) Horticulture and 2) Landscape Management. Both minors are earned by taking HORT 221 Principles of Horticulture Science plus 12 additional credits with a maximum of 3 credits at the 200-level and a minimum of 9 credits at the 300-level or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

**Horticulture minor**

The Horticulture minor is a broad-based minor that does not focus within a specific area of horticulture. The 12 additional credits for this minor can be selected from the full list of Horticulture courses.

**Landscape Management minor**

The Landscape Management minor focuses on landscape management including plant selection, landscape installation and management, and turfgrass management. The 12 additional credits for this minor can be selected from the following courses: HORT 240 Trees, Shrubs, and Woody Vines for Landscaping, HORT 281 Landscape Graphics, HORT 330 Herbaceous Ornamental Plants, HORT 341 Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs, HORT 342 Landscape Plant Installation, Establishment, and Management, HORT 351 Turfgrass Establishment and Management or HORT 444 Landscape Construction Management.

#### Graduate Study

The graduate major in horticulture leads to the M.S. (thesis and non-thesis option) and Ph.D. Some faculty members of the department serve as major professors for students in interdepartmental graduate majors in plant biology; genetics and genomics; molecular, cellular, and developmental biology; ecology and evolutionary biology; sustainable agriculture; and environmental science.

Graduates possess a broad understanding of horticulture and the allied plant sciences. They are able to communicate effectively with members of the scientific community, industry groups, and other interested citizens. They are experienced in conducting research and communicating the results from that research. They are capable of addressing and solving complex problems that confront the many horticultural, agricultural, and plant science professions. They also understand the ethical, legal, social, and environmental issues associated with modern agricultural/horticultural practices.

#### Industrial Technology

The Department of Agricultural and Biosystems Engineering offers a bachelor of science degree in Industrial Technology (ITEC), as well as an
undergraduate certificate in Occupational Safety. Students majoring in ITEC choose between two options: Manufacturing or Occupational Safety. The department also offers a minor in Industrial Technology.

Successful ITEC graduates gain knowledge, skills, and abilities in solving technical problems, understanding the design process, excelling in authentic leadership, being aware of safety issues, having a quality orientation, effectively managing projects, and having a systems-thinking perspective. This translates to a holistic approach that uses science and engineering principles to focus on the way the constituent parts of a manufacturing system interrelate, how they work over time, and how they fit the context of larger systems. Graduates find careers within a variety of industries, businesses, and organizations in the fields of advanced manufacturing; robotics; automation and controls; electronics; lean manufacturing; quality management; safety management, loss prevention; or industrial hygiene.

Common job duties of ITEC Manufacturing graduates include:

- quality management
- production supervision
- product process design
- facility planning and management

Common job duties of ITEC Occupational Safety graduates include:

- development, management, and evaluation of safety programs and systems
- hazard identification and mitigation
- loss prevention

The certificate in occupational safety is designed to meet the needs of the students who will find themselves in management roles with responsibilities that include safety. The certificate program prepares technically-oriented managers to meet their professional safety responsibilities.

For more information about the Industrial Technology degree: http://www.abe.iastate.edu/undergraduate-students/industrial-technology/

For more information about the occupational safety certificate: http://www.abe.iastate.edu/home/certificate-in-occupational-safety/

**Student Learning Outcomes**

Upon graduation, all ITEC students should be able to:

1. Apply knowledge of mathematics, science, computation, and applied engineering to identify and solve applied science and technology problems
2. Develop and conduct experiments, and analyze and interpret resulting data
3. Evaluate and adapt systems, processes and programs to meet desired needs
4. Function effectively on multi-disciplinary teams
5. Communicate effectively, ethically, and professionally in written, oral, and other formats to technical and non-technical audiences
6. Understand the potential impacts and limitations of solutions in global and societal contexts
7. Recognize the need for, and demonstrate an ability to, engage in lifelong learning
8. Effectively apply modern scientific and technical tools necessary for professional practice to address contemporary issues in applied engineering and technology

Upon graduation, ITEC students in the manufacturing (M) option should be able to:

1. Create, implement, and evaluate manufacturing processes and facility plans
2. Integrate and apply tools in computer aided design, manufacturing, controls, robotics, and automation systems to applied engineering and technology management settings
3. Evaluate technologies to enhance production, quality, sustainability, and profitability of manufacturing systems and facility management

Upon graduation, ITEC students in the occupational safety (OC) option should be able to:

1. Design, implement, and evaluate occupational safety and health programs for work environments
2. Identify, assess, and analyze hazards and loss-producing conditions in work environments
3. Eliminate or control occupational hazards using appropriate technologies, training, and administrative interventions

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**Communications Proficiency:**

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

**Communication/Library: 13 cr.**

International Agriculture

Interdepartmental Undergraduate Program

The international agriculture program provides opportunities to develop knowledge and skills related to the factors that interact to impact agricultural and environmental issues, production, processes, distribution and utilization worldwide. The program puts emphasis on international experience through structured internships and study abroad. The international agriculture program is appropriate for students seeking positions that require knowledge and experience related to global agricultural issues and their impact on local, regional, national and international policies and practices. Students preparing for careers in the following areas will benefit from the international agriculture program; governmental and non-governmental development agencies, agribusinesses, educational institutions, and non-profit assistance agencies. Outcomes from participation in this program include developing an awareness for the role of international agriculture in the career development process, analyzing international agricultural issues and policies, acquiring skills for solving problems in international development and agribusiness and experiencing real situations and gaining perspectives about agriculture in a global setting.

International Agriculture as Secondary Major

International agriculture is an undergraduate secondary major that may be taken only in conjunction with a primary major in an agriculture and life sciences curriculum. Students choosing international agriculture will strengthen their career placement with a business or agency involved in international activities. Technical knowledge of a primary major discipline will be strengthened by a global awareness of agriculture and life sciences. A secondary major in international agriculture will give students practical insight into the role of agriculture in a world of increasing food and fiber needs. It is ideal for those who wish to broaden their international perspective or prepare for international work in agriculture. The secondary major includes an emphasis on international internship or study abroad and/or foreign languages, and selection of appropriate courses (from an approved list) to meet the needs and interests of the student.

Courses for the secondary major include AGRON 342 World Food Issues: Past and Present; six credits of study abroad, travel, or language courses or any combination thereof; and six credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Fifteen credits of the secondary major cannot be used to meet requirements of the major or any other college or university requirement.

Students interested in earning a secondary major in international agriculture must contact a program advisor. The early indication of an interest in international agriculture allows for effective integration of the secondary major course requirements with those of the primary major.

Curriculum in International Agriculture

Administered by an Interdepartmental Committee. International agriculture can be taken only as a secondary major in conjunction with a primary major in the College of Agriculture and Life Sciences. A minor is available to interested students regardless of their major.

15 cr. of this major cannot be used to meet requirements of the primary major or any other college or university requirements.

6 cr. from Internship in International Agriculture or Study Abroad or World Languages and Cultures; AGRON 342 World Food Issues: Past and Present; credits from approved International Agriculture Courses to total 15 cr.

Minor

A minor in international agriculture is available to interested students regardless of their major. Students selecting the minor should have at least minimal familiarity with agriculture and life sciences and agricultural systems.

Courses for the minor include AGRON 342 World Food Issues: Past and Present; 3 to 6 credits of study abroad and/or foreign language and 3 to 6 credits in selected international agriculture courses in the College of Agriculture and Life Sciences. The minor requires 15 credits and must include at least 9 credits that are not used to meet any other department, college, or university requirement.

For more information about a secondary major or minor in international agriculture, see descriptions in the designated departments or the supervisory committee.
For more information about courses for either a secondary major or a minor in international agriculture, see descriptions in the designated departments.

Microbiology

Undergraduate Microbiology Major

Interested in the study of small things that have a big impact? Then Microbiology may be the place for you.

Our mission in the Microbiology Program is to instill a comprehensive understanding of microbiology and its relevance to human society and global health, and to cultivate the concepts and skills necessary to succeed in microbiology-related careers.

Iowa State University’s Microbiology Undergraduate Program offers:

- Extensive hands-on laboratory experiences that develop problem solving & technical skills used in a variety of professional careers
- Application of science to issues in the modern world
- Excellent preparation for human medicine and veterinary medicine
- Preparation for employment in a variety of professional settings
- Research opportunities and interaction with professors from across Iowa State University Departments of Animal Science, Plant Pathology and Microbiology, Biochemistry & Molecular Biology, Biology, Veterinary Microbiology, Veterinary Pathology, Food Science, Entomology, and Geology
- Degrees in microbiology at both the undergraduate (B.S.) level and graduate (M.S., PhD., see Graduate Major) level

Career opportunities:

Opportunities after graduation include the following:

- Biomedical research scientist
- Biotechnology firms
- Biorenewables industry
- Forensic scientist
- Pharmaceutical and vaccine development companies
- Immunologist
- Agricultural microbiology and plant pathology
- International agricultural research centers
- Government laboratories (CDC, NADC, USDA)
- Infectious disease
- Food safety and food technology
- Water quality
- Ecology and environmental microbiology
- Botanical gardens & nurseries
- Technical brewer
- Science writer
- Public health agencies
- Public policy organizations

Interested in Human medicine or Veterinary medicine? A microbiology degree prepares students for advanced study in Dentistry, Medical Laboratory Science, Optometry, Pharmacy, Physician Assistant Programs, and Physician or Veterinary education. Go to micro.iastate.edu (https://www.micro.iastate.edu/) to find more information about the Microbiology Program.

Student Learning Outcomes

Upon graduation, students should be able to:

1. Research and critically evaluate topics in microbiology; understand and communicate results from primary and secondary literature to a variety of audiences.
2. Utilize appropriate quantitative and qualitative microbiological laboratory techniques and equipment, including microscopy, biochemical tests, serological assays, and genetic manipulation.
3. Explain how evolution unifies and explains the diversity of microbes in terms of microbial structure, function, metabolism, and genetics.
4. Describe common adaptations that enable organisms to survive in an ecological niche, such as how microbiota can impact plants, animals/humans, food, and soil health in beneficial, neutral, or negative ways.
5. Develop and follow lab protocols, interpret data, maintain an accurate lab notebook, and create illustrative graphs and tables.
6. Communicate and collaborate across disciplines about fundamental concepts in microbiology and discuss the relationship of science, society, and ethical issues in microbiology.

Curriculum in Microbiology

www.micro.iastate.edu (http://www.micro.iastate.edu)

Administered by an interdepartmental committee.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

International Perspectives Courses (https://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/)
U.S. Diversity: 3 cr.
U.S. Diversity Courses (https://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses/)

Electives: 7-12
Communications Proficiency:
English composition - with a C or better 6
Speech fundamentals - with a C or better 3

Communication/Library:
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
SP CM 212 Fundamentals of Public Speaking 3
One course from the following: 3

- ENGL 302 Business Communication
- ENGL 309 Proposal and Report Writing
- ENGL 312 Communicating Science and Public Engagement
- ENGL 314 Technical Communication
- LIB 160 Introduction to College Level Research 1

Total Credits 13

Humanities and Social Sciences:
Approved Humanities list 1
Approved Social Science list 2

1 Humanities Course list (https://www.cals.iastate.edu/student-services/humanities/)
2 Social Sciences Course list (https://www.cals.iastate.edu/student-services/social-sciences/)

Ethics: 3 cr.
3 cr. from approved Ethics Course list (https://www.cals.iastate.edu/student-services/ethics/)

Mathematical Sciences:
One of the following: 7-8

- MATH 143 Preparation for Calculus
  & MATH 160 and Survey of Calculus
- MATH 165 Calculus I
  & MATH 166 and Calculus II
- MATH 160 Survey of Calculus
  & STAT 301 and Intermediate Statistical Concepts and Methods

One of the following: 3-4

- STAT 101 Principles of Statistics
- STAT 104 Introduction to Statistics

Total Credits 10-12

Physical Sciences:
CHEM 177 General Chemistry I 4
CHEM 177L Laboratory in General Chemistry I 1
CHEM 178 General Chemistry II 3
One of the following: 5-10

- PHYS 115 Physics for the Life Sciences
  & 115L and Laboratory in Physics for the Life Sciences
- PHYS 131 General Physics I
  & 131L and General Physics I Laboratory
- PHYS 132 General Physics II
  & PHYS 132L and General Physics II Laboratory
- CHEM 331 Organic Chemistry I 3
- CHEM 331L Laboratory in Organic Chemistry I 1
- CHEM 332 Organic Chemistry II 3
One of the following: 3-6

- BBMB 404 Biochemistry I
  & BBMB 405 and Biochemistry II
  or BBMB 301 Survey of Biochemistry
  or BBMB 316 Principles of Biochemistry

Total Credits 23-31

Biological Sciences:
Biol 211 Principles of Biology I 3
Biol 211L Principles of Biology Laboratory I 1
Biol 212 Principles of Biology II 3
Biol 212L Principles of Biology Laboratory II 1
Biol 313 Principles of Genetics 3
Biol 313L Genetics Laboratory 1
Biol 314 Principles of Molecular Cell Biology 3

Total Credits 15

Microbiology:
Core courses:
MICRO 110 Professional and Educational Preparation in Microbiology 1
MICRO 302 Biology of Microorganisms 3
MICRO 302L Microbiology Laboratory 1
MICRO 310 Medical Microbiology 3
One of the following: 1

- MICRO 310L Medical Microbiology Laboratory
- MICRO 475L Immunology Laboratory
- MICRO 320 Molecular and Cellular Bacteriology 4
- MICRO 440 Laboratory in Microbial Physiology, Diversity, and Genetics 4
- MICRO 450 Undergraduate Capstone Colloquium 2
One of the following: 3

- MICRO 430 Prokaryotic Diversity and Ecology
- MICRO 456 Principles of Mycology
- MICRO 477 Bacterial-Plant Interactions

Additional nine credit hours from the following: 9

- MICRO 353 Introductory Parasitology
- MICRO 374 Insects and Our Health
- MICRO 374L Insects and Our Health Laboratory
- MICRO 402 Microbial Genetics and Genomics
- MICRO 407 Microbiological Safety of Foods of Animal Origins
- MICRO 408 Virology
- MICRO 420 Food Microbiology
- MICRO 421 Food Microbiology Laboratory
- MICRO 430 Prokaryotic Diversity and Ecology
- MICRO 456 Principles of Mycology
- MICRO 475 Immunology
- MICRO 475L Immunology Laboratory
- MICRO 477 Bacterial-Plant Interactions
- MICRO 485 Soil and Environmental Microbiology
- MICRO 487 Microbial Ecology
- MICRO 490 Independent Study

Microbiology elective - only 3 cr. lab courses allowed

Total Credits 31

Microbiology, B.S.

### Minor

The program offers a minor in microbiology which may be earned by accumulating a minimum of 15 credits of microbiology courses. Students requesting a minor in Microbiology must take the following:

1) MICRO 201 Introduction to Microbiology and MICRO 201L Introductory Microbiology Laboratory or MICRO 302 Biology of Microorganisms and MICRO 302L Microbiology Laboratory

2) Additional lecture credits and no more than 3 additional lab credits to reach 15 credits. For a list of acceptable courses see https://www.micro.iastate.edu/files/inline-files/minor_in_microbiology_21-22_1.pdf

3) At least 6 credits at the 300+ level and must include at least 9 credits that are not used to meet any other department, college, or university requirement.
Central to that effective functioning are the abilities to:

- Identify, explain and critically evaluate their own beliefs, values and actions in relation to professional and societal standards of ethics.
- Anticipate, analyze and evaluate natural resource issues and opportunities, explaining the ecological, economic, and social consequences of natural resource actions at various scales and over time.
- Actively seek the input and perspectives of diverse stakeholders regarding natural resource problems and issues.
- Assess, analyze, synthesize, and evaluate information fairly and objectively.
- Work effectively, both individually and with others, on complex, value-laden natural resource problems that require holistic problem solving approaches.
- Formulate and evaluate alternative solutions to complex problems and recommend and defend best alternatives.
- Communicate clearly and effectively with all audiences using appropriate oral, visual, electronic, and written techniques.
- Recognize and interpret resource problems and opportunities across spatial scales from local to global.
- Appreciate cultural diversity and understand the impact of the global distribution of people and wealth on natural resource use and valuation.
- Exercise leadership skills as professionals and engaged citizens.
- Demonstrate creativity and innovation in identifying and pursuing opportunities that produce environmental, social, or economic value.
- Exercise life-long learning skills developed before graduation.

Graduate Study

The program offers work for the degrees master of science and doctor of philosophy in microbiology and for a minor for students majoring in other programs. The interdepartmental microbiology major is offered through faculty housed in twelve departments, including Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Civil, Construction and Environmental Engineering; Entomology; Food Science and Human Nutrition; Genetics, Developmental and Cell Biology; Geological and Atmospheric Sciences; Plant Pathology and Microbiology; Veterinary Diagnostic and Production Animal Medicine; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology. Faculty coordinate graduate education and research in a wide range of topics fundamental to the discipline of microbiology. Specific information about individual faculty and their research areas is available at www.micrograd.iastate.edu. (http://www.micrograd.iastate.edu/)

Prerequisites to graduate study include a sound undergraduate background in chemistry, mathematics and biology, including microbiology and genetics.

Graduates in the Microbiology Graduate program have a broad-based knowledge in the fundamentals of microbiology as well as advanced knowledge in specific areas as determined by their areas of research focus. Students completing the thesis have the technical, research, critical-thinking, problem-solving, and computer skills to design, implement, and conduct research using a variety of current techniques and equipment. They are also able to communicate research results effectively with scientific peer groups in both oral and written formats.

Natural Resource Ecology and Management

The department addresses a broad spectrum of natural resource and environmental issues in a holistic approach to learning, discovery and engagement. Our vision of natural resources is that informed protection and management of natural resources involves an integration of biological, economic, and social considerations. Such an integrated and comprehensive approach to the education of future generations of natural resource managers and scientists is needed in order to sustain viable landscapes, facilitate strong communities, and produce desired goods, services, and functions from our natural resources.

Our educational mission for the undergraduate and graduate programs is to provide those learning experiences and opportunities that will ensure students can learn to function effectively in their chosen fields.

Central to that effective functioning are the abilities to:

- Anticipate, analyze and evaluate natural resource issues and opportunities, explaining the ecological, economic, and social consequences of natural resource actions at various scales and over time.
- Actively seek the input and perspectives of diverse stakeholders regarding natural resource problems and issues.
- Assess, analyze, synthesize, and evaluate information fairly and objectively.
- Work effectively, both individually and with others, on complex, value-laden natural resource problems that require holistic problem solving approaches.
- Formulate and evaluate alternative solutions to complex problems and recommend and defend best alternatives.
- Communicate clearly and effectively with all audiences using appropriate oral, visual, electronic, and written techniques.
- Recognize and interpret resource problems and opportunities across spatial scales from local to global.
- Appreciate cultural diversity and understand the impact of the global distribution of people and wealth on natural resource use and valuation.
- Exercise leadership skills as professionals and engaged citizens.
- Demonstrate creativity and innovation in identifying and pursuing opportunities that produce environmental, social, or economic value.
- Exercise life-long learning skills developed before graduation.

Undergraduate Study

The Department of Natural Resource Ecology and Management offers work for the Bachelor of Science degree with majors in animal ecology or forestry. The department participates in interdisciplinary programs in biology, environmental studies, international studies, and pest management. By proper selection of free and restricted elective courses, students can obtain a minor or a second major in these programs or other disciplines.

Contact the department for information about minors from the Department of Natural Resource Ecology and Management.

The Department provides numerous scholarships; application information is available in the departmental Student Services Center.

Graduate Study

The Department of Natural Resource Ecology and Management offers work for the degrees Master of Science and Doctor of Philosophy with majors in fisheries biology, forestry, and wildlife ecology. A non-thesis masters degree is available for students desiring a general degree program without thesis research. Students may also major in interdepartmental graduate majors in ecology and evolutionary biology, environmental science, genetics, plant physiology, sustainable
agriculture, or toxicology (see Index [http://catalog.iastate.edu/azindex/]). All students are required to teach and conduct research as part of their training for the Ph.D. degree.

**Fisheries Biology and Wildlife Ecology**

Graduates have a broad understanding of the basic principles of animal biology, ecology and management, and relevant aspects of basic mathematics and natural sciences, computing applications, and personal and professional development. They are able to execute rigorous independent research, have developed problem-solving and critical-thinking skills, and can communicate effectively with scientific colleagues and the general public in both formal and informal settings.

Personnel of the U.S. Geological Survey’s Iowa Cooperative Fish and Wildlife Research Unit contribute significantly to the graduate program of the department through teaching and research. Governmental agencies such as the U.S. Fish and Wildlife Service, Natural Resources Conservation Service and the Iowa Department of Natural Resources, and non-governmental agencies such as The Nature Conservancy and the Iowa Natural Heritage Foundation also contribute to the graduate program by funding research, providing in-kind support, and providing numerous formal and informal mentoring relationships.

No more than two dual-listed animal ecology courses may be applied for major graduate credit. Additional work is expected of students taking a dual-listed course for credit at the 500 level.

**Forestry**

The department offers programs leading to the degrees of Master of Science and Doctor of Philosophy with a major in forestry and minor work to students taking major work in other departments.

Graduates are skilled at defining a research problem in forestry, applying scientific principles and appropriate methods, and analyzing the results. They are capable of understanding the many facets of forest and wood science and are very knowledgeable in specific areas in forestry. They are able to deal with complex forestry problems, and where appropriate, they are capable of blending ecological, social, ethical, legal, and economic factors in the research process. They are very skilled at communicating, both in written and oral form, research results to professional and lay audiences. They are sensitive to cultural diversity and work effectively with peers, natural resource professionals, and the public.

The graduate program is open to, and suitable for, students who have majored in forestry or related natural resource fields. A non-thesis master’s option is available.

The department participates in the Masters in Business Administration (M.B.A.), with specialization in the agriculture program administered by the College of Business, providing an opportunity to obtain an M.B.A. degree while taking advanced courses in forestry and maintaining contact with the profession of forestry.

**Nursing**

**OVERVIEW**

The Bachelor of Science in Nursing (BSN) program at Iowa State University is a RN-to-BSN program, designed for those who are already a Registered Nurse (RN), and desire to further their nursing career and education to the next level. Iowa State’s RN-to-BSN program provides interactive learning opportunities where students can apply their real-world experiences and education to inspire innovation in their places of care. RN-to-BSN students will be challenged to enhance health promotion and disease prevention, apply nursing science and evidenced-based patient-centered care, focus on the culture of health for nurses, individuals, and communities, and demonstrate the continuum of care, from a nurse’s self-care to patient care to community and population health.

The baccalaureate nursing program at Iowa State University of Science and Technology located in Ames, Iowa is approved by the:

**Iowa Board of Nursing (IBON)**

Riverpoint Business Park
400 SW 8th St., Suite B
Des Moines, IA 50309
(515) 281-3255

The baccalaureate nursing program at Iowa State University of Science and Technology located in Ames, Iowa is accredited by the:

**Accreditation Commission for Education in Nursing (ACEN)**

3390 Peachtree Road NE, Suite 1400
Atlanta, GA 30326
(404) 975-5000

The most recent accreditation decision made by the ACEN Board of Commissioners for the baccalaureate nursing program is initial accreditation.

View the public information disclosed by the ACEN regarding this program at [http://www.acenursing.com/accreditedprograms/programSearch.htm](http://www.acenursing.com/accreditedprograms/programSearch.htm)

**Student Learning Outcomes**

Upon graduation, students should be able to:

1. Synthesize theory and concepts from the arts and humanities, natural and social sciences, and nursing in the holistic practice of professional nursing.
2. Integrate knowledge of historical and contemporary nursing with leadership skills and principles to facilitate optimal patient and systems outcomes.

3. Translate research findings to support evidence-based, competent, safe, and effective nursing care to individuals, families, and communities in diverse settings across the lifespan.

4. Utilize current technology effectively and efficiently to communicate, manage knowledge, mitigate error, support decision making and accomplish goals related to the delivery of safe, quality care for diverse individuals, families, and the community.

5. Examine how healthcare policies, including financial and regulatory, influence healthcare systems, nursing practices and population health.

6. Incorporate principles of effective communication and collaboration when working with members of the health team, recipients of care and interested groups to improve health outcomes for individuals, groups and communities.

7. Integrate concepts of health promotion and disease management, health literacy and patient-centered care to improve population health.

8. Engage in professional, culturally competent, and ethically congruent care that reflects dignity and uniqueness of individuals and groups in diverse populations and locations.

9. Demonstrate a commitment to professionalism and model the values of advocacy, compassion, integrity, human dignity, cultural competence and social justice while embracing the concept of continuous learning.

Administered by the Department of Food Science and Human Nutrition

RN-to-BSN Admissions Criteria

Applications for the RN-to-BSN program are individually reviewed. Minimum requirements for admission to the BSN program include:

- Licensure as a Registered Nurse
- Meet all Iowa State University admission criteria for transfer students
- Official college transcripts from all colleges and universities attended
- Minimum of 2.5 cumulative GPA for all college coursework
- Achievement of minimum “C” (not C-) for all prerequisite courses listed below

English Composition I and II (ENGL 150 and ENGL 250 equivalent)
Introduction to Chemistry (CHEM 163 or CHEM 1T equivalent)
Statistics (STAT 101 or STAT 104 equivalent)
Introduction to Human Nutrition (FS HN 167 equivalent)

Admissions requirements are congruent with the Iowa Action Coalition, RN-to-BSN Task Force Recommendations.

RN-to-BSN Progression Criteria

- Must earn a “C” grade or better in all NRS courses and meet the university’s academic standards for progress toward a degree (http://catalog.iastate.edu/previouscatalogs/2022-2023/academic_standing/#academicprogresstext)

RN-to-BSN Graduation Requirements

- At least 32 credits earned in residence at Iowa State University, and the final 32 credits taken through Iowa State University prior to graduation.
- All general education requirements at Iowa State University must be met.
- The BSN curriculum consists of 21 credits of NRS courses, 8 credits of FS HN courses, and 3 elective credits for a total of 32 credits in addition to prerequisite coursework.
- Electives are selected by students to meet identified career interests, and total elective credits needed will vary based on individual transfer credits.
- Minimum credits for graduation is 120 credits.

** Denotes courses that may be taken before starting the nursing program.

Note: Plan of study does not include any unmet ISU general education requirements.

Nutritional Science (AGLS)

Nutritional science looks at the connection between diet and health. Students learn how diet can play a crucial role in the cause, treatment, and prevention of many diseases. There are degree program options within nutritional science. The pre-health professional and research option coursework prepares students for work in research laboratories, graduate study in nutrition or biological sciences, or entrance into health professional programs, such as medical, dental, physician assistant, and pharmacy schools. Students gain a strong science education along with human nutrition expertise. Additional options in health coach and nutrition and wellness prepare students for work positions in program planning and evaluation for community, public health, non-profit, and corporate wellness programs addressing the growing public interest in nutrition, wellness, and preventative health. Students learn about the role of nutrition and healthy eating for disease prevention and wellness.

The department also offers a nutrition minor (http://catalog.iastate.edu/previouscatalogs/2022-2023/collegeofagricultureandlifesciences/foodscienceandhumannutrition/#undergraduateminor).
Upon graduation, students should be able to:

- Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
- Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
- Facilitate and participate effectively in a group, team, or organization.
- Plan life-long learning activities with the aim of improving professional skills.
- Integrate creativity, innovation, or entrepreneurship in ways that produce value.
- Describe sociocultural competence relative to diversity, equity and/or inclusion.
- Explain how human activities impact the natural environment and how societies are affected.
- Meet program specific learning outcomes for the Nutritional Science major.

Administered by the Department of Food Science and Human Nutrition

- Pre-Health Professional and Research Option
- Health Coach Option
- Nutrition and Wellness Option

PRE-HEALTH PROFESSIONAL AND RESEARCH OPTION

Total Degree Requirement: 120 cr.
Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.
Communications and Library: 13 cr.

Select at least 15 additional credits from:

- BIOL 314 Principles of Molecular Cell Biology
- FS HN 214 Scientific Study of Food and Advanced Food Preparation Laboratory (or FS HN 115 lab)
- FS HN 242 The US Food System
- FS HN 311 Food Chemistry
- FS HN 365 Obesity and Health
- FS HN 367 Medical Terminology for Health Professionals
- FS HN 403 Food Laws and Regulations
- FS HN 420 Food Microbiology
- FS HN 430 U.S. Health Systems and Policy
- FS HN 461 Medical Nutrition and Disease I
- FS HN 463 Community Nutrition and Health
- FS HN 464 Medical Nutrition and Disease II
- FS HN 466 Nutrition Counseling and Education Methods
- FS HN 490C Independent Study: Nutrition
- FS HN 499 Undergraduate Research
- FS HN 575 Processed Foods
- NUTRS 501 Biochemical and Physiological Basis of Nutrition: Macronutrients and Micronutrients
- NUTRS 504 Nutrition and Epigenetic Regulation of Gene Expression
- NUTRS 562 Advanced Nutrition Assessment
- PHYS 131 General Physics I
- PHYS 131L and General Physics I Laboratory
- PHYS 231 Introduction to Classical Physics I
- PHYS 231L and Introduction to Classical Physics I Laboratory
- PHYS 132 General Physics II
- PHYS 132L and General Physics II Laboratory
- PHYS 232 Introduction to Classical Physics II
- PHYS 232L and Introduction to Classical Physics II Laboratory

**Total Credits: 36 cr.**

**Electives: 0-9 cr.** Select from any university coursework to earn at least 120 total credits. Students planning to apply to health professional programs should review entrance requirements and select appropriate courses as electives.

Concurrent B.S. and M.S. Program: Well-qualified students in Nutritional Science, pre-health professional and research option, who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a Bachelor of Science (B.S.) degree in Nutritional Science and a Master of Science (M.S.) degree in Nutritional Sciences. For more information, refer to www.fshn.hs.iastate.edu (http://www.fshn.hs.iastate.edu)

## CURRICULUM FOR HEALTH COACH OPTION AND NUTRITION & WELLNESS OPTION

### Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

### International Perspectives: 3 cr.

- U.S. Diversity: 3 cr.

**Communications/Library: 10 cr.**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

<td>3</td>
</tr>
<tr>
<td>LIB 160</td>
<td>Introduction to College Level Research</td>
<td>1</td>
</tr>
<tr>
<td>SP CM 212</td>
<td>Fundamentals of Public Speaking</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credits: 10 cr.**

### Humanities and Social Sciences: 15-18 cr.

Select Humanities course from approved list

- PSYCH 101 Introduction to Psychology
- or PSYCH 230 Developmental Psychology
- SOC 134 Introduction to Sociology
- POL S 344 Public Policy
- FS HN 342 World Food Issues: Past and Present (this course can also meet the IP requirement)

If H Sci student, select additional Humanities course
### Mathematical Sciences: 6-8 cr.
Select at least 3 credits from:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 140</td>
<td>College Algebra</td>
<td></td>
</tr>

<tbody>
<tr>
<td>STAT 101</td>
<td>Principles of Statistics</td>
<td></td>
</tr>
<tr>
<td>STAT 104</td>
<td>Introduction to Statistics</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credits**: 6-8

### Physical Sciences: 5 cr.
CHEM 163  | College Chemistry                          | 4       |

or CHEM 177 | General Chemistry I                        |         |

CHEM 163L | Laboratory in College Chemistry            | 1       |

or CHEM 177L | Laboratory in General Chemistry I            |         |

**Total Credits**: 5

### Biological Sciences: 18-19 cr.
BIOL 211 | Principles of Biology I                    | 3       |

BIOL 211L | Principles of Biology Laboratory I         | 1       |

BIOL 212 | Principles of Biology II                   | 3       |

BIOL 212L | Principles of Biology Laboratory II        | 1       |

BIOL 255 | Fundamentals of Human Anatomy              | 3       |

BIOL 255L | Fundamentals of Human Anatomy Laboratory   | 1       |

BIOL 256 & 256L | Fundamentals of Human Physiology          | 3-4     |

or BIOL 335 | Principles of Human and Other Animal Physiology |         |

MICRO 201 | Introduction to Microbiology               | 2       |

MICRO 201L | Introductory Microbiology Laboratory       | 1       |

**Total Credits**: 18-19

### Food Systems: 5 cr.
FS HN 242 | The US Food System                         | 3       |

FS HN 342 | World Food Issues: Past and Present (course shown above) | 3       |

FS HN 442 | Issues in Food and Society                 | 2       |

**Total Credits**: 8

### Food Science and Human Nutrition: 36 cr.
FS HN 101 | Food and the Consumer                      | 3       |

FS HN 110 | Professional and Educational Preparation   | 1       |

FS HN 111 | Fundamentals of Food Preparation           | 2       |

FS HN 115 | Food Preparation Laboratory                | 1       |

FS HN 167 | Introductory Human Nutrition and Health    | 3       |

FS HN 203 | Contemporary Issues in Food Science and Human Nutrition | 1       |

FS HN 264 | Fundamentals of Nutritional Biochemistry   | 3       |

FS HN 265 | Nutrition for Active and Healthy Lifestyles | 3       |

FS HN 361 | Nutrition and Health Assessment            | 2       |

FS HN 364 | Nutrition and Prevention of Chronic Disease | 3       |

FS HN 365 | Obesity and Health                         | 3       |

FS HN 430 | U.S. Health Systems and Policy             | 2       |

FS HN 445X | Strategies for Personal Food Waste Reduction | 1       |

FS HN 463 | Community Nutrition and Health             | 3       |

FS HN 495 | Practicum                                  | 2       |

COMST 450B | Special Topics in Communication Studies: Health Communication | 3       |

**Total Credits**: 36

### HEALTH COACH OPTION: 18 credits

KIN 258 | Principles of Physical Fitness and Conditioning | 2       |

KIN 358 | Exercise Physiology                         | 3       |

KIN 458 | Principles of Fitness Assessment and Exercise Prescription | 4       |

PSYCH 101 | Introduction to Psychology                  | 3       |

or PSYCH 230 | Developmental Psychology                     |         |

PSYCH 422 | Counseling Theories and Techniques          | 3       |

PSYCH 485 | Health Psychology                           | 3       |

**Total Credits**: 18

Select additional electives to reach 120 total semester credits.

### NUTRITION & WELLNESS OPTION: 10-18 credits of electives

At least 9 credits of electives must be 300-400 level courses. Select from any university coursework to earn at least 120 total credits.

**NOTE:**

Students are encouraged to pursue a minor, such as:

- Communication studies
- Culinary food science
- Entrepreneurship
- Environmental studies
- Event management
- Exercise science
- Global health
- Health promotion
• Hospitality management
• Human development and family studies
• Leadership studies

Occupational Safety Certificate

Undergraduate Certificate in Occupational Safety

The undergraduate certificate in Occupational Safety is designed to meet the needs of undergraduate students who are planning a career with management responsibilities (including safety), but are not planning on careers as safety professionals. This Certificate provides them with desired professional development and recognition of their increased professional knowledge and skills in the field of Occupational Safety.

Working professionals who have discovered that their career path has resulted in an increased focus on occupational safety, but do not have formal educational training in safety will also benefit from this structured safety curriculum. This certificate program prepares professionals, regardless of discipline, to effectively meet expected occupational safety responsibilities.

A professional with an Iowa State University Occupational Safety certificate will strengthen a company’s ability to protect their workers from injuries and illnesses. This undergraduate certificate provides a way to give formal recognition of focused study in occupational safety that is less comprehensive than what is required for an undergraduate major.

The Department of Agricultural and Biosystems Engineering, with its nationally ranked education programs, is pleased to offer this Occupational Safety Certificate program to undergraduate students, graduate students, and working professionals. This certificate program is available on campus or entirely online via web-based interactions and streaming media.

20 Credits required.

Students complete the following 14 credits of core courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

More information on the Nutrition minor can be found here: http://catalog.iastate.edu/collegeofagricultureandlifesciences/foodscienceandhumannutrition/#undergraduateminortext.

The Department of Food Science and Human Nutrition offers a Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) in Nutritional Sciences. More information can be found here: https://www.gradcollege.iastate.edu/academics/programs/apresults.php?id=84.

Note: This sequence is only an example. The number of credits taken each semester should be based on the individual student’s situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.
A minimum of 9 credits applied towards the certificate cannot be used to meet any other departmental, college, or university requirement. Courses taken for the certificate cannot be taken pass not pass. A grade of a 2.0 or better is required in each individual course applied towards the certificate.

Plant Pathology and Microbiology

Undergraduate Study

The department participates in the interdepartmental undergraduate Microbiology major. See www.catalog.iastate.edu/collegeofagricultureandlifesciences/microbiology/ for more information.

Graduate Study

The department offers studies for the degrees master of science and doctor of philosophy with a major in plant pathology, and minor work for students majoring in other departments or programs. A master of science nonthesis option is available. The department also participates in the interdepartmental majors in microbiology; toxicology; genetics; plant biology; molecular, cellular, and developmental biology; ecology and evolutionary biology; and sustainable agriculture.

Students entering graduate programs in the department need a sound background in the physical, biological, and mathematical sciences as well as adequate preparation in English.

Graduates have a broad understanding of the biology and management of plant pathogenic microorganisms and the interactions of pathogens with their host plants. They understand the relationship between plant pathology and allied disciplines and are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex plant disease problems facing agricultural and bioscience professionals, taking into account the related ethical, social, legal, and environmental issues. They are skilled in research procedures, communicating research results, and writing concise and persuasive grant proposals.

Sustainable Agriculture

Interdepartmental Graduate Major

The Sustainable Agriculture interdepartmental major is offered through faculty in 21 departments – Agricultural and Biosystems Engineering; Agricultural Education and Studies; Agronomy; Animal Science; Civil, Construction and Environmental Engineering; Community and Regional Planning; Ecology, Evolution and Organismal Biology; Economics; Entomology; Food Science and Human Nutrition; Horticulture; Industrial and Manufacturing Systems Engineering; Journalism and Mass Communication; Landscape Architecture; Mechanical Engineering; Natural Resource Ecology and Management; Plant Pathology; Political Science; Sociology; World Languages and Cultures and Veterinary Diagnostic and Production Animal Medicine. Faculty in these departments cooperate to offer courses and direct research leading to M.S. and Ph.D. degrees with a major in Sustainable Agriculture.

The Sustainable Agriculture major is designed to balance depth in disciplinary knowledge and perspectives with broader, systems-level thinking. It integrates technical and social sciences through a sequence of team-taught interdisciplinary core courses emphasizing higher-order critical thinking skills and active, collaborative approaches to learning. Students learn agroecological principles, study social relations underlying sustainable farming and food systems, and gain experience with practical techniques of sustainable agriculture.

Applicants applying to the MS program must have a bachelor’s degree in one of the life, social, or engineering sciences, or a bachelor’s degree plus equivalent experience in these areas. Applicants applying to the PhD program must have a master’s degree and either an undergraduate or master’s degree in one of the majors in the College of Agriculture and Life Sciences or its equivalent.

Graduates of the program will be able to design and manage agricultural systems that increase food security, enhance human communities, and protect environmental quality. Graduates of the program are qualified to work in a variety of settings, including university research, education, extension, agribusiness, governmental and non-governmental organizations, and farming.

Information on application procedures (https://susag.iastate.edu/admissions/), curriculum requirements (https://susag.iastate.edu/academics/), and faculty research areas (https://www.susag.iastate.edu/people/faculty/) is available on the Sustainable Agriculture website (https://susag.iastate.edu/).
Curriculum in Business

The Ivy College of Business strives to provide a high quality professional education in business. Such an education should provide the student with: (1) an appreciation of the evolution of the profession and an awareness of the ethical, global, technological, economic, political and social forces shaping its future; (2) an understanding of the major functional areas of business with the opportunity for specialization for a career in business; (3) an ability to recognize and appreciate the effect of diversity in the work place; (4) an opportunity for advanced study.

A comprehensive education in business includes a broad foundation in the liberal arts, courses in the major functional areas of business activity, proficiency in analytical methods, and the ability to identify problems and arrive at logical solutions. In addition, a professional education is designed to inspire students to assume business and community leadership.

Organization of Curriculum

The undergraduate curriculum in business is divided into three areas: a general education program, a pre-professional business program, and a professional business program. The general education program provides a broad spectrum of liberal arts coursework. The pre-professional business requirements provide a foundation in pre-business coursework. The professional program includes two parts: (1) the business core which provides a common body of knowledge in all the functional areas in business, and (2) a major area of study. The eleven majors offered for the degree bachelor of science (B.S.) are accounting, actuarial science, business analytics, business economics, entrepreneurship, finance, human resource management, management, management information systems, marketing, and supply chain management. The college also offers a secondary major in international business. Elective courses are part of the curriculum. Additionally, the college offers the Bachelor of Business Administration (BBA) online degree completer program.

Curriculum Changes

Iowa State University students who want to change their curriculum to the Ivy College of Business should contact the Undergraduate Programs Office for assistance. For more details on changing curriculum or majors, please visit: https://catalog.iastate.edu/academics/#degreeplanningtext.

Admission Standards to Professional Programs

All new entering students and curriculum change students are enrolled in the pre-business curriculum. To enter the professional program in the Ivy College of Business, students must complete any required ENGL 099 Strategies for Nonnative Speakers of English courses, any required ENGL 101 English for Native Speakers of Other Languages courses, ENGL 150 Critical Thinking and Communication, at least 30 credits, and the following foundation courses or their approved substitutions:

<table>
<thead>
<tr>

</tbody>
</table>

In addition, all students must achieve an Iowa State University cumulative grade point of 2.5 or a grade point average of 2.5 in the foundation courses listed above. Admission into the professional program is a prerequisite for pre-business students to gain admission into upper-level business classes. With the exception of ACCT 285 Managerial Accounting, pre-business students do not have access to business core or major classes. To facilitate registration, qualified students may be conditionally admitted during the semester in which they complete the admission requirements.

Students who meet the following requirements qualify for early admission to the professional program:

• Students must have a minimum ISU cumulative GPA of 3.50 in at least 12 graded credits or full membership in the University Honors Program.
• Students must have completed all ENGL 99/101 courses (if applicable).

If using the foundation courses for admission to the Professional Program, both transfer grades and Iowa State University grades are used to compute the grade point average. If foundation courses initially taken
at Iowa State University need to be repeated, they must be repeated at Iowa State University.

Admission requirements are subject to change. Applications and the current requirements for admission to the Ivy College of Business are available at https://online.bus.iastate.edu/professionalprogram/

**Academic Standards and Graduation Requirements**

Policies for students enrolled in the Ivy College of Business may be obtained at https://www.ivybusiness.iastate.edu/advising/ or from the Undergraduate Programs Office in the Ivy College of Business.

Students are responsible for knowing and adhering to these Ivy College of Business policies as well as the university regulations found in this catalog. The following policies are in effect for students graduating from a professional curriculum in business with a B.S. degree under the 2022 catalog:

1. A minimum of 122 semester credits are required. For the Actuarial Science major, a minimum of 131 semester credits are required.
2. At least 50 percent of the required business credits must be earned at Iowa State. All 300 level and higher business credits must be earned at a four-year institution.
3. Cumulative ISU grade point average of at least 2.0 with no quality point deficiencies.
4. The major departments reserve the right to determine the appropriate section of the degree program to which transfer credits will be assigned.
5. No more than two transfer classes can be applied to the major.
6. Students must achieve communication proficiency by earning a grade of C or better in ENGL 250, and one additional C or better from either ENGL 150 or ENGL 302.
7. A student must earn a grade of C or higher in a minimum of 30 credits applied to the business core and the major.
8. A student must earn at least 42 credits of 300 level and higher coursework from a four-year institution.
10. General education and supporting courses may not be taken P/NP.
11. No more than 9 elective credits may be taken P/NP.
12. The last 32 credits applied for graduation must be taken at ISU. A waiver for Study Abroad and Internship/Co-ops may be granted.

**Advising System**

Each student in the Ivy College of Business has an assigned academic advisor who helps facilitate student progress toward graduation while supporting the academic standards of the College. Students enter as Pre-Business majors and are guided toward their entrance to the Professional Program (business major) with assistance from professional advisors who continue to work with them through graduation.

Advisors, as part of the Undergraduate Programs Office staff, provide academic services to Business students including development of academic plans, study abroad planning, accessing pertinent University services and resources, and meeting their overall educational objectives.

The College encourages students to attend an orientation program prior to their entry, where information is shared and evaluated to help set the student out on the academic path appropriate to their goals, preparation, interests, and capabilities.

**Honors**

Entering freshmen who meet one of the following criteria, and have a minimum English ACT of 24, will be invited to apply for membership in the Freshman Honors Program: earned an ACT composite of 30 or higher, and have more than 48 credit hours remaining until graduation, are eligible to apply for membership to the University Honors Program (UHP). UHP students in the Ivy College of Business will work with designated advisors to incorporate elements of breadth, depth, and leadership into their business education through completion of academic, co-curricular, and personal/professional development experiences. In addition, to graduate with Honors in the Ivy College of Business, students must complete a minimum of two honors-designated courses, two 300-level honors seminars, an honors project, 50 credits of 300-level or higher coursework, and maintain a cumulative GPA of 3.50 or above. Additional details of requirements can be found on the Ivy College of Business Honors website at: https://www.ivybusiness.iastate.edu/advising/honors/

**Internships**

Credit and non-credit internships in business may be approved for Ivy College of Business students in all majors including pre-business. Credit hours and requirements vary, although internship credits only count as general electives. Arrangements must be made in the college prior to the beginning of the internship. A career coordinator from the Business Career Services Office will assist students in making these arrangements.

**Multiple Majors**

Undergraduates pursuing a degree in the Ivy College of Business may complete additional majors in the Ivy College of Business. Those desiring additional majors outside the college should refer to the catalog section of the appropriate college and department for the additional major requirements. A multiple major in business economics and agricultural
business or economics is not permitted. A major in business economics with a minor in economics is not permitted.

Undergraduates with a primary major outside the Ivy College of Business who want a second major in business must meet the admission requirements for the professional program as well as complete the following requirements: Foundation, Supporting Courses, Business Core, and major requirements. (Refer to the current Curriculum Guide).

All students pursuing multiple majors or multiple degrees within the Ivy College of Business are required to have a minimum of 15 credits of coursework in each major that is not used in the other majors.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Second Majors, Minors and certificates

International Business Secondary Major

A student in the Ivy College of Business may earn a secondary major in International Business. The requirements for this major include 6 credits of international overview courses, 6 credits of business focus courses, and the completion of one of the three options for global engagement, awareness, and regional perspective. Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major may not be used for the primary major.

Minor in International Business

Students with a major in the Ivy College of Business may earn a minor in International Business by completing 15 credits of approved coursework. The minor requires one course from the approved International Overview courses, two courses from the approved Business Focus courses, and by completing the Faculty-Led Global Awareness track, or the Foreign Language Global Awareness track, or through a plan of study approved by the Ivy International Programs Office. The minor must include at least six credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Minor in Business and Technology Consulting

The Department of Marketing offers a specialty minor open to any student with a major in the Ivy College of Business. The Business and Technology Consulting minor prepares you for a career as a business consultant. Every year consulting companies attract talented graduates across the world. As a consultant, you gain broad exposure to business issues, solve different business problems, make an impact on major businesses, and become an expert in a specific business functional area. The minor provides a systematic process for students to strengthen problem-solving skills and prepare them to become better communicators and future leaders.

The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Minors for Business Students

Students with a major in the Ivy College of Business may qualify for a minor specialization in one of the college's departments. Minor specializations are available in: Accounting, Business Analytics, Entrepreneurship (see Entrepreneurship Cross-Disciplinary Minor below), Finance, International Business (see Minor in International Business above), Management, Management Information Systems, Marketing, and Supply Chain Management. These minors require at least 15 credit hours in the minor specialization (16 credit hours are required for a minor in Accounting), nine hours of which may not be used to satisfy any other department, college, or university requirement. The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. Students with declared majors have priority over students with declared minors in courses with space constraints.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Minor in General Business for Non-Business Students

The Ivy College of Business offers a structured minor in general business to students outside the College. The minor requires a minimum of 15 credits, not including pre-requisite courses. Requirements for the minor are:

Required Courses (6 credits):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 284</td>
<td>Financial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 285</td>
<td>Managerial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>or ACCT 215</td>
<td>Legal Environment of Business</td>
<td>3</td>
</tr>
</tbody>
</table>

Elective Courses (9 credits):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENTSP 310</td>
<td>Entrepreneurship and Innovation</td>
<td>3</td>
</tr>
<tr>
<td>or MGMT 310</td>
<td>Entrepreneurship and Innovation</td>
<td>3</td>
</tr>
<tr>
<td>FIN 301</td>
<td>Principles of Finance</td>
<td>3</td>
</tr>
<tr>
<td>MIS 301</td>
<td>Management Information Systems</td>
<td>3</td>
</tr>
</tbody>
</table>
The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University. A "C" average or better is required in courses used to satisfy the minor requirements. All requirements for the minor must be taken for a grade. Students with a major outside the Ivy College of Business are eligible for a general business minor only—not a specific minor specialization from a business department.

Non-Business students may not take more than 9 cr. of 300 or 400 level Business courses.

General Business minor students needing more courses to meet the "nine credit stand alone" rule will need to apply to the Ivy College of Business for an exception, or should consider taking one additional course of ACCT 285 or ACCT 215.

For more information on the General Business minor, please visit: https://ivybusiness.iastate.edu/degree/zminors-and-certificates/

**Undergraduate Certificates**

**Professional Sales Certificate**

The certificate in professional sales is a course of study administered by the Department of Marketing in the Ivy College of Business. It is designed for all undergraduate majors who wish to enhance their degree and employment possibilities by adding expertise in professional selling. The certificate program will equip students with knowledge and skills related to developing and managing mutually beneficial relationships with customers. The certificate program is built on a strong theoretical background but emphasizes applications and practice. The certificate provides students with an opportunity to learn about the ethical, technological, analytical, and global aspects of professional sales.

Students need to fulfill the course prerequisites set by the Ivy College of Business. The certificate requires 21 credits from a designated list of courses, of which, a minimum of 9 credits may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.

Business courses listed as electives are available only to business majors. Non-business majors are limited to the 12 credits of required business courses for the certificate.

For more information about the Professional Sales Certificate, please visit: https://catalog.iastate.edu/collegeofbusiness/marketing/#undergraduatecertificatext

**Actuarial Science Certificate**

The certificate in actuarial science is available from the College of Liberal Arts and Sciences for non-actuarial science majors at Iowa State. The certificate requires 23 credits from a designated list of courses, of which 9 credits must stand-alone. There are 9 prerequisite courses required for the certificate's required courses.

For more information about the Actuarial Science Certificate, please visit: https://catalog.iastate.edu/collegeofbusiness/actuarialscience/#certificatetext

**Entrepreneurship Cross-Disciplinary Minor**

The Ivy College of Business participates in a cross-disciplinary minor in Entrepreneurship. This minor is available to any undergraduate student. Requirements for the minor include, ENTSP 310 Entrepreneurship and Innovation (3 credits), either ENTSP 313 Feasibility Analysis and Business Planning or ENTSP 320 Corporate Entrepreneurship, Innovation and Technology Management or ENTSP 410 Social Entrepreneurship (3 credits), two business-oriented electives from an approved list (6 credits), and an experiential learning component (3 credits). The approved list of courses is available at: https://ivybusiness.iastate.edu/entrepreneurship-minor/. The minor requires at least 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

**Non-degree Seeking Students**

Students who wish to take courses in the Ivy College of Business, but are not seeking an undergraduate degree, should apply to the college as non-degree seeking students. Non-degree seeking students are eligible to take up to 9 credits in 300-level and above business courses without meeting the college's admission requirements.

**Upper Division Courses for Students Outside the College**

Students from outside the Ivy College of Business are eligible to take up to 9 credits of 300-level and above business courses without meeting the college's admission requirements to the professional program, as long as they meet course prerequisites.

**Departments of the College**

- Accounting
- Finance
- Information Systems and Business Analytics
- Management and Entrepreneurship
Curriculum in Business

The college offers programs of study leading to the degree bachelor of science with a major in accounting, actuarial science, business analytics, business economics, entrepreneurship, finance, human resource management, management, management information systems, marketing, or supply chain management.

The college also offers a secondary major in international business. Total credits required: 122

Total credits required for Actuarial Science: 131

The college also offers a degree completer program leading to a bachelors of business administration (BBA). Total credits required: 120.

See also: A 4-year (8 semester) plan of study for each business degree.

Business Curriculum

For Actuarial Science curriculum, please go to: https://ivybusiness.iastate.edu/degree/actuarial-science/

For BBA curriculum, please go to: https://ivybusiness.iastate.edu/degree/bba/

For all Business majors, students may apply 9 P-NP credits of free electives; must earn an overall 2.00 minimum GPA; and apply only 65 credits from a 2-year institution, which may include up to 16 technical credits.

International Perspective: 3 cr. (see footnote 3 below)

U.S. Diversity: 3 cr. (see footnote 4 below)

Communication: 13 cr.
Proficiency met with grade of C or better in ENGL 250, and one additional C or better from either ENGL 150 or ENGL 302.

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
ENGL 302 Business Communication 3
SP CM 212 Fundamentals of Public Speaking 3
or SP CM 312 Business and Professional Speaking 3
LIB 160 Introduction to College Level Research 1

Humanities/Social Science: 9 cr.
9 cr. from approved humanities/social science list.

Global Perspectives: 6 cr. (SEE Footnote 3 BELOW)
6 cr. from approved global perspectives list.

Natural Science: 3 cr.
3 cr. from approved natural sciences list.

An approved list of the general education courses above are available at: https://ivybusiness.iastate.edu/general-education-requirements/ or from the Undergraduate Programs Office in the Ivy College of Business.

Foundation: 20 cr.

Total Credits 27
*All above core courses must be completed before MGMT 478.

**BUSINESS MAJOR:** 18-29 cr. (depending on major)

**ELECTIVES:** 0-17 cr. (depending on major)

**FootNotes:**
1. Accounting, Actuarial Science, Business Analytics, Business Economics, and Finance majors will also take STAT 326 Introduction to Business Statistics II as part of the supporting courses. Business Economics majors will take MATH 160 Survey of Calculus and ECON 207 Applied Economic Optimization instead of MATH 150 Discrete Mathematics for Business and Social Sciences and MATH 151 Calculus for Business and Social Sciences. Accounting majors will take ACCT 301 The Accounting Cycle concurrently with ACCT 285 Managerial Accounting as part of the Supporting Courses. Management Information Systems majors will take MIS 207 Fundamentals of Computer Programming as part of the Supporting Courses.
2. Students not adequately prepared in mathematics may have to take a supplemental course in addition to courses listed above.
3. Students may satisfy the Global/International Perspectives requirement by taking six credit hours from the University International Perspectives list.
4. Courses used for the U.S. Diversity requirements may also be used to fulfill Humanities/Social Sciences.

GRADUATE STUDY
Masters Programs

Seven programs are offered at the master’s level: a master of business administration (MBA), a master of accounting (MAcc), a master of business analytics (MoBA), a master of finance (MFIN), a masters in healthcare analytics and operations (MHAO), a master of real estate development (MRED), and a master of science in information systems (MSIS). These programs are intended to meet distinct sets of educational objectives.

The master of business administration (MBA) is the professional management education program for those pursuing careers in business. The goal of the MBA program is to educate future business leaders preparing them for the challenges of tomorrow by giving them the vision, knowledge, skills, and confidence to make the best decisions for all involved stakeholders. The MBA program consists of a 48-credit curriculum leading to a non-thesis, non-creative component master of business administration. Students may pursue a specialization in accounting, business analytics, finance, information systems, leadership, marketing, or supply chain management.

The Ivy College of Business also offers a business administration minor to students with majors outside the college. For more information on the graduate minor in business administration, please visit: https://ivybusiness.iastate.edu/degree/zgraduate-minors/

A concurrent BS/MBA is available to eligible engineering undergraduate students majoring in aerospace, agricultural, biological systems, chemical, civil, computer, construction, cybersecurity, electrical, industrial, materials science, mechanical, or software engineering. A concurrent BS/MBA is available to eligible undergraduate students majoring in agricultural systems technology, agronomy, animal science, chemistry, computer science, food science, geology, industrial design, industrial technology, and meteorology.

Double degree programs are offered with architecture (MArch/MBA), community and regional planning (MBA/MCRP), finance (MBA/MFIN), and information systems (MBA/MSIS). A double degree program (DVM/MBA) is available to eligible Veterinary Medicine students as well.

The master of accounting (MAcc) is designed to meet the needs of accountants in public or private accounting, focusing on interpreting and analyzing accounting information for decision-making and preparing students for certification as a Certified Public Accountant (CPA) or Certified Management Accountant (CMA). The 30-hour program requires 15 hours of graduate accounting courses, including courses in data analytics and communications. Students may pursue a specialization in Financial Reporting and Assurance, Information Systems and Analytics, Tax, or Managerial Decision Making.

The master of business analytics (MoBA) is an interdisciplinary program that addresses the challenges of dealing with data analytics and business intelligence in the “Big Data” environment. The goal is to develop managers who will master analytics in ways that lead to increased profits for their company. This online program offers a comprehensive approach that draws from Business, Computer Science, Electrical and Computer Engineering, Statistics, and Industrial and Manufacturing Systems Engineering. It provides a foundation in data analytics project management, statistical and predictive modeling, consumer sentiment analysis, knowledge discovery, analytical reporting, segmentation analysis and data visualization. The program requires 30 credits of graduate level courses over a 21 month period.

A certificate in business analytics is also available for working professionals. The certificate requires a minimum of 12 graduate level approved credits, which may be taken either on-line or face-to-face. For more information on the graduate certificate in business analytics, please visit: http://catalog.iastate.edu/collegeofbusiness/businessanalytics/#graduatecertificatetext

The master of finance (MFIN) is designed to provide students with in-depth coverage of financial topics and a strong quantitative skill set. Students will learn financial analysis, valuation, modeling, and risk management techniques. The 30-credit program requires 24 finance credits, of which 6 are finance electives. The remaining 6 credits are electives selected from any related area.

A certificate in finance is also available. The certificate requires a minimum of 12 graduate level approved credits, which may only be taken face-to-face. For more information on the graduate certificate in finance,
The Ivy College of Business participates in the following graduate level interdepartmental programs: Cyber Security, Engineering Management, Human Computer Interaction, Seed Technology and Business, and Transportation.

**Ph.D. in Business and Technology**

The Ivy College of Business offers graduate work leading to the Doctor of Philosophy degree in business and technology, with one of six specializations—entrepreneurship (ENTSP), finance, (FIN), management information systems (MIS), management (MGMT), marketing (MKT), or supply chain management (SCM). Departments in the college (Finance, Management and Entrepreneurship, Marketing, Supply Chain Management, and Information Systems and Business Analytics), along with select other departments from across campus cooperate in providing coursework toward this degree. The program prepares individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44-credit course curriculum followed by a 12-credit thesis or dissertation. Students do not need to have an undergraduate degree or master’s degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 credit hours of business foundation courses. For more details or application information contact the Graduate Programs office in the Ivy College of Business or visit: https://ivybusiness.iastate.edu/phd/

**Accounting**

Accountants are the business leaders in corporations and governments who manage, analyze, and explain complex information. Accountants are at the forefront of data analytics and lead the planning, evaluating, controlling, and reporting of activities in an entity.

The major in accounting is designed to give students a conceptual foundation, developing their financial acumen and analytical skills for use in every facet of business. Students who complete the accounting major are well prepared for careers in industry, government, and the public accounting profession.

Accountants both provide and explain useful financial information to internal users (such as managers in a company) and external users (such as investors, creditors, government officials, and the general public). Accounting is an integral part of the management of business and government organizations. Accounting information is needed by external users to make investment decisions, to grant or withhold credit, and in the case of government, to collect revenue and gather statistical information. To provide useful information, accountants collect, analyze, synthesize, and communicate data in an understandable manner.

Students graduating from the Masters in Healthcare Analytics and Operations (MHAO) program will apply data and appropriate models to analyze operations and supply chains to develop and present actionable insights leading to better outcomes in the healthcare industry. Healthcare analytics uses historical and current data to predict trends and optimize operations, bringing benefits to patients, medical professionals, and healthcare supply chain partners.

The Master of Real Estate Development (MRED) is a 30-credit non-thesis, non-creative component program. The MRED program offers academic training, networking opportunities and collaboration with leading academics and practitioners to solve real world problems. Areas of study include real estate market analysis, finance, investments, leadership and negotiation, fundamentals of the build environment, construction science and urban planning. The curriculum is offered in a convenient format of distance learning and brief campus residencies, making it ideal for the full-time working professional.

A certificate in supply chain management is also available. The certificate requires a minimum of 12 graduate level approved credits, which may only be taken on-line. For more information on the graduate certificate in supply chain management, please visit: http://catalog.iastate.edu/collegeofbusiness/supplychainmanagement/#graduatecertificatetext

A certificate in enterprise cybersecurity management is also available. The certificate requires a minimum of 12 graduate level approved credits, which may be taken either on-line or face-to-face. For more information on the graduate certificate in enterprise cybersecurity management, please visit: http://catalog.iastate.edu/collegeofbusiness/managementinformationsystems/#graduatecertificatetext

A certificate in entrepreneurship and innovation is also available. The certificate requires a minimum of 12 graduate level approved credits, which may be taken either on-line or face-to-face. For more information on the graduate certificate in entrepreneurship and innovation, please visit: http://catalog.iastate.edu/collegeofbusiness/entrepreneurship/#graduatecertificatetext
The curriculum in accounting is accredited by AACSB International, the Association to Advance Collegiate Schools of Business.

Undergraduate Major in Accounting

For undergraduate curriculum in business, major in accounting.

The Department of Accounting offers a major in accounting. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the bachelor of science (BS) degree, and 21 additional credits in the major.

The instructional objective of the Accounting Program is to provide a well-rounded professional education in accounting. Such an education should provide the student with:

1. a mastery of basic accounting concepts
2. an ability to solve accounting problems and analyze accounting issues utilizing critical thinking
3. an ability to communicate effectively and work with others as a member of a team
4. an awareness and sensitivity for dealing with ethical concerns.

For more information on the undergraduate major in Accounting, please visit: https://ivybusiness.iastate.edu/degree/accounting/

Student Learning Outcomes

Upon graduation, undergraduate students majoring in Accounting will:

1. Learners will possess fundamental accounting knowledge
2. Learners will be effective communicators
3. Learners will be critical thinkers
4. Learners will be skilled in the use of information technology
5. Learners will be effective team members
6. Learners will be ethical decision makers

Curriculum:

In addition to the basic business degree requirements (https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusiness), the requirements for the accounting major are met by successful completion of the following courses:

Required Courses (18 credits):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 383</td>
<td>Intermediate Managerial Accounting</td>

</tbody>
</table>

* ACCT 416 Business Law does not count towards the CPA exam requirements.

NOTE: Accounting majors must take ACCT 301 The Accounting Cycle and STAT 326 Introduction to Business Statistics II as part of the supporting courses.

See the CPA note below for the 150-hour education requirement for CPA certification in Iowa.

In addition, it is highly recommended that an accounting major include ACCT 416 Business Law. The Department of Accounting should be consulted for information on alternative plans of study.

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

CPA Note: The accounting major requires 22 credits of accounting beyond ACCT 284 Financial Accounting and ACCT 285 Managerial Accounting. To satisfy the State of Iowa CPA exam requirements of 24 credits of accounting beyond principles, students need one additional accounting elective. ACCT 416 Business Law is also highly recommended. Please note that ACCT 215 Legal Environment of Business, and ACCT 416 Business Law, do not count towards the 24 hours of accounting courses required to qualify for the CPA exam.
While students may sit for the CPA exam in Iowa after completing the required accounting coursework and earning a bachelor's degree, CPA candidates must complete a total of 150 credits in order to be certified or licensed to practice in Iowa. Qualified students should consider taking the Masters of Accounting (MAcc) to satisfy the 150-credit requirement. Students in accounting who are interested in graduate study should contact the Coordinator of the MAcc Program as early as possible to complete their graduate degree in an efficient manner. Students planning certification outside Iowa must check local rules, as each state determines its own exam qualification and licensing requirements.

### Core Business Courses

- 6 HUM/SOC SCI
- 3 Global/International Perspective@
- General Elective 4

| **Total Credits:** 15 | **16** |

@ Courses in these requirements may also be used as Global Perspective.

@ US Diversity courses may be used to satisfy HUM/SOC SCI.

* Requires completion of all core courses except MGMT 372 plus senior standing.

Graduation Requirements:

1. Grade of “C” or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 300+ level courses from a four-year institution.
3. 50% of required Business courses must be earned at ISU.
4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).
5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.
6. A grade of C or better in ENGL 250 required, and also in one other required ENGL course.
7. All 300-level and higher business credits must be earned at a four-year college.
8. Multiple business majors must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your advisor regarding multiple business degree requirements.

**Undergraduate Minor in Accounting**

The Department of Accounting also offers a minor for non-Accounting majors in the Ivy College of Business. The minor requires 16 credits.
from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Required Courses (7 credits):

</tbody>
</table>

Elective Courses (9 credits):

Select nine credit hours from 300 or 400 level Accounting courses, except ACCT 416.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in Accounting, please visit: https://ivybusiness.iastate.edu/degree/zminors-and-certificates/

**Master of Accounting (MAcc) 4+1 Program**

The Master of Accounting (MAcc) is a 30-credit hour, non-thesis graduate program with six credits dedicated to CPA exam preparation. This path allows students the time necessary to adequately study for and complete all four sections of the CPA exam before starting a full-time job. In addition, the program provides a solution to satisfying the 150 total credit hour CPA requirement while earning a higher degree!

Each MAcc student customizes their curriculum to fit their interests and intended career path. Both a CPA certification track and a CMA certification track are available. Within their selected track, students earn a specialization in one of the following areas of their choice: financial reporting and assurance, information systems and analytics, tax, or managerial decision-making. A three-week, six-credit study abroad option in London is available.

Students considering the MAcc should meet with Kayla Sander, MAcc coordinator and advisor, during the first semester of their junior year. Students are required to apply for the program the semester before beginning graduate coursework. For more information and a more detailed program outline, visit: http://www.ivybusiness.iastate.edu/degree/macc (http://www.ivybusiness.iastate.edu/degree/macc/).

**MAcc 4+1 Program Highlights**

**Freshman Spring**

**ACCT 284: Financial Accounting**

(3-0) Cr. 3. F.S.SS.

Introduction to the basic concepts and procedures of financial accounting from a user perspective. The course examines the accounting cycle, business terminology, basic control procedures, and the preparation and evaluation of financial reports, with an emphasis on financial statement analysis.

**Sophomore Fall**

**ACCT 301: The Accounting Cycle**

(1-0) Cr. 1. F.S.SS.

Prereq: ACCT 284

Interactive computer-based analysis of the accounting cycle including transactions and financial statements. Preparation of journal entries and adjusting entries and completion of the closing process.

**ACCT 285: Managerial Accounting**

(3-0) Cr. 3. F.S.SS.

Prereq: ACCT 284

Understanding of fixed and variable costs and their role in planning, control and performance evaluation. Examination of alternative costing methods. Making decisions by identifying and developing relevant information. Development of spreadsheet skills.

**MIS 301: Management Information Systems**

(3-0) Cr. 3.

Prereq: COM S 113

The role of information technology in organizations. Overview of methodologies for design and development of systems including decision support systems, expert systems, data bases, end-user computing, etc. Computer applications relate concepts to practice. Lecture and laboratory work emphasizes the enabling role of IT in contemporary organizations.

**Sophomore Spring**

**ACCT 384: Accounting Information Systems and Analytics**

(3-0) Cr. 3.

Prereq: ACCT 285 or ACCT 501; ACCT 301 and MIS 301

Concepts and procedures underlying creating, sharing, reporting, storing, and analyzing accounting data. Information technology internal controls and audit techniques. Trends in accounting information systems.
STAT 226: Introduction to Business Statistics I
(3-0) Cr. 3. F.S.S.S.
Prereq: MATH 150 or MATH 165
Obtaining, organizing, and presenting statistical data; measures of location and dispersion; the Normal distribution; sampling and sampling distribution of the sample mean; elements of statistical inference; confidence intervals and hypothesis testing for the mean; describing bivariate relationships and inference for simple linear regression analysis; use of computers to visualize and analyze data. Credit for only one of the following courses may be applied toward graduation: STAT 101, STAT 104, STAT 105, STAT 201, or STAT 226.

Junior Fall
(3-0) Cr. 3. F.S.
Prereq: ACCT 284 and ACCT 301
The conceptual framework of financial accounting. Communication of financial information on the income and retained earnings statements, statement of cash flows, and the balance sheet. Accounting concepts relating to current and operational assets of the firm.

Plan MAcc Program

Junior Spring
ACCT 383: Intermediate Managerial Accounting
(3-0) Cr. 3. F.S.
Prereq: ACCT 285 or ACCT 501; and ACCT 301
Generation, communication and use of information to assist management with planning, control, and decision making in manufacturing and service organizations. Includes cost concepts and relevance to decision situations, operational and capital budgeting, and performance evaluation. Emphasis on developing effective teamwork skills as well as spreadsheet capabilities.

ACCT 387: Intermediate Financial Accounting II
(3-0) Cr. 3. F.S.
Prereq: Minimum of C- in ACCT 386

Senior Fall
ACCT 485: Principles of Federal Income Tax
(3-0) Cr. 3. F.S.
Prereq: Minimum of C- in ACCT 386 or ACCT 501
Introduction to the fundamentals of federal income taxation and concepts applicable to all tax entities. Addresses issues related to the measurement and recognition of income, deductions, gains, and losses, taxation of property transactions, and basis / cost recovery concepts. Includes coverage of tax law policy objectives, tax implications of business and investment decisions, tax versus financial reporting treatment of common business transactions, and ethical issues related to tax compliance and planning.

ACCT 497: Introduction to Auditing
(3-0) Cr. 3. F.S.
Prereq: ACCT 384, ACCT 387 and STAT 326
The conceptual framework of auditing. Professional ethics. External reporting concepts. Audit methodology including risk analysis, internal control, procedures for gathering evidence and the role of statistical sampling in auditing.

Optional Concurrent Status to Get Started on MAcc Requirements Early!

Senior Summer
Optional Study Abroad in London

Graduate Fall
(3-0) Cr. 3. F.
Prereq: ACCT 386 or ACCT 501

ACCT 515: Accounting Analytics
Cr. 3. F.
Prereq: ACCT 384 or instructor permission
Applications and skills for performing data analytics in accounting contexts. Explores conceptual framework for providing data-driven insights and recommendations. Includes hands-on experiences working with different types of data and the latest analysis tools.
CPA or CMA Exam Prep Specialization Coursework

Please address MAcc questions to Kayla Sander, MAcc coordinator and advisor, at kayla@iastate.edu. An Accounting Student Resources page can be found in Canvas. This page provides useful, detailed information on both the CPA exam and the Iowa State University Master of Accounting 4+1 program. All Ivy accounting majors are connected to this page through Canvas.

Graduate Programs

Master of Accounting (MAcc)

The department offers a graduate degree, the master of accounting (MAcc). This is a 30-credit hour degree which offers paths to certification as a Certified Public Accountant (CPA) or Certified Management Accountant (CMA). Areas of specialization are also available within those 30 hours. Students pursuing the CPA certification may specialize in Financial Reporting and Assurance, Information Systems and Analytics, or Tax. Students pursuing the CMA certification may specialize in Managerial Decision Making or Information Systems and Analytics.

The program requires 15 hours of core courses which include ENGL 592C Core Studies: Professional Communication, ACCT 515 Accounting Analytics, ACCT 598 Financial Accounting: Theory and Contemporary Issues, and two Certification Preparation courses. The remaining 15 hours of the degree are determined by the selection of an area of specialization.

The MAcc is appropriate for accounting undergraduate students wanting to pursue a variety of accounting careers. The MAcc program is an efficient way for candidates to meet the 150-hour education requirement for CPA certification in Iowa. Students without an accounting degree will be required to complete a substantial amount of accounting coursework prior to being considered for admission to the MAcc. Contact the coordinator of the MAcc program for details.

Student Learning Outcomes

Upon graduation, master of accounting (MAcc) students will:

1. Be critical thinkers
2. Be effective communicators
3. Be effective team members
4. Be ethical decision makers
5. Be adequately prepared for professional certification or licensure

For more information about the MAcc program, please visit: https://ivybusiness.iastate.edu/degree/macc/

Master of Business Administration (MBA)

The Department of Accounting participates in the full-time, part-time, and executive Master of Business Administration (MBA) programs. The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students may develop an area of specialization in accounting. The specialization is designed to help meet the education requirement for CPA certification in Iowa.

Student Learning Outcomes

Upon graduation, MBA students will:

1. Demonstrate effective communication skills
2. Effectively lead and work in diverse teams
3. Critically solve business problems
4. Integrate ethical and global perspectives in decision making

For more information about the MBA program with a specialization in Accounting, please visit: https://ivybusiness.iastate.edu/degree/mba/

Actuarial Science

Actuaries have a deep understanding of finance, business, mathematics, and statistics. With this knowledge, they help businesses measure and manage risk, develop new products, and make strategic value-enhancing decisions. In high demand, actuaries work for and with businesses engaged in many different types of activities, including life-, health-, and property-casualty insurance, banking, investments, financial services, government, energy, e-commerce, marketing, and consulting.

Students studying actuarial science will acquire the knowledge base and skills in finance, mathematics, and statistics needed to pass the preliminary actuarial exams offered by the Society of Actuaries and Casualty Society of America, while acquiring essential business skills to be successful in the field.

Undergraduate Major

The Department of Finance in the Ivy College of Business offers a major in actuarial science. Students will complete the business general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the bachelor of science (B.S.) degree, and 29 additional credits in the major.

The actuarial science major, intended for students with strong quantitative backgrounds and interest in business, has the goal of educating students in business and risk management, while providing the background and training needed for certification as an actuary (via the 5 preliminary exams of the profession). The major is an excellent opportunity for individuals who want to use advanced technical and analytical skills to solve important business problems.

Certificate

The certificate in actuarial science is available from the College of Liberal Arts and Sciences for non-actuarial science majors at Iowa State. The certificate requires 23 credits from a designated list of courses, of which
9 credits must stand-alone. There are 9 prerequisite courses required for the certificate’s required courses.

The certificate in actuarial science is intended for students studying mathematics, statistics, or other STEM disciplines at Iowa State (or who hold a baccalaureate degree from an accredited institution) who wish to prepare for a career in the field while obtaining the advanced technical and analytical skills in their chosen major. Students completing the certificate will have sufficient background to pass the first 4 preliminary exams of the profession, along with applying actuarial mathematics to problems in finance, investments, and risk analysis for a broad range of businesses and consumers.

For undergraduate curriculum in business, major in actuarial science.

The Department of Finance offers a major in actuarial science. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the bachelor of science (B.S.) degree, and 29 additional credits in the major.

Actuaries measure and manage risk and work for and with businesses with a financial focus, such as finance and insurance. The actuarial science program provides a background in probability, statistics, finance, and actuarial mathematics to enable students to pass the 5 preliminary exams offered by the Society of Actuaries and Casualty Society of America. After completion of this program, students will acquire the business-related skills needed to be a successful actuary. These include the ability to: understand how a business is organized and functions; communicate effectively in written, oral, visual, and electronic modes; work in teams; make ethical choices; use quantitative and analytical methods to address unstructured business problems; think critically; understand financial statements; and understand markets and investments.

Areas of study in the field of actuarial science include interest theory, theory of probability, financial futures and options, loss models, credibility theory, and mathematics of life contingencies.

The instructional objective of the Actuarial Science program is to provide a well-rounded professional business education in actuarial science. Such a program will provide the student with:

1. a mastery of actuarial concepts and methods of analysis
2. a basic understanding of insurance operations in a global setting and of the role of financial institutions in the economy
3. an ability to effectively communicate and work with others as an actuary
4. an ability to demonstrate leadership capabilities in actuarial, financial analysis, and portfolio management.

For more information on the undergraduate major in Actuarial Science, please visit: https://ivybusiness.iastate.edu/degree/actuarial-science/

Student Learning Outcomes

Upon graduation, undergraduate students majoring in Actuarial Science will:

1. Be effective communicators
2. Be effective collaborators
3. Be problem solvers
4. Understand business concepts
5. Recognize ethical and legal responsibilities to organizations

Curriculum:

While the General Education Requirements for Actuarial Science majors remains the same as all other Business majors, there are specific changes in the following areas that must be completed in order to receive a Bachelor’s degree in Actuarial Science:

Pre-Professional Program – Foundation: (21)

**Part of the IFM actuarial exam includes material covered in FIN 310**

*Corporate Finance. Thus, FIN 310 remains highly recommended as an elective, and should be taken sooner rather than later.*

NOTE: Actuarial Science majors must take STAT 326 Introduction to Business Statistics II as part of the supporting courses.

NOTE: ACSCI 391X and ACSCI 392X review material covered on the P and FM actuarial exams respectively, and are highly recommended as electives for all Actuarial Science majors.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Actuarial Science, B.S.

Total Credits: 131
Total Credits = 131 if US Diversity and Human/Social Sciences are dual assigned.

@ Courses in these requirements may also be used as Global Perspective.
# US Diversity courses may be used to satisfy HUM/SOC SCI.
* Validation of Educational Experience courses
** Requires completion of all core courses except MGMT 372 plus senior standing.

FM = Financial Mathematics exam
P = Probability exam
IFM = Investments & Financial Markets exam
STAM = Short-Term Actuarial Mathematics exam
LTAM = Long-Term Actuarial Mathematics exam

Students must be admitted to the professional program in business to major in actuarial science. The requirements to enter the professional program are:

1. Completion of at least 30 credits, all Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.
2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses. Early admission is allowed for Honors-eligible students. (See your advisor for specific information.)

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 300+ level courses from a four-year institution.
3. 50% of required Business courses must be earned at ISU (exceptions for study abroad and internship may be requested).
4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).
5. 131 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.
6. A grade of C or better in ENGL 250 required, and also in one other required ENGL course.
7. A grade of C- or better in MATH 166 and MATH 265 required.
8. All 300-level and higher business credits must be earned at a four-year college.
9. Multiple business majors must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your advisor regarding multiple business degree requirements.

Undergraduate Certificate
For the undergraduate certificate in actuarial science.

Purpose
The College of Liberal Arts and Sciences offers a certificate in Actuarial Science. The certificate provides students with a major in mathematics, statistics, or other STEM disciplines (or who hold a baccalaureate degree from an accredited institution) with the necessary background in mathematics, statistics, and the basic principles of finance for a career in actuarial science while obtaining advanced technical and analytical skills in their chosen major. Students completing the certificate will have the background to pass 4 of the preliminary exams in the profession, will have obtained the specialized knowledge required for success in the field, and will be prepared to work for and with businesses with a financial focus, such as insurance, banking, and investments.

Learning Outcomes
After completing the certificate in actuarial science, students will:

• master the quantitative and analytical skills required to obtain an entry-level position in the profession,
• have sufficient background to pass the first 3 or 4 professional exams offered by the professional actuarial organizations,
• apply actuarial mathematics to problems in finance, investment, and risk analysis, and
• demonstrate the ability to communicate the results of quantitative analysis, both in writing and orally.

Requirements
The certificate in actuarial science requires the completion of 7 courses, totaling 23 credit hours.

The seven courses in the list above require 9 prerequisite courses. These courses are: ACCT 284, ECON 101, FIN 301, MATH 165, MATH 166, MATH 265, MATH 207 or 317, STAT 226 (or another introductory statistics
course: STAT 101, 104, 105, 201, 231, 305, 322 or 330), and STAT 326 (or STAT 301).

In order to be admitted to the certificate program, students must complete ACCT 284, ECON 101, MATH 165, MATH 166, and STAT 226 (or another introductory statistics course) with a cumulative GPA of at least 2.5.

At least 9 credits used for the certificate cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.

Courses for the certificate cannot be taken on a pass/not-pass basis.

A cumulative GPA of at least 2.0 is required in the seven courses for the certificate.

Business Administration

The Business Administration unit supports graduate and undergraduate programs in the departments of Accounting, Finance, Management and Entrepreneurship, Marketing, Supply Chain Management, and Information Systems and Business Analytics, by providing specialized coursework in orientation to business, professional development, and cooperative education opportunities.

Undergraduate Bachelor of Business Administration (BBA) Degree

For undergraduate curriculum in business, bachelor of business administration.

The Department of Management and Entrepreneurship offers an undergraduate bachelor of business administration (BBA) degree. This degree-completer program is a general business degree that is offered online. The BBA is accessible if you have some prior college experience, and is aimed at working professionals with at least 45 college credits. Students will complete the general education requirements (including business foundation courses), business core requirements for the bachelor of business administration (BBA) degree, and 21 additional credits in the major.

The instructional objective of the BBA degree is to learn the foundation in all areas of business, and then through the required and elective upper-level coursework, build out specialized knowledge in specific areas of business to align with your personal and professional interests and include an emphasis on critical management and leadership skills. By enrolling in the BBA program, you will be able to balance full time employment, or other personal commitments, and the completion of a four-year degree in business.

The major-specific coursework targets the following skills:

- Managing projects
- Negotiating and resolving conflicts
- Managing human resources
- Managing the supply chain
- Managing finances
- Managing a global and diverse workforce
- Managing sales and understanding consumer behavior

For more information on the undergraduate bachelor of business administration, please visit: https://www.ivybusiness.iastate.edu/degree/bba/

Student Learning Outcomes

Upon graduation, undergraduate students receiving a bachelor's in Business Administration will:

1. Be effective communicators
2. Be effective collaborators
3. Be problem solvers
4. Understand business concepts
5. Recognize ethical and legal responsibilities to organizations

Curriculum:

The department of Management and Entrepreneurship offers a fully online degree-completer program leading to a general business degree. This degree-completer program consists of 21 credits of coursework in the business administration major, including 9 credit hours of required core courses, and 12 credit hours of electives.

While the General Education Requirements for the Bachelor of Business Administration degree remains the same as all other Business majors, there are specific changes in the following areas that must be completed in order to receive a Bachelor's degree in Business Administration.

- or **MKT 447** | Consumer Behavior | 3

* Transfer coursework may be a substitute for STAT 226 Introduction to Business Statistics I, if approved.

# With the exception of ACCT 285 Managerial Accounting, pre-BBA students cannot take Professional Program - Business Core courses.

^ Requires completion of all core courses except MGMT 372 plus senior standing.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minor taken outside the Ivy College of Business.

BBA students cannot double major or earn a double degree in a business area. Online minors outside the Ivy College of Business could be added to the BBA if desired. Consult with an advisor in the Undergraduate Programs Office for assistance in identifying online minor options.

Graduate Programs

The Ivy College of Business offers a professional graduate degree program in business administration, the master of business administration (MBA), which is described below. The college also has six specialized master degree programs: the master of accounting (MAcc), the master of business analytics (MBS), the master of finance (MFIN), the master in healthcare analytics and operations (MHAO), the master of real estate development (MRED), and the master of science in information systems (MSIS). The college also offers a PhD in business and technology, with specializations in entrepreneurship, finance, information systems, management, marketing, and supply chain management. Finally, the Ivy College of Business is a participating member of the following interdepartmental programs: master of science in cyber security, master of engineering management, master of science and PhD in human computer interaction, master of science in seed technology and business, and master of science in transportation.

Master of Business Administration (MBA)

The Ivy College of Business offers a 48-credit program leading to a non-thesis master of business administration degree with a specialization in accounting, business analytics, finance, information systems, leadership, marketing, or supply chain management. The coursework is designed to provide the knowledge, skills, and abilities for managerial success and leadership in organizations. The MBA is the professional management education program for those pursuing careers in business.

Students may enroll in the MBA on either a full-time or part-time basis. The part-time MBA is designed for employed professionals. Part-time MBA classes are hybrid, offering a combination of online and face-to-face instruction held in the evenings in downtown Des Moines.

Students working toward the MBA are required to complete a series of core courses in the basic functional areas of business (accounting, economics, quantitative analysis, finance, supply chain management, organizational behavior, management information systems, marketing,
professional responsibilities, and strategic management), as well as advanced elective coursework. Two courses on professional skills development are also required for full-time MBA students.

Courses for the MBA are provided by the departments of Accounting, Economics, Finance, Management and Entrepreneurship, Marketing, Supply Chain Management, and Information Systems and Business Analytics. Courses from other departments may also be chosen to meet specific student interests.

A concurrent BS/MBA is available to eligible engineering undergraduate students majoring in aerospace, agricultural, biological systems, chemical, civil, computer, construction, cybersecurity, electrical, industrial, materials science, mechanical, or software engineering. A concurrent BS/MBA is available to eligible undergraduate students majoring in agricultural systems technology, agronomy, animal science, chemistry, computer science, food science, geology, industrial design, industrial technology, and meteorology.

Graduate Certificates
The Ivy College of Business currently has five graduate certificate programs, including:

- Business Analytics
- Enterprise Cybersecurity
- Entrepreneurship and Innovation
- Finance
- Supply Chain Management

Each certificate requires 12 credits—with approval of the director of graduate education (DOGE), all 12 credits may apply towards a future Ivy graduate program. Certificates may be earned before, after, or concurrently with a master’s or doctoral degree.

For more information on any of the graduate certificates offered, please visit: https://www.ivybusiness.iastate.edu/degree/graduate-certificates/

Double master’s degree programs are offered with architecture (MArch/MBA), community and regional planning (MBA/MCRP), finance (MBA/MFIN), and information systems (MBA/MSIS). A double degree program (DVM/MBA) is also available to eligible Veterinary Medicine students.

The MBA program is open to all individuals with a baccalaureate degree. Undergraduates from arts and humanities, science, and technical programs are especially encouraged to apply. Academic potential and promise for a productive career in business and for managerial success and leadership in organizations are important criteria for admission. Applicants must submit official transcripts of previous academic work, Graduate Management Admission Test (GMAT) scores or Graduate Record Exam (GRE) scores, personal essays, a resume, and two letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores.

Candidates are considered for fall semester entry only into the full-time MBA. Although applications will be considered after this date, candidates are encouraged to submit their application materials by June 1 (March 1 for international students). Part-time MBA applications are considered for fall, spring, or summer entry.

Student Learning Outcomes
Upon graduation, MBA students will:

1. Demonstrate effective communication skills
2. Effectively lead and work in diverse teams
3. Critically solve business problems
4. Integrate ethical and global perspectives in decision making

For more information about the MBA program in any of the areas of specialization listed above, please visit: https://ivybusiness.iastate.edu/degree/mba/

Executive Masters in Business Administration (EMBA)
The EMBA program is for professionals in the food, agriculture, and biosystems industry. The curriculum is a 48-credit program leading to a non-thesis master of business administration degree. The customized content is delivered 80% in-person, and 20% online.

Student Learning Outcomes
Upon graduation, executive MBA (EMBA) students will:

1. Be effective leaders
2. Be effective collaborators
3. Be critical thinkers in food, agriculture, and biosystems
4. Recognize ethical and global responsibilities around food, agriculture, and biosystems

For more information on the EMBA program, please visit: http://www.ivybusiness.iastate.edu/degree/emba/

Ph.D. in Business and Technology
The doctoral program at the Ivy College of Business is a full-time, residential program that prepares individuals to conduct and publish scholarly research in top journals. Graduates compete for academic positions at leading research universities in the United States and abroad. There are six specializations: entrepreneurship, finance, management information systems, management, marketing, and supply chain management.

Admission to the program is highly selective, with up to 12 students admitted annually. Applications are evaluated based on academic merit, compatibility of interests, and research ability. A master’s degree is not
required, but students without a sufficient business background and basic knowledge of statistics will take extra courses.

This 74-credit program requires a minimum of four years to complete. Coursework in the first two years includes seminars in content areas, statistics and research methodology. After passing comprehensive exams, students focus on their dissertation. All work, including the dissertation, must be done in residence (on campus). In addition to coursework, students participate in research seminars, work on research projects with faculty, and attend academic conferences.

Students can choose one of six areas of specialization: ENTSP, FIN, MIS, MGMT, MKT, or SCM.

The doctoral specialization in entrepreneurship (ENTSP) prepares students to conduct and publish scholarly research in entrepreneurship, including focus on new business ventures, entrepreneurs, innovation, and technology. In addition to curriculum in these core areas, students will also take courses in research methods and the closely-related areas of management, including strategy, organizational behavior, and human resources.

The goal of this program is to prepare students to compete for tenure-track positions at leading research universities in the United States and abroad. As a doctoral candidate, students will learn how to conduct impactful research, and they are expected to develop a research pipeline and publish their work in top academic journals before entering the job market.

The finance (FIN) specialization trains students to teach at the university level, do research that is publishable in top academic journals, and to analyzes questions that are important to government agencies and the private sector. Successful students develop close working relationships with the ISU finance faculty, both in the classroom and on co-authored research. We strive for our students to publish their first research study before finishing the program, and to obtain jobs at universities rated "high" or "very high" in research activity by the Carnegie Foundation. We emphasize rigorous training and hands-on experience. Five semesters of coursework include a firm grounding in economic theory, thorough training in statistics and econometrics, and an immersion in the most important research studies in corporate finance, investments, and financial institutions.

The management information systems (MIS) specialization examines issues related to the development, building, management, and use of information and knowledge-based technologies. Such technologies enable users to collect organizational data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. Students in the IS specialization will study areas such as information technology analysis and development, database and knowledge management systems, decision support and data mining, human computer interaction, system security and integrity, and project management and collaborative teamwork.

The management (MGMT) specialization applies a broad range of theoretical perspectives from the social sciences and diverse research methods to the study of organizational behavior, human resources, strategy, and entrepreneurship. The curriculum takes a multidisciplinary approach to analyze individuals and teams, the formulation and implementation of strategy, the effective use of human resources, social responsibility and ethics, entrepreneurship, innovation and technology, and the challenges of the global business environment. The program emphasizes personalized attention and the development of scholars who can contribute with high-quality theoretical and empirical research in these and related areas.

The marketing (MKT) area focuses on identification and delivery of solutions that help improve the ways in which businesses attract, capture, service and maintain customers. To do these activities well, organizations will need to integrate process goals and activities across different functional areas and across multiple organizational partners. This area of study will examine issues relating to inter-functional and inter-organizational relationships and their management in pursuit of maximizing the lifetime value of a businesses’ customer base.

The supply chain management (SCM) specialization focuses on the design, development, and control of business processes for conversion of inputs into outputs and distribution of those outputs. The traditional focus of SCM was on integration of processes across multiple functions within the firm—operations management, logistics, and purchasing primarily, with elements of marketing and information systems included as well. However, in today’s world, where competition occurs across supply chain networks, SCM also involves integrating business processes across firms.

Programs of study for the doctoral study are designed for each student in consultation with the major professor and the student's PhD committee. Each student must complete advanced courses in his/her area of specialization, a minor area that supports the major area, and research methods courses. Students must demonstrate competence in theory and research methods by passing qualifying examinations.

The final application deadline for the PhD program is January 15 for fall admission. Applicants must submit official transcripts of previous coursework and degrees, Graduate Management Admission Test (GMAT) scores or Graduate Record Exam (GRE) scores, personal essays, a resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S.
college or university are required to submit TOEFL (Test of English as a Foreign Language) scores.

**Student Learning Outcomes**

Upon graduation, PhD students will be able to:

1. Understand and advance knowledge
2. Create knowledge through original research
3. Teach effectively in an institution of higher education

For more information about the PhD program in any of the areas of specialization listed above, please visit: https://ivybusiness.iastate.edu/phd/

**Graduate Minor in Business Administration**

The Ivy College of Business also offers a business administration minor to students with majors outside the college. In order to obtain a graduate minor in business administration at Iowa State University, a student must complete eighteen credit hours of the required core courses for the major in business administration. A student who wishes to minor in business administration must have full admission status in his/her respective graduate program and must be in good academic standing (graduate transcript required).

**Required Courses (9 credits):**

Applications for the graduate minor in business administration are accepted for fall semester entry only.

For more information on the graduate minor in business administration, please visit: https://ivybusiness.iastate.edu/degree/zgraduate-minors/

**Business Analytics**

We live in a day where we are overwhelmed with data. Today’s companies are data-rich and information-poor (DRIP). Business analytics is the transformation of data into insights for better decision making. This transformation is iterative and multi-disciplinary. Business analytics falls at the intersection of technology, statistics, and business.

Students studying business analytics will gain the knowledge and skills necessary to understand and apply quantitative modeling techniques, design cross-functional solutions using standard and advanced business analytics technologies and software, evaluate data mining methods, communicate solutions using data visualizations, develop team and project management skills in a big data context, and effectively communicate analytical findings both orally and in writing.

**Undergraduate Major in Business Analytics**

For undergraduate curriculum in business, major in Business Analytics.

The Department of Information Systems and Business Analytics offers a major in Business Analytics. Students will complete the general education requirements (including business foundation courses), business core requirements for the bachelor of science (B.S.) degree, and 21 additional credits in the major.

The instructional objective of the business analytics major is to prepare students to realize the opportunities presented by data. This includes bringing structure to data, finding compelling patterns in data, communicating the stories buried in data, and advising decision-makers at all levels on the implications for processes and decisions through a data-driven approach.

For more information on the undergraduate major in Business Analytics, please visit: https://ivybusiness.iastate.edu/degree/business-a/

**Student Learning Outcomes**

Upon graduation, undergraduate students majoring in Business Analytics will:

1. Be effective communicators
2. Be effective collaborators
3. Be problem solvers
4. Understand business concepts
5. Recognize ethical and legal responsibilities to organizations

**Degree Requirements**

In addition to the basic business degree requirements (https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusinesstext), Business Analytics majors must also complete:

**Required Courses (12 credits):**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>DS 201</td>
<td>Introduction to Data Science</td>
<td>3</td>
</tr>

<tr>
<td>SCM 430</td>
<td>Supply Chain Analytics</td>
<td>3</td>
</tr>
<tr>
<td>SCM 460</td>
<td>Decision Tools for Logistics and Operations Management</td>
<td>3</td>
</tr>
</tbody>
</table>

* If both MIS 320 and ACCT 384 are taken, one will count for 3 elective credits in the major.
# STAT 326 is a prerequisite for these courses.

NOTE: Business Analytics majors must take STAT 326 Introduction to Business Statistics II as part of the supporting courses.

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Courses in these requirements may also be used as Global Perspective.
US Diversity courses may be used to satisfy HUM/SOC SCI.
Requires completion of all core courses except MGMT 372 plus senior standing.

Students must be admitted to the professional program in business to major in Business Analytics. The requirements to enter the professional program are:

1. Completion of at least 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.
2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses. Early admission is allowed for Honors-eligible students. (See your advisor for specific information)

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.

2. 42 credits of 300+ level courses from a four-year institution.

3. 50% of required Business courses must be earned at ISU.

4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).

5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.

6. A grade of C or better in ENGL 250 required, and also in one other required ENGL course.

7. All 300-level and higher business credits must be earned at a four-year college.

8. Multiple business majors must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your advisor regarding multiple business degree requirements.

**Undergraduate Minor in Business Analytics**

The Department of Information Systems and Business Analytics also offers a minor for non-Business Analytics majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least nine credits that are not used to satisfy any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

* If both MIS 320 and ACCT 384 are taken, one will count for 3 elective credits in the minor.
# STAT 326 is a prerequisite for these courses.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.

For more information on the undergraduate minor in Business Analytics, please visit: [https://ivybusiness.iastate.edu/degree/zminors-and-certificates/](https://ivybusiness.iastate.edu/degree/zminors-and-certificates/)

**Graduate Programs**

**Master of Business Analytics (MoBA)**

The master of business analytics (MoBA) is an interdisciplinary program that addresses the challenges of dealing with data analytics and business intelligence in the "Big Data" environment. The goal is to develop managers who will master analytics in ways that lead to increased profits for their company. This blended program offers both online and face-to-face education in a comprehensive approach that draws from Business, Computer Science, Electrical and Computer Engineering, Statistics, and Industrial and Manufacturing Systems Engineering. It provides a foundation in data analytics project management, statistical and predictive modeling, consumer sentiment analysis, knowledge discovery, analytical reporting, segmentation analysis and data visualization. The program requires 30 credits of graduate level courses over a 21 month period. Students start the program with a one-week on-campus initiation class. Students then
revisit campus once during the middle and once at the end of the program, while taking online classes during the rest of the time.

Student Learning Outcomes
Upon graduation, master of business analytics (MoBA) students will:

1. Be analytics modelers
2. Be problem solvers in analytics
3. Be evaluators of analytics
4. Be critical thinkers in analytics
5. Be collaborators in big data and analytics
6. Be effective communicators

For more information about the Master of Business Analytics program, please visit: https://ivybusiness.iastate.edu/degree/mban/

Masters in Healthcare Analytics and Operations (MHAO)
Students graduating from the Masters in Healthcare Analytics and Operations program will apply data and appropriate models to analyze operations and supply chains to develop and present actionable insights leading to better outcomes in the healthcare industry. Healthcare analytics uses historical and current data to predict trends and optimize operations, bringing benefits to patients, medical professionals, and healthcare supply chain partners.

For more information about the Master of Healthcare Analytics and Operations program, please visit: https://www.ivybusiness.iastate.edu/degree/master-of-healthcare-analytics-and-operations/

Master of Business Administration (MBA)
The Department of Information Systems and Business Analytics participates in the full-time and part-time Master of Business Administration (MBA) program. The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students may develop an area of specialization in Business Analytics.

Student Learning Outcomes
Upon graduation, MBA students will:

1. Demonstrate effective communication skills
2. Effectively lead and work in diverse teams
3. Critically solve business problems
4. Integrate ethical and global perspectives in decision making

For more information about the MBA program with a specialization in Business Analytics, please visit: https://ivybusiness.iastate.edu/degree/mba/

Graduate Certificate
The graduate certificate in business analytics will address the challenges of dealing with issues of "big data" and its analysis to extract actionable insights, equips business professionals with the basic analytic concepts and techniques necessary in various areas of business such as marketing, supply chain, operations, forensics, and risk management. Students will have a foundation in data management, business analytics, modeling, and communicating through data visualization.

The certificate is for working professionals as well as students enrolled in graduate programs who are employed or seeking a career as business analysts, analytic systems designers, and data scientists to help improve business performance. The certificate is available online, on campus in Ames and at Capital Square in Des Moines.

For more information about the graduate certificate in business analytics, please visit: https://ivybusiness.iastate.edu/ba-certificate/

Business Economics
The Ivy College of Business has partnered with the Department of Economics to offer a Business Economics major.

Where business studies the organizations and functions that deliver goods and services to customers, economics studies those good and services with respect to production, distribution, and consumption, and the choices we make about how to best utilize the resources we have.

Undergraduate Major in Business Economics
For undergraduate curriculum in business, major in business economics.

Through a partnership between the Ivy College of Business and the Department of Economics, a major in Business Economics is offered. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the bachelor of science (BS) degree, and 19 additional credits in the major.

The objective of the Business Economics major is to provide a high quality education with a balanced emphasis in both business and economics. Such an education should equip graduates with a unique set of skills distinguishing them from other graduates. In particular, they will have the ability to use both business and economic reasoning to think critically and address complex issues using tools and decision making models of economics, business, mathematics, statistics, as well as concepts from the biological, physical, and social sciences; to make decisions and to communicate effectively.

For more information on the undergraduate major in Business Economics, please visit: https://www.ivybusiness.iastate.edu/degree/business-economics/
Student Learning Outcomes

Upon graduation, undergraduate students majoring in Business Economics will:

1. Be effective communicators
2. Be effective collaborators
3. Be problem solvers
4. Understand business concepts
5. Recognize ethical and legal responsibilities to organizations

Curriculum:

In addition to the basic business degree requirements (https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusiness), business economics majors must also complete:

Required Courses (10 credits):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 301</td>
<td>Intermediate Microeconomics</td>
<td>4</td>

<td>R</td>
</tr>
</tbody>
</table>

Elective Courses (9 credits):

Select one course of ECON 230-289, 300-389, or 400-489 3
Select two additional 400-489 level ECON courses 6

NOTES:

Business Economic majors must take STAT 326 Introduction to Business Statistics II as part of the supporting courses.

Business Economic majors take MATH 160 and ECON 207 instead of MATH 150 and MATH 151.

Students majoring in business economics are not permitted to take agricultural business or economics as a double major, or economics as a minor.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Business Economics, B.S.

Total Credits: 122

@ Courses in these requirements may also be used as Global Perspective.
# US Diversity courses may be used to satisfy HUM/SOC SCI.
* Requires completion of all core courses except MGMT 372 plus senior standing.

Students must be admitted to the professional program in business to major in business economics. The requirements to enter the professional program are:
1. Completion of at least 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.

2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses. Early admission is allowed for Honors-eligible students. (See your advisor for specific information)

Graduation Requirements:

1. Grade of “C” or higher in at least 30 credits of Core and Major courses.

2. 42 credits of 300+ level courses from a four-year institution.

3. 50% of required Business courses must be earned at ISU.

4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).

5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.

6. A grade of C or better in ENGL 250 required, and also in one other required ENGL course.

7. All 300-level and higher business credits must be earned at a four-year college.

8. Multiple business majors must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your advisor regarding multiple business degree requirements.

Entrepreneurship

Success in entrepreneurship requires a broad base of conceptual knowledge, personal skills, and competencies. The required courses in the major provide a variety of rich developmental experiences that include applied learning, case analysis, research projects, team-based active learning projects, and guest speakers, in addition to traditional classroom lectures and discussions. The Entrepreneurship major places a strong emphasis on written and oral communication skills, teamwork, creativity, leadership, and personal initiative.

Undergraduate Major in Entrepreneurship
For undergraduate curriculum in business, major in entrepreneurship.

The Department of Management and Entrepreneurship offers a major in Entrepreneurship. Students will complete the general education requirements (including business foundation courses), business core requirements for the Bachelor of Science (B.S.) degree, and 18 additional credits in the major.

The Entrepreneurship major is designed to prepare students for the field of entrepreneurship. Upon graduation, students will be prepared to identify and exploit business opportunities, start their own business, or lead venture-creation and innovative initiatives at established for-profit and non-profit organizations.

The Entrepreneurship Major rests on three pillars:

- **Business Startup and Small Business Management.** The major focuses on starting and managing new and small businesses, including family businesses, which present different challenges that require knowledge of various models of leadership, market research, fundraising, risk management, and other activities with increasingly digital components.

- **Leadership and Innovation.** Today’s highly sought-after employees are those with entrepreneurial mind and skill sets that allow them to create, lead, and contribute to innovative projects and initiatives within their organizations.

- **Social Entrepreneurship.** A major emphasis is given to managing non-profit ventures to initiate and support positive social and environmental changes. Entrepreneurship principles and tools have proven their relevance and value for both small and large non-profit ventures and organizations. Thus, this major prepares students who are interested in making a difference by supporting positive social and environmental causes.

Students majoring in Entrepreneurship are not permitted to take Entrepreneurship as a minor.

For more information on the undergraduate major in Entrepreneurship, please visit: https://ivybusiness.iastate.edu/degree/entrepreneurship/

**Student Learning Outcomes**

Upon graduation, undergraduate students majoring in Entrepreneurship will:

1. Be effective communicators
2. Be effective collaborators
3. Be problem solvers
4. Understand business concepts
5. Recognize ethical and legal responsibilities to organizations

**Curriculum:**

In addition to the basic business degree requirements (https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusinesstext), Entrepreneurship majors are required to complete 18 credit hours of
entrepreneurship or management department-approved courses. Included in these 18 credits are four required courses:

Required Courses (12 credits):

**Total Credits: 122**

@ Courses in these requirements may also be used as Global Perspective.

^ Students are encouraged to register for sections of ENGL 250 that have topics focused on entrepreneurship and innovation.

# US Diversity courses may be used to satisfy HUM/SOC SCI.

* Requires completion of all core courses except MGMT 372 plus senior standing.

Students must be admitted to the professional program in business to major in entrepreneurship. The requirements to enter the professional program are:

1. Completion of at least 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.

2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses. Early admission is allowed for Honors-eligible students. (See your advisor for specific information)

Graduation Requirements:

1. Grade of “C” or higher in at least 30 credits of Core and Major courses.

2. 42 credits of 300+ level courses from a four-year institution.

3. 50% of required Business courses must be earned at ISU.

4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).

5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.

6. A grade of C or better in ENGL 250 required, and also in one other required ENGL course.

7. All 300-level and higher business credits must be earned at a four-year college.

8. Multiple business majors must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your advisor regarding multiple business degree requirements.

**Undergraduate Minor in Entrepreneurship**

An Entrepreneurship minor for non-Entrepreneurship majors is also available. This interdepartmental undergraduate minor in Entrepreneurship is available to all undergraduate students at Iowa State University. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include 9 credits that are not used to meet any other department, college, or university requirement. Students must follow college-specific rules in selecting courses for the minor. The college representatives to the supervisory committee for the minor will be responsible for advising students in their college, and will inform students about the details of the college rules. Students with declared majors have priority over students with declared minors in courses with space constraints.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Non-business students with an Entrepreneurship minor are not permitted to major in Entrepreneurship. Business students interested in Entrepreneurship may choose to major in Entrepreneurship (https://catalog.iastate.edu/collegeofbusiness/entrepreneurship/#undergraduatemajortext), or pursue the Entrepreneurship minor.

For more information on the undergraduate minor in Entrepreneurship, please visit: https://catalog.iastate.edu/interdisciplinaryprograms/minor/entrepreneurship (https://catalog.iastate.edu/interdisciplinaryprograms/minor/entrepreneurship/)

**Graduate Programs**

**Ph.D. in Business and Technology**

The doctoral specialization in entrepreneurship (ENTSP) prepares students to conduct and publish scholarly research in entrepreneurship, including focus on new business ventures, entrepreneurs, innovation, and technology. In addition to curriculum in these core areas, students will also take courses in research methods and the closely-related areas of management, including strategy, organizational behavior, and human resources.

The goal of this program is to prepare students to compete for tenure-track positions at leading research universities in the United States and abroad. As a doctoral candidate, students will learn how to conduct impactful research, and they are expected to develop a research pipeline
and publish their work in top academic journals before entering the job market.

**Student Learning Outcomes**

Upon graduation, PhD students will be able to:

1. Understand and advance knowledge
2. Create knowledge through original research
3. Teach effectively in an institution of higher education

For more information about the PhD program with a specialization in Entrepreneurship, please visit: [https://ivybusiness.iastate.edu/degree/phd/phd-entrepreneurship-and-management/](https://ivybusiness.iastate.edu/degree/phd/phd-entrepreneurship-and-management/)

**Graduate Certificate**

A graduate certificate in Entrepreneurship and Innovation offers post-undergraduate students the opportunity to learn the basics of starting a business. The certificate requires 4 courses (12 credits). The two required core courses are offered online by the Ivy College of Business. Elective courses are available across campus.

The graduate certificate in Entrepreneurship and Innovation focuses on strategies and resources for launching new ventures and helps students understand the role of innovation in entrepreneurship.

This interdisciplinary certificate provides a solid foundation in entrepreneurship and innovation through required core courses ENTSP 566 Entrepreneurship and New Venture Startup and MGMT 583 Formulating and Implementing Innovation Strategies. At the same time, the program enables students to follow their own interests through electives offered by partners across campus.

For more information about the graduate certificate in Entrepreneurship and Innovation, please visit: [https://ivybusiness.iastate.edu/ei-certificate/](https://ivybusiness.iastate.edu/ei-certificate/)

**Finance**

Finance is a broad program of study designed to provide a descriptive, behavioral, and analytical background of financial management to enable students to qualify for opportunities in financial services, insurance, brokerage, government, real estate, and financial management of business enterprises. Finance is also an excellent area for those who wish to become more knowledgeable as consumers, particularly in the fields of investments, insurance, and real estate.

Areas of study in the field of finance include corporate financial management, investments, portfolio management, insurance, real estate, banking, and risk management. Upper-level courses include a review of contemporary literature in the field, case studies, and financial problem analysis integrating finance courses previously taken.

**Undergraduate Major in Finance**

For undergraduate curriculum in business, major in finance.

The Department of Finance offers a major in finance. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the bachelor of science (B.S.) degree, and 21 additional credits in the major.

The instructional objective of the Finance program is to provide a well-rounded professional education in finance. Such an education should provide the student with:

1. a mastery of basic financial concepts and methods of analysis
2. an understanding of financial operations in a global setting and of the role of financial institutions in the economy
3. an ability to effectively communicate and work with others as the finance member of a team
4. an ability to demonstrate leadership capabilities in financial analysis and portfolio management.

For more information on the undergraduate major in Finance, please visit: [https://ivybusiness.iastate.edu/degree/finance/](https://ivybusiness.iastate.edu/degree/finance/)

**Student Learning Outcomes**

Upon graduation, undergraduate students majoring in Finance will:

1. Be effective communicators
2. Be effective collaborators
3. Be problem solvers
4. Understand business concepts
5. Recognize ethical and legal responsibilities to organizations

**Curriculum:**

In addition to the basic business degree requirements (https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusiness), finance majors must also complete:

<table>
<thead>
<tr>
<th>Required Courses (6 credits):</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>FIN 310 Corporate Finance</td>
<td>3</td>
</tr>
<tr>

FIN 480  International Finance  3  
FIN 491  International Study Course in Global Capital Markets  3  
FIN 492X  Case Studies in Strategic Financial Decision-Making  3  

Additional Elective Courses (3 credits):  
Select one course from the following:  
ACCT 383  Intermediate Managerial Accounting  3  
ACCT 386  Intermediate Financial Accounting I  3  
ACCT 387  Intermediate Financial Accounting II  3  
or any additional 400+ level Finance course.  

Total Credits: 21  

* STAT 326 Introduction to Business Statistics II is highly recommended to be taken as a prerequisite.  

NOTE: Finance majors must take STAT 326 Introduction to Business Statistics II as part of the supporting courses.  

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.  

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Total Credits: 122
Courses in these requirements may also be used as Global Perspective.

US Diversity courses may be used to satisfy HUM/SOC SCI.

Requires completion of all core courses except MGMT 372 plus senior standing.

Students must be admitted to the professional program in business to major in finance. The requirements to enter the professional program are:

1. Completion of at least 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.

2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses. Early admission is allowed for Honors-eligible students. (See your advisor for specific information)

Graduation Requirements:

1. Grade of “C” or higher in at least 30 credits of Core and Major courses.

2. 42 credits of 300+ level courses from a four-year institution.

3. 50% of required Business courses must be earned at ISU.

4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).

5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.

6. A grade of C or better in ENGL 250 required, and also in one other required ENGL course.

7. All 300-level and higher business credits must be earned at a four-year college.

8. Multiple business majors must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your advisor regarding multiple business degree requirements.

Undergraduate Minor in Finance

The Department of Finance also offers a finance minor for non-finance majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Required Course (3 credits):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>FIN 301</td>
<td>Principles of Finance</td>
<td>3</td>
</tr>
</tbody>
</table>

Elective Courses (12 credits):

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in Finance, please visit: https://ivybusiness.iastate.edu/degree/zminors-and-certificates/

Graduate Programs

Master of Finance (MFIN)

The Finance Department offers a Master of Finance (MFIN) degree. The MFIN is a non-thesis, non-creative component curriculum designed to provide students with in-depth coverage of finance topics and a strong quantitative skill set. Students will learn financial analysis and valuation, advanced regression techniques and programming approaches for data analysis, time series analysis and forecasting, optimization techniques, modelling of financial and risk variables, simulation techniques, and tools for effective risk management. The 30 credit program requires 18 core credits. Another 12 credits of electives are required, six of which must be in finance courses.

Student Learning Outcomes

Upon graduation, master of finance (MFIN) students will:

1. Be critical thinkers in finance
2. Have a broad understanding of financial concepts
3. Have strong problem solving and decision-making skills
4. Have a strong background in ethical development

For more information about the MFIN program, please visit: https://ivybusiness.iastate.edu/degree/mfin/

Master of Real Estate Development (MRED)

The Finance Department also offers a Master of Real Estate Development (MRED) degree. Jointly created with the College of Design, and with significant input and engagement from industry leaders, the MRED is a 30-credit non-thesis, non-creative component program. The MRED program offers academic training, networking opportunities and collaboration with leading academics and practitioners to solve real world problems. Areas of study include real estate market analysis, finance, investments, leadership and negotiation, fundamentals of the build environment, construction science and urban planning. The curriculum is offered in a convenient format of distance learning and brief campus residencies, making it ideal for the full-time working professional.
Student Learning Outcomes
Upon graduation, master of real estate development (MRED) students will:

1. Be knowledgeable in various aspects of real estate
2. Be critical thinkers in real estate
3. Be innovators in real estate
4. Be leaders in real estate

For more information about the MRED program, please visit: https://ivybusiness.iastate.edu/degree/masters-mred/

Master of Business Administration (MBA)
The Department of Finance also participates in the full-time and part-time Master of Business Administration (MBA) program as well as the PhD in Business and Technology program. The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students may develop an area of specialization in Finance.

Student Learning Outcomes
Upon graduation, MBA students will:

1. Demonstrate effective communication skills
2. Effectively lead and work in diverse teams
3. Critically solve business problems
4. Integrate ethical and global perspectives in decision making

For more information about the MBA program with a specialization in Finance, please visit: https://ivybusiness.iastate.edu/mba-full-time-details/

Ph.D. in Business and Technology
The PhD in Business and Technology with a Finance (FIN) specialization is a 56-credit (minimum) curriculum designed to train students to teach at the university level, to do research that is publishable in top academic journals, and to analyze questions that are important to government agencies and the private sector. Successful students develop close working relationships with the ISU finance faculty, both in the classroom and on co-authored research. We strive for our students to publish their first research study before finishing the program, and to obtain jobs at research-oriented universities in the U.S. and abroad. We emphasize rigorous training and hands-on experience. Five semesters of coursework include a firm grounding in economic theory, thorough training in statistics and econometrics, and an immersion in the most important research studies in corporate finance, investments, and financial institutions.

Student Learning Outcomes
Upon graduation, PhD students will be able to:

1. Understand and advance knowledge
2. Create knowledge through original research
3. Teach effectively in an institution of higher education

For more information about the PhD program with a specialization in Finance, please visit: https://ivybusiness.iastate.edu/phd/phdfinance/

Graduate Certificate
The graduate certificate in finance provides training in investment valuation and the skills necessary to value an entire company through analysis of expected cash flows based on financial statements, growth characteristics, and risk.

The certificate is for graduate students and recent graduates seeking job opportunities as investors or professional money managers, who deal with efficient asset allocation in a portfolio setting, investment performance measurement, and performance evaluation. The certificate is available on campus in Ames.

For more information about the graduate certificate in Finance, please visit: https://ivybusiness.iastate.edu/finance-graduate-certificate/

Healthcare Management
Healthcare management is a great fit for students who want to combine their interests in both healthcare and business. The major includes instruction in planning, business management, financial management, healthcare quality management, organizational behavior and leadership, health policy, health law and regulations, and management of health information systems. As a part of the curriculum, students are required to complete an experiential learning component (internship, co-op, or an independent study).

Undergraduate Major in Healthcare Management
For undergraduate curriculum in business, major in healthcare management.

The department of Management and Entrepreneurship offers a major in healthcare management. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the bachelor of science (B.S.) degree, and 24 additional credits in the major.

The instructional objective of the Healthcare Management program is to provide a well-rounded professional education in healthcare management. Such an education should provide the student with:

1. Foundational knowledge of the healthcare management field: insurance, current healthcare policy, policy development, economics of health and healthcare, patient safety, quality management, financing, payor mixture, healthcare-specific laws and
regulations, and information systems as they relate to healthcare
data

2. **Comprehensive business skills**: decision-making skills, relationship management skills, data interpretation and analytic skills, managerial professionalism, teamwork and collaboration skills related to various actors in healthcare (including practitioners), leadership skills, and strategy skills

3. **Experiential learning**: hands-on learning in a healthcare setting, application of HCM curriculum to real world experiences

For more information on the undergraduate major in Healthcare Management, please visit: https://ivybusiness.iastate.edu/degree/healthcare-management/

**Student Learning Outcomes**

Upon graduation, undergraduate students majoring in Healthcare Management will:

1. Be effective communicators
2. Be effective collaborators
3. Be problem solvers
4. Understand business concepts
5. Recognize ethical and legal responsibilities to organizations

**Curriculum:**

In addition to the basic business degree requirements (https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusiness), healthcare management majors must also complete:

**Required Courses:**

<table>
<thead>
<tr>
<th>Course</th>

### Human Resource Management

The field of human resource management (HRM) is a core contributor to an efficient and effective organization. HRM is focused on ensuring that organizations have employees with the right knowledge, skills, and abilities to achieve their objectives. HR professionals deliver the effective and necessary recruitment, training, development, and performance management processes that are crucial to sustained organizational success. Our HRM major prepares graduates for success by integrating relevant HR content knowledge and professional skills with a contemporary data-driven perspective that organizations value.

**Undergraduate Major in Human Resource Management**

For undergraduate curriculum in business, major in human resource management.

The Department of Management and Entrepreneurship offers a major in human resource management. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the bachelor of science (B.S.) degree, and 21 additional credits in the major.

The instructional objective of the Human Resource Management program is to provide a well-rounded professional education in human resource management. Such an education should provide the student with:

1. Knowledge and technical expertise in the functional areas of human resource management, including recruiting, selection, training and development, performance management, compensation and benefits, and employment law
2. Relationship management skills, professionalism and business partnering skills, teamwork and collaboration skills, listening skills, and leadership skills
3. Critical and analytical thinking, analytical skills, data interpretation and communication skills

For more information on the undergraduate major in Human Resource Management, please visit: [https://ivybusiness.iastate.edu/degree/human-resource-management/](https://ivybusiness.iastate.edu/degree/human-resource-management/)

Total Credits: 122

@ Courses in these requirements may also be used as Global Perspective.
* MGMT 472 satisfies the US Diversity requirement
# Requires completion of all core courses except MGMT 372 plus senior standing.

Students must be admitted to the professional program in business to major in human resource management. The requirements to enter the professional program are:

1. Completion of at least 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.
2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses. Early admission is allowed for Honors-eligible students. (See your advisor for specific information)
Graduation Requirements:

1. Grade of “C” or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 300+ level courses from a four-year institution.
3. 50% of required Business courses must be earned at ISU.
4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).
5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.
6. A grade of C or better in ENGL 250 required and also in one other required ENGL course.
7. All 300-level and higher business credits must be earned at a four-year college.
8. Multiple business majors must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your advisor regarding multiple business degree requirements.

Graduate Programs

The Department of Management and Entrepreneurship participates in the PhD in Business and Technology program.

Ph.D. in Business and Technology

The doctoral specialization in management (MGMT) will prepare students to conduct and publish scholarly research in management, including the sub-fields of strategy, organizational behavior, and human resource management. In addition to curriculum in these core areas, students will also take courses in research methods and the closely-related area of entrepreneurship.

The goal of this program is to prepare students to compete for tenure-track positions at leading research universities in the United States and abroad. As a doctoral candidate, students will learn how to conduct impactful research, and they are expected to develop a research pipeline and publish their work in top academic journals before entering the job market.

Student Learning Outcomes

Upon graduation, PhD students will be able to:
1. Understand and advance knowledge
2. Create knowledge through original research
3. Teach effectively in an institution of higher education

For more information about the PhD program with a specialization in Management, please visit: https://www.ivybusiness.iastate.edu/phd/phd-entrepreneurship-and-management/

International Business

The international business secondary major is designed to provide students with an understanding of the international business environment. Over the past 50 years, businesses have experienced heightened globalization that was unthinkable in the recent past. While this trend has been widely credited with numerous technological and economic advances, it has also ushered in a period of unprecedented economic and social disruption with ramifications for businesses around the world. Increased awareness of these consequences has recently led to a global re-evaluation of how business should be conducted internationally. Contemporary issues related to environmental concerns, political instability, and human rights have only made international business decisions more complicated for organizations.

Undergraduate Secondary Major in International Business

For undergraduate curriculum in business, secondary major in International Business.

Administered by the Department of Management and Entrepreneurship.

Whether you desire a career working internationally or simply want to understand how the broader business environment affects fundamental organizational decisions for domestic firms, our International Business (IBUS) offerings provide a broad global perspective to inform your world view. Specifically, the IBUS major is designed to help students develop global business acumen by highlighting how business intersects with politics, economic considerations, and cultures around the world.

The major is designed to provide a strong common foundation in international business with two required international overview courses. In addition, students are encouraged to take additional coursework with relevance to their business and career interests, with business-specific courses spanning numerous functional areas and general cultural classes covering numerous regions of the world. Students also have the opportunity to shape their international exposure via multiple study abroad options or via additional coursework at Iowa State.

For information on the secondary major in International Business, see the Ivy College of Business International Programs Coordinator, located in 2139 Gerdin Business Building.

For more information on the undergraduate secondary major in International Business, please visit: https://ivybusiness.iastate.edu/degree/international-business/
Student Learning Outcomes
Upon graduation, undergraduate students with a secondary major in international business will:

1. Be effective communicators
2. Be effective collaborators
3. Be problem solvers
4. Understand business concepts
5. Recognize ethical and legal responsibilities to organizations

Secondary Major in International Business
In addition to the basic business degree requirements (https://catalog.iastate.edu/collegeofbusiness/#/curriculumintbusinesstext), the requirements for the secondary major in International Business are met by successful completion of the following:

International Overview (6 credits)

BUSAD 301X: Introduction to International Business. This course focuses on the principles and practice of international business across functional areas, with an emphasis on comparing the legal, political, economic, and cultural dimensions of domestic and international business.

MGMT 414 International Management. The nature and economic role of the multinational firm and entrepreneurial ventures, including the impact of legal, political, and cultural variables upon firm performance and managerial activity; case studies illustrate interdependent nature of functional areas of business projected across national boundaries.

Business Focus (6 credits)*

* Additional business-focused courses incorporating an international travel component may be able to be applied towards fulfilling this requirement with approval of the Ivy International Programs Coordinator.

Global Engagement, Awareness, and Regional Perspective Requirement
Students can fulfill this portion of the IBUS major by completing one of the three options outlined below:

- **Option 1:**
  - One semester abroad, earning at least 12 credits AND
  - BUSAD 491AX: Integrating Your International Experience (3 cr.), taken the semester after returning from abroad AND
  - One course from the approved Global Awareness courses below

- **Option 2:**
  - One faculty-led study abroad program (may use a course from the Business Focus to meet this) AND
  - One Regional Focus course from the list below with relevance to the chosen study-abroad program AND
  - One course from the approved Global Awareness courses below

- **Option 3:**
  - Plan of study approved by the Ivy International Programs Coordinator

  Please note, in some instances international travel may not be required to fulfill the IBUS major--see the Ivy International Programs Coordinator for more information.

^ In the event that students complete their semester abroad during their final semester, this class may be taken concurrently.

## Undergraduate Minor in International Business

Students with a major in the Ivy College of Business may earn a minor in International Business by completing 15 credits of approved coursework. The minor requires one course from the approved International Overview courses, two courses from the approved Business Focus courses, and by completing the Faculty-Led Global Awareness track, or the Foreign Language Global Awareness track, or through a plan of study approved by the Ivy International Programs Office. The minor must include at least six credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

### International Overview (3 credits)

Choose one course from the list below:

- BUSAD 301X: Introduction to International Business. This course focuses on the principles and practice of international business across functional areas, with an emphasis on comparing the legal, political, economic, and cultural dimensions of domestic and international business.
- MGMT 414 International Management. The nature and economic role of the multinational firm and entrepreneurial ventures, including the impact of legal, political, and cultural variables upon firm performance and managerial activity; case studies illustrate interdependent nature of functional areas of business projected across national boundaries.

### Business Focus (6 credits)*

Select two courses from the list below:

- ACCT 496 Accounting in the Global Economy
- ECON 355 International Trade and Finance
- ECON 385 Economic Development
- ECON 455 International Trade
- ECON 457 International Finance
- FIN 480 International Finance
- FIN 491 International Study Course in Global Capital Markets
- MGMT 472 Management of Diversity
- MIS 495 Case Practicum
- MKT 448 Global Marketing
- MKT 492 Comparative Marketing
- SCM 466 Global Trade Management
- SCM 491 International Live Case and Study Tour
- SCM 473X War and Peace and Supply Chains

* Additional business-focused courses incorporating an international travel component may be able to be applied towards fulfilling this requirement with approval of the Ivy International Programs Coordinator.

### Global Awareness

Complete one of the two options below:

- Option 1:
  - One faculty-led study abroad program (may use a course from the Business Focus to meet this) AND
  - One Regional Focus course from the list found here https://catalog.iastate.edu/collegeofbusiness/internationalbusiness/curriculumtext/ with relevance to the chosen study-abroad program AND
• One course from the approved Global Awareness courses found here: https://catalog.iastate.edu/collegeofbusiness/internationalbusiness/#curriculumtext/

• Option 2:
  • Plan of study approved by the Ivy International Programs Coordinator
    • Please note, in some instances international travel may not be required to fulfill the IBUS major—see the Ivy International Programs Coordinator for more information.

^ Relevant university-level foreign language courses can be used to satisfy a Regional Focus requirement. Please note that sign language courses are not considered approved foreign language.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in International Business, please visit: https://ivybusiness.iastate.edu/degree/zminors-and-certificates/

**Management**

Management is a broadly defined discipline encompassing a diverse set of activities that span all business functions. By ensuring the effective utilization of resources, sound management is critical to organizational success.

Designed around learning critical conceptual, technical, and human skills, the management major is structured to prepare students to be successful organizational leaders. Whether taken as a stand-alone major or as a complement to another technical skill set, this skills-based approach ensures management majors have both the theoretical and practical background to excel in a wide range of organizational settings.

**Undergraduate Major in Management**

For undergraduate curriculum in business, major in management.

The Department of Management and Entrepreneurship offers a major in management. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the Bachelor of Science (B.S.) degree, and 18 additional credits in the major.

The required courses at the core of the management major build foundational managerial skills with broad applicability (e.g. leadership, conflict mitigation, and strategic-thinking skills). Elective courses provide additional contextual knowledge (e.g. managing in a family or international business) as well as complementary managerial skills (e.g. motivational, analytic, project management and sales skills), allowing students to accentuate their skill set in areas best aligned with their career objectives.

Students will demonstrate awareness for the role of evidence, diversity, ethics and technology in business decision-making and the impact of external forces and global issues on organizations. Students will display the ability to think critically, to communicate effectively and to contribute constructively to effective team performance. Required courses in the major provide a variety of rich developmental experiences that include applied learning, case analysis, research projects, team-based active learning projects, and interaction with guest speakers, in addition to traditional classroom lectures and discussions.

For more information on the undergraduate major in Management, please visit: https://ivybusiness.iastate.edu/degree/management/

**Student Learning Outcomes**

Upon graduation, undergraduate students majoring in Management will:

1. Be effective communicators
2. Be effective collaborators
3. Be problem solvers
4. Understand business concepts
5. Recognize ethical and legal responsibilities to organizations

**Curriculum:**

In addition to the basic business degree requirements (https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusiness) the Management major requires students to take 18 credit hours in the Management area, including 12 credit hours of required core courses and 6 credit hours of electives.

**Required Courses (12 credits):**

shared between business majors; see your advisor regarding multiple business degree requirements.

**Undergraduate Minor in Management**

The Department of Management and Entrepreneurship also offers a minor for non-Management majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

**Required Courses (6 credits):**

<table>

<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MGMT 371</td>
<td>Organizational Behavior</td>
<td>3</td>
</tr>
<tr>
<td>MGMT 478</td>
<td>Strategic Management</td>
<td>3</td>
</tr>
</tbody>
</table>

**Elective Courses (9 credits):**

Select nine credit hours from 300 or 400 level Management courses.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in Management, please visit: https://ivybusiness.iastate.edu/degree/zminors-and-certificates/

**Graduate Programs**

The Department of Management and Entrepreneurship participates in the full-time and part-time Master of Business Administration (MBA) and in the PhD in Business and Technology programs.

**Master of Business Administration (MBA)**

The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students can obtain a specialization in Leadership.

**Student Learning Outcomes**

Upon graduation, MBA students will:

1. Demonstrate effective communication skills
2. Effectively lead and work in diverse teams
3. Critically solve business problems
4. Integrate ethical and global perspectives in decision making

For more information about the MBA program with a specialization in Leadership, please visit: https://ivybusiness.iastate.edu/mba-full-time-details/

**Ph.D. in Business and Technology**

The doctoral specialization in management (MGMT) will prepare students to conduct and publish scholarly research in management, including the sub-fields of strategy, organizational behavior, and human resource management. In addition to curriculum in these core areas, students will also take courses in research methods and the closely-related area of entrepreneurship.

The goal of this program is to prepare students to compete for tenure-track positions at leading research universities in the United States and abroad. As a doctoral candidate, students will learn how to conduct impactful research, and they are expected to develop a research pipeline and publish their work in top academic journals before entering the job market.

**Student Learning Outcomes**

Upon graduation, PhD students will be able to:

1. Understand and advance knowledge
2. Create knowledge through original research
3. Teach effectively in an institution of higher education

For more information about the PhD program with a specialization in Management, please visit: https://ivybusiness.iastate.edu/phd/phd-entrepreneurship-and-management/

**Management Information Systems**

Management Information Systems is the analysis and use of information systems and technologies to support problem solving and decision making within and across organizations. Organizations and companies use data, most often in digital form, to conduct nearly every part of their businesses and functions. The program provides students with the core knowledge related to every dimension of information systems and technologies, including the creation and implementation of software and databases, to information security, analytics, and the user interface. The program takes a balanced approach with both technical and managerial coursework.

**Undergraduate Major in Management Information Systems**

For undergraduate curriculum in business, major in management information systems.

The Department of Information Systems and Business Analytics offers a major in management information systems. Students will complete the general education requirements (including business foundation courses), business core requirements for the bachelor of science (BS) degree, and 18 additional credits in the major.

The instructional objective of the Management Information Systems major is to prepare students for professional careers with a wide variety
of firms and roles, ranging from small start-up firms to large multinational corporations. Common job titles include business analyst and systems analyst. Students are also pursuing careers in Information Technology consulting.

For more information on the undergraduate major in Management Information Systems, please visit: https://ivybusiness.iastate.edu/degree/management-information-systems/

Student Learning Outcomes
Upon graduation, undergraduate students majoring in Management Information Systems will:

1. Be effective communicators
2. Be effective collaborators
3. Be problem solvers
4. Understand business concepts
5. Recognize ethical and legal responsibilities to organizations

Curriculum:
In addition to the basic business degree requirements (https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusiness) the Management Information Systems major requires students to take 18 credit hours in the management information systems area, including 12 credit hours of required core courses and 6 credit hours of electives.

Required Courses (12 credits):

<table>

Total Credits: 122

@ Courses in these requirements may also be used as Global Perspective.
# US Diversity courses may be used to satisfy HUM/SOC SCI.
* Requires completion of all core courses except MGMT 372 plus senior standing.

Students must be admitted to the professional program in business to major in management information systems. The requirements to enter the professional program are:

1. Completion of at least 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.

2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses. Early admission is allowed for Honors-eligible students. (See your advisor for specific information)

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.

2. 42 credits of 300+ level courses from a four-year institution.

3. 50% of required Business courses must be earned at ISU.

4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).

5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.

6. Grade of C or better in ENGL 250 required, and also in one other required ENGL course.

7. All 300-level and higher business credits must be earned at a four-year college.

8. Multiple business majors must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your advisor regarding multiple business degree requirements.

Undergraduate Minor in Management Information Systems

The Department of Information Systems and Business Analytics also offers a minor for non-Management Information Systems majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Required Course (3 credits):
MIS 301 Management Information Systems 3

Elective Courses (12 credits):
Select twelve credit hours from 300 or 400 level MIS courses

* Only 3 credits of MIS 495 Case Practicum may count as a MIS minor choice elective.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in Management Information Systems, please visit: https://ivybusiness.iastate.edu/degree/zminors-and-certificates/

Graduate Programs

The Department of Information Systems and Business Analytics participates in the MS in Information Systems (MSIS), the full-time and part-time Master of Business Administration (MBA) and the PhD in Business and Technology programs. The department also participates in an interdepartmental MS in Cyber Security as well as in a master's and PhD program in Human Computer Interaction.

Master of Science Information Systems (MSIS)

The MSIS is a 30-credit (minimum) curriculum designed around three interrelated areas – business foundation, IS core, and electives. All students are expected to be familiar with basic computing skills before entering the program. The MSIS program will educate students on
applying IS theory and concepts to modern IS development through classes that enable them to learn and use the latest software in application projects. Students graduating from the program will have advanced technical and managerial skills to develop and manage information systems projects.

Student Learning Outcomes
Upon graduation, MSIS students will:

1. Work effectively in teams
2. Be critical thinkers in the field of information systems
3. Develop an awareness of the ethical dimensions and consequences of business decisions
4. Have strong written communication skills
5. Have strong oral communication skills

For more information about the MSIS program, please visit: https://ivybusiness.iastate.edu/degree/msis/

Masters in Healthcare Analytics and Operations (MHAO)
Students graduating from the Masters in Healthcare Analytics and Operations program will apply data and appropriate models to analyze operations and supply chains to develop and present actionable insights leading to better outcomes in the healthcare industry. Healthcare analytics uses historical and current data to predict trends and optimize operations, bringing benefits to patients, medical professionals, and healthcare supply chain partners.

For more information about the Master of Healthcare Analytics and Operations program, please visit: https://www.ivybusiness.iastate.edu/degree/master-of-healthcare-analytics-and-operations/

Master of Business Administration (MBA)
The MBA program is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core business courses and the remaining 18 credits are graduate electives. Within the MBA program, students may obtain a specialization in information systems.

Student Learning Outcomes
Upon graduation, MBA students will:

1. Demonstrate effective communication skills
2. Effectively lead and work in diverse teams
3. Critically solve business problems
4. Integrate ethical and global perspectives in decision making

For more information about the MBA program with a specialization in Information Systems, please visit: https://ivybusiness.iastate.edu/degree/mba/

Ph.D. in Business and Technology
The PhD in Business and Technology is a 56-credit curriculum (minimum) which includes a 12-credit dissertation designed around four interrelated areas—core, specialization, minor, and research methods—and the dissertation. The Management Information Systems (MIS) specialization examines issues related to the development, building, management, and use of information and knowledge-based technologies. Such technologies enable users to collect organizational data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. Students in the MIS specialization will study areas such as information technology analysis and development, database and knowledge management systems, decision support and data mining, human computer interaction, system security and integrity, and project management and collaborative teamwork.

Student Learning Outcomes
Upon graduation, PhD students will be able to:

1. Understand and advance knowledge
2. Create knowledge through original research
3. Teach effectively in an institution of higher education

For more information about the PhD program with a specialization in MIS, please visit: https://ivybusiness.iastate.edu/degree/phd/phd-information-systems/

Graduate Certificates
Enterprise Cybersecurity Management
The graduate certificate in enterprise cybersecurity management will equip business professionals with basic concepts and techniques in cybersecurity and the management of information assets, including understanding cyber threat and choosing appropriate protections, enterprise cyber risk management, budgeting for cybersecurity, policies, procedures, human relations issues, and compliance and legal issues present in the modern organization.

The certificate is for working professionals as well as students enrolled in graduate programs. The certificate is available on campus in Ames and at Capital Square in Des Moines.

For more information about the graduate certificate in Enterprise Cybersecurity Management, please visit: https://ivybusiness.iastate.edu/cybersecurity-grad-certificate/

Business Analytics
The graduate certificate in business analytics will address the challenges of dealing with issues of "big data" and its analysis to extract actionable insights, equips business professionals with the basic analytic concepts and techniques necessary in various areas of business such as
marketing, supply chain, operations, forensics, and risk management. Students will have a foundation in data management, business analytics, modeling, and communicating through data visualization.

The certificate is for working professionals as well as students enrolled in graduate programs who are employed or seeking a career as business analysts, analytic systems designers, and data scientists to help improve business performance. The certificate is available online, on campus in Ames and at Capital Square in Des Moines.

For more information about the graduate certificate in business analytics, please visit: https://ivybusiness.iastate.edu/ba-certificate/

Marketing

A major in marketing acquaints students with the managerial decisions and actions that surround the satisfaction of customer needs in the purchase and use of goods and services. Examples of marketing decision areas are product development, pricing, marketing communication, customer relationships, social media, marketing analytics, and personal selling. Completion of the major prepares students for careers such as product manager, marketing analyst, digital marketing specialist, marketing consultant, advertising or promotions manager, marketing researcher, sales representative or manager, social media coordinator, retail management, and special events manager; in the public and private sectors.

Undergraduate Major in Marketing

For undergraduate curriculum in business, major in marketing.

The Department of Marketing offers a major in marketing. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the bachelor of science (BS) degree, and 18 additional credits in the major.

The instructional objective of the Marketing major is to provide knowledge of the marketing process and an understanding of its functions. Students are expected to develop decision-making skills, computational skills, and communication skills with appreciation for global marketplace and ethical concerns.

For more information on the undergraduate major in Marketing, please visit: https://ivybusiness.iastate.edu/degree/marketing/

Student Learning Outcomes

Upon graduation, undergraduate students majoring in Marketing will:

1. Be effective communicators
2. Be effective collaborators
3. Be problem solvers
4. Understand business concepts
5. Recognize ethical and legal responsibilities to organizations

Curriculum:

Required and elective marketing major courses can be combined into two distinct tracks: marketing analytics, and marketing management.

NOTE: If you are interested in sales, the Marketing department offers an undergraduate certificate in Professional Sales. The Professional Sales Certificate has different required Marketing courses, and a host of different electives that are available from departments around campus. For more information on the undergraduate certificate in Professional Sales, please visit: https://catalog.iastate.edu/collegeofbusiness/marketing/#undergraduatecertificatetext

In addition to the basic business degree requirements (https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusinesstext), marketing majors must also complete the following:

Required Courses (9 credits):

<table>
<thead>
<tr>
<th>Course</th>

### Undergraduate Minor in Business and Technology Consulting

The Department of Marketing also offers a minor for any student with a major in the Ivy College of Business. The Business and Technology Consulting minor prepares you for a career as a business consultant. Every year consulting companies attract talented graduates across the world. As a consultant, you gain broad exposure to business issues, solve different business problems, make an impact on major businesses, and become an expert in a specific business functional area. The minor provides a systematic process for students to strengthen problem-solving skills and prepare them to become better communicators and future leaders.

The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

### Undergraduate Minor in Marketing

The Department of Marketing also offers a minor for non-Marketing majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

#### Required Courses (6 credits):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MKT 340</td>
<td>Principles of Marketing</td>
<td>3</td>
</tr>
<tr>
<td>MKT 342</td>
<td>Foundation Of Personal Selling</td>
<td>3</td>
</tr>
</tbody>
</table>
Elective Courses (9 credits):
Select nine credit hours from 300 or 400 level Marketing courses.

* Only 3 credits of MKT 495 may count as a Marketing minor choice elective.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in Marketing, please visit: https://ivybusiness.iastate.edu/degree/zminors-and-certificates/

Undergraduate Certificate in Professional Sales

Purpose

The certificate in professional sales is a course of study administered by the Department of Marketing in the Ivy College of Business. It is designed for all undergraduate majors who wish to enhance their degree and employment possibilities by adding expertise in professional selling. The certificate program will equip students with knowledge and skills related to developing and managing mutually beneficial relationships with customers. The certificate program is built on a strong theoretical background but emphasizes applications and practice. The certificate provides students with an opportunity to learn about the ethical, technological, analytical, and global aspects of professional sales.

Learning Outcomes

After completing the certificate in professional sales, students will be able to:

- Identify and describe the steps in a relational selling process to create value and achieve customer satisfaction,
- Apply the sales technology, skills and knowledge to business problems,
- Enhance oral communication skills and basic business writing skills,
- Build a network and develop professional relationships through corporate participation in the sales program, and
- Enhance career management options by gaining a better understanding of sales as a career option.

Requirements

The certificate in professional sales requires the completion of at least 7 courses, totaling 21 credit hours. At least 12 credits should be taken at Iowa State University.

Required Courses (12 credits):

* Business courses listed as electives are available only to business majors. Non-business majors are limited to the 12 credits of required business courses for the certificate.

In addition to the courses listed, independent study/special topics or other courses may count as electives for the certificate. Please
contact the director of the Professional Sales Program or the chair of the Marketing Department for prior approval of an elective.

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.

Students need to fulfill the course prerequisites set by the Ivy College of Business.

A minimum of 9 credits used for the certificate may not be used to meet any other department (e.g. MKT 340 & MKT 342 cannot count for marketing majors), college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.

A certificate is not awarded until baccalaureate requirements are fulfilled.

Courses taken for the certificate may not be taken on a pass/not-pass basis.

A cumulative grade point average of at least 2.0 is required in courses taken for the certificate.

For more information on the undergraduate certificate in Professional Sales, please visit: https://ivybusiness.iastate.edu/degree/zminors-and-certificates/

Graduate Programs

The Department of Marketing participates in the full-time and part-time Master of Business Administration (MBA) and the PhD in Business and Technology programs.

Master of Business Administration (MBA)

The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students may develop an area of specialization in marketing.

Student Learning Outcomes

Upon graduation, MBA students will:

1. Demonstrate effective communication skills
2. Effectively lead and work in diverse teams
3. Critically solve business problems
4. Integrate ethical and global perspectives in decision making

For more information about the MBA program with a specialization in Marketing, please visit: https://ivybusiness.iastate.edu/mba-full-time-details/

Ph.D. in Business and Technology

The PhD in Business and Technology with a Marketing (MKT) specialization is a 56 credit (minimum) curriculum designed around four interrelated areas (core, specialization, minor, and research methods) and dissertation. The focus of the specialization is on marketing issues relating to strategic decision making, understanding consumer preferences and behaviors, and using data analytics for increasing the performance of the firm.

Student Learning Outcomes

Upon graduation, PhD students will be able to:

1. Understand and advance knowledge
2. Create knowledge through original research
3. Teach effectively in an institution of higher education

For more information about the PhD program with a specialization in Marketing, please visit: https://ivybusiness.iastate.edu/phd/phd-marketing/

Supply Chain Management

Supply chain management is an integrated program of study concerned with the efficient flow of information, materials, and products within and among organizations. Supply chain management involves the integration of business processes across organizations, from material sources and suppliers through manufacturing, and processing to the final customer. The program’s balanced approach includes courses in the three core areas of supply chain management: procurement, operations, and logistics. Students will develop knowledge related to a wide variety of supply chain activities, including demand planning, purchasing, transportation management, warehouse management, inventory control, material handling, product and service support, information technology, and strategic supply chain management.

Undergraduate Major in Supply Chain Management

For undergraduate curriculum in business, major in supply chain management.

The Department of Supply Chain Management offers a major in supply chain management. Students will complete the general education requirements (including business foundation courses), business core requirements for the bachelor of science (B.S.) degree, and 18 additional credits in the major.

The instructional objective of the supply chain management major is to prepare students for professional careers in logistics analysis, plant management, procurement, warehouse management, sustainable
supply chain management, and consulting. The curriculum provides the required theoretical and conceptual base and analytical methods for making sound operational and strategic business decisions related to all activities in a supply chain.

For more information on the undergraduate major in Supply Chain Management, please visit: https://ivybusiness.iastate.edu/degree/supply-chain-management/

Student Learning Outcomes
Upon graduation, undergraduate students majoring in Supply Chain Management will:

1. Be effective communicators
2. Be effective collaborators
3. Be problem solvers
4. Understand business concepts
5. Recognize ethical and legal responsibilities to organizations

Curriculum:

In addition to the basic business degree requirements (https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusiness), Supply Chain Management majors must also complete:

Required Courses (15 credits):

<table>

Total Credits: 122

@ Courses in these requirements may also be used as Global Perspective.

# US Diversity courses may be used to satisfy HUM/SOC SCI.

* Requires completion of all core courses except MGMT 372 plus senior standing.

Students must be admitted to the professional program in business to major in supply chain management. The requirements to enter the professional program are:

1. Completion of at least 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.

2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses. Early admission is allowed for Honors-eligible students. (See your advisor for specific information)

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.

2. 42 credits of 300+ level courses from a four-year institution.

3. 50% of required Business courses must be earned at ISU.

4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).

5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.

6. A grade of C or better in ENGL 250 required and also in one other required ENGL course.

7. All 300-level and higher business credits must be earned at a four-year college.

8. Multiple business majors must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your advisor regarding multiple business degree requirements.

Undergraduate Minor in Supply Chain Management

The Department of Supply Chain Management also offers a minor for non-Supply Chain Management majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Select one additional elective course from either section above.

* Courses not offered on a regular basis. Students should consult with their academic advisor about terms of offering.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.
For more information on the undergraduate minor in Supply Chain Management, please visit: https://ivybusiness.iastate.edu/degree/zminors-and-certificates/

Graduate Programs

The Department of Supply Chain Management participates in the full-time and part-time Master of Business Administration (MBA) and in the PhD in Business and Technology programs. The department also participates in the interdepartmental MS in Transportation program.

Master of Business Administration (MBA)

The MBA program is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students can obtain a specialization in Supply Chain Management.

Student Learning Outcomes

Upon graduation, MBA students will:

1. Demonstrate effective communication skills
2. Effectively lead and work in diverse teams
3. Critically solve business problems
4. Integrate ethical and global perspectives in decision making

For more information about the MBA program with a specialization in Supply Chain Management, please visit: https://ivybusiness.iastate.edu/mba-full-time-details/

Masters in Healthcare Analytics and Operations (MHAO)

Students graduating from the Masters in Healthcare Analytics and Operations program will apply data and appropriate models to analyze operations and supply chains to develop and present actionable insights leading to better outcomes in the healthcare industry. Healthcare analytics uses historical and current data to predict trends and optimize operations, bringing benefits to patients, medical professionals, and healthcare supply chain partners.

For more information about the Masters in Healthcare Analytics and Operations program, please visit: https://www.ivybusiness.iastate.edu/degree/master-of-healthcare-analytics-and-operations/

Ph.D. in Business and Technology

The PhD in Business and Technology is a 56-credit curriculum (minimum) that culminates in a dissertation. Students may select Supply Chain Management (SCM) as their major area of specialization. The primary objective of the SCM specialization is to prepare students for careers in research universities. The SCM domain is broad and includes the design, development and control of business processes for the conversion of inputs into outputs and distribution of those outputs. The traditional focus of SCM was on integration of processes across multiple functions within the firm—operations management, logistics, and purchasing primarily, with elements of marketing and information systems also included. However, in today’s world, with competition across supply chain networks, SCM also involves integrating business processes across firms. Research in this area is therefore interdisciplinary in nature and addresses both intra- and inter-organizational issues.

Student Learning Outcomes

Upon graduation, PhD students will be able to:

1. Understand and advance knowledge
2. Create knowledge through original research
3. Teach effectively in an institution of higher education

For more information about the PhD program with a specialization in Supply Chain Management, please visit: https://ivybusiness.iastate.edu/phd/phd-supply-chain/

Graduate Certificate

The online graduate certificate in Supply Chain Management will provide foundational concepts and applied technical skills that supply chain professionals need to effectively manage a global supply chain.

The certificate is for working professionals as well as students enrolled in graduate programs who are employed or seeking a career as a business analyst, supply chain analyst, or who want to move into a supply chain position.

For more information about the graduate certificate in Supply Chain Management, please visit: https://ivybusiness.iastate.edu/scm-certificate/
Objectives of the Curricula in Design

The College of Design is among a small number of comprehensive design schools offering outstanding opportunities for both disciplinary and interdisciplinary education.

The College of Design strives to provide each student with a broad educational background and preparation in a specific design or art discipline. Each program is designed to develop knowledge and appreciation of the physical and cultural environment, to stimulate creative thinking and analysis, and to prepare students for participation in a wide variety of careers.

The college's programs also encompass many opportunities for individualized study and extracurricular activities such as visiting lectures and symposia, workshops, gallery exhibits, practicum and internship programs, field trips, and international study programs.

Graduates of the college are employed in private firms, government, industry, and education, or are self-employed as designers or artists. Opportunities for graduates include careers as architects, landscape architects, community and regional planners, graphic designers, industrial designers, interior designers, studio artists, arts administrators and environmental designers.

Organization of Curricula

All undergraduate programs in the College of Design share a common foundation curriculum, the Core Design Program, followed by degree-specific curricula. The Core Design Program grounds the undergraduate degree programs and provides a rich, rigorous, inclusive base for the college's professional and non-professional programs. It creates a shared language, experience, and community for programs, faculty, and students and exposes students to all design disciplines, allowing them to make more informed degree choices, apply to multiple degree programs, and experiment with interdisciplinary work.

The intense, discipline-specific professional curricula that follow the Core Design Program focus on developing students' ability and knowledge in their major. Within the major area, students advance creative and professional skills through classroom and studio work, critiques of student projects, discussion with professional practitioners, and field studies.

General education, contained in both the Core Design Program and the degree programs, is composed to ensure that students receive a well-rounded undergraduate education.

High School Preparation

Courses in fine arts and design that develop visualization and freehand drawing abilities are highly recommended, though not required for entrance. Students planning to enroll in an academic program in the College of Design must complete the following high school requirements:

- 4 years of English, including coursework in composition and literature and up to 1 year of speech and/or journalism, to develop communication skills and critical reading/writing ability
- 3 years of mathematics to develop problem-solving skills, including 1 year each of algebra, geometry, and advanced algebra
- 3 years of science, including at least two of the following:
  - 1 year of biology, 1 year of chemistry, or 1 year of physics
  - 2 years of social studies, including at least 1 year of U.S. history and 1 semester of U.S. government

Admission Standards to Enrollment-Managed Professional Programs

Admission into the enrollment-managed professional programs of Architecture, Graphic Design, Industrial Design, Integrated Studio Arts, Interior Design, and Landscape Architecture requires a separate application after completing the Core Design Program.

Students may apply directly to the professional program in Community and Regional Planning and to the programs in Art and Design and Interdisciplinary Design. Transfer students from two-year institutions also may apply to these three programs.

Advising

Each student receives personal assistance from an academic advisor within the student's curriculum area. Students enrolled in the college's Core Design Program are advised by professional advisors. Once admitted to professional programs, students are assigned to faculty advisors within the student's curriculum area. Advisors help students develop a program of study and access pertinent university resources, and provide information on career choice.

The college's career services office works with students to develop their career goals as well as prepare and search for employment.

Honors Program

The College of Design participates in the Honors Program, which provides opportunities for outstanding students to individualize their programs of study. Honors students in the College of Design will work with the Honors Program chair or Honors academic advisor to choose from academic and co-curricular experiences that offer breadth and depth in their learning, as well as opportunities for personal, community, and professional development.
See Honors Program.

Departments of the College

- Architecture
- Art and Visual Culture
- Community and Regional Planning
- Graphic Design
- Industrial Design
- Interior Design
- Landscape Architecture

Requirements in the College of Design

All students in the College of Design are expected to meet the following requirements.

Core Design Program
Cr. Fall/Spring

- DSN S 102 Design Studio I 4
- DSN S 115 Design Collaborative Seminar * 1
- DSN S 131 Drawing I 4
- DSN S 183 Design in Context 3
- Social Science/Humanities Electives ** 6
- Math/Science Electives *** 6
- Communications 7

* Students enrolled in the Design Exchange Learning Community take DSN S 110 in place of DSN S 115.

** General education credits in the Core Design Program may count toward the minimum credits.

*** Students who intend to apply to the Architecture program are strongly advised to take MATH 145 Applied Trigonometry and PHYS 131 General Physics I, PHYS 131L General Physics I Laboratory during their Core year. While these specific courses are not required to apply to the program, they are required to advance in the B.Arch. program beyond the first semester.

Students who intend to apply to the Industrial Design program are advised to take PHYS 101 Physics for the Nonscientist for the Nonscientist, ECON 101 Principles of Microeconomics Principles of Microeconomics, and a math course during their Core year.

General Education
International Perspective: 3 cr.
U.S. Diversity: 3 cr.
Communications: 7 cr.

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
LIB 160 Introduction to College Level Research 1

Total Credits 7

According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 150 and 250 (or ENGL 250H).

Mathematics, physical sciences, and biological sciences 6 cr.
Includes courses in the fields of agronomy, astronomy and astrophysics, biology, chemistry, civil engineering, computer science, geology, mathematics, physics, and statistics.

Humanities: 6 cr.
Includes courses in the fields of classical studies, English (literature), foreign languages, history, philosophy, religious studies, as well as history/theory/literature courses in dance, music, theater, journalism, African American studies, American Indian studies, environmental studies, Latino/a studies, women's studies, and university studies.

Social Sciences: 6 cr.
Includes courses in the fields of African American studies, American Indian studies, anthropology, economics, environmental studies, geography, human development and family studies, Latino/a studies, psychology and sociology, women's studies, and university studies.

General Education Electives: 9 cr.
9 cr. from any of the above areas, 6 cr. of course level 300-400.

Undergraduate programs

Majors
- Art and Design
- Architecture
- Community and Regional Planning
- Graphic Design
- Industrial Design
- Integrated Studio Arts
- Interior Design
- Landscape Architecture
- Biological/Pre-Medical Illustration (BPM I)*

*The College of Design participates in this interdepartmental major.

Secondary Majors

• Preservation and Cultural Heritage
• Sustainability**
• Textile Design**
• Urban Studies**

**The College of Design participates in these interdepartmental secondary majors and minors.

Minors in Design

The College of Design offers or participates in the following undergraduate minors:

• Critical Studies in Design
• Design Studies
• Digital Media
• Entrepreneurship
• Geographic Information Science (GISC)
• Illustration
• Preservation and Cultural Heritage
• Textile Design
• Urban Studies

Critical Studies in Design

The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture and the built environment. In lectures and focused seminars, students explore:

• historical and contemporary issues
• cultural production
• media and technology
• design in everyday life
• models of professional practice

Open to undergraduates in all university majors, this minor requires 15 credits of coursework. At least 6 of the 15 credits must be taken at Iowa State University in courses numbered 300 or above. At least 9 of the 15 credits must not be used to meet any other department, college or university requirements except the credit requirement for graduation.

**The College of Design participates in these interdepartmental secondary majors and minors.

Minors in Design

The College of Design offers or participates in the following undergraduate minors:

• Critical Studies in Design
• Design Studies
• Digital Media
• Entrepreneurship
• Geographic Information Science (GISC)
• Illustration
• Preservation and Cultural Heritage
• Textile Design
• Urban Studies

Critical Studies in Design

The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture and the built environment. In lectures and focused seminars, students explore:

• historical and contemporary issues
• cultural production
• media and technology
• design in everyday life
• models of professional practice

Open to undergraduates in all university majors, this minor requires 15 credits of coursework. At least 6 of the 15 credits must be taken at Iowa State University in courses numbered 300 or above. At least 9 of the 15 credits must not be used to meet any other department, college or university requirements except the credit requirement for graduation.

Design Studies

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for interdisciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

This minor requires 15 credits of coursework: three (3) credits selected from College of Design history/theory course offerings (DSN S 183 will not meet this requirement) and additional 12 credits selected from any College of Design course offerings*. At least 6 of the 15 credits must be taken at Iowa State University in courses numbered 300 or above. At least 9 of the 15 credits must not be used to meet any other department, college or university requirements except the credit requirement for graduation.

Students enrolled in the College of Design may not use courses required in their major degree programs or in the Core Design Program to satisfy this minor.

* The following courses cannot be used to meet the requirements for the Design Studies Minor: DSN S 110, 111, 115, 301, 373, 397, 492.

Digital Media

Manipulation of digital media has emerged as an essential skill for design inquiry alongside traditional methods of building models and drawing sketches. To familiarize students with the use of digital media in the design process, the College of Design offers an undergraduate Minor in Digital Media. This minor is open to all undergraduate students at Iowa State University.

This minor requires 15 credits of coursework. At least three (3) credits of fundamental courses at the 200 level must be taken in the student’s primary major (see list below). At least 9 of the 15 credits must be taken at Iowa State University in courses numbered 300 or above and may not be used to meet any other department, college, or university requirement.

**Entrepreneurial Studies**

The College of Design is an active participant in the Entrepreneurial Studies Minor for undergraduate students.

**Geographic Information Science (GISC)**

The undergraduate minor in Geographic Information Science (GISC) is an interdisciplinary program that provides students with opportunities to engage the theory, processes, techniques and tools that use spatial data and computational technology to create cutting-edge analysis and mapping approaches for a wide range of fields, such as urban planning, architecture, landscape architecture, design, community development, agriculture, environmental sciences, natural resources, sociology, criminology, anthropology, political science, environmental studies and others.

The minor is open to undergraduates in all university majors with a minimum overall GPA of 2.0 prior to enrolling.

Students must complete a minimum of 15 undergraduate credits of GIS coursework to receive the minor. At least 6 of the 15 credits must be taken at Iowa State University in courses numbered 300 or above with a grade of C or higher. At least 9 of the 15 credits must not be used to meet any other department, college or university requirements except the credit requirement for graduation.

**Requirements:**

- Foundations of GIS - complete the following 2 courses:  
  - C R P 251 Fundamentals of Geographic Information Systems  
  - C R P 351 Intermediate Geographic Information Systems

- GIS Tools and Techniques - choose 3 courses from the following:  
  - A B E 437 Watershed Modeling and Policy
  - C R P 449 Geodesign: Planning for Sustainable Futures  
  - C R P 452 Geographic Data Management and Planning Analysis  
  - C R P 454 Fundamentals of Remote Sensing and Spatial Analysis (or substitute GEOL 489: Survey of Remote Sensing Technologies)  
  - C R P 456 GIS Programming and Automation  
  - C R P 457 Geogames for Civic Engagement  
  - GEOL 452 GIS for Geoscientists  
  - GEOL 468 Applied Geostatistics for Geoscientists  
  - GEOL 488 GIS for Geoscientists II  
  - NREM 345 Natural Resource Photogrammetry and Geographic Information Systems  
  - NREM 446 Integrating GPS and GIS for Natural Resource Management

**Total Credits: 15**

**Illustration**

The undergraduate minor in Illustration is ideal for students interested in illustration for books, graphic novels, magazine articles, advertising and concept art for game design and film. This minor provides the ability to tailor a curriculum that serves these varied career interests, whether you want to work in the industry or freelance as an independent studio practitioner.

Through this minor, students will:

- develop conceptual skills directed toward communicating narrative content in sequential visual form
- demonstrate the ability for critical thinking through visual, verbal and written communication
- develop technical skills, working with a range of both traditional and digital media used in the field of illustration
- develop an awareness of historical and contemporary illustration
- strengthen individual portfolios to position themselves for success in their chosen field after graduation

**Requirements:**

Students must complete two prerequisites prior to pursuing the Illustration minor.

**Prerequisites:**

- DSN S 131 Drawing I  
  - ARTIS 230 Drawing II

After completion of the prerequisites, students must complete a minimum of 15 credits of Illustration coursework to receive the minor. At least 9 of the 15 credits must not be used to meet any other department,
college or university requirements except the credit requirement for graduation.

Preservation and Cultural Heritage

The undergraduate minor in Preservation and Cultural Heritage provides students with knowledge, skills, and credentials that complement undergraduate degrees in a wide variety of majors, but especially Architecture, Interior Design, Community & Regional Planning, Landscape Architecture, and History. To these ends, the Minor has two major curricular objectives:

- Provide student with a holistic understanding of historic preservation that draws from the various departments involved, yet allows for the development of expertise within a student’s specific major.

The minor requires a minimum of 15 credit hours. At least six (6) credits need to be taken at the 300 or above (see list below), and at least 9 of the 15 credits must not be used to meet any other department, college or university requirement except the credit requirement for graduation.

For more information go to https://www.preservation.design.iastate.edu/ pch-undergraduate-minor/
For any questions, please send an email to historicplaces@iastate.edu

Preservation & Cultural Heritage Minor Curriculum:
The Minor requirements are divided into three sections (see below).
Please choose six (6) credits from Section 1 (Preservation Courses), three (3) credits from Section 2 (General History), and six (6) credits from Section 3 (History and Design of the Built Environment).

Section 1: Preservation Courses (choose two of the following)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

Textile Design

The undergraduate minor in Textile Design allows students to focus specifically on the design and creation of textiles - a practice with applications in the fine arts, fashion and related fields. Open to undergraduates at the sophomore level and above enrolled in any College of Design major or in the Apparel, Merchandising and Design major in the College of Human Sciences.

Through this minor, students will:

- learn historical and contemporary applications of textile production
- develop conceptual skills in textile media and techniques such as printing, dyeing and weaving for self-expression
- develop technical skills in both hand skills and digital tools
- demonstrate the ability for critical thinking through visual, verbal and written communications with an emphasis on what it means to be an artist/designer using textile media and techniques
- strengthen individual portfolios to position themselves for success in their chosen field after graduation

Students must complete 16-18 credits of Textile Design coursework to receive the minor. At least 9 of the 15 credits must not be used to meet any other department, college or university requirements except the credit requirement for graduation.

Urban Studies

The undergraduate minor in Urban Studies is an interdisciplinary program that emphasizes urban life in a variety of settings and from different disciplinary and methodological approaches. The Urban Studies minor will allow students to explore varied and multiple dimensions of urban and community life through differing conceptual and analytical frameworks. Students can pursue interests in:

- urban history
- urban design
- neighborhood revitalization
- economic development
- social movements
- global urbanization

The minor is open to undergraduates in all university majors except Community & Regional Planning.

This minor requires 15 credit hours of coursework. At least 6 of the 15 credits must be taken at Iowa State University in courses numbered 300 or above. At least 9 of the 15 credits must not be used to meet any other department, college or university requirements except the credit requirement for graduation.

Nine (9) credits in three other courses from the approved list ** 9

Total Credits 15

** Approved list of elective courses for Urban Studies Minor (https://www.design.iastate.edu/programs-minors/minors/urban-studies/)
The College of Design offers graduate study in the areas shown below. Graduate study is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

### Majors
- Architecture
- Community and Regional Planning
- Graphic Design
- Industrial Design
- Integrated Visual Arts
- Interior Design
- Landscape Architecture
- Sustainable Environments*
- Transportation*
- Urban Design*

### Double Degree Programs
- Architecture / Business Administration
- Architecture / Community and Regional Planning
- Architecture / Sustainable Environments
- Architecture / Urban Design
- Community and Regional Planning / Business Administration
- Community and Regional Planning / Landscape Architecture
- Community and Regional Planning / Sustainable Agriculture
- Community and Regional Planning / Sustainable Environments
- Community and Regional Planning / Urban Design
- Industrial Design / Human Computer Interaction (HCI)
- Integrated Visual Arts / Sustainable Environments
- Landscape Architecture / Sustainable Environments
- Landscape Architecture / Urban Design

### Certificates
- Geographic Information Systems (GIS)
- Gerontology*
- Preservation and Cultural Heritage
- The College of Design participates in this interdepartmental graduate program.

### Architecture

**OVERVIEW**

http://www.design.iastate.edu/architecture

The Department of Architecture is committed to the study of architecture as a cultural discipline in which issues of practice, of the multiplicity of social formations in which buildings exist, and of environmental effects are integrated with building design through construction, space, material, form and use. Architecture arises from the aspirations that diverse individuals and groups have for their physical environment, and from the social enterprise of designing and fabricating the landscape we inhabit. It involves individual and multiple buildings, the spaces within them, and the exterior landscape.

The undergraduate program in architecture is an accredited 165-credit five-year undergraduate professional program, including the 30-credit Core Design Program, leading to the Bachelor of Architecture degree (B. Arch). The program provides opportunities for general education as well as preparation for professional practice and/or graduate study. An optional one-semester foreign study program is offered to fourth-year students. Other study abroad opportunities are also available for short-term and semester-long duration.

The undergraduate curriculum includes one year of the college's Core Design Program followed by a four-year professional program. Admission to the professional degree program is based on the applicant's performance in the completed pre-professional curriculum; previous high school record (or transfer record where applicable); portfolio and essay evaluations; and on available departmental resources. Information on admission criteria is posted each year on the College of Design website.

Students completing their Bachelor's degree may opt to include a wide range of minor option as part of their course of study. A number of minors related to design, including digital media, critical studies, urban studies, and sustainability, can be integrated within their regular course of study; for details, please refer to the College of Design website.

For students entering the professional program after completion of the Core Design Program, the department requires purchase on their own or through the college of a laptop/notebook computer and appropriate software. Information is provided to students about computer requirements at the time of acceptance to the program.

The department offers two graduate degrees in architecture: a 90-credit graduate professional program leading to the Master of Architecture (M.Arch.) and a 30-credit interdisciplinary graduate program leading to the Master of Science in Architecture (M.S. Arch.). Both degrees offer options for interdisciplinary study within the College of Design and across related fields within the university. Double-degree programs are offered with a number of other graduate programs of study within the college. Financial support in the form of teaching and research assistantships is available competitively.

Students who complete their Bachelor of Architecture Degree at Iowa State University may have 6 approved credit hours of their undergraduate
study applied towards their Graduate Standing, permitting them to complete the M.S.Arch with 24 additional credit hours of study. In addition to graduate studies in Architecture, Bachelor of Architecture students may opt to pursue a one-year program of Master’s studies from other departments or programs in the College and the University. For complete current graduate program descriptions (many of which can apply 6 transfer credits from undergrad study), please see the College website under Graduate Programs.

**Student Learning Outcomes**

Our program prepares students for careers in architecture and related disciplines, emphasizing a diverse and holistic approach whereby graduates obtain:

- Rigorous, research-driven, and creative design skills;
- A broad, inclusive, and nuanced appreciation for the historic and theoretical frameworks that inform practice today;
- An array of graphic, computational and presentation skills needed to both design and convey design intent;
- An understanding of contemporary technical and performance criteria used to model, analyze, and construct projects, so as to responsibly evaluate the technical and environmental impact of design decisions; and
- A grounding in the critical, aesthetic, and ethical role of the profession and its relationship to public health, safety, well-being, and environmental stewardship.

**Program Accreditation**

Iowa State University Department of Architecture offers programs accredited by the National Architectural Accrediting Board, which requires the inclusion of the following statement:

"In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year term, an eight-year term with conditions, or a two-year term of continuing accreditation, or a three-year term of initial accreditation, depending on the extent of its conformance with established education standards.

Doctor of Architecture and Master of Architecture degree programs may require a nonaccredited undergraduate degree in architecture for admission. However, the non-accredited degree is not, by itself, recognized as an accredited degree."

Iowa State University Department of Architecture offers the following NAAB-accredited degree programs:

- Bachelor of Architecture (165 cr.)
- Master of Architecture (90 cr.; prerequisite: undergraduate degree in a discipline other than architecture or a four-year pre-professional degree in architecture)

**Degree Requirements**

**Total B. Arch. Requirement: 165 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**International Perspective: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications: 7 cr.**

Admission into the Bachelor of Architecture Program requires the completion of the Core Design Program. Admission depends upon available resources; admission criteria are posted on the College of Design website. Transfer students are considered on a case-by-case basis.

Graduate Programs

Master of Architecture (M.Arch.)

Our 90-credit M.Arch. is an accredited professional degree in architecture designed for students with undergraduate degrees in disciplines other than architecture as well as for students who hold a four-year pre-professional degree in architecture. Applicants holding B.S. or B.A. degrees in Architecture or other affiliated design fields may be given advanced standing in the M.Arch. program.

The M.Arch. program engages with architecture as a form of knowledge, practice and production situated in relation to contemporary concerns and issues. Students gain the knowledge, skills and experience with which to professionally practice architecture, while also developing a critical awareness of the discipline’s wider social, political, economic, environmental and cultural implications.

M.Arch. is accredited by the National Architectural Accreditation Board (NAAB) and leads to a professional Master of Architecture degree over three years. The curriculum commences with an intensive sequence of classes that establish the foundations for the study and practice of architecture. Equal emphasis is placed on each of the three study areas: studios in architectural design and media, laboratories and lectures on science and technology, and lectures and seminars on history and theory. Building on these foundations, students are supported in developing their own particular interests and agendas as they progress through the subsequent two years of study. This is facilitated through options in studying abroad, undertaking specialized studio options both within and outside of the department, and opportunities for independent study.

In addition to architecture, students previously admitted to the full three-year program have held undergraduate degrees in a broad range of fields, including art history, history, literature, interior design, economics, mathematics, computer science, anthropology, medicine and philosophy. This diverse range of previous study and experience is brought to bear on the study of architecture, collectively enriching the range and depth of our program.

While students with undergraduate degrees in other disciplines, must complete the full three years of the curriculum, students with undergraduate degrees in architecture or other related design fields may, on consideration, be given advanced standing in the program. Advanced standing students may waive up to the whole first year.

Master of Science in Architecture (M.S.)

M.S. in Arch. is a 30-credit research degree with a required graduate thesis. As a research degree, this program is not subject to NAAB accreditation.

M.S. in Arch. is open for applicants who hold a professional degree in architecture or other related design fields. Applicants are required to submit a research proposal that lies within one of the study areas listed on the program’s webpage. The degree is also open for applicants with non-professional degrees in various fields depending on the research proposed by the applicant.

Total Credits: 30

Dual degree
Double degree programs are offered with a number of graduate programs in other college departments. Information about our programs and how to apply can be obtained from the department’s web page at: https://www.design.iastate.edu/architecture/

Financial support in the form of teaching and research assistantships is available.

Art and Design

The Department of Art and Visual Culture offers degree programs focused on fine arts and visual culture, offering courses in studio arts, art history, and art education, and scientific illustration. Degree offerings include the Bachelor of Arts (BA) in Art and Design, Bachelor of Fine Arts (BFA) in Integrated Studio Arts, and Master of Fine Arts (MFA) in Integrated Visual Arts.

The Bachelor of Arts in Art and Design is a four-year degree program with two options: Art and Culture or Visual Culture Studies. Both options require students to complement their studio art or visual culture studies coursework with study in a second area, within or outside of the College of Design. This can include a second major or minor, or an alternative program of study approved by the student’s academic advisor.

Flexibility is a key feature of the BA in Art and Design. Many students, working with an advisor, design a course of study that allows them to pursue the BA degree in conjunction with a second major or minor such as journalism, advertising, business, entrepreneurship, history, or psychology.

The BA in Art and Design can serve as a springboard into a wide array of exciting graduate school and career opportunities, including art criticism, art history, art sales, conservation, corporate art collections, gallery/museum studies, and art therapy.

Art and Culture Option (Fine Arts + another area of interest)

In the Art and Culture option, students combine coursework in studio art with another area of interest. Working with an advisor, students design their own programs of study, which may include another major or minor in addition to the concentration emphasizing studio art.

Visual Culture Studies Option (Art History + another area of interest)

The Visual Culture Studies option is for students seeking a concentrated course of study in art and design history, theory, and criticism. For students interested in museum studies, courses may include up to nine (9) credits of museum or gallery internship. Working with an advisor, students design their own programs of study, which may include another major or minor in addition to the concentration in visual culture studies. Required courses include six (6) history courses at the 300/400 level.

This curriculum offers two concentrations: Art and Culture and Visual Culture Studies. Both concentrations are combined with an approved program of study, which may consist of a second major or a minor.

Art and Culture Concentration

The curriculum in Art and Design: Art and Culture Concentration leads to a 121-credit undergraduate Bachelor of Arts degree.

Total Degree Requirements: 121 credits

Only 65 credits from a two-year institution can apply, and may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

Biological/Pre-Medical Illustration

Overview

The interdepartmental undergraduate BPM I major is designed for students who want to combine their interests and aptitudes in science and art. Based on the theme of "Communicating Science Through Art," the major prepares students for careers in biological visualization/illustration or for graduate education in medical visualization/illustration. Graduates enter fields such as biocommunications, environmental display design, freelance illustration, UX/UI and museum display design, creative technologies, instructional design, and various careers in the publishing, research and education, and visual communication industries.

Student Learning Outcomes

Throughout its over 35-year existence, the underlying philosophy of BPM I has been to emphasize both art and science; students take approximately equal credit hours in the two major areas. Another important guiding principle has been visual thinking and problem-solving, and a third is maintaining student proficiency in a wide range of visual communication methods and technologies so they have the skill to choose the most effective tools for a given communication objective. Upon completion of the BPM I Program, graduates will:

- implement effective academic research methods and concept development processes for producing meaningful educational visual solutions
- demonstrate advanced science knowledge in a science focus area of choice (for example, pre-medical, or non-medical areas of life and earth science)
- demonstrate the ability to deconstruct and visualize complex science in order to create accessible, accurate, aesthetic, and meaningful visual representations, including diagrammatic, realistic, and symbolic, for a range of outputs (print, modeled, online, mobile)
- implement interdisciplinary thinking in team-based and independent projects
- flexibly adapt to new technology and communication challenges
- showcase and analyze works by articulating key visual elements in formal presentations, in written and oral format, and during assessments and critiques
- demonstrate effective use of design principles, problem solving skills, and visual organization
- demonstrate career-readiness and professional practice competencies
- exhibit an academic trajectory for engaging in life-long learning

Entrance Requirements
Entrance into the BPM I program is by application to the BPM I Advisory Committee. Eligibility is based on an academic standard of at least 2.00 cumulative GPA on 30 credits of university level work and a consideration of artistic ability as demonstrated through submission of a portfolio of representative drawings or other art work. Freshman and transfer students usually declare pre-BPM I as their major while satisfying the conditions for entrance into the major, although other majors can be declared.

Degree Requirements
The information below outlines the specific requirements for a BA degree in Biological/Pre-Medical Illustration (BPM I). There are four components to a degree in BPM I:

- Liberal arts general education
- Science core and advanced courses
- Art core and advanced courses
- Electives

Part 1. College Requirements

a. Communication Proficiency Requirements

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 150</td>
<td>Critical Thinking and Communication (grade of C or better)</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 250</td>
<td>Written, Oral, Visual, and Electronic Composition (grade of C or better)</td>
<td>3</td>
</tr>
</tbody>
</table>

Choose one course from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 302</td>
<td>Business Communication</td>
<td></td>
</tr>
<tr>
<td>ENGL 316</td>
<td>Creative Writing: Playwriting</td>
<td></td>
</tr>
<tr>
<td>LIB 160</td>
<td>Introduction to College Level Research</td>
<td>1</td>
</tr>
</tbody>
</table>

Two semesters of college-level world language 0-8

Students with 3 years in high school world language are exempt

Total Credits 10-18

B. Liberal Arts and Sciences Requirements*

Arts and Humanities **

<table>
<thead>
<tr>

**Total Credits**  
29

Beyond the core preparation, students must take 9 credits in the advanced science area and 12 credits in the advanced art area. The courses acceptable in these areas follow. Other courses in art and biological science may be acceptable. See BPM I advisors and/or the BPM I Advisory Committee.

**C. Advanced Art Area**

Select 12 total credits from below. At least 6 credits must be studio classes. Some courses can be considered either pre-med illustration or general art; speak with your advisor for guidance.

**Pre-Med Illustration Area**

**Consider**

- Conducting BPMI 497 Internship over the summer
- Enrolling in Art/Science/Techniques Workshops or Iowa Lakeside Lab to take advanced biology courses
- Consider study abroad, or attending summer AMI / GNSI Conferences and enrolling in Art/Science/Techniques Workshops
## Minor

A minor in biological/pre-medical illustration is offered. A minimum of 17 credits must be taken, including 8 credits in biological science courses and 9 credits in art and design courses. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

The biological sciences must include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 211</td>
<td>Principles of Biology I</td>
<td>3</td>
</tr>
<tr>

<tr>
<td>BIOL 212</td>
<td>Principles of Biology II</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 212L</td>
<td>Principles of Biology Laboratory II</td>
<td>1</td>
</tr>
</tbody>
</table>

The art and design courses must include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BPM I 323</td>
<td>Scientific Illustration Principles and Techniques</td>
<td>3</td>
</tr>
<tr>
<td>BPM I 337</td>
<td>Application of Scientific Illustration Techniques</td>
<td>3</td>
</tr>
<tr>
<td>Advanced</td>
<td>drawing, illustration, electronic media or painting course</td>
<td></td>
</tr>
</tbody>
</table>
Community and Regional Planning Overview

Community and regional planning is a field of study aimed at understanding the ever-changing socioeconomic and physical environments of our communities and planning for their future. Planners evaluate and seize opportunities to solve problems. Planners work at multiple levels of government, as well as the private sector, and they are concerned with issues that affect every corner of the world: the preservation and enhancement of the quality of life in a community, the protection of the environment, the promotion of equitable economic opportunities; and the management of growth and change of all kinds.

Graduates of the Community and Regional Planning department are able to integrate planning knowledge and skills in a variety of practical applications, and can communicate effectively in written and oral form. Graduates will be qualified for a variety of entry-level positions in the public, private, and not-for-profit sectors. They will also be well prepared for graduate study in a variety of fields, including urban planning, law, public policy, public health, environmental science, geography, sociology, urban design, historic preservation, data science, and architecture.

Graduates of the Community and Regional Planning department are expected to understand the structure and functions of urban settlements, including the history of planning and urban development and the processes for plan and policy making. Graduates should have skills in problem formulation, quantitative analysis, written/oral and graphic communications, and collaboration, and in synthesizing and applying knowledge to practice. Graduates are expected to be able to assess the impact of plans and alternatives based on principles of equity and social justice, economic welfare and efficiency, environmental sustainability, and cultural heritage in the context of citizen involvement in decision making.

The department is a member of the Association of Collegiate Schools of Planning. The curriculum is accredited by the Planning Accreditation Board of the American Institute of Certified Planners. Our students gain an education that, when combined with experience, supports eligibility for membership in the American Institute of Certified Planners.

Degree Requirements

The Department of Community and Regional Planning administers the 128-credit-hour undergraduate program leading to the Bachelor of Science. Students have the opportunity to work with their faculty advisors to define their own areas of interest, which may include a minor.

The BS in Community and Regional Planning program can be completed in two to four years. Students can declare a major in CRP at any time during their enrollment at Iowa State University. If applying by transfer from another program or institution, admission is based on the student’s cumulative GPA and a departmental review of course work. Transfer applications from students in programs in anthropology, sociology, political science, history, geography, engineering, and other related disciplines are encouraged. Community and Regional Planning emphasizes responsibility and citizenship, writing and analytical ability, and critical thinking.

Total Degree Requirement: 128 credits

Only 65 credits from a two-year institution may apply which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA; completion of all requirements listed below.

International Perspective: 3 credits
U.S. Diversity: 3 credits
Communication: 13 credits

(C or better grade in ENGL 150 and ENGL 250)

Undergraduate Minors

The Department of Community and Regional Planning offers 15-credit minors in Urban Studies and Geographic Information Science (GISC).

Urban Studies

The Urban Studies minor is earned by completing both C R P 201 (The North American Metropolis) and C R P 291 (World Cities and Globalization), plus 9 additional credit hours from the approved list of courses. At least 6 credit hours must be in courses numbered 300 or above at Iowa State. The College of Design requires students to earn a C or higher in at least 6 of the required 300-level credits. The minor must include at least nine credits that are not used to meet any other department, college or university requirement except the credit requirement for graduation. The Urban Studies minor is open to students from any college and any major.

Geographic Information Science

The Geographic Information Science (GISC) minor is earned by taking CRP 251 and CRP 351, plus 9 additional credits from the approved list of courses. At least 6 credit hours must be in courses numbered 300 or above at Iowa State. The College of Design requires students to earn a C or higher in at least 6 of the required 300-level credits. The minor must include at least 9 credits that are not used in any other department, college or university requirement except the credit requirement for graduation. The GIS minor is open to students in any college and any major.
Graduate Programs

The Department of Community and Regional Planning (CRP) offers three different graduate degree options for individuals interested in engaging with communities and helping to shape their future: a Master of Community and Regional Planning (MCRP), an interdisciplinary Master of Science with an emphasis in Community Development (CDEV), and a Master of Real Estate Development (MRED).

**Master of Community and Regional Planning**

The primary focus of the MCRP degree is to prepare students with the education and practical skills to be leaders in the practice of planning. The program of graduate study is accredited by the Planning Accreditation Board of the American Institute of Certified Planners.

Degree requirements include completion of a 2-year, 48-credit program, including a required core (24 credits), electives (18-21 credits), and a capstone component consisting of either a comprehensive exam (CRP 598X Comprehensive Exam Preparation, 3 credits) or thesis (CRP 699 Research, 6 credits). The required core consists of CRP 532, 561, 563, 564, 566, 568 and 592. Students select electives in consultation with their Program of Study Committee (POSC). Students are encouraged to complete an internship in a planning office during their course of study.

<td>3</td>
</tr>
</tbody>
</table>

Admission to the MCRP program is by application to the department and to the Graduate College. Students with a bachelor’s degree in planning or students who have taken highly relevant coursework may be able to waive up to 9 credits of course requirements. Students must petition the department’s Director of Graduate Education (DOGE) in writing prior to the first day class of the student’s first semester in the program to have credits waived. No foreign language is required for the degree Master of Community and Regional Planning.

**Double Degree Programs**

Double degree programs are offered with architecture (MCRP/MArch), business administration (MCRP/MBA), landscape architecture (MCRP/MLA) and sustainable agriculture (MCRP/MS). Information about our programs and how to apply can be obtained from the department’s web page at: www.design.iastate.edu/community-and-regional-planning (http://www.design.iastate.edu/CRP/), or send an email to crp@iastate.edu.

**Master of Science in Community Development**

CRP offers an interdisciplinary Master of Science degree with an emphasis in Community Development (CDEV) through the department’s affiliation with the Great Plains Interactive Distance Education Alliance (GPIDEA). The CDEV program consists of 30-credit hours offered in an on-line format. Information about the CDEV program may be obtained from the department office and from the department’s web page at: https://www.design.iastate.edu/community-and-regional-planning.degrees/master-of-community-and-regional-planning/community-development-masters-program/.

**Master of Real Estate Development**

In partnership with the Department of Finance in the College of Business, CRP offers a two-year, 33-credit Master of Real Estate Development (MRED) degree. The program is designed for working professionals, with coursework delivered in a blended online/on-campus format. During the academic year, students complete coursework remotely and come to campus for three, one-week intensive workshops throughout the two-year degree. More information on the MRED program is available on the program website: https://www.ivybusiness.iastate.edu/masters/mred/.

**Graduate Certificates**

The Certificate in Preservation and Cultural Heritage (P+CH) is a multidisciplinary graduate program that provides the practical skills and background needed to succeed in the fields of historic preservation and cultural resource management. The certificate program is open to Iowa State University graduate students in any College of Design major as well as those majoring in history, anthropology, and related disciplines. Interested students should visit https://www.design.iastate.edu/programs-minors/certificates/preservation-and-cultural-heritage/ or contact historicplaces@iastate.edu for guidance.
The department also offers a 13-credit graduate certificate in Geographic Information Systems (GIS) in spatial analysis, GIS applications, and program management. The program is open to graduate students in all disciplines of the university. Information about the graduate certificate may be obtained from the department office and from the department’s web page at: www.design.iastate.edu/programs-minors/certificates/gis-certificate/ (https://www.design.iastate.edu/programs-minors/certificates/gis-certificate/)

Design Studies

Interdepartmental Undergraduate Program

http://www.design.iastate.edu

The Design Studies programs bring together courses that deal with the integrated study of the conceptualization, production, visible form, uses, and history of artifacts, buildings, and environments as well as the common qualities and connections among the design, art and planning fields.

Undergraduate Minors

Minor - Critical Studies in Design

The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture. In lectures and focused seminars, students explore historical and contemporary issues, including cultural production, the built environment, media and technology, design in everyday life, and models of professional practice. The minor is open to all undergraduates at Iowa State University.

Minor - Design Studies

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for multi-disciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

Minor - Digital Media

The undergraduate minor in Digital Media covers the knowledge and techniques for applying digital representations to generate designs and art. The body of knowledge specializes in the fields of design, art and planning. This minor is open to all undergraduate students at Iowa State University.

Minor - Geographic Information Science (GISC)

The undergraduate minor in Geographic Information Science (GISC) is an interdisciplinary program that provides students with opportunities to engage the theory, processes, techniques and tools that use spatial data and computational technology to create cutting-edge analysis and mapping approaches for a wide range of fields, such as urban planning, architecture, landscape architecture, design, community development, agriculture, environmental sciences, natural resources, sociology, criminology, anthropology, political science, environmental studies and others. The minor is open to undergraduates in all university majors with a minimum overall GPA of 2.0 prior to enrolling.

Minor - Illustration

The undergraduate minor in Illustration is ideal for students interested in illustration for books, graphic novels, magazine articles, advertising and concept art for game design and film. This minor provides the ability to tailor a curriculum that serves these varied career interests, whether you want to work in the industry or freelance as an independent studio practitioner.

Minor - Preservation and Cultural Heritage

The undergraduate minor in Preservation and Cultural Heritage provides students with knowledge, skills, and credentials that complement undergraduate degrees in a wide variety of majors, but especially Architecture, Interior Design, Community & Regional Planning, Landscape Architecture, and History. To these ends, the Minor has two major curricular objectives:

• Provide students with a holistic understanding of historic preservation that draws from the various departments involved, yet allows for the development of expertise within a student's specific major.

The Minor requires a minimum of 15 credit hours. At least six (6) credits need to be taken at the 300 or above, and at least 9 of the 15 credits must not be used to meet any other department, college, or university requirement except the credit requirement for graduation.

Minor - Textile Design

The undergraduate minor in Textile Design allows students to focus specifically on the design and creation of textiles — a practice with applications in the fine arts, fashion and related fields. Open to undergraduates at the sophomore level and above enrolled in any College
of Design major or in the Apparel, Merchandising and Design major in the College of Human Sciences.

**Minor - Urban Studies**

The undergraduate minor in Urban Studies is an interdisciplinary program that emphasizes urban life in a variety of settings and from different disciplinary and methodological approaches. The Urban Studies minor will allow students to explore varied and multiple dimensions of urban and community life through differing conceptual and analytical frameworks. The minor is open to undergraduates in all university majors except Community & Regional Planning.

Additional information about minors is available in the Student Programs and Services Office, 297 College of Design.

## Graphic Design

### Overview

http://www.design.iastate.edu/graphicdesign/index.php (http://www.design.iastate.edu/graphicdesign/)

The Curriculum in Graphic Design leads to a 124-credit undergraduate Bachelor of Fine Arts in Graphic Design including the 30-credit Core Design Program.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Information on admission criteria is posted each year on the College of Design website.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.

A 30-graduate-credit program is offered leading to the Master of Arts with a specialization in Graphic Design for students planning to undertake a professional degree. (NOTE: Applicants without a degree background in graphic design may be required to complete up to 18 additional credits of coursework).

A 60-graduate-credit post-professional graduate program is also offered leading to the degree Master of Fine Arts.

### Degree Requirements

**Total Degree Requirement: 124 credits**

Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

Students who elect to participate in the Rome Program need to take additional 3 elective credits to reach the 123.5 needed to graduate.
Admission into the BFA in Graphic Design Program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Information on the admission criteria is posted each year on the College of Design website.

Graduate Programs
The department offers the degrees of Master of Fine Arts (M.F.A.) in Graphic Design and Master of Arts (M.A.) in Experiential Graphic Design.

Credit earned at Iowa State University or other institution for the Master of Arts degree may be applied toward the Master of Fine Arts degree at the discretion of the program of study committee.

Applicants to the graduate program should have an undergraduate major in an art or design area and demonstrate the ability to do technically competent and original work through the presentation of a digital portfolio for faculty review. Past academic performance and the quality of studio work are critical in the admission process. A minimum 3.0 GPA in the student’s undergraduate major is the standard for full admission to the graduate program. Admission is also determined by studio space available within the program area, which changes yearly due to graduate students’ progress in their programs of study.

Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduates in the department can expect that additional supporting coursework, determined by the graduate faculty, may be required.

Prospective students are advised to contact the graduate coordinator with specific questions about admission procedures and portfolio review. Application and additional program information may be obtained from the Department of Graphic Design, College of Design, Iowa State University, Ames, IA 50011-3092.

Master of Fine Arts in Graphic Design (M.F.A.)
The Master of Fine Arts in Graphic Design is recognized as the terminal degree in the field and requires a minimum of 60 credits. M.F.A. graduates in Graphic Design are skilled in communication design, problem solving, and are adept in the use of visual language, symbology, and interaction. Graduates are proficient in the design of communications and the use of technologies that incorporate human interaction with environments, objects, and electronic and traditional publications. Students and faculty work collaboratively on a required thesis; integrating theory, creation, research, and design problem solving.

Master of Arts in Experiential Graphic Design (M.A.)
This 30-credit degree focuses on preparing students for visual communication. This degree provides a comprehensive exposure to all aspects of user experience, including but not exclusive to wayfinding, exhibition design, interaction, information design, and placemaking.

The MAXGD is for those seeking a graphic design specialization with little to no previous experience in the area. Students may use the degree as a complement to a bachelor’s degree in graphic design or another design field to enhance their skills and qualifications for employment. It can also be used to complement those students with an undergraduate degree in a graphic design area that would like to add an additional graduate level study to their coursework prior to enter the field.

Thesis, 3-6 cr.

The curriculum aims to develop the ability to cope with diverse problem areas in industrial design, without restricting them to specific fields in design.

An industrial design degree from Iowa State prepares students for creative careers in private and corporate practice, with design consulting companies, in-house design departments, and product manufacturers.

Career choices with an industrial design degree include (but are not limited to):
- Product designer, design researcher, automotive designer, footwear & accessory designer, construction & agricultural equipment designer, furniture & lighting designer, interaction designer, service designer, exhibit designer, packaging designer, advertising & experience designer, UX designer and researcher.

Degree Requirements

The curriculum in Industrial Design leads to a 133-credit undergraduate Bachelor of Industrial Design including the first year Core Design Program.

Admission into the professional program depends upon available departmental resources. Updated information on admission criteria is announced yearly on the College of Design website.

Transfer students with studio credits from other programs, colleges, and universities must present a portfolio of work done in those courses, for departmental review, in order to have the credits apply toward studio. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.

A 60-credit post-professional graduate program is also offered leading to the terminal degree Master of Industrial Design.

Total Degree Requirements: 133 credits

Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

Graduate Program

Designing for Future Industries

Master of Industrial Design | MID

60 credit study | distributed across two consecutive years

How will (Industrial) Design look like in the future? Where is the field going? What new methods and methodologies will be needed to tackle current and emergent global issues? What will it mean to be human in the age of Artificial Intelligence? How will design disciplines answer to these new futures, new typologies of users and ever-changing technologies?

These are just some of the questions that keep us awake in the MID program! In an age where new technologies and automation are continually changing the way we think about human activities and future jobs, Industrial Design is faced with challenges that question the field itself. Designing successfully for and with new industries and technologies will require ambidextrous designers, that are flexible, critical, creative and highly capable of working and collaborating in different contexts, across domains and most importantly under different roles. Design practitioners, scholars and students will need to be more than developers, managers or human-centered researchers - they will need to be change-makers, leaders and above all Connectors. The MID program offers a competence-based curriculum, with tools and training on how to be[come] this design connector of the future.

Description of the degree | the bigger picture

The Master of Industrial Design (MID) program at the College of Design, Iowa State University, specifically emphasizes systems thinking as one of its core languages when reframing problems as opportunities for future contexts. Systems design, change theory, problem reframing, strategic and creative thinking, and innovation by design are some of the fundamentals of the MInD framework.

Industrial Design is a human-centered discipline that questions existing boundaries and makes connections among diverse domains. Therefore, the program challenges students to develop the ability to recognize and define problems in new ways, and thus find opportunities others might have missed or undervalued. As a strategic problem-solving process, Industrial Design tries to reimagine how we should go about developing innovative, sustainable and durable solutions for people and society at large that genuinely lead to better quality of life and better futures. The MID program actively connects with other knowledge domains and disciplines, to research how things are with the drive to propose how they ought to be. This is achieved through the challenging balance between critical and creative ways of thinking [and working] when devising novel, useful and meaningful artifacts, services, experiences, and environments. Ultimately, the program integrates the design triad of people, business, and technology, in innovative ways, and is based on insightful research to create new value and competitive advantage in a variety of societal, economic, and environmental contexts.

Details about the degree | zooming in

The MID program is centralized on the creation and application of new knowledge through in-depth investigations of existing ‘gaps’ culminating in a graduation project, which includes a creative component (grad studio-based) or a written thesis (research project). At the same time, students expand their design practice skills using different methodologies, collaboratively, throughout the entire design process. They explore, generate, transfer, and implement interdisciplinary insights into foundational knowledge for the discipline of Industrial Design.
The MID is accredited and recognized as a terminal degree in Industrial Design. This graduate program is designed to offer significant mix of skills and experiences, including students from different disciplinary backgrounds, faculty-directed research programs, internships, international study abroad, industry-sponsored coursework, and also teaching experience.

The MID program is positioned in one of the most comprehensive design colleges in the country, facilitating the integration of methodologies and skill sets from multiple disciplines. Additionally, the program has established curricular connections to the nationally ranked College of Engineering and the College of Business at Iowa State University, as well as to numerous industry collaborators and practitioners.

Degree requirements includes a completion of a 2-year, 60-credit program, including a required core (45 credits), departmental electives (9-12 credits) and experiential learning credits (3-6 electives). The final MID Graduate Project includes one of the following: creative component with a design process report opting for one of the following modes as Graduate Project: creative component with a design process report (6 credits) or research-based written thesis (6 credits). To note that students and their supervisory team work collaboratively on this required final grad project, integrating both theory and fabrication in the creative component, and research with/for a complex design problem.

Admission to the MID program is by application to the department and to the Graduate College. The MID program does not require a bachelor’s degree in industrial design and is open to students from any other disciplinary background. Information about our programs and how to apply can be obtained from the department’s web page at: https://www.design.iastate.edu/industrial-design/degrees/master-of-industrial-design/, or send an email directly to the Director of Graduate Studies.

Integrated Studio Arts

Overview

http://www.design.iastate.edu/artvisualculture/index.php

The Department of Art and Visual Culture offers degree programs focused on fine arts and visual culture, offering courses in studio arts, art history, art education, and scientific illustration. Degree offerings include the Bachelor of Arts (BA) in Art and Design, Bachelor of Fine Arts (BFA) in
Integrated Studio Arts, and Master of Fine Arts (MFA) in Integrated Visual Arts.

BFA Integrated Studio Arts (ISA) (Fine/Studio Arts)
Students will select from ISA's studio options including ceramics, digital media, drawing, furniture/wood design, illustration, jewelry and metalsmithing, scientific illustration, mixed media, new genres, painting, photography, printmaking, and textiles.

Over the four-year course of study students will develop a portfolio and prepare for a professional practice in the visual arts. This concentration engages aesthetics, visual problem-solving, critical thinking, and skill development, drawing on historical and cultural theory, contemporary trends, and studio practice.

Transfer students with studio credits from other colleges and universities may present a portfolio of work created in those courses to determine if these credits can be applied toward specific studio requirements. Students will present this portfolio upon admission and prior to registration for classes. Arrangements for this process should be made with the department’s academic advisors.

Degree Requirements
The curriculum in leads to a 127-128 credit undergraduate Bachelor of Fine Arts in Integrated Studio Arts. Admission into the program requires the completion of at least 30.0 credits, including the following courses:

- DSN S 102, DSN S 110 or 115, DSN S 131, and DSN S 183; 6 credits of Social Sciences/Humanities; 6 credits of Math/Science; ENGL 150 (or test-out credit); LIB 160. Information on admission criteria is posted each year on the College of Design website.

Total Degree Requirement: 127-128 cr.
Only 65 credits from a two-year institution can apply, and may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

International Perspective: 3 credits
U.S. Diversity: 3 credits
Communication: 10 credits
(C or better grade ENGL 150 and ENGL 250)

| ENGL 150  | Critical Thinking and Communication | 3 |
| ENGL 250  | Written, Oral, Visual, and Electronic Composition | 3 |
| LIB 160   | Introduction to College Level Research | 1 |
One course from the following: 3

| COMST 101 | Introduction to Communication Studies |
| COMST 211 | Interpersonal Communication |

**Post-Baccalaureate Undergraduate Certificate**  
Iowa State's Post-Baccalaureate Undergraduate Certificate program in Integrated Studio Arts (ISA) prepares students for either graduate study or career advancements by providing a focused environment for advancing aesthetic, technical, creative, and conceptual skills. While a bachelor's degree in visual or fine arts is not necessary, a strong portfolio of creative work and a written statement of purpose are required for admission. Download application requirements ([https://www.design.iastate.edu/wp-content/uploads/2021/03/Postbaccalaureate_ISA.pdf](https://www.design.iastate.edu/wp-content/uploads/2021/03/Postbaccalaureate_ISA.pdf)) or view online. ([https://www.design.iastate.edu/art-and-visual-culture/degrees/post-baccalaureate-undergraduate-certificate/](https://www.design.iastate.edu/art-and-visual-culture/degrees/post-baccalaureate-undergraduate-certificate/))

**Curriculum**  
Post-baccalaureate students will work with a faculty advisor to create a tailored 25-credit program of study including:

- 15 credits of 300/400-level Integrated Studio courses
- Six (6) credits of 300/400-level art history courses
- Three-credit elective selected from a list of options
- ARTIS 491: One-credit capstone exhibition course

For the capstone experience, you will be expected to produce an artist’s statement and a written assessment of your learning that will be reviewed, along with your art, by the arts faculty.

This certificate program must be completed within two years. Students interested in developing a body of work for admission to graduate school or to focus on further skill development prior to moving into professional practice will be ideal candidates.
Application Requirements
To apply for this program, please submit the following materials.

1. Digital portfolio:
   - Twenty (20) images of recent work with no more than four (4) of the images being details
   - Descriptions on each image need to include title, date, size and medium

2. One-page statement of intent

3. Current resume

4. Name and contact information of three (3) references

Graduate Program
The department offers the Master of Fine Arts (MFA) in Integrated Visual Arts (IVA). The MFA curriculum in IVA requires a minimum of 60 credits. This MFA is a unique interdisciplinary program offering integrative study among a combination of media areas including ceramics, computer applications, drawing, textiles, illustration, jewelry/metalsmithing, painting, printmaking, photography, furniture/wood design and areas outside of AVC. The IVA program offers an innovative curriculum aligned with emerging art and design markets.

IVA graduates link traditional studio disciplines with interdisciplinary studies. Graduates are prepared as visual artists to enter studio practice, business, higher education, or new interdisciplinary fields. The MFA is recognized as the terminal degree. A required thesis exhibition is composed of two parts: a substantial solo exhibition; and a written thesis statement that describes the development of the work in the exhibition, its objectives, and its historical and cultural points of reference. A written thesis with no exhibition component may be an appropriate alternative, but some portion of the work should entail an element of creative problem-solving in the form of a visual product.

Upon completion of the graduate program IVA graduates are expected to:

- Have developed a fully realized creative direction which provides a platform for continued professional research and growth, and visual expression;
- Have produced a body of work which demonstrates a high level of creative investigation and accomplishment;
- Have acquired a professional level of technical proficiency in one or more media areas;
- Effectively communicate their ideas verbally and in writing;
- Understand the context, both historical and current, within which their creative pursuits exist;
- Have developed a well-formed and informed personal creative philosophy and a strong studio skill set;
- Understand current and relevant ethical, ecological, and social issues; and
- Use relevant theory in pursuing creative university-level scholarship.

Studio Courses: 39 credits
Courses numbered ARTIS 27

| ARTIS 699A and ARTIS 699B | 6 |

Seminar Courses: 6 credits
(Students take 2 sections of ARTIS 571, or 1 section of ARTIS 571 and ARTIS 511)

| Graduate Seminar ARTIS 571 | 3 credits each section |
| ARTIS 571A Graduate Seminar: Grants, Residencies, Exhibitions, Entrepreneurialism |
| ARTIS 571B Graduate Seminar: Critique and Creative Process |
| ARTIS 511 Seminar in Teaching |

Art History/Theory/Criticism: 12 credits
ART H 501 required

| Related Courses (outside of IVA program): 3 credits |
| Total: 60 Credits |

Interdisciplinary Design
OVERVIEW
Design plays a crucial role in innovation, imagination and human creativity. The secondary major in Interdisciplinary Design is an asset on any resume. It offers courses for students interested in pursuing careers and futures related to creative leadership, design for social change, disruptive innovation and user experience (UX), and provides the knowledge and skill sets necessary to address complex challenges and contemporary societal problems using key innovation and entrepreneurial concepts.

Interdisciplinary Design explores the central principle of human-centered experiences, and how people — users, customers, markets, audiences — are at the core of all creative activities and endeavors. Interdisciplinary Design dives deeply into the fundamental concepts that explain creative processes, from collaboration to iteration to implementation.

This program provides a strong foundation in creative problem solving, design thinking, strategic design, leadership and project management and new product development. Interdisciplinary Design builds an understanding of the innovation journey through design tools and techniques for ideation, insights forecasting and prototyping with users.
This is the place to initiate a project, explore how to take an idea to execution and discover how to turn an insight into a reality.

The Interdisciplinary Design curriculum is built around a set of required innovation and design entrepreneurship-focused interdisciplinary studios and other required and elective courses, with many options for students across all university majors.

**SECONDARY MAJOR**

The secondary major in Interdisciplinary Design requires a minimum of 31 semester credits. Students seeking a secondary major in Interdisciplinary Design must complete:

**Anchor Courses: 19 cr.**

**Interior Design**

Overview

http://www.design.iastate.edu/interiordesign/index.php (http://www.design.iastate.edu/interiordesign/)

The department offers the degrees Bachelor of Fine Arts (BFA) in Interior Design, Master of Arts (MA) in Interior Design, and Master of Fine Arts (MFA) in Interior Design.

**BFA Interior Design**

Emphasis is on the student’s application of design processes to creatively solve problems of the interior environment based on knowledge of human safety, functional utility, and physical, psychological, and contextual fit. Graduates in interior design are competent in visual communication (sketching, drafting, and computer-aided design), design problem solving, space planning, lighting and color specification for interiors, finish and furniture selection, detailing interior construction, and application of human factors. The curriculum is accredited by the Council for Interior Design Accreditation (CIDA) as providing professional-level education.

Transfer students with studio credits from other colleges and universities must present a portfolio of work done in those courses to determine if these credits can be applied toward specific studio requirements. Students are required to present their portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.

**Graduate Study**

A 34-graduate-credit program is offered leading to the Master of Arts, for students planning to undertake professional or design research-oriented pursuits. (NOTE: Applicants without a previous undergraduate degree in interior design may be required to complete up to 40 additional credits of deficiency work).

A 60-graduate-credit post-professional graduate program is also offered leading to the degree Master of Fine Arts.

**Degree Requirements**

The curriculum in Interior Design leads to a 129-credit undergraduate Bachelor of Fine Arts in Interior Design including completion of the Core Design Program.

Admission into the professional program follows completion of the Core Design Program and depends upon available resources. Information on admission criteria to each professional degree is posted each year on the College admissions website.

**Total Degree Requirement: 129 cr.**

Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA; Completion of all requirements listed below.

**International Perspective: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communication: 10 cr.**

(C or better grade ENGL 150 and ENGL 250)

Graduate Study

The Department of Interior Design offers two graduate degrees in interior design: a five-semester Master of Fine Arts (MFA) and a three-semester Master of Arts (MA), each of which requires a thesis. The degree programs encourage interdisciplinary work within the College of Design and across related fields within the university. We currently offer double-degree programs and an interdisciplinary PhD program in Human Computer Interaction (HCI) with a home department in Interior Design. Financial support in the form of teaching and research assistantships is available on a competitive basis.

Master of Fine Arts in Interior Design (MFA)

The MFA is a terminal degree in Interior Design with a required thesis and a creative component. It is designed for students with undergraduate degrees in Interior Design or closely related disciplines and for students from other disciplines who complete required prerequisites in the Department of Interior Design. The MFA in Interior Design Program prepares students to become professionals in practice, teaching, and research.

The MFA program encourages students to research and engage diverse contemporary issues within design specializations across the field of Interior Design. Faculty in the program provide students with opportunities to engage and address social, cultural, environmental, historical, practical, and other concerns within regional, national, and international contexts. They amalgamate traditional methods and contemporary technologies, and encourage students to develop new processes as needed. Faculty members promote inclusive designs that accommodate current and future needs across distinct cultures and populations. The Interior Design Graduate Programs expect graduates to approach research and interdisciplinary coursework with dedication and commitment.

The MFA curriculum has an intensive five-semester course sequence that emphasizes foundations of interior design including methods, theory, process, humanics (human factors in design), and studio. Design seminars offer training in varied interior design specializations including preservation and cultural heritage, inclusive design, lighting, color theory, research methods, and human factors design. The program offers study abroad opportunities, studios with specialized faculty, and independent study projects. Interdisciplinary option studios apply and integrate core-course content with technical proficiency in areas of preservation and cultural heritage, healthcare, design for elderly populations, and hospitality, among others. During the last two semesters students explore interior design through focused research and a written thesis. The MFA program concludes with a public defense of the thesis that includes a thesis exhibition with graphic representations of the research.

Students admitted to the program hold undergraduate degrees in a broad range of fields. A student without an undergraduate degree in interior design or interior architecture must complete the curriculum’s prerequisites listed in curriculum sheets posted on the Graduate Programs in Interior Design’s website (https://www.design.iastate.edu/interior-design/graduate-degrees/graduate-program-overview/). Students with undergraduate degrees in closely related to design fields may be eligible to waive part of the prerequisites in the program.
Master of Fine Arts (MFA), 60 Credits

Advanced Studies and Human Factors: 12 credits
ARTID 551A Design Humanics: Sensory Perception & Ergonomic Factors 3
or ARTID 551B Design Humanics: Environment & Behavior
ARTID 569 Advanced Studies in Interior Design 3
ARTID 569 Advanced Studies in Interior Design 3
ARTID 569 Advanced Studies in Interior Design 3

Methods and Practicum: 8 credits
ARTID 552 Evidence-Based Design 2
ARTID 554 Interior Design Teaching Practicum 3
ARTID 660 Research Methods (or DSN S 501 Introduction to Research Design) 3

Studio Courses: 20 credits
ARTID 668 Advanced Experimental Interior Design 4
ARTID 668 Advanced Experimental Interior Design 4
DSN S 546 Interdisciplinary Design Studio * 6
DSN S 546 Interdisciplinary Design Studio * 6

* This course is offered for variable credits. Students should select a section offered for 6 credits.

Thesis and Creative Component: 12 credits
ARTID 699A Thesis 6
ARTID 699B Thesis-Exhibition 6

Electives: 8 cr.
Total: 60 credits

Master of Arts in Interior Design (MA)

The post-professional Master of Arts (MA) in Interior Design is a 34-credit research degree with required a graduate thesis. The MA degree is open to applicants who hold a professional degree in Interior Design or Interior Architecture from an accredited program. The MA in Interior Design degree prepares students to become competent professionals in Interior Design practice, while the written research thesis contributes to the body of knowledge in the field.

MA candidates are required to develop a thesis proposal with a statement of purpose, research questions, literature review, methods summary, and outline of proposed chapters. A first professional degree is also open for applicants with non-professional degrees in various fields with the completion of required prerequisites in the Department of Interior Design. A first professional MA for graduates in closely related design fields may allow some prerequisite courses to be waived.

Master of Arts in Interior Design (MA), 34 Credits

Advanced Studies and Human Factors: 9 credits
ARTID 551A Design Humanics: Sensory Perception & Ergonomic Factors 3
or ARTID 551B Design Humanics: Environment & Behavior
ARTID 569 Advanced Studies in Interior Design 3

Methods: 5 credits
ARTID 660 Research Methods 3
ARTID 552 Evidence-Based Design 2

Studio Courses: 10 credits
ARTID 668 Advanced Experimental Interior Design 4
DSN S 546 Interdisciplinary Design Studio 6

Thesis: 6 credits
ARTID 699A Thesis 6

Electives: 4 credits

Dual Degrees

Double-degree programs are offered with the Department of Architecture with a Master of Arts (MA) in Interior Design and a Master of Architecture (MArch). The graduate program also offers a PhD in Human Computer Interaction (HCI) with home department in Interior Design. Information about our programs and how to apply can be obtained from the department of Interior Design Graduate Program website and from the graduate school’s departmental web page.

Landscape Architecture Overview

Landscape architecture is an environmental design discipline. Landscape architects actively shape the human environment: they map, interpret, imagine, draw, build, conceptualize, synthesize, and project ideas that transform landscapes. The design process involves creative expression that derives from an understanding of the context of site (or landscape) ecosystems, cultural frameworks, functional systems, and social dynamics. Students in our program learn to change the world around them by re-imagining and re-shaping the landscape to enhance its aesthetic and functional dimensions, ecological health, cultural significance, and social relevance. The profession addresses a broad range of landscapes in urban, suburban, rural, and wilderness settings. The scale of landscape architecture projects varies from broad, regional landscape analysis and planning to detailed, individual site-scale designs. The curriculum at Iowa State prepares students for this challenge as they develop their abilities to design and communicate ideas through a sequence of foundational courses and studios. The program seeks to produce graduates who understand the ethical, social,
and environmental/ecological dimensions of issues involving changes in the landscape.

Graduates are active in a broad range of careers, such as sustainable site design, land development, park management, environmental advocacy, community planning, urban design, and others. In their professional lives, graduates apply their creative and technical skills in the planned arrangement of natural and constructed elements on the land with a concern for the stewardship and conservation of natural, constructed, and human resources. The resulting environments serve useful, aesthetic, safe, and enjoyable purposes. Graduates are able to communicate effectively with colleagues in the sciences and humanities as well as in the allied professions, and are prepared to work individually and in multidisciplinary teams to address complex problems dealing with the cultural/ecological environment.

The department offers graduate and undergraduate degree programs and cooperates in the undergraduate minors in Design Studies, Critical Studies in Design, and Digital Media.

The undergraduate curriculum includes one year of the college's Core Design Program followed by four years in the professional program. Applicants are reviewed on the basis of academic performance and a portfolio of original work; admission to the professional program is subject to the approval of a faculty committee at the completion of the Core Design Program. Information on admission criteria is posted each year on the College of Design website.

Following admission to the professional program, students embark on the traveling studio during the fall semester of their second year. This studio is a full semester's credit of integrated departmental courses and involves extensive travel within and beyond the great Midwest region of North America, to study regional natural systems and the cultural responses to those systems.

To enhance the study of landscape architecture in off-campus settings, the department requires students to choose from among the following options during the spring and summer of their fourth year: 1. a professional internship 2. the College of Design Rome Program 3. an independent study abroad experience or 4. National Student Exchange. The department assists students with placement, and additional information is provided through the department and the College of Design’s Career Services Office.

The undergraduate program consists of a five-year curriculum, requiring 150 credits, leading to the degree Bachelor of Landscape Architecture. These credits are distributed between a one-year Core Design Program of 30 credits and a four-year professional program of 120 credits.

Degree requirements

The department offers graduate and undergraduate degree programs.

The undergraduate program consists of a five-year curriculum, requiring 150 credits, leading to the degree Bachelor of Landscape Architecture. These credits are distributed between a one-year Core Design Program of 30 credits and a four-year professional program of 120 credits.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance and a portfolio of original work. Information on admission criteria is posted each year on the College of Design website.

The BLA from Iowa State University is an LAAB (Landscape Architectural Accreditation Board)-accredited professional degree program. In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for professional licensure. The LAAB is the sole entity recognized by the Council for Higher Education Accreditation to accredit U.S. first-professional degree programs in landscape architecture at the bachelor’s and master’s levels.

Total Degree Requirement: 149.5 credits

Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

Social Science/Humanities Elective  3  L A 444B  3
LA electives  3  L A 444C  3
Communications (300 level English)  3
Additionally: Each student needs to take 3 credits of a US Diversity (usually covered by LA 272) and 3 credits of an International Perspectives course (usually covered by LA 373). Students also need to take at least 6 credits of 300 level or above in the combined areas of communication, science, math, humanities, and social science (6 total from all the areas).

### Graduate Programs

The department offers the Master of Landscape Architecture (MLA), an accredited professional degree designed for students with or without an undergraduate degree in landscape architecture. The degree provides skills and knowledge as measured by the Landscape Architectural Accreditation Board (LAAB) and the licensing exam for students seeking to practice as a licensed professional in the public or private sectors. The MLA degree also offers competency for students interested in post-professional study as it provides the skills and knowledge for the application of research and/or scholarly methods to professional practice.

The MLA program offers three concentration tracks in the following topical areas — Theory/Urbanism, Technology/Ecology, Advocacy/Community — through coursework and an optional thesis or creative component. The concentration in one of the three tracks will be determined by the student in consultation with his/her advisor. Concentration electives may be selected from within the college and university from an approved list and up to three (3) credits from within the department. In their final year, students may undertake a creative component or thesis option with the approval of their major professor and the department Graduate Committee.

Students are also able to pursue double degrees with Master of Community and Regional Planning (MLA/MCRP), Master of Urban Design (MLA/MUD), and Master of Design in Sustainable Environments (MLA/MDesSE). Students interested in the double-degree programs should contact the departments to receive a detailed description of requirements.

The department also offers courses in the Graduate Certificate Program in Geographic Information Systems (GIS), administered by the Department of Community and Regional Planning.

### Concentration Electives: 15 credits

Concentration track electives in Theory/History/Urbanism; Advocacy/Planning/Community; Technology/Ecology/Materiality from approved list. Students may in consultation with their advisor also choose courses from CRP, ARCH, MUD, SUS E, IND D, or other relevant departments in the college or university.

**Total 80 credits**
Sustainable Environments
Master of Design in Sustainable Environments

The Master of Design in Sustainable Environments (MDesSE) is an initial interdisciplinary degree that focuses on holistic design strategies for the production of sustainable, resilient environments and artifacts. MDesSE students and faculty constitute a multidisciplinary, highly interactive community that is deeply engaged in understanding, promoting, and conceiving sustainable practices in design, planning, and artistic production. Students from a variety of backgrounds such as design, art, planning, education, engineering, science, etc., engage in research projects and are challenged to develop individual sustainable design strategies for issues of current relevance that conserve resources, ameliorate ecological problems, and promote social, political, and economic justice.

Coursework focuses on developing skills in modes of representation and information dissemination; foundational and emerging theoretical discourse; as well as research methods and design interventions. The degree concludes with an integrated capstone experience through a student-defined thematic project. Capstone projects are situated in different parts of the world and include themes that draw upon each student's specific area of interest while being informed by the theories, skills, methods, and tactics learned throughout the MDesSE program.

The Master of Design in Sustainable Environments degree consists of 35 credits, typically distributed over three semesters (fall, spring, and summer); however, students may choose to distribute these credits over four or five semesters. The degree is geared toward students with professional degrees in art (BFA, MFA), architecture (BArch, MArch), graphic design (BFA, MFA), interior design (BFA, MFA), industrial design (BID, MID), landscape architecture (BLA, MLA), community and regional planning (BSACP, MCRP, MUP), or engineering. Graduate students can also pursue the following double degrees in the College of Design: MArch/MDesSE, MCRP/MDesSE, MFA in IVA/MDesSE and MLA/MDesSE.

Urban Design

The Master of Urban Design (M.U.D.) is an initial, interdisciplinary program of study that focuses on contemporary challenges of urbanism at local, regional and global scales. Courses are taught by faculty from Architecture, Community and Regional Planning, and Landscape Architecture; with an understanding that urban environments should be engaged through an integrated design process that includes ecological, social, material, economic, and urban policy factors.

The urban design degree reflects a deep commitment to resilient urban environments within the context of an increasingly concentrated, connected and, diverse urban world. Accordingly, the coursework engages emerging urbanization topics including:

- The formation of more adaptable, flexible and resilient cities;
- the exponential growth of megacities and steady decline of investments in traditional urban economies in the twenty-first century;
- The transformation of Industrial landscapes, particularly within the Midwestern context, and the global impact of transnational economic operations.
- the spatialization of informal economies, practices, and services across the south-north global divide;
- and, a reexamination of the potentials of hard and soft infrastructures, principles of the circular economy and a reframing of the urban-rural divide.

The program consists of 30 credits, typically distributed over three semesters (fall, spring and summer), however, students may choose to distribute these credits over four or five semesters. The degree is geared toward students with professional degrees in architecture (BArch, MArch), landscape architecture (BLA, MLA) or planning (BSACP, MCRP, MUP). Graduate students can also pursue the following double degrees in the College of Design: MArch/MUD, MCRP/MUD and MLA/MUD.

Aligning Education in Engineering with the University Mission

The mission of Iowa State University is to create, share, and apply knowledge to make Iowa and the world a better place. Students will become broadly educated, global citizens who are culturally informed, technologically adept, and ready to lead. The College of Engineering echoes this philosophy and emphasizes preparing its graduates to meet the challenges of the 21st century.

Engineering education seeks to develop a capacity for objective analysis, synthesis, and design to obtain a practical solution. The engineering programs at Iowa State University are designed to develop the professional competence of a diverse student body and, by breadth of study, to prepare students to solve the technical problems of society while considering the ethical, social, and economic implications of their work at state, national and global levels.

The focus of each curriculum is to strengthen students’ critical thinking, creative abilities, and communication skills. Students in engineering will have the opportunity for interdisciplinary and experiential learning through learning communities, service learning, internships and cooperative education, as well as research, capstone, and study abroad experiences.

The problem-solving skills learned from an engineering education at Iowa State University also provide an excellent launching pad for careers not only in engineering, but also medicine, law, business, and many other fields.

Registration as a professional engineer, which is granted by each individual state, is required for many types of positions. The professional curricula in engineering at Iowa State University are designed to prepare a graduate for subsequent registration in all states.

Seniors in accredited curricula of the College of Engineering are encouraged to take the Fundamentals of Engineering Examination toward professional registration during their final academic year. Seniors in engineering curricula who have obtained at least 6 semester credits in surveying may take the Fundamentals Examination for professional registration as land surveyors.

Concurrent Graduate/ Undergraduate Programs

Several engineering programs offer the opportunity for well-qualified undergraduate juniors and seniors to pursue a graduate degree in their program while finishing the undergraduate requirements. The programs offering concurrent undergraduate/graduate degrees are: aerospace engineering, agricultural engineering, biological systems engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, materials engineering, mechanical engineering and software engineering.

Programs offering concurrent bachelor of science/master of business administration degrees are: aerospace engineering, agricultural engineering, biological systems engineering, chemical engineering, civil engineering, computer engineering, construction engineering, electrical engineering, industrial engineering, materials engineering, mechanical engineering and software engineering. For more information, refer to the graduate study sections for each engineering program. Advanced work in engineering is offered in the post-graduate programs. See the Graduate College section of this catalog.

Joint Undergraduate Programs

A bachelor of science degree in software engineering is offered in the College of Engineering and the College of Liberal Arts and Sciences.

Accreditation

Twelve undergraduate engineering programs are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org (http://www.abet.org/). These twelve programs are: aerospace, agricultural, biological systems, chemical, civil, computer, construction, electrical, industrial, materials, mechanical and software engineering. Accreditation status is indicated in the Courses and Programs section for each engineering program.

Organization of Curricula

All curricula in engineering are designed as four-year programs. They are structured in two phases: a basic program and a professional program. The basic program consists primarily of subjects fundamental and common to all branches of engineering and includes chemistry, physics, mathematics, engineering computations, and English. The professional phase of a curriculum includes intensive study in a particular branch of engineering, as well as a continuation of supporting work in mathematics, basic sciences, humanities, and social sciences.

Students should complete the requirements of the basic program before proceeding to a professional program.
Preparation for the Engineering Curricula

In addition to the freshman admission requirements for direct from high school students, the college also requires 2 years of a single foreign language. Students coming in without the 2 years of a single foreign language must meet this requirement by no later than the time of graduation. Other high school credits particularly important to students wishing to study engineering include:

- 2 years of algebra,
- 1 year of geometry
- 1/2 year of trigonometry
- 1/2 year of pre-calculus
- 1 year each of chemistry, biology, and physics
- 3 years of social science
- 4 years of English

See Index (http://catalog.iastate.edu/azindex/) for specific admission requirements.

Placement in mathematics, English, and chemistry will generally be based on high school preparation and test scores. Advanced placement is possible for exceptionally well-prepared students. Students who are not adequately prepared may be encouraged or required to take additional preparatory coursework and should expect to spend more than the customary time to complete the engineering program. Any coursework which is preparatory or remedial in nature cannot be used to satisfy credit requirements for graduation in any of the engineering curricula.

Engineering Basic Program

Please see "Basic Program for Engineering Curricula" section.

Requirement for Graduation

In order to graduate in a professional engineering curriculum, students must have a minimum GPA of 2.00 in a department-designated group of 200-level and above courses known as the Core. These courses will total no fewer than 24 semester credits.

Engineering Minors

The College of Engineering offers four undergraduate minors which are open only to students in the College of Engineering. These are minors in biomedical engineering, energy systems, engineering sales and nondestructive evaluation. These minors must include at least nine credits which are beyond the total used to meet curriculum requirements.

The biomedical engineering minor is a 17-credit interdisciplinary program that complements a student’s major discipline by providing additional insight into the interactions between various engineering disciplines and biomedically-relevant systems. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Biomedical Engineering in Courses and Programs.

The energy systems minor is a 15 credit program that provides engineering students with focused educational opportunities in the broad area of energy systems. Students will understand broad energy perspectives, the language of energy systems and the economic, environmental, and policy issues related to energy. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Energy Systems in Courses and Programs or see http://www.me.iastate.edu/energy-systems-minor/.

The engineering sales minor is a 15 credit minor that complements the technical training in the student’s major discipline by providing the tools and knowledge required for technical (i.e. business-to-business) sales careers. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Engineering Sales in Courses and Programs.

The nondestructive evaluation minor (16 credit minimum) open to engineering students who have met the basic program requirements and are not on academic warning or probation. The minor is supervised by an inter-disciplinary Engineering faculty committee. For minor course requirements, refer to Nondestructive Evaluation Engineering in Courses and Programs.

Engineering Minor (Interdisciplinary)

The College of Engineering offers an undergraduate minor in cyber security which is open to all students at ISU who meet the prerequisites. The cyber security minor is a 15 credit minor that is intended for students studying computer engineering, computer science, software engineering or management information systems with the goal of enabling them to work in cyber security. For minor course requirements, refer to the Cyber Security in Courses and Programs.

Undergraduate Majors and Minors Outside the College of Engineering

In addition to the engineering degree program, students may earn majors or minors in other colleges of the university. A major or minor program must meet all requirements of the offering department or program and its college and contain credits beyond the requirements for a B.S. degree in engineering. A minimum of 15 additional credits is required for each major area of study and an additional 9 credits for each minor.

Advising System

The purpose of the advising system in the College of Engineering is to work constructively with students in developing their individual academic programs and to provide a resource contact person for students during their college careers.
The college offers an orientation program during the spring and summer for students planning to enter in the fall, and during the fall for students planning to enter in the spring. Students may also complete orientation online. All entering students are encouraged to attend orientation which includes meeting with an academic advisor to register for classes. Placement assessments given during the orientation program help determine the student’s current level of proficiency which enables the academic advisor to prepare an appropriate course schedule for the student.

Special Programs

All engineering students are strongly encouraged to participate in either the cooperative education or internship programs. Students who are qualified to participate in the engineering honors program are also urged to do so. These programs are integrated into the professional engineering curricula and may require additional work. However, both these professional and academic programs offer opportunities that will enrich the standard academic experience. Engineering students are also encouraged to take advantage of study abroad opportunities available through the College of Engineering’s International Programs Office.

a. Cooperative Education Program. The College of Engineering offers, through its curricula, an experiential education program. Enrollment in the program allows students to gain practical work experience in their career field while attending college. In general, students enrolled in the co-op program will require an additional semester to complete curriculum requirements.

Cooperative programs are a mechanism by which a student may work full-time for one semester per academic or calendar year. The student has the opportunity to assess career paths within her/his chosen curriculum and the employer evaluates the student’s potential as a future full-time employee. Both domestic and international co-op programs are allowed. Cooperative education students pay no tuition to the university during their work periods and do not receive credit hours for their work experience. Students register for a non-credit cooperative education course (398) for fall or spring and are considered full-time students while enrolled in these courses. For additional information contact your academic advisor and the Office of Engineering Career Services.

b. Internship Program. The College of Engineering offers, through its curricula, an experiential education program. Internships are a mechanism by which a student may work full-time for the summer. Enrollment in the program allows students to gain practical work experience in their career field while attending college. Internship students pay no tuition to the university during their work periods and do not receive credit hours for their work experience. Students who register for the internship course (396) for the summer are considered to be full-time students. For additional information contact your academic advisor and the Office of Engineering Career Services.

c. Honors Program. The College of Engineering participates in the University Honors Program (see Index (http://catalog.iastate.edu/azindex/)). The honors program is designed for students with above average ability who wish to individualize their programs of study. For further details consult the chair of the Engineering College Honors Program Committee or your departmental honors program advisor.

d. Engineering International Engagement. In a world where the sun never sets, engineers must be prepared to understand other cultures and other ways of doing business. Engineers must expand their exportable skills, language and cross-cultural skills.

The College of Engineering has formed worldwide partnerships to create opportunities for students to work and study with leading universities in other countries and multinational corporations. With careful planning, students may earn credit in courses that fulfill their degree requirements. To learn more about work and study abroad, visit the Engineering International Engagement website: http://www.engineering.iastate.edu/studyabroad/

Departments of the College

Engineering

Two Bachelor’s Degrees versus a Degree and Second Major
A student with multiple curricula within the College of Engineering is permitted to earn only multiple degrees. All requirements for each curricula must be met plus an additional 30 credits for each curricula being pursued beyond the curriculum which requires the most credits.

Students in the College of Engineering are able to earn a degree with a second major/curriculum as long as the second major/curriculum is within another college, meets all requirements of the additional programs and contains a minimum of 15 additional credits beyond the requirements for a B.S. degree in engineering for each additional area of study.

Basic Program for Engineering Curricula
The Basic Program is a set of courses that provides a foundation common to all engineering curricula. Students normally enroll in most of the Basic Program courses during their first year. Before enrolling in engineering courses at the 200-level and above, students enrolled in the College of Engineering must do the following:

1. Complete the Basic Program with a Basic Program grade point average (GPA) of at least 2.00.
2. Earn an ISU cumulative GPA of at least 2.00.

A grade of C or better is required for any transfer credit course applied to the Basic Program. Grades from transfer courses will not be used in computing the Basic Program GPA.

Students enrolled in the College of Engineering who have not met the above requirements may enroll for no more than two semesters in 200-level engineering courses. Students not enrolled in the College of Engineering may take engineering courses as long as they meet the prerequisites and space is available; only the first two semesters of engineering courses at the 200-level and above taken at ISU while a student is not enrolled in the College of Engineering can be applied toward an engineering degree.

Entering undergraduates must demonstrate proficiency in trigonometry based on test scores, or by having transfer credits from a college trigonometry course, or by passing MATH 143 Preparation for Calculus before enrolling in MATH 165 Calculus I.

The Department of English may recommend placement in one or more sections of ENGL 099 or ENGL 101 English for Native Speakers of Other Languages if the placement test administered to students whose first language is not English indicates deficiencies. Satisfactory completion of the recommended English course(s) will be required of students to complete their Basic Program.

Basic Program
(A minimum GPA of 2.00 required for this set of courses. Transfer courses are not used in the Basic Program GPA computation).
Problem Solving in Software Engineering

Total Credits: 24-25

ENGL 250 Written, Oral, Visual, and Electronic Composition is normally taken in the second year. With advanced placement to ENGL 250, credit for ENGL 150 Critical Thinking and Communication is earned upon successful completion of ENGL 250 Written, Oral, Visual, and Electronic Composition, but only when ENGL 250 Written, Oral, Visual, and Electronic Composition is completed at Iowa State.

* Students enrolled in the joint software engineering degree program should take S E 101 Software Engineering Orientation, note that ENGR 101 can be substituted for S E 101.

Engineering Courses (ENGR)

Most of the courses with the designator of Engr are broad-based engineering courses applicable to all engineering disciplines. Several of these courses are part of the basic program which is required for engineering students. All courses are administered by the college and with the exception of ENGR 160 Engineering Problems with Computer Applications Laboratory, ENGR 340 Introduction to Wind Energy: System Design & Delivery, ENGR 466 Multidisciplinary Engineering Design and ENGR 467 Multidisciplinary Engineering Design II Multidisciplinary Engineering Design II are coordinated through Engineering Student Services in Engineering Academic and Student Affairs.

Aerospace Engineering

Undergraduate Study

For undergraduate curriculum in aerospace engineering leading to the degree bachelor of science. The Aerospace Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/.

The aerospace engineer is primarily concerned with the design, analysis, testing, and overall operation of vehicles which operate in air and space. The curriculum is designed to provide the student with an education in the fundamental principles of aerodynamics, flight dynamics, propulsion, structural mechanics, flight controls, design, testing, and space technologies. A wide variety of opportunities awaits the aerospace engineering graduate in research, development, design, production, sales, and management in the aerospace industry, and in many related industries in which fluid flow, control, structural, and transportation challenges play major roles.

Make To Innovate (M:2:I) is an exciting new program in the Aerospace Engineering Department that engages students in hands-on projects to augment their understanding of engineering fundamentals.

A cooperative education program in aerospace engineering is available in cooperation with government agencies and industry. The usual four-year curriculum is extended for students who participate in alternating industrial experience periods and academic periods. This arrangement offers valuable practical experience and financial assistance during the college years.

Undergraduate Mission and Educational Objectives

The Department of Aerospace Engineering maintains an internationally recognized academic program in aerospace engineering via ongoing consultation with students, faculty, industry, and aerospace professionals. Results of these consultations are used in a process of continuous academic improvement to provide the best possible education for our students.

Mission statement:

The mission of the aerospace engineering program is to prepare the aerospace engineering student for a career with wide-ranging opportunities in research, development, design, production, sales, and management in the aerospace industry and in the many related industries which are involved with the solution of multi-disciplinary, advanced technology problems.

Program Educational Objectives:

The objectives of the Aerospace Engineering program at ISU are to produce graduates:

- who actively contribute to the field of aerospace, related fields or other disciplines;
- are critical thinkers and lifelong learners; and
- are aware of the societal, economic and environmental impact of their work.

Student Learning Outcomes

Upon graduation, students should have:

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- an ability to communicate effectively with a range of audiences
• an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
• an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
• an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
• an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**CURRICULUM IN AEROSPACE ENGINEERING**

Leading to the degree bachelor of science.

**TOTAL CREDITS REQUIRED: 129.0.** Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements for either required or elective courses.

**INTERNATIONAL PERSPECTIVES: 1: 3 CR.**

**U.S. DIVERSITY: 1: 3 CR.**

**COMMUNICATION PROFICIENCY/LIBRARY REQUIREMENT:**

<table>

Total Credits 47

OTHER REMAINING COURSES: 33 CR.

ENGL 250 Written, Oral, Visual, and Electronic Composition 3
(60 must have a C or better in this course)

C E 274 Engineering Statics 3

M E 345 Engineering Dynamics 3

MAT E 273 Principles of Materials Science and Engineering 3

AER E 161 Numerical, Graphical and Laboratory Techniques for Aerospace Engineering 3

AER E 361 Computational Techniques for Aerospace Design 3

AER E 362 Aerospace Systems Integration 3

3 credits from the following 3 credits

any AER E or EM graduate level (500+ level) course

AER E 407 Applied Formal Methods

AER E 412 Spacecraft Electric Propulsion

AER E 415 Rocket Propulsion

AER E 417 Experimental Mechanics

AER E 422 Vibrations and Aeroelasticity

AER E 423 Composite Flight Structures

AER E 426 Design of Aerospace Structures

AER E 432 Flight Control Systems II

AER E 433 Spacecraft Dynamics and Control

AER E 442 V/STOL Aerodynamics and Performance

AER E 446 Computational Fluid Dynamics

AER E 448 Fluid Dynamics of Turbomachinery

AER E 451 Astrodynamics II

AER E 463 Introduction to Multidisciplinary Design and Optimization

AER E 464 Spacecraft Systems

AER E 468 Large-Scale Complex Engineered Systems (LSCES)

AER E 481 Advanced Wind Energy: Technology and Design

AER E 483 Aeroacoustics

One of the following: 3 credits

ENGL 314 Technical Communication (Must have a C or better in this course)

ENGL 309 Proposal and Report Writing (Must have a C or better in this course)

Technical Electives (see below) 2 credits

Career Electives (see below) 2 credits

Total Credits 33

Technical Electives, 3 cr. and Career Electives, 6 cr. selected from preceding AER E list or departmental-approved 300-level or above courses relevant to technical and career areas.

Seminar/Co-op/Internships/Flight Experience:

AER E 192 Aerospace Seminar R

AER E 301 Flight Experience R

Co-op and internships are optional

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also allowed by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

2. Choose from department approved list. (http://www.aere.iastate.edu/students/undergraduate_program/)

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

307
Nondestructive Evaluation (NDE)
The NDE Minor (http://catalog.iastate.edu/collegeofengineering/non_destructiveevaluationengineering/) is multidisciplinary and open to undergraduates in the College of Engineering.

BS/MS & BS/ME Degree Programs
The concurrent BS/MS & BS/ME (https://www.aere.iastate.edu/graduate-students/concurrent-degrees/) classification offers an opportunity for well-qualified Iowa State juniors and seniors to begin working on a master’s degree before completing a bachelor’s degree.

Graduate Study
The department offers graduate programs that lead to the degrees master of engineering, master of science, and doctor of philosophy with major in aerospace engineering and minor work to students taking major work in other departments. For all graduate degrees, it is possible to establish a co-major program with another graduate degree-granting department. Within the aerospace program, students can specialize in one or more of the following areas: aerospace systems design, atmospheric and space flight dynamics, computational fluid dynamics, control systems, wind engineering, fluid mechanics, optimization, structural analysis, and non-destructive evaluation.

Master of Science and Master of Engineering
The Master of Science degree requires a thesis and has strong research emphasis. The Master of Science degree is recommended for students who anticipate entering a doctoral program later. The Master of Engineering degree does not require either research credits or a thesis and is intended for students who do not anticipate pursuing a doctoral degree. The Master of Engineering degree can be completed with coursework only or with a combination of coursework and creative component. Credits for creative component will be obtained by registering for AER E 599 Creative Component. A written report and an oral presentation will be given to the student’s graduate committee.

At least 30 credits of acceptable graduate work are required for both the Master of Science and the Master of Engineering degrees. For specific course, research, and creative component requirements, see the departmental Graduate Student Handbook (http://www.aere.iastate.edu(files/2015/04/AerE-Graduate-Handbook-Revised-S15.pdf).

Bachelor of Science/Master of Science Concurrent Degree Program
The department offers concurrent BS/MS and BS/ME degree programs (http://www.aere.iastate.edu/students/concurrent-degrees/) and a concurrent BS/MBA degree program which offer an opportunity for well-qualified Iowa State juniors and seniors to begin working on a master’s degree before completing a bachelor’s degree. The concurrent degree programs reduce by one year the normal time period for completing both degrees separately.

Preparation for Graduate Work
The normal prerequisite for major graduate work in aerospace engineering is the completion of an undergraduate curriculum substantially equivalent to that required of aerospace engineering students at this university. Due to the diversity of interests of aerospace faculty, students whose prior undergraduate or graduate education has been in allied engineering and/or scientific fields may also qualify. In such cases, it may be necessary for the student to take additional work to provide the requisite aerospace background. A prospective graduate student is urged to specify the degree program and the specific field(s) of interest on the application for admission.

Courses are offered at the times stated in the course description. Where no specific time of offering is stated, the course may be offered during any semester provided there is sufficient demand.

Graduate Minor Work
Minor work for aerospace engineering majors is usually selected from mathematics, physics, electrical engineering, engineering mechanics, mechanical engineering, materials science, meteorology, computer science, and computer engineering.

Agricultural Engineering
For the undergraduate curriculum in agricultural engineering leading to the degree bachelor of science. The Agricultural Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/.

Goal: To educate students in the analysis and design of machinery, animal housing, and environmental systems for the production,
processing, storage, handling, distribution, and use of food, feed, fiber and other biomaterials, and the management of related natural resources, by integrating basic physical and biological sciences with engineering design principles.

**Student Learning Outcomes:** Graduates of the Agricultural Engineering curriculum should have, at the time of graduation:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**Program Educational Objectives:** Three to five years after graduation, our graduates will be using the knowledge, skills, and abilities from their agricultural engineering degree to improve the human condition through successful careers in a wide variety of fields. They will be effective leaders, collaborators, and innovators who address environmental, social, technical, and business challenges. They will be engaged in life-long learning and professional development through self-study, continuing education, or graduate/professional school.

Graduates find employment in diverse ag- and bio-related industries and government agencies dealing with agricultural machines and buildings, animal and environmental control, grain processing and handling, soil and water resources, food, biorenewables, and biotechnology. Their work involves engineering design, development, testing, research, manufacturing, consulting, sales, and service. Students are highly encouraged to participate in either cooperative education or internship programs.

The department also offers a bachelor of science curriculum in biological systems engineering. Additionally, the department offers bachelor of science curricula in agricultural systems technology and in industrial technology.

Well-qualified juniors and seniors in agricultural engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in agricultural engineering and a master of science degree in agricultural engineering. A concurrent bachelor of science and master of business administration program is also offered by the department. Refer to Graduate Study for more information.

**Curriculum in Agricultural Engineering**

Administered by the Department of Agricultural and Biosystems Engineering.

Leading to the degree bachelor of science.

**Total credits required:**

- 126.0 cr Land and Water Resources Engineering Option
- 128.0 cr Power and Machinery Engineering Option
- 128.0 cr Animal Production Systems Engineering Option

**Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.**

**International Perspectives:** 3 cr.

**U.S. Diversity:** 3 cr.

**Communication Proficiency/Library requirement:**

**Basic Program:** 24 cr.

A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Basic
Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section. Within the Agricultural Engineering Basic Program, students are required to complete CHEM 167 and CHEM 167L or the sequence of CHEM 177, CHEM 177L, and CHEM 178. This is a departmental requirement within the College of Engineering Basic Program requirements. CHEM 178 credits can then be applied to the Math/Science Elective within the options of Power and Machinery Engineering and Animal Production Systems Engineering of the Agricultural Engineering major requirements.

Co-op/Internships (Optional)

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.

2. Choose from department approved list. (http://www.abe.iastate.edu/undergraduate-students/agricultural-engineering/ae-curricula/)

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

TRANSFER CREDIT REQUIREMENTS

Students graduating with a degree in A E or BSE are required to have a minimum of 18 credits of 300-level and 400-level ABE courses taken at Iowa State University (excluding 490, 415, and 416), and must complete the two-semester ABE Capstone sequence (ABE 415 & 416) at Iowa State University. The Department of Agricultural & Biosystems Engineering requires a grade of C or better for any transfer credit course that is applied to the degree program.

#### Credits

The Department of Agricultural and Biosystems Engineering has concurrent Bachelor of Science /Master of Science (BS/MS) programs designed especially for departmental seniors who wish to pursue advanced studies. Concurrent BS/MS programs are: agricultural engineering (BS) with agricultural and biosystems engineering (MS) and biological systems engineering (BS) with agricultural and biosystems engineering (MS).

The concurrent BS/MS program allows seniors to:

- Become eligible for a research assistantship during their senior year
- Complete an MS degree (with thesis) within 18 months of BS graduation

For more information about our concurrent undergraduate and graduate programs in Agricultural & Biosystems Engineering, visit: https://www.abe.iastate.edu/graduate-students/abe-concurrent-degrees/.

### Graduate Study

The department offers master of science, master of engineering, and doctor of philosophy degrees with a major in agricultural and biosystems engineering. Within the agricultural and biosystems engineering major the student may specialize in advanced machinery engineering, animal production systems engineering, biological and process engineering, occupational safety engineering, or water and environmental stewardship engineering. Details on current research programs available at http://www.abe.iastate.edu/.

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 27. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology.

The department also participates in interdepartmental majors in environmental science, sustainable agriculture, human computer interaction, and toxicology (see Index).

### Biological Systems Engineering

For the undergraduate curriculum in biological systems engineering leading to the degree bachelor of science. The Biological Systems Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/.

Biological Systems Engineering integrates life sciences with engineering to solve problems related to, or using, biological systems. These biological systems may include microbes, plants, animals, humans and/or ecosystems. Biological systems engineers have a worldview shaped by an understanding of fundamental principles of engineering and life-sciences. They use their understanding of engineering to analyze organisms or ecosystems, and their knowledge of biological systems to inspire and inform their designs. They approach engineering design from a biological systems perspective, appreciating the complexity of biological systems and developing solutions that accommodate and anticipate the adaptability of biological systems.

**Goal:** To educate students to solve problems related to biorenewables production and processing, water quality, environmental impacts of the bioeconomy, food processing, and biosensors, and in so doing to prepare students for professional practice and post-graduate educational opportunities.

**Student Learning Outcomes:** Graduates of the Biological Systems Engineering curriculum should have, at the time of graduation:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must
consider the impact of engineering solutions in global, economic, environmental, and societal contexts

5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives: Three to five years after graduation, our graduates will be using the knowledge, skills, and abilities from their biological systems engineering degree to improve the human condition through successful careers in a wide variety of fields. They will be effective leaders, collaborators, and innovators who address environmental, social, technical, and business challenges. They will be engaged in life-long learning and professional development through self-study, continuing education, or graduate/professional school.

Well-qualified juniors and seniors in biological systems engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in biological systems engineering and a master of science degree in agricultural engineering. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses.

A concurrent bachelor of science and master of business administration program is also offered by the department.

The department also offers a bachelor of science curriculum in agricultural engineering. See College of Engineering. Additionally, the department offers bachelor of science curricula in agricultural systems technology and in industrial technology. See College of Agriculture and Life Sciences.

The department also participates in interdepartmental majors in environmental science, sustainable agriculture, human computer interaction, and toxicology (see Index (http://catalog.iastate.edu/azindex/)).

Curriculum in Biological Systems Engineering
Administered by the Department of Agricultural and Biosystems Engineering.

Leading to the degree bachelor of science.

| Total credits required: |  
|-------------------------|-------------------|
| 127.0 cr Bioenvironmental Engineering Option | 128.0 cr Food & Bioprocess Engineering Option |
| 128.0 cr Open Option. |  |

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Total Credits 12

Basic Program: 24 cr.
A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section. Within the Biological Systems Engineering Basic Program, students are required to complete CHEM 167 and CHEM 167L or the sequence of CHEM 177, CHEM 177L, and CHEM 178. This is a departmental requirement within the College of Engineering Basic Program requirements. The CHEM 178 course will show as completing the chemistry portion of the Basic Program and the credits will be applied towards a student's classification.

**Total Credits: 24**

### Biological, Math and Physical Science: 23 cr.

#### BIOL 212
Principles of Biology II 3

#### CHEM 167L
Laboratory in General Chemistry for Engineering 1

- or CHEM 177L Laboratory in General Chemistry I 1

Chemistry Sequence I (select from list of lecture with corresponding lab) 4

#### CHEM 231
Elementary Organic Chemistry 4

#### CHEM 231L
Laboratory in Elementary Organic Chemistry 3

#### CHEM 331
Organic Chemistry I 3

#### CHEM 331L
Laboratory in Organic Chemistry I 1

#### MATH 267
Elementary Differential Equations and Laplace Transforms 4

#### MICRO 302
Biology of Microorganisms 3

#### MICRO 302L
Microbiology Laboratory 1

#### STAT 305
Engineering Statistics (Chemistry Sequence I) 3

Chemistry Sequence II (select from list of lecture with corresponding lab) 4

#### CHEM 211
Quantitative and Environmental Analysis 4

#### CHEM 211L
Quantitative and Environmental Analysis Laboratory 3

#### CHEM 332
Organic Chemistry II 1

#### CHEM 332L
Laboratory in Organic Chemistry II 3

#### FS HN 311
Food Chemistry 3

#### FS HN 311L
Food Chemistry Laboratory 1

**Total Credits: 23**

### Biological Systems Engineering Core: 42 cr.

(A minimum GPA of 2.00 required for this set of courses, including any transfer courses; please note that transfer course grades will not be calculated into the Core GPA).

#### A B E 216
Fundamentals of Agricultural and Biosystems Engineering 3

#### A B E 218
Project Management & Design in Agricultural and Biosystems Engineering 2

#### A B E 273
CAD for Process Facilities and Land Use Planning 1

#### A B E 316
Applied Numerical Methods for Agricultural and Biosystems Engineering 3

- A B E 363
Agri-Industrial Applications of Electric Power and Electronics 4

- A B E 378
Mechanics of Fluids 3

- A B E 380
Principles of Biological Systems Engineering 3

- A B E 404
Instrumentation for Agricultural and Biosystems Engineering 3

- A B E 415
Agricultural & Biosystems Engineering Design I 2

- A B E 416
Agricultural & Biosystems Engineering Design II 2

- A B E 480
Engineering Analysis of Biological Systems 3

- C E 274
Engineering Statics 3

- E M 324
Mechanics of Materials 3

- E M 327
Mechanics of Materials Laboratory 1

- I E 305
Engineering Economic Analysis 3

- M E 231
Engineering Thermodynamics I 3

**Total Credits: 42**

### Other Remaining Courses: 11 cr.

#### A B E 110
Experiencing Agricultural and Biosystems Engineering 1

#### A B E 170
Engineering Graphics and Introductory Design 3

#### A B E 201
Preparing for Workplace Seminar 1

#### ENGL 250
Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course) 3

Communication Elective: One of the following (Must have a C or better in this course) 3

- AGEDS 311
Presentation and Sales Strategies for Agricultural Audiences 3

- ENGL 309
Proposal and Report Writing 3

- ENGL 314
Technical Communication 3

- MKT 450
Advanced Professional Selling 3

- SP CM 212
Fundamentals of Public Speaking 3

- SP CM 312
Business and Professional Speaking 3

**Total Credits: 11**

Complete remaining courses from one of the following options:

### Bioenvironmental Engineering Option: 15 cr.

#### A B E 431
Design and Evaluation of Soil and Water Conservation Systems 3

#### A B E 432
Nonpoint Source Pollution and Control 3

#### C E 326
Principles of Environmental Engineering 3

### Bioenvironmental Elective 2

#### Total Credits: 15
**Food & Bioprocess Engineering Option: 16 cr.**

- A B E 451  Food and Bioprocess Engineering  
- A B E 452X  Emerging Technologies in Biomanufacturing  
- A B E 469  Engineering for Grain Storage, Preservation, Handling, and Processing Systems  
- M E 436  Heat Transfer  
- Food Elective (select 3 cr from the following):  
  - A B E 325  Biorenewable Systems  
  - FS HN 420  Food Microbiology  
  - FS HN 471  Food Processing  
  - SCM 301  Supply Chain Management  

**Total Credits**  
16

**Open Option: 16 cr.**

- A B E 451  Food and Bioprocess Engineering  
- M E 436  Heat Transfer  
- Sequence I, II & III Elective  

**Total Credits**  
16

**Co-op/Internships (Optional)**

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.

   U.S. Diversity, International Perspectives and Social Science/ Humanities courses may not be taken Pass/Not Pass.

2. Choose from department approved list. ([http://www.abe.iastate.edu/undergraduate-students/biological-systems-engineering/bse-curricula/](http://www.abe.iastate.edu/undergraduate-students/biological-systems-engineering/bse-curricula/))

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

**TRANSFER CREDIT REQUIREMENTS**

Students graduating with a degree in A E or BSE are required to have a minimum of 18 credits of 300-level and 400-level ABE courses taken at Iowa State University (excluding 490, 415, and 416), and must complete the two-semester ABE Capstone sequence (ABE 415 & 416) at Iowa State University. The Department of Agricultural & Biosystems Engineering requires a grade of C or better for any transfer credit course that is applied to the degree program.

The Department of Agricultural and Biosystems Engineering has concurrent Bachelor of Science/Master of Science (BS/MS) programs designed especially for departmental seniors who wish to pursue advanced studies. Concurrent BS/MS programs are: agricultural engineering (BS) with agricultural and biosystems engineering (MS) and biological systems engineering (BS) with agricultural and biosystems engineering (MS).

The concurrent BS/MS program allows seniors to:

- Become eligible for a research assistantship during their senior year
- Complete an MS degree (with thesis) within 18 months of BS graduation

For more information about our concurrent undergraduate and graduate programs in Agricultural & Biosystems Engineering, visit: https://www.abe.iastate.edu/graduate-students/abe-concurrent-degrees/.

Graduate Study
The department offers master of science, master of engineering, and doctor of philosophy degrees with a major in agricultural and biosystems engineering. Within the agricultural and biosystems engineering major the student may specialize in advanced machinery engineering, animal production systems engineering, biological and process engineering, occupational safety engineering, or water and environmental stewardship engineering. Details on current research programs available at http://www.abe.iastate.edu/.

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 27. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology.

Biomedical Engineering Minor
Undergraduate Study
Minor supervised by an interdisciplinary faculty committee, administered by the Chemical and Biological Engineering Department. The Biomedical Engineering minor is a unique opportunity for engineering students to acquire a multi-disciplinary engineering and life sciences background for entering the field of biomedical engineering.

The program is open to all undergraduate engineering students at Iowa State University. This minor will provide students with a foundation of core biology and engineering relevant to further study in biomedical engineering along with an introduction to the application of engineering principles to biomedical problems from a multidisciplinary perspective as well as the applications within the majors of the participating departments.

A minimum of 17 cr. meeting the six requirements below with a minimum of 9 of those credits not being used to meet degree requirements and a minimum of 6 cr. at the 300 level or above. No more than 3 cr. of 490 credit may be applied to this minor.

Total Credits: 17-18

* A second (Introductory) engineering course from a department other than that of your major. The topic of the course should have ready application to later B M E-related electives in that discipline (C E 274; CH E 210; CPR E 281; E E 201, 314, or 442 and 448; E M 324 or 378; I E 271; MAT E 273; M E 231; or other courses approved by Minor Chair).

** 300-500 level engineering course with clear biomedical engineering application (B M E 490, B M E/E E 341, 450; B M E/CH E 440; B M E/MAT E 456; I E 447; I E 571; M E 550 or other courses approved by Minor Chair).

*** 300-500 level engineering or life sciences course with clear biomedical engineering application OR B M E 490 OR departmental 490 with biomedical engineering topic OR 200+-level life sciences laboratory course (If a 200-level course is chosen here, the student will need to meet the required 6 cr. of 300+ courses by substitution of a higher-level course for the other requirements or by taking an additional course.), OR 300-500 level B M E course.

Chemical Engineering
http://www.cbe.iastate.edu/

Administered by the Department of Chemical and Biological Engineering
For undergraduate curriculum in chemical engineering leading to the degree bachelor of science. The Chemical Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Chemical engineering is a profession, which provides a link between scientific knowledge and manufactured products. The chemical engineer
relies on science, experience, creativity, and ingenuity to produce these materials economically. Almost everything of a material nature used by society today has at some point felt the influence of the chemical engineer. From raw materials such as minerals, coal, petroleum, and agricultural products; chemical engineers create versatile intermediate and commodity chemicals, high performance fuels, new materials for construction, pharmaceuticals, high performance foodstuffs, synthetic textiles, plastics, solid state electronic components, and dozens of other engineered materials. The chemical engineer's influence has been important in the development of catalysts, fuel cells, automatic controls, biochemical processes, artificial kidneys, tissue engineering, nuclear energy, medical instruments and devices, as well as in the development of air and water pollution control systems. Many new and equally exciting challenges await the practicing chemical engineer of the future.

The profession of chemical engineering embraces a wide variety of activities including research, process development, product development, design, manufacturing supervision, technical sales, consulting, and teaching. The engineer can be behind a desk, in a laboratory, in a manufacturing plant, or engaged in nationwide and worldwide travel. Successful chemical engineers find chemistry, mathematics, and physics to be interesting and exciting. Many chemical engineers also have interest in the biological sciences. The curriculum in chemical engineering includes continued study of chemistry, biochemistry, mathematics, and physics as well as intensive study in the engineering sciences such as chemical reaction engineering, thermodynamics, mass transfer, fluid mechanics, heat transfer, system analysis and process synthesis, and design.

**Student Learning Outcomes**

Upon graduation, students should be able to:

1. identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. communicate effectively with a range of audiences
4. recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. acquire and apply new knowledge as needed, using appropriate learning strategies

The curriculum assures that graduates have a thorough grounding in chemistry, along with a working knowledge of advanced chemistry such as organic, inorganic, physical, analytical, materials chemistry, or biochemistry. In addition, a working knowledge, including safety and environmental aspects, of material and energy balances applied to chemical processes; thermodynamics of physical and chemical equilibria; heat, mass, and momentum transfer; chemical reaction engineering; continuous and stage-wise separation operations; process dynamics and control; process design; and appropriate modern experimental and computing techniques is assured.

**Program Educational Objectives**

The objectives of the Chemical Engineering Program at Iowa State University are to produce graduates who:

- will excel in careers as professional chemical engineers in the businesses and industries related to chemical engineering; and
- will successfully pursue research and advanced studies in chemical engineering, or in related fields such as chemistry or biology, or in related professional fields such as medicine, law, and business.

**Cooperative Education**

A cooperative education program is available to students in chemical engineering.

**Curriculum in Chemical Engineering**

Degree requirements leading to the degree bachelor of science.

**Total credits required: 129.0.**

**INTERNATIONAL PERSPECTIVES**

**U.S. DIVERSITY**

**COMMUNICATION PROFICIENCY/LIBRARY REQUIREMENT:**

The CBE Department requires a grade of a C or better for any transfer credit course that is applied to the degree program but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA.
**Social Sciences and Humanities: 15 cr.**
Complete a total of 15 cr. with at least 6 cr. but not more than 9 cr. from the same department.

**Basic Program: 24 cr.**
A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Basic Program for Engineering Curricula in College of Engineering section.

**Total Credits** 24

**SEMINARS/CO-OPS/INTERNSHIPS:**
Co-op/Internship is optional

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved list (http://www.cbe.iastate.edu/current-students/guides-and-handbooks/).
3. See Basic Program for Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

4. Students who substitute CHEM 201/201L credit for CHEM 177/CHEM 177L/CHEM 178L credit cannot also receive credit for CHEM 178. Credit for CHEM 178 must be earned through an Advanced Chemistry Elective\(^2\) that is taken in addition to the 3 credits of Advanced Chemistry required for all students.

Note: Transfer students with transfer credits in chemical engineering core courses must earn at least 15 semester credits in ISU courses in this category at the 300-level or above to qualify for the B.S. degree in chemical engineering.

**Pass-Not Pass Policy**

A maximum of nine Pass-Not Pass semester credits may be used to meet graduation requirements. Courses offered on a Satisfactory-Fail basis may not be taken on a Pass-Not Pass basis. Pass-Not Pass credits can be applied toward requirements for a B.S. degree in chemical engineering only if the course is specified in the curriculum as a social science and humanities elective or is a course not used in the degree program. Pass-Not Pass credits are not acceptable for technical elective courses or for courses used to satisfy the US diversity or international perspectives requirements.

---

* Choose from department approved list (http://www.cbe.iastate.edu/current-students/guides-and-handbooks/).

The Chemical and Biological Engineering Department offers well-qualified juniors and seniors in chemical engineering who are interested in graduate study the opportunity to apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science in Chemical Engineering and the Master of Engineering in Chemical Engineering.

For more information about concurrent undergraduate and graduate programs in Chemical Engineering visit: https://www.cbe.iastate.edu/prospective-students/bachelorsmasters-concurrent-degree-programs/.

### Graduate Study

The department offers work for the degrees master of science, master of engineering, and doctor of philosophy with major in chemical engineering, and minor work to students taking major work in other departments. Prerequisite to major graduate work is a bachelor’s degree in chemical engineering, chemistry, or other related field. Students with undergraduate background other than chemical engineering should contact the department for further details. A thesis is required for the
master of science degree. The master of science degree also requires a minimum of 30 graduate credits (minimum of 15 for coursework, 12 within Ch E and 3 outside). The master of engineering requirements are the same for total credits but include a special project or coursework rather than research thesis. The doctor of philosophy degree requires a minimum of 72 graduate credits (minimum of 26 for coursework, at least 16 inside Ch E). Candidates for the doctor of philosophy degree can refer to the department's home page and/or the department’s Graduate Student Handbook for degree options and credit requirements.

Civil Engineering

http://www.ccee.iastate.edu/

Administered by the Department of Civil, Construction and Environmental Engineering

For undergraduate curriculum in civil engineering leading to the degree bachelor of science. The Civil Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Civil engineers apply principles of motion and materials to plan, design, construct, maintain, and operate public and private facilities, while working under economic, social, and environmental constraints. Commonly included are transportation systems; bridges and buildings; water supply, pollution control, waste management, irrigation, and drainage systems; river and harbor improvements; dams and reservoirs. Civil engineering also includes planning, designing, and executing surveying operations and locating, delimiting, and delineating physical and cultural features on the earth's surface. Research, testing, sales, management, and related functions are also a part of civil engineering. Work on campus is supplemented by inspection trips, which furnish an opportunity for firsthand study of engineering systems in operation, as well as projects under construction.

Environmental engineering, as an emphasis in civil engineering, is concerned with protecting the public and natural health; providing an ample safe water supply; managing solid and hazardous waste; treating and disposing of domestic and industrial wastewaters and waste; resource recovery; providing adequate drainage of urban and rural areas for sanitation; and controlling water quality, soil contamination, and air pollution. The environmental emphasis for the civil engineering degree replaces some of the courses and electives in the general curriculum with further courses in chemistry, biology, and microbiology as well as specific topics in environmental engineering and design.

Student Learning Outcomes

Graduates of the civil engineering curriculum should have, at the time of graduation:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives

By three to five years after graduation, graduates of the civil engineering program will have:

1. Pursued successful careers and expertise in civil engineering or a related profession.
2. Collaborated effectively on multi-disciplinary teams to address the needs of society and the environment.
3. Pursued lifelong learning, professional development, and licensure as appropriate for their career goals.

The civil engineering curriculum equips students with a broad education that includes technical skills in analysis and design and professional practices such as communication, teamwork, leadership, and ethics.

The faculty encourages the students to develop their professional skills by participating in cooperative education, internships, or progressive summer engineering employment and study abroad programs. Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue the bachelor degree and either a master of science in Civil Engineering or a master of business administration in the College of Business Administration. These students would have the opportunity to graduate in five years with both degrees.

Curriculum in Civil Engineering (General)

Administered by the Department of Civil, Construction and Environmental Engineering.
Leading to the degree bachelor of science.

Total credits required: 129. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Department does not allow Pass/Not Pass credit courses to be used to meet graduation requirements. International Perspectives: 3 cr.

U.S. Diversity: 3 cr. 1

A concurrent bachelor of science/master of science (B.S./M.S.) degree program is available to qualified seniors at Iowa State University.

Go to: https://www.ccee.iastate.edu/prospective-graduate-students/concurrent-programs/ for more information.

**Graduate Study**

The Department of Civil, Construction and Environmental Engineering offers graduate programs for the degrees of master of engineering, master of science, and doctor of philosophy with a major in civil engineering with areas of specialization in structural engineering, environmental engineering, construction engineering and management, geotechnical engineering, civil engineering materials, transportation engineering, and intelligent infrastructure engineering. The department also offers graduate minors of 9 to 15 credits of coursework to students from other engineering departments.

Candidates for the degrees of master of engineering and master of science are required to complete a total of 30 acceptable graduate credits. The master of engineering degree involves all course work. The master of science degree requires the preparation of a thesis or creative component.

Candidates for the doctor of philosophy degree are required to complete a minimum of 72 acceptable graduate credits. Normal prerequisite for major graduate work in civil engineering is the completion of an undergraduate curriculum substantially equivalent to that required of engineering students at this university. Due to the diversity of interests within the graduate programs in civil engineering, a student may qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering. Supporting work will be required depending upon the student’s background and area of interest. The department participates in the interdepartmental graduate programs in transportation, environmental science, and wind energy science, engineering and policy.

The department also offers graduate certificates in construction management, environmental engineering, and environmental systems. The construction management certificate requires 12 graduate credits (nine credits of “core courses” and three credits of approved “elective courses”).

The environmental engineering or environmental systems certificate requires 12 graduate credits (six credits of “core courses”, six credits of approved “elective courses”) and a seminar course or an approved equivalent.

Additional information about graduate programs, research and admission criteria are available on the department’s website http://www.ccee.iastate.edu/academics/graduate/.

**Computer Engineering**

www.ece.iastate.edu (http://www.ece.iastate.edu)

Administered by the Department of Electrical and Computer Engineering

For the undergraduate curriculum in computer engineering leading to the degree Bachelor of Science. The Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

The Department of Electrical and Computer Engineering (ECpE) at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, study applications of the most recent advances in state-of-the-art technologies, and to prepare for the practice of computer engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in
undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The computer engineering curriculum offers focus areas in software systems, embedded systems, networking, information security, computer architecture, and VLSI.

Students also may take elective courses in control systems, electromagnetics, microelectronics, VLSI, power systems, and communications and signal processing.

**Student Learning Outcomes:** Graduates of the Computer Engineering curriculum should have, at the time of graduation:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

**Program Educational Objectives:** The program objectives for the computer engineering programs describe accomplishments that graduates are expected to attain within five years after graduation. Graduates will have applied their expertise to contemporary problem solving, be engaged professionally, have continued to learn and adapt, and have contributed to their organizations through leadership and teamwork. More specifically, the objectives for expertise, engagement, learning, leadership and teamwork are defined below for each program.

The objectives of the computer engineering program at Iowa State University are:

- Graduates, within five years of graduation, should demonstrate peer-recognized expertise together with the ability to articulate that expertise and use it for contemporary problem solving in the analysis, design, and evaluation of computer and software systems, including system integration and implementation.
- Graduates, within five years of graduation, should demonstrate engagement in the engineering profession, locally and globally, by contributing to the ethical, competent, and creative practice of engineering or other professional careers.
- Graduates, within five years of graduation, should demonstrate sustained learning and adapting to a constantly changing field through graduate work, professional development, and self study.
- Graduates, within five years of graduation, should demonstrate leadership and initiative to ethically advance professional and organizational goals, facilitate the achievements of others, and obtain substantive results.
- Graduates, within five years of graduation, should demonstrate a commitment to teamwork while working with others of diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the ECpE department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience. Students have the opportunity to participate in advanced research activities, and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in computer engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees.

**Curriculum in Computer Engineering**

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree Bachelor of Science.

**Total credits required: 127**

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. **Note:** Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

</tr>
</tbody>
</table>

Co-op or internship is optional.

Outcomes Assessment: Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student’s curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

### Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in computer engineering. These 30 credits must include CPR E 491 Senior Design Project I and Professionalism, CPR E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved.
by the department to meet other course requirements within the
degree program. U.S. diversity and international perspectives courses
may not be taken Pass/Not Pass, but are used to meet the general
education electives.

2. From department approved lists. (http://www.ece.iastate.edu/
academics/bachelors-degree-requirements/)

3. See Basic Program for Professional Engineering Curricula for
accepted substitutions for curriculum designated courses in the
Basic Program.

See also: A 4-year plan of study grid showing course template by
semester.

Note: International perspectives and U.S. diversity courses are used to
meet the general education electives.

Computer Engineering students have the opportunity to become a
c concurrent undergraduate/graduate student in a few programs.

**Concurrent B.S./M.ENG or M.S. in Computer Engineering**

**concurrent b.s./m.eng or m.s. in cyber security**

Computer engineering students have the opportunity to begin their
coursework towards their masters degree in computer engineering
or cyber security during their final semester(s) of undergraduate
coursework. In order to be eligible, student must have a 3.0 cumulative
GPA or higher to begin a Masters of Engineering ("M.ENG") degree or a 3.3
cumulative GPA to begin a Masters of Science ("M.S.") degree. Students
should meet with their academic advisor to discuss this option.

**concurrent b.s./mba**

Juniors and Seniors have the opportunity to continue their undergraduate
coursework while also pursuing a Master of Business Administration
(MBA) degree. For additional information please visit the concurrent
MBA website www.ivybusiness.iastate.edu/full-time-concurrent-mba
(https://www.ivybusiness.iastate.edu/full-time-concurrent-mba/).

**Graduate Study**

The department offers work for the degrees Master of Engineering,
Master of Science, and Doctor of Philosophy with a major in computer
engineering and minor work to students with other majors. Minor work
for computer engineering majors is usually selected from a wide range of
courses outside computer engineering.

The Master of Engineering degree is course-work only. It is recommended
for off-campus students.

The Master of Science degree with thesis is recommended for students
who intend to continue toward the Doctor of Philosophy degree or to
undertake a career in research and development. The non-thesis Master
of Science degree requires a creative component.
The department also offers three graduate certificate programs in embedded systems, computer networking, and software systems.

The normal prerequisite to graduate major work in computer engineering is the completion of undergraduate work substantially equivalent to that required of computer engineering students at this university. It is possible for a student to qualify for graduate study in computer engineering even though the student’s undergraduate or prior graduate training has been in a discipline other than computer engineering. Supporting work, if required, will depend on the student’s background and area of research interest. Prospective students from a discipline other than computer engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the Doctor of Philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science and Doctor of Philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an advisor in electrical and computer engineering.

The Department of Electrical and Computer Engineering also is a participating department in the interdepartmental certificate, Master of Engineering, and Master of Science in Cyber Security programs. Students interested in studying information assurance topics may earn a degree in computer engineering or in information assurance. (See catalog section on Cyber Security.)

Well-qualified juniors and seniors in computer engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both Bachelor of Science and Master of Science, or Bachelor of Science and Master of Business Administration, or Bachelor of Science and Master of Engineering degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department’s web site.

### Construction Engineering

**Administered by the Department of Civil, Construction and Environmental Engineering**

The curriculum in construction engineering, leading to a bachelor of science degree can be referenced here: [www.catalog.iastate.edu/collegeofengineering/constructionengineering/#curriculumtext](http://www.catalog.iastate.edu/collegeofengineering/constructionengineering/#curriculumtext). The Construction Engineering program is accredited by the Engineering Accreditation Commission of ABET, [http://www.abet.org](http://www.abet.org).

### Student Learning Outcomes

Graduates of the construction engineering curriculum should have, at the time of graduation:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**Program Educational Objectives:** Three to five years after graduation, our graduates will have pursued successful careers and expertise in construction engineering or a related profession. They will collaborate effectively on multi-disciplinary teams to address the needs of society and the environment. They will pursue lifelong learning, professional development, and licensure as appropriate for their career goals.

Students who successfully complete the curriculum will be prepared for entry into the field or for further study at the graduate level in construction engineering or related fields of study, such as law, business, and/or other engineering disciplines.

Construction engineers need to possess a strong fundamental knowledge of engineering design and management principles, including knowledge of business procedures, economics, and human behavior. Graduates of this curriculum may expect to engage in design of temporary structures, coordination of project design, systems design, cost estimating, planning and scheduling, company and project management, materials procurement, equipment selection, and cost control. With the emergence of integrated project delivery methods such as design-build construction, the role of the construction engineer is expanding the need for trained professionals that understand both aspects of the
project delivery environment. The curriculum offers opportunities to study emphases concerned with building, heavy, mechanical, or electrical construction. The process of construction involves the organization, administration, and coordination of labor resource requirements, temporary and permanent materials, equipment, supplies and utilities, money, technology and methods. These must be integrated in the most efficient manner possible to complete construction projects on schedule, within the budget, and according to the standards of quality and performance specified by the project owner or designer. The curriculum blends engineering, management and business sciences into a study of the processes of construction whereby designer’s plans and specifications are converted into physical structures and facilities.

The curriculum develops the ability of students to be team workers, creative thinkers, and effective communicators. This is achieved by encouraging students to:

- interact with practicing professionals
- gain work experience during summer jobs, internship, and cooperative education assignments that emphasize the knowledge required of construction engineers
- develop leadership skills by participating in student organizations
- develop, analyze, and interpret alternative solutions to open-ended problems
- study abroad

The construction industry is becoming increasingly global. Courses in humanities, social sciences, U.S. diversity, and international perspectives are included in the curriculum to broaden the student’s perspective of the work environment. In addition, the department has several exchange program opportunities for students to participate in study abroad programs.

Qualified construction engineering students within 30 credits of completing their degree may apply for concurrent enrollment in the Graduate College. See Civil Engineering (http://www.ccee.iastate.edu/academics/graduate/) Graduate Study for more information.

Curriculum in Construction Engineering

Administered by the Department of Civil, Construction and Environmental Engineering; leading to the degree bachelor of science.

Total credits required: Building Option - 128.0, Heavy Option - 127.0, Electrical - 127.0, Mechanical - 127.0 cr.

The Construction Engineering program requires a grade of a C or better for any transfer credit course that is applied to the degree program (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements for either required or elective courses.

A concurrent bachelor of science/master of science (B.S./M.S.) degree program is available to qualified seniors at Iowa State University. 

Go to https://www.ccee.iastate.edu/prospective-graduate-students/concurrent-programs/ for further information.

**Graduate Study**

An area of specialization in construction engineering and management is offered within the graduate program of the Department of Civil, Construction and Environmental Engineering. This specialization focuses on project management including and beyond the traditional iron triangle of scope, technical, and schedule to include context and financing, enabling project management of more complex projects. Three graduate degrees including, Master of Engineering (30 credits), Master of Science (30 credits), and Doctor of Philosophy (72 credits) are offered. The Master of Engineering degree is a coursework only option and the other degree programs require a research component at a level adjusted to the degree sought. All degrees are offered on-campus and some degrees may be completed off-campus through distance education. All degrees require C E 501, C E 502, C E 503, and nine credits additional credits within construction focused C E courses. Course options include but are not limited to:

<table>

</tr>
</tbody>
</table>

Undergraduate students may also qualify for the concurrent bachelor of science/master of science (BS/MS) degree program. Courses are offered for minor work to students taking major work in other curricula or in interdepartmental programs. A graduate certificate is also available which requires 12 credits of coursework. Courses required for the certificate are C E 501, C E 502, and C E 503. For additional information see Civil Engineering, Graduate Programs, https://www.ccee.iastate.edu/academics/graduate/.

**Cyber-Physical Systems Minor**

With the fourth industrial revolution upon us, physical systems are being designed to have a cyber component, that enables remote access, monitoring and control. In these systems, ubiquitous sensing, and advanced data management capability are taking us from automation to autonomy via a deep interconnection between the cyber and physical entities. Cyber-physical systems (CPS) are becoming abundant in many application sectors including manufacturing, energy, health care, transportation and agriculture. Safety-, time- and life-critical systems are relying on CPS concepts to become more efficient, robust, resilient, flexible and scalable. As CPS applications become more pervasive, the engineering education system needs to produce a next generation CPS workforce who can design, produce, and maintain these systems.

With this motivation and encouraged by the demand from the industry stakeholders of ISU College of Engineering, this CPS minor will focus on sensing, advanced information processing (data analytics and machine learning), and controls aspects of Cyber-Physical Systems. Specific CPS application sectors such as energy/power systems, manufacturing, biomedical devices, autonomous systems, transportation, and agriculture will be in focus.
Cyber-Physical Systems minor is only open to College of Engineering majors.

The minor requires 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University. The minor must include 9 credits that are not used to meet any other department, college, or university requirement.

Cyber Security Engineering

www.ece.iastate.edu (http://www.ece.iastate.edu/)

Administered by the Department of Electrical and Computer Engineering

For the undergraduate curriculum in cyber security engineering leading to the degree Bachelor of Science.

The Department of Electrical and Computer Engineering (ECpE) at Iowa State University provides undergraduate students with the opportunity to learn computer engineering fundamentals, study applications of the most recent advances in state-of-the-art technologies, and to prepare for the practice of cyber security engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

Student Learning Outcomes: Graduates of the Cyber Security Engineering curriculum should have, at the time of graduation:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives: The program objectives for the cyber security engineering program describe accomplishments that graduates are expected to attain within five years after graduation. Graduates will have applied their expertise to contemporary problem solving, be engaged professionally, have continued to learn and adapt, and have contributed to their organizations through leadership and teamwork. More specifically, the objectives for expertise, engagement, learning, leadership and teamwork are defined below for the program.

The objectives of the cyber security engineering program at Iowa State University are:

• Graduates, within five years of graduation, should demonstrate peer-recognized expertise in computer security principles together with the ability to articulate that expertise and use it for contemporary problem solving in the analysis, design, and operation of the physical, software and human components of a system, including system integration and implementation.

• Graduates, within five years of graduation, should demonstrate engagement in the engineering profession, locally and globally, by contributing to the ethical, competent, and creative practice of engineering or other professional careers.

• Graduates, within five years of graduation, should demonstrate sustained learning and adapting to a constantly changing field through graduate work, professional development, and self study.

• Graduates, within five years of graduation, should demonstrate leadership and initiative to ethically advance professional and organizational goals, facilitate the achievements of others, and obtain substantive results.

• Graduates, within five years of graduation, should demonstrate a commitment to teamwork while working with others of diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the ECpE department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience. Students have the opportunity to participate in advanced research activities, and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in cyber security engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science.
MATH 166  Calculus II 4
PHYS 231  Introduction to Classical Physics I 4
PHYS 231L  Introduction to Classical Physics I Laboratory 1

Total Credits 24

Math and Physical Science: 17 cr.
COM S 227  Object-oriented Programming 4
COM S 228  Introduction to Data Structures 3
MATH 267  Elementary Differential Equations and Laplace Transforms 4
STAT 330  Probability and Statistics for Computer Science 3
Math Elective 3

Total Credits 17

Cyber Security Engineering Core: 37 cr.
(A minimum GPA of 2.00 required for this set of courses, including any transfer courses; please note that transfer course grades will not be calculated into the Core GPA).

CYB E 230  Cyber Security Fundamentals 3
CYB E 231  Cyber Security Concepts and Tools 3
CYB E 234  Legal, Professional, and Ethical Issues in Cyber Systems 3

Total Credits 37

Other Remaining Courses: 26 cr.
CPR E 491  Senior Design Project I and Professionalism 3
CPR E 492  Senior Design Project II 2
Cyber Security/Technical Electives 3

Total Credits 26

Seminar/Co-op/Internships 4:
CPR E 166  Professional Programs Orientation R
CPR E 294  Program Discovery R
CPR E 494  Portfolio Assessment R

Transfer Credit Requirements
The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in computer engineering. These 30 credits must include CPR E 491 Senior Design Project I and Professionalism, CPR E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass, but are used to meet the general education electives.

2. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

3. From department approved lists. ([http://www.ece.iastate.edu/academics/bachelors-degree-requirements/](http://www.ece.iastate.edu/academics/bachelors-degree-requirements/))

4. Co-op / Internships are optional

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Cyber Security Engineering Minor

The cyber security engineering minor is intended for students studying computer engineering, computer science, software engineering, or management information systems with the goal of enabling them to work in cyber security. The minor consists of a series of lab based courses that are designed to provide students with both the technical background and the hands-on experiences along with the theoretical background to allow them to compete for jobs in cyber security.

Cyber Security Engineering students have the opportunity to become a concurrent undergraduate/graduate student in a few programs.

CONCURRENT B.S./M.ENG OR M.S. IN COMPUTER ENGINEERING
CONCURRENT B.S./M.ENG OR M.S. IN ELECTRICAL ENGINEERING
CONCURRENT B.S./M.ENG OR M.S. IN CYBER SECURITY

Cyber Security Engineering students have the opportunity to begin their coursework towards their masters degree in computer engineering, cyber security during, or electrical engineering their final semester(s) of undergraduate coursework. In order to be eligible, student must have a 3.0 cumulative GPA or higher to begin a Masters of Engineering ("M.ENG") degree or a 3.3 cumulative GPA to begin a Masters of Science ("M.S.") degree. Students should meet with their academic advisor to discuss this option.

CONCURRENT B.S./MBA

Juniors and Seniors have the opportunity to continue their undergraduate coursework while also pursuing a Master of Business Administration (MBA) degree. For additional information please visit the concurrent MBA website [www.ivybusiness.iastate.edu/full-time-concurrent-mba](https://www.ivybusiness.iastate.edu/full-time-concurrent-mba/).

The department offers work for the degrees Master of Science and Doctor of Philosophy with a major in cyber security and minor work to students with other majors. Minor work for cyber security majors is usually selected from a wide range of courses outside cyber security.

Master of Engineering degree is coursework only. It is recommended for off-campus students.

The degree Master of Science with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component.

The department also offers a graduate certificate program in cyber security.

The normal prerequisite to major in graduate work in cyber security is the completion of undergraduate work substantially equivalent to that required of cyber security students at this university. Because of the diversification in the cyber security graduate program, however, it is possible for a student to qualify for graduate study in certain areas of cyber security even though the student's undergraduate or prior graduate training has been in a discipline other than cyber security. Supporting work, if required, will depend on the student's background and area of research interest. Prospective students from a discipline other than cyber security are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the Doctor of Philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science and Doctor of Philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an advisor in electrical and computer engineering.

Well-qualified juniors or seniors in cyber security who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science degrees, the Bachelor of Science and Master of
Business Administration, or the Bachelor of Science and Master of Engineering degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department’s website.

**Cyber Security Minor**

The minor is intended for students studying computer engineering, computer science, software engineering, or management information systems with the goal of enabling them to work in cyber security. The minor consists of a series of lab based courses that are designed to provide students with both the technical background and the hands-on experiences along with the theoretical background to allow them to compete for jobs in cyber security.

**Objectives**

The minor in cyber security is designed to prepare students with the technical skills for entry into cybersecurity positions in industry or government agencies.

A few years after graduation, students completing the cyber security minor should be:

1. Contributing to their communities and society in the area of cyber security technology and applications and demonstrating an understanding of contemporary security issues, both technological and societal.
2. Advancing in their careers through application of their knowledge of cyber security
3. Working effectively as team members and demonstrating ethics and responsible behavior
4. Applying cyber security methods and concepts to the general area of their BS degree
5. Continuing their professional development through life-long learning

**Learning Outcomes**

After earning the minor in cyber security students will

1. Demonstrate the ability to apply knowledge of cyber security concepts, tools and technologies to computer systems.
2. Understand cyber security risks, threats and countermeasures and apply this understanding to develop cyber defense strategies.
3. Demonstrate the ability to design cyber security systems to meet organizational needs within realistic constraints such as economic, environmental, social, and ethical expectations.
4. Demonstrate the ability to function on teams.

The minor requires 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Below is the list of courses used in the minor.

1. From department approved lists.

**Electrical Engineering**

For the undergraduate curriculum in electrical engineering leading to the degree Bachelor of Science. The Electrical Engineering program is accredited by the Engineering Accreditation Commission of ABET, [http://www.abet.org](http://www.abet.org).

The Department of Electrical and Computer Engineering (ECpE) at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, study applications of the most recent advances in state-of-the-art technologies, and prepare for the practice of electrical engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The electrical engineering curriculum offers a number of emphasis areas at the undergraduate level, including control systems, electromagnetics and nondestructive evaluation, microelectronics and photonics, VLSI, electric power and energy systems, and communications and signal processing. Students are required to choose at least one course sequence that focuses on one of these areas; therefore graduates have substantial depth in specific areas to complement the breadth obtained in the required curriculum. Students also may take elective courses in computer networking, security, computer architecture, digital systems, and software.

**Student Learning Outcomes:** Graduates of the Electrical Engineering curriculum should have, at the time of graduation:
1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives: The program objectives for the electrical engineering program describe accomplishments that graduates are expected to attain within five years after graduation. Graduates will have applied their expertise to contemporary problem solving, be engaged professionally, have continued to learn and adapt, and have contributed to their organizations through leadership and teamwork. More specifically, the objectives for expertise, engagement, learning, leadership and teamwork are defined below for each program.

The objectives of the electrical engineering program at ISU are:

- Graduates, within five years of graduation, should demonstrate peer-recognized expertise together with the ability to articulate that expertise and use it for contemporary problem solving in the analysis, design, and evaluation of electrical and electronic devices and systems.
- Graduates, within five years of graduation, should demonstrate engagement in the engineering profession, locally and globally, by contributing to the ethical, competent, and creative practice of engineering or other professional careers.
- Graduates, within five years of graduation, should demonstrate sustained learning and adapting to a constantly changing field through graduate work, professional development, and self study.
- Graduates, within five years of graduation, should demonstrate leadership and initiative to ethically advance professional and organizational goals, facilitate the achievements of others, and obtain substantive results.

- Graduates, within five years of graduation, should demonstrate a commitment to teamwork while working with others of diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the ECPE department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience.

Students have the opportunity to participate in advanced research activities, and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees.

Courses for students who are not in the electrical engineering program: E E 442 Introduction to Circuits and Instruments, E E 448 Introduction to AC Circuits and Motors. Credit in these courses may not be counted toward a degree in either electrical engineering or computer engineering.

Curriculum in Electrical Engineering

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree Bachelor of Science.

Total credits required: 128. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr. 1
U.S. Diversity: 3 cr.

Communication Proficiency/Library requirement:

ENGL 314  Technical Communication (Must have a C or better in this course.)  3
or ENGL 309  Proposal and Report Writing

Complete minimum of 6 cr. from Approved General Education Component 300 level and above.  2

Complete additional 9 cr. from Approved General Education Component.  2

Total Credits  21

Basic Program: 24 cr.
A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 167  General Chemistry for Engineering Students  4
or CHEM 177  General Chemistry I

ENGL 150  Critical Thinking and Communication (Must have a C or better in this course)  3
ENGR 101  Engineering Orientation  R
E E 185  Introduction to Electrical Engineering and Problem-Solving I  3

LIB 160  Introduction to College Level Research  1
MATH 165  Calculus I  4
MATH 166  Calculus II  4
PHYS 231  Introduction to Classical Physics I  4
PHYS 231L  Introduction to Classical Physics I Laboratory  1

Total Credits  24

Math and Physical Science: 16 cr.
MATH 207  Matrices and Linear Algebra  3
MATH 265  Calculus III  4
MATH 267  Elementary Differential Equations and Laplace Transforms  4

PHYS 232  Introduction to Classical Physics II  4

Total Credits  15

Electrical Engineering Core: 41 cr.
(A minimum GPA of 2.00 required for this set of courses, including any transfer courses; please note that transfer course grades will not be calculated into the Core GPA).

CPR E 281  Digital Logic  4
CPR E 288  Embedded Systems I: Introduction  4
E E 201  Electric Circuits  4
E E 230  Electronic Circuits and Systems  4
E E 224  Signals and Systems I  4
E E 285  Problem Solving Methods and Tools for Electrical Engineering  4
E E 303  Energy Systems and Power Electronics  3
E E 311  Electromagnetic Fields and Waves  4
E E 322  Probabilistic Methods for Electrical Engineers  3
Core Elective: one of the following:  7
E E 321  Communication Systems I
E E 324  Signals and Systems II
Core Elective: one of the following:  13
E E 330  Integrated Electronics
E E 332  Semiconductor Materials and Devices

Total Credits  41

Note: E E 321 and E E 332 are 3-credit courses, whereas E E 324 and E E 330 are 4-credit courses. The core credit requirement (41 credits) assumes 7 credits taken for these options. Any core credit surplus or deficiency can be used as credits for E E technical electives.

Other Remaining Courses: 26 cr.
E E 491  Senior Design Project I and Professionalism  3
E E 492  Senior Design Project II  2
Econ Elective (ECON 101, 102 or IE 305)  3
E E/Cpr E Technical Electives including one approved sequence  2
Technical Electives  6

Total Credits  27

Seminar/Co-op/Internships:
E E 166  Professional Programs Orientation  R
E E 294  Program Discovery  R
E E 394  Program Exploration  R
E E 494  Portfolio Assessment  R
Co-op or internship is optional

Outcomes Assessment: Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student’s curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Transfer Credit Requirements
The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in electrical engineering. These 30 credits must include E E 491 Senior Design Project I and Professionalism, E E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree.
2. From department approved lists (http://www.ece.iastate.edu/academics/bachelors-degree-requirements/).

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Electrical Engineering students have the opportunity to become a concurrent undergraduate/graduate student in a few programs.

**CONCURRENT B.S./M.ENG OR M.S. IN COMPUTER ENGINEERING**
**CONCURRENT B.S./M.ENG OR M.S. IN CYBER SECURITY**
**CONCURRENT B.S./M.ENG OR M.S. IN ELECTRICAL ENGINEERING**

Electrical engineering students have the opportunity to begin their coursework towards their masters degree in computer, cyber security or electrical engineering during their final semester(s) of undergraduate coursework. In order to be eligible, student must have a 3.0 cumulative GPA or higher to begin a Masters of Engineering ("M.ENG") degree or a 3.3 cumulative GPA to begin a Masters of Science ("M.S.") degree. Students should meet with their academic advisor to discuss this option.

**CONCURRENT B.S./MBA**

Juniors and Seniors have the opportunity to continue their undergraduate coursework while also pursuing a Master of Business Administration (MBA) degree. For additional information please visit the concurrent MBA website [www.ivybusiness.iastate.edu/full-time-concurrent-mba](https://www.ivybusiness.iastate.edu/full-time-concurrent-mba/).

### Graduate Study

The department offers work for the degrees Master of Engineering, Master of Science, and Doctor of Philosophy with a major in electrical engineering and minor work to students with other majors. Minor work for electrical engineering majors is usually selected from a wide range of courses outside electrical engineering.

Master of Engineering degree is coursework only. It is recommended for off-campus students.

The degree Master of Science with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component.
The department also offers a graduate certificate program in power systems engineering.

The normal prerequisite to major in graduate work in electrical engineering is the completion of undergraduate work substantially equivalent to that required of electrical engineering students at this university. Because of the diversification in the electrical engineering graduate program, however, it is possible for a student to qualify for graduate study in certain areas of electrical engineering even though the student’s undergraduate or prior graduate training has been in a discipline other than electrical engineering. Supporting work, if required, will depend on the student’s background and area of research interest. Prospective students from a discipline other than electrical engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the Doctor of Philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science and Doctor of Philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an advisor in electrical and computer engineering.

Well-qualified juniors or seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science degrees, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department’s website.

**Energy Systems Minor**

**Energy Systems Minor**

Energy systems are pervasive in our society. A list of energy-related subjects and applications in the engineering curriculum would be nearly endless, but here are some examples:

- Mechanical engineers have a core area in thermo-fluids where courses in thermodynamics, fluid mechanics, and heat transfer form a base for energy systems.
- Electrical engineers address power transmission and distribution as well as electric motors and power systems.
- Civil engineers develop structures for wind turbines and hydroelectric dams.
- Construction engineers need to understand how building systems impact energy utilization.
- Chemical engineers develop alternative fuels and clean burning technologies.
- Material engineers develop new materials for batteries and fuel cells.
- Aerospace engineers develop wind turbines.
- Industrial engineers address manufacturing efficiency and energy reduction.
- Agricultural engineers develop biorenewable energy sources.

Energy systems are also a significant focus of the grand challenges of engineering (http://www.engineeringchallenges.org/), and this minor will help our students address these issues in their engineering careers.

The goal of the minor in energy systems is to provide ISU engineering students with focused educational opportunities in the broad area of energy systems. Successful energy systems minor students will understand broad energy perspectives, the language of energy systems, and the economic, environmental, and policy issues related to energy in the two required courses (six credits) for the minor (Econ 380 and EE 351 or ME 433). Note that credit for both EE 351 and ME 433 is no longer accepted. The remaining nine credits in the minor can be selected from a list of approved engineering courses related to energy systems to give students the opportunity to extend their knowledge.

The Energy Systems minor is administered by the mechanical engineering department and is open to all undergraduates in the College of Engineering. The minor may be earned by completing 15 credits from the following course list. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. A complete list of approved elective courses can be found below.

**Required Courses**

Approved list of electives are as follows:

A B E 325 Biorenewable Systems
A B E 342 Agricultural Tractor Power
A B E 363 Agri-Industrial Applications of Electric Power and Electronics
A B E 380 Principles of Biological Systems Engineering
A B E 413 Fluid Power Engineering
A B E 472 Controlled Environments for Animals and Plants
A B E 480 Engineering Analysis of Biological Systems
Undergraduate Study

The undergraduate courses in mechanics are intermediate between those in physics and mathematics and the professional and design courses of the several engineering curricula. In these courses the student is expected to acquire an understanding of the basic principles and analysis techniques pertaining to the static and dynamic behavior of rigid media, deformable solids, fluids, and gasses. Physical properties of engineering materials are studied in the classroom and are tested in the laboratory. General physical laws are given mathematical expression and are made suitable for use in the solution of specific problems in machine and structural design, and in the flow and measurement of fluids.

Graduate Study

The department offers graduate programs that lead to the degrees master of science, master of engineering, and doctor of philosophy with major in engineering mechanics, and minor work to students taking major work in other departments.

The master of science degree requires a thesis and has strong research emphasis. The master of science degree is recommended for students who anticipate entering a doctoral program later. The master of engineering degree does not require either research credits or a thesis. The program is intended to give students additional instruction at the graduate level to better qualify them for advanced professional engineering work. By careful selection of electives and perhaps additional courses during the senior undergraduate year, students should be able to qualify for the master of engineering degree with an additional year of full-time study after receiving their baccalaureate degree in one of the several engineering curricula.

The master of engineering degree does require a creative component which will be obtained by registering for E M 599 Creative Component.
A written report and an oral presentation will be given to the student’s graduate committee.

At least 30 credits of acceptable graduate work are required for both the master of science and the master of engineering degrees. For specific course, research, and creative component requirements, see the departmental Graduate Student Handbook (http://www.aere.iastate.edu/wp-content/blogs.dir/13/files/2011/09/Graduate-Handbook-Fall-2011.pdf).

The normal prerequisite to major graduate work is the completion of a curriculum substantially equivalent to that required of undergraduate students in engineering at this university. However, because of the diversity of interests in graduate work in engineering mechanics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering—e.g., physics or mathematics.

**Engineering Sales Minor**

With approximately 15% of engineering job postings involving product sales, marketing or customer field support, a minor in engineering sales can be a critical step towards a great job offer. Besides being one of the best paid positions in engineering, technical sales offers substantial travel opportunities and the ability to solve customers’ engineering problems in the field working with people. Talk to your advisor to see how just a few additional courses could fit into your schedule and fast-track your job prospects.

To fill this need, the Department of Industrial and Manufacturing Systems Engineering has developed a minor in sales engineering. The engineering sales minor is a 15 credit minor that complements the technical training in the student’s major discipline by providing the tools and knowledge required for technical (i.e. business-to-business) sales careers. The minor is available only to engineering students and is administered by a supervisory faculty committee. No more than 6 of the 15 credits can be used to meet any other department, college or university requirements.

**Requirements:**

- I E 450 Technical Sales for Engineers I
- I E 451 Technical Sales for Engineers II or I E 430 Entrepreneurial Product Engineering
- MKT 340 Principles of Marketing
- MKT 442 Sales Management or MKT 447 Consumer Behavior or MKT 450 Advanced Professional Selling

AND

One of the following:

- I E 305 Engineering Economic Analysis
- FIN 301 Principles of Finance

- C E 206 Engineering Economic Analysis and Professional Issues in Civil Engineering

The objectives of the minor are to provide a broad understanding of the technical sales process, primarily from the business-to-business perspective. At the conclusion of the minor, students will be able to:

- Calculate a return on investment and communicate this to the customer
- Determine payback period for a given solution and communicate this to the customer
- Perform a market segmentation
- Develop a client value analysis
- Perform prospecting and business-to-business marketing
- Identify decision makers and processes
- Manage a sales process
- Use sales automation software
- Apply knowledge of underlying international sales issues
- Prepare written and verbal sales presentations
- Provide information about product/service pricing
- Lead a team selling process
- Establish sales channel management procedures
- Develop sound distribution strategies and global sales processes
- Formulate bid strategies/negotiation strategies
- Employ good time management skills

Those students interested in pursuing this minor should contact an academic advisor in their home department and fill out a REQUEST FOR MINOR form. Evaluation of all students requesting this minor will be conducted in the Department of Industrial and Manufacturing Systems Engineering. Any questions should be directed to Ms. Devna Popejoy-Sheriff at devna@iastate.edu.

**Environmental Engineering**

http://www.ccee.iastate.edu/

*Administered by the Department of Civil, Construction and Environmental Engineering*

For undergraduate curriculum in environmental engineering leading to the degree bachelor of science.

Students in the environmental engineering bachelor’s degree program will complete a curriculum covering the engineering and science knowledge necessary to design and implement effective, affordable solutions for environmental challenges involving water, air, and land. The environmental engineering curriculum equips students with a broad education that includes technical skills in analysis and design and
professional practices such as communication, teamwork, leadership, and ethics. Graduates will have a strong foundation necessary to solve complex current and future infrastructure challenges within the diverse areas of environmental engineering.

Graduates of this program will be prepared to work in environmental engineering positions within the private and public (e.g., federal, military, state and community) sectors that deal with pollution and contamination in all aspects of the built and natural environment. Examples of this work include analyzing and designing systems for water supply and distribution, collecting and processing waste, controlling air quality, recycling residuals, and protecting public health. Students interested in a more general education in civil engineering should consider the B.S. in civil engineering with environmental emphasis.

Student Learning Outcomes: Graduates of the Environmental Engineering curriculum should have, at the time of graduation:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives: Three to five years after graduation, graduates of the environmental engineering program will have:

1. Pursued successful careers and expertise in environmental engineering or a related profession.
2. Collaborated effectively on multi-disciplinary teams to address the needs of society and the environment.
3. Pursued lifelong learning, professional development, and licensure as appropriate for their career goals.

The faculty encourages the students to develop their professional skills by participating in cooperative education, internships, or progressive summer engineering employment and study abroad programs. Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to pursue concurrently the bachelor degree and either a master of science in Civil Engineering or a master of business administration in the College of Business Administration. These students would have an opportunity to graduate in five years with both degrees.

Curriculum in Environmental Engineering

Administered by the Department of Civil, Construction and Environmental Engineering.

Leading to the degree bachelor of science.

Total credits required: 130. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.

Industrial Engineering

Administered by the Department of Industrial and Manufacturing Systems Engineering

The undergraduate curriculum in Industrial Engineering leads to the degree Bachelor of Science.

The Industrial Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Program Educational Objectives

The Industrial Engineering (IE) Program educates its future graduates to accomplish its program educational objectives (PEO’s) in their early careers.

Specifically, the IE Program prepares its majors so that, within a few years after graduation, graduates’ attainments are

1. Industrial engineering solutions that are effectively created and communicated and consider relevant stakeholders and ramifications.
2. Team goal accomplishment through productive and inclusive interactions and leadership.
3. New capabilities, skills, and knowledge that advance professional practice and enable career advancement.

Student Learning Outcomes

The IE Program currently has the following student outcomes describing what IE majors are expected to know and be able to do by the time of graduation.

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Details on Industrial Engineering program outcomes that foster the attainment of these objectives are available at appropriate sections of: www.imse.iastate.edu (http://www.imse.iastate.edu)

The Industrial Engineering undergraduate curriculum provides students with fundamental knowledge in mathematics and science, engineering science, social science, and humanities as well as professional industrial engineering course work. Management electives provide students with an opportunity to become familiar with modern business practices that they will encounter in their career. A senior capstone design course provides students with an opportunity to solve open-ended industrial problems with an industrial partner. The cooperative education program provides students with real world experience in the profession and a good perspective on career choices. Students are encouraged to participate in international experiences through exchange programs and industrial internships.

Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue both B.S. and M.S. or M.Eng. degrees in Industrial Engineering, or B.S. and M.B.A. degrees. For further information please refer to Concurrent Undergraduate and Graduate Programs tab.

Curriculum in Industrial Engineering

Administered by the Department of Industrial and Manufacturing Systems Engineering.

Leading to the degree Bachelor of Science.
Total credits required: 122 cr. See also Basic Program and Special Programs. Grades of C or better are required for any transfer credit course that is applied to the degree program but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr. 1

**Engineering Sales Minor**

The Engineering Sales Minor is multidisciplinary and open to undergraduates in the College of Engineering. The minor requires 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Total Credits: **15**

**Concurrent B.S./Master’s Industrial Engineering Degree**

If you are considering going to graduate school, the concurrent B.S. IE/Master’s program (either M.S. or M.Eng.) in industrial engineering is an excellent opportunity to obtain both degrees within 5 years. Up to 6 credits of graduate course work can be used to satisfy your program requirements for both degrees. After completing the B.S. program, you will be a full-time graduate student for the remainder of the Master’s program.

**Program Policies**

1. Up to two semesters of concurrent enrollment are allowed.
2. Students can enroll in up to nine credits of coursework at the 500-level in Industrial Engineering for both the B.S. and M.S./M.Eng. degrees. Six credits will be shared with your undergraduate degree. The remaining three credits will be applied to your M.S. or M.Eng. degree.
3. Students must take at least three credits of 500-level courses each semester during concurrent enrollment and will be paying graduate tuition and fees.
4. Students participating in the concurrent program must adhere to the requirements for the graduate degree program in which they are enrolled.

**Admission Requirements**

Students must have a record of high academic achievement and should have a GPA of at least 3.40 on a 4.00 scale. Students must be within 30 credits of completing the requirements for the B.S. degree before applying to the concurrent program. Prospective students must speak with their undergraduate advisor prior to applying.

**Concurrent B.S. in Industrial Engineering and MBA in the College of Business**

Accelerate Your Career with an MBA

Today's successful engineers often need strong business management skills to complement their degree in engineering. These skills are especially important for engineers who are interested in working for technical companies, launching their own business ventures, or pursuing nontraditional jobs such as consulting. The MBA provides an opportunity for competitive advantage for advancement into management positions.

The Colleges of Business and Engineering offer an integrated, concurrent program leading to bachelor of science and master of business administration degrees.

The best part is that this program reduces by one year the normal time for completing both degrees separately.

The program is designed to be completed in a minimum of five academic years or ten semesters.

The actual time for completion may be longer depending upon semester course loads, internships, and course sequencing. Careful planning with an academic advisor is essential throughout the program. This program is slightly accelerated through the first six semesters to complete the general education requirements. The remaining four semesters integrate the B.S. in IE requirements and the MBA courses. Twelve credits will be shared in common and will fulfill the requirements for both the B.S. in IE and the MBA.

Summer study is possible, although students are strongly encouraged to complete at least two internships or co-ops in engineering and business for practical experience during their academic program.

Preparation for the B.S. IE/MBA

Students interested in pursuing the MBA need to demonstrate exemplary academic performance throughout their undergraduate program. Mastery of communications, economic theory, global and diversity perspectives, statistical data analysis, and the core professional curriculum is of particular importance.

**The Selection Process**

The program is demanding and admission is selective. Students are expected to exhibit superior intellectual ability, strong leadership attributes, and must be highly motivated and career-focused. Although not absolute minimums, admitted students typically will have earned a cumulative GPA of 3.00 or above and have scored 600 or higher on the Graduate Management Admissions Test (GMAT). All application materials, however, are taken into account collectively in the applicant review and student selection process.

**GRADUATE STUDY**

The department offers programs for the degrees Master of Engineering (M.Eng.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.) with a major in industrial engineering. A minor is available to graduate students having a major in another department. The M.Eng. degree consists of coursework designed to improve professional expertise in industrial engineering. The M.S. and Ph.D. degrees are designed to improve the student's capability to conduct research as well as advancing their professional expertise. In conjunction with the Department of Mechanical Engineering, the department offers a certificate in advanced manufacturing.

The prerequisite to major graduate work is the completion of a curriculum similar to that required of undergraduate students in engineering at this institution. Because of the diversity of industrial engineering topics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering; e.g., mathematics or physics. However, completion of a math sequence of calculus through differential equations is expected.

The graduate program offers advanced study in advanced manufacturing, ergonomics/human factors, operations research/analytics, systems engineering and engineering management.

Well-qualified juniors and seniors in industrial engineering who are interested in graduate study may apply for concurrent enrollment to simultaneously pursue both the industrial engineering bachelor's degree and an M.Eng or M.S. degree. Another attractive concurrent degree option is the industrial engineering bachelor's degree concurrent with a Master of Business Administration degree from the business college. For additional information about graduate degree programs, admission criteria, and procedures refer to [https://www.imse.iastate.edu/graduate-program/](https://www.imse.iastate.edu/graduate-program/).
Materials Engineering

For the undergraduate curriculum in materials engineering leading to the degree bachelor of science. The Materials Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/. Materials engineering is a broadly-based discipline relating the composition, structure, and processing of materials to their properties, uses and performance. Materials engineering includes a variety of traditional and modern technologies involving metals, ceramics, polymers, composites, and electronic materials.

Because of its interdisciplinary nature, career opportunities for materials engineers bridge all industrial and government sectors including: materials based technologies (materials production), communication/ information technologies (semiconducting materials, fiber optics), medical/environmental technologies (biomedical, energy production, waste containment), nanotechnologies, consumer products (building and construction, durable goods), and transportation industries (automotive, aerospace).

Student Learning Outcomes

Graduates of the Materials Engineering curriculum should have, at the time of graduation:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives

Upon graduation, students should be able to:

- practice materials engineering in a broad range of industries including materials production, semiconductors, medical/environmental, consumer products, and transportation products
- engage in advanced study in materials and related or complementary fields

Graduates in materials engineering are able to apply scientific and engineering principles to select or design the best materials to solve engineering problems. They are also able to control the microstructure of materials through processing to optimize properties and performance. They are skilled in creative, independent problem solving under time and resource constraints. Graduates have the opportunity to gain experience in materials engineering practice through cooperative work experience or internships in industry, national laboratories, or other funded research. Graduates can develop a global perspective of engineering through various study abroad opportunities supported by the department. Classes provide hands-on skills with a broad range of modern materials processing and characterization equipment and methods.

A degree in materials engineering relies on a strong foundation of math, chemistry and physics. The core materials courses include fundamentals of materials, kinetics and thermodynamics, mechanical properties, computational methods, design, and professional practice experience. Students tailor their programs to their goals and interests through the selection of a specialization from the three available: ceramic materials, metallic materials and polymeric materials. Additional technical electives can be taken in other areas of interest. The breadth and depth of the program provide excellent preparation for both immediate entry into industry or further study in graduate school.

Curriculum in Materials Engineering

Administered by the Department of Materials Science and Engineering.

Leading to the degree bachelor of science.

Total credits required: 128 cr. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.

Areas of specialization:

- Ceramic Materials: 321, 322, 425, 433
- Metallic Materials: 341, 342, 443, 444
- Polymeric Materials: 350, 351, 453, 454

The MSE Department offers B.S./M.S. and B.S./M.Eng. concurrent enrollment programs. Students accepted into a concurrent degree program may apply up to 6 credits of major or non-major graduate credit to both the B.S. degree and the relevant graduate degree (M.S. or M. Eng.). Admission to the B.S./M.S. program requires major professor sponsorship. Assistantships are not available for B.S./M.Eng. students. See the Graduate College Handbook for more details concerning application procedures. Undergraduate students should visit with both their academic advisor and the MSE Director of Graduate Education to discuss interest in a concurrent program, learn more about blending the undergraduate and graduate curricula, and to obtain copies of the application forms.

- Eligibility – Undergraduate students who will have earned 90 credits toward the BS Mat E degree by the time of concurrent enrollment are eligible to apply for a concurrent program.
The MSE Department also offers a B.S. MAT E and MBA concurrent enrollment program in collaboration with the Ivy College of Business. For more information about this program, please visit: https://www.ivybusiness.iastate.edu/full-time-concurrent-mba/.

**Materials Science and Engineering Graduate Studies**

The Materials Science and Engineering Department offers three graduate degree programs representing a range of opportunities for advanced study. While they share several common features, the programs are designed to serve students with a variety of academic backgrounds, technical interests, and career aspirations. In all three programs, it is expected that our graduate students will acquire fundamental understanding of the structure, properties, processing, and performance of materials, underpinned by the foundational pillars of thermodynamics and kinetics and manifested by the immense landscape of engineered materials and the broad range of physical, chemical, and mechanical functionalities that may be realized in them. Our degree programs include diverse combinations of classroom instruction, seminars, laboratory training, guided teaching experiences, individually mentored independent study, and various forms of materials research experiences, all intended to serve students with a wide range of educational goals. Students are admitted with undergraduate or prior graduate qualifications in a variety of technical areas, and each program of study is tailored to meet the needs of the individual student. The accomplishments of our alumni demonstrate that our graduate training enables a wide range of career paths, but specific types of technical employment opportunities are targeted by the program components contained within each of our degree programs, as summarized below.

The **Master of Engineering** (M. Eng.) program in Materials Science and Engineering is a coursework-only degree program intended to provide broad knowledge related to materials processing, structure, properties, and performance, coupled with an understanding of the various materials challenges associated with existing and emerging technologies and industry/business sectors. The program is delivered mainly through classroom-based instruction but may also include laboratory-based courses and/or online courses. The curriculum combines a core of fundamental coursework with a highly flexible set of electives, which may include MSE courses and courses from other fields of study. This flexible coursework-only degree option is intended to provide advanced knowledge of fundamental and contemporary issues in Materials Science and Engineering relevant to a broad range of career paths.

The **Master of Science** (M.S.) program in Materials Science and Engineering is an intensive advanced degree program combining graduate coursework and project-based research. The program is intended to provide broad-based knowledge related to materials processing, structure, properties, and performance, coupled with an understanding of the various materials challenges associated with existing and emerging technologies and industry sectors. The program is delivered mainly through classroom-based instruction but may also include laboratory-based courses and/or online courses. The curriculum combines a core of fundamental coursework and a complement of MSE and non-MSE electives.

Two program options are available, and students enrolled in the MS degree program will select either the **Research Thesis** track or the **Research Portfolio** track. Both tracks include a substantial research component but with different focus.

- **The Research Thesis** track provides an opportunity for the student to complete a full-scale research project from beginning to end, including literature review, project design, planning, laboratory and/or computational investigation, data analysis, decision-making, formulation of conclusions, and appropriate reporting of outcomes. The research, culminating in a thesis document, will be conducted under the supervision of a major professor. In this track, the research efforts are aimed at making an identifiable contribution toward solving a relevant problem in a selected area of science and/or engineering. Project success is judged on the scientific soundness of the contribution and the quality with which it is presented in the Thesis document and in a final oral presentation/examination.

- **The Research Portfolio** track provides an opportunity for the student to complete several separate research projects involving multiple selected topics and methods of experimental and/or computational investigation in accord with their interests. In this track, research
is conducted through a sequence of three 3-credit project-based courses, each supervised by a specific faculty member and focused on a different area of research and related methods and analysis techniques. Each project has specific scientific objectives, but the focus of the overall portfolio is for the student to develop expertise in a targeted set of laboratory and/or computational research skills. Assessment is based on practical examinations and documented research results associated with each project. The program also requires a comprehensive presentation and oral examination covering all of the student’s project work. Each student’s overall program is overseen by a major professor.

The Doctor of Philosophy (Ph.D.) degree is the highest academic credential in the field. ISU’s robust multi-faceted program is intended to develop state-of-the-art competencies in academic scholarship, enabling graduates to make high-level career-based contributions in fields related to Materials Science and Engineering. The Ph.D. program combines graduate coursework with intensive and specialized project-based research expected to result in significant reportable scientific contributions in one or more selected areas, as evidenced by publication in peer-reviewed journals, industry standards, patents, or other forms of recognizable technical contributions.

The MSE department boasts excellent facilities for academic materials research, maintaining a wide range of faculty laboratories across the ISU campus. In addition, departmental research is highly integrated with the operation of several Research Centers, such as the Ames Laboratory, the Center for Nondestructive Evaluation, the Microelectronics Research Center, the Center for Advanced Nonferrous Structural Materials, the Caloric Materials Consortium, the Critical Materials Institute, and the Sensitive Instruments Facility. These laboratories provide excellent resources for our graduate students in advanced materials research.

**Graduate Majors**

The department offers work toward the following advanced degrees: Master of Engineering in Materials Science and Engineering, Master of Science in Materials Science and Engineering and Doctor of Philosophy in Materials Science and Engineering.

Prerequisite to major graduate work is completion of an undergraduate curriculum in physical science, biological science, or engineering discipline. Graduate students from disciplines other than materials science and engineering may expect that supplemental coursework will be needed, in addition to the required graduate coursework. Well qualified students enrolled in the undergraduate materials engineering program at Iowa State University can apply to the Graduate College for admission to the concurrent enrollment program, where students may simultaneously pursue both master of science and bachelor of science degrees.

The requirements for the M. Eng., M.S. and Ph.D. degrees are established by the student’s program of study (POS) committee within the established guidelines of the Graduate College. Minimum requirements include coursework, research (M.S. and Ph.D. only), proposal (M.S. and Ph.D. only), preliminary oral examination (Ph.D. only), dissertation (M.S. and Ph.D. only), and a final oral examination (M.S. and Ph.D. only).

Academic requirements include 30 credits for the M.Eng. degree, 33 credits for the M.S. degree (18 credits of coursework, 3 credits of professional development, 12 credits of research), and 72 credits for the Ph.D. degree (27 coursework, 6 professional development, 36 credits of research, 3 additional course or research). The MSE Department offers a graduate minor in Materials Science and Engineering. The graduate minor requires 12 credits of MSE graduate coursework, including 6 credits selected from MSE 510, 520, 530, and 540. In addition, the minor program requires that the POS committee includes at least one member of the MSE Graduate Faculty. There are no foreign language requirements for any of the graduate degrees administered by the Department of Materials Science and Engineering.

**Mechanical Engineering**

For the undergraduate curriculum in mechanical engineering leading to the degree bachelor of science. The Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/.

Mechanical engineers apply the principles of motion, energy, and force to create mechanical solutions to technological problems, thereby realizing devices and systems that make life better. About one-fifth of all engineers practicing today are mechanical engineers. Their skills are used in research, development, design, testing, production, technical sales, technical management, as well as medicine, law, and business. Mechanical engineers are characterized by personal creativity, breadth of knowledge, and versatility. For these reasons they are found to function and thrive as valuable members and leaders of multidisciplinary teams. Mechanical engineers are employed in a wide range of industries; examples include agricultural/heavy equipment, biomedical, consulting, energy and power, manufacturing, product design and transportation.

**Student Learning Outcomes:**

Graduates of the Mechanical Engineering curriculum should have, at the time of graduation:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety,
and welfare, as well as global, cultural, social, environmental, and economic factors.

3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives:
The mechanical engineering curriculum is organized to provide students with a broad foundation in mathematics, science, engineering, social science and humanities. Areas emphasized in the curriculum are design and optimization, dynamic systems and control, materials processing and mechanics, and thermo-fluid sciences. Elective courses provide additional emphasis in terms of the student’s unique educational goals, whether they include immediate entry into industry or further professional or graduate study.

The mechanical engineering curriculum at Iowa State University is dedicated to preparing students for productive careers in the state, nation, and the world and has the following objectives:

1. Graduates will have utilized a foundation in engineering and science to improve lives and livelihoods through a successful career in mechanical engineering or other fields.
2. Graduates will have become effective collaborators and innovators, leading or participating in efforts to address social, technical and business challenges.
3. Graduates will have engaged in life-long learning and professional development through self-study, continuing education or graduate and professional studies in engineering, business, law or medicine.

A major focus throughout the mechanical engineering curriculum is a series of experiences that emphasize engineering design, culminating in a capstone design experience in the senior year. Students will develop engineering judgment through open-ended problems that require establishment of reasonable engineering assumptions and realistic constraints. Development of skills needed to be independent, creative thinkers, effective communicators, and contributing team members is integrated throughout the curriculum. Students also develop an understanding of the societal context in which they will practice engineering, including environmental, legal, aesthetic, and human aspects.

Students are encouraged to participate in the cooperative education program or to obtain engineering internships, both domestically and abroad. Study abroad is encouraged, and the department has exchange programs with several universities around the world. These experiences help students to round out their education and to better prepare for careers in the increasingly global practice of engineering.

Curriculum in Mechanical Engineering
Administered by the Department of Mechanical Engineering. Leading to the degree bachelor of science.

Total credits required: 129 cr.
Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.
International Perspectives: 3 cr.
U.S. Diversity: 3 cr.
Communication Proficiency/Library requirement:

<table>

**Co-op/Internships (Optional)**

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.

2. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

3. Choose from department approved list of technical electives (http://www.me.iastate.edu/students/degrees-and-programs/bs-degree/degree-requirements/tech-electives/) and general education electives (http://www.me.iastate.edu/students/degrees-and-programs/bs-degree/degree-requirements/general-education/). Note: electives used to meet graduation requirements may not be taken Pass-Not Pass (P-NP).

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
**Transfer Credit Requirements**

The Mechanical Engineering Department requires a grade of a C or better for any transfer credit course that is applied to the degree program. The degree program must include a minimum of 15 credits taken from courses offered through the Mechanical Engineering Department at Iowa State University. Of these 15 credits, 3 must be from one of the senior capstone design courses. The remaining 12 credits may be from the core curriculum program (if a student is deficient in these courses) or from 400-level M E technical electives. No more than 3 credits of independent study shall be applied to meet the 12 credit requirement.

See also: A 4-year plan of study grid showing course template by semester.

**Energy Systems Minor**

The Energy Systems minor is administered by the mechanical engineering department and is open to all undergraduates in the College of Engineering. The minor may be earned by completing 15 credits from the following courses. The complete list of approved elective courses can be found below. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

http://www.me.iastate.edu/energy-systems-minor/

**Required courses**

- ECON 380  Energy, Environmental, and Resource Economics 3
- E E 351  Analysis of Energy Systems 3
- or M E 433  Alternative Energy

**Electives:** Choose from a list of approved courses 9

**Total Credits** 15

**Approved Elective Courses**

- A B E 325  Biorenewable Systems 3
- A B E 342  Agricultural Tractor Power 3
- A B E 363  Agri-Industrial Applications of Electric Power and Electronics 4
- A B E 380  Principles of Biological Systems Engineering 3
- A B E 413  Fluid Power Engineering 3
- A B E 472  Controlled Environments for Animals and Plants 3
- A B E 480  Engineering Analysis of Biological Systems 3
- A B E 572  Controlled Environments for Animals and Plants 3
- A B E 580  Engineering Analysis of Biological Systems 3
- AER E 381  Introduction to Wind Energy 3
- AER E 481  Advanced Wind Energy: Technology and Design 3
- AER E 570  Wind Engineering 3
- CH E 356  Transport Phenomena I 3
- CH E 357  Transport Phenomena II 3
- CH E 358  Separations 3
- CH E 381  Chemical Engineering Thermodynamics 3
### Concurrent mechanical engineering BS/MS degree

The Department of Mechanical Engineering (ME) provides BS/MS concurrent degrees that allow well-qualified students to be admitted to the graduate program while still working on their undergraduate degrees during their senior year. Concurrent degrees allow well-qualified students to begin their graduate studies before completing their undergraduate degree to complete their graduate degree on an accelerated timeline. Students in concurrent status must be making good progress toward a bachelor's degree. The minimum requirements for admission to concurrent-student status are the same as those required for admission to the Graduate College. Other aspects of concurrent status include:

- Official enrollment and fee payment will be as a graduate student.
- The graduate credential will be awarded at the same time or after the undergraduate degree is conferred.
- Students may be appointed to graduate research assistantships.
- With the approval of a student's Program of Study (POS) Committee, up to 6 ISU credits taken while in concurrent status may be applied to a bachelor's degree and a graduate degree.

Details on the Masters degree requirements and graduate admission in mechanical engineering may be found at: [https://www.me.iastate.edu/graduate-admissions/](https://www.me.iastate.edu/graduate-admissions/)

Details on the graduate college policies on concurrent degrees may be found at: [https://www.grad-college.iastate.edu/handbook/chapter.php?id=4#4.3](https://www.grad-college.iastate.edu/handbook/chapter.php?id=4#4.3)

---

</table>
a major in mechanical engineering. The M.Eng. degree is a coursework-only degree designed to improve professional expertise in mechanical engineering. The M.S. and Ph.D. degrees are designed to improve the student’s capability to conduct research as well as their professional expertise. Although co-major and formal minor programs are not offered in mechanical engineering, courses may be used for minor work by students taking major work in other departments.

Well-qualified juniors and seniors in mechanical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science, the Bachelor of Science and Master of Business Administration. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Graduate Programs Office and on the department’s website (http://www.me.iastate.edu/).

The graduate program offers advanced study in a variety of thrust areas, including biological and nanoscale sciences, clean energy technologies, complex fluid systems, design and manufacturing innovation, and simulation and visualization.

The department offers students the opportunity to broaden their education by participating in minor programs in established departments, interdepartmental programs, or other experiences as approved by their program of study committees.

The requirements for advanced degrees are established by the student’s program of study committee within established guidelines of the Graduate College. Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduate students in the department can expect that additional supporting coursework will be required.

Program requirements can be found on the department webpage (http://www.me.iastate.edu/) and in the Mechanical Engineering Graduate Student Handbook.

Non-destructive Evaluation Minor

Minor supervised by an interdisciplinary faculty committee, administered by Aerospace Engineering. The NDE minor is a unique opportunity for engineering students to acquire a multidisciplinary engineering qualification in the rapidly evolving field of Nondestructive Evaluation.

Undergraduate Study

Students interested in completing the NDE engineering minor must be enrolled in the College of Engineering at Iowa State University. They must submit the “Request for Minor” form and complete the minimum prescribed 16 credit-hours of course work defined below. Acceptance is based on approval by the administering department, Aerospace Engineering.

A combined average grade of C or higher is required in courses applied to the minor. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

The course requirements for the undergraduate minor in NDE are:

Software Engineering

Administered by the College of Engineering and the College of Liberal Arts and Sciences.

For the undergraduate curriculum in Software Engineering (http://www.se.iastate.edu) leading to the degree Bachelor of Science. The Software Engineering Program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

A software engineer uses their expertise to design, develop, and evaluate software, configure and install computer systems, and build and maintain software systems throughout their lifecycle. Specific tasks software engineers perform evolve quickly, reflecting changes in technology, as well as the needs of employers. Software engineers work as members of teams that may include experts in engineering, marketing, manufacturing, accounting, training, and design.

The Software Engineering Program provides undergraduate students with the opportunity to learn Software Engineering fundamentals, to study applications of state-of-the-art software technologies, and to prepare for the practice of Software Engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research, and outreach programs.

Student learning outcomes

Graduates of the Software Engineering curriculum should have, at the time of graduation:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PROGRAM EDUCATIONAL Objectives

Within five years of graduation, the graduates should:

1. attain a productive career in Software Engineering or related fields;
2. attain leadership roles and become effective collaborators to advance professional and organizational goals;
3. engage in lifelong learning and professional development;
4. encourage and support diversity and inclusiveness in their workplace.

We expect that these objectives will be manifested in our graduates through the following five key attributes: (a) peer-recognized expertise, (b) engagement in professional practice, (c) sustained learning, (d) leadership and (e) teamwork.

Demonstration of expertise involves applying state-of-the-art practices for solving problems in the design, development, validation, evolution and sustainment of (software) products. Demonstration of professional engagement involves contributing locally and globally to the use of ethical, competent, and creative practices in industry, academia or the public sector. Demonstration of sustained learning involves the ability to adapt to rapid technological, environmental, and organizational changes through self-study and group study and through opportunities of professional development or graduate study. Demonstration of leadership involves the ability to take initiative, and to facilitate the advancements of individuals and the community by influencing others and by having a widespread, positive impact on critical issues and projects. Finally, demonstration of teamwork involves the ability to work with collaborators who have varied expertise, and with diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the College of Engineering and the College of Liberal Arts and Sciences provide opportunities for each student to have experience with broadening activities. Students have the opportunity to gain practical industry experience in the cooperative education and internship program. Students have the opportunity to participate in advanced research activities. Through
international exchange programs, students learn about engineering practices in other parts of the world.

**Curriculum in Software Engineering**

Degree requirements leading to the degree Bachelor of Science in Software Engineering.

**Total credits required:** 125 cr. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Engineering Basic Program GPA, or Software Engineering Core GPA). See also Engineering Basic Program and Special Programs. Note: Pass/Not Pass credits cannot be used to meet graduation requirements.

**International Perspectives:** 3 cr. 
**U.S. Diversity:** 3 cr.

**Communication Proficiency/Library requirement:**

Optional Co-op/Internships
Co-op (S E 398) or internship (S E 396) is optional.

Transfer Credit Requirements
The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a Bachelor of Science in Software Engineering. These 30 credits must include S E 491 Senior Design Project I and Professionalism and S E 492 Senior Design Project II. The Software Engineering degree program requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S Diversity and International Perspectives courses may not be taken Pass/Not Pass.

2. Choose from approved lists (http://www.se.iastate.edu/academics/).
Total credits required - 125 credits. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU Cumulative GPA, Engineering Basic Program GPA, or Software Engineering Core GPA). See also Basic Program and Special Programs.

Engineering Basic Program - A minimum GPA of 2.00 is required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Engineering Basic Program GPA)

Must receive a C or better grade in required English classes.

Must receive a C- or better grade in MATH 165, MATH 166, COM S 227, and COM S 228.

General Educational Elective courses to be selected in consultation with Software Engineering Academic Advisors from a list of approved courses. They must include courses that satisfy university and college general education requirements. These courses include courses or categories of courses such as International Perspectives and U.S. Diversity, World Language, Arts and Humanities, and Social Sciences. Pass/Not Pass credit is not accepted.

Software Engineering Electives and Supplemental Electives must be selected from the program-approved list (http://www.se.iastate.edu/academics/).

1 Software Engineering Core (A minimum GPA of 2.00 is required for this set of courses, including any transfer courses but transfer course grades will not be calculated into the Software Engineering Core GPA)

2 Students who take the 4-credit lab courses CPR E 288, CPR E 308, and CPR E 381 instead of the corresponding 3-credit alternatives can apply the additional credits toward Supplemental Electives. The total number of credits required in the Software Engineering Program remains the same for all students.

The Software Engineering Program has established concurrent undergraduate and graduate programs with the Department of Computer Science, the Department of Electrical and Computer Engineering, and the Ivy College of Business. Please visit https://se.iastate.edu/academics/ for details.

**Systems Engineering**

**Systems Engineering Master’s Degree**

Administered by the Department of Industrial and Manufacturing Systems Engineering

---

The Systems Engineering Program focuses on developing an individual’s analytical skills to design, evaluate, and build modern complex engineered systems. Engineers who can conceptualize, model, and integrate hardware, software, data, and humans are critical in technology driven multi-disciplinary design teams. The Iowa State University Master of Engineering in Systems Engineering Program is designed to train engineers to excel in the technology driven design environment commonly found in developing modern complex engineered systems. The program can be completed on line or in residence, part-time or full-time.

**Admission Requirements**

To be considered for admission, the applicant should have a bachelor’s degree in engineering or related field from a college, university, or technical school of recognized standing. Non-engineering backgrounds will be considered on a case-by-case basis. High academic achievement or other persuasive evidence of professional accomplishments is expected for admission to the program. The GRE is not required.

Applicants for admission to this program apply through the ISU Graduate College. Each applicant must submit:

- Application and application fee
- Official academic transcripts
- Three letters of recommendation
- Resume

Applications should be submitted as early as possible before the beginning of the semester for which admission is sought. Individuals may also take up to nine credits at Iowa State as a non-degree seeking student and then transfer them to the program when they are admitted. (https://www.elo.iastate.edu/admission-and-enrollment/)

The Master of Engineering in Systems Engineering Program at Iowa State University is focused on supporting working professionals so teaching or research assistantships typically are not available.

Other focus areas in related disciplines, such as systems engineering, human factors, supply chain management, or manufacturing, may be substituted for supporting courses. A program of study is developed by the student and academic advisor to fit individual needs.

Students working in research and development who are interested in furthering their research skills may select a creative component option as part of their supporting courses.
COLLEGE OF HUMAN SCIENCES

Laura Jolly, Dean, Dean’s Chair
Jennifer Margrett, Associate Dean Research and Graduate Education
Robert D. Reason, Associate Dean Undergraduate Academic Affairs
Debra Sellers, Associate Dean and Director of Human Sciences Extension and Outreach

www.hs.iastate.edu/ (http://www.hs.iastate.edu/)

The College of Human Sciences (CHS) provides an integrative approach to improving the quality of life for individuals, families, schools and communities by linking discovery, science, creativity, and practice; applying the knowledge of learning in all endeavors; and developing leaders for roles in research, education, business and industry, and health and human services.

The College of Human Sciences, founded in 2005, fosters innovative synergies in teaching and learning in addition to the discovery of new knowledge. Members of the college work to enhance human potential in many ways, and strive to improve the quality of people’s lives - helping them learn better, live longer, and lead lives that are more productive and fulfilling.

Departments/School
- Apparel, Events, and Hospitality Management (http://www.aeshm.hs.iastate.edu/)
- Food Science and Human Nutrition (http://www.fshn.hs.iastate.edu/)
- Human Development and Family Studies (http://www.hdfs.hs.iastate.edu/)
- Kinesiology (http://www.kin.hs.iastate.edu/)
- School of Education (http://www.education.iastate.edu/)

Recommended High School Preparation
Recommended preparation for students entering most departments in the College of Human Sciences should include 4 years of English (including speech) with emphasis in composition and communication skills; 3 years each of mathematics and natural sciences, and at least 2 years of social sciences and/or humanities. In addition, students interested in Elementary Education are advised to complete two or more years of high school study in one foreign language.

Information for Prospective Students
Each student in the College of Human Sciences works closely with an academic advisor who is associated with the program in which the student is majoring. Advisors assist students in developing academic programs and in adjusting to university life. They also provide information and guidance about career choices. Advisors attempt to assist students as they develop their schedule of classes to meet their goals, interests, and capabilities.

The college offers a number of orientation sessions during the summer for students planning to enter in the fall. Students who enter in spring or summer terms are also offered orientation sessions which are held prior to the beginning of the student’s first term. Incoming students are encouraged to attend an orientation session so that academic assessments can be made and appropriate classes may be scheduled for the following term.

Undecided Students
The College of Human Sciences offers an academic support program for students who are considering several majors in CHS. This program is administered to undecided Human Sciences students through the MINDS Learning Community. Students in the MINDS Learning Community take coursework together, including an orientation and career exploration course which is taught by college advisors. This course provides opportunities for students to evaluate their interests, skills, and strengths while also receiving additional support through a peer mentor program. All undecided majors in the College of Human Sciences are required to participate in MINDS Learning Community and will sign up for the program during orientation. For more information, visit the MINDS webpage: https://hs.iastate.edu/learning-community/minds/. (https://hs.iastate.edu/learning-community/minds/)

Planned Transfer Programs
By planning carefully, students may begin their education at another college and then transfer their courses to a curriculum within the College of Human Sciences with maximum efficiency in meeting the degree requirements. The college works closely with community colleges in Iowa and surrounding states to facilitate a transfer to Iowa State University. For more information, call 1-800-522-0683 or visit the College of Human Sciences Recruitment Office.

Accreditation and Licensure
The following program-specific accreditation/ licensure/registrations have been attained by departments or School of Education within the college:

Department of Apparel, Events, and Hospitality Management:
- Apparel, Merchandising, and Design major is endorsed by the American Apparel and Footwear Association’s Education Foundation. The Design primary option is accredited by the National Association of Schools in Art and Design.
- Hospitality Management is accredited by the Accreditation Commission for Programs in Hospitality Administration.
Department of Food Science and Human Nutrition:
The Food Science degree, including Industry and Technology options are approved by the Institute of Food Technologists.

The Didactic Program in Dietetics and Dietetics Internship are accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics.

The Baccalaureate Degree in Nursing at Iowa State University is pursuing initial accreditation by the Commission on Collegiate Nursing Education (CCNE), One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791. Applying for accreditation does not guarantee that accreditation will be granted. The program has interim approval from the Iowa Board of Nursing.

Department of Human Development and Family Studies:
The Child Development Laboratory School is accredited by the National Association for the Education of Young Children (NAEYC), Academy for Early Childhood Programs, is licensed by the Iowa Department of Human Services, and maintains a 5 Star Rating from the Iowa Quality Rating System.

The Early Childhood Education Program (administered in collaboration with the School of Education) and the Family and Consumer Sciences Education Teacher Licensure Program are accredited by the Iowa Department of Education and students may be recommended for licensure to the Iowa Board of Educational Examiners.

Financial Counseling and Planning (FCP) is a registered education program with the Certified Financial Planner Board of Standards and the Association for Financial Counseling and Planning Education. With these registrations FCP students are eligible to sit for the Certified Financial Planner ™ and Accredited Financial Counselor® examinations.

Department of Kinesiology:
The Athletic Training program is accredited by the Commission on Accreditation of Athletic Training Education.

The Physical Education Educator Preparation Program is recommended for approval by the Iowa Department of Education and approved by the State of Iowa Board of Education.

School of Education - Educator Preparation
All Iowa State University Educator Preparation Programs are recommended for approval by the Iowa Department of Education and approved by the State of Iowa Board of Education.

Each student will be enrolled in the School or Department in which he or she plans to major and must meet the graduation requirements of that department and the college in which it is located.

All candidates must meet the program completion requirements of the Iowa State University Educator Preparation Program in order to be recommended for teacher or educational leadership licensure by Iowa State University.

For details about Teacher Education programs, requirements, and endorsement areas, see Teacher Education. (https://education.iastate.edu/current-students/educator-preparation-program/)

For details about Educational Leadership programs and requirements, see Educational Leadership (https://education.iastate.edu/graduate-students/graduate-programs/division-of-teaching-learning-leadership-and-policy/)

Undergraduate Core Curriculum
Purpose
The College of Human Sciences has established core learning outcomes to provide the unifying foundation critical to personal and professional success for all College of Human Sciences undergraduate students. Assessment of College of Human Sciences’ core learning outcomes will measure student competence in four (4) areas. Assessment results will be used by CHS faculty and staff to enhance student learning experiences.

Four components
The core identifies the expected minimum outcomes that each undergraduate in the college must meet:

Communication - Communicate with clear purpose, workable organization and effective style in written, oral, visual and electronic (WOVE) formats without distracting errors in usage or convention.

Self-Assessment/Self Reflection - Consistently and realistically analyze and evaluate one's own knowledge, abilities and actions in comparison to professional standards and create action plans to enhance personal and professional efficacy.

Critical Thinking - Generate, acquire and evaluate information based on scientific evidence, creative processes, and logical and ethical reasoning to make decisions and solve problems in one's personal, professional and community endeavors.

Social Justice - Articulate and demonstrate a clear concept of a just society in which individuals and groups equitably share in societal benefits within a global community.
Expectations for Departments/School of Education/Programs

Departments/schools/programs formally participate in outcomes assessment. Programs identify courses at three levels (introductory, intermediate, and advanced) where at least one significant educational activity is identified and assessed. Increased achievement and level of mastery at advanced levels is discussed and incorporated through continuous improvement efforts.

General Education

Students in the College of Human Sciences are required to complete a program in general education which is integrated in their professional training and extends through the undergraduate curriculum.

The general education program emphasizes intellectual growth and personal development as contrasted with specific career preparation.

The program aims to stimulate a desire for learning and intellectual endeavor, develop understanding and appreciation for the physical and cultural world, encourage independent thinking and analysis, increase competence in all aspects of communication, and create an understanding of individuals as social, psychological, and physical beings.

The student is expected to complete studies in three groups in general education. Areas represented below are not departmental titles. In some cases, courses relating to a given area may be found in several different departments. Credits listed are minimum requirements.

Minimum Group Requirements in the College of Human Sciences

I. Communication Skills (10 cr.): ENGL 150, ENGL 250; LIB 160; and 3 credits in oral communication

II. Biological and physical sciences and mathematical disciplines (9 cr.): at least 3 credits in mathematical disciplines

III. Social sciences and humanities (15 cr.): at least 6 credits in social sciences and at least 6 credits in humanities

Double Majors

Undergraduate students may elect a second major from the departments or school and program areas listed above, or from a major field offered for the bachelor’s degree in another college of the university. Double majors may be prohibited between majors as determined by the appropriate curriculum committees.

The major departments must approve the degree program, and if those majors involve two colleges, both deans must approve. Such programs must fulfill the general education requirements of the college of the primary major. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department of the primary major. If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In this case, the student must satisfy the requirements of each major and of the degree that is chosen for the primary major.

Students with a primary major in another college who wish to take a second major in the College of Human Sciences are required to meet all requirements for the major, prerequisites and supporting courses.

Two Bachelor’s Degrees

Any degree offered by the College of Human Sciences may be earned together with a degree in this or any other college of the university. For the requirements for two degrees, see Index (http://catalog.iastate.edu/azindex/), Bachelor’s Degree, Two.

International Programs

The College of Human Sciences encourages students to participate in international programs that will help them to become life-long learners of other cultures and perspectives, to enhance their global citizenship, and to expand their opportunities for employment after graduation. The College offers short-term faculty-led study abroad programs, semester-long programs, international student teaching placements, and dietetic internship rotations.

International opportunities change each year, and students should visit http://intl.hs.iastate.edu to review the list of available programs and to explore which offerings are designed for specific majors. The College offers several study abroad scholarships and last year over $73,000 was awarded to support student participation in our international programs.

Faculty members also bring diversity and global perspectives to instruction through research and collaborations with scholars and institutions abroad, and the College employs faculty members from many different countries.

Honors Program

High achieving students, with a grade point average of above 3.50, are invited to apply to the Honors Program. Honors students are encouraged to develop a creative program of study expanding their interests while meeting individual educational objectives. Students in the Honors Program also participate in University Honors Seminars, Honors Courses and collaborate with a faculty member to complete an honors project. For further information, contact the College Honors Committee or academic advisor. See https://hs.iastate.edu/current-students/academics/honors-program/ or look in the Index (http://catalog.iastate.edu/azindex/), under Honors Program.

Human Sciences Extension and Outreach

Students may prepare for a career in the Cooperative Extension System by enrolling in a curriculum in the College of Human Sciences that
provides them with a subject matter base for conducting educational programs for families. Advice on choice of courses should be sought from the Family and Consumer Sciences Education and Studies program, the Associate Dean and Director of Iowa State University Human Sciences Extension and Outreach, and/or the Iowa State University Extension and Outreach 4-H Youth Development Program Leader.

**Undergraduate Majors**

**For more information about a major, see:**

1. The curriculum descriptions in this section of the catalog
2. The department catalog section under Courses and Programs
3. Department websites.

**Apparel, Events, and Hospitality Management**

**Apparel, Merchandising, and Design**

Options: Merchandising; Creative and Technical Design; and Product Development. See Curriculum in Apparel, Merchandising, and Design

**Event Management**

See Curriculum in Event Management

**Hospitality Management**

See Curriculum in Hospitality Management

**Food Science and Human Nutrition**

**Culinary Food Science**

See Curriculum in Culinary Food Science

**Diet and Exercise B.S./M.S.**

Jointly administered with the Department of Kinesiology. See Curriculum in Diet and Exercise

**Dietetics**

See Curriculum in Dietetics

**Food Science**

Options: Food Science and Industry; Food Science and Technology. See Curriculum in Food Science

**Nursing**

See Curriculum in Nursing

**Nutritional Science**

Options: Pre-Health Professional and Research; Family Health; Food Service; Global Health and Policy; Health Coach; and Nutrition and Wellness. See Curriculum in Nutritional Science

**Human Development and Family Studies**

**Human Development and Family Studies**

Options: Child Programs; Youth Programs; and Adult/Family Programs. See Human Development and Family Studies

**Early Childhood Education - Unified**

Administered jointly by the School of Education and the Department of Human Development and Family Studies. See Curriculum in Early Childhood Education - Unified

**Family and Consumer Sciences Education and Studies**

Options: Communications; Professional Studies; Teacher Licensure. See Curriculum in Family and Consumer Sciences Education and Studies

**Financial Counseling and Planning**

See Curriculum in Financial Counseling and Planning

**Affiliated Program: Early Childcare Education and Programming**

Offered by the Great Plains Interactive Distance Education Alliance (GPIDEA). See Curriculum in Early Childcare Education and Programming

**Kinesiology**

**Athletic Training**

See Curriculum in Athletic Training

**Diet and Exercise B.S./M.S.**

Jointly administered with the Department of Food Science and Human Nutrition. See Curriculum in Diet and Exercise

**Kinesiology & Health**

Options: Community and Public Health; Exercise Science; Physical Activity and Health Promotion; Physical Education Teacher Education; and Pre-Health Professions. See Curriculum in Kinesiology & Health

**School of Education**

**Early Childhood Education - Unified**

Administered jointly by the School of Education and the Department of Human Development and Family Studies. See Curriculum in Early Childhood Education - Unified

**Elementary Education**

Administered by the School of Education. See Curriculum in Elementary Education

**K-12/Secondary Education**
The Secondary Education program has three routes, an undergraduate route, a post bachelor route, and a graduate route.

- **Undergraduate Secondary Education**
  
  Offered in conjunction with subject matter areas, or majors, offered by various departments across the university campus. These subject matter areas include agriculture, biology, chemistry, earth sciences, English, family and consumer sciences, health, history-social sciences, mathematics, music, physics, physical education, and world languages. See Teacher Education

- **Post-Bachelor Secondary Education**
  
  Coordinated by departments/programs across the university campus. These subject matter areas include agriculture, biology, chemistry, earth sciences, English, family and consumer sciences, health, history-social sciences, mathematics, music, physics, physical education, and world languages. See Teacher Education

- **Graduate Secondary Education in the School of Education**
  
  Masters of Arts in Teaching in Science Education and Masters of Education in Mathematics Education are coordinated by the School of Education. Other education programs, such as agriculture education, family consumer sciences education, and physical education teacher education, offer masters programs to pursue program completion through their own departments.

### International Studies (secondary major only)

The International Studies Program is an interdisciplinary program which may be taken only as a second major. Students pursuing a second major in international studies must complete the International Studies Program as described in this catalog (see International Studies).

### Undergraduate Minors

Minors are available to all Iowa State students. Minors consist of at least 15 credits including 6 credits taken at Iowa State University in courses numbered 300 or above. A student may not apply the same course to two different minors. The minor must include 9 credits that are not used to meet any other department, college or university requirement. Minors are available in the following areas:

- Apparel, Merchandising, and Design
- Human Development and Family Studies
- Culinary Food Science
- Dance

### Educational Services in Family and Consumer Sciences

- Event Management
- Exercise Science
- Financial Counseling and Planning
- Food and Society
- Food Safety (interdepartmental minor)
- Food Science
- Gerontology (interdisciplinary minor)
- Global Human Sciences
- Health Promotion
- Hospitality Management
- Learning and Leadership Sciences
- Learning Technologies
- Kinesiology
- Nutrition

### Graduate Programs

The College of Human Sciences offers a variety of programs leading to a Master's degree, a Ph.D., or a graduate certificate. Each unit offers a variety of program options, as well as opportunities for interdisciplinary study in the areas of gerontology, toxicology, nutritional studies, and genetics. Multiple opportunities for on-campus and distance education programs are available.

### Preparation for Graduate Study

Students considering graduate studies should gain background knowledge in basic subjects related to their area of interest. Undergraduate mathematics, statistics, and research methods courses are useful as preparation for advanced study in graduate school. Upon completion of graduate programs, students are qualified for leadership positions in business; government agencies; and public and private agencies and institutions; as well as for teaching, research, and extension positions in colleges and universities.

### Information for Prospective Students

Graduate study in the College of Human Sciences is conducted through collaboration with the Graduate College, and application is completed through the Graduate College. Details regarding the application process and general information about graduate studies at ISU are found in the Graduate College section of this catalog, (http://www.grad-
Each graduate student in the College of Human Sciences works closely with an academic advisor and a Program of Study (POSC) committee. The POSC assists students in developing academic programs tailored to meet individual needs, guide research and/or internship activities, and provide information and guidance about career choices. Graduate assistantship support is available for many students and involves them in research, teaching, and administrative experiences. Incoming students are encouraged to work with departmental advisors to develop appropriate class and assistantship activities.

**Graduate Curricula**

Information about curricula and degree options for each College of Human Sciences unit is available on the unit websites below.

- Apparel, Events, and Hospitality Management – [http://www.aeshm.hs.iastate.edu/graduate-programs/](http://www.aeshm.hs.iastate.edu/graduate-programs/)
- Food Science & Human Nutrition – [http://www.fshn.hs.iastate.edu/graduate-program/](http://www.fshn.hs.iastate.edu/graduate-program/)
- Human Development & Family Studies – [https://www.hdfs.hs.iastate.edu/graduate-programs/](https://www.hdfs.hs.iastate.edu/graduate-programs/)
- Kinesiology – [https://www.kin.hs.iastate.edu/graduate-programs/kinesiology/](https://www.kin.hs.iastate.edu/graduate-programs/kinesiology/)
- School of Education - [https://education.iastate.edu/graduate-students/graduate-programs/](https://education.iastate.edu/graduate-students/graduate-programs/)

**Distance Education Opportunities**

The College of Human Sciences offers several online courses and programs. Degrees include PhD, Master’s, Undergraduate, and Certificates. Many courses incorporate a blended or hybrid approach, where online students interact with students on campus in real time using webinar services. Some degree programs are provided with a combination of online and condensed schedules that require limited time on campus. Details about these offerings are found on the website at [https://hs.iastate.edu/graduate-students/academics-graduate/online-programs-graduate/](https://hs.iastate.edu/graduate-students/academics-graduate/online-programs-graduate/).

Of these programs, six Certificates, one Undergraduate, and four Masters programs are offered through collaboration with the Great Plains Interactive Distance Education Alliance (GP-IDEA; [http://www.gpidea.org/](http://www.gpidea.org/)). These online programs allow students to earn a graduate degree from ISU while taking courses and interacting with students from a number of participating universities. The CHS also offers a Masters of Family and Consumer Sciences-Comprehensive degree online where students have the flexibility to design a program of study the best meets their professional goals.

**Undergraduate Certificates**

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for a undergraduate major. At Iowa State University, an undergraduate certificate is awarded concurrently or after baccalaureate requirements are finished. The following undergraduate certificate is available in the College of Human Sciences:

- Health Coach Certificate

**Graduate Certificates**

Graduate certificates provide formal recognition of focused graduate study in an area of specialization that is less comprehensive than required for a master’s degree. At Iowa State University, a graduate certificate may be earned either before, after, or concurrently with the master’s or doctoral degree. The following graduate certificates are available in the College of Human Sciences:

- Applied Research Methods in Human Sciences Certificate - see [https://www.education.iastate.edu/graduate-programs/applied-research/](https://www.education.iastate.edu/graduate-programs/applied-research/)
- Community College Teaching Certificate - see [https://hdfs.hs.iastate.edu/graduate-students/graduate-programs/division-of-higher-education/ed-d-in-education/](https://hdfs.hs.iastate.edu/graduate-students/graduate-programs/division-of-higher-education/ed-d-in-education/)
- * Dietetics Internship Certificate - see [www.dietetics.iastate.edu/](http://www.dietetics.iastate.edu/)
- Education for Social Justice Certificate - see [https://education.iastate.edu/graduate-students/graduate-programs/school-of-education-certification-programs/education-for-social-justice-graduate-certificate/](https://education.iastate.edu/graduate-students/graduate-programs/school-of-education-certification-programs/education-for-social-justice-graduate-certificate/)
- * Family Financial Planning Certificate - see [www.online.hs.iastate.edu/graduate-programs/masters/mfcs-ffp/](http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-ffp/)
- Financial and Housing Counseling Certificate - see [www.online.hs.iastate.edu/graduate-programs/masters/mfcs-ffp/](http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-ffp/)

* Family Financial Planning Certificate and Financial and Housing Counseling Certificate are offered through collaboration with the Great Plains Interactive Distance Education Alliance (GP-IDEA; [http://www.gpidea.org/](http://www.gpidea.org/)).
* Gerontology Certificate - see www.hdfs.hs.iastate.edu/graduate/curriculum/ms-fcs/ (http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-gerontology/)

* Infant and Early Childhood Mental Health - see https://hdfs.hs.iastate.edu/graduate-students/graduate-programs/graduate-certificates/

* Instructional Design Certificate - see https://education.iastate.edu/graduate-students/graduate-programs/division-of-teaching-learning-leadership-and-policy/graduate-certificates/instructional-design-certificate/

Life Span Development - see https://hdfs.hs.iastate.edu/graduate-students/graduate-programs/graduate-certificates/

* Literacy Coaching Certificate - see https://education.iastate.edu/graduate-students/graduate-programs/division-of-teaching-learning-leadership-and-policy/graduate-certificates/literacy-coaching-certificate/

Principal Endorsement (Pre-LEAD) - see https://education.iastate.edu/graduate-students/graduate-programs/division-of-teaching-learning-leadership-and-policy/educator-prep-programs-for-licensure-recommendation/transformative-school-leadership-program-licensure-recommendation-m-ed/

Special Education Certificate - see https://education.iastate.edu/graduate-students/graduate-programs/division-of-teaching-learning-leadership-and-policy/graduate-certificates/special-education-instructional-strategist-certificate/

Superintendent Licensure - see https://education.iastate.edu/graduate-students/graduate-programs/division-of-teaching-learning-leadership-and-policy/ed-d-in-education/

* Youth Development Specialist - see http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/

* Youth Program Management & Evaluation - see http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/

* online certificate

**Apparel, Events, and Hospitality Management Department**

The Apparel, Events, and Hospitality Management department offers courses that provide opportunities for students to learn about interdisciplinary areas including aesthetics, leadership, entrepreneurship, and multi-channel retailing at both undergraduate and graduate levels. AESHM courses serve to complement the student's major area of study whether it be Apparel, Merchandising, and Design; Event Management; Hospitality Management; agriculture, business, design education, engineering, liberal arts and sciences or minor areas of study including entrepreneurial studies, design studies, or international studies.

Apparel, Events, and Hospitality Management, otherwise known as AESHM, is composed of three majors:

- Apparel, Merchandising, and Design
- Event Management
- Hospitality Management

Through each of these three programs, students gain skills and knowledge to help them succeed in the real world. In addition to coursework, they complete an internship that closely relates to their career aspirations.

Graduates of these programs are the managers of your favorite resorts, the designers of your best jeans, and the coordinators of lavish events. From fine dining to fine apparel, our students, alumni, faculty, and staff have an eye for the original and a taste for quality.

**Apparel, Merchandising, and Design**

Administered by the Department of Apparel, Events, and Hospitality Management. Leading to the degree bachelor of science.

Total credits required: 123 including a minimum of 18 credits in AMD at Iowa State University for the degree (12 of the 18 credits must be at the 300-400 level). The major in apparel, merchandising, and design provides a broad-based program of study with flexibility in creating program options. Courses are required in general education and the apparel industry professional core. To complete the program, a student selects a primary option from design, product development and innovation, product management and sourcing, merchandising and retail analytics, or fashion communication.

Minors and a certificate are available in apparel, merchandising, and design: (a) textile science and product performance or (b) a textile design minor in collaboration with the College of Design; and a merchandising certificate.

**Student Learning Outcomes**

Upon graduation, students should be able to:

1. **Communication.** Use clear and effective written, oral, verbal and electronic (WOVE) communication techniques to foster inquiry, collaboration, and engagement in apparel and related industries.

2. **Self-assessment/self-reflection.** Analyze and evaluate one's own knowledge, abilities, and actions relative to professional standards, seek opportunities to grow professionally, and utilize self-assessment and assessment of others to foster psychological, cognitive, social and emotional well-being.
3. **Critical thinking.** Understand fundamental concepts of apparel, merchandising, and design and apply critical thinking to solve problems from personal, scholarly, and professional perspectives.

4. **Ethics, Diversity, and Social Responsibility.** Demonstrate leadership and social justice to improve quality of life for global citizens and encourage socially responsible decision-making for consumers and businesses.

### UNDERGRADUATE STUDY

The program offers study for the degree of Bachelor of Science with a major in apparel, merchandising, and design (AMD). The program offers students a broad understanding of textile and apparel products, merchandising and marketing strategies, technical and creative design, product development, production processes, and business practices leading to a wide range of careers at state, national, and international levels in business and industry. Courses in the program provide scientific, technical, and humanistic knowledge about textiles, apparel, and related products basic to career preparation. Courses also provide knowledge applicable to the development and use of apparel and textile products by individuals, families, and institutions. The program provides a foundation for graduate study. Graduates understand the production, distribution, and use of textiles and apparel, aesthetic expression, and communication. They are prepared to plan, develop, source and present textile and apparel products to meet the needs of consumers. Students understand the issues involved in textile and apparel production and marketing, both nationally and internationally.

The AMD major provides a broad-based program of study with flexibility in creating an individualized program. To complete the program, a student combines general education, AMD core classes, and a structure of focused courses to form an option in: (a) creative and technical design, (b) fashion communication, (c) product development and innovation, (d) product management and sourcing, or (e) merchandising and retail analytics.

An option in **creative and technical design** is appropriate for those interested in the aesthetic and creative aspects of design, technical design, costuming, textile design, and product development. The fashion communications option prepares students for the development and delivery of visual, written, and oral communication. Career opportunities are in visual merchandising, styling, fashion influencing, social media, and communication. An option in **product development and innovation** is appropriate for those interested in developing innovative products for special markets including accessories, footwear, performance wear, smart textiles, functional apparel, and soft-goods for home. Career opportunities include designer, materials testing, quality assurance, and technical design. The **product management and sourcing** option is appropriate for those interested in both line planning, product development, and merchandising products or lines for consumer groups, sourcing, quality assurance, and manufacturing. An option in **merchandising and retail analytics** prepares students for the planning, promotion, and presentation of market-oriented product lines and events. Career opportunities are in buying, promotion, sales, product development, branding, and management in both manufacturing and retailing sectors with a focus on the textile and apparel industry.

***Instead of a portfolio review for admission, students in the creative and technical design option have a review of their first year design skills (AMD 206 Design Selective Advancement) after completing AMD 121 Apparel Assembly, AMD 131 Overview of the Fashion Industry, AMD 178 Introduction to Fashion Design Studio, and AMD 204 Textile Science. The AMD 206 Design Selective Advancement project is scored by design industry professionals and determines if/when students move forward into the creative and technical design option.

For additional courses of interest, see Apparel, Events, and Hospitality Management.

### GRADE POINT REQUIREMENT

All students majoring in apparel, merchandising, and design are required to earn a C- or better in all AESHM and AMD courses applied toward the degree, including transfer credits.

### COMMUNICATION PROFICIENCY REQUIREMENT

Undergraduate English proficiency is certified when the student has received a grade of C or better in ENGL 150 Critical Thinking and Communication, and ENGL 250 Written, Oral, Visual, and Electronic Composition.

### Curriculum in Apparel, Merchandising, and Design

Administered by the Department of Apparel, Events, and Hospitality Management (AESHM). Leading to the degree bachelor of science.

Total credits required: 123, including a minimum of 18 credits in AMD at Iowa State University for the degree (12 of the 18 credits must be at the 300-400 level). Leads to the degree Bachelor of Science. Administered by the AESHM Department. All students majoring in Apparel, Merchandising, and Design (AMD) are required to earn a C- or better in all AMD, AESHM, EVENT, and HSP M courses applied toward the degree, including transfer credits. All students majoring in Apparel, Merchandising, and Design (AMD) are required to earn a C or better in ENGL 150 and ENGL 250. No courses may be applied to more than one degree requirement except those used to meet US Diversity and International Perspective requirements.

FASHION, CULTURE, HISTORY, AND SOCIAL JUSTICE MINOR

The Fashion, Culture, History, and Social Justice minor will benefit emerging professionals and future leaders entering the fashion, museum, or other related industries become more critical people in regards to fashion, appearance, clothing, history, and identity. Examples of a few job...
titles that this minor would benefit include museum curator, collections manager, research associate, chief diversity officer, human resource roles, designers, merchandisers, product developers, and/or marketing managers.

Having an increased awareness of appearances and fashions of individuals historically experiencing oppression and marginalization can aid in societal improvements towards developing a more socially just environment. As students enter the workforce with a social justice background, they can better understand and work with others who are different from them. Additionally, having a better understanding of diverse consumers could help provide these consumers with the products they desire, in addition to avoiding public diversity issues that are far too common in the fashion industry.

**Learning Outcomes:**

- Examine historical, social/psychological, and cultural aspects of fashion, clothing, appearance, and identity with a focus on social justice
- Define social justice, power, privilege, and inequity as it relates to the historical, social/psychological, and cultural aspects of fashion, clothing, appearance, and identity
- Examine power dynamics of diverse communities and cultures and their fashions, clothing, appearance, and identities

**Requirements:**

The Fashion, Culture, History, and Social Justice minor can be earned by successfully completing the following for a total of 15 credits. All course prerequisites must be completed prior to taking the course. All minor courses must be taken for a grade.

Students who complete the Textile Science and Product Performance minor will meet the following over-arching learning objectives:

- Apply a comprehensive understanding of the characteristics (physical, chemical and structural) of textiles/textile products and the interrelationship of these characteristics to their major discipline
- Engage in interdisciplinary research through the analysis, testing and evaluation of textiles and textile products for sustainable industry and global applications in their major

**Requirements**

The Textile Science and Product Performance minor consists of 17 credits, including 14 credits distributed over four required classes. Six of the nine required 300-400 level credits in the minor must be taken at Iowa State University. Nine credits must be isolated to the minor only.

The Merchandising Certificate may be earned at the same time as an ISU baccalaureate degree or after the completion of an associate of arts (AA) or associate of science (AS) degree or a baccalaureate degree from any accredited institution.

The AMD program offers a concurrent B.S. and M.S. degree that allows students to obtain a B.S. and M.S. degree in apparel, merchandising, and design in five years. Application for admission to the Graduate College should be made in the junior year. More information can be found here: https://aeshm.hs.iastate.edu/graduate-students/graduate-programs/apparel-merchandising-and-design/concurrent-bs-ms/.

## Graduate Study

The program offers work for the concurrent Bachelor of Science and Master of Science; Master of Science (thesis and non-thesis options; on-campus and hybrid); and Doctor of Philosophy (on-campus and distance hybrid) with a major in apparel, merchandising, and design. For all programs the field of study is highly interdisciplinary; programs of study are tailored to students' background and interests. The program offers a concurrent B.S. and M.S. degree that allows students to obtain both the B.S. and M.S. degrees in apparel, merchandising, and design in 5 years. Application for admission to the Graduate College should be submitted in fall semester of the junior year.

Graduates understand how textiles and apparel are essential in meeting individual and societal needs and understand the interdependence of nations and cultures as producers and consumers. Graduates understand diverse philosophies of scholarship and apply multiple methods to creative activity, research, and teaching. Strong writing and oral communication skills help graduates disseminate scholarship and compete successfully for awards and grants.

Graduates accept positions relevant to their academic experience. All doctoral graduates have teaching experience. Master's and doctoral graduates have experience working in team-oriented and interactive environments. Graduates are prepared to adapt to future changes in their professions and to provide leadership in professional and public practice. They bring a strong sense of ethics to research, teaching, and business endeavors.

Program emphases for graduate study include creative design and functional design; product development; consumer behavior; entrepreneurship; merchandising and marketing aspects of textiles and clothing; acquisition and use of textiles and apparel within cultures; U.S. dress and textiles from the 19th into the 21st centuries; textiles and sustainability.

---

## Athletics

Administered by the Department of Kinesiology.

## Athletic Training

This major prepares students for a career as an athletic trainer in a variety of settings such as high school, college and professional settings. There are additional settings in sports medicine clinics, hospitals, military, industry, and in performing arts. The accredited program will prepare students for the Board of Certification exam upon graduation. Admission to the athletic training program is competitive and based on available departmental resources. Admission procedures and technical standards can be found at http://www.kin.hs.iastate.edu/programs/athletic-training/#program-information-and-requirements.

Iowa State University’s Athletic Training Program has transitioned to a Professional Master’s degree program. Undergraduate students will be enrolled in the 3+2 athletic training program with a 3-year Pre-Athletic Training undergraduate curriculum and a 2-year Masters of Athletic Training program in the Department of Kinesiology. Students with a B.S. or B.A. degree may apply directly to the Master’s program with completion of prerequisite coursework, program requirements, and observation hours. For more information, please contact the program director, Dr. Mary Meier, at mary@iastate.edu.

## Mission

Athletic training is the art and science of the prevention, recognition, care, and rehabilitation of athletic injuries. It includes the organization and administration of athletic training education programs, as well as the education and counseling physically active individuals and athletes. The Iowa State University athletic training program provides high quality education striving to instill intellectual curiosity, evidence-based knowledge, and clinical skills essential for individual development. The athletic training program enrolls academically qualified students who represent diverse socio-economic levels, ethnic heritage and who provide a gender balance. The program faculty and clinical preceptors strive to prepare athletic training students to be productive and responsible citizens of the world and to foster affective, caring individuals to promote the profession of athletic training.

The Athletic Training faculty and clinical preceptors continually update educational curriculum to keep athletic training students current with field knowledge and to ensure the best possible undergraduate and graduate education in both the didactic and clinical settings.

## Goals

1. We prepare athletic training students for the BOC Certification Exam.
2. We produce high quality athletic trainers prepared for employment in educational, clinical, and professional settings.
3. We promote professional and ethical conduct at all times.
4. We provide athletic training students equal opportunity to develop their skills both in the classroom and in the clinical settings.
5. We continually update the curricular offerings to provide the athletic training student current evidence based knowledge in the profession.
6. We provide high quality instruction in the classroom and clinical experiences.
7. We assist the athletic training student in gaining employment.
8. We promote the concept of establishing professional contacts by attending professional and educational meetings.
9. We foster an appreciation of athletic training as a component of sports medicine.
10. We foster the affective, caring side of athletic training.

**Student Learning Objectives**

1. Athletic training graduates will use effective communication skills.
2. Athletic training graduates will demonstrate competence in athletic training skills and knowledge.
3. Athletic training graduates will possess ethical, caring, professional attributes and behaviors as a health care professional.
4. Athletic training graduates will demonstrate effective critical thinking and problem-solving skills ensuring them of being an effective athletic trainer.
5. Athletic training graduates will demonstrate the ability to apply clinical skills and make evidence-based decisions to optimize patient outcomes.

**UNDERGRADUATE STUDY**

The Department of Kinesiology offers a Bachelor of Science degree in Kinesiology & Health. The B.S. in Athletic Training degree is only offered upon completion of the 3+2 B.S./M.A.TR. Athletic Training program. The undergraduate curriculum major/option is comprised of three components: general education, required departmental courses and the component courses. The intent of the general education component is to promote intellectual and personal growth and to prepare students for success in the basic, advanced and major/option components. Required courses provide an introduction to the field and fundamental principles of physical activity, fitness, health and disease.

**B.S./M.A.TR. degree in Athletic Training**

Certified Athletic Trainers are allied medical health care professionals who specialize in the prevention, assessment, diagnosis, emergency care, and treatment and rehabilitation of injuries. To gain certification as an athletic trainer, candidates must graduate from a CAATE accredited athletic training education program and successfully pass the Board of Certification (BOC) examination. In addition, most states have licensure requirements to practice athletic training. The ISU Athletic Training undergraduate education program has been CAATE accredited since 2001 and has transitioned to a Professional Master’s program. The Athletic Training program at Iowa State University includes various athletic training clinical rotations including high school settings, physical therapy and hospital clinics, college and university settings, surgical and emergency room observations, and immersive clinical opportunities in orthopedic and non-orthopedic settings.

**Curriculum in Athletic Training**

This major prepares students for a career as an athletic trainer in high school, college, professional sport settings. Additional settings include sports medicine clinics, hospitals, military, industry, and with the performing arts. The 3+2 program prepares students for the Board of Certification exam upon graduation from the Master’s program. Admission to the Athletic Training Master’s degree program is competitive. Admission requirements for the Professional Master’s in Athletic Training program can be found at [http://www.kin.hs.iastate.edu/graduate-programs/athletic-training/](http://www.kin.hs.iastate.edu/graduate-programs/athletic-training/) or [http://www.kin.hs.iastate.edu/programs/athletic-training/#program-information-and-requirements](http://www.kin.hs.iastate.edu/programs/athletic-training/#program-information-and-requirements).

**Curriculum in Athletic Training**

**Communication Proficiency**

In order to meet graduation requirements, all students must earn an average of C (2.0) or better in ENGL 150 and ENGL 250, with neither grade being lower than a C-. Students not meeting this condition must earn a C or better in an advanced writing course:

Human Development and Family Studies

Administered by the Department of Human Development and Family Studies. Leading to the degree bachelor of science.

Total credits required: 120. The human development and family studies curriculum prepares graduates to pursue careers in helping professions with employment opportunities in government, non-profit, and private agencies, as well as continue on to graduate studies programs. Students select an option within the major: child development and guidance; advocacy, administration, and policy; or health, well-being, and prevention.

Student Learning Outcomes

The following set of learning goals were established for the bachelor’s degree in Human Development and Family Studies (HD FS). The curriculum is designed to ensure that students earning a bachelor’s degree in HD FS will have achieved the following goals or learning outcomes.
LO 1: Content Knowledge- The student understands the central concepts, research, theories, and professional competencies across the lifespan within Human Development and Family Studies.

LO 2: Applied Knowledge and Skills- The student is able to apply content knowledge and use evidence-based practical skills to engage others’ in growth-oriented reflection, planning, and action across developmental domains.

LO 3: Social Justice- The student engages in ongoing learning and critical evaluation of one’s own position, one’s community and contexts, and relevant micro and macro structures and systems. The student works with others to create and advocate for inclusive and equitable environments for individuals and families.

LO 4: Critical Thinking- The student integrates, evaluates, and critiques policies and practices using relevant tools of inquiry to apply in professional settings.

LO 5: Professional Development – The student engages in ongoing professional learning and efforts to enhance self-awareness to ensure growth and ethical practice.

LO 6: Research- The student is able to access and evaluate peer-reviewed research and can identify strengths, weaknesses, and applications of such research.

A minor in human development and family studies is available; see requirements under Human Development and Family Studies, Undergraduate Minor.

The following requirements are for the HD FS major by option.

**Child Development & Guidance Option**

**Human Development and Family Studies Core: 23-24 credits**

396 Culinary Food Science (H SCI)

Graduate Programs

More information on the variety of graduate programs offered through the Department of Human Development and Family Studies can be found here: https://hdfs.hs.iastate.edu/graduate-students/graduate-programs/.

Culinary Food Science (H SCI)

The Culinary Food Science degree program is a food science-based degree in which students develop basic culinary skills along with knowledge of the accompanying sciences. As a graduate, you'll combine food product development skills and entrepreneurial talents with scientific and technological knowledge.

The department also offers a culinary food science minor (http://catalog.iastate.edu/previouscatalogs/2022-2023/collegeofagricultureandlifesciences/foodscienceandhumannutrition/#undergraduateminortext).

Student Learning Outcomes

Upon graduation, students should be able to:

• Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
• Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
• Facilitate and participate effectively in a group, team, or organization.
• Plan life-long learning activities with the aim of improving professional skills.
• Integrate creativity, innovation, or entrepreneurship in ways that produce value.
• Describe sociocultural competence relative to diversity, equity and/or inclusion.
• Explain how human activities impact the natural environment and how societies are affected.
• Meet program specific learning outcomes for the Culinary Food Science major.
Administered by the Department of Food Science and Human Nutrition

Total Degree Requirement: 120 cr.
Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.
Communications and Library: 10 cr.

16-17 14-15
Choose elective courses to total equal to or greater than 120 credits.

Notes:
- Planned course offerings may change and students need to check the online Schedule of Classes each term to confirm course offerings: https://classes.iastate.edu (https://classes.iastate.edu/).
- This sequence is only an example. The number of credits taken each semester should be based on the individual student’s situation.
- Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

More information on the Culinary Food Science minor can be found here: http://catalog.iastate.edu/collegeofhumansciences/foodscienceandhumannutrition/#undergraduateminortext.

Dance

Administered by the Department of Kinesiology.

Coursework in dance provides opportunities for students to develop an understanding and appreciation of dance as part of a liberal education. Those interested in teaching dance and physical education in the public schools may major in Kinesiology and Health (Teacher Licensure option) and minor in Dance.

A Performing Arts major with a Dance emphasis is available through the College of Liberal Arts and Sciences. For further information see: Performing Arts.

Diet and Exercise (H SCI)

OVERVIEW

Diet and Exercise, B.S./M.S.

Administered by the Department of Food Science and Human Nutrition and Department of Kinesiology.

This is an accelerated program with concurrent enrollment in the undergraduate and graduate degree programs. Courses included have been approved as meeting the academic requirements of the Didactic Program in Dietetics (DPD) in preparation for admission to accredited dietetics internship programs; the DPD is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. There is a $30 fee for the verification statement of completion of the accredited dietetics program. Additionally, courses are included to meet the American College of Sports Medicine (ACSM) requirements for certification at the level of Certified Exercise Physiologist.

Student Learning Outcomes

Upon graduation, students should be able to:

Communicate effectively in their field of study using written, oral, visual and/or electronic forms.

Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.

Facilitate and participate effectively in a group, team, or organization.

Plan life-long learning activities with the aim of improving professional skills.

Integrate creativity, innovation, or entrepreneurship in ways that produce value.

Describe sociocultural competence relative to diversity, equity and/or inclusion.

Explain how human activities impact the natural environment and how societies are affected.

Meet program specific learning outcomes for the Diet & Exercise major.

Degree Requirements

Total Degree Requirements: 122 cr. for bachelor’s degree and 34-38 cr. for master’s degree

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements.

Communications and Library: 10 cr.

### Dietetics (H SCI)

Dietitians are nutrition experts who strive for optimal health and nutrition of individuals and the population. The curriculum for the dietetics program as well as the diet and exercise program meet the academic requirements of the Didactic Program in Dietetics and prepares students for a career in the field of dietetics. The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency for the Academy of Nutrition and Dietetics.

#### Student Learning Outcomes

Upon graduation, students should be able to:

- Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
- Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
- Facilitate and participate effectively in a group, team, or organization.
- Plan life-long learning activities with the aim of improving professional skills.
- Integrate creativity, innovation, or entrepreneurship in ways that produce value.
- Describe sociocultural competence relative to diversity, equity and/or inclusion.
- Explain how human activities impact the natural environment and how societies are affected.
- Meet program specific learning outcomes for the Dietetics major.

### Administered by the Department of Food Science and Human Nutrition

The dietetics undergraduate curriculum meets the academic requirements as the Didactic Program in Dietetics and is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. Graduates of the program are eligible to apply for admission to accredited supervised practice programs/dietetics internships. There is a $30 fee for the verification statement of completion of the accredited dietetics program.

**Footnotes**

* Choose elective courses to total equal to or greater than 120 credits.

This sequence is only an example, and the number of credits taken each semester should be based on the individual student’s situation.

Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

More information on minors offered through Food Science and Human Nutrition can be found here: http://catalog.iastate.edu/collegeofhumansciences/foodscienceandhumannutrition/#undergraduateminertext.

The Department of Food Science and Human Nutrition offers a Master of Professional Practice in Dietetics (M.P.P.). More information on the program can be found here: http://catalog.iastate.edu/collegeofhumansciences/professionalpracticeindietetics/.

---

**Early Childcare Education and Programming**

**Curriculum in Early Childcare Education and Programming**

The Early Childcare Education and Programming (E C P) curriculum is designed to prepare graduates to work in a variety of early care and education programs that serve families that are mobile. Families who are mobile include military families, immigrant families, families who must travel to make a living, homeless families, and families living in poverty. Some of the programs are childcare centers and homes, infant/toddler and preschool programs, Head Start programs, and before and after-school programs for children ages birth to eight. This degree does not lead to teacher licensure. Students interested in a license to teach in public schools can refer to the Early Childhood Education - Unified (ECE) program. The E C P curriculum is designed to provide content for the final two years of a student’s program; the content is focused specifically on topics directly relevant to the major. This is an online program offered through a collaboration of universities called Great Plains Interactive Distance Education Alliance (or GPIDEA). The program within GPIDEA is known as Early Care and Education for a Mobile Society.
Students will complete a total of 120 credits for the major, 51 of which are specific to the E C P curriculum. These 51 credit hours are comprised of 12 core courses and 3 practica; the final practicum will be a 6-credit capstone experience. Students must complete 30 credits of college work, a lifespan development course, and have a 2.5 GPA to be admitted to E C P. If students prefer to be admitted to ISU before being admitted to the E C P major, they can enroll as Pre ECP (P ECP) students until they are eligible for the E C P major. For more information about the program at Iowa State, see https://online.hs.iastate.edu/early-childcare-programming/.

**Student Learning Outcomes**

Upon successful completion of the ECEMS bachelor’s degree program, students will be able to:

- use their understanding of young children’s characteristics and needs, and of multiple interacting influences on children’s development and learning, to create environments that are healthy, respectful, supportive, and challenging for each child.

- understand how successful early childhood education depends upon partnerships with children’s families and communities and value the importance and complex characteristics of children’s families and communities.

- use child observation, documentation, and other forms of assessment, in partnership with families and other professionals, to positively influence the development of every child.

- demonstrate, through sequential practicum experiences and clinical practice, the knowledge, skills, and professional dispositions necessary to promote the development and learning of young children across the entire developmental period of early childhood.

- identify and conduct themselves as a member of the early childhood profession, using ethical guidelines and other professional standards related to early childhood practice.

Administered by the Department of Human Development and Family Studies. Leading to the degree bachelor of science.

**Early Childhood Education - Unified**

Administered by the Department of Human Development and Family Studies and the School of Education. Leading to the degree bachelor of science.

The curriculum in early childhood education – unified (ECE) prepares graduates to teach young children and work with their families. This curriculum has been approved by the Iowa Department of Education and meets requirements for candidates to seek a teaching endorsement in PK-3, Inclusive Settings, which permits individuals to teach general and special education for children from birth through third grade. Graduates may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through third grade) or in home-based programs.

Students who enroll in the early childhood education – unified program must apply to and be accepted into the teacher education program prior to enrolling in advanced courses.

Additional information is also available from the student's academic advisor.

Students in early childhood education – unified must meet the performance outcome standards for teacher licensure. Standards are assessed in coursework through artifacts such as assignments, projects, or practicum participation. These standards assessments are based on the early childhood content standards for endorsements 1001 and 262 in the State of Iowa. These include competencies in (1) promoting child development, learning and individual learning differences, (2) building family and community relationships, (3) observing, documenting, and assessing to support young children and families, (4) using developmentally and individually effective approaches to connect with children and families, (5) using content knowledge to build a meaningful curriculum, (6) professional responsibilities, and (7) early childhood field experiences. Pre-student teaching field experiences in at least three settings, and student teaching experiences in at least two different settings is required.

**Student Learning Outcomes**

Graduates of the Early Childhood Education program will meet the following learning objectives, as defined by the InTASC standards for teacher preparation.

**Standard 1: Learner Development**

The student understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.

**Standard 2: Learning Differences**

The student uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.

**Standard 3: Learning Environments**

The student works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

**Standard 4: Content Knowledge**

The student understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning
experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.

**Standard 5: Application of Content**

The student understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.

**Standard 6: Assessment**

The student understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher's and learner's decision making.

**Standard 7: Planning for Instruction**

The student plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.

**Standard 8: Instructional Strategies**

The student understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.

**Standard 8A: Technology**

The student integrates current and emerging technology in instruction to encourage student creativity, problem solving, collaboration, and digital literacy. Teachers practice and advocate safe, legal, and responsible use of information and technology.

**Standard 9: Professional Learning and Ethical Practice**

The student engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.

**Standard 10: Leadership and Collaboration**

The student seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

This sheet provides a guide to the sequence of HD FS and EDUC courses; courses adhere to a prescribed sequence of semesters. Your academic advisor will help you develop an individual long range plan.

Block of courses listed together in the semester must be taken concurrently as sequenced.

See approved general education options list of courses for courses in Biological Sciences, Humanities, Physical Sciences and Social Sciences

ISU requires a 3 credit U.S. Diversity course (satisfied by HD FS 240) and a 3 credit international perspective course (usually met through a University approved humanities or social science options from the approved general education options list).
A secondary major in Education at Iowa State University prepares candidates to teach at the middle school and high school levels. K-12/Secondary Educator Preparation Programs eligible to pursue the secondary major in Education are:

- English Education
- History/Social Sciences Education - History
- History/Social Sciences Education - Political Science
- Mathematics Education
- Science Education – Biology
- Science Education – Chemistry
- Science Education – Earth Science
- Science Education – Physics
- World Languages and Cultures Education – French
- World Languages and Cultures Education – German
- World Languages and Cultures Education – Spanish

Additional Endorsements and Minors
Candidates pursuing the secondary major in Education have the opportunity to pursue additional endorsements and minors:

- K-12 Coaching Endorsement
- K-12 English as a Second Language Endorsement
- 5-12 Reading Endorsement
- Additional Science Endorsements
  - 5-12 Physical Science
  - 5-12 Basic Science
- Additional Social Sciences Endorsements
  - 5-12 American Government
  - 5-12 Anthropology
  - 5-12 Economics
  - 5-12 Psychology
  - 5-12 Sociology
- 5-12 Speech and Theatre Endorsement
  (See https://education.iastate.edu/future-students/find-your-major/endorsements/ for additional information)
- Learning Technologies Minor
  (See https://education.iastate.edu/find-your-major/learning-technologies-minor/)

Specific program requirements can be found within each department that houses the endorsement. Information on K-12 Coaching, K-12 English as a Second Language, and 5-12 Reading can be found at: https://iastate.app.box.com/s/m4tr3og99ouwmiubz5dhv9catyr2jqf

Student Learning Outcomes
Upon graduation, students should be able to:

The Learner and Learning
Standard #1: Learner Development.
Understand how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.

Standard #2: Learning Differences.
Use understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.

Standard #3: Learning Environments.
Work with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

Content
Standard #4: Content Knowledge.
Understand the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.

Standard #5: Application of Content.
Understand how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.

Instructional Practices
Standard #6: Assessment.
Understand and use multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher's and learner's decision making.

Standard #7: Planning for Instruction.
Plan instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.

Standard #8: Instructional Strategies.
Understand and use a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.

Standard #8A: Technology.
Integrate current and emerging technology in instruction to encourage student creativity, problem solving, collaboration, and digital literacy. Teachers practice and advocate safe, legal, and responsible use of information and technology.

Professional Responsibility
Standard #9: Professional Learning and Ethical Practice.
Engage in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.

Standard #10: Leadership and Collaboration.
Seek appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

Curriculum in secondary major in EDUCATION

Educator Preparation Program Admission Requirements

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Teacher Education Program. To access the policy, please follow this link: https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1njkrb4e9
- Decision Point 1 - Early Admission to the Teacher Education Program for Transfer Students. To access the policy, please follow this link: https://iastate.box.com/s/o45gppndbjxa39fm9pwwr9cc92jzb

In order to be eligible to student teaching (EDUC 417), candidates must have completed all degree program requirements and content specific coursework.

- Decision Point 2 - Requirements Students Must Meet Prior to Student Teaching. To access the policy, please follow this link: https://iastate.box.com/s/arvh7dvr3z35548rod5ssso2g5thrho6f

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer.

- Decision Point 3 - Recommendation for Licensure. To access the policy, please follow this link: https://iastate.box.com/s/s6l016zuy0r7v7alw426d6bosa6zo3

All Educator Preparation Program candidates must complete the professional core coursework (information found under each program) and required pedagogy and field experience coursework for their program. In addition, all prospective teachers are required to meet general education requirements as a part of their preparation. They must complete studies in the following general education groups. General education courses may be found in many departments. Credits listed are minimum requirements. Specific departments and/or colleges may require specific coursework to meet these requirements or additional credits. Credits used to satisfy these general education requirements typically satisfy department and college general education requirements.

Elementary Education

A degree in elementary education at Iowa State prepares you to teach all subjects at the elementary school level (grades K-6). Program completers can be recommended for licensure to the Iowa Board of Education Examiners.

In addition to pursuing a degree in Elementary Education, candidates are required to pursue an endorsement in at least one additional area. Candidates will be prepared to teach students in grades kindergarten through eighth grade in this area of specialization. Endorsements in the following areas are available for elementary education majors:

- K-8 English/language arts
- K-12 English as a Second Language (ESL)
- K-8 Health
- K-8 Mathematics
- K-8 Science
- K-8 Social studies
- K-8 Special education (Instructional Strategist I: Mild/Moderate Disabilities K-8)

In addition, candidates can choose to pursue endorsements in K-8 Reading and K-12 Coaching.

Additional information about endorsements can be found at: https://www.education.iastate.edu/find-majors/elementary-education/

Student Learning Outcomes

Upon graduation, students should be able to:

**The Learner and Learning**

Standard #1: Learner Development.

Understand how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.

Standard #2: Learning Differences.

Use understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.

Standard #3: Learning Environments.

Work with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

**Content**

Standard #4: Content Knowledge.

Understand the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.

Standard #5: Application of Content.

Understand how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.

**Instructional Practices**

Standard #6: Assessment.

Understand and use multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher’s and learner’s decision making.

Standard #7: Planning for Instruction.

Plan instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.

Standard #8: Instructional Strategies.

Understand and use a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.

**Standard #8A: Technology.**

Integrate current and emerging technology in instruction to encourage student creativity, problem solving, collaboration, and digital literacy.
Teachers practice and advocate safe, legal, and responsible use of information and technology.

**Professional Responsibility**

Standard #9: Professional Learning and Ethical Practice.

Engage in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.

Standard #10: Leadership and Collaboration.

Seek appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

Curriculum in Elementary Education

**Educator Preparation Program Admission Requirements**

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Teacher Education Program. To access the policy, please follow this link: https://iastate.box.com/s/vnp2dt4sihtu99ilym531y11njkrb4e9
- Decision Point 1 - Early Admission to the Teacher Education Program for Transfer Students. To access the policy, please follow this link: https://iastate.box.com/s/o45gppndbjxa3j9fm9pwvrk9cc92jzb

Primary Endorsement Area: Credits Vary

Minimum grade of a "C" required for all EDUC/C I, HD FS, and SP ED courses and all content-specific pedagogy/methods courses. Minimum grade of "C-" required for all other courses in endorsement areas.

Primary Endorsement Options:

- K-8 English/language arts
- K-12 English as a Second Language (ESL)
- K-8 Health
- K-8 Mathematics
- K-8 Science
- K-8 Social studies
- K-8 Special education (Instructional Strategist I: Mild/Moderate Disabilities K-8).

Additional information about endorsements can be found at https://www.education.iastate.edu/find-majors/elementary-education/

</table>

**Must receive a "C" or above

Total Credits: 120 minimum credits (credits will vary depending on endorsement option)

U.S. Diversity and International Perspectives Requirements: Students in elementary education fulfill the U.S. Diversity requirement with SP ED 250 or HD FS 240. Students in elementary education fulfill the International perspectives requirement by choosing three credits of coursework from university-approved Humanities or Social Sciences courses included on the Elementary Education approved options sheet.

Additional Endorsement

Candidates can pursue any of the primary endorsement areas listed above and in the following areas:

- K-8 Reading
- K-12 Coaching

Information about these endorsements can be found at: https://iastate.app.box.com/s/m4tr3og9ouwmibuz5dhv9catry2qf (https://iastate.app.box.com/s/m4tr3og9ouwmibuz5dhv9catry2qf/)

Contact an Elementary Education academic advisor for additional information.
Educator Preparation Program Completion Requirements:

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an Educator Preparation Program Completer. Total Credits: 120 and above

It is our expectation that students know the requirements of their academic program and develop and follow an academic plan based on their academic catalog and degree audit using their individual academic advisor as a resource in this process.

Event Management

Administered by the Department of Apparel, Events, and Hospitality Management.

The program offers study for the degree of Bachelor of Science with a major in event management. The program prepares undergraduate students for careers in leading event and meeting management businesses. To complete the program, a student combines general education, Event core classes, and a structure of focused courses to form an option in: (a) corporate/business events, (b) virtual events, (c) social events: weddings and nonprofit events, (d) sport events, or (e) innovative event experiences in retail.

Through the major, students gain background and experiences in planning, budgeting, and implementing conferences, meetings, and other special events in the public or private sectors. Course work provides students with a general education plus professional preparation focusing on the concepts and principles involved in meeting and event planning strategy; special event management; stakeholder development; budgets and finance; site selection; contracts, vendors, and negotiations; marketing and promotions; food and beverage management; meeting technology; event evaluation; and hospitality law. Event electives include courses in event sustainability, event digital promotion, incentive meetings, and international conference planning. Supporting courses include foodservice, catering, promotion, brand management, trend analysis, fashion, and resource management.

The program also houses “The Meeting Room: Where Experiences and Technology Innovate,” a lab designed to allow Event Management students to have hands-on access to a number of cutting-edge technology tools designed to let students focus on new and event disruptive ideas in events and meeting management. The lab is equipped with virtual reality headsets, event sound and lighting equipment, wireless connectivity to displays for BYOD, and group/collaboration furniture.
Graduates from this program are prepared for careers in event planning (corporate events, celebrations, education, promotions, commemorations, trade shows, weddings, conferences, association events, exhibitions, festivals, philanthropies, entertainment, fundraising, conventions, and sport events) and small business development (entrepreneurship). Graduates demonstrate leadership characteristics and make decisions based on integrating knowledge of financial, human resources, promotion, and event management principles. Students are required to complete an internship in event management prior to graduation. The student experience is enhanced through networking and development events with our Event Management Executive Advisory Council, meeting/event industry conferences and association meetings, and international experiences designed specifically for event management students.

**Leading to the degree Bachelor of Science**

Total credits required: 123, including a minimum of 18 credits from the AESHM Department at Iowa State University for the degree.

The curriculum in event management prepares students for careers in leading event and meeting management businesses. Courses are required in general education, and the professional area. Students majoring in Event Management are required to earn C- or better in all AESHM and EVENT courses, and all courses in the EVENT Core.

Communication Proficiency Requirement: Grade of C or better in ENGL 150 Critical Thinking and Communication, and ENGL 250 Written, Oral, Visual, and Electronic Composition.

**Curriculum in Event Management**

Administered by the Apparel, Events, and Hospitality Management Department.

Leading to the degree Bachelor of Science.

The AESHM Department offers a minor in Event Management. The minor can be earned by successfully completing the following for a total of 15 credits. The minor must include at least six (6) credits in courses numbered 300 or above taken at ISU. All course prerequisites must be completed prior to taking the course. All minor courses must be taken for a grade. The Event Management Minor requires students to complete

**Only 12 total credits of EVENT classes can apply to the minor.**

9 credits are required:

**Family and Consumer Sciences Education and Studies**

Administered by the Department of Human Development and Family Studies. Leading to the degree bachelor of science.

The curriculum in Family and Consumer Sciences Education and Studies (FCEDS) prepares graduates with a broad understanding of individual and family well-being. Graduates apply knowledge and research in human sciences content in global professional settings. They work in an integrative fashion to improve well-being by addressing and acting on complex problems confronting individuals, families, and communities. Ours is an interdisciplinary major where students take coursework in content areas including human development, early childhood education, interpersonal relationships, family studies, culinary arts, nutrition, textiles, interior design, and financial planning. This unique program of study integrates multiples facets of human health and well-being, preparing FCEDS graduates to support individuals, families, and communities in diverse settings to achieve optimal quality of life.

**Student Learning Outcomes**

Graduates of the Family & Consumer Sciences Education program will meet the following learning objectives, as defined by the InTASC standards for teacher preparation.

**Standard 1: Learner Development**

The student understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.

**Standard 2: Learning Differences**

The student uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.

**Standard 3: Learning Environments**

The student works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

**Standard 4: Content Knowledge**

The student understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.

**Standard 5: Application of Content**

The student understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.

**Standard 6: Assessment**
The student understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher’s and learner’s decision making.

**Standard 7: Planning for Instruction**

The student plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.

**Standard 8: Instructional Strategies**

The student understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.

**Standard 8A: Technology**

The student integrates current and emerging technology in instruction to encourage student creativity, problem solving, collaboration, and digital literacy. Teachers practice and advocate safe, legal, and responsible use of information and technology.

**Standard 9: Professional Learning and Ethical Practice**

The student engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.

**Standard 10: Leadership and Collaboration**

The student seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

Students in the curriculum choose one of three options: Teacher Licensure, Professional Studies, or Communications.

Graduates of the Teacher Licensure option may teach family and consumer sciences in middle, junior high, and senior high schools. Students who enroll in Teacher Licensure must apply and be accepted into the educator preparation program prior to enrolling in advanced courses. This program option is approved by the Iowa Department of Education for the preparation of comprehensive and occupational career and technical education family and consumer sciences teachers.

Graduates of the Professional Studies option are prepared to work in a variety of careers including Extension & Outreach, non-profit organizations, and governmental agencies as well as within the private business or entrepreneurial sector.

Graduates of the Communications option have the ability to educate consumers in a global and technologically changing society. Students apply the principles of educational presentations, journalism, marketing, and public relations to empower people to critically analyze options and make the best choices for their needs.

Students in FCEDS may choose coursework that leads to becoming a Certified Family Life Educator (CFLE), a program that has been approved by the National Council on Family Relations. These courses provide the basic education for students interested in working with families, including adolescents, parents, or adults working to strengthen relationships. The student takes courses that support the development of knowledge and skills in family life content areas selected by the National Council on Family Relations. The certification is a voluntary credential that requires the individual to complete a degree in an approved program and to have at least two years of work experience in family life education settings. Iowa State University does not grant the Certified Family Life Educator credential. The certification is granted only by the National Council on Family Relations. See [https://hdfs.hs.iastate.edu/future-students/find-your-major/certified-family-life-educator/] and/or [http://www.ncfr.org/cfle-certification/](http://www.ncfr.org/cfle-certification/).

Graduates may also choose from one of several nationally recognized professional certifications available from the American Association of Family and Consumer Sciences (AAFCS) Council for Certification. This program measures competencies of FCS professionals using high-quality, rigorous assessments. Certifications that are currently available are ([https://www.aafcs.org/home](https://www.aafcs.org/home)):

- **CFCS:** Certified in Family and Consumer Sciences; **CFCS-HDFS:** Certified in Human Development and Family Studies; **CFCS-HNFS:** Certified in Hospitality, Nutrition, and Food Science; and **CPFFE:** Certified Personal and Family Finance Educator.

There is also an opportunity to take courses that will allow you to be recommended for a family and consumer sciences-general endorsement or teacher licensure as a post baccalaureate student.

Communication Proficiency Requirement: A student must achieve a grade of C or higher in ENGL 150, Critical Thinking and Communication, and ENGL 250, Written, Oral, Visual, and Electronic Composition. A student achieving a grade of C- or lower in 150 and/or 250 must either repeat the course(s), earning a minimum grade of C, or, in consultation with the advisor and the coordinator of freshman English, complete another appropriate English writing course with a minimum grade of C.

A minor in Educational Services in Family and Consumer Sciences is available, see requirements under Undergraduate Minor.
Curriculum in Family and Consumer Sciences Education and Studies

Administered by the Department of Human Development and Family Studies. Leading to a degree bachelor of science.

This curriculum provides a broad-based program of study focusing on preparation for professional careers related to education or community leadership. Courses are required in general education and the College core.

Students in the program choose one of three options: Teacher Licensure, Communications, or Professional Studies.

Option 1, Teacher Licensure, is designed for students seeking careers as family and consumer sciences educators in a variety of settings such as middle, junior high, and senior high schools. Further information about educator preparation programs appears under Teacher Education in the School of Education.

Option 2, Communications, is designed for students seeking careers emphasizing the use of principles in journalism, marketing, communications, and public relations with diverse populations in business or social agency settings as well as extension, community agencies, community colleges, and youth and adult education programs in the global community.

Option 3, Professional Studies, is designed to provide students with the opportunity to pursue an individualized program which is planned with their academic advisors. Careers include working with diverse populations in Extension, business, community agencies, and community colleges, or non-profit groups and organizations involving youth and adult education programs.

Option 1: Teacher Licensure

Total Credits for FCEDS (Teacher Licensure): 123

Family and Consumer Sciences Education and Studies Core: 22 credits

Family and Consumer Sciences, MFCS

Master of Family and Consumer Sciences (M.F.C.S.)

The College of Human Sciences offers a nonthesis, professional master's degree program offered completely online through the Great Plains Interactive Distance Education Alliance (or GPIDEA).

Students select one of the following specializations (all require 36 credits): Dietetics (no longer accepting new applicants), Family Financial Planning, Gerontology, and Youth Development

The Program of Study committee, in consultation with the student, establishes the courses to be taken and the acceptability of transfer credits. The major professor is selected from the discipline in which the concentration of coursework will be taken. Written and oral final integrative examinations are required in lieu of a thesis or creative component.
