Assessment procedures and evaluation techniques for upper and lower body orthopedic conditions and injuries. Includes an overview of mechanisms of injury, general musculoskeletal disorders, spine or neurological dysfunction. (Typically Offered: Fall)

ATR 2290: Clinical Practicum in Athletic Training II

Credits: 1.

Prereq: Concurrent enrollment in ATR 2280

Pre-Athletic training clinical experiences designed to orientate students to the assessment and evaluation principles of upper and lower body orthopedic conditions and injuries. Pre-athletic training students will observe athletic trainers in various athletic training clinical sites. Concurrent enrollment in ATR 2280. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

ATR 3280: Athletic Injuries Clinical Practicum

Credits: 1. Contact Hours: Laboratory 2.

Prereq: ATR 2290

Athletic training clinical experiences for pre-athletic training students. Clinical experiences include: prevention of injury screening strategies, athletic training room and education program policies and procedures, review of athletic taping techniques, acute injury management, and anatomy review. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

ATR 5010: Bracing, Wrapping, and Taping Techniques

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Admission to graduate program in Athletic Training

Methods to select, fabricate, and/or customize prophylactic, assistive, and restrictive devices, material, and techniques into plan of care (durable medical equipment, orthotic devices, taping, bracing, splinting, protective padding, and casting). Methods of taping and wrapping for injury care, mitigation of injury, and return to play. Exposure to different brands of bracing, how to fit a brace, and their use as well as casting techniques. Discussions of when to refer for prosthetics and overview of gait training.

ATR 5020: Emergency Care Procedures in Athletic Training

Credits: 3. Contact Hours: Lecture 3.

Prereq: Admission to graduate program in Athletic Training

Overview of medical emergencies and other critical incidents that may occur. Evaluate and manage patients with acute conditions including triaging conditions and internal/external hemorrhage. Cardiac, respiratory, and cervical spine compromise. Conditions related to environment, fractures, dislocations, and wound care and closure. Concussion/brain injury with consideration of established protocols including: comprehensive examination, recognition, and treatment, implementation of a plan of care, referral, and return to participation. (Typically Offered: Summer)

ATR 5050: Therapeutic Modalities and Clinical Interventions

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ATR 5020, ATR 5200, acceptance into Athletic Training program

Knowledge and skills to utilize a variety of therapeutic modalities.

Detailed understanding of the psychological and physiological process of pain, healing and a problem-based approach to apply theories, principles, and techniques of thermal, electrical, mechanical, light, and alternative therapies (laser, cryotherapy). Incorporation interventions (for pre-, post-, and non-surgical conditions) designed to address a patients' identified impairments, activity limitations, injuries, and participation restrictions. Home care to include self-treatment, soft tissue techniques. (Typically Offered: Fall)

ATR 5090: Athletic Training Clinical Education I

Credits: 1.

Prereq: Acceptance into Athletic Training program

Clinical experiences under the direct supervision of a clinical preceptor.

Techniques and clinical skills provided in both the clinical and classroom settings including: Special Olympics, emergency department rotation, environmental conditions, off season practice and conditioning sessions, biometrics/physiological monitoring systems and translation of data into effective preventative measures, clinical interventions, and performance enhancement. (Typically Offered: Summer)

ATR 5100: Evaluation Methods and Treatment Techniques - Lower Body

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ATR 5020, ATR 5200, acceptance into Athletic Training program

Proper methods of musculoskeletal evaluation of the lower extremity.

Evaluate and manage patient(s) with acute conditions including triaging conditions that are life threatening or otherwise emergent. Obtain a medical history, proper methods of documentation, patient overview (including ICF model), identification of comorbidities, assessment of function, selection and use of special tests and measures assessing patient's clinical presentation, clinical practice decisions, evaluation of all results to determine a plan of care, including referral when warranted. Selection and incorporations of interventions designed to address a patient's identified impairments, activity limitations, and participation restriction. (Typically Offered: Fall)

ATR 5130: Evaluation Methods and Treatment Techniques - Upper Body

Credits: 3. Contact Hours: Lecture 3.

Prereq: ATR 5100, ATR 5210, acceptance into Athletic Training program

Proper methods of musculoskeletal evaluation of the upper extremity including spine. Evaluate and manage patient(s) with acute conditions.

Obtaining a medical history, methods of documentation, assessment of function, selection and use of special tests and measures assessing patient's clinical presentation, determine a plan of care, including referral when warranted. Selection and incorporations of interventions designed to address a patient's identified impairments, activity limitations, and participation restrictions, using ICF model for clinical practice decisions. Review of concussion evaluation, protocols, and return to play following a head injury/concussion. (Typically Offered: Spring)

ATR 5150: Evidence-based Practice in Athletic Training

Credits: 2. Contact Hours: Lecture 2.

Prereq: ATR 5220, ATR 5450, acceptance into Athletic Training program

Principles of evidence-based practice, search for evidence, grading and evaluating literature. Use of systems of quality assurance and improvement to enhance patient care, search, retrieve, and incorporating the use of contemporary principles and practices information from health informatics for clinical decisions and communication with patients/clients, family members, coaches, administrators, other healthcare providers, consumers, payors, and/or policy makers. Use of the International Classification of Functioning, Disability, and Health (ICF) as a framework for delivery and communication about patient care. (Typically Offered: Summer)

ATR 5190: Athletic Training Clinical Education II

Credits: 3.

Prereq: ATR 5100, ATR 5210, acceptance into Athletic Training program

Clinical experiences under the supervision of a clinical preceptor with client/patient populations in competitive, recreational, individual and team activities, with foundational behaviors of professional practice. Real client/patient interactions as well as assessment of clinical component procedures and policies. Clinical hours occur in a variety of settings with patients and the student will complete the clinical hours that may extend prior to and/or beyond the academic semester end date. Clinical opportunities provide a basis for evaluating the athletic training student's clinical progression through the program. (Typically Offered: Fall)

ATR 5200: Athletic Training Seminar A - An Introduction to Athletic Training

Credits: 1. Contact Hours: Lecture 1.

Prereq: Acceptance into Athletic Training program

Introduction to athletic training program and an overview of policies and procedures, and program handbook. History of athletic training, professional domains, electronic health records, ethics, cultural competence, social justice, HIPPA, and FERPA confidentiality, and professionalism. (Typically Offered: Summer)

ATR 5210: Athletic Training Seminar B - Diagnostic Imaging and Lab Principles

Credits: 1. Contact Hours: Lecture 1.

Prereq: ATR 5020, ATR 5200, acceptance into Athletic Training program

Procedures on obtaining via the appropriate physician and medical staff the necessary and appropriate diagnostic tests or labs to facilitate diagnosis, referral, and treatment planning. Using evidence to inform practice and utilize systems of quality assurance and improvement to enhance patient care. Communicate and collaborate with other medical interprofessionals including radiologists, x-ray technicians, medical laboratory scientists and clinical lab technicians for best patient care and outcomes. (Typically Offered: Fall)

ATR 5220: Athletic Training Seminar C - Interprofessional Collaboration and Leadership

Credits: 1. Contact Hours: Lecture 1.

Prereq: ATR 5100, ATR 5210, acceptance into Athletic Training program

Explore other allied health care professions and interprofessional collaboration for optimal patient care and referral. Total patient care and how different professions can impact the care will be explored and discussed. Participation in roundtable discussions with other interprofessional health professions and students are exposed to foundational behaviors of professional practice including but not limited to: communication, work/family balance, ethics, mentorship, leadership, professional involvement, and promotion of the profession. (Typically Offered: Spring)

ATR 5230: Athletic Training Seminar D - Advanced Topics in Athletic Training

Credits: 1. Contact Hours: Lecture 1.

Prereq: ATR 5220, ATR 5450, acceptance into Athletic Training program

Advanced clinical experiences and specialty training that includes exposure to soft tissue mobilization techniques, gait analysis and sport science technologies related to injury mitigation and sport performance. (Typically Offered: Summer)

ATR 5240: Athletic Training Seminar E - Professional Development in Athletic Training

Credits: 1. Contact Hours: Lecture 2.

Prereq: ATR 5150, ATR 5500, and permission of the Athletic Training Program Director

Assess the athletic training students' mastery of knowledge and clinical skills in athletic training, prepare students for employment, continuing education, and self-assessment. Utilizes a case study approach covering all of the domains of athletic training and demonstrates interprofessional and interdisciplinary connections. Review of all of the athletic training domains via specific exams (written, simulation and computer based) will be utilized to prepare the student to challenge the BOC examination. (Typically Offered: Spring)

ATR 5290: Athletic Training Clinical Education III

Credits: 3.

Prereq: ATR 5100, ATR 5210, ATR 5190, acceptance into Athletic Training program

Clinical experiences under the supervision of a clinical preceptor with client/patient populations in competitive, recreational, individual and team activities, high and low intensity activities with foundational behaviors of professional practice. Real client/patient interactions as well as assessment of clinical component procedures and policies. Clinical hours occur in a variety of settings with patients and the student will complete the clinical hours that may extend prior to and/or beyond the academic semester end date. Clinical opportunities provide a basis for evaluating the athletic training student's clinical progression through the program. (Typically Offered: Spring)

ATR 5390: Athletic Training Clinical Education IV

Credits: 2.

Prereq: ATR 5220, ATR 5450, ATR 5290, acceptance into Athletic Training program

General medicine clinical experiences under the direct supervision of a clinical preceptor. Advanced issues in the athletic training profession with emphasis on practical application and professional development, and collaboration with other health care professionals. Utilization of evidenced based research and approaches to clinical practice with emphasis placed on lab reports, imaging results, life-span issues, and diverse patient populations including non-sport client/patient populations, different sexes and throughout the lifespan (pediatric, adult, elderly). Foundational behaviors of professional practice and emphasis will focus on evaluation, treatment, rehabilitation, and clinical skills. (Typically Offered: Summer)

ATR 5450: Therapeutic Exercise and Rehabilitation Interventions

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ATR 5100, ATR 5210, acceptance into Athletic Training program

Therapeutic and corrective exercise, joint mobilization, soft tissue techniques, movement training (including gait training), motor control/proprioceptive activities, task-specific functional training, home and self-care including self-treatment and exercise, cardiovascular training. Pre-, post-, and non-surgical conditions and addressing activity limitations, patient goals, participation restrictions, quality assurance and quality improvement, patient reported outcomes, and return to play guidelines. (Typically Offered: Spring)

ATR 5490A: Athletic Training Clinical Education Study Abroad: Preparing for the Experience

Credits: 1. Contact Hours: Lecture 1.

Prereq: Sophomore or junior classification, or acceptance into graduate Athletic Training Program; minimum GPA of 3.0; ATR 2200 or ATR 2290

Preparation for a study abroad experience that is focused on the discipline of athletic training in another country. Pre-travel for ATR 5490B study abroad experience. Meets International Perspectives Requirement. (Typically Offered: Spring)

ATR 5490B: Athletic Training Clinical Education Study Abroad

Credits: 1-3. Contact Hours: Lecture 3.

Prereq: ATR 5490A; Accepted to study abroad by Athletic Training Director

First-person perspective into the athletic training profession in another country as well as provide enrichment experiences related to the history and culture of that country. Follow-up course and experience of one credit ATR 5490A which was intended to prepare the student for the study abroad experience. Meets International Perspectives Requirement. (Typically Offered: Spring)

ATR 5500: Pharmacological Issues in Athletic Training

Credits: 2. Contact Hours: Lecture 2.

Prereq: ATR 5220, ATR 5450, acceptance into Athletic Training program

General medical and pharmacological issues generally found in the field of athletic training. Medications used to treat medical conditions and the ability to educate patients regarding appropriate pharmacological agents for the management of their condition, including indications, contraindications, dosing, interactions, and adverse reactions. Administration of medications by the appropriate route upon the order of a physician or other provider with legal prescribing authority. Educate clients/patients about effects, participation consequences, risks of misuse and abuse of alcohol, performance-enhancing drugs/substances; and over the counter, prescription and recreational drugs including drug testing policies and procedures. (Typically Offered: Summer)

ATR 5590: Athletic Training Clinical Education V

Credits: 4.

Prereq: ATR 5390 and ATR 5600; Acceptance into graduate Athletic Training Program

Course monitors student progression of athletic training proficiencies, acquiring clinical skills under the direct supervision of a clinical preceptor. Field experience provides additional athletic training experiences and clinical responsibilities for a minimum of two 8 week rotations under the direct supervision of a clinical preceptor. Required to complete a minimum of 25 hrs per week of field clinical experience. Clinical experience may extend beyond the academic semester end date and the clinical hours are a component of this course. (Typically Offered: Fall)

ATR 5600: General Medical and Behavioral Health Issues

Credits: 3. Contact Hours: Lecture 3.

Prereq: ATR 5220, ATR 5450, acceptance into Athletic Training program

Medical issues generally observed in the athletic training profession. Development and implementation of wellness strategies to mitigate the risk for long-term health conditions across the lifespan and in an active population. Topics including dermatology, mental illness, neurological disorders, pulmonary disease, respiratory infections, viral infections, autoimmune disorders, oncology, gastrointestinal conditions and sexually transmitted infections. Identify, refer, give support to patients with behavioral health conditions and interact with other healthcare providers. (Typically Offered: Summer)

ATR 5690: Athletic Training Immersion Clinical Education VI

Credits: 5.

Prereq: Athletic Training Program Director Permission for Course

Cumulative clinical experience to gain a more in-depth experience in the field of athletic training. Student selects a field or site experience that meets their professional goals. Field experience is designed to provide immersive and additional athletic training experiences for a minimum of 10 weeks under the direct supervision of a certified athletic trainer. Site approved by the preceptor and ATR program director prior to beginning the immersion clinical experience. Required to complete a minimum of 25 hours per week of field experience. Clinical experience may extend beyond the academic semester end date and the clinical hours are a component of this course. (Typically Offered: Spring)

ATR 5700: Injury Intervention, Rehabilitation and Patient Care

Credits: 3.

Prereq: ATR 5150, ATR 5500, ATR 5600 and acceptance into Athletic Training program

Basic understanding of injury and sport psychology and its application to the overall health and well-being of athletic and general population clients. Psychological, social, socio-economical, and environmental factors that influence a client/patient and in their injury susceptibility, reaction, immediate care, and adherence to rehabilitation will be explored. Assessment and intervention techniques to promote and facilitate rehabilitation in a variety of professional settings and with patients from different backgrounds and social issues that may impact a patient. Overview of special populations (adolescent, female, special populations of athletes/physically active patients). Foundational behaviors of professional practice and working with other allied health care professionals in the overall health and well-being of a patient will be explored. (Typically Offered: Fall)

ATR 5750: Athletic Training Organization and Administration

Credits: 3. Contact Hours: Lecture 3.

Prereq: Concurrently enrolled in ATR 5690

Knowledge and skills necessary for the administration aspect of an athletic training program. Course content includes but is not limited to: PPEs, how to manage physical, human, and financial resources in the delivery of healthcare services. Discussion of patient and insurance management, working relationships with interprofessional members of the health care team, policies and procedures for guidance in the daily operation of athletic training services including EAP or other critical incidents (concussion or other brain injuries), patients in behavioral health crisis, record keeping, athletic training facility design, resume development, and administrative/leadership skills and mentoring. (Typically Offered: Spring)

Athletics (ATH)

Courses primarily for undergraduates:**ATH 1010B: Intercollegiate Athletics: Basketball (men)**

Credits: 1. Contact Hours: Laboratory 15.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010C: Intercollegiate Athletics: Basketball (women)

Credits: 1. Contact Hours: Laboratory 15.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010D: Intercollegiate Athletics: Cross Country (men)

Credits: 1. Contact Hours: Laboratory 15.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010E: Intercollegiate Athletics: Cross Country (women)

Credits: 1. Contact Hours: Laboratory 13.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010F: Intercollegiate Athletics: Football (men)

Credits: 1. Contact Hours: Laboratory 15.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010G: Intercollegiate Athletics: Golf (men)

Credits: 1. Contact Hours: Laboratory 15.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010J: Intercollegiate Athletics: Gymnastics (women)

Credits: 1. Contact Hours: Laboratory 13.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010K: Intercollegiate Athletics: Softball (women)

Credits: 1. Contact Hours: Laboratory 13.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010M: Intercollegiate Athletics: Swimming/Diving (women)

Credits: 1. Contact Hours: Laboratory 13.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010O: Intercollegiate Athletics: Tennis (women)

Credits: 1. Contact Hours: Laboratory 15.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010P: Intercollegiate Athletics: Track and Field (men)

Credits: 1. Contact Hours: Laboratory 15.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010Q: Intercollegiate Athletics: Track and Field (women)

Credits: 1. Contact Hours: Laboratory 13.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010R: Intercollegiate Athletics: Volleyball (women)

Credits: 1. Contact Hours: Laboratory 13.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010S: Intercollegiate Athletics: Wrestling (men)

Credits: 1. Contact Hours: Laboratory 15.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010T: Intercollegiate Athletics: Golf (women)

Credits: 1. Contact Hours: Laboratory 13.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010U: Intercollegiate Athletics: Soccer (women)

Credits: 1. Contact Hours: Laboratory 13.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

Biochemistry, Biophysics, and Molecular Biology (BBMB)

Courses primarily for undergraduates:

BBMB 1010: Introduction to Biochemistry

Credits: 1. Contact Hours: Lecture 1.

Foundational principles of the molecules and chemistry of life, including structure and function of biological molecules: protein, lipids, nucleic acids, and carbohydrates. Survey of modern biotechnology frontiers. (Typically Offered: Fall)

BBMB 1020: Introduction to Biochemistry Laboratory

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Prereq: Credit or enrollment in CHEM 1770 and CHEM 1770L or CHEM 2010 and CHEM 2010L

Topics in the scientific background of biochemistry, such as macromolecules, metabolism, and catalysis. Laboratory experimentation covers biochemical concepts and the study of bio-molecules including proteins, lipids and nucleic acids. A significant component is practice in scientific communication. For students declaring or considering Biochemistry majors. (Typically Offered: Spring)

BBMB 1100: Biochemistry Learning Community I

Credits: 1. Contact Hours: Lecture 1.

Biochemistry Learning Community introducing the program of study, academic planning, and university resources. Survey of careers and research in biotechnology, medicine, and biophysics. Introduction to ISU research and faculty. Concurrent enrollment with BBMB 1010 highly recommended. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

BBMB 1110: Biochemistry Learning Community II

Credits: 1. Contact Hours: Lecture 1.

Biochemistry Learning Community serving an overview of career-development and research resources, including research opportunities, internships, lab skills, and leadership roles. Introductions to ISU research and faculty. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

BBMB 1200: The Biochemistry of Beer

(Cross-listed with FSHN 1200).

Credits: 2. Contact Hours: Lecture 2.

An introduction to the major classes of biomolecules, basic biochemical concepts, enzymology, metabolism and genetic engineering as they apply to the production and flavor of beer. All aspects of the biochemistry of beer will be covered, including the malting of barley, starch conversion, yeast fermentation and the chemical changes that occur during the aging of beer. Intended for non-majors. (Typically Offered: Fall)

BBMB 1200L: Biochemistry of Beer Laboratory

(Cross-listed with FSHN 1200L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment in BBMB 1200

An introduction to biochemical methods related to the production of beer. Laboratory exercises related to water chemistry, mash enzymology, hop compound extraction and analysis, and yeast biology will be performed. Closely follows the material being taught in BBMB 1200. Graduation Restriction: Natural science majors are limited to elective credit only.

BBMB 1210: Medicines, Drugs and You

Credits: 2. Contact Hours: Lecture 2.

An introduction to how medicines treat disease, what drug molecules look like, how they function, how they can be toxic, modern therapeutics ranging from over-the-counter pain relievers, antibiotics and anti-depressants, to anti-cancer chemotherapies. The differences between drugs and supplements. Intended for students of all majors. (Typically Offered: Spring)

BBMB 2010: Chemical Principles in Biological Systems

Credits: 2. Contact Hours: Lecture 2.

Prereq: Credit or enrollment in CHEM 3320

Survey of the chemical principles of biological systems including: water, organic chemistry of functional groups in biomolecules and biochemical cofactors, weak bonds and their contribution to biomolecular structure, oxidation-reduction reactions and redox potential, thermodynamic laws and bioenergetics, chemical equilibria and kinetics, inorganic chemistry in biological systems, data presentation. The subjects will be taught using molecules from biological systems as examples. Intended for majors in biochemistry. (Typically Offered: Spring)

BBMB 2210: Structure and Reactions in Biochemical Processes

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 1630, CHEM 1670, or CHEM 1770

Fundamentals necessary for an understanding of biochemical processes. Primarily for students in agriculture. Graduation Restriction: Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry. Credit for both BBMB 2210 and CHEM 2310 may not be applied toward graduation. (Typically Offered: Fall, Spring)

BBMB 3010: Survey of Biochemistry

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 2310 or CHEM 3310

A survey of biochemistry: structure and function of amino acids, proteins, carbohydrates, lipids, and nucleic acids; enzymology; metabolism; biosynthesis; and selected topics. Graduation Restriction: Only one of BBMB 3010, 3030, or 3160 may count toward graduation; Not acceptable for credit toward a major in Biochemistry. (Typically Offered: Fall, Spring, Summer)

BBMB 3030: General Biochemistry

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 3310

Survey of biochemistry for Engineering majors: structure and function of amino acids, proteins, carbohydrates, lipids and nucleic acids; enzyme activity; metabolism; DNA replication; RNA transcription; protein translation; with case studies examining industrial uses. Graduation Restriction: Only one of BBMB 3010, 3030, or 3160 may count toward graduation; Not acceptable for credit toward a major in Biochemistry. (Typically Offered: Fall)

BBMB 3110: Writing Scientific Reports in Biochemistry

Credits: 1.

Prereq: Credit or concurrent enrollment in BBMB 3120

Data analysis, presentation, and writing reports in biochemistry. Concurrent enrollment in BBMB 3120 recommended. (Typically Offered: Fall, Spring)

BBMB 3120: Experimental Research Skills in Biochemistry

Credits: 2. Contact Hours: Lecture 1, Laboratory 3.

Prereq: BBMB 1020; credit or concurrent enrollment in CHEM 1780 or CHEM 2010

Inquiry-based introduction to biochemical techniques such as protein purification, enzymatic assays, solution preparation, hypothesis formation and testing, data analysis, high-throughput methodology, and research record keeping. Concurrent enrollment in BBMB 3110 recommended. (Typically Offered: Fall, Spring)

BBMB 3160: Principles of Biochemistry

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3140; (CHEM 2310 or CHEM 3310)

Biological systems at the molecular level; chemistry of biological macromolecules, enzyme function and regulation, basic metabolic pathways; integration of metabolism in diverse living systems. For students in biology and related majors who do not require the more rigorous treatment of biochemistry found in BBMB 4040/4050. Graduation Restriction: Only one of BBMB 3010, 3030, or 3160 may count toward graduation; Not acceptable for credit toward a major in Biochemistry. (Typically Offered: Fall, Spring)

BBMB 4040: Biochemistry I

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 3310

Survey of biochemistry for undergraduate majors in biochemistry and related fields. The first of a comprehensive two semester series with BBMB 4050. Chemistry of amino acids, proteins, carbohydrates, and lipids; protein structure, function, and regulation; carbohydrate metabolism. BIOL 3140 strongly recommended. Graduation Restriction: Credit for both BBMB 4200 and the BBMB 4040 - 4050 sequence may not be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

BBMB 4050: Biochemistry II

Credits: 3. Contact Hours: Lecture 3.

Prereq: BBMB 4040

Survey of biochemistry for undergraduate majors in biochemistry and related fields. The second of a comprehensive two semester series after BBMB 4040. Metabolism of carbohydrates, amino acids, nucleotides and lipids; formation, turnover, and molecular relationships among DNA, RNA, and proteins; genetic code; regulation of gene expression; and selected topics in molecular physiology. (Typically Offered: Fall, Spring, Summer)

BBMB 4100: Analysis of Scientific Literature

Credits: 2. Contact Hours: Lecture 2.

Repeatable, maximum of 2 times.

Prereq: Credit or enrollment in BBMB 4040 or BBMB 5040

Examination and discussion of current research reports in biochemistry, biophysics, genetics, molecular and cell biology. Critical evaluation and analysis of scientific data and experimental design in research literature. (Typically Offered: Fall, Spring)

BBMB 4110: Techniques in Biochemical Research

Credits: 4. Contact Hours: Lecture 2, Laboratory 8.

Prereq: Credit or enrollment in CHEM 3320

Laboratory experimentation and techniques for studying biochemistry, including: chromatographic methods; electrophoresis; spectrophotometry; enzyme purification; enzyme kinetics; and characterization of carbohydrates, proteins, lipids, and nucleic acids. Scientific communication and technical writing are emphasized. (Typically Offered: Fall)

BBMB 4200: Mammalian Biochemistry

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 3320 and BIOL 3140

Structure and function of proteins; enzymology; biological oxidation; chemistry and metabolism of carbohydrates, lipids, amino acids and nucleic acids; protein synthesis and the genetic code; relationship of biochemistry to selected mammalian diseases. Biochemistry of mammals emphasized. Graduation Restriction: Not acceptable for credit toward a major in Biochemistry. Credit for both BBMB 4200 and the BBMB 4040 - 4050 sequence may not be applied toward graduation. (Typically Offered: Fall, Spring)

BBMB 4300: Prokaryotic Diversity and Ecology

(Cross-listed with MICRO 4300).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 3020; MICRO 3020L

Survey of the diverse groups of prokaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups. Offered odd-numbered years. (Typically Offered: Spring)

BBMB 4450: Molecular Signaling

(Dual-listed with BBMB 5450).

Credits: 2. Contact Hours: Lecture 2.

Prereq: BBMB 4050 or BBMB 4200; or BBMB 5060 and BBMB 5070

Molecular mechanisms of cellular signaling including receptor activation, desensitization and cross talk, signal transduction pathways, nuclear receptors, growth factor and extracellular matrix activators, protein kinases, caspase and transcription factor downstream signals, and lipids, gases and cyclic nucleotides as regulators of cell signaling. Course content includes current literature, student and instructor presentations and, for BBMB 5450 students only, research proposal writing and review. Offered even-numbered years. (Typically Offered: Spring)

BBMB 4610: Molecular Biophysics

(Dual-listed with BBMB 5610).

Credits: 2. Contact Hours: Lecture 2.

Prereq: CHEM 1780; PHYS 2320 or PHYS 2320H

Physical methods for the study of molecular structure and organization of biological materials. X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy. Registration for the graduate credit commits the student to graduate-level examinations, which differ from undergraduate-level examinations in the number and/or difficulty of questions. (Typically Offered: Spring)

BBMB 4900: Independent Study

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Independent study with a faculty mentor. Graduation Restriction:

No more than 9 credits of BBMB 4900 may count toward graduation.

(Typically Offered: Fall, Spring, Summer)

BBMB 4990: Undergraduate Research

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

Independent research under faculty guidance. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

BBMB 5040: Amino Acids and Proteins

Credits: 2. Contact Hours: Lecture 2.

Protein structure and chemistry including protein folding, examples of enzyme functions and mechanisms, methods of protein expression, purification, and analysis, and elementary enzyme kinetics. (Typically Offered: Fall, Spring)

BBMB 5050: Bioenergetics and Metabolism

Credits: 2. Contact Hours: Lecture 2.

Examination of catabolic pathways involved in the oxidation of organic and inorganic molecules, and energy metabolism involving inputs from light or other non-light sources. Central metabolism and glycolysis, fermentation, aerobic and anaerobic respiration, photosynthesis.

(Typically Offered: Fall)

BBMB 5060: Membrane Biochemistry

Credits: 2. Contact Hours: Lecture 2.

Prereq: CHEM 3320 or equivalent

Analysis of the structure and functions of biological lipids and membranes. Mechanisms of membrane transport, trafficking, and signaling mechanisms. Investigation of the structures, roles, and biogenesis of transmembrane proteins. (Typically Offered: Fall, Spring)

BBMB 5070: Biochemistry of Nucleic Acids

Credits: 2. Contact Hours: Lecture 2.

Prereq: CHEM 3320 or equivalent

Analysis of the chemical structure, function, synthesis, and metabolism of nucleic acids. Chemical characterization of nucleotides, polynucleotides, DNA, and RNA. Analysis of transcription, translation, and the genetic code. (Typically Offered: Fall, Spring)

BBMB 5100: Molecular Biology and Biochemistry of RNA

Credits: 2. Contact Hours: Lecture 2.

Biochemical processes that define structure and function of nucleic acids. Emphasis on the molecular processes that take place during synthesis, processing, and function of different RNA species; review of recent advances in RNA research. (Typically Offered: Fall)

BBMB 5120: Principles of Glycobiology

Credits: 2. Contact Hours: Lecture 2.

Structure, synthesis, and functions of glycans, glycoproteins, glycolipids, and glycosylated secondary metabolites in prokaryotic and eukaryotic organisms. Fundamental role of glycans in living organisms along with the most advanced techniques used for their characterization. Biotechnological applications of glycans and glycoconjugates for human needs. Offered even-numbered years. (Typically Offered: Spring)

BBMB 5300: Prokaryotic Diversity and Ecology

(Dual-listed with MICRO 4300). (Cross-listed with MICRO 5300).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (MICRO 3020 and MICRO 3020L) or Graduate Classification

In-depth exploration of plant biochemistry with a focus on the unique aspects of plants versus heterotrophic organisms. Analysis of unique pathways, metabolic trafficking between unique organelles and tissues, and techniques for their characterization. Offered even-numbered years. (Typically Offered: Fall)

BBMB 5310: Plant Biochemistry

Credits: 2. Contact Hours: Lecture 2.

Prereq: BBMB 3010

In-depth exploration of plant biochemistry with a focus on the unique aspects of plants versus heterotrophic organisms. Analysis of unique pathways, metabolic trafficking between unique organelles and tissues, and techniques for their characterization. (Typically Offered: Fall)

BBMB 5320: Enzyme Kinetics and Mechanisms

Credits: 2. Contact Hours: Lecture 2.

Advanced concepts of enzyme kinetics and catalysis. Experimental methods for determining kinetic and chemical reaction mechanisms. Enzyme structure/function relationships and the role of dynamics in catalysis. Offered odd-numbered years. (Typically Offered: Spring)

BBMB 5420A: Introduction to Molecular Biology Techniques: DNA Techniques

(Cross-listed with BMS 5420A/ EEOB 5420A/ FSHN 5420A/ GDCB 5420A/ HORT 5420A/ NREM 5420A/ NUTRS 5420A/ VDPAM 5420A/ VMPM 5420A).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

BBMB 5420B: Introduction to Molecular Biology Techniques: Protein

(Cross-listed with BMS 5420B/ EEOB 5420B/ FSHN 5420B/ GDCB 5420B/ HORT 5420B/ NREM 5420B/ NUTRS 5420B/ VDPAM 5420B).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only. (Typically Offered: Spring, Summer)

BBMB 5420C: Introduction to Molecular Biology Techniques: Cell Techniques

(Cross-listed with BMS 5420C/ EEOB 5420C/ FSHN 5420C/ GDCB 5420C/ HORT 5420C/ NREM 5420C/ NUTRS 5420C/ VMPM 5420C/ VDPAM 5420C).

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. ular biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

BBMB 5420D: Introduction to Molecular Biology Techniques: Plant Transformation

(Cross-listed with BMS 5420D/ EEOB 5420D/ FSHN 5420D/ GDCB 5420D/ HORT 5420D/ NREM 5420D/ NUTRS 5420D/ VMPM 5420D/ VDPAM 5420D).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of tranformants. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

BBMB 5420E: Introduction to Molecular Biology Techniques: Proteomics

(Cross-listed with BMS 5420E/ EEOB 5420E/ FSHN 5420E/ GDCB 5420E/ HORT 5420E/ NREM 5420E/ NUTRS 5420E/ VMPM 5420E/ VDPAM 5420E).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

BBMB 5420F: Introduction to Molecular Biology Techniques: Metabolomics

(Cross-listed with BMS 5420F/ EEOB 5420F/ FSHN 5420F/ GDCB 5420F/ HORT 5420F/ NREM 5420F/ NUTRS 5420F/ VMPM 5420F/ VDPAM 5420F).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

BBMB 5420G: Introduction to Molecular Biology Techniques: Genomic

(Cross-listed with BMS 5420G/ EEOB 5420G/ FSHN 5420G/ GDCB 5420G/ HORT 5420G/ NREM 5420G/ NUTRS 5420G/ VMPM 5420G/ VDPAM 5420G).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

BBMB 5450: Molecular Signaling

(Dual-listed with BBMB 4450).

Credits: 2. Contact Hours: Lecture 2.

Prereq: (BBMB 5060 AND BBMB 5070) OR Graduate Classification

Molecular mechanisms of cellular signaling including receptor activation, desensitization and cross talk, signal transduction pathways, nuclear receptors, growth factor and extracellular matrix activators, protein kinases, caspase and transcription factor downstream signals, and lipids, gases and cyclic nucleotides as regulators of cell signaling. Course content includes current literature, student and instructor presentations and, for BBMB 5450 students only, research proposal writing and review. Offered even-numbered years. (Typically Offered: Spring)

BBMB 5490: Nuclear Magnetic Resonance Spectroscopy

(Cross-listed with CHEM 5490).

Credits: 3. Contact Hours: Lecture 3.

Theoretical principles of NMR, practical aspects of experimental NMR, solution and solid state NMR, methodologies for molecule characterization, protein structure determination, NMR relaxation, and recent advances. (Typically Offered: Spring)

BBMB 5530: Current Research in Chemical and Physical Biology

Credits: 2. Contact Hours: Lecture 2.

Principles and applications of chemical and physical methods to analyze biological structures and function ranging from cells to individual biomolecules. Offered even-numbered years. (Typically Offered: Fall)

BBMB 5610: Molecular Biophysics

(Dual-listed with BBMB 4610).

Credits: 2. Contact Hours: Lecture 2.

Physical methods for the study of molecular structure and organization of biological materials. X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy. Registration for the graduate credit commits the student to graduate-level examinations, which differ from undergraduate-level examinations in the number and/or difficulty of questions. (Typically Offered: Spring)

BBMB 5610L: Laboratory in Molecular Biophysics

Credits: 2. Contact Hours: Lecture 1, Laboratory 3.

Practice in methods of X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy as applied to macromolecules. (Typically Offered: Spring)

BBMB 5690: Structural Bioinformatics

(Cross-listed with BCB 5690/ COMS 5690/ CPRE 5690/ GDCB 5690).

Credits: 3. Contact Hours: Lecture 3.

Molecular structures including genes and gene products: protein, DNA and RNA structure. Structure determination methods, structural refinement, structure representation, comparison of structures, visualization, and modeling. Molecular and cellular structure from imaging. Analysis and prediction of protein secondary, tertiary, and higher order structure, disorder, protein-protein and protein-nucleic acid interactions, protein localization and function, bridging between molecular and cellular structures. Molecular evolution. (Typically Offered: Fall)

BBMB 5900: Special Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

By arrangement.

BBMB 5930: Workshop in Biochemistry and Biophysics

Credits: 1. Repeatable.

Workshops in selected topics in biochemistry and biophysics. Credit in this course does not meet the requirement for advanced graduate electives in Biochemistry. Spring only: BBMB Undergraduate Research Symposium participation. Scheduled class meetings are required in addition to attending the symposium. (Typically Offered: Fall, Spring)

Courses for graduate students:**BBMB 6150: Molecular Immunology**

(Cross-listed with MICRO 6150/ VMPM 6150).

Credits: 3. Contact Hours: Lecture 3.

Current topics in molecular aspects of immunology: T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control and activate immune function. Offered odd-numbered years. (Typically Offered: Fall)

BBMB 6610: Advanced Topics in Neuroscience

(Cross-listed with GDCB 6610/ KIN 6610/ NEURO 6610).

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: NEURO 5560 (or comparable course) or permission of instructor

Students will present three journal articles and two overview lectures on topics in neuroscience that are related but outside of their own research interest. Offered even-numbered years. (Typically Offered: Spring)

BBMB 6750: Nucleic Acid Structure and Function

Credits: 2. Contact Hours: Lecture 2.

In-depth discussion of nucleic acid properties, structures and structure/function relationships. Interactions between nucleic acids and proteins will be emphasized. Offered even-numbered years. (Typically Offered: Fall)

BBMB 6810: Advanced Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Student presentations. (Typically Offered: Fall, Spring)

BBMB 6820: Departmental Seminar

Credits: Required. Contact Hours: Lecture 1.

Repeatable.

Faculty, staff and invited guest research seminar. (Typically Offered: Fall, Spring)

BBMB 6960: Research Seminar

(Cross-listed with AGRON 6960/ PLBIO 6960/ FOR 6960/ GDCB 6960/ HORT 6960).

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

BBMB 6980: Seminar in Molecular, Cellular, and Developmental Biology

(Cross-listed with MCDB 6980/ GDCB 6980/ MICRO 6980/ VMPM 6980).

Credits: 1-2. Contact Hours: Lecture 2.

Repeatable.

Student and faculty presentations. (Typically Offered: Spring)

BBMB 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Research. (Typically Offered: Fall, Spring)

Bioinformatics and Computational Biology (BCB)

Courses primarily for undergraduates:

BCB 4900: Independent Study

Credits: 1-5. Repeatable, maximum of 9 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

BCB 5230: Mathematical Modeling in Biology

(Cross-listed with MATH 5230/ BCBO 5230).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 2660 or MATH 2670 or Graduate Classification

Introduction to mathematical techniques for modeling and simulation, parameter identification, and analysis of biological systems. Applications drawn from many branches of biology and medicine. Apply differential equations, difference equations, and dynamical systems theory to a wide array of biological problems. MATH 2650 or equivalent recommended. (Typically Offered: Fall)

BCB 5440: Fundamentals of Bioinformatics

(Cross-listed with GDCB 5440/ COMS 5440/ CPRE 5440).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

A practical, hands-on overview of how to apply bioinformatics to biological research. Recommended for biologists desiring to gain computational molecular biology skills. Topics include: sequence analysis, genomics, proteomics, phylogenetic analyses, ontology enrichment, systems biology, data visualization and emergent technologies. Offered odd-numbered years. (Typically Offered: Fall)

BCB 5460: Computational Skills for Biological Data

(Cross-listed with EEOB 5460).

Credits: 3. Contact Hours: Lecture 1, Discussion 2.

Computational skills necessary for biologists working with big data sets. UNIX commands, scripting in R and Python, version control using Git and GitHub, and use of high performance computing clusters. Combination of lectures and computational exercises. (Typically Offered: Fall)

BCB 5670: Bioinformatics Algorithms

(Cross-listed with COMS 5670/ CPRE 5670).

Credits: 3. Contact Hours: Lecture 3.

Biology as an information science. A review of the algorithmic principles that are driving the advances in bioinformatics and computational biology.

BCB 5680: Statistical Bioinformatics

(Cross-listed with COMS 5680/ GDCB 5680/ STAT 5680).

Credits: 3. Contact Hours: Lecture 3.

Statistical models for sequence data, including applications in genome annotation, motif discovery, variant discovery, molecular phylogeny, gene expression analysis, and metagenomics. Statistical topics include model building, inference, hypothesis testing, and simple experimental design, including for big data/complex models. (Typically Offered: Spring)

BCB 5690: Structural Bioinformatics

(Cross-listed with BBMB 5690/ COMS 5690/ CPRE 5690/ GDCB 5690).

Credits: 3. Contact Hours: Lecture 3.

Molecular structures including genes and gene products: protein, DNA and RNA structure. Structure determination methods, structural refinement, structure representation, comparison of structures, visualization, and modeling. Molecular and cellular structure from imaging. Analysis and prediction of protein secondary, tertiary, and higher order structure, disorder, protein-protein and protein-nucleic acid interactions, protein localization and function, bridging between molecular and cellular structures. Molecular evolution. (Typically Offered: Fall)

BCB 5700: Systems Biology

(Cross-listed with COMS 5700/ CPRE 5700/ GDCB 5700/ STAT 5700).

Credits: 3. Contact Hours: Lecture 3.

Algorithmic and statistical approaches in computational functional genomics and systems biology. Analysis of high throughput biological data obtained using system-wide measurements. Topological analysis, module discovery, and comparative analysis of gene and protein networks. Modeling, analysis, and inference of transcriptional regulatory networks, protein-protein interaction networks, and metabolic networks. Dynamic systems and whole-cell models. Ontology-driven, network based, and probabilistic approaches to information integration. (Typically Offered: Spring)

BCB 5850: Fundamentals of Predictive Plant Phenomics

(Cross-listed with GDCB 5850/ ME 5850).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Principles of engineering, data analysis, and plant sciences and their interplay applied to predictive plant phenomics. Transport phenomena, sensor design, image analysis, graph models, network data analysis, fundamentals of genomics and phenomics. Multidisciplinary laboratory exercises. (Typically Offered: Fall)

BCB 5900: Special Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

BCB 5930: Workshop in Bioinformatics and Computational Biology

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 1 credits.

Current topics in bioinformatics and computational biology research. Lectures by off-campus experts. Students read background literature, attend preparatory seminars, attend all lectures, meet with lecturers. (Typically Offered: Fall, Spring)

BCB 5980: Cooperative Education

Credits: Required. Repeatable.

Off-campus work periods for graduate students in the field of bioinformatics and computational biology. (Typically Offered: Fall, Spring, Summer)

BCB 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Courses for graduate students:**BCB 6600: Selected Topics in Bioinformatics and Computational Biology**

Credits: 1-4. Contact Hours: Lecture 4.

Repeatable, maximum of 4 credits.

Topics of interest in the major research areas of computational molecular biology, including genomics, structural genomics, functional genomics, and computational systems biology. (Typically Offered: Fall, Spring, Summer)

BCB 6900: Student Seminar in Bioinformatics and Computational Biology

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Student research presentations. (Typically Offered: Spring)

BCB 6910: Faculty Seminar in Bioinformatics and Computational Biology

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Faculty research series.

BCB 6930: Entrepreneurship for Graduate Students in Science and Engineering

(Cross-listed with AGRON 6930/ EE 6930/ ENGR 6930/ GENET 6930/ ME 6930).

Credits: 1. Contact Hours: Lecture 3.

Repeatable, maximum of 2 credits.

Understanding key topics of starting a technology based company, from development of technology-led idea to early-stage entrepreneurial business. Concepts discussed include: entrepreneurship basics, starting a business, funding your business, protecting your technology/ business IP. Subject matter experts and successful, technology-based entrepreneurs will provide real world examples from their experience with entrepreneurship. Learn about the world class entrepreneurship ecosystem at ISU and Central Iowa. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

BCB 6970: Graduate Research Rotation

Credits: 1-30. Repeatable.

Graduate research projects performed under the supervision of selected faculty members in the Bioinformatics and Computational Biology major. (Typically Offered: Fall, Spring, Summer)

BCB 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Bioinformatics and Computational Biology (BCBIO)

Courses primarily for undergraduates:

BCBIO 1100: BCBIO Orientation

Credits: 0.5. Contact Hours: Lecture 0.5.

First 8 weeks. Orientation to the area of bioinformatics and computational biology. For students considering a major in BCBIO. Specializations and career opportunities. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

BCBIO 3220: Introduction to Bioinformatics and Computational Biology

(Cross-listed with BIOL 3220/ GEN 3220).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120

Genome sequencing, assembly, structural and functional annotation, and comparative genomics. Investigating these topics will develop skills in programming and scripting (Perl and/or Python), the use of biological databases, sequence alignment, similarity search, identification of sequence patterns, construction of phylogenetic trees, and comparative genomics. (Typically Offered: Fall)

BCBIO 4010: Bioinformatics of Sequences

(Cross-listed with BIOL 4010/ COMS 4010/ GEN 4010).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BCBIO 3220; (COMS 1270 OR COMS 2270); (MATH 1600 or MATH 1650); (MATH 1660 or STAT 3010); (STAT 1010 or STAT 1040 or STAT 3300) or Permission of Instructor

Application of computer science and statistics to molecular biology with a significant problem-solving component, including hands-on programming using Python to solve a variety of biological problems. String algorithms, sequence alignments, homology search, pattern discovery, genotyping, genome assembly, genome annotation, comparative genomics, protein structure. Offered odd-numbered years. (Typically Offered: Fall)

BCBIO 4060: Bioinformatics of OMICS

(Cross-listed with BIOL 4060/ COMS 4060/ GEN 4060).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120

Introduction to cutting edge OMICS analyses including transcriptome, proteome, metabolome, DNA-protein interactome, protein-protein interactome and methylome. Genomic analysis including transcriptome analysis, cancer genomics, comparative genomics, and regulatory network analysis. (Typically Offered: Spring)

BCBIO 4230: Mathematical Modeling in Biology

(Cross-listed with MATH 4230).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 2660 or MATH 2670

Introduction to mathematical techniques for modeling and simulation, parameter identification, and analysis of biological systems. Applications drawn from many branches of biology and medicine. Apply differential equations, difference equations, and dynamical systems theory to a wide array of biological problems. MATH 2650 or equivalent recommended. (Typically Offered: Fall)

BCBIO 4420A: Bioinformatics and Computational Biology Techniques: Sequence Database Searching

Credits: 0.5. Contact Hours: Lecture 0.3, Laboratory 0.5.

Repeatable, maximum of 2 credits.

Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. BIOL 3140 recommended. Offered on a satisfactory-fail basis only. (Typically Offered: Spring, Summer)

BCBIO 4420B: Bioinformatics and Computational Biology: Protein Structure Databases, Visualization, and Prediction

Credits: 0.5. Contact Hours: Lecture 0.3, Laboratory 0.5.

Repeatable, maximum of 2 credits.

Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. BIOL 3140 recommended. Offered on a satisfactory-fail basis only. (Typically Offered: Spring, Summer)

BCBIO 4420C: Bioinformatics and Computational Biology Techniques: Phylogenetic Analysis

Credits: 0.5. Contact Hours: Lecture 0.3, Laboratory 0.5.

Repeatable, maximum of 2 credits.

Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. BIOL 3140 recommended. Offered on a satisfactory-fail basis only. (Typically Offered: Spring, Summer)

BCBIO 4420D: Bioinformatics and Computational Biology Techniques: Microarray Analysis

Credits: 0.5. Contact Hours: Lecture 0.3, Laboratory 0.5.

Repeatable, maximum of 2 credits.

Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. BIOL 3140 recommended. Offered on a satisfactory-fail basis only. (Typically Offered: Spring, Summer)

BCBIO 4900: Independent Study

Credits: 1-5. Repeatable, maximum of 9 credits.

Prereq: BCBIO 3220; Junior or Senior classification; Permission of Instructor
Independent research projects for undergraduate students in bioinformatics and computational biology. Graduation Restriction: Students in the College of Liberal Arts and Sciences may use no more than 9 credits of BCBIO 4900 and 4910 toward graduation. (Typically Offered: Fall, Spring, Summer)

BCBIO 4910: Team Research Projects

Credits: 1-5. Repeatable, maximum of 9 credits.

Prereq: BCBIO 3220; Junior or Senior classification; Permission of Instructor
Research projects in bioinformatics and computational biology done by teams of students. Graduation Restriction: Students in the College of Liberal Arts and Sciences may use no more than 9 credits of BCBIO 4900 and 4910 toward graduation. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

BCBIO 5230: Mathematical Modeling in Biology

(Cross-listed with BCB 5230/ MATH 5230).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 2660 or MATH 2670 or Graduate Classification

Introduction to mathematical techniques for modeling and simulation, parameter identification, and analysis of biological systems. Applications drawn from many branches of biology and medicine. Apply differential equations, difference equations, and dynamical systems theory to a wide array of biological problems. MATH 2650 or equivalent recommended. (Typically Offered: Fall)

Biological/Pre-Medical Illustration (BPMI)

Courses primarily for undergraduates:

BPMI 3230: Scientific Illustration Principles and Techniques

(Cross-listed with ARTIS 3230).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Prereq: (ARTIS 2300; BIOL 2110 or BIOL 2120) or Permission of Instructor
Studio basics and professional techniques in black & white, continuous tone, and color. Introduction to professional practice and principles of communicating science through art. Emphasis on tools, materials, and rendering.

BPMI 3260: Illustration and Illustration Software

(Cross-listed with ARTIS 3260).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Prereq: ARTIS 3230/BPMI 3230, or permission of the instructor
An introduction to digital illustration software. Application of painting, drawing and image making techniques using vector and raster based programs.

BPMI 3270: Illustration as Communication

(Cross-listed with ARTIS 3270).

Credits: 3. Contact Hours: Studio 6.

Prereq: ARTIS 3230/BPMI 3230, or permission of the instructor
Investigation of illustration as a form of communication. Emphasis on problem solving, effective composition, and advancement of rendering skills.

BPMI 3370: Application of Scientific Illustration Techniques

(Cross-listed with ARTIS 3370).

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 6 credits.

Prereq: ARTIS 3270

Rendering techniques applied to different types of biological and scientific subjects emphasizing communication. The use of traditional and digital media. Term project required. (Typically Offered: Spring)

BPMI 3950: Field Illustration

Credits: 1-3. Contact Hours: Lecture 2, Laboratory 1.

Repeatable, maximum of 6 credits.

Prereq: ARTIS 2300 or permission of instructor

A combination seminar and field trip course emphasizing nature interpretation, field sketching techniques and preparation of a final illustration based on field experience. (Typically Offered: Spring, Summer)

BPMI 3980: Cooperative Education

Credits: Required.

Prereq: Junior standing or permission of instructor.

Required of all cooperative education students. Students must register for these courses prior to commencing each work period. (Typically Offered: Fall, Spring, Summer)

BPMI 4060X: Introduction to 3D Organic Modeling in ZBrush

(Cross-listed with ARTIS 4060X).

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 2 times.

Introduction to organic 3D model creation in ZBrush. Digital clay sculpting informed by traditional techniques. 3D printing pipeline. Emphasis on science research and visual design thinking for science communication. Some experience with other 3D modeling software beneficial, but not required. (Typically Offered: Spring)

BPMI 4700X: Data, Code, and Form

(Dual-listed with ARTIS 5700X). (Cross-listed with ARTIS 4700X).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Data visualization: strategies, principles, and tools for encoding data in visual art, applied art, and creative industry practices. The aesthetics of encoded data in creative practices. An overview of working with data as artistic and visual communication media including data acquisition, organization, representing, and interacting with data through art and design. Producing data display outputs that include a range of displays from screen to installation. (Typically Offered: Fall, Spring, Summer)

BPMI 4900: Independent Study

Credits: 1-3. Repeatable, maximum of 3 credits.

Prereq: Instructor Permission for Course

BPMI 4910: Portfolio Design and Professional Development

Credits: 2. Repeatable.

Prereq: BPMI 3370, junior or senior classification

Portfolio and professional preparation including identity package development, writing and speaking. Career-readiness, professional practice, leadership, networking, exploring research subfields within scientific visualization. Creating print and digital visual materials, learning approaches for entering the field, and developing business practice skills. Final portfolio materials presented at the end of the term. (Typically Offered: Spring)

BPMI 4940: Special Topics in Illustration

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Intensive exploration of illustration techniques in a studio or field setting.

BPMI 4970: Illustration Internship

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Offered on a satisfactory-fail basis only.

Biology (BIOL)

Courses primarily for undergraduates:

BIOL 1010: Introductory Biology

Credits: 3. Contact Hours: Lecture 3.

Life considered at cellular, organism, and population levels. Function and diversity of the living world. Presentation of basic biological principles as well as topics and issues of current human interest. Does not satisfy biology major requirements. (Typically Offered: Fall, Spring, Summer)

BIOL 1100: Biology Major Orientation

Credits: 1. Contact Hours: Lecture 0.5, Discussion 0.5.

Student orientation to the Biology program. Introduction to degree requirements, university policies and deadlines, campus resources, academic success strategies, degree planning, and registration procedures. Community building through the Biology Education Success Teams Learning Community. Required for first-year direct from high school Biology majors. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

BIOL 1110: Opportunities in Biology

Credits: 0.5. Contact Hours: Lecture 1.

Orientation to opportunities in Biology. Introduction to biological science disciplines, career awareness, and professional development opportunities. Required for first-year direct from high school Biology majors. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

BIOL 1120: Transfer Student Orientation

Credits: Required. Contact Hours: Lecture 1.

Orientation to the Biology major for students transferring from other academic institutions. Reviews university resources, academic success strategies, degree requirements, opportunities for campus involvement, and professional development. Required for all new transfer students and recommended for major changes. Online with on-campus activities. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

BIOL 1130X: Exploring Possibilities in Life Sciences

(Cross-listed with GEN 1130X).

Credits: 1. Contact Hours: Lecture 0.5, Discussion 0.5.

Seminar focusing on introducing students to life science fields and careers. Explores interdisciplinary career paths and guidance on strategies for success in achieving career goals. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

BIOL 1140X: Experiential Learning and Explorations in Life Sciences

(Cross-listed with GEN 1140X).

Credits: 1.

A second year experiential learning course focused on careers in life science fields. Sections offer themed learning allowing students to choose an immersive experience in an area of interest. Sections utilize hands-on engagement, field trips to on- and off-campus locations, and small group discussions with speakers working in different life science careers. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

BIOL 1550: Human Biology

Credits: 3. Contact Hours: Lecture 3.

A survey course of human biology, including principal structures and functions of the body systems and the diseases and disorders associated with them. Designed to meet general education requirements in natural science. Not recommended for those seeking a career in the allied health professions or for students majoring in life science. Does not satisfy biology major requirements. (Typically Offered: Fall, Spring)

BIOL 1730: Environmental Biology

(Cross-listed with ENVS 1730).

Credits: 3. Contact Hours: Lecture 3.

An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Does not satisfy biology major requirements. (Typically Offered: Fall, Spring)

BIOL 2010: Introduction to Environmental Issues

(Cross-listed with ENSCI 2010/ ENVS 2010).

Credits: 2. Contact Hours: Lecture 2.

Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change. (Typically Offered: Fall)

BIOL 2040: Biodiversity

(Cross-listed with ENVS 2040).

Credits: 2. Contact Hours: Lecture 4.

Survey of the major groups of organisms and biological systems. Definition, measurements, and patterns of distribution of organisms. Sources of information about biodiversity. Does not satisfy biology major requirements. Half semester course. See list of life science courses (<https://www.cals.iastate.edu/student-services/lifescience>) for additional information. (Typically Offered: Spring)

BIOL 2110: Principles of Biology I

Credits: 3. Contact Hours: Lecture 3.

Introduction to the nature of life, including the diversity of microbial, plant, and animal life; the nature of heredity; evolution; and principles of ecology. Intended for life science majors. (Typically Offered: Fall, Spring)

BIOL 2110L: Principles of Biology Laboratory I

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment in BIOL 2110

Laboratory to accompany 2110. (Typically Offered: Fall, Spring)

BIOL 2120: Principles of Biology II

Credits: 3. Contact Hours: Lecture 3.

Introduction to the chemical, molecular, and cellular basis of life; form and function of microbial, plant, and animal life. Intended for life science majors. HS courses in biology and chemistry necessary. Credit or enrollment in CHEM 1630 or CHEM 1770 recommended. (Typically Offered: Fall, Spring)

BIOL 2120L: Principles of Biology Laboratory II

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment in BIOL 2120

Laboratory to accompany 2120. (Typically Offered: Fall, Spring)

BIOL 2510: Biological Processes in the Environment

(Cross-listed with ENSCI 2510).

Credits: 3. Contact Hours: Lecture 3.

Principles of Biology from the level of macromolecules to the biosphere. Biological processes that affect environmental systems: including metabolism, energy pathways, biochemical reactions in cells, plant and microbial structure and function, element and water cycles. (Typically Offered: Spring)

BIOL 2550: Fundamentals of Human Anatomy

Credits: 3. Contact Hours: Lecture 3.

An introduction to human anatomy, beginning with cells and tissues, surveying all body systems, relating form to function. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider BIOL 3510 for their anatomy background. Does not satisfy biology major requirements. HS courses in biology and chemistry necessary. Credit or enrollment in BIOL 1010 recommended. (Typically Offered: Fall)

BIOL 2550L: Fundamentals of Human Anatomy Laboratory

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment in BIOL 2550

Investigation of human anatomy using models and dissections of preserved organs and model mammals. Pre-Medical students should consider 3510 for their anatomy background. Does not satisfy biology major requirements. (Typically Offered: Fall)

BIOL 2560: Fundamentals of Human Physiology

Credits: 3. Contact Hours: Lecture 3.

An introduction to human physiology, studying the function of all body systems. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic and immune, respiratory, digestive, urinary, and reproductive. Does not satisfy biology major requirements. HS courses in biology and chemistry necessary. Credit or enrollment in BIOL 1010 or BIOL 2550 recommended. (Typically Offered: Spring)

BIOL 2560L: Fundamentals of Human Physiology Laboratory

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment in BIOL 2560

Student-conducted experiments investigating concepts of human physiology with computer data acquisition and analysis. Interpretation of experimental results and preparation of lab reports. Does not satisfy biology major requirements. (Typically Offered: Spring)

BIOL 2570X: Bionics

Credits: 2.

Introduction to engineering design for life sciences focusing on bionics. Cross-disciplinary experiential learning projects drawing from human anatomy, physiology, mechanical, computer, and electrical engineering disciplines. Exploration of emerging technologies for human body augmentation and how these technologies can be developed for entrepreneurship projects. (Typically Offered: Fall, Spring)

BIOL 2890X: Experiences in Biodiversity Research

Credits: 2.

Designed to provide early undergraduates with practical experience in biodiversity research and demystify the path to careers in the field. Exposure to a variety of research contexts to increase experiences and engagement with biodiversity sciences; teachings on how to communicate and peer-review biodiversity science; and empowerment to seek future research opportunities. Regular cohort-building opportunities to increase student sense of belonging in biodiversity research. Includes an overnight field trip towards the end of the semester. Elective credit. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

BIOL 2990X: Introduction to Undergraduate Research

(Cross-listed with GEN 2990X).

Credits: 1-2.

Prereq: Instructor Permission for Course

Identify a research opportunity on campus and conduct guided research under the supervision. (Typically Offered: Fall, Spring, Summer)

BIOL 3070: Women in Science and Engineering

(Cross-listed with WGS 3070/ WISE 3070).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500; Sophomore classification

The interrelationships of women and science and engineering examined from historical, sociological, philosophical, and biological perspectives. Factors contributing to under-representation; feminist critiques of science; examination of successful strategies. Does not satisfy biology major advanced credit requirements. Meets U.S. Diversity Requirement. (Typically Offered: Fall)

BIOL 3110X: Genome Editing and Engineering

Credits: 1. Contact Hours: Laboratory 2.

Repeatable, maximum of 4 times.

Hands-on experiences in molecular cloning, CRISPR/Cas9 genome editing, and imaging techniques. Novel biological and cellular processes and disease-related pathways in mammalian cell culture and other model systems will be investigated through CRISPR/Cas9-mediated mutagenesis approaches. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

BIOL 3120: Ecology

(Cross-listed with AECL 3120/ ENSCI 3120).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: BIOL 2110; (BIOL 2120 or BIOL 2510)

Fundamental concepts and principles of ecology dealing with organisms, populations, communities, and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats. (Typically Offered: Fall, Summer)

BIOL 3130: Principles of Genetics

(Cross-listed with GEN 3130).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110, BIOL 2110L, BIOL 2120, and BIOL 2120L

Introduction to the principles of transmission and molecular genetics of plants, animals, and bacteria. Recombination, structure and replication of DNA, gene expression, cloning, quantitative genetics, and population genetics. Graduation Restriction: Students may receive graduation credit for no more than one of the following: GEN 2600, GEN 3130 and 3130L, GEN 3200, BIOL 3130 and 3130L, and AGRON 3200. (Typically Offered: Fall, Spring, Summer)

BIOL 3130L: Genetics Laboratory

(Cross-listed with GEN 3130L).

Credits: 1. Contact Hours: Laboratory 4.

Prereq: Credit or enrollment in BIOL 3130

Laboratory to accompany 3130. Graduation Restriction: Students may receive graduation credit for no more than one of the following: BIOL 3130 and 3130L, GEN 2600, GEN 3130, GEN 3200, and AGRON 3200. (Typically Offered: Fall, Spring)

BIOL 3140: Principles of Molecular Cell Biology

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110, BIOL 2110L, BIOL 2120, and BIOL 2120L

Integration of elementary principles of metabolism, bioenergetics, cell structure, and cell function to develop a molecular view of how the cell works. (Typically Offered: Fall, Spring)

BIOL 3150: Biological Evolution

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110, BIOL 2110L, BIOL 2120, and BIOL 2120L

The mechanisms of evolution. Topics in microevolution: population genetics, natural selection, genetic variation, and adaptation. Macroevolution: speciation, extinction, phylogeny, and major evolutionary patterns. (Typically Offered: Fall, Spring)

BIOL 3180: Introduction to Ecosystems

(Cross-listed with AGRON 3180/ ENSCI 3180/ NREM 3180).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 12 credits in AECL, AGRON, BIOL, CHEM, FOR, GEOL, NREM

Biological and physical processes affecting material and energy flows in natural and managed ecosystems. Understanding and predicting climate and management impacts on ecosystem services and sustainability. (Typically Offered: Spring)

BIOL 3190: Analysis of Environmental Systems

(Cross-listed with ENSCI 3190/ ENVS 3190).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENSCI 3120; junior classification

Systems approach to the analysis and modeling of material and energy flows in natural and managed environmental systems and the primary environmental factors controlling these systems. Applications in hydrology, biogeochemistry, and population dynamics. (Typically Offered: Spring)

BIOL 3220: Introduction to Bioinformatics and Computational Biology

(Cross-listed with BCBIO 3220/ GEN 3220).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120

Genome sequencing, assembly, structural and functional annotation, and comparative genomics. Investigating these topics will develop skills in programming and scripting (Perl and/or Python), the use of biological databases, sequence alignment, similarity search, identification of sequence patterns, construction of phylogenetic trees, and comparative genomics. (Typically Offered: Fall)

BIOL 3280: Molecular and Cellular Biology of Human Diseases

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120

Survey of molecular, genetic, and cellular aspects of human diseases. Fundamental concepts of cell biology and how they are linked to the pathologies of different classes of human diseases. Recent scientific advances with an emphasis on new methods of diagnosis and treatment. (Typically Offered: Fall)

BIOL 3350: Principles of Human and Other Animal Physiology

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120

Introduction to physiology of metabolic function in mammals and other animals. Metabolic processes and their interactions with various subsystems, approached from an organismal perspective. Integration of cellular, gastrointestinal, cardiovascular, respiratory, and renal processes, relevant to their control and integration at the nervous and endocrine system levels. Functional aspects of organismal physiology, energy and water balances, physiology of rest exercise, and environmental stress. (Typically Offered: Spring)

BIOL 3350L: Principles of Human and Other Animal Physiology Laboratory

Credits: 1. Contact Hours: Laboratory 3.

Optional laboratory to accompany Biology 3350. Student-conducted experiments investigating concepts of physiology. (Typically Offered: Spring)

BIOL 3360: Ecological and Evolutionary Animal Physiology

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120

Study of mechanisms by which animals perform life-sustaining functions; the evolution and adaptive significance of physiology traits, the diversity of physiological mechanisms, and how physiology and ecology interact.

BIOL 3440: Human Reproduction

(Cross-listed with WGS 3440).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120

Biology of human reproduction, including reproductive systems, hormones, and endocrinology of pregnancy, presented from a clinically-oriented perspective. Reviews health-related conditions such as infertility, sexually-transmitted diseases, and complicated pregnancy. (Typically Offered: Spring)

BIOL 3490: The Genome Perspective in Biology

(Cross-listed with GEN 3490).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: GEN 3130 or GEN 3200

Analysis of genome, RNA, and protein data using computer technology to answer biological questions on topics ranging from microbial diversity to human health. An introduction for students in the life sciences to the fields of genomics, bioinformatics and systems. (Typically Offered: Spring)

BIOL 3500: Comprehensive Human Anatomy

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: BIOL 2120

Comprehensive survey of human anatomy, emphasizing structural and functional relationships of major organ systems. Compartmental study of normal anatomy; practical clinical application of anatomical regions. Laboratory using 3-dimensional software to study anatomy in augmented reality. Recommended for pre-medical and pre-health professional students. (Typically Offered: Fall)

BIOL 3510: Comparative Chordate Anatomy

Credits: 5. Contact Hours: Lecture 3, Laboratory 4.

Prereq: BIOL 2120, junior classification

The evolution of chordates as reflected in the anatomy of extinct and living forms. Lecture topics include the history and diversity of chordates, comparisons of anatomic structures among major groups, and the adaptive significance of anatomic structures. Laboratory involves dissection of representative species. (Typically Offered: Spring)

BIOL 3520: Vertebrate Histology

Credits: 4. Contact Hours: Lecture 2, Laboratory 4.

Prereq: BIOL 2120

Microanatomy of animal cells, tissues, and organs; histology from a functional perspective; ultra-structure of cells, the four primary tissues, and different anatomical organs, focusing on function and clinical significance. Offered even-numbered years. (Typically Offered: Spring)

BIOL 3530: Introductory Parasitology

(Cross-listed with VPTH 3530/ MICRO 3530).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120

Biology and host-parasite relationships of major groups of animal parasites, and techniques of diagnosing and studying parasites. (Typically Offered: Spring)

BIOL 3540: Animal Behavior

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120

Ethological and sociobiological approaches to animal behavior. Genetic and developmental aspects of behavior, biological rhythms, orientation (including navigation, migration), communication, and social behavior (mating, aggression, parental care). (Typically Offered: Fall)

BIOL 3540L: Laboratory in Animal Behavior

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment in BIOL 3540

Laboratory techniques for observation, description and analysis of animal activities; independent projects. (Typically Offered: Fall)

BIOL 3550: Plants and People

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110

Uses of plants and fungi by humans and the importance of plants in the past, present, and future. Discussion of fruits, vegetables, grains, herbs, spices, beverages, oils, fibers, wood, medicines, and drugs, in the context of their agricultural, cultural, and economic roles in modern societies. Emphasis on origins and worldwide diversity of culturally important plants, their characteristics, and uses. (Typically Offered: Spring)

BIOL 3560: Dendrology

(Cross-listed with FOR 3560).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: BIOL 2110

Identification and ecology of North American woody plant species. Importance of woody plants in timber production and wildlife habitat. Historical conditions of North American forest regions will also be addressed. (Typically Offered: Fall)

BIOL 3570: Biology of Plants

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110 and BIOL 2120

Study of the general biology of plants, including plant cells and functions, basic anatomy of tissues, meristems, and organs; adaptive morphological features. Review of processes of photosynthesis, respiration, basic plant metabolic functions, and plant reproduction. Survey of evolutionary aspects of all major groups of land plants, and relationships of plants to their environment. Intended for Biology and other life science undergraduate majors. BIOL 2110L and BIOL 2120L recommended. (Typically Offered: Fall)

BIOL 3580: Bee Biology, Management, and Beekeeping

(Cross-listed with ENT 3580).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Introductory (2000-level) biology coursework or permission of an instructor

Bee diversity and evolution, ecology, role as pollinators, behavior, anatomy, and development. Management of bees as agricultural pollinators and honey producers, focusing on honey bees. Working with live bee hives and demonstration of practical beekeeping skills will occur during several field trips to local hives. (Typically Offered: Fall)

BIOL 3640: Invertebrate Biology

Credits: 3-4. Contact Hours: Lecture 3, Laboratory 4.

Prereq: BIOL 2110 and BIOL 2120

Emphasis on diversity, development, physiology, and behavior of invertebrate organisms- the 'spineless wonders' of the world. Laboratory involves hands-on study and investigation of living invertebrates. (Typically Offered: Fall)

BIOL 3650: Vertebrate Biology

(Cross-listed with AECL 3650).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: BIOL 2110 and BIOL 2110L

Evolution, biology, and classification of fish, amphibians, reptiles, birds, and mammals. Emphasis on a comparative analysis of the structure and function of organ systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates. (Typically Offered: Fall)

BIOL 3660: Plant Systematics

Credits: 4. Contact Hours: Lecture 2, Laboratory 4.

Prereq: BIOL 2110

Introduction to plant phylogenetic systematics, plant classification, survey of flowering plant families, and identification and field study of local plants. (Typically Offered: Spring)

BIOL 3700: GIS for Ecology and Environmental Science

(Cross-listed with ENSCI 3700).

Credits: 1-6. Repeatable.

Prereq: 6 credits BIOL; permission of instructor

Introduction to geographic information systems (GIS) with emphasis on ecological and environmental applications. No prior GIS experience required. Guided, individualized study of topics based on student background and interest. For students with prior experience, topics and activities are selected to build upon any previous experience and minimize duplication to previous GIS coursework. Potential topics include: basic concepts of GIS, data structures, database management, spatial analysis, modeling and visualization of ecological and environmental data. Case studies in ecological and environmental applications using ArcGIS. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

BIOL 3710: Ecological Methods

(Cross-listed with AECL 3710).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 3120; STAT 1010 or STAT 1040

Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations. (Typically Offered: Fall)

BIOL 3750: Marine Ecology and Ecosystems Dynamics

(Cross-listed with AECL 3750/ ENSCI 3750).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110

Overview of the ecological processes, ecosystems, and biodiversity in marine environments. Ever-changing dynamics caused by environmental disturbances, internal forces, or by human impacts on species and ecosystems. (Typically Offered: Spring)

BIOL 3930A: North American Field Trips in Biology: Pre-trip Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Prereq: 6 credits BIOL; permission of instructor

Discussion of relevant biological and cultural topics during semester preceding extended field trips to North American locations of interest to biologists.

BIOL 3930B: North American Field Trips in Biology: North American Field trip

Credits: 1-3. Repeatable.

Prereq: 6 credits BIOL; permission of instructor

Extended field trip under supervision of faculty member, usually during break periods, to North American locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule. Report required.

BIOL 3940A: International Field Trips in Biology: Pre-trip Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Prereq: 6 credits BIOL; permission of instructor

Discussion of relevant biological and cultural topics during semester preceding extended field trip to international locations of interest to biologists. Meets International Perspectives Requirement.

BIOL 3940B: International Field Trips in Biology: Field Trip to International Location

Credits: 1-3. Repeatable.

Prereq: 6 credits BIOL; permission of instructor

Extended field trips, under supervision of faculty member, usually during break periods, to international locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule. Meets International Perspectives Requirement.

BIOL 3950X: Professional Development in Biological Sciences-Identifying Opportunities and Preparing Application

Credits: 2. Contact Hours: Lecture 2.

For students interested in undergraduate research, competitive internships, graduate or professional school. This course will help students identify opportunities, create, and polish your applications. (Typically Offered: Fall)

BIOL 4010: Bioinformatics of Sequences

(Cross-listed with BCBIO 4010/ COMS 4010/ GEN 4010).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BCBIO 3220; (COMS 1270 OR COMS 2270); (MATH 1600 or MATH 1650); (MATH 1660 or STAT 3010); (STAT 1010 or STAT 1040 or STAT 3300) or Permission of Instructor

Application of computer science and statistics to molecular biology with a significant problem-solving component, including hands-on programming using Python to solve a variety of biological problems. String algorithms, sequence alignments, homology search, pattern discovery, genotyping, genome assembly, genome annotation, comparative genomics, protein structure. Offered odd-numbered years. (Typically Offered: Fall)

BIOL 4020: Introduction to Pathology

(Cross-listed with VPTH 4020).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110, BIOL 2110L, BIOL 2120, and BIOL 2120L

Introductory exploration of pathology as a medical discipline. This includes study of disease mechanisms via an introduction to general pathology topics (cell degeneration, necrosis, disturbances of growth, disturbances of blood flow, inflammation, neoplasia) and organ system-specific response to injury. (Typically Offered: Fall)

BIOL 4030: Introduction to Pathology II

(Cross-listed with VPTH 4030).

Credits: 3. Contact Hours: Lecture 3.

Prereq: VPTH 4020 and BIOL 4020

Continuation of pathology topics begun in VPTH/BIOL 4020. How specific organ systems respond to injury using principles and information covered in VPTH 4020/ BIOL 4020. Study of a set of prototypical diseases that affect humans and animals. (Typically Offered: Spring)

BIOL 4060: Bioinformatics of OMICS

(Cross-listed with BCBIO 4060/ COMS 4060/ GEN 4060).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120

Introduction to cutting edge OMICS analyses including transcriptome, proteome, metabolome, DNA-protein interactome, protein-protein interactome and methylome. Genomic analysis including transcriptome analysis, cancer genomics, comparative genomics, and regulatory network analysis. (Typically Offered: Spring)

BIOL 4140: Life History and Reproductive Strategies

(Dual-listed with EEOB 5140).

Credits: 3. Contact Hours: Lecture 3.

Evolution of ecological adaptations at the individual, population, and species level. Emphasis is on evolutionary mechanisms and adaptive strategies related to life histories and reproduction; age and size at maturity; lifespan and senescence; offspring size/number trade-offs; sex and mating systems; sex determination and sex ratios. BIOL 3150 or equivalent recommended. Offered odd-numbered years. (Typically Offered: Fall)

BIOL 4210: Biological Principles of Aging

(Dual-listed with EEOB 5210/ GERON 5210).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110 and BIOL 2120

Basic biological principles of aging. Course modules include an introduction to the aging process, body systems and normal aging, environment and the biology of aging. In addition, disorders and diseases of aging, prevention and treatment and exercise and aging topics will be covered. (Typically Offered: Summer)

BIOL 4230: Developmental Biology

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3130

Principles of embryogenesis and animal development. Establishment of body axes, organ and limb development, and specification of cell fates. Emphasis on cell signaling and the control of gene expression within the context of a developing organism. Medically relevant subjects will be discussed, including stem cells, cancer biology, fertilization, and cloning. (Typically Offered: Spring)

BIOL 4230L: Developmental Biology Laboratory

Credits: 1. Contact Hours: Laboratory 3.

Repeatable, maximum of 4 times.

Prereq: Credit or enrollment in BIOL 4230 or permission of the instructor.

Experiments and explorations illustrating fundamental principles of multicellular development. (Typically Offered: Spring)

BIOL 4280: Cell Biology

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3140

Cell structure and function in health and disease. Emphasis on cellular dynamics, transport, organelle biogenesis and signaling, and how defects in these processes disrupt cell function. (Typically Offered: Spring)

BIOL 4300: Principles of Plant Physiology

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120; CHEM 2310 or CHEM 3320

An overview of classical and current concepts, principles, and approaches regarding the basic mechanisms of plant function underlying growth, development, and survival of plants. Topics covered include environmental and developmental signals, plant hormone action, signal transduction, mineral nutrition, water relations, metabolism, and photosynthesis. (Typically Offered: Spring)

BIOL 4340: Endocrinology

(Dual-listed with EEOB 5340).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110 and BIOL 2120

Chemical integration of vertebrate organisms. The structure, development, and evolution of the endocrine glands and the function and structure of their hormones. (Typically Offered: Spring)

BIOL 4360: Neurobiology

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120

Basic principles of brain function and development. Signaling of nerve cells, synaptic transmission, structure/function of ion channels and receptors, memory and synaptic plasticity, movement and central control, sensation and sensory processing, construction of neural circuits, early brain development, complex brain functions in health and disease. (Typically Offered: Fall)

BIOL 4510: Plant Evolution and Phylogeny

(Dual-listed with EEOB 5510).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: BIOL 3150

Survey of land plant evolution; phylogenetic comparison of anatomical, reproductive, and life history specializations. Relationships among bryophytes, lycophytes, pteridophytes, gymnosperms, and angiosperms emphasizing significant evolutionary changes documented by paleobotanical, morphological, and molecular studies. (Typically Offered: Fall, Spring, Summer)

BIOL 4540: Plant Anatomy

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: BIOL 2120L

Characteristics of cell and tissue types in vascular plants. Anatomy of developing and mature stems, roots, and leaves, including secondary (woody) growth. Introduction to the special anatomy of flowers and seeds. BIOL 3660 recommended. Offered odd-numbered years. (Typically Offered: Fall)

BIOL 4550: Bryophyte and Lichen Biodiversity

(Dual-listed with EEOB 5550).

Credits: 3.

Prereq: Credit in BIOL 2110 and BIOL 2110L

Introduction to the biology and ecology of mosses, liverworts, and lichens. Emphasis on identification and diversity of local representatives of these three groups of organisms. Required field trips and service-learning. (Typically Offered: Spring)

BIOL 4560: Principles of Mycology

(Cross-listed with MICRO 4560).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: 10 credits BIOL or MICRO

Morphology, diversity, and ecology of fungi; their relation to agriculture, industry, and human health. (Typically Offered: Fall)

BIOL 4570: Herpetology

(Cross-listed with AECL 4570).

Credits: 2. Contact Hours: Lecture 2.

Prereq: BIOL 3510 or BIOL 3650

Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles. (Typically Offered: Fall)

BIOL 4570L: Herpetology Laboratory

(Cross-listed with AECL 4570L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: BIOL 3510 or BIOL 365 or AECL 3650; enrollment in BIOL 4570 or AECL 4570

Laboratory to accompany Biology/Animal Ecology 4570. Focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles. (Typically Offered: Fall)

BIOL 4580: Ornithology

(Cross-listed with AECL 4580).

Credits: 2. Contact Hours: Lecture 2.

Prereq: BIOL 3510 or AECL 3650

Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation. (Typically Offered: Spring)

BIOL 4580L: Ornithology Laboratory

(Cross-listed with AECL 4580L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: BIOL 3510 or AECL 3650/BIOL 3650 and Credit or concurrent enrollment in AECL 4580/BIOL 4580

Laboratory complements lecture topics with emphasis on external anatomy, identification and distribution of Midwest birds, and field trips. (Typically Offered: Spring)

BIOL 4590: Mammalogy

(Dual-listed with EEOB 5590). (Cross-listed with AECL 4590).

Credits: 2. Contact Hours: Lecture 2.

Prereq: AECL 3650 or BIOL 3510

Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation. (Typically Offered: Spring)

BIOL 4590L: Mammalogy Laboratory

(Cross-listed with AECL 4590L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: BIOL 3510 or BIOL/AECL 3650; concurrent enrollment in BIOL 4590 or AECL 4590 required

Laboratory focus on identification, survey methods, distribution, habits, and habitats of mammals. Several field trips. (Typically Offered: Spring)

BIOL 4620: Evolutionary Genetics

(Cross-listed with GEN 4620).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3150

The population and quantitative genetic basis of evolutionary processes.

The role of genetic variation in natural selection and the influences of random processes on evolutionary change. The determinants of phenotype. (Typically Offered: Fall)

BIOL 4640: Wetland Ecology

(Cross-listed with ENSCI 4640).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 15 credits in BIOL

Ecology, classification, creation and restoration, and management of wetlands. Emphasis on North American temperate wetlands. (Typically Offered: Fall, Spring, Summer)

BIOL 4650: Macroevolution

(Dual-listed with EEOB 5650).

Credits: 4. Contact Hours: Lecture 2, Discussion 1.

Prereq: BIOL 3150

The history and diversity of life on earth; evolutionary patterns and processes above the species level. Diversity from a phylogenetic perspective. Empirical exercises include: phylogeny estimation, ancestral states, estimating diversification rates, evaluating the tempo and mode of evolution, biogeographic patterns, and trait associations across the tree of life. Offered even-numbered years. (Typically Offered: Spring)

BIOL 4710: Introductory Conservation Biology

(Cross-listed with AECL 4710).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3120

Examination of conservation issues from a population and community perspective. The role of genetics, demography, and environment in determining population viability, habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology. (Typically Offered: Spring)

BIOL 4740: Plant Ecology

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3120

Principles of plant population and community ecology. (Typically Offered: Fall, Spring, Summer)

BIOL 4760: Functional Ecology

(Dual-listed with EEOB 5760).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3120

The nature of adaptations to physical and biotic environments. Biophysical, biomechanical, and physiological bases of the structure, form, growth, distribution, and abundance of organisms. Offered odd-numbered years. (Typically Offered: Spring)

BIOL 4800: Studies in Marine Biology

Credits: 1-8. Contact Hours: Lecture 8.

Repeatable.

Courses taken at Gulf Coast Research Laboratory and other marine biological stations are transferred to Iowa State University under this number.

BIOL 4810: Summer Field Studies

Credits: 1-8. Contact Hours: Lecture 8.

Repeatable.

Courses taken at summer biological field stations are transferred to Iowa State University under this number. See www.biology.iastate.edu for links to field stations located in different biomes: coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mountains.

BIOL 4820: Tropical Biology

Credits: 1-4. Contact Hours: Lecture 4.

Repeatable, maximum of 8 credits.

Prereq: One year of college biology

Students registering for courses taught by the Organization for Tropical Studies will receive credit for this ISU course when requesting a transfer of credits. Knowledge of Spanish desirable but not required.

BIOL 4830: Environmental Biogeochemistry

(Dual-listed with ENSCI 5830). (Cross-listed with ENSCI 4830/ GEOL 4830).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Combined 12 credits in biology, chemistry, and physics

An exploration of biological, physical and geochemical impacts on the structure and function of ecosystems from local to global scales. Emphasis on the cycles of carbon, nitrogen, phosphorus, sulfur, and metals, and how these have been impacted by human activity. Topics may include biological feedbacks to climate change, microbial physiology and redox reactions, plant/soil feedbacks, terrestrial/aquatic linkages, early Earth processes and the origins of life. Offered odd-numbered years. (Typically Offered: Spring)

BIOL 4840: Ecosystem Ecology

(Cross-listed with ENSCI 4840).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Combined 12 credits in biology, chemistry, and physics

Introduction of the study of ecosystems and the biological and physical factors that influence their properties and dynamics. Conceptual foundations for ecosystem studies. Interactions among organisms, biological diversity, and ecosystem attributes. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems. Global change issues. Offered odd-numbered years. (Typically Offered: Spring)

BIOL 4850: Community Ecology

(Dual-listed with EEOB 5850).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3120

The effect of interspecific interactions on the structure and dynamics of natural and managed communities; including concepts of guild structure and trophic web dynamics and their importance to the productivity, diversity, stability, and sustainability of communities. The implications of interspecific interactions in the management of wild species will be emphasized with illustrative case histories of interactions between plants, invertebrates, and vertebrates. (Typically Offered: Spring)

BIOL 4860: Aquatic Ecology

(Cross-listed with AECL 4860/ ENSCI 4860).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3120 or ENSCI 3190 or ENSCI 4020 or NREM 3010

Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology. (Typically Offered: Fall)

BIOL 4860L: Aquatic Ecology Laboratory

(Cross-listed with AECL 4860L/ ENSCI 4860L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Concurrent enrollment in BIOL 4860

Field trips and laboratory exercises to accompany 4860. Hands-on experience with aquatic research and monitoring techniques and concepts. (Typically Offered: Fall)

BIOL 4870: Microbial Ecology

(Cross-listed with ENSCI 4870/ GEOL 4870/ MICRO 4870).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 credits in Biology and 6 credits in Chemistry

Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized. (Typically Offered: Fall)

BIOL 4880: Identification of Aquatic Organisms

Credits: 1. Contact Hours: Laboratory 3.

On-line taxonomic and identification exercises to accompany 4860. Instruction and practice in the identification of algae, aquatic macrophytes, zooplankton, and benthos. (Typically Offered: Fall, Spring)

BIOL 4890: Population Ecology

(Dual-listed with AECL 5890/ EEOB 5890). (Cross-listed with AECL 4890).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: BIOL 3120; (STAT 1010 or STAT 1040); (MATH 1510, 1600, 1650 or Graduate standing)

Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation. Offered even-numbered years. (Typically Offered: Fall)

BIOL 4900: Independent Study

Credits: 1. Repeatable, maximum of 9 credits.

Prereq: Instructor Permission for Course

Independent study opportunities for undergraduate students in the biological sciences. Graduation Restriction: No more than 9 credits in BIOL 4900 may be counted toward graduation and, of those, only 2 credits may be applied toward the biology advanced course requirement. (Typically Offered: Fall, Spring, Summer)

BIOL 4910: Undergraduate Teaching Experience

Credits: 1-2. Repeatable.

Prereq: Instructor Permission for Course

For students registering to be undergraduate teaching assistants. Offered on a satisfactory-fail basis only.

BIOL 4920: Preparing for Graduate School in the Biological Sciences

Credits: 1. Contact Hours: Lecture 1.

Prereq: Sophomore classification; major in College of Agriculture and Life Sciences

For students considering pursuing a graduate degree in the biological sciences. Professional development topics including the defining of academic and career areas of interest, finding and evaluating appropriate programs of graduate study, the graduate school application process, and developing a curriculum vita. Exploration of learning opportunities at field stations, research internships, and independent research activities. (Typically Offered: Fall)

BIOL 4940: Biology Internship

Credits: 1-3. Repeatable.

Prereq: 8 credits in Biology and Permission of Instructor

Professional experiences in biological sciences. Intended for Biology majors. Graduation Restriction: No more than 9 credits in BIOL 4940 may be counted toward graduation and, of those, only 6 credits may be applied toward the Biology advanced course requirement. (Typically Offered: Fall, Spring, Summer)

BIOL 4950: Undergraduate Seminar

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Prereq: Instructor Permission for Course

Content varies from year to year and may include detailed discussion of special topics in biology, current issues in biology, or careers in biology. (Typically Offered: Fall, Spring)

BIOL 4980: Cooperative Education

Credits: Required. Repeatable.

Prereq: Department Cooperative Education Coordinator Permission for Course

Required of all cooperative education students. Students must register for this course prior to commencing each work period. (Typically Offered: Fall, Spring, Summer)

BIOL 4990: Undergraduate Research Experience

Credits: 1-3. Repeatable, maximum of 9 credits.

Prereq: Instructor Permission for Course

Research opportunities for undergraduate students in the biological sciences. Intended for Biology majors. Graduation Restriction: No more than 9 credits in BIOL 4990 may be counted toward graduation and, of those, only 6 credits may be applied toward the Biology advanced course requirement. (Typically Offered: Fall, Spring, Summer)

Biomedical Engineering (BME)

Courses primarily for undergraduates:

BME 1040: Biomedical Engineering First-Year Learning Community

Credits: Required. Contact Hours: Lecture 1.

Curriculum and career planning; academic course support for first-year students. Restricted to BME majors. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

BME 1600: Biomedical Engineering Problems with Computer Applications Laboratory

Credits: 3.

Prereq: MATH 1430 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 1650

Formulation and solution of engineering problems; significant figures; use of SI units; graphing and curve-fitting; flowcharting; introduction to material balances, statics, and electric circuits in the context of biomedical engineering problems; use of spreadsheet programs to solve and present engineering problems; solution of engineering problems using computer programming languages. Only one of ENGR 1600, ABE 1600, AERE 1600, BME 1600, CHE 1600, CE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600 and SE 1850 may count towards graduation. (Typically Offered: Fall, Spring)

BME 2200: Introduction to Biomedical Engineering

(Cross-listed with CHE 2200).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120; (CHEM 1670 or CHEM 1770); (ABE 1600 or AERE 1600 or BME 1600 or CE 1600 or CHE 1600 or CPRE 1850 or EE 1850 or ENGR 1600 or IE 1480 or ME 1600 or SE 1850); MATH 1660; PHYS 2320; PHYS 2320L

Engineering analysis of basic biology and engineering problems associated with living systems and health care delivery. The course will illustrate biomedical engineering applications in such areas as: biotechnology, biomechanics, biomaterials and tissue engineering, and biosignal and image processing, and will introduce the basic life sciences and engineering concepts associated with these topics. (Typically Offered: Spring)

BME 3410: BioMEMs and Nanotechnology

(Cross-listed with EE 3410).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BME 2200

Overview of Micro-Electro-Mechanical-System (MEMS) technologies for bioengineering, fundamentals of microfluidic device design, fabrication, and characterization, survey of microfluidic functional building blocks for lab-on-a-chip applications including mixers, valves, channels, and chambers. Topics of nanotechnology in bioengineering, nanoscale building block technologies for bioengineering including self-assembling, surface chemical treatment, nano-imprinting, nano-particles, nano-tubes, nano-wires, and stimuli-responsive biomaterials.

BME 3520: Molecular, Cellular and Tissue Biomechanics

Credits: 3. Contact Hours: Lecture 3.

Prereq: BME 2200; EM 3240; MATE 2730

Introduction to the anatomy of the musculoskeletal system and connective tissue. Range of movement, joint dislocation, bone deformity and fracture. Application of continuum mechanics to both living and non-living systems. Laws of motion, free-body diagrams and simple force analysis of musculoskeletal system. Biomechanical response of soft and hard tissues with emphasis on microstructure and mechanical properties. Applications to bioengineering design.

BME 4400: Biomedical Applications of Chemical Engineering

(Cross-listed with CHE 4400).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHE 2100 or CHE 2200, MATH 2660 or MATH 2670, PHYS 2320

Applications of material and energy balances, transport phenomena, chemical reaction engineering, and thermodynamics to problems in biomedical engineering and applied physiology; survey of biomedical engineering; biomaterials; biomedical imaging.

BME 4470: Biomedical Design and Manufacturing

(Cross-listed with IE 4470).

Credits: 3. Contact Hours: Lecture 3.

Exploration of biology, materials, body mechanics, manufacturing, quality control, and ethics and the intersection of these subjects as they relate to biomedical manufacturing. Study of medical data (CT, MRI, etc.) processing, biomedical design, 3D bioprinting and additive manufacturing concepts.

BME 4500: Biosensors

(Cross-listed with EE 4500).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BME 2200

Overview of biosensors and bioanalytical challenges; designing for performance including various analytical problems, ion-selective membranes, characteristics of enzymes and basics of bioaffinity sensing; fundamentals of bioselective layers including depositing films and membranes, surfaces for immobilization and bioselective agents; survey of different biosensing technologies including electroanalytical, biomembrane, optical, and acoustic-wave based sensors.

BME 4500L: Biosensors Laboratory

(Cross-listed with EE 4500L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: BME 2200; concurrent enrollment in BME 4500 or EE 4500

Laboratory course accompanying BME 4500. Design, fabrication, and characterization of various electrical, chemical, polymer, optical and acoustic sensors.

BME 4560: Biomaterials

(Dual-listed with MSE 5560). (Cross-listed with MATE 4560).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 1780 and (MATE 2160 or MATE 2730 or MATE 3920)

Presentation of the basic chemical and physical properties of biomaterials, with special emphasis on metallic, ceramic, polymeric, and composite biomaterials, as they are related to their manipulation by the engineer for incorporation into living systems. Role of microstructure and properties needed to select and design biomaterials used in medical devices, artificial organs, implants, and prostheses. Overview of medical science vis-à-vis materials science. (Typically Offered: Fall)

BME 4900: Independent Study

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Department Permission for Course

Investigation of biomedical engineering topics of special interest to student and supervising faculty member with a final written report. (Typically Offered: Fall, Spring, Summer)

Biomedical Sciences (BMS)

Courses primarily for undergraduates:

BMS 3290: Anatomy and Physiology of Domestic Animals

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120 and BIOL 2120L

Survey of body systems of domestic animals. Provides a medical science orientation particularly useful to students in a preveterinary medicine curriculum. (Typically Offered: Spring)

BMS 4380: Principles of Physiology

Credits: 4. Contact Hours: Lecture 4.

Principles of neurophysiology, endocrine and reproductive physiology, muscle physiology, cardiovascular, respiratory, renal, and digestive physiology, and regulation of body fluid. (Typically Offered: Fall)

BMS 4390: Principles of Pharmacology

Credits: 4. Contact Hours: Lecture 4.

General principles of drug actions; drug disposition; drug acting on, cardiovascular, respiratory, renal, gastrointestinal, and endocrine systems; anti-inflammatory and antibiotic drug; anti-cancer drugs; anesthetics CNS stimulants; lifestyle drugs; drug addiction, abuse and dependence; drugs in sport; drugs for obesity; biopharmaceuticals and gene therapy; drug development. (Typically Offered: Spring)

BMS 4470: Introduction to Human Gross Anatomy

Credits: 4. Contact Hours: Lecture 2, Laboratory 6.

Examination of gross anatomy and neuroanatomy of the human. Laboratories will center on regional anatomy study through human cadaver dissection in addition to models, virtual learning solutions, radiologic imaging and case studies. (Typically Offered: Fall)

BMS 4480: Principles of Human Gross Anatomy

Credits: 4. Contact Hours: Lecture 2, Laboratory 6.

Repeatable, maximum of 2 times.

BMS 448 will be a laboratory-centered course that focuses on prosected human cadavers to develop an in-depth understanding of human anatomical function. The course will follow a regional approach and stress relationships between neighboring anatomical structures. During laboratory sessions, students teams will study anatomy from multiple individuals to gain an appreciation for anatomical variation and effects on the body from aging, disease, etc. Additional laboratory activities include study in osteology, radiograph interpretation and case studies. (Typically Offered: Spring, Summer)

BMS 4500X: Introduction to a Research Career in Industry

(Cross-listed with VMPM 4500X).

Credits: 1. Contact Hours: Lecture 2.

Explores research career paths in industry. Course will discuss ways students can prepare competitive applications and skill sets necessary for success. Concepts of regulatory constraints, quality management systems and intellectual property will also be introduced. Material will be presented by industry associates and leaders. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

BMS 4900H: Independent Study: Honors

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

BMS 5010: Selected Research Methods in Biomedical Sciences

Credits: 3.

Experience in biomedical techniques in selected BMS laboratories that include but is not limited to cytochemical methods, molecular biological techniques, extracellular and intracellular unit recording, microiontophoresis, microinjection, spectrophotofluorometric analysis of chemicals, use of radioisotopes, radioimmunoassay, Ca²⁺ imaging, confocal microscopy, fluorescence microscopy, and immunocytochemistry. (Typically Offered: Fall, Spring, Summer)

BMS 5020: Methods in Biomedical Sciences

Credits: 3. Contact Hours: Laboratory 6.

Provides laboratory experience in the application of methods in biomedical sciences, including animal physiology and pharmacology laboratory techniques; human physiology recordings and urinalysis; pharmacokinetics; basic techniques in analytical laboratory; basic pathology, immunology, bacteriology, and virology laboratory techniques. (Typically Offered: Spring)

BMS 5030: Fundamentals of Biomedical Sciences

Credits: 1. Contact Hours: Lecture 1.

Institutional training essential for biomedical research, orientation to institutional career services and communication resources, professional development activities and practice with critical evaluation of data presentation and interpretation in biomedical literature. (Typically Offered: Fall)

BMS 5300: Principles of Morphology I

Credits: 6. Contact Hours: Lecture 4, Laboratory 6.

Anatomy of the dog and cat: from basics to clinical application. (Typically Offered: Fall)

BMS 5310: Principles of Morphology II

Credits: 4. Contact Hours: Lecture 2, Laboratory 6.

Comparative and topographic anatomy of horse, ruminants, pig, and chicken. (Typically Offered: Spring)

BMS 5330: Biomedical Sciences I

Credits: 6. Contact Hours: Lecture 5, Laboratory 3.

Microscopic anatomy and physiology of cells, tissues, cardiovascular system, respiratory system, and urinary system. (Typically Offered: Fall)

BMS 5340: Biomedical Sciences II

Credits: 6. Contact Hours: Lecture 5, Laboratory 3.

Microscopic anatomy of the immune system and integument.

Microscopic anatomy and physiology of the digestive system, endocrine system, and reproductive system. (Typically Offered: Spring)

BMS 5350: Molecular and Cellular Basis of Disease

Credits: 1. Contact Hours: Lecture 1.

Descriptions of molecular and cellular biology, especially as it pertains to veterinary medicine. Discussions of cellular components, cellular functions and anomalies thereof. Emphasis placed on divergences relevant to companion animals and livestock. (Typically Offered: Spring)

BMS 5370: Neuroanatomy

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Neuroanatomy of domestic animals. (Typically Offered: Spring)

BMS 5380: Principles of Physiology

Credits: 4. Contact Hours: Lecture 4.

Principles of neurophysiology, endocrine and reproductive physiology, muscle physiology, cardiovascular, respiratory, renal, and digestive physiology, and regulation of body fluid. (Typically Offered: Fall)

BMS 5390: Principles of Pharmacology

Credits: 4. Contact Hours: Lecture 4.

General principles of drug actions; drug disposition; drug acting on, cardiovascular, respiratory, renal, gastrointestinal, and endocrine systems; anti-inflammatory and antibiotic drug; anti-cancer drugs; anesthetics CNS stimulants; lifestyle drugs; drug addiction, abuse and dependence; drugs in sport; drugs for obesity; biopharmaceuticals and gene therapy; drug development. (Typically Offered: Spring)

BMS 5420A: Introduction to Molecular Biology Techniques: DNA Techniques

(Cross-listed with BBMB 5420A/ EEOB 5420A/ FSHN 5420A/ GDCB 5420A/ HORT 5420A/ NREM 5420A/ NUTRS 5420A/ VDPAM 5420A/ VMPM 5420A).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

BMS 5420B: Introduction to Molecular Biology Techniques: Protein

(Cross-listed with BBMB 5420B/ EEOB 5420B/ FSHN 5420B/ GDCB 5420B/ HORT 5420B/ NREM 5420B/ NUTRS 5420B/ VDPAM 5420B).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only. (Typically Offered: Spring, Summer)

BMS 5420C: Introduction to Molecular Biology Techniques: Cell Techniques

(Cross-listed with BBMB 5420C/ EEOB 5420C/ FSHN 5420C/ GDCB 5420C/ HORT 5420C/ NREM 5420C/ NUTRS 5420C/ VMPM 5420C/ VDPAM 5420C).

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Includes cellular biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

BMS 5420D: Introduction to Molecular Biology Techniques: Plant Transformation

(Cross-listed with BBMB 5420D/ EEOB 5420D/ FSHN 5420D/ GDCB 5420D/ HORT 5420D/ NREM 5420D/ NUTRS 5420D/ VMPM 5420D/ VDPAM 5420D).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

BMS 5420E: Introduction to Molecular Biology Techniques: Proteomics

(Cross-listed with BBMB 5420E/ EEOB 5420E/ FSHN 5420E/ GDCB 5420E/ HORT 5420E/ NREM 5420E/ NUTRS 5420E/ VMPM 5420E/ VDPAM 5420E).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

BMS 5420F: Introduction to Molecular Biology Techniques: Metabolomics

(Cross-listed with BBMB 5420F/ EEOB 5420F/ FSHN 5420F/ GDCB 5420F/ HORT 5420F/ NREM 5420F/ NUTRS 5420F/ VMPM 5420F/ VDPAM 5420F).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

BMS 5420G: Introduction to Molecular Biology Techniques: Genomic

(Cross-listed with BBMB 5420G/ EEOB 5420G/ FSHN 5420G/ GDCB 5420G/ HORT 5420G/ NREM 5420G/ NUTRS 5420G/ VMPM 5420G/ VDPAM 5420G).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

BMS 5430: Pharmacology and Therapeutics

Credits: 3. Contact Hours: Lecture 3.

Pharmacology and therapeutic uses of fluids, antimicrobial and antiparasitic drugs, clinical use of veterinary drugs, and adverse drug reactions. (Typically Offered: Fall)

BMS 5470: Introduction to Human Gross Anatomy

Credits: 4. Contact Hours: Lecture 2, Laboratory 6.

Examination of gross anatomy and neuroanatomy of the human. Laboratories will center on regional anatomy study through human cadaver dissection in addition to models, virtual learning solutions, radiologic imaging and case studies. (Typically Offered: Fall)

BMS 5500X: Introduction to a Research Career in Industry

(Cross-listed with VMPM 5500X).

Credits: 1. Contact Hours: Lecture 2.

Explores research career paths in industry. Course will discuss ways students can prepare competitive applications and skill sets necessary for success. Concepts of regulatory constraints, quality management systems and intellectual property will also be introduced. Material will be presented by industry associates and leaders. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

BMS 5540: General Pharmacology

(Cross-listed with TOX 5540).

Credits: 3. Contact Hours: Lecture 3.

General principles; drug disposition; drugs acting on the nervous, cardiovascular, renal, gastrointestinal, and endocrine systems. (Typically Offered: Spring)

BMS 5560: Cellular, Molecular and Developmental Neuroscience

(Cross-listed with NEURO 5560/ GDCB 5560).

Credits: 3. Contact Hours: Lecture 3.

Fundamental principles of neuroscience including cellular and molecular neuroscience, nervous system development, and regulatory systems. Offered odd-numbered years. (Typically Offered: Fall)

BMS 5750: Cell Biology

(Cross-listed with TOX 5750).

Credits: 3. Contact Hours: Lecture 3.

A multi-instructor course covering major topics in cell structure and function, including: universal features of prokaryotic and eukaryotic cells, types of utilization and conversion of energy, genetic control of cell shape and functionality, internal organization of cells, communication between cells and their environment, development of multicellular systems. Students have to write a term paper. (Typically Offered: Fall)

BMS 5900A: Anatomy

Credits: 1-7. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

BMS 5900B: Physiology

Credits: 1-7. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

BMS 5900C: Pharmacology

Credits: 1-7. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

BMS 5900D: Cell Biology

Credits: 1-7. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

BMS 5990: Creative Component

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Creative component for non-thesis Master of Science degree. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**BMS 6880: Research Review**

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

A forum for BMS students to gain experience in the critical exchange of ideas through oral presentation and discussion of scientific information.

(Typically Offered: Fall)

BMS 6900A: Anatomy

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

BMS 6900B: Physiology

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

BMS 6900C: Pharmacology

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

BMS 6900D: Cell Biology

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

BMS 6980A: Seminar: Attendance

Credits: Required. Contact Hours: Lecture 1.

Repeatable.

(Typically Offered: Fall, Spring)

BMS 6980B: Seminar: Attendance and Presentation

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Attendance and presentation required. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

BMS 6980C: Seminar: Attendance and Report

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Attendance to all BMS seminars and written reports are required.

(Typically Offered: Fall, Spring)

BMS 6990A: Research: Anatomy

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

BMS 6990B: Research: Physiology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

BMS 6990C: Research: Pharmacology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

BMS 6990D: Research: Cell biology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses primarily for professional curriculum students:**BMS 7330: Principles Of Morphology I**

Credits: 6. Contact Hours: Lecture 4, Laboratory 6.

Prereq: 10 credits in biological sciences or permission of instructor

Anatomy of the dog and cat: from basics to clinical application.

(Typically Offered: Fall)

BMS 7331: Principles of Morphology II

Credits: 4. Contact Hours: Lecture 2, Laboratory 6.

Prereq: First-year classification in veterinary medicine. BMS 3300

Comparative and topographic anatomy of horse, ruminants, pig, and chicken. (Typically Offered: Spring)

BMS 7333: Biomedical Sciences I

Credits: 6. Contact Hours: Lecture 5, Laboratory 3.

Prereq: First-year classification in veterinary medicine or graduate student status

Microscopic anatomy and physiology of cells, tissues, cardiovascular system, respiratory system, and urinary system. (Typically Offered: Fall)

BMS 7334: Biomedical Sciences II

Credits: 6. Contact Hours: Lecture 5, Laboratory 3.

Prereq: First-year classification in veterinary medicine or graduate student status

Microscopic anatomy of the immune system and integument.

Microscopic anatomy and physiology of the digestive system, endocrine system, and reproductive system. (Typically Offered: Spring)

BMS 7335: Molecular and Cellular Basis of Disease

Credits: 1. Contact Hours: Lecture 1.

Descriptions of molecular and cellular biology especially as it pertains to veterinary medicine. Discussions of cellular components, cellular functions and anomalies thereof. Emphasis placed on divergences relevant to companion animals and livestock. (Typically Offered: Fall)

BMS 7336: Veterinary Nutrition

Credits: 2. Contact Hours: Lecture 2.

Introduce basic biochemical aspects of metabolism and function of energy, protein, fat, minerals and vitamins in the diet. Determine nutrient requirements of food animals, pets, and horses under various physiological states. Understand fate of various nutrients in simple stomached animals, ruminants, and cecal fermenters. Discuss clinical nutrition problems specific to each species. (Typically Offered: Fall)

BMS 7337: Neuroanatomy

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Neuroanatomy of domestic animals. (Typically Offered: Spring)

BMS 7339: Clinical Foundations I

(Cross-listed with VCS 7339).

Credits: 1. Contact Hours: Lecture 1, Laboratory 2.

Canine physical examination; basic behavior, animal handling and restraint; medical record keeping. (Typically Offered: Fall)

BMS 7345: Case Study I

Credits: 1. Contact Hours: Laboratory 2.

Clinical applications of basic sciences taught concurrently in the fall semester of the first year curriculum in veterinary medicine. (Typically Offered: Fall)

BMS 7346: Case Study II

Credits: 1. Contact Hours: Laboratory 2.

Clinical applications of basic sciences taught concurrently in the spring semester of the first year curriculum in veterinary medicine. (Typically Offered: Spring)

BMS 7354: General Pharmacology

(Cross-listed with TOX 7354).

Credits: 3. Contact Hours: Lecture 3.

General principles; drug disposition; drugs acting on the nervous, cardiovascular, renal, gastrointestinal, and endocrine systems. (Typically Offered: Spring)

BMS 7401: Intro to Aquatic Animal Medicine

(Dual-listed with AECL 4010). (Cross-listed with AECL 7401).

Credits: 1.

8-week course. Introductory course with focus on fin fish production, health and medicine. Course content will help define future roles for veterinarians, producers, and service providers. Emphasis will be placed on water-evaluation, anatomy, pathology, infectious diseases, nutrition, regulatory constraints in production, food safety, biosecurity and current research. Field trip to aquaculture facility. (Typically Offered: Spring)

BMS 7403: Behavior of Domestic Animals

Credits: 1. Contact Hours: Lecture 1.

Prereq: Classification in veterinary medicine

Normal and abnormal behavior of domestic animals. Offered odd-numbered years. (Typically Offered: Spring)

BMS 7443: Pharmacology and Therapeutics

Credits: 3. Contact Hours: Lecture 3.

Pharmacology and therapeutic uses of fluids, antimicrobial and antiparasitic drugs, clinical use of veterinary drugs, and adverse drug reactions. (Typically Offered: Fall)

BMS 7490: Independent Study

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

BMS 7496: International Experience

Credits: 1-12. Repeatable.

Prereq: Vet Med classification or permission of instructor

International Preceptorships and Study Abroad Group programs. Opportunities for students to be involved in applied clinical, production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities. (Typically Offered: Spring)

Business Administration (BUSAD)

Courses primarily for undergraduates:

BUSAD 1020: Business Learning Team Orientation

Credits: 1. Contact Hours: Lecture 1.

A required orientation for all College of Business Students involved with a Business Learning Team. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines and registration procedures. Includes a consideration of various business majors and careers, tools for success in college including writing skills and presentations from employers, alumni and current students. (Typically Offered: Fall, Spring)

BUSAD 1030: Orientation

Credits: 1. Contact Hours: Lecture 1.

A required orientation for all College of Business students. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines, and registration procedures. Includes group advising for course selection and registration. (Typically Offered: Fall, Spring)

BUSAD 1050: Exploration of Majors & Careers in Business

Credits: 1. Contact Hours: Lecture 1.

Exploration course providing in-depth information and education regarding majors and related careers in business, with the goal for students of making a decision on which business major(s) to pursue. 8 week course. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

BUSAD 2030: Professional Development in Business

Credits: 1. Contact Hours: Lecture 1.

Prereq: Credit or enrollment in BUSAD 1020 or BUSAD 1030

Designed to develop prepared, professional and engaged students directly aligned with current workplace competencies: individual and team strengths, professional branding, developing and implementing a professional job/internship search, resume and other professional job seeking communications, interviewing, evaluating offers, and networking. Team presentations will be a requirement of this course.

BUSAD 2500: Applied Principles of Business

Credits: 3. Contact Hours: Lecture 3.

Introduction to the functional areas of business and how the functional areas are integrated for the purpose of implementing business strategy. Introduces students to decision making tools (spreadsheets and databases) that are integral to business decision making. Includes application exercises to all functional areas of business.

BUSAD 2920: Entrepreneurship & Innovation Learning Community (EILC) Seminar

Credits: 1. Contact Hours: Lecture 1.

Topics related to entrepreneurship and entrepreneurial thinking. Presentations by entrepreneurs and faculty, field trips, business concept development. (Typically Offered: Fall, Spring)

BUSAD 3010: Introduction to International Business

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Foundation for international business theory and practices with an emphasis on understanding the intersection of business, culture, politics, law, and economics. Views from both the United States and countries abroad will be presented. (Typically Offered: Fall, Spring)

BUSAD 3910A: Professional Experiential Learning: Domestic Internship

Credits: 1. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Supervised work experience in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 3910B: Professional Experiential Learning: International Internship

Credits: 1. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Supervised work experience in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 3910C: Professional Experiential Learning: Domestic Travel and Study

Credits: 1. Repeatable, maximum of 6 credits.

Supervised travel and study in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 3910D: Professional Experiential Learning: International Travel and Study

Credits: 1. Repeatable, maximum of 6 credits.

Supervised travel and study in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 3980: Cooperative Education

Credits: Required. Repeatable, maximum of 3 times.

Required of all cooperative education students engaged in full-time internship/co-op. Students must register for this course prior to commencing each work period. No more than three credits may be taken in addition to BUSAD 3980 during any given semester. Offered on a satisfactory-fail basis only.

BUSAD 4900A: Independent Study: International Business

Credits: 1-3. Repeatable.

BUSAD 4900C: Independent Study: Consulting, Investment Banking and Related Industries

Credits: 3. Contact Hours: Lecture 1, Laboratory 4.

Application of course learning to solve real-life business problems. Through the combination of significant experiential-learning activities, online academic lectures and readings, and writing assignments, this course will provide students with unique experiences to enhance skills such as formulating problems, structuring and prioritizing problems, synthesizing results, and communicating intuition from complicated analyses. (Typically Offered: Fall, Spring, Summer)

BUSAD 4900E: Independent Study: Entrepreneurship

Credits: 1-3. Repeatable.

BUSAD 4900G: Independent Study: General

Credits: 1-3. Repeatable.

Independent Study.

BUSAD 4900H: Independent Study: Honors

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

BUSAD 4910: Okoboji Entrepreneurship Institute

Credits: 1.

Advanced study of entrepreneurship that includes a team-based entrepreneurial simulation, seminars with successful entrepreneurs and business community leaders, a formal pitch presentation, and networking and mentoring in an immersive experiential environment. Students must apply and be selected for participation.

Courses primarily for graduate students, open to qualified undergraduates:

BUSAD 5010: Strategic Management

(Cross-listed with STB 5010).

Credits: 2. Contact Hours: Lecture 2.

Critical analysis of current practice and case studies in strategic management with an emphasis on integrative decision making. Strategy formulation and implementation will be investigated in the context of complex business environments.

BUSAD 5020: Quantitative Business Analysis and Decision Making

Credits: 3. Contact Hours: Lecture 3.

Introduction to the sources and statistical analysis of data as well as optimization models for use in making business decisions. Data collection, descriptive and inferential statistics including hypothesis testing, analysis of variance, multiple regression, linear programming and simulation.

BUSAD 5030: Information Systems

(Cross-listed with STB 5030).

Credits: 2. Contact Hours: Lecture 2.

Introduction to a broad variety of information systems (IS) topics, including current and emerging developments in information technology (IT), IT strategy in the context of corporate strategy, and IS planning and development of enterprise architectures. Cases, reading, and discussions highlight the techniques and tactics used by managers to cope with strategic issues within an increasingly technical and data-driven competitive environment.

BUSAD 5040: Marketing and Logistics

(Cross-listed with STB 5040).

Credits: 3. Contact Hours: Lecture 3.

Integration of the business functions concerned with the marketing and movement of goods along the supply chain with the primary goal of creating value for the ultimate customer. Coordination of marketing, production, and logistics activities within the firm and with outside suppliers and customers in the supply chain.

BUSAD 5070: Organizational Behavior

(Cross-listed with STB 5070).

Credits: 2. Contact Hours: Lecture 2.

Understanding human behavior in organizations, and the nature of organizations from a managerial perspective. Special emphasis on how individual differences, such as perceptions, personality, and motivation, influence individual and group behavior in organizations and on how behavior can be influenced by job design, leadership, groups, and the structure of organizations.

BUSAD 5080: Accounting and Finance

(Cross-listed with STB 5080).

Credits: 3. Contact Hours: Lecture 3.

Survey of fundamental topics in accounting and finance. Financial statement reporting and analysis for agriculture firms, corporate governance issues related to financial reporting, (e.g., Sarbanes-Oxley). Basic tools and techniques used in financial management, including stock and bond valuation. How to assess and use capital budgeting methods to evaluate proposed firm investments.

BUSAD 5090: International Seed Business Practices, Policies, & Regulation

(Cross-listed with STB 5090).

Credits: 3. Contact Hours: Lecture 3.

Cultural, financial, economic, political, legal/regulatory environments shaping an organization's international business strategy. Topics include entry (and repatriation) of people, firms, goods, services, and capital. Special attention to the institutions of seed regulation and policy. Ethical issues facing managers operating in an international context.

BUSAD 5900: Special Topics in Business

Credits: 3. Repeatable.

Prereq: Instructor Permission for Course

A special topics course covering contemporary issues in business.

Topics vary by semester.

BUSAD 5910: Professional Experiential Learning

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

Academically supervised travel and/or work experiences in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 5920: MBA Professional Skills Development

Credits: Required. Contact Hours: Lecture 1.

Provides first-year MBA students with tools necessary to develop and implement a successful internship and career search, and to develop professional skills critical for success in the competitive business environment. Topics include career search strategy, resume and cover letter development, interviewing, strategic networking, salary negotiation, impression management, team skills development, presentation skills development, and business etiquette. Required for all full-time MBA students. Offered on a satisfactory-fail basis only.

BUSAD 5930X: Business Specialty Masters Seminar

Credits: Required. Contact Hours: Lecture 1.

Provides incoming specialty masters students in the Ivy College of Business with an introduction to college and program resources in the areas of student services, career services, and program support. Required for all full-time residential Ivy masters students. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

BUSAD 5940: MBA Professional Skills Development II

Credits: Required. Contact Hours: Lecture 1.5.

A second course designed to improve the professional skills of first-year MBA students. Emphasis on building effective communications and networking skills. Students will participate in professional workshops, company visits, executive speaker seminars, service learning projects, business case competitions, and related activities. Offered on a satisfactory-fail basis only.

BUSAD 5960X: Professional Development and Executive Communications

Credits: 3. Contact Hours: Lecture 3.

Refine executive business core competencies through professional development topics, a speaker series and individualized coaching. The course is designed to enhance existing professional communication skill sets for emerging leaders. Various communication focuses may include: executive presentations, communication strategies, and other topics relevant to working professionals. (Typically Offered: Summer)

BUSAD 5970: Part-Time Cooperative Education

Credits: Required. Repeatable.

Career development growth through a process of analyzing and reporting experiential learning endeavors. Students may complete this course during or pursuant to completion of a summer- or semester-length internship or co-op experience. International students must have completed two graduate course semesters at Iowa State University before taking the course. Offered on a satisfactory-fail basis only.

BUSAD 5980: Cooperative Education

Credits: Required. Repeatable.

Professional work experience. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

BUSAD 5990A: Creative Component: Accounting

Credits: 3. Repeatable.

Prereq: Instructor Permission for Course

Preparation and writing of creative component.

BUSAD 5990C: Creative Component: Finance

Credits: 3. Repeatable.

Prereq: Instructor Permission for Course

Preparation and writing of creative component.

BUSAD 5990E: Creative Component: Management

Credits: 3. Repeatable.

Prereq: Instructor Permission for Course

Preparation and writing of creative component.

BUSAD 5990F: Creative Component: Marketing

Credits: 3. Repeatable.

Prereq: Instructor Permission for Course

Preparation and writing of creative component.

BUSAD 5990I: Creative Component: Agribusiness

Credits: 3. Repeatable.

Preparation and writing of creative component.

BUSAD 5990J: Creative Component: General Business

Credits: 3. Repeatable.

Preparation and writing of creative component.

BUSAD 5990K: Creative Component: Management Information Systems

Credits: 3. Repeatable.

Prereq: Instructor Permission for Course

Preparation and writing of creative component.

BUSAD 5990L: Creative Component: Supply Chain Management

Credits: 3. Repeatable.

Prereq: Instructor Permission for Course

Preparation and writing of creative component.

Courses for graduate students:**BUSAD 6440: Business Research Methods**

Credits: 3. Contact Hours: Lecture 3.

A survey of the wide variety of research methods used in business.

Methods will be presented and discussed with emphasis on applicability in different research situations. (Typically Offered: Fall)

BUSAD 6990: Research

Credits: 3-6. Repeatable.

Prereq: Instructor Permission for Course

Research. (Typically Offered: Fall, Spring, Summer)

Chemical Engineering (CHE)

Courses primarily for undergraduates:**CHE 1040: Chemical Engineering Learning Community**

Credits: Required. Contact Hours: Lecture 1.

Curriculum in career planning and academic course support for Freshmen learning team. (Typically Offered: Fall)

CHE 1600: Chemical Engineering Problems with Computer Applications Laboratory

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: MATH 1430 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 1650

Formulation and solution of engineering problems. Significant figures. Use of SI units. Graphing and curve-fitting. Flowcharting. Introduction to material balances, engineering economics, and design. Use of spreadsheet programs to solve and present engineering problems. Solution of engineering problems using computer programming languages. Chemical Engineering examples. Satisfactory placement scores can be found at: <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, CHE 1600, CE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count towards graduation. (Typically Offered: Fall, Spring)

CHE 2020: Chemical Engineering Seminar

Credits: Required. Contact Hours: Lecture 1.

Professionalism in the context of the engineering/technical workplace. Introduction to chemical engineering career opportunities. Process and workplace safety. Development and demonstration of key workplace competencies: teamwork, professionalism and ethical responsibility, ability to engage in life-long learning, and knowledge of contemporary issues. Resumes; professional portfolios; preparation for internship experiences. Restricted to CHE majors. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

CHE 2040: Chemical Engineering Continuing Learning Community

Credits: Required. Contact Hours: Lecture 1.

Curriculum and career planning, academic course support for learning community.

CHE 2050: Chemical Engineering Progress Assessment

Credits: Required. Contact Hours: Lecture 1.

Prereq: CHEM 1780, MATH 1660, CHE 1600

Assessment of proficiency in general chemistry, calculus (including infinite series and applications of derivatives and integrals), and material balances, and an ability to use the principles of science and mathematics to identify, formulate, and solve engineering problems. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

CHE 2100: Material and Energy Balances

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 1780, MATH 1660, CHE 1600

Introduction to chemical processes. Physical behavior of gases, liquids, and solids. Application of material and energy balances to chemical engineering equipment and processes. (Typically Offered: Fall, Spring)

CHE 2200: Introduction to Biomedical Engineering

(Cross-listed with BME 2200).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120; (CHEM 1670 or CHEM 1770); (ABE 1600 or AERE 1600 or BME 1600 or CE 1600 or CHE 1600 or CPRE 1850 or EE 1850 or ENGR 1600 or IE 1480 or ME 1600 or SE 1850); MATH 1660; PHYS 2320; PHYS 2320L

Engineering analysis of basic biology and engineering problems associated with living systems and health care delivery. The course will illustrate biomedical engineering applications in such areas as: biotechnology, biomechanics, biomaterials and tissue engineering, and biosignal and image processing, and will introduce the basic life sciences and engineering concepts associated with these topics. (Typically Offered: Spring)

CHE 2900: Introduction to Undergraduate Research/Independent Study

Credits: 1. Repeatable, maximum of 2 credits.

Prereq: Instructor Permission for Course

Introduction to independent study with emphasis on skills necessary to pursue further independent study of a topic of special interest to student and faculty. Topics may include introductions to laboratory safety, standard operating procedures, design of experiments, data analysis, computational methods, literature searches, and professional communications. Pre-enrollment contract between student and instructor required. Graduation Restriction: Not applicable to the B.S. in Chemical Engineering degree. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

CHE 3100: Computational Methods in Chemical Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHE 1600, CHE 2050, CHE 2100, MATH 2650

Numerical methods for solving systems of linear and nonlinear equations, ordinary differential equations, numerical differentiation and integration, and nonlinear regression using chemical engineering examples. (Typically Offered: Fall, Spring)

CHE 3250: Chemical Engineering Laboratory I

Credits: 2. Contact Hours: Laboratory 4.

Prereq: CHE 3570; CHE 3810; (STAT 2310 or STAT 3050); (Credit or concurrent enrollment in ENGL 3090 or ENGL 3120 or ENGL 3140 or JLMC 3470)

Experiments covering fundamental material and energy balances, momentum and energy transport operations, and thermodynamics. Computer applications. (Typically Offered: Fall, Spring)

CHE 3560: Transport Phenomena I

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHE 2050; CHE 2100; PHYS 2310 or PHYS 2310H; PHYS 2310L; credit or concurrent enrollment in MATH 2670

Momentum and mechanical energy balances. Incompressible and compressible fluid flow. Applications to fluid drag, piping system design, filtration, packed beds and settling. (Typically Offered: Fall, Spring)

CHE 3570: Transport Phenomena II

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHE 3560

Conduction and diffusion, convective heat and mass transfer, boiling and condensation, radiation, and design of heat exchange equipment. Introduction to diffusion. Graduation Restriction: Credit for only FSHN 3510 or CHE 3570 may be applied toward graduation for the Food Science major or Food Science minor. (Typically Offered: Fall, Spring)

CHE 3580: Separations

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHE 3100, CHE 3570, and CHE 3810

Diffusion and mass transfer in fluids. Analysis and design of continuous contacting and multistage separation processes. Binary and multicomponent distillation, absorption, extraction, evaporation, membrane processes, and simultaneous heat and mass transfer. (Typically Offered: Fall, Spring)

CHE 3810: Chemical Engineering Thermodynamics

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHE 2020, MATH 2670, PHYS 2320, CHE 3250 and Credit or concurrent enrollment in CHE 3100 and PHYS 2320L

Application of thermodynamic principles to chemical engineering problems. Thermodynamic properties of fluids, phase equilibria, and chemical reaction equilibria. (Typically Offered: Fall, Spring)

CHE 3820: Chemical Reaction Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHE 3100, CHE 3810; credit or enrollment in CHE 3570

Kinetics of chemical reactions. Design of homogeneous and heterogeneous chemical reactors. (Typically Offered: Fall, Spring)

CHE 3910: Foreign Study Orientation

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHE 3570, CHE 3810; credit or enrollment in ENGL 3140 or ENGL 3090 or ENGL 3120 or JLMC 3470

Graduation Restriction: Credit for graduation allowable only upon completion of CHE 3920. Meets International Perspectives Requirement. (Typically Offered: Spring)

CHE 3920: Foreign Study Program

Credits: 4. Contact Hours: Lecture 4.

Prereq: CHE 3580, CHE 3820, and CHE 3910

Study of chemical engineering including laboratories and lectures at collaborating international universities. Comparative study of U.S. and international manufacturing facilities. Expenses required. Meets International Perspectives Requirement. (Typically Offered: Summer)

CHE 4060: Environmental Chemodynamics

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHE 3570 and CHE 3810

Examines the mechanisms and rates of chemical transport across air, water, and soil interfaces. Applications of transport and thermodynamic fundamentals to movement of chemicals in the environment.

CHE 4080: Surface and Colloid Chemistry

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHE 3810

Examines the factors underlying interfacial phenomena, with an emphasis on the thermodynamics of surfaces, structural aspects, and electrical phenomena. Application areas include emulsification, foaming, detergency, sedimentation, fluidization, nucleation, wetting, adhesion, flotation, and electrophoresis.

CHE 4100: Electrochemical Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHE 3570, CHE 3810, and CHE 3820

Electrochemical engineering principles in thermodynamics, electrode kinetics, charge and mass transport; modeling and simulation; electrocatalysis; electrochemical reactions; applications of electrochemical engineering in fuel cells, batteries and electrolyzers. (Typically Offered: Fall)

CHE 4120: Core Concepts in Chemical Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 3250; MATH 2670; PHYS 2310 or PHYS 2310H; PHYS 2310L

Survey of the engineering science fundamentals in chemical engineering.

Topics include material balances, energy balances, thermodynamics, transport phenomena, and reaction engineering. Graduation Restriction:

Credit for CHE 4120 may not be applied to any undergraduate or graduate degree programs in chemical engineering. (Typically Offered: Spring, Summer)

CHE 4150: Biochemical Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHE 3570, CHEM 3310; BBMB 3010 or BBMB 3030 or BBMB 4040

Application of basic chemical engineering principles in biochemical and biological process industries such as enzyme technology and fermentation.

CHE 4200: Chemical Process Safety

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHE 3570 and CHE 3810

Application of transport phenomena, thermodynamics, and chemical kinetics to the study of safety, health, and loss prevention. Government regulations, industrial hygiene, relief sizing, runaway reactions, toxic release, and dispersion models will be used. Fires, explosions, risk assessment, hazard identification, case studies, accident investigations, and design considerations will be studied. (Typically Offered: Fall, Spring)

CHE 4210: Process Control

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHE 3580, CHE 3820, and MATH 2670

Control of industrial chemical processes. Device applications and limitations. Dynamics of chemical process components and process control systems. (Typically Offered: Fall, Spring)

CHE 4260: Chemical Engineering Laboratory II

Credits: 2. Contact Hours: Laboratory 4.

Prereq: CHE 3250, CHE 3580, and CHE 3820

Experiments in heat and mass transfer, staged operations, chemical reactor performance, unit processes. Computer applications. Graduation Restriction: Only one of CHE 4260 or 4270 may count toward graduation. (Typically Offered: Fall, Spring)

CHE 4270: Biological Engineering Laboratory

Credits: 2. Contact Hours: Laboratory 4.

Prereq: CHE 3250, CHE 3580, CHE 3820; BBMB 3010 or BBMB 3030 or BBMB 4040

Experiments on biological applications in chemical engineering. (Typically Offered: Spring)

CHE 4290: Chemical Engineering Product Design

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHE 3580 and CHE 3820

Application of core chemical engineering concepts to product design.

Market and economic analysis, and technical feasibility. Literature and intellectual property search. Environmental, regulatory, and safety considerations. (Typically Offered: Fall, Spring)

CHE 4300: Process and Plant Design

Credits: 4. Contact Hours: Lecture 2, Laboratory 6.

Prereq: CHE 3580 and CHE 3820

Synthesis of chemical engineering processes, equipment and plants.

Cost estimation and feasibility analysis. (Typically Offered: Fall, Spring)

CHE 4400: Biomedical Applications of Chemical Engineering

(Cross-listed with BME 4400).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHE 2100 or CHE 2200, MATH 2660 or MATH 2670, PHYS 2320

Applications of material and energy balances, transport phenomena, chemical reaction engineering, and thermodynamics to problems in biomedical engineering and applied physiology; survey of biomedical engineering; biomaterials; biomedical imaging.

CHE 4470: Polymers and Polymer Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 3310; CHE 3820 or MATE 3510

Chemistry of polymers, addition and condensation polymerization. Physical and mechanical properties, polymer rheology, production methods. Applications of polymers in the chemical industry.

CHE 4900: Undergraduate Research/Independent Study

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Department Permission for Course

Investigation of topics of special interest to student and faculty with a final written report or presentation. Election of course and topic must be approved in advance by Department with completion of Study Proposal. Graduation Restriction: No more than 6 credits of CHE 4900 may be counted towards technical electives.

CHE 4900H: Undergraduate Research/Independent Study: Honors

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Department Permission for Course

Investigation of topics of special interest to student and faculty with a final written report or presentation. Election of course and topic must be approved in advance by Department with completion of Study Proposal. Graduation Restriction: No more than 6 credits of CHE 4900 may be counted towards technical electives.

CHE 4990: Applied Industrial Research

Credits: 3. Repeatable, maximum of 6 credits.

Prereq: CHE 2050; CHE 2100; Permission of Instructor

Application of core chemical engineering concepts to solve industrially-sponsored process design problems in teams. Introduction to literature review and analysis, intellectual property, and project management.

(Typically Offered: Fall, Spring)

Courses primarily for graduate students, open to qualified undergraduates:

CHE 5060: Environmental Chemodynamics

Credits: 3. Contact Hours: Lecture 3.

Examines the mechanisms and rates of chemical transport across air, water, and soil interfaces. Applications of transport and thermodynamic fundamentals to movement of chemicals in the environment. (Typically Offered: Fall, Spring, Summer)

CHE 5080: Surface and Colloid Chemistry

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHE 3810 or graduate standing

Examines the factors underlying interfacial phenomena, with an emphasis on the thermodynamics of surfaces, structural aspects, and electrical phenomena. Application areas include emulsification, foaming, detergency, sedimentation, fluidization, nucleation, wetting, adhesion, flotation, and electrophoresis. Term project required for graduate credit.

CHE 5100: Electrochemical Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: (CHE 3570, CHE 3810, and CHE 3820) or graduate standing

Electrochemical engineering principles in thermodynamics, electrode kinetics, charge and mass transport; modeling and simulation; electrocatalysis; electrochemical reactions; applications of electrochemical engineering in fuel cells, batteries and electrolyzers. (Typically Offered: Fall)

CHE 5150: Biochemical Engineering

Credits: 3. Contact Hours: Lecture 3.

Application of basic chemical engineering principles in biochemical and biological process industries such as enzyme technology and fermentation.

CHE 5400: Biomedical Applications of Chemical Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: (CHE 2100 or CHE 2200, MATH 2660 or MATH 2670, PHYS 2320) or graduate standing

Applications of material and energy balances, transport phenomena, chemical reaction engineering, and thermodynamics to problems in biomedical engineering and applied physiology; survey of biomedical engineering; biomaterials; biomedical imaging.

CHE 5420: Polymeric Biomaterials

Credits: 3. Contact Hours: Lecture 3.

Polymeric biomaterials, overview of biomaterial requirements, different classes of polymers used as biomaterials, specific bioapplications of polymers.

CHE 5450: Analytical and Numerical Methods

Credits: 3. Contact Hours: Lecture 3.

Analysis of equipment and processes by analytic and/or numerical solution of descriptive differential equations. Operational and series techniques, boundary value problems, numerical interpolation and approximation, integration techniques. (Typically Offered: Fall)

CHE 5470: Polymers and Polymer Engineering

Credits: 3. Contact Hours: Lecture 3.

Chemistry of polymers, addition and condensation polymerization. Physical and mechanical properties, polymer rheology, production methods. Applications of polymers in the chemical industry.

CHE 5540: Integrated Transport Phenomena

Credits: 4. Contact Hours: Lecture 4.

Conservation equations governing diffusive and convective transport of momentum, thermal energy and chemical species. Transport during laminar flow in conduits, boundary layer flow, creeping flow. Heat and mass transport coupled with chemical reactions and phase change. Scaling and approximation methods for mathematical solution of transport models. Diffusive fluxes; conservation equations for heat and mass transfer; scaling and approximation techniques; fundamentals of fluid mechanics; unidirectional flow; creeping flow; laminar flow at high Reynolds number; forced-convection heat and mass transfer in confined and unconfined laminar flows. (Typically Offered: Fall)

CHE 5620: Bioseparations

Credits: 3. Contact Hours: Lecture 3.

Principles and techniques for separation and recovery of biologically-produced molecules, especially proteins. Relationship between the chemistry of biological molecules and efficient separation and preservation of biological activity. Includes centrifugation and filtration, membrane processing, extraction, precipitation and crystallization, chromatography, and electrophoresis.

CHE 5720: Turbulence

(Cross-listed with AERE 5720).

Credits: 3. Contact Hours: Lecture 3.

Qualitative features of turbulence. Statistical representation of turbulent velocity fields: averages, moments, correlations, length and time scales and the energy cascade. Averaged equations of motion, closure requirements, Reynolds averaged models. Homogeneous shear flows, free shear flows, boundary layers. Numerical simulation of turbulence: DNS, LES, DES.

CHE 5800X: Introduction of Project Management for Thesis Research

(Cross-listed with MSE 5800X/ IE 5800X).

Credits: 1. Contact Hours: Lecture 1.

Tools and skills of Project Management (PM) adapted from industry to improve efficiency in thesis research. Project charter initiation for thesis, timeline and meeting scheduling tools, expectation management, and communication with advisors. Practice of the PM skills using student's own thesis. Presentation of a project charter. Demonstration of knowledge of related PM skills and the ability of utilizing these skills for thesis research. Sharing thesis ideas and learning experience in the Graduate for Advancing Professional Skills (GAPS) learning community. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

CHE 5830: Advanced Thermodynamics

Credits: 3. Contact Hours: Lecture 3.

Application of thermodynamic principles to chemical engineering problems. Thermodynamic properties of non-ideal fluids and solutions; phase and chemical-reaction equilibria/stability. (Typically Offered: Fall)

CHE 5870: Advanced Chemical Reactor Design

Credits: 3. Contact Hours: Lecture 3.

Analysis of complex reactions and kinetics. Fixed bed, fluidized bed, and other industrial reactors. Analysis and design of non-ideal flow mixing, and residence times. Heterogeneous reactors. (Typically Offered: Spring)

CHE 5900: Independent Study

Credits: 2-6. Repeatable.

Prereq: Instructor Permission for Course

Investigation of an approved topic on an individual basis.

CHE 5950A: Special Topics: Separations

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable.

CHE 5950B: Special Topics: Advanced Control Theory

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable.

CHE 5950C: Special Topics: Crystallization

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable.

CHE 5950D: Special Topics: Thermodynamics

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable.

CHE 5950E: Special Topics: Protein Engineering/Bioseparations

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable.

CHE 5950F: Special Topics: Biological Engineering

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable.

CHE 5950G: Special Topics: Materials and Biomaterials

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable.

CHE 5950H: Special Topics: Surfaces

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable.

CHE 5950I: Special Topics: Combinatorial Design

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable.

CHE 5990: Creative Component

Credits: 1-30. Repeatable.

*Prereq: Instructor Permission for Course***Courses for graduate students:****CHE 6010: Seminar**

Credits: Required. Contact Hours: Lecture 1.

Repeatable.

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

CHE 6250: Metabolic Engineering

Credits: 3. Contact Hours: Lecture 3.

Principles of metabolic engineering. Emphasis on emerging examples in biorenewables and plant metabolic engineering. Overview of biochemical pathways, determination of flux distributions by stoichiometric and labeling techniques; kinetics and thermodynamics of metabolic networks; metabolic control analysis; genetic engineering for overexpression, deregulation, or inhibition of enzymes; directed evolution; application of bioinformatics, genomics, and proteomics.

CHE 6320: Multiphase Flow

(Cross-listed with ME 6320).

Credits: 3. Contact Hours: Lecture 3.

Single particle, multiparticle and two-phase fluid flow phenomena (gas-solid, liquid-solid and gas-liquid mixtures); particle interactions, transport phenomena, wall effects; bubbles, equations of multiphase flow. Dense phase (fluidized and packed beds) and ducted flows; momentum, heat and mass transfer. Computer solutions. Offered even-numbered years. (Typically Offered: Spring)

CHE 6420: Principles and Applications of Molecular Simulation

Credits: 3. Contact Hours: Lecture 3.

Principles of statistical physics. General features of molecular simulations including Monte Carlo (MC) methods, molecular mechanics (MM), and molecular dynamics (MD). Overview of intermolecular and interatomic potentials. Evaluation of phase equilibria, free energies, and surface/interfacial properties. Coarse-grained methods.

CHE 6880: Catalysis and Catalytic Processes

Credits: 3. Contact Hours: Lecture 3.

Principles and applications of heterogeneous and homogeneous catalysis. Adsorption. Reaction kinetics and mass transfer effects. Catalyst characterization. Industrial catalytic processes.

CHE 6920: Independent Study

Credits: 2-6. Repeatable.

Prereq: Instructor Permission for Course

Investigation of an approved topic on an individual basis. Election of course and topic must be approved in advance by Program of Study Committee.

CHE 6950A: Advanced Topics: Separations

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

CHE 6950B: Advanced Topics: Advanced Statistical Modeling and Control

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

CHE 6950C: Advanced Topics: Crystallization

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

CHE 6950D: Advanced Topics: Thermodynamics

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

CHE 6950E: Advanced Topics: Protein Engineering/Bioseparations

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

CHE 6950F: Advanced Topics: Biological Engineering

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

CHE 6950G: Advanced Topics: Materials and Biomaterials

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

CHE 6950H: Advanced Topics: Surfaces

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

CHE 6950I: Advanced Topics: Combinatorial Design

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

CHE 6950J: Advanced Topics: Polymeric and Nanostructured Materials

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

CHE 6950K: Advanced Topics: Biomaterials and Tissue Engineering

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

CHE 6950L: Advanced Topics: Catalysis, Reaction Engineering, and Renewable Energy

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

CHE 6970: Engineering Internship

Credits: Required. Repeatable.

One semester and one summer maximum per academic year professional work period. (Typically Offered: Fall, Spring, Summer)

CHE 6980A: Chemical Engineering Teaching Practicum: Teaching Practicum

Credits: 1. Contact Hours: Lecture 1.

Discussions intended to foster the development of graduate students as teaching assistants and future chemical engineering instructors. Topics include classroom and laboratory instruction, grading, and developing a teaching philosophy. (Typically Offered: Fall)

CHE 6980B: Chemical Engineering Teaching Practicum: Teaching Experience

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Prereq: Instructor Permission for Course

Participation in the instruction of a CHE course under the mentorship of a CBE faculty member. Typical activities may include lecture preparation and delivery, laboratory instruction, design of assessments, problem-solving sessions, office hours, and grading. (Typically Offered: Fall, Spring, Summer)

CHE 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Advanced topic for thesis/dissertation.

Chemistry (CHEM)

Courses primarily for undergraduates:

CHEM 0500: Preparation for College Chemistry

Credits: 0. Contact Hours: Lecture 2, Discussion 1.

An in-depth active learning experience designed to impart the fundamental concepts and principles of chemistry, with an emphasis on mathematics skills and logical thinking. For students intending to enroll in general chemistry and who have not taken high school chemistry or who have not had a high school college preparatory chemistry course who need a review of chemical problem solving and chemical concepts. 1-year high school algebra recommended. Graduation Restriction: Credit for CHEM 0500 does not count toward graduation. (Typically Offered: Fall, Spring)

CHEM 1010A: Chemistry Learning Community Orientation: On-Campus Orientation

Credits: 1. Contact Hours: Lecture 1.

Integration of first year and transfer students into the chemistry program. Introduction and overview of degree requirements and support services on campus, assistance with transition to college and community life, and team-building and leadership activities. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

CHEM 1010B: Chemistry Learning Community Orientation: Professional Development Opportunities

Credits: 1. Contact Hours: Lecture 1.

Integration of first year and transfer students into the chemistry program. Introduction and overview of degree requirements and support services on campus, assistance with transition to college and community life, and team-building and leadership activities. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

CHEM 1020L: Physical Sciences for Elementary Education

(Cross-listed with PHYS 1020L).

Credits: 3. Contact Hours: Lecture 1, Laboratory 4.

Prereq: MATH 1400 or higher.

Physical science principles for future elementary teachers. Emphasis on experiments that address current elementary science education standards and that are appropriate for their future students to do, such as measurements of mass, length, time, light from atoms, charge and current, motion due to forces, energy and work, heat, waves, optics, building bridges and making musical instruments, studying states of matter and chemical reactions. (Typically Offered: Fall, Spring)

CHEM 1100: Cutting-Edge Chemistry: Research and Career Opportunities

Credits: 1. Contact Hours: Lecture 1.

Overview of careers in chemistry: industrial, governmental, and academic careers; literature and compound search instruction; professional ethics; and an introduction to joining a research lab. For students majoring or minoring in chemistry or chemistry-related fields. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

CHEM 1600: Chemistry in Modern Society

Credits: 3. Contact Hours: Lecture 3.

Aspects of chemistry visible to a non-scientist in our society. A survey of selected areas of chemistry with emphasis on the interface between chemistry and other fields of human activity. (Typically Offered: Fall, Spring)

CHEM 1630: College Chemistry

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Prereq: Credit or concurrent enrollment in CHEM 1630L

A general survey of chemistry with an emphasis on conceptual problems for those who are not physical and biological science or engineering majors. Nomenclature, chemical reactions, stoichiometry, atomic structure, periodic properties, chemical bonding, states of matter, solutions, thermochemistry, acid-base theory, oxidation-reduction reactions, basic chemical kinetics, and chemical equilibrium. 1 year of high school algebra and geometry and CHEM 0500 or 1 year of high school chemistry necessary. Graduation Restriction: Only one of CHEM 1630, 1670, 1770, or 2010 may count toward graduation. (Typically Offered: Fall, Spring, Summer)

CHEM 1630L: Laboratory in College Chemistry

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment for credit in CHEM 1630

Laboratory to accompany CHEM 1630. Must be taken with CHEM 1630. Graduation Restriction: Only one of CHEM 1630L, 1670L, and 1770L may count toward graduation. (Typically Offered: Fall, Spring, Summer)

CHEM 1670: General Chemistry for Engineering Students

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. MATH 1400 or 2 years of high school algebra and 1 year of high school geometry and CHEM 0500 or 1 year of high school chemistry necessary. Graduation Restriction: Only one of CHEM 1630, 1670, 1770, or 2010 may count toward graduation. (Typically Offered: Fall, Spring)

CHEM 1670L: Laboratory in General Chemistry for Engineering

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment for credit in CHEM 1670

Laboratory to accompany 1670. Graduation Restriction: Only one of CHEM 1630L, 1670L, and 1770L may count toward graduation. (Typically Offered: Fall, Spring)

CHEM 1770: General Chemistry I

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Prereq: Credit or concurrent enrollment in CHEM 1770L

The first semester of a two-semester sequence which explores chemistry at a greater depth and with more emphasis on concepts, problems, and calculations than 1630. Recommended for physical and biological science majors, chemical engineering majors, and all others intending to take 3000-level chemistry courses. Principles and quantitative relationships, stoichiometry, chemical equilibrium, acid-base chemistry, thermochemistry, rates and mechanism of reactions, changes of state, solution behavior, atomic structure, periodic relationships, chemical bonding. Chemistry and Biochemistry majors may consider taking CHEM 2010. MATH 1400 or 2 years of high school algebra and 1 year of high school geometry and CHEM 0500 or 1 year of high school chemistry necessary. Graduation Restriction: Only one of CHEM 1630, 1670, 1770, or 2010 may count toward graduation. (Typically Offered: Fall, Spring, Summer)

CHEM 1770L: Laboratory in General Chemistry I

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment for credit in CHEM 1770

Laboratory to accompany 1770. 1770L must be taken with 1770.

Graduation Restriction: Only one of CHEM 1630L, 1670L, and 1770L may count toward graduation. (Typically Offered: Fall, Spring, Summer)

CHEM 1770N: Laboratory in General Chemistry I

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment for credit in CHEM 1770

Laboratory to accompany CHEM 1770. CHEM 1770N must be taken with CHEM 1770. For Chemistry and Biochemistry majors. Laboratory to accompany CHEM 1770. CHEM 1770N must be taken with CHEM 1770. Graduation Restriction: Only one of CHEM 1630, 1670, 1770, or 2010 may count toward graduation. (Typically Offered: Fall)

CHEM 1780: General Chemistry II

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Prereq: CHEM 1630 or CHEM 1670 or (CHEM 1770; CHEM 1770L)

Continuation of 1770. Recommended for physical or biological science majors, chemical engineering majors, and all others intending to take 3000-level chemistry courses. (Typically Offered: Fall, Spring, Summer)

CHEM 1780L: Laboratory in College Chemistry II

Credits: 1. Contact Hours: Laboratory 3.

Prereq: CHEM 1770L and Credit or concurrent enrollment in CHEM 1780

Laboratory to accompany 1780. 1780L is not a necessary co-requisite with 1780. (Typically Offered: Fall, Spring, Summer)

CHEM 2010: Advanced General Chemistry

Credits: 5. Contact Hours: Lecture 4, Discussion 1.

Prereq: Credit or concurrent enrollment in MATH 1650 or MATH 1660 or MATH 2650; concurrent enrollment in CHEM 2010L

A one-semester course in general chemistry designed to give students an in-depth, broad-based view of modern chemistry, and, in part, to facilitate participation in independent undergraduate research. Topics include stoichiometry, atomic and molecular structure, chemical bonding, kinetics, chemical equilibria, and thermodynamics. Discussion of current trends in various chemical disciplines, which may be given by guest experts in chemistry, biochemistry, and chemical engineering, will help the student appreciate the scope of the chemical sciences and how research is carried out. One year HS chemistry and one year HS physics, or advanced chemistry necessary. Graduation Restriction: Only one of CHEM 1630L, 1670L, and 1770L may count toward graduation. (Typically Offered: Fall)

CHEM 2010L: Laboratory in Advanced General Chemistry

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or concurrent enrollment in CHEM 2010

Laboratory to accompany 2010. Introductory lab experience in synthesis and analysis to prepare students for research activities. 2010L must be taken with 2010. Graduation Restriction: Only one of 1630L, 1670L, 1770L, 1770N or 2010L may count toward graduation. (Typically Offered: Fall)

CHEM 2110: Quantitative and Environmental Analysis

Credits: 2. Contact Hours: Lecture 2.

Prereq: (CHEM 1630; CHEM 1630L; CHEM 1780; CHEM 2010; CHEM 2010L); concurrent enrollment in CHEM 2110L

Theory and practice of elementary volumetric, chromatographic, electrochemical and spectrometric methods of analysis. Chemical equilibrium, sampling, and data evaluation. Emphasis on environmental analytical chemistry; the same methods are widely used in biological and materials sciences as well. (Typically Offered: Fall, Spring)

CHEM 2110L: Quantitative and Environmental Analysis Laboratory

Credits: 2. Contact Hours: Laboratory 6.

Prereq: Credit or enrollment for credit in CHEM 2110

Introductory laboratory experience in volumetric, spectrometric, electrochemical and chromatographic methods of chemical analysis. (Typically Offered: Fall, Spring)

CHEM 2310: Elementary Organic Chemistry

Credits: 3. Contact Hours: Lecture 3.

Prereq: (CHEM 1630; CHEM 1630L) or (CHEM 1770; CHEM 1770L) or CHEM 1670; credit or concurrent enrollment in CHEM 2310L

A survey of modern organic chemistry including nomenclature, structure and bonding, and reactions of hydrocarbons and important classes of natural and synthetic organic compounds. For students desiring only an elementary course in organic chemistry. Students in physical or biological sciences and premedical or pre-veterinary curricula should take the full year sequence 3310 and 3320 (with the accompanying laboratories 3310L and 3320L). Graduation Restriction: Only one of CHEM 2310 and 3310 or BBMB 2210 may count toward graduation. (Typically Offered: Fall, Spring, Summer)

CHEM 2310L: Laboratory in Elementary Organic Chemistry

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or concurrent enrollment in CHEM 2310; (CHEM 1630L or CHEM 1770L)

Laboratory to accompany 2310. 2310L must be taken with 2310.

Graduation Restriction: Only one of CHEM 2310L and 3310L may count toward graduation. (Typically Offered: Fall, Spring, Summer)

CHEM 2980: Cooperative Education

Credits: Required. Repeatable.

Prereq: Permission of the department cooperative education coordinator; sophomore classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period. (Typically Offered: Fall, Spring, Summer)

CHEM 2990: Undergraduate Research (for Freshmen and Sophomores)

Credits: 1-30. Repeatable, maximum of 6 credits.

*Prereq: Instructor Permission for Course***CHEM 3010: Inorganic Chemistry**

Credits: 2. Contact Hours: Lecture 2.

Atomic and molecular structure and bonding principles; molecular shapes and symmetry; acids and bases; solid-state structures and properties; inorganic chemistry of H, B, C. (Typically Offered: Spring)

CHEM 3160: Instrumental Methods of Chemical Analysis

Credits: 2. Contact Hours: Lecture 2.

Prereq: CHEM 2110, CHEM 2110L, MATH 1660, and concurrent enrollment in CHEM 3160L

Quantitative and qualitative instrumental analysis. Operational theory of instruments, atomic and molecular absorption and emission spectroscopy, electroanalysis, mass spectrometry, liquid and gas chromatography, electrophoresis, literature of chemical analysis. PHYS 2320 recommended. (Typically Offered: Fall)

CHEM 3160L: Instrumental Analysis Laboratory

Credits: 2. Contact Hours: Laboratory 6.

Prereq: Credit or enrollment in CHEM 3160

Advanced laboratory experience in UV-visible spectrophotometry, atomic absorption and emission spectrometry, electrochemistry, gas and liquid chromatography, electrophoresis, mass spectrometry, and other instrumental methods. (Typically Offered: Fall)

CHEM 3210L: Laboratory in Physical Chemistry

Credits: 2. Contact Hours: Lecture 1, Laboratory 3.

Prereq: Credit or enrollment in CHEM 3240 or CHEM 3250

Error analysis; use of computers for interfacing to experiments and for data analysis; thermodynamics, infrared and optical spectroscopy, lasers. Not applicable towards the B.S. degree in Chemistry. Graduation Restriction: Only one of CHEM 3210L and 3202L may count toward graduation. (Typically Offered: Spring)

CHEM 3220L: Laboratory in Physical Chemistry

Credits: 3. Contact Hours: Lecture 1, Laboratory 6.

Prereq: CHEM 3240 or CHEM 3250

Error analysis: use of computers for interfacing to experiments and for data analysis; thermodynamics, surface science, infrared and optical spectroscopy, lasers. Graduation Restriction: Only one of CHEM 3210L and 3220L may count toward graduation. (Typically Offered: Spring)

CHEM 3240: Introductory Quantum Mechanics

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 1780; MATH 1660; PHYS 2320

Quantum mechanics, atomic and molecular structure, spectroscopy, kinetic theory of gases, chemical kinetics. (Typically Offered: Fall, Spring)

CHEM 3250: Chemical Thermodynamics

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 1780; MATH 1660; PHYS 2320

Classical thermodynamics 1st, 2nd, and 3rd laws with applications to gases and interfacial systems, multicomponent, multiphase equilibrium of reacting systems, surface chemistry, and electrochemical cells. Students taking a two-semester physical chemistry sequence are advised to take 3240 first; in the spring semester, a molecular-based section of this course, stressing statistical thermodynamics, is offered for which knowledge of 3240 is useful. (Typically Offered: Fall, Spring)

CHEM 3260: Chemical Kinetics

Credits: 1. Contact Hours: Lecture 1.

Prereq: CHEM 1670, CHEM 1770, CHEM 1780 or CHEM 2010 and MATH 1660

Kinetic theory, rate laws, temperature dependence of rate constants, transition-state theory, reaction mechanisms, kinetic isotope effects, catalysts, Michaelis-Menten kinetics, and Marcus theory. CHEM 3240 and CHEM 3250 recommended. (Typically Offered: Spring)

CHEM 3310: Organic Chemistry I

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 1780 or CHEM 2010

The first half of a two-semester sequence. Modern organic chemistry including nomenclature, synthesis, structure and bonding, reaction mechanisms. For students majoring in physical and biological sciences, premedical and pre-veterinary curricula, chemistry and biochemistry. Students desiring only one semester of organic chemistry should take 2310 and 2310L, not 3310. Enrollment in CHEM 3310L highly recommended. Graduation Restriction: Only one of CHEM 2310 and 3310 may count toward graduation. (Typically Offered: Fall, Spring, Summer)

CHEM 3310L: Laboratory in Organic Chemistry I

Credits: 1. Contact Hours: Laboratory 3.

Prereq: CHEM 1770L; credit or enrollment for credit in CHEM 3310

Laboratory to accompany 3310. Chemistry and biochemistry majors are encouraged to take 3330L. Graduation Restriction: Only one of CHEM 2310L and 3310L may count toward graduation. (Typically Offered: Fall, Spring, Summer)

CHEM 3320: Organic Chemistry II

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 3310

Continuation of 3310. Modern organic chemistry including nomenclature, synthesis, structure and bonding, reaction mechanisms, natural products, carbohydrates and proteins. For students majoring in physical and biological sciences, premedical and pre-veterinary curricula, chemistry and biochemistry. Enrollment in CHEM 3320L highly recommended. (Typically Offered: Fall, Spring, Summer)

CHEM 3320L: Laboratory in Organic Chemistry II

Credits: 1. Contact Hours: Laboratory 3.

Prereq: CHEM 3310L; credit or concurrent enrollment in CHEM 3320

Laboratory to accompany 3320. Chemistry and biochemistry majors are encouraged to take 3340L. (Typically Offered: Fall, Spring, Summer)

CHEM 3330L: Laboratory in Organic Chemistry I (for Chemistry and Biochemistry Majors)

Credits: 2. Contact Hours: Laboratory 6.

Prereq: Credit or enrollment for credit in CHEM 3310

Laboratory to accompany 3310 for chemistry and biochemistry majors. (Typically Offered: Fall)

CHEM 3340L: Laboratory in Organic Chemistry II (for Chemistry and Biochemistry Majors)

Credits: 2. Contact Hours: Laboratory 6.

Prereq: CHEM 3330L, credit or enrollment for credit in CHEM 3320

Laboratory to accompany 3320 for chemistry and biochemistry majors. (Typically Offered: Spring)

CHEM 3980: Cooperative Education

Credits: Required. Repeatable.

Prereq: Permission of Department Cooperative Education Coordinator; Junior classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period. (Typically Offered: Fall, Spring, Summer)

CHEM 3990: Undergraduate Research

Credits: 1-30. Repeatable.

Prereq: Permission of Instructor; Sophomore classification

A comprehensive research report, describing the work performed, the justification or purpose of the research work, the results obtained, and including appropriate literature references/citations must be submitted to the undergraduate chemistry office and the research faculty member. Reports must contain a title, abstract, introduction, procedural details (experimental, computational, or theoretical), results, discussion, and references. Graduation Restriction: No more than six total credits of CHEM 3990 and CHEM 4990 may count toward graduation. Credits earned in 3990/4990/4900 may only be used to meet one of the advanced course requirements for the B.S. degree.

CHEM 4010L: Inorganic Chemistry Laboratory

Credits: 1. Contact Hours: Laboratory 3.

Prereq: CHEM 4020

Preparation and characterization of inorganic and organometallic compounds by modern techniques. For students majoring in chemistry or biochemistry. (Typically Offered: Spring)

CHEM 4020: Advanced Inorganic Chemistry

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 3010

Chemistry of the d and f metals. Structure, bonding, electronic spectra, and reaction mechanisms. Aspects of organometallic solid state and bioinorganic chemistry. CHEM 3310 recommended. (Typically Offered: Fall)

CHEM 4900: Independent Study

Credits: 1-30. Repeatable.

Prereq: 6 credits in CHEM at 3000 level or higher; Permission of Instructor

Graduation Restriction: No more than 9 credits of CHEM 4900 may count toward graduation.

CHEM 4980: Cooperative Education

Credits: Required. Repeatable.

Prereq: Permission of Department Cooperative Education Coordinator; Senior classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period. (Typically Offered: Fall, Spring, Summer)

CHEM 4990: Senior Research

Credits: 2-3. Repeatable, maximum of 6 credits.

Prereq: 3.0 GPA in CHEM, PHYS, and MATH courses; Permission of Instructor
Research in chosen area of chemistry. This course should be elected for two consecutive semesters. For students majoring in chemistry. A comprehensive and formal research report/senior thesis, describing the work performed, the justification or purpose of the research work, the results obtained, and including appropriate literature references/citations must be submitted to the undergraduate chemistry office and the research faculty member. Reports must contain a title, abstract, introduction, procedural details (experimental, computational, or theoretical), results, discussion, and references. Graduation Restriction: No more than six total credits of CHEM 3990 and CHEM 4990 may count toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

CHEM 5010L: Inorganic Preparations

Credits: 1. Contact Hours: Laboratory 3.

Preparation and characterization of inorganic and organometallic compounds by modern research techniques. (Typically Offered: Fall)

CHEM 5020: Advanced Inorganic Chemistry

Credits: 3. Contact Hours: Lecture 3.

Chemistry of the main group (s, p) and transition (d, f) metals. Structure, bonding, electronic spectra, and reaction mechanisms. Aspects of organometallic, solid state, bioinorganic, and nano chemistry. (Typically Offered: Fall)

CHEM 5050: Physical Inorganic Chemistry

Credits: 3. Contact Hours: Lecture 3.

Elementary group theory and molecular orbital theory applied to inorganic chemistry. Spectroscopic methods of characterization of inorganic compounds and organometallic compounds. (Typically Offered: Fall)

CHEM 5110: Advanced Analytical Chemistry

Credits: 3. Contact Hours: Lecture 3.

General methods of quantitative inorganic and organic analysis. Aqueous and nonaqueous titrimetry; selective reagents; sampling and sample dissolution; modern instrumentation; sensors; atomic and molecular microscopy; bioanalytical methods; data evaluation; chemometrics; and analytical literature. (Typically Offered: Fall)

CHEM 5120: Electrochemical Methods of Analysis

Credits: 3. Contact Hours: Lecture 3.

Principles of convective-diffusional mass transport in electroanalysis. Applications of potentiometry, voltammetry, and coulometry. Introduction to heterogeneous and homogeneous kinetics in electroanalysis. Analog and digital circuitry. Interfacing. (Typically Offered: Fall)

CHEM 5130: Analytical Molecular and Atomic Spectroscopy

Credits: 3. Contact Hours: Lecture 3.

Introduction to physical optics and design of photometric instruments. Principles of absorption, emission, fluorescence, and Raman spectroscopy. Error and precision of optical methods. Ultraviolet, visible, and infrared methods of qualitative and quantitative organic and inorganic analysis. (Typically Offered: Spring)

CHEM 5160: Analytical Separations

Credits: 3. Contact Hours: Lecture 3.

Principles and examples of inorganic and organic separation methods applied to analytical chemistry. Solvent extraction, volatilization, ion exchange, liquid and gas chromatography, and electrophoresis. (Typically Offered: Fall)

CHEM 5310: Organic Synthesis I

Credits: 3. Contact Hours: Lecture 3.

Survey of organic functional group transformations. (Typically Offered: Spring)

CHEM 5320: Organic Synthesis II

Credits: 2. Contact Hours: Lecture 2.

Synthesis of complex organic compounds including natural products. (Typically Offered: Fall)

CHEM 5370: Physical Organic Chemistry I

Credits: 3. Contact Hours: Lecture 3.

Survey of reactive intermediates including cations, anions, carbenes, and radicals. (Typically Offered: Fall)

CHEM 5380: Physical Organic Chemistry II

Credits: 3. Contact Hours: Lecture 3.

Molecular structure, stereochemistry, introduction to reaction mechanisms, thermodynamic and kinetic data, linear free energy relationships, isotope effects, orbital symmetry. (Typically Offered: Spring)

CHEM 5490: Nuclear Magnetic Resonance Spectroscopy

(Cross-listed with BBMB 5490).

Credits: 3. Contact Hours: Lecture 3.

Theoretical principles of NMR, practical aspects of experimental NMR, solution and solid state NMR, methodologies for molecule characterization, protein structure determination, NMR relaxation, and recent advances. (Typically Offered: Spring)

CHEM 5500: Safety in the Chemical Laboratory

Credits: 1. Contact Hours: Lecture 1.

Introduction to laboratory safety and chemical hygiene. Use of engineering controls and personal protective equipment. Chemical storage and waste disposal practices. Handling hazardous chemicals. Radiation safety and laser safety. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

CHEM 5550: Teaching College Chemistry

Credits: 2. Contact Hours: Lecture 2.

Methods of instruction, strategies and techniques for effective teaching and learning along with practice teaching in undergraduate chemistry recitation and laboratory courses. Cooperative learning, guided-inquiry, learning cycles, conceptual change, models and modeling, concept maps, visualization, computer simulations, web-based delivery systems, and learning theories. Offered even-numbered years. (Typically Offered: Spring)

CHEM 5610: Fundamentals of Quantum Mechanics

Credits: 4. Contact Hours: Lecture 4.

Schrodinger equation and exact solutions; square wells and barriers; harmonic oscillator; the hydrogen atom; atomic orbitals; operators including angular momenta; time-independent and time-dependent perturbation theory; Schrodinger and Heisenberg representations; unitary operators; interaction picture, density matrix. (Typically Offered: Fall)

CHEM 5620: Fundamentals of Atomic and Molecular Quantum Mechanics

Credits: 3. Contact Hours: Lecture 3.

Variational method, many electron atoms; addition of angular momentum, self-consistent field method for open and closed shells, linear combinations of atomic orbitals, origin of chemical bonding, many-electron diatomic and polyatomic molecules, treatments of electron correlation, approximation methods. (Typically Offered: Spring)

CHEM 5630: Statistical Mechanics

Credits: 3. Contact Hours: Lecture 3.

Microscopic and macroscopic properties, laws of thermodynamics, ensembles and distribution functions, applications to gases, solids, and chemical equilibrium. (Typically Offered: Spring)

CHEM 5640: Molecular Spectroscopy and Structure

Credits: 3. Contact Hours: Lecture 3.

Maxwell's field equations, interaction of light with matter including time-dependent perturbation theory, microwave, vibrational (infra-red, Raman) and electronic spectroscopies, symmetry derived selection rules, special lineshapes and introduction to nonlinear and coherent laser spectroscopies. Offered even-numbered years. (Typically Offered: Spring)

CHEM 5710: Solid-State Chemistry

Credits: 2. Contact Hours: Lecture 2.

Structural principles, synthetic strategies, analytical methods, and chemical bonding issues applied to solids. Atomic packings and networks, short-range vs. long-range order, defects; phase diagrams, reactive fluxes, chemical transport; diffraction, spectroscopy; energy bands and their bonding interpretations. Offered even-numbered years. (Typically Offered: Spring)

CHEM 5720: Spectrometric Identification of Organic Compounds

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Principles of infrared, ultraviolet, nuclear magnetic resonance, and mass spectroscopy as applied to organic chemistry. (Typically Offered: Fall)

CHEM 5730: Nanochemistry

Credits: 2. Contact Hours: Lecture 2.

Synthesis, characterization, properties and applications of nanoscale materials (≈ 0.5 -500 nm), relationship with molecular, meso and bulk compounds. Chemistry of solid surfaces, zero-, one- and two- dimensional (0D, 1D, 2D) nanostructures, semiconductor quantum dots, plasmonic nanoparticles, carbon nanomaterials, porous nanomaterials, potential health and safety impacts. Offered odd-numbered years. (Typically Offered: Spring)

CHEM 5740: Organometallic Chemistry of the Transition Metals

Credits: 2. Contact Hours: Lecture 2.

Transition metal complexes with ligands such as cyclopentadienyl, olefins, acetylenes, benzenes, and carbon monoxide. Coverage of structure, bonding, reactivity, fundamental mechanisms, and homogeneous catalysis. Offered odd-numbered years. (Typically Offered: Spring)

CHEM 5750: Diffraction and Crystal Structure

Credits: 3. Contact Hours: Lecture 3.

Fundamentals of structure determination for single crystals emphasizing symmetry, diffraction geometry and instrumentation, sample preparation and handling, data collection strategies, methods of structure solution and refinement, presentation of results, and crystallographic databases. Offered odd-numbered years. (Typically Offered: Spring)

CHEM 5760: Surface Chemistry

Credits: 3. Contact Hours: Lecture 3.

Gas-surface interactions and techniques of characterization. Idealized surface lattices, surface tension, Wulff plots, work function, adsorbate-adsorbate interactions, 2D phase diagrams, diffusion, thin film growth, adsorption and desorption mechanisms/energetics/kinetics, adsorption isotherms, vacuum techniques, electron- and ion-based spectroscopies for surface analysis (including AES, FIM, XPS, UPS, EXAFS, EELS, SIMS, LEED and STM). Offered even-numbered years. (Typically Offered: Fall)

CHEM 5770: Mass Spectrometry

Credits: 3. Contact Hours: Lecture 3.

Basic physics, instrumentation, chemical and biological applications of mass spectrometry. (Typically Offered: Spring)

CHEM 5780: Chemical Kinetics and Mechanisms

Credits: 2. Contact Hours: Lecture 2.

Rates and mechanisms; reversible, consecutive, and competing reactions; chain mechanisms; kinetic isotope effects; very rapid reactions; acid-base catalysis, theories of unimolecular reactions; transition state and Marcus theories. Offered even-numbered years. (Typically Offered: Spring)

CHEM 5790: Introduction to Research in Chemistry

Credits: Required. Contact Hours: Lecture 1.

Introduction to the various areas of research in chemistry at Iowa State University. (Typically Offered: Fall)

CHEM 5800: Introduction to Computational Quantum Chemistry

Credits: 3. Contact Hours: Lecture 3.

Basic principles of quantum mechanics, schrodinger equation. Hartree-Fock/molecular orbital theory, introduction to group theory, introduction to modern methods of computational chemistry; applications include molecular structure, potential energy surfaces and their relation to chemical reactions; molecular spectroscopy, photochemistry, solvent effects and surface chemistry. Offered odd-numbered years. (Typically Offered: Fall)

CHEM 5830: Chemical Group Theory

Credits: 1. Contact Hours: Lecture 1.

Basic concepts and theorems, representation theory; point groups, molecular orbitals, molecular states, molecular vibrations, rotation group and angular momenta; space groups and crystals; permutation group, antisymmetry, and spin states. (Typically Offered: Fall)

CHEM 5990: Nonthesis Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Courses for graduate students:**CHEM 6000: Seminar in Inorganic Chemistry**

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 3 times.

(Typically Offered: Fall, Spring)

CHEM 6010: Selected Topics in Inorganic Chemistry

Credits: 1-2. Contact Hours: Lecture 2.

Repeatable.

Topics such as molecular structure and bonding; organometallic compounds; physical techniques of structure determination; nonaqueous solutions; Zintl phases; transition-metal oxides; free-radical reactions; electron transfer reactions; metal-metal bonding; and bioinorganic chemistry of nucleic acids. (Typically Offered: Fall, Spring)

CHEM 6110: Seminar in Analytical Chemistry

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

(Typically Offered: Fall, Spring)

CHEM 6190: Special Topics in Analytical Chemistry

Credits: 1-2. Contact Hours: Lecture 2.

Repeatable.

Raman spectroscopy, sensors, spectroelectrochemistry, capillary electrophoresis, analytical plasmas, chemometrics and bioanalytical chemistry. (Typically Offered: Fall, Spring)

CHEM 6310: Seminar in Organic Chemistry

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

(Typically Offered: Fall, Spring)

CHEM 6320: Selected Topics in Organic Chemistry

Credits: 1-2. Contact Hours: Lecture 2.

Repeatable.

Topics of current interest in organic chemistry such as spectroscopy, physical organic chemistry, photochemistry, organometallic chemistry, mechanisms of oxidations and reductions, modern organic synthesis, reactive intermediates, bioorganic chemistry, and polymers. (Typically Offered: Fall, Spring)

CHEM 6600: Seminar in Physical Chemistry

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

(Typically Offered: Spring)

CHEM 6670: Special Topics in Physical Chemistry

Credits: 1-2. Contact Hours: Lecture 2.

Advanced and recent developments in physical chemistry are selected for each offering. (Typically Offered: Fall, Spring)

CHEM 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Chinese (CHIN)

Courses primarily for undergraduates:

CHIN 1010: Elementary Mandarin Chinese I

Credits: 4. Contact Hours: Lecture 4.

Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters. For students whose native language is not Chinese. (Typically Offered: Fall)

CHIN 1020: Elementary Mandarin Chinese II

Credits: 4. Contact Hours: Lecture 4.

Prereq: CHIN 1010

Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters. For students whose native language is not Chinese. Meets International Perspectives Requirement. (Typically Offered: Spring)

CHIN 2010: Intermediate Mandarin Chinese I

Credits: 4. Contact Hours: Lecture 4.

Prereq: CHIN 1020

Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, intensification of character acquisition. For students whose native language is not Chinese. Meets International Perspectives Requirement. (Typically Offered: Fall)

CHIN 2020: Intermediate Mandarin Chinese II

Credits: 4. Contact Hours: Lecture 4.

Prereq: CHIN 2010

Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, intensification of character acquisition. For students whose native language is not Chinese. Meets International Perspectives Requirement. (Typically Offered: Spring)

CHIN 3010: Advanced Mandarin Chinese I

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHIN 2020

Continuing development of speaking, writing, reading, and listening skills beyond intermediate level. Expansion of cultural literacy through a variety of texts from the humanities, social sciences, mass media and business. Native speakers of Chinese by instructor's permission only. Meets International Perspectives Requirement. (Typically Offered: Fall)

CHIN 3020: Advanced Mandarin Chinese II

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHIN 3010

Continuing development of speaking, writing, reading, and listening skills beyond intermediate level. Expansion of cultural literacy through a variety of texts from the humanities, social sciences, mass media and business. Native speakers of Chinese by instructor's permission only. Meets International Perspectives Requirement. (Typically Offered: Spring)

CHIN 3040: Chinese for Global Professionals

Credits: 4. Contact Hours: Lecture 4.

Prereq: CHIN 2020

Introduction to professional language and culture in China and Chinese-speaking regions in Asia. Development of all four language skills, focusing on practical applications in the professional contexts. Development of global awareness and cross-cultural understanding. Preparation for internships. Meets International Perspectives Requirement. (Typically Offered: Spring)

CHIN 3700: Chinese Literature in English Translation

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: ENGL 1500 or satisfactory score of 24 or higher on ACT English

Topics may include traditional prose, poetry, novel and drama; twentieth-century fiction and film. All readings and class discussions in English. Meets International Perspectives Requirement. (Typically Offered: Fall)

CHIN 3720: Introduction to Chinese Culture

Credits: 3. Contact Hours: Lecture 3.

Interdisciplinary introduction to Chinese society and culture from earliest times to the present. Topics include ancient literature, philosophy, religion, art, architecture, customs, transition to a modern society, social changes, urban life, popular culture, and contemporary values and ideas. Meets International Perspectives Requirement. (Typically Offered: Spring)

CHIN 3750: China Today

Credits: 3-4. Contact Hours: Lecture 4.

Repeatable.

Focusing on contemporary society, culture, literature and the arts. All readings, discussions, and papers in English. Topics vary from year to year. Meets International Perspectives Requirement. (Typically Offered: Spring)

CHIN 3780: Chinese Film and Society

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 1500 or satisfactory score of 24 or higher on ACT English

Survey of Chinese cinematic history from 1896 to the present against the background of China's constant sociocultural transformation; emphasis on narrative themes, film history, and film criticism. Topics vary according to faculty interest. Taught in English. Meets International Perspectives Requirement. (Typically Offered: Spring)

CHIN 4030A: Seminar in Chinese Language and Culture: Translating Contemporary Chinese Texts

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHIN 3020

Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese. Meets International Perspectives Requirement.

CHIN 4030B: Seminar in Chinese Language and Culture: Topics on Business and Professions

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHIN 3020

Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese. Meets International Perspectives Requirement.

CHIN 4030C: Seminar in Chinese Language and Culture: Reading Chinese Texts

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHIN 3020

Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese. Meets International Perspectives Requirement.

CHIN 4900: Independent Study

Credits: 1-6. Repeatable.

Prereq: 6 credits in CHIN; Permission of Department Chair

Designed to meet student needs in areas beyond current course offerings or to accommodate the desire to integrate a study of literature or language with special issues in major fields. (Typically Offered: Fall, Spring, Summer)

CHIN 4990: Internship in Chinese

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: 9 credits of CHIN at the 3000-level; Permission of Department

Work experience using Chinese in the public or private sector, combined with academic work under faculty supervision. Graduation Restriction: No more than 3 credits may apply toward the Chinese minor or LCP minor. Offered on a satisfactory-fail basis only.

CE 1110: Geomatics

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: CE 1600 or (ABE 1600 or AERE 1600 or BME 1600 or CHE 1600 or CPRE 1850 or EE 1850 or ENGR 1600 or IE 1480 or ME 1600 or SE 1850); CE 1700; MATH 1650

Fundamentals of geospatial measurement theory, computations, analysis, and instrumentation relative to engineering surveys. Includes distance and angular measurement and analyses; elevation, area, and volume determinations; construction staking; errors in observations; traversing; horizontal and vertical curve layout; geographical information systems; and equipment used for measurements. (Typically Offered: Fall, Spring)

CE 1200: Civil Engineering Learning Community

Credits: Required.

Integration of first-year students into the Civil Engineering program. Assignments and activities involving teamwork, academic preparation, study skills, and preparation for entry into the Civil Engineering profession. Completed both individually and in learning teams under the direction of faculty and peer mentors. (Typically Offered: Fall, Spring)

CE 1600: Engineering Problems with Computational Laboratory

Credits: 3. Contact Hours: Laboratory 2, Lecture 2.

Prereq: Credit or Enrollment in MATH 1650

Engineering approach to solving problems and presenting results with applications to examples in civil, construction, and environmental engineering, such as problems in statics. Dimensions and units. Data processing, graphing, and curve fitting. Formulating and solving fundamental and practical engineering problems with spreadsheets and a structured programming language. Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count towards graduation. (Typically Offered: Fall, Spring)

CE 1700: Graphics for Civil Engineering

Credits: 2. Contact Hours: Laboratory 4.

Prereq: Credit or concurrent enrollment in MATH 1430 or MATH 1450 (or satisfactory scores on mathematics placement assessments)

Integration of fundamental graphics, computer modeling, and engineering design. Applications of multiview drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process. Freehand and computer methods. Satisfactory placement scores can be found at: <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. (Typically Offered: Fall, Spring)

Civil Engineering (CE)

Courses primarily for undergraduates:

CE 1900: Introduction to Undergraduate Research in Civil and Environmental Engineering

(Cross-listed with ENVE 1900).

Credits: 2. Repeatable, maximum of 4 times.

Prereq: Instructor Permission for Course

Introduction to research, focusing on sub-disciplines of civil and environmental engineering. Research questions, hypotheses, literature reviews, experimental design, data collection, data analysis, and presentation. Topics chosen to introduce students to water resources, environmental engineering, transportation engineering, geotechnical/materials engineering, or structural engineering. Graduation Restriction: Repeatable but only two credits may count toward graduation in CE.

CE 2060: Engineering Economic Analysis and Professional Issues in Civil Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: (CE 1200 or CONE 1210 or CONE 1220 or ENGR 1310 or ENVE 1200); ENGL 2500; MATH 1660

Engineering/managerial analysis of the economic aspects of project proposals. Alternative sources of funds; time value of money; expenditure of capital funds and methods of evaluating alternative projects. Professionalism, licensure, liability, ethics, leadership, risk analysis, social responsibility, creative and critical thinking, and applications/impacts of regulations in civil engineering. ECON 1010 recommended. (Typically Offered: Fall, Spring)

CE 2740: Engineering Statics

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or concurrent enrollment in MATH 1660 or MATH 1660H; PHYS 2310 or PHYS 2310H; PHYS 2310L

Vector analysis; analysis of force systems; resultant in two and three dimensions; free-body diagrams; equilibrium; analysis of trusses, frames, and machines; friction, belts and pulleys; shear and bending moment in beams, centroid and center of mass; second moments of areas. (Typically Offered: Fall, Spring, Summer)

CE 3060: Project Management for Civil Engineers

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: (CE 1200 or ENVE 1200); (CE 1700 or ENVE 1900)

Project management, including work breakdown structures, cost estimating, scheduling, and project control. Civil engineering project life cycle, including planning, design, construction, and maintenance processes. Techniques in interpretation of contract documents, plan reading, and in estimating quantities. (Typically Offered: Fall, Spring)

CE 3260: Principles of Environmental Engineering

(Cross-listed with ENVE 3260).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Credit or enrollment in ABE 3780; (CHEM 1670 OR CHEM 1770); CHEM 1780; MATH 1660

Introduction to environmental problems, water quality indicators and requirements, potable water quality and quantity objectives, water sources and treatment methods; water pollution control objectives and treatment methods; survey of solid and hazardous waste management and air pollution control. (Typically Offered: Fall, Spring)

CE 3320: Structural Analysis I

Credits: 3. Contact Hours: Lecture 3, Laboratory 1.

Prereq: EM 3240

Loads, shear, moment, and deflected shape diagrams for beams and framed structures. Deformation calculations. Approximate methods. Application of consistent deformation methods to continuous beams and frames. Application of displacement or slope deflection methods to continuous beams and frames without sway. Influence lines for determinate and indeterminate structures. Computer applications to analyze beams and frames. Validation of computer results. (Typically Offered: Fall, Spring)

CE 3330: Structural Steel Design I

Credits: 3. Contact Hours: Lecture 3, Laboratory 1.

Prereq: CE 3320, EM 3270

AISC design methods for structural steel buildings. Design of steel tension members. Design of steel members for flexure. Design of members for compression. Beam-Column member design. Introduction to steel building systems. Steel moment frames and concentrically braced frames. Design of commonly used connections in steel buildings. (Typically Offered: Fall, Spring)

CE 3340: Reinforced Concrete Design I

Credits: 3. Contact Hours: Lecture 3, Laboratory 1.

Prereq: CE 3320, EM 3270

ACI design methods for structural concrete members. Emphasis on the analysis and design for flexure of singly reinforced and doubly reinforced sections, T-section, one-way slabs, short columns, and isolated footings. Analysis and design for shear, and serviceability. Bond, anchorage, and development of reinforcement. (Typically Offered: Fall, Spring)

CE 3550: Principles of Transportation Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: CE 1110

Introduction to planning, design, and operations of transportation facilities. Road user, vehicle and roadway characteristics. Technological, economic and environmental factors. Asset management, transportation planning, capacity analysis, traffic control, geometric design, traffic safety. (Typically Offered: Fall, Spring)

CE 3600: Geotechnical Engineering

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: EM 3240, credit or enrollment in GEOL 2010 or CONE 2410

Introduction to geotechnical engineering and testing. Identification and classification tests, soil water systems, principles of settlement, stresses in soils, and shear strength testing; slope stability, retaining walls, bearing capacity. (Typically Offered: Fall, Spring)

CE 3720: Engineering Hydrology and Hydraulics

Credits: 3. Contact Hours: Lecture 3.

Prereq: ABE 3780; (STAT 2310 or STAT 3050)

The hydrologic cycle: precipitation, infiltration, runoff, evapotranspiration, groundwater, and streamflow. Hydrograph analysis, flood routing, frequency analysis and urban hydrology. Applied hydraulics including pipe and channel flow with design applications in culverts, pumping, water distribution, storm and sanitary sewer systems. Design project required. (Typically Offered: Fall, Spring)

CE 3820: Design of Concretes

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: CE 2740

Physical and chemical properties of bituminous, portland, and other cements; aggregate properties and blending; mix design and testing of concretes; admixtures, mixing, handling, placing and curing; principles of pavement thickness design. (Typically Offered: Fall, Spring)

CE 3830: Design of Portland Cement Concrete

Credits: 1.

Prereq: CE 2740

For CONE students only. Physical and chemical properties of portland cement and p.c. concrete. Mix design and testing of p.c. concrete. Graduation Restriction: Credit for both CE 3820 and CE 3830 may not be applied for graduation. (Typically Offered: Fall, Spring)

CE 3880: Sustainable Engineering and International Development

(Cross-listed with ABE 3880/ EE 3880).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Junior Classification in an Engineering Major

Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report. Meets International Perspectives Requirement. (Typically Offered: Fall)

CE 3950: Global Perspectives in Transportation

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 2 times.

Background on historical civil engineering design and construction. Impacts of historical, cultural, social, economic, ethical, environmental, and political conditions on the design and construction of various infrastructure projects outside the United States. Global road safety and intermodal operations. Addressing transportation problems in a large metropolitan area. Meets International Perspectives Requirement. (Typically Offered: Spring)

CE 4030: Program and Outcome Assessment

Credits: Required. Contact Hours: Lecture 1.

Assessment of CE Curriculum and educational objectives. Assessments to be reviewed by the CE Department to incorporate potential improvements. Verification of undergraduate application for graduation by the end of the first week of class. Permission of instructor for students who are scheduled for summer graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

CE 4130: Applied and Environmental Geophysics

(Cross-listed with GEOL 4130/ ENSCI 4130).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar. Introductory geology, algebra, and trigonometry recommended. Offered odd-numbered years. (Typically Offered: Spring)

CE 4170: Boundary Surveys

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: CE 1110

Basic principles of boundary surveying with a focus on the legal principles affecting the determination of land boundaries. Concepts include boundaries, ownership, boundary law principles, easements, sequential and simultaneous conveyances, case studies, riparian rights, state laws and rules for practicing surveying, American Land Title Association (ALTA) surveys and standards, U.S. public land survey system; unwritten land transfers; plats of survey; land descriptions and boundary evidence. (Typically Offered: Spring)

CE 4200: Environmental Engineering Chemistry

(Cross-listed with ENSCI 4200).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: CE 3260, CHEM 1780

Geology and geochemistry of non-metallic and metallic ore deposits. Major processes that concentrate metals in the Earth. Geochemical conditions of ore formation using stable-isotope and fluid-inclusion studies. Laboratory emphasizes the study of metallic ores. Offered even-numbered years. (Typically Offered: Fall)

CE 4240A: Air Pollution: Air Quality and Effects of Pollutants

(Cross-listed with ABE 4240A/ ENSCI 4240A).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (CHEM 1780 or [PHYS 2310; PHYS 2310L]); (MATH 1660 or 3 credits in STAT); Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

CE 4240B: Air Pollution: Climate Change and Causes

(Cross-listed with ABE 4240B/ ENSCI 4240B).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (CHEM 1780 or [PHYS 2310; PHYS 2310L]); (MATH 1660 or 3 credits in STAT); Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

CE 4240C: Air Pollution: Transportation Air Quality

(Cross-listed with ABE 4240C/ ENSCI 4240C).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (CHEM 1780 or [PHYS 2310; PHYS 2310L]); (MATH 1660 or 3 credits in STAT); Senior classification or above

CE 4240D: Air Pollution: Off-Gas Treatment Technology

(Cross-listed with ABE 4240D/ ENSCI 4240D).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (CHEM 1780 or [PHYS 2310; PHYS 2310L]); (MATH 1660 or 3 credits in STAT); Senior classification or above

CE 4240E: Air Pollution: Agricultural Sources of Pollution

(Cross-listed with ABE 4240E/ ENSCI 4240E).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (CHEM 1780 or [PHYS 2310; PHYS 2310L]); (MATH 1660 or 3 credits in STAT); Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

CE 4280: Water and Wastewater Treatment Plant Design

(Cross-listed with ENVE 4280).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CE 3260

Physical, chemical and biological processes for the treatment of water and wastewater including coagulation and flocculation, sedimentation, filtration, adsorption, chemical oxidation/disinfection, fixed film and suspended growth biological processes and sludge management. Design project. (Typically Offered: Spring)

CE 4390: Seismic Methods in Geology, Engineering, and Petroleum Exploration

(Cross-listed with GEOL 4390).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Physics of elastic-wave propagation. Seismic surveys in environmental imaging, engineering, and petroleum exploration. Reflection and refraction techniques. Data collection, processing, and geological interpretation. Field work with state-of-the-art equipment. Introductory geology, algebra, and trigonometry recommended. Offered even-numbered years. (Typically Offered: Spring)

CE 4460: Bridge Design

Credits: 3.

Prereq: CE 3330, CE 3340

Bridge design in structural steel and reinforced concrete. Application of AASHTO Bridge Design Specifications. Analysis techniques for complex structures. Preliminary designs include investigating alternative structural systems and materials. Final designs include preparation of design calculations and sketches. Design project. Offered odd-numbered years. (Typically Offered: Spring)

CE 4480: Building Design

Credits: 3.

Prereq: CE 3330, CE 3340

Building design in structural steel and reinforced concrete. Investigation of structural behavior. Gravity and lateral load resisting systems. Application of current building codes and design specifications. In-depth analysis of gravity and wind loads on buildings. Review of building designs. Preliminary designs include investigating alternative structural systems. Approximate methods of structural analysis for gravity and lateral loads. Final designs include preparation of design calculations and sketches. Design project. Offered even-numbered years. (Typically Offered: Spring)

CE 4490: Structural Health Monitoring

Credits: 3. Contact Hours: Lecture 3.

Prereq: Senior classification in an Engineering major or Permission of Instructor

Introductory and advanced topics in structural health monitoring (SHM) of aeronautical, civil, and mechanical systems. Topics include sensors, signal processing in time and frequency domains, data acquisition and transmission systems, design of integrated SHM solutions, nondestructive evaluation techniques, feature extraction methods, and cutting-edge research in the field of SHM. Graduate students will have a supervisory role to assist students in 449 and an additional design project or more in-depth analysis and design.

CE 4510: Urban Transportation Planning Models

Credits: 3. Contact Hours: Lecture 3.

Prereq: C E 3550; (STAT 2310 or STAT 3050)

Urban transportation planning context and process. Project planning and programming. Congestion, mitigation, and air quality issues. Transportation data sources. Travel demand and network modeling. Use of popular travel demand software and applications of geographic information systems. (Typically Offered: Fall)

CE 4530: Highway Design

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: CE 3060, CE 3550

Introduction to highway planning and design. Design, construction, and maintenance of highway facilities. Level-of-service, stopping sight distance, highway alignment, earthwork and pavement design. Design project, oral reports and written reports. Computer applications. (Typically Offered: Fall)

CE 4600: Foundation Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: CE 3600

Fundamentals of foundation engineering. Exploration, sampling, and in-situ tests. Shallow and deep foundations. Settlement and bearing capacity analyses. Stability of excavations and earth retaining structures. Design project. (Typically Offered: Fall, Spring)

CE 4620: Site Evaluations for Civil Engineering Projects

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: CE 3600 or Permission of Instructor

Identification and mapping of engineering soils from aerial photos, maps, and soil surveys. Planning subsurface investigations, geomaterials prospecting, geotechnical hazards, geomorphology, in situ testing and sampling, geophysical site characterization, instrumentation and monitoring, interpretation of engineering parameter values for design.

CE 4670: Geomaterials Stabilization

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: (CE 3600; [CE 3820 or CE 3830]) or Permission of Instructor

Soil and aggregate physical, chemical and biological stabilization procedures. Stabilization analysis and design. Ground modification and compaction methods. Geosynthetics application and design.

CE 4730: Groundwater Hydrology

Credits: 3. Contact Hours: Lecture 3.

Prereq: CE 3720

Principles of groundwater flow, hydraulics of wells, superposition, slug and pumping tests, streamlines and flownets, and regional groundwater flow. Contaminant transport. Computer modeling. Design project. Extra assignments required for graduate students. (Typically Offered: Fall)

CE 4830: Pavement Analysis and Design

(Dual-listed with CE 5830).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CE 3600 and CE 3820

Analysis, behavior, performance, and structural design of pavement systems. Topics include climate factors, rehabilitation, life cycle design economics, material and system response, pavement foundations and traffic loadings. Development of models for and analysis of pavement systems. Use of transfer functions relating pavement response to pavement performance. Evaluation and application of current and evolving pavement design practices and procedures. Mechanistic-based pavement design techniques and concepts. Analysis of the effects of maintenance activities on pavement performance and economic evaluation of pavement systems. Design project. (Typically Offered: Spring)

CE 4840: Advanced Design of Concretes

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: CE 3820

Asphalt binder characterization, fundamentals of asphalt rheology, asphalt materials behavior under loading and temperature effects. High-strength, lightweight, fiber-reinforced, and self-consolidating portland cement concretes, mix design, properties, advanced performance testing. Design project.

CE 4850: Civil Engineering Design

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: CE 2060, CE 3060, CE 3260, CE 3330 or CE 3340, CE 3550, CE 3600, CE 3720, CE 3820, SPCM 2120

The civil engineering design process, interacting with the client, identification of the engineering problems, development of a technical proposal, identification of design criteria, cost estimating, planning and scheduling, codes and standards, development of feasible alternatives, selection of best alternative, and oral presentation. Course enrollment limited to final graduating semester. (Typically Offered: Fall, Spring)

CE 4880: Sustainable Civil Infrastructure Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: Instructor Permission for Course

Sustainable planning, life cycle analysis, appropriate engineering design, investment levels and overall rating of civil engineering infrastructure systems, including highway, bridge, airport, rail, dam, power and port facilities. Complementary assessment of future civil infrastructure sustainability impacts and challenges in relation to autonomous and electric vehicle development. Overview regarding US and global availability and supply of critical infrastructure commodities (e.g., cement, stone, metals, phosphorus, uranium, etc.). Directed course readings and multiple project/design reports. (Typically Offered: Fall)

CE 4890: Pavement Preservation and Rehabilitation

Credits: 3. Contact Hours: Lecture 3.

Prereq: CE 3820

Overview of pavement preservation and pavement rehabilitation techniques. Overview and selection of materials used in pavement preservation and rehabilitation strategies. Evaluating suitability of pavement preservation and pavement rehabilitation strategies based on existing structure, pavement distresses and non-condition factors. Use of recycled pavement materials in pavement reconstruction techniques. (Typically Offered: Fall, Spring)

CE 4900: Independent Study

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Independent study in any phase of civil engineering. Pre-enrollment contract required. Graduation Restriction: No more than 6 credits of CE 4900 may be counted towards engineering topics electives. (Typically Offered: Fall, Spring, Summer)

CE 4900H: Independent Study: Honors

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Independent study that is being proposed to be used for an honors project in any discipline of civil engineering. Pre-enrollment contract required. Graduation Restriction: No more than 6 credits of CE 4900H may be counted towards engineering topics electives. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

CE 5010: Preconstruction Project Engineering and Management

Credits: 3. Contact Hours: Lecture 3.

Application of engineering and management control techniques to construction project development from conceptualization to notice to proceed. Emphasis is on managing complex projects using 5-dimensional project management theory.

CE 5020: Construction Project Engineering and Management

Credits: 3. Contact Hours: Lecture 3.

Application of engineering and management control techniques to complex construction projects. Construction project control techniques, project administration, construction process simulation, quality management, and productivity improvement programs.

CE 5030: Construction Finance and Business Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment in CONE 4220 or CE 5940A or permission of instructor

Fundamental theories and applied methods for financial management of construction projects and companies. Construction accounting, cash flow analysis, financial planning and management, and risk analysis. Case studies.

CE 5050: Design of Construction Systems

Credits: 3. Contact Hours: Lecture 3.

Advanced design of concrete formwork and falsework systems. Design for excavation and marine construction including temporary retaining structures and cofferdams. Aggregate production operations, including blasting, crushing, and conveying systems. Rigging system design.

CE 5060: Case Histories in Construction Documents

Credits: 3. Contact Hours: Lecture 3.

Study of cases involving disputes, claims, and responsibilities encountered by management in construction contract documents. Analysis of methods of resolving differences among the owner, architect, engineer, and construction contractor for a project.

CE 5100: Information Technologies for Construction

Credits: 3. Contact Hours: Lecture 3.

Information technologies including microcomputer based systems, management information systems, automation technologies, computer-aided design, and expert systems and their application in the construction industry. Overview of systems acquisition, communications, and networking.

CE 5130: Applied and Environmental Geophysics

(Cross-listed with GEOL 5130/ ENSCI 5130).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar. Introductory geology, algebra, and trigonometry recommended. Offered odd-numbered years. (Typically Offered: Spring)

CE 5190: Methods for Data-Driven Computational Engineering Research

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: Instructor Permission for Course

Recent advances in computational and statistical methods and theories that will promote data-driven engineering research. Solve various engineering problems involving complex, large-scale engineering data. Experience representing complex engineering data and real-world populations, handle uncertainty behind the data, assess impact of the uncertainty on complex engineering responses, learn and predict engineering responses by solely using data, leverage data to complement high-precision computer simulations, handle random real-world information, and cure engineering data plagued with many incomplete data points. High-performance cluster of CoE (HPC-Class) will be utilized for computational exercises and practical projects. Ample examples and computational programs will be provided to students for applications to their own research.

CE 5200: Environmental Engineering Chemistry

(Cross-listed with ENSCI 5200).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Geology and geochemistry of non-metallic and metallic ore deposits. Major processes that concentrate metals in the Earth. Geochemical conditions of ore formation using stable-isotope and fluid-inclusion studies. Laboratory emphasizes the study of metallic ores. Offered even-numbered years. (Typically Offered: Fall)

CE 5210: Environmental Biotechnology

(Cross-listed with ENSCI 5210).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Fundamentals of biochemical and microbial processes applied to environmental engineering processes, role of microorganisms in wastewater treatment and bioremediation, bioenergetics and kinetics, metabolism of xenobiotic compounds, waterborne pathogens and parasites, and disinfection. Term paper and oral presentation. (Typically Offered: Fall)

CE 5220: Water Pollution Control Processes

(Cross-listed with ENSCI 5220).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Fundamentals of biochemical processes, aerobic growth in a single CSTR, multiple events in complex systems, and techniques for evaluating kinetic parameters; unit processes of activated sludge system, attached growth systems, stabilization and aerated lagoon systems, biosolids digestion and disposal, nutrient removal, and anaerobic treatment systems.

CE 5230: Physical-Chemical Treatment Process

(Cross-listed with ENSCI 5230).

Credits: 3.

Mass balances. Principles and design of physical-chemical unit processes including ideal and realistic reactors; heterogeneous process including gas transfer, sorption, precipitation, and dissolution; redox; flocculation/coagulation; gravity separations; filtration; and membrane processes, electrodialysis, fouling, and scaling. Emphasis on water and wastewater treatment for environmental, health, and aesthetic ends. Case studies in secondary industries.

CE 5240A: Air Pollution: Air Quality and Effects of Pollutants

(Cross-listed with ABE 5240A/ ENSCI 5240A).

Credits: 1. Contact Hours: Lecture 1.

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

CE 5240B: Air Pollution: Climate Change and Causes

(Cross-listed with ABE 5240B/ ENSCI 5240B).

Credits: 1. Contact Hours: Lecture 1.

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

CE 5240C: Air Pollution: Transportation Air Quality

(Cross-listed with ABE 5240C/ ENSCI 5240C).

Credits: 1. Contact Hours: Lecture 1.

CE 5240D: Air Pollution: Off-Gas Treatment Technology

(Cross-listed with ABE 5240D/ ENSCI 5240D).

Credits: 1. Contact Hours: Lecture 1.

CE 5240E: Air Pollution: Agricultural Sources of pollution

(Cross-listed with ABE 5240E/ ENSCI 5240E).

Credits: 1. Contact Hours: Lecture 1.

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

CE 5280: Solid and Hazardous Waste Management

(Cross-listed with ENSCI 5280).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Evaluation, characterization, assessment, planning and design of solid and hazardous waste management systems, regulatory requirements, material characterization and collection, minimization and recycling, energy and materials recovery, composting, off-gas treatment, incineration, stabilization, and landfill design. Design of treatment and disposal systems, including physical, chemical, and biological treatment, solidification, incineration, secure landfill design, and final disposal site closure plus restoration.

CE 5320: Structural Analysis II

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Analysis of indeterminate structural problems by the consistent deformation and generalized direct displacement methods. Direct stiffness method for 2-D frames, grids, 3-D frames. Special topics for the stiffness method. (Typically Offered: Fall)

CE 5330: Structural Steel Design II

Credits: 3. Contact Hours: Lecture 3.

Prereq: CE 3330

Theoretical background and development of AISC Specification equations. In-depth analysis and design of tension members, columns, beams, beam-columns, and plate girders. Emphasis on Load and Resistance Factor Design. Elastic and inelastic buckling of members and member elements. Investigation of amplification factors for members subject to combined bending and axial load and to combined bending and torsion. Effective Length Method and Direct Analysis Method of design. Approximate Second-Order Analysis. Biaxial bending. Torsion and combined bending and torsion of W-shapes.

CE 5340: Reinforced Concrete Design II

Credits: 3. Contact Hours: Lecture 3.

Advanced topics in reinforced concrete analysis and design. Moment-curvature and load-deflection behavior. Design of reinforced concrete long columns, two-way floor slabs, and isolated and combined footings. Design and behavior considerations for torsion, biaxial bending, and structural joints. Strut-and-tie modeling.

CE 5350: Prestressed Concrete Structures

Credits: 3. Contact Hours: Lecture 3.

Prereq: CE 3340

Design of prestressed concrete structures, review of hardware, stress calculations, prestress losses, section proportioning, flexural design, shear design, deflections, and statically indeterminate structures.

CE 5390: Seismic Methods in Geology, Engineering, and Petroleum Exploration

(Cross-listed with GEOL 5390).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Physics of elastic-wave propagation. Seismic surveys in environmental imaging, engineering, and petroleum exploration. Reflection and refraction techniques. Data collection, processing, and geological interpretation. Field work with state-of-the-art equipment. Introductory geology, algebra, and trigonometry recommended. Offered even-numbered years. (Typically Offered: Spring)

CE 5410: Dynamic Analysis of Structures

Credits: 3. Contact Hours: Lecture 3.

Prereq: ME 3450 and credit or enrollment in CE 5320

Single and multi-degree-of-freedom systems. Free and forced vibrations. Linear and nonlinear response. Modal analysis. Response spectra. Seismic analysis.

CE 5420: Structural Analysis by Finite Elements

Credits: 3. Contact Hours: Lecture 3.

Use of the finite element method for the analysis of complex structural configurations. Plane stress, solid, Axisymmetric and plate elements. Numerical integration. Use of general purpose finite element programs.

CE 5450: Seismic Design

Credits: 3. Contact Hours: Lecture 3.

Seismic hazard in the United States. Engineering characteristics of ground motions. Structural damage in past earthquakes. Capacity design philosophy for seismic resistant design. Conceptual design of structures. Capacity design process including design of structural members.

CE 5460: Bridge Design

Credits: 3.

Bridge design in structural steel and reinforced concrete. Application of AASHTO Bridge Design Specifications. Analysis techniques for complex structures. preliminary designs include investigating alternative structural systems and materials. Final designs include preparation of design calculations and sketches. Design project. Offered odd-numbered years. (Typically Offered: Spring)

CE 5480: Building Design

Credits: 3.

Building design in structural steel and reinforced concrete. Investigation of structural behavior. Gravity and lateral load resisting systems. Application of current building codes and design specifications. In-depth analysis of gravity and wind loads on buildings. Review of building designs. preliminary designs include investigating alternative structural systems. Approximate methods of structural analysis for gravity and lateral loads. Final designs include preparation of design calculations and sketches. Design project. Offered even-numbered years. (Typically Offered: Spring)

CE 5490: Structural Health Monitoring

Credits: 3. Contact Hours: Lecture 3.

Introductory and advanced topics in structural health monitoring (SHM) of aeronautical, civil, and mechanical systems. Topics include sensors, signal processing in time and frequency domains, data acquisition and transmission systems, design of integrated SHM solutions, nondestructive evaluation techniques, feature extraction methods, and cutting-edge research in the field of SHM. Graduate students will have a supervisory role to assist students in 4490 and an additional design project or more in-depth analysis and design.

CE 5510: Urban Transportation Planning Models

Credits: 3. Contact Hours: Lecture 3.

Urban transportation planning context and process. Project planning and programming. Congestion, mitigation, and air quality issues. Transportation data sources. Travel demand and network modeling. Use of popular travel demand software and applications of geographic information systems. (Typically Offered: Fall)

CE 5520: Traffic Safety, Operations, and Maintenance

Credits: 3. Contact Hours: Lecture 3.

Engineering aspects and fundamental principles of transportation safety. Reduction of crash incidence and severity through highway design and traffic control, and maintenance activities. Safety management best practices, safe systems, and other state-of-the-art practices in transportation safety. Human behaviors and how to influence them using engineering countermeasures to improve safety outcome metrics. Offered even-numbered years. (Typically Offered: Spring)

CE 5530: Traffic Engineering

Credits: 3. Contact Hours: Lecture 3.

Driver, pedestrian, and vehicular characteristics. Traffic characteristics; highway capacity; traffic studies and analyses. Principles of traffic control for improved highway traffic service. Application of appropriate computing software and tools. (Typically Offered: Fall)

CE 5560: Transportation Data Analysis

Credits: 3. Contact Hours: Lecture 3.

Statistical, econometric, and data science principles applied to real-world transportation data. Includes identification of data sources and limitations. Fundamentals of reproducibility and replicability, validation (including spatial and temporal validation), differences and purposes of inferential, descriptive, predictive, causal models, etc. Linear regression, count regression, and discrete choice models. Basic utility theory and decision making with applications in transportation. Emphasis is placed on practical applications, proper model development, assumption checking, and usability of results.

CE 5570: Transportation Systems Analysis

Credits: 3. Contact Hours: Lecture 3.

Travel studies and analysis of data. Transportation systems forecasts and analyses. Statewide, regional, and local transportation system planning. Network level systems planning and operations. Optimization of systems.

CE 5580: Transportation Systems Development and Management

Credits: 3. Contact Hours: Lecture 3.

Study of designated problems in traffic engineering, transportation planning, and development. Forecasting and evaluation of social, economic, and environmental impacts of proposed solutions; considerations of alternatives. Formulation of recommendations and publication of a report. Presentation of recommendations in the host community.

CE 5590: Transportation Infrastructure/Asset Management

Credits: 3. Contact Hours: Lecture 3.

Engineering management techniques for maintaining and managing infrastructure assets. Systematic approach to management through value engineering, engineering economics, and life cycle cost analysis. Selection and scheduling of maintenance activities. Analysis of network-wide resource needs. Project level analysis.

CE 5600: Fundamentals of Soil Mechanics

Credits: 3. Contact Hours: Lecture 3.

Nature of soil deposits, seepage, settlement and secondary compression, consolidation theories and analysis, failure theories, stress paths, introduction to critical state soil mechanics, constitutive models, soil strength under various drainage conditions, liquefaction of soil, pore pressure parameters, selection of soil parameters.

CE 5610: Applied Foundation Engineering

Credits: 3. Contact Hours: Lecture 3.

Analysis and design of shallow and deep foundations, lateral earth pressure theories and retaining structures, field investigations, in-situ testing, and foundations on problematic soils. Foundation engineering reports.

CE 5620: Site Evaluations for Civil Engineering Projects

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Identification and mapping of engineering soils from aerial photos, maps, and soil surveys. Planning subsurface investigations, geomaterials prospecting, geotechnical hazards, geomorphology, in situ testing and sampling, geophysical site characterization, instrumentation and monitoring, interpretation of engineering parameter values for design.

CE 5630: Experimental Methods in Geo-Engineering

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Principles of geo-engineering laboratory testing including the conduct, analysis, and interpretation of permeability, consolidation, triaxial, direct and ring shear, and direct simple shear tests. Issues regarding laboratory testing versus field testing and acquisition, transport, storage, and preparation of samples for geotechnical testing. Field and laboratory geotechnical monitoring techniques, including the measurements of deformation, strain, total stress and pore water pressure.

CE 5640: Application of Numerical Methods to Geotechnical Design

Credits: 3. Contact Hours: Lecture 3.

Application of numerical methods to analysis and design of foundations, underground structures, and soil-structure interaction. Application of slope stability software. Layered soils, bearing capacity and settlement for complex geometries, wave equation for piles, and foundation vibrations.

CE 5650: Fundamentals of Geomaterials Behavior

Credits: 3. Contact Hours: Lecture 3.

Prereq: CE 3820 or permission of instructor

Atoms and molecules, crystal chemistry, clay minerals, structure of solids, phase transformations and phase equilibria. Surfaces and interfacial phenomena, colloid chemistry, mechanical properties. Applications to soils and civil engineering materials. Overview of state-of-the-art instrumental techniques for analysis of the physicochemical properties of soils and civil engineering materials.

CE 5670: Geomaterials Stabilization

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Soil and aggregate physical, chemical and biological stabilization procedures. Stabilization analysis and design. Ground modification and compaction methods. Geosynthetics application and design.

CE 5680: Dynamics of Soils and Foundations

Credits: 3. Contact Hours: Lecture 3.

Dynamic soil properties and their measurement. Foundation dynamics and soil-structure interaction. Sources and characteristics of dynamic loads. Vibration of single- and multi-degree-of-freedom systems. Vibration of continuous systems; 1D, 2D, and 3D analyses, wave propagation. Liquefaction concepts and analysis methods. Introduction to geotechnical earthquake engineering.

CE 5690: Ground Improvement

Credits: 3. Contact Hours: Lecture 3.

Classification of ground improvement methods. Dynamic compaction, vibrocompaction, preloading using fill surcharge, vacuum or a combination of both and prefabricated vertical drains, vibro replacement or stone columns, dynamic replacement, sand compaction piles, geotextile confined columns, rigid inclusion, column supported embankment, microbial methods, particulate and chemical grouting, lime and cement columns, jet grouting, and deep cement mixing.

CE 5700: Applied Hydraulic Design

Credits: 3. Contact Hours: Lecture 3.

Flow characteristics in natural and constructed channels; principles of hydraulic design of culverts, bridge waterway openings, spillways, hydraulic gates and gated structures, pumping stations, and miscellaneous water control structures; pipe networks, mathematical modeling. Design project. Offered odd-numbered years. (Typically Offered: Fall)

CE 5710: Surface Water Hydrology

(Cross-listed with ENSCI 5710).

Credits: 3. Contact Hours: Lecture 3.

Analysis of hydrologic data including precipitation, infiltration, evapotranspiration, direct runoff and streamflow; theory and use of frequency analysis; theory of streamflow and reservoir routing; use of deterministic and statistical hydrologic models. Fundamentals of surface water quality modeling, point and non-point sources of contamination. (Typically Offered: Spring)

CE 5720: Analysis and Modeling Aquatic Environments

(Cross-listed with ENSCI 5720).

Credits: 3. Contact Hours: Lecture 3.

Principles of surface water flows and mixing. Introduction to hydrologic transport and water quality simulation in natural water systems. Advection, diffusion and dispersion, chemical and biologic kinetics, and water quality dynamics. Applications to temperature, dissolved oxygen, primary productivity, and other water quality problems in rivers, lakes and reservoirs. Deterministic vs. stochastic models. Offered even-numbered years. (Typically Offered: Fall)

CE 5730: Groundwater Hydrology

(Cross-listed with ENSCI 5730).

Credits: 3. Contact Hours: Lecture 3.

Principles of groundwater flow, hydraulics of wells, super-position, slug and pumping tests, streamlines and flownets, and regional groundwater flow. Contaminant transport. Computer modeling. Individual and group projects. (Typically Offered: Fall)

CE 5760: Environmental Flows

Credits: 3. Contact Hours: Lecture 3.

Analysis and applications of flows in civil engineering, environmental engineering, and water resources. Primary topics include conservation laws, laminar flow, turbulence, mixing, diffusion, dispersion, water waves, and boundary layers. Associated applications include particle settling, transfer at air-water and water-sediment boundaries, flow and friction in pipes and open channels, contaminant transport, waves in lakes, jets, plumes, and salt wedges.

CE 5810: Geotechnical and Materials Engineering Seminar

Credits: Required. Contact Hours: Lecture 1.

Repeatable.

Students and outside/invited speakers give weekly presentations about the ongoing research work and Geotechnical and Materials Engineering issues. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

CE 5830: Pavement Analysis and Design

(Dual-listed with CE 4830).

Credits: 3. Contact Hours: Lecture 3.

Analysis, behavior, performance, and structural design of pavement systems. Topics include climate factors, rehabilitation, life cycle design economics, material and system response, pavement foundations and traffic loadings. Development of models for and analysis of pavement systems. Use of transfer functions relating pavement response to pavement performance. Evaluation and application of current and evolving pavement design practices and procedures. Mechanistic-based pavement design techniques and concepts. Analysis of the effects of maintenance activities on pavement performance and economic evaluation of pavement systems. Design project. (Typically Offered: Spring)

CE 5840: Advanced Design of Concretes

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Asphalt binder characterization, fundamentals of asphalt rheology, asphalt materials behavior under loading and temperature effects. High-strength, lightweight, fiber-reinforced, and self-consolidating portland cement concretes, mix design, properties, advanced performance testing. Design project.

CE 5860: Advanced Asphalt Materials

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Advanced asphalt concrete (SUPERPAVE) mix designs. Aggregates. Admixtures. Production and construction, quality control and inspection. Nondestructive testing. Pavement thickness design. Materials engineering reports.

CE 5870: Advanced Portland Cement Concretes

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Hydraulic cements, aggregates, admixtures, and concrete mix design; cement hydration and microstructure development; fresh, early-age, and mechanical properties of concrete; concrete distress examination, damage mechanism, and prevention.

CE 5880: Sustainable Civil Infrastructure Systems

Credits: 3. Contact Hours: Lecture 3.

Sustainable planning, life cycle analysis, appropriate engineering design, investment levels and overall rating of civil engineering infrastructure systems, including highway, bridge, airport, rail, dam, power and port facilities. Complementary assessment of future civil infrastructure sustainability impacts and challenges in relation to autonomous and electric vehicle development. Overview regarding US and global availability and supply of critical infrastructure commodities (e.g., cement, stone, metals, phosphorus, uranium, etc.). Directed course readings and multiple project/design reports. (Typically Offered: Fall)

CE 5890: Pavement Preservation and Rehabilitation

Credits: 3. Contact Hours: Lecture 3.

Overview of pavement preservation and pavement rehabilitation techniques. Overview and selection of materials used in pavement preservation and rehabilitation strategies. Evaluating suitability of pavement preservation and pavement rehabilitation strategies based on existing structure, pavement distresses and non-condition factors. Use of recycled pavement materials in pavement reconstruction techniques. (Typically Offered: Fall, Spring)

CE 5900: Special Topics

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

Pre-enrollment contract required. (Typically Offered: Fall, Spring, Summer)

CE 5910: Seminar in Environmental Engineering

Credits: Required. Contact Hours: Lecture 1.

Repeatable.

Contemporary environmental engineering issues. Outside speakers. Review of ongoing research in environmental engineering. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

CE 5940A: Special Topics Construction Engineering and Mgt.: Planning and Scheduling

Credits: 3. Contact Hours: Lecture 3.

Studies in planning and scheduling including scheduling and estimating.

CE 5940B: Special Topics Construction Engineering and Mgt.: Computer Applications for Planning and Scheduling

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Studies in computer applications for planning and scheduling.

CE 5940C: Special Topics Construction Engineering and Mgt.: Cost Estimating

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Studies in cost estimating.

CE 5940D: Special Topics Construction Engineering and Mgt.: Computer Applications for Cost Estimating

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Studies in computer applications for cost estimating.

CE 5940E: Special Topics Construction Engineering and Mgt.: Project Controls

Credits: 1. Contact Hours: Lecture 3.

Repeatable.

Studies in project controls.

CE 5940F: Special Topics Construction Engineering and Mgt.: Computer Applications for Project Controls

Credits: 1. Contact Hours: Lecture 10.

Repeatable.

Studies in computer applications for project controls.

CE 5940G: Special Topics Construction Engineering and Mgt: Integration of Planning, Scheduling and Project Controls

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Studies in integration of planning, scheduling and project controls.

CE 5940J: Special Topics Construction Engineering and Mgt.: Trenchless Technologies

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Studies in trenchless technologies.

CE 5940K: Special Topics Construction Engineering and Mgt.: Electrical and Mechanical Construction

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Studies in electrical and mechanical construction.

CE 5940L: Special Topics Construction Engineering and Mgt.: Advanced Building Construction Topics - LEED for New Construction

Credits: 3. Contact Hours: Lecture 3.

Studies in advanced building construction topics including LEED.

(Typically Offered: Summer)

CE 5940M: Special Topics Construction Engineering and Mgt.: Design Build Construction

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Studies in design build construction.

CE 5940N: Special Topics Construction Engineering and Mgt.: Industrial Construction

Credits: 3. Contact Hours: Lecture 3.

Studies in industrial construction.

CE 5940O: Special Topics Construction Engineering and Mgt.: Highway and Heavy Construction

Credits: 3. Contact Hours: Lecture 3.

Studies in highway and heavy construction.

CE 5940P: Special Topics Construction Engineering and Mgt.: Advanced Building Energy Systems and Technologies

Credits: 3. Contact Hours: Lecture 3.

Studies in advanced building technologies including building energy modeling, building energy performance and efficiency assessments, and demand side management for smart grid applications.

CE 5940Q: Special Topics Construction Engineering and Mgt.: Construction Quality Control

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Studies in construction quality control.

CE 5940R: Special Topics Construction Engineering and Mgt.: Risk Management

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Studies in risk management.

CE 5940S: Special Topics Construction Engineering and Mgt.: Building Information Modeling

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Studies in building information modeling.

CE 5950A: Research Methods Seminar in Construction Engineering and Management: Qualitative Methods

Credits: 1. Contact Hours: Lecture 1.

Assigned readings and reports on qualitative research methods to assess and solve construction engineering and management problems.

CE 5950B: Research Methods Seminar in Construction Engineering and Management: Quantitative Methods

Credits: 1. Contact Hours: Lecture 1.

Assigned readings and reports on quantitative research methods to assess and solve construction engineering and management problems.

CE 5950C: Research Methods Seminar in Construction Engineering and Management: Technical Reporting

Credits: 1. Contact Hours: Lecture 1.

Assigned readings and reports on research methods for planning and preparation of technical reports with construction engineering and management research projects.

CE 5990: Creative Component

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Pre-enrollment contract required. Advanced topic for creative component report in lieu of thesis.

Courses for graduate students:

CE 6220A: Advanced Topics in Environmental Engineering: Water Pollution Control

Credits: 2. Contact Hours: Lecture 2.

Repeatable.

Advanced concepts in environmental engineering.

CE 6220B: Advanced Topics in Environmental Engineering: Water Treatment

Credits: 2. Contact Hours: Lecture 2.

Repeatable.

Advanced concepts in environmental engineering.

CE 6220C: Advanced Topics in Environmental Engineering: Solid and Hazardous Waste

Credits: 2. Contact Hours: Lecture 2.

Repeatable.

Advanced concepts in environmental engineering.

CE 6220D: Advanced Topics in Environmental Engineering: Water Resources

Credits: 2. Contact Hours: Lecture 2.

Repeatable.

Advanced concepts in environmental engineering.

CE 6220E: Advanced Topics in Environmental Engineering: Instrumental Methods for Environmental Analyses

Credits: 2. Contact Hours: Lecture 2.

Repeatable.

Advanced concepts in environmental engineering.

CE 6500A: Advanced Topics in Transportation Engineering: Highway Design

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

CE 6500B: Advanced Topics in Transportation Engineering: Traffic Operations

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

CE 6500C: Advanced Topics in Transportation Engineering: Big Data Analysis

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Topics in transportation engineering related to data analysis.

CE 6500D: Advanced Topics in Transportation Engineering: Traffic Simulation

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

CE 6900: Advanced Topics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Pre-enrollment contract required. (Typically Offered: Fall, Spring, Summer)

CE 6910: Seminar in Transportation Planning

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Provides an overview of current transportation issues; speakers provide seminars on a variety of timely transportation topics. (Typically Offered: Fall, Spring)

CE 6970: Engineering Internship

Credits: Required. Repeatable.

One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

CE 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Advanced topic for thesis/dissertation.

Classical Studies (CLST)

Courses primarily for undergraduates:

CLST 2730: Greek and Roman Mythology

Credits: 3. Contact Hours: Lecture 3.

Survey of the legends, myths of the classical world with emphasis on the principal gods, and heroes, and their relation to ancient social, psychological, and religious practices; some attention may be given to important modern theories. Meets International Perspectives Requirement.

CLST 2730H: Greek and Roman Mythology: Honors

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Survey of the legends, myths of the classical world with emphasis on the principal gods, and heroes, and their relation to ancient social, psychological, and religious practices; some attention may be given to important modern theories. Meets International Perspectives Requirement.

CLST 2750: The Ancient City

Credits: 3. Contact Hours: Lecture 3.

Examination of ancient urban life, including historical context, physical space, material culture, religion, literature, and art; examination of civic identity (the 'polis'). Contrast between the concepts of urban and rural. Examples drawn from one or several selected ancient cities; some attention to modern methods of recovering the conditions of ancient urban life and the fundamental concept of the city in European history. Meets International Perspectives Requirement.

CLST 3100: Ancient Philosophy

(Cross-listed with PHIL 3100).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits in PHIL or Permission of Instructor

Survey of ancient Greek philosophy, focusing on the pre-Socratics, Plato, and Aristotle. Questions concerning being, knowledge, language, and the good life are treated in depth. (Typically Offered: Fall)

CLST 3500: Rhetorical Traditions

(Cross-listed with ENGL 3500/ SPCM 3500).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Ideas about the relationship between rhetoric and society in contemporary and historical contexts. An exploration of classical and contemporary rhetorical theories in relation to selected topics that may include politics, gender, race, ethics, education, science, or technology. (Typically Offered: Spring)

CLST 3530: World Literature: Western Foundations through Renaissance

(Cross-listed with ENGL 3530).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Representative works of drama, poetry, and prose from ancient times through the mid-seventeenth century. Consideration of Western traditions within global contexts. Attention to religious and ethnic diversity; oral, manuscript, and print cultures; political authority; and the impact of translation on form, meaning, and reception of texts. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

CLST 3670: Christianity in the Roman Empire

(Cross-listed with RELIG 3670).

Credits: 3. Contact Hours: Lecture 3.

An historical introduction to the rise of Christianity in the Roman empire, with special attention to the impact of Greco-Roman culture on the thought and practice of Christians and the interaction of early Christians with their contemporaries.

CLST 3680: Religions of Ancient Greece and Rome

(Cross-listed with RELIG 3680).

Credits: 3. Contact Hours: Lecture 3.

Nature, origins and development of religious beliefs and practices in ancient Greece and Rome from earliest times up to the rise of Christianity. Roles of divinities and rituals in lives of individuals and families and the governing of city-states and empires. Emphasis on historical contexts of the Graeco-Roman world and influences of neighboring cultures in Africa and Asia. Meets International Perspectives Requirement.

CLST 3690: Ancient Egypt

(Cross-listed with ANTHR 3690).

Credits: 3. Contact Hours: Lecture 3.

Archaeology and culture of Ancient Egypt from prehistory to Late Antiquity. Exploration of literature, religion, social history, government, and architecture. Discussion of major archaeological sites and methods; examination of interaction with other ancient near eastern and Mediterranean civilizations. Meets International Perspectives Requirement.

CLST 3700X: Topics in the Ancient Mediterranean

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 12 credits.

Topics in ancient Greek, Roman, or Egyptian culture vary according to faculty interest. Readings from ancient and modern sources in English. Meets International Perspectives Requirement.

CLST 3720: Greek and Roman Tragedy and Comedy

Credits: 3. Contact Hours: Lecture 3.

Greek and Roman drama from the beginnings until today. Readings in English from authors such as Aeschylus, Sophocles, Euripides, Aristophanes, Menander, Plautus, Terence, Seneca. Course may cover performance, theories of comedy and tragedy, recent and current expressions of the comic and tragic in film and other media. Meets International Perspectives Requirement.

CLST 3720H: Greek and Roman Tragedy and Comedy: Honors

Credits: 4. Contact Hours: Lecture 4.

Greek and Roman drama from the beginnings until today. Readings in English from authors such as Aeschylus, Sophocles, Euripides, Aristophanes, Menander, Plautus, Terence, Seneca. Course may cover performance, theories of comedy and tragedy, recent and current expressions of the comic and tragic in film and other media. Meets International Perspectives Requirement.

CLST 3730: Heroes of Greece, Rome, and Today

Credits: 3. Contact Hours: Lecture 3.

Cultural and political significance of ancient epic, especially in Greece and Rome. Course may include study of the heroic code in antiquity and its modern expressions including in film. Readings in English from authors such as Homer and Vergil. Meets International Perspectives Requirement.

CLST 3730H: Heroes of Greece, Rome, and Today: Honors

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Cultural and political significance of ancient epic, especially in Greece and Rome. Course may include study of the heroic code in antiquity and its modern expressions including in film. Readings in English from authors such as Homer and Vergil. Meets International Perspectives Requirement.

CLST 3740: Sex, Gender, and Culture in the Ancient Mediterranean World

(Cross-listed with HIST 3740/ WGS 3740).

Credits: 3. Contact Hours: Lecture 3.

Survey of the roles of women and others on the margins and the issues that impacted them in the ancient Greek and Roman worlds. Evidence from literature, the visual arts, and archaeology. Contemporary approaches to studying women, gender, and sexuality in ancient history. Intersections of gender categories with ideas of slave and free status, citizenship, and ethnicity. Readings from ancient and modern sources. Meets International Perspectives Requirement.

CLST 3760A: Classical Archeology: Bronze Age and Early Iron Age Greece

(Cross-listed with ANTHR 3760A).

Credits: 3. Contact Hours: Lecture 3.

An examination of the material culture of Bronze Age and Early Iron Age Greece (ca 3000-700 BCE) and the role of archaeological context in understanding the varied aspects of the cultures that flourished in the region. Primary focus on the urbanized palatial centers that emerged on the island of Crete (Minoan) and in mainland Greece (Mycenaean). Topics include the emergence of social complexity, cultural and technological changes, religious systems, and methods of interpretation. Meets International Perspectives Requirement.

CLST 3760B: Classical Archeology: Archaic through Hellenistic Greece (ca 700-30 BCE)

(Cross-listed with ANTHR 3760B).

Credits: 3. Contact Hours: Lecture 3.

An examination of the material culture of ancient Greece from ca. 700-30 BCE and the role of archaeological context in understanding the varied aspects of Greek culture found in cities, rural areas, and sanctuaries during the Archaic, Classical, and Hellenistic periods. Topics include urbanization and the rise of the polis, sanctuaries and their offerings, engagement with the wider Mediterranean, and developments in the ways that the Greeks conceptualized and represented their world. Meets International Perspectives Requirement.

CLST 3760C: Classical Archaeology: Roman Archaeology (ca 1000 BCE-400 CE)

(Cross-listed with ANTHR 3760C).

Credits: 3. Contact Hours: Lecture 3.

An examination of major developments in architecture, sculpture, painting, and other arts of the ancient Roman world and the role of archaeological context in understanding various aspects of Roman culture. Topics include art in the service of social ideology and political propaganda; interactions between the Etruscans, Greeks, and Romans; and the relationship between Rome and its provinces. Meets International Perspectives Requirement.

CLST 3830: Greek and Roman Art

(Cross-listed with ARTH 3830).

Credits: 3. Contact Hours: Lecture 3.

Greek art from Neolithic to Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

CLST 3830H: Greek and Roman Art: Honors

(Cross-listed with ARTH 3830H).

Credits: 3-4. Contact Hours: Lecture 3.

Greek art from Neolithic to Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

CLST 3840: Roman Italy: An Introduction

(Cross-listed with HIST 3840).

Credits: 2. Contact Hours: Lecture 2.

Repeatable.

Prereq: Instructor Permission for Course

Introduction to the topography, history, archaeology, monuments, and art of Rome from the 8th century BCE to the 5th century CE; attention given to the culture of modern Italy, preparatory to study abroad in Rome. Enrollment limited to students participating in CLST 3850/HIST 3850. Meets International Perspectives Requirement. (Typically Offered: Spring)

CLST 3850: Study Abroad: Roman Italy: Building the Empire

(Cross-listed with HIST 3850).

Credits: 3. Repeatable, maximum of 6 credits.

Prereq: CLST 3840/HIST 3840, Instructor Permission Required

Supervised on-site instruction in the history, archaeology, monuments, and art of Rome and environs from the 8th century BCE to the 5th century CE; attention given to the culture of modern Italy. Meets International Perspectives Requirement. (Typically Offered: Summer)

CLST 3940: The Archaeology of Greece: An Introduction

Credits: 2. Contact Hours: Lecture 2.

Repeatable, maximum of 4 credits.

Prereq: Instructor Permission for Course

Introduction to the topography, history, archaeology, monuments and art of Greece from the Bronze Age through the Ottoman period; attention given to the culture of modern Greece, preparatory to study abroad in Greece (CLST 3950). Enrollment limited to students participating in CLST 3950. Meets International Perspectives Requirement. (Typically Offered: Spring)

CLST 3950: Study Abroad: The Archaeology of Greece

Credits: 2-6. Contact Hours: Lecture 2.

Repeatable, maximum of 9 credits.

Prereq: CLST 3940; Instructor Permission Required

Supervised on-site instruction in the archaeology, monuments, and art of Greece from the Bronze Age through the Ottoman period; attention given to the culture of modern Greece. Meets International Perspectives Requirement. (Typically Offered: Summer)

CLST 4020: Greek Civilization

(Cross-listed with HIST 4020).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Ancient Greece from the Bronze Age to the Hellenistic period; evolution of the Greek polis and its cultural contributions, with a particular emphasis on the writings of Herodotus and Thucydides.

CLST 4030: Roman Civilization

(Cross-listed with HIST 4030).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Ancient Rome from the Regal Period to the fall of the Western Empire; evolution of Roman institutions and Rome's cultural contributions studied through original sources.

CLST 4100: Soul, Mind, and World in Ancient Greek Philosophy

(Cross-listed with PHIL 4100).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 credits in PHIL or CLST, or Permission of Instructor

Prominent theories of soul and mind developed by Greek philosophers in the classical period, roughly 500 BCE-200 CE, and how the philosophers located these theories within their general metaphysical views. Relationship between mind and body and the roles of reason, desire, and emotion. Philosophers to be studied include Plato, Aristotle, and selected others. (Typically Offered: Spring)

CLST 4300: Foundations of Western Political Thought

(Cross-listed with POLS 4300).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 credits in POLS, HIST, or PHIL

Study of original texts in political thought ranging from the classical period to the renaissance. Topics such as justice, freedom, virtue, the allocation of political power, the meaning of democracy, human nature, and natural law. (Typically Offered: Fall, Spring, Summer)

CLST 4800: Seminar in Classical Studies

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Prereq: Permission of Program Director

Advanced study of a selected topic in Classical Studies. Research paper or project selected by the student.

CLST 4900: Independent Study

Credits: 1-6. Repeatable, maximum of 9 credits.

Prereq: 7 credits in CLST at the 2000-level or higher; Permission of the Program Chair

Designed to meet the needs of students who wish to study specific topics in classical civilization in areas where courses are not offered, or to pursue such study beyond the limits of existing courses at the advanced level.

Courses primarily for graduate students, open to qualified undergraduates:

CLST 5120A: Readings Seminar in European History: Ancient

(Cross-listed with HIST 5120A).

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings in European history.

CLST 5300: Foundations of Western Political Thought

(Cross-listed with POLS 5300).

Credits: 3. Contact Hours: Lecture 3.

Study of original texts in political thought ranging from the classical period to the renaissance. Topics such as justice, freedom, virtue, the allocation of political power, the meaning of democracy, human nature, and natural law. (Typically Offered: Fall, Spring, Summer)

CLST 5940A: Research Seminar in European History: Ancient

(Cross-listed with HIST 5940A).

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Topics vary each time offered.

Communication Studies (COMST)

Courses primarily for undergraduates:

COMST 1010: Introduction to Communication Studies

Credits: 3. Contact Hours: Lecture 3.

An introduction to communication theory, the development and functions of communication, and a survey of verbal, nonverbal, interpersonal, small group, organizational, and intercultural communication.

COMST 1040: Orientation to Communication Studies

Credits: 1. Contact Hours: Lecture 1.

Prereq: Major in Communication Studies

Orientation to Communication Studies discipline, program requirements and career opportunities. Required of communication studies majors. Offered on a satisfactory-fail basis only.

COMST 2100: Communication and U.S. Diversity

Credits: 3. Contact Hours: Lecture 3.

Introduction to the role of diversity in communication. Developing competent communication with diverse social groups within interpersonal and organizational contexts in the United States. Topics may include structured reflection of one's role in diverse communication experiences, cultural variations in communication mores, impacts of racial/ethnic/gender identities on communication, workplace policies regarding cultural diversity, the intersection of communication and cultural privilege, communication practices that can reduce prejudice/discrimination, and communication characteristics of advocates for diversity. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring, Summer)

COMST 2110: Interpersonal Communication

Credits: 3. Contact Hours: Lecture 3.

Application of major principles related to interpersonal communication theories, concepts, and research. Emphasis on using interpersonal communication skills effectively.

COMST 2140: Professional Communication

Credits: 3. Contact Hours: Lecture 3.

Communication theory and skill development in organizational settings. Emphasis on interpersonal skill development, team and meeting facilitation, informational interviewing, individual and team presentations, and self-assessment. (Typically Offered: Fall, Spring, Summer)

COMST 2180: Conflict Management

Credits: 3. Contact Hours: Lecture 3.

Exploration of communication theories, principles and methods associated with effective conflict management.

COMST 3010: Human Communication Theory

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMST 1010

Examination of the major theories related to human communication; with particular emphasis on theories underlying interpersonal, small group, organizational, and intercultural communication.

COMST 3030: Introduction to Communication Research Methods

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMST 1010; 3 additional credits in COMST

An introduction to evaluating, analyzing, and conducting communication research. Provides an overview of quantitative and qualitative approaches to communication research that are beneficial to learn communication concepts and solve communication issues.

COMST 3100: Intercultural Communication

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMST 1010

Examines the theories, principles and research on intercultural communication to enhance cultural sensitivity and to recognize, accept, and adapt to cultural diversity. Interactive assignments. Meets International Perspectives Requirement.

COMST 3110: Relational Communication

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMST 1010

Contemporary relational communication theories, concepts, and research. Examines issues central to communication and its application in interpersonal relationships.

COMST 3130: Leadership Communication Theories

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMST 1010

Investigation of theories, research and principles of leadership communication. Exploration of the contexts in which leadership and communication occurs, with emphasis on the connection between communication and leadership and the dyadic linkage of leader and follower. (Typically Offered: Fall, Spring)

COMST 3140: Organizational Communication

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMST 1010

Theory and research in organizational communication. Provides strategies for assessing and improving individual and organizational communication effectiveness. Addresses issues such as technology, diversity, work-life negotiation, emotional labor, conflict, socialization, and socially responsible organizations. Explores how organizational meaning is created and sustained through human communication.

COMST 3170: Small Group Communication

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMST 1010

Theory and research in small group communication; application to group decision-making and leadership. Includes communication analyses of groups and teams.

COMST 3190: Communication Training and Development

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMST 1010

Theories and approaches to communication training and development; includes adult learning theory. Emphasis on the design, presentation and assessment of communication skills in organizational contexts.

COMST 3250: Nonverbal Communication

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMST 1010

Approaches to studying nonverbal communication. Foci include topics such as emotion, gestures, gaze, use of space, and parsing intention in social interaction.

COMST 3270: Persuasion and Social Influence

(Cross-listed with PSYCH 3270).

Credits: 3. Contact Hours: Lecture 3.

Examination of theories and research in persuasive communication, including attitudes and social influence. Emphasis on persuasive communication strategies in everyday social settings that influence changes in attitudes and actions. (Typically Offered: Fall, Spring, Summer)

COMST 3300: Computer Mediated Communication

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMST 1010

Theories and approaches related to mediated communication in interpersonal and organizational settings. Focus on how new technology impacts human interaction and relationships.

COMST 4040: Research Seminar

(Dual-listed with COMST 5040).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Prereq: COMST 3010 and 3 Credits in COMST 3100, COMST 3110, COMST 3130, COMST 3140, COMST 3170, COMST 3190, COMST 3250, or COMST 3300

Capstone communication studies course. Students develop an original research study linked to the study of communication. Data are collected and analyzed. Results are presented in a final research paper and a presentation. (Typically Offered: Fall, Spring, Summer)

COMST 4500A: Special Topics in Communication Studies: General

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: Junior standing or Permission of Instructor

Research and theory related to special topics and issues in communication studies. Offered irregularly. (Typically Offered: Fall, Spring)

COMST 4500B: Special Topics in Communication Studies: Health Communication

(Dual-listed with COMST 5500B).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior standing or Permission of Instructor

Examines research, theories, and concepts relevant to health communication. Topics include studying the interpersonal, organizational, and mediated communication occurring in health care and public health settings, and understanding why effective communication contributes to positive health outcomes. (Typically Offered: Fall, Spring)

COMST 4900: Independent Study

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: 9 credits in COMST; Junior classification; Permission of Instructor

Application must be submitted for approval the semester prior to the independent study. (Typically Offered: Fall, Spring, Summer)

COMST 4910: Research Practicum

Credits: 1-30. Repeatable, maximum of 6 credits.

Prereq: COMST 2030; COMST 3010; Permission of Instructor

Providing research assistance on projects conducted by Communication Studies faculty. (Typically Offered: Fall, Spring, Summer)

COMST 4970: Professional Internship

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: COMST 2030; COMST 3010; 1 additional 3000-level COMST course; Junior classification; Department Permission

100 hours of on-site professional work per credit hour plus completion of the academic requirement set by the internship committee. Application should be submitted in the term prior to the term in which the internship will be served. Internship cannot be used to meet degree requirement in Communication Studies. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

COMST 5040: Research Seminar

(Dual-listed with COMST 4040).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Research Seminar. (Typically Offered: Fall, Spring, Summer)

COMST 5500B: Special Topics in Communication Studies:Health

(Dual-listed with COMST 4500B).

Credits: 3. Contact Hours: Lecture 3.

(Typically Offered: Fall, Spring)

COMST 5900: Special Topics

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

Application must be submitted for approval the semester prior to the independent study. (Typically Offered: Fall, Spring, Summer)

Community and Regional Planning (CRP)

Courses primarily for undergraduates:

CRP 2010: The North American Metropolis

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Examination of the evolution of American urban centers from the colonial era to the present. Considers the demographic changes and social movements underway in urban America and explores how an understanding of the history of cities provides us with knowledge that we can use to improve our cities today. (Typically Offered: Fall, Spring)

CRP 2110: Digital Design Methods for Landscape Architecture

(Cross-listed with LA 2110).

Credits: 3. Contact Hours: Lecture 3.

Foundational knowledge and basic skills in 2D, 3D, and 4D computer applications used for design development and communication, with emphasis on 3D modeling and workflow interoperability. (Typically Offered: Spring)

CRP 2510: Fundamentals of Geographic Information Systems

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Fundamentals of the concepts, models, functions and operations of Geographic Information Systems (GIS). Principles of spatial problems, spatial questions and hypotheses and their solutions based on spatial data, GIS tools and techniques. Integration of concepts and applications through lectures and facilitated labs. Applications from a variety of areas including design; physical, social, and human science; engineering; agriculture; business and medicine, landscape architecture, architecture, urban planning, geology, forestry, biology, and ecology. (Typically Offered: Fall)

CRP 2910: World Cities and Globalization

Credits: 3. Contact Hours: Lecture 3.

World cities and globalization in developed and developing countries.

Topics include globalization, world cities and regions, uneven economic development, the international division of labor, multinational corporations, international environmentalism, tourism, popular culture and place-based identity. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

CRP 2930: Environmental Planning

(Cross-listed with ENVS 2930).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Comprehensive overview of the field of environmental relationships and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water. (Typically Offered: Fall, Spring)

CRP 3010: Urban Analytical Methods

Credits: 4. Contact Hours: Lecture 3, Studio 2.

Prereq: STAT 1010

An introduction to the methods and analytical techniques used by planners to study community change. Course includes identification of key sources of planning information and data. Students learn to use quantitative methods for analysis of population, land use, economic and transportation data. Students learn to apply basic analytic methods to community problems and learn the art of effective written, graphic, and oral presentation of data. (Typically Offered: Spring)

CRP 3200: Urban Geography

Credits: 3. Contact Hours: Lecture 3.

An introduction to urban geography. Study of urban centers, including people and infrastructure. Investigation of the origin and evolution of urban areas and the processes that shape urban change. Topics include urban form, and the social, economic, political, cultural, and institutional factors that shape cities. (Typically Offered: Fall, Spring)

CRP 3250: Introduction to Housing

Credits: 3. Contact Hours: Lecture 3.

Introduction to issues related to the topic of housing in the United States. Particular focus on the social and spatial segmentation of housing in the U.S. and the role of policy in housing production and regulation. Meets U.S. Diversity Requirement. (Typically Offered: Spring)

CRP 3300: Practicum

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Major in CRP

Structured work experience under close supervision of a professional planner. Practical planning experience; relationships between theory and practice, professional responsibilities, and the scope of various planning roles. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

CRP 3310: Professional Practice Seminar

Credits: 2. Contact Hours: Lecture 2.

Prereq: CRP 3010 and Junior classification

Preparation for working as a planning professional; development of resume and portfolio; discussion of professional ethics and expectations of employers and clients; presentations from planning professionals, and discussion of the range of career choices within the planning profession. (Typically Offered: Fall)

CRP 3510: Intermediate Geographic Information Systems

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: CRP 2510

Intermediate GIS for design and non-design students to learn concepts of digital management and representation of spatial data, including spatial problems, data sources and structures, simple spatial operations and cartographic issues. Gain skill set to effectively display feature and tabular data, query features using logical expressions, edit spatial and attribute data, associate tables with joins and relates, produce maps, reports, and graphs. (Typically Offered: Fall, Spring)

CRP 3760: Rural, Urban and Regional Economics

(Cross-listed with ECON 3760).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010

Firm location with respect to regional resources, transport, scale economies, externalities, and policies. Measures of local comparative advantage and specialization. Spatial markets. Population location considering jobs, wages, commuting, and local amenities. Business, residential, and farm land use and value. Migration. Other topics may include market failure, regulation, the product cycle, theories of rural and urban development, developmental policy, firm recruiting, local public goods and public finance, schools, poverty, segregation, and crime.

CRP 3830: Theory of the Planning Process

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

The nature of planning and its relation to social and economic planning; levels of planning, place of planning in decision making; steps in the planning process, uses and limitation of knowledge in planning, relation of facts and values. (Typically Offered: Fall)

CRP 3910: Field Travel

Credits: 1-2. Repeatable.

Prereq: Major in CRP

Observation of professional practice and community or regional problems and issues. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

CRP 4100: Professional Work Experience

Credits: Required. Repeatable.

Prereq: Instructor Permission for Course

Approved professional work experience. (Typically Offered: Fall, Spring, Summer)

CRP 4160: Urban Design and Practice

(Dual-listed with CRP 5160).

Credits: 6.

Prereq: CRP 3010

Principles of urban design and their application to residential and commercial development in studio projects. (Typically Offered: Spring)

CRP 4170: Urban Revitalization

(Dual-listed with CRP 5170).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications. (Typically Offered: Spring)

CRP 4210: Financing Historic Preservation Projects

Credits: 3. Contact Hours: Lecture 3.

Investigation of the financial tools and incentives used to promote the rehabilitation and redevelopment of historic buildings and neighborhoods in cities and towns. Study of broader economic and social impacts on communities. Examinations of completed preservation projects around the United States. (Typically Offered: Fall)

CRP 4290: Planning in Developing Countries

(Dual-listed with CRP 5290).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Introduction to issues in planning and governance in developing countries. Problems and strategies may include population movement and change, economic globalization, rural development, urban growth, sustainable development, and housing. (Typically Offered: Fall, Spring)

CRP 4320: Community Planning Studio

Credits: 4-6.

Prereq: (CRP 2010 or CRP 3010 or CRP 3830) OR Permission of Instructor

Integration of planning methods and theory in dealing with a community planning problem. Analysis of problem and formulation of strategies for implementation. Preparation of a community planning report. (Typically Offered: Fall, Spring)

CRP 4350: Planning in Small Towns

(Dual-listed with CRP 5350).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Contemporary planning problems in small towns and the design of viable strategies to enhance their social and economic position in today's society. (Typically Offered: Fall)

CRP 4360: Community Economic Development

(Dual-listed with CRP 5360).

Credits: 3. Contact Hours: Lecture 3.

The nature and process of economic development in the context of community development. Recent changes and trends and their implications for local and regional development. Selected case studies and applications. Contemporary community economic development issues. Offered odd-numbered years. (Typically Offered: Fall)

CRP 4370: Public Participation in Planning

Credits: 3. Contact Hours: Lecture 3.

Rationale and need for public participation in community planning and development. Techniques used to garner participation, and the ability to integrate techniques into a broader participatory process. Techniques covered will include public hearings, public meetings, social action construct, advisory committees, scenario building, social media and asset mapping. Students will also work with a community to demonstrate skills learned. (Typically Offered: Spring)

CRP 4420: Site Development

(Dual-listed with CRP 5420).

Credits: 3. Contact Hours: Lecture 3.

Introduction to site development including site review. Studio project integrating concept, finance, selection, analysis, and design. (Typically Offered: Spring)

CRP 4450: Transportation Policy and Planning

(Dual-listed with CRP 5450).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Comprehensive overview of key policy issues related to transportation planning and investment in the United States and abroad. Policy issues explored include safety, environmental impact, sustainable communities, and economic development. Policy analysis and planning are studied in conjunction with each policy issue explored. Issues of concern to state, metropolitan, and local governments. (Typically Offered: Fall)

CRP 4490: Geodesign: Planning for Sustainable Futures

(Dual-listed with CRP 5490).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CRP 2510

Geodesign combines design creativity with scientific thinking based on spatial data. Special focus on sustainable development of future neighborhoods, communities, cities and/or countries. Students learn the geodesign process and implement a set of techniques and technologies that enable project conceptualization, data collection and visualization, spatial analysis, design creation, impact evaluation and stakeholder participation. Final project involves developing cases for analysis using GIS software.

CRP 4510: Introduction to Geographic Information Systems

Credits: 3.

Introduction to geographic information systems, including discussions of GIS hardware, software, data structures, data acquisition, data conversion, data presentation, analytical techniques, and implementation procedures. Laboratory emphasizes practical applications and uses of GIS. (Typically Offered: Fall, Spring, Summer)

CRP 4520: Geographic Data Management and Planning Analysis

(Dual-listed with CRP 5520).

Credits: 3.

Prereq: CRP 3510

Extensive coverage of geo-relational database concept and design, GIS database creation and maintenance, geographic data manipulation and analysis. GIS output generation and geographic data presentation. Laboratory emphasizes practical applications and uses of GIS. (Typically Offered: Fall, Spring)

CRP 4540: Fundamentals of Remote Sensing and Spatial Analysis

(Dual-listed with CRP 5540/ LA 5540). (Cross-listed with LA 4540).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CRP 3510

Introduction to image processing techniques needed for analysis of optical remote sensing imagery, including filtering, enhancement, and classification. Analysis of elevation surfaces, hydrology, distance, overlays and visual programming with Model Builder. Practical applications in a variety of topics to understand how to analyze imagery. (Typically Offered: Spring)

CRP 4550: Smart and Sustainable Cities

(Dual-listed with CRP 5550).

Credits: 3. Contact Hours: Lecture 3.

Introduction to concepts of smart and sustainable cities. Study of novel technologies for smart and sustainable cities, including sustainable energy, innovative tools for citizens' engagement, improved safety, smart mobility, and happy living. Examples of national and international smart cities. Students may gain experience with ArcGIS Online, ArcUrban and/or other emerging software.

CRP 4560: GIS Programming and Automation

Credits: 3. Contact Hours: Lecture 3.

Prereq: CRP 3510

Introduction to automated geoprocessing in Geographic Information Systems using Python. Focus on learning scripting language and object-oriented programming, automation of custom-designed geoprocessing scripts, and application toward student research and/or interests. (Typically Offered: Fall, Spring, Summer)

CRP 4570: Geogames for Civic Engagement

(Dual-listed with CRP 5570).

Credits: 3. Contact Hours: Lecture 3.

Explore, design, and implement participatory geospatial games; define GeoGames; learn about different types of GeoGames and their formal and dramatic elements; design GeoGames for civic engagement, community visioning, and community planning. (Typically Offered: Spring)

CRP 4600: Social Justice and Planning

(Dual-listed with CRP 5600).

Credits: 3. Contact Hours: Lecture 3.

Investigation of the topic of social justice as it relates to the challenge of planning more socially just urban societies, emphasizing the importance of social justice issues to planning in a globalized world. Includes a range of issues and case studies of local social justice initiatives, both US and global. Students will complete individual service learning projects as part of the course requirement. Offered even-numbered years. (Typically Offered: Spring)

CRP 4710: Real Estate Development

Credits: 3. Contact Hours: Lecture 3.

Summary of the process to develop real property. Using case studies, examine how the development process differs between residential, office, retail and mixed-use projects. Study the development process using a diverse set of analytical tools including market research, planning and legal analysis, and the discounted cash flow method. (Typically Offered: Spring)

CRP 4750: Grant Writing

(Dual-listed with CRP 5750).

Credits: 1. Contact Hours: Lecture 1.

A short introduction to effective grant writing for the public and non-profit sectors. Includes identifying appropriate funding sources for an organization, identifying goals and objectives, and budgeting. (Typically Offered: Fall)

CRP 4790: Public Finance and Planning

(Dual-listed with CRP 5790).

Credits: 3. Contact Hours: Lecture 3.

Overview of public finance theory, particularly in how it relates to local governments and the work of planning and community development. Concepts include theories of taxation, challenges unique to local public finance, collective action, and a survey of the different revenue sources used to fund local government. (Typically Offered: Spring)

CRP 4840: Sustainable Communities

(Cross-listed with ENVS 4840).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

The history and theory of sustainable community planning. Procedural and substantive dimensions. Case studies of communities engaged in sustainability planning. Use and development of indicators. (Typically Offered: Spring)

CRP 4900: Independent Study

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Investigation of an approved topic commensurate with student's interest and ability. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

CRP 4900H: Independent Study: Honors

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Investigation of an approved topic commensurate with student's interest and ability. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

CRP 4910: Environmental Law and Planning

(Cross-listed with ENVS 4910/ LA 4910).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 credits natural sciences or permission of instructor

Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs. (Typically Offered: Spring)

CRP 4920: Planning Law, Administration and Implementation

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

The basis in constitutional, common, and statutory law for the powers of plan implementation. Problems of balancing public and private interests as revealed in the study of leading court cases. Administration of planning agencies and programs. (Typically Offered: Fall)

CRP 4940: Senior Seminar in Planning

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable, maximum of 2 times.

Prereq: Senior classification

An advanced forum for seniors that focuses upon recent trends and important issues affecting planning today. Topics addressed will vary. A demonstration of understanding of current issues and their effects upon planning applications is expected. (Typically Offered: Fall, Spring)

Courses primarily for graduate students, open to qualified undergraduates:

CRP 5010X: The Practice of Planning

Credits: 1. Contact Hours: Lecture 1.

Exploration of the practice of planning in the United States. Discussion of the role of professional planning; field trips to meet practicing planners; learn about local government structure, functions and key issues confronting Iowa and US communities; examination of career paths within the planning profession.

CRP 5100: Professional Work Experience

Credits: Required. Repeatable.

Prereq: Instructor Permission for Course

Approved professional work experience. (Typically Offered: Fall, Spring, Summer)

CRP 5110: Documenting the Historic Built Environment

Credits: 3-4. Contact Hours: Lecture 4.

Principals and methods for researching, identifying, recording, and analyzing buildings, districts, and sites that are historically or architecturally significant. Classroom and fieldwork components will use real-world historic places as case studies. (Typically Offered: Fall)

CRP 5160: Urban Design Practice

(Dual-listed with CRP 4160).

Credits: 6.

Principles of urban design and their application to residential and commercial development in studio project. (Typically Offered: Spring)

CRP 5170: Urban Revitalization

(Dual-listed with CRP 4170).

Credits: 3. Contact Hours: Lecture 3.

Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications. (Typically Offered: Spring)

CRP 5210: Historic Preservation Planning: Theory and Practice

Credits: 3. Contact Hours: Lecture 3.

Introduction to the history, theory, and practice of historic preservation and cultural resource management. Cases exploring preservation in US and global contexts; politics of preservation; preservation technologies; and relationship of preservation to other community issues. (Typically Offered: Spring)

CRP 5260: Real Estate Development

Credits: 3. Contact Hours: Lecture 3.

Overview of the real estate development process. Topics include the history of real estate development, roles of planning and market forces in real estate development, and financial management of real estate development. Projects involve analysis of market niches, market penetration rates, lease rates, synergism and tenant mix, and the go/no go decision applied to residential, commercial, and mixed-use development.

CRP 5270: Sustainable Community Development

Credits: 3. Contact Hours: Lecture 3.

Introduces the central principles of sustainable community design and its implementation in the residential and commercial real estate development sectors. Topics include current practices and regulatory mandates, with a focus on the importance of private participation in the development of sustainable communities.

CRP 5280: Financing Historic Preservation Projects and Revitalizing Communities

Credits: 3. Contact Hours: Lecture 3.

Investigation of the financial tools and incentives used to promote the rehabilitation and redevelopment of historic buildings and neighborhoods in cities and towns. Study of broader economic and social impacts on communities. Examinations of completed preservation projects around the United States.

CRP 5290: Planning in Developing Countries

(Dual-listed with CRP 4290).

Credits: 3. Contact Hours: Lecture 3.

Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing. (Typically Offered: Fall, Spring)

CRP 5300: Practicum

Credits: 1-3. Repeatable, maximum of 6 credits.

Practical planning experience. Structured work in range of tasks under close supervision of a professional planner. Relationships between theory and practice, exposure to variety of roles in functioning specialties.

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

CRP 5320: Community Planning Studio

Credits: 4-6.

Comprehension and analysis of various geographic contexts pertinent to community planning and the use of planning theory, tools and techniques in an applied setting. Process of making a community plan: historical patterns, current conditions and strategies for planning. (Typically Offered: Fall)

CRP 5350: Planning in Small Towns

(Dual-listed with CRP 4350).

Credits: 3. Contact Hours: Lecture 3.

Contemporary planning problems in small towns and the design of viable strategies to enhance their social and economic position in today's society. Offered even-numbered years. (Typically Offered: Fall)

CRP 5360: Community Economic Development

(Dual-listed with CRP 4360).

Credits: 3. Contact Hours: Lecture 3.

The nature and process of economic development in the context of community development. Recent changes and trends and their implications for local and regional development. Selected case studies and applications. Contemporary community economic development issues. Offered odd-numbered years. (Typically Offered: Fall)

CRP 5420: Site Development

(Dual-listed with CRP 4420).

Credits: 3. Contact Hours: Lecture 3.

Introduction to site development, including site review. Studio project integrating concept, finance, selection, analysis, and design. (Typically Offered: Spring)

CRP 5450: Transportation Policy and Planning

(Dual-listed with CRP 4450).

Credits: 3. Contact Hours: Lecture 3.

Comprehensive overview of key policy issues related to transportation planning and investment in the United States and abroad. Policy issues explored include safety, environmental impact, sustainable communities, and economic development. Policy analysis and planning are studied in conjunction with each policy issue explored. Issues of concern to state, metropolitan, and local governments. (Typically Offered: Fall)

CRP 5490: Geodesign: Planning for Sustainable Futures

(Dual-listed with CRP 4490).

Credits: 3. Contact Hours: Lecture 3.

Geodesign combines design creativity with scientific thinking based on spatial data. Special focus on sustainable development of future neighborhoods, communities, cities and/or countries. Students learn the geodesign process and implement a set of techniques and technologies that enable project conceptualization, data collection and visualization, spatial analysis, design creation, impact evaluation and stakeholder participation. Final project involves developing cases for analysis using GIS software.

CRP 5500: Making Resilient Environments

(Cross-listed with SUSE 5500).

Credits: 3. Contact Hours: Lecture 2.

Major theories and ideas revolving around the concept of resilience. Assessing the social and political processes associated with policy making for resilience. Application of the concept of resilience in order to understand and evaluate environments. Evaluate the different approaches toward resilience and develop an understanding of the relationship between sustainability and resilience. Case studies of communities that proactively prepare for, absorb, recover from, and adapt to actual or potential future adverse events. (Typically Offered: Spring)

CRP 5510: Introduction to Geographic Information Systems

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Introduction to geographic information systems, including discussions of GIS hardware, software, data structures, data acquisition, data conversion, data presentation, analytical techniques, and implementation procedures. Laboratory emphasizes practical applications and uses of GIS. (Typically Offered: Fall, Spring, Summer)

CRP 5520: Geographic Data Management and Planning Analysis

(Dual-listed with CRP 4520).

Credits: 3.

Extensive coverage of geo-relational database concept and design, GIS database creation and maintenance, geographic data manipulation and analysis. GIS output generation and geographic data presentation. Laboratory emphasizes practical applications and uses of GIS. (Typically Offered: Fall, Spring)

CRP 5530: Analytical Planning/GIS

Credits: 3.

Integration of exploratory, participatory and predictive spatial analyses and 3D visualization into the planning process. GIS tools and techniques are used to automate decision analysis and facilitate future planning in analyzing and visualizing planning actions. Laboratory emphasizes practical uses of GIS tools and techniques. (Typically Offered: Fall)

CRP 5540: Fundamentals of Remote Sensing and Spatial Analysis

(Dual-listed with CRP 4540/ LA 4540). (Cross-listed with LA 5540).

Credits: 3. Contact Hours: Lecture 3.

Introduction to image processing techniques needed for analysis of optical remote sensing imagery, including filtering, enhancement, and classification. Analysis of elevation surfaces, hydrology, distance, overlays and visual programming with Model Builder. Practical applications in a variety of topics to understand how to analyze imagery. (Typically Offered: Spring)

CRP 5550: Smart and Sustainable Cities

(Dual-listed with CRP 4550).

Credits: 3. Contact Hours: Lecture 3.

Introduction to concepts of smart and sustainable cities. Study of novel technologies for smart and sustainable cities, including sustainable energy, innovative tools for citizens' engagement, improved safety, smart mobility, and happy living. Examples of national and international smart cities. Students may gain experience with ArcGIS Online, ArcUrban and/or other emerging software.

CRP 5560: GIS Programming and Automation

(Cross-listed with ABE 5560).

Credits: 3. Contact Hours: Lecture 3.

Introduction to automated geoprocessing in Geographic Information Systems using Python. Focus on learning scripting language and object-oriented programming, automation of custom-designed geoprocessing scripts, and application toward student research and/or interests. (Typically Offered: Fall)

CRP 5570: Geogames for Civic Engagement

(Dual-listed with CRP 4570).

Credits: 3. Contact Hours: Lecture 3.

Explore, design, and implement participatory geospatial games; define GeoGames; learn about different types of GeoGames and their formal and dramatic elements; design GeoGames for civic engagement, community visioning, and community planning. (Typically Offered: Spring)

CRP 5580: Web Mapping and Spatial Data Visualization

(Cross-listed with LA 5580).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Use and development of online mapping tools and coding to support participatory GIS, Volunteered Geographic Information, information sharing, geodesign, and decision-making actions. Geoprocessing, spatial data science, and user interface design. Laboratory emphasis on practical applications and uses of Web GIS.

CRP 5600: Social Justice and Planning

(Dual-listed with CRP 4600).

Credits: 3. Contact Hours: Lecture 3.

Investigation of the topic of social justice as it relates to the challenge of planning more socially just urban societies, emphasizing the importance of social justice issues to planning in a globalized world. Includes a range of issues and case studies of local social justice initiatives, both US and global. Students will complete individual service learning projects as part of the course requirement. Offered even-numbered years. (Typically Offered: Spring)

CRP 5610: Planning Theory

Credits: 3. Contact Hours: Lecture 3.

Use and development of theory/action relationship in planning practice. Competing normative theories of planning and their evolution, key components and fundamental critiques. Exploration of planning frameworks and approaches, including comprehensive planning; incrementalism; advocacy; communicative rationality; and others. (Typically Offered: Spring)

CRP 5630: Planning the American Metropolis

Credits: 3. Contact Hours: Lecture 3.

Focus on the historical role of planning in the shaping of American cities and regions, from the beginning of the Republic to the present. Examine the legacy of planning by exploring the intersection of design, politics and policy. Investigate the factors and the processes that produce the built environment. (Typically Offered: Fall)

CRP 5640: Introduction to Analytical Methods for Planning

Credits: 3. Contact Hours: Lecture 3.

Applications of analytical methods in planning with emphasis on the collection, description, analysis, presentation, and interpretation of planning data. Introduction to descriptive statistics. Sources of planning information and data including primary and secondary data types and sources. Demographic analysis, population projection techniques for planning at local and regional levels. (Typically Offered: Fall)

CRP 5660: Policy Analysis and Planning

Credits: 3. Contact Hours: Lecture 3.

Principles and methods for analyzing community problems and policies including forecasting, efficiency and equity measures, cost/benefit, political feasibility, and sensitivity analysis. Examination of social, political, economic, and environmental values and their manifestation in decision making methods used in planning. Application of tools used to analyze planning problems, project evaluation and public policies. (Typically Offered: Fall)

CRP 5680: Planning and Development

Credits: 3. Contact Hours: Lecture 3.

Exploration and evaluation of the techniques, processes, and professional skills required to effectively manage land use change at various scales. Land classification systems; land supply and needs inventory for residential uses and commercial and employment centers; capacity and needs analysis for public infrastructure. Includes land use planning project(s) designed to apply the methods explored in this and other courses. (Typically Offered: Spring)

CRP 5730: Contemporary Issues in Global Housing

Credits: 3. Contact Hours: Lecture 3.

Investigation of broader social and economic processes around the globe from the housing perspective. Case study approach to shelter struggles and the various policy and design responses related to them, as a means of understanding a range of issues important to urban systems including poverty, development, urbanization, migration, social movements and citizenship. (Typically Offered: Fall)

CRP 5750: Grant Writing

(Dual-listed with CRP 4750).

Credits: 1. Contact Hours: Lecture 1.

A short introduction to effective grant writing for the public and non-profit sectors. Includes identifying appropriate funding sources for an organization, identifying goals and objectives, and budgeting. (Typically Offered: Fall)

CRP 5780: MRED Capstone Project

(Cross-listed with FIN 5780).

Credits: 3. Contact Hours: Lecture 3.

Refinement of students' problem-solving, communication and negotiation skills. Students work on an actual case. Teams will apply knowledge acquired in the classroom to some aspect of a current development on-the-ground and in-process project.

CRP 5790: Public Finance and Planning

(Dual-listed with CRP 4790).

Credits: 3. Contact Hours: Lecture 3.

Overview of public finance theory, particularly in how it relates to local governments and the work of planning and community development. Concepts include theories of taxation, challenges unique to local public finance, collective action, and a survey of the different revenue sources used to fund local government. (Typically Offered: Spring)

CRP 5840: Sustainable Communities

Credits: 3. Contact Hours: Lecture 3.

The history and theory of sustainable community planning. Procedural and substantive dimensions. Case studies of communities engaged in sustainability planning. Use and development of indicators. (Typically Offered: Spring)

CRP 5900A: Special Topics: Planning Law, Administration and Implementation

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

CRP 5900B: Special Topics: Economic Development

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

CRP 5900C: Special Topics: Urban Design

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

CRP 5900D: Special Topics: Housing and Urban Revitalization

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

CRP 5900H: Special Topics: Environmental Planning

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

CRP 5900I: Special Topics: Land Use and Transportation Planning

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

CRP 5900N: Special Topics: International Planning

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

CRP 5900O: Special Topics: Spatial Analytical Methods

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

CRP 5900P: Special Topics: Planning in Small Towns

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

CRP 5900Q: Special Topics: Diversity and Equity in Planning

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

CRP 5900R: Special Topics: Geographic Information Systems

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

CRP 5910: Environmental Law and Planning

(Cross-listed with LA 5910).

Credits: 3. Contact Hours: Lecture 3.

Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs. (Typically Offered: Spring)

CRP 5920: Land Use and Development Regulation Law

Credits: 3. Contact Hours: Lecture 3.

An in-depth analysis of the legal constructs that shape the practice of planning and plan implementation in the United States. An exploration of how land use regulations are applied to reconcile the competing needs and diverse uses of land. The positive and negative consequences of developing and implementing regulatory controls will be addressed. (Typically Offered: Fall)

CRP 5930X: Field Travel

Credits: 1-2. Contact Hours: Lecture 2.

Repeatable.

Field travel, either domestic or international, to observe and analyze local professional planning practices and to provide firsthand exposure to the destination community and its residents. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

CRP 5950: Seminar in GIS Applications/Research

Credits: 1. Contact Hours: Lecture 1.

Discussion and demonstration of current GIS applications and research in multiple disciplines. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

CRP 5980X: Comprehensive Exam Preparation

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Preparation to complete the capstone requirement for the MCRP program, which is a comprehensive exam that will be administered as part of this course. Material based on content of required courses and electives as well as study and test-taking strategies. Ideally taken in the Fall semester of a student's second academic year immediately prior to graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

CRP 5990: Professional Planning Report

Credits: 1-30. Contact Hours: Laboratory 30.

Repeatable.

Prereq: Instructor Permission for Course

Independent planning project with practical application, including research element. Offered on a satisfactory-fail basis only.

Courses for graduate students:

CRP 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Offered on a satisfactory-fail basis only.

Community Development (COMDV)

Courses primarily for graduate students, open to qualified undergraduates:

COMDV 5020: Theories and Constructs of Community Change

Credits: 3. Contact Hours: Lecture 3.

Examines the principles and practices of community change. Use of case studies to relate development approaches to conceptual models. Constructs defining community include community capitals, community field and interactionism, human ecology, social identity, community conflict, communitarianism, and central place theory.

COMDV 5030: Community Development Methods

Credits: 3. Contact Hours: Lecture 3.

Introduction to research methods relevant to community development. Topics include research design and methods of data collection.

Conceptual frameworks are used to develop research questions and analyze data. Strategies for reporting research results as a means of community action are examined.

COMDV 5040: Creating Community Change

Credits: 3. Contact Hours: Lecture 3.

Examines the role of civil society in community planning efforts and a comparative approach to planning theories and approaches. Focuses on change within communities and the roles of government, planners, and citizens in reacting to or shaping change. Explores the relationship of community planning to community development as community responses to change.

COMDV 5050: Analysis of the Community Economy

Credits: 3. Contact Hours: Lecture 3.

Introduction to theories of community economic growth. Examines drivers of economic growth, community economic base, sources of growth or decline, roles of local government and institutions, analytical tools, and strategies for local economic development. Explores use of data in community economic development and local and regional development action.

COMDV 5300: Community Development Practicum

Credits: 3.

Practical community development experience. Structured work in range of tasks under close supervision of a professional community developer. Exploration of relationships between theory and practice, exposure to variety of professional roles in community development, and demonstration of the ability to design community development programming. Demonstrate applications of knowledge gained from previous coursework.

Community Development GPIDEA (CDEV)

Courses primarily for graduate students, open to qualified undergraduates:

CDEV 5020: Community and Natural Resource Management

Credits: 3. Contact Hours: Lecture 3.

Detailed introduction to community resource management. Theoretical frameworks, methodological investigation, applied practices.

Enhancement of ability of community development professionals to work with communities to plan, develop and monitor conversation and development of natural resources with multiple functions.

CDEV 5030: Principles and Strategies of Community Change

Credits: 3. Contact Hours: Lecture 3.

Analysis of principles and practices of community change and development. Use of case studies to relate community development approaches to conceptual models from diverse disciplines. Exploration of professional practice principles, and student construction of their personal framework for practicing community development.

CDEV 5040: Community Analysis: Introduction to Methods

Credits: 3. Contact Hours: Lecture 3.

Introduction to research methods relevant to community development. Formulate and begin a research effort, methods of data collection and how conceptual frameworks are used to develop the questions and analyze data. Emphasis on strategies for reporting findings and applying findings in community action and methods of evaluating the entire research process. Significant attention paid to issues of research ethics and inclusiveness.

CDEV 5050: Organizing for Community Change

Credits: 3. Contact Hours: Lecture 3.

Examines role of civil society in community planning efforts. Comparative approach to planning theories and approaches. Focus on change within communities and the roles of government, planners, and citizens in reacting to or shaping change. Dimensions of social capital and the context of change covered.

CDEV 5060: Community and Regional Economic Analysis I

Credits: 3. Contact Hours: Lecture 3.

Introduction to concepts of communities and regions, theories of economic growth, drivers of economic growth, the economic base of a community, sources of growth or decline in the community, roles of local government and institutions, and analytical tools. Strategies for local economic development will also be explored.

CDEV 5070: Introduction to Native Communities

Credits: 3. Contact Hours: Lecture 3.

A base knowledge course. For students currently working within, in partnership with, or considering working with Native communities. Basic understanding within the context of community development of the diversity of the tribal structures and cultures and the unique history and jurisdictional considerations of these nations. Working with tribes, Federal and Indian relations, and governance and cultural issues.

CDEV 5080: Ecological Economics

Credits: 3. Contact Hours: Lecture 3.

Approaches economy and community by looking at the inherent interdependence, jointness, and potential complementarity between ecology and economy (utility) of a place.

CDEV 5090: Building Native Community and Economic Capacity

Credits: 3. Contact Hours: Lecture 3.

Focus on non-western approaches to helping Native communities build their capacity. Students will learn to take a participatory, culture-centered, and strength-based approach to development.

CDEV 5100: Indian Country Agriculture and Natural Resources

Credits: 3. Contact Hours: Lecture 3.

Introduction to the historical and contemporary issues related to natural resource management on Native American lands. Philosophical and economic arguments concerning natural resource conservation, preservation and extraction will be explored.

CDEV 5120: Sustainable Communities

Credits: 3. Contact Hours: Lecture 3.

Students will learn the conceptual relationships among Community and Sustainable Development and Sustainable Communities and examine the social, environmental, and economic aspects of sustainable communities. The course includes analysis of public policy impacts on community sustainability, practical actions for enhancing sustainability, and changing power dynamics and reward structures involved in incorporating sustainability into Community Development.

CDEV 5130: Economic Development Strategies and Programs

Credits: 3. Contact Hours: Lecture 3.

Course explores theories of local economic development and addresses the development issues faced by communities in the 21st century. Students will understand and apply concepts from economic development planning, economic analysis, business development, human resource development, community-based development, and high-technology development.

CDEV 5200: Community Development Orientation

Credits: 2. Contact Hours: Lecture 2.

Introduction to the Community Development program. Focus on on-line delivery methods, graduate level research and writing, technology skills.

CDEV 5210: Housing and Development

Credits: 3. Contact Hours: Lecture 3.

Review and evaluation of historical and current housing issues, production, and financial systems, including consideration of racial, ethnic, income, and gender issues as they relate to the role of housing developments and programs in community development. (Typically Offered: Spring)

CDEV 5220: Community Leadership and Capacity Building

Credits: 3. Contact Hours: Lecture 3.

Defining leadership and applying it to the workplace. Understanding of potential link between leadership and community capacity. Identifying strategies for leadership development in communities.

CDEV 5230: Grantwriting for Community Development Professionals

Credits: 3. Contact Hours: Lecture 3.

Basic Grant Development and Management will introduce students to the grant-getting process and provide an overview of what happens after a project is funded. The following topics will be covered: researching funding sources, generating cutting edge ideas, assessing needs, planning a project, establishing credibility, formulating a sustainable budget, designing an evaluation plan, managing the funded project, and disseminating project results.

CDEV 5240: Non-Profit Management in Community Development

Credits: 3. Contact Hours: Lecture 3.

Understanding of how non-profit organizations are run in order that they may participate more fully in community development efforts. Learning skills necessary to assist organizations to manage community development projects and programs, such as, budgeting, planning, personnel, facilities, volunteer management, and fundraising.

CDEV 5250: Role of Tribal Colleges in Economic Development

Credits: 3. Contact Hours: Lecture 3.

Focus on role of tribally-chartered colleges and universities in economic development within Native communities. Social capital analytic framework to examine and evaluate tribal college model of economic development.

CDEV 5260: Immigration and Community Inclusion

Credits: 3. Contact Hours: Lecture 3.

Mechanisms for community inclusion and exclusion in relation to immigration will be examined. Aspects of ethnicity, religion, occupation and transnationalism are addressed in terms of community mechanism for incorporating immigrants as community assets.

CDEV 5270: Public and Non-Profit Budgeting

Credits: 3. Contact Hours: Lecture 3.

Introduction to the fundamental theories and practices of budgeting in the public and non-profit sectors. Topics covered include overview of budgeting and budget reform, taxation, expenditures, budget preparation and adoption, budget implementation, and performance budgeting. (Typically Offered: Summer)

CDEV 5280: Evaluation of Organizations and Programs

Credits: 3. Contact Hours: Lecture 3.

Introduction to the philosophy, techniques, and methodologies of organizational and program evaluation. Overview of program evaluation and theory, techniques to evaluate program processes and performance, evaluation designs, assessing program efficiency, models to diagnose organizations, and methods to assess organizational performance.

CDEV 5300: Toward Ethical Engagement

Credits: 3. Contact Hours: Lecture 3.

Understanding what ethics are and identify ethical dimensions of a problem. Ability to employ ethical analysis and engagement strategies in public problem-solving.

CDEV 5320: Community and Regional Economic Analysis II

Credits: 3. Contact Hours: Lecture 3.

Substantive grounding in the theories and practice of measuring community economic dynamics; build solid foundation skills for applied community economic analysis.

CDEV 5900: Special Topics in Community Development

Credits: 1-3. Repeatable, maximum of 4 times.

Special topics in Community Development. Independent Study, must get instructor approval. (Typically Offered: Fall, Spring, Summer)

CDEV 5990: Creative Component

Credits: 1-30. Repeatable.

Students work with major professor to conduct research and carry out work on their creative component. Instructor permission required. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**CDEV 6990: Thesis Research**

Credits: 1-6. Repeatable.

Thesis Research. (Typically Offered: Fall, Spring, Summer)

Computer Engineering (CPRE)

Courses primarily for undergraduates:**CPRE 1310: Introduction to Computer Security Literacy**

(Cross-listed with CYBSC 1310).

Credits: 1. Contact Hours: Lecture 1.

Basic concepts of practical computer and Internet security: passwords, firewalls, antivirus software, malware, social networking, surfing the Internet, phishing, and wireless networks. This class is intended for students with little or no background in information technology or security. Basic knowledge of word processing required. Offered on a satisfactory-fail basis only.

CPRE 1610: Programming Practice for Engineers

Credits: 1. Contact Hours: Lecture 1.

Applied introduction to computer programming for engineering students. Topics include variables and objects, control flow, iteration and looping, string processing, and file input/output. Modern software development practices, tooling, and testing. Individual programming assignments and projects. (Typically Offered: Fall, Spring, Summer)

CPRE 1660: Professional Programs Orientation

(Cross-listed with EE 1660).

Credits: Required. Contact Hours: Lecture 1.

(1-0) Overview of the nature and scope of electrical engineering and computer engineering professions. Overview of portfolios. Departmental rules, advising center operations, degree requirements, program of study planning, career options, and student organizations. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

CPRE 1840: Computer Engineering Learning Community

Credits: 1. Contact Hours: Lecture 1.

Integration of first-year students into the Computer Engineering program. Assignments and activities involving teamwork, academic preparation, study skills, and preparation for entry into the Computer Engineering profession. Completed both individually and in learning teams under the direction of faculty and peer mentors. (Typically Offered: Fall)

CPRE 1850: Introduction to Computer Engineering and Problem Solving I

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: MATH 1430 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 1650

Introduction to Computer Engineering. Project based examples from computer engineering. Individual interactive skills for small and large groups. Computer-based projects. Solving engineering problems and presenting solutions through technical reports. Solution of engineering problems using a programming language. Satisfactory placement scores can be found at: <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, BME 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count towards graduation.

CPRE 1860: Introduction to Computer Engineering and Problem Solving II

Credits: 1. Contact Hours: Laboratory 2.

Prereq: CPRE 1850

Project based examples from computer engineering. Group skills needed to work effectively in teams. Group problem solving. Computer based projects. Technical reports and presentations. Students will work on 2 or 3 self-directed team based projects that are representative of problems faced by computer engineers. (Typically Offered: Spring)

CPRE 2300: Cyber Security Fundamentals

(Cross-listed with CYBE 2300).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: COMS 2270 or EE 2850 or MIS 2070

Introduction to computer and network infrastructures used to support cyber security. Basic concepts of computer and network configuration used to secure environments. Computer virtualization, network routing and address translation, computer installation and configuration, network monitoring, in a virtual environment. Laboratory experiments and exercises including secure computer and network configuration and management. (Typically Offered: Fall)

CPRE 2310: Cyber Security Concepts and Tools

(Cross-listed with CYBE 2310).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: CPRE 2300 or CYBE 2300

Basic concepts of practical computer and Internet security and the tools used to protect and attack systems and networks. Computer and network security methods including: user authentication, access control, firewalls, intrusion detection, use of vulnerability assessment tools and methods, and penetration testing. Ethics and legal issues in cyber security will also be covered. Laboratory experiments and exercises including evaluating systems for vulnerabilities, understanding potential exploits of the systems, and defenses for the systems. (Typically Offered: Spring)

CPRE 2320: Professional and Ethical Issues in Electrical and Computer Engineering

(Cross-listed with EE 2320).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 2270 or EE 2850

Professional and ethical issues in electrical and computer engineering. Soft skills, including communication and leadership skills, and how they relate to the engineering profession. Case studies illustrating ethical decision making in an engineering context and differentiating between moral and professional ethics. Issues of diversity, equity, and inclusion in the engineering profession.

CPRE 2340: Legal, Professional, and Ethical Issues in Cyber Systems

(Cross-listed with CYBE 2340).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 2270 or EE 2850 or MIS 2070

Emphasizes legal, ethical, and professional issues in cyber systems. Other topics include privacy, government regulation, and compliance as applied to professional practice. Guest lecturer from government and industry, as well as discussions including current legal and ethical issues found in the main stream. (Typically Offered: Spring)

CPRE 2610: Transfer Orientation

(Cross-listed with EE 2610).

Credits: Required. Contact Hours: Lecture 1.

Introduction to the College of Engineering and the engineering profession specifically for transfer students. Information concerning university and college policies, procedures, and resources. Offered on a satisfactory-fail basis only.

CPRE 2810: Digital Logic

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: Sophomore classification

Number systems and representation. Boolean algebra and logic minimization. Combinational and sequential logic design. Arithmetic circuits and finite state machines. Use of programmable logic devices. Introduction to computer-aided schematic capture systems, simulation tools, and hardware description languages. Design of simple digital systems. (Typically Offered: Fall, Spring)

CPRE 2870X: Cyber-Physical System Fundamentals

Credits: 3. Contact Hours: Laboratory 2, Lecture 2.

Repeatable.

Prereq: ENGR 1600

Fundamentals of cyber-physical systems, including introduction to digital systems design, embedded platforms and programming, sensing and actuation, and performance analysis. Introduction to data communication concepts, including systems-level view of signal processing and electronic circuits, networking standards and protocols. Laboratory exercises with embedded circuits, signals, and measurement applications. (Typically Offered: Fall)

CPRE 2880: Embedded Systems I: Introduction

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: CPRE 2810, COMS 2070 or COMS 2270 or EE 2850

Embedded C programming. Interrupt handling. Memory mapped I/O in the context of an application. Elementary embedded design flow/methodology. Timers, scheduling, resource allocation, optimization, state machine based controllers, real time constraints within the context of an application. Applications laboratory exercises with embedded devices. (Typically Offered: Fall, Spring)

CPRE 2940: Program Discovery

(Cross-listed with EE 2940).

Credits: Required. Contact Hours: Lecture 1.

Prereq: CPRE 1660 or EE 1660

The roles of professionals in computer and electrical engineering. Relationship of coursework to industry and academic careers. Issues relevant to today's world. Offered on a satisfactory-fail basis only.

CPRE 3080: Operating Systems: Principles and Practice

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: COMS 3210 or CPRE 3810

Operating system concepts, processes, threads, synchronization between threads, process and thread scheduling, deadlocks, memory management, file systems, I/O systems, security, Linux-based lab experiments. (Typically Offered: Fall, Spring)

CPRE 3100: Theoretical Foundations of Computer Engineering

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Prereq: COMS 2280

Propositional logic and methods of proof; basic discrete structures; mathematical induction and recurrence relations; functions and relations; and counting; trees and graphs; applications in computer engineering. (Typically Offered: Fall, Spring)

CPRE 3290: Software Project Management

(Cross-listed with SE 3290).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3090

Process-based software development. Capability Maturity Model (CMM). Project planning, cost estimation, and scheduling. Project management tools. Factors influencing productivity and success. Productivity metrics. Analysis of options and risks. Version control and configuration management. Inspections and reviews. Managing the testing process. Software quality metrics. Modern software engineering techniques and practices.

CPRE 3300: Integrated Electronics

(Cross-listed with EE 3300).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: CPRE 2810; EE 2010; credit or concurrent enrollment in EE 2300

Semiconductor technology for integrated circuits. Modeling of integrated devices including diodes, BJTs, and MOSFETs. Physical layout. Circuit simulation. Digital building blocks and digital circuit synthesis. Analysis and design of analog building blocks. Laboratory exercises and design projects with CAD tools and standard cells.

CPRE 3310: Application of Cryptographic Concepts to Cyber Security

(Cross-listed with CYBE 3310).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: CPRE 2310 or CYBE 2310

Basic cryptographic underpinnings used in modern cyber security encryption suites. Encryption benefits to cyber security and its use in protocols. Topics include cryptographically secure hash functions and pseudorandom numbers, key distribution techniques, secure authentication including single sign on. Detection and prevention of security threats such as covert communication, malicious code, and other security threats in protocols are included. In addition to laboratory experiments and exercises, students complete a project focused on cyber security problem and solution. Graduation Restriction: Only one of CPRE/ CYBE 3310 and CPRE 4310 may count towards graduation. (Typically Offered: Fall, Spring)

CPRE 3320: Cyber Defense Competition

(Cross-listed with CYBSC 3320).

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Participation in cyber defense competition driven by scenario-based network design. Includes computer system setup, risk assessment and implementation of security systems, as well as defense of computer and network systems against trained attackers. Team based. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

CPRE 3390: Software Architecture and Design

(Cross-listed with SE 3390).

Credits: 3. Contact Hours: Lecture 3.

Prereq: SE 3190

Modeling and design of software at the architectural level. Architectural styles. Basics of model-driven architecture. Object-oriented design and analysis. Iterative development and unified process. Design patterns. Design by contract. Component based design. Product families. Measurement theory and appropriate use of metrics in design. Designing for qualities such as performance, safety, security, reliability, reusability, etc. Analysis and evaluation of software architectures. Introduction to architecture definition languages. Basics of software evolution, reengineering, and reverse engineering. Case studies. Introduction to distributed system software.

CPRE 3810: Computer Organization and Assembly Level Programming

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: CPRE 2880

Introduction to computer organization, evaluating performance of computer systems, instruction set design. Assembly level programming: arithmetic operations, control flow instructions, procedure calls, stack management. Processor design. Datapath and control, scalar pipelines, introduction to memory and I/O systems. (Typically Offered: Fall, Spring)

CPRE 3880: Embedded Systems II: Mobile Platforms

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: CPRE 2880

Contemporary programming techniques for event driven systems. Mobile platforms and operating systems. Location and motion sensors based user interfaces. Threading and scheduling. Resource management - measurement and control techniques - for memory and energy. Client-server application design. Distributed applications. Laboratory includes exercises based on a mobile platform.

CPRE 3940: Program Exploration

(Cross-listed with EE 3940).

Credits: Required. Contact Hours: Lecture 1.

Prereq: CPRE 2940 or EE 2940

Exploration of academic and career fields for electrical and computer engineers. Examination of professionalism in the context of engineering and technology with competencies based skills. Introduction to professional portfolio development and construction. Offered on a satisfactory-fail basis only.

CPRE 4120: Formal Methods in Software Engineering

(Cross-listed with COMS 4120/ SE 4120).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3110; (STAT 3050 or STAT 3300 or STAT 3410)

A study of formal techniques for model-based specification and verification of software systems. Topics include logics, formalisms, graph theory, numerical computations, algorithms and tools for automatic analysis of systems. Graduate credit requires in-depth study of concepts.

CPRE 4140: Introduction to Software Systems for Big Data Analytics

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: COMS 3630 or CPRE 3150 or CPRE 3080 or COMS 3110 or COMS 3520

Introduction to different perspectives of the "data universe" and trade-offs when choosing an appropriate perspective. Impact of the concept(s) of analytics – from raw data, through its storage/representation, to interacting and querying (linguistic/interface issues). Focused studies on 3-4 different domains, followed by generalization of the concepts/abstractions and preparing the students for the next course in this realm, targeting different domains/problems. Understanding the dependencies between problem-domain needs and the data properties, and their impact on choosing appropriate analytics tools (and how/why those tools were developed and exist in the manners that they do). In addition, the students will be exposed to (limited selection of) internals of such tools. (Typically Offered: Fall)

CPRE 4160: Software Evolution and Maintenance

(Cross-listed with SE 4160).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3090

Practical importance of software evolution and maintenance, systematic defect analysis and debugging techniques, tracing and understanding large software, impact analysis, program migration and transformation, refactoring, tools for software evolution and maintenance, experimental studies and quantitative measurements of software evolution. Written reports and oral presentation.

CPRE 4180: High Speed System Engineering Measurement and Testing

(Cross-listed with EE 4180).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: EE 2300, EE 3110

Measurement of high speed systems and mixed signal systems. Measurement accuracy and error. Network analysis and spectrum analysis used in high speed measurement and testing. Test specification process and parametric measurement. Sampling and digital signal processing concepts. Design for testability. Testing equipment. Applications. (Typically Offered: Fall)

CPRE 4190: Software Tools for Large Scale Data Analysis

(Cross-listed with SE 4190).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: COMS 3630 or COMS 3520 or CPRE 3080; COMS 2280

Software tools for managing and manipulating large volumes of data, external memory processing, large scale parallelism, and stream processing, data interchange formats. Weekly programming labs that involve the use of a parallel computing cluster.

CPRE 4210: Software Analysis and Verification for Safety and Security

(Cross-listed with SE 4210).

Credits: 3. Contact Hours: Lecture 3.

Significance of software safety and security; various facets of security in cyber-physical and computer systems; threat modeling for software safety and security; and categorization of software vulnerabilities. Software analysis and verification: mathematical foundations, data structures and algorithms, program comprehension, analysis, and verification tools; automated vs. human-on-the-loop approach to analysis and verification; and practical considerations of efficiency, accuracy, robustness, and scalability of analysis and verification. Cases studies with application and systems software; evolving landscape of software security threats and mitigation techniques. Understanding large software, implementing software analysis and verification algorithms. (Typically Offered: Fall, Spring)

CPRE 4240: Introduction to High Performance Computing

(Cross-listed with COMS 4240/ MATH 4240).

Credits: 3.

Prereq: (MATH 2650; [MATH 2070 OR MATH 3170]) or permission of instructor

Unix, serial programming of scientific applications, OpenMP for shared-memory parallelization. No Unix, Fortran or C experience required.

(Typically Offered: Fall)

CPRE 4250: High Performance Computing for Scientific and Engineering Applications

(Cross-listed with COMS 4250).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: COMS 3110 and ENGL 2500 and SPCM 2120

Introduction to high performance computing platforms including parallel computers and workstation clusters. Discussion of parallel architectures, performance, programming models, and software development issues.

Sample applications from science and engineering. Practical issues in high performance computing will be emphasized via a number of programming projects using a variety of programming models and case studies. Oral and written reports.

CPRE 4260: Introduction to Parallel Algorithms and Programming

(Cross-listed with COMS 4260).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: CPRE 3080 or COMS 3210 and CPRE 3150 or COMS 3110

Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms. (Typically Offered: Fall)

CPRE 4300: Network Protocols and Security

(Cross-listed with CYBSC 4300).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CPRE students: (CPRE 3080 OR COMS 2520 OR COMS 3520); EE students: CPRE 2880

Detailed examination of networking standards, protocols, and their implementation. TCP/IP protocol suite, network application protocols. Network security issues, attack and mitigation techniques. Emphasis on laboratory experiments.

CPRE 4310: Basics of Information System Security

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment in CPRE 3080 or COMS 3520

Introduction to and application of basic mechanisms for protecting information systems from accidental and intentional threats. Basic cryptography use and practice. Computer security issues including authentication, access control, and malicious code. Network security mechanisms such as intrusion detection, firewalls, SSL/TLS, and related protocols. Ethics and legal issues in information security. Wireless security. Programming and system configuration assignments. Graduation Restriction: This course can not be used towards any requirements for the Cyber Security Degree or Minor. Only one of CPRE/ CYBE 3310 and CPRE 4310 may count towards graduation. (Typically Offered: Spring)

CPRE 4350: Analog VLSI Circuit Design

(Cross-listed with EE 4350).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: EE 3300

Basic analog integrated circuit and system design including design space exploration, performance enhancement strategies, operational amplifiers, references, integrated filters, and data converters. (Typically Offered: Spring)

CPRE 4400: Operating System Security

(Cross-listed with CYBE 4400).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3520 or CPRE 3080

Focus on fundamentals and advanced topics in operating system (OS) security. Design issues, principles, mechanisms, and good practice for design and implementation of secure computer/OS systems. Threat models, vulnerabilities, attacks compromise security, and advanced OS-level techniques for achieving security. Topics include OS security concepts and principles, seminal security in Multics, vulnerabilities in ordinary systems, secure capability systems, information flow control, mandatory access control, security kernels, memory protection, file system, virtual machine systems, hardware/architecture support (e.g., Intel SGX) for OS security, secure microkernel OSes (e.g., seL4, QNX), modern mobile operating systems (e.g., Android and iOS), and security from end-user perspective. Assignments include labs exploring and implementing the technologies in the context of the Linux, Android, and seL4 systems (some involving kernel programming). (Typically Offered: Spring)

CPRE 4500: Distributed Systems and Middleware

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3520 or CPRE 3080

Fundamentals of distributed computing, software agents, naming services, distributed transactions, security management, distributed object-based systems, web-based systems, Blockchain, middleware-based application design and development, case studies of middleware and internet applications.

CPRE 4540: Distributed Systems

(Cross-listed with COMS 4540).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3110 and COMS 3520 or CPRE 3080

Theoretical and practical issues of design and implementation of distributed systems. The client server paradigm, inter-process communications, synchronization and concurrency control, naming, consistency and replication, fault tolerance, and distributed file systems. Graduate credit requires additional in-depth study of concepts. Programming projects and written reports.

CPRE 4580: Real Time Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3520 or CPRE 3080

Fundamental concepts in real-time systems. Real time task scheduling paradigms. Resource management in uniprocessor, multiprocessor, and distributed real-time systems. Energy management in real-time systems and sensor networks. Fault-tolerance and overload handling in real-time systems. Real-time channel, QoS routing, traffic policing, packet scheduling, and real-time LAN protocols. Case study of real-time and IoT applications. Term project in real-time systems and networks.

CPRE 4590X: Security and Privacy in Cloud Computing

(Dual-listed with COMS 5590/ CPRE 5590). (Cross-listed with COMS 4590X).

Credits: 3. Contact Hours: Lecture 3.

Introduction to cloud computing concepts and systems. Security and privacy threats in cloud computing. Practical techniques for cloud computing security. Theoretical and practical solutions for secure outsourcing of data and computation. Oral presentations and research projects. (Typically Offered: Fall)

CPRE 4650: Digital VLSI Design

(Cross-listed with EE 4650).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: EE 3300

Digital design of integrated circuits employing very large scale integration (VLSI) methodologies. Technology considerations in design. High level hardware design languages, CMOS logic design styles, area-energy-delay design space characterization, datapath blocks: arithmetic and memory, architectures and systems on a chip (SOC) considerations. VLSI chip hardware design project. (Typically Offered: Fall)

CPRE 4800: Graphics Processing and Architecture

(Dual-listed with CPRE 5800).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: COMS 3210 or CPRE 3810

Introduction to hardware architectures for computer graphics and their programming models. System-level view, including framebuffers, video output devices, displays, 2D and 3D graphics acceleration, and device interfacing. Architectural design of GPUs, from 2D and 3D sprite engines to 3D rendering pipelines to unified shader architectures. Computing models for graphics processors. GPGPU and GPU computing. (Typically Offered: Spring)

CPRE 4870: Hardware Design for Machine Learning

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: COMS 3210 or CPRE 3810

Introduction to hardware architectures for machine learning. Full system view – machinelearning frameworks to hardware interface to hardware architecture. General purpose CPU extensions for machine learning. GPU extensions for machine learning. Spatial architectures for machine learning. Performance, energy, and accuracy trade-offs. Hardware design optimizations for machine learning, including quantization, data re-use, SIMD, and SIMT. Lab section will culminate with the design and evaluation of an application-specific machinelearning accelerator.

CPRE 4880: Embedded Systems Design

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: COMS 3210 or CPRE 3810

Embedded microprocessors, embedded memory and I/O devices, component interfaces, embedded software, program development, basic compiler techniques, platform-based FPGA technology, hardware synthesis, design methodology, real-time operating system concepts, performance analysis and optimizations.

CPRE 4890: Computer Networking and Data Communications

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: CPRE 2880 or COMS 3270

Modern computer networking and data communications concepts. OSI reference model, TCP/IP architecture. Sockets programming. Protocols at the physical layer, data link layer, network layer, transport layer, and application layer. Software-defined networking. (Typically Offered: Fall, Spring)

CPRE 4900: Independent Study

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Investigation of an approved topic.

CPRE 4900H: Independent Study: Honors

Credits: 1-30. Repeatable.

Prereq: Senior classification in computer engineering; Instructor Permission for Course

Investigation of an approved topic.

CPRE 4910: Senior Design Project I and Professionalism

(Cross-listed with EE 4910/ SE 4910).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: CPRE major: CPRE 2320, cr or enrollment in CPRE 3080, completion of 29 cr in the CPRE prof prog, ENGL 3140 or ENGL 3140H. EE major: EE 2320, cr or enrollment in EE 3220, completion of 24 cr in the EE prof prog, ENGL 3140 or ENGL 3140H. SE major: SE 3170 and SE 3390, ENGL 3090 or ENGL 3140 or ENGL 3140H. Co-req: CPRE 3080 or COMS 3520

Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and design report; design review presentation. First of two-semester team-oriented, project design and implementation experience. (Typically Offered: Fall, Spring)

CPRE 4920: Senior Design Project II

(Cross-listed with EE 4920/ SE 4920).

Credits: 2. Contact Hours: Lecture 1, Laboratory 3.

Prereq: CPRE 4910 or EE 4910

Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the design completed in EE 4910, CPRE 4910, or SE 4910 and the evaluation of project results. Technical writing of final project report; oral presentation of project achievements; project poster. (Typically Offered: Fall, Spring)

CPRE 4940: Portfolio Assessment

(Cross-listed with EE 4940).

Credits: Required. Contact Hours: Lecture 1.

Prereq: CPRE 2320 or EE 2320 or CYBE 2340; credit or concurrent enrollment in CPRE 4910 or EE 4910

Portfolio update and evaluation. Portfolios as a tool to enhance career opportunities. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

CPRE 5110: Design and Analysis of Algorithms

(Cross-listed with COMS 5110).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3110

A study of algorithm design and analysis techniques. Network flows and linear programming. Randomized algorithms. NP-completeness. Approximation algorithms. Fixed-parameter algorithms.

CPRE 5130: Program Analysis

(Cross-listed with COMS 5130).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (COMS 3270 or CPRE 2880); COMS 3420 or Graduate Classification

Algorithms, AI techniques and tools for automatically reasoning about code and program executions. Theory and foundations related to control flow analysis, dataflow analysis, abstract interpretation, and symbolic execution. Applications of program analysis to bug detection, test input generation, debugging, program repair, specification inference and trustworthy AI engineering. Concepts, algorithms, tools, benchmarks, methodologies for solving problems using program analysis and for preparing research in program analysis.

CPRE 5220: Cognitive Radio Networks

(Cross-listed with EE 5220).

Credits: 3. Contact Hours: Lecture 3.

Topics on cognitive radio networks: Cognitive Radio Networks Architecture; Software Defined Radio Architecture; Spectrum Sensing; Spectrum management; Spectrum Sharing; Spectrum Mobility; Applications of Cognitive Radio Networks. Offered irregularly. (Typically Offered: Fall)

CPRE 5250: Numerical Analysis of High Performance Computing

(Cross-listed with COMS 5250/ MATH 5250).

Credits: 3. Contact Hours: Lecture 3.

Introduction to parallelization techniques and numerical methods for distributed memory high performance computers. A semester project in an area related to each student's research interests is required. (Typically Offered: Spring)

CPRE 5260: Introduction to Parallel Algorithms and Programming

(Cross-listed with COMS 5260).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms. (Typically Offered: Fall)

CPRE 5270: High-Performance Deep Learning

(Cross-listed with COMS 5270).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3520 or CPRE 3080

Fundamentals and advances in HPC in the context of GPUs, TPUs, multicore and HPC systems with specific focus on parallel programming models. Discussing of high-performance computing, GPGPU, scaling deep neural network training and machine learning algorithms, high-performance deep learning, intersection of HPC and AI for HPC, distributed parallel training, engineering parallel software and parallel design patterns.

CPRE 5280: Probabilistic Methods in Computer Engineering

Credits: 3. Contact Hours: Lecture 3.

The application of randomization and probabilistic methods in the design of computer algorithms, and their efficient implementation. Discrete random variables in modeling algorithm behavior, with applications to sorting, selection, graph algorithms, hashing, pattern matching, cryptography, distributed systems, and massive data set algorithmics.

CPRE 5290: Data Analytics in Electrical and Computer Engineering

(Cross-listed with EE 5290).

Credits: 3. Contact Hours: Lecture 3.

Introduces a variety of data analytics techniques - particularly those relevant for electrical and computer engineers - from a foundational perspective. Topics to be covered include techniques for classification, visualization, and parameter estimation, with applications to signals, images, matrices, and graphs. Emphasis will be placed on rigorous analysis as well as principled design of such techniques. (Typically Offered: Spring)

CPRE 5300: Network Protocols and Security

(Cross-listed with CYBSC 5300).

Credits: 3. Contact Hours: Lecture 3.

Detailed examination of networking standards, protocols, and their implementation. TCP/IP protocol suite, network application protocols. Network security issues, attack and mitigation techniques. Emphasis on laboratory experiments.

CPRE 5310: Information System Security

(Cross-listed with CYBSC 5310).

Credits: 3. Contact Hours: Lecture 3.

Computer, software, and data security: basic cryptography, security policies, multilevel security models, attack and protection mechanisms, legal and ethical issues.

CPRE 5320: Information Warfare

(Cross-listed with CYBSC 5320).

Credits: 3. Contact Hours: Lecture 3.

Computer system and network security: implementation, configuration, testing of security software and hardware, network monitoring. Authentication, firewalls, vulnerabilities, exploits, countermeasures. Study and use of attack tools. Ethics in cyber security. Emphasis on laboratory experiments. (Typically Offered: Spring)

CPRE 5330: Cryptography

(Cross-listed with CYBSC 5330/ MATH 5330).

Credits: 3. Contact Hours: Lecture 3.

Basic concepts of secure communication, DES and AES, public-key cryptosystems, elliptic curves, hash algorithms, digital signatures, applications. Relevant material on number theory and finite fields. (Typically Offered: Spring)

CPRE 5340: Legal and Ethical Issues in Cyber Security

(Cross-listed with POLS 5340/ CYBSC 5340).

Credits: 3. Contact Hours: Lecture 3.

Legal and ethical issues in computer security. State and local codes and regulations. Privacy issues. (Typically Offered: Spring)

CPRE 5350: Steganography and Digital Image Forensics

(Cross-listed with MATH 5350/ CYBSC 5350).

Credits: 3. Contact Hours: Lecture 3.

Basic principles of covert communication, steganalysis, and forensic analysis for digital images. Steganographic security and capacity, matrix embedding, blind attacks, image forensic detection and device identification techniques. Related material on coding theory, statistics, image processing, pattern recognition. (Typically Offered: Spring)

CPRE 5360: Computer and Network Forensics

(Cross-listed with CYBSC 5360).

Credits: 3. Contact Hours: Lecture 3.

Fundamentals of computer and network forensics, forensic duplication and analysis, network surveillance, intrusion detection and response, incident response, anonymity and pseudonymity, privacy-protection techniques, cyber law, computer security policies and guidelines, court testimony and report writing, and case studies. Emphasis on hands-on experiments.

CPRE 5370: Wireless Network Security

Credits: 3. Contact Hours: Lecture 3.

Introduction to the physical layer and special issues associated with the security of wireless networks. The basics of wireless communication systems (antennas and propagation, modulation, multiple access, channel modeling, specific security issues of the wireless link), jamming and countermeasures (spread spectrum technologies, channel coding, interleaving), authentication and confidentiality (basics of classic cryptography, common authentication and encryption algorithms).

Detailed case studies on authentication, encryption and privacy flaws, and good practices based on the most common wireless technologies, including WiFi, GSM/3G, Bluetooth, and RFID. Individual or team-based class projects. (Typically Offered: Spring)

CPRE 5380: Reverse Engineering and Security Testing

(Cross-listed with CYBSC 5380).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Techniques and tools for understanding the behavior of software/hardware systems based on reverse engineering. Flaw hypothesis, black, grey, and white box testing as well as other methods for testing the security of software systems. Discussion of counter-reverse engineering techniques. (Typically Offered: Spring)

CPRE 5390: Cyber Physical System Security for the Smart Grid

Credits: 3. Contact Hours: Lecture 3.

Introduction to cyber security, cyber physical system (CPS), and smart grid automation technologies; supervisor control and data acquisition (SCADA) systems; cyber risk modeling, vulnerability analysis, impact analysis, defense and mitigation techniques; cyber security of wide-area monitoring, protection, and control (WAMPAC); security and privacy in advanced metering infrastructure (AMI), cyber security compliance and industry best practices, CPS security test-beds and attack-defense hands-on laboratory experiments. (Typically Offered: Spring)

CPRE 5410: High-Performance Communication Networks

Credits: 3. Contact Hours: Lecture 3.

Computer architectures and protocols designed for high-performance networking environments; software defined networking (SDN) and supporting protocols; cloud and data center networks; network traffic management and congestion control strategies; quality of service; high-speed access network protocols.

CPRE 5420: Optical Communication Networks

Credits: 3. Contact Hours: Lecture 3.

Optical components and interfaces; optical transmission and reception techniques; wavelength division multiplexing; network architectures and protocol for first generation, single and multihop optical network; routing and wavelength assignment in second generation wavelength routing networks; traffic grooming, optical network control; survivability; access networks; metro networks. (Typically Offered: Spring)

CPRE 5430: Wireless Network Architecture

Credits: 3. Contact Hours: Lecture 3.

Introduction to the protocol architecture of the data link layer, network layer and transport layer for wireless networking. Operation and management of Medium Access Control in Wireless Local Area Networks (WLAN) and Wireless Metropolitan Area Networks (WMAN); recent developments in IEEE 802.11 & 802.16 and Bluetooth; Mobile IP; Mobile TCP.

CPRE 5440: Fundamentals of Bioinformatics

(Cross-listed with BCB 5440/ COMS 5440/ GDCB 5440).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

A practical, hands-on overview of how to apply bioinformatics to biological research. Recommended for biologists desiring to gain computational molecular biology skills. Topics include: sequence analysis, genomics, proteomics, phylogenetic analyses, ontology enrichment, systems biology, data visualization and emergent technologies. Offered odd-numbered years. (Typically Offered: Fall)

CPRE 5450: Fault-Tolerant Systems

Credits: 3. Contact Hours: Lecture 3.

Faults and their manifestations, errors, and failures; fault detection, location and reconfiguration techniques; time, space, and information (coding) redundancy management; design for testability; self-checking and fail-safe circuits; system-level fault diagnosis; Byzantine agreement; stable storage and RAID; clock synchronization; fault-tolerant networks; fault tolerance in real-time systems; reliable software design; checkpointing and rollback recovery; atomic actions; replica management protocols; and reliability evaluation techniques and tools.

CPRE 5460: Wireless and Sensor Networks

Credits: 3. Contact Hours: Lecture 3.

Fundamental and well-known protocols for wireless ad hoc and sensor networks at various layers, including physical layer issues, MAC (medium access control) layer protocols, routing protocols for wireless ad hoc and sensor networks, data management in sensor networks, coverage and connectivity, localization and tracking, security and privacy issues. Introduction to TinyOS and the nesC language. Hands-on experiments with Crossbow Mote sensor devices.

CPRE 5470: Resource Allocation in Communication Networks

Credits: 3. Contact Hours: Lecture 3.

Analytical approach to resource allocation on communication networks (e.g. the Internet, multihop wireless networks, etc.). Network utility maximization and the internet congestion control algorithm. Layering as optimization decomposition: a cross-layer design approach in multihop wireless networks. Capacity of ad hoc wireless networks.

CPRE 5480: Cyber-Physical Systems Networking

Credits: 3. Contact Hours: Lecture 3.

Cyber-physical systems applications in smart agriculture, transportation, power grid, manufacturing, public safety, health systems, etc.; field area and control networks; industrial Ethernet; time-triggered communication; real-time wireless networks; wireless industrial networks; safety and security of industrial networks; systems platforms for cyber-physical systems networks; team-based learning/projects.

CPRE 5500: Distributed Systems and Middleware

Credits: 3. Contact Hours: Lecture 3.

Fundamentals of distributed computing, software agents, naming services, distributed transactions, security management, distributed object-based systems, web-based systems, Blockchain, middleware-based application design and development, case studies of middleware and internet applications.

CPRE 5540: Distributed Systems

(Cross-listed with COMS 5540).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3110 and (COMS 3520 or CPRE 3080) or Graduate Classification

Theoretical and practical issues of design and implementation of distributed systems. The client server paradigm, inter-process communications, synchronization and concurrency control, naming, consistency and replication, fault tolerance, and distributed file systems. Graduate credit requires additional in-depth study of concepts. Programming projects and written reports.

CPRE 5560: Scalable Software Engineering

Credits: 3. Contact Hours: Lecture 3.

Design and analysis techniques scalable to large software, project-based learning of problem solving techniques, automation tools for high productivity and reliability of software, analysis-based measurement and estimation techniques for predictable software engineering.

CPRE 5570: Computer Graphics and Geometric Modeling

(Cross-listed with COMS 5570/ ME 5570).

Credits: 3. Contact Hours: Lecture 3.

Fundamentals of computer graphics technology. Data structures. Parametric curve and surface modeling. Solid model representations. Applications in engineering design, analysis, and manufacturing. Offered odd-numbered years. (Typically Offered: Fall)

CPRE 5580: Real Time Systems

Credits: 3. Contact Hours: Lecture 3.

Fundamental concepts in real-time systems. Real time task scheduling paradigms. Resource management in uniprocessor, multiprocessor, and distributed real-time systems. Energy management in real-time systems and sensor networks. Fault-tolerance and overload handling in real-time systems. Real-time channel, QoS routing, traffic policing, packet scheduling, and real-time LAN protocols. Case study of real-time and IoT applications. Term project in real-time systems and networks.

CPRE 5590: Security and Privacy in Cloud Computing

(Dual-listed with COMS 4590X/ CPRE 4590X). (Cross-listed with COMS 5590).

Credits: 3. Contact Hours: Lecture 3.

Introduction to cloud computing concepts and systems. Security and privacy threats in cloud computing. Practical techniques for cloud computing security. Theoretical and practical solutions for secure outsourcing of data and computation. Oral presentations and research projects.

CPRE 5600: Data-Driven Security and Privacy

(Cross-listed with COMS 5600/ CYBSC 5600).

Credits: 3. Contact Hours: Lecture 3.

Examination of applications of machine learning and big data techniques to various security and privacy problems, as well as secure and privacy-preserving machine learning algorithms. Offered irregularly. (Typically Offered: Spring)

CPRE 5620: Secure Software Engineering

Credits: 3. Contact Hours: Lecture 3.

Fundamentals and techniques to design and implement software systems. Assessment of security vulnerabilities in software systems, exploitation of software vulnerabilities, and methods to secure vulnerable software. Secure coding practices, data analytics for security, microservices and cloud services security. Reverse engineering and security assessment of cyber-physical systems. (Typically Offered: Fall, Spring)

CPRE 5630: Advanced Data Storage Systems

Credits: 3. Contact Hours: Lecture 3.

Focus on how to keep valuable digital data (e.g., scientific computations, financial transactions, family photos) safely in modern computer systems. Fundamentals of data storage technologies including state of the art. Topics include storage hardware, Linux file systems, and warehouse-scale big data storage, with an emphasis on the design tradeoffs for robustness and security. Team projects based on high-impact open-source systems.

CPRE 5660: Physical Design of VLSI Systems

Credits: 3. Contact Hours: Lecture 3.

Physical design of VLSI systems. Partitioning algorithms. Placement and floorplanning algorithms. Routing-global and detailed. Layout compaction. Physical design of FPGA's and MCM's. Performance-driven layout synthesis.

CPRE 5670: Bioinformatics Algorithms

(Cross-listed with BCB 5670/ COMS 5670).

Credits: 3. Contact Hours: Lecture 3.

Biology as an information science. A review of the algorithmic principles that are driving the advances in bioinformatics and computational biology.

CPRE 5690: Structural Bioinformatics

(Cross-listed with BCB 5690/ COMS 5690/ BBMB 5690/ GDCB 5690).

Credits: 3. Contact Hours: Lecture 3.

Molecular structures including genes and gene products: protein, DNA and RNA structure. Structure determination methods, structural refinement, structure representation, comparison of structures, visualization, and modeling. Molecular and cellular structure from imaging. Analysis and prediction of protein secondary, tertiary, and higher order structure, disorder, protein-protein and protein-nucleic acid interactions, protein localization and function, bridging between molecular and cellular structures. Molecular evolution. (Typically Offered: Fall)

CPRE 5700: Systems Biology

(Cross-listed with COMS 5700/ BCB 5700/ GDCB 5700/ STAT 5700).

Credits: 3. Contact Hours: Lecture 3.

Algorithmic and statistical approaches in computational functional genomics and systems biology. Analysis of high throughput biological data obtained using system-wide measurements. Topological analysis, module discovery, and comparative analysis of gene and protein networks. Modeling, analysis, and inference of transcriptional regulatory networks, protein-protein interaction networks, and metabolic networks. Dynamic systems and whole-cell models. Ontology-driven, network based, and probabilistic approaches to information integration. (Typically Offered: Spring)

CPRE 5750: Computational Perception

(Cross-listed with COMS 5750/ HCI 5750).

Credits: 3. Contact Hours: Lecture 3.

This class covers statistical and algorithmic methods for sensing, recognizing, and interpreting the activities of people by a computer. This semester we will focus on machine perception techniques that facilitate and augment human-computer interaction. The main goal of the class is to introduce computational perception on both theoretical and practical levels. Participation in small groups to design, implement, and evaluate a prototype of a human-computer interaction system that uses one or more of the techniques covered in the lectures. (Typically Offered: Spring)

CPRE 5800: Graphics Processing and Architecture

(Dual-listed with CPRE 4800).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Introduction to hardware architectures for computer graphics and their programming models. System-level view, including framebuffers, video output devices, displays, 2D and 3D graphics acceleration, and device interfacing. Architectural design of GPUs, from 2D and 3D sprite engines to 3D rendering pipelines to unified shader architectures. Computing models for graphics processors. GPGPU and GPU computing. (Typically Offered: Spring)

CPRE 5810: Computer Systems Architecture

(Cross-listed with COMS 5810).

Credits: 3. Contact Hours: Lecture 3.

Quantitative principles of computer architecture design, instruction set design, processor architecture: pipelining and superscalar design, instruction level parallelism, memory organization: cache and virtual memory systems, multiprocessor architecture, cache coherency, interconnection networks and message routing, I/O devices and peripherals. (Typically Offered: Fall)

CPRE 5820: Computer Systems Performance

Credits: 3. Contact Hours: Lecture 3.

Review of probability and stochastic processes concepts; Markovian processes; Markovian queues; renewal theory; semi-Markovian queues; queueing networks, applications to multiprocessor architectures, computer networks, and switching systems.

CPRE 5830: Reconfigurable Computing Systems

(Cross-listed with COMS 5830).

Credits: 3. Contact Hours: Lecture 3.

Introduction to reconfigurable computing, FPGA technology and architectures, spatial computing architectures such as systolic and bit serial adaptive network architectures, static and dynamic rearrangeable interconnection architectures, processor architectures incorporating reconfigurability.

CPRE 5840: Models and Techniques in Embedded Systems

Credits: 3. Contact Hours: Lecture 3.

Industry-standard tools and optimization strategies; practical embedded platforms and technology (reconfigurable platforms, multi-core platforms, low-power platforms); instruction augmentation, memory-mapped accelerator design, embedded software optimization. Students will be encouraged to compete as teams in an embedded system design competition.

CPRE 5850: Developmental Robotics

(Cross-listed with HCI 5850).

Credits: 3. Contact Hours: Lecture 3.

An introduction to the emerging interdisciplinary field of Developmental Robotics, which crosses the boundaries between robotics, artificial intelligence, developmental psychology, and philosophy. The main goal of this field is to create autonomous robots that are more intelligent, more adaptable, and more useful than the robots of today, which can only function in very limited domains and situations. Offered odd-numbered years. (Typically Offered: Spring)

CPRE 5860: Pervasive Computing

Credits: 3. Contact Hours: Lecture 3.

Fundamentals of pervasive computing, including location and context awareness, mobile and location services, ubiquitous data access, low power computing and energy management, middleware, security and privacy issues.

CPRE 5870: Hardware Design for Machine Learning

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Introduction to hardware architectures for machine learning. Full system view – machinelearning frameworks to hardware interface to hardware architecture. General purpose CPU extensions for machine learning. GPU extensions for machine learning. Spatial architectures for machine learning. Performance, energy, and accuracy trade-offs. Hardware design optimizations for machine learning, including quantization, data re-use, SIMD, and SIMT. Lab section will culminate with the design and evaluation of an application-specific machinelearning accelerator.

CPRE 5880: Embedded Computer Systems

Credits: 3. Contact Hours: Lecture 3.

Hardware/software systems and codesign. Models of computation for embedded systems. System-level design. Modeling, specification, synthesis, and verification. Hardware/software implementation. Design space exploration. Performance analysis and optimization. Multiprocessor system on chip. Platform-based design. Design methodologies and tools. Case studies and design projects.

CPRE 5900: Special Topics

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

Formulation and solution of theoretical or practical problems in computer engineering.

CPRE 5920: Seminar in Computer Engineering

Credits: 1-4. Contact Hours: Lecture 4.

Repeatable.

Prereq: Instructor Permission for Course

Seminar in Computer Engineering.

CPRE 5950: Independent Study

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Investigation of an approved topic commensurate with the student's prerequisites. (Typically Offered: Fall, Spring, Summer)

CPRE 5980: Electrical and Computer Engineering Learning Community Seminar

(Cross-listed with EE 5980).

Credits: Required. Contact Hours: Lecture 1.

Introduction to graduate study in Electrical and Computer Engineering at Iowa State University. Building networks, introduction to core requirements, and tools and techniques for success. Graduation Restriction: ECpE. Offered on a satisfactory-fail basis only.

CPRE 5990: Creative Component

Credits: 1-30. Repeatable.

*Prereq: Instructor Permission for Course***Courses for graduate students:****CPRE 6260: Parallel Algorithms for Scientific Applications**

(Cross-listed with COMS 6260).

Credits: 3. Contact Hours: Lecture 3.

Algorithm design for high-performance computing. Parallel algorithms for multidimensional tree data structures, space-filling curves, random number generation, graph partitioning and load balancing. Applications to grid and particle-based methods and computational biology.

CPRE 6310: Cyber Security Operations Practicum

(Cross-listed with CYBSC 6310).

Credits: 3. Contact Hours: Lecture 1.

Repeatable.

Practical experience in cyber operations. Cyber security threat analysis, malware analysis, and intrusion detection management. Cyber security data analysis methods. Pen testing tools and techniques. Weekly threat analysis briefings. Offered on a satisfactory-fail basis only.

CPRE 6320: Cyber Security Capstone Design

(Cross-listed with CYBSC 6320).

Credits: 3. Contact Hours: Lecture 3.

Capstone design course which integrates the security design process. Design of a security policy. Creation of a security plan. Implementation of the security plan. The students will attack each other's secure environments in an effort to defeat the security systems. Students evaluate the security plans and the performance of the plans. Social, political and ethics issues. Student self-evaluation, journaling, final written report.

CPRE 6490: Advanced Topics in Computational Biology

(Cross-listed with COMS 6490).

Credits: 3. Contact Hours: Lecture 3.

Design and analysis of algorithms for applications in computational biology, pairwise and multiple sequence alignments, approximation algorithms, string algorithms including in-depth coverage of suffix trees, semi-numerical string algorithms, algorithms for selected problems in fragment assembly, phylogenetic trees and protein folding. No background in biology is assumed. Also useful as an advanced algorithms course in string processing.

CPRE 6810: Advanced Topics in Computer Architecture

(Cross-listed with COMS 6810).

Credits: 3. Contact Hours: Lecture 3.

Current topics in computer architecture design and implementation. Advanced pipelining, cache and memory design techniques. Interaction of algorithms with architecture models and implementations. Tradeoffs in architecture models and implementations. Offered odd-numbered years. (Typically Offered: Spring)

CPRE 6970: Engineering Internship

(Cross-listed with EE 6970).

Credits: Required. Repeatable.

One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

CPRE 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Computer Science (COMS)

Courses primarily for undergraduates:

COMS 1010: Orientation

Credits: Required. Contact Hours: Discussion 1, Lecture 1.

Required orientation class for all incoming students in the Computer Science major. Topics include academic planning and policies, campus resources, and supports. Opportunity to connect with other computer science peers, faculty, alumni, and employers. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

COMS 1030: Computer Literacy and Applications

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Introduction to computer literacy and applications. Literacy: Impact of computer technology in today's societies, hardware, software, software programming, database and information systems, communication and networks, digital media technology, computer security and safety, ethics and privacy. Applications: In-depth hands-on experience with the operating systems, Microsoft word processing, spreadsheets, database management and presentation software. No prior computer experience necessary. Offered online only. (Typically Offered: Fall, Spring, Summer)

COMS 1040: Brief Introduction to Computer Programming for Non-Majors

Credits: 2. Contact Hours: Lecture 1.5, Discussion 0.5.

Offered first 8 weeks and last 8 weeks. Use of personal computer and workstation and beginning programming. Project-oriented approach to computer operation and programming, including use of tools to aid in programming. Topics from computer history, using basic Windows and MacOS tools, program structure, expression, variables, decision and logic, and iteration. No prior computer experience necessary. (Typically Offered: Fall, Spring)

COMS 1050A: Short Course in Computer Programming: Perl

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Prereq: COMS 1040

8-week course in programming using Perl.

COMS 1050B: Short Course in Computer Programming: MATLAB

Credits: 2. Contact Hours: Lecture 2.

Prereq: COMS 1040

8-week course in programming using MATLAB.

COMS 1060: Introduction to Web Programming

Credits: 3. Contact Hours: Lecture 3.

Introduction to web programming basics. Fundamentals of developing web pages using a comprehensive web development life cycle. Learn to design and code practical real-world homepage programs and earn adequate experience with current web design techniques such as HTML5 and cascading style sheets. Students also learn additional programming languages including JavaScript, jQuery, PHP, SQL, and MySQL. Strategies for accessibility, usability and search engine optimization. No prior computer programming experience necessary. (Typically Offered: Fall, Spring)

COMS 1070: Windows Application Programming

Credits: 3. Contact Hours: Lecture 3.

Introduction to computer programming for non-majors using a language such as the Visual Basic language. Basics of good programming and algorithm development. Graphical user interfaces. (Typically Offered: Fall, Spring)

COMS 1130: Introduction to Spreadsheets and Databases

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Using Microsoft Excel spreadsheets and Microsoft Access databases to input, store, process, manipulate, query, and analyze data for business and industrial applications. Graduation Restriction: Credit in COMS 1130 may not be applied toward graduation in the SE and CPRE majors. (Typically Offered: Fall, Spring, Summer)

COMS 1270: Introduction to Computer Programming

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Credit or concurrent enrollment in MATH 1400 or higher

Introduction to computer programming with an emphasis on problem-solving. Topics include: program structures, expressions, variables, decision and logic, iteration, collections, input, and output. Program construction and testing. Programming assignments including games and applications. No prior programming experience necessary. (Typically Offered: Fall, Spring)

COMS 1920: Explorations in Computing Research I

Credits: 1. Contact Hours: Discussion 0.5.

Repeatable, maximum of 2 credits.

Explore research opportunities for undergraduate students in Computer Science; understanding the nature of research and development process; reviewing the literature; development of writing, presentation, and data reporting skills; rotation under different research labs; group work. (Typically Offered: Fall, Spring)

COMS 2030: Careers in Computer Science

Credits: Required. Contact Hours: Lecture 1.5.

Computer science as a profession. Introduction to career fields open to computer science majors. Relationship of coursework to careers. Presentations by computer science professionals. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

COMS 2070: Fundamentals of Computer Programming

Credits: 3. Contact Hours: Lecture 3, Discussion 1.

Prereq: MATH 1500 or credit or enrollment in MATH 1400 or higher

An introduction to computer programming using an object-oriented programming language. Emphasis on the basics of good programming techniques and style. Extensive practice in designing, implementing, and debugging small programs. Use of variable, if-statement, looping, method, and class. Interactive and file I/O. This course is not designed for computer science, software engineering, and computer engineering majors. Graduation Restriction: Credit may not be applied toward graduation for both COMS 2070 and COMS 2270. (Typically Offered: Fall, Spring, Summer)

COMS 2270: Object-oriented Programming

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: Credit or concurrent enrollment in MATH 1430 or higher; (COMS 1270 or CPRE 1850 or SE 1850 or EE 2850)

Computer programming using objects as the mechanism for modularity, abstraction, and code reuse. Instance variables, methods, and encapsulation. Review of control structures for conditionals and iteration. Developing algorithms on strings, arrays, and lists. Recursion, searching, and sorting. Text parsing and file I/O. Interfaces, inheritance, polymorphism, and abstract classes. Exception handling. Tools for unit testing and debugging. Emphasis on a disciplined approach to specification, code development, and testing. Course intended for majors in computer science and related fields. Graduation Restriction: Credit may not be applied toward graduation for both COMS 2070 and 2270. (Typically Offered: Fall, Spring, Summer)

COMS 2280: Introduction to Data Structures

Credits: 3. Contact Hours: Lecture 3, Discussion 1.

Prereq: Minimum of C- in COMS 2270; credit or concurrent enrollment in MATH 1650

An object-oriented approach to data structures and algorithms. Object-oriented analysis, design, and programming, with emphasis on data abstraction, inheritance and subtype polymorphism, and generics. Abstract data type specification and correctness. Collections including lists, stacks, queues, trees, heaps, maps, hash tables, and graphs. Big-O notation and algorithm analysis. Searching and sorting. Graph search and shortest path algorithms. Emphasis on object-oriented design, writing and documenting medium-sized programs. This course is designed for majors. (Typically Offered: Fall, Spring, Summer)

COMS 2300: Discrete Computational Structures

(Cross-listed with MATH 2300).

Credits: 3. Contact Hours: Lecture 3, Discussion 1.

Prereq: Minimum of C- in COMS 2270 and MATH 1650; ENGL 1500

Concepts in discrete mathematics as applied to computer science. Logic, set theory, functions, relations, cardinality of sets, combinatorics, graph theory and number theory. Proof techniques, induction and recursion.

(Typically Offered: Fall, Spring, Summer)

COMS 2520: Linux Operating System Essentials

Credits: 3. Contact Hours: Lecture 3.

Prereq: CPRE 1850 or SE 1850 or COMS 1270 or COMS 2070 or COMS 2270

Introduction to installation, utilization, and administration of Linux systems. Topics include open-source software, package installation and management, shell programming and command-line utilities, process and service management, account management, network configuration, file sharing, interoperability with other computers and operating systems, automation, and system security. (Typically Offered: Fall)

COMS 2900: Independent Study

Credits: 1-30. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Graduation Restriction: No more than 6 credits of COMS 2900 or COMS 2900H may be counted toward graduation. (Typically Offered: Fall, Spring, Summer)

COMS 2900H: Independent Study: Honors

Credits: 1-30. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Graduation Restriction: No more than 6 credits of COMS 2900 or COMS 2900H may be counted toward graduation. (Typically Offered: Fall, Spring)

COMS 2950: Programming-Based Problem Solving Practices

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 3 times.

Prereq: COMS 2070 or COMS 2270

Basics of problem solving using programming techniques. Development and implementation of simple to advanced data structures and algorithms, evaluation of problem difficulty, design and implementation of solutions, debugging, and working under time pressure. (Typically Offered: Fall, Spring)

COMS 3090: Software Development Practices

(Cross-listed with SE 3090).

Credits: 3. Contact Hours: Lecture 3, Discussion 1.

Prereq: Minimum of C- in (COMS 2280; MATH 1650)

Practical introduction to methods for managing software development.

Software engineering concepts, practices and tools. Requirements analysis, structured and object-oriented design, coding, testing, and maintenance. Software process models, software tools and environments. Programming projects that provide exposure to information management techniques, client/server model, networking and communication. (Typically Offered: Fall, Spring)

COMS 3110: Introduction to the Design and Analysis of Algorithms

Credits: 3. Contact Hours: Lecture 3, Discussion 1.

Prereq: Minimum of C- in (COMS 2280; MATH 1660, ENGL 1500); (COMS 2300 or CPRE 3100)

Basic techniques for design and analysis of algorithms. Sorting, searching, graph algorithms, string matching, algorithms for secure computing such as RSA, and NP-completeness. Design techniques such as dynamic programming, divide and conquer, greedy method, and approximation. Asymptotic, worst-case, average-case and amortized analyses. Topics from advanced data structures such as balanced trees and hashing. Programming projects. (Typically Offered: Fall, Spring, Summer)

COMS 3190: Construction of User Interfaces

(Cross-listed with SE 3190).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 2280

Overview of user interface design. Evaluation and testing of user interfaces. Review of principles of object orientation, object oriented design and analysis using UML in the context of user interface design. Design of windows, menus and commands. Developing Web and Windows-based user-interfaces. Event-driven programming. Introduction to Frameworks and APIs for the construction of user interfaces. (Typically Offered: Fall, Spring)

COMS 3210: Introduction to Computer Architecture and Machine-Level Programming

Credits: 3. Contact Hours: Lecture 4.

Prereq: Minimum of C- in (COMS 2280 and MATH 1650); (COMS 2300 or CPRE 2810); ENGL 2500

Introduction to computer architecture and organization. Emphasis on evaluation of performance, instruction set architecture, datapath and control, memory-hierarchy design, and pipelining. Assembly language programming. (Typically Offered: Fall, Spring)

COMS 3260: C for Programmers

Credits: 1. Contact Hours: Lecture 1.

Prereq: Minimum of C- in (COMS 2280; [COMS 2300 or CPRE 3100])

Half-semester course. Design and implementation of libraries and applications in C, for students with prior programming background. Emphasis on differences between C and other languages, including file I/O, string processing, memory management, and buffer overruns. Using build systems, debuggers, and other development tools. Programming projects. (Typically Offered: Fall, Spring)

COMS 3270: Advanced Programming Techniques

Credits: 3. Contact Hours: Lecture 3.

Prereq: Minimum of C- in COMS 2280 and MATH 1650

Object-oriented programming experience using a language suitable for exploring advanced topics in programming. Topics include memory management, parameter passing, inheritance, compiling, debugging, and maintaining programs. Significant programming projects. (Typically Offered: Fall, Spring)

COMS 3310: Theory of Computing

(Cross-listed with LING 3310).

Credits: 3. Contact Hours: Lecture 3, Discussion 1.

Prereq: Minimum of C- in (COMS 2280; MATH 1660; ENGL 2500); (COMS 2300 or CPRE 3100)

Models of computation: finite state automata, pushdown automata and Turing machines. Study of grammars and their relation to automata. Limits of digital computation, unsolvability and Church-Turing thesis. Relations between classes of languages. (Typically Offered: Fall, Spring)

COMS 3360: Introduction to Computer Graphics

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3270 or CPRE 2880; concurrent enrollment in (MATH 2070 or MATH 2650 or MATH 3170)

Programming interactive computer graphics systems using standard low-level libraries (such as OpenGL or DirectX) with an emphasis on 3D rendering. The graphics pipeline and programmable shaders. Coordinate systems and transformations in two and three dimensions. Homogeneous coordinates, viewing transformations and perspective. Euler angles and quaternions. Visible surface algorithms. Lighting models and shading. Texture mapping, bump mapping, reflection, elementary ray tracing. Offscreen buffers, render-to-texture and related techniques. (Typically Offered: Fall)

COMS 3420: Principles of Programming Languages

(Cross-listed with SE 3420).

Credits: 3. Contact Hours: Lecture 3, Discussion 1.

Prereq: Minimum of C- in COMS 2280 and MATH 1650; COMS 2300 or CPRE 3100

Study of concepts in programming languages, especially functional programming concepts. Overview of major programming paradigms, their relationship, and tradeoffs among paradigms enabling sound choices of programming language for application-specific development. Programming projects. (Typically Offered: Fall, Spring)

COMS 3500: Number Theory

(Cross-listed with MATH 3500).

Credits: 3. Contact Hours: Lecture 3, Discussion 1.

Prereq: COMS 2300 or CPRE 3100 or MATH 2010

Divisibility, integer representations, primes and divisors, linear diophantine equations, congruences, and multiplicative functions. Applications to cryptography. Additional topics, chosen at the discretion of the instructor. (Typically Offered: Spring)

COMS 3520: Introduction to Operating Systems

Credits: 3. Contact Hours: Lecture 3, Discussion 1.

Prereq: (COMS 3210 or CPRE 3810); (COMS 3270 or CPRE 2880); ENGL 2500
Survey of operating systems; process management including scheduling and multithreading; memory management including virtual memory and paging; concurrency including mutual exclusion, synchronization, and deadlocks; persistent storage and file systems; principles and practices of secure computing including threats and access control; networking and distributed systems; virtualization. Programming projects. (Typically Offered: Fall, Spring)

COMS 3620: Object-Oriented Analysis and Design

(Cross-listed with SE 3620).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500 and Minimum of C- in COMS 2280 and MATH 1650

Object-oriented requirements analysis and systems design. Analysis and design methodologies including use case and Unified Modeling Language (UML). Design principles, heuristics, and patterns. Architectural patterns and alternative programming paradigms. Group design and programming project. (Typically Offered: Fall, Spring)

COMS 3630: Introduction to Database Management Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500 and Minimum of C- in COMS 2280 and MATH 1650

Data models and database design using entity relationship model. Database implementation with relational and graph database management systems (DBMS) and query languages. DBMS internals including basic concepts of database storage, indexing, query optimization, and concurrent control. Database application development. Programming Projects. (Typically Offered: Fall, Spring)

COMS 3980: Cooperative Education

Credits: Required. Repeatable.

Prereq: Department Permission for Course

Required of all cooperative education students. Students must register for this course prior to commencing each work period. (Typically Offered: Fall, Spring, Summer)

COMS 3990X: Special Topics

Credits: 3. Contact Hours: Lecture 3.

Special Topics in Computer Science.

COMS 4010: Bioinformatics of Sequences

(Cross-listed with BIOL 4010/ BCBIO 4010/ GEN 4010).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BCBIO 3220; (COMS 1270 OR COMS 2270); (MATH 1600 or MATH 1650); (MATH 1660 or STAT 3010); (STAT 1010 or STAT 1040 or STAT 3300) or Permission of Instructor

Application of computer science and statistics to molecular biology with a significant problem-solving component, including hands-on programming using Python to solve a variety of biological problems. String algorithms, sequence alignments, homology search, pattern discovery, genotyping, genome assembly, genome annotation, comparative genomics, protein structure. Offered odd-numbered years. (Typically Offered: Fall)

COMS 4020A: Computer Science Senior Project: Multimedia and Computer Gaming I

Credits: 2-3. Contact Hours: Studio 3.

Repeatable, maximum of 6 credits.

Prereq: COMS 3090, COMS 3110, COMS 3210, COMS 3310, COMS 4370 and Senior classification

Students conceive, plan, architect and design a computer game. Student registered in this course will work with students in ARTIS 4090. Oral and written reports. Graduation Restriction: No more than 6 credits of 4020A, 4020B, and 4020C may be used toward graduation. (Typically Offered: Fall)

COMS 4020B: Computer Science Senior Project: Multimedia and Computer Gaming II

Credits: 2-3. Contact Hours: Studio 3.

Repeatable, maximum of 6 credits.

Prereq: COMS 4020A and Senior classification

Students implement, test, and present a completed production computer game. Students in this class will work with students in ARTIS 4090. Oral and written reports. Graduation Restriction: No more than 6 credits of 4020A, 4020B, and 4020C may be used toward graduation. (Typically Offered: Spring)

COMS 4020C: Computer Science Senior Project: Project in Computer Science

Credits: 3. Contact Hours: Studio 3.

Prereq: COMS 3090, COMS 3110, COMS 3210, COMS 3310 and Senior classification

Students work as individuals and teams to complete the planning, design, and implementation of a significant project in the topic area. Oral and written reports. Recommended final semester Senior year. Graduation Restriction: No more than 6 credits of 4020A, 4020B, and 4020C may be used toward graduation. (Typically Offered: Fall, Spring)

COMS 4060: Bioinformatics of OMICS

(Cross-listed with BIOL 4060/ BCBIO 4060/ GEN 4060).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120

Introduction to cutting edge OMICS analyses including transcriptome, proteome, metabolome, DNA-protein interactome, protein-protein interactome and methylome. Genomic analysis including transcriptome analysis, cancer genomics, comparative genomics, and regulatory network analysis. (Typically Offered: Spring)

COMS 4070: Applied Formal Methods

(Cross-listed with AERE 4070).

Credits: 3. Contact Hours: Lecture 3.

Prereq: AERE 3610 for AERE majors. COMS 3110 for COMS majors.

AERE 3610 or COMS 3110, or an equivalent course, plus instructor permission for other majors.

Introduction to the fundamentals of formal methods, a set of mathematically rigorous techniques for the formal specification, validation, and verification of safety- and security-critical systems. Tools, techniques, and applications of formal methods with an emphasis on real-world use-cases such as enabling autonomous operation. Build experience in writing mathematically analyzable specifications from English operational concepts for real cyberphysical systems, such as aircraft and spacecraft. Review capabilities and limitations of formal methods in the design, verification, and system health management of today's complex systems. (Typically Offered: Spring)

COMS 4090: Software Requirements Engineering

(Cross-listed with SE 4090).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3090

The requirements engineering process including elicitation, requirements analysis fundamentals, requirements specification and communication, and requirements evaluation. Modeling of functional requirements and nonfunctional requirements, traceability, and requirements change management. Case studies and software projects.

COMS 4100: Distributed Development of Software

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3090; (COMS 3270 or CPRE 2880)

Teams of students develop software applications in a modern software engineering environment. Importance, effective processes pertaining to team organization, management and communication, and cultural issues of distributed development. Graduate credit requires in-depth study of concepts and oral presentations.

COMS 4120: Formal Methods in Software Engineering

(Cross-listed with CPRE 4120/ SE 4120).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3110; (STAT 3050 or STAT 3300 or STAT 3410)

A study of formal techniques for model-based specification and verification of software systems. Topics include logics, formalisms, graph theory, numerical computations, algorithms and tools for automatic analysis of systems. Graduate credit requires in-depth study of concepts.

COMS 4130: Program Analysis

(Cross-listed with SE 4130).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (COMS 3270 or CPRE 2880); COMS 3420

Algorithms, AI techniques and tools for automatically reasoning about code and program executions. Theory and foundations related to control flow analysis, dataflow analysis, abstract interpretation, and symbolic execution. Applications of program analysis to bug detection, test input generation, debugging, program repair, specification inference and trustworthy AI engineering. Concepts, algorithms, tools, benchmarks, methodologies for solving problems using program analysis and for preparing research in program analysis.

COMS 4140: Gerontechnology in Smart Home Environments

Credits: 3. Contact Hours: Lecture 3.

Interdisciplinary course designed for students interested in assistive technology, pervasive computing, mobile computing and principles of universal and inclusive design for end users, in particular, the elderly population. Students work in semester-long projects as interdisciplinary teams to apply knowledge obtained from lectures and mutual presentations. Research report and oral presentation required for graduate credit.

COMS 4150: Software System Safety

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3090 or COMS 3110

An introduction to the hazard analysis, safety requirements, design, and verification of software for safety-critical and high-dependability systems. Safety analysis techniques, fault identification and recovery, and certification issues. Emphasizes a case-based and systematic approach to software's role in safe systems.

COMS 4170: Software Testing

(Cross-listed with SE 4170).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3090; (COMS 2300 or CPRE 3100); ENGL 2500

An introduction to software testing principles and techniques. Test models, test design, test adequacy criteria; regression, integration, and system testing; and software testing tools.

COMS 4180: Introduction to Computational Geometry

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3110

Introduction to data structures, algorithms, and analysis techniques for computational problems that involve geometry. Convex hulls, line segment intersection, polygon triangulation, 2D linear programming, range queries, point location, arrangements and duality, Voronoi diagrams, Delaunay triangulations, geometric data structures, robot motion planning, visibility graphs. Other selected topics. Programming assignments. Scholarly report required for graduate credit.

COMS 4190X: Trustworthy Healthcare Software

(Dual-listed with COMS 5190X).

Credits: 3. Contact Hours: Lecture 3.

Introduction to healthcare software used for health diagnosis or treatment. Focus on software as part of a medical device, the emerging use of software as a medical device, and on mobile healthcare applications. Topics include: discovering and verifying usability, reliability, and safety requirements; design and verification of trustworthy healthcare software; assurance cases for healthcare software in a regulatory environment. (Typically Offered: Spring)

COMS 4210: Logic for Mathematics and Computer Science

(Cross-listed with MATH 4210).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 2300 or CPRE 3100 or MATH 2070 or MATH 3010 or MATH 3170

Propositional and predicate logic. Topics selected from Horn logic, equational logic, resolution and unification, foundations of logic programming, reasoning about programs, program specification and verification, model checking and binary decision diagrams, temporal logic and modal logic.

COMS 4240: Introduction to High Performance Computing

(Cross-listed with MATH 4240/ CPRE 4240).

Credits: 3.

Prereq: (MATH 2650; [MATH 2070 OR MATH 3170]) or permission of instructor

Unix, serial programming of scientific applications, OpenMP for shared-memory parallelization. No Unix, Fortran or C experience required. (Typically Offered: Fall)

COMS 4250: High Performance Computing for Scientific and Engineering Applications

(Cross-listed with CPRE 4250).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: COMS 3110 and ENGL 2500 and SPCM 2120

Introduction to high performance computing platforms including parallel computers and workstation clusters. Discussion of parallel architectures, performance, programming models, and software development issues. Sample applications from science and engineering. Practical issues in high performance computing will be emphasized via a number of programming projects using a variety of programming models and case studies. Oral and written reports.

COMS 4260: Introduction to Parallel Algorithms and Programming

(Cross-listed with CPRE 4260).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: CPRE 3080 or COMS 3210 and CPRE 3150 or COMS 3110

Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms. (Typically Offered: Fall)

COMS 4300: Concurrent Programming in Practice

Credits: 3. Contact Hours: Lecture 3, Discussion 1.

Prereq: COMS 3110 and COMS 3620 or COMS 3630 and ENGL 2500 and SPCM 2120

A practical course in concepts, techniques, languages, and frameworks for concurrent and asynchronous systems. Concurrency fundamentals: threads, synchronization locks, waiting and notification, memory visibility. Immutability and thread confinement. Concurrent data structures and utilities, thread pools. Asynchronous programming with callbacks, futures, and message passing. Issues of aliasing, ownership and borrowing. Transactional memory, immutable and versioned data structures. Alternatives to threads and locks: event-driven systems, the actor model, CSP, coroutines. Students will investigate several non-mainstream languages supporting different concurrency models. Oral and written reports.

COMS 4330: Molecular Programming of Nanoscale Devices and Processes

Credits: 3. Contact Hours: Lecture 3.

Prereq: Minimum of C- in COMS 3310 or Permission of Instructor

Programming, modeling, and analysis of natural and engineered systems at the nanoscale. Topics include chemical reaction networks, strand displacement systems, models of self-assembly, biomolecular origami, and molecular robotics. Emphasis on mathematical methods of describing, simulating, programming, and assessing the computational power of such systems. Graduate credit requires a written or oral report on current research.

COMS 4340: Quantum Information and Complexity

Credits: 3. Contact Hours: Lecture 3.

Prereq: (COMS 3310 or PHYS 4220 or PHYS 5220); (MATH 2070 or MATH 3170)

An exploration of quantum information and computation from a theoretical computer science perspective. Topics include quantum circuits, axioms of quantum mechanics, quantum entanglement, quantum teleportation, nonlocal games, quantum entropies, quantum information theory, quantum computational complexity, interactive proof systems, and quantum supremacy. (Typically Offered: Fall)

COMS 4350: Algorithms for Large Data Sets: Theory and Practice

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3110 or Permission of Instructor

Algorithmic challenges involved in solving computational problems on massive data sets. Probabilistic data structures, Curse of Dimensionality and dimensionality reduction, locality sensitive hashing, similarity measures, matrix decompositions. Optimization problems in massive data analysis. Computational problems that arise in the context of web search, social network analysis, online advertising etc. Practical aspects include implementation and performance evaluation of the algorithms on real world data sets. Graduate credit requires a written report on current research.

COMS 4370: Computer Game and Media Programming

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3360

Video game programming using current game engine interfaces with real hardware. Particular attention is paid to the development environment, tool chains, 2D graphics, 3D graphics, controllers, memory management, and audio systems.

COMS 4400: Principles and Practice of Compiling

(Cross-listed with SE 4400).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3310 or COMS 3420 and COMS 3090 and ENGL 2500

Theory of compiling and implementation issues of programming languages. Programming projects leading to the construction of a compiler. Projects with different difficulty levels will be given for 4400 and 5400. Topics include: lexical, syntactic and semantic analyses, syntax-directed translation, code generation, runtime environment and library support.

COMS 4410: Programming Languages

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3420 or COMS 4400

Survey of the goals and problems of language design. Formal and informal studies of a wide variety of programming language features including type systems. Creative use of functional and declarative programming paradigms.

COMS 4530: Privacy Preserving Algorithms and Data Security

(Dual-listed with COMS 5530X).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COM S 3110; (STAT 3050 or STAT 3300 or STAT 3410 or STAT 3470)

Latest online threats on identity theft, fundamentals of privacy preserving algorithms, techniques, and mechanisms to minimize disclosure of sensitive information while maintaining availability. Theory and fundamentals underpinning measures to evaluate the privacy and availability of data; implementation and deployment of privacy-preserving data operations including pre- and post-randomization techniques, homomorphisms, and secure function evaluation protocols. (Typically Offered: Spring)

COMS 4540: Distributed Systems

(Cross-listed with CPRE 4540).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3110 and COMS 3520 or CPRE 3080

Theoretical and practical issues of design and implementation of distributed systems. The client server paradigm, inter-process communications, synchronization and concurrency control, naming, consistency and replication, fault tolerance, and distributed file systems. Graduate credit requires additional in-depth study of concepts. Programming projects and written reports.

COMS 4550: Simulation: Algorithms and Implementation

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3110 and STAT 3050, STAT 3300 or STAT 3410 and ENGL 2500

Introduction to discrete-event simulation with a focus on computer science applications, including performance evaluation of networks and distributed systems. Overview of algorithms and data structures necessary to implement simulation software. Discrete and continuous stochastic models, random number generation, elementary statistics, simulation of queuing and inventory systems, Monte Carlo simulation, point and interval parameter estimation. Graduate credit requires additional in-depth study of concepts.

COMS 4590X: Security and Privacy in Cloud Computing

(Dual-listed with COMS 5590/ CPRE 5590). (Cross-listed with CPRE 4590X).

Credits: 3. Contact Hours: Lecture 3.

Introduction to cloud computing concepts and systems. Security and privacy threats in cloud computing. Practical techniques for cloud computing security. Theoretical and practical solutions for secure outsourcing of data and computation. Oral presentations and research projects. (Typically Offered: Fall)

COMS 4610: Principles and Internals of Database Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3110 and ENGL 2500 and SPCM 2120

Database design including entity-relationship model, relational data model, and non-relational data models, data dependency, and normalization. Database management including physical storage, access methods, query processing, and transaction management. Database systems of special purposes such as spatial databases, mobile object databases, and multimedia databases. Introduction to current database research such as cloud data management and Internet information retrieval.

COMS 4630X: Healthcare Data Privacy, Security and Confidentiality: Principles and Algorithms

(Dual-listed with COMS 5630X).

Credits: 3. Contact Hours: Lecture 3.

Introduction to types of healthcare data, complexities of privacy, confidentiality and security within healthcare. Key laws and regulations specific to healthcare such as HIPAA and the European Data Protection Directive 95/46/EC. Types of data sources and data elements utilized in healthcare. Algorithms for privacy, security and confidentiality of electronic health records. Role-based access control in healthcare. (Typically Offered: Spring)

COMS 4640X: AI for Healthcare

(Dual-listed with COMS 5640X).

Credits: 3. Contact Hours: Lecture 3.

Introduction to use of AI techniques in healthcare. Topics may include: AI techniques for medical diagnosis, prognosis and treatment, AI techniques for diagnosis of lung and brain disorders from 2D medical imaging data, classification models of 2D medical images, AI techniques for 3D medical imaging data, use of multi-modal imaging data in disease detection and diagnosis. Programming projects.

COMS 4720: Principles of Artificial Intelligence

Credits: 3. Contact Hours: Lecture 3, Discussion 1.

Prereq: COMS 3110 and STAT 3050, STAT 3300 or STAT 3410 and ENGL 2500

Basic principles, techniques, and applications of artificial intelligence. Specification, design, implementation, and applications of intelligent agents. Computational models of intelligent behavior, including problem solving, knowledge representation and reasoning, planning, decision making, learning, perception, and communication. Artificial intelligence programming. Term project and written report for graduate credit.

COMS 4740: Introduction to Machine Learning

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3110; STAT 3300 or STAT 3050 or STAT 3410 or STAT 3470; MATH 1650; ENGL 2500

Introduction to concepts, tools and techniques of machine learning for applications. Selected machine learning algorithms in practical data mining tasks such as classification, regression, and clustering, e.g., association rules, decision trees, linear models, Bayesian learning, support vector machines, artificial neural networks, instance-based learning, probabilistic graphical models, ensemble learning, and clustering algorithms. Selected applications in data mining and pattern recognition.

COMS 4760: Motion Planning for Robotics and Autonomous Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3110; ENGL 2500

Recent techniques for developing algorithms that automatically generate continuous motions while satisfying geometric constraints. Applications in areas such as robotics and autonomous systems. Discrete planning, kinematics, configuration space, collision detection, sampling-based motion planning, nonholonomic systems and differential constraints. Implementation of software that computes motion plans in Python. Written reports. (Typically Offered: Fall, Spring, Summer)

COMS 4770: Foundations of Robotics and Computer Vision

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 2280; COMS 2300 or CPRE 3100; MATH 2070 or MATH 3170, or consent of the instructor

Selected topics from applied mathematics, algorithms, geometry, and mechanics that are fundamental to robotics and computer vision, and are also applied in computer graphics, geometric modeling and visualization, to me a few. Homogeneous coordinates and transformations, perspective projection, camera calibration, rotations and quaternions, roots of polynomials and polynomial systems, solution of linear and nonlinear equations, parametric and algebraic curves, curvature, torsion, Frenet formulas, surfaces, fundamental forms, principal curvatures, Gaussian and mean curvatures, geodesics, approximation, Fourier series and fast Fourier transform, nonlinear optimization, Lagrange multipliers, least squares, surface fitting and calculus of variations. Programming components. Scholarly report required for graduate credit.

COMS 4810: Numerical Methods for Differential Equations

(Cross-listed with MATH 4810).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 2650 and one of MATH 2660, MATH 2670

First order Euler method, high order Runge-Kutta methods, and multistep methods for solving ordinary differential equations. Finite difference and finite element methods for solving partial differential equations. Local truncation error, stability, and convergence for finite difference method. Numerical solution space, polynomial approximation, and error estimate for finite element method. Computer programming required. (Typically Offered: Spring)

COMS 4870: Introduction to Network Programming and Cloud Computing

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3520 or CPRE 3080

Introduction to network programming: protocols, programming suites, and applications. Introduction to cloud computing: concepts and case study with AWS. Introduction to selected research issues in networking and cloud computing. Graduate credit requires written report and oral presentation.

COMS 4880: Computer Networks

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3520 or CPRE 3080

Fundamental concepts in the design and implementation of computer communication in both wired and wireless networks, their protocols, and applications. Topics include the layered network architecture in the Internet, applications, transport, network, and data link layers and their protocols, Socket API, software-defined networking, and network security. Lectures organized in a top-down approach to cover the layers of network design. (Typically Offered: Fall, Spring)

COMS 4900: Independent Study

Credits: 1-30. Repeatable, maximum of 9 credits.

Prereq: 6 credits in COMS; Permission of Instructor

Graduation Restriction: No more than 9 credits of COMS 4900 or COMS 4900H may be counted toward graduation. (Typically Offered: Fall, Spring, Summer)

COMS 4900H: Independent Study: Honors

Credits: 1-30. Repeatable, maximum of 9 credits.

Prereq: 6 credits in COMS; Permission of Instructor

Graduation Restriction: No more than 9 credits of COMS 4900 or COMS 4900H may be counted toward graduation. (Typically Offered: Fall, Spring)

COMS 4990X: Special Topics

Credits: 3. Contact Hours: Lecture 3.

Special Topics in Computer Science.

Courses primarily for graduate students, open to qualified undergraduates:

COMS 5010X: Computational Methods I

Credits: 3. Contact Hours: Lecture 3.

Design of data structures and algorithms with an object-oriented programming methodology. Abstract data type specification and correctness. Collections including lists, stacks, queues, trees and hash tables. Searching and Sorting. Discrete mathematics concepts as applied to computer science. Basics of logic, set theory, functions, relations, combinatorics. Proof techniques such as induction and recursion. Background in Math and Computer Science equivalent to MATH 1650 and COMS 2270 required.

COMS 5040X: Computational Methods II

Credits: 3. Contact Hours: Lecture 3.

Basics of graph theory, number theory and discrete probability. Big O Notation and algorithm analysis. Analysis of sorting and searching algorithms. Algorithm design techniques such as divide and conquer, greedy method and dynamic programming. Graph algorithms.

COMS 5070: Applied Formal Methods

(Cross-listed with AERE 5070).

Credits: 3. Contact Hours: Lecture 3.

Introduction to the fundamentals of formal methods, a set of mathematically rigorous techniques for the formal specification, validation, and verification of safety- and security-critical systems. Tools, techniques, and applications of formal methods with an emphasis on real-world use-cases such as enabling autonomous operation. Build experience in writing mathematically analyzable specifications from English operational concepts for real cyberphysical systems, such as aircraft and spacecraft. Review capabilities and limitations of formal methods in the design, verification, and system health management of today's complex systems. (Typically Offered: Spring)

COMS 5090: Software Requirements Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3090 or Graduate Classification

The requirements engineering process including elicitation, requirements analysis fundamentals, requirements specification and communication, and requirements evaluation. Modeling of functional requirements and nonfunctional requirements, traceability, and requirements change management. Case studies and software projects.

COMS 5100: Distributed Development of Software

Credits: 3. Contact Hours: Lecture 3.

Teams of students develop software applications in a modern software engineering environment. Importance, effective processes pertaining to team organization, management and communication, and cultural issues of distributed development. Graduate credit requires in-depth study of concepts and oral presentations.

COMS 5110: Design and Analysis of Algorithms

(Cross-listed with CPRE 5110).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3110

A study of algorithm design and analysis techniques. Network flows and linear programming. Randomized algorithms. NP-completeness. Approximation algorithms. Fixed-parameter algorithms.

COMS 5120: Formal Methods in Software Engineering

Credits: 3. Contact Hours: Lecture 3.

A study of formal techniques for model-based specification and verification of software systems. Topics include logics, formalisms, graph theory, numerical computations, algorithms and tools for automatic analysis of systems. Graduate credit requires in-depth study of concepts.

COMS 5130: Program Analysis

(Cross-listed with CPRE 5130).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (COMS 3270 or CPRE 2880); COMS 3420 or Graduate Classification
Algorithms, AI techniques and tools for automatically reasoning about code and program executions. Theory and foundations related to control flow analysis, dataflow analysis, abstract interpretation, and symbolic execution. Applications of program analysis to bug detection, test input generation, debugging, program repair, specification inference and trustworthy AI engineering. Concepts, algorithms, tools, benchmarks, methodologies for solving problems using program analysis and for preparing research in program analysis.

COMS 5140: Gerontechnology in Smart Home Environments

Credits: 3. Contact Hours: Lecture 3.

Prereq: ARTGR 2710 or COMS 2070 or COMS 2270 or GERON 3770 or Graduate Classification

Interdisciplinary course designed for students interested in assistive technology, pervasive computing, mobile computing and principles of universal and inclusive design for end users, in particular, the elderly population. Students work in semester-long projects as interdisciplinary teams to apply knowledge obtained from lectures and mutual presentations. Research report and oral presentation required for graduate credit.

COMS 5150: Software System Safety

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3090 or COMS 3110 or Graduate Classification

An introduction to the hazard analysis, safety requirements, design, and verification of software for safety-critical and high-dependability systems. Safety analysis techniques, fault identification and recovery, and certification issues. Emphasizes a case-based and systematic approach to software's role in safe systems.

COMS 5160: Artificial Intelligence in Software Engineering

Credits: 3. Contact Hours: Lecture 3.

Application of artificial intelligence (AI) techniques used to solve problems in software engineering and the use of software engineering techniques to improve AI. AI techniques such as optimization/search, classification, natural language processing, and deep learning to address software engineering problems will be included. Offered even-numbered years. (Typically Offered: Spring)

COMS 5180: Introduction to Computational Geometry

Credits: 3. Contact Hours: Lecture 3.

Introduction to data structures, algorithms, and analysis techniques for computational problems that involve geometry. Convex hulls, line segment intersection, polygon triangulation, 2D linear programming, range queries, point location, arrangements and duality, Voronoi diagrams, Delaunay triangulations, geometric data structures, robot motion planning, visibility graphs. Other selected topics. Programming assignments. Scholarly report required for graduate credit.

COMS 5190X: Trustworthy Healthcare Software

(Dual-listed with COMS 4190X).

Credits: 3. Contact Hours: Lecture 3.

Introduction to healthcare software used for health diagnosis or treatment. Focus on software as part of a medical device, the emerging use of software as a medical device, and on mobile healthcare applications. Topics include: discovering and verifying usability, reliability, and safety requirements; design and verification of trustworthy healthcare software; assurance cases for healthcare software in a regulatory environment.

COMS 5250: Numerical Analysis of High Performance Computing

(Cross-listed with MATH 5250/ CPRE 5250).

Credits: 3. Contact Hours: Lecture 3.

Introduction to parallelization techniques and numerical methods for distributed memory high performance computers. A semester project in an area related to each student's research interests is required. (Typically Offered: Spring)

COMS 5260: Introduction to Parallel Algorithms and Programming

(Cross-listed with CPRE 5260).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms. (Typically Offered: Fall)

COMS 5270: High-Performance Deep Learning

(Cross-listed with CPRE 5270).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3520 or CPRE 3080

Fundamentals and advances in HPC in the context of GPUs, TPUs, multicore and HPC systems with specific focus on parallel programming models. Discussing of high-performance computing, GPGPU, scaling deep neural network training and machine learning algorithms, high-performance deep learning, intersection of HPC and AI for HPC, distributed parallel training, engineering parallel software and parallel design patterns.

COMS 5310: Theory of Computation

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3310

A systematic study of the fundamental models and analytical methods of theoretical computer science. Computability, the Church-Turing thesis, decidable and undecidable problems. Computational resources such as time, space, and nonuniformity. Complexity classes, computational intractability and completeness. Selected topics from randomness, algorithmic information theory, and logic.

COMS 5330: Molecular Programming of Nanoscale Devices and Processes

Credits: 3. Contact Hours: Lecture 3.

Programming, modeling, and analysis of natural and engineered systems at the nanoscale. Topics include chemical reaction networks, strand displacement systems, models of self-assembly, biomolecular origami, and molecular robotics. Emphasis on mathematical methods of describing, simulating, programming, and assessing the computational power of such systems. Graduate credit requires a written or oral report on current research.

COMS 5340: Quantum Information and Complexity

Credits: 3. Contact Hours: Lecture 3.

Prereq: (COMS 3310 or PHYS 4220 or PHYS 5220); (MATH 2070 or MATH 3170)

An exploration of quantum information and computation from a theoretical computer science perspective. Topics include quantum circuits, axioms of quantum mechanics, quantum entanglement, quantum teleportation, nonlocal games, quantum entropies, quantum information theory, quantum computational complexity, interactive proof systems, and quantum supremacy.

COMS 5350: Algorithms for Large Data Sets: Theory and Practice

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3110 or equivalent; graduate standing or permission of instructor

Algorithmic challenges involved in solving computational problems on massive data sets. Probabilistic data structures, Curse of Dimensionality and dimensionality reduction, locality sensitive hashing, similarity measures, matrix decompositions. Optimization problems in massive data analysis. Computational problems that arise in the context of web search, social network analysis, online advertising etc. Practical aspects include implementation and performance evaluation of the algorithms on real world data sets. Graduate credit requires a written report on current research.

COMS 5400: Principles and Practice of Compiling

Credits: 3. Contact Hours: Lecture 3, Laboratory 1.

Theory of compiling and implementation issues of programming languages. Programming projects leading to the construction of a compiler. Projects with different difficulty levels will be given for 4400 and 5400. Topics include: lexical, syntactic and semantic analyses, syntax-directed translation, code generation, runtime environment and library support.

COMS 5410: Programming Languages

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3420 or COMS 4400 or Graduate Classification

Survey of the goals and problems of language design. Formal and informal studies of a wide variety of programming language features including type systems. Creative use of functional and declarative programming paradigms.

COMS 5440: Fundamentals of Bioinformatics

(Cross-listed with BCB 5440/ GDCB 5440/ CPRE 5440).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

A practical, hands-on overview of how to apply bioinformatics to biological research. Recommended for biologists desiring to gain computational molecular biology skills. Topics include: sequence analysis, genomics, proteomics, phylogenetic analyses, ontology enrichment, systems biology, data visualization and emergent technologies. Offered odd-numbered years. (Typically Offered: Fall)

COMS 5510: Genomic Data Science

Credits: 3. Contact Hours: Lecture 3.

Introduction to a big data research area in bioinformatics. Focus on applying computational techniques to huge genomic sequence data. These techniques include finding optimal sequence alignments, generating genome assemblies, finding genes in genomic sequences, mapping short sequences onto a genome assembly, finding single-nucleotide and structural variations, building phylogenetic trees from genome sequences, and performing genome-wide association studies.

COMS 5520: Principles of Operating Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: Graduate classification or Permission of Instructor

A comparative study of high-level language facilities for process synchronization and communication. Analysis of deadlock, concurrency control and recovery. Protection issues including capability-based systems, access and flow control, encryption, and authentication. Additional topics chosen from distributed operating systems, soft real-time operating systems, and advanced security issues. Programming and research projects.

COMS 5530X: Privacy Preserving Algorithms and Data Security

(Dual-listed with COMS 4530).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3110; (STAT 3050 or STAT 3300 or STAT 3410 or STAT 3470)

Latest online threats on identity theft, fundamentals of privacy preserving algorithms, techniques, and mechanisms to minimize disclosure of sensitive information while maintaining availability. Theory and fundamentals underpinning measures to evaluate the privacy and availability of data; implementation and deployment of privacy-preserving data operations including pre- and post-randomization techniques, homomorphisms, and secure function evaluation protocols. (Typically Offered: Spring)

COMS 5540: Distributed Systems

(Cross-listed with CPRE 5540).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3110 and (COMS 3520 or CPRE 3080) or Graduate Classification

Theoretical and practical issues of design and implementation of distributed systems. The client server paradigm, inter-process communications, synchronization and concurrency control, naming, consistency and replication, fault tolerance, and distributed file systems. Graduate credit requires additional in-depth study of concepts. Programming projects and written reports.

COMS 5550: Simulation: Algorithms and Implementation

Credits: 3. Contact Hours: Lecture 3.

Introduction to discrete-event simulation with a focus on computer science applications, including performance evaluation of networks and distributed systems. Overview of algorithms and data structures necessary to implement simulation software. Discrete and continuous stochastic models, random number generation, elementary statistics, simulation of queuing and inventory systems, Monte Carlo simulation, point and interval parameter estimation. Graduate credit requires additional in-depth study of concepts.

COMS 5570: Computer Graphics and Geometric Modeling

(Cross-listed with ME 5570/ CPRE 5570).

Credits: 3. Contact Hours: Lecture 3.

Fundamentals of computer graphics technology. Data structures. Parametric curve and surface modeling. Solid model representations. Applications in engineering design, analysis, and manufacturing. Offered odd-numbered years. (Typically Offered: Fall)

COMS 5590: Security and Privacy in Cloud Computing

(Dual-listed with COMS 4590X/ CPRE 4590X). (Cross-listed with CPRE 5590).

Credits: 3. Contact Hours: Lecture 3.

Introduction to cloud computing concepts and systems. Security and privacy threats in cloud computing. Practical techniques for cloud computing security. Theoretical and practical solutions for secure outsourcing of data and computation. Oral presentations and research projects.

COMS 5600: Data-Driven Security and Privacy

(Cross-listed with CPRE 5600/ CYBSC 5600).

Credits: 3. Contact Hours: Lecture 3.

Examination of applications of machine learning and big data techniques to various security and privacy problems, as well as secure and privacy-preserving machine learning algorithms. Offered irregularly. (Typically Offered: Spring)

COMS 5610: Database Design, Management, and Research

Credits: 3. Contact Hours: Lecture 3.

Prereq: Instructor Permission for Course

Database design including entity-relationship model, relational data model, and non-relational data models, data dependency, and normalization. Database management including physical storage, access methods, query processing, and transaction management. Database systems of special purposes such as spatial databases, mobile object databases, and multimedia databases. Introduction to current database research such as cloud data management and Internet information retrieval. Significant work on reading and presentation of research publications.

COMS 5630X: Healthcare Data Privacy, Security and Confidentiality: Principles and Algorithms

(Dual-listed with COMS 4630X).

Credits: 3. Contact Hours: Lecture 3.

Introduction to types of healthcare data, complexities of privacy, confidentiality and security within healthcare. Key laws and regulations specific to healthcare such as HIPAA and the European Data Protection Directive 95/46/EC. Types of data sources and data elements utilized in healthcare. Algorithms for privacy, security and confidentiality of electronic health records. Role-based access control in healthcare.

COMS 5640X: AI for Healthcare

(Dual-listed with COMS 4640X).

Credits: 3. Contact Hours: Lecture 3.

Introduction to use of AI techniques in healthcare. Topics may include: AI techniques for medical diagnosis, prognosis and treatment, AI techniques for diagnosis of lung and brain disorders from 2D medical imaging data, classification models of 2D medical images, AI techniques for 3D medical imaging data, use of multi-modal imaging data in disease detection and diagnosis. Programming projects.

COMS 5670: Bioinformatics Algorithms

(Cross-listed with BCB 5670/ CPRE 5670).

Credits: 3. Contact Hours: Lecture 3.

Biology as an information science. A review of the algorithmic principles that are driving the advances in bioinformatics and computational biology.

COMS 5680: Statistical Bioinformatics

(Cross-listed with BCB 5680/ GDCB 5680/ STAT 5680).

Credits: 3. Contact Hours: Lecture 3.

Statistical models for sequence data, including applications in genome annotation, motif discovery, variant discovery, molecular phylogeny, gene expression analysis, and metagenomics. Statistical topics include model building, inference, hypothesis testing, and simple experimental design, including for big data/complex models. (Typically Offered: Spring)

COMS 5690: Structural Bioinformatics

(Cross-listed with BCB 5690/ BBMB 5690/ CPRE 5690/ GDCB 5690).

Credits: 3. Contact Hours: Lecture 3.

Molecular structures including genes and gene products: protein, DNA and RNA structure. Structure determination methods, structural refinement, structure representation, comparison of structures, visualization, and modeling. Molecular and cellular structure from imaging. Analysis and prediction of protein secondary, tertiary, and higher order structure, disorder, protein-protein and protein-nucleic acid interactions, protein localization and function, bridging between molecular and cellular structures. Molecular evolution. (Typically Offered: Fall)

COMS 5700: Systems Biology

(Cross-listed with BCB 5700/ CPRE 5700/ GDCB 5700/ STAT 5700).

Credits: 3. Contact Hours: Lecture 3.

Algorithmic and statistical approaches in computational functional genomics and systems biology. Analysis of high throughput biological data obtained using system-wide measurements. Topological analysis, module discovery, and comparative analysis of gene and protein networks. Modeling, analysis, and inference of transcriptional regulatory networks, protein-protein interaction networks, and metabolic networks. Dynamic systems and whole-cell models. Ontology-driven, network based, and probabilistic approaches to information integration. (Typically Offered: Spring)

COMS 5710X: Responsible AI: Risk Management in Data Driven Discovery

Credits: 3. Contact Hours: Lecture 3.

Prereq: Instructor Permission for Course

Risk assessment and mitigation mechanisms of various stages of machine learning/data science lifecycles with the emphasis on the early stages: study design, data acquisition, exploratory data analysis, feature engineering, modeling and training, and model evaluation. Case studies of machine learning/data science lifecycles used in application domains along with methods for risk assessment and mitigation. DS 2020 recommended. (Typically Offered: Fall)

COMS 5720: Principles of Artificial Intelligence

Credits: 3. Contact Hours: Lecture 3, Discussion 1.

Prereq: COMS 3110; STAT 3300 or STAT 3050 or STAT 3410 or STAT 3470; ENGL 2500; graduate standing or permission of instructor

Basic principles, techniques, and applications of artificial intelligence. Specification, design, implementation, and applications of intelligent agents. Computational models of intelligent behavior, including problem solving, knowledge representation and reasoning, planning, decision making, learning, perception, and communication. Artificial intelligence programming. Term project and written report for graduate credit.

COMS 5730: Machine Learning

Credits: 3. Contact Hours: Lecture 4.

Prereq: Graduate classification and Permission of Instructor

Basic principles, techniques, and applications of machine learning. Design, analysis, theoretical foundation, implementation, and applications of learning algorithms. Selected machine learning techniques in supervised learning, unsupervised learning, and reinforcement learning, including Bayesian decision theory, computational learning theory, decision trees, linear models, support vector machines, artificial neural networks, instance-based learning, probabilistic graphical models, ensemble learning, clustering algorithms, dimensionality reduction and feature selection. Selected applications in data mining and pattern recognition.

COMS 5740: Introduction to Machine Learning

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3110; STAT 3050 or STAT 3300 or STAT 3410 or STAT 3470; MATH 1650; ENGL 2500; Graduate standing or permission of instructor

Introduction to concepts, tools and techniques of machine learning for applications. Selected machine learning algorithms in practical data mining tasks such as classification, regression, and clustering, e.g., association rules, decision trees, linear models, Bayesian learning, support vector machines, artificial neural networks, instance-based learning, probabilistic graphical models, ensemble learning, and clustering algorithms. Selected applications in data mining and pattern recognition.

COMS 5750: Computational Perception

(Cross-listed with HCI 5750/ CPRE 5750).

Credits: 3. Contact Hours: Lecture 3.

This class covers statistical and algorithmic methods for sensing, recognizing, and interpreting the activities of people by a computer. This semester we will focus on machine perception techniques that facilitate and augment human-computer interaction. The main goal of the class is to introduce computational perception on both theoretical and practical levels. Participation in small groups to design, implement, and evaluate a prototype of a human-computer interaction system that uses one or more of the techniques covered in the lectures. (Typically Offered: Spring)

COMS 5760: Motion Planning for Robotics and Autonomous Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3110 and ENGL 2500 or Graduate Classification

Recent techniques for developing algorithms that automatically generate continuous motions while satisfying geometric constraints. Applications in areas such as robotics and autonomous systems. Discrete planning, kinematics, configuration space, collision detection, sampling-based motion planning, nonholonomic systems and differential constraints. Implementation of software that computes motion plans in Python. Proficiency with programming in Python expected. Written reports.

COMS 5770: Foundations of Robotics and Computer Vision

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 2280 and COMS 2300 or CPRE 3100; MATH 2070 or MATH 3170, or Graduate Classification

Selected topics from applied mathematics, algorithms, geometry, and mechanics that are fundamental to robotics and computer vision, and are also applied in computer graphics, geometric modeling and visualization, to name a few. Homogeneous coordinates and transformations, perspective projection, camera calibration, rotations and quaternions, roots of polynomials and polynomial systems, solution of linear and nonlinear equations, parametric and algebraic curves, curvature, torsion, Frenet formulas, surfaces, fundamental forms, principal curvatures, Gaussian and mean curvatures, geodesics, approximation, Fourier series and fast Fourier transform, nonlinear optimization, Lagrange multipliers, least squares, surface fitting and calculus of variations. Programming components. Scholarly report required for graduate credit.

COMS 5780: Optimization for Machine Learning

Credits: 3. Contact Hours: Lecture 3.

Advances in optimization theory and algorithms with evolving applications for machine learning. Theoretical foundations at the intersection of optimization and machine learning to conduct advanced research in machine learning and related fields. Emphasis on proof techniques for optimization algorithms in machine learning.

COMS 5790: Natural Language Processing

Credits: 3. Contact Hours: Lecture 3.

Introduction to NLP and its connection with other branches of Artificial Intelligence, such as machine learning and knowledge representation. Text analysis including n-gram language models, stemming and lemmatization, part-of-speech (POS) tagging. Topic modeling, summarization, text classification, knowledge extraction, and text reasoning. Applications of deep learning in NLP including question answering, machine reading comprehension, word and sentence embedding. Research project required.

COMS 5810: Computer Systems Architecture

(Cross-listed with CPRE 5810).

Credits: 3. Contact Hours: Lecture 3.

Quantitative principles of computer architecture design, instruction set design, processor architecture: pipelining and superscalar design, instruction level parallelism, memory organization: cache and virtual memory systems, multiprocessor architecture, cache coherency, interconnection networks and message routing, I/O devices and peripherals. (Typically Offered: Fall)

COMS 5830: Reconfigurable Computing Systems

(Cross-listed with CPRE 5830).

Credits: 3. Contact Hours: Lecture 3.

Introduction to reconfigurable computing, FPGA technology and architectures, spatial computing architectures such as systolic and bit serial adaptive network architectures, static and dynamic rearrangeable interconnection architectures, processor architectures incorporating reconfigurability.

COMS 5870: Introduction to Network Programming and Cloud Computing

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3520 or CPRE 3080; graduate standing or permission of instructor

Introduction to network programming: protocols, programming suites, and applications. Introduction to cloud computing: concepts and case study with AWS. Introduction to selected research issues in networking and cloud computing. Graduate credit requires written report and oral presentation.

COMS 5880: Computer Networks

Credits: 3. Contact Hours: Lecture 3.

Fundamental concepts in the design and implementation of computer communication in both wired and wireless networks, their protocols, and applications. Topics include the layered network architecture in the Internet, applications, transport, network, and data link layers and their protocols, Socket API, software-defined networking, and network security. Lectures organized in a top-down approach to cover the layers of network design. (Typically Offered: Fall, Spring)

COMS 5900: Special Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course
Special Topics in Computer Science.

COMS 5920: Graduate Studies in Computer Science

Credits: 1. Contact Hours: Lecture 1.

Prereq: Graduate classification

Introduction to Graduate program, Graduate Program Policies, Computing Resources, Faculty Research Areas, Reading Computer Science Research Articles, LaTeX, Research Writing and Presentation, Attend Research Colloquia. Offered on a satisfactory-fail basis only.

COMS 5930X: Experiential Learning in Responsible AI

Credits: 1. Repeatable.

Experience interacting with industry, government, or nonprofit organizations to learn AI/data science techniques in real-world settings. Explore risks to the trustworthiness of data science lifecycles in practice. (Typically Offered: Fall, Spring)

COMS 5980: Graduate Internship

Credits: Required. Repeatable.

Prereq: Graduate classification

Supervised internship working in professional settings appropriate to the student's degree program. Academic work under faculty supervision.

COMS 5990: Creative Component

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Creative component for nonthesis option of Master of Science degree. (Typically Offered: Fall, Spring)

Courses for graduate students:

COMS 6100: Seminar

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Prereq: Instructor Permission for Course

Seminar in Computer Science. Offered on a satisfactory-fail basis only.

COMS 6110: Advanced Topics in Algorithms

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Advanced algorithm analysis and design techniques. Topics include, but are not limited to, graph algorithms, geometric algorithms, approximation algorithms, fixed-parameter algorithms, randomized algorithms and advanced data structures. Content varies by semester.

COMS 6120: Distributed Algorithms

Credits: 3. Contact Hours: Lecture 3.

The theory of distributed computation. Algorithms, lower bounds and impossibility results. Fundamental problems including consensus, leader election, mutual exclusion and clock synchronization. Synchronous, asynchronous and partially synchronous distributed systems models. Shared memory and message passing systems. Fault-tolerance and randomization. Wait-free object simulations. Distributed shared memory. Special topics vary from year to year.

COMS 6250: Advanced Topics in High Performance Computing

Credits: 3. Contact Hours: Lecture 3.

Parallel solutions of numerical and non-numerical problems, implementation of parallel programs on parallel machines, performance and other computational issues in parallel programming.

COMS 6260: Parallel Algorithms for Scientific Applications

(Cross-listed with CPRE 6260).

Credits: 3. Contact Hours: Lecture 3.

Algorithm design for high-performance computing. Parallel algorithms for multidimensional tree data structures, space-filling curves, random number generation, graph partitioning and load balancing. Applications to grid and particle-based methods and computational biology.

COMS 6310: Advanced Topics in Computational Complexity

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Advanced study in the quantitative theory of computation. Time and space complexity of algorithmic problems. The structure of P, NP, PH, PSPACE, and other complexity classes, especially with respect to resource-bounded reducibilities and complete problems. Complexity relative to auxiliary information, including oracle computation and relativized classes, randomized algorithms, advice machines, Boolean circuits. Kolmogorov complexity and randomness. Novel models of computation emerging in a rapidly changing field.

COMS 6330: Advanced Topics in Computational Randomness

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Advanced study of the role of randomness in computation. Randomized algorithms, derandomization, and probabilistic complexity classes. Kolmogorov complexity, algorithmic information theory, and algorithmic randomness. Applications chosen from cryptography, interactive proof systems, computational learning, lower bound arguments, mathematical logic, and the organization of complex systems. Novel models of computation emerging in a rapidly changing field.

COMS 6340: Theory of Games, Knowledge and Uncertainty

Credits: 3. Contact Hours: Lecture 3.

Fundamentals of Game Theory: individual decision making, strategic and extensive games, mixed strategies, backward induction, Nash and other equilibrium concepts. Discussion of Auctions and Bargaining. Repeated, Bayesian and evolutionary games. Interactive Epistemology: reasoning about knowledge in multiagent environment, properties of knowledge, agreements, and common knowledge. Reasoning about and representing uncertainty, probabilities, and beliefs. Uncertainty in multiagent environments. Aspects and applications of game theory, knowledge, and uncertainty in other areas, especially Artificial Intelligence and Economics, will be discussed.

COMS 6410: Advanced Topics in Programming Language Semantics

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Operational and other mathematical models of programming language semantics. Type systems and their soundness. Applications of semantics on areas such as program correctness, language design or translation.

COMS 6490: Advanced Topics in Computational Biology

(Cross-listed with CPRE 6490).

Credits: 3. Contact Hours: Lecture 3.

Design and analysis of algorithms for applications in computational biology, pairwise and multiple sequence alignments, approximation algorithms, string algorithms including in-depth coverage of suffix trees, semi-numerical string algorithms, algorithms for selected problems in fragment assembly, phylogenetic trees and protein folding. No background in biology is assumed. Also useful as an advanced algorithms course in string processing.

COMS 6520: Advanced Topics in Distributed Systems

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: COMS 5520

Selected topics in the research of distributed systems, including but not limited to blockchain, cloud computing, cyber-physical systems, distributed learning, edge computing, Internet of things, mobile computing, as well as fairness, privacy, reliability and security in the systems.

COMS 6560: Advanced Topics in Verification

Credits: 3. Contact Hours: Lecture 3.

Advanced formal methods to specify and study correctness and timing properties of complex systems and software, with a particular focus on concurrent and distributed behavior. Topics include: Petri nets and related formalisms to describe discrete-state systems; decision diagram algorithms for state-space and reachability graph generation, symbolic model checking, and timing analysis; Markov models for exact and approximate probabilistic verification.

COMS 6570: Advanced Topics in Computer Graphics

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 2 times.

Modern lighting models: Rendering Equation, Spherical Harmonics, Lafortune, Cook-Torrance. Non-polygonal primitives: volumes, points, particles. Textures: filtering, reflections creation. Graphics hardware: pipeline, performance issues, programmability in vertex and fragment path. Per-pixel lighting. Nonphotorealistic rendering. Radiosity; Ray tracing.

COMS 6610: Advanced Topics in Database Systems

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Advanced topics chosen from the following: database design, data models, query systems, query optimization, incomplete information, logic and databases, multimedia databases; temporal, spatial and belief databases, semistructured data, concurrency control, parallel and distributed databases, information retrieval, data warehouses, wrappers, mediators, and data mining.

COMS 6650A: Advanced Topics in Software Engineering: Foundations

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: COMS 5110

Advanced topics on theoretical and technical foundations in Software Engineering. Content varies by semester. Graduation Restriction: Maximum 6 credits of COMS 6650 may apply toward graduation. Offered irregularly. (Typically Offered: Fall, Spring)

COMS 6650B: Advanced Topics in Software Engineering: Empirical

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Advanced topics on empirical studies on human factors and other software engineering topics. Content varies by semester. (Typically Offered: Fall, Spring, Summer)

COMS 6710X: Responsible AI: Advanced Topics in Risk Management in Data Driven Discovery

Credits: 3. Contact Hours: Lecture 3.

Selected topics in risk assessment and mitigation mechanisms on machine learning/data science lifecycles. Case studies of machine learning/data science lifecycles in application domains, along with risk assessment and mitigation methods. Content varies by semester. (Typically Offered: Spring)

COMS 6720: Advanced Topics in Artificial Intelligence

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Selected topics in probabilistic graphical models, causal inference, semantic web, information retrieval, natural language processing, knowledge representation and reasoning, deep learning, embedding, distributed learning, incremental learning, multi-task learning, multi-strategy learning, multi-relational learning, modeling the internet and the web, automated scientific discovery, neural and cognitive modeling. Advanced applications of artificial intelligence in bioinformatics, distributed systems, natural language, multimedia data, decision making, robotics, and more.

COMS 6730: Advanced Topics in Machine Learning

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: COMS 4720 or COMS 5720 or COMS 5730 or COMS 4740 or COMS 5740

Advanced topics in machine learning. Selected topics in computational learning theory, Bayesian and information theoretic models (ML, MAP, MDL, MML), probabilistic graphical models, statistical relational learning, reinforcement learning, and deep learning.

COMS 6760X: Advanced Topics in Autonomous Systems and Robotics

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 5720 or Permission of Instructor

Theoretical and practical issues in the design and analysis of autonomous and robotic systems, including self-driving cars. Topics include object detection, perception, mapping, localization, prediction, planning, decision-making, control, learning, kinematics and dynamics, specification, and model-based design and verification.

COMS 6810: Advanced Topics in Computer Architecture

(Cross-listed with CPRE 6810).

Credits: 3. Contact Hours: Lecture 3.

Current topics in computer architecture design and implementation. Advanced pipelining, cache and memory design techniques. Interaction of algorithms with architecture models and implementations. Tradeoffs in architecture models and implementations. Offered odd-numbered years. (Typically Offered: Spring)

COMS 6880AX: Advanced Topics in Computer Networks: Foundations

Credits: 3. Contact Hours: Lecture 3.

Theoretical aspects of computer networks. Topics include cross-layer congestion control, routing, and scheduling optimization for wireless networks, distributed network optimization algorithms, and networking for big data. (Typically Offered: Fall, Spring)

COMS 6880BX: Advanced Topics in Computer Networks: Systems

Credits: 3. Contact Hours: Lecture 3.

Topics can include Internet architecture, inter-domain routing, Internet topology, passive and active Internet measurements, and Internet data analysis. (Typically Offered: Fall, Spring)

COMS 6880CX: Advanced Topics in Computer Networks: Security/Privacy

Credits: 3. Contact Hours: Lecture 3.

Advanced topics in network security and privacy. Topics can include security and privacy issues in cloud data center networks, wireless networks, vehicular networks, sustainable sensor networks, and the Internet of Things (IoT) systems, dark web, The Onion Router (TOR), cybersecurity, criminal hackers, and virtual currency. (Typically Offered: Fall, Spring)

COMS 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Research. Offered on a satisfactory-fail basis only.

Construction Engineering (CONE)

Courses primarily for undergraduates:

CONE 1100: Leadership and Professionalism in Construction and Design

Credits: Required. Contact Hours: Lecture 1.

Orientation to the design and construction industry. Emphasis on teambuilding and professionalism, including teamwork, communication, career opportunities, leadership, and interacting with engineers in other disciplines. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

CONE 1210: Cornerstone Learning Community: Orientation to Academic Life

Credits: 1. Contact Hours: Laboratory 2.

Integration of first-year and transfer students into the engineering profession and the Construction Engineering program. Assignments and activities completed both individually and in learning teams involving teamwork, academic preparation, and study skills. Introduction to construction industry professionals. Teamwork topics include interdisciplinary teamwork, skills for academic success, diversity issues and leadership. Introduction to organization of program, department, college, and university. Overview of faculty, staff, policies, procedures and resources. (Typically Offered: Fall)

CONE 1220: Cornerstone Learning Community: Orientation to Professional Life

Credits: 1. Contact Hours: Laboratory 2.

Continuation of CONE 1210. Integration of first year and transfer students into the engineering profession. Career preparation, professional ethics, construction research, leadership. Introduction to construction industry professionals including how they interact with engineers in other disciplines. Continued introduction to program, department, college, and university organization. Overview of faculty, staff, policies, procedures and resources. (Typically Offered: Spring)

CONE 2220: Contractor Organization and Management of Construction

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Credit or concurrent enrollment in (CHEM 1670 or CHEM 1770); (ABE 1600 or AERE 1600 or BME 1600 or CE 1600 or CHE 1600 or CPRE 1850 or EE 1850 or ENGR 1600 or IE 1480 or ME 1600 or SE 1850); ENGL 1500; ENGR 1010; LIB 1600; MATH 1650 or MATH 1650H; MATH 1660 or MATH 1660H; PHYS 2310 or PHYS 2310H; PHYS 2310L

Entry level course for construction engineering: integration of significant engineering and management issues related to construction company operations. Company organization and operations; construction and project administration; construction contracts; project delivery systems; quality management; construction safety; contract and project documents. (Typically Offered: Fall, Spring)

CONE 2410: Construction Materials and Methods

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: engineering Basic courses

Introduction to materials and methods of building construction and to construction drawings. Foundation, structural framing, floor, roof, and wall systems. Blueprint reading and quantity takeoff techniques. (Typically Offered: Fall, Spring)

CONE 2510: Mechanical/Electrical Materials and Methods

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment in CONE 2410

Introduction to the materials and methods for mechanical and electrical construction systems and drawings. HVAC, water and waste water, power distribution, lighting, and fire protection. Blueprint reading and quantity takeoff. (Typically Offered: Fall, Spring)

CONE 3220: Construction Equipment and Heavy Construction Methods

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: CONE 2220 and CONE 2410 or CE 3060

Selection and acquisition of construction equipment. Application of engineering fundamentals and economics to performance characteristics and production of equipment. Heavy construction methods and economic applications. (Typically Offered: Fall)

CONE 3400: Concrete and Steel Construction

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: EM 3240 and CONE 2220 or CE 3060

Planning and field engineering for concrete and steel construction. Design and applications of concrete formwork to construction. Erection of structural steel. Emerging industry themes. (Typically Offered: Fall, Spring)

CONE 3520: Mechanical Systems in Buildings

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: (CONE 2220; CONE 2510; PHYS 2320; PHYS 2320L) or Permission of Department

Comprehensive coverage of mechanical systems, plumbing, fire protection. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project. (Typically Offered: Fall, Spring)

CONE 3530: Electrical Systems in Buildings

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ([Credit or concurrent enrollment in CONE 3520]; PHYS 2320 or PHYS 2320H; PHYS 2320L) or Permission of Department

Comprehensive coverage of building electrical systems including power, lighting, fire alarm, security and communications. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project. (Typically Offered: Fall, Spring)

CONE 3540: Building Energy Performance

Credits: 3. Contact Hours: Lecture 3.

Prereq: CONE 3520 or Permission of Department

Energy performance of buildings, building shells, HVAC, electrical and other building systems. Analysis and evaluation of building performance, energy efficiency, environmental quality, first costs, and operating costs. Strategies to exceed energy code requirements through the ASHRAE Standard 90.1. (Typically Offered: Fall)

CONE 3800: Engineering Law

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Introduction to law and judicial procedure as they relate to the practicing engineer. Contracts, professional liability, professional ethics, licensing, bidding procedures, intellectual property, products liability, risk analysis. Emphasis on development of critical thinking process, abstract problem analysis and evaluation. (Typically Offered: Fall)

CONE 3810A: Bidding Construction Projects I: Heavy and Highway

Credits: 1. Contact Hours: Lecture 1.

Prereq: Instructor Permission for Course

Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids. (Typically Offered: Fall)

CONE 4220: Construction Cost Estimating and Cost Engineering

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: CONE 2410 and CONE 2510

Conceptual and detailed cost estimating. Theory and practice of estimating construction costs of materials, labor, equipment, contingency, overhead and markup. Estimating competencies and bid ethics. Electronic quantity take off and pricing methods. Assemblies costs, unit costs, production rates. Analysis of project profitability, cost analysis and cost control methods. Value engineering. Life cycle cost analysis. (Typically Offered: Fall, Spring)

CONE 4410: Construction Planning, Scheduling, and Control

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Credit or enrollment in CONE 4220

Integration of previous construction coursework into the planning, scheduling, and management of time, costs, and other resources. Emphasis on preparation and analysis of network schedules. Comprehensive planning and scheduling project. Computer project management applications. (Typically Offered: Fall, Spring)

CONE 4810A: Bidding Construction Projects II: Heavy and Highway

Credits: 1. Contact Hours: Laboratory 2.

Prereq: Instructor Permission for Course

Similar to CONE 3810, except students with previous experience attempt projects with larger scope or lead students with less experience. (Typically Offered: Fall)

CONE 4870: Construction Engineering Design I

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: CONE 3400; CONE 3520; CONE 3530; CONE 4220; CONE 4410; Senior classification

The integrated delivery of project services as a team, including preliminary engineering design process, constructability review, interaction with the client, identification of engineering problems, developments of a proposal, identification of design criteria, cost estimating, planning and scheduling, application of codes and standards, development of feasible alternatives, selection of best alternative, and delivery of oral presentations. (Typically Offered: Fall, Spring)

CONE 4880: Construction Engineering Design II

Credits: 3. Contact Hours: Lecture 1, Laboratory 5.

Prereq: CONE 3400; CONE 3520; CONE 3530; CONE 4220; CONE 4410; within two semesters of graduation

Application of team design concepts to a construction engineering project. Project planning. Advanced construction and project management. (Typically Offered: Fall, Spring)

CONE 4900: Independent Study

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Individual study in any phase of construction engineering. Pre-enrollment contract required. (Typically Offered: Fall, Spring, Summer)

Criminal Justice (CJ)

Courses primarily for undergraduates:

CJ 1200: The Criminal Justice League Learning Community Seminar

Credits: 1. Contact Hours: Lecture 1.

Orientation to academic program requirements, career awareness, strategies for successful transition to college. Topics include: University and LAS College requirements and procedures; occupational tracks and career options open to criminal justice; and introduction to career planning. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

CJ 1210: The Criminal Justice League Learning Community Seminar II

Credits: 1. Contact Hours: Lecture 1.

Foundations for student success in the criminal justice major. Students will examine current issues in crime and criminal justice and build career awareness and planning skills through guest speakers and field trips. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

CJ 2200: Introduction to Forensic Science

(Cross-listed with ENT 2200).

Credits: 3. Contact Hours: Lecture 3.

Study of fundamental forensic science techniques and procedures covering types of physical, chemical, and biological evidence and how this information is used in the legal system. Assessment of crime scenes and various forensic specialties will be introduced. (Typically Offered: Spring)

CJ 2400: Introduction to the U.S. Criminal Justice System

Credits: 3. Contact Hours: Lecture 3.

Provides systematic overview of law, police organization and behavior, prosecution and defense, sentencing, the judiciary, community corrections, penology, and capital punishment. The course demonstrates the role of discretion in all of these agencies as well as the sociological influences of age, race, gender, and social class on criminal justice system processes. (Typically Offered: Fall)

CJ 2410: Youth and Crime

(Cross-listed with SOC 2410).

Credits: 3. Contact Hours: Lecture 3.

An examination of delinquency that focuses on the relationship between youth as victims and as offenders, social and etiological features of delinquency, the role of the criminal justice system, delinquents' rights, and traditional and alternative ways of dealing with juvenile crime. (Typically Offered: Fall)

CJ 2420: Criminology

Credits: 3. Contact Hours: Lecture 3.

Prereq: CJ 2400

The nature of crime and criminology; the concept of crime; statistics and theories of criminality; major forms of crime; official responses to crime and control of crime. (Typically Offered: Fall)

CJ 3150X: Crime Victims and Victimization

Credits: 3. Contact Hours: Lecture 3.

Examination of the characteristics of victims of crime, victim-offender relationships, the interactions between victims and the criminal justice system, as well as the physical, emotional, and financial harm individuals suffer at the hands of offenders. In exploring these dynamics and connections, this course will address the theory, history, research, legislation, and policy implications related to victimization.

CJ 3200: American Judicial Process

(Cross-listed with POLS 3200).

Credits: 3. Contact Hours: Lecture 3.

An overview of the American judicial process. Emphasis on specific topics such as application of constitutional rights to the states (particularly the Fourth, Fifth, Sixth, and Fourteenth Amendments), mechanics of judicial opinions, constitutional philosophies of Supreme Court Justices, decisions of first impression, and the value and scope of precedent. (Typically Offered: Spring)

CJ 3250: Religion, Law, and Justice

(Cross-listed with RELIG 3250/ POLS 3250).

Credits: 3. Contact Hours: Lecture 3.

A study of the role of religion in law and justice with a focus on the United States. Examines the history of religious freedom, key contemporary legal cases, and how religious-oriented justice movements engage ethics and the law. (Typically Offered: Fall)

CJ 3320: Philosophy of Law

(Cross-listed with PHIL 3320).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits in PHIL or Permission of Instructor

Extent of our obligation to obey the law; what constitutes just punishment; how much of the immoral should be made illegal? Relation of these questions to major theories of law and the state. Discussion of such concepts as coercion, equality, and responsibility. (Typically Offered: Fall, Spring)

CJ 3330X: Latinos/as/x in the Criminal Justice Complex

(Cross-listed with USLS 3330X).

Credits: 3. Contact Hours: Lecture 3.

Intersections of ethnicity, culture, assimilation, immigration/migration, crime, and the criminal justice system in the United States. Topics include: criminality among Latinos/as and the challenges they face within the CJ complex (cops, courts, corrections, as well as immigration and border control) situated within mass incarceration; the use of criminalization as a form of social control; and Latino/as' human and civil rights and the role that race, ethnicity, gender, class, and immigration status play in the criminal justice system and border control enforcement. Meets U.S. Diversity Requirement. (Typically Offered: Fall)

CJ 3350: Race, Ethnicity, and the US Criminal Justice System

(Cross-listed with AFAM 3350).

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Prereq: AFAM 2010 or CJ 2400

Empirical and theoretical readings on the intersection of race, ethnicity, crime, and the criminal justice system in contemporary society. Topics include, but are not limited to racial and ethnic relations in society, media, violence, policing, and disparity and discrimination in crime and punishment. Criminological theories of racial and ethnic antagonism. Meets U.S. Diversity Requirement.

CJ 3390: Liberty and Law in America

(Cross-listed with POLS 3390/ PHIL 3390).

Credits: 3. Contact Hours: Lecture 3.

Competing conceptions of liberty in American political thought. Debates about how liberty should be protected by the law, in fields such as health care, drugs, property, speech, religion, and sex. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

CJ 3400: Deviant and Criminal Behavior

(Cross-listed with SOC 3400).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CJ 2400 or SOC 1340

Theory and research on the etiology of types of social deviance; issues relating to crime, antisocial behavior and social policies designed to control deviant behavior. (Typically Offered: Spring, Summer)

CJ 3510: Police and Society

Credits: 3. Contact Hours: Lecture 3.

Introduction and overview of law enforcement in the United States. Theory and research on police history, function, and organization; constitutional issues of policing; and critical topics, such as community policing, officer discretion and decision-making, corruption, use of force, and racial profiling. The course illustrates the interconnections between communities, police organizations, citizens, and criminal offenders. (Typically Offered: Fall, Spring)

CJ 3520: Punishment, Corrections, and Society

Credits: 3. Contact Hours: Lecture 3.

Introduction and overview of corrections in the United States. Theory and research on probation, parole, intermediate sanctions, prison, inmate society, inmate behavior and misconduct, capital punishment, recidivism, correctional treatment, rehabilitation, and offender reintegration into society. (Typically Offered: Fall, Spring)

CJ 3540: Prevention of Crime and Delinquency

Credits: 3. Contact Hours: Lecture 3.

Prereq: CJ 2400

Introduction to various efforts to prevent crime and juvenile delinquency, as well as the reduction of specific risk factors for both. Theories that provide the baseline for various approaches to prevention, as well as the development, operation and effectiveness of prevention efforts centered in various social institutions such as the family, schools, neighborhoods/communities, religion and the media. Examine programs originating from within the traditional criminal justice institutions of the police, courts, and correctional systems. (Typically Offered: Spring)

CJ 3600: Latinas and Victimization

(Cross-listed with USLS 3600).

Credits: 3. Contact Hours: Lecture 3.

Intersections of race/ethnicity, class, gender, culture, acculturation, and immigration/migration in the victimization experiences of Latina women interacting with criminal justice systems and services. Topics include: domestic/intimate partner violence, sexual assault, human trafficking among Hispanic, Latina, and Chicana women, and the impact of language barriers, abuser threats of deportation, social and institutional discrimination and racism, cultural norms, and cultural insensitivity among first responders and service providers on help-seeking, well-being, and interactions with the criminal justice system. Meets U.S. Diversity Requirement.

CJ 4020: White-Collar Crime

Credits: 3. Contact Hours: Lecture 3.

Introduction and overview of white-collar crime as a form of deviance. Theory and research on occupational, corporate, and organizational offending; prevalence, costs, and consequences of white-collar crime; predictors and correlates of white-collar crime; and political, business, and public policy responses to white-collar crime. (Typically Offered: Spring)

CJ 4030: Criminal Offenders

Credits: 3. Contact Hours: Lecture 3.

Introduction and overview of criminal offenders. Theory and research on epidemiology, offender typologies, etiology of violence, recidivism, societal costs, correctional supervision, treatment, and prevention of serious antisocial behavior. (Typically Offered: Fall, Spring)

CJ 4040: Criminal Justice Policies

Credits: 3. Contact Hours: Lecture 3.

Prereq: CJ 2400

Development, implementation and evaluation of criminal justice policies affecting major areas of the criminal justice system. History, development and operation of the criminal justice system, including policing, courts/sentencing, corrections, crime prevention, and offender rehabilitation. (Typically Offered: Spring)

CJ 4050: Drugs and Crime

Credits: 3. Contact Hours: Lecture 3.

Prereq: CJ 2400

Analysis of the drug problem, including issues arising from the use and abuse of legal and illegal drugs and their relation to crime and the criminal justice system. Examination of issues related to effective prevention and treatment, crime, and the debates over the most effective policies for the control or prevention of drug abuse. Offered irregularly. (Typically Offered: Fall, Spring)

CJ 4060: Gender and Crime

Credits: 3. Contact Hours: Lecture 3.

Prereq: CJ 2400

Overview of the relationship between gender and crime. Examination of gender and gender roles definitions; how gender impacts criminal behavior in terms of offending, victimization, criminal justice processing, and working in the criminal justice system; and theories used to understand the gender gap in offending.

CJ 4100: Capital Punishment

Credits: 3. Contact Hours: Lecture 3.

Prereq: CJ 2400

History, philosophy, demographics, administration, and punishment rationales of capital punishment in the United States from its founding to the present. Methods of execution and trends in public opinion about the death penalty. Examination of correlates of capital offending and criminological characteristics of persons who are sentenced to death.

CJ 4510: Contemporary Issues in Policing

Credits: 3. Contact Hours: Lecture 3.

Introduction to contemporary issues in policing in the United States. Topics include: the media/law enforcement relationship, cultural competence for police, use of technology, and career foundations for hiring and advancement. Scenario-based learning in individual and group settings will help students to grasp the challenges next generation leaders will face in policing. (Typically Offered: Fall)

CJ 4600: Criminal and Juvenile Justice Internship

(Cross-listed with SOC 4600).

Credits: 3-9. Repeatable, maximum of 9 credits.

Study of the criminal and juvenile justice systems and social control processes. Supervised placement in a police department, prosecutor's office, court, probation and parole department, penitentiary, juvenile correctional institution, community-based rehabilitation program, or related agency. Assessed service-learning component. Graduation Restriction: No more than a total of 9 credits of 4600 can be counted toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

CJ 4700: Ethical Issues in Criminal Justice

Credits: 3. Contact Hours: Lecture 3.

Ethical issues and considerations in policing, the practice of law, sentencing, corrections, criminal justice research, and crime control policy. Decision-making by criminal justice professionals in an environment of competing interest. Policy and legal issues confronting the American criminal justice system from an ethical perspective. Emphasis on moral and ethical issues in the criminal justice process. (Typically Offered: Spring)

CJ 4840: Topical Studies in Criminal and Juvenile Justice

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Thematic or topical issues and studies dealing with the sociology of police, judiciary, institutional and community-based corrections, gender/ethnicity and crime/delinquency, criminal and delinquent gangs, and crime and delinquency prevention.

Courses primarily for graduate students, open to qualified undergraduates:

CJ 5040X: Criminal Justice Policies

Credits: 3. Contact Hours: Lecture 3.

Development, implementation and evaluation of criminal justice policies affecting major areas of the criminal justice system. History, development and operation of the criminal justice system, including policing, courts/sentencing, corrections, crime prevention, and offender rehabilitation. (Typically Offered: Fall, Spring)

CJ 5700: Ethical Issues in Criminal Justice

Credits: 3. Contact Hours: Lecture 3.

Ethical issues and considerations in policing, the practice of law, sentencing, corrections, criminal justice research, and crime control policy. Decision-making by criminal justice professionals in an environment of competing interest. Policy and legal issues confronting the American criminal justice system from an ethical perspective. Emphasis on moral and ethical issues in the criminal justice process. (Typically Offered: Spring, Summer)

CJ 5840: Current Issues in Crime and Justice

(Cross-listed with SOC 5840).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 credits.

Discussion of current research and theory in crime and delinquency; topics include the purpose and role of law in social life; emerging theoretical directions in criminology; recent work on specific forms of criminality; controversies in the criminal justice system. Offered odd-numbered years. (Typically Offered: Fall)

Cyber Security (CYBSC)

Courses primarily for undergraduates:

CYBSC 1310: Introduction to Computer Security Literacy

(Cross-listed with CPRE 1310).

Credits: 1. Contact Hours: Lecture 1.

Basic concepts of practical computer and Internet security: passwords, firewalls, antivirus software, malware, social networking, surfing the Internet, phishing, and wireless networks. This class is intended for students with little or no background in information technology or security. Basic knowledge of word processing required. Offered on a satisfactory-fail basis only.

CYBSC 3320: Cyber Defense Competition

(Cross-listed with CPRE 3320).

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Participation in cyber defense competition driven by scenario-based network design. Includes computer system setup, risk assessment and implementation of security systems, as well as defense of computer and network systems against trained attackers. Team based. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

CYBSC 4300: Network Protocols and Security

(Cross-listed with CPRE 4300).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CPRE students: (CPRE 3080 OR COMS 2520 OR COMS 3520); EE students: CPRE 2880

Detailed examination of networking standards, protocols, and their implementation. TCP/IP protocol suite, network application protocols. Network security issues, attack and mitigation techniques. Emphasis on laboratory experiments.

Courses primarily for graduate students, open to qualified undergraduates:

CYBSC 5300: Network Protocols and Security

(Cross-listed with CPRE 5300).

Credits: 3. Contact Hours: Lecture 3.

Detailed examination of networking standards, protocols, and their implementation. TCP/IP protocol suite, network application protocols. Network security issues, attack and mitigation techniques. Emphasis on laboratory experiments.

CYBSC 5310: Information System Security

(Cross-listed with CPRE 5310).

Credits: 3. Contact Hours: Lecture 3.

Computer, software, and data security: basic cryptography, security policies, multilevel security models, attack and protection mechanisms, legal and ethical issues.

CYBSC 5320: Information Warfare

(Cross-listed with CPRE 5320).

Credits: 3. Contact Hours: Lecture 3.

Computer system and network security: implementation, configuration, testing of security software and hardware, network monitoring.

Authentication, firewalls, vulnerabilities, exploits, countermeasures. Study and use of attack tools. Ethics in cyber security. Emphasis on laboratory experiments. (Typically Offered: Spring)

CYBSC 5330: Cryptography

(Cross-listed with CPRE 5330/ MATH 5330).

Credits: 3. Contact Hours: Lecture 3.

Basic concepts of secure communication, DES and AES, public-key cryptosystems, elliptic curves, hash algorithms, digital signatures, applications. Relevant material on number theory and finite fields.

(Typically Offered: Spring)

CYBSC 5340: Legal and Ethical Issues in Cyber Security

(Cross-listed with CPRE 5340/ POLS 5340).

Credits: 3. Contact Hours: Lecture 3.

Legal and ethical issues in computer security. State and local codes and regulations. Privacy issues. (Typically Offered: Spring)

CYBSC 5350: Steganography and Digital Image Forensics

(Cross-listed with CPRE 5350/ MATH 5350).

Credits: 3. Contact Hours: Lecture 3.

Basic principles of covert communication, steganalysis, and forensic analysis for digital images. Steganographic security and capacity, matrix embedding, blind attacks, image forensic detection and device identification techniques. Related material on coding theory, statistics, image processing, pattern recognition. (Typically Offered: Spring)

CYBSC 5360: Computer and Network Forensics

(Cross-listed with CPRE 5360).

Credits: 3. Contact Hours: Lecture 3.

Fundamentals of computer and network forensics, forensic duplication and analysis, network surveillance, intrusion detection and response, incident response, anonymity and pseudonymity, privacy-protection techniques, cyber law, computer security policies and guidelines, court testimony and report writing, and case studies. Emphasis on hands-on experiments.

CYBSC 5380: Reverse Engineering and Security Testing

(Cross-listed with CPRE 5380).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Techniques and tools for understanding the behavior of software/hardware systems based on reverse engineering. Flaw hypothesis, black, grey, and white box testing as well as other methods for testing the security of software systems. Discussion of counter-reverse engineering techniques. (Typically Offered: Spring)

CYBSC 5600: Data-Driven Security and Privacy

(Cross-listed with COMS 5600/ CPRE 5600).

Credits: 3. Contact Hours: Lecture 3.

Examination of applications of machine learning and big data techniques to various security and privacy problems, as well as secure and privacy-preserving machine learning algorithms. Offered irregularly. (Typically Offered: Spring)

CYBSC 5920: Seminar in Cyber Security

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Projects or seminar in Cyber Security. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:

CYBSC 6310: Cyber Security Operations Practicum

(Cross-listed with CPRE 6310).

Credits: 3. Contact Hours: Lecture 1.

Repeatable.

Practical experience in cyber operations. Cyber security threat analysis, malware analysis, and intrusion detection management. Cyber security data analysis methods. Pen testing tools and techniques. Weekly threat analysis briefings. Offered on a satisfactory-fail basis only.

CYBSC 6320: Cyber Security Capstone Design

(Cross-listed with CPRE 6320).

Credits: 3. Contact Hours: Lecture 3.

Capstone design course which integrates the security design process. Design of a security policy. Creation of a security plan. Implementation of the security plan. The students will attack each other's secure environments in an effort to defeat the security systems. Students evaluate the security plans and the performance of the plans. Social, political and ethics issues. Student self-evaluation, journaling, final written report.

CYBSC 6340: Current Research Problems in Cyber Security

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Discussion of complex cyber security problems. Students will learn how to apply research techniques, think clearly about these issues, formulate and analyze potential solutions, and communicate their results. Working in small groups under the mentorship of technical clients from government and industry, each student will formulate, carry out, and present original research on complex current cybersecurity problems of interest to the nation. This course will be run in a synchronized distance fashion, coordinating some activities with our partner schools and our technical clients. (Typically Offered: Fall, Spring)

CYBSC 6970: Cyber Security Summer Internship

Credits: Required.

One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

Cyber Security Engineering (CYBE)

Courses primarily for undergraduates:

CYBE 2300: Cyber Security Fundamentals

(Cross-listed with CPRE 2300).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: COMS 2270 or EE 2850 or MIS 2070

Introduction to computer and network infrastructures used to support cyber security. Basic concepts of computer and network configuration used to secure environments. Computer virtualization, network routing and address translation, computer installation and configuration, network monitoring, in a virtual environment. Laboratory experiments and exercises including secure computer and network configuration and management. (Typically Offered: Fall)

CYBE 2310: Cyber Security Concepts and Tools

(Cross-listed with CPRE 2310).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: CPRE 2300 or CYBE 2300

Basic concepts of practical computer and Internet security and the tools used to protect and attack systems and networks. Computer and network security methods including: user authentication, access control, firewalls, intrusion detection, use of vulnerability assessment tools and methods, and penetration testing. Ethics and legal issues in cyber security will also be covered. Laboratory experiments and exercises including evaluating systems for vulnerabilities, understanding potential exploits of the systems, and defenses for the systems. (Typically Offered: Spring)

CYBE 2340: Legal, Professional, and Ethical Issues in Cyber Systems

(Cross-listed with CPRE 2340).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 2270 or EE 2850 or MIS 2070

Emphasizes legal, ethical, and professional issues in cyber systems. Other topics include privacy, government regulation, and compliance as applied to professional practice. Guest lecturer from government and industry, as well as discussions including current legal and ethical issues found in the main stream. (Typically Offered: Spring)

CYBE 3310: Application of Cryptographic Concepts to Cyber Security

(Cross-listed with CPRE 3310).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: CPRE 2310 or CYBE 2310

Basic cryptographic underpinnings used in modern cyber security encryption suites. Encryption benefits to cyber security and its use in protocols. Topics include cryptographically secure hash functions and pseudorandom numbers, key distribution techniques, secure authentication including single sign on. Detection and prevention of security threats such as covert communication, malicious code, and other security threats in protocols are included. In addition to laboratory experiments and exercises, students complete a project focused on cyber security problem and solution. Graduation Restriction: Only one of CPRE/ CYBE 3310 and CPRE 4310 may count towards graduation. (Typically Offered: Fall, Spring)

CYBE 4400: Operating System Security

(Cross-listed with CPRE 4400).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 3520 or CPRE 3080

Focus on fundamentals and advanced topics in operating system (OS) security. Design issues, principles, mechanisms, and good practice for design and implementation of secure computer/OS systems. Threat models, vulnerabilities, attacks compromise security, and advanced OS-level techniques for achieving security. Topics include OS security concepts and principles, seminal security in Multics, vulnerabilities in ordinary systems, secure capability systems, information flow control, mandatory access control, security kernels, memory protection, file system, virtual machine systems, hardware/architecture support (e.g., Intel SGX) for OS security, secure microkernel OSes (e.g., seL4, QNX), modern mobile operating systems (e.g., Android and iOS), and security from end-user perspective. Assignments include labs exploring and implementing the technologies in the context of the Linux, Android, and seL4 systems (some involving kernel programming). (Typically Offered: Spring)

Dance (DANCE)

Courses primarily for undergraduates:

DANCE 1200: Modern Dance I

Credits: 1. Contact Hours: Laboratory 3.

Introduction and practice of basic dance concepts, including preparatory techniques and guided creativity problems. No previous modern dance experience required. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

DANCE 1300: Ballet I

Credits: 1. Contact Hours: Laboratory 3.

Introduction to the basic skills, vocabulary, and tradition of ballet with concentration on control and proper alignment. No previous ballet experience required. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

DANCE 1400: Jazz I

Credits: 1. Contact Hours: Laboratory 3.

Introduction to the modern jazz style with concentration on isolation and syncopation. No previous jazz experience required. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

DANCE 1500: Tap Dance I

Credits: 1. Contact Hours: Laboratory 3.

Instruction and practice in basic tap technique and terminology. No previous tap experience required. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

DANCE 1600: Ballroom Dance I

Credits: 1. Contact Hours: Laboratory 2.

Instruction and practice in foxtrot, waltz, swing, cha cha, rhumba, tango, and selected contemporary dances. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

DANCE 1990: Dance Continuum

Credits: 0.5-2. Contact Hours: Laboratory 30.

Repeatable, maximum of 6 credits.

Advance registration required. Continued instruction and practice in either modern dance, recreational dance, ballet, jazz and/or compositional skills. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

DANCE 2110: Fundamentals and Methods of Social and World Dance

Credits: 1.

Prereq: Physical Education Teacher Education Specialization

Skill enhancement, teaching, progressions with emphasis on world and social dance. Designed for kinesiology and health majors, open to others. (Typically Offered: Spring)

DANCE 2200: Modern Dance Composition

Credits: 2.

Prereq: DANCE 1200 or Permission of Instructor

Theory and practice of the creative skills involved in solo and small group composition. (Typically Offered: Fall)

DANCE 2220: Modern Dance II

Credits: 1. Contact Hours: Laboratory 3.

Prereq: DANCE 1200 or Permission of Instructor

Dance techniques emphasizing strength, balance, endurance, rhythmic activity and extended combinations. (Typically Offered: Fall)

DANCE 2230: Modern Dance III

Credits: 1. Contact Hours: Laboratory 3.

Prereq: DANCE 2220

Continued experience in dance techniques and extended combinations. Emphasis on maturation of skill and artistry. Exposure to a variety of modern dance technical styles. (Typically Offered: Spring)

DANCE 2240: Concert and Theatre Dance

(Cross-listed with THRE 2240).

Credits: 0.5-2. Contact Hours: Laboratory 3.

Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Choreography, rehearsal, and performance in campus dance concerts and/or musical theatre productions. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

DANCE 2320: Ballet II

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Instructor Permission for Course

Technical skills in the classical movement vocabulary. Emphasis on alignment, techniques, sequence development, and performing quality. (Typically Offered: Spring)

DANCE 2330: Ballet III

Credits: 1. Contact Hours: Laboratory 3.

Prereq: DANCE 2320

Concentration on technical proficiency at the intermediate level. Pointe work and partnering opportunities available. (Typically Offered: Fall)

DANCE 2420: Jazz II

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Instructor Permission for Course

Dance concepts within the jazz idiom. Instruction in extended movement sequences and artistic interpretation. (Typically Offered: Spring)

DANCE 2500: Yoga Movement

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Mixed-level Hatha Yoga class that emphasizes Iyengar style yoga. Yoga Movement is designed for developing awareness and personal practice with yoga poses and relaxation techniques. Attention will be paid to postural alignment to safely develop strength, endurance, flexibility, balance, and reduce stress. The practice develops awareness and consciousness in the physical body to help unite body and mind. Class will include introduction to other somatic practices, asanas (poses), breathing practices, meditation, yoga philosophy and deep relaxation. (Typically Offered: Fall, Spring)

DANCE 2700: Dance Appreciation

Credits: 3. Contact Hours: Lecture 3.

Introduction to the many forms and functions of dance in world cultures. Develop abilities to distinguish and analyze various dance styles. No dance experience required. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

DANCE 3200: Sound and Movement

Credits: 3. Contact Hours: Laboratory 2, Lecture 2.

Prereq: DANCE 2200

Intermediate composition based on the relationship of movement to improvised sounds, rhythmic scores, and the musical works of composers from various periods. (Typically Offered: Spring)

DANCE 3600: History and Philosophy of Dance

Credits: 3. Contact Hours: Lecture 3.

Prereq: DANCE 2700

Study of the history of dance from early to modern times with emphasis on the theories and philosophies of contemporary modern dance, dancers, and dance educators. Offered even-numbered years. (Typically Offered: Spring)

DANCE 3700: Advanced Studies in Dance

Credits: 1-3. Repeatable, maximum of 8 credits.

Prereq: 2 credits in dance

Advance registration required. Designed to meet special interests and talents of students to include both group and independent study in various aspects of dance as a performing art including production, choreography, and performance. (Typically Offered: Fall, Spring)

DANCE 3840: Teaching Children's Dance

Credits: 2.

Content, experiences, and methods of a comprehensive dance program at the elementary school level. Theories and practice in guiding elementary school children in expressive movement experiences. (Typically Offered: Spring)

DANCE 3850: Methods of Teaching Dance

Credits: 2.

Methods and techniques of teaching social and world dance forms. Introduction to teaching educational modern dance. (Typically Offered: Fall)

DANCE 3860: Teaching Dance Technique and Composition

Credits: 2.

Prereq: DANCE 3200

Teaching yoga, body therapies, mindfulness and dance composition to enhance the physical and mental performance of the individual.

DANCE 4900A: Independent Study: Dance

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Independent study of problems or areas of interest in dance. (Typically Offered: Fall, Spring)

DANCE 4900H: Independent Study in Dance - Honors

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Independent study of problems or areas of interest in dance for those admitted to the honors program. (Typically Offered: Fall, Spring)

Data Science (DS)

Courses primarily for undergraduates:

DS 1100: Orientation to Data Science

Credits: Required. Contact Hours: Lecture 1.

Introduction to the procedures and policies of Iowa State University and the Data Science program, test-outs, honorary societies, etc. Issues relevant to student adjustment to college life will also be discussed. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

DS 2010: Introduction to Data Science

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Satisfactory math placement test score (ALEKS, 51+)

Data Science concepts and their applications; domain case studies with applications in various fields; overview of data analysis; major components of data analysis pipelines; computing concepts for data science; descriptive data analysis; hands-on data analysis experience; communicating findings to stakeholders, and ethical issues in data science. Placement scores can be found at: <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Typically Offered: Fall (annually), Spring (annually), Summer (irregularly).

DS 2020: Data Acquisition and Exploratory Data Analysis

Credits: 3. Contact Hours: Lecture 3.

Prereq: DS 2010

Data acquisition: file structures, web-scraping, database access; ethical aspects of data acquisition; types of data displays; numerical and visual summaries of data; pipelines for data analysis: filtering, transformation, aggregation, visualization and (simple) modeling; good practices of displaying data; data exploration cycle; graphics as tools of data exploration; strategies and techniques for data visualizations; basics of reproducibility and repeatability; web-based interactive applets for visual presentation of data and results. Programming exercises. (Typically Offered: Fall, Spring)

DS 3010: Applied Data Modeling and Predictive Analysis

Credits: 3. Contact Hours: Lecture 3.

Prereq: DS 2020 and STAT 1010, STAT 1040, STAT 1050, STAT 2010, STAT 2260, STAT 2310, STAT 3050, STAT 3220 or STAT 3300

Elements of predictive analysis such as training and test sets; feature extraction; survey of algorithmic machine learning techniques, e.g. decision trees, Naive Bayes, and random forests; survey of data modeling techniques, e.g. linear model and regression analysis; assessment and diagnostics: overfitting, error rates, residual analysis, model assumptions checking; communicating findings to stakeholders in written, oral, verbal and electronic form, and ethical issues in data science. Participation in a multi-disciplinary team project. (Typically Offered: Fall, Spring)

DS 3030: Concepts and Applications of Machine Learning

Credits: 3. Contact Hours: Lecture 3.

Prereq: DS 2020, MATH 2070, MATH 2650, and STAT 3010

Machine learning concepts such as training and test sets; feature extraction; principles of machine learning techniques; regression; pattern recognition methods; unsupervised learning techniques; assessment and diagnostics: overfitting, error rates, residual analysis, model assumptions checking, feature selection; ethical issues in data science; communicating findings to stakeholders in written, oral, visual and electronic form. (Typically Offered: Fall)

DS 3900: Special Topics in Data Science

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Lecture/seminar on special topics in Data Science. (Typically Offered: Fall, Spring, Summer)

DS 4010: Data Science Capstone

Credits: 3. Contact Hours: Lecture 3.

Prereq: DS 3010 or DS 3030

Students work as individuals and teams to complete the planning, design, and implementation of a significant multi-disciplinary project in data science. Oral and written reports. Offered irregularly. (Typically Offered: Fall, Spring)

DS 4220X: Mathematical Principles of Data Science

(Cross-listed with MATH 4220X).

Credits: 3. Contact Hours: Lecture 3.

Mathematical foundations of algorithms in data science. Topics include Riemann-Stieltjes integration, Riesz-Markov theorem, Stone-Weierstrass theorem, Universal Approximation theorem, reproducing kernel Hilbert spaces, Cauchy and Fourier kernels, convergence of clustering algorithms, and topological persistence. (Typically Offered: Spring)

Design (DES)

Courses primarily for undergraduates:**DES 1500: Introduction to Innovation and Design**

Credits: 3. Contact Hours: Lecture 3.

Introduction to the concept of human-centered design and its crucial role for innovation, including fundamental concepts that explain the creative process. Builds an understanding of the innovation journey, through design tools and techniques for ideation, data collection, and insights forecasting.

DES 2300: Design Thinking

Credits: 3. Contact Hours: Lecture 3.

Introduction to design thinking processes, toolkits, and mindsets, and its interaction with art, design, and technology. Emphasis on interdisciplinary practices.

DES 2400: Design Innovation Studio

Credits: 3. Contact Hours: Studio 6.

First project-based studio focused on creative problem solving, idea generation, and design principles. Analogue and digital fabrication of mock-ups and sketch models. All majors are encouraged to enroll; no previous design studio training required.

DES 2500: Design Intersections

Credits: 3. Contact Hours: Lecture 3.

Cross disciplinary themes and issues relevant to interdisciplinary design, innovation, and entrepreneurship, such as design activism and agency, design for social change, civic innovation, and creative leadership.

DES 3300: Visual Literacy for Design Critique

Credits: 3. Contact Hours: Lecture 3.

Interpret, analyze, and evaluate visual materials, use images and text effectively to communicate ideas, and understand issues surrounding the creation and use of images and visual media for design critique.

Precedent study and critique of sample student design work to understand principles of visual literacy and how to apply them to the presentation of design work. Emphasis on peer-to-peer discussion and in-class participation. Lecture and discussion format. (Typically Offered: Spring)

DES 3400: Design Entrepreneurship Studio

Credits: 3. Contact Hours: Studio 6.

Second project-based studio focused on addressing complex challenges and contemporary societal problems using key entrepreneurship concepts to evaluate design prototypes and minimum viable products. Application of user insights and customer data in design iteration. Expert guest speakers from business and industry to talk about design innovation. Students in all majors encouraged to enroll.

DES 4910: Portfolio and Professional Preparation

Credits: 3.

Discussion of interdisciplinary design practices and career planning. Guidance for interviewing, professional networking, business etiquette, and resume writing. Workshops and lectures.

DES 4950: Design Innovation Launchpad

Credits: 6. Contact Hours: Studio 12.

Prereq: DES 3400

Third project-based studio as applied design lab for a career, enterprise, business, social movement, or campaign. Launching and creating project start-ups in four areas: design research, design management, design leadership, and design entrepreneurship. Advanced practice of design skills, project planning, and new product development.

Design Studies (DSNS)

Courses primarily for undergraduates:

DSNS 1020: Design Studio I

Credits: 4. Contact Hours: Lecture 1, Studio 6.

A foundation design studio exploring two and three-dimensional design. Emphasis on fundamental skills and ideas shared across design disciplines. Creative processes, visual order, materials, and critical thinking are investigated through studio projects. Lectures and discussions cover the topics introduced in studios.

DSNS 1100: Design Exchange Seminar I

Credits: 1. Contact Hours: Studio 2.

Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy. (Typically Offered: Fall)

DSNS 1110: Design Exchange Seminar II

Credits: 1. Contact Hours: Studio 2.

Development and clarification of career and academic plans. (Typically Offered: Spring)

DSNS 1150: Design Collaborative Seminar

Credits: 1. Contact Hours: Lecture 1.

Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy.

DSNS 1310: Drawing I

Credits: 4. Contact Hours: Lecture 1, Studio 6.

An introduction to methods of visual thinking and drawing through studio experiences and lectures. All design fields utilize visual communication and drawing. Focus on the use of drawing as a method for creative problem solving, design development and visual communication. Explore, from observation and imagination, the use of fast sketching and in-depth drawing, using various scales, mediums and processes.

DSNS 1320: Digital Design Literacy

Credits: 1. Contact Hours: Lecture 1.

Prereq: Admission to a College of Design program

Introduction to cross-disciplinary concepts on digital literacy. Covers basic computer fundamentals, addresses file and image handling, illustrates the basic principles of documentation, demonstrates how to effectively present your work, and introduces the basic software necessary for design disciplines. (Typically Offered: Fall, Spring)

DSNS 1450: Diversity in Art

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 3 credits.

Discussion on issues of diversity and inclusion utilizing the Art on Campus and University's Permanent Collection. Topics include ethnic heritage, family background, religious traditions, and interpersonal relationships, with a significant focus on instilling visual analysis skills. (Typically Offered: Spring)

DSNS 1830: Design in Context

Credits: 3. Contact Hours: Discussion 1, Lecture 2.

Explores designed media, objects, places, spaces, structures, and systems as products of varied and often intersecting contexts. Using historical and contemporary case studies, investigates how cultural, economic, environmental, spatial, social, and temporal contexts, among others, affect design. Explores in particular how design addresses complex and multifaceted problems.

DSNS 2320: Digital Design Communications

Credits: 3. Contact Hours: Lecture 3.

Introductory investigations of various digital design media to develop multi-dimensional problem solving, digital communication skills and perceptual sensitivity. Open to all university majors.

DSNS 3010: Study Abroad Preparation Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Cultural introduction to host country, introduction to faculty sponsor and program of study, the particulars of traveling and living abroad, and financial and logistical preparations. Guest lectures. Required of all students planning to participate in a College of Design study abroad program for 9 or more credits. Offered on a satisfactory-fail basis only.

DSNS 3020: Design Leadership Seminar

Credits: 2. Contact Hours: Lecture 1, Studio 2.

Repeatable, maximum of 4 credits.

Prereq: Instructor Permission for Course

For students serving as peer mentors for the Core Design Program, under faculty supervision. Development of teaching and leadership skills within the context of design education experiences. Offered on a satisfactory-fail basis only.

DSNS 3030: Design Ambassadors

Credits: 1-2. Contact Hours: Lecture 1, Studio 2.

Repeatable, maximum of 4 credits.

Prereq: Instructor Permission for Course

Opportunity to strengthen leadership, communication and presentation skills. Introduction to student development theory. Students participate in collaborative projects focused on prospective design students. Offered on a satisfactory-fail basis only.

DSNS 3040: Global Challenges: Intro to UN Sustainable Development Goals

Credits: 3. Contact Hours: Lecture 3.

The United Nations Sustainable Development Goals - also known as the SDGs or the Global Goals - cover a wide range of sustainability issues; highlighting local, national and international priority areas to end poverty and hunger, improve health and education, make cities more sustainable and combat climate change. Students are empowered & challenged to become self-directed as they explore each issue individually and collectively from a personal, academic, and professional perspective. Meets International Perspectives Requirement.

DSNS 3100: Practical Experience

Credits: Required.

Prereq: Instructor Permission for Course

Independent educational enrichment through practical experience. Students must register for this course prior to commencing each term. Available only to students taking course loads of eleven credits or less. Offered on a satisfactory-fail basis only.

DSNS 3320: Multi-Dimensional Digital Design Communication

Credits: 3. Contact Hours: Lecture 3.

Prereq: ARCH 2300 or ARTGR 2750 or DSNS 2320 or ARTIS 2120

Investigations of interoperable digital-design tools, techniques and methods directed at human scale interactive hybrid design from ideation to visualization, synthesis to analysis, and realization to fabrication.

DSNS 3330: Time-Based Digital Media

Credits: 3. Contact Hours: Lecture 3.

Prereq: ARCH 2300 or ARTGR 2750 or DSNS 2320 or ARTIS 2120

Introduction to various time-based digital media tools to develop basic skills including sequencing, storytelling, animation, sound editing, and video production. (Typically Offered: Spring)

DSNS 3400: Design Entrepreneurship

Credits: 3. Contact Hours: Lecture 3.

Focus on the interconnection between entrepreneurial thinking and applied design practices of innovation. Explores several business management tools, models and frameworks, relating it to the development of design projects. Critical areas for successful growth, open innovation, and entrepreneurial mindset. Designer entrepreneurs are more attuned to the social and meaningful values of their creations, than economic growth for an industrial venture. Social impact, inclusive responsibility, future foresight and change mindset are the key motors of their dive into innovation and creative problem-solving. By developing an attitude towards risk-taking, initiative, uncertainty and creative leaps, the course is substantiated by strategy planning and leadership skill sets that allow students to turn their innovative ideas and conceptual solutions into products (or services or experiences), and to distribute them in a viable market and/or a business venture.

DSNS 3450X: Design Justice

Credits: 3. Contact Hours: Discussion 1, Lecture 2.

Repeatable.

Introduction to concepts of equity, inclusion, and social justice in relationship to the fields and practices of design. Students examine how art, design, and planning influence institutions capacity to support, educate, liberate, and or oppress those who engage with them. (Typically Offered: Spring)

DSNS 4450: Public Art/Public Space

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Exploration of the history, precedents, and practice of public art and public space with a focus on developments since 1970 in the United States and abroad. Course includes development of a proposal for a site specific work of art.

DSNS 4460: Interdisciplinary Design Studio

Credits: 4-6. Contact Hours: Studio 12.

Repeatable, maximum of 18 credits.

Prereq: Instructor Permission for Course

Advanced interdisciplinary design projects.

DSNS 4460H: Interdisciplinary Design Studio: Honors

Credits: 5-7. Contact Hours: Studio 12.

Repeatable, maximum of 18 credits.

Prereq: Instructor Permission for Course

Advanced interdisciplinary design projects.

DSNS 4900A: Independent Study: History

Credits: 1-4. Repeatable, maximum of 9 credits.

Prereq: Department Permission for Course

Independent investigation of a topic of special interest to the student.

DSNS 4900B: Independent Study: Technology

Credits: 1-4. Repeatable, maximum of 9 credits.

Prereq: Department Permission for Course

Independent investigation of a topic of special interest to the student.

DSNS 4900C: Independent Study: Communications

Credits: 1-4. Repeatable, maximum of 9 credits.

Prereq: Department Permission for Course

Independent investigation of a topic of special interest to the student.
(Typically Offered: Fall, Spring, Summer)

DSNS 4900D: Independent Study: Design

Credits: 1-4. Repeatable, maximum of 9 credits.

Prereq: Department Permission for Course

Independent investigation of a topic of special interest to the student.
(Typically Offered: Fall, Spring, Summer)

DSNS 4900E: Independent Study: Entrepreneurship

Credits: 1-4. Repeatable, maximum of 9 credits.

Prereq: Department Permission for Course

Independent investigation of a topic of special interest to the student.
(Typically Offered: Fall, Spring, Summer)

DSNS 4900F: Independent Study: Social/Behavioral

Credits: 1-4. Repeatable, maximum of 9 credits.

Prereq: Department Permission for Course

Independent investigation of a topic of special interest to the student.

DSNS 4900G: Independent Study: Outreach

Credits: 1-4. Repeatable, maximum of 9 credits.

Prereq: Department Permission for Course

Independent investigation of a topic of special interest to the student.
(Typically Offered: Fall, Spring, Summer)

DSNS 4900H: Independent Study: Honors

Credits: 1-4. Repeatable, maximum of 9 credits.

Prereq: Department Permission for Course

Independent investigation of a topic of special interest to the student.

DSNS 4900I: Independent Study: Sustainability

Credits: 1-4. Repeatable, maximum of 9 credits.

Prereq: Department Permission for Course

Independent investigation of a topic of special interest to the student.
Offered on a satisfactory-fail basis only.

DSNS 4920: Introduction to Italian Culture

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 3 credits.

Prereq: Instructor Permission for Course

Introduction to Italian contemporary culture for design students, including food, religion, fashion, politics, media, and social mores.

Courses primarily for graduate students, open to qualified undergraduates:

DSNS 5010: Introduction to Research Design

Credits: 3. Contact Hours: Lecture 3.

Introduction to research design and methodology in social science research. Essential knowledge and skills required to frame and conduct research independently. Emphasizes various aspects of research design including: foundations of research; understanding research-related concepts; research ethics; developing research questions; reviewing literature and theory; critiquing and evaluating research studies; exploring data collection and analysis; writing research proposal and presenting findings to a diverse audience. (Typically Offered: Fall)

DSNS 5460: Interdisciplinary Design Studio

Credits: 4-6. Contact Hours: Studio 12.

Repeatable, maximum of 18 credits.

Advanced interdisciplinary design projects.

DSNS 5900: Special Topics

Credits: 1-4. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

Independent investigation of a topic of special interest to the student.
(Typically Offered: Fall, Spring, Summer)

Dietetics (DIET)

Courses primarily for graduate students, open to qualified undergraduates:

DIET 5110: Research Methods

Credits: 3. Contact Hours: Lecture 3.

An overview of diverse research approaches focusing on methods for collecting and analyzing quantitative and qualitative data. (Typically Offered: Fall, Spring)

DIET 5120: Nutritional Epidemiology

Credits: 3. Contact Hours: Lecture 3.

Important issues related to designing, conducting, and interpreting research on the role of diet or physical activity in the development of disease (& health) in human populations. Offered odd-numbered years. (Typically Offered: Spring)

DIET 5260: Obesity Across the Lifespan

Credits: 3. Contact Hours: Lecture 3.

Exploration of the affects that obesity has on public health, the healthcare system, and society in general. Overview of strategies to prevent obesity across the lifespan. (Typically Offered: Fall)

DIET 5300: Nutrition and Wellness

Credits: 3. Contact Hours: Lecture 3.

Addresses wellness promotion through nutrition. Nutritional risk and protective factors will be examined in relation to public health and individual nutrition. (Typically Offered: Spring)

DIET 5310: Nutrition Therapy for Eating Disorders

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

An online study of eating disorders management and nutrition care. Topics include eating disorders medical complications, clinical care guidelines, basic pharmacology, clinical nutrition education, nutrition care planning, psychology of eating disorders, team collaboration, and therapeutic modalities for nutrition counseling. (Typically Offered: Fall)

DIET 5320: Maternal and Child Nutrition

Credits: 3. Contact Hours: Lecture 3.

Critical examination of behavioral, physiological, and public health issues impacting dietary and nutritional factors that support normal growth and development. Content focuses on early stages of the life cycle: gestation, lactation, infancy, preschool, school age, and adolescence. Offered even-numbered years. (Typically Offered: Summer)

DIET 5340: Nutrition Education in the Community

Credits: 3. Contact Hours: Lecture 3.

Principles and practices of teaching individuals and groups to translate nutrition knowledge into action. Emphasis on research in and evaluation of nutrition education. (Typically Offered: Spring)

DIET 5380: Nutrition: A Focus on Life Stages

Credits: 3. Contact Hours: Lecture 3.

Explores influence of normal physiological stresses on nutritional needs throughout the life span. Evaluates dietary intake and identification of appropriate community nutrition services in on-line discussions. Specific considerations, such as the influence of age and cultural heritage, are incorporated.

DIET 5400: Nutrition and Physical Activity in Aging

(Cross-listed with GERON 5400).

Credits: 3. Contact Hours: Lecture 3.

WWW only. Basic physiologic changes during aging and their impacts in health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed. (Typically Offered: Fall)

DIET 5410: Food Culture

Credits: 3. Contact Hours: Lecture 3.

Survey of topics that affect how we perceive food in the modern world. Food is examined as a badge of cultural identity, focus of media scrutiny and promotion, symbol of religion, and driver of technology. Offered even-numbered years. (Typically Offered: Spring)

DIET 5440: Pediatric Clinical Nutrition

Credits: 3. Contact Hours: Lecture 3.

Pediatric Clinical Nutrition. (Typically Offered: Fall)

DIET 5460: Phytochemicals

Credits: 3. Contact Hours: Lecture 3.

Overview of phytochemicals (non-nutritive biologically active compounds) from fruits, vegetables, cereals and oilseeds. Covers recent findings of chemistry, physiological functions, and potential health implications of phytochemicals. Offered odd-numbered years. (Typically Offered: Fall)

DIET 5470: Functional Foods in Chronic Disease Prevention

Credits: 3. Contact Hours: Lecture 3.

Examination of nutritional science, food science, regulatory principles, and nutrient metabolism to understand and explain functional foods, nutraceuticals, and dietary supplements. Additionally students will evaluate the biochemical basis, technologies, legal requirements, and clinical assessment in the marketplace. Offered odd-numbered years. (Typically Offered: Fall)

DIET 5480: Nutrition and Physical Activity Assessment

Credits: 3. Contact Hours: Lecture 3.

Introduction to a variety of nutrition and physical activity assessment tools. Opportunity to discuss the strengths and weaknesses of different tools and gain experience collecting, analyzing, and interpreting nutrition and physical activity data. Offered odd-numbered years. (Typically Offered: Spring)

DIET 5510: Advanced Nutrition: Nutrigenomics, Nutrigenetics & Advanced Lipid Metabolism in Human Nutrition

Credits: 3. Contact Hours: Lecture 3.

Exploration and integration of topics and ideas that are at the forefront of the field of nutritional science. Examination of topics that are new and/or controversial and have implications that range from the cellular/molecular/biochemical level up to clinical/educational level. Emphasis on the integrative and complex nature of human nutrition research from basic science to clinical studies to population studies and dietary recommendations. (Typically Offered: Spring)

DIET 5540: Statistics

Credits: 3. Contact Hours: Lecture 3.

Tools used to make statistical decisions. Major emphasis on explanation and understanding of important concepts involved; basic theme is understanding of data and methods used to analyze such data. Offered irregularly. (Typically Offered: Fall, Spring, Summer)

DIET 5550: Public Health Nutrition

Credits: 3. Contact Hours: Lecture 3.

Examines U.S. public health and nutrition concerns in diverse U.S. populations, examines nutritional status in communities, looks at health communication, and considers nutrition policies and community-based nutrition interventions. Students explore roles of dietitians, nutritionists, and others in developing and delivering nutrition policies and interventions in U.S. communities. (Typically Offered: Fall, Spring)

DIET 5560: Micronutrients in Human Nutrition

Credits: 3. Contact Hours: Lecture 3.

Interrelationships of micronutrients in terms of biochemistry, physiology, genetics, and nutrition. Emphasis on developing understanding of how the coordination of structure and function is related to metabolic needs of the cell and its response to the environment. This integrated approach forms the basis for evaluating the micronutrient needs of humans in both normal and altered metabolic states. (Typically Offered: Spring, Summer)

DIET 5580: Advanced Human Nutrition: Macronutrients

Credits: 3. Contact Hours: Lecture 3.

Integration of the molecular, cellular and physiological aspects of macronutrients and energy metabolism in mammalian systems. Dietary energy, carbohydrates, fiber, lipids, proteins, their interactions, metabolic consequences, and major research methodologies. (Typically Offered: Summer)

DIET 5600: Advanced Medical Nutrition Therapy

Credits: 3. Contact Hours: Lecture 3.

Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention directed to medical nutrition needs of patients in the treatment of each disease state. (Typically Offered: Summer)

DIET 5650: International Nutrition and World Hunger

Credits: 3. Contact Hours: Lecture 3.

Identification and assessment of malnutrition in low-income countries. Social, cultural, political, economic, and geographic determinants of malnutrition. Protein-energy malnutrition, vitamin and mineral deficiencies. Intervention approaches; international efforts and local sustainability. (Typically Offered: Fall)

DIET 5660: Nutrition Counseling and Education Methods

Credits: 3.

Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories. (Typically Offered: Fall, Spring)

DIET 5680: Entrepreneurship Theory and Practice

Credits: 3. Contact Hours: Lecture 3.

Definition and discussion of entrepreneurship and its importance to economic and business environment. Offered odd-numbered years. (Typically Offered: Summer)

DIET 5690: Dietary and Herbal Supplements

Credits: 3. Contact Hours: Lecture 3.

Develop skills to partner with patients in making dietary supplement decisions. Explore the safe, efficacious use of botanicals and supplements in nutritional support of aging, maternal health and wellness. Discussions on supplementation in the prevention and treatment of chronic disease include: arthritis, cancer, cardiovascular, diabetes, digestive, liver and renal disorders. (Typically Offered: Summer)

DIET 5700: Nutrition and Human Performance

Credits: 3. Contact Hours: Lecture 3.

Develop an understanding of nutrition based on knowledge of the biochemical and physiological process and functions of specific nutrients in meeting nutritional requirements. Emphasis on the relationship of optimal nutrition and physical efficiency and performance. (Typically Offered: Spring)

DIET 5710: Foundation of Leadership in Dietetics

Credits: 3. Contact Hours: Lecture 3.

Using leadership theories to develop the fundamental concepts and skills to bridge the gap between theory and practice. Students will be able to successfully evaluate classic and contemporary leadership theories, investigate current leadership trends and identify positive applications in the dietetics community. (Typically Offered: Summer)

DIET 5720: Current Issues or Trends

Credits: 3. Contact Hours: Lecture 3.

Overview of current topics, issues, and trends in dietetics practice. (Typically Offered: Fall, Spring)

DIET 5740: Nutrition and Immunology

Credits: 3. Contact Hours: Lecture 3.

Principles and issues related to nutrition and immunology. Impact of nutrients and nutritional status on immune responses. Impact of disease states on nutritional status. Offered odd-numbered years. (Typically Offered: Spring)

DIET 5760: Diabetes Medical Nutrition Therapy

Credits: 3. Contact Hours: Lecture 3.

An in-depth study of diabetes management with emphasis in nutrition care. Topics will include diabetes pathophysiology, clinical care guidelines, basic pharmacology, clinical nutrition education and counseling strategies, and nutrition care planning.

DIET 5970: Nutritional Aspects of Oncology

Credits: 3. Contact Hours: Lecture 3.

Understanding of basic cancer biology and methodology used to study nutrition and cancer relationships. Using current research as a basis, the role of nutrition in specific cancers will be explored. Students will learn about sources of information for cancer prevention programs, and how to apply this information to clinical patient management. Offered odd-numbered years. (Typically Offered: Spring)

DIET 5980: Clinical Aspects of Nutrition Support

Credits: 3. Contact Hours: Lecture 3.

Specialized nutrition assessment and support. Review of energy expenditure and substrate utilization in specific disease states. Current Methods for the initiation and management of enteral and parenteral nutrition therapy including access, metabolic and mechanical complications. Evaluation of nutrition support methodology in selected disease states. (Typically Offered: Spring)

DIET 5990: Creative Component

Credits: 1-30. Repeatable.

For non-thesis option only. (Typically Offered: Fall, Spring, Summer)

Early Childcare Education and Programming (ECP)

Courses primarily for undergraduates:

ECP 2010: Child Development - Ages Birth to 3

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 1020

Development from birth to age three. Major theories and research on development will be covered including growth patterns, the influences of disabilities and risk factors, environmental factors and their effects on attachment styles, language acquisition, brain development, cognitive development, social-emotional development, and perceptual and sensory motor skills.

ECP 2020: Child Development - Ages 4 to 8

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 1020

Development from ages four through eight. Major theories and research on development will be covered including growth patterns, the influences of disabilities and risk factors, environmental factors and their effects on attachment styles, language acquisition, brain development, cognitive development, social-emotional development, and perceptual and sensory motor skills.

ECP 3050: Professional Development

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 1020

Exploring the role of a professional as a teacher, administrator or advocate in early childhood programming. Students will learn about professionalism and ethics, identifying child abuse, and applying universal precautions. Discussion of qualities of the early childhood educator role, program models, and working with children and professional colleagues.

ECP 3060: Health, Safety, and Nutrition

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 1020

Important elements for planning, promoting and maintaining healthy and safe learning/care environments, understanding childhood illnesses and establishing healthy lifestyles, first aid, and care providers maintaining their own health. Maintaining safe relationships with others, including identifying and reporting abuse, neglect, and exploitation of children. Exploration of nutrients for life and feeding, food preparation and safety policies and guidelines, food allergies and intolerances, appropriate feeding practices.

ECP 3070: Child Guidance and Classroom Environments

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 1020

Working knowledge of developmentally appropriate practice in child guidance. This goal will be accomplished through review of current guidance methods and programs in order to familiarize students with successful guidance techniques. By the end of this course, students will develop their own approach to guidance based upon practices best suited to their own unique skills and strengths.

ECP 3200: Practicum I - Child Observations in Classroom Environments

Credits: 3. Contact Hours: Laboratory 6.

Prereq: ECP 2010; ECP 2020; ECP 3050; ECP 3060; ECP 3070; HDFS 1030

Practicum in Early Childhood Education is an opportunity for ECP teacher candidates to have a guided learning experience in a professional agency that provides services to children and families. It is expected that learning experiences and projects at the practicum site will provide teacher candidates with the opportunity to utilize and implement theories and practices learned in other ECP classes.

ECP 3220: Diversity in the Lives of Young Children and Families

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 1020

Exploration of cultural diversity in daily life and beliefs in families with young children. The focus is on U.S. families, with attention to the multiple cultures from which they come.

ECP 3230: Working with Families

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 1020

Application of an ecological model to the understanding of variation in parental roles, perspectives, relationships, approaches, and challenges.

ECP 3240: Technology and Young Children

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 1020

Impact of electronic technology on the development of young children in educational, home, and community environments, and how technology can be used to enhance teaching and learning. Students will be critical thinkers and informed consumers of technology related to young children.

ECP 4120: Development of Curriculum for Children Ages Birth to 3

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECP 2010; ECP 2020; ECP 3050; ECP 3060; ECP 3070; ECP 3200

Curriculum development related to children from birth to age 3: (1) learn and utilize assessment and documentation to inform curriculum, (2) plan and evaluate developmentally appropriate activities, and (3) learn about effective ways to share curriculum information with families. All areas of developmental domains and content areas; issues related to diversity in family composition, culture, and individual abilities will also be addressed.

ECP 4130: Development of Curriculum for Children Ages 4 to 8

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECP 2010; ECP 2020; ECP 3050; ECP 3060; ECP 3070; ECP 3200

Development of curriculum for children ages 4 to 8 years: (1) learn and utilize assessment and documentation to inform curriculum, (2) plan and evaluate developmentally appropriate activities, and (3) learn about effective ways to share curriculum information with families. This course addresses all areas of developmental domains and content areas, and issues related to diversity in family composition, culture, and individual abilities will also be addressed.

ECP 4240: Assessing Young Children and Their Environments to Enhance Development

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECP 2010; ECP 2020; ECP 3050; ECP 3060; ECP 3070; ECP 3200

Students will learn to select, evaluate, and use appropriate assessment tools for children birth to age 8. Students will use assessment data to inform decisions about teaching (environments and practice) and intervention. There will be an emphasis on the ethical use of assessments, validity of assessments, multicultural sensitivity, and assessments for children with special needs.

ECP 4250: Understanding and Adapting for Developmental Differences

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECP 2010; ECP 2020; ECP 3050; ECP 3060; ECP 3070; ECP 3200

Knowledge of disability conditions, assessment and identification, interventions in inclusive environments, and collaborations among family members and service providers.

ECP 4400: Practicum II - Curriculum Development and Implementation

Credits: 3.

Prereq: ECP 4120; ECP 4130; ECP 4240; ECP 4250

Practicum in Early Childhood Education is an opportunity for ECE teacher candidates to have a guided learning experience in a professional agency that provides services to children and families. It is expected that learning experiences and projects at the practicum site will provide teacher candidates with the opportunity to utilize and implement theories and practices learned in other required classes.

ECP 4420: Administration and Supervision in Early Childhood Settings

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 1020

Exploration of issues surrounding the administration of early childhood programs including identification of community needs, analysis of business opportunities, the evaluation and appropriate use of space and quality programming, consideration of policy and legal responsibilities, and professionalism in the field. In addition, the course explores best practices in staff selection, training, coaching, and supervision.

ECP 4600: Practicum III - Capstone Experience

Credits: 3-6. Repeatable, maximum of 6 credits.

Prereq: ECP 3220; ECP 3230; ECP 3240; ECP 4400; ECP 4420

Professional practicum as a 15 week experience designed to allow the student to demonstrate practical application of developmentally appropriate early childhood teaching techniques and skills, actual teaching experience and developmental feedback. Practicum students will be involved in observation and evaluation of classroom experiences, environmental design, classroom management, and parent communication.

Ecology and Evolutionary Biology (EEB)

Courses primarily for graduate students, open to qualified undergraduates:

EEB 5110: Conceptual Foundations in Ecology and Evolutionary Biology

Credits: 4.

Introduction to key figures and ideas that have shaped the development of ecology and evolutionary biology. Covers major developments in ecology and evolutionary biology at five levels of biological organization: Genome, Organism, Population, Community, and Ecosystem. Impacts of these developments on current approaches to investigation and argument formulation. Effects of technological advances on the direction of scientific investigations. Introduction to analytical skills important for critical thinking in ecology and evolutionary biology and the impact of accepted lines of scientific reasoning on the objectives and conduct of research, such as explanation and prediction, design of studies as experimentation, and structured or unstructured observation. (Typically Offered: Fall)

EEB 5850A: Extended Field Trip: Pre-Trip Lecture

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Extended field trip to study major terrestrial and aquatic ecosystems. Location and duration vary. Report required. (Typically Offered: Fall, Spring, Summer)

EEB 5850B: Extended Field Trip: Travel

Credits: 1. Repeatable.

Extended field trip to study major terrestrial and aquatic ecosystems. Location and duration vary. Report required. (Typically Offered: Fall, Spring, Summer)

EEB 5900: Special Topics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

For students wishing to conduct in-depth study of a particular topic in ecology and evolutionary biology. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:

EEB 6980: Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Reports and discussion of recent research and literature. (Typically Offered: Fall, Spring)

EEB 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Thesis and dissertation research. (Typically Offered: Fall, Spring, Summer)

Ecology, Evolution, and Organismal Biology (EEOB)

The department offers graduate work leading to both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees. Each EEOB faculty member is affiliated with one or more interdepartmental majors, and EEOB students major in one of these programs. These interdepartmental programs include:

- Bioinformatics and Computational Biology (<http://www.bcb.iastate.edu/>)
- Ecology and Evolutionary Biology (<http://www.eeb.iastate.edu/>)
- Environmental Science (<https://enscigrad.iastate.edu/>)
- Genetics and Genomics (<http://www.genetics.iastate.edu>)
- Interdisciplinary Graduate Studies (<http://www.grad-college.iastate.edu/igs/admission.html>)
- Microbiology (<http://www.micrograd.iastate.edu/>)
- Plant Biology (<http://www.ipb.iastate.edu/>)
- Sustainable Agriculture (<https://susag.iastate.edu/>)

The department offers graduate work leading to both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees.

Courses primarily for graduate students, open to qualified undergraduates:

EEOB 5070: Advanced Animal Behavior

Credits: 3. Contact Hours: Lecture 3.

Analysis of current research in animal behavior. Topics covered may include behavioral ecology, mechanisms of behavior, evolution of behavior, applications of animal behavior to conservation biology, and applications of animal behavior to wild animals in captivity. (Typically Offered: Spring)

EEOB 5140: Life History and Reproductive Strategies

(Dual-listed with BIOL 4140).

Credits: 3. Contact Hours: Lecture 3.

Evolution of ecological adaptations at the individual, population, and species level. Emphasis is on evolutionary mechanisms and adaptive strategies related to life histories and reproduction; age and size at maturity; lifespan and senescence; offspring size/number trade-offs; sex and mating systems; sex determination and sex ratios. BIOL 3150 or equivalent recommended. (Typically Offered: Fall)

EEOB 5210: Biological Principles of Aging

(Dual-listed with BIOL 4210). (Cross-listed with GERON 5210).

Credits: 3. Contact Hours: Lecture 3.

Basic biological principles of aging. Course modules include an introduction to the aging process, body systems and normal aging, and environment and the biology of aging. In addition, disorders and diseases of aging, prevention and treatment and exercise and aging topics will be covered. (Typically Offered: Summer)

EEOB 5310: Conservation Biology

(Cross-listed with AECL 5310).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3120, BIOL 3130; or graduate standing

Examination of conservation issues from a population and a community perspective. Population-level analysis will focus on the role of genetics, demography, and environment in determining population viability. Community perspectives will focus on topics such as habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology. Offered even-numbered years. (Typically Offered: Spring)

EEOB 5340: Endocrinology

(Dual-listed with BIOL 4340).

Credits: 3. Contact Hours: Lecture 3.

Chemical integration of vertebrate organisms. The structure, development, and evolution of the endocrine glands and the function and structure of their hormones. (Typically Offered: Spring)

EEOB 5350: Restoration Ecology

(Cross-listed with NREM 5350/ ENSCI 5350).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Theory and practice of restoring animal and plant diversity, structure and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies. Offered even-numbered years. (Typically Offered: Fall)

EEOB 5420A: Introduction to Molecular Biology Techniques: DNA Techniques

(Cross-listed with BMS 5420A/ BBMB 5420A/ FSHN 5420A/ GDCB 5420A/ HORT 5420A/ NREM 5420A/ NUTRS 5420A/ VDPAM 5420A/ VMPM 5420A).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EEOB 5420B: Introduction to Molecular Biology Techniques: Protein

(Cross-listed with BMS 5420B/ BBMB 5420B/ FSHN 5420B/ GDCB 5420B/ HORT 5420B/ NREM 5420B/ NUTRS 5420B/ VDPAM 5420B).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only. (Typically Offered: Spring, Summer)

EEOB 5420C: Introduction to Molecular Biology Techniques: Cell Techniques

(Cross-listed with BMS 5420C/ BBMB 5420C/ FSHN 5420C/ GDCB 5420C/ HORT 5420C/ NREM 5420C/ NUTRS 5420C/ VMPM 5420C/ VDPAM 5420C).

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. ular biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EEOB 5420D: Introduction to Molecular Biology Techniques: Plant Transformation

(Cross-listed with BMS 5420D/ BBMB 5420D/ FSHN 5420D/ GDCB 5420D/ HORT 5420D/ NREM 5420D/ NUTRS 5420D/ VMPPM 5420D/ VDPAM 5420D).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1. Repeatable.

Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

EEOB 5420E: Introduction to Molecular Biology Techniques: Proteomics

(Cross-listed with BMS 5420E/ BBMB 5420E/ FSHN 5420E/ GDCB 5420E/ HORT 5420E/ NREM 5420E/ NUTRS 5420E/ VMPPM 5420E/ VDPAM 5420E).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1. Repeatable.

Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

EEOB 5420F: Introduction to Molecular Biology Techniques: Metabolomics

(Cross-listed with BMS 5420F/ BBMB 5420F/ FSHN 5420F/ GDCB 5420F/ HORT 5420F/ NREM 5420F/ NUTRS 5420F/ VMPPM 5420F/ VDPAM 5420F).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1. Repeatable.

Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

EEOB 5420G: Introduction to Molecular Biology Techniques: Genomic

(Cross-listed with BMS 5420G/ BBMB 5420G/ FSHN 5420G/ GDCB 5420G/ HORT 5420G/ NREM 5420G/ NUTRS 5420G/ VMPPM 5420G/ VDPAM 5420G).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1. Repeatable.

Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

EEOB 5440: Intro Bioinformatics

Credits: 4. Contact Hours: Lecture 4.

Intro Bioinformatics. (Typically Offered: Fall)

EEOB 5460: Computational Skills for Biological Data

(Cross-listed with BCB 5460).

Credits: 3. Contact Hours: Lecture 1, Discussion 2.

Computational skills necessary for biologists working with big data sets. UNIX commands, scripting in R and Python, version control using Git and GitHub, and use of high performance computing clusters. Combination of lectures and computational exercises. (Typically Offered: Fall)

EEOB 5510: Plant Evolution and Phylogeny

(Dual-listed with BIOL 4510).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Survey of land plant evolution; phylogenetic comparison of anatomical, reproductive, and life history specializations. Relationships among bryophytes, lycophytes, pteridophytes, gymnosperms, and angiosperms emphasizing significant evolutionary changes documented by paleobotanical, morphological, and molecular studies. (Typically Offered: Fall)

EEOB 5530: Agrostology

Credits: 3.

Structure, identification, classification, phylogeny, and economic aspects of grasses and related families. Offered even-numbered years. (Typically Offered: Fall)

EEOB 5550: Bryophyte and Lichen Biodiversity

(Dual-listed with BIOL 4550).

Credits: 3. Contact Hours: Lecture 2, Laboratory 1.

Introduction to the biology and ecology of mosses, liverworts, and lichens. Emphasis on identification and diversity of local representatives of these three groups of organisms. Required field trips and service-learning. (Typically Offered: Spring)

EEOB 5610: Evolutionary and Ecological Genomics

Credits: 3. Contact Hours: Lecture 3.

Use of genomic and other 'omic' data in evolution and ecology. Review of data-generation platforms, computational methods, and examples of how phylogenomics, metagenomics, epigenomics, and population genomics are transforming the disciplines of evolution and ecology. Offered even-numbered years. (Typically Offered: Spring)

EEOB 5620: Evolutionary Genetics

Credits: 3. Contact Hours: Lecture 3.

Seminar/discussion course covering the genetic basis of evolutionary processes in multicellular organisms. Offered even-numbered years. (Typically Offered: Spring)

EEOB 5630: Molecular Phylogenetics

Credits: 3.

An overview of the theory underlying phylogenetic analysis and the application of phylogenetic methods to molecular datasets. The course emphasizes a hands-on approach to molecular phylogenetics and combines lecture presentations with computer exercises and discussion of original scientific literature. (Typically Offered: Spring)

EEOB 5640: Wetland Ecology

(Cross-listed with ENSCI 5640).

Credits: 3. Contact Hours: Lecture 3.

Ecology, classification, creation and restoration, and management of wetlands. Emphasis on North American temperate wetlands. (Typically Offered: Spring)

EEOB 5650: Macroevolution

(Dual-listed with BIOL 4650).

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

The history and diversity of life on earth; evolutionary patterns and processes above the species level. Diversity from a phylogenetic perspective. Empirical exercises include: phylogeny estimation, ancestral states, estimating diversification rates, evaluating the tempo and mode of evolution, biogeographic patterns, and trait associations across the tree of life. Offered even-numbered years. (Typically Offered: Spring)

EEOB 5660: Molecular Evolution

Credits: 3. Contact Hours: Lecture 3.

Seminar/discussion course covering the fundamentals of molecular evolution. Emphasis is placed on original scientific literature and current topics, including rates and patterns of genetic divergence; nucleotide and allelic diversity; molecular clocks; gene duplications; genome structure; organellar genomes; polyploidy; transposable elements; and modes and mechanisms of gene and genome evolution. Offered even-numbered years. (Typically Offered: Fall)

EEOB 5670: Empirical Population Genetics

Credits: 3. Contact Hours: Lecture 3.

An overview of fundamental population genetic theory and the ecological and evolutionary factors underlying the distribution of genetic variation within and among natural populations. Emphasis on the analysis of inbreeding, breeding systems, parentage, relatedness, spatial autocorrelation, effective population size, hierarchical population models, and phylogeography. (Typically Offered: Fall)

EEOB 5680: Advanced Systematics

(Cross-listed with ENT 5680).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Principles and practice of systematic biology; taxonomy, nomenclature and classification of plants and animals; sources and interpretation of systematic data; speciation; fundamentals of phylogenetic systematics. (Typically Offered: Spring)

EEOB 5690: Biogeography

Credits: 3. Contact Hours: Lecture 3.

Principles underlying the geographic distribution of organisms throughout the world; biological influences of geological history and tectonic movements; role of climate, migration, dispersal, habitat, and phylogeny on past and present organismal distribution patterns; biogeographic methods. (Typically Offered: Spring)

EEOB 5760: Functional Ecology

(Dual-listed with BIOL 4760).

Credits: 3. Contact Hours: Lecture 3.

The nature of adaptations to physical and biotic environments. Biophysical, biomechanical, and physiological bases of the structure, form, growth, distribution, and abundance of organisms. (Typically Offered: Spring)

EEOB 5770: Concepts in Theoretical Ecology and Evolution

Credits: 1. Contact Hours: Lecture 1.

Readings and discussion of influential ideas in ecological and evolutionary theory, with an emphasis on how models are used as conceptual tools for building synthetic paradigms. Topics are chosen according to student interests; may include spatial ecology, behavioral theory, chaos, community assembly and biodiversity, and others. Offered even-numbered years. (Typically Offered: Fall)

EEOB 5840: Ecosystem Science

(Cross-listed with ENSCI 5840).

Credits: 3. Contact Hours: Lecture 3.

Advanced studies of ecosystems and the biological and physical factors that influence their properties and dynamics. Conceptual foundations and modern approaches to ecosystem studies. Interactions among organisms, biological diversity, and ecosystem attributes. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems. Global change issues. Offered even-numbered years. (Typically Offered: Spring)

EEOB 5850: Community Ecology

(Dual-listed with BIOL 4850).

Credits: 3. Contact Hours: Lecture 3.

The effect of interspecific interactions on the structure and dynamics of natural and managed communities; including concepts of guild structure and trophic web dynamics and their importance to the productivity, diversity, stability, and sustainability of communities. The implications of interspecific interactions in the management of wild species will be emphasized with illustrative case histories of interactions between plants, invertebrates, and vertebrates. (Typically Offered: Spring)

EEOB 5860: Aquatic Ecology

(Cross-listed with AECL 5860/ ENSCI 5860).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3120 or ENSCI 3810 or ENSCI 4020 or NREM 3010 or graduate classification

Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology. (Typically Offered: Fall)

EEOB 5860L: Aquatic Ecology Laboratory

(Cross-listed with AECL 5860L/ ENSCI 5860L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Concurrent enrollment in BIOL 4860

Field trips and laboratory exercises to accompany 4860. Hands-on experience with aquatic research and monitoring techniques and concepts. (Typically Offered: Fall)

EEOB 5870: Microbial Ecology

(Cross-listed with ENSCI 5870/ GEOL 5870/ MICRO 5870).

Credits: 3. Contact Hours: Lecture 3.

Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized. (Typically Offered: Fall)

EEOB 5890: Population Ecology

(Dual-listed with EEOB 4890/ AECL 4890). (Cross-listed with AECL 5890).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (BIOL 3120, STAT 1010 OR STAT 1040, MATH 1510 OR 1600 OR 1650) or graduate classification

Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation. Offered even-numbered years. (Typically Offered: Fall)

EEOB 5900A: Special Topics: Current Topics in Ecology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

EEOB 5900B: Special Topics: Current Topics in Evolutionary Biology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

EEOB 5900C: Special Topics: Current Topics in Organismal Biology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

EEOB 5990: Creative Component

Credits: 1-30. Repeatable.

Research toward nonthesis master's degree.

Courses for graduate students:

EEOB 6980: Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Prereq: Instructor Permission for Course

Meetings of graduate students and faculty to discuss recent literature and problems under investigation.

EEOB 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Research for thesis or dissertation. Offered on a satisfactory-fail basis only.

Early Childhood and Family Policy (ECFP)

Courses primarily for graduate students, open to qualified undergraduates:

ECFP 5500: History of Child Development and Equity

Credits: 3. Contact Hours: Lecture 3.

Overview of research on children birth to age five, demographics of this population, critical domains of development, significance of early brain development, and issues of inequality and disproportionality that shape child outcomes. (Typically Offered: Fall)

ECFP 5600: Examining Practices, Policies, and Key Issues

Credits: 3. Contact Hours: Lecture 3.

Advances general early childhood education and care (ECEC) policy knowledge and addresses contextual and historical variables that have affected its evolution in the United States. Overview of the practices, policies, and issues framing the design and delivery of contemporary early childhood education and care (ECEC), including the role of parents and families. Addresses understanding ECEC practice and policy and identifying and addressing critical policy challenges. (Typically Offered: Fall)

ECFP 5700: Theory, Analysis & Research

Credits: 3. Contact Hours: Lecture 3.

Provides interdisciplinary perspective on early childhood education and care (ECEC) policy. Focus on research influence on policy, tools for policy analysis, and theoretical frames used to interpret and influence current ECEC policy discourse. Examine and analyze design, implementation, and outcomes of various policies. (Typically Offered: Spring)

ECFP 5800: Policy, Leadership & Advocacy

Credits: 3. Contact Hours: Lecture 3.

Provides foundational knowledge of fundamentals of policy creation, design, and development. Emphasis on policies that impact early childhood education and care (ECEC) and focus on policy construction. (Typically Offered: Spring)

Economics (ECON)

Courses primarily for undergraduates:

ECON 1010: Principles of Microeconomics

Credits: 3. Contact Hours: Lecture 3.

Resource allocation, opportunity cost, comparative and absolute advantage. Supply and demand. Marginal analysis. Theories of production and consumption, pricing, and the market system. Perfect and imperfect competition and strategic behavior. Factor markets. Present discounted value. (Typically Offered: Fall, Spring, Summer)

ECON 1010H: Principles of Microeconomics: Honors

Credits: 3. Contact Hours: Lecture 3.

Prereq: Membership in the University Honors Program

Resource allocation, opportunity cost, comparative and absolute advantage. Supply and demand. Marginal analysis. Theories of production and consumption, pricing, and the market system. Perfect and imperfect competition and strategic behavior. Factor markets. Present discounted value.

ECON 1010L: Laboratory in Principles of Microeconomics

Credits: 1. Contact Hours: Laboratory 2.

Discussion of material typically covered in ECON 1010. Application of economic principles to real world problems. Economic principles and basic business management concepts applied to decision-making in agribusiness operations. (Typically Offered: Fall)

ECON 1020: Principles of Macroeconomics

Credits: 3. Contact Hours: Lecture 3.

Measurement of macro variables and general macro identities. Classical models of full employment. Production and growth. Savings and investment. Employment and unemployment. Money, inflation, and price levels. Operation of the U.S. banking system. Fiscal and monetary policy. Elements of international finance. ECON 1010 recommended. (Typically Offered: Fall, Spring, Summer)

ECON 1020H: Principles of Macroeconomics: Honors

Credits: 3. Contact Hours: Lecture 3.

Prereq: Membership in the University Honors Program

Measurement of macro variables and general macro identities. Classical models of full employment. Production and growth. Savings and investment. Employment and unemployment. Money, inflation, and price levels. Operation of the U.S. banking system. Fiscal and monetary policy. Elements of international finance. ECON 1010 recommended.

ECON 1030X: Introduction to Economics: Real World Applications

Credits: 3. Contact Hours: Lecture 3.

Introduction to key economics concepts in the context of current events and real-world questions. Topics will address some or all of the following concepts: market supply and demand, consumer and producer behavior, government policy and regulation, market structure, market failures, time value of money, inflation, gross domestic product, economic growth, labor markets, financial markets, and international trade. Cannot be used as a substitute for ECON 1010 or ECON 1020 prerequisite.

ECON 1100: Orientation in Agricultural Business

Credits: 1. Contact Hours: Discussion 0.5, Lecture 0.5.

Orientation course for freshman and new transfer students in agricultural business. (Typically Offered: Fall)

ECON 2070: Applied Economic Optimization

Credits: 3. Contact Hours: Lecture 2, Discussion 2.

Prereq: MATH 1510; MATH 1600; MATH 1650

Application of linear algebra, calculus and unconstrained and constrained optimization techniques to economic problems. Learning outcomes include the ability to (i) identify the objective, decision variables and constraints in economic decision problems, (ii) represent elements of an economic problem in simple mathematical models, (iii) identify and apply mathematical tools that can be used to solve the problems, (iv) identify the strengths and limitations of the solution method, and (v) interpret the economic meaning and implications of the solution. (Typically Offered: Fall, Spring)

ECON 2300: Farm Business Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 2840; ECON 1010

Business and economic principles applied to decision making and problem solving in the management of a farm business. Cash flow, partial, enterprise, and whole farm budgeting. Information systems for farm accounting, analysis, and control. Obtaining and managing land, capital, and labor resources. Alternatives for farm business organization and risk management. (Typically Offered: Fall, Spring)

ECON 2340: Small Business Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010

An introduction to small business management, entrepreneurship, and economics utilizing a series of case studies. Exploration of issues related to starting or acquiring a new business and development of knowledge and skills for successful management of a small business, with an emphasis on agricultural business.

ECON 2350: Introduction to Agricultural Markets

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010

Basic concepts and economics principles related to markets for agricultural inputs and products. Overview of current marketing problems faced by farms and agribusinesses, farm and retail price behavior, structure of markets, food marketing channels, food quality and food safety, and the role of agriculture in the general economy. The implications of consumer preferences at the farm level. Introduction to hedging, futures, and other risk management tools. (Typically Offered: Fall, Spring)

ECON 2360: Agricultural Selling

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010

Principles of selling with application to agricultural and food related businesses. Attitudes, value systems, and behavioral patterns that relate to agricultural sales. Marketing, selling strategies, preparing for sales calls, making sales presentations, handling objections, and closing sales. Analysis of the buying or purchasing process. Evaluation of agri-selling profession. (Typically Offered: Fall, Spring, Summer)

ECON 2710: Introduction to Data Analysis in Agri-Food Industry

Credits: 3. Contact Hours: Lecture 3.

Introduction to quantitative methods for economic decision making. Examples from agricultural and natural resource economics presented using spreadsheet software tools such as Microsoft Excel. (Typically Offered: Spring)

ECON 2920A: Career Seminar: Agricultural Business

Credits: 1. Contact Hours: Lecture 1.

Prereq: Major in economics or agricultural business

Career opportunities in the various industries and government institutions. Required training and skills needed to perform successfully in different types of careers. Factors important in finding and obtaining employment either before or after graduation including personal resumes, interviewing, and letter writing. Graduation Restriction: Only one of ECON 2920, 2920A, and 2920B can be used toward graduation.

ECON 2920B: Career Seminar: Economics and Business Economics

Credits: 1. Contact Hours: Lecture 1.

Prereq: Major in economics or business economics

Career opportunities in the various industries and government institutions. Required training and skills needed to perform successfully in different types of careers. Factors important in finding and obtaining employment either before or after graduation including personal resumes, interviewing, and letter writing. Graduation Restriction: Only one of ECON 2920, 2920A, and 2920B can be used toward graduation.

ECON 2970: Internship

Credits: 2. Repeatable, maximum of 4 credits.

Prereq: Permission of Instructor; and major in Agricultural Business or Economics

Students complete a research report, based on their internship or approved work experience, that examines chosen topics in management, marketing or finance.

ECON 2980: Cooperative Education

Credits: Required. Repeatable.

Prereq: Permission of the department cooperative education coordinator; sophomore classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period.

ECON 3010: Intermediate Microeconomics

Credits: 3-4. Contact Hours: Discussion 1, Lecture 3.

Prereq: ECON 1010 and ECON 2070 or MATH 1660

Theory of consumer and business behavior; optimal consumption choices and demand; theory of firm behavior; costs, production, and supply; competitive and imperfectly competitive markets; theory of demand for and supply of factors of production; general equilibrium analysis. Fall and spring require recitation and are 4 credits; summer is 3.0 credits. (Typically Offered: Fall, Spring, Summer)

ECON 3010H: Intermediate Microeconomics: Honors

Credits: 3-4. Contact Hours: Lecture 3.

Prereq: ECON 1010 and ECON 2070 or MATH 1660

Theory of consumer and business behavior; optimal consumption choices and demand; theory of firm behavior; costs, production, and supply; competitive and imperfectly competitive markets; theory of demand for and supply of factors of production; general equilibrium analysis. Recitation required for 4 credits.

ECON 3020: Intermediate Macroeconomics

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010; ECON 1020; (MATH 1600 or MATH 1650)

Theory of income, employment, interest rates, and the price level; fiscal and monetary policy; budget and trade deficits; money and capital inflows, interest rates, and inflation. (Typically Offered: Fall, Spring)

ECON 3020H: Intermediate Macroeconomics: Honors

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010; ECON 1020; (MATH 1600 or MATH 1650)

Theory of income, employment, interest rates, and the price level; fiscal and monetary policy; budget and trade deficits; money and capital inflows, interest rates, and inflation.

ECON 3130: Economics of Sports

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010

Application of economics to issues in sports, including franchising; rival leagues and barriers to entry; cooperative, competitive, and collusive behavior; player productivity and compensation; contracts, unions, and discrimination; antitrust, taxation, and subsidies. Economic concepts include supply and demand, costs, competition, time value of money, labor economics, pricing, public finance, production, game theory, risk analysis, and industrial organization.

ECON 3200: Labor Economics

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010

Economic analysis of contemporary domestic and international labor market issues including labor supply and demand, unemployment, and employment in the U.S. and elsewhere; investments in and returns to education, training, health, immigration and migration; income inequality; labor productivity; out-sourcing and global competitiveness; work incentives; compensation including benefits; and labor policies such as minimum wages, over-time pay, discrimination, unions, and immigration. Examples drawn from the U.S. and other developed countries with reference to developing countries where relevant. Meets International Perspectives Requirement.

ECON 3210: Economics of Discrimination

(Cross-listed with WGS 3210).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010

Economic theories of discrimination. Analysis of the economic problems of women and minorities in such areas as earnings, occupations, and unemployment. Public policy concerning discrimination. Poverty measurement and antipoverty programs in the U.S. Meets U.S. Diversity Requirement.

ECON 3300: Advanced Farm Business Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 2300

Effective use of strategic planning, decision methods, and computer assistance for solving farm problems. Applications of economic and management theory to analyze farm business decisions using efficiency measures to assess current resource use and direct the farm business analysis, planning, and tax process.

ECON 3320: Cooperatives

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010

Survey of cooperative business structure, including historical developments in the United States, principles of cooperation, state and federal authorization for cooperative activity, economic motivations and foundations, governance, marketing and pricing strategies, and financing, capitalization and taxation considerations. Students will learn how the cooperative model is applied in a variety of markets.

ECON 3340: Entrepreneurship in Agriculture

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010

Introduction to the process of entrepreneurship within the agricultural and food sectors. Emphasis on opportunity recognition and creation of concept for new startup ventures. Students will develop a business plan for a startup business or non-profit organization. (Typically Offered: Fall, Spring)

ECON 3350: The Economics of Global Agricultural Food and Bio-energy
(Cross-listed with GLOBE 3350).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010

Applied economic analysis of the determinants of world agricultural production, marketing, and use in feed, food, fiber, biofuel, and other applications, and global food processing and consumption. Analysis of market case studies and various data on global agricultural production and transformation, land and resource use, demography, economic activity, nutrition and health trends. Meets International Perspectives Requirement.

ECON 3370: Agricultural Marketing

Credits: 3. Contact Hours: Lecture 3, Discussion 0.

Prereq: ECON 1010

Understanding of agricultural commodity markets for grain, livestock and dairy with emphasis on marketing decisions and risk management for farmers and processors. Hands-on applications of marketing and management tools via market simulations. ECON 2350 recommended.

ECON 3440: Public Finance

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010

The economic role of governments in market economies. Public goods, externalities, income distribution, and income maintenance programs. The effect of taxes on economic behavior, descriptions of the structure of the principal U.S. taxes, and current reform proposals.

ECON 3530: Money, Banking, and Financial Institutions

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010; ECON 1020

Theoretical and applied analysis of money, banking, and financial markets; interest rates and portfolio choice; the banking industry in transition; the money supply process; the Federal Reserve System and the conduct of monetary policy; macro implications of monetary policy; international finance. (Typically Offered: Fall, Spring, Summer)

ECON 3550: International Trade and Finance

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010; ECON 1020

Explanations of causes of international trade and the impact of trade on welfare and employment patterns. Analysis of government policies towards trade, such as tariffs, quotas, and free trade areas. Theory of balance of payments and exchange rate determination, and the role of government policies. Examination of alternative international monetary arrangements. Meets International Perspectives Requirement.

ECON 3620: Applied Ethics in Agricultural Business

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010; Junior or Senior classification; College of Agriculture and Life Sciences major

Explore ethics of management and decision-making in agriculture and agricultural business. Discuss and debate proper ethical behavior in these issues and situations and the relationship between business and personal ethical behavior.

ECON 3640: Rural Property Appraisal

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010

Use of income capitalization, sales comparison and cost appraisal concepts in appraising agricultural resources. Application of underlying economic/business/management principles, especially present value, as they relate to farmland appraisal. Determination and estimation of economic impacts of special consideration and property use factors. Evaluate feasibility and profitability of investment in rural property.

ECON 3710: Introductory Econometrics

Credits: 4. Contact Hours: Lecture 4.

Prereq: ECON 3010 and ECON 3020 or ECON 3530 and STAT 3260

Introduction to the models and methods used to estimate relationships and test hypotheses pertaining to economic variables. Among the topics covered in the course are: Single and multiple regression analysis; functional forms; omitted variable analysis; multicollinearity; heteroskedasticity; autocorrelation; simultaneous equations; and dynamic models. (Typically Offered: Fall, Spring)

ECON 3760: Rural, Urban and Regional Economics

(Cross-listed with CRP 3760).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010

Firm location with respect to regional resources, transport, scale economies, externalities, and policies. Measures of local comparative advantage and specialization. Spatial markets. Population location considering jobs, wages, commuting, and local amenities. Business, residential, and farm land use and value. Migration. Other topics may include market failure, regulation, the product cycle, theories of rural and urban development, developmental policy, firm recruiting, local public goods and public finance, schools, poverty, segregation, and crime.

ECON 3800: Energy, Environmental and Resource Economics

(Cross-listed with ENVS 3800).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010

Natural resource availability, use, conservation, and government policy, with emphasis on energy issues. Environmental quality and pollution control policies.

ECON 3850: Economic Development

(Cross-listed with GLOBE 3850).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010; ECON 1020

Current problems of developing countries, theories of economic development, agriculture, and economic development, measurement and prediction of economic performance of developing countries, alternative policies and reforms required for satisfying basic needs of Third World countries, interrelationships between industrialized countries and the developing countries, including foreign aid. Meets International Perspectives Requirement.

ECON 3870: Economies of China and India

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010

The economic development of China and India within the larger historical, political, and socioeconomic contexts. The characteristics of the development paths of major industries. The drivers of and impediments for future economic development. The two economies' connections with the world economy. Meets International Perspectives Requirement.

ECON 3980: Cooperative Education

Credits: Required. Repeatable.

Prereq: Permission of Department Cooperative Education Coordinator; Junior classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period.

ECON 4010: Topics in Microeconomics

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 3010 and STAT 2260

Advanced treatment of selected topics from one or more of the following areas: household production models, factor markets, game theory and imperfect competition, general equilibrium, intertemporal choice, asset markets, income distribution, externalities and public goods, etc.

ECON 4020: Topics in Macroeconomics

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 3010, ECON 3020, and STAT 2260

Advanced treatment of selected topics from one or more of the following areas: business cycle theory, growth theory, fiscal and monetary policy, coordination issues, open economy macroeconomics, and financial economics.

ECON 4100X: Experimental Economics

Credits: 3. Contact Hours: Lecture 3.

Introduction to experimental economics and major subject areas addressed by laboratory and field experiments. Topics include an introduction to the technique of using laboratory experimental methods to test economic theories, understanding economic behavior, and conducting field experiments. Additional topics will introduce students to human subjects review, experimental design, writing a literature review, and the study of a series of experiments: markets, individual decision-making, asset markets, behavioral game theory, and neuroeconomics.

ECON 4160: Industrial Organization

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 3010

Study of the structure of firms and markets and of their interaction, with emphasis on imperfectly competitive markets. Behavior of firms in strategic settings and insights of basic game-theoretic models. Welfare implications of alternative market organizations, consequences of market power, and scope for government regulation and antitrust/competition policies. Topics include monopoly and price discrimination, oligopoly models, product quality, product differentiation, vertical integration, information and advertising, patents, R&D and innovation, and regulation.

ECON 4180: Introduction to Game Theory

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 3010

Systematic introduction to game theory and its uses in economics. Develops the basic framework, models and tools necessary to analyze games of strategy, including: Strategic and extensive-form representations of games; best response functions and Nash equilibrium, mixed strategies backward induction and subgame-perfect equilibrium, imperfect and incomplete information, Bayesian and sequential equilibria. Examples and applications taken from economics, business, political science, law and biology.

ECON 4310: Managerial Economics

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 3010

Theory of the firm; organizational incentives and efficiency; moral hazard; role of information and decision making under uncertainty; ownership and control; business investment.

ECON 4350: Analysis of Food Markets

(Cross-listed with FSHN 4350).

Credits: 3. Contact Hours: Lecture 3.

Prereq: STAT 2260, ECON 2350, and ECON 3010

Food market analysis from an economics perspective; food markets and consumption; methods of economic analysis; food industry structure and organization; food and agriculture regulations; labeling; consumer concerns; agricultural commodity promotion. Final project required. (Typically Offered: Spring)

ECON 4370: Commodity Marketing and Risk Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: STAT 2260, ECON 2350, and ECON 3010

The purpose and performance of commodity markets. How commodity marketing institutions function. Merchandising arrangements. Distinguishing features of agricultural commodities. Hedging, arbitrage, and speculation in commodity spot, forward, futures, and options markets. Valuation theory.

ECON 4500X: Economic Growth

Credits: 3. Contact Hours: Lecture 3.

A theoretical and empirical examination of economic growth and income differences between countries. Focuses on both the historical experience of countries that are currently rich and the process of catch-up, or stagnation, among poor countries. Topics include population growth, accumulation of physical and human capital, technological change, natural resources, income distribution, geography, government, and culture. Meets International Perspectives Requirement. (Typically Offered: Fall)

ECON 4550: International Trade

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 3010

Rigorous treatment of theories of international trade and international factor movements. Examination of the impact of trade and labor migration on domestic and world welfare and on the distribution of income. Theoretical analysis of government policies towards trade and factor movements, including quotas, tariffs, free trade areas and immigration restrictions. Discussion of contemporary issues and controversies concerning globalization, including multinational firms and labor migration. Meets International Perspectives Requirement.

ECON 4570: International Finance

(Dual-listed with ECON 5570).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 3020

National income accounting and balance of payments; foreign exchange rates and exchange rate markets; money, interest rates, and exchange rate determination; prices, exchange rates, and output in the short run; international monetary arrangements; fixed versus flexible exchange rates; optimal currency areas; international capital flows; currency and financial crises in emerging markets. Graduation Restriction: Retrieving data. Wait a few seconds and try to cut or copy again. Meets International Perspectives Requirement.

ECON 4600: Agricultural, Food, and Trade Policy

(Dual-listed with ECON 5600).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 3010 or ECON 5010

Description and analysis of economic problems of U.S. agriculture. Explanation and economic analysis of government policies and programs to develop agriculture, conserve agricultural resources, address consumer food concerns, stabilize farm prices, and raise farm incomes. The influence of macropolicy, world economy, international trade, and bioenergy on U.S. agriculture.

ECON 4660: Agricultural Finance

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 3010; FIN 3010; STAT 2260

Financial analysis of agricultural businesses; liquidity, capital structure, and growth and risk of agricultural firms; capital budgeting methods; analysis of land investments, leasing, and costs of credit; financial intermediation and major financial institutions for agriculture; borrower-lender relationships, and asset-liability management techniques by financial intermediaries; public policies affecting agricultural credit markets. ECON 3530 recommended.

ECON 4800: Intermediate Environmental and Resource Economics

(Dual-listed with ECON 5800).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 3010

Theories of natural resource utilization and allocation. Externalities, public goods, and environmental quality. Renewable energy, biofuels, land use change and life cycle analysis of carbon, and sustainability and resource conservation. Methodologies for analyzing natural resource and environmental problems and evaluating resource policies.

ECON 4900: Independent Study

Credits: 1-3. Repeatable, maximum of 4 credits.

Prereq: Junior or Senior classification; 14 credits in ECON; Permission of Instructor

Graduation Restriction: No more than 9 credits of ECON 4900 may be used toward graduation.

ECON 4900E: Independent Study: Entrepreneurship

Credits: 1-5. Repeatable, maximum of 6 credits.

Prereq: Junior or Senior classification; 14 credits in ECON; Permission of Instructor

Graduation Restriction: No more than 9 credits of ECON 4900 may be used toward graduation.

ECON 4900H: Independent Study: Honors

Credits: 1-5. Repeatable, maximum of 6 credits.

Prereq: Junior or Senior classification; 14 credits in ECON; Permission of Instructor

Graduation Restriction: No more than 9 credits of ECON 4900 may be used toward graduation.

ECON 4920: Graduating Senior Survey

Credits: Required. Contact Hours: Lecture 1.

Final preparations for graduation. The final stages of job searching, interviewing, letter writing, and resume preparation. Outcomes assessment information from graduating seniors including opinion surveys, instructor/advisor/course evaluations, exit interviews, student accomplishment surveys, job placement surveys, and comprehensive skills examinations. Departmental recognition of graduating seniors. Life as an alumnus - expectations and obligations. Convocation and commencement information. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ECON 4950: Economics Domestic Travel Course

Credits: 1-3. Contact Hours: Lecture 4.

Prereq: Permission of Instructor; Sophomore classification

Tour and study of domestic businesses, markets, and economic institutions located outside Iowa to expose students to the diversity of activities within the U.S. economy. Pre-trip sessions arranged. Locations and duration of tours will vary.

ECON 4960: Economics International Travel Course

Credits: 1-3. Repeatable.

Prereq: Permission of Instructor; Sophomore classification

Tour and study of international agricultural and/or nonagricultural economies, markets, and institutions. Locations and duration of tours will vary. Limited enrollment. Meets International Perspectives Requirement.

ECON 4970X: Agricultural Business Capstone

Credits: 3.

Students admitted into this experiential course will act as consultants to an agricultural business, consortium, or trade organization to execute an innovation project. Students are mentored through a process for developing and executing the consulting project, where they assimilate knowledge from other courses as they analyze new business/market opportunities. Students will develop insights through idea/concept articulation, opportunity assessment, customer needs analysis, value proposition, and financial modeling which will coalesce into a final summary report and presentation to present to the sponsor organization at the end of the semester.

ECON 4980: Cooperative Education

Credits: Required. Repeatable.

Prereq: Permission of Department Cooperative Education Coordinator; Senior classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduates:

ECON 5000: Quantitative Methods in Economic Analysis I

Credits: 4. Contact Hours: Lecture 4.

Economic applications of selected mathematical and statistical concepts: linear models and matrix algebra; differential calculus and optimization; integral calculus and economic dynamics; probability distributions, estimation, and hypothesis testing in the analysis of economic data. The best math preparation is a full year of calculus. (Typically Offered: Fall)

ECON 5010: Microeconomics

Credits: 4. Contact Hours: Lecture 4.

The theory of the consumer, theory of the firm, perfect and imperfect competition, welfare economics, and selected topics in general equilibrium and uncertainty. (Typically Offered: Fall)

ECON 5020: Macroeconomics

Credits: 4. Contact Hours: Lecture 4.

Models of aggregate supply and demand, theories of consumption and investment, money supply and demand, inflation, rational expectations, stabilization policy, financial markets, and international finance. (Typically Offered: Fall)

ECON 5090: Applied Numerical Methods in Economics

Credits: 3. Contact Hours: Lecture 3.

Use of numerical techniques to solve economic problems. Numerical differentiation and integration numeric solutions of systems of equations, static and dynamic optimization problems including unconstrained optimization, maximum likelihood methods, general nonlinear programming methods, dynamic programming and optimal control, numerical methods for solving functional equations.

ECON 5100: Experimental Economics

Credits: 3. Contact Hours: Lecture 3.

Introduction to experimental economics and major subject areas addressed by laboratory and field experiments. Exploration of experimental methods by concentrating on series of experiments. Applications include individual decision-making, behavioral game theory, markets, behavioral labor, public and development economics, social network, and neuroeconomics. Research project.

ECON 5110X: Research Seminar in Experimental Economics

Credits: 3. Contact Hours: Lecture 3.

Design, conduct, interpret, and report on economic experiments. Preparation of a potentially publishable experimental research paper. Topics vary according to student interest. (Typically Offered: Fall)

ECON 5200: Labor Supply and Human Capital Formation

Credits: 3. Contact Hours: Lecture 3.

Labor supply decisions and empirical analysis for agricultural operators and other self-employed and wage-earning households; multiple job holding; resource allocation in productive households; human capital formation by households, firms, and public institutions, which includes schooling, on-the-job training, migration, health, research, raising of children, and implications for household income and welfare; applications to problems in rural areas of developing and developed countries.

ECON 5310: Trends Impacting Agri-Food Businesses

Credits: 2. Contact Hours: Lecture 2.

Explore trends impacting agricultural and food businesses. Video interviews with a range of entrepreneurs, investors and industry experts will expose students to a variety of ideas and opinions on the most important trends and issues impacting the future structure of agri-food markets and explore the implications for agri-food businesses. In addition, students will be challenged to develop their own ideas about how these trends will impact their business and career. (Typically Offered: Fall)

ECON 5320: Managerial Economics for the Global Organization

Credits: 3. Contact Hours: Lecture 3.

Applications of microeconomic theory and decision analysis for firms operating in U.S. and internationally. Topics include demand & supply, consumer choice theory, production and cost theory, short run and long run business decisions, input cost and human capital differences across countries, empirical estimation of demand and supply, pricing, exchange rates, government and business, market structures and strategy.

ECON 5370: Commodity Markets: Analysis and Strategy

Credits: 3. Contact Hours: Lecture 3.

Analysis of exchange-traded and over-the-counter commodity markets, their functions and performance. Evaluation of hedging, speculation, and arbitrage strategies. Commodity transformation over space and time. Valuation of derivatives and comparison with derivatives on financial assets. Efficiency and the role of information in commodity markets. Market regulation.

ECON 5450: Public Economics

Credits: 3. Contact Hours: Lecture 3.

Economic justifications for government activities; illustrative theoretical and empirical analyses of expenditure programs; foundations of excess burden, incidence analysis, and optimal taxation; effects of taxation on labor supply; public goods and externalities; social insurance; introduction to economics of the health sector with an emphasis on the role of market failures.

ECON 5570X: International Finance

(Dual-listed with ECON 5570).

Credits: 3. Contact Hours: Lecture 3.

National income accounting and balance of payments; foreign exchange rates and exchange rate markets; money, interest rates, and exchange rate determination; prices, exchange rates, and output in the short run; international monetary arrangements; fixed versus flexible exchange rates; optimal currency areas; international capital flows; currency and financial crises in emerging markets. Graduation Restriction: Retrieving data. Wait a few seconds and try to cut or copy again. Meets International Perspectives Requirement.

ECON 5600: Agricultural, Food, and Trade Policy

(Dual-listed with ECON 4600).

Credits: 3. Contact Hours: Lecture 3.

Description and analysis of economic problems of U.S. agriculture. Explanation and economic analysis of government policies and programs to develop agriculture, conserve agricultural resources, address consumer food concerns, stabilize farm prices, and raise farm incomes. The influence of macroeconomic policy, world economy, international trade, and bioenergy on U.S. agriculture. (Typically Offered: Fall, Spring, Summer)

ECON 5710: Intermediate Econometrics

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Single and multiple equation regression models; dummy explanatory variables; serial correlation; heteroskedasticity; distributed lags; qualitative dependent variables; simultaneity. Use of econometric models for tests of economic theories and forecasting. (Typically Offered: Spring)

ECON 5760: Spatial Economics

Credits: 3. Contact Hours: Lecture 3.

Analysis of location choice by firms, employees, and households emphasizing the role of spatial variations in agglomeration economies, economies of scale, distance, transport, endowments, amenities, and local government. Models of land use, urban form, spatial competition, central place theory, and migration. Techniques of discrete choice analysis, statistical analysis of categorical data, urban system modeling, and interregional computable general equilibrium.

ECON 5800: Intermediate Environmental and Resource Economics

(Dual-listed with ECON 4800).

Credits: 3. Contact Hours: Lecture 3.

Theories of natural resource utilization and allocation. Externalities, public goods, and environmental quality. Renewable energy, biofuels, land use change and life cycle analysis of carbon, and sustainability and resource conservation. Methodologies for analyzing natural and environmental problems and evaluating resource policies. (Typically Offered: Fall, Spring, Summer)

ECON 5810: Advanced Environmental Economics

Credits: 3. Contact Hours: Lecture 3.

Interrelationships of natural resource use and the environment. Applied welfare and benefit-cost analyses. Externalities and pollution abatement. Nonmarket valuation of resources. Property rights. Legal and social constraints. Policy approaches.

ECON 5900: Special Topics

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ECON 5940: Research Methods in Economics I

Credits: 1. Contact Hours: Lecture 1.

Introduction to methods used in empirical economic research. Formulation of well-posed economic questions, locating and evaluating relevant literature, and meaning of testable hypotheses. (Typically Offered: Fall)

ECON 5950: Research Methods in Economics II

Credits: 1. Contact Hours: Lecture 1.

Develop skills required to successfully acquire, manipulate and analyze data that can be used for conducting empirical economic research.

Topics include research design, developing workflows that support reproducible analysis, data visualization and related issues. Hands on work with one or more example data sets to gain experience and confidence in using statistical software and interpreting the results of this analysis. (Typically Offered: Spring)

ECON 5960: Research Methods in Economics III

Credits: 1. Contact Hours: Lecture 1.

Formulation of the research question, problem identification, literature review, data identification, formulation and testing of hypotheses, and presentation of research results. Lectures will build on assigned readings, and cover components of applied economic research, and writing skills. Student research presentations and lectures by invited speakers. Students develop their creative component in a "hands on" environment where the instructor and others can offer guidance. (Typically Offered: Spring)

ECON 5990: Creative Component

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**ECON 6010: Microeconomic Analysis I**

Credits: 4. Contact Hours: Lecture 4, Discussion 1.

Economic theory and methodology; theory of consumer behavior, theory of the competitive firm, supply and factor demand; duality relations in consumer and producer theory, welfare change measures; partial equilibrium analysis, perfect competition, monopoly; choice under uncertainty, the expected utility model, risk aversion; insurance, portfolio and production decisions under risk. (Typically Offered: Fall)

ECON 6020: Macroeconomic Analysis

Credits: 4. Contact Hours: Lecture 4, Discussion 1.

Neoclassical aggregate growth models; the overlapping generations model; endogenous growth models; equilibrium business cycle theories; equilibrium job search and matching; models of money; fiscal and monetary policy; income and wealth distribution. (Typically Offered: Spring)

ECON 6030: Microeconomic Analysis II

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

General equilibrium analysis, efficiency, and welfare; market failures, externalities, and the theory of the second best; introduction to game theory; adverse selection, signaling, screening and moral hazard.

(Typically Offered: Spring)

ECON 6040: Advanced Macroeconomic Analysis

Credits: 4. Contact Hours: Lecture 4, Discussion 1.

Topics will be selected from: new Keynesian approaches to business cycle theory; endogenously generated business cycles; models of credit and financial intermediation; mechanism design and time inconsistency issues; political economy models; heterogeneous-agent models with strategic interaction; path dependence, network effects, and lock-in; economies as evolving self-organizing systems. (Typically Offered: Fall)

ECON 6060: Advanced Topics in Macroeconomics

Credits: 3. Contact Hours: Lecture 3.

Selected topics in macroeconomic theory of current significance to the profession.

ECON 6150: Industrial Organization I

Credits: 3. Contact Hours: Lecture 3.

Introduction to industrial organization theory and game-theoretic methods. Monopoly and price discrimination. Oligopoly theory and product differentiation. Quality and asymmetric information. Research & development and innovation. Introduction to empirical methods in industrial organization. Discrete choice models of product differentiation. Cost and production functions. Entry, exit, and dynamic equilibrium models.

ECON 6180: Game Theory

Credits: 3. Contact Hours: Lecture 3.

Theoretical analysis and applications of strategic games, extensive form games, and cooperative games. Nash equilibrium, correlated equilibrium, Bayesian games, subgame perfect equilibrium, the core, evolutionary equilibrium, repeated games with finite automata, and common knowledge.

ECON 6210: Advanced Labor Demand and Labor Markets

Credits: 3. Contact Hours: Lecture 3.

Analysis of labor demand, job search and matching, unemployment, market determination of wages, compensating differentials, employment contracts and incentives, wage inequality and discrimination, effects of minimum wage legislation, occupation choice, labor unions. (Typically Offered: Spring)

ECON 6410: Agricultural Economics I

Credits: 3. Contact Hours: Lecture 3.

Advanced treatment of selected topics and models in agricultural economics, with policy analysis applications. Topics include: farm-level input and output choices; decision making under uncertainty; supply analysis, storage and commodity markets; risk management and hedging; crop insurance; credit markets; farmland prices; market integration.

ECON 6420: Agricultural Economics II

Credits: 3. Contact Hours: Lecture 3.

Advanced treatment of selected topics and models in agricultural economics, with policy analysis applications. Topics include: demand systems for food and agricultural goods; imperfect competition and market power in agriculture; contracts; economics of R&D and innovation; quality and product differentiation; equilibrium models for agricultural policy analysis.

ECON 6530: Financial Economics

Credits: 3. Contact Hours: Lecture 3.

Review of decision-making under uncertainty. Portfolio Theory. Theoretical foundations of asset valuation models: capital asset pricing model (CAPM), arbitrage pricing theory (APT), representative agent models, pricing of derivative securities. Complete and incomplete asset markets, credit markets, financial intermediaries, the role of government in the financial sector. Market frictions, crashes, bubbles. Applications of asset valuation models, with emphasis on their testable implications.

ECON 6550: International Trade

Credits: 3. Contact Hours: Lecture 3.

Theories of international trade; welfare and distributional aspects of trade and commercial policies. Optimal trade policies in the presence of domestic distortions; strategic trade policy; international trade and economic growth.

ECON 6570: International Finance

Credits: 3. Contact Hours: Lecture 3.

The intertemporal approach to current account determination; non-traded goods and the real exchange rate; fiscal policy in the open economy; monetary approach to balance of payments and exchange rate determination; sticky price models of the open economy; exchange-rate based stabilizations; capital inflows; financial and balance of payments crises; international business cycles.

ECON 6710: Econometrics I

Credits: 4. Contact Hours: Lecture 4, Discussion 1.

Probability and distribution theory for univariate and multivariate normal random variables, introduction to the theory of estimators for linear models, hypothesis testing and inference, introduction to large sample properties of estimators; derivation of common estimators and their properties for the classical and general multiple regression models, hypothesis testing, forecasting, implications of specification errors - missing data, left-out regressors, measurement error, stochastic regressors. (Typically Offered: Fall)

ECON 6720: Econometrics II

Credits: 4. Contact Hours: Lecture 4, Discussion 1.

Identification, estimation, and evaluation of systems of simultaneous equations; qualitative choice and limited dependent variable models; introduction to time series methods and applications, including alternative variance specifications. (Typically Offered: Spring)

ECON 6730: Microeconometrics

Credits: 3. Contact Hours: Lecture 3.

Econometric treatment of models arising in microeconomic applications. Methods are primarily concerned with the analysis of cross-section data. Topics may include: systems of demand equations in panel data settings, random utility models of discrete choices, production possibilities frontier estimation, and discrete/continuous models of participation and consumption.

ECON 6740: Macroeconometrics

Credits: 3. Contact Hours: Lecture 3.

Time-series econometric techniques and their application to macroeconomics and financial markets. Techniques may include GARCH and ARCH-M models, unit-root tests, nonlinear adjustment models, structural VARs, and cointegration tests.

ECON 6800: Advanced Resource Economics

Credits: 3. Contact Hours: Lecture 3.

Dynamic allocation of scarce, exhaustible, and renewable natural resources, including minerals and energy, soil, water, forests, and fish. Social versus private decisions. Market and nonmarket considerations. Technological change. Regulation. Dynamics and uncertainty.

ECON 6900: Advanced Topics

Credits: 1-5. Contact Hours: Lecture 5.

Repeatable.

Prereq: Instructor Permission for Course

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ECON 6940A: Research Workshop

Credits: 3. Contact Hours: Lecture 3.

Prereq: Instructor Permission for Course

Instruction in basic and applied research methods commonly used in economics. Survey methodologies, critique written work, summarize and evaluate data, prepare and present work orally, and develop an original research paper. Satisfactory-fail only. (Typically Offered: Fall)

ECON 6940B: Research Workshop

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Prereq: ECON 6940A

Writing and communicating economic research. Continuation of ECON 6940A, resulting in completion of an original research paper. Satisfactory-fail only. (Typically Offered: Spring)

ECON 6990: Research for Thesis or Dissertation

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Education (EDUC)

Courses primarily for undergraduates:

EDUC 2010: Educational Technologies in the PK-6 Classroom

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Overview of ways to use educational technologies to support instruction in PK-6 settings. Focus on pedagogical approaches that integrate technologies to support learning in the content areas. Laboratory experiences include development of activities to use web 2.0 tools, apps, multimedia, web page development, digital video and other technologies to facilitate learning and teaching. (Typically Offered: Fall, Spring)

EDUC 2020: Educational Technologies in the 7-12 Classroom

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Overview of ways to use educational technologies to support instruction in 7-12 settings. Focus on pedagogical approaches that integrate technologies to support learning in the content areas. Laboratory experiences include development of activities to use tool software, multimedia, web page development, digital video and other technologies to facilitate learning and teaching. (Typically Offered: Fall, Spring)

EDUC 2040: Social Foundations of Education in the United States: Secondary

Credits: 3. Contact Hours: Lecture 3.

Introduction to the historical and contemporary landscape of schooling in the United States. Emphasis is placed on topics and tensions in the relationship between school and society (e.g. equity of access to education and competing purposes of education) and the implications of these topics and tensions for teaching and learning at the secondary level in public schools. For prospective teachers in an ISU Secondary Educator Preparation program; open to students who are considering teaching and/or work in education as a career path. (Typically Offered: Fall, Spring, Summer)

EDUC 2050: Social Foundations of Education in the United States: Early Childhood and Elementary Education

Credits: 3. Contact Hours: Lecture 3.

Introduction to the historical and contemporary landscape of schooling in the United States. Emphasis on topics and tensions in the relationship between school and society (e.g., equity of access to education and competing purposes of education) and the implications of these topics and tensions for teaching and learning in public schools. Student in K-12 education, or a non-education major should take EDUC 2040. (Typically Offered: Fall, Spring)

EDUC 2160: Learning Community Orientation to Teacher Education

Credits: 1. Contact Hours: Lecture 1.

Learning Community for Elementary Education majors to help with their transition to university life. Offers an overview of K-8 teacher certification in Iowa as well as degree and career planning. With the help of guest speakers and peer mentors students learn about elementary teaching as a profession and are introduced to a social justice orientation to teaching. All first semester freshman Elementary Education majors are required to register. Open to those interested in pursuing education. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

EDUC 2190: Orientation to Teacher Education: English, FCS, History, Math, Science and World Language Majors

Credits: Required. Contact Hours: Lecture 1.

Overview of English, mathematics, science, family and consumer sciences and history, and world language and cultures secondary education (grades 5-12), teacher licensure requirements in Iowa and other states. Program and career planning. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 2450: Landscape of Teaching

Credits: 3. Contact Hours: Lecture 3.

Prereq: EDUC 2050; sophomore classification.

Introduction to the landscape of teaching including the exploration of outside influences that impact schools, classroom structures (including classroom management systems) that help classrooms function efficiently and effectively, and instructional planning (basic lesson design and assessment) that addresses state standards and students' needs. Open to students majoring in Elementary Education or Early Childhood Education. (Typically Offered: Fall, Spring)

EDUC 2750: International Travel Study - Pre-departure Orientation

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 1 credits.

Prereq: Instructor Permission for Course

Orientation to the international travel study, offered during the semester preceding the trip. (Typically Offered: Spring)

EDUC 2800A: Pre-Student Teaching Experience

Credits: 1-2. Contact Hours: Lecture 0.4.

Repeatable.

Prereq: Admitted to the Educator Preparation Program

Pre-Student teaching experience in school settings. Two, half days per week needed for school experience. Clinical Experience Level 2 or 3. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 2800B: Pre-Student Teaching Experience I: Educational Technologies

Credits: 1.

Prereq: EDUC 2010 or EDUC 2020 or EDUC 2030

Pre-Student teaching experience with technologies in various educational settings with K-12 technology leaders. 2 1/2-hour blocks of time needed. Clinical Experience Level 1. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 2800I: Pre-Student Teaching Experience I: Mild/Moderate Disabilities

Credits: 1. Repeatable.

Pre-Student teaching experience in mild/moderate disabilities in school settings. One, half-day per week needed for school experience. Clinical Experience Level 1. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

EDUC 2800J: Pre-Student Teaching Experience I: Mathematics Clinic

Credits: 1. Repeatable.

Early field experience where students explore and develop an understanding of research-based instructional practices that could be implemented with middle level students to teach mathematical concepts. Clinical Experience Level 1. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

EDUC 2800K: Pre-Student Teaching Experience I: Music

(Cross-listed with MUSIC 2800K).

Credits: 0.5. Repeatable.

Pre-student teaching experience in music in school settings. Permission of Music coordinator required prior to enrollment. Clinical Experience Level 1. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

EDUC 2800L: Pre-Student Teaching Experience I: Secondary Education

Credits: 0.5. Repeatable.

Pre-student teaching experience for secondary education students in school settings. One, half-day per week needed for school experience. Clinical Experience Level 1. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 2800N: Pre-Student Teaching Experience I: Elementary Education

Credits: 0.5-1. Contact Hours: Laboratory 1.5, Lecture 0.5.

Repeatable.

Pre-student teaching experience for students in school settings. One, half-day per week needed for school experience. Clinical Experience Level 1. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

EDUC 2800O: Pre-Student Teaching Experience 1: Art Education

Credits: 1. Repeatable.

Pre-student teaching experience in art education in school settings. 2 1/2-hour blocks of time needed. Clinical Experience Level 1. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 2800S: Pre-Student Teaching Experience I: English as a Second Language (ESL)

Credits: 1. Repeatable, maximum of 1 credits.

Prereq: Admitted to the Educator Preparation Program

Pre-student teaching experience in English as a Second Language. One, half-day per week needed for school experience. Graduation Restrictions: EDUC 2800 may be taken more than once for credit toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 2800T: Pre-Student Teaching Experience I: Tutoring

Credits: 1. Repeatable.

Pre-student teaching experience tutoring in a school setting focused on mathematics, literacy, and/or other content areas. Clinical Experience Level 1. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 2900: Independent Study

Credits: 1-3. Repeatable.

Prereq: 6 credits in Education, permission of instructor

Independent study, under faculty supervision, of a topic in the field of education. (Typically Offered: Fall, Spring, Summer)

EDUC 3020: Principles and Practices of Learning with Technology

Credits: 3. Contact Hours: Lecture 3.

Prereq: EDUC 2010 or EDUC 2020 or EDUC 2030

Advanced integration of learning technologies into PK-12 educational contexts. Examine current trends in using learning technologies with PK-12 students; explore current applications used in formal and informal educational settings; and discuss issues focused on technology use in education. Required for Learning Technologies Minor. (Typically Offered: Spring)

EDUC 3150: Transfer Orientation

Credits: Required. Contact Hours: Lecture 1.

Offers an overview of Elementary Education requirements, university procedures, K-8 certification in Iowa as well as degree and career planning. With the help of guest speakers and peer mentors, students learn about elementary teaching as a profession and are introduced to a social justice orientation to teaching. Learning community required of all transfer students and change of major students pursuing Elementary Education. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 3320: Educational Psychology of Early Childhood and Elementary Education

Credits: 3. Contact Hours: Lecture 3.

Prereq: PSYCH 2300 or HDFS 1020, major in Early Childhood Education or Elementary Education

Psychological theories relevant to student development, learning, and motivation. Review of assessment principles and practices. Implications of theory for teaching children and for assessing learning in educational settings with primary and intermediate grade children. (Typically Offered: Fall, Spring)

EDUC 3330: Educational Psychology

(Cross-listed with PSYCH 3330).

Credits: 3. Contact Hours: Lecture 3.

Prereq: PSYCH 2300 or HDFS 1020

Psychological theories relevant to student development, learning, and motivation. Review of assessment principles and practices. Implications of theory for teaching children and for assessing learning in K-12 educational settings, with an emphasis on grades 5 - 12. (Typically Offered: Fall, Spring)

EDUC 3470: Nature of Science

(Dual-listed with EDUC 5470).

Credits: 3. Contact Hours: Lecture 3.

The history, philosophy, and sociology of science, how scientific knowledge differs from other forms of knowledge, and the relationship of the Nature of Science to science teaching and learning.

EDUC 3550X: Teaching Multilingual Learners

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 2 times.

Focus on in teaching in schools and/or community agencies serving multilingual populations. Topics include: theories of first and second language acquisition, translanguaging, language policies and laws, strategies for teaching academic content in the mainstream classroom, creating classroom/school cultures that invite all students into learning, and the role of advocacy and professional collaboration in educational equity & excellence. (Typically Offered: Spring)

EDUC 3690X: Dilemmas in Education

Credits: 3. Contact Hours: Lecture 3.

Exploration of dilemmas in education that revolve around issues of the societal value placed on P-20 education, as the value placed on the students and professionals who work in the field, and the educational challenges facing society and individuals. Analysis, critique, and discussions will integrate current topics, historical context, and social, political, and cultural impacts within P-20 education systems. (Typically Offered: Fall, Spring)

EDUC 3700: Toying with Technology

Credits: 3.

Prereq: EDUC 2010 or EDUC 2030

Integration of learning technologies into PK-12 STEM contexts with a focus on engineering design and computational thinking. Examine current trends and explore how technology can be used to design creative and innovative hands-on experiences that promote computational thinking and problem-solving skills across STEM-related educational contexts. (Typically Offered: Fall, Spring)

EDUC 3770: Teaching Literacy in the Primary Grades

Credits: 4. Contact Hours: Lecture 4.

Prereq: Admitted to the Educator Preparation Program, EDUC 2450, SPED 2500, HDFS 2400 (ECE majors); concurrent enrollment in EDUC 4050, EDUC 4480, EDUC 4680A, and EDUC 4680C (EL ED majors) or EDUC 4380, EDUC 4680F, EDUC 4680G, SPED 3680

Theories, teaching strategies, and instructional materials pertinent to teaching reading, writing, listening, and speaking to children in kindergarten through third grade. (Typically Offered: Fall, Spring, Summer)

EDUC 3780: Teaching Literacy in the Intermediate Grades

Credits: 4. Contact Hours: Lecture 4.

Prereq: EDUC 3770; concurrent enrollment in EDUC 4050, EDUC 4490, EDUC 4680D, and EDUC 4680F; admitted into the Educator Preparation Program

Theories and processes of literacy. Application through reading and writing across the curriculum, integration of language arts, literature-based instruction, and metacognitive strategies. (Typically Offered: Fall, Spring, Summer)

EDUC 3800A: Pre-Student Teaching Experience II: Core Experience

Credits: 1-2. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Admitted to the Educator Preparation Program

Pre-Student teaching experience in school setting. Two, half-days per week needed for school experience. Clinical Experience Level 2. (Typically Offered: Fall, Spring)

EDUC 3800B: Pre-Student Teaching Experience II: Physical Science, Chemistry or Physics

Credits: 1-2. Contact Hours: Lecture 2, Laboratory 2.

Repeatable, maximum of 2 credits.

Prereq: Admitted to the Educator Preparation Program

Pre-student teaching experience in physical science, chemistry, or physics. Two, half-days per week needed for school experience. Clinical Experience Level 2. Graduation Restriction: EDUC 3800 may be taken more than once for credit toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 3800D: Pre-Student Teaching Experience II: Biological Sciences

Credits: 1-2. Contact Hours: Lecture 2, Laboratory 2.

Repeatable, maximum of 2 credits.

Prereq: Admitted to the Educator Preparation Program

Pre-student teaching experience in physical science, chemistry, or physics. Two, half-days per week needed for school experience. Clinical Experience Level 2. Graduation Restriction: EDUC 3800 may be taken more than once for credit toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 3800J: Pre-Student Teaching Experience II: Earth Sciences

Credits: 1-2. Contact Hours: Lecture 2, Laboratory 2.

Repeatable, maximum of 2 credits.

Prereq: Admitted to the Educator Preparation Program

Pre-student teaching experience in earth science. Two, half-days per week needed for school experience. Clinical Experience Level 2. Graduation Restriction: EDUC 3800 may be taken more than once for credit toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 3800K: Pre-Student Teaching Experience II: Music

(Cross-listed with MUSIC 3800K).

Credits: 1-2. Contact Hours: Lecture 1, Studio 8.

Prereq: Admitted to the Educator Preparation Program

Participation in a K-12 school setting. Permission of Music coordinator required prior to enrollment. Clinical Experience Level 2. Offered on a satisfactory-fail basis only.

EDUC 3800S: Pre-Student Teaching Experience II: English as a Second Language (ESL)

Credits: 1. Contact Hours: Laboratory 4.

Repeatable, maximum of 1 credits.

Prereq: Admitted to the Educator Preparation Program

Pre-student teaching experience in English as a Second Language. One, half-day per week needed for school experience. Clinical Experience Level 2. Graduation Restriction: EDUC 3800 may be taken more than once for credit toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 3800V: Pre-Student Teaching Experience in FCS Education: Practicum in FCS Labs

(Cross-listed with FCEDS 3800V).

Credits: 1-2. Contact Hours: Laboratory 2.

Repeatable.

Prereq: FCEDS 3060 and admission to Educator Preparation program

Laboratory experience in foods, hospitality management, culinary, prostart, textiles, fashion design, housing, and human development related to family and consumer sciences courses taught at the secondary level. Planning, implementing, managing, and assessing laboratory lessons in family and consumer sciences. Includes 24 hours practicum: unsupervised. 1/2 day of time needed in schedule. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 3950: Teaching Disciplinary Literacy

(Dual-listed with EDUC 5950).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EDUC 2040; junior classification

Analysis and application of strategies to enhance students' disciplinary literacy development in middle and secondary school setting. Research paper related to a course topic for EDUC 5950. (Typically Offered: Fall, Spring, Summer)

EDUC 4050: Social Justice Education and Teaching: Early Childhood and Elementary

Credits: 3. Contact Hours: Lecture 3.

Prereq: Concurrent enrollment in (EDUC 3780, EDUC 4490, EDUC 4680B and EDUC 4680D); Admitted to the Educator Preparation Program.

Awareness and nature of social justice in relation to the educational system; deep exploration of justice in education at the levels of self, teaching, and systems; multicultural concepts and theories; awareness of context of cultural groups -their history, perspective, needs, and contributions; problems and issues regarding prejudice, discrimination, and oppression based on race, ethnicity, socioeconomic class, gender, sexual identity and language in the school environment. Special attention is given to enacting culturally relevant teaching in grades PK through 6, along with curriculum transformation and social action in those grades. Restricted to those enrolled in Early Childhood and Elementary Education Programs. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

EDUC 4060: Social Justice Education and Teaching: Secondary

Credits: 3. Contact Hours: Lecture 3.

Awareness and nature of social justice in relation to the educational system; need for cultural competence; multicultural concepts and theories; awareness of context of cultural groups - their history, perspective, needs, and contributions; problems and issues regarding prejudice, and discrimination based on race, ethnicity, socioeconomic class, gender, sexual identity and language in the school environment. Special attention to culturally relevant teaching in grades 7 through 12, along with curriculum transformation and social action in those grades. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring, Summer)

EDUC 4070: Online Education in Pre-K-12 Classrooms: Hybrid, Virtual, and Blended Approaches

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: EDUC 2010 or EDUC 2030

Preparing educators to develop and sustain learning environments where their students are physically separated from them. Developing flexible and distance learning experiences where Pre- K-12 students expand their knowledge and improve their skills in curricular areas outside of the traditional classroom. Required for the Learning Technologies Minor. (Typically Offered: Fall, Summer)

EDUC 4160A: Supervised Student Teaching - Elementary: Primary grades (K-3)

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Supervised teaching experience in the elementary grades. (Typically Offered: Fall, Spring)

EDUC 4160B: Supervised Student Teaching - Elementary: Intermediate grades (3-6)

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Supervised teaching experience in the elementary grades. (Typically Offered: Fall, Spring)

EDUC 4160D: Supervised Student Teaching - Elementary: International Student Teaching - Primary Grades

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Supervised teaching experience in the elementary grades. (Typically Offered: Fall, Spring)

EDUC 4160E: Supervised Student Teaching - Elementary: International Student Teaching - Intermediate Grades

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Supervised teaching experience in the elementary grades. (Typically Offered: Fall, Spring)

EDUC 4160Z: Supervised Student Teaching - Elementary: English as a Second Language

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Supervised teaching experience in the elementary grades. (Typically Offered: Fall, Spring)

EDUC 4170A: Student Teaching: Social Studies-Middle School

(Dual-listed with EDUC 5170A).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in the liberal arts and sciences. (Typically Offered: Fall, Spring)

EDUC 4170B: Student Teaching: Physical Sciences

(Dual-listed with EDUC 5170B).

Credits: 1-30. Repeatable.

Evaluation of instruction, lesson planning, and teaching in physical sciences grades 5-12. (Typically Offered: Fall, Spring)

EDUC 4170C: Student Teaching: Mathematics

(Dual-listed with EDUC 5170C).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in mathematics grades 5-12. (Typically Offered: Fall, Spring)

EDUC 4170D: Student Teaching: Biological Sciences

(Dual-listed with EDUC 5170D).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in biological sciences grades 5-12. (Typically Offered: Fall, Spring)

EDUC 4170E: Student Teaching: English and Literature

(Cross-listed with ENGL 4170E).

Credits: 1-30. Repeatable.

Prereq: ENGL 4940, admission to the Educator Preparation Program, approval of coordinator the semester prior to student teaching

Full-time teaching in secondary English: long term and unit planning, lesson planning, classroom teaching practice in English language arts. (Typically Offered: Fall, Spring)

EDUC 4170F: Student Teaching: Speech

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in speech.

EDUC 4170G: Student Teaching: World Language

(Dual-listed with EDUC 5170G/ WLC 5170G). (Cross-listed with WLC 4170G).

Credits: 1-30. Repeatable.

Prereq: Minimum cumulative GPA of 2.5; Department Permission

Evaluation of instruction, lesson planning, and teaching in world languages, secondary grades. (Typically Offered: Fall, Spring)

EDUC 4170J: Student Teaching: Earth Sciences

(Dual-listed with EDUC 5170J).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in earth sciences grades 5-12. (Typically Offered: Fall, Spring)

EDUC 4170M: Student Teaching: Science - Basic

(Dual-listed with EDUC 5170M).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in basic sciences grades 5-12. (Typically Offered: Fall, Spring)

EDUC 4170N: Student Teaching: International

(Dual-listed with EDUC 5170N).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in the liberal arts and sciences. (Typically Offered: Fall, Spring)

EDUC 4170P: Student Teaching: Social Studies-High School

(Dual-listed with EDUC 5170P).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in the liberal arts and sciences. (Typically Offered: Fall, Spring)

EDUC 4170R: Student Teaching: Music-Elementary

(Dual-listed with EDUC 5170R/ MUSIC 5170R). (Cross-listed with MUSIC 4170R).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in the liberal arts and sciences. (Typically Offered: Fall, Spring)

EDUC 4170S: Student Teaching: Music-Secondary

(Dual-listed with EDUC 5170S/ MUSIC 5170S). (Cross-listed with MUSIC 4170S).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in the liberal arts and sciences. (Typically Offered: Fall, Spring)

EDUC 4170Z: Supervised Student Teaching- Secondary: English as Second Language

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in English as a Second Language grades 7-12. (Typically Offered: Fall, Spring)

EDUC 4180: Secondary Science Methods I

(Dual-listed with EDUC 5180).

Credits: 3. Contact Hours: Lecture 3.

Develop an understanding of research-based practices for effective and equitable science teaching that align with state and national standards. Emphasis is on the character and role of science inquiry, teaching behaviors and strategies, and actively engaging students in self-evaluation and evidence-based inquiry learning experiences. (Typically Offered: Fall)

EDUC 4190: Secondary Science Methods II

(Dual-listed with EDUC 5190).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EDUC 4180; (concurrent enrollment in EDUC 4800B OR EDUC 4800D, OR EDUC 4800J)

Advancing a research-based framework for effective and equitable science teaching rooted in the idea that students need opportunities to make sense of phenomena, and grapple with scientific ideas using authentic science and engineering practices while observing science safety. (Typically Offered: Spring)

EDUC 4200: Bilingualism & The Education of Latinx Youth

(Cross-listed with USLS 4200).

Credits: 3. Contact Hours: Lecture 3.

Introduction to research on bilingualism and examination of the social, historical, and political contexts of Spanish/English education in the U.S. Attention to policy environment, school program structure, mode of classroom instruction, family and community context, and attainment of bilingualism and biculturalism for Latinx youth. Meets U.S. Diversity Requirement. (Typically Offered: Fall)

EDUC 4220: Teaching and Learning Iowa History

(Dual-listed with EDUC 5220).

Credits: 3. Contact Hours: Lecture 3.

Multicultural and social justice focus on Iowa history; different theme each summer. Effective pedagogical and assessment strategies for integrating these themes into K-12 curriculum. (Typically Offered: Summer)

EDUC 4260: Principles of Secondary Education

(Dual-listed with EDUC 5260).

Credits: 3. Contact Hours: Lecture 3.

Introduction to secondary education teaching strategies, lesson planning that provides equitable learning opportunities for all students, classroom management, legal aspects of schools, professional and ethical issues, current educational issues, professional learning communities, and social-justice oriented teaching. (Typically Offered: Fall, Spring, Summer)

EDUC 4330: Teaching Social Studies in the Primary Grades

Credits: 2. Contact Hours: Lecture 2.

Emphasis is placed on providing equity and justice-oriented social studies learning experiences (e.g. curriculum content, instructional strategies, and assessment) for primary grade children. (Typically Offered: Fall, Spring)

EDUC 4380: Teaching Mathematics in the Primary Grades

Credits: 2. Contact Hours: Lecture 2.

Prereq: Concurrent enrollment in (EDUC 3770, EDUC 4680F, EDUC 4680G), MATH 1950 (minimum grade of C-), MATH 1960 (minimum grade of C-); Admitted to the Educator Preparation Program.

Develop an understanding of effective mathematics teaching practices situated in equitable pedagogies that support primary students' mathematical understanding. (Typically Offered: Fall, Spring)

EDUC 4390: Teaching Science in the Primary Grades

Credits: 2. Contact Hours: Lecture 2.

Development and application of effective methods of science teaching that align with standards and best practices. Emphasis is on research-based, equitable teaching practices that provide appropriate science learning experiences in the early elementary grades. (Typically Offered: Fall, Spring)

EDUC 4430: The Teaching of Social Studies

Credits: 3. Contact Hours: Lecture 3.

Prereq: EL ED majors: Concurrent enrollment in EDUC 3770, EDUC 4480, EDUC 4680A and EDUC 4680C or ECE majors: Concurrent enrollment in EDUC 4380, EDUC 4680F, EDUC 4680G; Admitted to Educator Preparation Program

Emphasis is placed on providing equity and justice-oriented social studies learning experiences (e.g. curriculum content, instructional strategies, and assessment) for primary and intermediate grade children. (Typically Offered: Fall, Spring, Summer)

EDUC 4480: Teaching Children Mathematics

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 1950 (minimum grade of C-), MATH 1960 (minimum grade of C-); concurrent enrollment in EDUC 3770, EDUC 4680A, EDUC 4680C, and EDUC 4430; admitted to the Educator Preparation Program

Develop an understanding of effective mathematics teaching practices situated in equitable pedagogies that support elementary students' mathematical understanding. (Typically Offered: Fall, Spring, Summer)

EDUC 4490: The Teaching of Science

Credits: 3. Contact Hours: Lecture 3.

Development and application of effective methods of science teaching that align with standards and best practices. Emphasis is on research-based, equitable teaching practices that provide appropriate science learning experiences in the elementary grades. (Typically Offered: Fall, Spring, Summer)

EDUC 4500: Ethnicity and Learning

(Dual-listed with EDUC 5500).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (EDUC 3320 or EDUC 3330), EDUC 4060

Examination of cultural relevance in education. Development and application of strategies and techniques for implementing multicultural goals and multiethnic perspectives in PreK-12 school classroom settings. Offered even-numbered years. (Typically Offered: Spring)

EDUC 4520: Assessment for Literacy and Learning

(Dual-listed with EDUC 5520).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EDUC 3780. Concurrent enrollment in EDUC 4880.

Identification, analysis and correction of reading problems in five areas: print knowledge, integration of print knowledge, oral reading fluency, vocabulary, and comprehension. (Typically Offered: Fall, Spring, Summer)

EDUC 4540: Emerging Topics in Educational Technologies

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 6 credits.

Prereq: EDUC 2010 or EDUC 2030

Development and application of emerging technology topics related to digital learning. Series of 1 credit on-line learning modules on current technology being used in education and topics being addressed.

These modules extend learning opportunities from other courses and experiences. Required for Learning Technologies Minor. (Typically Offered: Fall, Spring, Summer)

EDUC 4560: Integrating Technology into Literacy

(Dual-listed with EDUC 5560).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EDUC 2010 or EDUC 2030; EDUC 3770

Methods and strategies used to integrate technology into K-8 literacy. Examination of the use and evaluation of technology appropriate for elementary literacy classrooms. (Typically Offered: Fall, Spring)

EDUC 4590: Critical Approaches to Teaching Children's and Adolescent Literature

(Dual-listed with EDUC 5590).

Credits: 3. Contact Hours: Lecture 3.

Research and discussion of issues surrounding the classroom use of literature for children and young adults including censorship, diversity, selection, critical literacy and the influences of technology. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring, Summer)

EDUC 4680A: Pre-Student Teaching Experience III: Primary Grades, Reading and Language Arts

Credits: 1.

Prereq: Admitted to the Educator Preparation Program

Application of current methods and instructional experiences with children in a supervised K-3 elementary classroom while engaged in other elementary methods courses. Clinical Experience Level 3. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

EDUC 4680B: Pre-Student Teaching Experience III: Intermediate Grades, Reading and Language Arts

Credits: 1.

Prereq: Admitted to the Educator Preparation Program

Application of current methods and instructional experiences with children in a supervised 3-6 elementary classroom while engaged in other elementary methods courses. Clinical Experience Level 3. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

EDUC 4680C: Pre-Student Teaching Experience III: Primary Grades, Mathematics

Credits: 1.

Prereq: Admitted to the Educator Preparation Program

Application of current methods, and instructional experiences with children in a supervised K-3 elementary classroom while engaged in other elementary methods courses. Clinical Experience Level 3. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

EDUC 4680D: Pre-Student Teaching Experience III: Intermediate Grades, Science

Credits: 1.

Prereq: Admitted to the Educator Preparation Program

Application of current methods and instructional experiences with children in a supervised 3-6 elementary classroom while engaged in other elementary methods courses. Clinical Experience Level 3. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

EDUC 4680F: Pre-Student Teaching Experience III: Primary Grades Inclusive, Literacy

Credits: 1.

Prereq: Admitted to the Educator Preparation Program

Application of current methods and instructional experiences with children in a supervised K-3 inclusive elementary classroom while engaged in other elementary methods courses. Clinical Experience Level 3. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 4680G: Pre-Student Teaching Experience III: Primary Grades Inclusive, Mathematics

Credits: 1.

Prereq: Admitted to the Educator Preparation Program

Application of current methods and instructional experiences with children in a supervised K-3 inclusive elementary classroom while engaged in other elementary methods courses. Clinical Experience Level 3. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 4680I: Pre-Student Teaching Experience III: Primary Grades Inclusive, Science

Credits: 1.

Prereq: Admitted to the Educator Preparation Program

Application of current methods and instructional experiences with children in a supervised K-3 inclusive elementary classroom while engaged in other elementary methods courses. Clinical Experience Level 3. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 4680R: Pre-Student Teaching Experience II: Intermediate Grades, Reading Endorsement

Credits: 1.

Prereq: Admitted to the Educator Preparation Program

Application of current methods and instructional experiences with children in a supervised 3-6 elementary classroom while engaged in other elementary methods courses. Clinical Experience Level 3. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

EDUC 4680T: Pre-Student Teaching Experience III: Elementary

Credits: 2. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Application of current methods and instructional experiences with children in a supervised elementary classroom outside of Iowa while engaged in other elementary methods courses. Clinical Experience Level 3. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 4750: International Travel Study in Education

(Dual-listed with EDUC 5750).

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: EDUC 2750; Permission of instructor

Seminar-based course for undergraduate and graduate students to develop a better understanding around global issues related to teaching, learning, curriculum, and educational policy through international travel study. 1 to 6 week duration involving study in a country other than the US. (Typically Offered: Summer)

EDUC 4800A: Pre-Student Teaching Experience III: History/Social Sciences

(Cross-listed with HIST 4800A).

Credits: 2. Repeatable, maximum of 2 credits.

Prereq: Admitted to the Educator Preparation Program

Supervised participation in a 5-12 school setting. Permission of History/Social Sciences coordinator required prior to enrollment. Two, half-days per week needed for school experience. Clinical Supervision Level 3. (Typically Offered: Fall)

EDUC 4800B: Pre-Student Teaching Experience III: Physical Science, Chemistry, or Physics

Credits: 2. Repeatable, maximum of 2 credits.

Prereq: Admitted to the Educator Preparation Program

Supervised participation in a 5-12 school setting. Permission of program coordinator required prior to enrollment. Two, half-days per week needed for school experience. Clinical Supervision Level 3. (Typically Offered: Fall, Spring)

EDUC 4800C: Pre-Student Teaching Experience III: Mathematics

Credits: 0.5-2. Repeatable, maximum of 2 credits.

Prereq: Admitted to the Educator Preparation Program

Supervised participation mathematics in a 5-12 school setting. Permission of mathematics coordinator required prior to enrollment. Two, half-days per week needed for school experience. Clinical Experience Level 3. (Typically Offered: Fall, Spring)

EDUC 4800D: Pre-Student Teaching Experience III: Biological Sciences

Credits: 2. Repeatable, maximum of 2 credits.

Prereq: Admitted to the Educator Preparation Program

Supervised participation in a 5-12 school setting. Permission of program coordinator required prior to enrollment. Two, half-days per week needed for school experience. Clinical Supervision Level 3. (Typically Offered: Fall, Spring)

EDUC 4800E: Pre-Student Teaching Experience III: English

Credits: 1-2. Repeatable, maximum of 2 credits.

Prereq: Admitted to the Educator Preparation Program

Supervised participation in a 5-12 school setting. Permission of English coordinator required prior to enrollment. Two, half-days per week needed for school experience. Clinical Experience Level 3. (Typically Offered: Fall, Spring)

EDUC 4800G: Pre-Student Teaching Experience III: World Languages and Cultures

Credits: 1-2. Repeatable, maximum of 2 credits.

Prereq: Admitted to the Educator Preparation Program

Supervised participation in a 5-12 school setting. Permission of World Languages and Cultures coordinator required prior to enrollment. Two, half-days per week needed for school experience. Clinical Experience Level 3. (Typically Offered: Fall)

EDUC 4800J: Pre-Student Teaching Experience III: Earth Science

Credits: 2. Repeatable, maximum of 2 credits.

Prereq: Admitted to the Educator Preparation Program

Supervised participation in a 5-12 school setting. Permission of program coordinator required prior to enrollment. Two, half-days per week needed for school experience. Clinical Supervision Level 3. (Typically Offered: Fall, Spring)

EDUC 4800K: Pre-Student Teaching Experience III: Music

(Cross-listed with MUSIC 4800K).

Credits: 1-2. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Participation in a K-12 school setting. Permission of Music coordinator required prior to enrollment. Clinical Experience Level 3. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 4800S: Pre-Student Teaching Experience III: English as a Second Language (ESL)

Credits: 2. Repeatable, maximum of 2 credits.

Prereq: EDUC 2800S; ENGL 2190 or LING 2190; ENGL 2200 or LING 2200; Admitted to Educator Preparation Program

Supervised participation in a school setting. Permission of ESL area coordinator required prior to enrollment. Two, half-days per week needed for school experience. Clinical experience level 3. Offered on a satisfactory-fail basis only.

EDUC 4800T: Pre-Student Teaching Experience III: Secondary Education

Credits: 2. Repeatable, maximum of 4 credits.

Prereq: Admitted to the Educator Preparation Program

Supervised participation in a 5-12 school setting outside of Iowa. Permission of content program coordinator required prior to enrollment. Clinical Experience Level 3. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 4800V: Pre-Student Teaching Experience in FCS Education: Practicum in Diverse Settings

(Cross-listed with FCEDS 4800V).

Credits: 2. Contact Hours: Laboratory 4.

Repeatable.

Laboratory experience in foods, textiles, and human development related to family and consumer sciences exploratory programs. Planning, implementing, managing and assessing laboratory lessons in family and consumer sciences. Includes 48 hours practicum and supervised individual teaching. 1/2 day of time needed in schedule. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EDUC 4810: Philosophy of Education

(Dual-listed with EDUC 5810).

Credits: 3. Contact Hours: Lecture 3.

Introduction to philosophy of education. Emphasis is placed on historical and contemporary debates about the nature and purpose(s) of education in a just society. Possible topics include questions such as: When is one justified in claiming to know or to have learned? Who is morally responsible for a learner's education or schooling? What is a just distribution of educational opportunities? How might one teach philosophically? Offered odd-numbered years. (Typically Offered: Fall)

EDUC 4860: Methods in Elementary School World Language Instruction

(Cross-listed with WLC 4860/ LING 4860).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 25 credits in a World Language

Planning, implementation, and assessment of standards-based, student-centered, and thematic instruction in the elementary (K-8) classroom. Special emphasis on K-8 students' communicative skills, cultural knowledge, and content learning. (Typically Offered: Fall)

EDUC 4870: Methods in Secondary School World Language Instruction

(Cross-listed with WLC 4870/ LING 4870).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 25 credits in a world language; Department Permission

Theories and principles of contemporary world language learning and teaching. Special emphasis on designing instruction and assessments for active learning. Admission to teacher education required. (Typically Offered: Fall)

EDUC 4880: Supervised Tutoring in Reading

(Dual-listed with EDUC 5880).

Credits: 3. Contact Hours: Lecture 2.

Prereq: EDUC 3780; concurrent enrollment in EDUC 4520

Using formal and informal diagnostic procedures to plan and implement individualized reading instruction. Field experience in tutoring and a related research project. (Typically Offered: Fall, Spring, Summer)

EDUC 4900A: Independent Study: Education

(Cross-listed with MUSIC 4900A).

Credits: 1-30. Repeatable.

Prereq: 12 credits in MUSIC; Department Permission

Music. (Typically Offered: Fall, Spring, Summer)

EDUC 4900C: Independent Study: Curriculum Construction

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EDUC 4900D: Independent Study: Principles of Education

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EDUC 4900E: Independent Study: Methods of Teaching

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EDUC 4900F: Independent Study: Educational Psychology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EDUC 4900G: Independent Study: Digital Learning

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EDUC 4900H: Independent Study: Honors

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EDUC 4900J: Independent Study: Social and Cultural Studies

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EDUC 4900K: Independent Study: History/Social Sciences

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EDUC 4900L: Independent Study: Literacy Education

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EDUC 4900M: Independent Study: Mathematics Education

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EDUC 4900N: Independent Study: World Language

Credits: 1-3. Repeatable.

(Typically Offered: Fall, Spring, Summer)

EDUC 4900O: Independent Study: Foundations of Education

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EDUC 4900P: Independent Study: Science Education

Credits: 1-3.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring)

EDUC 4950B: Independent Study: Teaching Speech

(Cross-listed with SPCM 4950B).

Credits: 3. Contact Hours: Lecture 3.

Problems, methods, and materials related to teaching speech, theatre, and media in secondary schools. (Typically Offered: Fall)

EDUC 4970: Teaching Secondary School Mathematics

(Cross-listed with MATH 4970).

Credits: 3. Contact Hours: Lecture 3.

Develop an understanding of instructional planning, lesson implementation, and assessment in grades 5-12 mathematics, with a focus on reform-based mathematics, equity, and conceptual understanding. (Typically Offered: Fall)

EDUC 4980: Methods of Teaching History/Social Sciences

(Cross-listed with HIST 4980).

Credits: 3. Contact Hours: Lecture 3.

Theories and processes of teaching and learning secondary history/social sciences. Emphasis on development and enactment of current methods, assessments, and curriculum materials for providing appropriate learning experiences. (Typically Offered: Fall, Spring)

Courses primarily for graduate students, open to qualified undergraduates:

EDUC 5010: Foundations of Educational Technology

Credits: 3. Contact Hours: Lecture 3.

Educational philosophies and theories of teaching, learning, and technologies. Understanding of how people learn with, and through, educational technology, in many settings. Overview of significant topics in educational technology. Major learning theories, including recent debates in how educators conceive of learning; teaching and learning with technology; new literacies practices; and critical theory. (Typically Offered: Fall, Summer)

EDUC 5020: Teaching Mathematics to English Language Learners

Credits: 3. Contact Hours: Lecture 3.

Prereq: EDUC 4480 or EDUC 4970 or EDUC 5970 or permission of instructor

Understanding the needs of various English language learners, learn to use ELLs' language and culture as a resource in mathematics classrooms, and implement research-based instructional strategies that are effective to teach mathematics for ELLs. For pre-service/in-service teachers and others who will work or currently works with English language learners (ELLs). (Typically Offered: Spring, Summer)

EDUC 5030: Designing Effective Learning Environments

Credits: 3. Contact Hours: Lecture 3.

Prereq: EDUC 5010

Application of theories and models of instructional design. Design decision-making based on the analysis of performance problems and instructional inputs. Practical experience with the design and development of instruction and evaluation principles. (Typically Offered: Fall)

EDUC 5040: Evaluating Technology-based Learning Environments

(Cross-listed with HCI 5040).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EDUC 5010

Principles and procedures to plan, design, and conduct effective evaluation studies (formative, summative, usability) in different settings are studied. Opportunities to engage in real or simulated evaluation projects of substantial scope are provided. Create evaluation instruments, develop methods with which to evaluate a product or program, conduct try-outs or usability sessions, analyze the data, report the findings, and recommendations are some of the course activities. (Typically Offered: Spring)

EDUC 5050: Using Technology in Learning and Teaching

Credits: 3. Contact Hours: Lecture 3.

Teaching and learning using educational technology. Selection and evaluation of digital tools for teaching and learning. Research on instructional technology. Tool software. Trends in computer-based instruction. (Typically Offered: Fall, Spring)

EDUC 5060: Social Justice Education and Teaching: Advanced

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 graduate credits in EDUC

Engage with justice-oriented multicultural frameworks for transformative education and education research, understand equity in education in historical and contemporary contexts, develop principled approaches to critical self-reflection, interpret educational situations in justice-oriented ways, and counter inequities in education through curriculum, pedagogy, and research. (Typically Offered: Fall, Summer)

EDUC 5080: Algebra in the K-12 Classrooms

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 credits MATH AND (credit or concurrent enrollment in EDUC 4480 or EDUC 4970 or EDUC 5970)

Focus on Algebraic reasoning, concepts, and associated procedures in K-12 classrooms, especially middle level. Using algebra and algebraic reasoning to solve a real-life problem. Attention is given to algebraic habits of mind, generalization, representation, and transition from arithmetic algorithms to algebra. (Typically Offered: Fall)

EDUC 5090: Geometry in the K-12 Classrooms

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 credits MATH AND (credit or concurrent enrollment in EDUC 4480 or EDUC 4970 or EDUC 5970)

Explore geometry and measurement through research-based pedagogies in K-12 classrooms. An investigative approach involving problem solving, reasoning and proof, connections, and communication are emphasized. (Typically Offered: Fall)

EDUC 5100: Foundations of Game-based Learning

(Cross-listed with HCI 5100).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 12 graduate credits

Theories, principles and best practices of utilizing games in educational environments. Topics include the theoretical foundations of learning games and game play, identity development in online environments, and assessment of learning in and out of games. (Typically Offered: Spring)

EDUC 5110: Technology Diffusion, Leadership, and Change

Credits: 3. Contact Hours: Lecture 3.

Prereq: EDUC 5010 and EDUC 5050 and Graduate Classification

Principles and practices of technology diffusion, leadership and school change. Coursework focuses on technology diffusion broadly and implications on educational contexts. Leadership frameworks and strategies for professional development and organizational change are examined, as well as new literacy practices, critical theory, and current debates in the field. (Typically Offered: Spring)

EDUC 5120: Research Trends in Educational Technology

Credits: 3. Contact Hours: Lecture 3.

Critical review and synthesis of current research trends in educational technology. Designed for students to synthesize knowledge of issues in research, and methods of conducting research in practice. (Typically Offered: Fall)

EDUC 5130: Mathematical Problem Solving in K-12 Classrooms

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 credits MATH AND (credit or concurrent enrollment in EDUC 4480 or EDUC 4970 or EDUC 5970)

Develop problem solving strategies across all strands of mathematics. Issues surrounding the appropriate role of problem solving in K-12 mathematics classrooms are discussed, including distinctions among teaching 'about,' 'for,' and 'through' problem solving. Emphasis on task modification and mathematical modeling. (Typically Offered: Spring)

EDUC 5140: Introduction to Science Teaching and Learning

Credits: 1-4. Contact Hours: Lecture 1, Laboratory 2.

Introduction to critical issues facing science education, science education goals reflecting contemporary purposes of schooling, and how people learn science. (Typically Offered: Summer)

EDUC 5150: Action Research in Education

Credits: 3. Contact Hours: Lecture 3.

Methods of conducting and communicating action research focused on improving educational practices. Develop first cycle of action plan with purpose of investigating an educational setting. Learn to identify problems to investigate, select appropriate research methods, collect and analyze data, and draw conclusions from research. (Typically Offered: Spring)

EDUC 5170A: Student Teaching: Social Studies-Middle School

(Dual-listed with EDUC 4170A).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in the liberal arts and sciences. (Typically Offered: Fall, Spring)

EDUC 5170B: Student Teaching: Physical Sciences

(Dual-listed with EDUC 4170B).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in physical sciences grades 5-12. (Typically Offered: Fall, Spring)

EDUC 5170C: Student Teaching: Mathematics

(Dual-listed with EDUC 4170C).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in mathematics grades 5-12. (Typically Offered: Fall, Spring)

EDUC 5170D: Student Teaching: Biological Sciences

(Dual-listed with EDUC 4170D).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in biological sciences grades 5-12. (Typically Offered: Fall, Spring)

EDUC 5170E: Student Teaching: English

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Seminar-based course for undergraduate and graduate students to develop a better understanding around global issues related to teaching, learning, curriculum, and educational policy through international travel study. 1 to 6 week duration involving study in a country other than the US.

EDUC 5170G: Student Teaching: World Language

(Dual-listed with EDUC 4170G/ WLC 4170G). (Cross-listed with WLC 5170G).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in world languages, secondary grades. (Typically Offered: Fall, Spring)

EDUC 5170J: Student Teaching: Earth Sciences

(Dual-listed with EDUC 4170J).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in earth sciences grades 5-12. (Typically Offered: Fall, Spring)

EDUC 5170M: Student Teaching: Science - Basic

(Dual-listed with EDUC 4170M).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in basic sciences grades 5-12. (Typically Offered: Fall, Spring)

EDUC 5170N: Student Teaching: International

(Dual-listed with EDUC 4170N).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in the liberal arts and sciences. (Typically Offered: Fall, Spring)

EDUC 5170P: Student Teaching: Social Studies-High School

(Dual-listed with EDUC 4170P).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in the liberal arts and sciences. (Typically Offered: Fall, Spring)

EDUC 5170R: Student Teaching: Music-Elementary

(Dual-listed with EDUC 4170R/ MUSIC 4170R). (Cross-listed with MUSIC 5170R).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in the liberal arts and sciences. (Typically Offered: Fall, Spring)

EDUC 5170S: Student Teaching: Music-Secondary

(Dual-listed with EDUC 4170S/ MUSIC 4170S). (Cross-listed with MUSIC 5170S).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in the liberal arts and sciences. (Typically Offered: Fall, Spring)

EDUC 5180: Secondary Science Methods I

(Dual-listed with EDUC 4180).

Credits: 3. Contact Hours: Lecture 3.

Develop an understanding of research-based practices for effective and equitable science teaching that align with state and national standards. Emphasis is on the character and role of science inquiry, teaching behaviors and strategies, and actively engaging students in self-evaluation and evidence-based inquiry learning experiences. (Typically Offered: Fall)

EDUC 5190: Secondary Science Methods II

(Dual-listed with EDUC 4190).

Credits: 3. Contact Hours: Lecture 3.

Advancing a research-based framework for effective and equitable science teaching rooted in the idea that students need opportunities to make sense of phenomena, and grapple with scientific ideas using authentic science and engineering practices while observing science safety. (Typically Offered: Spring)

EDUC 5200: Bilingualism & The Education of Latinx Youth

Credits: 3. Contact Hours: Lecture 3.

Introduction to research on bilingualism and examination of the social, historical, and political contexts of Spanish/English education in the U.S. Attention to policy environment, school program structure, mode of classroom instruction, family and community context, and attainment of bilingualism and biculturalism for Latinx youth. Meets U.S. Diversity Requirement. (Typically Offered: Fall)

EDUC 5210: Introduction to the Teaching and Learning of Mathematics and Science

Credits: 3. Contact Hours: Lecture 3.

Provides future secondary teachers with opportunities to explore learning theories and approaches for teaching mathematics and science, especially those related to constructivism and social constructivism. Opportunities to understand how students learn mathematics and science and how to assess secondary students' understanding in these content areas. Includes 12-hours (2 full days) of classroom observation in a nearby middle or high school and may include other practical experiences in teaching math and science. (Typically Offered: Summer)

EDUC 5220: Teaching and Learning Iowa History

(Dual-listed with EDUC 4220).

Credits: 3. Contact Hours: Lecture 3.

Multicultural and social justice focus on Iowa history; different theme each summer. Effective pedagogical and assessment strategies for integrating these themes into K-12 curriculum. (Typically Offered: Summer)

EDUC 5230: Teaching Students who Struggle in Mathematics

Credits: 3. Contact Hours: Lecture 3.

Explore and implement research-based instructional practices with K-8 students who are struggling with learning essential mathematical concepts. (Typically Offered: Spring)

EDUC 5260: Principles of Secondary Education

(Dual-listed with EDUC 4260).

Credits: 3. Contact Hours: Lecture 3.

Introduction to secondary education teaching strategies, lesson planning that provides equitable learning opportunities for all students, classroom management, legal aspects of schools, professional and ethical issues, current educational issues, professional learning communities, and social-justice oriented teaching. (Typically Offered: Fall, Spring, Summer)

EDUC 5290: Educational Psychology and the Secondary Classroom

Credits: 3. Contact Hours: Lecture 3.

Analysis of psychological research theory related to learning, cognition, motivation, individual differences, and teaching techniques. Student and classroom assessment to facilitate positive learning outcomes. Adaptation and differentiation of instruction to meet individual learners' needs. This course can only be used for teacher licensure programs. It is not acceptable for use in meeting the non-licensure M.Ed., M.S. or Ph.D. requirements. (Typically Offered: Summer)

EDUC 5330: Theories of Learning

(Cross-listed with PSYCH 5330).

Credits: 3. Contact Hours: Lecture 3.

Major theories of learning and cognition in educational settings. Emphasis on behavioral, cognitive, constructivist, and sociocultural theories and their implications for educational policy and practice. (Typically Offered: Fall)

EDUC 5360: Sociocultural Theories of Learning

Credits: 3. Contact Hours: Lecture 3.

Study of sociocultural learning theories, including how knowledge is constructed through interactions and how learning is embedded in these interactions. Examination of how particular sociocultural approaches to learning can inform responsive teaching and responsive research, and impact opportunities for educational equity. (Typically Offered: Summer)

EDUC 5410: How People Learn: Implications for Teaching Science and Mathematics

Credits: 3. Contact Hours: Lecture 3.

Examination of theories of learning and motivation in science and mathematics and their application to teaching and current research in science and mathematics education.

EDUC 5460: Advanced Pedagogy in Science Education

Credits: 3. Contact Hours: Lecture 3.

Advanced examination of effective and equitable science teaching, emphasizing teacher behaviors and strategies, methods of self-evaluation, and current issues and trends in science education. Offered odd-numbered years. (Typically Offered: Spring)

EDUC 5470: Nature Of Science

(Dual-listed with EDUC 3470).

Credits: 3. Contact Hours: Lecture 3.

The history, philosophy, and sociology of science, how scientific knowledge differs from other forms of knowledge, and the relationship of the nature of science-to-science teaching and learning.

EDUC 5480: Restructuring Science Activities

Credits: 3. Contact Hours: Lecture 3.

Modification of laboratory activities and other everyday science activities so they are more congruent with how students learn, the nature of science, and national standards. (Typically Offered: Summer)

EDUC 5500: Ethnicity and Learning

(Dual-listed with EDUC 4500).

Credits: 3. Contact Hours: Lecture 3.

Examination of cultural relevance in education. Development and application of strategies and techniques for implementing multicultural goals and multiethnic perspectives in PreK-12 school classroom settings. Offered even-numbered years. (Typically Offered: Spring)

EDUC 5510: Assessment for Literacy and Learning

Credits: 3. Contact Hours: Lecture 3.

Analyzing, discussing, and researching the theory and practice of current literacy issues. (Typically Offered: Fall)

EDUC 5520: Corrective Reading

(Dual-listed with EDUC 4520).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EDUC 3780. Concurrent enrollment in EDUC 4880.

Identification, analysis and correction of reading problems in five areas: print knowledge, integration of print knowledge, oral reading fluency, vocabulary, and comprehension. (Typically Offered: Fall, Spring, Summer)

EDUC 5530: Teaching Adolescent Readers with Reading Difficulties

(Cross-listed with SPED 5530).

Credits: 3. Contact Hours: Lecture 3.

Instructional strategies for enhancing the fluency, vocabulary and comprehension of adolescents with reading difficulties. Attention to content-area reading materials and strategies. (Typically Offered: Fall, Spring)

EDUC 5550: Literacy, Leadership, and Advocacy

Credits: 3. Contact Hours: Lecture 3.

Examination of the roles of literacy specialists in diverse pre-K-12 schools and communities. Particular focus placed on current theories, research, standards, and policies relative to literacy processes and instruction, including culturally responsive literacy; successful methods of supporting teachers and other school personnel in planning, implementing, and evaluating literacy instruction for all students. (Typically Offered: Spring)

EDUC 5560: Integrating Technology into Literacy

(Dual-listed with EDUC 4560).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EDUC 2010 or EDUC 2030; EDUC 3770

Methods and strategies used to integrate technology into K-8 literacy. Examination of the use and evaluation of technology appropriate for elementary literacy classrooms. (Typically Offered: Fall, Summer)

EDUC 5580: Perspectives on Reading Comprehension

Credits: 3. Contact Hours: Lecture 3.

Critical examination of the topics central to the study of reading comprehension, including processes, development, contexts, motivation, teaching and learning, and assessment. Reading and discussion of research literature in reading comprehension and comprehension instruction. (Typically Offered: Fall)

EDUC 5590: Critical Approaches to Teaching Children's and Adolescent Literature

(Dual-listed with EDUC 4590).

Credits: 3. Contact Hours: Lecture 3.

Research and discussion of issues surrounding the classroom use of literature for children and young adults including censorship, diversity, selection, critical literacy and the influences of technology. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring, Summer)

EDUC 5650: Literacy: Connecting Research, Policy and Practice

Credits: 3. Contact Hours: Lecture 3.

Critical examination of current policy initiatives and reform efforts that affect how literacy is viewed, assessed, and practiced, as well as how literacy professionals are prepared for their roles in public schools and colleges. (Typically Offered: Fall, Spring)

EDUC 5670: Teaching Secondary Learners with Mathematics Difficulties

(Cross-listed with SPED 5670).

Credits: 3. Contact Hours: Lecture 3.

Instructional methods and assessment techniques for secondary students struggling to learn mathematics. Particular emphasis on current research, practices, and trends in mathematics interventions for at-risk students and students with disabilities.

EDUC 5680: New Media Literacies: Understanding Research and Practice

Credits: 3. Contact Hours: Lecture 3.

Designed to increase awareness and understanding of critical issues surrounding the evolving concept of literacy and examine the effect that technology has on the literacy we use every day, teach in our schools, and need in order to function as 21st century citizens. (Typically Offered: Fall)

EDUC 5690: Critical Disciplinary Literacy across the Content Areas

Credits: 3. Contact Hours: Lecture 3.

Guided by frameworks of critical literacies and sociocultural theories of disciplinary literacy, students investigate the specialized and unique histories, discourses, practices, norms, and skills of select disciplines/programs/fields. Course is intended/differentiated for graduate students from various disciplines/programs/fields. Students will design their own inquiry-based critical disciplinary literacy research project. (Typically Offered: Spring)

EDUC 5750: International Travel Study in Education

(Dual-listed with EDUC 4750).

Credits: 1-6. Repeatable, maximum of 3 times.

Prereq: 6 graduate credits and permission of instructor

Seminar-based course for undergraduate and graduate students to develop a better understanding around global issues related to teaching, learning, curriculum, and educational policy through international travel study. 1 to 6 week duration involving study in a country other than the US. (Typically Offered: Summer)

EDUC 5770: Historical Perspectives on Technology Equity: Implications for Policy and Practice

Credits: 3. Contact Hours: Lecture 3.

Examination of the definition and origin of the 'digital divide' and its relationship to the histories of racism, sexism, classism, and imperialism/globalization. Exploration of the historical, political, sociological, and economic factors that engender global inequities. Exploration and analysis of research-based alternative approaches to alleviating technology inequities in educational settings. (Typically Offered: Spring)

EDUC 5780: Pedagogy, Equality of Opportunity, and the Education of Blacks in the United States

Credits: 3. Contact Hours: Lecture 3.

Examination of the historical, social, economic, political, and legal contexts of the education of Blacks in the U.S. Educational theories and philosophies, Critical Race Theory and Black Feminist Thought form the framework for investigating broad-based, multiple issues of education for Blacks in the U.S. as they are situated in the prevailing dominant views.

EDUC 5800: Studies in the Foundations of Education in the United States

Credits: 3. Contact Hours: Lecture 3.

Introduction to the historical and contemporary landscape of schooling in the United States. Emphasis is placed on topics and tensions in the relationship between school and society (e.g. equity of access to education and competing purposes of education) and the implications of these topics and tensions for teaching and learning in public schools. Designed for students in a graduate licensure program. (Typically Offered: Summer)

EDUC 5810: Philosophy of Education

(Dual-listed with EDUC 4810).

Credits: 3. Contact Hours: Lecture 3.

Introduction to philosophy of education. Emphasis is placed on historical and contemporary debates about the nature and purpose(s) of education in a just society. Possible topics include questions such as: When is one justified in claiming to know or to have learned? Who is morally responsible for a learner's education or schooling? What is a just distribution of educational opportunities? How might one teach philosophically? Offered odd-numbered years. (Typically Offered: Fall)

EDUC 5820: History of Public Schooling in the United States

Credits: 3. Contact Hours: Lecture 3.

Examination of the history of public schools in the United States. Historicizes the development of an educational system marked by both profound expectations and extreme inequalities. Readings include primary and secondary materials.

EDUC 5830: Inequality & Schooling in the U.S.

Credits: 3. Contact Hours: Lecture 3.

General introduction to the disciplinary tools of social and cultural studies to examine historical and contemporary inequalities and attempts to disrupt them in U.S. schools. Required for all TLLP doctoral students. (Typically Offered: Spring)

EDUC 5880: Supervised Tutoring in Reading

(Dual-listed with EDUC 4880).

Credits: 3. Contact Hours: Lecture 2.

Prereq: Graduate classification; concurrent enrollment in EDUC 5880

Using formal and informal diagnostic procedures to plan and implement individualized reading instruction. Field experience in tutoring and a related research project. (Typically Offered: Fall, Spring, Summer)

EDUC 5900A: Special Topics: Curriculum

Credits: 1-3.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course
(Typically Offered: Fall, Spring)

EDUC 5900B: Special Topics: Educational Technology

Credits: 1-3.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course
(Typically Offered: Fall, Spring)

EDUC 5900C: Special Topics: Science Education

Credits: 1-3.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course
(Typically Offered: Fall, Spring)

EDUC 5900D: Special Topics: Secondary Education

Credits: 1-3.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course
(Typically Offered: Fall, Spring)

EDUC 5900F: Special Topics: Social and Cultural Studies

Credits: 1-3. Repeatable.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course
(Typically Offered: Fall, Spring)

EDUC 5900G: Special Topics: Mathematics Education

Credits: 1-3.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course
(Typically Offered: Fall, Spring)

EDUC 5900I: Special Topics: Elementary Education

Credits: 1-3.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course
(Typically Offered: Fall, Spring)

EDUC 5900J: Special Topics: World Language Education

Credits: 1-3.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course
(Typically Offered: Fall, Spring)

EDUC 5900K: Special Topics: Educational Psychology

Credits: 1-3.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course
(Typically Offered: Fall, Spring)

EDUC 5900L: Special Topics: Social Studies Education

Credits: 1-3.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course
(Typically Offered: Fall, Spring)

EDUC 5900M: Special Topics: Literacy Education

Credits: 1-3.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course
(Typically Offered: Fall, Spring)

**EDUC 5910A: Graduate Level Pre-Student Teaching Experience:
Secondary Social Studies**

Credits: 0.5-6. Repeatable.

Supervised pre-student teaching experience in Social Studies education at middle school. Supervision level 3.

EDUC 5910C: Supervised Field Experience: Elementary Education

Credits: 0.5-6.

Supervised on-the-job field experience in special area. (Typically Offered: Fall, Spring, Summer)

**EDUC 5910D: Graduate Level Pre-Student Teaching Experience:
Secondary Science**

Credits: 0.5-6. Repeatable.

Supervised pre-student teaching experience in secondary science education. Supervision level 3. (Typically Offered: Fall, Spring)

**EDUC 5910EX: Graduate Level Pre-Student Teaching Experience:
Secondary English Education**

Credits: 0.5-6. Repeatable.

Pre-Stdnt Tchng-Eng. (Typically Offered: Fall)

**EDUC 5910G: Graduate Level Pre-Student Teaching Experience:
Secondary Mathematics Education**

Credits: 0.5-6. Repeatable.

Supervised pre-student teaching experience in mathematics education. Supervision level 3. (Typically Offered: Fall, Spring)

EDUC 5910M: Supervised Field Experience: Literacy

Credits: 0.5-6.

Supervised on-the-job field experience in special area. (Typically Offered: Fall, Spring, Summer)

EDUC 5910N: Supervised Field Experience: College Teaching

Credits: 0.5-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Supervised on-the-job field experience in special area. (Typically Offered: Fall, Spring)

EDUC 5930A: Workshops: Curriculum

Credits: 1-3. Contact Hours: Lecture 3.

Prereq: 9 graduate credits in EDUC
(Typically Offered: Fall, Spring)

EDUC 5930B: Workshops: Educational Technology

Credits: 1-3. Contact Hours: Lecture 3.

Prereq: 9 graduate credits in EDUC
(Typically Offered: Fall, Spring, Summer)

EDUC 5930C: Workshops: Science Education

Credits: 1-3. Contact Hours: Lecture 3.

Prereq: 9 graduate credits in EDUC

(Typically Offered: Fall, Spring)

EDUC 5930D: Workshops: Secondary Education

Credits: 1-3. Contact Hours: Lecture 3.

Prereq: 9 graduate credits in EDUC

(Typically Offered: Fall, Spring)

EDUC 5930F: Workshops: Social and Cultural Studies

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Prereq: 9 graduate credits in EDUC

(Typically Offered: Fall, Spring)

EDUC 5930G: Workshops: Mathematics Education

Credits: 1-3.

Prereq: 9 graduate credits in EDUC

(Typically Offered: Fall, Spring)

EDUC 5930I: Workshops: Elementary Education

Credits: 1-3. Contact Hours: Lecture 3.

Prereq: 9 graduate credits in EDUC

(Typically Offered: Fall, Spring)

EDUC 5930J: Workshops: World Language Education

Credits: 1-3. Contact Hours: Lecture 3.

Prereq: 9 graduate credits in EDUC

(Typically Offered: Fall, Spring)

EDUC 5930K: Workshops: Educational Psychology

Credits: 1-3. Contact Hours: Lecture 3.

Prereq: 9 graduate credits in EDUC

(Typically Offered: Fall, Spring)

EDUC 5930L: Workshops: Social Studies Education

Credits: 1-3. Contact Hours: Lecture 3.

(Typically Offered: Fall, Spring)

EDUC 5930M: Workshops: Literacy Education

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Prereq: 9 graduate credits in EDUC

(Typically Offered: Fall, Spring)

EDUC 5940: Contemporary Curriculum Theory and Principles

Credits: 3. Contact Hours: Lecture 3.

Theoretical and historical perspectives of contemporary curriculum; social, cultural, and epistemological aspects of curriculum theory; diverse philosophical positions and approaches to understanding curriculum as it relates to educational settings. (Typically Offered: Fall)

EDUC 5950: Teaching Disciplinary Literacy

(Dual-listed with EDUC 3950).

Credits: 3. Contact Hours: Lecture 3.

Analysis and application of strategies to enhance students' disciplinary literacy development in middle and secondary school setting. Research paper related to a course topic for EDUC 5950. (Typically Offered: Fall, Spring, Summer)

EDUC 5970: Teaching Secondary School Mathematics

Credits: 3. Contact Hours: Lecture 3.

Develop an understanding of instructional planning, lesson implementation, and assessment in grades 5-12 mathematics, with a focus on reform-based mathematics, equity, and conceptual understanding. (Typically Offered: Fall)

EDUC 5990A: Creative Component: Curriculum

Credits: 1-3.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EDUC 5990B: Creative Component: Educational Technology

Credits: 1-3.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EDUC 5990C: Creative Component: Science Education

Credits: 1-3.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EDUC 5990D: Creative Component: Secondary Education

Credits: 1-3.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EDUC 5990F: Creative Component: Social and Cultural Studies

Credits: 1-3. Repeatable.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EDUC 5990G: Creative Component: Mathematics Education

Credits: 1-3.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EDUC 5990I: Creative Component: Elementary Education

Credits: 1-3.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EDUC 5990J: Creative Component: World Language Education

Credits: 1-3.

Prereq: 9 graduate credits in EDUC

(Typically Offered: Fall, Spring, Summer)

EDUC 5990K: Creative Component: Educational Psychology

Credits: 1-3.

Prereq: 9 graduate credits in EDUC

(Typically Offered: Fall, Spring, Summer)

EDUC 5990L: Creative Component: Social Studies Education

Credits: 1-3.

Prereq: 9 graduate credits in EDUC

(Typically Offered: Fall, Spring, Summer)

EDUC 5990M: Creative Component: Literacy Education

Credits: 1-3.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**EDUC 6020: Educational Inquiry in Action**

Credits: 3. Contact Hours: Lecture 3.

Opportunities to learn about a variety of faculty research in the School of Education, engage faculty in conversation about their research, and continue reflecting on the theory and practice of educational inquiry.

Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

EDUC 6030: Advanced Learning Environments Design

(Cross-listed with HCI 6030).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EDUC 5030

Exploration of advanced aspects of the learning environments design process. Application of analysis, design, development and production, evaluation, implementation, and project management principles. Theory and research in educational technology provides the foundation for design decisions. Focus on current trends in learning environment design and the production and use of educational technology. (Typically Offered: Spring)

EDUC 6080: Social Media and Education

(Cross-listed with HCI 6080).

Credits: 3. Contact Hours: Lecture 3.

Increase understanding of how social media is changing traditional concepts of identity, literacy, citizenship and more. Develop an online social presence through active social media participation. (Typically Offered: Fall)

EDUC 6100: Digital Learning in Teacher Education

Credits: 3. Contact Hours: Lecture 3.

Research on using technology in teacher education programs.

Application examples studied. Field component involving relating material from class to a teacher education situation. (Typically Offered: Fall)

EDUC 6110: Philosophical Foundations of Educational Technology

Credits: 3. Contact Hours: Lecture 3.

Prereq: 12 graduate credits in EDUC

Exploration of philosophies of science that serve as foundations for research and practice in educational technology, including positivism, post-positivism, interpretivism/constructivism, and critical theory. The roles of language, nature of truth and reality, and acceptable ways of knowing are explored in terms of their implications for educational technology design, delivery, research, and scholarship.

EDUC 6120: Socio-psychological Foundations of Educational Technology

Credits: 3. Contact Hours: Lecture 3.

Examining socio-psychological theories of educational technology, their historical development, and their implications for the research and design of learning and instructional environments. Emphasis on cognitive and social constructivist paradigms and the creation and use of learning environments supported by technology.

EDUC 6150A: Seminar: Curriculum

Credits: 1. Contact Hours: Lecture 1.

Selected topics in curriculum and instruction; an analysis of research potential; evaluation of impact upon the profession; implications for additional research. (Typically Offered: Fall, Spring)

EDUC 6150B: Seminar: Educational Technology

Credits: 1. Contact Hours: Lecture 1.

Selected topics in educational technology; an analysis of research potential; evaluation of impact upon the profession; implications for additional research. (Typically Offered: Fall, Spring)

EDUC 6150C: Seminar: Science Education

Credits: 1. Contact Hours: Lecture 1.

Selected topics in curriculum and instruction; an analysis of research potential; evaluation of impact upon the profession; implications for additional research. (Typically Offered: Fall, Spring)

EDUC 6150D: Seminar: Secondary Education

Credits: 1. Contact Hours: Lecture 1.

Selected topics in curriculum and instruction; an analysis of research potential; evaluation of impact upon the profession; implications for additional research. (Typically Offered: Fall, Spring)

EDUC 6150F: Seminar: Social and Cultural Studies

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Selected topics in curriculum and instruction; an analysis of research potential; evaluation of impact upon the profession; implications for additional research. (Typically Offered: Fall, Spring)

EDUC 6150G: Seminar: Mathematics Education

Credits: 1. Contact Hours: Lecture 1.

Selected topics in curriculum and instruction; an analysis of research potential; evaluation of impact upon the profession; implications for additional research. (Typically Offered: Fall, Spring)

EDUC 6150I: Seminar: Elementary Education

Credits: 1. Contact Hours: Lecture 1.

Selected topics in curriculum and instruction; an analysis of research potential; evaluation of impact upon the profession; implications for additional research. (Typically Offered: Fall, Spring)

EDUC 6150J: Seminar: World Language Education

Credits: 1. Contact Hours: Lecture 1.

Selected topics in curriculum and instruction; an analysis of research potential; evaluation of impact upon the profession; implications for additional research. (Typically Offered: Fall, Spring)

EDUC 6150K: Seminar: Educational Psychology

Credits: 1. Contact Hours: Lecture 1.

Selected topics in curriculum and instruction; an analysis of research potential; evaluation of impact upon the profession; implications for additional research. (Typically Offered: Fall, Spring)

EDUC 6150L: Seminar: Social Studies Education

Credits: 1. Contact Hours: Lecture 1.

Selected topics in curriculum and instruction; an analysis of research potential; evaluation of impact upon the profession; implications for additional research. (Typically Offered: Fall, Spring)

EDUC 6150M: Seminar: Literacy Education

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Selected topics in curriculum and instruction; an analysis of research potential; evaluation of impact upon the profession; implications for additional research. (Typically Offered: Fall, Spring)

EDUC 6800: Motivation in Educational Contexts

Credits: 3. Contact Hours: Lecture 3.

Current conceptualizations and research regarding motivation in educational contexts from Pre-K through college. Understanding historical development of a body of research, including critical examination of inclusivity. Implications for education and practice.

EDUC 6900B: Advanced Special Topics: Educational Technology

Credits: 1-30. Repeatable.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

EDUC 6900C: Advanced Special Topics: Science Education

Credits: 1-30. Repeatable.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

EDUC 6900D: Advanced Special Topics: Secondary Education

Credits: 1-30. Repeatable.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

EDUC 6900F: Advanced Special Topics: Social and Cultural Studies

Credits: 1-30. Repeatable.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

EDUC 6900G: Advanced Special Topics: Mathematics Education

Credits: 1-30. Repeatable.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

EDUC 6900I: Advanced Special Topics: Elementary Education

Credits: 1-30. Repeatable.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

EDUC 6900J: Advanced Special Topics: World Language Education

Credits: 1-30. Repeatable.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

EDUC 6900K: Advanced Special Topics: Educational Psychology

Credits: 1-30. Repeatable.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

EDUC 6900L: Advanced Special Topics: Social Studies Education

Credits: 1-30. Repeatable.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

EDUC 6900M: Advanced Special Topics: Literacy Education

Credits: 1-30. Repeatable.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

EDUC 6990A: Research: Curriculum

Credits: 1-30. Repeatable.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

EDUC 6990B: Research: Educational Technology

Credits: 1-30. Repeatable.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

EDUC 6990C: Research: Science Education

Credits: 1-30. Repeatable.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

EDUC 6990D: Research: Secondary Education

Credits: 1-30. Repeatable.

*Prereq: 9 graduate credits in EDUC; Instructor Permission for Course***EDUC 6990F: Research: Social and Cultural Studies**

Credits: 1-30. Repeatable.

*Prereq: 9 graduate credits in EDUC; Instructor Permission for Course***EDUC 6990G: Research: Mathematics Education**

Credits: 1-30. Repeatable.

*Prereq: 9 graduate credits in EDUC; Instructor Permission for Course***EDUC 6990I: Research: Elementary Education**

Credits: 1-30. Repeatable.

Prereq: 9 graduate credits in EDUC; Instructor Permission for Course

Educational Administration (EDADM)

Courses primarily for graduate students, open to qualified undergraduates:

EDADM 5410: Principles of Inclusive Educational Leadership

Credits: 3. Contact Hours: Lecture 3.

Basic principles of educational organizations, including an understanding of organizational behavior and theoretical approaches to administration. Exploration of substantive elements related to school reform, such as the change process, current issues in education, and developing a shared vision and mission around inclusive leadership. (Typically Offered: Fall, Spring, Summer)

EDADM 5510: Supervision for Learning Environments

Credits: 3. Contact Hours: Lecture 3.

Study of effective classroom instructional practices that reflect current principles of learning. Understanding and practice of supervisory techniques that support teachers in improving the teaching and learning process, including skills in observational data collection, data analysis, collaboration, and conferencing skills. (Typically Offered: Fall, Spring, Summer)

EDADM 5520: Contemporary Issues in Principal Leadership

Credits: 3. Contact Hours: Lecture 3.

Develops an equity-centered principal and building-level leadership understanding of school/work and community context. Emphasis placed on understanding essential tasks of building-level leadership and management; connecting management and operational decisions to mission and vision; building expertise in instructional leadership to improve teacher practice and student learning; leveraging school culture/atmosphere to provide opportunities and success for all students and their learning needs; advocacy for resources; and, examining the role of principals in a changing world. (Typically Offered: Fall, Spring, Summer)

EDADM 5540: Leading School Reform

Credits: 3. Contact Hours: Lecture 3.

Study of principles of transformational leadership and collaborative decision-making skills. Leadership activities that facilitate the development of a school culture that embraces change and school reforms that result in high quality schools dedicated to improved student achievement. (Typically Offered: Fall, Spring, Summer)

EDADM 5560: Leading for Equitable Learning in School Systems

Credits: 3. Contact Hours: Lecture 3.

This course builds on EDADM 5410, Principles of Educational Leadership, to explore more fully how a leader can establish a vision for equitable and excellent learning. It provides historical, practical and theoretical perspectives on the culture and systems of schools, particularly in an age of accountability.

EDADM 5570: Human Resource Development for Learning

Credits: 3. Contact Hours: Lecture 3.

Leadership theory and practice that focuses on the professional development of school staff to promote improved student learning. Principles of school personnel evaluation; legal issues related to hiring, retention, and dismissal; evaluation models for professional and classified staff; and effective professional development models to support lifelong learning and reflective practice. (Typically Offered: Fall, Spring, Summer)

EDADM 5580: Diverse Learning Needs

Credits: 3. Contact Hours: Lecture 3.

This course is designed to address practical and ethical dimensions of school leadership, especially related to disability status, race, gender, language status, and other minoritized statuses. Specific focus will be on the various ecological contexts of the school, the community, and the family as means of making effective use of multiple resources to enrich education. (Typically Offered: Fall, Spring, Summer)

EDADM 5590: Curriculum Leadership

Credits: 3. Contact Hours: Lecture 3.

Analysis of PK-12 school curricula (hidden, explicit, and null), including current and historical curriculum and instructional issues; design, development, and evaluation of instructional materials. Promoting a vision of learning and instructional program conducive to student learning and staff professional growth. Examining the role curricula play in maintaining and advancing bodies of thought, norms, and historic attitudes. Draws on critical curriculum leadership theories to promote socially just curriculum leadership. (Typically Offered: Fall, Spring, Summer)

EDADM 5750: Education Law and Ethics

Credits: 3. Contact Hours: Lecture 3.

Examination of constitutional, statutory, and judicial provisions as a basis for the legal operation of educational institutions. Rights and ethical responsibilities of school leaders are examined in relation to their roles and responsibilities with boards, other school personnel, and students. (Typically Offered: Fall, Spring, Summer)

EDADM 5900: Special Topics

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

EDADM 5910A: Supervised Field Experience: Elementary Principal

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

Supervised on-the-job field experience in special areas.

EDADM 5910B: Supervised Field Experience: Secondary Principal

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

Supervised on-the-job field experience in special areas.

EDADM 5930: Workshops

Credits: 1-4. Contact Hours: Lecture 4.

EDADM 5990: Creative Component Development

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Courses for graduate students:

EDADM 6150A: Seminar: Client Focus

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

In-depth study of administrative topics of contemporary interest and importance.

EDADM 6150B: Seminar: Research

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

In-depth study of administrative topics of contemporary interest and importance.

EDADM 6150C: Seminar: Quality Improvement

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

In-depth study of administrative topics of contemporary interest and importance. (Typically Offered: Fall)

EDADM 6150D: Seminar: Special Services

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

In-depth study of administrative topics of contemporary interest and importance.

EDADM 6150E: Seminar: Assessment

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

In-depth study of administrative topics of contemporary interest and importance.

EDADM 6150F: Seminar: Leadership

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

In-depth study of administrative topics of contemporary interest and importance.

EDADM 6200: Program Induction Leadership Seminar

Credits: 3. Contact Hours: Lecture 3.

Assessment of candidate skill areas, including communication, leadership, technology, and team facilitation for the development of an individualized learning plan for the program. Orientation to program expectations and leadership challenges in the context of schooling for a global society. (Typically Offered: Summer)

EDADM 6210: Aligning the System for Student Achievement

Credits: 5. Contact Hours: Lecture 5.

Alignment of system goals and leadership theory with student achievement, governance, systems thinking, and communication and collaboration with various publics. (Typically Offered: Fall)

EDADM 6220: Maximizing Human and Financial Resources for Student Achievement

Credits: 3. Contact Hours: Lecture 3.

Allocation of system resources to enhance student achievement; human resource development and negotiations; and coaching and evaluating the administrative team. (Typically Offered: Spring)

EDADM 6230: Mid-Program Leadership Seminar

Credits: 1. Contact Hours: Lecture 1.

Mid-program assessment of candidate progress and exploration of leadership strategies for working with diverse populations. (Typically Offered: Summer)

EDADM 6240: School Finance

Credits: 2. Contact Hours: Lecture 2.

General issues of school finance and managing a school district's financial responsibilities. Role of the federal, state and local governments in educational finance, tax issues, and structures; budgeting procedures; and financial analysis and accountability. Includes attendance at selected sessions of the Iowa School Business Management Academy in the spring and two additional class sessions during the summer. (Typically Offered: Summer)

EDADM 6250: Social Justice Leadership in Organizations

Credits: 3. Contact Hours: Lecture 4.

Study of the principles of transformative leadership and leadership for social justice. Exploration of scholarly and practitioner-based perspectives on equitable school organizations, with particular emphasis on how to develop culturally responsive and community oriented systems-level leadership. (Typically Offered: Fall)

EDADM 6260: Equitable School Finance

Credits: 3. Contact Hours: Lecture 3.

Examine the equitable management of a school district's financial responsibilities. Coursework addresses the role of the federal, state, and local governments in educational finance, tax issues, and structures; bonding; budgeting procedures; and financial analysis and accountability. Student attendance required at the annual Iowa School Business Management Academy. (Typically Offered: Fall, Spring)

EDADM 6270: Transformative Instructional Leadership

Credits: 3.

Accountability strategies for applying leadership theory to student achievement, evaluation, governance, systems thinking, change agency, and communication and collaboration with various publics. Engage with the PSEL and NELP standards for administrators and districts, coach and evaluate their administrative team. Conduct an analysis of PK-12 school curricula (hidden, explicit, and null), including current and historical curriculum and instructional issues; design, development, and evaluation of instructional materials. Develop a vision of learning and instructional program that promotes student learning and staff professional growth. Examine the role curricula play in maintaining and advancing bodies of thought, norms, and historic attitudes. Utilize critical curriculum leadership theories to promote socially just curriculum and instructional leadership. Clinical field work requirement embedded in course- 50hrs per course to meet the required 400 hrs. total. Offered even-numbered years. (Typically Offered: Fall). (Typically Offered: Fall)

EDADM 6310: Achieving Results Through Accountability Strategies

Credits: 5. Contact Hours: Lecture 5.

Accountability strategies for applying leadership theory to student achievement, governance, systems thinking, change agency, and communication and collaboration with various publics. (Typically Offered: Fall)

EDADM 6320: Using System Assets to Create a Culture of Learning

Credits: 3. Contact Hours: Lecture 3.

Leadership strategies to promote a culture of high student achievement; effective human capital management, including recruitment and induction of new personnel; and effective communication with parents and other patrons. (Typically Offered: Spring)

EDADM 6330: Career Induction Leadership Seminar

Credits: 1. Contact Hours: Lecture 1.

Development of entry plan for creating a culture of collaboration; professional growth plan for first year in new position; and authentic performance assessment of values and beliefs platform. (Typically Offered: Summer)

EDADM 6340: School Business Management and Accountability

Credits: 2. Contact Hours: Lecture 2.

Management of school operations; accountability and ethical business practices; risk management; school plant operations, food service and student transportation. Includes attendance at selected sessions of the Iowa School Business Management Academy in the spring and two additional class sessions during the summer. (Typically Offered: Summer)

EDADM 6350: Ethical Governance and Policy

Credits: 3. Contact Hours: Lecture 3.

Explores ethics to support equitable systems-level administrative practice, with attention to the development of personal and professional codes of ethics and social justice. Examine constitutional, statutory, and judicial provisions as a basis for the legal operation of educational institutions which serve school boards, school personnel, students, and communities. (Typically Offered: Spring)

EDADM 6360: Culturally Responsive Leadership

Credits: 3. Contact Hours: Lecture 3.

Culturally Responsive Leadership as a pillar of social justice in educational settings. Historical origins of and emerging frameworks of Culturally Responsive Leadership; contextualizing how educational leaders can embed culturally responsive practices.

EDADM 6370: Equity in HR and Fiscal Management

Credits: 3. Contact Hours: Lecture 3.

Hiring of personnel and management of school operations; accountability and ethical business practices; risk management; school plant operations, food service and student transportation. Includes attendance at selected sessions of the Iowa School Business Management Academy at the end of the spring term and three additional class sessions during the summer. SBO Academy - 18 contact hours on topics related to legal governance, human resources, risk management insurance, support services: transportation, nutrition services, facility planning, and management and fiscal management will be a part of the Iowa School Business Management Academy (ISBMA). Offered odd-numbered years. (Typically Offered: Summer)

EDADM 6510: Ethics, Spirituality, and Social Justice in Administrative Practice

Credits: 3. Contact Hours: Lecture 3.

Exploration of ethical models and practice of educational administrators. Participants develop personal and professional codes of ethics: define concepts of care, spirituality, democracy, equity, diversity, and social justice; and explain how those concepts relate to students' academic and social success. Case studies offer opportunities to consider moral and legal consequences of decision-making. Participants develop their own vision of leadership. Offered even-numbered years. (Typically Offered: Summer)

EDADM 6900: Advanced Special Topics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

EDADM 6910: Clinical Dilemmas of Practice

Credits: 1-3. Repeatable, maximum of 3 credits.

Prereq: Instructor Permission for Course

Supervised on-the-job field leadership experience in clinical dilemmas of practice. Offered on a satisfactory-fail basis only.

EDADM 6990: Dissertation Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Educational Leadership and Policy Studies (ELPS)

Courses primarily for graduate students, open to qualified undergraduates:

ELPS 5910: Social Justice Field Experience

Credits: 1-3.

Prereq: Instructor Permission for Course

Supervised field experience in equity and social justice inside/outside higher education. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:

ELPS 6150A: Thematic Seminars: Communication and Team Building

Credits: 1. Contact Hours: Lecture 1.

(Typically Offered: Fall, Spring, Summer)

ELPS 6150B: Thematic Seminars: Governance, Politics and Policies

Credits: 1. Contact Hours: Lecture 1.

(Typically Offered: Fall, Spring, Summer)

ELPS 6150C: Thematic Seminars: Law, Equity, Equality

Credits: 1. Contact Hours: Lecture 1.

(Typically Offered: Fall, Spring, Summer)

ELPS 6150D: Thematic Seminars: Ethics, Justice, and Caring

Credits: 1. Contact Hours: Lecture 1.

(Typically Offered: Fall, Spring, Summer)

ELPS 6150E: Thematic Seminars: Problem Solving and Planning

Credits: 1. Contact Hours: Lecture 1.

(Typically Offered: Fall, Spring, Summer)

ELPS 6150F: Thematic Seminars: Critical and Creative Thinking

Credits: 1. Contact Hours: Lecture 1.

(Typically Offered: Fall, Spring, Summer)

ELPS 6160: Capstone Experience

Credits: 3.

Prereq: Instructor Permission for Course

This experience is designed to explore a topic addressed in one of the thematic seminars. The product of the capstone experience is a written paper of sufficient quality to be submitted to a scholarly journal for review. (Typically Offered: Fall, Spring)

ELPS 6200: Education for Social Justice

Credits: 3. Contact Hours: Lecture 3.

Introduction to social justice theory, research, and practice from a variety of theoretical perspectives in the context of education and broader society. (Typically Offered: Fall)

ELPS 6210: Pedagogies of Dissent

(Cross-listed with WGS 6210).

Credits: 3. Contact Hours: Lecture 3.

Critical examination of the theoretical foundations of contemporary and historical pedagogical traditions that seek to challenge the status quo, expand justice, and deepen democracy. (Typically Offered: Spring)

ELPS 6220: Decolonizing Praxis

Credits: 3. Contact Hours: Lecture 3.

Critically probes the philosophical and historical foundations of indigenous epistemologies and knowledge systems. Examination of policy, social, theoretical, research, and P-20 educational issues from a decolonial perspective. (Typically Offered: Spring)

ELPS 6240: Critical Race Theory in Education

Credits: 3. Contact Hours: Lecture 3.

Exploration of the central tenets of critical race theory. Examination of policy, social and educational issues from a critical race perspective. (Typically Offered: Summer)

ELPS 6250: Gender and Sexuality in Education

Credits: 3. Contact Hours: Lecture 3.

Exploration of gender and sexuality in education. (Typically Offered: Summer)

ELPS 6260: Social Justice and Social Change in Education

Credits: 3. Contact Hours: Lecture 3.

An examination of how changes in the interest of social justice have occurred historically in education. Exploration of social movements and theories of social change. (Typically Offered: Fall)

ELPS 6300: Education Policy and Analysis

Credits: 3. Contact Hours: Lecture 3.

Introduction to current theoretical, practical, and research-based policy debates related to the P-20 educational system. Critical analysis and evaluation of government policies, initiatives, funding, and other regulatory levers related to education. Intensive reading and discussion of the nature of theory, evidence, practice of education policy. Offered even-numbered years. (Typically Offered: Spring)

ELPS 6510: Social Foundations of Education

Credits: 3. Contact Hours: Lecture 3.

Introduction to the historical and contemporary landscape of P-20 schooling in the United States. Emphasis on topics and tensions in the relationship between school and society (e.g. equity of access to education and competing purposes of education) and the implications of these topics and tensions for teaching, learning, and leadership in schools across the P-20 continuum. (Typically Offered: Fall, Spring, Summer)

ELPS 6520: Organizational Theory in P-20 Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: Graduate standing and admission to Ed.D. program

Theory of inclusive leadership and organizations for the Education Doctorate program in the School of Education. Topics for practitioner-scholars related to educational leadership, current issues in the field, and program success.

ELPS 6530: Contemporary Issues of Equity and Diversity

Credits: 3.

Contemporary issues of equity and diversity across P-20+ school settings. Relevant history, philosophy, theory, and research is highlighted to understand how equity and diversity is conceptualized, addressed, researched, and contextualized at micro and macro levels of educational settings. (Typically Offered: Fall, Spring, Summer)

ELPS 6540: Scholar-Practitioner Inquiry

Credits: 3. Contact Hours: Lecture 3.

Introductory doctoral research course addresses the fundamental concepts and procedures that form the foundations of empirical research in the social sciences and education. Orient scholar-practitioners regarding how to design an empirical research study that identifies a problem of practice, and developing the necessary knowledge and skills to complete an action research dissertation. (Typically Offered: Fall, Spring, Summer)

ELPS 6550: Qualitative Inquiry in P-20 Education

Credits: 3. Contact Hours: Lecture 3.

Prereq: Admission to Ed.D. program

Qualitative research approaches and methods for applied research in P-20 education settings; research designs, data collection, and data analysis with a focus on action research.

ELPS 6560: Statistics for P-20 Education

Credits: 3. Contact Hours: Lecture 3.

Prereq: Admission to Ed.D. program

Quantitative research approaches and methods for applied research in P-20 education settings; research designs, data collection, and data analysis with a focus on action research.

ELPS 6570: Dissertation in Practice Seminar

Credits: 3. Contact Hours: Lecture 3.

Development of dissertation in practice proposal. Formulating research questions, theoretical/conceptual frameworks, literature review, research design, and methodology. (Typically Offered: Fall, Spring, Summer)

Electrical Engineering (EE)

Courses primarily for undergraduates:

EE 1660: Professional Programs Orientation

(Cross-listed with CPRE 1660).

Credits: Required. Contact Hours: Lecture 1.

(1-0) Overview of the nature and scope of electrical engineering and computer engineering professions. Overview of portfolios. Departmental rules, advising center operations, degree requirements, program of study planning, career options, and student organizations. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EE 1850: Introduction to Electrical Engineering and Problem-Solving I

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: MATH 1430 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 1650

Project based examples from electrical engineering. Systematic thinking process for engineering problem solving. Group problem solving. Mathematical, conceptual and computer-based projects. Solving engineering problems and presenting solutions through technical reports and oral presentations. Solutions of engineering problems using computation tools and basic programming. Satisfactory placement scores can be found at: <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, BME 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count towards graduation. (Typically Offered: Fall, Spring)

EE 1860: Introduction to Electrical Engineering and Problem Solving II

Credits: 1.

Prereq: EE 1850

Project based and hands on continuation of 1850. Group skills needed to work effectively in teams. Individual interactive skills for small and large groups. Learning to use tools and methods for solving electrical engineering problems. (Typically Offered: Spring)

EE 2010: Electric Circuits

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: PHYS 2310 or PHYS 2310H; PHYS 2310L; credit or concurrent enrollment in MATH 2670

Emphasis on mathematical tools. Circuit elements (resistors, inductors, capacitors) and analysis methods including power and energy relationships. Network theorems. DC, sinusoidal steady-state, and transient analysis. AC power. Frequency response. Two port models. Diodes, PSpice. Laboratory instrumentation and experimentation. Graduation Restriction: Credit for only EE 2010 or 4420 may be used towards graduation. (Typically Offered: Fall, Spring)

EE 2240: Signals and Systems I

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: EE 2010; MATH 2670

Mathematical preliminaries. Introduction to signals and systems. Signal manipulations. System properties. LTI systems, impulse response and convolution. Fourier Series representation and properties. Continuous and discrete-time Fourier Transforms and properties. Sampling and reconstruction. Modulation and demodulation. Applications and demonstrations using Matlab. (Typically Offered: Fall, Spring)

EE 2300: Electronic Circuits and Systems

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: EE 2010; MATH 2670

Frequency domain characterization of electronic circuits and systems, transfer functions, sinusoidal steady state response. Time domain models of linear and nonlinear electronic circuits, linearization, small signal analysis. Stability and feedback circuits. Operational amplifiers, device models, linear and nonlinear applications, transfer function realizations. A/D and D/A converters, sources of distortions, converter linearity and spectral characterization, applications. Design and laboratory instrumentation and measurements. (Typically Offered: Fall, Spring)

EE 2320: Professional and Ethical Issues in Electrical and Computer Engineering

(Cross-listed with CPRE 2320).

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 2270 or EE 2850

Professional and ethical issues in electrical and computer engineering. Soft skills, including communication and leadership skills, and how they relate to the engineering profession. Case studies illustrating ethical decision making in an engineering context and differentiating between moral and professional ethics. Issues of diversity, equity, and inclusion in the engineering profession.

EE 2610: Transfer Orientation

(Cross-listed with CPRE 2610).

Credits: Required. Contact Hours: Lecture 1.

Introduction to the College of Engineering and the engineering profession specifically for transfer students. Information concerning university and college policies, procedures, and resources. Offered on a satisfactory-fail basis only.

EE 2850: Problem Solving Methods and Tools for Electrical Engineering

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Integration of field-specific computational tools for practically solving electrical engineering problems. Methods for systematically reducing problems into sequential steps compatible with computer based tools. Structuring computer programs for efficiency and maintainability. Integration of multi-platform operating systems and multi-vendor tools for solving engineering problems. Hands-on laboratory experiences using Matlab, C, and other computational tools.

EE 2940: Program Discovery

(Cross-listed with CPRE 2940).

Credits: Required. Contact Hours: Lecture 1.

Prereq: CPRE 1660 or EE 1660

The roles of professionals in computer and electrical engineering. Relationship of coursework to industry and academic careers. Issues relevant to today's world. Offered on a satisfactory-fail basis only.

EE 3030: Energy Systems and Power Electronics

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 2670; PHYS 2320 or PHYS 2320H; credit or concurrent enrollment in EE 2300

Structure of competitive electric energy systems. System operation and economic optimization. Mutual inductance, transformers. Synchronous generators. Balanced three-phase circuit analysis and power calculations. Network calculations and associated numerical algorithms. Two-port circuits. Voltage regulation. Resonance and power factor correction. DC and induction motors. Power electronic circuit applications to power supplies and motor drives. (Typically Offered: Fall, Spring)

EE 3110: Electromagnetic Fields and Waves

Credits: 4. Contact Hours: Lecture 4.

Prereq: EE 2010, MATH 2650, PHYS 2320, PHYS 2320L and Credit or concurrent enrollment in MATH 2670

Fundamentals and applications of electric and magnetic fields and materials. Electrostatics and magnetostatics, potentials, capacitance and inductance, energy, force, torque. Uniform plane electromagnetic waves, Poynting vector. Transmission lines: transient and sinusoidal steady-state conditions, reflection coefficient. (Typically Offered: Fall, Spring)

EE 3140: Electromagnetics for non Electrical Engineers

Credits: 3. Contact Hours: Lecture 3.

Prereq: PHYS 2320

Conceptual study of electromagnetism and its application in engineering and related fields. EM fundamentals, EM spectrum, radiation, radiating systems, wireless, modern concepts of physics, quantum computing, transmission lines, high speed effects, waveguides, GPS and other related phenomena will be discussed and explained with the application in mind. (Typically Offered: Fall, Spring)

EE 3210: Communication Systems I

Credits: 3. Contact Hours: Lecture 3.

Frequency domain analysis, spectral filtering, bandwidth. Linear modulation systems. Angle modulation systems. Phase locked loop, super-heterodyne receiver. Sampling and pulse code modulation. Digital data transmission, line coding, pulse shaping, multiplexing. (Typically Offered: Fall)

EE 3220: Probabilistic Methods for Electrical Engineers

(Cross-listed with STAT 3220).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EE 2240

Introduction to probability with applications to electrical engineering. Sets and events, probability space, conditional probability, total probability and Bayes' rule. Discrete and continuous random variables, cumulative distribution function, probability mass and density functions, expectation, moments, moment generating functions, multiple random variables, functions of random variables. Elements of statistics, hypothesis testing, confidence intervals, least squares. Introduction to random processes. (Typically Offered: Fall, Spring)

EE 3240: Signals and Systems II

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: EE 2240

Laplace and z-Transforms, properties and inverses. Applications to LTI systems, circuits, analog/digital filters, feedback systems, stability analysis and margins. MATLAB labwork covering these topics. (Typically Offered: Fall, Spring)

EE 3300: Integrated Electronics

(Cross-listed with CPRE 3300).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: CPRE 2810; EE 2010; credit or concurrent enrollment in EE 2300

Semiconductor technology for integrated circuits. Modeling of integrated devices including diodes, BJTs, and MOSFETs. Physical layout. Circuit simulation. Digital building blocks and digital circuit synthesis. Analysis and design of analog building blocks. Laboratory exercises and design projects with CAD tools and standard cells.

EE 3320: Semiconductor Materials and Devices

(Cross-listed with MATE 3320).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CPRE and EE majors: EE 2300, MATE majors: MATE 3170

Introduction to semiconductor material and device physics. Quantum mechanics and band theory of semiconductors. Charge carrier distributions, generation/recombination, transport properties. Physical and electrical properties and fabrication of semiconductor devices such as MOSFETs, bipolar transistors, laser diodes and LED's. (Typically Offered: Spring)

EE 3330: Electronic Systems Design

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: CPRE 2810, EE 2300

Further topics in electronic systems design: Use of sensors and actuators. High-power amplifying and switching components. Linear and switched-mode power supplies. Linear and switched-mode amplifiers. Interfacing electronic components with programmable microcontrollers. Printed circuit board technology and design tools. Laboratory exercises and design projects incorporating printed circuit technology. (Typically Offered: Fall)

EE 3410: BioMEMs and Nanotechnology

(Cross-listed with BME 3410).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BME 2200

Overview of Micro-Electro-Mechanical-System (MEMS) technologies for bioengineering, fundamentals of microfluidic device design, fabrication, and characterization, survey of microfluidic functional building blocks for lab-on-a-chip applications including mixers, valves, channels, and chambers. Topics of nanotechnology in bioengineering, nanoscale building block technologies for bioengineering including self-assembling, surface chemical treatment, nano-imprinting, nano-particles, nano-tubes, nano-wires, and stimuli-responsive biomaterials.

EE 3510: Analysis of Energy Systems

Credits: 3. Contact Hours: Lecture 3.

Energy-scientific, engineering and economic foundations. Energy utilization-global and national. Sectoral analysis of energy consumption. Relationship of energy consumption and production to economic growth and environment. Technology for energy production. Economic evaluation of energy utilization and production. Scientific basis for global warming. Environmental impact of energy production and utilization. Renewable energy. Meets International Perspectives Requirement.

EE 3880: Sustainable Engineering and International Development

(Cross-listed with ABE 3880/ CE 3880).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Junior Classification in an Engineering Major

Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report. Meets International Perspectives Requirement. (Typically Offered: Fall)

EE 3910: Open Laboratory and Design Studio

Credits: 2.

Prereq: EE 2240

Studio-based activity (guided problem-based learning and design) focusing on elements of design, measurement, data capture, and data interpretation. Team building, engineering professionalism, engineering process of review and critique, and presentation. Open design activities that may include working with other studios.

EE 3940: Program Exploration

(Cross-listed with CPRE 3940).

Credits: Required. Contact Hours: Lecture 1.

Prereq: CPRE 2940 or EE 2940

Exploration of academic and career fields for electrical and computer engineers. Examination of professionalism in the context of engineering and technology with competencies based skills. Introduction to professional portfolio development and construction. Offered on a satisfactory-fail basis only.

EE 4110: Wave Propagation and Transmission Lines

Credits: 3. Contact Hours: Lecture 3.

Prereq: EE 3110

Time varying Maxwell's equations; wave equation in an unbounded generally lossy (multi-layered) media; uniform plane waves, dielectric constant, propagation, attenuation and phase constants; wave impedance; phase and group velocities; wave polarization; reflection and transmission coefficients (at oblique incidence) at boundaries (conducting and dielectric); Doppler effect; transmission lines; propagation, attenuation, phase constants; phase velocity; characteristic impedance; load impedance and its influence; reflection and transmission coefficients; cascaded transmission lines; steady-state voltage and current; standing waves; SWR; Smith chart; matching techniques including, quarter-wave matching, single and double stub matching. (Typically Offered: Spring)

EE 4140: Microwave Engineering

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: EE 2300, EE 3110

Principles, analyses, and instrumentation used in the microwave portion of the electromagnetic spectrum. Wave theory in relation to circuit parameters. S parameters, couplers, discontinuities, and microwave device equivalent circuits. RF amplifier design, microwave sources, optimum noise figure and maximum power designs. Microwave filters and oscillators. (Typically Offered: Fall)

EE 4170: Electromagnetic Radiation, Antennas, and Propagation

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: EE 3110

Fundamental antenna concepts. Radiation from wire-and aperture-type sources. Radio transmission formulas. Wave and antenna polarization. Antenna arrays. Modern antenna topics. Practical antenna design. Antenna noise. Radiowave propagation in the presence of the earth and its atmosphere. Antenna measurements and computer aided analysis. (Typically Offered: Spring)

EE 4180: High Speed System Engineering Measurement and Testing

(Cross-listed with CPRE 4180).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: EE 2300, EE 3110

Measurement of high speed systems and mixed signal systems. Measurement accuracy and error. Network analysis and spectrum analysis used in high speed measurement and testing. Test specification process and parametric measurement. Sampling and digital signal processing concepts. Design for testability. Testing equipment. Applications. (Typically Offered: Fall)

EE 4190: Magnetism and Magnetic Materials

(Cross-listed with MATE 4190).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EE 3110 or MATE 3170 or PHYS 3640

Introduction to thermal and catalytic processes for the conversion of biomass to biofuels and other biobased products. Topics include gasification, fast pyrolysis, hydrothermal processing, syngas to synfuels, and bio-oil upgrading. Application of thermodynamics, heat transfer, and fluid dynamics to bioenergy and biofuels. Offered odd-numbered years. (Typically Offered: Fall).

EE 4220: Communication Systems II

Credits: 3. Contact Hours: Lecture 3.

Prereq: EE 3210, EE 3220 and Credit or concurrent enrollment in EE 4230

Introduction to probability and random processes; Performance of analog systems with noise; Performance of digital communication with noise; optimum receivers, transmission impairments, and error rates; Introduction to information theory and coding: source coding, channel coding, channel capacity.

EE 4230: Communication Systems Laboratory

Credits: 1. Contact Hours: Laboratory 3.

Prereq: EE 3210 and Credit or concurrent enrollment in EE 4220

Construction and evaluation of modulators, demodulators and other components for analog and digital communications. Design, simulate, and evaluate wireless communication systems and their key components. Noise measurement.

EE 4240: Introduction to Digital Signal Processing

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: EE 2240

Sampling and reconstruction. Concepts and mathematical tools in discrete-time signal and image processing with examples from communications, nondestructive evaluation (NDE), and medical imaging. Discrete-time correlation and matched-filter receivers. Discrete Fourier transform (DFT) and its fast implementation (FFT). 2-dimensional versions. Z transforms. Filter design. Realizations of discrete-time systems and quantization effects. Laboratory experiments illustrating DSP implementations and applications.

EE 4250: Machine learning: A Signal Processing Perspective

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Prereq: EE 3220/STAT 3220 or STAT 3300; and MATH 2070 or MATH 4070/5070

Background material review (probability, calculus, linear algebra), Key machine learning tools and techniques. Supervised Learning: Linear Regression, Logistic Regression, Generative algorithms for classification (Gaussian & discrete-valued case; Naive Bayes assumption), Support Vector Machines, Decision trees; Unsupervised Learning: principal components analysis (PCA), robust PCA, clustering; Introduction to Deep Learning and Neural Networks; Basic Learning Theory and Bias-Variance Tradeoff; introduction to key Bayesian estimation concepts (MMSE estimation, Kalman filter, hidden Markov models). (Typically Offered: Spring)

EE 4280X: Image Analysis using Machine Learning

Credits: 3. Contact Hours: Laboratory 2, Lecture 2.

Repeatable.

Visual recognition tasks such as image classification, localization and detection are core to applications in image understanding. Developments in neural network (aka 'deep learning') approaches have advanced the performance of these state-of-the-art visual recognition systems. Explore deep learning architectures with a focus on learning end-to-end models for tasks such as image classification. Implement, train and debug neural networks and gain a detailed understanding of research in computer vision. Image recognition problem set-up, the learning algorithms (e.g. backpropagation), practical engineering tricks for training and fine-tuning the networks. Final course project. (Typically Offered: Fall)

EE 4320: Microelectronics Fabrication Techniques

(Cross-listed with MATE 4320).

Credits: 4. Contact Hours: Lecture 2, Laboratory 4.

Prereq: CPRE and EE majors: EE 2300, MATE majors: MATE 3170

Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and micro-electro-mechanical systems (MEMS).

EE 4350: Analog VLSI Circuit Design

(Cross-listed with CPRE 4350).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: EE 3300

Basic analog integrated circuit and system design including design space exploration, performance enhancement strategies, operational amplifiers, references, integrated filters, and data converters. (Typically Offered: Spring)

EE 4360: Physics of Transistors

Credits: 3. Contact Hours: Lecture 3.

Prereq: EE 3320

Use of energy band diagrams to describe the behavior of junction devices, electron and hole currents in transistors, junction capacitance, parasitic and second-order effects, development of circuit models from the underlying physical behavior, heterojunction devices, high-speed and high-power applications, measurement techniques. (Typically Offered: Spring)

EE 4370: Electronic Properties of Materials

(Cross-listed with MATE 4370).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EE 3320 or MATE 3170 or PHYS 3220

Magnetic fields, flux density and magnetization. Magnetic materials, magnetic measurements. Magnetic properties of materials. Domains, domain walls, domain processes, magnetization curves and hysteresis. Types of magnetic order, magnetic phases and critical phenomena. Magnetic moments of electrons, theory of electron magnetism. Technological application, soft magnetic materials for electromagnets, hard magnetic materials, permanent magnets, magnetic recording technology, biomedical applications of magnetism, magnetic evaluation of materials. (Typically Offered: Spring)

EE 4380: Optoelectronic Devices and Applications

Credits: 3. Contact Hours: Lecture 3.

Prereq: EE 3110 and EE 3320

Transmission and reflection of electromagnetic plane waves. Propagation in dielectric and fiber optic waveguides. LED and laser operating principles and applications. Photodetectors and solar cells. Optical modulation and switching.

EE 4390: Nanoelectronics

Credits: 3. Contact Hours: Lecture 3.

Prereq: EE 3320 or MATE 3340

Concepts of quantum mechanics relevant to nanoelectronic devices, including quantization, tunneling, and transport; overview of some of the leading technologies for nanoelectronics, including carbon nanotubes, quantum dots, and molecular transistors; fabrication methods for building nanoelectronic devices. (Typically Offered: Spring)

EE 4420: Introduction to Circuits and Instruments

Credits: 2. Contact Hours: Lecture 1.5, Laboratory 1.

Prereq: MATH 2670; PHYS 2320; PHYS 2320L

Half-semester course. Basic circuit analysis using network theorems with time domain and Laplace transform techniques for resistive, resistive-inductive, resistive-capacitive, and resistive-inductive-capacitive circuits. Transient circuit behavior. Basic operational amplifiers and applications. Familiarization with common EE instrumentation and demonstration of basic principles. Graduation Restriction: Credit for only 2010 or 4420 may be counted toward graduation; credit FOR 4420 will not count toward graduation for EE or CPRE majors. (Typically Offered: Fall, Spring)

EE 4480: Introduction to AC Circuits and Motors

Credits: 2. Contact Hours: Lecture 1.5, Laboratory 1.

Prereq: EE 4420

Half-semester course. Basics of DC machines, stepper motors, AC induction motors, and synchronous generators. AC steady state analysis, transformers, and three-phase circuit analysis. (Typically Offered: Fall, Spring)

EE 4500: Biosensors

(Cross-listed with BME 4500).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BME 2200

Overview of biosensors and bioanalytical challenges; designing for performance including various analytical problems, ion-selective membranes, characteristics of enzymes and basics of bioaffinity sensing; fundamentals of bioselective layers including depositing films and membranes, surfaces for immobilization and bioselective agents; survey of different biosensing technologies including electroanalytical, biomembrane, optical, and acoustic-wave based sensors.

EE 4500L: Biosensors Laboratory

(Cross-listed with BME 4500L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: BME 2200; concurrent enrollment in BME 4500 or EE 4500

Laboratory course accompanying BME 4500. Design, fabrication, and characterization of various electrical, chemical, polymer, optical and acoustic sensors.

EE 4510: Engineering Acoustics

(Cross-listed with EM 4510/ ME 4510).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 2660 or MATH 2670; PHYS 2310 and 2310L

The basics of acoustic wave propagation in fluids with an emphasis on sound propagation in air. Topics include transmission and reflection of sound at a boundary; role of acoustic sources in directing sound fields; diffraction of sound around solid objects; reverberation of sound in a room; and the measurement of sound fields. (Typically Offered: Fall)

EE 4520: Electrical Machines and Power Electronic Drives

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: EE 3030, EE 3240

Basic concepts of electromagnetic energy conversion. DC motors and three-phase induction motors. Basic introduction to power electronics. Adjustable speed drives used for control of DC, induction, and AC motors. Experiments with converter topologies, DC motors, AC motors and adjustable speed drives. (Typically Offered: Spring)

EE 4550: Introduction to Energy Distribution Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: EE 3030 and Credit or concurrent enrollment in EE 3240

Overhead and underground distribution system descriptions and characteristics, load descriptions and characteristics, overhead line and underground cable models, distribution transformers, power flow and fault analysis, overcurrent protection, power factor correction, system planning and automation, and economics in a deregulated environment. (Typically Offered: Fall)

EE 4560: Power System Analysis I

Credits: 3. Contact Hours: Lecture 3.

Prereq: EE 3030 and Credit or concurrent enrollment in EE 3240

Power transmission lines and transformers, synchronous machine modeling, network analysis, power system representation, load flow. (Typically Offered: Fall)

EE 4570: Power System Analysis II

Credits: 3. Contact Hours: Lecture 3.

Prereq: EE 3030 and Credit or concurrent enrollment in EE 3240

Power system protection, symmetrical components, faults, stability. Power system operations including the new utility environment. (Typically Offered: Spring)

EE 4580: Economic Systems for Electric Power Planning

Credits: 3. Contact Hours: Lecture 3.

Prereq: EE 3030 or ECON 3010

Evolution of electric power industry. Power system operation and planning and related information systems. Linear and integer optimization methods. Short-term electricity markets and locational marginal prices. Risk management and financial derivatives. Basics of public good economics. Cost recovery models including tax treatment for transmission investments.

EE 4590: Electromechanical Wind Energy Conversion and Grid Integration

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment in EE 4520 and EE 4560

Summary of industry status and expected growth; power extraction from the air stream; operation and modeling of electric machines, and power electronics topologies for wind energy conversion; analysis of machine-grid power electronic circuits, controller interface, and collector (distribution) networks; treatment of harmonics, flicker, over/under-voltages, filters, low-voltage ride-through, and reactive compensation; relaying; effects on transmission expansion, planning and grid operation and coordination including variability, frequency control, reserves, and electricity markets; overview of storage technologies and hybrid configurations.

EE 4650: Digital VLSI Design

(Cross-listed with CPRE 4650).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: EE 3300

Digital design of integrated circuits employing very large scale integration (VLSI) methodologies. Technology considerations in design. High level hardware design languages, CMOS logic design styles, area-energy-delay design space characterization, datapath blocks: arithmetic and memory, architectures and systems on a chip (SOC) considerations. VLSI chip hardware design project. (Typically Offered: Fall)

EE 4750: Automatic Control Systems

Credits: 3. Contact Hours: Lecture 3.

Stability and performance analysis of automatic control systems. The state space, root locus, and frequency response methods for control systems design. PID control and lead-lag compensation. Computer tools for control system analysis and design. (Typically Offered: Fall)

EE 4760: Control System Simulation

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: EE 4750

Theory and practice of linear, nonlinear, and logic control systems, with hands-on labs on Modeling and Control of: Motor (model identification and validation, speed and position control using PID), Double-hinged inverted pendulum (model identification and validation, balance control using linearization and state-feedback, and swing-up control using sliding-mode), Quadcopter (model identification and validation, navigation and obstacle avoidance control using PID), PLC Assembly-line (ladder logic control for start/stop, sorting, assembly, and discharge using constructs of XIC/XIO/Timer/Counter/OSF/FIFO). (Typically Offered: Spring)

EE 4880: Eddy Current Nondestructive Evaluation

(Cross-listed with MATE 4880).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 2650 and (MATE 2160 or MATE 2730 or MATE 3920 or EE 3110 or PHYS 3640)

Electromagnetic fields of various eddy current probes. Probe field interaction with conductors, crack and other material defects. Ferromagnetic materials. Layered conductors. Elementary inversion of probe signals to characterize defects. Special techniques including remote-field, transient, potential drop nondestructive evaluation and the use of Hall sensors. Practical assignments using a 'virtual' eddy current instrument will demonstrate key concepts. Offered odd-numbered years. (Typically Offered: Fall)

EE 4890: Survey of Remote Sensing Technologies

(Cross-listed with MTEOR 4890/ ENSCI 4890/ GEOL 4890/ NREM 4890).

Credits: 3. Contact Hours: Lecture 3.

Electromagnetic-radiation principles, active and passive sensors, multispectral and hyperspectral sensors, imaging radar, SAR, thermal imaging, lidar. Examples of applications. Also offered online S. (Typically Offered: Fall)

EE 4890L: Satellite Remote Sensing Laboratory

(Cross-listed with MTEOR 4890L/ GEOL 4890L/ NREM 4890L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Completion or concurrent enrollment in MTEOR/GEOL/NREM/ EE 4890/5890

Processing and analysis of satellite sensor data (optical and radar). Provides practical applications in an environmental context. (Typically Offered: Fall)

EE 4900: Independent Study

Credits: 1-30. Repeatable.

Prereq: Senior classification in Electrical Engineering; Permission of Department

Investigation of an approved topic commensurate with the student's prerequisites.

EE 4900H: Independent Study: Honors

Credits: 1-30. Repeatable.

Prereq: Senior classification in Electrical Engineering; Permission of Department

Investigation of an approved topic commensurate with the student's prerequisites.

EE 4910: Senior Design Project I and Professionalism

(Cross-listed with CPRE 4910/ SE 4910).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: CPRE major: CPRE 2320, or or enrollment in CPRE 3080, completion of 29 cr in the CPRE prof prog, ENGL 3140 or ENGL 3140H. EE major: EE 2320, or or enrollment in EE 3220, completion of 24 cr in the EE prof prog, ENGL 3140 or ENGL 3140H. SE major: SE 3170 and SE 3390, ENGL 3090 or ENGL 3140 or ENGL 3140H. Co-req: CPRE 3080 or COMS 3520

Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and design report; design review presentation. First of two-semester team-oriented, project design and implementation experience. (Typically Offered: Fall, Spring)

EE 4920: Senior Design Project II

(Cross-listed with CPRE 4920/ SE 4920).

Credits: 2. Contact Hours: Lecture 1, Laboratory 3.

Prereq: CPRE 4910 or EE 4910

Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the design completed in EE 4910, CPRE 4910, or SE 4910 and the evaluation of project results. Technical writing of fil project report; oral presentation of project achievements; project poster. (Typically Offered: Fall, Spring)

EE 4940: Portfolio Assessment

(Cross-listed with CPRE 4940).

Credits: Required. Contact Hours: Lecture 1.

Prereq: CPRE 2320 or EE 2320 or CYBE 2340; credit or concurrent enrollment in CPRE 4910 or EE 4910

Portfolio update and evaluation. Portfolios as a tool to enhance career opportunities. Offered on a satisfactory-fail basis only.

EE 4960: Modern Optics

(Cross-listed with PHYS 4960).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment in PHYS 3220, PHYS 3650, and PHYS 4800

Review of wave and electromagnetic theory; topics selected from: reflection/refraction, interference, geometrical optics, Fourier analysis, dispersion, coherence, Fraunhofer and Fresnel diffraction, holography, quantum optics, nonlinear optics. (Typically Offered: Fall)

Courses primarily for graduate students, open to qualified undergraduates:

EE 5010: Analog and Mixed-Signal VLSI Circuit Design Techniques

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Design techniques for analog and mixed-signal VLSI circuits. Amplifiers; operational amplifiers, transconductance amplifiers, finite gain amplifiers and current amplifiers. Linear building blocks; differential amplifiers, current mirrors, references, cascading and buffering. Performance characterization of linear integrated circuits; offset, noise, sensitivity and stability. Layout considerations, simulation, yield and modeling for high-performance linear integrated circuits. (Typically Offered: Fall)

EE 5030: Power Management Integrated Circuits

Credits: 3. Contact Hours: Lecture 3.

Prereq: (EE 4350 or credit or concurrent enrollment in EE 5010) or Graduate Classification

Introducing in-depth chip-level power management integrated circuit (PMIC) designs, including switching power converters, linear regulators, charge pumps and other types of PMICs. Steady-state and dynamic response analysis and optimization of linear regulators and switching power converters with different control methodologies, such as voltage-/current-/band-band control. Chip-level circuit design considerations, optimizations and cadence simulations for PMICs, including system and block-level circuits, such as voltage reference, current source and current mirror, current sensor, ramp generator, non-overlapping power stage, and other circuits. Offered even-numbered years. (Typically Offered: Fall)

EE 5050: CMOS and BiCMOS Data Conversion Circuits

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Theory, design and applications of data conversion circuits (A/D and D/A converters) including: architectures, characterization, quantization effects, conversion algorithms, spectral performance, element matching, design for yield, and practical comparators, implementation issues. Offered even-numbered years. (Typically Offered: Spring)

EE 5060: Design of CMOS Phase-Locked Loops

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Analysis and design of phase-locked loops implemented in modern CMOS processes including: architectures, performance metrics, and characterization; noise and stability analysis; and design issues of phase-frequency detectors, charge pumps, loop filters (passive and active), voltage controlled oscillators, and frequency dividers.

EE 5070: VLSI Communication Circuits

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Phase-locked loops, frequency synthesizers, clock and data recovery circuits, theory and implementation of adaptive filters, low-noise amplifiers, mixers, power amplifiers, transmitter and receiver architectures. Offered odd-numbered years. (Typically Offered: Spring)

EE 5080: Filter Design and Applications

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Filter design concepts. Approximation and synthesis. Transformations. Continuous-time and discrete time filters. Discrete, active and integrated synthesis techniques.

EE 5090: Mixed-Signal IC Testing and Built In Self Test

Credits: 3. Contact Hours: Lecture 3.

Introduction to mixed-signal IC testing; measurement uncertainty and test validity; IEEE standard test algorithms; high performance test and built-in self test challenges; new mixed-signal test algorithms and techniques to reduce data acquisition to relax instrumentation requirements, to simplify test setup, to improve test validity, and/or to enable co-testing of heterogeneous functions. (Typically Offered: Fall, Spring, Summer)

EE 5100: Topics in Electromagnetics

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

EE 5120: Advanced Electromagnetic Field Theory I

Credits: 3. Contact Hours: Lecture 3.

Review of static electric and magnetic fields. Maxwell's equations. Circuit concepts and impedance elements. Propagation and reflection of plane waves in isotropic media. Guided electromagnetic wave. Characteristics of common waveguides and transmission lines. Propagation in anisotropic media. Special theorems and concepts. Radiation and scattering. (Typically Offered: Fall)

EE 5130: Advanced Electromagnetic Field Theory II

Credits: 3. Contact Hours: Lecture 3.

Green's functions, perturbational and variational techniques. Analysis of microstrip lines and interconnects. Spectral domain approach, waves in layered media. Integral equations and method of moments. Inverse scattering. Electromagnetic applications. (Typically Offered: Spring)

EE 5140: Microwave Engineering

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Principles, analyses, and instrumentation used in the microwave portion of the electromagnetic spectrum. Wave theory in relation to circuit parameters. S parameters, couplers, discontinuities, and microwave device equivalent circuits. RF amplifier design, microwave sources, optimum noise figure and maximum power designs. Microwave filters and oscillators. (Typically Offered: Fall)

EE 5160: Computational Methods in Electromagnetics

Credits: 3. Contact Hours: Lecture 3.

Maxwell's equations. Differential equation based methods. Finite difference and finite difference time domain methods, boundary conditions. Finite element method and applications to the analysis of practical devices. Integral equation based methods. Electric and magnetic field integral equations. Matrix solvers. Fast solution methods. (Typically Offered: Spring)

EE 5170: Electromagnetic Radiation, Antennas, and Propagation

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Fundamental antenna concepts. Radiation from wire-and aperture-type sources. Radio transmission formulas. Wave and antenna polarization. Antenna arrays. Modern antenna topics. Practical antenna design. Antenna noise. Radiowave propagation in the presence of the earth and its atmosphere. Antenna measurements and computer aided analysis. (Typically Offered: Spring)

EE 5180: Microwave Remote Sensing

(Cross-listed with AGRON 5180/ MTEOR 5180).

Credits: 3. Contact Hours: Lecture 3.

Microwave remote sensing of Earth's surface and atmosphere using satellite-based or ground-based instruments. Specific examples include remote sensing of atmospheric temperature and water vapor, precipitation, ocean salinity, and soil moisture. Offered even-numbered years. (Typically Offered: Spring)

EE 5190: Magnetism and Magnetic Materials

(Dual-listed with EDUC 5190). (Cross-listed with MSE 5190).

Credits: 3. Contact Hours: Lecture 3.

Magnetic fields, flux density and magnetization. Magnetic materials, magnetic measurements. Magnetic properties of materials. Domains, domain walls, domain processes, magnetization curves and hysteresis. Types of magnetic order, magnetic phases and critical phenomena. Magnetic moments of electrons, theory of electron magnetism. Technological application, soft magnetic materials for electromagnets, hard magnetic materials, permanent magnets, magnetic recording technology, magnetic measurements of properties for materials evaluation. Offered odd-numbered years. (Typically Offered: Fall)

EE 5210: Advanced Communications

Credits: 3. Contact Hours: Lecture 3.

Digital communication systems overview. Characterization of communication channels. Digital modulation and demodulation design and performance analysis. Channel capacity and error-control coding concepts. Waveform design for band-limited channels. Equalization. Wireless fading channels and performance. (Typically Offered: Fall)

EE 5220: Cognitive Radio Networks

(Cross-listed with CPRE 5220).

Credits: 3. Contact Hours: Lecture 3.

Topics on cognitive radio networks: Cognitive Radio Networks Architecture; Software Defined Radio Architecture; Spectrum Sensing; Spectrum management; Spectrum Sharing; Spectrum Mobility; Applications of Cognitive Radio Networks. Offered irregularly. (Typically Offered: Fall)

EE 5230: Random Processes for Communications and Signal Processing

Credits: 3. Contact Hours: Lecture 3.

Axioms of probability; Repeated trials; Functions of a random variable and multiple random variables: covariance matrix, conditional distribution, joint distribution, moments, and joint moment generating function; Mean square estimation; stochastic convergence; Some important stochastic processes: Random walk, Poisson, Wiener, and shot noise; Markov chains; Power spectral analysis; Selected applications.

EE 5240: Digital Signal Processing

Credits: 3. Contact Hours: Lecture 3.

Review: sampling and reconstruction of signals; discrete-time signals, systems, and transforms. Multi-rate digital signal processing and introduction to filter banks. Optimal linear filtering and prediction. Introductions to adaptive filtering and spectral estimation. Applications. (Typically Offered: Fall)

EE 5260: Deep Learning: Theory and Practice

Credits: 3. Contact Hours: Lecture 3.

Review of basic theoretic tools such as linear algebra and probability. Machine learning basics will then be introduced to motivate deep learning networks. Different deep learning network architectures will be studied in detail, including their training and implementations. Applications and research problems will also be surveyed at the end of the class.

EE 5270: Detection and Estimation Theory

Credits: 3. Contact Hours: Lecture 3.

Statistical estimation theory and performance measures: maximum likelihood estimation, Cramer-Rao bound, Bayesian estimation, optimal demodulation, signal design. Introduction to graphical models. Hidden Markov models and Kalman filter. Classical statistical decision theory, decision criteria, binary and composite hypothesis tests. Error probability and Chernoff bound. Applications. (Typically Offered: Spring)

EE 5290: Data Analytics in Electrical and Computer Engineering

(Cross-listed with CPRE 5290).

Credits: 3. Contact Hours: Lecture 3.

Introduces a variety of data analytics techniques - particularly those relevant for electrical and computer engineers - from a foundational perspective. Topics to be covered include techniques for classification, visualization, and parameter estimation, with applications to signals, images, matrices, and graphs. Emphasis will be placed on rigorous analysis as well as principled design of such techniques. (Typically Offered: Spring)

EE 5310: Micro and Nano Systems and Devices

Credits: 3. Contact Hours: Lecture 3.

Fundamentals of modeling and design of micro-nanosystems and devices based on various operational mechanisms. Significant hands-on experience using commercial software COMSOL to design and model micro-nanosystems and devices for biomedical and biomedicine applications among others. Experimental hands-on experience to operate the fabricated micro-nanosystems and devices in the instructor's research lab.

EE 5320: Microelectronics Fabrication Techniques

(Cross-listed with MSE 5320).

Credits: 4. Contact Hours: Lecture 2, Laboratory 4.

Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and micro-electro-mechanical systems (MEMS).

EE 5350: Physics of Semiconductors

(Cross-listed with PHYS 5350).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Basic elements of quantum theory, Fermi statistics, motion of electrons in periodic structures, crystal structure, energy bands, equilibrium carrier concentration and doping, excess carriers and recombination, carrier transport at low and high fields, space charge limited current, photo-conductivity in solids, phonons, optical properties, amorphous semiconductors, heterostructures, and surface effects. Laboratory experiments on optical properties, carrier lifetimes, mobility, defect density, doping density, photo-conductivity, diffusion length of carriers.

EE 5360: Physics of Semiconductor Devices

(Cross-listed with PHYS 5360).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EE 5350

P-n junctions, band-bending theory, tunneling phenomena, Schottky barriers, heterojunctions, bipolar transistors, field-effect transistors, negative-resistance devices and optoelectronic devices.

EE 5370: Electronic Properties of Materials

(Cross-listed with MSE 5370).

Credits: 3. Contact Hours: Lecture 3.

Magnetic fields, flux density and magnetization. Magnetic materials, magnetic measurements. Magnetic properties of materials. Domains, domain walls, domain processes, magnetization curves and hysteresis. Types of magnetic order, magnetic phases and critical phenomena. Magnetic moments of electrons, theory of electron magnetism. Technological application, soft magnetic materials for electromagnets, hard magnetic materials, permanent magnets, magnetic recording technology, biomedical applications of magnetism, magnetic evaluation of materials. (Typically Offered: Spring)

EE 5380: Optoelectronic Devices and Applications

Credits: 3. Contact Hours: Lecture 3.

Transmission and reflection of electromagnetic plane waves. Propagation in dielectric and fiber optic waveguides. LED and laser operating principles and applications. Photodetectors and solar cells. Optical modulation and switching.

EE 5520: Energy System Planning

Credits: 3. Contact Hours: Lecture 3.

Characteristics of bulk energy conversion, storage, and transport technologies. Environmental legislation. Modeling of electricity markets. Evaluation of sustainability and resiliency. Types of planning analyses: economic, multi-sector, long-term, national. Planning tools and associated optimization methods.

EE 5530: Steady State Analysis

Credits: 3. Contact Hours: Lecture 3.

Power flow, economic dispatch, unit commitment, electricity markets, automatic generation control, sparse matrix techniques, interconnected operation, voltage control. (Typically Offered: Fall)

EE 5540: Power System Dynamics

Credits: 3. Contact Hours: Lecture 3.

Dynamic performance of power systems with emphasis on stability. Modeling of system components and control equipment. Analysis of the dynamic behavior of the system in response to small and large disturbances. (Typically Offered: Spring)

EE 5550: Advanced Energy Distribution Systems

Credits: 3. Contact Hours: Lecture 3.

Transient models of distribution components, automated system planning and distribution automation, surge protection, reliability, power quality, power electronics and intelligent systems applications.

EE 5560: Power Electronic Systems

Credits: 3. Contact Hours: Lecture 3.

Converter topologies, AC/DC, DC/DC, DC/AC, AC/AC. Converter applications to do motor drives, power supplies, AC motor drives, power system utility applications (var compensators) and power quality.

EE 5590: Electromechanical Wind Energy Conversion and Grid Integration

Credits: 3. Contact Hours: Lecture 3.

Summary of industry status and expected growth; power extraction from the air stream; operation and modeling of electric machines, and power electronics topologies for wind energy conversion; analysis of machine-grid power electronic circuits, controller interface, and collector (distribution) networks; treatment of harmonics, flicker, over/under-voltages, filters, low-voltage ride-through, and reactive compensation; relaying; effects on transmission expansion, planning and grid operation and coordination including variability, frequency control, reserves, and electricity markets; overview of storage technologies and hybrid configurations.

EE 5650: Systems Engineering and Analysis

(Cross-listed with AERE 5650/ IE 5650).

Credits: 3. Contact Hours: Lecture 3.

Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test and evaluation, and systems engineering planning and organization. Graduation Restrictions: Not available for degrees in industrial engineering.

EE 5660: Avionics Systems Engineering

(Cross-listed with AERE 5660).

Credits: 3. Contact Hours: Lecture 3.

Avionics functions. Applications of systems engineering principles to avionics. Top down design of avionics systems. Automated design tools. (Typically Offered: Spring)

EE 5700: Systems Engineering Analysis and Design

Credits: 3. Contact Hours: Lecture 3.

Selected topics in abstract algebra, linear algebra, real analysis, functional analysis, and optimization methods in electrical engineering.

EE 5710: Introduction to Convex Optimization

Credits: 3. Contact Hours: Lecture 3.

Introduction to convex optimization problems emerging in electrical engineering. Efficiently solving convex optimization problems with the use of interior point algorithms software. Review of linear algebra, convex functions, convex sets, convex optimization problems, duality, disciplined convex programming, applications to optimal filtering, estimation, control and resources allocations, sensor network, distributed systems.

EE 5730: Random Signal Analysis and Kalman Filtering

(Cross-listed with AERE 5730/ ME 5730).

Credits: 3. Contact Hours: Lecture 3.

Elementary notions of probability. Random processes. Autocorrelation and spectral functions. Estimation of spectrum from finite data. Response of linear systems to random inputs. Discrete and continuous Kalman filter theory and applications. Smoothing and prediction. Linearization of nonlinear dynamics. (Typically Offered: Fall)

EE 5740: Optimal Control

(Cross-listed with AERE 5740/ ME 5740).

Credits: 3. Contact Hours: Lecture 3.

The optimal control problem. Variational approach. Pontryagin's principle, Hamilton-Jacobi equation. Dynamic programming. Time-optimal, minimum fuel, minimum energy control systems. The regulator problem. Structures and properties of optimal controls. (Typically Offered: Spring)

EE 5750: Introduction to Robust Control

(Cross-listed with AERE 5750/ ME 5750).

Credits: 3. Contact Hours: Lecture 3.

Introduction to modern robust control. Model and signal uncertainty in control systems. Uncertainty description. Stability and performance robustness to uncertainty. Solutions to the H₂, H_∞, and L₁ control problems. Tools for robustness analysis and synthesis.

EE 5760: Digital Feedback Control Systems

(Cross-listed with AERE 5760/ ME 5760).

Credits: 3. Contact Hours: Lecture 3.

Sampled data, discrete data, and the z-transform. Design of digital control systems using transform methods: root locus, frequency response and direct design methods. Design using state-space methods. Controllability, observability, pole placement, state estimators. Digital filters in control systems. Microcomputer implementation of digital filters. Finite wordlength effects. Linear quadratic optimal control in digital control systems. Simulation of digital control systems. (Typically Offered: Fall)

EE 5770: Linear Systems

(Cross-listed with AERE 5770/ ME 5770/ MATH 5770).

Credits: 3. Contact Hours: Lecture 3.

Linear algebra review. Least square method and singular value decomposition. State space modeling of linear continuous-time systems. Solution of linear systems. Controllability and observability. Canonical description of linear equations. Stability of linear systems. State feedback and pole placements. Observer design for linear systems. (Typically Offered: Fall)

EE 5780: Nonlinear Systems

(Cross-listed with AERE 5780/ ME 5780/ MATH 5780).

Credits: 3. Contact Hours: Lecture 3.

Linear vs nonlinear systems. Phase plane analysis. Bifurcation and center manifold theory. Lyapunov stability. Absolute stability of feedback systems. Input-output stability. Passivity theory and feedback linearization. Nonlinear control design techniques. (Typically Offered: Spring)

EE 5880: Eddy Current Nondestructive Evaluation

(Cross-listed with MSE 5880).

Credits: 3. Contact Hours: Lecture 3.

Electromagnetic fields of various eddy current probes. Probe field interaction with conductors, crack and other material defects. Ferromagnetic materials. Layered conductors. Elementary inversion of probe signals to characterize defects. Special techniques including remote-field, transient, potential drop nondestructive evaluation and the use of Hall sensors. Practical assignments using a 'virtual' eddy current instrument will demonstrate key concepts. Offered odd-numbered years. (Typically Offered: Fall)

EE 5890: Survey of Remote Sensing Technologies

(Cross-listed with MTEOR 5890/ ENSCI 5890/ GEOL 5890/ NREM 5890).

Credits: 3. Contact Hours: Lecture 3.

Electromagnetic-radiation principles, active and passive sensors, multispectral and hyperspectral sensors, imaging radar, SAR, thermal imaging, lidar. Examples of applications. Also offered online S. (Typically Offered: Fall)

EE 5890L: Satellite Remote Sensing Laboratory

(Cross-listed with MTEOR 5890L/ GEOL 5890L/ NREM 5890L).

Credits: Required. Contact Hours: Laboratory 3.

Processing and analysis of satellite sensor data (optical and radar). Provides practical applications in an environmental context. (Typically Offered: Fall)

EE 5900A: Special Topics: Electromagnetic Theory

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

Formulation and solution of theoretical or practical problems in electrical engineering.

EE 5900B: Special Topics: Control Systems

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

Formulation and solution of theoretical or practical problems in electrical engineering.

EE 5900E: Special Topics: Computer Engineering

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

Formulation and solution of theoretical or practical problems in electrical engineering.

EE 5900F: Special Topics: Electric Power

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

Formulation and solution of theoretical or practical problems in electrical engineering.

EE 5900G: Special Topics: Electrical Materials

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

Formulation and solution of theoretical or practical problems in electrical engineering.

EE 5900H: Special Topics: Electronic Devices and Circuits

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

Formulation and solution of theoretical or practical problems in electrical engineering.

EE 5900I: Special Topics: Signal Processing

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

Formulation and solution of theoretical or practical problems in electrical engineering.

EE 5920: Seminar in Electrical Engineering

Credits: 1-4. Contact Hours: Lecture 4.

Repeatable, maximum of 8 times.

Prereq: Instructor Permission for Course

Technical seminar presentations on topics in various areas in electrical engineering. It will have the following sections, corresponding to graduate study areas in the department: Bioengineering; Communications, signal processing, and machine learning; Electric power and energy systems; Electromagnetic, microwave, and nondestructive evaluation; Microelectronics and photonics; Systems and controls; and VLSI. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EE 5950: Independent Study

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Investigation of an approved topic commensurate with the student's prerequisites. (Typically Offered: Fall, Spring, Summer)

EE 5980: Electrical and Computer Engineering Learning Community Seminar

(Cross-listed with CPRE 5980).

Credits: Required. Contact Hours: Lecture 1.

Introduction to graduate study in Electrical and Computer Engineering at Iowa State University. Building networks, introduction to core requirements, and tools and techniques for success. Graduation Restriction: ECpE. Offered on a satisfactory-fail basis only.

EE 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Courses for graduate students:

EE 6170: Advanced Topics in Antenna Analysis and Design

Credits: 3. Contact Hours: Lecture 3.

Introduction to several advanced topics related to antenna design, analysis, and fabrication; beyond what is covered in EE 4170 or EE 5170 which primarily addresses fundamental foundations of antenna theory, analysis, and design. Topics include: Radiation integrals and methods; Polarization, in a comprehensive manner; antenna synthesis and continuous sources; Integral equations, self and mutual impedances, and vector effective length; Aperture antennas and field calculation fundamentals; Near-field to far-field transformation; Microstrip antennas; and Reconfigurable antenna fundamentals. Assignments will involve the use of numerical electromagnetic solvers such as HFSS and CST Microwave Studio. Expands skill sets in the area of numerical EM analysis, which is a critical issue for practical and advanced antenna design problems. (Typically Offered: Fall)

EE 6210: Coding Theory

Credits: 3. Contact Hours: Lecture 3.

Fundamentals of error-control coding techniques: coding gain, linear block codes. Galois fields. Cyclic codes: BCH, Reed-Solomon. Convolutional codes and the Viterbi algorithm. Trellis-coded modulation. Iterative decoding. Recent developments in coding theory.

EE 6220: Information Theory

Credits: 3. Contact Hours: Lecture 3.

Information system overview. Entropy and mutual information. Data Compression and source encoding. Discrete memoryless channel capacity. Noisy channel coding theorem. Rate distortion theory. Waveform channels. Advanced topics in information theory.

EE 6530: Advanced Topics in Electric Power System Engineering

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Advanced topics of current interest in electric power system engineering.

EE 6740: Advanced Topics in Systems Engineering

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Advanced topics of current interest in the areas of control theory, stochastic processes, digital signal processing, and image processing.

EE 6930: Entrepreneurship for Graduate Students in Science and Engineering

(Cross-listed with AGRON 6930/ BCB 6930/ ENGR 6930/ GENET 6930/ ME 6930).

Credits: 1. Contact Hours: Lecture 3.

Repeatable, maximum of 2 credits.

Understanding key topics of starting a technology based company, from development of technology-led idea to early-stage entrepreneurial business. Concepts discussed include: entrepreneurship basics, starting a business, funding your business, protecting your technology/ business IP. Subject matter experts and successful, technology-based entrepreneurs will provide real world examples from their experience with entrepreneurship. Learn about the world class entrepreneurship ecosystem at ISU and Central Iowa. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

EE 6970: Engineering Internship

(Cross-listed with CPRE 6970).

Credits: Required. Repeatable.

One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

EE 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Engineering (ENGR)

Courses primarily for undergraduates:

ENGR 1010: Engineering Orientation

Credits: Required. Contact Hours: Lecture 1.

Introduction to the College of Engineering and the engineering profession. Information concerning university and college policies, procedures, and resources. Undeclared sections: Considerations in choosing an engineering curriculum. Opportunities to interact with departments. Declared sections: Introduction to major-specific topics. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ENGR 1040: LEAD Program Orientation

Credits: 1. Contact Hours: Lecture 1.

Orientation for LEAD Learning/Living Community participants. Introduction to college and university resources, tools and techniques to promote academic, professional and social/cultural development and success. Focus on building support networks with peers, faculty, and staff. Introduction to core engineering competencies including but not limited to initiative, communication, teamwork, and cultural adaptability. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

ENGR 1050: LEAD Program Seminar

Credits: 1. Contact Hours: Lecture 1.

Seminar for LEAD Learning/Living Community participants. Focus on professional development and exposure to various engineering disciplines through hands-on lab experiences, industry visits and networking opportunities with alumni, faculty, and staff. Development of core competencies: engineering/technical knowledge, communication and teamwork. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

ENGR 1310: Learning Community Seminar

Credits: Required. Contact Hours: Lecture 1.

Peer-mentored review of course topics in engineering undeclared learning communities. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

ENGR 1500: Foundations of Leadership Development and Learning

Credits: 1. Contact Hours: Lecture 1.

Leadership development with focus on global context and awareness of events shaping the context. Exposure to theory of leadership with examples. Necessary characteristics of a leader, and strategies for leadership skills development. Exposure to non-traditional career paths for engineers. Outline of personalized leadership development. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ENGR 1600: Engineering Problems with Computer Applications**Laboratory**

Credits: 3.

Prereq: MATH 1430 or satisfactory score of 76 on mathematics placement exam

Solving engineering problems and presenting solutions through technical reports. Significant figures. Use of SI units. Graphing and curve-fitting. Flowcharting. Introduction to mechanics, statistics and engineering economics. Use of spreadsheet programs to solve and present engineering problems. Solution of engineering problems using computer programming languages. (The honors section includes application of programming to mobile robotics). Satisfactory placement scores can be found at: <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count towards graduation. (Typically Offered: Fall, Spring, Summer)

ENGR 2030: Engineering Career and Employment Preparation

Credits: 1. Contact Hours: Lecture 1.

Development of practical career knowledge and skills such as understanding employers of engineers, determining career goals, identifying employers of interest, developing effective application materials, applying for positions, networking, interviewing, and evaluating offers. Overview of professional resources and tools available to aid in the employment process. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ENGR 2500: Leadership in Engineering Teams

Credits: 1. Contact Hours: Lecture 1.

Building and sustaining decision-making engineering teams. Students will explore the interrelated processes of discerning purpose, thinking systemically, developing reflective judgment, and exercising leadership by mobilizing and setting the direction for adaptive change within a team. Industry based examples and information from engineering and natural resource sciences will be infused into the course. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ENGR 2650: Survey of the Impacts of Engineering Activity

Credits: 3. Contact Hours: Lecture 3.

Survey of the economic, environmental, societal, and political benefits and problems resulting from engineering activity. Effects of engineering projects on human health, social structures, and the environment. Examination of improvements in economic opportunities and quality of life resulting from engineering activity. Case studies of the effects of engineering activity. (Typically Offered: Fall, Spring)

ENGR 3200: International Experience Report

Credits: 3.

Critique of work/study abroad experience as it relates to professional development. Taken the semester after completion of work abroad or study abroad. Written report and presentation. Offered on a satisfactory-fail basis only. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

ENGR 3270: Voices of Public Policy

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification in engineering

Role and impact of legislative process, partisan politics, government, lobbyists, the media, expert testimony and grassroots activism on public policy. Critical analysis of context; of claims, assumptions, premises, and evidence of both sides; represented and disenfranchised populations; the ethical issues to develop personal position and courses of action to impact public policy process. (Typically Offered: Fall)

ENGR 3500: Dean's Leadership Seminar

Credits: 1. Contact Hours: Lecture 1.

Prereq: Sophomore classification in engineering

Understanding the complexities of leadership in building an organization, decision-making styles, communication, managing change, building trust, shared responsibility leadership, creating legacy, prioritizing, effective use of authority, conflict, ethics, integrity, transparency, accountability. Selection based on demonstrated commitment to leadership development. Graduation Restriction: May not apply toward a degree in Engineering. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ENGR 3960: Summer Internship

Credits: Required. Repeatable.

Prereq: Permission of Engineering Career Services

Professional work period of at least 10 weeks during the summer. Students must register for the course prior to commencing work. Offered on a satisfactory-fail basis only. (Typically Offered: Summer)

ENGR 3970: Engineering Condensed Internship

Credits: Required. Repeatable.

Prereq: Permission of Engineering Career Services

Professional work period less than 10 weeks. Students must register for the course prior to commencing work. Offered on a satisfactory-fail basis only. (Typically Offered: Summer)

ENGR 3980: Cooperative Education

Credits: Required. Repeatable.

Prereq: Permission of Engineering Career Services

Professional work period during the fall or spring semester. One semester per academic or calendar year. Students must register for the course prior to commencing work. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ENGR 4300: Entrepreneurial Product Engineering

(Cross-listed with IE 4300).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Process of innovative product development in both entrepreneurial and intra-preneurial settings. Define, prototype and validate a product concept based on competitive bench-marking, market positioning and customer requirement evaluation in a target market into a product design that is consistent with defined business goals and strategies. Combination of lecture, discussion, problem solving and case study review. (Typically Offered: Fall, Spring)

ENGR 4340X: Entrepreneurial Product Engineering Design Project

(Cross-listed with IE 4340X).

Credits: 0-99. Contact Hours: Laboratory 4, Lecture 1.

Repeatable.

Prereq: IE 4300 or ENGR 4300

Open-ended design project related to creating, validating and launching a new engineered product into the marketplace. Fundamentals related to launching new engineered products in an Entrepreneurial way. Students submit new product ideas or select from a list of company supplied ideas. Application of engineering design principles including product definition, competitive evaluation, requirements evaluation, product design, manufacturing design, manufacturing costing, prototype creation, field validation, user evaluation. (Typically Offered: Spring)

ENGR 4900E: Entrepreneurship

Credits: 1-3. Repeatable, maximum of 3 credits.

Prereq: Junior or senior classification in Engineering; College approval

(Typically Offered: Fall, Spring)

ENGR 4900L: Independent Study

Credits: 1-3. Repeatable, maximum of 3 credits.

Leadership. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

ENGR 5380: Foundations of Engineering Education

(Cross-listed with AERE 5380/ HGED 5380).

Credits: 3. Contact Hours: Lecture 3.

Introduction to the field of engineering education, with an emphasis on engineering education history, existing challenges, teaching and learning pedagogies and theories, research opportunities, and research methodologies. The course goal is to develop students as scholars and to have students think critically about engineering and education. Students will apply the knowledge gained from this course to propose a research project related to their own discipline. The proposal is intended to help students learn and apply the key elements of engineering education research. This course is intended for students with a variety of interests and career goals, including those interested in learning to conduct engineering education research, exploring research discoveries about teaching and learning, and engaging with the engineering education community. (Typically Offered: Fall)

Courses for graduate students:

ENGR 6930: Entrepreneurship for Graduate Students in Science and Engineering

(Cross-listed with AGRON 6930/ BCB 6930/ EE 6930/ GENET 6930/ ME 6930).

Credits: 1. Contact Hours: Lecture 3.

Repeatable, maximum of 2 credits.

Understanding key topics of starting a technology based company, from development of technology-led idea to early-stage entrepreneurial business. Concepts discussed include: entrepreneurship basics, starting a business, funding your business, protecting your technology/ business IP. Subject matter experts and successful, technology-based entrepreneurs will provide real world examples from their experience with entrepreneurship. Learn about the world class entrepreneurship ecosystem at ISU and Central Iowa. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

Engineering Mechanics (EM)

Courses primarily for undergraduates:

EM 3240: Mechanics of Materials

Credits: 3. Contact Hours: Lecture 3.

Prereq: CE 2740

Plane stress, plane strain, stress-strain relationships, and elements of material behavior. Application of stress and deformation analysis to members subject to centric, torsional, flexural, and combined loadings. Elementary considerations of theories of failure, buckling. (Typically Offered: Fall, Spring, Summer)

EM 3270: Mechanics of Materials Laboratory

Credits: 1. Contact Hours: Laboratory 2.

Prereq: EM 3240

Experimental determination of mechanical properties of selected engineering materials. Experimental verification of assumptions made in 3240. Use of strain measuring devices. Preparation of reports. (Typically Offered: Fall, Spring)

EM 3620: Principles of Nondestructive Testing

(Cross-listed with MATE 3620).

Credits: 3. Contact Hours: Lecture 3.

Prereq: PHYS 1320 OR PHYS 2320 or PHYS 2320H

Radiography, ultrasonic testing, magnetic particle inspection, eddy current testing, dye penetrant inspection, and other techniques. Physical bases of nondestructive tests, materials to which applicable, effects of material condition, types of defects detectable, calibration standards, and reliability safety precautions. (Typically Offered: Spring)

EM 3620L: Nondestructive Testing Laboratory

(Cross-listed with MATE 3620L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment in MATE 3620 or EM 3620

Application of nondestructive testing techniques to the detection and sizing of flaws in materials and to the characterization of material's microstructure. Included are experiments in hardness, dye penetrant, magnetic particle, x-ray, ultrasonic and eddy current testing. (Typically Offered: Fall, Spring)

EM 4170: Experimental Mechanics

(Cross-listed with AERE 4170).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: EM 3240, and MATE 2730

Introduction to fundamental concepts for force, displacement, stress and strain measurements for structures and materials applications. Strain gage theory and application. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro- and nano-scale regimes. Selected laboratory experiments. Offered even-numbered years. (Typically Offered: Fall)

EM 4240: Intermediate Mechanics of Materials

Credits: 3. Contact Hours: Lecture 3.

Prereq: EM 3240

Analysis of stresses, strains, and deflections. Torsion and bending of unsymmetrical members. Analysis of thick wall pressure vessels and shrink fit problems. Dynamic load effects, fatigue and fracture mechanics introduction. Work-strain energy methods. (Typically Offered: Fall, Spring)

EM 4250: Introduction to the Finite Element Method

Credits: 3. Contact Hours: Lecture 3.

Prereq: EM 3240 and MATH 2660 or MATH 2670

Introduction of finite element analysis through applications to one-dimensional, steady-state problems such as elastic deformation, heat and fluid flow, consolidation, beam bending, and mass transport. Transient heat conduction and wave propagation. Two-dimensional triangular and quadrilateral elements. Plane problems of torsion, thermal and potential flow, stress analysis. Simple computer programs for one- and two-dimensional problems. (Typically Offered: Spring)

EM 4510: Engineering Acoustics

(Cross-listed with EE 4510/ ME 4510).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 2660 or MATH 2670; PHYS 2310 and 2310L

The basics of acoustic wave propagation in fluids with an emphasis on sound propagation in air. Topics include transmission and reflection of sound at a boundary; role of acoustic sources in directing sound fields; diffraction of sound around solid objects; reverberation of sound in a room; and the measurement of sound fields. (Typically Offered: Fall)

EM 4800: Ultrasonic Nondestructive Evaluation

(Cross-listed with AERE 4800).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EM 3240, MATH 2660 or MATH 2670, PHYS 2320

Introduction to stress/strain, Hooke's law, and elastic wave propagation in two dimensions in isotropic media. Ultrasonic plane-wave reflection and transmission; and simple straight-crested guided waves. Transducer construction, behavior, and performance. Simple signal analysis and discrete signal processing. The last few weeks of the course are devoted to case studies. (Typically Offered: Spring)

EM 4900: Independent Study

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EM 4900H: Independent Study: Honors

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

EM 5100: Continuum Mechanics

Credits: 3. Contact Hours: Lecture 3.

Introduction to Cartesian tensors as linear vector transformations. Kinematics of continuous deformations, Lagrangian and Eulerian descriptions of motion. Fundamental equations or balance laws of continuous media, linear and angular momentum balance. Conservation laws of momentum and energy. Introduction to constitutive equations of classical elastic solids and simple fluids. Formulations and solutions of some canonical problems. (Typically Offered: Fall)

EM 5140: Advanced Mechanics of Materials

(Cross-listed with AERE 5140).

Credits: 3. Contact Hours: Lecture 3.

Theory of stress and strain, stress-strain relationships. Unsymmetrical bending, curved beams, shear center. Torsion of thin-walled noncircular sections. Equilibrium, compatibility equations. Airy stress functions. Membrane stresses in shells, thick-walled cylinders. (Typically Offered: Fall)

EM 5160: Applied Elasticity and Mechanics of Deformable Solids

Credits: 3. Contact Hours: Lecture 3.

Fundamental mechanics of linear elasticity, formulation and solution of simple elastostatic boundary value problems. Kinematics of small deformations, constitutive equations for isotropic and anisotropic media. Field equations for elastic solids, plane strain/plane stress and some classic analytical solutions such as Boussinesq, Hertz, Kirsch, Lamé, and Mitchell. Stress functions and potential methods and introduction to finite elements. (Typically Offered: Spring)

EM 5170: Experimental Mechanics

(Cross-listed with AERE 5170).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Introduction to fundamental concepts for force, displacement, stress and strain measurements for structures and materials applications. Strain gage theory and application. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro- and nano-scale regimes. Selected laboratory experiments. Offered even-numbered years. (Typically Offered: Fall)

EM 5180: Waves in Elastic Solids with Applications to Ultrasonic Nondestructive Evaluation

Credits: 3. Contact Hours: Lecture 3.

Propagation of bulk waves, surface waves, and guided waves in isotropic and anisotropic elastic media. Transmission and reflection of waves at plane and curved interfaces. Radiation of sources with application to ultrasonic transducer beam modeling. Elastic wave scattering from cracks and inclusions. Reciprocity principles and their use in the development of an ultrasonic measurement model. Characterization and measurement of material attenuation. (Typically Offered: Fall)

EM 5250: Finite Element Analysis

(Cross-listed with AERE 5250).

Credits: 3. Contact Hours: Lecture 3.

Variational and weighted residual approach to finite element equations. Emphasis on two- and three-dimensional problems in solid mechanics. Isoparametric element formulation, higher order elements, numerical integration, imposition of constraints and penalty, convergence, and other more advanced topics. Use of two- and three-dimensional computer programs. Dynamic and vibrational problems, eigenvalues, and time integration. Introduction to geometric and material nonlinearities. (Typically Offered: Spring)

EM 5260: Boundary Element Methods in Engineering

Credits: 3. Contact Hours: Lecture 3.

Introductory boundary element methods through plane problems. Singular integrals, Cauchy principal values, integral representations and boundary integrals in one dimension. Direct and indirect formulations. Plane potential and elastostatic problems. Higher order elements, numerical integration. Regularizations. Body forces and infinite regions. Specialized fundamental solutions, half-plane and axisymmetric problems. Diffusion and wave problems. Coupling with finite elements. Offered even-numbered years. (Typically Offered: Fall)

EM 5430: Introduction to Random Vibrations and Nonlinear Dynamics

(Cross-listed with ME 5430).

Credits: 3. Contact Hours: Lecture 3.

Vibrations of continuous systems. Nonlinear vibration phenomena, perturbation expansions; methods of multiple time scales and slowly-varying amplitude and phase. Characteristics of random vibrations; random processes, probability distributions, spectral density and its significance, the normal or Gaussian random process. Transmission of random vibration, response of simple single and two-degree-of-freedom systems to stationary random excitation. Fatigue failure due to random excitation. Offered odd-numbered years. (Typically Offered: Spring)

EM 5480: Advanced Engineering Dynamics

Credits: 3. Contact Hours: Lecture 3.

Prereq: EM 3450, MATH 2660 or MATH 2670

3-D kinematics and dynamics of particles and rigid bodies. Coordinate systems, calculus of variations. Lagrange's equations with constraints, modified Euler's equations, torque-free motion of rigid bodies in 3-D, moment equations with constraints. Offered even-numbered years. (Typically Offered: Spring). (Typically Offered: Spring)

EM 5500: Nondestructive Evaluation

(Cross-listed with MSE 5500).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Principles of five basic NDE methods and their application in engineering inspections. Materials behavior and simple failure analysis. NDE reliability, and damage-tolerant design. Advanced methods such as acoustic microscopy, laser ultrasonics, thermal waves, and computed tomography are analyzed. Computer-based experiments on a selection of methods: ultrasonics, eddy currents, x-rays are assigned for student completion. (Typically Offered: Spring)

EM 5640: Fracture and Fatigue

(Cross-listed with AERE 5640/ ME 5640/ MSE 5640).

Credits: 3. Contact Hours: Lecture 3.

Materials and mechanics approach to fracture and fatigue.

Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue. Offered even-numbered years. (Typically Offered: Fall)

EM 5660: Phase Transformation in Elastic Materials

(Cross-listed with ME 5660).

Credits: 3. Contact Hours: Lecture 3.

Continuum thermodynamics and kinetics approaches to phase transformations. Phase field approach to stress- and temperature-induced martensitic transformations and twinning at the nanoscale. Nucleation and growth. Nanostructural evaluation. Analytical and numerical solutions. Surface stresses and energy. Surface-induced phase transformations. Large Strain formulation. (Typically Offered: Spring)

EM 5670: Nanomechanics of Materials

Credits: 3. Contact Hours: Lecture 3.

Continuum theoretical and computational approaches to material deformation and nanostructure evolution. Thermodynamics and kinetics. Nucleation and growth. Surface and interface tension and phenomena. Chemical reactions, phase transformations, and dislocation evolution. (Typically Offered: Spring)

EM 5690: Mechanics of Composite and Combined Materials

(Cross-listed with AERE 5690/ MSE 5690).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EM 3240

Mechanics of fiber-reinforced materials. Micromechanics of lamina. Macromechanical behavior of lamina and laminates. Strength and interlaminar stresses of laminates. Failure criteria. Stress analysis of laminates. Thermal moisture and residual stresses. Joints in composites. Offered even-numbered years. (Typically Offered: Spring)

EM 5700: Wind Engineering

(Cross-listed with AERE 5700).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ABE 3780 and ME 3450

Atmospheric circulations, atmospheric boundary layer wind, bluff-body aerodynamics, aeroelastic phenomena, wind-tunnel and full-scale testing, wind-load code and standards, effect of tornado and thunderstorm winds, design applications. Offered odd-numbered years. (Typically Offered: Spring)

EM 5800: Phase Transformations and Plasticity

Credits: 3. Contact Hours: Lecture 3.

Continuum approaches to phase transformations and plasticity at nano-, micro-, and macroscales. Interaction between phase transformations and plasticity and different scales. Temperature-, stress-, and strain-induced phase transformations. Transformation-induced plasticity. Thermodynamics and kinetics. Nucleation and growth. Large strain formulation. High pressure phenomena and theories. (Typically Offered: Fall)

EM 5840: High Pressure Mechanics and Phase Transformations

Credits: 3. Contact Hours: Lecture 3.

Techniques for producing static high pressure and measurements. Traditional and rotational diamond anvil cell. Phase diagrams. Pressure, stress, and plastic strain induced phase transformations: continuum thermodynamics and kinetics. Elasticity and plastic flow under high pressure. Transformation pressure hysteresis. Material synthesis and search for new phases. Interaction between phase transformations and plasticity under high pressure. High pressure mechanochemistry. Multiscale modeling.

EM 5860: Micromechanics of Structural Changes in Materials

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Continuum and micromechanical approaches to material deformation, phase transformations, and microstructure evolution. Thermodynamics and kinetics. Eshelby inclusion. Interface propagation and reorientation. Microscale phase field approach. Large strain formulation. Phase transformations, chemical reactions, twinning, and fracture. (Typically Offered: Fall)

EM 5900F: Engineering Mechanics Special Topics: Introduction to Dislocation and Plasticity

Credits: 1-4. Repeatable.

(Typically Offered: Fall, Spring, Summer)

EM 5900H: Engineering Mechanics Special Topics: Mechanics of Thin Films and Adhesives

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EM 5900I: Engineering Mechanics Special Topics: Mechanics of Cellular and Porous Media

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EM 5900J: Engineering Mechanics Special Topics: Other

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EM 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**EM 6900N: Engineering Mechanics Special Topics: Advanced Experimental Methods**

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EM 6900O: Engineering Mechanics Special Topics: Advanced Wave Propagation

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EM 6900P: Engineering Mechanics Special Topics: Advanced Materials

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EM 6900Q: Engineering Mechanics Special Topics: Advanced Computational Methods

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EM 6900R: Engineering Mechanics Special Topics: Reliability and Failure

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall)

EM 6900S: Engineering Mechanics Special Topics: Other

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EM 6970: Engineering Internship

Credits: Required. Repeatable.

One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

EM 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

English (ENGL)

Courses primarily for undergraduates:**ENGL 0100: Intensive English**

Credits: 0. Contact Hours: Lecture 21.

Intensive English. (Typically Offered: Fall, Spring, Summer)

ENGL 0100A: Intensive English

Credits: 0. Contact Hours: Lecture 15.

Intensive English. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ENGL 0100B: Intensive English

Credits: 0. Contact Hours: Lecture 10.

Intensive English. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ENGL 0100C: Intensive English

Credits: 0. Contact Hours: Lecture 5.

Intensive English. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ENGL 0100D: Intensive English

Credits: 0. Contact Hours: Lecture 2.5.

Intensive English. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ENGL 0990S: Nonnative Speaking

Credits: 0.

Open to all interested international students. (Typically Offered: Fall, Spring)

ENGL 1010B: English for Native Speakers of Other Languages: Academic English

Credits: 3. Contact Hours: Lecture 3.

For undergraduates: Completion of ENGL 1010 requirement prepares students for ENGL 1500. For graduates: Completion of ENGL 1010 satisfies the English requirement of the Graduate College. ENGL 1010 courses are limited to students who are nonnative speakers of English. See English Requirement for International Students in Index for additional information about placement exam. Graduation Restriction: Credit from ENGL 1010 does not count toward graduation. (Typically Offered: Fall, Spring)

ENGL 1010C: English for Native Speakers of Other Languages: Academic English II--Undergraduates

Credits: 3. Contact Hours: Lecture 3.

For undergraduates: Completion of ENGL 1010 requirement prepares students for ENGL 1500. For graduates: Completion of ENGL 1010 satisfies the English requirement of the Graduate College. ENGL 1010 courses are limited to students who are nonnative speakers of English. See English Requirement for International Students in Index for additional information about placement exam. Graduation Restriction: Credit from ENGL 1010 does not count toward graduation. (Typically Offered: Fall, Spring)

ENGL 1010D: English for Native Speakers of Other Languages: Academic English II--Graduates

Credits: 3. Contact Hours: Lecture 3.

Available P/NP to graduate students at their department's option.

For undergraduates: Completion of ENGL 1010 requirement prepares students for ENGL 1500. For graduates: Completion of ENGL 1010 satisfies the English requirement of the Graduate College. ENGL 1010 courses are limited to students who are nonnative speakers of English. See English Requirement for International Students in Index for additional information about placement exam. Graduation Restriction: Credit from ENGL 1010 does not count toward graduation. (Typically Offered: Fall, Spring)

ENGL 1200: Computers and Language

(Cross-listed with LING 1200).

Credits: 3. Contact Hours: Lecture 3.

Introduction to the use of linguistic knowledge in computer applications today and the basic computational techniques used in such applications. The development of these techniques throughout the history of computational linguistics. How the study of language has contributed to the advancement of technology and how certain computational problems have influenced the way linguists study language.

ENGL 1500: Critical Thinking and Communication

Credits: 3. Contact Hours: Lecture 3.

Application of critical reading and thinking abilities to topics of civic and cultural importance. Introduction of basic oral, visual, and electronic communication principles to support writing development. Initiation of communication portfolio. Concurrent enrollment in LIB 1600 is recommended. (Typically Offered: Fall, Spring, Summer)

ENGL 2010: Introduction to Literature

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or concurrent enrollment in ENGL 1500

Introduction to the diversity of literary texts. Students will explore work across different genres (drama, poetry, short fiction, the novel) and traditions (Indigenous, postcolonial, global, British, American). Recommended for nonmajors.

ENGL 2070: Introduction to Creative Writing

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or concurrent enrollment in ENGL 1500

Course introduces students to the fundamentals of writing fiction, poetry, and creative nonfiction. Extensive readings in all three genres. Students learn creative processes through writing exercises, workshops, and conferences. (Typically Offered: Fall, Spring)

ENGL 2140: Introduction to Technical Communication

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 1500.

A broad introduction to the culture of professional work as a technical communicator, with particular emphasis on principles and best practices for developing and managing technical information and digital media. Examination of user-centered design, the history of the discipline, cross-cultural communication, and the ethics of communicating complex information to lay audiences. Study and practice of team-based collaboration, project management, and technical editing. (Typically Offered: Fall)

ENGL 2190: Introduction to Linguistics

(Cross-listed with LING 2190).

Credits: 3. Contact Hours: Lecture 3.

Introduction to linguistic concepts and principles of linguistic analysis with English as the primary source of data. Sound and writing systems, sentence structure, vocabulary, and meaning. Issues in the study of usage, regional and social dialects, language acquisition, and language change. (Typically Offered: Fall, Spring)

ENGL 2200: Descriptive English Grammar

(Cross-listed with LING 2200).

Credits: 3. Contact Hours: Lecture 3.

Overview of grammatical structures and functions. Parts of speech; phrase, clause, and sentence structure; sentence types and sentence analysis; rhetorical grammar and sentence style; terminology. Not a remedial, English composition, or ESL course. (Typically Offered: Fall, Spring)

ENGL 2220X: Artificial Intelligence and Writing

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 1500

Introduction to artificial intelligence (AI) and writing. Students will learn how to find and use AI technologies such as ChatGPT to write for specific purposes, genres, and media; create effective AI prompts and search for accurate information; and navigate the ethical issues of integrating AI-generated and processed content into authored works. (Typically Offered: Fall)

ENGL 2250: Survey of British Literature to 1800

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Survey of British Literature from its beginnings to 1800. Representative works studied in their historical, cultural, and literary contexts that span nearly 900 years of shifts in religious, political, ethnic, and philosophical cultures.

ENGL 2260: Survey of British Literature since 1800

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Representative works studied in their historical, cultural, and literary contexts, including attention to the impact and legacy of the British empire on its former colonies, i.e., postcolonial literature.

ENGL 2270: Survey of American Literature to 1865

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Survey of American literature from its beginnings (including Indigenous and conquest literatures) through the end of the Civil War. Representative works studied in their historical, cultural, and literary contexts, including attending to the diversity (ethnic, cultural, religious, philosophical, etc.) of American literature and culture.

ENGL 2280: Survey of American Literature since 1865

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Survey of American literature from the Civil War to the present. Representative works studied in their historical, cultural, and literary contexts, including attention to the diversity (ethnic, cultural, religious, philosophical, etc.) of American literature and culture.

ENGL 2370: Survey of Film History

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit in or enrollment in ENGL 1500

Survey of U.S. and international film history from its beginnings in the late nineteenth century to the present. (Typically Offered: Fall)

ENGL 2400: Introduction to American Indian Literature

(Cross-listed with AMIN 2400).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit in or enrollment in ENGL 1500

Survey of American Indian Literature of varying genres, including fiction, non-fiction, poetry, film, drama, and media. Focuses on interdisciplinary approaches to American Indian cultural, social, and environmental issues. Meets U.S. Diversity Requirement. (Typically Offered: Fall)

ENGL 2450X: Climate Change in Literature, Film, and Popular Culture

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Narratives of climate change through Literature, Film, and Popular Culture; how narratives shape understanding, behavior, and culture. Literary texts contextualized with readings from other disciplines. How narratives explain climate change, and how we might reimagine narratives to create healthier and more resilient futures.

ENGL 2500: Written, Oral, Visual, and Electronic Composition

Credits: 3. Contact Hours: Lecture 3.

Prereq: (Credit for or exemption from ENGL 1500) AND (credit or concurrent enrollment in LIB 1600)

Analyzing, composing, and reflecting on written, oral, visual, and electronic (WOVE) discourse within academic, civic, and cultural contexts. Emphasis on supporting a claim and using primary and secondary sources. Continued development of communication portfolio. Graduation Restriction: The University requires a minimum grade of C in ENGL 2500 to meet the Communication Proficiency graduation requirement; some majors/degree programs may set higher standards. (Typically Offered: Fall, Spring, Summer)

ENGL 2500H: Written, Oral, Visual, and Electronic Composition: Honors

Credits: 3. Contact Hours: Lecture 3.

In-depth analysis, composition, and reflection on written, oral, visual, and electronic (WOVE) discourse within academic, civic, and cultural contexts. Emphasis on argumentation: developing claims, generating reasons, providing evidence. Individual sections organized by special topics. Development of communication portfolio. Graduation Restriction: The University requires a minimum grade of C in ENGL 2500 to meet the Communication Proficiency graduation requirement; some majors/degree programs may set higher standards. (Typically Offered: Fall)

ENGL 2600: Introduction to Literary Study

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or concurrent enrollment in ENGL 1500.

Introduction to the basic principles of literary study, including strategies for analyzing poetry, fiction, nonfiction, film, drama, and media. Emphasis on writing critical essays and conducting research. Designed for English majors.

ENGL 2750: Analysis of Popular Culture Texts

(Cross-listed with SPCM 2750).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or concurrent enrollment in ENGL 2500

Analysis of how information and entertainment forms persuade and manipulate audiences. Study of several forms that may include newspapers, speeches, television, film, advertising, fiction, and magazines. Special attention to verbal and visual devices. (Typically Offered: Fall, Spring)

ENGL 3020: Business Communication

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500 and Junior classification

Rhetorical concepts and processes to successfully communicate individually and collaboratively via written, oral, visual, and electronic modes across a range of business disciplines. Covers strategies for analyzing audiences internal and external to an organization in order to communicate positive, neutral, and negative messages clearly, completely, correctly, and ethically; save an audience's time; and create goodwill. (Typically Offered: Fall, Spring, Summer)

ENGL 3020H: Business Communication: Honors

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500 and Junior classification

Theory, principles and processes of effective written, oral, visual, and electronic communication typically encountered in business and the professions. Extensive practice in many areas of workplace communication, including letter, memo, and email correspondence; short proposals and reports; policies and procedures; job packet including letters of application and resumes; website analysis; brochures; and individual and team presentations. (Typically Offered: Fall, Spring, Summer)

ENGL 3030: Free-Lance Writing for Popular Magazines

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500; Sophomore classification

Practical workshop in writing nonfiction articles for popular magazines. Emphasis on writing, market research, preparation of manuscripts, methods of submission. Major goal of the course is production of marketable material. (Typically Offered: Spring)

ENGL 3040: Creative Writing: Fiction

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500; Sophomore classification

Progresses from practice in basic techniques of fiction writing to fully developed short stories. Emphasis on writing, analytical reading, workshop criticism, and individual conferences. (Typically Offered: Fall, Spring)

ENGL 3050: Creative Writing: Nonfiction

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500; Sophomore classification

Workshop in writing imaginative essays, both critical and personal. Analytical reading, development of literary techniques. Individual and small group conferences. (Typically Offered: Fall, Spring)

ENGL 3060: Creative Writing: Poetry

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500; Sophomore classification

Progresses from traditional to contemporary forms. Emphasis on writing, analytical reading, workshop criticism, and individual conferences. (Typically Offered: Fall, Spring)

ENGL 3080: Write Like a Woman

(Cross-listed with WGS 3080).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Writing and reading interpretive fiction written by women. Emphasis on stories that embody a female literary life, gender-specific ways of creating characters and conflicts, analytical reading and writing, workshop criticism and shared commentaries. Includes multi-modal projects. (Typically Offered: Fall)

ENGL 3090: Proposal and Report Writing

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500 and Junior classification

Rhetorical concepts and processes to individually and collaboratively develop proposals for business, governmental, nonprofit, or other organizations and to report on the work completed both orally and in writing. Emphasizes the structure and classification of proposal and report types, qualitative and quantitative research methods, audience analysis, document design, and data visualization. (Typically Offered: Fall, Spring)

ENGL 3100: Rhetorical Analysis

(Cross-listed with SPCM 3100).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Fundamental principles of rhetorical criticism. Focus on selected theories for analyzing cultural texts, including essays, speeches, film, technical and scientific documents, and websites. Emphasis on identifying artifacts, formulating research questions, applying methodologies, and understanding and practicing critical analysis through discussion and in writing. (Typically Offered: Fall, Spring)

ENGL 3120: Communicating Science and Public Engagement

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500 and Junior classification

Rhetorical concepts, processes, and strategies to successfully communicate individually and collaboratively via written, oral, visual, and electronic modes in disciplines in and related to science. Emphasizes the strategies for analyzing and adapting to audiences about scientific topics and disciplines. Covers developing and designing documentation, presenting scientific data visually, and communicating results orally. (Typically Offered: Fall, Spring, Summer)

ENGL 3130: Rhetorical Website Design

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Rhetorical principles of multimodal composing in hypertextual environments. Focus on writing according to web style guidelines, employing cascading stylesheets for layout and design, and using principles of information architecture to determine optimal site structure. Final project involves constructing interactive client site using latest web standards.

ENGL 3140: Technical Communication

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500 and Junior classification

Rhetorical concepts and processes to successfully communicate technical information individually and collaboratively via written, oral, visual, and electronic modes. Emphasizes the major strategies for analyzing expert and lay audiences and adapting information to those audiences. Covers developing and designing usable technical documentation, visualizing data, and presenting technical information orally. (Typically Offered: Fall, Spring, Summer)

ENGL 3140H: Technical Communication: Honors

Credits: 3. Contact Hours: Lecture 3.

Theories, principles, and processes of effective written, oral, visual, and electronic communication of technical information. Attention to major strategies for analyzing and adapting to audiences in various communication situations and composing technical discourse including organizing visual and verbal information. Extensive practice in many areas of technical communication, including instructions and procedures, proposals and reports, website analysis and design, and individual and team presentations. (Typically Offered: Fall, Spring, Summer)

ENGL 3150: Creative Writing: Screenplays

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500; Sophomore classification

Stresses master scene technique of writing fully developed screenplays. Emphasis on movie techniques, writing, workshop criticism, analytical reading and viewing, and individual conferences. (Typically Offered: Fall)

ENGL 3160: Creative Writing: Playwriting

(Cross-listed with THTRE 3160).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500; Sophomore classification

Progresses from production of scenes to fully developed one-act plays. Emphasis on action, staging, writing, analytical reading, workshop criticism, and individual conferences. (Typically Offered: Spring)

ENGL 3180: Introduction to ESL methods and materials

(Cross-listed with LING 3180).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2190 or LING 2190

Introduction to methods and materials for teaching English as a Second Language (ESL) for elementary and secondary students. Strategies and resources for teaching reading, writing, speaking and listening skills. Elementary Education students must take this course in the same semester as either EDUC 2800S or EDUC 4800S. (Typically Offered: Fall)

ENGL 3190: Studies in Language and Diversity

(Cross-listed with LING 3190).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Prereq: ENGL 2500

Special topics related to the role of language and linguistics in US diversity, such as Dialects and American literature, American English Accents, Legal and Social Aspects of English-only Laws in the US. Connections between language use and social diversity. (Typically Offered: Fall)

ENGL 3200: Topics in Linguistic Structure

(Cross-listed with LING 3200).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Prereq: ENGL 2190/LING 2190 or ENGL 2200/LING 2200

Special topics related to the study of linguistic structure. Focus on language structure in areas not covered in detail by existing courses. Topics include field linguistics, morphology, forensic linguistics, neurolinguistics, semantics, non-English phonology, acoustic phonetics, linguistic universals, and historical linguistics. (Typically Offered: Spring)

ENGL 3220: Language and Society

(Cross-listed with LING 3220).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2190 or LING 2190

Introduction to variation in language use in society. Survey of factors affecting language use, including background characteristics of language users, location, and purpose of interaction in addition to institutional, state, and national language policies. (Typically Offered: Spring)

ENGL 3240: Introduction to Teaching ESL Literacy

(Cross-listed with LING 3240).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2190 or LING 2190

Introduction to the issues and methods involved in teaching literacy skills to English as a second language (ESL) learners. The nature of literacy and materials and methods for developing ESL literacy at the middle school, high school, and adult ages across multiple levels of competency. (Typically Offered: Fall)

ENGL 3250: Teaching Methods for ESL Learners: Oral Communication Skills

(Cross-listed with LING 3250).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2190 or LING 2190

Issues and methods in teaching oral communication skills (listening, speaking, pronunciation) to English as a second language (ESL) learners. The nature of oral language ability. Materials and Methods for developing oral communication skills at middle school, high school, and adult contexts. (Typically Offered: Spring)

ENGL 3300: Science Fiction

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Focused study of science fiction from its origins to the present. Highlights the genre's connections to issues related to gender, sexuality, race, empire, and environmentalism. May include study of cyberpunk, Afrofuturism, cli-fi, etc.

ENGL 3320: Visual Communication of Quantitative Information

(Cross-listed with STAT 3320).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500; (STAT 1010 or STAT 1040 or STAT 1050 or STAT 2010 or STAT 2310 or STAT 3050 or STAT 3220 or STAT 3300)

Communicating quantitative information using visual displays; visualizing data; interactive and dynamic data displays; evaluating current examples in the media; color, perception, and representation in graphs; interpreting data displays.

ENGL 3350: Studies in Film

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: ENGL 2500

Focused study of film that explores a specific cinematic genre, style, period, or theme. (Typically Offered: Spring)

ENGL 3390: Literary Theory and Criticism

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2600; 3 additional credits from (ENGL 2250-2270, ENGL 2400, ENGL 3100, ENGL 3400, ENGL 3440-3470, ENGL 3490, ENGL 4400-4410, ENGL 4450, ENGL 3520-3550, ENGL 3600, ENGL 3620, ENGL 3640, ENGL 3730, ENGL 3750, ENGL 3760, ENGL 3760A, ENGL 3760B, ENGL 3890, ENGL 4900A, ENGL 3950A)

Focused examination of the history and recent trends in literary theory and criticism (e.g., postcolonialism, queer theory, disability studies, ecocriticism).

ENGL 3450: Women's Literature

(Cross-listed with WGS 3450).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Focused study of literature by women and about women that focuses on a particular genre (fiction, non-fiction, poetry, film, drama, media), author, or theme.

ENGL 3460: American Indian Literature

(Cross-listed with AMIN 3460).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Focused study of American Indian literature of varying genres, including fiction, non-fiction, poetry, film, drama, and media. Examines interdisciplinary approaches to American Indian cultural, social, and environmental issues. Meets U.S. Diversity Requirement.

ENGL 3470: African American Literature

(Cross-listed with AFAM 3470).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Focused study of literature by African American writers. May include focus on a particular genre (fiction, non-fiction, poetry, film, drama, media), author, event, movement, or theme.

ENGL 3490: Multicultural Literatures of the United States

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Focused study of literature by writers from U.S. multicultural groups.

May include literature of several groups or focus upon one (such as Asian Americans, African Americans, Latinx Americans, American Indians). May also include focus on a particular genre (fiction, non-fiction, poetry, film, drama, media), event, movement, or theme.

ENGL 3500: Rhetorical Traditions

(Cross-listed with CLST 3500/ SPCM 3500).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Ideas about the relationship between rhetoric and society in contemporary and historical contexts. An exploration of classical and contemporary rhetorical theories in relation to selected topics that may include politics, gender, race, ethics, education, science, or technology. (Typically Offered: Spring)

ENGL 3520: Queer Literature

(Cross-listed with WGS 3520).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Focused study of literary portrayals of queer lives and relationships from many different genres. Attention to changing definitions and representations of sexual orientation and LGBTQ identities over time.

ENGL 3530: World Literature: Western Foundations through Renaissance

(Cross-listed with CLST 3530).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Representative works of drama, poetry, and prose from ancient times through the mid-seventeenth century. Consideration of Western traditions within global contexts. Attention to religious and ethnic diversity; oral, manuscript, and print cultures; political authority; and the impact of translation on form, meaning, and reception of texts. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

ENGL 3540: World Literature: Seventeenth Century to the Present

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Global literatures in their various cultural and aesthetic contexts.

Representative works, oral and written literature, including poetry, fiction, nonfiction, and drama. Meets International Perspectives Requirement. (Typically Offered: Spring)

ENGL 3550: Literature and the Environment

(Cross-listed with ENVS 3550).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Focused study of texts that address a wide range of environmental issues, including the relationship between humans and natural/urban environments, views of other-than-human beings, food, climate change, extinction, and social and racial justice. Assignments for the course may include research, exams, writing, and/or individual/group projects.

ENGL 3600: Studies in American Literature to 1800

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: ENGL 2500; Sophomore classification

Selected readings in American literature from its beginnings through the colonial period; may reflect themes, genres, or social and cultural contexts.

ENGL 3620: Studies in 19th Century American Literature

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: ENGL 2500; Sophomore classification

Selected readings in American literature of the 19th century; may reflect themes, genres, or social and cultural contexts.

ENGL 3640: Studies in American Literature: 1900 to the Present

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: ENGL 2500; Sophomore classification

Selected readings in American literature since 1900; may reflect themes, genres, or social and cultural contexts.

ENGL 3700: Shakespeare

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Focused study of Shakespeare's plays and how they participate in cultural and political contexts – both in Shakespeare's time and our own. Includes staging activities, film presentations, and attention to pedagogy. Assignments for the course may include analytical essays (no research required), film presentations, marginalia, and individual/group projects. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

ENGL 3730: Studies in British Literature: The Middle Ages

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: ENGL 2500; Sophomore classification

Selected readings in medieval literature from its beginnings through the fifteenth century; may reflect themes, genres, or social and cultural contexts.

ENGL 3750: Studies in British Literature: The Restoration and 18th Century

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: ENGL 2500; Sophomore classification

Selected readings in British literature from 1660 to 1800; may reflect themes, genres, or social and cultural contexts. Meets International Perspectives Requirement.

ENGL 3760A: Studies in British Literature: Romantic

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500; Sophomore classification

Selected readings from British literature from the late eighteenth century to about 1900; may reflect themes, genres, or social and cultural contexts. Meets International Perspectives Requirement.

ENGL 3760B: Studies in British Literature: Victorian

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500; Sophomore classification

Selected readings from British literature from the late eighteenth century to about 1900; may reflect themes, genres, or social and cultural contexts. Meets International Perspectives Requirement.

ENGL 3770: Latina/o/x Life Stories: Memoirs and Oral History

(Cross-listed with US LS 3770/ SPAN 3770).

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: USLS 2110 or ENGL 2500

Study and archive Latinx life stories through traditional coursework, digital humanities and community outreach with local schools. Analysis of the extensive realities of Latinx communities in Iowa through the study, writing, tutorial work, and production of memoirs and oral histories.

ENGL 3890: Postcolonial Literature

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500; Sophomore classification

Focused study of literatures from previously (or continuously) colonized nations. May be broadly focused, or specific to the literature of one of the following areas: Africa, South Asia, the Caribbean, and the Middle East. Irish and immigrant British writers may also be included. Assignments for the course may include exams, written reflections and/or discussion boards, short essays, posters, and/or individual/group projects. Meets International Perspectives Requirement.

ENGL 3930: The History of Children's Literature

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Focused study of the development of English and American children's literature through the present day. Includes readings in animal stories, fantasy, and realism, including contemporary social issues. (Typically Offered: Fall)

ENGL 3950A: Study and Travel: Literature

Credits: 1-30.

Prereq: Instructor Permission for Course

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply. Meets International Perspectives Requirement. (Typically Offered: Summer)

ENGL 3950B: Study and Travel: Creative Writing

Credits: 1-30.

Prereq: Instructor Permission for Course

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply. Meets International Perspectives Requirement. (Typically Offered: Summer)

ENGL 3950C: Study and Travel: Linguistics

Credits: 1-30.

Prereq: Instructor Permission for Course

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply. Meets International Perspectives Requirement. (Typically Offered: Summer)

ENGL 3950D: Study and Travel: Rhetoric and Professional Communication

Credits: 1-30.

Prereq: Instructor Permission for Course

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply. Meets International Perspectives Requirement. (Typically Offered: Summer)

ENGL 3950E: Study and Travel: Teacher Education

Credits: 1-30.

Prereq: Instructor Permission for Course

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply. Meets International Perspectives Requirement. (Typically Offered: Summer)

ENGL 3960: Teaching the Reading of Young Adult Literature

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Critical study and evaluation of themes, genres, and cultures found in young adult literature. Strategies of effective reading; instructional strategies including discussion techniques and use of technology; matching texts to reader needs and proficiencies. Evaluation of fiction, nonfiction, and media-based materials for use in school programs. Lesson planning. (Typically Offered: Fall, Spring)

ENGL 3970: Practice and Theory of Teaching Writing in the Secondary Schools

Credits: 3. Contact Hours: Lecture 3.

Prereq: Concurrent enrollment in EDUC 3800

Introduction to teaching secondary language arts. Current theories and practices in the teaching of writing to secondary school students. Theories of rhetoric, approaches to teaching, lesson design and planning. Evaluating writing. Students must have initiated the application process for the teacher education program and initiated a background check with the state of Iowa Department of Criminal Investigation. (Typically Offered: Fall, Spring)

ENGL 4040: Creative Writing Workshop: Fiction

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: ENGL 3040

Individual projects in short fiction on a workshop and conference basis. Readings in short fiction. Discussion of elements of narrative such as plot, point of view, characterization, theme, setting. (Typically Offered: Fall, Spring)

ENGL 4050: Creative Writing Workshop: Nonfiction

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: ENGL 3050

Individual projects in memoir, immersion journalism, character studies, and/or the personal essay on a workshop and conference basis. Readings in creative nonfiction. (Typically Offered: Fall, Spring)

ENGL 4060: Creative Writing Workshop--Poetry

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: ENGL 3060

Individual projects in poetry on a workshop and conference basis. Readings in poetry. Discussion of poetic elements such as image, sound, internal structure, rhythm, tone, figurative language. (Typically Offered: Fall, Spring)

ENGL 4100: Language as Data

(Cross-listed with LING 4100).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior standing

Methods of discovering language patterns in text documents solve practical text analysis problems in the disciplines. Fundamentals of linguistics and its role in text analysis. Practice writing R scripts to perform text analysis and visualize textual data. (Typically Offered: Spring)

ENGL 4110: Technology, Rhetoric, and Professional Communication

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 3100; (ENGL 3020, ENGL 3090, ENGL 3130, or ENGL 3140); Junior classification

Seminar course on the implication of technologies, especially computer technology, for the writing and reading of business, technical, and academic texts. Extensive reading, discussion, and writing on selected technology-related topics. (Typically Offered: Fall, Spring, Summer)

ENGL 4150: Business and Technical Editing

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 3020, ENGL 3090, or ENGL 3140; Junior Classification

Editing concepts and processes for choosing the appropriate level of editing for the particular rhetorical situation. Covers using editorial tools such as copy-marking symbols, developing style sheets and guides, and managing document production. Emphasizes developing an editorial eye for verbal and visual details in order to achieve accuracy, consistency, correctness, and completeness. (Typically Offered: Spring)

ENGL 4160: Visual Aspects of Business and Technical Communication

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 3020, ENGL 3090, or ENGL 3140; Junior Classification

Rhetorical strategies and perceptual principles for designing print and digital visual elements such as diagrams and graphs and integrating those visual elements into business and technical communications. Covers strategies for employing visual elements such as typeface, page and screen layout, and illustrations in order to make communications more usable. (Typically Offered: Fall)

ENGL 4170E: Student Teaching: English and Literature

(Cross-listed with EDUC 4170E).

Credits: 1-30. Repeatable.

Prereq: ENGL 4940, admission to the Educator Preparation Program, approval of coordinator the semester prior to student teaching

Full-time teaching in secondary English: long term and unit planning, lesson planning, classroom teaching practice in English language arts.

(Typically Offered: Fall, Spring)

ENGL 4180: Seminar in Argumentation

(Cross-listed with SPCM 4180).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 3100/SPCM 3100 and Junior classification

Advanced seminar in theory and analysis with extensive practice in various modes of argument. (Typically Offered: Fall, Spring)

ENGL 4200: History of the English Language

(Cross-listed with LING 4200).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2190/LING 2190 or ENGL 2200/LING 2200

Comparison of English to other languages by family background and by type. Analysis of representative Old, Middle, Early Modern and present-day English texts, including both literary works and non-literary documents. (Typically Offered: Fall, Spring)

ENGL 4220: Women, Men, and the English Language

(Cross-listed with LING 4220/ WGS 4220).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2190 or LING 2190

The ways men and women differ in using language in varied settings and the ways in which language both creates and reflects gender divisions.

(Typically Offered: Spring)

ENGL 4250: Second Language Learning and Teaching

(Cross-listed with LING 4250).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2190/LING 2190 and Junior classification

The process of second language learning and principles and techniques of teaching second languages. Learning and teaching in specific situations and for particular purposes. Current applications of technology in teaching and assessment. (Typically Offered: Spring)

ENGL 4370: Grammatical Analysis

(Cross-listed with LING 4370).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (ENGL 2190 or LING 2190); (ENGL 2200 or LING 2200); Junior classification

Theories and methods for analysis of syntax and morphology. (Typically Offered: Fall)

ENGL 4400: Seminar in British Literature

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Junior standing

Selected authors, movements, eras, or genres in British literature.

Readings in criticism; required research paper.

ENGL 4410: Seminar in American Literature

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Junior standing

Selected authors, movements, eras, or genres in American literature.

Readings in criticism; required research paper.

ENGL 4450: Seminar: Literature Crossing Boundaries

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Junior standing

Intensive study of selected literature that bridges traditional genre, period, national, or disciplinary boundaries. Readings in criticism; required research paper.

ENGL 4500: Seminar in Literary Genres

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Junior standing

Intensive study of drama, film, fiction, poetry, or prose. Selected movements, eras, or national traditions. Readings in criticism; required research paper.

ENGL 4600: Seminar in Gender and Ethnicity

(Cross-listed with WGS 4600).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Junior standing

Selected readings of various authors, movements, eras, or genres.

Readings in criticism; required research paper.

ENGL 4770: Seminar in Technical Communication

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: ENGL 3020, ENGL 3090, or ENGL 3140

Intensive study of a selected topic that bridges theory and practice in technical communication. Required project that contributes to the understanding of an emerging issue in the profession.

ENGL 4870: Internship in Business, Technical, and Professional Communication

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: 9 credits in (ENGL 3020, ENGL 3090, ENGL 3130, ENGL 3140, ENGL 4150, ENGL 4160, or ENGL 4770); Junior classification; Department permission

An opportunity to write, edit, and design business and technical documents in a professional setting. Projects might include reports, proposals, manuals, brochures, newsletters. (Typically Offered: Fall, Spring, Summer)

ENGL 4900A: Independent Study: Literature

Credits: 1-30. Repeatable, maximum of 9 credits.

Prereq: 9 credits in English beyond ENGL 2500; Junior classification; Department Permission

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. Graduation Restriction: No more than 9 credits of ENGL 4900 may be used toward graduation. (Typically Offered: Fall, Spring, Summer)

ENGL 4900B: Independent Study: Linguistics

(Cross-listed with LING 4900B).

Credits: 1-30. Repeatable, maximum of 9 credits.

Prereq: 9 credits in English beyond ENGL 2500; Junior classification; Department Permission

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. Graduation Restriction: No more than 9 credits of ENGL 4900 may be used toward graduation. (Typically Offered: Fall, Spring)

ENGL 4900C: Independent Study: Rhetoric, Teaching of Composition

Credits: 1-30. Repeatable, maximum of 9 credits.

Prereq: 9 credits in English beyond ENGL 2500; Junior classification; Department Permission

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. Graduation Restriction: No more than 9 credits of ENGL 4900 may be used toward graduation. (Typically Offered: Fall, Spring, Summer)

ENGL 4900D: Independent Study: Criticism and Theory of Literature

Credits: 1-30. Repeatable, maximum of 9 credits.

Prereq: 9 credits in English beyond ENGL 2500; Junior classification; Department Permission

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. Graduation Restriction: No more than 9 credits of ENGL 4900 may be used toward graduation. (Typically Offered: Fall, Spring, Summer)

ENGL 4900E: Independent Study: Instructional Methods and Research

Credits: 1-30. Repeatable, maximum of 9 credits.

Prereq: 9 credits in English beyond ENGL 2500; Junior classification; Department Permission

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. Graduation Restriction: No more than 9 credits of ENGL 4900 may be used toward graduation. (Typically Offered: Fall, Spring, Summer)

ENGL 4900F: Independent Study: Creative Writing

Credits: 1-30. Repeatable, maximum of 9 credits.

Prereq: 9 credits in English beyond ENGL 2500; Junior classification; Department Permission

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. Graduation Restriction: No more than 9 credits of ENGL 4900 may be used toward graduation. (Typically Offered: Fall, Spring)

ENGL 4900G: Independent Study: Business/Technical Communication

Credits: 1-30. Repeatable, maximum of 9 credits.

Prereq: 9 credits in English beyond ENGL 2500; Junior classification; Department Permission

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. Graduation Restriction: No more than 9 credits of ENGL 4900 may be used toward graduation. (Typically Offered: Fall, Spring)

ENGL 4900H: Independent Study: Honors

Credits: 1-30. Repeatable, maximum of 9 credits.

Prereq: 9 credits in English beyond ENGL 2500; Junior classification; Department Permission

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered or who desire to integrate a study of literature or language with special problems in major fields. Graduation Restriction: No more than 9 credits of ENGL 4900 may be used toward graduation. (Typically Offered: Fall, Spring)

ENGL 4920: Undergraduate Teaching Experience

Credits: 1-30. Repeatable, maximum of 9 credits.

Prereq: 9 credits in English beyond ENGL 2500; Junior classification; Department Permission

Teaching assistant experience. (Typically Offered: Fall, Spring, Summer)

ENGL 4930: Advanced Creative Writing Workshop-Multi-Genre

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: ENGL 3040, ENGL 3050 or ENGL 3060 and Junior classification

Advanced workshop of individual creative writing projects in short fiction, nonfiction, and poetry. Readings and discussion of published examples of short fiction, nonfiction, and poetry by authors of national and international note. Extensive discussion and written analysis of elements of craft across genres. (Typically Offered: Fall, Spring)

ENGL 4940: Practice and Theory of Teaching Literature in the Secondary Schools

(Dual-listed with ENGL 5940X).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 3100; ENGL 3970; 9 additional credits in ENGL beyond ENGL 2500; PSYCH 3330

Current theories and practices in the teaching of literature to secondary school students. Integrating literary study and writing. Preparation and selection of materials. Classroom presentation. Unit planning. 4940 students must have initiated the application process for the teacher education program and initiated a background check with the state of Iowa Department of Criminal Investigation. 5940 students must have initiated a background check with the State of Iowa Department of Criminal Investigation. 4940: Concurrent enrollment in EDUC 4800 and SPED 4010 required. 5940: concurrent enrollment in EDUC 5910E. (Typically Offered: Fall, Spring)

ENGL 4970: Capstone Assessment

Credits: Required. Contact Hours: Lecture 1.

Prereq: Junior or Senior classification; Department Permission

Must be taken in conjunction with a 4000-level English course. (Typically Offered: Fall, Spring)

Courses primarily for graduate students, open to qualified undergraduates:

ENGL 5000: Teaching Multimodal Composition

Credits: 3. Contact Hours: Lecture 3.

Introduction to the teaching of ISUComm Foundation Courses.

Foundational and relevant newer composition theory and pedagogical methods related to ISUComm Foundation Courses objectives and their classroom enactment, including development of assignments and supporting activities, and evaluation of student projects. Required of all new teaching assistants teaching ISUComm Foundation Courses. (Typically Offered: Fall)

ENGL 5010: Introduction to Research in Rhetoric, Composition, and Professional Communication

Credits: 3. Contact Hours: Lecture 3.

Survey of the major rhetorical, qualitative, and quantitative methods used in research on communication and language in academic and nonacademic settings.

ENGL 5030: Composition Theory

Credits: 3. Contact Hours: Lecture 3.

In-depth consideration of the theory and practice of composition pedagogy. Opportunities for actual classroom application.

ENGL 5040: Theory and Practice of Teaching Advanced Composition

Credits: 3. Contact Hours: Lecture 3.

Theory of teaching technical, business, and science communication courses combined with practical matters related to such courses, including curriculum planning, assignment design, assessment of student work, and online teaching. (Typically Offered: Fall)

ENGL 5050: User Experience Architecture and Testing

Credits: 3. Contact Hours: Lecture 3.

Seminar course examining user experience (UX) interface design and development in technical communication. Focus is on the UX project cycle: creating user interfaces, conducting user research, system testing, and implementing data-driven results.

ENGL 5060: Professional Communication Theory

Credits: 3. Contact Hours: Lecture 3.

Introduction to professional communication as a discipline, with emphasis on theories of communication and discourse that inform professional communication research and on trends and developments in that research and the field.

ENGL 5080: Writing for Academic Publication

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Hands-on practice in writing academic discourse for publication; rhetorical analyses of student-selected academic journals; discussion of current trends in academic writing; professional perspectives on the referee process and on journal editorial decision making. Focus on the writing of selected short pieces (opinion essays, standard reviews, conference-length papers) and of article-length manuscripts.

ENGL 5100: Introduction to Computers in Applied Linguistics

(Cross-listed with LING 5100).

Credits: 3. Contact Hours: Lecture 3.

Use of software and web applications for language teaching, linguistic analysis, and statistical analysis. Issues and problems in applied linguistics related to computer methods. (Typically Offered: Fall)

ENGL 5110: Introduction to Linguistic Analysis

(Cross-listed with LING 5110).

Credits: 3. Contact Hours: Lecture 3.

Principles and methods of linguistic analysis with emphasis on phonology, morphology, and syntax. Description of linguistic variation and current theoretical approaches to linguistics. (Typically Offered: Fall)

ENGL 5120: Second Language Acquisition

(Cross-listed with LING 5120).

Credits: 3. Contact Hours: Lecture 3.

Theory, methods, and results of second language acquisition research with emphasis on approaches relevant to second language teaching.

ENGL 5130: Language Assessment Practicum

(Cross-listed with LING 5130).

Credits: 3.

Advanced practicum in language assessment. (Typically Offered: Fall, Spring, Summer)

ENGL 5140: Sociolinguistics

(Cross-listed with LING 5140).

Credits: 3. Contact Hours: Lecture 3.

Theories and methods of examining language in its social setting. Analysis of individual characteristics (e.g., age, gender, ethnicity, social class, region), interactional factors (e.g., situation, topic, purpose) and national policies affecting language use.

ENGL 5150: Statistical Natural Language Processing

(Cross-listed with HCI 5150/ LING 5150).

Credits: 3. Contact Hours: Lecture 3.

Introduction to computational techniques involving human language and speech in applications such as information retrieval and extraction, automatic text categorization, word prediction, intelligent Web searching, spelling and grammar checking, speech recognition and synthesis, statistical machine translation, n-grams, POS-tagging, word-sense disambiguation, on-line lexicons and thesauri, markup languages, corpus analysis, and Python programming language.

ENGL 5160: Methods of Formal Linguistic Analysis

(Cross-listed with LING 5160).

Credits: 3. Contact Hours: Lecture 3.

Data and knowledge structures for formal representation of natural language and speech data. Designing and implementing algorithms for automating linguistic analysis tasks. Conceptual issues for natural language and speech processing programming. Offered even-numbered years. (Typically Offered: Spring)

ENGL 5170: Corpus Linguistics

(Cross-listed with LING 5170).

Credits: 3. Contact Hours: Lecture 3.

Corpus linguistics methods of language analysis, including corpus design, construction and annotation; data in corpus studies; tools and methods of analysis. Corpus methods applied in vocabulary, grammar, register and dialect variation, language change, pragmatics, semantics, stylistics, language learning and teaching, and language testing. Offered even-numbered years. (Typically Offered: Spring)

ENGL 5190: Second Language Assessment

(Cross-listed with LING 5190).

Credits: 3. Contact Hours: Lecture 3.

Principles of second language assessment including reliability, validity, authenticity and practicality. Constructing, scoring, interpreting, and evaluating second language tests for a variety of situations. (Typically Offered: Spring)

ENGL 5200: Computational Analysis of English

(Cross-listed with HCI 5200/ LING 5200).

Credits: 3. Contact Hours: Lecture 3.

Concepts and practices for analysis of English by computer with emphasis on the applications of computational analysis to problems in applied linguistics such as corpus analysis and recognition of learner language in computer-assisted learning and language assessment.

ENGL 5210: Teaching of Literature and the Literature Curriculum

Credits: 3. Contact Hours: Lecture 3.

Examination of the roles of the literary work, reader, and teacher in literary study. Responses to literature. Place of literature in language arts. Study and development of curriculum materials for middle school, high school, and college levels of instruction.

ENGL 5220: Literary Theory and Criticism

Credits: 3. Contact Hours: Lecture 3.

Examination of the history of and/or recent trends in literary theory and criticism (e.g., postcolonialism, queer theory, disability studies).

ENGL 5230: Introduction to Old English Language and Literature

Credits: 3. Contact Hours: Lecture 3.

Introductory study of Old English language and literature in prose and poetry, including extracts from Beowulf. Some attention to Anglo-Saxon culture.

ENGL 5240: Literacy: Issues and Methods for Nonnative Speakers of English

(Cross-listed with LING 5240).

Credits: 3. Contact Hours: Lecture 3.

Theoretical and practical issues and techniques in the teaching of literacy in a variety of contexts, involving children and adults at basic skill levels and teens and adults in academic and vocational programs. Offered even-numbered years. (Typically Offered: Fall)

ENGL 5250: Research and Teaching of Second Language Pronunciation
(Cross-listed with LING 5250).

Credits: 3. Contact Hours: Lecture 3.

Theoretical and practical issues and techniques in the teaching of second language pronunciation as it relates to other areas of language, especially listening and speaking skills. Topics will include segmental and suprasegmental features; intelligibility; pronunciation in language assessment; classroom, technology and individual instruction; and research issues. Topics will be relevant to those intending to teach or research in various contexts. Offered odd-numbered years. (Typically Offered: Fall)

ENGL 5260: Technology for Language Learning

(Cross-listed with LING 5260).

Credits: 3. Contact Hours: Lecture 3.

Theory, research, and practice in computer use for teaching nonnative speakers of English. Methods for planning and evaluating computer-based learning activities. Offered odd-numbered years. (Typically Offered: Spring)

ENGL 5270: Discourse Analysis

(Cross-listed with LING 5270).

Credits: 3. Contact Hours: Lecture 3.

Methods and theoretical foundations for linguistic approaches to discourse analysis. Applications of discourse analysis to the study of texts in a variety of settings, including academic and research contexts. Offered odd-numbered years. (Typically Offered: Spring)

ENGL 5280: English for Specific Purposes

(Cross-listed with LING 5280).

Credits: 3. Contact Hours: Lecture 3.

Issues and techniques in analyzing, teaching, and assessing English for specific purposes. Topics include theories of specific purpose language use, analysis of learner needs in target language contexts, and corpus-informed syllabus and materials development for teaching and assessment.

ENGL 5290: Content Management

Credits: 3. Contact Hours: Lecture 3.

Strategies for developing and delivering multimodal content via online digital media. Focus on the principles of database design, interface development, usability testing, and collaborative content management within professional communication settings.

ENGL 5300: Technology and Oral Language

(Cross-listed with LING 5300).

Credits: 3. Contact Hours: Lecture 3.

Structure and description of oral language and discourse. How spoken language is linguistically described, analyzed, and taught for research and for education. Using technology to record, transcribe, and analyze spoken language at all levels of linguistic structure. Offered even-numbered years. (Typically Offered: Fall)

ENGL 5310: Topics in the Study of Literature

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Intensive study of literary genres, periods, movements, or themes (e.g., The African American Novel, Allegory, Science Fiction).

ENGL 5320: American Literature to 1865

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Selected texts in American literature from Beginnings to the Civil War. Study may include Native American literature, the literature of European conquest, Colonial and Revolutionary periods, Early Republic, and Jacksonian Era, in critical and cultural contexts.

ENGL 5330: British Literature to 1830

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Selected texts from the Medieval, Renaissance, Restoration, Eighteenth-Century, and/or Romantic periods, in critical and cultural contexts.

ENGL 5340: American Literature 1865 to the Present

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Selected texts in American literature from the Civil War to the present. Study may include Realism, Naturalism, Modernism, and Postmodernism, with significant attention to race/ethnicity, gender, and identity, and to contemporary critical views. Range of authors and genres.

ENGL 5350: British Literature 1830 to the Present

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Selected texts from the Victorian, Edwardian, Modernist, and/or Contemporary periods, in critical and cultural contexts.

ENGL 5360: Preparing Publishable Thesis Chapters

(Cross-listed with GRST 5360).

Credits: 3. Contact Hours: Lecture 3.

Reporting original research results within the norms for writing of a student's discipline. Emphasis on preparing thesis/dissertation chapters that will be both acceptable to the Graduate College and ready for submission to a refereed journal in the student's discipline. Focus on reporting results from student-generated original research, norms for discourse within disciplines, and how thesis chapters differ from journal manuscripts. (Typically Offered: Fall, Spring)

ENGL 5370: Corpus Approaches to Grammatical Analysis

(Cross-listed with LING 5370).

Credits: 3. Contact Hours: Lecture 3.

Corpus-informed analysis of syntax in authentic writing and speech, with emphasis on approaches used in applied linguistics.

ENGL 5380: Fiction

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Selected fiction writers in English; range of authors and genres. Emphasis on both male and female writers; attention to the relationships between fiction and cultural change.

ENGL 5390: Poetry

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Selected poets writing in English, considered in representative groups.

ENGL 5400: Drama

(Cross-listed with SPCM 5400).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Primary texts in dramatic genres from various literary periods, in critical and cultural contexts. Frequently concentrates on the English Renaissance and the Shakespearean stage.

ENGL 5420: Technical Editing and Publication Management

Credits: 3. Contact Hours: Lecture 3.

Overview of theory and research in technical editing and publication management with substantial practice in applying theory and research findings. Focus on document production process, levels of edit, development of accessible, translatable, and inclusive documents, and sustainable publication practices.

ENGL 5430: The Study of Environmental Literature

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Intensive study of environmental literary genres, periods, figures, movements, or themes: e.g., Ecofeminism, Imagining Natural Disaster, Material Ecocriticism, Environmental Justice, Posthumanism.

ENGL 5450: Women's Literature

(Cross-listed with WGS 5450).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Primary texts by women writers; historical, thematic, formal, or theoretical approaches; secondary readings; e.g., Nineteenth-Century Women Writers; American Women's Personal Narratives; Southern Women Writers of the U.S.

ENGL 5460: Issues in the Study of Literature

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Intensive study of current and emerging topics and problems concerning literature and its relationship to theory and to language study; e.g., Theory of Metaphor; Renegotiating the Canon; Feminist Theory.

ENGL 5470: The History of Rhetorical Theory from the Classical Era to the Present

(Cross-listed with SPCM 5470).

Credits: 3. Contact Hours: Lecture 3.

Rhetorical theory from the classical period of ancient Greece through to the 20th century; attention to rhetoric's relation to the nature of knowledge, communication, practice, and pedagogy.

ENGL 5480: Cultural and Critical Theories of Communication and Rhetoric

(Cross-listed with SPCM 5480).

Credits: 3. Contact Hours: Lecture 3.

Contemporary theories that address the production, reception, and critical evaluation of cultural artifacts and communicative events; these theories address power, ideology, and the norms of public discourse. Theories covered may include Postmodernism, Feminist Theory, Public Sphere Theory, as well as Critical Race Theory, Social Justice Theory, Disability Theory, Queer Theory, and/or Intercultural Theories of Communication and Rhetoric.

ENGL 5490: Multimedia and Interaction Design

(Cross-listed with SPCM 5490).

Credits: 3. Contact Hours: Lecture 3.

Rhetorical principles of interactive multimedia design, such as those in streaming multimedia as part of workplace documents. Practical understanding of the computer applications used in interactive multimedia development. Focus on theoretical and practical elements of producing multimedia for training in both education and industry. Work with interactive hypertext, digital audio, and nonlinear video editing.

ENGL 5500: Creative Writing: Craft and Professional Practice

Credits: 3. Contact Hours: Lecture 3.

Prereq: Graduate students in Creative Writing and Environment MFA Program OR Instructor Permission

Students develop an understanding of craft and environmental writing across genres (poetry, fiction, nonfiction, drama), as well as learn about editing and publication practice through the lens of a working literary magazine, Flyway: Journal of Writing and Environment. Other course activities may include an environmental field trip, presentations on the production practices of leading literary journals, individual editing projects, and pragmatic guidance for finding publication outlets for polished creative work. (Typically Offered: Fall)

ENGL 5510: Master Workshop

Credits: 3. Contact Hours: Lecture 3.

An advanced multigenre creative writing workshop. Students work intensively on book-length manuscripts of fiction, creative nonfiction, scriptwriting, or poetry.

ENGL 5520: Workshop: Scriptwriting

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 12 credits.

Prereq: Graduate students in Creative Writing and Environment MFA Program OR Instructor Permission

Individual projects in dramatic writing. Focus on writing for stage, screen, and/or new media. Readings in dramatic literature. Discussion of elements such as plot, character, dialogue, structure, theme, and visual storytelling.

ENGL 5540: Workshop: Fiction

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 12 credits.

Individual projects in fiction on a workshop and conference basis. Readings in short fiction. Discussion of elements of narrative such as plot, point of view, characterization, theme, setting.

ENGL 5550: Workshop: Nonfiction

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 12 credits.

Individual projects in memoir, immersion journalism, character studies, and/or the personal essay on a workshop and conference basis.

Readings in creative nonfiction.

ENGL 5560: Workshop: Poetry

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 12 credits.

Individual projects in poetry on a workshop and conference basis.

Readings in poetry. Discussion of poetic elements such as image, sound, internal structure, rhythm, tone, figurative language.

ENGL 5570: Studies in Creative Writing

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 12 credits.

Special topics course on ideas, issues, and techniques in creative writing. Subject matter may include specific genres, aspects of the creative writing process, or themes of particular interest. Significant readings and written work required; previous workshop experience helpful.

ENGL 5580: Teaching Creative Writing

Credits: 3. Contact Hours: Lecture 3.

Prereq: Graduate students in Creative Writing and Environment MFA Program OR Instructor Permission

Pedagogical approaches that are effective for grade-school through adult-education creative writing teaching. Writing exercises, workshops, text evaluation, and visits from creative writers.

ENGL 5590: Creative Writing Teaching Internship

Credits: 1-3. Repeatable.

Students assist in an introductory creative writing course, primarily evaluating manuscripts and facilitating workshops. Some students may facilitate community-based creative writing workshops.

ENGL 5600: Environmental Field Experience

Credits: 3. Repeatable, maximum of 6 credits.

Prereq: Graduate students in Creative Writing and Environment MFA Program OR Instructor Permission

Students spend a term on a project that requires fieldwork. Projects might include working for a federal, state, or private non-profit environmental organization or farm, or living and working in a specified natural area.

ENGL 5610: Methods for Scholarship in Literature and the Humanities

Credits: 3. Contact Hours: Lecture 3.

Intensive study of research methods and perspectives concerning the study of literature and the humanities at the master's level. Introduction to resources and techniques of research, the structure of academic articles, and strategies for argument in academic communication.

ENGL 5620: Topics in the Study of Film

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Intensive study of cinematic genres, periods, movements, or themes; e.g., The Musical, Classical Hollywood Cinema, Structural Film, Art and Cinema. General emphasis will be on American, British, and other Anglophone cinemas. (Typically Offered: Spring)

ENGL 5630A: Research Methods in Rhetoric, Composition, and Professional Communication: Qualitative Research

Credits: 3. Contact Hours: Lecture 3.

Theory and application of qualitative communication research, including research design, data collection, ethical issues, data analysis, and reporting results. Offered even-numbered years. (Typically Offered: Spring)

ENGL 5630B: Research Methods in Rhetoric, Composition, and Professional Communication: Quantitative Research

Credits: 3. Contact Hours: Lecture 3.

Application of quantitative research designs, such as surveys and experiments; data collection techniques; essential statistical analysis; and write-up of results. Develop ethical research practices for human subjects in research. Analyze quantitative research design principles in professional communication studies. Offered odd-numbered years. (Typically Offered: Spring)

ENGL 5630C: Research Methods in Rhetoric, Composition, and Professional Communication: Rhetorical Analysis

Credits: 3. Contact Hours: Lecture 3.

Extended practice in close textual analysis of various kinds of rhetorical artifacts. Attention to important theoretical concepts used in rhetorical analysis and to historical controversies over the scope and function of rhetorical analysis. (Typically Offered: Spring)

ENGL 5690: Grant Writing

(Cross-listed with GRST 5690).

Credits: 1. Contact Hours: Lecture 1.

Writing a winning proposal. (Typically Offered: Spring)

ENGL 5860: Visual Rhetoric in Professional Communication

Credits: 3. Contact Hours: Lecture 3.

Rhetorical theory and research in graphics, document design, and related principles of visual communication. Methods of designing texts, data displays, illustrations, and other visual elements in business and technical communication.

ENGL 5870: Internship in Professional Communication

Credits: 1-3. Repeatable, maximum of 6 credits.

An opportunity to write, edit, and design documents in a professional setting. (Typically Offered: Fall, Spring, Summer)

ENGL 5880: Supervised Practice Teaching in Teaching English as a Second Language

(Cross-listed with LING 5880).

Credits: 3. Contact Hours: Lecture 1, Laboratory 5.

Intensive observation of ESL instruction and supervised practice in teaching learners of English in a context appropriate to the student teacher's goals. Graduation Restriction: ENGL 5880 cannot be used for teacher licensure. (Typically Offered: Fall, Spring)

ENGL 5890: Supervised Practicum in Literary Editing

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

An opportunity to edit literary texts and gain experience in a literary publishing setting. (Typically Offered: Fall, Spring, Summer)

ENGL 5900A: Special Topics: Literature

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

ENGL 5900B: Special Topics: Teaching English as a Second Language (TESL)/Applied Linguistics

(Cross-listed with LING 5900B).

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

ENGL 5900C: Special Topics: Composition and Rhetoric

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

ENGL 5900E: Special Topics: Rhetoric and Professional Communication

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

ENGL 5900F: Special Topics: Creative Writing

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

ENGL 5900G: Special Topics: Applied Linguistics and Technology

(Cross-listed with LING 5900G).

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

ENGL 5910A: Directed Readings: Literature

Credits: 1-30. Repeatable.

(Typically Offered: Fall, Spring, Summer)

ENGL 5910B: Directed Readings: Teaching English as a Second Language (TESL)/Applied Linguistics

(Cross-listed with LING 5910B).

Credits: 1-30. Repeatable.

(Typically Offered: Fall, Spring, Summer)

ENGL 5910C: Directed Readings: Composition and Rhetoric

Credits: 1-30. Repeatable.

(Typically Offered: Fall, Spring, Summer)

ENGL 5910E: Directed Readings: Rhetoric and Professional Communication

Credits: 1-30. Repeatable.

(Typically Offered: Fall, Spring, Summer)

ENGL 5910F: Directed Readings: Creative Writing

Credits: 1-30. Repeatable.

(Typically Offered: Fall, Spring, Summer)

ENGL 5910G: Directed Readings: Applied Linguistics and Technology

(Cross-listed with LING 5910G).

Credits: 1-30. Repeatable.

(Typically Offered: Fall, Spring, Summer)

ENGL 5920A: Core Studies: Rhetoric

(Cross-listed with SPCM 5920A).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Seminar on topics central to the fields of rhetoric and professional communication or composition. (Typically Offered: Fall, Spring, Summer)

ENGL 5920B: Core Studies: Composition

(Cross-listed with SPCM 5920B).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Seminar on topics central to the fields of rhetoric and professional communication or composition. (Typically Offered: Fall, Spring, Summer)

ENGL 5920C: Core Studies: Professional Communication

(Cross-listed with SPCM 5920C).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Seminar on topics central to the fields of rhetoric and professional communication or composition. (Typically Offered: Fall, Spring, Summer)

ENGL 5940X: Practice and Theory of Teaching Literature in the Secondary Schools

(Dual-listed with ENGL 4940).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 4940: ENGL 3100; ENGL 3970; 9 additional credits in ENGL beyond ENGL 2500; PSYCH 3330; Admission to the MAT Program

Portfolio review. Current theories and practices in the teaching of literature to secondary school students. Integrating literary study and writing. Preparation and selection of materials. Classroom presentation. Unit planning. (ENGL 4940: Taken concurrently with EDUC 4800, Cr. 2, and SPED 4010; 5940X: taken concurrently with EDUC 5910E.) ENGL 4940 students must have initiated the application process for the teacher education program and initiated a background check with the State of Iowa Department of Criminal Investigation. ENGL 5940X students must have initiated a background check with the State of Iowa Department of Criminal Investigation. (Typically Offered: Fall, Spring)

ENGL 5950A: Graduate Study and Travel: Literature

Credits: 1-30. Contact Hours: Lecture 30.

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply. (Typically Offered: Fall, Spring, Summer)

ENGL 5950B: Graduate Study and Travel: Creative Writing

Credits: 1-30. Contact Hours: Lecture 30.

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply. (Typically Offered: Fall, Spring, Summer)

ENGL 5950C: Graduate Study and Travel: Linguistics

Credits: 1-30. Contact Hours: Lecture 30.

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply. (Typically Offered: Fall, Spring, Summer)

ENGL 5950D: Graduate Study and Travel: Rhetoric and Professional Communication

Credits: 1-30. Contact Hours: Lecture 30.

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply. (Typically Offered: Fall, Spring, Summer)

ENGL 5950E: Graduate Study and Travel: Teacher Education

Credits: 1-30. Contact Hours: Lecture 30.

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply. (Typically Offered: Fall, Spring, Summer)

ENGL 5990: Creative Component

Credits: 3. Repeatable.

Prereq: Instructor Permission for Course

Creative Component. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**ENGL 6030: Seminar in Composition Theory**

Credits: 3. Contact Hours: Lecture 3.

Exploration of relationships between theory and practice in current pedagogy. Intensive examination of contemporary theories of poststructuralism, new media, feminism, postcolonialism, or cultural studies and their impact on current pedagogical practice. Participation in pedagogical research and theory building.

ENGL 6110: Seminar in Rhetorical Theory

(Cross-listed with SPCM 6110).

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Rhetorical theory, criticism, and/or practice in relation to a historical period or a particular theoretical issue.

ENGL 6230A: Research Methods in Applied Linguistics: Quantitative

(Cross-listed with LING 6230A).

Credits: 3. Contact Hours: Lecture 3.

Survey of quantitative research methods used in applied linguistics. Offered odd-numbered years. (Typically Offered: Spring)

ENGL 6230B: Research Methods in Applied Linguistics: Qualitative

(Cross-listed with LING 6230B).

Credits: 3. Contact Hours: Lecture 3.

Survey of qualitative research methods used in applied linguistics. Offered even-numbered years. (Typically Offered: Spring)

ENGL 6260: Computer-Assisted Language Testing

(Cross-listed with LING 6260).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 5190 or LING 5190

Principles and practices for the use and study of computers and the Internet in second language assessment. Offered even-numbered years. (Typically Offered: Spring)

ENGL 6300: Seminar in Applied Linguistics

(Cross-listed with LING 6300).

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Topic changes each semester. Topics include advanced methods in natural language processing, technology and literacy in a global context, feedback in CALL programs, technology and pronunciation, and advances in language assessment.

ENGL 6310: Administration and Organization of Multimodal Writing Programs

Credits: 3. Contact Hours: Lecture 3.

Survey of the major components of writing instruction in academic and nonacademic settings. History, theory, organization, and evaluation of writing programs. Guided observation of writing program functions at various institutions and businesses.

ENGL 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Research. (Typically Offered: Fall, Spring, Summer)

Entomology (ENT)

Courses primarily for undergraduates:**ENT 2010: Introduction to Insects**

Credits: 1. Contact Hours: Lecture 2.7.

Biological and ecological aspects of insects. Offered online only. 5 weeks. (Typically Offered: Fall, Spring)

ENT 2110: Insects and Society

Credits: 2. Contact Hours: Lecture 2.7.

Prereq: ENT 2010

The importance of insects in human well-being. Insect-human interactions. Primarily for non-science and non-agriculture majors. Offered online only. 11 weeks. (Typically Offered: Fall, Spring)

ENT 2140: Insects in Forensic Science

Credits: 3. Contact Hours: Lecture 3.

Introduction to the use of insects as evidence in court and how they can assist in solving crimes. Topics covered include basic insect biology, systematics, behavior, with emphasis on applications of forensic entomology. Offered even-numbered years. (Typically Offered: Fall)

ENT 2200: Introduction to Forensic Science

(Cross-listed with CJ 2200).

Credits: 3. Contact Hours: Lecture 3.

Study of fundamental forensic science techniques and procedures covering types of physical, chemical, and biological evidence and how this information is used in the legal system. Assessment of crime scenes and various forensic specialties will be introduced. (Typically Offered: Spring)

ENT 2830: Pesticide Application Certification

(Cross-listed with AGRON 2830/ FOR 2830/ HORT 2830).

Credits: 2. Contact Hours: Lecture 2.

Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized. (Typically Offered: Spring)

ENT 3580: Bee Biology, Management, and Beekeeping

(Cross-listed with BIOL 3580).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Introductory (2000-level) biology coursework or permission of an instructor

Bee diversity and evolution, ecology, role as pollinators, behavior, anatomy, and development. Management of bees as agricultural pollinators and honey producers, focusing on honey bees. Working with live bee hives and demonstration of practical beekeeping skills will occur during several field trips to local hives. (Typically Offered: Fall)

ENT 3700: Insect Biology

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: BIOL 1010 or BIOL 2110

Structure, physiology, evolution, behavior, life histories, and recognition of insects. Collection required. (Typically Offered: Fall)

ENT 3720: Livestock Entomology

Credits: 2. Contact Hours: Lecture 2.

Classroom and off-campus videotape sections. 12 weeks. Recognition, biology, behavior, economic importance, and management of insects and other arthropods affecting livestock and poultry production. Offered odd-numbered years. (Typically Offered: Spring)

ENT 3740: Insects and Our Health

(Cross-listed with MICRO 3740).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits in Biological Sciences

Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease. Meets International Perspectives Requirement. (Typically Offered: Spring)

ENT 3740L: Insects and Our Health Laboratory

(Cross-listed with MICRO 3740L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or concurrent enrollment in ENT 3740 or MICRO 3740

Laboratory and field techniques for studying medical or public health entomology, including: collection, identification and maintenance of medically significant arthropods and experimental design and execution related to the biology of arthropods or arthropod-pathogen interactions. Offered even-numbered years. (Typically Offered: Spring)

ENT 3750: Plant Protection Using Natural Enemies

(Dual-listed with ENT 5750).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENT 3700 or ENT 3760

Overview of the biology, ecology, and classification of insect pathogens, predators, and parasitoids. Discussion of the use of these organisms in plant protection, including an emphasis on genetic alteration of natural enemies. Offered even-numbered years. (Typically Offered: Spring)

ENT 3760: Fundamentals of Entomology and Pest Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: BIOL 1010 or BIOL 2110

Introduction to entomology and insect-pest management, including life processes, ecology, economics, tactics of population suppression, and ecological backlash. (Typically Offered: Spring)

ENT 4250: Aquatic Insects

(Cross-listed with AECL 4250).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: BIOL 3120

Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes. Offered odd-numbered years. (Typically Offered: Spring)

ENT 4350: Entomology Field Trip

(Cross-listed with AECL 4350).

Credits: 2. Repeatable, maximum of 2 credits.

Prereq: BIOL 3120; Permission of Instructor

Field trip to study insects of major terrestrial and aquatic ecosystems. Location and duration vary. ENT 3700 or ENT 4250 recommended. Offered irregularly. (Typically Offered: Spring, Summer)

ENT 4500: Pesticides in the Environment

(Dual-listed with ENT 5500/ TOX 5500). (Cross-listed with TOX 4500).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 credits of BIOL or Permission of Instructor

Fate and significance of pesticides in soil, water, plants, animals, and the atmosphere. (Typically Offered: Spring)

ENT 4520: Integrated Management of Diseases and Insect Pests of Turfgrasses

(Cross-listed with PLP 4520/ HORT 4520).

Credits: 3. Contact Hours: Lecture 3.

Prereq: HORT 3510

Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments. Offered even-numbered years. (Typically Offered: Spring)

ENT 4710: Insect Ecology

(Dual-listed with ENT 5710).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: 9 credits of BIOL

The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture. Offered even-numbered years. (Typically Offered: Fall)

ENT 4900E: Independent Study: Research or Work Experience

Credits: 1-3. Repeatable, maximum of 9 credits.

Prereq: 15 credits in biological sciences, Junior or Senior classification;

Permission of Instructor

Graduation Restriction: A maximum of 9 credits of all (university-wide) 4900 courses may be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

ENT 4900U: Independent Study: Laboratory teaching experience

Credits: 1-3. Repeatable, maximum of 9 credits.

Prereq: Instructor Permission for Course

For students registering to be undergraduate laboratory assistants.

Graduation Restriction: A maximum of 9 credits of all (university-wide) 4900 courses may be applied toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

ENT 5110: Integrated Management of Tropical Crops

(Cross-listed with HORT 5110/ PLP 5110).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (ENT 3700 or ENT 3760 or HORT 2210 or PLP 4080 or PLP 4160) or Graduate Classification

Applications of Integrated Crop management principles (including plant pathology, entomology, and horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by a 10-day tour of Costa Rican agriculture during spring break, then writeup of individual projects. Offered odd-numbered years. Meets International Perspectives Requirement. (Typically Offered: Spring)

ENT 5250: Aquatic Insects

(Cross-listed with AECL 5250).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: BIOL 3120 or graduate standing

Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes. Offered odd-numbered years. (Typically Offered: Spring)

ENT 5300: Ecologically Based Pest Management Strategies

(Cross-listed with AGRON 5300/ SUSAG 5300/ PLP 5300).

Credits: 3. Contact Hours: Lecture 3.

Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes. Offered even-numbered years. (Typically Offered: Fall)

ENT 5500: Pesticides in the Environment

(Dual-listed with ENT 4500/ TOX 4500). (Cross-listed with TOX 5500).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 9 credits in BIOL or Graduate Classification

Fate and significance of pesticides in soil, water, plants, animals, and the atmosphere. (Typically Offered: Spring)

ENT 5520: Integrated Management of Diseases and Insect Pests of Turfgrasses

(Cross-listed with PLP 5520/ HORT 5520).

Credits: 3. Contact Hours: Lecture 3.

Prereq: HORT 3510 or Graduate Classification

Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments. Offered even-numbered years. (Typically Offered: Spring)

ENT 5550: Insect Physiology

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: ENT 3700 or Graduate Classification

Life processes of the insects, including reviews of current problems in insect physiology. Offered even-numbered years. (Typically Offered: Spring)

ENT 5680: Advanced Systematics

(Cross-listed with EEOB 5680).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Principles and practice of systematic biology; taxonomy, nomenclature and classification of plants and animals; sources and interpretation of systematic data; speciation; fundamentals of phylogenetic systematics. (Typically Offered: Spring)

ENT 5700: Plant-Insect Interaction

Credits: 2. Contact Hours: Lecture 2.

Prereq: 9 credits in BIOL or Graduate Classification

Physiological, behavioral, ecological, and evolutionary factors that govern interactions between insects and plants, applications of this knowledge to agriculture, and important results from the study of natural systems. Additional topics covered during the semester include: tritropic interactions, biological control of plants by insects, and pollination biology. Student-led discussions and draws on both the primary and secondary literature. Offered odd-numbered years. (Typically Offered: Fall)

ENT 5710: Insect Ecology

(Dual-listed with ENT 4710).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: 9 credits in BIOL or Graduate Classification

The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role of insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture. Offered even-numbered years. (Typically Offered: Fall)

ENT 5740: Medical Entomology

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: 9 credits in BIOL or Graduate Classification

Identification, biology, and significance of insects and other arthropods that attack people and animals, particularly those that are vectors of disease. Offered even-numbered years. (Typically Offered: Spring)

ENT 5750: Plant Protection Using Natural Enemies

(Dual-listed with ENT 3750).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENT 3700 or ENT 3760 or Graduate Classification

Overview of the biology, ecology, and classification of insect pathogens, predators, and parasitoids. Discussion of the use of these organisms in plant protection, including an emphasis on genetic alteration of natural enemies. Offered even-numbered years. (Typically Offered: Spring)

ENT 5760: Systematic Entomology

Credits: 5. Contact Hours: Lecture 3, Laboratory 6.

Prereq: ENT 3700 or Graduate Classification

Classification, distribution, and natural history of insects, including fundamentals of phylogenetic systematics, biogeography, taxonomic procedures, and insect collection and curation. Offered even-numbered years. (Typically Offered: Fall)

ENT 5810: Experience in Plant Science Extension and Outreach

(Cross-listed with AGRON 5810/ PLP 5810/ HORT 5810).

Credits: 1.

A supervised learning experience in several extension delivery methods used in the plant sciences. Participation in Iowa State University-based extension programs that may include field crops horticulture, or Master Gardener programming. Offered odd-numbered years. (Typically Offered: Summer)

ENT 5900A: Special Topics: Biological Control and Pathology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Biological Control and Pathology. (Typically Offered: Fall, Spring, Summer)

ENT 5900B: Special Topics: Chemical Ecology and Behavior

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Chemical Ecology and Behavior. (Typically Offered: Fall, Spring, Summer)

ENT 5900C: Special Topics: Ecology and Pest Management

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Ecology and Pest Management. (Typically Offered: Fall, Spring, Summer)

ENT 5900D: Special Topics: Evolution and Systematics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Evolution and Systematics. (Typically Offered: Fall, Spring, Summer)

ENT 5900E: Special Topics: Special Research Topics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Special Research Topics. (Typically Offered: Fall, Spring, Summer)

ENT 5900F: Special Topics: Medical and Veterinary Entomology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Medical and Veterinary Entomology. (Typically Offered: Fall, Spring, Summer)

ENT 5900G: Special Topics: Molecular Entomology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Molecular Entomology. (Typically Offered: Fall, Spring, Summer)

ENT 5900I: Special Topics: Toxicology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Toxicology. (Typically Offered: Fall, Spring, Summer)

ENT 5900K: Special Topics: Teaching Experience

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Teaching Experience. (Typically Offered: Fall, Spring, Summer)

ENT 5900L: Special Topics: Extension Internship

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Independent Study. (Typically Offered: Fall, Spring, Summer)

ENT 5900M: Special Topics: Immature Insects

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Immature Insects. (Typically Offered: Fall, Spring, Summer)

ENT 5900N: Special Topics: Population Genetics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Population Genetics. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**ENT 6000: Seminar**

Credits: 1. Contact Hours: Lecture 1.

Presentation of research results. (Typically Offered: Fall, Spring, Summer)

ENT 6750: Insecticide Toxicology

(Cross-listed with TOX 6750).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: ENT 5550 or TOX 5010 or Graduate Classification

Principles of insecticide toxicology; classification, mode of action, metabolism, and environmental effects of insecticides. Offered even-numbered years. (Typically Offered: Fall)

ENT 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Research. (Typically Offered: Fall, Spring, Summer)

Entrepreneurship (ENTSP)

Courses primarily for undergraduates:**ENTSP 3100: Entrepreneurship and Innovation**

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Introduction to the entrepreneurial process, from the creation and discovery of entrepreneurial opportunities to starting viable business ventures. Develops core entrepreneurial and innovation skills instrumental for business startups as well as for established businesses, and fosters fundamental understanding of how to organize, structure, finance, market and launch new ventures. Opportunities to apply introduced skills, tools and frameworks through class projects and exercises. (Typically Offered: Fall, Spring)

ENTSP 3130: Feasibility Analysis for New Ventures

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENTSP 3100

Focuses on the knowledge and practical skills required for developing an idea for a new business venture, researching potential markets, analyzing competition, conducting formal feasibility analyses, and considering business plan implications. Includes discussion of basic business functions in terms of their application to conducting feasibility analyses and to exploiting related business opportunities. (Typically Offered: Fall, Spring)

ENTSP 3200: Corporate Entrepreneurship

(Cross-listed with MGMT 3200).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Introduces entrepreneurial approaches aimed at the identification, development and exploitation of technical and organizational innovations, the management of new product or process developments, and the effective management of new ventures. Focuses on mid-size to large corporations, especially in the manufacturing and service industries. Develops an awareness and understanding of the range, scope, and complexity of issues related to the creation of a corporate environment that is supportive of entrepreneurial endeavors as well as the effective implementation of technological and organizational innovations in corporate settings. (Typically Offered: Fall, Spring)

ENTSP 3670: International Entrepreneurship

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Introduces the essentials of two key components of international entrepreneurship: operating an entrepreneurial firm in an international environment, and starting and developing a new venture in an international market. Topics include choosing and entering an international market, organizing international ventures, and other issues related to managing the business and employees in an international context. Offers students the opportunity to create an international business plan for their own business idea or an existing company. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

ENTSP 3810: Managing Family Businesses

(Cross-listed with MGMT 3810).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Introduction to the important role family businesses play in the domestic and global economies as well as the complex and unique challenges and opportunities encountered by such businesses and their family members and other employees. Explores best practices for successfully managing family businesses.

ENTSP 4100: Social Entrepreneurship

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Introduces the role of entrepreneurship in helping to solve social issues and societal problems, and the idea of social entrepreneurs as pursuers of the public good and as change agents in the social sector. Emphasis on how entrepreneurial topics such as innovation and opportunity recognition can be leveraged to address social problems, as well as on the planning and launch of new non-profit or not-for-profit ventures. (Typically Offered: Fall, Spring)

ENTSP 4310: New Venture Financing

(Cross-listed with FIN 4310).

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3100 or [(ENSTP 3130 or MGMT 3130) and FIN 3010]

Exploration of the foundations of financing entrepreneurial companies. Emphasis on the roles of the entrepreneurs, venture capitalists, and limited partners in the full financing cycle of early-stage ventures, including pitching and raising capital, deal sourcing and due diligence, deal structuring, and post-investment management. Extensive use of case studies and interactive presentations to a mock investor-based board of directors to illustrate the key concepts and processes involved in start-up financing. (Typically Offered: Spring)

ENTSP 4540: Entrepreneurial Marketing

(Cross-listed with MKT 4540).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400

Basic understanding of marketing for those interested in creating or working for a start-up or an innovation-oriented company or consultancy. Relevant to marketing roles in entrepreneurial firms across both B2B and B2C markets. Integrates theory and practice, and provides insight into how entrepreneurs take both strategic and tactical marketing decisions in uncertain business environments. For hands-on perspective, incorporates projects involving real-world marketing problems confronting start-ups, and guest talks from entrepreneurs and frequent case analyses. (Typically Offered: Fall)

ENTSP 4550X: Current Issues in Entrepreneurship

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENTSP 3100

Designed to complement the required curriculum in the Entrepreneurship (ENTSP) major. Explores a rotating selection of cutting edge and timely topics in the areas of new venture creation, social entrepreneurship, and intrapreneurship, with an emphasis on the application of entrepreneurial knowledge and skills to the challenges facing today's organizations and new ventures. Develops an awareness and understanding of the range, scope, and complexity of issues related to entrepreneurial mindsets and the creation of new ventures in different contexts and in our post-pandemic world. Opportunities to apply introduced knowledge, skills, and tools through class projects and exercises.

ENTSP 4610: Entrepreneurship and Accounting Information

(Cross-listed with ACCT 4610).

Credits: 3. Contact Hours: Lecture 3.

Accounting information recording, dissemination, and use by entrepreneurs. Introduces pro forma financials, venture capital, private equity, and state and federal regulations for business creation and formation. Other topics include intrapreneurship, intellectual property, information privacy, cybersecurity, and internal controls, including managing the risk of embezzlement.

ENTSP 4800: Applied Entrepreneurship: Executing New Ventures

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENTSP 3100 and ENTSP 3130

Focuses on application-oriented and experiential learning of best practices for starting and advising new business ventures. Students identify, propose and attempt to execute an experiential learning project, such as developing and presenting a business model for a new venture, launching a new venture, or similar entrepreneurial experience. Requires extensive work outside the classroom.

ENTSP 4850: Trends in Entrepreneurship

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENTSP 3100

A broad examination of historical, literary, and business perspectives on entrepreneurship. The entrepreneurial process is studied by examining the role of individuals, new ventures, and established organizations in the discovery, evaluation, and exploitation of economic opportunities. Emphasis is placed on tracing the evolution of entrepreneurship theories over time, as well as analyzing current trends related to the study of entrepreneurship. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

ENTSP 5200X: Corporate Entrepreneurship, Innovation and Technology Management

(Cross-listed with MGMT 5200X).

Credits: 3. Contact Hours: Lecture 3.

Management of venture creation and innovation at large and established organizations. New ideas, concepts, and techniques on how to stimulate and exploit innovative activities to make established firms not only more responsive and flexible, but also more proactive and opportunity-creating. Related approaches combine activities targeted at the individual, team, organization, industry, regional, national and global level. Introduction to how today's large and established corporations (1) identify, develop and exploit innovative opportunities, (2) manage product development processes, and (3) create, spin-in, spin-off and manage new innovative ventures. This case-based course introduces emerging, non-traditional, evidence-based approaches, such as agile product development, design-thinking, entrepreneurial leadership, entrepreneurial ecosystems, open innovation and blue-ocean strategies. (Typically Offered: Fall, Spring, Summer)

ENTSP 5660: Entrepreneurship and New Venture Startup

Credits: 3. Contact Hours: Lecture 3.

The essentials of starting and operating a new business. Topics include current research on entrepreneurial perspective, starting and developing a new business, financing the venture, managing the growing firm, and special issues. (Typically Offered: Fall, Spring, Summer)

ENTSP 5670: Launching International Ventures

Credits: 3. Contact Hours: Lecture 3.

Essentials of operating international ventures. Topics include identifying and evaluating international business opportunities, choosing among international markets and modes of international entry, building an international organization, managing across cultures, financing international ventures, and recognizing the major issues related to starting a venture in a non-US context. International entry plan for an international new venture or an existing business. (Typically Offered: Fall, Spring, Summer)

ENTSP 5700: Launching your Startup: Proof of Concept and Financial Viability

Credits: 3.

Designed to aid students who are actively pursuing a venture that has progressed beyond the ideation stage of development – and is possibly launched or launch-imminent. Addresses operational challenges in launching a new venture in its very formative stage. Attention is devoted to business formation, risk management, recordkeeping, go-to-market strategy. Examines how start-up and small/medium-size companies reach the marketplace and sustain their businesses, within highly-competitive industries. Recognition is given to the need of management to operate flexibly in these environments. (Typically Offered: Spring)

ENTSP 5830: Formulating and Implementing Innovation Strategies

(Cross-listed with MGMT 5830).

Credits: 3. Contact Hours: Lecture 3.

Key strategies, models, and tools to foster and drive organizational innovation. Analysis of industry dynamics, sources and types of innovations, timing of entry; formulation of innovation strategies; developing innovation portfolios and collaboration strategies, protecting innovation; implementing technological innovation strategy, including new product development and deployment strategy. Essential traits of innovative strategic leaders. Critical analysis and discussion of cases focused on entrepreneurship and innovation and project requiring hands-on practical application of course concepts.

Courses for graduate students:

ENTSP 6050: Seminar in Strategic Management

(Cross-listed with MGMT 6050).

Credits: 3. Contact Hours: Lecture 3.

Critical review of theory and research in the field of strategic management. Introduction to representative conceptual and empirical research. Review theories that provide the foundation for management research, and review current research in associate research streams. The review will cover fundamental questions in strategy. Offered odd-numbered years. (Typically Offered: Fall)

ENTSP 6060: Historical Foundations of Entrepreneurship Research

(Cross-listed with MGMT 6060).

Credits: 3. Contact Hours: Lecture 3.

Seminal readings, theoretical perspectives, and historical roots of Entrepreneurship research. A broad variety of core foundational theories, perspectives, and approaches are discussed.

ENTSP 6070: Current Topics in Entrepreneurship Research

(Cross-listed with MGMT 6070).

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Current theoretical perspectives and methodological approaches in entrepreneurship research. Current entrepreneurship research is inherently interdisciplinary such that we will draw on insight from scholars across a range of disciplines. Offered even-numbered years. (Typically Offered: Spring)

ENTSP 6090: Organizational Research Methods

(Cross-listed with MGMT 6090).

Credits: 3. Contact Hours: Lecture 3.

Solid methodological foundation that will prepare you to be a productive producer and educated consumer of scientific research in the field of Management, Entrepreneurship, and other related disciplines. Introduction to numerous concepts and techniques with relevance to your future scholarship in this domain. Conceptual underpinnings necessary to appreciate the strengths and limitations of various approaches used in these fields and the interplay between theoretical advancement and rigorous empirical investigation. (Typically Offered: Fall)

ENTSP 6110X: Seminar in Entrepreneurship Topics

Credits: 3. Contact Hours: Lecture 3.

Semil readings that canvas the theoretical perspectives and historical roots of entrepreneurship research. A broad variety of core foundational theories, perspectives, and approaches discussed. Topics include the domain of entrepreneurship, foundations and theories of entrepreneurship, the role of opportunities and resources in the entrepreneurial process, the entrepreneur and new venture emergence, cultural and environmental influences on entrepreneurship, family business, corporate entrepreneurship, entrepreneurial orientation, social capital, entrepreneurial learning, and venture financing. Offered even-numbered years. (Typically Offered: Fall)

ENTSP 6200AX: Special Topics: Resources and Capabilities

Credits: 1. Contact Hours: Lecture 3.

Provide students with a deeper content knowledge of innovation. Analysis of classic and recent readings in Strategic Management of Innovation. Topics include an introduction to the main theories of innovation, technology strategy, types and measurement of innovation, ambidexterity, the influence of strategic leadership on innovation, and innovation challenges in established firms. Multiple levels of analysis and consideration of how these topics emerge across different areas of management (micro and macro) and entrepreneurship research. Theory and empirical research embedded within the applied context of the strategic management innovation field. Emphasis on systematic and scientific approach to deepening our knowledge and understanding of topics. (Typically Offered: Spring)

ENTSP 6200BX: Special Topics: Leadership

Credits: 1. Contact Hours: Lecture 3.

Provides deeper content knowledge of entrepreneur well-being. Covers the broad goals of entrepreneur well-being research and examines differences between two critical types of well-being: hedonic and eudaimonic. Addresses why entrepreneurs can achieve and entrepreneur working environments can produce well-being outcomes distinct from those seen by non-entrepreneurs in more traditional waged work environments. Addresses the different coping behaviors used by entrepreneurs, as well as the complex relationship between well-being and venture performance. Approaches course topics from multiple levels of analysis and considers how these topics emerge across different areas of management (micro and macro) and entrepreneurship research. Emphasis on a systematic and scientific approach to deepening knowledge and understanding of topics. (Typically Offered: Fall)

ENTSP 6200CX: Special Topics: Groups and Teams

Credits: 1. Contact Hours: Lecture 3.

Provide content knowledge regarding the importance of self-regulation to entrepreneurs. Explore existing research from a number of domains (primarily psychology and entrepreneurship) that has explored various aspects of self-regulation. Understand connections between various self-regulatory mechanisms and how those individual capabilities potentially relate to a host of entrepreneurial behaviors and outcomes. Examine course topics from multiple levels of analysis and consider how these topics emerge across different areas of management (micro and macro) and entrepreneurship research. Blend of theory and empirical research within the applied context of the management field. Emphasis on a systematic and scientific approach to deepening knowledge and understanding of topics. (Typically Offered: Fall)

ENTSP 6200DX: Special Topics: Crafting Research Ideas

(Cross-listed with MGMT 6200DX).

Credits: 1. Contact Hours: Lecture 3.

Role as a scholar is more than publishing research. The purpose of scholarship is to add to usable knowledge - which means knowledge that can be used to solve real - world problems. To publish an article, students need to convince other scholars of the quality of their research. To create usable knowledge, you need to solve a problem that managers face and communicate that solution to managers. Most managers do not read academic journals, so the publication of an article does not guarantee that anyone who needs the knowledge will find it. Introduction an ideal form of scholarship that Andy Van de Ven calls 'engaged scholarship.' This form of scholarship requires the rigorous theory and methods by adds the additional component of connecting research to practitioners throughout the research process. (Typically Offered: Spring)

ENTSP 6200EX: Special Topics: Effective Academic Writing

(Cross-listed with MGMT 6200EX).

Credits: 1. Contact Hours: Lecture 3.

Provide skills and training necessary to navigate the professional landscape of the management and entrepreneurship fields. Discussion of effective academic writing, focusing on the discipline of management (but certainly applicable beyond this field). Blend of theory, research and practice focused on understanding one's role as a scholar, the implications of scholarly work, and successful advancement through career stages. (Typically Offered: Spring)

ENTSP 6200FX: Special Topics: Professional Development in Management and Entrepreneurship Research

(Cross-listed with MGMT 6200FX).

Credits: 1. Contact Hours: Lecture 3.

Repeatable, maximum of 2 times.

Provide skills and training necessary to navigate the professional landscape of the management/entrepreneurship fields. Includes topics such as research collaborations and networking, the peer review process, ethics, scholarly writing, presenting scholarly work, developing a research identity, understanding the research process, receiving and utilizing feedback, and navigating career milestones. Blend of theory, research, and practice focused on understanding one's role as a scholar, the implications of scholarly work, and successful advancement through career stages. (Typically Offered: Fall)

ENTSP 6200GX: Special Topics: Bayesian Analysis in Management and Entrepreneurship Research

(Cross-listed with MGMT 6200GX).

Credits: 1. Contact Hours: Lecture 3.

Provides a deeper understanding of research methodology. Introduces the fundamental concepts of Bayesian statistics as an advanced methodology to empirically investigate entrepreneurship and management phenome. Analytical topics include Bayes theorem, prior specification, likelihood functions, Markov Chain Monte Carlo simulations, analysis diagnostics, and posterior distributions. Application topics include Bayesian point estimates, intervals, predictions and hypothesis tests. Contrasts Bayesian approaches with frequentist paradigms such as statistical null-hypothesis significance tests. Designed to complement knowledge of MGMT 6090 Organizational Research Methods. Focus on exercises and discussions regarding how to collect, analyze and interpret empirical data to develop and advance micro- and macro-level theories in management and entrepreneurship. (Typically Offered: Fall)

ENTSP 6200IX: Mergers and Acquisitions

(Cross-listed with MGMT 6200IX).

Credits: 1. Contact Hours: Lecture 3.

Provide a deeper content knowledge of mergers and acquisitions (M&As). Cover various M&A topics (premiums, deal completion, CEO characteristics, post-merger integration, acquisition performance, etc.), theoretical frameworks, as well as relevant findings of M&A research. Consider course topics from multiple levels of analysis and consider how these topics emerge across different areas of management (micro and macro) and entrepreneurship research. Blend of theory and empirical research within the applied context of the management field. Emphasis on a systematic and scientific approach to deepening knowledge and understanding of topics. (Typically Offered: Spring)

ENTSP 6200JX: Artificial Intelligence, Machine Learning and Big Data in Management and Entrepreneurship Research

(Cross-listed with MGMT 6200JX).

Credits: 1. Contact Hours: Lecture 3.

Repeatable, maximum of 2 times.

Provide a deeper understanding of research methodology implications of artificial intelligence, machine learning and big data for management and entrepreneurship scholars. Introduce students to the fundamental concepts and emerging capabilities of artificial intelligence and machine learning and investigate their applications in the context of data collection, data analysis and communication of research findings. Explore broader implications of these technologies for the objects of management research: organizations and their members. Designed to complement knowledge students can gain in MGMT 6090 Organizational Methods and ENTSP/MGMT 6200GX Bayesian Aylsis in management and Entrepreneurship Research. (Typically Offered: Fall, Spring, Summer)

ENTSP 6200KX: How to Manage the Revise and Resubmit Process

(Cross-listed with MGMT 6200KX).

Credits: 1. Contact Hours: Lecture 3.

Prereq: Enrollment in the PhD Program

Provide skills and training necessary to navigate the professional landscape of the management and entrepreneurship fields. Explore how to successfully manage the R&R (revise and resubmit process) at scholarly journals. Discussion of the purpose and stages of the peer review process. Blend of theory, research, and practice focused on understanding one's role as a scholar, the review process and implications of reviewing, and successful advancement through career stages. (Typically Offered: Spring)

ENTSP 6200L: Stakeholder Theory in Entrepreneurship Research

Credits: 1. Contact Hours: Lecture 3.

Provide content knowledge of stakeholder theory as it applies to entrepreneurship research. Gain a better understanding of the current research in stakeholder theory and build new insights in entrepreneurship research. Understand how entrepreneurship creates value for customers, suppliers, employees, communities, financiers, and the environment in general. Blend of theory and empirical research within the applied context of the entrepreneurship field. Emphasis on a systematic and scientific approach to deepening knowledge and understanding of topics. (Typically Offered: Fall, Spring)

ENTSP 6200MX: Ethics and Values in Management and Entrepreneurship

(Cross-listed with MGMT 6200MX).

Credits: 1. Contact Hours: Lecture 3.

Provides content knowledge of business ethics, especially the variety of behavioral ethics. Offers an exposure to business ethics literature, experiments with blending different methodology with substantive content and develops interesting research questions related to business ethics & values. Evaluate course topics from multiple levels of analysis and consider how these topics emerge across different areas of management (micro and macro) and entrepreneurship research. Blend of theory and empirical research within the applied context of the management field. Emphasis on a systematic and scientific approach to deepening knowledge and understanding of topics. (Typically Offered: Spring)

ENTSP 6200N: Family Business

Credits: 1. Contact Hours: Lecture 3.

Provide content knowledge of family business. Family businesses are uniquely complex enterprises—that range from small to large corporations and that are characterized by involving the dominant family logic into the management and governance of the firm. Examine current and future research directions of family-owned businesses. Learn (1) the strategic advantages of family businesses and (2) how leaders navigate the challenges posed by these organizations. Blend of theory and empirical research within the applied context of the entrepreneurship field. Emphasis on a systematic and scientific approach to deepening knowledge and understanding of topics. (Typically Offered: Fall, Spring)

ENTSP 6200O: Entrepreneurial Characteristics

Credits: 1. Contact Hours: Lecture 3.

Provide content knowledge of entrepreneurial characteristics. Examine the qualities associated with entrepreneurs. Explore how different characteristics influence entrepreneurial outcomes. Blend of theory and empirical research within the applied context of the entrepreneurship field. Emphasis on a systematic and scientific approach to deepening knowledge and understanding of topics. (Typically Offered: Fall, Spring)

Environmental Engineering (ENVE)

Courses primarily for undergraduates:

ENVE 1200: Environmental Engineering Learning Community

Credits: 1.

Integration of first-year students into the Environmental Engineering program. Assignments and activities involve personal and leadership skill development, teamwork, academic planning and career readiness. Completed both individually and in learning teams under the direction of instructors and peer mentors. (Typically Offered: Fall)

ENVE 1900: Introduction to Undergraduate Research in Civil and Environmental Engineering

(Cross-listed with CE 1900).

Credits: 2. Repeatable, maximum of 4 times.

Prereq: Instructor Permission for Course

Introduction to research, focusing on sub-disciplines of civil and environmental engineering. Research questions, hypotheses, literature reviews, experimental design, data collection, data analysis, and presentation. Topics chosen to introduce students to water resources, environmental engineering, transportation engineering, geotechnical/materials engineering, or structural engineering. Graduation Restriction: Repeatable but only two credits may count toward graduation in CE.

ENVE 2010: Environmental Engineering Measurements and Analysis

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: CE 1900

Introduction to environmental monitoring, environmental field and laboratory sampling, sample preservation and chain of custody, quality assurance and quality control, measurements of common chemical and biological components in different media, and analysis of environmental quality in natural and engineered systems. Concentrations and material balances concepts as applied to environmental engineering. Laboratory testing and experiments. (Typically Offered: Fall)

ENVE 3260: Principles of Environmental Engineering

(Cross-listed with CE 3260).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Credit or enrollment in ABE 3780; (CHEM 1670 OR CHEM 1770); CHEM 1780; MATH 1660

Introduction to environmental problems, water quality indicators and requirements, potable water quality and quantity objectives, water sources and treatment methods; water pollution control objectives and treatment methods; survey of solid and hazardous waste management and air pollution control. (Typically Offered: Fall, Spring)

ENVE 4260: Environmental Engineering Science

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: CE 3260, CHEM 2310, and MICRO 2010

Physical, chemical and biological principles related to environmental engineering and management. Topics include physical principles (mass transfer, mass balances, reactor systems), chemical principles (kinetics and equilibrium, acid-base, redox and precipitation), and biological principles (common environmental microbial processes, microbiology). Laboratory testing and experiments. ENVE 2010 recommended. (Typically Offered: Fall)

ENVE 4270: Environmental Engineering Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 2650; MATH 2660; CE 3260; CE 3720

Integrated systems and modeling-based evaluation of natural and engineered environments including water, soil, and air. Exploration of public health outcomes and risk assessment in environmental engineering. Analysis of socio-environmental systems. (Typically Offered: Spring)

ENVE 4280: Water and Wastewater Treatment Plant Design

(Cross-listed with CE 4280).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CE 3260

Physical, chemical and biological processes for the treatment of water and wastewater including coagulation and flocculation, sedimentation, filtration, adsorption, chemical oxidation/disinfection, fixed film and suspended growth biological processes and sludge management. Design project. (Typically Offered: Spring)

ENVE 4290: Air Pollution and Control

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 2650; CE 3260

Coverage of air pollution topics such as stationary and mobile sources, National Ambient Air Quality Standards, regional and global air pollution concerns (acid rain, ozone depletion, greenhouse gases), indoor air pollution, air pollution meteorology, air pollutant dispersion, and air pollution control equipment. (Typically Offered: Spring)

ENVE 4300: Solid and Hazardous Waste Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: CE 3260; credit or concurrent enrollment in ENVE 4260

Evaluation, characterization, assessment, planning and design of solid and hazardous waste management systems, regulatory requirements, material characterization and collection, minimization and recycling, energy and materials recovery, composting, off-gas treatment, incineration, stabilization, and landfill design. Design of treatment and disposal systems for solid and hazardous wastes, including physical, chemical, and biological treatment, solidification, incineration, secure landfill design, and final disposal site closure plus restoration. (Typically Offered: Fall)

ENVE 4900: Independent Study

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Independent study in environmental or water resources engineering.

Pre-enrollment contract required. Graduation Restriction: Maximum of 3 credits may be counted towards Engineering Topics Electives. (Typically Offered: Fall, Spring, Summer)

Environmental Science (ENSCI)

Courses primarily for undergraduates:

ENSCI 1100: Orientation to Environmental Science

Credits: 1. Contact Hours: Lecture 1.

Overview of Environmental Science curriculum and discussion of professional opportunities. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

ENSCI 2010: Introduction to Environmental Issues

(Cross-listed with BIOL 2010/ ENVS 2010).

Credits: 2. Contact Hours: Lecture 2.

Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change. (Typically Offered: Fall)

ENSCI 2020: Exploration of Environmental and Sustainability Issues

Credits: 1. Contact Hours: Lecture 1.

Exploration of specific environmental and sustainability issues; designed to complement ENSCI 2010. (Typically Offered: Fall)

ENSCI 2030: Exploration of Environmental Science

Credits: 1. Contact Hours: Lecture 1.

Continued exploration of specific environmental science issues developed in ENSCI 2020. Topics may vary in different years. (Typically Offered: Spring)

ENSCI 2500: Environmental Geography

(Cross-listed with AGRON 2500/ ENVS 2500/ NREM 2500).

Credits: 3. Contact Hours: Lecture 3.

The distribution, origins and functions of the earth's physical systems and the spatial relationship between human activity and the natural world. (Typically Offered: Fall)

ENSCI 2510: Biological Processes in the Environment

(Cross-listed with BIOL 2510).

Credits: 3. Contact Hours: Lecture 3.

Principles of Biology from the level of macromolecules to the biosphere. Biological processes that affect environmental systems: including metabolism, energy pathways, biochemical reactions in cells, plant and microbial structure and function, element and water cycles. (Typically Offered: Spring)

ENSCI 2700: Geospatial Technologies

(Cross-listed with AGRON 2700).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Concepts and tools for acquiring, managing, analyzing, and displaying geographic information, including GIS, remote sensing, spatial analysis, and cartography. Focus on applications in biological, ecological, environmental, and agricultural sciences. (Typically Offered: Spring)

ENSCI 3010: Natural Resource Ecology and Soils

(Cross-listed with NREM 3010).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: BIOL 2110, BIOL 2110L; FOR 2010 or a second course in biology

Effects of environmental factors on ecosystem structure and function using forest, prairie and agricultural ecosystems as models. Special emphasis is given to soil-forming factors and the role of soil in nutrient and water cycling and ecosystem dynamics. Additional emphasis is given to human influences on natural ecosystems and the role of perennial plant communities in agricultural landscapes. (Typically Offered: Fall)

ENSCI 3120: Ecology

(Cross-listed with AECL 3120/ BIOL 3120).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: BIOL 2110; (BIOL 2120 or BIOL 2510)

Fundamental concepts and principles of ecology dealing with organisms, populations, communities, and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats. (Typically Offered: Fall, Summer)

ENSCI 3180: Introduction to Ecosystems

(Cross-listed with AGRON 3180/ BIOL 3180/ NREM 3180).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 12 credits in AECL, AGRON, BIOL, CHEM, FOR, GEOL, NREM

Biological and physical processes affecting material and energy flows in natural and managed ecosystems. Understanding and predicting climate and management impacts on ecosystem services and sustainability.

(Typically Offered: Spring)

ENSCI 3190: Analysis of Environmental Systems

(Cross-listed with BIOL 3190/ ENVS 3190).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENSCI 3120; junior classification

Systems approach to the analysis and modeling of material and energy flows in natural and managed environmental systems and the primary environmental factors controlling these systems. Applications in hydrology, biogeochemistry, and population dynamics. (Typically Offered: Spring)

ENSCI 3240: Energy and the Environment

(Cross-listed with GEOL 3240/ ENVS 3240/ MTEOR 3240).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 1630, CHEM 1670, or CHEM 1770

Exploration of the origin of Earth's energy resources and the environmental and climatic impacts of energy acquisition and consumption. Renewable and non-renewable energy resources within an Earth-system context. Various environmentally-relevant topics such as water quality and availability, habitat destruction, greenhouse-gas emissions, and health and safety hazards to wildlife and human communities. (Typically Offered: Spring)

ENSCI 3450: Natural Resource Photogrammetry and Geographic Information Systems

(Cross-listed with NREM 3450).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: Junior classification

Measurement and interpretation of aerial photos in resource management. Introduction to Geographic Information Systems (GIS) using ArcGIS including digitizing, development and query of attribute tables, georeferencing, and use of multiple GIS layers in simple spatial analyses. (Typically Offered: Spring)

ENSCI 3600: Environmental Soil Science

(Cross-listed with AGRON 3600).

Credits: 3. Contact Hours: Lecture 3.

Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities. AGRON 1820 or ENSCI 2500 or GEOL 1010 recommended. (Typically Offered: Spring)

ENSCI 3700: GIS for Ecology and Environmental Science

(Cross-listed with BIOL 3700).

Credits: 1-6. Repeatable.

Prereq: 6 credits BIOL; permission of instructor

Introduction to geographic information systems (GIS) with emphasis on ecological and environmental applications. No prior GIS experience required. Guided, individualized study of topics based on student background and interest. For students with prior experience, topics and activities are selected to build upon any previous experience and minimize duplication to previous GIS coursework. Potential topics include: basic concepts of GIS, data structures, database management, spatial analysis, modeling and visualization of ecological and environmental data. Case studies in ecological and environmental applications using ArcGIS. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ENSCI 3750: Marine Ecology and Ecosystems Dynamics

(Cross-listed with AECL 3750/ BIOL 3750).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110

Overview of the ecological processes, ecosystems, and biodiversity in marine environments. Ever-changing dynamics caused by environmental disturbances, internal forces, or by human impacts on species and ecosystems. (Typically Offered: Spring)

ENSCI 3900: Internship in Environmental Science

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Supervised off-campus work experience in the field of environmental science. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ENSCI 3910: Apprenticeship

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Practical experience in an approved setting such as a research laboratory, government office, or private office. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ENSCI 4020: Watershed Hydrology

(Dual-listed with GEOL 5020/ ENSCI 5020/ MTEOR 5020/ NREM 5020).

(Cross-listed with GEOL 4020/ MTEOR 4020/ NREM 4020).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. (Typically Offered: Fall)

ENSCI 4040: Global Change

(Cross-listed with AGRON 4040/ MTEOR 4040/ ENVS 4040).

Credits: 3. Contact Hours: Lecture 3.

Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. (Typically Offered: Fall, Spring)

ENSCI 4050: Soil-Plant-Animal-Atmosphere Physics

(Dual-listed with AGRON 5050/ ENSCI 5050/ MTEOR 5050). (Cross-listed with AGRON 4050/ MTEOR 4050).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 1600 or MATH 1650

The movement of energy and mass among the soil, vegetation, and atmosphere. The heat and water budget of humans, other animals, plants, and plant communities. Relevance to weather and climate, the effect of climate change on organisms, and remote sensing. Some exposure to computer programming (any language) recommended. Offered odd-numbered years. (Typically Offered: Spring)

ENSCI 4060: World Climates

(Cross-listed with AGRON 4060/ MTEOR 4060).

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 2060 or MTEOR 2060

Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of a changing climate. Semester project and in-class presentation required. Meets International Perspectives Requirement. (Typically Offered: Spring)

ENSCI 4070: Watershed Management

(Cross-listed with NREM 4070/ ENVS 4070).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: 1 course in BIOL

Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers. (Typically Offered: Spring)

ENSCI 4090: Field Methods in Hydrogeology

(Dual-listed with GEOL 5090/ ENSCI 5090). (Cross-listed with GEOL 4090).

Credits: 3. Contact Hours: Laboratory 4.

Prereq: GEOL 4020/ENSCI 4020, GEOL 4110/ENSCI 4110 or CE 4730

Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seepage meters, minipiezometers, stream gaging, and electronic instrumentation for data collection. Field trips to investigate water resource, water quality, and remediation projects. Offered even-numbered years. (Typically Offered: Summer)

ENSCI 4110: Hydrogeology

(Dual-listed with GEOL 5110/ ENSCI 5110). (Cross-listed with GEOL 4110).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations. (Typically Offered: Spring)

ENSCI 4120: Micropaleontology

(Dual-listed with GEOL 5120). (Cross-listed with GEOL 4120).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: GEOL 1020 and GEOL 1020L

Evolution, identification and utility of major microfossil groups from the Mesozoic to present. Focus on Cenozoic applications including biostratigraphy, paleoclimate, and paleothermometry using assemblages, stable isotopes, Mg/Ca, and molecular fossils. Laboratory includes processing and analysis of specific microfossils. Major groups covered include foraminifera, calcareous nanofossils, sponge spicules, diatoms, radiolarians, and silicoflagellates. Offered even-numbered years. (Typically Offered: Fall)

ENSCI 4130: Applied and Environmental Geophysics

(Cross-listed with CE 4130/ GEOL 4130).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar. Introductory geology, algebra, and trigonometry recommended. Offered odd-numbered years. (Typically Offered: Spring)

ENSCI 4140: Applied Groundwater Flow Modeling

(Dual-listed with GEOL 5140/ ENSCI 5140). (Cross-listed with GEOL 4140).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: (GEOL 4110 or CE 4730); MATH 1650

Introduction to the principles of modeling groundwater flow systems. Finite-difference and analytic-element methods, spreadsheet models, boundary conditions, calibration, sensitivity analysis, parameter estimation, particle tracking, and post-audit analysis. Application of MODFLOW to regional flow-system analysis. Computer laboratory emphasizes assigned problems that illustrate topics discussed in the course. Offered even-numbered years. (Typically Offered: Spring)

ENSCI 4150: Paleoclimatology

(Dual-listed with GEOL 5150/ ENSCI 5150). (Cross-listed with GEOL 4150).

Credits: 3. Contact Hours: Lecture 3.

Introduction to mechanisms that drive climate, including the interplay between oceanic and atmospheric circulation and fluctuation in Earth's orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis; O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods; utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimatology and paleoecology of the late Quaternary (last ~1 million years). Offered even-numbered years. (Typically Offered: Fall)

ENSCI 4160: Hydrologic Modeling and Analysis

(Dual-listed with GEOL 5160/ ENSCI 5160/ MTEOR 5160). (Cross-listed with GEOL 4160/ MTEOR 4160).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Study of the basic principles of hydrologic modeling, including rainfall-runoff analysis, lumped and distributed modeling, conceptual and physical models, parameter estimation and sensitivity analysis, input and validation data, uncertainty analysis, and the use of models in surface water hydrology. A range of common models are applied to study hydrologic topics such as flood forecasting and land use change impacts. Previous experience with Matlab or other programming language is needed. Offered odd-numbered years. (Typically Offered: Spring)

ENSCI 4180: Stream Ecology

(Cross-listed with AECL 4180).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 4860

Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries. Offered odd-numbered years. (Typically Offered: Fall)

ENSCI 4190: Aqueous and Environmental Geochemistry

(Dual-listed with GEOL 5190/ ENSCI 5190). (Cross-listed with GEOL 4190).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: CHEM 1780, CHEM 1780L and Junior classification

Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling. Offered even-numbered years. (Typically Offered: Spring)

ENSCI 4200: Environmental Engineering Chemistry

(Cross-listed with CE 4200).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: CE 3260, CHEM 1780

Geology and geochemistry of non-metallic and metallic ore deposits. Major processes that concentrate metals in the Earth. Geochemical conditions of ore formation using stable-isotope and fluid-inclusion studies. Laboratory emphasizes the study of metallic ores. Offered even-numbered years. (Typically Offered: Fall)

ENSCI 4240A: Air Pollution: Air Quality and Effects of Pollutants

(Cross-listed with ABE 4240A/ CE 4240A).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (CHEM 1780 or [PHYS 2310; PHYS 2310L]); (MATH 1660 or 3 credits in STAT); Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 4240B: Air Pollution: Climate Change and Causes

(Cross-listed with ABE 4240B/ CE 4240B).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (CHEM 1780 or [PHYS 2310; PHYS 2310L]); (MATH 1660 or 3 credits in STAT); Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 4240C: Air Pollution: Transportation Air Quality

(Cross-listed with ABE 4240C/ CE 4240C).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (CHEM 1780 or [PHYS 2310; PHYS 2310L]); (MATH 1660 or 3 credits in STAT); Senior classification or above

ENSCI 4240D: Air Pollution: Off-Gas Treatment Technology

(Cross-listed with ABE 4240D/ CE 4240D).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (CHEM 1780 or [PHYS 2310; PHYS 2310L]); (MATH 1660 or 3 credits in STAT); Senior classification or above

ENSCI 4240E: Air Pollution: Agricultural Sources of Pollution

(Cross-listed with ABE 4240E/ CE 4240E).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (CHEM 1780 or [PHYS 2310; PHYS 2310L]); (MATH 1660 or 3 credits in STAT); Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 4260: Stable Isotopes in the Environment

(Dual-listed with GEOL 5260/ ENSCI 5260). (Cross-listed with GEOL 4260).

Credits: 3. Contact Hours: Lecture 3.

Introduction to the theory, methods and applications of stable isotopes.

Primary focus on the origin, natural abundance, and fractionation of carbon, hydrogen, oxygen, nitrogen isotopes. Applications of isotopic occurrence for elucidation of physical, chemical, biological, and environmental processes. Effects of plant physiology, photosynthesis, trophic structure, diffusion, evaporation, chemical precipitation, soil and atmospheric processes, and environmental factors on isotope abundance. Offered odd-numbered years. (Typically Offered: Fall)

ENSCI 4460: Integrating GPS and GIS for Natural Resource Management

(Dual-listed with NREM 5460/ ENSCI 5460). (Cross-listed with NREM 4460).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: 12 credits in student's major (AECL/FOR) at 3000 level or above

Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation. (Typically Offered: Fall)

ENSCI 4520: Intro GIS for Geoscientists

(Dual-listed with GEOL 5520/ AGRON 5520/ ENSCI 5520). (Cross-listed with AGRON 4520/ GEOL 4520).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Introduction to geographic information systems (GIS) using ArcGIS Pro with particular emphasis on geoscientific data. Teaches typical GIS operations and analyses in the geosciences to prepare students for practical use of GIS in industry and academia. Includes a class project for GEOL 5520. Sophomore classification or above recommended. (Typically Offered: Fall, Spring)

ENSCI 4590: Environmental Soil and Water Chemistry

(Dual-listed with AGRON 5590/ ENSCI 5590). (Cross-listed with AGRON 4590).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: 6 credit of CHEM; (AGRON 1820 or AGRON 3600); MATH 1400 or higher

An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues. AGRON 3540; GEOL 1000 recommended. (Typically Offered: Fall)

ENSCI 4630: Soil Formation and Landscape Relationships

(Dual-listed with AGRON 5630/ ENSCI 5630). (Cross-listed with AGRON 4630).

Credits: 3. Contact Hours: Lecture 3.

Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. AGRON 1820 or ENSCI 2500 recommended. Graduation Restriction: Credit for one of AGRON 4630 or AGRON 4630L may be applied for graduation. (Typically Offered: Fall)

ENSCI 4640: Wetland Ecology

(Cross-listed with BIOL 4640).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 15 credits in BIOL

Ecology, classification, creation and restoration, and management of wetlands. Emphasis on North American temperate wetlands. (Typically Offered: Fall, Spring, Summer)

ENSCI 4660: Ecosystem Services

(Dual-listed with ENSCI 5660/ NREM 5660). (Cross-listed with NREM 4660).

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Prereq: 15 credits in AECL, AGRON, BIOL, CHEM, FOR, GEOL, NREM

Ecosystem services are the societal benefits provided by natural and managed ecosystems. Benefits such as provision of food, purification of air and water, and regulation of climate are essential to human survival and prosperity, but rely upon maintenance of healthy ecosystems. This course will cover the science, policy, and practice of ecosystem services assessment and management, with a special focus on biodiversity, water quality, food production, and climate. Offered odd-numbered years. (Typically Offered: Spring)

ENSCI 4680: Applied Geostatistics for Geoscientists

(Dual-listed with GEOL 5680/ ENSCI 5680/ MTEOR 5680). (Cross-listed with GEOL 4680/ MTEOR 4680).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: GEOL 4520; CRP 3510; CRP 4520; (NREM 3450 or NREM 4470)

Introduction to geospatial data collection, analysis, interpretation, and presentation. Geospatial techniques including geographic information systems (GIS), remote sensing (RS), and global positioning systems (GPS). Study of applied geostatistical analysis (e.g., interpolation and spatial regression). Offered even-numbered years. (Typically Offered: Fall)

ENSCI 4770: Soil Physics

(Dual-listed with AGRON 5770/ ENSCI 5770). (Cross-listed with AGRON 4770).

Credits: 3. Contact Hours: Lecture 3.

The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat. AGRON 1820 recommended. (Typically Offered: Spring)

ENSCI 4790: Surficial Processes

(Dual-listed with GEOL 5790/ ENSCI 5790). (Cross-listed with GEOL 4790).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

The study of physical processes that shape Earth's surface. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial, hillslope, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory includes topographic map interpretation and local field trips. An introductory course in geology is recommended as background. (Typically Offered: Fall)

ENSCI 4800: Engineering Analysis of Biological Systems

(Cross-listed with ABE 4800/ GLOBE 4800).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ABE 3800 or Permission of Department

Systems-level quantitative analysis of various biological systems, including applications in foods, feeds, biofuels, bioenergy, and other bio-based systems. Introduction to techno-economic analysis and life-cycle assessment of these systems at multiple production scales. Applying these tools to evaluate and improve cost and sustainability performance. Students enrolled in ABE 5800 will be required to conduct additional learning activities. (Typically Offered: Fall)

ENSCI 4830: Environmental Biogeochemistry

(Dual-listed with ENSCI 5830). (Cross-listed with BIOL 4830/ GEOL 4830).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Combined 12 credits in biology, chemistry, and physics

An exploration of biological, physical and geochemical impacts on the structure and function of ecosystems from local to global scales. Emphasis on the cycles of carbon, nitrogen, phosphorus, sulfur, and metals, and how these have been impacted by human activity. Topics may include biological feedbacks to climate change, microbial physiology and redox reactions, plant/soil feedbacks, terrestrial/aquatic linkages, early Earth processes and the origins of life. Offered odd-numbered years. (Typically Offered: Spring)

ENSCI 4840: Ecosystem Ecology

(Cross-listed with BIOL 4840).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Combined 12 credits in biology, chemistry, and physics

Introduction of the study of ecosystems and the biological and physical factors that influence their properties and dynamics. Conceptual foundations for ecosystem studies. Interactions among organisms, biological diversity, and ecosystem attributes. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems. Global change issues. Offered odd-numbered years. (Typically Offered: Spring)

ENSCI 4850: Soil and Environmental Microbiology

(Dual-listed with AGRON 5850/ ENSCI 5850/ MICRO 5850). (Cross-listed with AGRON 4850/ MICRO 4850).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AGRON 1820

The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues. MICRO 2010; MICRO 2010L recommended. (Typically Offered: Fall)

ENSCI 4860: Aquatic Ecology

(Cross-listed with AECL 4860/ BIOL 4860).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3120 or ENSCI 3190 or ENSCI 4020 or NREM 3010

Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology. (Typically Offered: Fall)

ENSCI 4860L: Aquatic Ecology Laboratory

(Cross-listed with AECL 4860L/ BIOL 4860L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Concurrent enrollment in BIOL 4860

Field trips and laboratory exercises to accompany 4860. Hands-on experience with aquatic research and monitoring techniques and concepts. (Typically Offered: Fall)

ENSCI 4870: Microbial Ecology

(Cross-listed with BIOL 4870/ GEOL 4870/ MICRO 4870).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 credits in Biology and 6 credits in Chemistry

Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized. (Typically Offered: Fall)

ENSCI 4880: Raster GIS for Geoscientists

(Dual-listed with GEOL 5880/ AGRON 5880/ ENSCI 5880). (Cross-listed with AGRON 4880/ GEOL 4880).

Credits: 3.

GIS course with focus on the spatial analysis and modeling of raster and triangulated irregular network (TIN) data using ArcGIS Pro. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 5880) a class project. Basic knowledge of ArcGIS Pro is a plus but not required. Course can be taken concurrently to any other Intro GIS course. Sophomore classification or above recommended. Offered odd-numbered years. (Typically Offered: Spring)

ENSCI 4890: Survey of Remote Sensing Technologies

(Cross-listed with EE 4890/ MTEOR 4890/ GEOL 4890/ NREM 4890).

Credits: 3. Contact Hours: Lecture 3.

Electromagnetic-radiation principles, active and passive sensors, multispectral and hyperspectral sensors, imaging radar, SAR, thermal imaging, lidar. Examples of applications. Also offered online S. (Typically Offered: Fall)

ENSCI 4900: Independent Study

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

ENSCI 4900H: Independent Study: Honors

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Permission of instructor and approval of Environmental Science coordinator. (Typically Offered: Fall, Spring, Summer)

ENSCI 4950: Current Topics and Case Studies in Environmental Science

Credits: 1-3. Contact Hours: Lecture 2, Laboratory 2.

Current topics and case studies related to the analysis and management of environmental systems. Individual and/or group projects.

ENSCI 4960A: Travel Course: International Tour

Credits: 1-30. Repeatable.

Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings.

ENSCI 4960B: Travel Course: Domestic Tour

Credits: 1-30. Repeatable.

Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings.

ENSCI 4980: Cooperative Education

Credits: Required. Repeatable.

Required of all cooperative education students. Students must register prior to commencing each work period. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

ENSCI 5020: Watershed Hydrology

(Dual-listed with GEOL 4020/ ENSCI 4020/ MTEOR 4020/ NREM 4020).

(Cross-listed with GEOL 5020/ MTEOR 5020/ NREM 5020).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. (Typically Offered: Fall)

ENSCI 5040: Global Change

(Cross-listed with AGRON 5040/ MTEOR 5040).

Credits: 3. Contact Hours: Lecture 3.

Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. (Typically Offered: Fall, Spring)

ENSCI 5050: Soil-Plant-Animal-Atmosphere Physics

(Dual-listed with AGRON 4050/ ENSCI 4050/ MTEOR 4050). (Cross-listed with AGRON 5050/ MTEOR 5050).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 1600 or MATH 1650

The movement of energy and mass among the soil, vegetation, and atmosphere. The heat and water budget of humans, other animals, plants, and plant communities. Relevance to weather and climate, the effect of climate change on organisms, and remote sensing. Some exposure to computer programming (any language) recommended. Offered odd-numbered years. (Typically Offered: Spring)

ENSCI 5070: Watershed Management

(Cross-listed with NREM 5070).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers. (Typically Offered: Spring)

ENSCI 5090: Field Methods in Hydrogeology

(Dual-listed with GEOL 4090/ ENSCI 4090). (Cross-listed with GEOL 5090).

Credits: 3. Contact Hours: Laboratory 4.

Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seepage meters, minipiezometers, stream gaging, and electronic instrumentation for data collection. Field trips to investigate water resource, water quality, and remediation projects. Offered even-numbered years. (Typically Offered: Summer)

ENSCI 5110: Hydrogeology

(Dual-listed with GEOL 4110/ ENSCI 4110). (Cross-listed with GEOL 5110).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations. (Typically Offered: Fall)

ENSCI 5120: Micropaleontology

(Dual-listed with GEOL 4120). (Cross-listed with GEOL 5120).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Evolution, identification and utility of major microfossil groups from the Mesozoic to present. Focus on Cenozoic applications including biostratigraphy, paleoclimate, and paleothermometry using assemblages, stable isotopes, Mg/Ca, and molecular fossils. Laboratory includes processing and analysis of specific microfossils. Major groups covered include foraminifera, calcareous nannofossils, sponge spicules, diatoms, radiolarians, and silicoflagellates. Offered even-numbered years. (Typically Offered: Fall). (Typically Offered: Fall)

ENSCI 5130: Applied and Environmental Geophysics

(Cross-listed with CE 5130/ GEOL 5130).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar. Introductory geology, algebra, and trigonometry recommended. Offered odd-numbered years. (Typically Offered: Spring)

ENSCI 5140: Applied Groundwater Flow Modeling

(Dual-listed with GEOL 4140/ ENSCI 4140). (Cross-listed with GEOL 5140).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Introduction to the principles of modeling groundwater flow systems. Finite-difference and analytic-element methods, spreadsheet models, boundary conditions, calibration, sensitivity analysis, parameter estimation, particle tracking, and post-audit analysis. Application of MODFLOW to regional flow-system analysis. Computer laboratory emphasizes assigned problems that illustrate topics discussed in the course. Offered even-numbered years. (Typically Offered: Spring)

ENSCI 5150: Paleoclimatology

(Dual-listed with GEOL 4150/ ENSCI 4150). (Cross-listed with GEOL 5150).

Credits: 3. Contact Hours: Lecture 3.

Introduction to mechanisms that drive climate, including the interplay between oceanic and atmospheric circulation and fluctuation in Earth's orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis; O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods; utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimatology and paleoecology of the late Quaternary (last ~1 million years). Offered even-numbered years. (Typically Offered: Fall)

ENSCI 5160: Hydrologic Modeling and Analysis

(Dual-listed with GEOL 4160/ ENSCI 4160/ MTEOR 4160). (Cross-listed with GEOL 5160/ MTEOR 5160).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Study of the basic principles of hydrologic modeling, including rainfall-runoff analysis, lumped and distributed modeling, conceptual and physical models, parameter estimation and sensitivity analysis, input and validation data, uncertainty analysis, and the use of models in surface water hydrology. A range of common models are applied to study hydrologic topics such as flood forecasting and land use change impacts. Previous experience with Matlab or other programming language is needed. Offered odd-numbered years. (Typically Offered: Spring)

ENSCI 5180: Stream Ecology

(Cross-listed with AECL 5180).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 4860; or graduate standing

Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries. Offered odd-numbered years. (Typically Offered: Fall)

ENSCI 5190: Aqueous and Environmental Geochemistry

(Dual-listed with GEOL 4190/ ENSCI 4190). (Cross-listed with GEOL 5190).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling. Offered even-numbered years. (Typically Offered: Spring)

ENSCI 5200: Environmental Engineering Chemistry

(Cross-listed with CE 5200).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Geology and geochemistry of non-metallic and metallic ore deposits. Major processes that concentrate metals in the Earth. Geochemical conditions of ore formation using stable-isotope and fluid-inclusion studies. Laboratory emphasizes the study of metallic ores. Offered even-numbered years. (Typically Offered: Fall)

ENSCI 5210: Environmental Biotechnology

(Cross-listed with CE 5210).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Fundamentals of biochemical and microbial processes applied to environmental engineering processes, role of microorganisms in wastewater treatment and bioremediation, bioenergetics and kinetics, metabolism of xenobiotic compounds, waterborne pathogens and parasites, and disinfection. Term paper and oral presentation. (Typically Offered: Fall)

ENSCI 5220: Water Pollution Control Processes

(Cross-listed with CE 5220).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Fundamentals of biochemical processes, aerobic growth in a single CSTR, multiple events in complex systems, and techniques for evaluating kinetic parameters; unit processes of activated sludge system, attached growth systems, stabilization and aerated lagoon systems, biosolids digestion and disposal, nutrient removal, and anaerobic treatment systems.

ENSCI 5230: Physical-Chemical Treatment Process

(Cross-listed with CE 5230).

Credits: 3.

Mass balances. Principles and design of physical-chemical unit processes including ideal and realistic reactors; heterogeneous process including gas transfer, sorption, precipitation, and dissolution; redox; flocculation/coagulation; gravity separations; filtration; and membrane processes, electrodialysis, fouling, and scaling. Emphasis on water and wastewater treatment for environmental, health, and aesthetic ends. Case studies in secondary industries.

ENSCI 5240A: Air Pollution: Air Quality and Effects of Pollutants

(Cross-listed with ABE 5240A/ CE 5240A).

Credits: 1. Contact Hours: Lecture 1.

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 5240B: Air Pollution: Climate Change and Causes

(Cross-listed with ABE 5240B/ CE 5240B).

Credits: 1. Contact Hours: Lecture 1.

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 5240C: Air Pollution: Transportation Air Quality

(Cross-listed with ABE 5240C/ CE 5240C).

Credits: 1. Contact Hours: Lecture 1.

ENSCI 5240D: Air Pollution: Off-Gas Treatment Technology

(Cross-listed with ABE 5240D/ CE 5240D).

Credits: 1. Contact Hours: Lecture 1.

ENSCI 5240E: Air Pollution: Agricultural Sources of pollution

(Cross-listed with ABE 5240E/ CE 5240E).

Credits: 1. Contact Hours: Lecture 1.

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 5260: Stable Isotopes in the Environment

(Dual-listed with GEOL 4260/ ENSCI 4260). (Cross-listed with GEOL 5260).

Credits: 3. Contact Hours: Lecture 3.

Introduction to the theory, methods and applications of stable isotopes.

Primary focus on the origin, natural abundance, and fractionation of carbon, hydrogen, oxygen, nitrogen isotopes. Applications of isotopic occurrence for elucidation of physical, chemical, biological, and environmental processes. Effects of plant physiology, photosynthesis, trophic structure, diffusion, evaporation, chemical precipitation, soil and atmospheric processes, and environmental factors on isotope abundance. Offered odd-numbered years. (Typically Offered: Fall)

ENSCI 5280: Solid and Hazardous Waste Management

(Cross-listed with CE 5280).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Evaluation, characterization, assessment, planning and design of solid and hazardous waste management systems, regulatory requirements, material characterization and collection, minimization and recycling, energy and materials recovery, composting, off-gas treatment, incineration, stabilization, and landfill design. Design of treatment and disposal systems, including physical, chemical, and biological treatment, solidification, incineration, secure landfill design, and final disposal site closure plus restoration.

ENSCI 5310: Design and Evaluation of Soil and Water Conservation Systems

(Dual-listed with ABE 4310). (Cross-listed with ABE 5310).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Hydrology and hydraulics in agricultural and urbanizing watersheds. Design and evaluation of systems for the conservation and quality preservation of soil and water resources. Use and analysis of hydrologic data in engineering design; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices, and agricultural water quality. (Typically Offered: Fall)

ENSCI 5320: Nonpoint Source Pollution and Control

(Dual-listed with ABE 4320). (Cross-listed with ABE 5320).

Credits: 3.

Characteristics and mechanisms of non-point source (NPS) pollution in agricultural and urban watersheds, modeling of NPS pollution for terrestrial and aquatic systems, statistical tools to assess environmental datasets, strategies to control and manage NPS pollution of water bodies, and integrated watershed management. Graduate students are required to develop/deliver lecture models on assigned topics and/or complete additional assignments. Offered irregularly. (Typically Offered: Spring)

ENSCI 5330: Erosion and Sediment Transport

(Cross-listed with ABE 5330/ NREM 5330).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Soil erosion processes, soil loss equations and their application to conservation planning, sediment properties, initiation of sediment motion and over land flow, flow in alluvial channels and theory of sediment transport, channel stability, reservoir sedimentation, wind erosion, BMPs for controlling erosion. Offered even-numbered years. (Typically Offered: Fall)

ENSCI 5350: Restoration Ecology

(Cross-listed with EEOB 5350/ NREM 5350).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Theory and practice of restoring animal and plant diversity, structure and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies. Offered even-numbered years. (Typically Offered: Fall)

ENSCI 5370: Watershed Modeling and Policy

(Dual-listed with ABE 4370). (Cross-listed with ABE 5370).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

A project-based course on watershed-scale models for improving water quality. Legislative and judicial basis of the Total Maximum Daily Load (TMDL) program; approaches to TMDL development; principles and techniques for implementation; stakeholder engagement strategies. Hands-on experiences with GIS-interfaced models, data sources, calibration/validation, statistical assessment of model results, and simulation using multiple tools. In addition to other assignments, graduate students will present case studies of TMDLs using different modeling tools. Offered irregularly. (Typically Offered: Fall)

ENSCI 5460: Integrating GPS and GIS for Natural Resource Management
(Dual-listed with NREM 4460/ ENSCI 4460). (Cross-listed with NREM 5460).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation. (Typically Offered: Fall)

ENSCI 5520: Intro GIS for Geoscientists

(Dual-listed with GEOL 4520/ AGRON 4520/ ENSCI 4520). (Cross-listed with AGRON 5520/ GEOL 5520).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Introduction to geographic information systems (GIS) using ArcGIS Pro with particular emphasis on geoscientific data. Teaches typical GIS operations and analyses in the geosciences to prepare students for practical use of GIS in industry and academia. Includes a class project for GEOL 5520. Sophomore classification or above recommended. (Typically Offered: Fall, Spring)

ENSCI 5530: Soil-Plant Relationships

(Cross-listed with AGRON 5530).

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 3540 or graduate standing

Composition and properties of soils in relation to the nutrition and growth of plants. (Typically Offered: Spring)

ENSCI 5590: Environmental Soil and Water Chemistry

(Dual-listed with AGRON 4590/ ENSCI 4590). (Cross-listed with AGRON 5590).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues. AGRON 3540; GEOL 1000 recommended. (Typically Offered: Fall)

ENSCI 5630: Soil Formation and Landscape Relationships

(Dual-listed with AGRON 4630/ ENSCI 4630). (Cross-listed with AGRON 5630).

Credits: 3. Contact Hours: Lecture 3.

Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. AGRON 1820 or ENSCI 2500 recommended. Graduation Restriction: Credit for one of AGRON 4630 or AGRON 4630L may be applied for graduation. (Typically Offered: Fall)

ENSCI 5640: Wetland Ecology

(Cross-listed with EEOB 5640).

Credits: 3. Contact Hours: Lecture 3.

Ecology, classification, creation and restoration, and management of wetlands. Emphasis on North American temperate wetlands. (Typically Offered: Spring)

ENSCI 5660: Ecosystem Services

(Dual-listed with ENSCI 4660/ NREM 4660). (Cross-listed with NREM 5660).

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Ecosystem services are the societal benefits provided by natural and managed ecosystems. Benefits such as provision of food, purification of air and water, and regulation of climate are essential to human survival and prosperity, but rely upon maintenance of healthy ecosystems. This course will cover the science, policy, and practice of ecosystem services assessment and management, with a special focus on biodiversity, water quality, food production, and climate. Offered odd-numbered years. (Typically Offered: Spring)

ENSCI 5680: Applied Geostatistics for Geoscientists

(Dual-listed with GEOL 4680/ ENSCI 4680/ MTEOR 4680). (Cross-listed with GEOL 5680/ MTEOR 5680).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Introduction to geospatial data collection, analysis, interpretation, and presentation. Geospatial techniques including geographic information systems (GIS), remote sensing (RS), and global positioning systems (GPS). Study of applied geostatistical analysis (e.g., interpolation and spatial regression). Offered even-numbered years. (Typically Offered: Fall)

ENSCI 5710: Surface Water Hydrology

(Cross-listed with CE 5710).

Credits: 3. Contact Hours: Lecture 3.

Analysis of hydrologic data including precipitation, infiltration, evapotranspiration, direct runoff and streamflow; theory and use of frequency analysis; theory of streamflow and reservoir routing; use of deterministic and statistical hydrologic models. Fundamentals of surface water quality modeling, point and non-point sources of contamination. (Typically Offered: Spring)

ENSCI 5720: Analysis and Modeling Aquatic Environments

(Cross-listed with CE 5720).

Credits: 3. Contact Hours: Lecture 3.

Principles of surface water flows and mixing. Introduction to hydrologic transport and water quality simulation in natural water systems. Advection, diffusion and dispersion, chemical and biologic kinetics, and water quality dynamics. Applications to temperature, dissolved oxygen, primary productivity, and other water quality problems in rivers, lakes and reservoirs. Deterministic vs. stochastic models. Offered even-numbered years. (Typically Offered: Fall)

ENSCI 5730: Groundwater Hydrology

(Cross-listed with CE 5730).

Credits: 3. Contact Hours: Lecture 3.

Principles of groundwater flow, hydraulics of wells, super-position, slug and pumping tests, streamlines and flownets, and regional groundwater flow. Contaminant transport. Computer modeling. Individual and group projects. (Typically Offered: Fall)

ENSCI 5750: Soil Formation and Transformation

(Cross-listed with AGRON 5750).

Credits: 1. Contact Hours: Lecture 1.

A one-week intensive field class examining the pedology of Iowa under natural and transformed con. (Typically Offered: Fall)

ENSCI 5770: Soil Physics

(Dual-listed with AGRON 4770/ ENSCI 4770). (Cross-listed with AGRON 5770).

Credits: 3. Contact Hours: Lecture 3.

The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

AGRON 1820 recommended. (Typically Offered: Spring)

ENSCI 5780: Laboratory Methods in Soil Physics

(Cross-listed with AGRON 5780).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: concurrent enrollment in AGRON 4770 or AGRON 5770

Methods of measuring soil physical properties such as texture, density, and water content, and transport of heat, water, and gases. (Typically Offered: Spring)

ENSCI 5790: Surficial Processes

(Dual-listed with GEOL 4790/ ENSCI 4790). (Cross-listed with GEOL 5790).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

The study of physical processes that shape Earth's surface. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial, hillslope, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory includes topographic map interpretation and local field trips. An introductory course in geology is recommended as background. (Typically Offered: Fall)

ENSCI 5830: Environmental Biogeochemistry

(Dual-listed with ENSCI 4830).

Credits: 3. Contact Hours: Lecture 3.

An exploration of biological, physical and geochemical impacts on the structure and function of ecosystems from local to global scales. Emphasis on the cycles of carbon, nitrogen, phosphorus, sulfur, and metals, and how these have been impacted by human activity. Topics may include biological feedbacks to climate change, microbial physiology and redox reactions, plant/soil feedbacks, terrestrial/aquatic linkages, early Earth processes and the origins of life. Offered odd-numbered years. (Typically Offered: Spring)

ENSCI 5840: Ecosystem Science

(Cross-listed with EEOB 5840).

Credits: 3. Contact Hours: Lecture 3.

Advanced studies of ecosystems and the biological and physical factors that influence their properties and dynamics. Conceptual foundations and modern approaches to ecosystem studies. Interactions among organisms, biological diversity, and ecosystem attributes. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems. Global change issues. Offered even-numbered years. (Typically Offered: Spring)

ENSCI 5850: Soil and Environmental Microbiology

(Dual-listed with AGRON 4850/ ENSCI 4850/ MICRO 4850). (Cross-listed with AGRON 5850/ MICRO 5850).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Qualified Undergrad Prereq: AGRON 1820 or graduate standing

The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues. MICRO 2010; MICRO 2010L recommended. (Typically Offered: Fall)

ENSCI 5860: Aquatic Ecology

(Cross-listed with AECL 5860/ EEOB 5860).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3120 or ENSCI 3810 or ENSCI 4020 or NREM 3010 or graduate classification

Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology. (Typically Offered: Fall)

ENSCI 5860L: Aquatic Ecology Laboratory

(Cross-listed with AECL 5860L/ EEOB 5860L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Concurrent enrollment in BIOL 4860

Field trips and laboratory exercises to accompany 4860. Hands-on experience with aquatic research and monitoring techniques and concepts. (Typically Offered: Fall)

ENSCI 5870: Microbial Ecology

(Cross-listed with EEOB 5870/ GEOL 5870/ MICRO 5870).

Credits: 3. Contact Hours: Lecture 3.

Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized. (Typically Offered: Fall)

ENSCI 5880: Raster GIS for Geoscientists

(Dual-listed with GEOL 4880/ AGRON 4880/ ENSCI 4880). (Cross-listed with AGRON 5880/ GEOL 5880).

Credits: 3.

Qualified Undergrad Prereq: GEOL 4520; CRP 4510; CRP 4520; NREM 3450; NREM 4460; AE 4080 or graduate standing

GIS course with focus on the spatial analysis and modeling of raster and triangulated irregular network (TIN) data using ArcGIS Pro. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 5880) a class project. Basic knowledge of ArcGIS Pro is a plus but not required. Course can be taken concurrently to any other Intro GIS course. Sophomore classification or above recommended. Offered odd-numbered years. (Typically Offered: Spring)

ENSCI 5890: Survey of Remote Sensing Technologies

(Cross-listed with EE 5890/ MTEOR 5890/ GEOL 5890/ NREM 5890).

Credits: 3. Contact Hours: Lecture 3.

Electromagnetic-radiation principles, active and passive sensors, multispectral and hyperspectral sensors, imaging radar, SAR, thermal imaging, lidar. Examples of applications. Also offered online S. (Typically Offered: Fall)

ENSCI 5900: Special Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Literature reviews and conference in accordance with needs and interest of the student. (Typically Offered: Fall, Spring, Summer)

ENSCI 5990: Creative Component

Credits: 1-30. Repeatable.

Creative component for nonthesis master of science degree. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**ENSCI 6980: Seminar in Environmental Science**

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Reports and discussion of recent research and literature. (Typically Offered: Spring)

ENSCI 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Environmental Studies (ENVS)

Courses primarily for undergraduates:**ENVS 1010: Environmental Geology: Earth in Crisis**

(Cross-listed with GEOL 1010).

Credits: 3. Contact Hours: Lecture 3.

Exploration of the interactions between humans and the geologic environment, and the consequences of those interactions, on local to global scales. Discussion of water, soil, mineral, and energy resources, pollution, climate change, and natural hazards such as earthquakes, volcanism, mass wasting, and flooding. (Typically Offered: Fall, Spring, Summer)

ENVS 1080: Introduction to Oceanography

(Cross-listed with GEOL 1080).

Credits: 3. Contact Hours: Lecture 3.

Introduction to the study of oceans and the processes that helped shape them. A major focus is on how the oceans work, with special attention on geological, chemical, and biological processes. Ocean circulation and its influence on climate. Life of the oceans. Use and misuse of ocean resources. Anthropogenic impacts on the oceanic environment. (Typically Offered: Fall)

ENVS 1110: Geological Disasters

(Cross-listed with GEOL 1110).

Credits: 1. Contact Hours: Lecture 1.

Introduction to the catastrophic geologic processes with the potential to devastate human populations that continue to expand into regions at greatest risk from geologic hazards. Selected case studies and discussion of plate tectonics, climate, and earth processes explain the driving forces behind natural hazards such as earthquakes, tsunamis, volcanic eruptions, landslides, and floods. (Typically Offered: Fall, Spring, Summer)

ENVS 1200: Introduction to Renewable Resources

(Cross-listed with AGRON 1200/ NREM 1200).

Credits: 3. Contact Hours: Lecture 3.

Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management. (Typically Offered: Fall, Spring)

ENVS 1300: Natural Resources and Agriculture

(Cross-listed with NREM 1300).

Credits: 3. Contact Hours: Lecture 3.

Survey of the ecology and management of fish, forest, and wildlife resources in areas of intensive agriculture, with emphasis on Iowa. Conservation and management practices for private agricultural lands. Designed for nonmajors. (Typically Offered: Spring)

ENVS 1400: Climate and Society

(Cross-listed with AGRON 1400/ MTEOR 1400/ GEOL 1400).

Credits: 3. Contact Hours: Lecture 3.

The climate system of our planet. How nature and our actions alter the existing energy balance leading to climate change. Past climates on our planet. The influence of climate on society and resource availability during the Holocene (~ 11,000 years ago to present) with focus on changes post industrial revolution. Significant climate events that have altered our way of life in the past. Projected changes in future climate and potential impacts on society, environment and resources. Adaption to and mitigation of climate change. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

ENVS 1600: Water Resources of the World

(Cross-listed with AGRON 1600/ MTEOR 1600/ GEOL 1600).

Credits: 3. Contact Hours: Lecture 3.

Study of the occurrence, history, development, and management of world water resources. Basic hydrologic principles including climate, surface water, groundwater, and water quality. Historical and current perspectives on water policy, use, and the role of water in society and the environment. Meets International Perspectives Requirement. (Typically Offered: Spring)

ENVS 1730: Environmental Biology

(Cross-listed with BIOL 1730).

Credits: 3. Contact Hours: Lecture 3.

An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Does not satisfy biology major requirements. (Typically Offered: Fall, Spring)

ENVS 2010: Introduction to Environmental Issues

(Cross-listed with BIOL 2010/ ENSCI 2010).

Credits: 2. Contact Hours: Lecture 2.

Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change. (Typically Offered: Fall)

ENVS 2040: Biodiversity

(Cross-listed with BIOL 2040).

Credits: 2. Contact Hours: Lecture 4.

Survey of the major groups of organisms and biological systems. Definition, measurements, and patterns of distribution of organisms. Sources of information about biodiversity. Does not satisfy biology major requirements. Half semester course. See list of life science courses (<https://www.cals.iastate.edu/student-services/lifescience>) for additional information. (Typically Offered: Spring)

ENVS 2200: Globalization and Sustainability

(Cross-listed with ANTHR 2200/ SOC 2200/ GLOBE 2200/ ME 2200/ MATE 2200).

Credits: 3. Contact Hours: Lecture 3.

An introduction to understanding the key global issues in sustainability. Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Graduation Restriction: Cannot be used for technical elective credit in any engineering department. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

ENVS 2500: Environmental Geography

(Cross-listed with AGRON 2500/ ENSCI 2500/ NREM 2500).

Credits: 3. Contact Hours: Lecture 3.

The distribution, origins and functions of the earth's physical systems and the spatial relationship between human activity and the natural world. (Typically Offered: Fall)

ENVS 2700: Foundations in Natural Resource Policy and History

(Cross-listed with NREM 2700/ LA 2700).

Credits: 3. Contact Hours: Lecture 3.

The development of natural resource conservation philosophy and policy from the Colonial Era to the present. North American wildlife, forestry, and environmental policy; national parks and other protected lands; federal and state agencies. Relationship to cultural contexts, including urban reform and American planning movement. Discussion of common pool resources, public and private lands. (Typically Offered: Fall)

ENVS 2830: Introduction to Environmental Politics and Policies

(Cross-listed with POLS 2830).

Credits: 3. Contact Hours: Lecture 3.

Introduction to major ideologies' relations to conservation and ecology. Processes, participants, and institutions involved in state, national, and global environmental policymaking. Case studies of environmental controversies and proposals for policy reform. (Typically Offered: Spring)

ENVS 2930: Environmental Planning

(Cross-listed with CRP 2930).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Comprehensive overview of the field of environmental relationships and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water. (Typically Offered: Fall, Spring)

ENVS 3190: Analysis of Environmental Systems

(Cross-listed with BIOL 3190/ ENSCI 3190).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENSCI 3120; junior classification

Systems approach to the analysis and modeling of material and energy flows in natural and managed environmental systems and the primary environmental factors controlling these systems. Applications in hydrology, biogeochemistry, and population dynamics. (Typically Offered: Spring)

ENVS 3200: Ecofeminism

(Cross-listed with WGS 3200).

Credits: 3. Contact Hours: Lecture 3.

Prereq: WGS 2010 or 3 credits in WGS at 3000 level or above

Women's relationships with the earth, non-human nature, and other humans. The course explores the connections between society's treatment of women and nature; origins of ecofeminism and how it relates to the science of ecology, conventional and sustainable agriculture as well as how ecofeminism relates to other branches of feminist philosophy. Evaluation and critique of modern science, technology, political systems and SOLUTIONS will be included.

ENVS 3240: Energy and the Environment

(Cross-listed with ENSCI 3240/ GEOL 3240/ MTEOR 3240).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 1630, CHEM 1670, or CHEM 1770

Exploration of the origin of Earth's energy resources and the environmental and climatic impacts of energy acquisition and consumption. Renewable and non-renewable energy resources within an Earth-system context. Various environmentally-relevant topics such as water quality and availability, habitat destruction, greenhouse-gas emissions, and health and safety hazards to wildlife and human communities. (Typically Offered: Spring)

ENVS 3340: Environmental Ethics

(Cross-listed with PHIL 3340).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits in PHIL or Permission of Instructor

Thorough study of some of the central moral issues arising in connection with human impact on the environment, e.g., human overpopulation, species extinction, forest and wilderness management, pollution. Several world views of the proper relationship between human beings and nature will be explored. (Typically Offered: Fall)

ENVS 3360X: Climate Change Policy

(Cross-listed with POLS 3360X).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits in POLS OR ECON 1010 OR Sophomore Classification

Policy-centered approach to climate-change solutions. Investigation, analysis, and evaluation of policy responses to the prospect and occurrence of climate change. Politics of climate-related technological, regulatory, and societal changes. Interaction of social movements, institutions, and economic interests in shaping national and global responses to climate change. (Typically Offered: Spring)

ENVS 3420: World Food Issues: Past and Present

(Cross-listed with AGRON 3420/ FSHN 3420).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Issues associated with global agricultural and food systems including ethical, social, economic, environmental, and policy contexts. Investigation of various causes and consequences of overnutrition/ undernutrition, global health, poverty, hunger, access, and distribution. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

ENVS 3450: Population and Society

(Cross-listed with SOC 3450).

Credits: 3. Contact Hours: Lecture 3.

Prereq: SOC 1340

Human population growth and structure; impact on food, environment, and resources; gender issues; trends of births, deaths, and migration; projecting future population; population policies and laws; comparison of the United States with other societies throughout the world. Meets International Perspectives Requirement. (Typically Offered: Fall)

ENVS 3550: Literature and the Environment

(Cross-listed with ENGL 3550).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Focused study of texts that address a wide range of environmental issues, including the relationship between humans and natural/urban environments, views of other-than-human beings, food, climate change, extinction, and social and racial justice. Assignments for the course may include research, exams, writing, and/or individual/group projects.

ENVS 3620: Global Environmental History

(Cross-listed with HIST 3620).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Survey of the interactions of human communities with their environments from the beginnings of human history to the present. Topics include the domestication of animals, the agricultural revolution, industrialization, urbanization, deforestation, hydraulic management, fossil fuel consumption, and climate change. (Typically Offered: Fall)

ENVS 3630: U. S. Environmental History

(Cross-listed with HIST 3630).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Survey of the interactions of human communities with the North American environment. Focus on the period from presettlement to the present, with a particular concentration on natural resources, disease, settlement patterns, land use, and conservation policies.

ENVS 3800: Energy, Environmental and Resource Economics

(Cross-listed with ECON 3800).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010

Natural resource availability, use, conservation, and government policy, with emphasis on energy issues. Environmental quality and pollution control policies.

ENVS 3820: Environmental Sociology

(Cross-listed with SOC 3820).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits of ENVS or SOC 1340

Environment-society relations; social construction of nature and the environment; social and environmental impacts of resource extraction, production, and consumption; environmental inequality; environmental mobilization and movements; U.S. and international examples. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

ENVS 3900: Internship in Environmental Studies

Credits: 1-30. Repeatable.

Prereq: Program Coordinator Permission for Course

Practical experience with nature centers, government agencies, schools, private conservation groups, and other organizations. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ENVS 4040: Global Change

(Cross-listed with AGRON 4040/ ENSCI 4040/ MTEOR 4040).

Credits: 3. Contact Hours: Lecture 3.

Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. (Typically Offered: Fall, Spring)

ENVS 4070: Watershed Management

(Cross-listed with ENSCI 4070/ NREM 4070).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: 1 course in BIOL

Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers. (Typically Offered: Spring)

ENVS 4240: Sustainable and Environmental Horticulture Systems

(Cross-listed with HORT 4240).

Credits: 3. Contact Hours: Lecture 3.

Inquiry into ethical issues and environmental consequences of horticultural cropping systems, production practices and managed landscapes. Emphasis on systems that are resource efficient, environmentally sound, socially acceptable, and profitable. Offered odd-numbered years. (Typically Offered: Spring)

ENVS 4500: Issues in Sustainable Agriculture

(Cross-listed with AGRON 4500).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Agricultural science as a human activity; contemporary agricultural issues from agroecological perspective. Comparative analysis of intended and actual consequences of agricultural practices from the perspective of ethics and sustainable agriculture. (Typically Offered: Spring)

ENVS 4600: Controversies in Natural Resource Management

(Cross-listed with NREM 4600).

Credits: 3. Contact Hours: Lecture 3.

Prereq: AECL 3120 or NREM 3010, NREM 1200, and Junior classification

Analysis of controversial natural resource issues using a case approach that considers uncertainty and adequacy of information and scientific understanding. Ecological, social, political, economic, and ethical implications of issues will be analyzed. (Typically Offered: Fall, Spring)

ENVS 4840: Sustainable Communities

(Cross-listed with CRP 4840).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

The history and theory of sustainable community planning. Procedural and substantive dimensions. Case studies of communities engaged in sustainability planning. Use and development of indicators. (Typically Offered: Spring)

ENVS 4900: Independent Study

Credits: 1-30. Repeatable.

Prereq: Program Coordinator Permission for Course

(Typically Offered: Fall, Spring, Summer)

ENVS 4900H: Independent Study: Honors

Credits: 1-30. Repeatable.

Prereq: Program Coordinator Permission for Course

(Typically Offered: Fall, Spring, Summer)

ENVS 4910: Environmental Law and Planning

(Cross-listed with CRP 4910/ LA 4910).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 credits natural sciences or permission of instructor

Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs. (Typically Offered: Spring)

ENVS 4960A: International Tour

Credits: 1-30. Repeatable.

Prereq: Sophomore classification

Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings. (Typically Offered: Fall, Spring, Summer)

ENVS 4960B: Domestic Tour

Credits: 1-30. Repeatable.

Prereq: Sophomore classification

Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings. (Typically Offered: Fall, Spring, Summer)

Event Management (EVENT)

Courses primarily for undergraduates:

EVENT 1710: Introduction to Event Management

Credits: 3. Contact Hours: Lecture 3.

Overview of the event management industries. Techniques and procedures required for designing and implementing successful events. (Typically Offered: Fall, Spring)

EVENT 2030: Event Management Sophomore Mentorship

Credits: 2. Contact Hours: Lecture 1.

Prereq: Sophomore classification; AESHM 1110; EVENT 1710; by application only

Event Management sophomore students will be paired with a professional mentor in the event industry. Students will meet in the class and individually with their professional mentor throughout the spring semester. Students will be assessed on their experience through reflection, presentation, and mentor evaluation. (Typically Offered: Fall, Spring, Summer)

EVENT 2120: Digital Production in Event Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Applications of skills in Adobe Suite and other software technologies. Introduction to design elements used within the event management industry with a focus on digital publishing of marketing and promotional materials, wayfinding, and other stationery items. Face-to-face lecture and laboratory work. (Typically Offered: Fall, Spring)

EVENT 2770: Digital Promotion in the Service Industry

Credits: 3. Contact Hours: Lecture 3.

Service industry management digital channels and platforms, including media planning, search advertising, social media, and mobile. Students will be introduced to the trending social media management platforms as well as digital marketing management topics of influencer marketing, digital media planning, and content marketing. (Typically Offered: Spring, Summer)

EVENT 2900: Independent Study

Credits: 1-2. Repeatable, maximum of 4 credits.

Prereq: Freshman or Sophomore Classification. Permission of instructor, advisor, and department chair.

Independent study on topics of special interest to the student, facilitated by approved faculty member. Graduation Restriction: No more than 9 credits of EVENT 2900 and EVENT 4900 may be applied towards graduation requirements. (Typically Offered: Fall, Spring, Summer)

EVENT 3280: Incentive Meeting Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: EVENT 1710; Event Management major or minor

Overview of the incentive meeting industry. Focus on incentive meeting planning, destination selection, program development, risk management, cultural aspects of destination, incentive meeting execution, and incentive meeting evaluation. (Typically Offered: Fall, Spring)

EVENT 3330: Entertainment Venue Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: EVENT 1710; Event Management major or minor

Organization and management of various types of entertainment venues including clubs, theaters, auditoriums, and arenas. (Typically Offered: Fall)

EVENT 3430X: Virtual and Hybrid Events

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: EVENT 1710; Event Management major or minor

Application of event management leadership, communication, strategies, and production to analyze and execute virtual and hybrid events. (Typically Offered: Fall, Spring)

EVENT 3670: Event Sales

Credits: 3. Contact Hours: Lecture 3.

Prereq: EVENT 1710; (AESHM 3400 or MKT 3400)

Overview of sales marketing management in the event industry and highlights of the role of the professional event sales manager in the marketing process. As an event professional, students will identify best sales practices to develop their personal selling style, to build on their strengths, and to create a referral business that delivers results. Principles covered include evaluation of characteristics and skills necessary for success in sales; strategic planning; sales leadership; analyzing customers and markets; designing and developing the sales force; recognize the importance of relationship building; process management; and measurement, analysis, and knowledge management. (Typically Offered: Fall, Spring)

EVENT 3710: Conference and Meeting Planning

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable, maximum of 4 times.

Prereq: Credit or concurrent enrollment in EVENT 1710; Sophomore classification

Application of event management principles to conference and meeting planning, trade shows, and conventions focusing on budget development, resource allocation, promotion, hospitality, and professional development. Graduation Restriction: Course must be taken for 3 credits first time, can be repeated for 1-3 credits. (Typically Offered: Fall)

EVENT 3730: Wedding Planning and Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: EVENT 1710; Event Management major or minor

Overview of wedding event industry. Focus on wedding planning processes and implementation, design, and business planning and development. (Typically Offered: Fall, Spring)

EVENT 3780: Sustainable Event Management

Credits: 3. Contact Hours: Lecture 3.

Introduction to organizing sustainable events. Discussion of the business case for sustainability in the events industry, as well as practical solutions for reducing environmental and social impacts in accordance with the United Nations Sustainable Development Goals (SDG). Offered odd-numbered years. (Typically Offered: Spring)

EVENT 3790: Nonprofit Fundraising Event Planning

Credits: 3. Contact Hours: Lecture 3.

Prereq: EVENT 1710; Event Management major or minor

Provides a comprehensive understanding of the principles underlying event fundraising. Students will be provided with the necessary knowledge and skills to conceptualize and implement a fundraising plan, either for their own venture, or for a not-for-profit organization. Through practical exercise, students will have the opportunity to put their fundraising concepts and techniques into practice, gaining valuable insights into the challenges and opportunities of the funding process. (Typically Offered: Fall)

EVENT 3830: Sports Event Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: EVENT 1710; Event Management major or minor

A comprehensive overview of sports and recreation competitions, events, and facilities. Best practices in sports event management, sports organizations, and franchises across the industry. In depth look at athlete and guest services, game day operations, marketing, sponsorship, and post-competition. (Typically Offered: Fall, Spring)

EVENT 3930: Event Management Workshop

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: EVENT Junior or Senior classification; Permission of Instructor

Topics vary each time offered. Graduation Restriction: Maximum of 6 EVENT 3930 credits can be applied to graduation. (Typically Offered: Fall, Spring, Summer)

EVENT 4230: International Meetings and Conferences Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: EVENT 1710

A comprehensive understanding of the strategies, procedures and nuances of planning and executing multinational and multicultural meetings, expositions, conventions or events held outside of the United States. The international aspects that will be covered include planning, budgeting, logistics, venue selection, risk management, and cross-cultural understanding. Meets International Perspectives Requirement. (Typically Offered: Fall)

EVENT 4710: Special Events Coordination

Credits: 1-3. Contact Hours: Lecture 3.

Prereq: EVENT 1710; credit or enrollment in EVENT 3710; Junior classification

Advanced application of public relations and event management. Provide leadership and communicate direction for production of an event including developing budgets, publicity, advertising, fund raising, choreography, staging, lighting, and food. Graduation Restriction: Course must be taken for 3 credits first time, can be repeated for 1-3 credits. (Typically Offered: Fall, Spring)

EVENT 4850: Event Production

Credits: 3. Contact Hours: Lecture 3.

Prereq: EVENT 3710; Event Management major

Event management production and design elements, including experience design, stakeholder relations, risk management, fundraising and sponsorship, promotion, developing objectives, and evaluation and assessment. (Typically Offered: Fall, Spring)

EVENT 4860: Advanced Event Production

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Repeatable, maximum of 6 credits.

Prereq: EVENT 3710; EVENT 4850; Event Management major

Advanced application event management. Provide leadership and direction for production of an event including vendor and stakeholder relations, budget management, publicity, advertising, choreography, staging, lighting, and food. Graduation Restriction: Maximum of 6 credits may be applied toward graduation. (Typically Offered: Fall)

EVENT 4900B: Independent Study: Conferences

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Independent study. (Typically Offered: Fall, Spring, Summer)

EVENT 4900C: Independent Study: Special Events

Credits: 1-30. Repeatable.

Prereq: Program approval

Independent study. (Typically Offered: Fall, Spring, Summer)

EVENT 4900D: Independent Study: Event Management

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Independent study. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

EVENT 5310: Event Business Research Essentials

Credits: 3. Contact Hours: Lecture 3.

Prereq: Instructor Permission for Course

The effective execution of an event necessitates the application of suitable tools and techniques to achieve the event's intended business objectives. This course equips students with the knowledge and skills to cater to the escalating requirement for a structured methodology for conducting event business research and integrating the findings into the strategic decision-making process. Students will be exposed to a comprehensive curriculum that covers research design, measurement, sampling, data collection, processing, analysis, and interpretation, thereby preparing them to navigate the multifaceted challenges of the event industry with poise and proficiency. (Typically Offered: Fall)

EVENT 5610: Advanced Topics in Event Management

Credits: 3. Contact Hours: Lecture 3.

Advanced meeting and event planning topics including event strategy, event risk and security management, event financial management, event design, event project management, and event tourism strategy. (Typically Offered: Spring)

EVENT 5770: Advanced Social Media Marketing in Event Management

Credits: 3. Contact Hours: Lecture 3.

Project-based course that includes analyzing relevant literature in social media and developing, implementing, and assessing an integrated social media marketing strategy in the event planning business marketing plan. Perspective on digital/social/mobile marketing to appreciate its true value to consumers, to managers, and to other corporate stakeholders. Offered odd-numbered years. (Typically Offered: Fall)

EVENT 5780: Advanced Event Sustainability Management

Credits: 3. Contact Hours: Lecture 3.

The course centers on the pivotal domain of sustainability and highlights the compelling justifications for event businesses to accord it preeminence in their operations. An erroneous notion prevades that sustainability is synonymous with ecological conservation and solely concerns the environment. In reality, authentic business sustainability takes into account both social and economic factors, incorporating both the impact on societal stakeholders, such as consumers and employees, and the profitability required to sustain a business. Students in this course will undertake a comprehensive inquiry into the adaptation of modern societies to global transformations and the construction of healthier systems that foster lasting sustainability. (Typically Offered: Spring)

EVENT 5900: Special Topics

Credits: 3. Contact Hours: Lecture 3.

Prereq: Instructor Permission for Course

Topics in event management. (Typically Offered: Fall, Spring)

EVENT 5990: Creative Component

Credits: 3. Contact Hours: Lecture 3.

Prereq: Instructor Permission for Course

Creative component as arranged with instructor. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**EVENT 6340: Theory and Research Seminar in Event Management**

Credits: 3. Contact Hours: Lecture 3.

Prereq: STAT 4010 or Permission of Instructor

Analysis and application of theories and research methodologies in event management and is designed to strengthen students' analytical and critical perspectives to evaluate event management research. Multidisciplinary approach to the areas of sports events, festivals and fairs, conventions and tradeshow, mega events, and event tourism. Offered odd-numbered years. (Typically Offered: Fall)

Family and Consumer Sciences Education and Studies (FCEDS)

Courses primarily for undergraduates:

FCEDS 2060: Professional Roles in Family and Consumer Sciences

Credits: 2. Contact Hours: Lecture 1.

Explore the "secret" history of Home Economics and how women pioneered an academic discipline that grew and evolved into a variety of modern disciplines including family & consumer sciences (FCS), human services, human sciences, human ecology, etc. Introduction to various roles in professional settings (community agencies, secondary schools, business and industry, and Cooperative Extension). Includes 12 hours of field experience, scheduled outside of class. (Typically Offered: Fall)

FCEDS 3010F: Housing

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 credits in FCEDS

Concepts in interior design and housing. Fulfills "Housing" content component for Iowa teaching endorsement 1390: Family and Consumer Sciences. Offered odd-numbered years. (Typically Offered: Summer)

FCEDS 3010K: Textile Selection and Apparel Construction Methods

Credits: 3. Contact Hours: Lecture 2, Laboratory 1.

Prereq: 6 credits in FCEDS

This course is designed to empower Family and Consumer Science (FCS) teachers with the knowledge and skills needed to effectively teach fashion, textiles, and sewing in today's dynamic educational landscape. Participants will delve into an overview of the fashion industry and basic textile science. Students will also develop beginning garment construction skills, gaining insights into both traditional and contemporary practices. This course fulfills the "Textiles or apparel design and merchandising" content component for Iowa teaching endorsement 1390: Family & Consumer Sciences. This course is delivered in a hybrid format, requiring 15 hours (2 days) in-person in the sewing laboratory; the rest of the course is delivered online. Offered even-numbered years. (Typically Offered: Summer)

FCEDS 3060: Educational Principles for Family and Consumer Sciences

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: FCEDS 2060 or Permission of Instructor

Principles of teaching and learning applied to family and consumer sciences content incorporating literacy and STEM strategies for diverse audiences. Focus on providing a broad overview of effective instructional methods and substantial technological tools to meet varied learning needs. Includes 12 hours of arranged practicum and team teaching. (Typically Offered: Fall)

FCEDS 3800V: Pre-Student Teaching Experience in FCS Education: Practicum in FCS Labs

(Cross-listed with EDUC 3800V).

Credits: 1-2. Contact Hours: Laboratory 2.

Repeatable.

Prereq: FCEDS 3060 and admission to Educator Preparation program

Laboratory experience in foods, hospitality management, culinary, prostart, textiles, fashion design, housing, and human development related to family and consumer sciences courses taught at the secondary level. Planning, implementing, managing, and assessing laboratory lessons in family and consumer sciences. Includes 24 hours practicum: unsupervised. 1/2 day of time needed in schedule. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

FCEDS 4130: Planning and Assessment for Family and Consumer Sciences

Credits: 3. Contact Hours: Lecture 3.

Development of curriculum and assessment tools for family and consumer sciences programs in school settings. Focus on accommodating exceptional learners and alignment of teaching standards for classroom assessment. Includes 12 hours of Career and Technical Student Organization Competitive Event Assessment at the state/national level. (Typically Offered: Spring)

FCEDS 4170A: Supervised Teaching in Family and Consumer Sciences: Vocational family and consumer sciences.

Credits: 3-8. Repeatable.

Supervised teaching experience in secondary schools. (Typically Offered: Fall, Spring)

FCEDS 4170B: Supervised Teaching in Family and Consumer Sciences: Family and consumer sciences.

Credits: 3-8. Repeatable.

Supervised teaching experience in secondary schools. (Typically Offered: Fall, Spring)

FCEDS 4180: Foundations of Career and Technical Education in Family and Consumer Sciences

Credits: 3. Contact Hours: Lecture 3.

Investigation into the philosophy of Career and Technical Education (CTE). Historical development of family and consumer sciences. Planning and implementing programs in family and consumer sciences including FCCLA. Impact of selected legislation on family and consumer sciences programs. Techniques for cooperative education, school-to-work, and work-based education programs. Includes educational opportunities off campus for professional development and career advancement. May be used toward Multioccupations Endorsement. (Typically Offered: Spring)

FCEDS 4800V: Pre-Student Teaching Experience in FCS Education: Practicum in Diverse Settings

(Cross-listed with EDUC 4800V).

Credits: 2. Contact Hours: Laboratory 4.

Repeatable.

Laboratory experience in foods, textiles, and human development related to family and consumer sciences exploratory programs. Planning, implementing, managing and assessing laboratory lessons in family and consumer sciences. Includes 48 hours practicum and supervised individual teaching. 1/2 day of time needed in schedule. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

FCEDS 4900C: Independent Study: Curriculum

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

FCEDS 4900G: Independent Study: General

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

FCEDS 4900H: Independent Study: Honors

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

FCEDS 4910A: Supervised Experiences in a Professional Setting: Communications

Credits: 3-8. Repeatable, maximum of 8 credits.

Prereq: HDFS 4180B; minimum 24 credits in FCEDS

Supervised professional experience in an approved setting such as Cooperative Extension, business, community, human service, or government agency. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

FCEDS 4910B: Supervised Experiences in a Professional Setting: Professional Studies

Credits: 3-8. Repeatable, maximum of 8 credits.

Prereq: HDFS 4180B; minimum 24 credits in FCEDS

Supervised professional experience in an approved setting such as Cooperative Extension, business, community, human service, or government agency. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

FCEDS 5000F: Short Course: Career and Technical Education

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring, Summer)

FCEDS 5000G: Short Course: General

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring, Summer)

FCEDS 5000K: Short Course: Textile Selection and Apparel Construction Methods

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring, Summer)

Family Financial Planning (FFP)

Courses primarily for graduate students, open to qualified undergraduates:

FFP 5200: Financial Theory and Research I

Credits: 3. Contact Hours: Lecture 3.

Theories of family functioning, macroeconomic theory related to family resource allocation decisions, the family as an economic unit, and the interaction of the economy and families. (Typically Offered: Fall, Spring, Summer)

FFP 5250: Financial Theory and Research II

Credits: 3. Contact Hours: Lecture 3.

Microeconomic theory as it relates to family resource allocation decisions, theories of household behavior, the lifecycle hypothesis, behavioral economics, behavioral finance, theories of behavioral change, and psychological theories of family well-being. Focus on empirical research investigating household financial decision-making. (Typically Offered: Fall, Spring, Summer)

FFP 5300: Fundamentals of Family Financial Planning

Credits: 3. Contact Hours: Lecture 3.

Introduction to the financial planning process and establishing client-planner relationships. Applied work in cash flow, credit and debt, income tax, insurance, investment, retirement and estate planning. Review of services provided to families, documentation required, ethics in financial planning, and Certified Financial Planner licensee responsibilities. (Typically Offered: Fall, Spring, Summer)

FFP 5350: Financial Counseling

Credits: 3. Contact Hours: Lecture 3.

Theory and research regarding the interactive process between the client and the practitioner, including communication techniques, motivation and esteem building, the counseling environment, ethics, and methods of data intake, verification, and analysis. Other topics include legal issues, compensation, uses of technology to identify resources, information management, and current or emerging issues. (Typically Offered: Fall, Spring, Summer)

FFP 5400: Estate Planning for Families

Credits: 3. Contact Hours: Lecture 3.

Fundamentals of the estate planning process, including estate settlement, estate and gift taxes, property ownership and transfer, and powers of appointment. Tools and techniques used in implementing an effective estate plan, ethical considerations used in providing estate planning services, and new and emerging issues in the field. Case studies provide experience in developing estate plans suitable for varied family forms. (Typically Offered: Fall, Spring, Summer)

FFP 5410: Housing and Real Estate in Family Financial Planning

(Cross-listed with HDFS 5410).

Credits: 3. Contact Hours: Lecture 3.

The role of housing and real estate in the family financial planning process, including taxation, mortgages, financial calculations, legal concerns, and ethical issues related to home ownership and real estate investments. Emphasis on emerging issues in the context of housing and real estate. Offered even-numbered years. (Typically Offered: Summer)

FFP 5450: Retirement Planning, Employee Benefits, and the Family

Credits: 3. Contact Hours: Lecture 3.

Study of micro and macro considerations for retirement planning. Survey of various types of retirement plans, ethical considerations in providing retirement planning services, assessing and forecasting financial needs in retirement, and integration of retirement plans with government benefits. (Typically Offered: Fall, Spring, Summer)

FFP 5500: Military Personal Financial Readiness

Credits: 3. Contact Hours: Lecture 3.

Overview of the topics relevant to the financial planning process that address the unique needs of military service members and their families. (Typically Offered: Fall, Summer)

FFP 5550: Insurance Planning for Families

Credits: 3. Contact Hours: Lecture 3.

In-depth study of risk management concepts, tools, and strategies for individuals and families, including life insurance; property and casualty insurance; liability insurance; accident, disability, health, and long-term care insurance; and government-subsidized programs. Current and emerging issues and ethical considerations relative to risk management. Case studies provide experience in selecting insurance products suitable for individuals and family, study of investment options for clients including common stocks, fixed income securities, convertible securities, and related choices. Relationships between investment options and employee/employer benefit plan choices. Current and emerging issues and ethics are included. (Typically Offered: Fall, Spring, Summer)

FFP 5650: Personal Income Taxation

Credits: 3. Contact Hours: Lecture 3.

In-depth information on income tax practices and procedures including tax regulations, tax return preparation, the tax audit processes, the appeals process, preparation for an administrative or judicial forum, and ethical considerations of taxation. New and emerging issues related to taxation. Family/individual case studies provide practice in applying and analyzing tax information and recommending appropriate tax strategies. (Typically Offered: Fall, Spring, Summer)

FFP 5700: Professional Practices in Financial Planning

Credits: 3. Contact Hours: Lecture 3.

Challenges of managing financial planning practices including, but not limited to: business valuation, personnel, marketing, client services, ethics and technological applications. Relying both on a theoretical as well as an applied approach, students analyze case studies that provide relevant, practical exposure to practice management issues, with a strong emphasis on current research findings. (Typically Offered: Fall, Spring, Summer)

FFP 5830: Investing for the Family's Future

(Cross-listed with HDFS 5830).

Credits: 3. Contact Hours: Lecture 3.

Evaluation of investment markets for the household. Analysis of how families choose where to put their savings. Emphasis is on using the family's overall financial and economic goals to help inform investment choices. (Typically Offered: Fall)

FFP 5900: Family Financial Planning Seminar

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 credits.

Through a seminar format comprised of readings, guest lectures, collaborative case studies, peer interaction, and practical application, students will explore the rapidly growing and changing opportunities of sustainable, responsible, and impact investments. (Typically Offered: Spring, Summer)

FFP 5910: Practicum

Credits: 3-6. Repeatable.

Supervised experience in family financial planning. (Typically Offered: Fall, Spring, Summer)

FFP 5950: Financial Planning - Case Studies

Credits: 3. Contact Hours: Lecture 3.

Professional issues in financial planning, including ethical considerations, regulation and certification requirements, communication skills, and professional responsibility. Students are expected to utilize skills obtained in other courses and work experiences in the completion of personal finance case studies, the development of a targeted investment policy, and other related financial planning assignments. (Typically Offered: Fall, Spring, Summer)

Finance (FIN)

Courses primarily for undergraduates:**FIN 3010: Principles of Finance**

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010 and ACCT 2840 and STAT 2260

Introduction to financial management with emphasis on corporate financing and investment decision making, time value of money, asset valuation, capital budgeting decision methods, cash budgeting, and financial markets. (Typically Offered: Fall, Spring, Summer)

FIN 3100: Corporate Finance

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3010 and (credit or enrollment in MATH 1510 or MATH 1600 or MATH 1650)

Theory used in a firm's investment and financing decisions. Analysis of environment in which financial decisions are made; applications of analytical techniques to financial management problems. (Typically Offered: Fall, Spring, Summer)

FIN 3200: Investments

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3010 and (credit or enrollment in MATH 1510 or MATH 1600 or MATH 1650)

Introduction to securities and markets from the viewpoint of the individual investor. Emphasis on mechanics of trading, measurement of return and risk, behavior of security prices, valuation of stocks and bonds, mutual funds, portfolio selection techniques, and performance evaluation. (Typically Offered: Fall, Spring)

FIN 3300: Financial Markets and Institutions

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3010

Introduction to the structure and operations of the United States financial system and its markets and institutions. Emphasis on developing an integrated understanding of markets and financial service providers including global linkages. (Typically Offered: Fall, Spring)

FIN 3340X: Introduction to Financial Technologies and Cryptocurrencies

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3010

Introduction to the emerging role of financial technologies and cryptocurrencies in the financial services industry and the impact these technologies are having in areas such as payment systems, financial regulation, crowdfunding, robotic investments, and cyber security. Explore the history and origins of crypto coins, markets for trading cryptocurrencies, and role of digital money as a medium of exchange and financial asset, including valuation, risk, and correlation with other investments. (Typically Offered: Fall, Spring)

FIN 3610: Personal Risk Management and Insurance

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3010

Risk concepts and the use of insurance by individuals and families. Emphasis on the insurance mechanism and methods of dealing with income, property, and liability risks. (Typically Offered: Fall, Spring)

FIN 3710: Real Estate Principles

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010.

Legal, economic, social and financial aspects of real estate, including property rights, contracts, mortgage instruments, tax factors, brokerage, valuation, risk and return analysis, financing techniques, and investments. (Typically Offered: Summer)

FIN 4100X: Corporate Financial Planning and Analysis

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3100

Advanced study of corporate financial planning and cash flow management. Major topics include strategic planning and budgeting, analysis of business performance, forecasting and modeling, and financial reporting. (Typically Offered: Spring)

FIN 4150: Business Financing Decisions

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3100

In depth study of the firm's external financing decision. Emphasis on the development of cash flow statements, projected financing needs and the selection of the appropriate financing instrument. Focus on case studies and application of developed techniques on actual field project. (Typically Offered: Fall, Spring, Summer)

FIN 4240: Financial Futures and Options

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3200 and (STAT 3260 or STAT 3410)

Advanced study of pricing and using derivatives - instruments deriving value from fundamental items such as commodities, currency exchange rates, market indices, equities and bonds. Addresses basic building blocks of derivatives (i.e., forwards, futures, options and swaps) and relevant current topics and issues. (Typically Offered: Fall, Spring)

FIN 4250: Security Analysis and Portfolio Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3200 and (STAT 3260 or STAT 3410)

Advanced study of security analysis, security selection techniques and portfolio management. Emphasis on the applications of methods learned via the selection and evaluation of a portfolio of actual securities purchased in securities markets in the U.S. or abroad. Tracking and periodic reporting of the portfolio's performance relative to standard benchmarks is also required. (Typically Offered: Fall, Spring)

FIN 4260X: Quantitative Investment Analysis

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3200 and (STAT 3260 or STAT 3410)

Introduction to the use of advanced statistical and machine learning techniques in the practice of portfolio construction. Topics include regularization and tree-based investment techniques, characteristic-based and trend-following investing, and multivariate GARCH analysis. Provides essential analytics training needed for investment management. (Typically Offered: Spring)

FIN 4270: Fixed Income Securities

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3200

Valuation of fixed income securities, including pricing conventions, term structure of interest rates, default, duration, and hedging of interest rate risk with derivatives. Analysis of bond market sectors, including treasury, agency, corporate, sovereign, municipal, and residential mortgage bonds.

FIN 4280: Advanced Fixed Income Analysis and Portfolio Management
(Dual-listed with FIN 5280).

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 4270

Advanced analysis of fixed income markets and securities, including valuation and trading of treasury securities, corporate bonds, mortgage backed securities. Analysis of structured financial securities, including CDO, CMBS, and ABS. Analysis of active and passive investment strategies for managing fixed income portfolios. Students are required to manage a fixed income portfolio for an institutional investor. A top-down approach to portfolio management is assumed, with active bets taken on market direction, duration, yield curve, and credit spreads.

FIN 4310: New Venture Financing

(Cross-listed with ENTSP 4310).

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3100 or [(ENTSP 3130 or MGMT 3130) and FIN 3010]

Exploration of the foundations of financing entrepreneurial companies. Emphasis on the roles of the entrepreneurs, venture capitalists, and limited partners in the full financing cycle of early-stage ventures, including pitching and raising capital, deal sourcing and due diligence, deal structuring, and post-investment management. Extensive use of case studies and interactive presentations to a mock investor-based board of directors to illustrate the key concepts and processes involved in start-up financing. (Typically Offered: Spring)

FIN 4350: Venture Capital, Private Equity, and Mergers and Acquisitions

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3100 and FIN 3200 and (STAT 3260 or STAT 3410)

An advanced investments class that focuses on alternative investments. Topics include techniques for valuing public and private firms, venture capital finance, investment banking, private equity finance, leveraged buyouts, hedge funds, the structure and financing of mergers and acquisitions, and divestitures. (Typically Offered: Spring)

FIN 4450: Bank Management Decisions

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3100 or FIN 3200 or FIN 3300 or ECON 3530

Analysis of operations of depository financial institutions from management viewpoint. Emphasis on evaluating performance, policy formation, asset and liability management, the role of capital, and the operating environment. (Typically Offered: Fall, Spring)

FIN 4500: Analytical Methods in Finance

Credits: 3. Contact Hours: Lecture 3.

Prereq: (STAT 3260 or STAT 3410) and (FIN 3010 or ECON 3010)

Applied empirical methods commonly employed in the analysis of firm and market data. Specific applications to financial and agricultural markets. Experiential learning experience using lectures with frequent in-class computer work sessions. Experience with financial and agricultural data sources. Application and interpretation of empirical techniques. (Typically Offered: Fall, Spring)

FIN 4550: Risk Modeling

Credits: 3. Contact Hours: Lecture 3.

Prereq: (FIN 3010 or MATH 2400); (STAT 3260 or STAT 3410)

Introduction to predictive modeling and business analytics in the finance and insurance industry. Basic statistical/computing skills, analytical thinking, and business acumen. Develop practical data analytic skills based on building real analytic applications on real data. (Typically Offered: Fall, Spring)

FIN 4560: Financial Modeling

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 2850 and FIN 3010 and (STAT 3260 or STAT 3410)

Applying computers to business applications especially using Excel in finance related work.

FIN 4620: Corporate Risk Management and Insurance

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3100

Analysis of an organization's approaches to the management of price, credit, and pure risk. Emphasis on the consideration and selection of risk control and financing treatments and the decision making framework underlying the alternatives selected. Covers commercial insurance, self-insurance, and alternative financing arrangements. (Typically Offered: Fall)

FIN 4720: Real Estate Finance

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3010 and (STAT 3260 or STAT 3410)

Introduction to the techniques of assessing the value of real estate and real estate financing instruments.

FIN 4740: Real Estate Investment

Credits: 3. Contact Hours: Lecture 3.

Prereq: (FIN 3710 or FIN 4270 or FIN 4720) and (STAT 3260 or STAT 3410)

Introduction to theories and methods of investment analysis applied to real estate. Studies cash flow analysis, alternative measures of investment performance, the impact of the financing decision on real estate investment risks and return, and various real estate financing techniques. Covers cases involving more complex financing and capital markets tools used in real estate. (Typically Offered: Fall, Spring)

FIN 4800: International Finance

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3100, FIN 3200 or FIN 3300

Advanced study of currency market equilibrium, use and analysis of currency derivatives, hedging currency risk, and additional topics, which could include multinational capital budgeting, taxation, raising capital internationally, international portfolio diversification, international capital market equilibrium, political and country risk, financing international trade, multinational corporate treasury management, and current issues. (Typically Offered: Fall, Spring)

FIN 4900: Independent Study

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

FIN 4910: International Study Course in Global Capital Markets

Credits: 3.

European capital markets and multinational corporate finance with focus on banking, capital markets, and corporate finance in a particular European country. Exposure to European capital markets, the European Monetary Union and the banking system. Current and historical banking practices within the EU and how they changed since the EMU implementation. Understand financial decisions faced by firms located in the EU. Study banks, institutions, and companies in Europe to gain specific knowledge of their practices. Learn about the culture and general economy of Europe during the in country visit. (Typically Offered: Spring)

FIN 4920X: Case Studies in Strategic Financial Decision-Making

Credits: 1. Contact Hours: Lecture 1.

Prereq: FIN 3100 and FIN 3200

Case based study of situations where companies need to strategically use equity financing. Focus on equity financing decisions at the different phases of a company's lifecycle, from raising private equity, to going public, to making significant acquisitions. Will also consider issues such as investor activism, governance, regulatory and valuation impact. Multiple guest speakers who are actively engaged in private equity and investment banking. (Typically Offered: Fall)

Courses primarily for graduate students, open to qualified undergraduates:

FIN 5010: Financial Valuation and Corporate Financial Decisions

Credits: 3. Contact Hours: Lecture 3.

Shareholder wealth maximization as the goal of the firm within a social responsibility context, financial Math, valuation of securities, the global financial market place as the test of value, estimation of cost of capital, global capital investment decisions, capital structure policy, working capital management.

FIN 5100: Advanced Corporate Finance

Credits: 3. Contact Hours: Lecture 3.

Examines corporate financial decisions, including theory and associated empirical evidence. Topics include agency conflicts, corporate governance, executive compensation, becoming publicly traded, raising capital through public and private offerings, capital structure, financial distress and bankruptcy, leasing, dividend policy, corporate control, restructuring, and risk management.

FIN 5150: Case Studies in Financial Decision Making

Credits: 3. Contact Hours: Lecture 3.

This course focuses on case studies to develop an integrated set of financial decisions. Topic areas include fixed asset, working capital, capital structure, dividend and merger/acquisition decisions. The objective of the course is to examine different firm settings and establish a framework within which to apply financial tools.

FIN 5200: Investments

Credits: 3. Contact Hours: Lecture 3.

Analysis of risk and return for individual securities and portfolios of securities. Topics include the market environment, mechanics of trading, measurement of return and risk, valuation of stocks and bonds, mutual funds, optimal asset allocation, market efficiency, portfolio performance evaluation, and risk management.

FIN 5260X: Advanced Quantitative Investment Analysis

Credits: 3. Contact Hours: Lecture 3.

Study of the use of advanced statistical and machine learning techniques in the practice of portfolio construction. Topics include regularization and tree-based investment techniques, characteristic-based and trend-following investing, and multivariate GARCH analysis. Provides essential analytics training needed for quantitative investment management.

FIN 5280: Advanced Fixed Income Analysis and Portfolio Management
(Dual-listed with FIN 4280).

Credits: 3. Contact Hours: Lecture 3.

Advanced analysis of fixed income markets and securities, including valuation and trading of treasury securities, corporate bonds, mortgage backed securities. Analysis of structured financial securities, including CDO, CMBS, and ABS. Analysis of active and passive investment strategies for managing fixed income portfolios. Students are required to manage a fixed income portfolio for an institutional investor. A top-down approach to portfolio management is assumed, with active bets taken on market direction, duration, yield curve, and credit spreads.

FIN 5300: Financial Analysis and Valuation

Credits: 3. Contact Hours: Lecture 3.

Valuation of public and private firms through analysis of financial statements and other information. Study of drivers of value creation, industry analysis, patterns of growth, models for forecasting and analyzing firm cash flows, estimating and adjusting cost of capital, alternative methods of cash flow valuation, the calculation and use of valuation multiples, and valuing mergers and acquisitions.

FIN 5320X: Financial Markets and the Economy

Credits: 3. Contact Hours: Lecture 3.

Exploration of the structure and integration of financial and product markets in the United States. Focus on the operation and function of U.S. debt and equity markets, and the linkages between financial markets and the real economy. Topics include inflation, interest rates, the banking system, the conduct and impact of monetary policy, the development and function of stock markets, and the impact of changes in the cost and availability of external finance on corporate decision-making.

FIN 5340: Financial Derivatives

Credits: 3. Contact Hours: Lecture 3.

An applied course in derivative markets. Topics covered include futures and options markets, option pricing, swaps, use and rating of insurance products, and alternative forms of reinsurance. Emphasis will be placed on agricultural commodity markets, but energy, interest, currency and stock index contracts will also be covered. (Typically Offered: Fall)

FIN 5350: Venture Capital, Private Equity, and Mergers and Acquisitions

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Advanced investments class focusing on alternative investments. Topics include the nature and scope of investment banking, techniques for valuing public and private firms, venture capital finance, private equity finance, leveraged buyouts, hedge funds, the structure and financing of mergers and acquisitions, and divestitures.

FIN 5410: Analytics in Finance

(Cross-listed with MIS 5410).

Credits: 3. Contact Hours: Lecture 3.

Introduction to Business Analytics (BA) in finance and the insurance industry. The concepts and tools discussed in this course, to be followed and complemented by more advanced courses in the area. Basic analytical thinking and business acumen focusing on applications from finance and insurance. Practical data analytic skills based on building real analytic applications on real data. (Typically Offered: Spring)

FIN 5500: Financial Econometrics

Credits: 3. Contact Hours: Lecture 3.

Analysis, modeling, and forecasting of time series data, volatility modeling and forecasting, maximum likelihood estimation, robust standard error computation, specification testing, estimation under alternative distributional assumptions, and Monte Carlo simulation. Applications include tests of asset pricing models, analysis of asset volatility, corporate event studies, and value at risk analysis.

FIN 5560: Advanced Financial Modeling

Credits: 3. Contact Hours: Lecture 3.

Applying computers to business applications, especially using Excel to solve advanced finance related problems. (Typically Offered: Spring)

FIN 5640: Advanced Derivatives and Risk Management

Credits: 3. Contact Hours: Lecture 3.

Risk management tools and how they are applied within financial institutions and the corporate enterprise. Focus on measuring exposure to stock market risk, interest rate risk, currency risk, and credit risk and how these exposures may be managed. Topics include bank risk management regulations, volatility modeling, value at risk analysis, extreme value theory, credit default swaps, and portfolio simulation.

FIN 5720: Real Estate Finance

Credits: 3. Contact Hours: Lecture 3.

Survey of techniques for assessing the value of real estate assets. Introduction to real estate financing instruments, their use and appropriateness.

FIN 5740: Real Estate Investment

Credits: 3. Contact Hours: Lecture 3.

Introduction to theories and methods of investment analysis applied to real estate. Designed as second course in the sequence of real estate finance and investments. Basics of income-producing properties, the valuations of those properties using pro-forma, risk management and various other issues about the finance and investment of income-producing properties. Study of analysis of sustainable real estate development from capital budgeting perspective. Discussion of the financing practices in real estate and land development.

FIN 5750: Real Estate Securitization and Portfolio Management

Credits: 3. Contact Hours: Lecture 3.

Mechanics, incentives and importance of securitization in firms' efforts to raise capital with application to residential and commercial real estate. Design and implementation of portfolio management strategies of private-market real estate investments. Additional topics include devising alpha strategies, approaches to diversification, creating investment plans to achieve different risk profiles and performance measurement and analysis.

FIN 5760: Real Estate Market Analysis

Credits: 3. Contact Hours: Lecture 3.

Introduction to the structure of real estate markets. Topics include determinants of supply and demand in space and capital markets, house price dynamics and causes and consequences of market cycles. Discussion of likely behavior of U.S. real estate markets and comparisons with markets in other countries.

FIN 5780: MRED Capstone Project

(Cross-listed with CRP 5780).

Credits: 3. Contact Hours: Lecture 3.

Refinement of students' problem-solving, communication and negotiation skills. Students work on an actual case. Teams will apply knowledge acquired in the classroom to some aspect of a current development on-the-ground and in-process project.

FIN 5900: Special Topics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

For students wishing to do individual research in a particular area of finance. (Typically Offered: Fall)

Courses for graduate students:**FIN 6050X: Advanced Regression Analysis for Business PhD Students**

Credits: 3. Contact Hours: Lecture 3.

Understand how to apply regression analysis, with applications in business research. Focus on applying the theory to analyze data that suffer from problems which make classical Ordinary Least Squares (OLS) regression inappropriate. Emphasis on analyzing market and firm level data to test hypotheses in business research. Required analysis of business data that are characterized by violations of the ideal conditions behind OLS, including data with autocorrelated or heteroskedastic errors, multicollinearity, endogeneity, qualitative (dummy) variables, seemingly unrelated regressions, and panel data. (Typically Offered: Fall)

FIN 6100X: Corporate Finance

Credits: 3. Contact Hours: Lecture 3.

Empirical aspects of corporate finance research as well as the underlying theory. Topics include agency theory, corporate governance, raising capital, capital structure theory and evidence, dividend theory and signaling models, financial distress, and corporate control. (Typically Offered: Fall)

FIN 6150X: Empirical Corporate Finance Research

Credits: 3. Contact Hours: Lecture 3.

Focus on understanding major paradigms in the corporate finance literature, and applying the methodologies used in empirical corporate finance research. Students will be exposed to the most impactful papers in empirical corporate finance, with a focus on recent publications in the top finance journals. Students will also master the various econometric techniques that are used to analyze corporate finance data. Topics include capital structure decisions, investment policy, liquidity management, corporate governance, mergers and acquisitions, and innovation.

FIN 6250X: Empirical Asset Pricing Research

Credits: 3. Contact Hours: Lecture 3.

Focus on understanding the major paradigms in the asset pricing literature, and applying the methodologies used in empirical asset pricing research. Students will be exposed to the most impactful papers published over the years, as well as more recent work. Students will also master various currently used econometric techniques for analyzing financial data. Topics include tests of market efficiency and return predictability that reveal the numerous asset pricing anomalies, behavioral finance, how information is diffused into asset prices, limits of arbitrage, and market microstructure issues. (Typically Offered: Fall)

FIN 6500X: Seminar in Empirical Finance

Credits: 3. Contact Hours: Lecture 3.

Issues in empirical financial economics including Identification of causal effects, evolution of research streams, development of new research questions, critical usage of archival data and replication of published results. (Typically Offered: Spring)

FIN 6600X: Research Practicum I

Credits: 1.

Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project. Offered on a satisfactory-fail basis only. (Typically Offered: Summer)

FIN 6610X: Research Practicum II

Credits: 1.

Prereq: Instructor Permission for Course

Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project. Offered on a satisfactory-fail basis only. (Typically Offered: Summer)

Food Science and Human Nutrition (FSHN)

Courses primarily for undergraduates:

FSHN 1010: Food and the Consumer

Credits: 3. Contact Hours: Lecture 3.

The food system from point of harvest to the consumption of the food by the consumer. Properties of food constituents. Protection of food against deterioration and microbial contamination. Introduction of foods into the marketplace. Processes for making various foods. Government regulations. Use of food additives. Current and controversial topics. High school biology and chemistry or 3 credits of college level biology and chemistry recommended. (Typically Offered: Fall, Spring, Summer)

FSHN 1020: Nutrition for Sport Performance

Credits: 1. Contact Hours: Lecture 1.

A scientific evaluation of dietary needs, dietary supplementation, and pop-culture claims relative to physical/sport performance. Discussion of safe and effective practices to enhance physical/sport performance. (Typically Offered: Fall, Spring)

FSHN 1040: Introduction to Professional Skills in Culinary Science

Credits: 1. Contact Hours: Laboratory 6.

Prereq: Major in CUFSA or CUFSH or Culinary Science minor

Introduction to culinary science. Students will develop fundamental culinary skills by arranged on-campus work experience (100 hours). Sessions with instructor arranged. (Typically Offered: Spring)

FSHN 1100: Professional and Educational Preparation

Credits: 1. Contact Hours: Lecture 1.

Introduction to professional and educational development within the food science and human nutrition disciplines. Focus is on university and career acclimation as well as enhancement of communication skills. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

FSHN 1110: Fundamentals of Food Preparation

Credits: 2. Contact Hours: Lecture 2.

Prereq: (FSHN 1010 or FSHN 1670); concurrent enrollment in FSHN 1150

Principles involved in preparation of food products of standard quality. Influence of composition and techniques on properties of food products. (Typically Offered: Spring)

FSHN 1150: Food Preparation Laboratory

Credits: 1. Contact Hours: Laboratory 3.

Prereq: (FSHN 1010 OR FSHN 2140) AND Major in NUTRS, DIET, FCEDS, HSPM

Practice standard methods of food preparation with emphasis on quality, nutrient retention, and safety. (Typically Offered: Fall, Spring)

FSHN 1200: The Biochemistry of Beer

(Cross-listed with BBMB 1200).

Credits: 2. Contact Hours: Lecture 2.

An introduction to the major classes of biomolecules, basic biochemical concepts, enzymology, metabolism and genetic engineering as they apply to the production and flavor of beer. All aspects of the biochemistry of beer will be covered, including the malting of barley, starch conversion, yeast fermentation and the chemical changes that occur during the aging of beer. Intended for non-majors. (Typically Offered: Fall)

FSHN 1200L: Biochemistry of Beer Laboratory

(Cross-listed with BBMB 1200L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment in BBMB 1200

An introduction to biochemical methods related to the production of beer. Laboratory exercises related to water chemistry, mash enzymology, hop compound extraction and analysis, and yeast biology will be performed. Closely follows the material being taught in BBMB 1200. Graduation Restriction: Natural science majors are limited to elective credit only.

FSHN 1670: Introductory Human Nutrition and Health

Credits: 3. Contact Hours: Lecture 3.

Understanding and implementing present day knowledge of nutrition. The role of nutrition in the health and well being of the individual and family. High school biology or 3 credits of biology recommended. (Typically Offered: Fall, Spring, Summer)

FSHN 2020X: Food Literacy through Film

Credits: 1. Contact Hours: Lecture 1.

An introduction to food literacy using systems thinking. Exploration of movies and documentaries to identify how one's food choices can support personal health, community, and the environment. Development of skills to assess potential bias of multi-media messages. (Typically Offered: Fall)

FSHN 2030: Contemporary Issues in Food Science and Human Nutrition

Credits: 1. Contact Hours: Lecture 1.

Introduction to presentation of published research and discussion of current issues in food science and human nutrition. Emphasis on sources of credible information, ethics, and communication. (Typically Offered: Fall, Spring)

FSHN 2070: Processing of Foods: Basic Principles and Applications

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: FSHN 1010

Lecture and lab-based instruction on principles of food processing and packaging. Food product-based discussion and activities will highlight raw food materials; unit operations; food quality and safety; processing plant sanitation; food forming and extrusion; fermentation; properties and selection of packaging materials. (Typically Offered: Spring)

FSHN 2140: Scientific Study of Food

Credits: 3. Contact Hours: Lecture 3.

Prereq: FSHN 1670 or FSHN 2650; CHEM 2310 or CHEM 3310; plus concurrent enrollment in FSHN 1150 or 2150

Composition and structure of foods. Principles of preparation of standard quality food products. Behavior and interactions of food constituents. (Typically Offered: Fall, Spring)

FSHN 2150: Advanced Food Preparation Laboratory

Credits: 2. Contact Hours: Laboratory 6.

Prereq: Credit or enrollment in FSHN 2140

Practice standard methods of food preparation with emphasis on quality, nutrient retention, and safety. Development of culinary skills and advanced food preparation. (Typically Offered: Fall, Spring)

FSHN 2200: American Food and Culture

Credits: 3. Contact Hours: Lecture 3.

American cuisine reflects the history of the U.S. It is the unique blend of diverse groups of people from around the world, including indigenous Native American Indians, Africans, Asians, Europeans, Pacific Islanders, and South Americans. Explore factors that impact the American Cuisine of today including diverse ethnic and cultural group influences, historical events related to food diversity in the U.S., and agriculture and industrial impacts on food production. Practical knowledge and basic food preparation techniques related to the U.S. food system and trends. Class sessions will include lectures, class discussions and Tasting Immersion activities. (Typically Offered: Fall, Spring)

FSHN 2410: Introduction to Manufacturing Processes for Plastics

(Cross-listed with TSM 2410).

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Prereq: MATH 1450 or higher.

A study of selected materials and related processes used in plastics manufacturing. Lecture and laboratory activities focus on materials, properties, and processes. (Typically Offered: Fall, Spring)

FSHN 2420: The US Food System

Credits: 3. Contact Hours: Lecture 3.

Prereq: FSHN 1010 or FSHN 1670

Exploration of the components of our food system including production, processing, and access. A systems approach is used to evaluate the social, environmental, and nutrition/health implications of the US food system. Controversial topics related to how food is produced, processed, marketed and consumed will be discussed. (Typically Offered: Spring)

FSHN 2640: Fundamentals of Nutritional Biochemistry

Credits: 3. Contact Hours: Lecture 3.

Prereq: FSHN 1670; CHEM 1630, CHEM 1630L; 3 credits in BIOL

Digestion, absorption, metabolism, and biochemical functions of nutrients. Biochemical aspects of nutrient deficiencies. (Typically Offered: Fall)

FSHN 2650: Nutrition for Active and Healthy Lifestyles

Credits: 3. Contact Hours: Lecture 3.

Prereq: FSHN 1670; (credit or enrollment in FSHN 2640 or credit or enrollment in 3 credits in BBMB)

Fundamentals of nutrient metabolism and nutrient requirements. Role of macronutrient metabolism in physical performance and disease prevention. Effect of manipulation of macronutrient metabolism on physical performance and disease prevention. Applications of nutrient metabolism principles to dietary recommendations and planning. (Typically Offered: Spring, Summer)

FSHN 2670X: Clinical Perspectives on Human Nutrition and Health

Credits: 1. Contact Hours: Lecture 1.

Through case scenarios presented by practicing physicians and other health care professionals of various specializations, students will gain appreciation for the actual clinical impact of nutrition on health and disease. Through interactions with clinicians, students will learn about the current and future status of health care. (Typically Offered: Spring)

FSHN 2760: Understanding Grape and Wine Science

(Cross-listed with HORT 2760).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

A scientific introduction to viticulture (grape-growing) and enology (wine-making) and grape and wine chemistry. Topics include grape biology and cultivars, vineyard management, geography of wine, wine production, wine classification, grape and wine chemistry, wine sensory. No wine tasting. (Typically Offered: Spring)

FSHN 3010: Nutrigenomics: From Basic Science to Translational Impact

Credits: 1. Contact Hours: Lecture 2.

Introduction to the concepts of nutrigenomics and nutrigenetics and how it affects consumers of food, as well as the implications for human diseases. The potential impact of personalized nutrition and full genome sequencing on health maintenance, chronic disease prevention, and the ethical implications of this knowledge will be explored. (Typically Offered: Fall)

FSHN 3050: Food Quality Management and Control

Credits: 2. Contact Hours: Lecture 2.

Prereq: 3 credits in statistics

Fundamentals of statistical decision-making processes and quality control procedures used in food quality assurance programs. (Typically Offered: Spring)

FSHN 3110: Food Chemistry

Credits: 3. Contact Hours: Lecture 3.

Prereq: BBMB 3000 or higher; (CHEM 2310 or CHEM 3310); ENGL 2500

The structure, properties, and chemistry of food constituents and animal and plant commodities. (Typically Offered: Fall)

FSHN 3110L: Food Chemistry Laboratory

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or concurrent enrollment in FSHN 3110

The laboratory practices of structure, properties, and chemistry of food constituents. (Typically Offered: Fall)

FSHN 3140: Professional Development for Culinary Food Science and Food Science Majors

Credits: 1. Contact Hours: Lecture 1.

Prereq: Major or minor in Culinary Food Science or Food Science; Junior or senior classification.

Introduction to the roles culinary scientists and food scientists hold within industry. Discussions focused on professional and educational development and emerging issues and trends in the food industry. (Typically Offered: Fall)

FSHN 3150: Professional Skills for Culinary Food Science and Food Science Majors

Credits: 1. Contact Hours: Lecture 1.

Prereq: Major or minor in FSHN

Focus on the importance of professional skills and application of those skills to potential job situations. Professional skills include communication, team building, leadership vs. management styles, business ethics, and continual learning. Junior classification recommended. (Typically Offered: Fall)

FSHN 3400: Foundations of Dietetic Practice

Credits: 2. Contact Hours: Lecture 2.

Prereq: Major in Dietetics (A or H) or Pre-Diet and Exercise; Junior classification

Introduction to the profession of dietetics and responsibilities associated with dietetic professional practice. Emphasis on exploring career options in dietetics and preparation for supervised practice and graduate school. Leadership and professional career development for the dietitian is addressed through self reflection and creation of materials for post-baccalaureate programs. Professional issues related to dietetic practice include Code of Ethics, legal credentialing and standards of professional practice, leadership and future trends in the profession. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

FSHN 3420: World Food Issues: Past and Present

(Cross-listed with ENVS 3420/ AGRON 3420).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Issues associated with global agricultural and food systems including ethical, social, economic, environmental, and policy contexts. Investigation of various causes and consequences of overnutrition/ undernutrition, global health, poverty, hunger, access, and distribution. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

FSHN 3510: Introduction to Food Engineering Concepts

Credits: 3. Contact Hours: Lecture 3.

Prereq: (FSHN 2070; [MATH 1600 or MATH 1650]; [PHYS 1310 or PHYS 2310]) or Permission of Instructor

Methodology for solving problems in food processing and introduction to food engineering concepts including food properties, material and energy balances, sources of energy, thermodynamics, fluid flow, heat transfer, and mass transfer. Graduation Restriction: Credit for only FSHN 3510 or CHE 3570 may be applied toward graduation for the Food Science major or Food Science minor. (Typically Offered: Spring)

FSHN 3600: Advanced Nutrition and the Regulation of Metabolism in Health and Disease

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500; FSHN 2650

Physiological and biochemical basis for nutrient needs; assessment of nutrient deficiency and toxicity; examination of nutrient functions and the regulation of metabolism; nutrient-gene interactions; mechanistic role of nutrients in health and disease. 3 credits or concurrent enrollment in 3000-level or above Biochemistry recommended. 3 credits in physiology recommended. (Typically Offered: Fall)

FSHN 3610: Nutrition and Health Assessment

Credits: 2. Contact Hours: Lecture 2, Laboratory 2.

Prereq: FSHN 2650

The assessment of nutritional status in healthy individuals. Laboratory experiences in food composition and assessment of dietary intake, body composition, and biochemical indices of nutritional status. (Typically Offered: Spring)

FSHN 3620: Nutrition and Health Throughout the Lifecycle

Credits: 3. Contact Hours: Lecture 3.

Molecular, biochemical and physiological basis to understand the nutritional aspects of human development and aging. Nutrient needs and various disease states at each stage of human life cycle. (Typically Offered: Spring)

FSHN 3640: Nutrition and Prevention of Chronic Disease

Credits: 3. Contact Hours: Lecture 3.

Prereq: (BIOL 2560 and BIOL 2560L) or enrolled in NRS major

Overview of nutrients, their functions, metabolism, food sources and optimal choices for the promotion of health and wellness. Nutrition strategies for the prevention of chronic disease, including cancer, diabetes and obesity, as they apply to individuals or the wider population will be discussed. (Typically Offered: Fall)

FSHN 3650: Obesity and Health

Credits: 3. Contact Hours: Lecture 3.

Multifactorial aspects of obesity, maintenance of healthy weight, and the relationship of weight status and chronic disease prevention. Traditional and novel nutrition and exercise theories as well as current popular diet and exercise trends will be discussed. (Typically Offered: Spring)

FSHN 3660: Communicating Nutrition Messages

Credits: 3. Contact Hours: Lecture 3.

Prereq: FSHN 2640 or FSHN 2650

Theory and application of adult learning and behavior change as it relates to the role of nutrition in health promotion and disease prevention. Discussion of nutrition education and interventions relative to various models. Focus on communication strategies for providing nutrition messages to diverse community audiences using various forms of media and outreach. (Typically Offered: Spring)

FSHN 3670: Medical Terminology for Health Professionals

Credits: 1. Contact Hours: Lecture 1.

An independent course focused on medical terminology, abbreviations, and simple clinical mathematical calculations. (Typically Offered: Fall, Spring, Summer)

FSHN 3730: Science and Practice of Brewing

(Cross-listed with ME 3730).

Credits: 3. Contact Hours: Lecture 1.5, Laboratory 4.5.

Introduction to brewing science and technology. Understanding the role of malts, hops, water, and yeast in production of ale and lager beers. Unit operations in brewing. Health, safety, and environmental sustainability in alcohol production and consumption. Weekly laboratory in practical aspects of beer production. (Typically Offered: Fall, Spring)

FSHN 3760X: Science and Practice of Cheesemaking

Credits: 2. Contact Hours: Lecture 2.

Science and Practice of Cheesemaking is designed to provide students with applied knowledge about milk chemistry and microbiology, sanitation, and cheesemaking. Small teams will engage in various aspects of research and development, including brainstorming, basic market research, food processing, sensory evaluation, and marketing pitches for a new cheese with beer or wine. The course culminates with an invitational culinary event, designed and executed by the students. (Typically Offered: Fall)

FSHN 3920: Food and Nutrition Services Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: HSPM 3800; HSPM 3800L

Functions and responsibilities related to the management of foodservice systems and nutrition services, including planning, marketing, human resource management, and cost accounting. Graduation Restriction: Only one of HSPM 3920 or FSHN 3920 may count toward graduation. (Typically Offered: Spring)

FSHN 4030: Food Laws and Regulations

Credits: 2. Contact Hours: Lecture 2.

Prereq: 3 credits in FSHN at 2000-level or above

History of food law in the US and the world. Relationship between policy, legislation and regulation. Introduction to primary US regulatory agencies and enforcement principles. Discussion of key laws related to food safety and nutrition. Overview of federal and independent research tools and sources of food law. (Typically Offered: Spring, Summer)

FSHN 4060: Sensory Evaluation of Food

(Dual-listed with FSHN 5060).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: FSHN 3050 and credit or enrollment in FSHN 4110; 3 credits in statistics

Sensory evaluation techniques used to evaluate the appearance, aroma, flavor, texture and acceptability of foods. Relationships between sensory and instrumental measurements of color and texture. Work independently and cooperatively (in a team) to identify sensory evaluation objectives, write hypotheses, design and conduct experiments, and analyze and interpret data. (Typically Offered: Fall)

FSHN 4070: Microbiological Safety of Foods of Animal Origins

(Dual-listed with FSHN 5070/ MICRO 5070). (Cross-listed with MICRO 4070).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 2010 or MICRO 3020

Examination of the various factors in the production of foods, from production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. Upon successful completion of this class, the student will receive both the Preventive Controls for Human Foods certificate (FDA program) and the International HACCP Alliance certificate (USDA-FSIS program). Recommended: FSHN 4200 or MICRO 4200 and one semester of Microbiology Laboratory. (Typically Offered: Fall, Spring)

FSHN 4080: Dairy Products Evaluation

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Instructor Permission for Course

Gain experience in identifying quality defects in dairy products including milk, cottage cheese, cheddar cheese, strawberry yogurt, butter, and vanilla ice cream. Intensive training for the National Collegiate Dairy Products Evaluation competition and for dairy product evaluation in the food industry. (Typically Offered: Spring)

FSHN 4100: Food Analysis

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: FSHN 2140 or FSHN 3110 or CHEM 2110

An introduction to the theory and application of chemical and instrumental methods for determining the constituents of food. Use of standard procedures for food analysis and food composition data bases. (Typically Offered: Fall, Spring)

FSHN 4110: Food Ingredient Interactions and Formulations

Credits: 2. Contact Hours: Lecture 1, Laboratory 3.

Prereq: (FSHN 1150; FSHN 2150; FSHN 2140) or (FSHN 3110; FSHN 3110L); 3 credits in STAT

Application of food science principles to ingredient substitutions in food products. Laboratory procedures for standard formulations and instrumental evaluation, with emphasis on problem-solving and critical thinking. (Typically Offered: Fall)

FSHN 4120: Food Product Development

(Dual-listed with FSHN 5120).

Credits: 3. Contact Hours: Lecture 1, Laboratory 6.

Prereq: FSHN 4110; senior classification

Principles of developing consumer packaged food products. Application of skills gained in food chemistry, formulation, quality, sensory and processing. Emphasis on teamwork and effective communication. (Typically Offered: Spring)

FSHN 4190: Foodborne Hazards

(Cross-listed with MICRO 4190/ TOX 4190).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 2010 or MICRO 3020; 3 credits in BBMB

Pathogenesis of human microbiological foodborne infections and intoxications, principles of toxicology, major classes of toxicants in the food supply, governmental regulation of foodborne hazards. Assessed service-learning component. Offered even-numbered years. Graduation Restriction: Only one of FSHN 4190 and FSHN 5190 may count toward graduation. (Typically Offered: Spring)

FSHN 4200: Food Microbiology

(Cross-listed with MICRO 4200/ TOX 4200).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 2010 or MICRO 3020

Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications. (Typically Offered: Fall)

FSHN 4210: Food Microbiology Laboratory

(Cross-listed with MICRO 4210).

Credits: 3. Contact Hours: Lecture 1, Laboratory 5.

Prereq: MICRO 2010 or MICRO 3020; MICRO 2010L or MICRO 3020L. Credit or enrollment in FSHN/MICRO 4200

Standard techniques used for the microbiological examination of foods. Independent and group projects on student-generated questions in food microbiology. Emphasis on oral and written communication and group interaction. (Typically Offered: Spring)

FSHN 4300: U.S. Health Systems and Policy

(Dual-listed with FSHN 5300).

Credits: 2. Contact Hours: Lecture 2.

Prereq: Graduate or senior level status or Permission of Instructor

Introduction to public policy for health care professionals. Emphasis on understanding the role of the practitioner for participating in the policy process, interpreting government policies and programs such as Medicare and Medicaid, determining reimbursement rates for eligible services, and understanding licensure and accreditation issues. Discussion and exploration of federal, state and professional policy-relevant resources. (Typically Offered: Fall, Spring)

FSHN 4350: Analysis of Food Markets

(Cross-listed with ECON 4350).

Credits: 3. Contact Hours: Lecture 3.

Prereq: STAT 2260, ECON 2350, and ECON 3010

Food market analysis from an economics perspective; food markets and consumption; methods of economic analysis; food industry structure and organization; food and agriculture regulations; labeling; consumer concerns; agricultural commodity promotion. Final project required. (Typically Offered: Spring)

FSHN 4420: Issues in Food and Society

Credits: 2. Contact Hours: Lecture 2.

Prereq: Sophomore classification

In-depth discussion, synthesis, and analysis of domestic and global food issues from a systems approach. Mutually reinforcing interactions between culture, biology, and environmental influences on human dietary habits, nutrition and health will be emphasized. Historical and current foodways of cultural groups will be presented with specific attention to understanding cultural differences. Students will demonstrate how to locate, interpret, evaluate and use professional literature to inform about current food and society issues. Meets U.S. Diversity Requirement. (Typically Offered: Fall)

FSHN 4450: Strategies for Personal Food Waste Reduction

Credits: 1. Contact Hours: Lecture 1.

Prereq: Junior standing or Permission of Instructor

In-depth analysis and discussion of economic, environmental, social, and ethical implications of food waste. Overview of personal food waste reduction strategies, food recycling/recovery, and responsible waste disposal methods. Discussion and application of advocacy tactics for the promotion of food waste reduction in local communities. (Typically Offered: Spring)

FSHN 4600: Global Nutrition, Health and Sustainability

(Dual-listed with FSHN 5600).

Credits: 3. Contact Hours: Lecture 3.

An overview of current global nutrition and health-related issues in relation to the Sustainable Development Goals. The etiology, epidemiology, and program/policy responses to topics will be discussed, in relation to the sociocultural, biological, economic, and environmental context of health and disease. Topics include childhood malnutrition, growth stunting, micronutrient deficiencies, global nutrition transition, parasitic infections, sanitation, and chronic disease incidence. Participatory course, students will engage in a series of class activities, discussions, and presentations. Meets International Perspectives Requirement. Meets International Perspectives Requirement. (Typically Offered: Spring)

FSHN 4610: Medical Nutrition and Disease I

Credits: 4. Contact Hours: Lecture 4.

Prereq: (BIOL 2560; 2560L) or BIOL 3350; FSHN 3600; FSHN 3610; FSHN 3670

Pathophysiology of selected chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state to optimize nutritional status and improve health. (Typically Offered: Fall)

FSHN 4630: Community Nutrition and Health

(Dual-listed with NUTRS 5630).

Credits: 3. Contact Hours: Lecture 3.

Prereq: FSHN 2650 or FSHN 3600

Dual-listed with NUTRS 5630. Survey of current public health nutrition challenges and assets among nutritionally vulnerable individuals and groups. Culturally informed interventions or improvements of community nutrition and public health programs will be developed through needs assessment and primary research literature review. Significant emphasis on written and oral communication at the lay and professional level as it relates to community nutrition and health. Students should have a prior background in nutrition or social sciences. Meets U.S. Diversity Requirement. Meets U.S. Diversity Requirement. (Typically Offered: Fall)

FSHN 4640: Medical Nutrition and Disease II

(Dual-listed with NUTRS 5640).

Credits: 4. Contact Hours: Lecture 4.

Prereq: FSHN 4610

(Dual-listed with NUTRS 5640) Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state to optimize nutritional status and promote health. (Typically Offered: Spring)

FSHN 4660: Nutrition Counseling and Education Methods

(Dual-listed with FSHN 5660).

Credits: 3.

Prereq: FSHN 3610 and FSHN 3620

Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories. (Typically Offered: Fall, Spring)

FSHN 4670: Molecular Basis of Nutrition in Disease Etiology and Health Promotion

Credits: 3. Contact Hours: Lecture 3.

Prereq: FSHN 3600

Understanding the molecular basis for the role of nutrients, nutrient-derivatives, and bioactive compounds in the development, prevention, and treatment of common diseases including diabetes, cancer, vascular disease, obesity, neurological disease, aberrant mineral metabolism, and autoimmune disease. Translating this understanding into practical approaches for improving the health of individuals and populations. Credit for FSHN 3600 suggested. (Typically Offered: Spring)

FSHN 4710: Food Processing

Credits: 3. Contact Hours: Lecture 2.5, Discussion 0.5.

Prereq: (AE 4510 or CHE 3570 or FSHN 3510); (MICRO 2010 or 3020)

Principles and application of food processing using both thermal (ex., blanching, pasteurization, canning, drying, freezing, evaporation, aseptic processing, extrusion) and non-thermal (ex., high pressure, irradiation, pulsed electric field, fermentation) unit operations. Emphasis on microbial inactivation, process heat and mass balance, and numerical problem solving. (Typically Offered: Fall)

FSHN 4720: Food Processing Laboratory

Credits: 2. Contact Hours: Lecture 1, Laboratory 3.

Prereq: (FSHN 4710; Senior classification) or Permission of Instructor

Hands-on and demonstration laboratory activities related to food processing principles and applications using lab and pilot-scale equipment. Laboratory experiences include important food processing operations, e.g., blanching/pasteurization, canning, freezing, drying, corn wet milling, fermentation, baking etc. Emphasis on mass balance, interpreting data, writing reports, and presentations. Occasional field trips. (Typically Offered: Spring)

FSHN 4890: Issues in Food Safety

(Cross-listed with ANS 4890/ HSPM 4890/ VDPAM 4890).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (Credit or concurrent enrollment in FSHN 1010 or FSHN 2720 or HSPM 2330); (FSHN 4190 or FSHN 4200); FSHN 4030

Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective. (Typically Offered: Spring)

FSHN 4900A: Independent Study: Dietetics

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Independent work in food science, nutrition, or dietetics. Graduation Restriction: A maximum of 6 credits of FSHN 4900 may be used toward graduation. (Typically Offered: Fall, Spring, Summer)

FSHN 4900B: Independent Study: Food Science

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Independent work in food science, nutrition, or dietetics. Graduation Restriction: A maximum of 6 credits of FSHN 4900 may be used toward graduation. (Typically Offered: Fall, Spring, Summer)

FSHN 4900C: Independent Study: Nutrition

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Independent work in food science, nutrition, or dietetics. Graduation Restriction: A maximum of 6 credits of FSHN 4900 may be used toward graduation. (Typically Offered: Fall, Spring, Summer)

FSHN 4900D: Independent Study: International Experience

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Independent work in food science, nutrition, or dietetics. Graduation Restriction: A maximum of 6 credits of FSHN 4900 may be used toward graduation. (Typically Offered: Fall, Spring, Summer)

FSHN 4900E: Independent Study: Entrepreneurship

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Independent work in food science, nutrition, or dietetics. Graduation Restriction: A maximum of 6 credits of FSHN 4900 may be used toward graduation. (Typically Offered: Fall, Spring, Summer)

FSHN 4900H: Independent Study: Honors

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Independent work in food science, nutrition, or dietetics. Graduation Restriction: A maximum of 6 credits of FSHN 4900 may be used toward graduation. (Typically Offered: Fall, Spring, Summer)

FSHN 4910A: Supervised Work Experience: Dietetics

Credits: 1-4. Repeatable, maximum of 4 credits.

Prereq: Permission of Instructor; Permission of Advisor

Supervised off-campus work experience relevant to the academic major. Graduation Restriction: A maximum of 4 credits of FSHN 4910 may be used toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

FSHN 4910B: Supervised Work Experience: Food Science

Credits: 1-4. Repeatable, maximum of 4 credits.

Prereq: Permission of Instructor; Permission of Advisor

Supervised off-campus work experience relevant to the academic major. Graduation Restriction: A maximum of 4 credits of FSHN 4910 may be used toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

FSHN 4910C: Supervised Work Experience: Nutrition

Credits: 1-4. Repeatable, maximum of 4 credits.

Prereq: Permission of Instructor; Permission of Advisor

Supervised off-campus work experience relevant to the academic major. Graduation Restriction: A maximum of 4 credits of FSHN 4910 may be used toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

FSHN 4910D: Supervised Work Experience: Culinary Science

Credits: 1-4. Repeatable, maximum of 4 credits.

Prereq: Permission of Instructor; Permission of Advisor

Supervised off-campus work experience relevant to the academic major.

Graduation Restriction: A maximum of 4 credits of FSHN 4910 may be used toward graduation. Offered on a satisfactory-fail basis only.

(Typically Offered: Fall, Spring, Summer)

FSHN 4920: Research Concepts in Human Nutrition

Credits: 2.

Prereq: (FSHN 3600; Senior classification) or Permission of Instructor

Students will develop and implement research projects with faculty supervision, based on knowledge gained from nutrition, biology and chemistry courses and write a formal science paper to share the results of their research. Students will gain appreciation for independent research and experience creative and innovative aspects of nutrition research. (Typically Offered: Fall)

FSHN 4930: Food Preparation Workshop

Credits: 1-3. Repeatable, maximum of 3 credits.

Selected topics in food preparation including scientific principles, culture and culinary techniques. Variable format may include laboratory, recitation, and lecture. Offered on a satisfactory-fail basis only.

FSHN 4960A: Food Science and Human Nutrition Travel Course: International travel

(Dual-listed with FSHN 5960A).

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

FSHN 4960B: Food Science and Human Nutrition Travel Course: Domestic travel

(Dual-listed with FSHN 5960B).

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students. (Typically Offered: Fall, Spring, Summer)

FSHN 4980: Cooperative Education

Credits: Required. Repeatable, maximum of 0 credits.

Prereq: Department Chair Permission for Course

Required for students completing professional work periods in a cooperative education program. Students must register prior to commencing each work period. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

FSHN 4990: Undergraduate Research

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Research under staff guidance. Graduation Restriction: A maximum of 6 credits of FSHN 4990 may be used toward graduation. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

FSHN 5060: Sensory Evaluation of Food

(Dual-listed with FSHN 4060).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Sensory evaluation techniques used to evaluate the appearance, aroma, flavor, texture and acceptability of foods. Relationships between sensory and instrumental measurements of color and texture. Work independently and cooperatively (in a team) to identify sensory evaluation objectives, write hypotheses, design and conduct experiments, and analyze and interpret data. (Typically Offered: Fall)

FSHN 5070: Microbiological Safety of Foods of Animal Origins

(Dual-listed with FSHN 4070/ MICRO 4070). (Cross-listed with MICRO 5070).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 4200 or Graduate Classification

Examination of the various factors in the production of foods, from production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. Upon successful completion of this class, the student will receive both the Preventive Controls for Human Foods certificate (FDA program) and the International HACCP Alliance certificate (USDA-FSIS program). Recommended: FSHN 4200 or MICRO 4200 and one semester of Microbiology Laboratory. (Typically Offered: Fall, Spring)

FSHN 5080: Consumer Perceptions and Nutrition Communication

Credits: 2. Contact Hours: Lecture 2.

Examination of current consumer food and nutrition trends. Critical analysis of consumer perceptions relative to current research base. Use of various media to create effective nutrition messages for consumers. Activities designed to meet accreditation standards. (Typically Offered: Fall, Spring, Summer)

FSHN 5090: Sensory Evaluation of Wines

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Principles of sensory evaluation and their application to wine evaluation. Sensory testing methods such as discrimination tests, ranking, descriptive analysis and scoring of wines will be covered. Students will have the opportunity to evaluate and learn about major types and styles of wines of the world. Lab fee. (Typically Offered: Spring)

FSHN 5110: Integrated Food Science

Credits: 3. Contact Hours: Lecture 3.

Critical review of the key principles of food science and applications in the chemistry, microbiology, and processing of food. Understanding of the impact of processing on the quality of foods with respect to composition, quality and safety. (Typically Offered: Fall)

FSHN 5120: Food Product Development

(Dual-listed with FSHN 4120).

Credits: 3. Contact Hours: Lecture 1, Laboratory 6.

Principles of developing consumer packaged food products. Application of skills gained in food chemistry, formulation, quality, sensory and processing. Emphasis on teamwork and effective communication. (Typically Offered: Spring)

FSHN 5160: Advanced Nutrition I

Credits: 2. Contact Hours: Lecture 2.

Examination of current literature relative to molecular, cellular, and physiologic aspects of macronutrient and micronutrient metabolism. Integration of current evidence-based information, including peer-reviewed literature, to inform nutrition practice. Activities designed to meet accreditation standards. (Typically Offered: Fall)

FSHN 5170: Gut Microbiome: Implications for Health and Diseases

(Cross-listed with ANS 5170/ MICRO 5170/ VMPM 5170).

Credits: 3. Contact Hours: Lecture 3.

Explore current research on gut microbiome including modern tools used to study the gut microbiome. Examine the linkages between gut microbiome and health status, diseases, and manipulation of gut microbiome to improve health. (Typically Offered: Fall)

FSHN 5180: Advanced Nutrition II

Credits: 3. Contact Hours: Lecture 3.

Principles of research design/methods and interpreting results/statistics in the current peer-reviewed scientific literature. Critical evaluation of the evidence-base to inform nutrition practice. Activities designed to meet accreditation standards. (Typically Offered: Spring)

FSHN 5210: Microbiology of Food

Credits: 2. Contact Hours: Lecture 2.

Identification, enumeration, and characterization of bacteria, yeasts, and mold associated with foods and food processing. Effects of physical and chemical agents on micro-organisms will be studied. Microbiological problems in food spoilage, food preservation, food fermentation, and food-borne disease will be discussed. (Typically Offered: Spring, Summer)

FSHN 5220: Advanced Food Microbiology and Biotechnology

Credits: 2. Contact Hours: Lecture 2.

Basic principles in biotechnology and applied food microbiology, including current topics of interest in food biotechnology. Introduction to recombinant DNA techniques and how they are applied to genetically modify microorganisms, the use of nucleic acids as tools of rapid detection of microorganisms in foods, basic enzyme immobilization and down-stream processing techniques, and regulatory aspects of food biotechnology. Offered odd-numbered years. (Typically Offered: Spring).

FSHN 5230: A Multidisciplinary Overview of Food Safety and Security

Credits: 2. Contact Hours: Lecture 2.

Multidisciplinary food safety and security perspectives provided by numerous subject matter experts. Topics include food safety policy, ag bioterrorism, border security, animal ID, food defense and site security, risk analysis, crisis communication, epidemiology, HACCP, and more. (Typically Offered: Fall, Summer)

FSHN 5240: Food Microbiology

Credits: 3. Contact Hours: Lecture 3.

Food Microbiology looks at the nature, physiology, and interactions of microorganisms in foods. The course is an introduction to food-borne diseases, the effect of food processing systems on the microflora of foods, principles of food preservation, food spoilage, and foods produced by microorganisms. Additionally, the course looks at food plant sanitation and criteria for establishing microbial standards for food products. (Typically Offered: Fall)

FSHN 5250: Principles of HACCP

Credits: 2. Contact Hours: Lecture 2.

A comprehensive study of the Hazard Analysis and Critical Control Point System and its application in the food industry. (Typically Offered: Fall)

FSHN 5260: Ethnic Foods: Food Safety, Food Protection and Defense

Credits: 2. Contact Hours: Lecture 2.

Understanding of the various factors that impact safety of ethnic and imported ethnic foods; knowledge about the handling, preparation, processing and storage of ethnic and imported foods and food products; science-based characterization of representative ethnic foods. (Typically Offered: Summer)

FSHN 5270: Microbiology of Fermented Foods

Credits: 2. Contact Hours: Lecture 2.

Microbiology of fermented foods covers the physiology, biochemistry, and genetics of microorganisms important in food fermentations. The course looks at how microorganisms are used in fermentations and the effects of processing and manufacturing conditions on production of fermented foods. (Typically Offered: Summer)

FSHN 5280: Food Protection and Defense-Essential Concepts

Credits: 2. Contact Hours: Lecture 2.

This course will provide students with an understanding of the principles required in a food defense program for a food manufacturing, warehousing or distribution center. The topics covered include: defining threats and aggressors; the Bioterrorism Act; food defense teams; vulnerability assessments; security programs; recall and traceability basics; security inspections; crisis management; emergency preparedness; and workplace violence. (Typically Offered: Spring)

FSHN 5290: Foodborne Toxicants

(Cross-listed with TOX 5290).

Credits: 2. Contact Hours: Lecture 2.

Mechanisms of action, metabolism, sources, remediation/detoxification, risk assessment of major foodborne toxicants of current interest, design of HACCP plans for use in food industries targeting foodborne toxicants, discussion of toxicants from a food defense perspective. Offered online only. (Typically Offered: Fall, Spring, Summer)

FSHN 5300: U.S. Health Systems and Policy

(Dual-listed with FSHN 4300).

Credits: 2. Contact Hours: Lecture 2.

Introduction to public policy for health care professionals. Emphasis on understanding the role of the practitioner for participating in the policy process, interpreting government policies and programs such as Medicare and Medicaid, determining reimbursement rates for eligible services, and understanding licensure and accreditation issues. Discussion and exploration of federal, state and professional policy-relevant resources. (Typically Offered: Fall, Spring)

FSHN 5330: Diet and Integrative Therapies for Prevention and Treatment of Diseases

Credits: 2. Contact Hours: Lecture 2.

Explore the role of specific nutrients, dietary bioactive compounds and integrative therapies on disease prevention and treatment. Activities designed to meet accreditation standards. (Typically Offered: Fall)

FSHN 5370: Leadership and Management in Dietetics

Credits: 3. Contact Hours: Lecture 3.

Application of leadership and management theories and approaches relevant to dietetics practice. Use of self-reflection and self-assessment to assist in recognition and development of leadership behaviors. Activities designed to meet accreditation standards. (Typically Offered: Summer)

FSHN 5380: Advanced Medical Nutrition Therapy

Credits: 3. Contact Hours: Lecture 3.

Nutritional biochemistry and physiology related to selected pathophysiology of disease with emphasis on treatment of complex medical problems and current issues. The nutrition care process will be utilized. Evidenced-based practice will be integrated into each disease state covered to optimize nutritional status and promote health. Activities designed to meet accreditation standards. (Typically Offered: Spring)

FSHN 5420A: Introduction to Molecular Biology Techniques: DNA Techniques

(Cross-listed with BMS 5420A/ EEOB 5420A/ BBMB 5420A/ GDCB 5420A/ HORT 5420A/ NREM 5420A/ NUTRS 5420A/ VDPAM 5420A/ VMPM 5420A).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

FSHN 5420B: Introduction to Molecular Biology Techniques: Protein

(Cross-listed with BMS 5420B/ EEOB 5420B/ BBMB 5420B/ GDCB 5420B/ HORT 5420B/ NREM 5420B/ NUTRS 5420B/ VDPAM 5420B).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only. (Typically Offered: Spring, Summer)

FSHN 5420C: Introduction to Molecular Biology Techniques: Cell Techniques

(Cross-listed with BMS 5420C/ EEOB 5420C/ BBMB 5420C/ GDCB 5420C/ HORT 5420C/ NREM 5420C/ NUTRS 5420C/ VMPM 5420C/ VDPAM 5420C).

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Includes biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

FSHN 5420D: Introduction to Molecular Biology Techniques: Plant Transformation

(Cross-listed with BMS 5420D/ EEOB 5420D/ BBMB 5420D/ GDCB 5420D/ HORT 5420D/ NREM 5420D/ NUTRS 5420D/ VMPPM 5420D/ VDPAM 5420D).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1. Repeatable.

Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

FSHN 5420E: Introduction to Molecular Biology Techniques: Proteomics

(Cross-listed with BMS 5420E/ EEOB 5420E/ BBMB 5420E/ GDCB 5420E/ HORT 5420E/ NREM 5420E/ NUTRS 5420E/ VMPPM 5420E/ VDPAM 5420E).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1. Repeatable.

Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

FSHN 5420F: Introduction to Molecular Biology Techniques: Metabolomics

(Cross-listed with BMS 5420F/ EEOB 5420F/ BBMB 5420F/ GDCB 5420F/ HORT 5420F/ NREM 5420F/ NUTRS 5420F/ VMPPM 5420F/ VDPAM 5420F).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1. Repeatable.

Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

FSHN 5420G: Introduction to Molecular Biology Techniques: Genomic

(Cross-listed with BMS 5420G/ EEOB 5420G/ BBMB 5420G/ GDCB 5420G/ HORT 5420G/ NREM 5420G/ NUTRS 5420G/ VMPPM 5420G/ VDPAM 5420G).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1. Repeatable.

Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

FSHN 5540: Supervised Experience in Food Systems Management

Credits: 3. Supervised experiential learning in food service and management. Capstone project. Experiences and activities designed to meet accreditation standards. (Typically Offered: Summer)

FSHN 5550: Supervised Experience in Community Nutrition

Credits: 3. Supervised experiential learning in community nutrition. Capstone project. Experiences and activities designed to meet accreditation standards. (Typically Offered: Fall)

FSHN 5560: Supervised Experience in Medical Nutrition Therapy

Credits: 5. Supervised experiential learning in medical nutrition therapy. Capstone project. Experiences and activities designed to meet accreditation standards. (Typically Offered: Spring)

FSHN 5600: Global Nutrition, Health and Sustainability

(Dual-listed with FSHN 4600). Credits: 3. Contact Hours: Lecture 3. An overview of current global nutrition and health-related issues in relation to the Sustainable Development Goals. The etiology, epidemiology, and program/policy responses to topics will be discussed, in relation to the sociocultural, biological, economic, and environmental context of health and disease. Topics include childhood malnutrition, growth stunting, micronutrient deficiencies, global nutrition transition, parasitic infections, sanitation, and chronic disease incidence. Participatory course, students will engage in a series of class activities, discussions, and presentations. Meets International Perspectives Requirement. Meets International Perspectives Requirement. (Typically Offered: Spring)

FSHN 5620: Advanced Nutrition Assessment

Credits: 4. Contact Hours: Lecture 4. Overview and practical applications of methods for assessing nutritional status, including: theoretical framework of nutritional health and disease, dietary intake, biochemical indices, nutrition focused physical exam and body composition across the lifecycle. Activities designed to meet accreditation standards. (Typically Offered: Fall)

FSHN 5660: Nutrition Counseling and Education Methods

(Dual-listed with FSHN 4660). Credits: 3. Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories. (Typically Offered: Fall)

FSHN 5680X: Foundations of Sustainable, Resilient, and Healthy Food Systems

Credits: 3. Contact Hours: Lecture 3.

Utilize a systems-based approach to critically analyze current and future societal issues specific to nutrition, health, and policy in the US food system. Controversial topics influencing multiple sectors of the US food system will be explored. Pathways forward for local and regional food system transformation will be explored and community-based solutions will be proposed. (Typically Offered: Fall)

FSHN 5690X: Food Disconnected - What We Eat Matters

Credits: 3. Contact Hours: Lecture 3.

Our food systems are at a crossroad and sustainability is a pressing need. In this course, students will apply a systems-based approach to critically evaluate food production and processing challenges in the US food system using domestic and global case studies. We will consider how food production can be done in environmentally friendly way and reflect on whether consumers can play a role through their food choices. Finally, students will enhance their knowledge regarding food literacy and the ability to apply skills to engage in enterprises that can transform current food systems. (Typically Offered: Fall)

FSHN 5700X: Sustainable and Healthy Eating Patterns

Credits: 3. Contact Hours: Lecture 3.

This course will utilize a system-based approach to consider multisectoral actions integrating health, economic considerations, environmental impacts, and sociocultural wellbeing to comprehensively explore sustainable diets. We will discuss topics related to the benefits and challenges of transitioning to sustainable diets in the context of current and future food systems. The course will also address the role of food environments, link nutrition guidelines to sustainability issues, review complex ethical issues, and identify how sustainable diets fit in the context of global environmental goals. Food systems frameworks and models will be applied to evaluate the sustainability of select foods and eating patterns at the local and global level. (Typically Offered: Spring)

FSHN 5750: Processed Foods

Credits: 3. Contact Hours: Lecture 3.

This course will examine effect of industrial and domestic food processing on the nutrient content of food and risk of developing chronic disease. Offered odd-numbered years. (Typically Offered: Spring).

FSHN 5800: Orientation to Food Science and Nutrition Research

Credits: 1. Contact Hours: Lecture 1.

Orientation to and discussion of research interests in food science and nutrition. Discussion of policy and ethical issues in the conduct of research. Intended for entering students in FSHN. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

FSHN 5810: Seminar

Credits: 1. Contact Hours: Lecture 1.

Discussion and practice of oral presentation of scientific data in a professional setting. Discussion of issues related to data presentation. Intended for graduate students in their first or second semester in FSHN. (Typically Offered: Fall)

FSHN 5890: Systems Neuroscience: Brain, Behavior, and Nutrition-Related Integrative Physiology

(Cross-listed with NUTRS 5890/ GERON 5890/ NEURO 5890/ PSYCH 5890).

Credits: 2. Contact Hours: Lecture 2.

Structural, functional, and biochemical aspects of brain and non-motor behavior across the human lifespan. Types of neuroimaging used to assess the brain. Current research is leveraged to gauge how nutrition, diseases related to nutrition, and associated physiological processes influence the brain, particularly for common developmental, psychological, and neurological disorders. (Typically Offered: Spring)

FSHN 5900A: Special Topics: Nutrition

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

FSHN 5900B: Special Topics: Food Science

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

FSHN 5900C: Special Topics: Teaching

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

FSHN 5960A: Food Science and Human Nutrition Travel Course: International Travel

(Dual-listed with FSHN 4960A).

Credits: 1-4. Repeatable.

(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

FSHN 5960B: Food Science and Human Nutrition Travel Course:**Domestic travel**

(Dual-listed with FSHN 4960B).

Credits: 1-4. Repeatable.

(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students. (Typically Offered: Fall, Spring, Summer)

FSHN 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Nonthesis option only. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**FSHN 6060: Advanced Food Analysis and Instrumentation**

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Instrumental methods for measuring chemical and physical properties of foods, food quality and functionality. Techniques for methods development, sample preparation, optimization of operating conditions, and data analysis needed to obtain accurate, reproducible results by means of instrumentation. Offered even-numbered years. (Typically Offered: Fall). .

FSHN 6110: Advanced Food Processing

Credits: 3. Contact Hours: Lecture 3.

Recent advances in the science and technology of food processing and preservation; examples include both thermal and non-thermal processes, including cold plasma, nanotechnology, and extrusion. Advances in extraction and separation technologies, by-product utilization, and sustainability in food processing industry will also be discussed. Students to research on select topics and present. Offered odd-numbered years. (Typically Offered: Fall).

FSHN 6120: Advanced Food Chemistry

Credits: 3. Contact Hours: Lecture 3.

Structure, chemical and physical properties of lipids, proteins and carbohydrates, and their food and industrial applications. Changes in functionalities during processing and storage. Offered even-numbered years. (Typically Offered: Spring).

FSHN 6260: Advanced Food Microbiology

(Cross-listed with MICRO 6260/ TOX 6260).

Credits: 3. Contact Hours: Lecture 3.

Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and mode of action of antimicrobials. Offered odd-numbered years. (Typically Offered: Spring)

FSHN 6270: Rapid Methods in Food Microbiology

(Cross-listed with MICRO 6270/ TOX 6270).

Credits: 2. Contact Hours: Lecture 2.

Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.), existing commercial test formats and kits, automation in testing, sample preparation and 'next generation' testing formats now in development. (Typically Offered: Fall, Spring, Summer)

FSHN 6530: Food and Agricultural Traceability

Credits: 3. Contact Hours: Lecture 3.

Current issues and concepts of food and agricultural product traceability in the U.S., from production to consumption. Food types, microbial agents of concern, adulterants, disease investigations, risk analysis, risk mitigation, prevention and regulatory policy and advocacy. Travel to Washington, D.C. (Typically Offered: Fall)

FSHN 6810: Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 2 credits.

Presentation of thesis or dissertation research. Must be taken once for each graduate program; once for the M.S. program and once for the Ph.D. program. (Typically Offered: Fall, Spring, Summer)

FSHN 6820: Seminar Reflection

Credits: Required. Contact Hours: Lecture 1.

Repeatable.

Active listening and critical thinking activities related to research seminars in food science and human nutrition. Required each semester for all FSHN graduate students. Electronic documentation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

FSHN 6900: Special Problems

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

FSHN 6950: Grant Proposal Writing

(Cross-listed with NUTRS 6950).

Credits: 1. Contact Hours: Lecture 1.

Grant proposal preparation experiences including writing and critiquing of proposals and budget planning. Understanding the grant funding process from federal, foundation, and commodity agencies. Includes preparing a grant for possible submission and participation in the review of proposals. Discussion of the role of successful grant writing in career development. (Typically Offered: Fall, Spring)

FSHN 6990: Research in Food Science and Technology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Forestry (FOR)

Courses primarily for undergraduates:

FOR 2010: Forest Biology

Credits: 2. Contact Hours: Lecture 2.

Prereq: Concurrent enrollment in FOR 2020, FOR 2030, FOR 2040, FOR 2050, and FOR 2060

Discussion of ecological concepts, individual tree structure and growth, variation and diversity in tree populations. Physical environment of trees and forests, ecological processes in forest communities, and introduction to different regional forest communities. (Typically Offered: Fall)

FOR 2020: Sustainable Materials: Wood Utilization

Credits: 2. Contact Hours: Lecture 2.

Prereq: Concurrent enrollment in FOR 2010, FOR 2030, FOR 2040, FOR 2050, and FOR 2060

Basis for use of wood as an industrial raw material for lumber, composites, pulp and paper, energy and chemicals. Implications of use of alternative renewable and non-renewable materials for societal infrastructure and consumer goods. (Typically Offered: Fall)

FOR 2030: Resource Measurements/Evaluation

Credits: 2. Contact Hours: Lecture 2.

Prereq: Concurrent enrollment in FOR 2010, FOR 2020, FOR 2040, FOR 2050, and FOR 2060; MATH 1400

Survey techniques involved in quantification, valuation, and evaluation of tree and stand growth and other variables in the forest environment (e.g., recreational use, wildlife habitat value, biomass, and solid wood). (Typically Offered: Fall)

FOR 2040: Forest Ecosystem Decision-Making

Credits: 2. Contact Hours: Lecture 2.

Prereq: Concurrent enrollment in FOR 2010, FOR 2020, FOR 2030, FOR 2050, and FOR 2060

Methods of decision-making related to forest ecosystems including communications, teams and conflict resolution. Current issues relating to public, private, and urban forests; quantification of processes, services, and goods produced by the forest and expected by the public such as wildlife, water, range, recreation, wilderness, biodiversity, as well as wood and fiber products. (Typically Offered: Fall)

FOR 2050: Integrated Forestry Laboratory

Credits: 3. Contact Hours: Laboratory 8.

Prereq: Concurrent enrollment in FOR 2010, FOR 2020, FOR 2030, FOR 2040, and FOR 2060

Field and laboratory exercises integrating the evaluation and management of forest goods, services, and the processing of wood products. (Typically Offered: Fall)

FOR 2060: Fall Forestry Camp

Credits: 4.

Prereq: Concurrent enrollment in FOR 2010, FOR 2020, FOR 2030, FOR 2040, and FOR 2050

Three-week field camp to address topics and issues covered in 2010, 2020, 2030, 2040, and 2050. (Typically Offered: Fall)

FOR 2800: Wood Properties and Identification

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Properties of wood and how they relate to its successful use.

Comparative anatomical characteristics, scientific nomenclature, and hand lens identification of commercially important North American woods. (Typically Offered: Spring)

FOR 2830: Pesticide Application Certification

(Cross-listed with AGRON 2830/ ENT 2830/ HORT 2830).

Credits: 2. Contact Hours: Lecture 2.

Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized. (Typically Offered: Spring)

FOR 2900A: Special Problems: Leadership in Forestry Teams (LIFT) Learning Community

Credits: 1-4. Repeatable.

Prereq: Freshman or Sophomore classification, permission of instructor

FOR 2900B: Special Problems: Forest Ecosystem Management

Credits: 1-4. Repeatable.

Prereq: Freshman or Sophomore classification, permission of instructor

FOR 2900C: Special Problems: Natural Resource Conservation

Credits: 1-4. Repeatable.

Prereq: Freshman or Sophomore classification, permission of instructor

FOR 2900D: Special Problems: Urban and Community Forestry

Credits: 1-4. Repeatable.

Prereq: Freshman or Sophomore classification, permission of instructor

FOR 2900E: Special Problems: Wood Science and Technology

Credits: 1-4. Repeatable.

Prereq: Freshman or Sophomore classification, permission of instructor

FOR 3020: Silviculture

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: FOR 2010 or NREM 3010 or AECL 3120

Manipulation of forest vegetation based on ecological principles for the production of goods and services. (Typically Offered: Spring)

FOR 3560: Dendrology

(Cross-listed with BIOL 3560).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: BIOL 2110

Identification and ecology of North American woody plant species. Importance of woody plants in timber production and wildlife habitat. Historical conditions of North American forest regions will also be addressed. (Typically Offered: Fall)

FOR 3580: Forest Herbaceous Layer: Ecology and Identification.

Credits: 1.

Survey of the major plant families, general, and representative species of the forest herbaceous layer. Functional ecology and restoration. (Typically Offered: Spring)

FOR 4160: Forest Insects and Diseases

(Cross-listed with PLP 4160).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Nature of insects and pathogens of forest and shade trees; their role in the dynamics of natural and managed forest ecosystems; and the management of indigenous and exotic pests. Laboratory experience working with insect and fungal pests of trees. (Typically Offered: Fall)

FOR 4420: Dynamics of Forest Stands

(Dual-listed with FOR 5420).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: FOR 3020; NREM 3010; (STAT 1010 or STAT 1040)

Change in forest species composition and structure at the stand and landscape scales resulting from site quality, tree growth, competition, succession, and disturbance. Methods for assessing tree growth and reconstructing past stand development. Applications to forest and savanna management. Offered even-numbered years. (Typically Offered: Fall)

FOR 4510: Forest Resource Economics and Quantitative Methods

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: FOR 2030

Application of economic principles to forest resource management considering both market and non-market goods and services. Methods of identifying and specifying problems in the management and use of forest resources. Application of mathematical and statistical models to the solution of managerial problems. (Typically Offered: Spring)

FOR 4520: Ecosystem Management: Integrating Ecology, Society, and Policy

(Dual-listed with FOR 5520/ NREM 5520). (Cross-listed with NREM 4520).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: Junior or Senior classification; (NREM 1200 or BIOL 1730)

Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints. (Typically Offered: Spring)

FOR 4540: Forestry Practicum

Credits: 3. Contact Hours: Lecture 1, Laboratory 4.

Prereq: Senior classification

Integrated decision-making related to the conservation, management, and preservation of private and public forests, wildlands, urban/ community forests, and/or the production and utilization of wood products. Student teams work with a client and develop management plans that incorporate ecological, social, economic, ethical, and institutional/political factors. Effective teamwork, written/oral/visual communication, and problem-solving stressed. Multiple trips to project site and client. (Typically Offered: Spring)

FOR 4750: Urban Forestry

(Cross-listed with HORT 4750).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: Junior or senior classification, 3 credits in BIOL

Discussion of establishment and management of woody perennials in community-owned urban greenspaces, consideration of urban site and soil characteristics, plant physiology, plant culture, urban forest valuation, inventory methods, species selection, and urban forest maintenance (health care and pest management). (Typically Offered: Fall)

Courses primarily for graduate students, open to qualified undergraduates:

FOR 5420: Dynamics of Forest Stands

(Dual-listed with FOR 4420).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: Graduate Standing or Permission of Instructor

Change in forest species composition and structure at the stand and landscape scales resulting from site quality, tree growth, competition, succession, and disturbance. Methods for assessing tree growth and reconstructing past stand development. Applications to forest and savanna management. Offered even-numbered years. (Typically Offered: Fall)

FOR 5520: Ecosystem Managemnt

(Dual-listed with FOR 4520/ NREM 4520). (Cross-listed with NREM 5520).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints. (Typically Offered: Spring)

FOR 5990A: Creative Component: Forest Biology

Credits: 1-12. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

FOR 5990B: Creative Component: Forest Biometry

Credits: 1-12. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

FOR 5990C: Creative Component: Forest and Recreation Economics

Credits: 1-12. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

FOR 5990D: Creative Component: Forest Management and Administration

Credits: 1-12. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

FOR 5990E: Creative Component: Wood Science

Credits: 1-12. Repeatable, maximum of 12 credits.

Courses for graduate students:**FOR 6960: Research Seminar**

(Cross-listed with AGRON 6960/ BBMB 6960/ PLBIO 6960/ GDCB 6960/ HORT 6960).

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

FOR 6990A: Research: Forest Biology - Wood Science

Credits: 1-12. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

FOR 6990B: Research: Forest Biometry

Credits: 1-12. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

FOR 6990C: Research: Forest Economics

Credits: 1-12. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

FOR 6990D: Research: Forest Management and Administration

Credits: 1-12. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

FOR 6990E: Research: Wood Science

Credits: 1-12. Repeatable, maximum of 12 credits.

FOR 6990F: Research: Plant Physiology

Credits: 1-12. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

French (FRNCH)

Courses primarily for undergraduates:**FRNCH 1010: Elementary French I**

Credits: 4. Contact Hours: Lecture 4.

Beginning level development of reading, writing, listening comprehension, and speaking in French, within the context of French culture. (Typically Offered: Fall, Summer)

FRNCH 1020: Elementary French II

Credits: 4. Contact Hours: Lecture 4.

Prereq: FRNCH 1010

Beginning level development of reading, writing, listening comprehension, and speaking in French, within the context of French culture. Graduation Restriction: A student may apply either FRNCH 1010 and 1020 or FRNCH 1070 to graduation. Meets International Perspectives Requirement. (Typically Offered: Spring, Summer)

FRNCH 1070: Intensive Beginning French

Credits: 4. Contact Hours: Lecture 4.

An accelerated introduction to reading, writing, listening comprehension, and speaking in French, within the context of Francophone cultures around the world. This course is the equivalent of FRNCH 1010 and 1020. Graduation Restrictions: A Student may apply either FRNCH 1010 and 1020 or FRNCH 1070 to graduation. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

FRNCH 2010: Intermediate French I

Credits: 4. Contact Hours: Lecture 4.

Prereq: FRNCH 1020

Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture. Meets International Perspectives Requirement. (Typically Offered: Fall)

FRNCH 2020: Intermediate French II

Credits: 4. Contact Hours: Lecture 4.

Prereq: FRNCH 2010

Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture. Meets International Perspectives Requirement. (Typically Offered: Spring)

FRNCH 2030: Intermediate French Grammar and Conversation

Credits: 4. Contact Hours: Lecture 4.

Prereq: FRNCH 2010

Practice in oral communication within the context of French language and cultures for professions. Best-suited for students with a solid foundation in basic French grammar. Graduation Restriction: Only one of FRNCH 2020 or 2030 may count toward graduation. (Typically Offered: Fall)

FRNCH 3010: Language, Culture, Contexts

Credits: 3. Contact Hours: Lecture 3.

Prereq: FRNCH 2020

Emphasis on developing language proficiency and skills in reading and writing. Selective review of grammar within the context of cultural and literary prose. Meets International Perspectives Requirement. (Typically Offered: Fall)

FRNCH 3020: Text and Media Analysis

Credits: 3. Contact Hours: Lecture 3.

Prereq: FRNCH 3010

Readings in French prose, theater and poetry. Introduction to close reading and analysis. Development of reading and writing skills for upper-level courses. Meets International Perspectives Requirement. (Typically Offered: Spring)

FRNCH 3040: French for Global Professionals

Credits: 3. Contact Hours: Lecture 3.

Prereq: FRNCH 2020

Communication in business and professional contexts in French-speaking countries. Development of effective communication strategies and project management in the workplace. Cultural contexts of business and professional practice. Emphasis on working across French-American cultures. Preparation for internships. Meets International Perspectives Requirement.

FRNCH 3050: French Conversation

Credits: 3. Contact Hours: Lecture 3.

Prereq: concurrent enrollment in FRNCH 3010

Intensive conversational and listening practice emphasizing contemporary France and the Francophone world. Native or near-native speakers are not eligible to enroll. Meets International Perspectives Requirement.

FRNCH 3100: French Pronunciation

Credits: 1. Contact Hours: Lecture 1.

Prereq: Concurrent enrollment in FRNCH 2020

Practice and theory of correct pronunciation of sounds in French. Correlation between sound and spelling in French. Relationship between pronunciation and grammar. (Typically Offered: Fall, Spring)

FRNCH 3200: France Today

Credits: 3. Contact Hours: Lecture 3.

Prereq: FRNCH 2020

Selected topics dealing with contemporary French society and culture. Meets International Perspectives Requirement.

FRNCH 3260: French and Francophone Film

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: FRNCH 3010

In-depth study of a selected filmmaker, genre, or movement. Emphasis on analytical interpretation and relationship between film and French or Francophone culture, history, and society. Counts toward World Film Studies Minor. Meets International Perspectives Requirement.

FRNCH 3400: Cultural Expressions in the French-Speaking World

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: Credit or concurrent enrollment in FRNCH 3020

Cultural approaches to selected topics, genres, movements, or voices in French language, literatures, and media. Emphasis on close reading and discussion. Meets International Perspectives Requirement.

FRNCH 3700: French Studies in English

Credits: 3-4. Contact Hours: Lecture 3.

Repeatable.

Author, genre, or period study in French or Francophone history, literature, or culture. Three credits: readings, discussions and papers in English; open to all students. Four credits: required for French concentration credit, supplementary readings and written course work in French. For enrollment in fourth credit, 6 credits in FRNCH at 3000-level. Meets International Perspectives Requirement.

FRNCH 3700F: Studies in English Translation: French Topics on Women and Gender Studies

(Cross-listed with WGS 3700F).

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Topics vary according to faculty interest. Readings, discussions, and papers in English. Meets International Perspectives Requirement.

FRNCH 3750: Francophone Studies in English

Credits: 3-4. Contact Hours: Lecture 4.

Repeatable.

Author, genre, period study, or contemporary topics in Francophone history, literature, politics, or culture. Readings, discussions, and papers in English. Required for French concentration credit (4th credit), supplementary readings and written course work in French. For enrollment in fourth credit, 6 credits in FRNCH at 3000-level. Meets International Perspectives Requirement.

FRNCH 3780: French Cinema

Credits: 3-4. Repeatable.

Analysis and interpretation of film in French society. Topics vary according to faculty interest. Film directors, genres, movements (e.g. The New Wave), historical survey, aesthetics, and cinematography. Three credits: readings, discussions and papers in English; open to all students. Four credits: required for French concentration credit, supplementary readings and written course work in French. Counts toward World Film Studies Minor. For enrollment in fourth credit, 6 credits in FRNCH at 3000-level. Meets International Perspectives Requirement.

FRNCH 3950: Study Abroad

Credits: 1-10. Repeatable.

Prereq: 12 credits in FRNCH

Formal class instruction at level appropriate to the student's training, augmented by practical living experience. Meets International Perspectives Requirement. (Typically Offered: Summer)

FRNCH 4400: Seminar in French and/or Francophone Studies

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: FRNCH 3400

Seminar in French and/or Francophone literatures, civilizations. or cultural studies. Topics vary according to faculty interest. Meets International Perspectives Requirement.

FRNCH 4760: French Culture and Society in English

Credits: 3-4. Contact Hours: Lecture 3.

Repeatable.

Key moments and themes in French society and culture up to the modern era. Subjects vary according to faculty interest. Readings, discussions, and papers in English. Meets International Perspectives Requirement. (Typically Offered: Spring)

FRNCH 4900: Independent Study

Credits: 1-6. Repeatable, maximum of 9 credits.

Prereq: Department Chair Permission for Course

Designed to meet the needs of students who wish to focus on areas other than those in which courses are offered. Graduation Restriction: No more than 9 credits in FRNCH 4900 may be counted toward graduation.

FRNCH 4990: Internship in French

Credits: 1-3. Repeatable, maximum of 3 credits.

Prereq: 9 credits of French at the 3000 level; permission of advisor and WLC Internship Coordinator

Work experience using French language skills in the public or private sector, combined with academic work under faculty supervision.

Graduation Restriction: No more than 3 credits of FRNCH 4990 may be applied to the major. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

FRNCH 5900A: Special Topics in French: Literature or Literary Criticism

Credits: 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 4000 level French

FRNCH 5900B: Special Topics in French: Linguistics

Credits: 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 4000 level French

FRNCH 5900C: Special Topics in French: Language Pedagogy

Credits: 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 4000 level French

FRNCH 5900D: Special Topics in French: Civilization

Credits: 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 4000 level French

Genetics (GEN)

Courses primarily for undergraduates:

GEN 1100: Genetics Orientation

Credits: 1. Contact Hours: Lecture 1.

This course is intended for first year students and others new to the genetics major. Discussion of university policies and resources, requirements of the major, career opportunities, and other topics related to the first-year experience. Graduation Restriction: Only one of GEN 1100 or 1120 may count toward graduation. (Typically Offered: Fall)

GEN 1120: Genetics Orientation for Transfer Students

Credits: 0.5. Contact Hours: Lecture 0.5.

Eight-week course for external transfer students and internal change of major students. Discussion of university policies and resources, requirements of the major, and career opportunities. Graduation Restriction: Only one of GEN 1100 or 1120 may count toward graduation. (Typically Offered: Spring)

GEN 1130X: Exploring Possibilities in Life Sciences

(Cross-listed with BIOL 1130X).

Credits: 1. Contact Hours: Lecture 0.5, Discussion 0.5.

Seminar focusing on introducing students to life science fields and careers. Explores interdisciplinary career paths and guidance on strategies for success in achieving career goals. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

GEN 1140X: Experiential Learning and Explorations in Life Sciences

(Cross-listed with BIOL 1140X).

Credits: 1.

A second year experiential learning course focused on careers in life science fields. Sections offer themed learning allowing students to choose an immersive experience in an area of interest. Sections utilize hands-on engagement, field trips to on- and off-campus locations, and small group discussions with speakers working in different life science careers. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

GEN 2980: Cooperative Education

Credits: Required.

Prereq: Permission of the department cooperative education coordinator; sophomore classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period. (Typically Offered: Fall, Spring, Summer)

GEN 2990X: Introduction to Undergraduate Research

(Cross-listed with BIOL 2990X).

Credits: 1-2.

Prereq: Instructor Permission for Course

Identify a research opportunity on campus and conduct guided research under the supervision. (Typically Offered: Fall, Spring, Summer)

GEN 3130: Principles of Genetics

(Cross-listed with BIOL 3130).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110, BIOL 2110L, BIOL 2120, and BIOL 2120L

Introduction to the principles of transmission and molecular genetics of plants, animals, and bacteria. Recombination, structure and replication of DNA, gene expression, cloning, quantitative genetics, and population genetics. Graduation Restriction: Students may receive graduation credit for no more than one of the following: GEN 2600, GEN 3130 and 3130L, GEN 3200, BIOL 3130 and 3130L, and AGRON 3200. (Typically Offered: Fall, Spring, Summer)

GEN 3130L: Genetics Laboratory

(Cross-listed with BIOL 3130L).

Credits: 1. Contact Hours: Laboratory 4.

Prereq: Credit or enrollment in BIOL 3130

Laboratory to accompany 3130. Graduation Restriction: Students may receive graduation credit for no more than one of the following: BIOL 3130 and 3130L, GEN 2600, GEN 3130, GEN 3200, and AGRON 3200. (Typically Offered: Fall, Spring)

GEN 3200: Genetics, Agriculture and Biotechnology

(Cross-listed with AGRON 3200).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120

Transmission and molecular genetics with an emphasis on applications in agriculture, the structure and expression of the gene, how genes behave in populations and how recombinant DNA technology can be used to improve agriculture. Graduation Restriction: Credit for graduation will not be allowed for more than one of the following: GEN 2600, 3130, 3200 and BIOL 3130 and 3130L. (Typically Offered: Fall, Spring)

GEN 3220: Introduction to Bioinformatics and Computational Biology

(Cross-listed with BIOL 3220/ BCBIO 3220).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120

Genome sequencing, assembly, structural and functional annotation, and comparative genomics. Investigating these topics will develop skills in programming and scripting (Perl and/or Python), the use of biological databases, sequence alignment, similarity search, identification of sequence patterns, construction of phylogenetic trees, and comparative genomics. (Typically Offered: Fall)

GEN 3400: Human Genetics

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3130 or GEN 3130

Fundamental concepts and current issues of human genetics. Human chromosome analysis, pedigree analysis, gene mapping, the human genome project, sex determination, genetics of the immune system, genetics of cancer, gene therapy, the genetic basis of human diversity, eugenics. (Typically Offered: Fall, Spring, Summer)

GEN 3490: The Genome Perspective in Biology

(Cross-listed with BIOL 3490).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: GEN 3130 or GEN 3200

Analysis of genome, RNA, and protein data using computer technology to answer biological questions on topics ranging from microbial diversity to human health. An introduction for students in the life sciences to the fields of genomics, bioinformatics and systems. (Typically Offered: Spring)

GEN 3510: Principles of Domestic Animal Genetics

(Cross-listed with ANS 3510).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110, BIOL 2120 and STAT 1010 or STAT 1040

Foundation of genetics, genomics, and statistical concepts in domestic animal populations. Graduation Restriction: Only one of ANS 3510, GEN 3130, and GEN 3200 may count toward graduation. (Typically Offered: Fall)

GEN 3980: Cooperative Education

Credits: Required.

Prereq: Permission of Department Cooperative Education Coordinator; Junior classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period. (Typically Offered: Fall, Spring, Summer)

GEN 4010: Bioinformatics of Sequences

(Cross-listed with BIOL 4010/ COMS 4010/ BCBIO 4010).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BCBIO 3220; (COMS 1270 OR COMS 2270); (MATH 1600 or MATH 1650); (MATH 1660 or STAT 3010); (STAT 1010 or STAT 1040 or STAT 3300) or Permission of Instructor

Application of computer science and statistics to molecular biology with a significant problem-solving component, including hands-on programming using Python to solve a variety of biological problems. String algorithms, sequence alignments, homology search, pattern discovery, genotyping, genome assembly, genome annotation, comparative genomics, protein structure. Offered odd-numbered years. (Typically Offered: Fall)

GEN 4020: Microbial Genetics and Genomics

(Cross-listed with MICRO 4020).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3130; MICRO 3020

The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of vertical and horizontal genetic information transfer and gene regulation are covered, along with genetic and genomic-based approaches to study these and other cellular processes of microorganisms. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics and genomics. Offered even-numbered years. (Typically Offered: Fall)

GEN 4060: Bioinformatics of OMICS

(Cross-listed with BIOL 4060/ COMS 4060/ BCBIO 4060).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120

Introduction to cutting edge OMICS analyses including transcriptome, proteome, metabolome, DNA-protein interactome, protein-protein interactome and methylome. Genomic analysis including transcriptome analysis, cancer genomics, comparative genomics, and regulatory network analysis. (Typically Offered: Spring)

GEN 4090: Molecular Genetics

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3130 or GEN 3130

Principles of molecular genetics and analysis of gene expression, including elements of the Central Dogma (DNA replication, transcription, and translation) and gene regulation. Utilizing examples from the primary literature to illustrate experimental design, data analysis, and interpretation. (Typically Offered: Fall)

GEN 4100: Analytical Genetics

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3130 or GEN 3130

The principles and practice of genetic analysis. Mendelian genetic analysis, mutational, transgenic, and genomic analysis of gene function, linkage and gene mapping, chromosomal aberrations, aneuploidy and polyploidy, extrachromosomal inheritance, analysis of genetic pathways. (Typically Offered: Spring)

GEN 4620: Evolutionary Genetics

(Cross-listed with BIOL 4620).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3150

The population and quantitative genetic basis of evolutionary processes. The role of genetic variation in natural selection and the influences of random processes on evolutionary change. The determinants of phenotype. (Typically Offered: Fall)

GEN 4900: Independent Study

Credits: 1-5. Repeatable, maximum of 9 credits.

Prereq: GEN 3130; Junior or Senior classification; Instructor Permission

Independent study in any area of genetics. Graduation Restriction: Students may use no more than 9 credits of university-wide 4900 credits (including GEN 4900) toward the total of 120 credits required for graduation.

GEN 4910: Undergraduate Seminar, Professional Practice in Genetics Disciplines

Credits: 1. Contact Hours: Lecture 1.

Prereq: Junior classification

Intended to develop career objectives and obtain positions appropriate to the goals of students, in particular juniors, in preparation for position searches in the senior year. Discussion of various career paths in genetics disciplines; identification of experiences to enhance entry to specific careers; exposure to professional practices not covered elsewhere including literature database management, scientific figure preparation for publication, the peer-review journal system, the federal competitive grants system, laboratory budgets and management, authorship and collaborations, etc.; preparation of effective curricula vitae and application letters; and verbal scientific discourse appropriate to interview interactions and other professional settings. (Typically Offered: Fall, Spring)

GEN 4920: Undergraduate Teaching Experience

Credits: 1-2. Repeatable, maximum of 9 credits.

Prereq: BIOL 2120; Junior or Senior classification; Instructor Permission

For students registering to be undergraduate laboratory or classroom assistants. Graduation Restriction: No more than 2 credits of GEN 4920 may be applied toward the Genetics advanced course requirement. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

GEN 4950: Special Topics in Genetics

Credits: 1-3. Repeatable, maximum of 3 credits.

Prereq: GEN 3130; Instructor Permission

Content varies from year to year. Graduation Restriction: Genetics students may use no more than 9 credits of university-wide 4900 - 4990 credits toward the total of 120 credits required for graduation. (Typically Offered: Fall, Spring)

GEN 4960: Attendance and Critique of Genetics Seminars

Credits: 1-3. Repeatable, maximum of 3 credits.

Prereq: GEN 3130; Junior or Senior classification; Instructor Permission

Attendance and critique of departmental seminars in BBMB, GDCB, or EEOB. Graduation Restriction: Genetics students may use no more than 9 credits of university-wide 4900 - 4990 credits toward the total of 120 credits required for graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

GEN 4980: Cooperative Education

Credits: Required.

Prereq: Senior classification; Department Permission

Required of all cooperative education students. Students must register for this course prior to commencing each work period. (Typically Offered: Fall, Spring, Summer)

GEN 4990: Genetics Research

Credits: 1-5. Repeatable, maximum of 9 credits.

Prereq: GEN 3130; Junior or Senior classification; Instructor Permission

Independent research in any area of genetics. Graduation Restriction: Genetics students may use no more than 9 credits of university-wide 4900 - 4990 credits toward the total of 120 credits required for graduation. (Typically Offered: Fall, Spring, Summer)

GEN 4990H: Genetics Research for Honors

Credits: 1-5. Repeatable, maximum of 9 credits.

Prereq: GEN 3130; Junior or Senior classification; Instructor Permission

Independent research in any area of genetics; for Honors students only. Graduation Restriction: Genetics students may use no more than 9 credits of university-wide 4900 - 4990 credits toward the total of 120 credits required for graduation. (Typically Offered: Fall, Spring, Summer)

Genetics (GENET)

Courses primarily for graduate students, open to qualified undergraduates:

GENET 5390: Ethics and Biological Sciences

Credits: 2. Contact Hours: Lecture 2.

Introduction to Bioethics through case studies, discussion of contemporary work on central bioethics topics, and discussion of important emerging ethical issues associated with recent research or technological development. Issues covered will vary somewhat from year to year, but will include at least some of the following: ethics and responsible research practice, animal ethics and the use of animals in teaching and research, cloning, human reproductive and stem cell research, regulation of genetically modified crops and foods, plant biotechnology, gene patents. Students will be divided into groups to develop their own case study, to be presented in class at the end of the term. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

GENET 5900: Special Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Contact individual faculty for special projects or topics. Graded. (Typically Offered: Fall, Spring, Summer)

GENET 5910: Workshop in Genetics

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Prereq: Instructor Permission for Course

Current topics in genetics research. Lectures by off-campus experts. Students read background literature, attend preparatory seminars, attend all lectures, meet with lecturers. (Typically Offered: Fall)

Courses for graduate students:

GENET 6900: Graduate Student Seminar in Genetics

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Research presentations by students to improve their ability to: orally present scientific work in a clear and meaningful way, critically evaluate oral presentations, and give and receive constructive criticism. Students may enroll in one seminar per school year. (Typically Offered: Fall, Spring)

GENET 6910: Faculty Seminar in Genetics

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Faculty research seminars that introduce students to the variety of genetics research projects on campus and provide an opportunity for students to become engaged in the scientific presentation to the point where they can think critically and ask meaningful questions. (Typically Offered: Fall)

GENET 6920: Conceptual Foundations of Genetics

Credits: 1. Contact Hours: Lecture 1.

Landmark papers in the development of genetics concepts. Papers are presented and discussions led by students, guided and mentored by the instructors. Instructors provide a broad overview and history of the development of fundamental concepts in genetics. (Typically Offered: Fall)

GENET 6930: Entrepreneurship for Graduate Students in Science and Engineering

(Cross-listed with AGRON 6930/ BCB 6930/ ENGR 6930/ EE 6930/ ME 6930).

Credits: 1. Contact Hours: Lecture 3.

Repeatable, maximum of 2 credits.

Understanding key topics of starting a technology based company, from development of technology-led idea to early-stage entrepreneurial business. Concepts discussed include: entrepreneurship basics, starting a business, funding your business, protecting your technology/business IP. Subject matter experts and successful, technology-based entrepreneurs will provide real world examples from their experience with entrepreneurship. Learn about the world class entrepreneurship ecosystem at ISU and Central Iowa. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

GENET 6970: Graduate Research Rotation

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Graduate research projects performed under the supervision of selected faculty members in the graduate Genetics major. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

GENET 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Research. (Typically Offered: Fall, Spring, Summer)

Genetics, Development and Cell Biology (GDCB)

Courses primarily for graduate students, open to qualified undergraduates:

GDCB 5100: Transmission Genetics

Credits: 3. Contact Hours: Lecture 3.

In-depth investigations of modern research practices of transmission genetics. Designed for students interested in genetic research. Topics include: Mendelian genetic analysis, analysis of genetic pathways, mutational analysis of gene function, chromosomal mechanics, genetic mapping, epigenetic inheritance, human genetic analysis. (Typically Offered: Fall)

GDCB 5110: Advanced Molecular Genetics

(Cross-listed with MCDB 5110).

Credits: 3. Contact Hours: Lecture 3.

Mechanisms of molecular genetic processes in eukaryotes and prokaryotes, including DNA replication and repair, transcription, translation and regulation of gene expression. Critical evaluation and discussion of current primary literature, methodologies and experimental data. (Typically Offered: Spring)

GDCB 5130: Plant Metabolism

(Cross-listed with PLBIO 5130).

Credits: 2. Contact Hours: Lecture 2.

Photosynthesis, respiration, and other aspects of plant metabolism. Offered even-numbered years. (Typically Offered: Fall)

GDCB 5280: Advances in Molecular Cell Biology

(Cross-listed with MCDB 5280).

Credits: 3. Contact Hours: Lecture 3.

Cell biological processes including cell signaling, cell division, intracellular trafficking, biogenesis of organelles, cell adhesion and motility. Offered even-numbered years. (Typically Offered: Fall)

GDCB 5330: Advances in Developmental Biology

(Cross-listed with MCDB 5330).

Credits: 3. Contact Hours: Lecture 3.

Fundamental principles in multicellular development. Emphasis on cellular and molecular regulation of developmental processes, and experimental approaches as illustrated in the current literature. Offered odd-numbered years. (Typically Offered: Fall)

GDCB 5360: Statistical Genetics

(Cross-listed with STAT 5360).

Credits: 3. Contact Hours: Lecture 3.

Statistical models and methods for genetics covering models of population processes: selection, mutation, migration, population structure, and linkage disequilibrium, and inference techniques: genetic mapping, linkage analysis, and quantitative trait analysis. Applications include genetic map construction, gene mapping, genome-wide association studies (GWAS), inference about population structure, phylogenetic tree construction, and forensic and paternity identification.

GDCB 5420A: Introduction to Molecular Biology Techniques: DNA Techniques

(Cross-listed with BMS 5420A/ EEOB 5420A/ FSHN 5420A/ BBMB 5420A/ HORT 5420A/ NREM 5420A/ NUTRS 5420A/ VDPAM 5420A/ VMPPM 5420A).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

GDCB 5420B: Introduction to Molecular Biology Techniques: Protein

(Cross-listed with BMS 5420B/ EEOB 5420B/ FSHN 5420B/ BBMB 5420B/ HORT 5420B/ NREM 5420B/ NUTRS 5420B/ VDPAM 5420B).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only. (Typically Offered: Spring, Summer)

GDCB 5420C: Introduction to Molecular Biology Techniques: Cell Techniques

(Cross-listed with BMS 5420C/ EEOB 5420C/ FSHN 5420C/ BBMB 5420C/ HORT 5420C/ NREM 5420C/ NUTRS 5420C/ VMPPM 5420C/ VDPAM 5420C).

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. ular biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

GDCB 5420D: Introduction to Molecular Biology Techniques: Plant Transformation

(Cross-listed with BMS 5420D/ EEOB 5420D/ FSHN 5420D/ BBMB 5420D/ HORT 5420D/ NREM 5420D/ NUTRS 5420D/ VMPPM 5420D/ VDPAM 5420D).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of tranformants. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

GDCB 5420E: Introduction to Molecular Biology Techniques: Proteomics

(Cross-listed with BMS 5420E/ EEOB 5420E/ FSHN 5420E/ BBMB 5420E/ HORT 5420E/ NREM 5420E/ NUTRS 5420E/ VMPPM 5420E/ VDPAM 5420E).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

GDCB 5420F: Introduction to Molecular Biology Techniques: Metabolomics

(Cross-listed with BMS 5420F/ EEOB 5420F/ FSHN 5420F/ BBMB 5420F/ HORT 5420F/ NREM 5420F/ NUTRS 5420F/ VMPPM 5420F/ VDPAM 5420F).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

GDCB 5420G: Introduction to Molecular Biology Techniques: Genomic

(Cross-listed with BMS 5420G/ EEOB 5420G/ FSHN 5420G/ BBMB 5420G/ HORT 5420G/ NREM 5420G/ NUTRS 5420G/ VMPPM 5420G/ VDPAM 5420G).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

GDCB 5440: Fundamentals of Bioinformatics

(Cross-listed with BCB 5440/ COMS 5440/ CPRE 5440).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

A practical, hands-on overview of how to apply bioinformatics to biological research. Recommended for biologists desiring to gain computational molecular biology skills. Topics include: sequence analysis, genomics, proteomics, phylogenetic analyses, ontology enrichment, systems biology, data visualization and emergent technologies. Offered odd-numbered years. (Typically Offered: Fall)

GDCB 5450: Plant Molecular, Cell and Developmental Biology

(Cross-listed with MCDB 5450/ PLBIO 5450).

Credits: 3. Contact Hours: Lecture 3.

Plant nuclear and organelle genomes; regulation of gene expression; hormone signaling; organization, function, and development of plant cells and subcellular structures; regulation of plant growth and development. Offered odd-numbered years. (Typically Offered: Fall)

GDCB 5560: Cellular, Molecular and Developmental Neuroscience

(Cross-listed with BMS 5560/ NEURO 5560).

Credits: 3. Contact Hours: Lecture 3.

Fundamental principles of neuroscience including cellular and molecular neuroscience, nervous system development, and regulatory systems. Offered odd-numbered years. (Typically Offered: Fall)

GDCB 5570: Rotations in Neuroscience

(Cross-listed with NEURO 5570).

Credits: 2. Contact Hours: Lecture 2.

Rotation experiences in various neuroscience research methods and techniques related to our current faculty specialties. (Typically Offered: Fall, Spring)

GDCB 5680: Statistical Bioinformatics

(Cross-listed with COMS 5680/ BCB 5680/ STAT 5680).

Credits: 3. Contact Hours: Lecture 3.

Statistical models for sequence data, including applications in genome annotation, motif discovery, variant discovery, molecular phylogeny, gene expression analysis, and metagenomics. Statistical topics include model building, inference, hypothesis testing, and simple experimental design, including for big data/complex models. (Typically Offered: Spring)

GDCB 5690: Structural Bioinformatics

(Cross-listed with BCB 5690/ COMS 5690/ CPRE 5690/ BBMB 5690).

Credits: 3. Contact Hours: Lecture 3.

Molecular structures including genes and gene products: protein, DNA and RNA structure. Structure determination methods, structural refinement, structure representation, comparison of structures, visualization, and modeling. Molecular and cellular structure from imaging. Analysis and prediction of protein secondary, tertiary, and higher order structure, disorder, protein-protein and protein-nucleic acid interactions, protein localization and function, bridging between molecular and cellular structures. Molecular evolution. (Typically Offered: Fall)

GDCB 5700: Systems Biology

(Cross-listed with COMS 5700/ CPRE 5700/ BCB 5700/ STAT 5700).

Credits: 3. Contact Hours: Lecture 3.

Algorithmic and statistical approaches in computational functional genomics and systems biology. Analysis of high throughput biological data obtained using system-wide measurements. Topological analysis, module discovery, and comparative analysis of gene and protein networks. Modeling, analysis, and inference of transcriptional regulatory networks, protein-protein interaction networks, and metabolic networks. Dynamic systems and whole-cell models. Ontology-driven, network based, and probabilistic approaches to information integration. (Typically Offered: Spring)

GDCB 5850: Fundamentals of Predictive Plant Phenomics

(Cross-listed with BCB 5850/ ME 5850).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Principles of engineering, data analysis, and plant sciences and their interplay applied to predictive plant phenomics. Transport phenomena, sensor design, image analysis, graph models, network data analysis, fundamentals of genomics and phenomics. Multidisciplinary laboratory exercises. (Typically Offered: Fall)

GDCB 5900: Special Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Courses for graduate students:**GDCB 6610: Advanced Topics in Neuroscience**

(Cross-listed with BBMB 6610/ KIN 6610/ NEURO 6610).

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: NEURO 5560 (or comparable course) or permission of instructor

Students will present three journal articles and two overview lectures on topics in neuroscience that are related but outside of their own research interest. Offered even-numbered years. (Typically Offered: Spring)

GDCB 6900: Seminar in GDCB

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Research seminars by faculty, invited speakers, and graduate students. Offered on a satisfactory-fail basis only.

GDCB 6960: Research Seminar

(Cross-listed with AGRON 6960/ BBMB 6960/ FOR 6960/ PLBIO 6960/ HORT 6960).

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

GDCB 6980: Seminar in Molecular, Cellular, and Developmental Biology

(Cross-listed with BBMB 6980/ MCDB 6980/ MICRO 6980/ VMPM 6980).

Credits: 1-2. Contact Hours: Lecture 2.

Repeatable.

Student and faculty presentations. (Typically Offered: Spring)

GDCB 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Research for thesis or dissertation. Offered on a satisfactory-fail basis only.

Geology (GEOL)

Courses primarily for undergraduates:

GEOL 1000: How the Earth Works

Credits: 3. Contact Hours: Lecture 3.

How does the earth work, what is it made of, and how does it change through time? Plate tectonics, Earth materials, landforms, structures, climate, and natural resources. Emphasis on the observations and hypotheses used to interpret earth system processes. Students may also enroll in GEOL 1000L. (Typically Offered: Fall, Spring, Summer)

GEOL 1000L: How the Earth Works: Laboratory

Credits: 1. Contact Hours: Laboratory 2.

Students will gain understanding of how Earth processes affect their lives and how they affect the Earth, and of the complex nature of the Earth and its processes. They will gain a deep knowledge of the methods used to understand the time scales and rates of Earth processes also through an applied research experience on groundwater and surface water. (Typically Offered: Fall, Spring)

GEOL 1010: Environmental Geology: Earth in Crisis

(Cross-listed with ENVS 1010).

Credits: 3. Contact Hours: Lecture 3.

Exploration of the interactions between humans and the geologic environment, and the consequences of those interactions, on local to global scales. Discussion of water, soil, mineral, and energy resources, pollution, climate change, and natural hazards such as earthquakes, volcanism, mass wasting, and flooding. (Typically Offered: Fall, Spring, Summer)

GEOL 1020: History of the Earth

Credits: 3. Contact Hours: Lecture 3.

Prereq: GEOL 1000 or GEOL 2010

Tectonic, climate, and biological evolution of the Earth. Interactions between the three are emphasized. Students will learn methods used to decipher earth history, including reading papers and maps, introductory computer coding, and using rocks and fossils. Students majoring in geology must also enroll in GEOL 1020L. (Typically Offered: Spring)

GEOL 1020L: History of the Earth: Laboratory

Credits: 1. Contact Hours: Laboratory 2.

Prereq: Credit or concurrent enrollment in GEOL 1020

Introduction to the tools used to study Earth history. Students will gain familiarity with sketching/drawing, rock/mineral/fossil identification, reading maps, learning about geologic history, and how we use these tools to reconstruct the Earth's history. (Typically Offered: Spring)

GEOL 1030: Age of Dinosaurs

Credits: 1. Contact Hours: Lecture 1.

Introduction to the diversity of dinosaur species. Discussion of basic evolutionary theory and interpretation of fossil evidence. Overview of Mesozoic Earth history including paleogeographic and paleoclimate reconstructions. Course available via the World Wide Web. (Typically Offered: Fall)

GEOL 1050: Gems and Gemstones

Credits: 1. Contact Hours: Lecture 1.

Offered in second half of the semester. Introduction to gems and gemstones, physical and optical properties of gems and gemstones, explanation of where gems come from and how they are found, how to distinguish between synthetic and naturally occurring gems, how the value of gems are determined, and the history of famous gems. (Typically Offered: Fall)

GEOL 1080: Introduction to Oceanography

(Cross-listed with ENVS 1080).

Credits: 3. Contact Hours: Lecture 3.

Introduction to the study of oceans and the processes that helped shape them. A major focus is on how the oceans work, with special attention on geological, chemical, and biological processes. Ocean circulation and its influence on climate. Life of the oceans. Use and misuse of ocean resources. Anthropogenic impacts on the oceanic environment. (Typically Offered: Fall)

GEOL 1110: Geological Disasters

(Cross-listed with ENVS 1110).

Credits: 1. Contact Hours: Lecture 1.

Introduction to the catastrophic geologic processes with the potential to devastate human populations that continue to expand into regions at greatest risk from geologic hazards. Selected case studies and discussion of plate tectonics, climate, and earth processes explain the driving forces behind natural hazards such as earthquakes, tsunamis, volcanic eruptions, landslides, and floods. (Typically Offered: Fall, Spring, Summer)

GEOL 1120: Geoscience Orientation

(Cross-listed with MTEOR 1120).

Credits: 1. Contact Hours: Lecture 1.

Orientation course for students enrolled in the Earth, Wind and Fire Learning Community. Provides an introduction to Iowa State University and meteorology, geology, and Earth science programs for students enrolled in the department's learning community. Activities include academic and social activities, talks and presentations on academic success, resume writing, and study abroad, as well as research talks by faculty members. (Typically Offered: Fall)

GEOL 1130: Spring Geoscience Orientation for Earth, Wind and Fire Learning Community

(Cross-listed with MTEOR 1130).

Credits: 1. Contact Hours: Lecture 1.

Spring orientation course for students enrolled in the 'Earth, Wind and Fire' Learning Community. Develop and apply quantitative, data-analysis, management, and communication skills on an authentic research project in a team to focus on professionalism and resilience. Introduction to interview strategies and the importance of creating a professional image on social media. Academic and social events, plus two field trips. (Typically Offered: Spring)

GEOL 1400: Climate and Society

(Cross-listed with AGRON 1400/ ENVS 1400/ MTEOR 1400).

Credits: 3. Contact Hours: Lecture 3.

The climate system of our planet. How nature and our actions alter the existing energy balance leading to climate change. Past climates on our planet. The influence of climate on society and resource availability during the Holocene (~ 11,000 years ago to present) with focus on changes post industrial revolution. Significant climate events that have altered our way of life in the past. Projected changes in future climate and potential impacts on society, environment and resources. Adaption to and mitigation of climate change. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

GEOL 1600: Water Resources of the World

(Cross-listed with AGRON 1600/ ENVS 1600/ MTEOR 1600).

Credits: 3. Contact Hours: Lecture 3.

Study of the occurrence, history, development, and management of world water resources. Basic hydrologic principles including climate, surface water, groundwater, and water quality. Historical and current perspectives on water policy, use, and the role of water in society and the environment. Meets International Perspectives Requirement. (Typically Offered: Spring)

GEOL 2010: Geology for Engineers and Environmental Scientists

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Introduction to Earth materials and processes with emphasis on engineering and environmental applications. (Typically Offered: Fall)

GEOL 2900: Independent Study

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Independent study for freshman and sophomore students.

GEOL 2980: Cooperative Education

Credits: Required.

Prereq: GEOL 1000 or GEOL 2010, GEOL 1000L, GEOL 1020, GEOL 1020L; sophomore classification

Required of all cooperative education students. Students must register for this course prior to commencing the work period. (Typically Offered: Fall, Spring, Summer)

GEOL 3020: Summer Field Studies

Credits: 6.

Prereq: GEOL 1020, GEOL 3560, and GEOL 3680

Geologic mapping; structural, stratigraphic, sedimentologic, metamorphic, geomorphic, and environmental analyses. Study areas in the Bighorn Basin and Wind River Range and excursions to Yellowstone and Grand Teton National Parks. A 6-week summer field course required of all geology majors. (Typically Offered: Summer)

GEOL 3150: Mineralogy and Earth Materials

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or concurrent enrollment in CHEM 1630 or CHEM 1670 or CHEM 1770

Introduction to mineral classification, elementary crystal chemistry, crystal growth and morphology, mineral stability, and mineral associations. GEOL 1000 or GEOL 1010 or GEOL 2010 or equivalent recommended. (Typically Offered: Fall)

GEOL 3150L: Laboratory in Mineralogy and Earth Materials

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or concurrent enrollment in CHEM 1630 or CHEM 1670 or CHEM 1770

Elements of mineral symmetry and hand-specimen mineral identification using physical properties. (Typically Offered: Fall)

GEOL 3160: Optical Mineralogy

Credits: 1. Contact Hours: Lecture 1, Laboratory 2.

Prereq: Credit or concurrent enrollment in CHEM 1630 or CHEM 1670 or CHEM 1770

Laboratory problems in mineral-identification methods utilizing optical microscopic techniques. GEOL 1000 or GEOL 1010 or GEOL 2010 or equivalent recommended. (Typically Offered: Fall)

GEOL 3240: Energy and the Environment

(Cross-listed with ENSCI 3240/ ENVS 3240/ MTEOR 3240).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 1630, CHEM 1670, or CHEM 1770

Exploration of the origin of Earth's energy resources and the environmental and climatic impacts of energy acquisition and consumption. Renewable and non-renewable energy resources within an Earth-system context. Various environmentally-relevant topics such as water quality and availability, habitat destruction, greenhouse-gas emissions, and health and safety hazards to wildlife and human communities. (Typically Offered: Spring)

GEOL 3560: Structural Geology and Tectonics

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: (GEOL 1000 or GEOL 2010); PHYS 1310; PHYS 1310L

Principles of stress, strain, and rheology. Brittle and ductile behavior of rocks. Mechanics of formation, description, and classification of fractures, faults, folds, foliation, and lineation. From micro-structures to tectonic processes. Laboratory includes application of learned concepts to real-world scenarios, geometrical techniques to solve structural problems. (Typically Offered: Spring)

GEOL 3570: Geological Mapping and Field Methods

Credits: 1. Contact Hours: Laboratory 3.

Prereq: (GEOL 1000 or GEOL 2010); PHYS 1310; PHYS 1310L

Generation and interpretation of geological maps via a combination of laboratory and field exercises. Developing skills in 3D thinking, cross-section construction, stereonet analysis, field data collection, and communicating scientific results. (Typically Offered: Fall)

GEOL 3650: Igneous and Metamorphic Petrology

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: GEOL 3150, GEOL 3150L, and GEOL 3160

Nature and origin of igneous and metamorphic rocks. Emphasis on important rock-forming environments and processes and their influence on rock characteristics. Laboratory includes thin section study of rock textures and mineralogy and the interpretation of these features. (Typically Offered: Spring)

GEOL 3680: Sedimentary Geology

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: GEOL 1020

Exploration of the interplay between weathering, sedimentation, sea-level change, tectonics, and life through time that creates sedimentary rocks and stratigraphic packages. Understanding of the historical development of sedimentary geology through the development of petrography, paleontology, deep earth sampling, geophysical technologies, and geochemistry. Field and laboratory problem sets illuminate lecture material. (Typically Offered: Fall)

GEOL 3980: Cooperative Education

Credits: Required.

Prereq: GEOL 1000 or GEOL 2010, GEOL 1000L, GEOL 1020, GEOL 1020L and Junior classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period. (Typically Offered: Fall, Spring, Summer)

GEOL 4020: Watershed Hydrology

(Dual-listed with GEOL 5020/ ENSCI 5020/ MTEOR 5020/ NREM 5020).

(Cross-listed with ENSCI 4020/ MTEOR 4020/ NREM 4020).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. (Typically Offered: Fall)

GEOL 4060: Geology Field Course

Credits: 1-2. Repeatable, maximum of 2 credits.

Prereq: Instructor Permission for Course

Weekly seminar introduces students to a selected geological region or theme that is visited on a required ten-day field excursion. Introduction to field-safety leadership. (Typically Offered: Fall, Spring)

GEOL 4090: Field Methods in Hydrogeology

(Dual-listed with GEOL 5090/ ENSCI 5090). (Cross-listed with ENSCI 4090).

Credits: 3. Contact Hours: Laboratory 4.

Prereq: GEOL 4020/ENSCI 4020, GEOL 4110/ENSCI 4110 or CE 4730

Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seepage meters, minipiezometers, stream gaging, and electronic instrumentation for data collection. Field trips to investigate water resource, water quality, and remediation projects. Offered even-numbered years. (Typically Offered: Summer)

GEOL 4110: Hydrogeology

(Dual-listed with GEOL 5110/ ENSCI 5110). (Cross-listed with ENSCI 4110).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations. (Typically Offered: Spring)

GEOL 4120: Micropaleontology

(Dual-listed with GEOL 5120). (Cross-listed with ENSCI 4120).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: GEOL 1020 and GEOL 1020L

Evolution, identification and utility of major microfossil groups from the Mesozoic to present. Focus on Cenozoic applications including biostratigraphy, paleoclimate, and paleothermometry using assemblages, stable isotopes, Mg/Ca, and molecular fossils. Laboratory includes processing and analysis of specific microfossils. Major groups covered include foraminifera, calcareous nanofossils, sponge spicules, diatoms, radiolarians, and silicoflagellates. Offered even-numbered years. (Typically Offered: Fall)

GEOL 4130: Applied and Environmental Geophysics

(Cross-listed with CE 4130/ ENSCI 4130).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar. Introductory geology, algebra, and trigonometry recommended. Offered odd-numbered years. (Typically Offered: Spring)

GEOL 4140: Applied Groundwater Flow Modeling

(Dual-listed with GEOL 5140/ ENSCI 5140). (Cross-listed with ENSCI 4140).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: (GEOL 4110 or CE 4730); MATH 1650

Introduction to the principles of modeling groundwater flow systems. Finite-difference and analytic-element methods, spreadsheet models, boundary conditions, calibration, sensitivity analysis, parameter estimation, particle tracking, and post-audit analysis. Application of MODFLOW to regional flow-system analysis. Computer laboratory emphasizes assigned problems that illustrate topics discussed in the course. Offered even-numbered years. (Typically Offered: Spring)

GEOL 4150: Paleoclimatology

(Dual-listed with GEOL 5150/ ENSCI 5150). (Cross-listed with ENSCI 4150).

Credits: 3. Contact Hours: Lecture 3.

Introduction to mechanisms that drive climate, including the interplay between oceanic and atmospheric circulation and fluctuation in Earth's orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis; O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods; utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimatology and paleoecology of the late Quaternary (last ~1 million years). Offered even-numbered years. (Typically Offered: Fall)

GEOL 4160: Hydrologic Modeling and Analysis

(Dual-listed with GEOL 5160/ ENSCI 5160/ MTEOR 5160). (Cross-listed with ENSCI 4160/ MTEOR 4160).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Study of the basic principles of hydrologic modeling, including rainfall-runoff analysis, lumped and distributed modeling, conceptual and physical models, parameter estimation and sensitivity analysis, input and validation data, uncertainty analysis, and the use of models in surface water hydrology. A range of common models are applied to study hydrologic topics such as flood forecasting and land use change impacts. Previous experience with Matlab or other programming language is needed. Offered odd-numbered years. (Typically Offered: Spring)

GEOL 4190: Aqueous and Environmental Geochemistry

(Dual-listed with GEOL 5190/ ENSCI 5190). (Cross-listed with ENSCI 4190).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: CHEM 1780, CHEM 1780L and Junior classification

Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling. Offered even-numbered years. (Typically Offered: Spring)

GEOL 4200: Mineral Resources

(Dual-listed with GEOL 5200).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: GEOL 3650

Geology and geochemistry of non-metallic and metallic ore deposits. Major processes that concentrate metals in the Earth. Geochemical conditions of ore formation using stable-isotope and fluid-inclusion studies. Laboratory emphasizes the study of metallic ores. Offered even-numbered years. (Typically Offered: Fall)

GEOL 4260: Stable Isotopes in the Environment

(Dual-listed with GEOL 5260/ ENSCI 5260). (Cross-listed with ENSCI 4260).

Credits: 3. Contact Hours: Lecture 3.

Introduction to the theory, methods and applications of stable isotopes. Primary focus on the origin, natural abundance, and fractionation of carbon, hydrogen, oxygen, nitrogen isotopes. Applications of isotopic occurrence for elucidation of physical, chemical, biological, and environmental processes. Effects of plant physiology, photosynthesis, trophic structure, diffusion, evaporation, chemical precipitation, soil and atmospheric processes, and environmental factors on isotope abundance. Offered odd-numbered years. (Typically Offered: Fall)

GEOL 4390: Seismic Methods in Geology, Engineering, and Petroleum Exploration

(Cross-listed with CE 4390).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Physics of elastic-wave propagation. Seismic surveys in environmental imaging, engineering, and petroleum exploration. Reflection and refraction techniques. Data collection, processing, and geological interpretation. Field work with state-of-the-art equipment. Introductory geology, algebra, and trigonometry recommended. Offered even-numbered years. (Typically Offered: Spring)

GEOL 4440: Petroleum Geoscience and Engineering

(Dual-listed with GEOL 5440).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

The geoscience and engineering aspects of exploration, development, and production of hydrocarbon resources around the world, as well as the historical and legal frameworks through which the industry has developed. Broader discussions of safety, risk, uncertainty, cost, and integrity as relevant to the petroleum industry. Offered even-numbered years. (Typically Offered: Spring)

GEOL 4520: Intro GIS for Geoscientists

(Dual-listed with GEOL 5520/ AGRON 5520/ ENSCI 5520). (Cross-listed with AGRON 4520/ ENSCI 4520).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Introduction to geographic information systems (GIS) using ArcGIS Pro with particular emphasis on geoscientific data. Teaches typical GIS operations and analyses in the geosciences to prepare students for practical use of GIS in industry and academia. Includes a class project for GEOL 5520. Sophomore classification or above recommended. (Typically Offered: Fall, Spring)

GEOL 4680: Applied Geostatistics for Geoscientists

(Dual-listed with GEOL 5680/ ENSCI 5680/ MTEOR 5680). (Cross-listed with ENSCI 4680/ MTEOR 4680).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: GEOL 4520; CRP 3510; CRP 4520; (NREM 3450 or NREM 4470)

Introduction to geospatial data collection, analysis, interpretation, and presentation. Geospatial techniques including geographic information systems (GIS), remote sensing (RS), and global positioning systems (GPS). Study of applied geostatistical analysis (e.g., interpolation and spatial regression). Offered even-numbered years. (Typically Offered: Fall)

GEOL 4740: Glacial and Quaternary Geology

(Dual-listed with GEOL 5740).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: GEOL 1000 or GEOL 2010

The study of glaciers, the landscapes and sediments they create, and their behavior during the Quaternary Period. Discussion of the flow of glaciers, glacial erosion and sediment transport, glacial landforms, Quaternary glacier/climate interactions, and the landscapes of Iowa. Laboratory emphasizes topographic map interpretation and local field trips. An introductory course in geology is recommended as background. Offered even-numbered years. (Typically Offered: Spring)

GEOL 4790: Surficial Processes

(Dual-listed with GEOL 5790/ ENSCI 5790). (Cross-listed with ENSCI 4790).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

The study of physical processes that shape Earth's surface. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial, hillslope, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory includes topographic map interpretation and local field trips. An introductory course in geology is recommended as background. (Typically Offered: Fall)

GEOL 4830: Environmental Biogeochemistry

(Dual-listed with ENSCI 5830). (Cross-listed with BIOL 4830/ ENSCI 4830).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Combined 12 credits in biology, chemistry, and physics

An exploration of biological, physical and geochemical impacts on the structure and function of ecosystems from local to global scales. Emphasis on the cycles of carbon, nitrogen, phosphorus, sulfur, and metals, and how these have been impacted by human activity. Topics may include biological feedbacks to climate change, microbial physiology and redox reactions, plant/soil feedbacks, terrestrial/aquatic linkages, early Earth processes and the origins of life. Offered odd-numbered years. (Typically Offered: Spring)

GEOL 4870: Microbial Ecology

(Cross-listed with ENSCI 4870/ BIOL 4870/ MICRO 4870).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 credits in Biology and 6 credits in Chemistry

Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized. (Typically Offered: Fall)

GEOL 4880: Raster GIS for Geoscientists

(Dual-listed with GEOL 5880/ AGRON 5880/ ENSCI 5880). (Cross-listed with AGRON 4880/ ENSCI 4880).

Credits: 3.

GIS course with focus on the spatial analysis and modeling of raster and triangulated irregular network (TIN) data using ArcGIS Pro. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 5880) a class project. Basic knowledge of ArcGIS Pro is a plus but not required. Course can be taken concurrently to any other Intro GIS course. Sophomore classification or above recommended. Offered odd-numbered years. (Typically Offered: Spring)

GEOL 4890: Survey of Remote Sensing Technologies

(Cross-listed with EE 4890/ ENSCI 4890/ MTEOR 4890/ NREM 4890).

Credits: 3. Contact Hours: Lecture 3.

Electromagnetic-radiation principles, active and passive sensors, multispectral and hyperspectral sensors, imaging radar, SAR, thermal imaging, lidar. Examples of applications. Also offered online S. (Typically Offered: Fall)

GEOL 4890L: Satellite Remote Sensing Laboratory

(Cross-listed with EE 4890L/ MTEOR 4890L/ NREM 4890L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Completion or concurrent enrollment in MTEOR/GEOL/NREM/ EE 4890/5890

Processing and analysis of satellite sensor data (optical and radar). Provides practical applications in an environmental context. (Typically Offered: Fall)

GEOL 4900: Independent Study

Credits: 1-3. Repeatable, maximum of 9 credits.

Prereq: 6 credits in geology; Permission of Instructor

Independent study for senior students. Graduation Restriction: No more than 9 credits of GEOL 4900 may be counted toward graduation.

GEOL 4950: Undergraduate Seminar

Credits: 1. Contact Hours: Lecture 1.

Prereq: Junior or Senior Classification

Weekly seminar on topics of current research interest. Requires written summaries of three presentations of choice. (Typically Offered: Fall, Spring)

GEOL 4980: Cooperative Education

Credits: Required.

Prereq: (GEOL 1000 or GEOL 2010); GEOL 1000L; GEOL 1020; GEOL 1020L; Permission of Department Cooperative Education Coordinator; Senior classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

GEOL 5020: Watershed Hydrology

(Dual-listed with GEOL 4020/ ENSCI 4020/ MTEOR 4020/ NREM 4020).

(Cross-listed with ENSCI 5020/ MTEOR 5020/ NREM 5020).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. (Typically Offered: Fall)

GEOL 5060: Geology Field Course

Credits: 1-2. Repeatable, maximum of 2 credits.

Prereq: Instructor Permission for Course

Weekly seminar introduces students to a selected geological region or theme that is visited on a required ten-day field excursion. Graduate students are expected to assist in field teaching and safety leadership. (Typically Offered: Fall, Spring)

GEOL 5070: Midwestern Geology Field Trip

Credits: 1. Contact Hours: Laboratory 1.

Repeatable, maximum of 1 credits.

On-site inspection of various ore deposits, mining operations, and terrains dominated by igneous or metamorphic rocks. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

GEOL 5090: Field Methods in Hydrogeology

(Dual-listed with GEOL 4090/ ENSCI 4090). (Cross-listed with ENSCI 5090).

Credits: 3. Contact Hours: Laboratory 4.

Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seepage meters, minipiezometers, stream gaging, and electronic instrumentation for data collection. Field trips to investigate water resource, water quality, and remediation projects. Offered even-numbered years. (Typically Offered: Summer)

GEOL 5110: Hydrogeology

(Dual-listed with GEOL 4110/ ENSCI 4110). (Cross-listed with ENSCI 5110).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations. (Typically Offered: Fall)

GEOL 5120: Micropaleontology

(Dual-listed with GEOL 4120). (Cross-listed with ENSCI 5120).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Evolution, identification and utility of major microfossil groups from the Mesozoic to present. Focus on Cenozoic applications including biostratigraphy, paleoclimate, and paleothermometry using assemblages, stable isotopes, Mg/Ca, and molecular fossils. Laboratory includes processing and analysis of specific microfossils. Major groups covered include foraminifera, calcareous nannofossils, sponge spicules, diatoms, radiolarians, and silicoflagellates. Offered even-numbered years. (Typically Offered: Fall). (Typically Offered: Fall)

GEOL 5130: Applied and Environmental Geophysics

(Cross-listed with CE 5130/ ENSCI 5130).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar. Introductory geology, algebra, and trigonometry recommended. Offered odd-numbered years. (Typically Offered: Spring)

GEOL 5140: Applied Groundwater Flow Modeling

(Dual-listed with GEOL 4140/ ENSCI 4140). (Cross-listed with ENSCI 5140).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Introduction to the principles of modeling groundwater flow systems. Finite-difference and analytic-element methods, spreadsheet models, boundary conditions, calibration, sensitivity analysis, parameter estimation, particle tracking, and post-audit analysis. Application of MODFLOW to regional flow-system analysis. Computer laboratory emphasizes assigned problems that illustrate topics discussed in the course. Offered even-numbered years. (Typically Offered: Spring)

GEOL 5150: Paleoclimatology

(Dual-listed with GEOL 4150/ ENSCI 4150). (Cross-listed with ENSCI 5150).

Credits: 3. Contact Hours: Lecture 3.

Introduction to mechanisms that drive climate, including the interplay between oceanic and atmospheric circulation and fluctuation in Earth's orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis; O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods; utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimatology and paleoecology of the late Quaternary (last ~1 million years). Offered even-numbered years. (Typically Offered: Fall)

GEOL 5160: Hydrologic Modeling and Analysis

(Dual-listed with GEOL 4160/ ENSCI 4160/ MTEOR 4160). (Cross-listed with ENSCI 5160/ MTEOR 5160).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Study of the basic principles of hydrologic modeling, including rainfall-runoff analysis, lumped and distributed modeling, conceptual and physical models, parameter estimation and sensitivity analysis, input and validation data, uncertainty analysis, and the use of models in surface water hydrology. A range of common models are applied to study hydrologic topics such as flood forecasting and land use change impacts. Previous experience with Matlab or other programming language is needed. Offered odd-numbered years. (Typically Offered: Spring)

GEOL 5190: Aqueous and Environmental Geochemistry

(Dual-listed with GEOL 4190/ ENSCI 4190). (Cross-listed with ENSCI 5190).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling. Offered even-numbered years. (Typically Offered: Spring)

GEOL 5200: Mineral Resources

(Dual-listed with GEOL 4200).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Geology and geochemistry of non-metallic and metallic ore deposits. Major processes that concentrate metals in the Earth. Geochemical conditions of ore formation using stable-isotope and fluid-inclusion studies. Laboratory emphasizes the study of metallic ores. Offered even-numbered years. (Typically Offered: Fall)

GEOL 5260: Stable Isotopes in the Environment

(Dual-listed with GEOL 4260/ ENSCI 4260). (Cross-listed with ENSCI 5260).

Credits: 3. Contact Hours: Lecture 3.

Introduction to the theory, methods and applications of stable isotopes. Primary focus on the origin, natural abundance, and fractionation of carbon, hydrogen, oxygen, nitrogen isotopes. Applications of isotopic occurrence for elucidation of physical, chemical, biological, and environmental processes. Effects of plant physiology, photosynthesis, trophic structure, diffusion, evaporation, chemical precipitation, soil and atmospheric processes, and environmental factors on isotope abundance. Offered odd-numbered years. (Typically Offered: Fall)

GEOL 5390: Seismic Methods in Geology, Engineering, and Petroleum Exploration

(Cross-listed with CE 5390).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Physics of elastic-wave propagation. Seismic surveys in environmental imaging, engineering, and petroleum exploration. Reflection and refraction techniques. Data collection, processing, and geological interpretation. Field work with state-of-the-art equipment. Introductory geology, algebra, and trigonometry recommended. Offered even-numbered years. (Typically Offered: Spring)

GEOL 5440: Petroleum Geoscience and Engineering

(Dual-listed with GEOL 4440).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

The geoscience and engineering aspects of exploration, development, and production of hydrocarbon resources around the world, as well as the historical and legal frameworks through which the industry has developed. Broader discussions of safety, risk, uncertainty, cost, and integrity as relevant to the petroleum industry. Offered even-numbered years. (Typically Offered: Spring)

GEOL 5520: Intro GIS for Geoscientists

(Dual-listed with GEOL 4520/ AGRON 4520/ ENSCI 4520). (Cross-listed with AGRON 5520/ ENSCI 5520).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Introduction to geographic information systems (GIS) using ArcGIS Pro with particular emphasis on geoscientific data. Teaches typical GIS operations and analyses in the geosciences to prepare students for practical use of GIS in industry and academia. Includes a class project for GEOL 5520. Sophomore classification or above recommended. (Typically Offered: Fall, Spring)

GEOL 5590: Quantitative Methods in Geology

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Analysis of geologic data on applied and quantitative basis using MATLAB. Introduction to basic programming with special focus to applied geoscience problems such as stress and strain analysis, particle tracking for fracture propagation and strain field visualization, basic tectonic modeling, red noise filtering. Toolkit development for effective handling of large data sets and picture analysis. Offered even-numbered years. (Typically Offered: Fall)

GEOL 5680: Applied Geostatistics for Geoscientists

(Dual-listed with GEOL 4680/ ENSCI 4680/ MTEOR 4680). (Cross-listed with ENSCI 5680/ MTEOR 5680).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Introduction to geospatial data collection, analysis, interpretation, and presentation. Geospatial techniques including geographic information systems (GIS), remote sensing (RS), and global positioning systems (GPS). Study of applied geostatistical analysis (e.g., interpolation and spatial regression). Offered even-numbered years. (Typically Offered: Fall)

GEOL 5740: Glacial and Quaternary Geology

(Dual-listed with GEOL 4740).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

The study of glaciers, the landscapes and sediments they create, and their behavior during the Quaternary Period. Discussion of the flow of glaciers, glacial erosion and sediment transport, glacial landforms, Quaternary glacier/climate interactions, and the landscapes of Iowa. Laboratory emphasizes topographic map interpretation and local field trips. An introductory course in geology and is recommended as background. Offered even-numbered years. (Typically Offered: Spring)

GEOL 5790: Surficial Processes

(Dual-listed with GEOL 4790/ ENSCI 4790). (Cross-listed with ENSCI 5790).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

The study of physical processes that shape Earth's surface. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial, hillslope, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory includes topographic map interpretation and local field trips. An introductory course in geology is recommended as background. (Typically Offered: Fall)

GEOL 5870: Microbial Ecology

(Cross-listed with ENSCI 5870/ EEOB 5870/ MICRO 5870).

Credits: 3. Contact Hours: Lecture 3.

Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized. (Typically Offered: Fall)

GEOL 5880: Raster GIS for Geoscientists

(Dual-listed with GEOL 4880/ AGRON 4880/ ENSCI 4880). (Cross-listed with AGRON 5880/ ENSCI 5880).

Credits: 3.

Qualified Undergrad Prereq: GEOL 4520; CRP 4510; CRP 4520; NREM 3450; NREM 4460; AE 4080 or graduate standing

GIS course with focus on the spatial analysis and modeling of raster and triangulated irregular network (TIN) data using ArcGIS Pro. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 5880) a class project. Basic knowledge of ArcGIS Pro is a plus but not required. Course can be taken concurrently to any other Intro GIS course. Sophomore classification or above recommended. Offered odd-numbered years. (Typically Offered: Spring)

GEOL 5890: Survey of Remote Sensing Technologies

(Cross-listed with EE 5890/ ENSCI 5890/ MTEOR 5890/ NREM 5890).

Credits: 3. Contact Hours: Lecture 3.

Electromagnetic-radiation principles, active and passive sensors, multispectral and hyperspectral sensors, imaging radar, SAR, thermal imaging, lidar. Examples of applications. Also offered online S. (Typically Offered: Fall)

GEOL 5890L: Satellite Remote Sensing Laboratory

(Cross-listed with EE 5890L/ MTEOR 5890L/ NREM 5890L).

Credits: Required. Contact Hours: Laboratory 3.

Processing and analysis of satellite sensor data (optical and radar). Provides practical applications in an environmental context. (Typically Offered: Fall)

GEOL 5900A: Special Topics: Surficial Processes

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

GEOL 5900B: Special Topics: Stratigraphy

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

GEOL 5900C: Special Topics: Sedimentation

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

GEOL 5900D: Special Topics: Paleontology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

GEOL 5900E: Special Topics: Petrology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

GEOL 5900F: Special Topics: Structural Geology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

GEOL 5900G: Special Topics: Geochemistry

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

GEOL 5900H: Special Topics: Hydrogeology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

GEOL 5900I: Special Topics: Earth Science

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

GEOL 5900J: Special Topics: Mineral Resources

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

GEOL 5900K: Special Topics: Geophysics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

GEOL 5900L: Special Topics: Mineralogy

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

GEOL 5900M: Special Topics: Tectonics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

GEOL 5900N: Special Topics: Paleocology and Paleoclimatology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

GEOL 5900O: Special Topics: Isotope Geochemistry

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

GEOL 5900P: Special Topics: Computational Methods and GIS

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

GEOL 5900R: Special Topics: Surface Hydrology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

GEOL 5900S: Special Topics: Oceanography

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

GEOL 5950A: Graduate Seminar: Presentation Required

(Cross-listed with MTEOR 5950A).

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Weekly seminar on topics of current research interest. All students seeking a graduate degree must enroll during each semester of residence. Students pursuing a non-thesis option for the M.S. in Earth Science must enroll for one semester. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

GEOL 5950B: Graduate Seminar: Attendance Only

(Cross-listed with MTEOR 5950B).

Credits: Required. Contact Hours: Lecture 1.

Repeatable.

Attendance only. Weekly seminar on topics of current research interest. All students seeking a graduate degree must enroll during each semester of residence. Students pursuing a non-thesis option for the M.S. in Earth Science must enroll for one semester. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

GEOL 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Courses for graduate students:**GEOL 6100A: Advanced Seminar: Earth Materials**

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring)

GEOL 6100B: Advanced Seminar: Economic Geology

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring)

GEOL 6100C: Advanced Seminar: Environmental Geochemistry

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring)

GEOL 6100D: Advanced Seminar: Geophysics

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring)

GEOL 6100E: Advanced Seminar: Geotectonics

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring)

GEOL 6100F: Advanced Seminar: Hydrogeology

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring)

GEOL 6100G: Advanced Seminar: Surficial Processes

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring)

GEOL 6100H: Advanced Seminar: Sedimentation and Stratigraphy

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring)

GEOL 6100I: Advanced Seminar: Paleoecology and Paleoclimatology

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring)

GEOL 6100J: Advanced Seminar: Isotope Geochemistry

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring)

GEOL 6100K: Advanced Seminar: Computational Methods and GIS

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring)

GEOL 6990A: Research: Surficial Processes

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

GEOL 6990B: Research: Stratigraphy

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

GEOL 6990C: Research: Sedimentation

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

GEOL 6990D: Research: Paleontology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

GEOL 6990E: Research: Petrology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

GEOL 6990F: Research: Structural Geology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

GEOL 6990G: Research: Geochemistry

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

GEOL 6990H: Research: Hydrogeology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

GEOL 6990I: Research: Earth Science

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

GEOL 6990J: Research: Mineral Resources

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

GEOL 6990K: Research: Geophysics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

GEOL 6990L: Research: Mineralogy

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

GEOL 6990M: Research: Tectonics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

GEOL 6990N: Research: Paleoecology and Paleoclimatology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

GEOL 6990O: Research: Isotope Geochemistry

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

GEOL 6990P: Research: Computational Methods and GIS

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

GEOL 6990R: Research: Surface Hydrology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

GEOL 6990S: Research: Geoscience Education

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

German (GER)

Courses primarily for undergraduates:

GER 1010: Elementary German I

Credits: 4. Contact Hours: Lecture 4.

Beginning level development of reading, writing, listening comprehension, and speaking in German within the context of German culture. For beginning-level learners who have little or no prior exposure to German. (Typically Offered: Fall, Summer)

GER 1020: Elementary German II

Credits: 4. Contact Hours: Lecture 4.

Prereq: GER 1010

Beginning level development of reading, writing, listening comprehension, and speaking in German within the context of German culture. For beginning level learners with only one semester of German (or exposure equivalent to two years or less in high school.). Meets International Perspectives Requirement. (Typically Offered: Spring, Summer)

GER 2010: Intermediate German I

Credits: 4. Contact Hours: Lecture 4.

Prereq: GER 1020

Intermediate level development of reading, writing, listening comprehension, and speaking in German within the context of German culture. Intensive review of basic grammar covered in the first-year German class (or equivalent high school courses) while exploring cultural topics and themes. Meets International Perspectives Requirement. (Typically Offered: Fall)

GER 2020: Intermediate German II

Credits: 4. Contact Hours: Lecture 4.

Prereq: GER 2010

Intermediate level development of reading, writing, listening comprehension, and speaking in German within the context of German culture. Emphasis on intermediate level grammar and communication about topics and themes beyond the personal realm. Meets International Perspectives Requirement. (Typically Offered: Spring)

GER 3010: Reading

Credits: 3. Contact Hours: Lecture 3.

Prereq: GER 2020

Emphasis on reading with further development of grammar using a variety of texts. Meets International Perspectives Requirement. (Typically Offered: Fall)

GER 3020: Composition

Credits: 3. Contact Hours: Lecture 3.

Prereq: GER 2020

Emphasis on writing skills, with further development of grammar and reading skills using a variety of current and historical materials. Meets International Perspectives Requirement. (Typically Offered: Spring)

GER 3040: German for Global Professionals

Credits: 3. Contact Hours: Lecture 3.

Prereq: GER 2020

Communication in business and professional contexts in German-speaking countries. Development of effective communication strategies and project management in the workplace. Cultural contexts of business and professional practice. Preparation for internships. Meets International Perspectives Requirement. (Typically Offered: Fall)

GER 3050: Conversation

Credits: 3. Contact Hours: Lecture 3.

Prereq: GER 2020

Intensive conversational and listening practice in German. GER 3010 recommended. Meets International Perspectives Requirement. (Typically Offered: Spring)

GER 3200: Germany Today

Credits: 3. Contact Hours: Lecture 3.

Prereq: GER 3010 or GER 3040

Selected topics dealing with contemporary German society and culture. Introduction to materials, resources, and forms of communication available on the Internet, and in other electronic and print media. Meets International Perspectives Requirement. (Typically Offered: Spring)

GER 3300: German Literature and Culture

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: GER 3010 or permission of instructor

Selected readings in German literature from Classicism to present. Emphasis on techniques of reading and analysis of literary texts. Graduation Restriction: No more than six credits of GER 3300 may be counted toward the major. Meets International Perspectives Requirement. (Typically Offered: Fall)

GER 3700: German Studies in English

Credits: 3-4. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Sophomore classification

Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Three credits: English, open to all students. Four credits: Required for German concentration credit, supplementary readings and compositions in German. For enrollment in fourth credit, 6 credits in GER at the 3000-level. Meets International Perspectives Requirement.

GER 3700G: Studies in English Translation: German Topics on Women or Feminism

(Cross-listed with WGS 3700G).

Credits: 3-4. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Sophomore classification

Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Three credits: English, open to all students. Four credits: Required for German concentration credit, supplementary readings and compositions in German. For enrollment in fourth credit, 6 credits in GER at the 3000-level. Meets International Perspectives Requirement.

GER 3710: The Holocaust in Text, Image, and Memory

Credits: 3-4. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Examination of such topics as the origins and expressions of Anti-Semitism in central Europe, the political events and structures of the Holocaust, the reality of ghettos and concentration camps, the impact of technological modernization on the Final Solution, and resistance to the Nazis. Materials will include non-fictional texts, literature, art, and music. Three credits: English, open to all students. Four credits: required for German major credit, supplementary readings and compositions in German. Four credits: required for German concentration credit, supplementary readings and compositions in German. For enrollment in fourth credit, 6 credits in GER at the 3000-level. Meets International Perspectives Requirement.

GER 3750: Grimms' Tales

Credits: 3-4. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Emphasis on the Grimm tales: theoretical approaches to the tales from the late 19th and early 20th centuries; perversions of these traditional tales by the National Socialists (Nazis). Readings in contemporary Grimm scholarship. Taught in English. Three credits: English, open to all students. Four credits: required for German concentration credit, supplementary readings and compositions in German. For enrollment in fourth credit, 6 credits in GER at the 3000-level. Meets International Perspectives Requirement.

GER 3780: German Film and Media Studies

Credits: 3-4. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Analysis and interpretation of film or media in German society. Study of media production and reception within multicultural and global contexts. Thematic emphases based on faculty and student interest including: 1) film directors, genres, movements (e.g. New German Cinema), aesthetics, and cinematography or 2) media studies (e.g. television, mass press, popular culture). Three credits: English, open to all students. Four credits: required for German concentration credit, supplementary readings and compositions in German. Counts towards the World Film Studies Minor. For enrollment in fourth credit, 6 credits in GER at the 3000-level. Meets International Perspectives Requirement. (Typically Offered: Spring)

GER 3950: Study Abroad

Credits: 1-10.

Prereq: 12 credits in GER; Department Permission

Supervised instruction in language and culture of Germany; formal class instruction at level appropriate to student's training, augmented by practical living experience. Meets International Perspectives Requirement.

GER 4760: Topics in German Cultural Studies

Credits: 3-4. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Key topics and themes in German history and culture up to the modern era. Three credits: Taught in English, open to all students. Four credits: Required for German concentration credit, supplementary readings and compositions in German. For enrollment in fourth credit, six credits in GER at the 3000-level. Meets International Perspectives Requirement. (Typically Offered: Spring)

GER 4900: Independent Study

Credits: 1-6. Repeatable, maximum of 9 credits.

Prereq: 6 credits in German and permission of department chair

Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. Graduation Restriction: No more than 9 credits of GER 4900 may be counted toward graduation.

GER 4990: Internship in German

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: 9 credits in GER at the 3000-level; Permission of Advisor; Permission of World Languages and Cultures Internship Coordinator

Work experience using German language skills in the public or private sector, combined with academic work under faculty supervision.

Available only to majors and minors. Graduation Restriction: GER 4990 may be repeated to a maximum of 6 credits. No more than 3 credits of GER 4990 may be applied to the major. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

GER 5900A: Special Topics in German: Literature or Literary Criticism

Credits: 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 4000 level German

GER 5900B: Special Topics in German: Linguistics

Credits: 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 4000 level German

GER 5900C: Special Topics in German: Language Pedagogy

Credits: 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 4000 level German

GER 5900D: Special Topics in German: Civilization

Credits: 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 4000 level German

Gerontology (GERON)

Courses primarily for undergraduates:

GERON 2340: Adult Development

(Cross-listed with HDFS 2340).

Credits: 3. Contact Hours: Lecture 3.

Prereq: PSYCH 2300 or HDFS 1020

Introductory exploration of the health, individual and social factors associated with adult development including younger adulthood, middle age and older adulthood. Information is presented from a life-span developmental framework. (Typically Offered: Spring)

GERON 3730: Death as a Part of Living

(Cross-listed with HDFS 3730).

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 1020

Consideration of death in the life span of the individual and the family with opportunity for exploration of personal and societal attitudes. (Typically Offered: Fall, Spring, Summer)

GERON 3770: Aging and the Family

(Cross-listed with HDFS 3770).

Credits: 3. Contact Hours: Lecture 3.

Interchanges of older adults and their families. Emphasis on role changes, social interaction, and independence as influenced by health, finances, lifestyles, and community support. (Typically Offered: Fall, Summer)

GERON 3780: Retirement Planning and Employee Benefits

(Cross-listed with HDFS 3780).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits in ECON, HDFS, or FIN

Financial needs analysis for retirement, characteristics of employer-sponsored and individual retirement plans, tax implications of retirement plans, Social Security funding and benefits, strategies for meeting varying retirement needs in a diverse society, financial counseling and planning practice, and overview of employee benefits. (Typically Offered: Spring)

GERON 4660: Gerontology Prepracticum Seminar

Credits: 1. Contact Hours: Lecture 1.

Prepracticum training for students planning a gerontology practicum. Exploration of possible agencies for the practicum, in-depth study of a selected agency, and development of goals and objectives for the practicum. (Typically Offered: Fall, Spring, Summer)

GERON 4670: Gerontology Practicum

Credits: 3-6. Repeatable.

Supervised field experience related to aging. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

GERON 4900: Independent Study

Credits: 1-30.

Prereq: Instructor Permission for Course

Consult program coordinator for procedure. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

GERON 5010: Seminar

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

(Typically Offered: Fall, Spring, Summer)

GERON 5010J: Gerontology Seminar: Gerontechnology

Credits: 3. Contact Hours: Lecture 3.

Gerontology Seminar: Gerontechnology. (Typically Offered: Fall, Spring, Summer)

GERON 5010M: Gerontology Seminar: Spiritual & Aging

Credits: 3. Contact Hours: Lecture 3.

Gerontology Seminar: Spiritual & Aging. (Typically Offered: Fall, Spring, Summer)

GERON 5100: Survey of Gerontology

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Provides an overview of important gerontological issues. (Typically Offered: Fall, Spring, Summer)

GERON 5210: Biological Principles of Aging

(Dual-listed with BIOL 4210). (Cross-listed with EEOB 5210).

Credits: 3. Contact Hours: Lecture 3.

Basic biological principles of aging. Course modules include an introduction to the aging process, body systems and normal aging, and environment and the biology of aging. In addition, disorders and diseases of aging, prevention and treatment and exercise and aging topics will be covered. (Typically Offered: Summer)

GERON 5220: Long-Term Care

Credits: 3. Contact Hours: Lecture 3.

Administration principles involved in the planning, organizing and directing of long-term care agencies. Includes an in-depth exposure to federal and state standards and regulations governing long-term care. (Typically Offered: Fall)

GERON 5230: Mental Health and Aging

Credits: 3. Contact Hours: Lecture 3.

Introduction to the range of issues involved in aging and mental health. From a systems framework the major emotional and psychiatric problems encountered in old age will be examined including mood, anxiety, adjustment and personality disorders, dementia, cognitive problems, substance abuse, and suicide. Barriers to treatment and cohort and cultural issues will be explored. (Typically Offered: Spring)

GERON 5240: Cognitive Health

Credits: 3. Contact Hours: Lecture 3.

Cognitive skills form the foundation for functioning in everyday life and these skills take on added importance in older adulthood. This course focuses on selected theoretical approaches and current research related to cognitive aging. We will review normative and non-normative cognitive changes, assessment techniques, and prevention/intervention efforts. Throughout the course we will keep the role of environment and life-span implications in the forefront of our discussion. (Typically Offered: Summer)

GERON 5300: Perspectives in Gerontology

(Cross-listed with HDFS 5300).

Credits: 3. Contact Hours: Lecture 3.

Overview of current aging issues including theory and research, critical social and political issues in aging, the interdisciplinary focus of gerontology, career opportunities, and aging in the future. (Typically Offered: Fall)

GERON 5310: Foundations in Integrative Aging Studies

Credits: 3. Contact Hours: Lecture 3.

Introduction to foundational concepts in the interdisciplinary field of aging studies, including: core theories of adult development and aging how to be critical consumers of aging research; developing writing and other professional skills; and exploring career options in aging. Offered even-numbered years. (Typically Offered: Spring)

GERON 5340: Adult Development

(Cross-listed with HDFS 5340).

Credits: 3. Contact Hours: Lecture 3.

Exploration of the biological, psychological and social factors associated with aging. Although the focus is on the later years, information is presented from a life-span developmental framework. Empirical studies are reviewed and their strengths, limitations and implications for normative and optimal functioning are discussed. (Typically Offered: Spring)

GERON 5400: Nutrition and Physical Activity in Aging

(Cross-listed with DIET 5400).

Credits: 3. Contact Hours: Lecture 3.

WWW only. Basic physiologic changes during aging and their impacts in health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed. (Typically Offered: Fall)

GERON 5450: Economics, Public Policy, and Aging

(Cross-listed with HDFS 5450).

Credits: 3. Contact Hours: Lecture 3.

Policy development in the context of the economic status of the older adult population. Retirement planning and the retirement decisions; social security and public transfer programs; intra-family transfers to/from the aged; private pensions; financing medical care; prospects and issues for the future. (Typically Offered: Fall)

GERON 5630: Environments for the Aging

(Cross-listed with HDFS 5630).

Credits: 3. Contact Hours: Lecture 3.

Emphasis on independent living within residential settings including specialized shelter, supportive services and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities. (Typically Offered: Spring)

GERON 5710: Design for All People

(Cross-listed with ARCH 5710).

Credits: 3. Contact Hours: Lecture 3.

Principles and procedures of inclusive design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of History, Theory, Culture requirements. (Typically Offered: Spring)

GERON 5770: Aging in the Family Setting

(Cross-listed with HDFS 5770).

Credits: 3. Contact Hours: Lecture 3.

Theories and research related to personal and family adjustments in later life affecting older persons and their intergenerational relationships. Related issues including demographics also are examined through the use of current literature. (Typically Offered: Spring)

GERON 5840: Program Evaluation and Research Methods in Gerontology

(Cross-listed with HDFS 5840).

Credits: 3. Contact Hours: Lecture 3.

Overview of program evaluation, research methods, and grant writing in gerontology. Includes application of quantitative and qualitative methods in professional settings. (Typically Offered: Spring)

GERON 5890: Systems Neuroscience: Brain, Behavior, and Nutrition-Related Integrative Physiology

(Cross-listed with FSHN 5890/ NUTRS 5890/ NEURO 5890/ PSYCH 5890).

Credits: 2. Contact Hours: Lecture 2.

Structural, functional, and biochemical aspects of brain and non-motor behavior across the human lifespan. Types of neuroimaging used to assess the brain. Current research is leveraged to gauge how nutrition, diseases related to nutrition, and associated physiological processes influence the brain, particularly for common developmental, psychological, and neurological disorders. (Typically Offered: Spring)

GERON 5900: Special Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Consult program coordinator for procedure. (Typically Offered: Fall, Spring, Summer)

GERON 5910: Internship

Credits: 1-9. Repeatable, maximum of 9 credits.

Prereq: Instructor Permission for Course

Supervised experience in an area of gerontology. (Typically Offered: Fall, Spring, Summer)

GERON 5940: Professional Seminar in Gerontology

(Cross-listed with HDFS 5940).

Credits: 3. Contact Hours: Lecture 3.

An integrative experience for gerontology students designed to be taken near the end of the degree program. By applying knowledge gained in earlier coursework, students will strengthen skills in ethical decision-making behavior, applying these skills in gerontology-related areas such as advocacy, professionalism, family and workplace issues. Students from a variety of professions will bring their unique perspectives to bear on topics of common interest. (Typically Offered: Summer)

GERON 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**GERON 6300: Theories of Aging**

Credits: 3. Contact Hours: Lecture 3.

Historical, contemporary, and interdisciplinary basis of aging theory. Biological, psychological, sociological, and human developmental conceptualizations of aging will be critically assessed. Emphasis will be placed on conceptual models, as well as theoretical development and application within gerontological research and the field of aging. (Typically Offered: Summer)

GERON 6350: Adult Development, Aging, and Health

(Cross-listed with HDFS 6350).

Credits: 3. Contact Hours: Lecture 3.

Review of the impact of the growing older adult population as well as individual development and aging on individuals, families, and society. Exploration of theoretical perspectives applied to adult development and aging and distinction of normative and non-normative changes in adulthood. Discussion of methods to assess development across adulthood and consideration of the role of individual and environmental factors impacting efforts to optimize adult development. Offered odd-numbered years. (Typically Offered: Fall)

GERON 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Global Resource Systems (GLOBE)

Courses primarily for undergraduates:

GLOBE 1100: Orientation

Credits: 1. Contact Hours: Lecture 1.

An introduction to Global Resource Systems (GRS) program. University and career acclimation, development of educational and professional skills, participation in GRS Learning Community. Assessed service-learning component. (Typically Offered: Fall)

GLOBE 1200: Geography of Global Resource Systems

Credits: 3. Contact Hours: Lecture 3.

A survey of geographic concepts with a specific focus on the distribution of natural and human-generated resources and the demand for those resources on a global scale. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

GLOBE 2010: Introduction to Global Resource Systems

Credits: 3. Contact Hours: Lecture 3.

A systematic analysis of natural, physical, and socio-economic resources. Examine ways communities prioritize, save, use, and invest in community resources to address their needs and wants in a sustainable way, and the global implications of resource systems decisions. Assessed service-learning component. (Typically Offered: Fall, Spring)

GLOBE 2110: Issues in Global Resource Systems

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 4 credits.

Discussion of topics of current importance in global resource systems. Graduation Restriction: A maximum of 4 credits of GLOBE 2110 may be used towards degree requirements. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

GLOBE 2200: Globalization and Sustainability

(Cross-listed with ANTHR 2200/ ENVS 2200/ SOC 2200/ ME 2200/ MATE 2200).

Credits: 3. Contact Hours: Lecture 3.

An introduction to understanding the key global issues in sustainability. Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Graduation Restriction: Cannot be used for technical elective credit in any engineering department. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

GLOBE 2210: Apprenticeship

Credits: Required. Repeatable.

Prereq: Approval by the Global Resource Systems Faculty Coordinator

Practical work experience in approved domestic or international settings such as with a company, research laboratory, governmental agency or non-governmental organization. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

GLOBE 2220X: Global Engagement

(Cross-listed with POLS 2220X).

Credits: 3. Contact Hours: Lecture 3.

Engagement with social and political issues on a global scale.

Contributions of individual action, non-governmental organizations, and governments to changing societal and international outcomes.

Techniques for identifying and addressing problems around the world.

Meets International Perspectives Requirement. (Typically Offered: Fall)

GLOBE 2900: Independent Study

Credits: 1-2. Repeatable.

Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator

Independent study on topics of special interest to the student.

Comprehensive report required. Intended primarily for first-year students and sophomores. (Typically Offered: Fall, Spring, Summer)

GLOBE 2900H: Independent Study: Honors

Credits: 1-2. Repeatable.

Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator

Independent study on topics of special interest to the student.

Comprehensive report required. Intended primarily for first-year students and sophomores. (Typically Offered: Fall, Spring, Summer)

GLOBE 3030: Agricultural, Food and Natural Global Resource Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: GLOBE 2010 and ECON 1010 or ECON 1020 or permission of instructor.

In-depth analysis of the opportunities, constraints and consequences of agricultural, food and natural resource systems. Topics integrate global natural resources with agriculture and food systems, nutrition and health, sustainable development, and societal structures, including gender, migration and urbanization. Course content utilizes a systems approach. (Typically Offered: Fall)

GLOBE 3040: Socio-Economic Global Resource Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: GLOBE 2010 and ECON 1010 or ECON 1020 or permission of instructor.

In-depth analysis of the opportunities, constraints and consequences of social, economic and political global resource systems. Topics integrate agriculture and food production, globalization, population, economic planning, energy, security, trade, and policy and their role in defining different world regions. Course content utilizes a systems approach. (Typically Offered: Spring)

GLOBE 3200: Global Resource Systems Internship Preparation

Credits: 1. Contact Hours: Lecture 1.

Prereq: Instructor Permission for Course

Students enrolled in this course intend to enroll in GLOBE 3210 or 3220 in the following term. Topics provide a pre-departure orientation, including logistical, academic, cultural, and personal requirements for completion of an experiential supervised work experience. (Typically Offered: Fall, Spring)

GLOBE 3210: Internship - Global

Credits: 3-6. Repeatable.

Prereq: GLOBE 3200, Junior or Senior and enrollment in Global Resource Systems major; permission of the instructor and approval by the Global Resource Systems Faculty Coordinator

A supervised learning experience including an analysis of an international location's resource system via immersion in a foreign culture lasting at least five weeks. The experience should focus on the region and technical area consistent with the student's degree track. Course expenses paid by student. Graduation Restriction: A maximum of 12 credits of GLOBE 3210 and 3220 may be used for degree requirements. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

GLOBE 3220: Internship - United States

Credits: 3-6. Repeatable.

Prereq: GLOBE 3200, Junior or Senior and enrollment in Global Resource Systems major; permission of the instructor and approval by the Global Resource Systems Faculty Coordinator

A supervised learning experience including an analysis of a domestic location's resource system via immersion in a different culture within the United States lasting at least five weeks. Designed for international students and for students who are not in a position to leave the United States. Course expenses paid by student. Graduation Restriction: A maximum of 12 credits of GLOBE 3210 and 3220 may be used for degree requirements. (Typically Offered: Fall, Spring, Summer)

GLOBE 3300: Global Health Disparities

(Cross-listed with VMPM 3300).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Historical and contemporary factors contributing to disparities in health outcomes for persons disadvantaged by income, location, ethnicity, sexual orientation, and abilities. Analysis and evaluation of health promotional materials, such as campaigns, and community-based interventions focused on reducing global health disparities. Meets U.S. Diversity Requirement. (Typically Offered: Spring)

GLOBE 3350: The Economics of Global Agricultural Food and Bio-energy

(Cross-listed with ECON 3350).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010

Applied economic analysis of the determinants of world agricultural production, marketing, and use in feed, food, fiber, biofuel, and other applications, and global food processing and consumption. Analysis of market case studies and various data on global agricultural production and transformation, land and resource use, demography, economic activity, nutrition and health trends. Meets International Perspectives Requirement.

GLOBE 3600: Global Health

(Cross-listed with VMPM 3600/ MICRO 3600).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110

Explores human health across the world with particular emphasis on low- and lower-middle-income countries. Attention is given to the interconnectedness of health determinants, problems, and solutions found in global health, including the role of animals and the environment. Broad in scope, highlighting different cultures and the historical foundations of global health. Topics include colonialism, poverty, emerging diseases, climate change, biodiversity, one health, maternal and child health, HIV, malaria, urbanization, noncommunicable diseases and more. Current events will be a feature of all class meetings. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

GLOBE 3850: Economic Development

(Cross-listed with ECON 3850).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010; ECON 1020

Current problems of developing countries, theories of economic development, agriculture, and economic development, measurement and prediction of economic performance of developing countries, alternative policies and reforms required for satisfying basic needs of Third World countries, interrelationships between industrialized countries and the developing countries, including foreign aid. Meets International Perspectives Requirement.

GLOBE 3980: Cooperative Education

Credits: Required.

Prereq: Permission of faculty coordinator for the major.

Students must complete GLOBE 3980 Cooperative Education Approval Form and register for GLOBE 3980 before commencing each work period. Work periods for students in cooperative education related to Global Resource Systems. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

GLOBE 4010: Senior Project

Credits: 3.

Prereq: Senior classification in Global Resource Systems

Research project in collaboration with faculty that complements and furthers a student's experiences from GLOBE 3210 and 3220 while simultaneously bringing into focus entire four-year experience. Student will write a research report and make either an oral or poster presentation. (Typically Offered: Fall, Spring, Summer)

GLOBE 4010H: Senior Project: Honors

Credits: 3.

Prereq: Senior classification in Global Resource Systems

Research project in collaboration with faculty that complements and furthers a student's experiences from GLOBE 3210 and 3220 while simultaneously bringing into focus entire four-year experience. Student will write a research report and make either an oral or poster presentation. (Typically Offered: Fall, Spring, Summer)

GLOBE 4020: Responses to Global Resource System Challenges

Credits: 3. Contact Hours: Lecture 3.

Capstone analysis of critical global resource challenges facing both developed and developing countries. Students will use research skills to investigate specific global resource issues and use communications skills to work as a team to integrate their research, develop an interdisciplinary perspective, and evaluate potential solutions to resource challenges. (Typically Offered: Spring)

GLOBE 4310X: Global Healthcare Delivery Systems

Credits: 3. Contact Hours: Lecture 3.

Exploration of structures and functions of healthcare delivery systems. Concepts, scope, challenges, and current strategies of existing health care delivery systems are discussed. Strategies to enhance healthcare delivery systems through case studies. Course content emphasis on low- and upper-middle income nations and utilizes systems approach. (Typically Offered: Fall)

GLOBE 4320X: Field Course on Global Public Health Services Delivery

Credits: 3. Contact Hours: Lecture 3.

Exploration of global public health infrastructures and processes through experiential learning. Discussion of challenges in global public health and application of best practices to enhance quality of public health service delivery in low- and upper-middle income country through a field trip. Location and duration of international travel will vary. Course fee will vary by location. (Typically Offered: Spring)

GLOBE 4410: International Animal Agriculture

(Cross-listed with ANS 4410).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANS 2230 or ANS 2250 or ANS 2260 or ANS 2290 or ANS 2350

An overview of animal agriculture with emphasis in developing countries. Historical, economic, environmental, and political considerations will be assessed and evaluated. Issues related to gender, resilience and sustainability for different production systems including alternative livestock species, will be investigated. The role of animal source foods in attainment of global food security will be discussed. Meets International Perspectives Requirement. (Typically Offered: Spring)

GLOBE 4800: Engineering Analysis of Biological Systems

(Cross-listed with ENSCI 4800/ ABE 4800).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ABE 3800 or Permission of Department

Systems-level quantitative analysis of various biological systems, including applications in foods, feeds, biofuels, bioenergy, and other bio-based systems. Introduction to techno-economic analysis and life-cycle assessment of these systems at multiple production scales. Applying these tools to evaluate and improve cost and sustainability performance. Students enrolled in ABE 5800 will be required to conduct additional learning activities. (Typically Offered: Fall)

GLOBE 4820: Soils of the Tropics

(Cross-listed with AGRON 4820).

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: AGRON 3540 and 9 credits in AGRON, GLOBE, ENSCI, or related discipline

Properties, classification, and geographic distribution of tropical and near-tropical soils and landscapes with emphasis on their suitability for cropping. (Typically Offered: Spring)

GLOBE 4900A: Independent Study: General

Credits: 1-4. Repeatable.

Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator

Independent study on topics of special interest to the student.

Comprehensive report required. Intended primarily for juniors and seniors.

Graduation Restriction: A maximum of 9 credits of all (university-wide)

4900 courses may be used for degree requirements. (Typically Offered: Fall, Spring, Summer)

GLOBE 4900E: Independent Study: Entrepreneurship

Credits: 1-4. Repeatable.

Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator

Independent study on topics of special interest to the student.

Comprehensive report required. Intended primarily for juniors and seniors.

Graduation Restriction: A maximum of 9 credits of all (university-wide)

4900 courses may be used for degree requirements. (Typically Offered: Fall, Spring, Summer)

GLOBE 4900H: Independent Study: Honors

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

Independent study on topics of special interest to the student.

Comprehensive report required. Intended primarily for juniors and seniors.

Graduation Restriction: A maximum of 9 credits of all (university-wide)

4900 courses may be used for degree requirements. (Typically Offered: Fall, Spring, Summer)

GLOBE 4900Z: Independent Study: Service Learning

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

Independent study on topics of special interest to the student.

Comprehensive report required. Intended primarily for juniors and seniors. Assessed service-learning component. Graduation Restriction: A maximum of 9 credits of all (university-wide) 4900 courses may be used for degree requirements. (Typically Offered: Fall, Spring, Summer)

GLOBE 4930: Workshop in Global Resource Systems

Credits: 1-3. Contact Hours: Lecture 2.

Repeatable, maximum of 4 times.

Prereq: Instructor Permission for Course

Workshop experience in selected topics in global resource systems.

Variable format may include lecture, recitation, laboratory, and field.

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

GLOBE 4940A: Service Learning: International

Credits: 1-30. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

Selected projects that result in outcomes benefiting a non-Iowa State University entity while instilling professional ethics and accomplishing student learning goals. Course expenses paid by student. Assessed service-learning component. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

GLOBE 4940B: Service Learning: Domestic

Credits: 1-30. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

Selected projects that result in outcomes benefiting a non-Iowa State University entity while instilling professional ethics and accomplishing student learning goals. Course expenses paid by student. Assessed service-learning component. (Typically Offered: Fall, Spring, Summer)

GLOBE 4940C: Service Learning: U.S. Diversity Project

Credits: 3. Repeatable.

Prereq: Instructor Permission for Course

Selected projects that result in outcomes benefiting a non-Iowa State University entity, while instilling professional ethics and accomplishing student learning goals. Academic work under faculty supervision may include written reports, presentations, and guided readings. Course expenses paid by student. Assessed service-learning component. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring, Summer)

GLOBE 4950: Global Resource Systems Study Abroad Course Preparation

Credits: 1-2. Contact Hours: Lecture 1.

Repeatable.

Prereq: Instructor Permission for Course

Global resource systems topics will include the agricultural industries, climate, crops, culture, economics, food, geography, government, history, livestock, marketing, natural resources, public policies, soils, and preparation for travel to locations to be visited. Students enrolled in this course intend to register for GLOBE 4940A, 4960 or 4970 the following term. (Typically Offered: Fall, Spring)

GLOBE 4960: Global Resource Systems Study Abroad

Credits: 2-4. Repeatable.

Prereq: Instructor Permission for Course

Extended field trips abroad to study global resource systems. Location and duration of trips will vary. Pre-trip sessions arranged through GLOBE 4950. Trip expenses paid by student. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

GLOBE 4960B: Global Resource Systems Domestic Travel Study

Credits: 1-4. Repeatable, maximum of 4 times.

Prereq: Instructor Permission for Course

Limited enrollment. Extended domestic field trips to study global resource systems topics. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by student. (Typically Offered: Fall, Spring, Summer)

GLOBE 4970: Deans Global Ag and Food Leadership Program

Credits: 1-4. Repeatable.

Prereq: 2 credits of GLOBE 4950; Permission of Instructor

An integrated agricultural and food production and policy program that allows students to assess, analyze and evaluate complex, country-specific situations and to develop their skills, knowledge and abilities via team-oriented projects that involve complex issues such as development of effective foreign food aid and agricultural and food production systems, drivers of world hunger, sustainable resource management and efficacy of policy, and the role of the USA and the United Nations and other development agencies in these systems. International location and duration of program will vary. Pre-trip sessions arranged through GLOBE 4950. Trip expenses paid by students. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

GLOBE 4990: Undergraduate Research

Credits: 1-30.

Prereq: Instructor Permission for Course

Research projects in collaboration with faculty. (Typically Offered: Fall, Spring, Summer)

Graduate Studies (GRST)

Graduate students may enroll in Graduate Studies (GRST) courses for professional development or to fulfill certain enrollment requirements. No major is granted in Graduate Studies.

Courses primarily for graduate students, open to qualified undergraduates:

GRST 5000T: Graduate Transfer Credit

Credits: 0-99. Contact Hours: Lecture 0.
Repeatable.

GRST 5310X: Thriving in Graduate School

Credits: 1. Contact Hours: Lecture 1.

Part one of a four-part series of courses in the Center for Communication Excellence's (CCE's) Academic Communication Practices (AcComP) Certification Track. Focus on identifying and overcoming challenges associated with the transition to graduate school. Orientation to Graduate College standards, resources, and requirements. Determining goals for graduate education. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

GRST 5320X: Mapping Graduate School Trajectory

Credits: 1. Contact Hours: Lecture 1.

Part two of a four-part series of courses in the Center for Communication Excellence's (CCE's) Academic Communication Practices (AcComP) Certification Track. Focus on planning for empirical research and responsible research standards. Utilizing Graduate College, CCE, and university resources to succeed in graduate school. Orientation to creative component/thesis/dissertation expectations and guidelines. Identifying strategies to achieving goals in graduate education. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

GRST 5330X: Sustaining Productivity through Accountability in Graduate School

Credits: 1. Contact Hours: Lecture 1.

Part three of a four-part series of courses in the Center for Communication Excellence's (CCE's) Academic Communication Practices (AcComP) Certification Track. Focus on reporting and disseminating research findings, maintaining accountability, and producing high quality communication. Preparation for creative component/thesis/dissertation phase and meeting of Graduate College requirements. Executing strategies to achieving goals in graduate education. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

GRST 5340X: Attaining Success in Graduate School

Credits: 1. Contact Hours: Lecture 1.

Part four of a four-part series of courses in the Center for Communication Excellence's (CCE's) Academic Communication Practices (AcComP) Certification Track. Focus on preparing creative component/thesis/dissertation and readying for the job market. Preparation for final oral exam phase and meeting the graduation requirements. Achieving goals in graduate education. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

GRST 5360: Preparing Publishable Thesis Chapters

(Cross-listed with ENGL 5360).

Credits: 3. Contact Hours: Lecture 3.

Reporting original research results within the norms for writing of a student's discipline. Emphasis on preparing thesis/dissertation chapters that will be both acceptable to the Graduate College and ready for submission to a refereed journal in the student's discipline. Focus on reporting results from student-generated original research, norms for discourse within disciplines, and how thesis chapters differ from journal manuscripts. (Typically Offered: Fall, Spring)

GRST 5400A: English for Teaching Purposes (Intermediate-Low)

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 credits.

Emphasis on pronunciation improvement and greater fluency in spoken English. Placement based upon OECT test results. Persons whose native language is English cannot take GRST 5400 for credit. No more than one section of GRST 5400 may be taken per semester; up to two sections total. Graduation Restriction: Credit for GRST 5400 does not apply toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

GRST 5400B: English for Teaching Purposes (Intermediate-Mid)

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 credits.

Placement based upon OECT test results. Persons whose native language is English cannot take GRST 5400 for credit. No more than one section of GRST 5400 may be taken per semester; up to two sections total. Graduation Restriction: Credit for GRST 5400 does not apply toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

GRST 5400C: English for Teaching Purposes (Intermediate-High)

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 credits.

For students who have completed GRST 5400A or GRST 5400B but have not reached the passing level on the OECT test. Placement based upon OECT test results. Persons whose native language is English cannot take GRST 5400 for credit. No more than one section of GRST 5400 may be taken per semester; up to two sections total. Graduation Restriction: Credit for GRST 5400 does not apply toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

GRST 5400D: English for Teaching Purposes (Advanced)

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 credits.

Developing explanations, leading discussions and handling questions in a teaching environment. Placement based upon OECT test results. Persons whose native language is English cannot take GRST 5400 for credit. No more than one section of GRST 5400 may be taken per semester; up to two sections total. Graduation Restriction: Credit for GRST 5400 does not apply toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

GRST 5400E: English for Teaching Purposes (Supervised Independent Study)

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 1 credits.

Seminar with individual observation and consultation. Placement based upon OECT test results. Persons whose native language is English cannot take GRST 5400 for credit. No more than one section of GRST 5400 may be taken per semester; up to two sections total. Graduation Restriction: Credit for GRST 5400 does not apply toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

GRST 5480X: Improving academic and professional speaking skills

Credits: 2. Contact Hours: Lecture 2.

Skill building to improve oral presentation fundamentals for graduate students in any discipline. Principles and guidance in both personal speaking style and maximizing impact of presentation software. In-depth lectures and class discussions on all aspects of presentation skills. Video and anonymous peer review of individual speeches. (Typically Offered: Spring)

GRST 5650: Responsible Conduct of Research in Science and Engineering

Credits: 1. Contact Hours: Lecture 1.

Ethical and legal issues facing researchers in the sciences and engineering. (Typically Offered: Fall, Spring)

GRST 5660: Communications in Science

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 8 credits.

Focus on enhancing professional communication skills to convey scientific knowledge and discoveries to broader audiences. Emphasis on developing best practices for communicating science to a wide range of specialist and non-specialist audiences including disciplinary researchers, interdisciplinary scholars, industry professionals, governmental bodies, media representatives, and the general public. (Typically Offered: Fall)

GRST 5670: Time Management and Mentoring

Credits: 0.5. Contact Hours: Lecture 0.5.

Balancing life and career; mentoring; lab management. (Typically Offered: Fall, Spring, Summer)

GRST 5680: The Interview Process

Credits: 0.5. Contact Hours: Lecture 0.5.

Applying and interviewing for academia, industry and government. (Typically Offered: Fall, Spring, Summer)

GRST 5690: Grant Writing

(Cross-listed with ENGL 5690).

Credits: 1. Contact Hours: Lecture 1.

Writing a winning proposal. (Typically Offered: Spring)

GRST 5700: Teaching Practices

Credits: 0.5. Contact Hours: Lecture 0.5.

Preparation of a teaching portfolio and course materials; lecturing, technology. (Typically Offered: Fall, Spring, Summer)

GRST 5850: Preparing Future Faculty Introductory Seminar

Credits: 2. Contact Hours: Lecture 2.

Prereq: Instructor permission and admission into the Preparing Future Faculty Program

Development of job application materials for faculty positions. Considerations of faculty life issues such as job searches, tenure expectations, position responsibilities, and work-life balance. Visiting speakers from a variety of institutions share their experiences. Written components include presentation reflections and preparation of an application-ready academic job packet. (Typically Offered: Fall)

GRST 5860: Preparing Future Faculty Intermediate Seminar

Credits: 0-3. Contact Hours: Lecture 3.

Development of additional job application materials for faculty positions and a working knowledge of a variety of other faculty skills to successfully navigate the first years on the job: inclusive classroom, ethics, public speaking, career management, and teaching skills from course design to delivery and assessment. (Typically Offered: Spring)

GRST 5870: Preparing Future Faculty Teaching Practicum

Credits: 1-3. Repeatable.

Prereq: GRST 5850, credit or enrollment in GRST 5860, instructor permission

Participants complete a stand-alone teaching experience at Iowa State or another institution of higher education. Written components include journaling, peer observation, reading reflection, and a teaching portfolio suitable for the academic job search process. (Typically Offered: Fall, Spring)

GRST 5880: Preparing Future Faculty Special Topics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

In-depth study of topic providing further academic professional development. Written components include journaling, project management, a project report, and a reading reflection. (Typically Offered: Fall, Spring)

Courses for graduate students:

GRST 6800: Doctoral Post Prelim (Continuous) Registration

Credits: Required. Repeatable.

Reserved for doctoral students on pre-approved leave (medical, military, maternity, family/emergency) who have passed the preliminary exam and have not yet taken the final exam. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

GRST 6810A: Required Registration: Doctoral Continuous Registration

Credits: 1. Repeatable, maximum of 6 times.

Course is available for students pursuing doctoral degrees who have passed their preliminary oral examination. Continuous enrollment is required for PhD students during fall and spring semesters between the preliminary oral exam and their final oral examination. Graduation Restriction: This course cannot be used toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

GRST 6810B: Required Registration: Final Exam Only

Credits: 1. Repeatable.

Course is available for students who are ready to have their Final Oral Examination. Enrollment is required for students during the semester of their final oral examination. Late registration of this course requires that the Request for Final Oral Examination has been submitted. Graduation Restriction: This course cannot be used toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

GRST 6810C: Required Registration: Graduate Assistant Enrollment

Credits: 1. Repeatable.

Offered on a satisfactory-fail basis only.

GRST 6970: Curricular Practical Training

Credits: Required. Repeatable.

Professional work period. (Typically Offered: Fall, Spring, Summer)

GRST 6980: Graduate Internship: Part-Time CPT

Credits: Required.

Internship course for graduate students completing part-time internship. Internship is fewer than 20 hours per week or fewer than 90 days. International students must have approved part-time CPT prior to the semester of enrollment. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Graphic Design (ARTGR)

Courses primarily for undergraduates:

ARTGR 2700: Graphic Design Studio I

Credits: 3. Contact Hours: Studio 6.

Prereq: Enrollment in ARTGR major; DSNS 1020; DSNS 1310

Introduction to the fundamental skills required in the graphic design profession. (Typically Offered: Fall)

ARTGR 2710: Graphic Design Studio II

Credits: 3. Contact Hours: Studio 6.

Prereq: Enrollment in ARTGR major; ARTGR 2700

Reinforces and further explores the fundamental skills, principles, and tools required for effective visual communication. (Typically Offered: Spring)

ARTGR 2720: Digital Photography for Graphic Design

Credits: 3. Contact Hours: Studio 6.

Prereq: Enrollment in ARTGR major; concurrent enrollment in ARTGR 2700 or ARTGR 2710

This course will address the development of 'seeing' as a medium design, expression, and visual communication including compositional dynamics, advanced digital image manipulation, software usage and support, digital camera operations along with scanning and other digital input devices, color management, digital format for presentation and printing with digital ready formats. (Typically Offered: Fall, Spring)

ARTGR 2730: Typography I

Credits: 3. Contact Hours: Studio 6.

Prereq: Concurrent enrollment in ARTGR 2700

Emphasizes foundational typographic principles from letterform construction to hierarchies of extended text, directed toward typographic vocabulary, and typographic organization. Students will also understand both classical and contemporary typographic forms, as well as having the ability to construct typographic compositions and systems. (Typically Offered: Fall)

ARTGR 2740: Typography II

Credits: 3. Contact Hours: Studio 6.

Prereq: Enrollment in ARTGR major; concurrent enrollment in ARTGR 2710

Advances the skills and principles learned in Graphic Design Typography I. Exploration of more complex problems that address typographic hierarchy, context, sequence and typography and image. (Typically Offered: Spring)

ARTGR 2750: Graphic Technology I

Credits: 3. Contact Hours: Studio 6.

Prereq: ARTGR Major

Basic 2-dimensional computer skills for graphic design.

ARTGR 2760: Graphic Technology II

Credits: 3. Contact Hours: Studio 6.

Prereq: ARTGR Major

Basic 3-dimensional computer skills for graphic design. (Typically Offered: Spring)

ARTGR 2810: Visual Communication and Branding

Credits: 3. Contact Hours: Lecture 3.

Prereq: ARTGR Major

Introduction to basic principles of visual communication that contribute to the successful comprehension of intended visual messages; these include promotional messages, such as corporate branding and marketing campaigns, as well as informational messages, such as those used in computer interface design or in the clear presentation of diagrammatic data. Emphasis is placed on sensitivity to the diversity of the intended American or global audience, and to the cross-cultural differences that may affect the ways that visual messages are interpreted. Methods for creating brand experiences are explored as they apply to both small and large enterprises, ranging from personal brand to corporate brand identities. (Typically Offered: Fall)

ARTGR 3700: Graphic Design Studio III

Credits: 3. Contact Hours: Studio 6.

Prereq: Enrollment in ARTGR major; ARTGR 2710; ARTGR 2760 or concurrent enrollment in ARTGR 3870

Creation and design of images and symbols for communication. Application and integration of typography with images and symbols. (Typically Offered: Fall)

ARTGR 3710: Graphic Design Studio IV

Credits: 3. Contact Hours: Studio 6.

Prereq: ARTGR 3700 and ARTGR 3870

Development and preparation of design concepts for application to the printing and electronic publishing process. Creative problem-solving skills, introduction to systems design. (Typically Offered: Spring)

ARTGR 3720: Graphic Materials and Processes

Credits: 3. Contact Hours: Lecture 3.

Prereq: Enrollment in ARTGR major; Junior classification or above

Introduction to the processes and materials involved in graphic design production. Course covers production ranging from pre-press to digital media.

ARTGR 3770: Graphic Design Internship Seminar

Credits: 1. Contact Hours: Lecture 1.

Prereq: Enrollment in ARTGR major; Junior classification or above
Professional preparation for graphic design internship.

ARTGR 3780: Critical Issues in Graphic Design

Credits: 2. Contact Hours: Lecture 2.

Prereq: Enrollment in ARTGR major; credit or concurrent enrollment in ARTGR 3700

Lecture, discussion and writing about the critical issues facing the communications field today and in the future.

ARTGR 3830: A Concise History of Graphics and Sports

Credits: 3. Contact Hours: Lecture 3.

Prereq: ARTGR Major

This introduction to basic concepts of branding in design explores the processes of sports, graphics of sports, design criteria of sport objects, consumer trends, and social importance of sports will be discussed. This course takes a historical perspective of sport graphics and objects starting at the first known understanding of what could be considered 'Sport,' from ancient times to the present. Interpretation of sport graphics and sport objects. Measuring the sports impact and associated graphics with emotions; sounds that date the sport or strengthen our memories of them, photographs of objects and people from different periods, images of industrial, sport, agrarian and city landscapes to remind us of the dominant role played by sport/graphics or that sport object in the country of its origin. (Typically Offered: Spring)

ARTGR 3870: Graphic Design History/Theory/ Criticism I

(Dual-listed with ARTGR 5870).

Credits: 3. Contact Hours: Lecture 3.

Late nineteenth century to the 1990s. This course will explore the cultural, social, political, industrial, and technological forces that have influenced the practice of graphic design in Britain, Europe, and the United States. Students will study the historical issues and problems facing designers, their clients, and their publics. Meets International Perspectives Requirement. (Typically Offered: Fall)

ARTGR 3880: Graphic Design History/Theory/ Criticism II

(Dual-listed with ARTGR 5880).

Credits: 3. Contact Hours: Lecture 3.

Critical issues that affect the contemporary practice of graphic design as it relates to the United States. Students will study a variety of issues that include, but are not exclusive to, new media, gender, class, design and the public sphere, design as social action, postmodern design theory, sustainability, and ethical practice. Meets U.S. Diversity Requirement. (Typically Offered: Spring)

ARTGR 3910: Graphic Design Field Study

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 2 credits.

Prereq: Enrollment in ARTGR major; Junior classification or above

Travel, study, and tours of areas of interest within the graphic design profession such as print production companies, design studios, and museums. Offered on a satisfactory-fail basis only.

ARTGR 4630: 3D Motion Graphics

(Dual-listed with ARTGR 5630).

Credits: 3. Contact Hours: Studio 6.

Prereq: Enrollment in ARTGR major; Junior classification or above

3D visualization in a Motion Graphics context. Emphasis on design in 3D computer animation as it relates to various electronic media. (Typically Offered: Spring)

ARTGR 4640: Digital Imaging

(Dual-listed with ARTGR 5640).

Credits: 3. Contact Hours: Studio 6.

Prereq: Enrollment in ARTGR major; Junior classification or above

Studio in experimental techniques using the digital drawing tablet combined with manual drawing mediums, exploring the digital tablet, scanner, and camera as ways to collect and make images, conceptual and compositional development of digital techniques and software, and connecting digital techniques to visual processes and ideation. Understanding of different ways of working digitally while exploring image-making processes.

ARTGR 4700: Graphic Design Studio V

Credits: 3. Contact Hours: Studio 6.

Prereq: Enrollment in ARTGR major; ARTGR 3710

Advanced design systems as applied to corporate identity and environmental graphic design. Symbolology as an integrated component of communication systems. (Typically Offered: Fall)

ARTGR 4710: Graphic Design Capstone

Credits: 3. Contact Hours: Studio 6.

Prereq: Enrollment in ARTGR major; ARTGR 4700 or Permission of Instructor

Experience design and innovation in a multi-disciplinary design studio. Class will use unique research, design, evaluation, creativity, and innovation methodologies to solve human problems on special topics. Designed solutions will be in the form of products, artifacts, interfaces, information, and human environments. (Typically Offered: Spring)

ARTGR 4720: Photography and Narrative Messaging

(Dual-listed with ARTGR 5720).

Credits: 3. Contact Hours: Studio 6.

Prereq: Enrollment in ARTGR major; Junior classification or above

Photography as a tool for creating conceptually-driven images and metaphors. Emphasis is on photography as an evocative storytelling device for a range of audiences and design applications. Compositional and technical aspects are explored to ensure successful interpretation of the photograph's intended message.

ARTGR 4730: Multimedia Design

(Dual-listed with ARTGR 5730).

Credits: 3. Contact Hours: Laboratory 6.

Prereq: Junior, Senior or Graduate classification and in the graphic design program

The design of visual, aural and textual communication for electronic media.

ARTGR 4740: Exhibition Design

(Dual-listed with ARTGR 5740).

Credits: 3. Contact Hours: Studio 6.

Prereq: Junior, Senior or Graduate classification and in the graphic design program

Exhibition Design.

ARTGR 4750: Advanced Typography

(Dual-listed with ARTGR 5750).

Credits: 3. Contact Hours: Studio 6.

Prereq: Junior, Senior or Graduate classification and in the graphic design program

Typographic theory exploring traditional and non-traditional forms, both historical and contemporary typographic achievements.

ARTGR 4760: Graphic Design Methodology

(Dual-listed with ARTGR 5760).

Credits: 3. Contact Hours: Studio 6.

Prereq: Junior, Senior or Graduate classification and in the graphic design program

Analysis and application of scientific, systematic, and non-traditional problem-solving and problem-seeking techniques.

ARTGR 4770: Graphic Design Practicum

Credits: 3. Contact Hours: Studio 6.

Prereq: Enrollment in ARTGR major; concurrent enrollment in ARTGR 3700, ARTGR 3710, or ARTGR 4700

Graphic design outreach and problem solving. Individual and group projects for non-profit clients selected by the instructor.

ARTGR 4780: Graphic Design Advanced Web Design

(Dual-listed with ARTGR 5780).

Credits: 3. Contact Hours: Laboratory 6.

Prereq: Junior, Senior or Graduate classification and in the graphic design program

The development of advanced and experimental web design.

ARTGR 4790: Wayfinding Design

(Dual-listed with ARTGR 5790).

Credits: 3. Contact Hours: Studio 6.

Prereq: Junior, Senior or Graduate classification and in the graphic design program

Study of the navigational challenges of built environments and outdoor spaces, including site analysis, development of navigational plans, and design of wayfinding sign systems. Issues of function, accessibility, legibility, and fabrication are considered.

ARTGR 4800: Graphic Design Internship

Credits: 3.

Prereq: Enrollment in ARTGR major; Junior classification or above

Graphic design experience in an off-campus professional environment. (Typically Offered: Summer)

ARTGR 4810: Graphic Design Professional Practices

Credits: 3. Contact Hours: Lecture 3.

Prereq: Enrollment in ARTGR major; ARTGR 4700 or Permission of Instructor

Professional design management: ethics, setting up a new business, client/designer relationships, contractual options, billing practices, and effective operating procedures. (Typically Offered: Spring)

ARTGR 4820: Professional Presentation

Credits: 3.

Prereq: Enrollment in ARTGR major; Junior classification or above

Exploration and development of job application materials and presentation skills.

ARTGR 4830: Science + Design: Interpretation of Natural Resources in Montana

(Cross-listed with NREM 4830).

Credits: 3. Contact Hours: Lecture 1, Studio 4.

Prereq: Enrollment in ARTGR major; ARTGR 2710 or BIOL 2110; Permission of Instructor.

Interdisciplinary service-learning. Design and production of natural resource related interpretive signs for Montana natural areas. Field-work experience followed by on-campus studio. (Typically Offered: Fall)

ARTGR 4840: Selected Studies in Graphic Design

(Dual-listed with ARTGR 5840).

Credits: 1-3. Contact Hours: Studio 6.

Repeatable, maximum of 12 credits.

Prereq: Junior, Senior or Graduate classification and in the graphic design program

Special issues related to graphic design. Topics vary each time offered. Topics not to be repeated. Graduation Restriction: Topics may not be repeated. (Typically Offered: Fall, Spring, Summer)

ARTGR 4890: Design Ethics

Credits: 3. Contact Hours: Lecture 3.

Prereq: Enrollment in ARTGR major; Junior classification or above

Historical and contemporary issues in ethics and decision-making related to visual arts, related visual communication, and design disciplines, including education/training, professional practice and research, the social role of design, and the implications and consequences of designed artifacts and systems.

ARTGR 4900A: Independent Study: Theory, Criticism, and Methodology

Credits: 1-6. Repeatable.

Prereq: Enrollment in ARTGR major; Permission of Instructor

Student must have completed related graphic design coursework appropriate to planned independent study. (Typically Offered: Fall, Spring, Summer)

ARTGR 4900B: Independent Study: Two-Dimensional Design

Credits: 1-6. Repeatable.

Prereq: Enrollment in ARTGR major; Permission of Instructor

Student must have completed related graphic design coursework appropriate to planned independent study. (Typically Offered: Fall, Spring, Summer)

ARTGR 4900C: Independent Study: Three-Dimensional Design

Credits: 1-6. Repeatable.

Prereq: Enrollment in ARTGR major; Permission of Instructor

Student must have completed related graphic design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis. (Typically Offered: Fall, Spring, Summer)

ARTGR 4900H: Independent Study: Honors

Credits: 1-6. Repeatable.

Prereq: Enrollment in ARTGR major; Permission of Instructor

Student must have completed related graphic design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis. (Typically Offered: Fall, Spring, Summer)

ARTGR 4900I: Internship/Cooperative (In-Depth Experience Other Than ARTGR 4800)

Credits: 1-6. Repeatable.

Prereq: Enrollment in ARTGR major; Permission of Instructor

Student must have completed related graphic design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis. (Typically Offered: Fall, Spring, Summer)

ARTGR 4910: Publication Design

(Dual-listed with ARTGR 5910).

Credits: 3.

Prereq: Junior, Senior or Graduate classification and in the graphic design program

The philosophy, concepts, and structures of publication design.

ARTGR 4920: Graphic Design Systems Thinking

(Dual-listed with ARTGR 5920).

Credits: 3. Contact Hours: Studio 6.

Prereq: Junior, Senior or Graduate classification and in the graphic design program

The philosophy, concepts, and structures of systems thinking in graphic design.

ARTGR 4930: Workshop

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Prereq: Enrollment in ARTGR major; Junior classification or above

Intensive 2 to 4 week studio exploration. Topics vary each time offered.

ARTGR 4950: Graphic Design Abroad

(Dual-listed with ARTGR 5950).

Credits: 3.

Prereq: Enrollment in ARTGR major; Permission of Instructor

International study abroad program with visits to design studios, art museums, and educational facilities. (Typically Offered: Summer)

ARTGR 4960: Graphic Design Semester Abroad

Credits: Required. Repeatable.

Prereq: Enrollment in ARTGR major; Junior classification or above

Study and tours of museums, galleries, artist and/or designer studios, and other areas of interest within art and design. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ARTGR 4970: Graphic Design Field Study

Credits: 1. Repeatable.

Prereq: Enrollment in ARTGR major; Junior classification or above

Introduction to places related to graphic design in urban environments such as museums and design studios. Culture and context of design in the urban environment. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

ARTGR 5100: Graphic Design Theory

Credits: 3. Contact Hours: Lecture 3.

This course will investigate graphic design as a tool to represent and create imageability in the mind of the audience, through relevant readings in graphic design theory and principles of visual organization in various media. (Typically Offered: Fall)

ARTGR 5110: Graphic Design Graduate Studio I

Credits: 3. Contact Hours: Studio 6.

Introduction to a range of research topics, methods, and ideas that are predicated on learning through the process of creation. (Typically Offered: Fall)

ARTGR 5120: Audience and Perception

Credits: 3. Contact Hours: Studio 6.

Theory and investigation of systems, structures, principles of visual organization for communication through the experimental application of traditional and non-traditional media. Studio problems will be influenced by social, cultural, environmental, or technological factors. (Typically Offered: Fall)

ARTGR 5200: Design & Cultural Semiotics

Credits: 3. Contact Hours: Lecture 3.

Introduction to semiotics as it relates to art, design and culture. Historical and contemporary vantage points and the importance of designers as makers of meaning. Key concepts of semiotics and the interrelationship between message, meaning, design and culture. (Typically Offered: Spring)

ARTGR 5210: Graphic Design Graduate Studio II

Credits: 3. Contact Hours: Studio 6.

In this advanced graduate graphic design studio led by a variety of faculty, students will be introduced to a range of research topics, methods and ideas that are predicated on learning through the process of creation. (Typically Offered: Spring)

ARTGR 5220: Critical Media

Credits: 3. Contact Hours: Studio 6.

Advanced theory and investigation of critical media and application of principles of visual organization for communication. Through hypothetical design work with critical media tools, studio problems will examine and be informed by social, cultural, environmental, or technological factors. (Typically Offered: Spring)

ARTGR 5300: User Engagement

Credits: 3. Contact Hours: Studio 6.

The exploration and design of interface/interaction with products, systems, and technologies.

ARTGR 5310: Graphic Design Graduate Project Preparation

Credits: 1. Contact Hours: Lecture 1.

Exploration, formulation, and structuring of graduate thesis/creative component topics, investigation of design research and creative scholarship. (Typically Offered: Fall)

ARTGR 5400: Design for Behavioral Change

Credits: 3. Contact Hours: Studio 6.

The exploration and design of educational experiences and artifacts as they relate to the social, emotional, and behavioral aspects of society.

ARTGR 5630: 3D Motion Graphics

(Dual-listed with ARTGR 4630).

Credits: 3. Contact Hours: Studio 6.

3D visualization in a Motion Graphics context. Emphasis on design in 3D computer animation as it relates to various electronic media. (Typically Offered: Spring)

ARTGR 5640: Digital Imaging

(Dual-listed with ARTGR 4640).

Credits: 3. Contact Hours: Studio 6.

Studio in experimental techniques using the digital drawing tablet combined with manual drawing mediums, exploring the digital tablet, scanner, and camera as ways to collect and make images, conceptual and compositional development of digital techniques and software, and connecting digital techniques to visual processes and ideation. Understanding of different ways of working digitally while exploring image-making processes.

ARTGR 5720: Photography and Narrative Messaging

(Dual-listed with ARTGR 4720).

Credits: 3. Contact Hours: Laboratory 6.

Photography as a tool for creating conceptually-driven images and metaphors. Emphasis is on photography as an evocative storytelling device for a range of audiences and design applications. Compositional and technical aspects are explored to ensure successful interpretation of the photograph's intended message.

ARTGR 5730: Multimedia Design

(Dual-listed with ARTGR 4730).

Credits: 3. Contact Hours: Laboratory 6.

The design of visual, aural and textual communication for electronic media.

ARTGR 5740: Exhibition Design

(Dual-listed with ARTGR 4740).

Credits: 3. Contact Hours: Studio 6.

Visual communication applied to exhibition design focusing on educational or interactive museum exhibitions, trade show booth design, and modular unit design for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ARTGR 5750: Advanced Typography

(Dual-listed with ARTGR 4750).

Credits: 3. Contact Hours: Studio 6.

Typographic theory exploring traditional and non-traditional forms, both historical and contemporary typographic achievements.

ARTGR 5760: Graphic Design Methodology

(Dual-listed with ARTGR 4760).

Credits: 3. Contact Hours: Studio 6.

Analysis and application of scientific, systematic, and non-traditional problem-solving and problem-seeking techniques.

ARTGR 5780: Graphic Design Advanced Web Design

(Dual-listed with ARTGR 4780).

Credits: 3. Contact Hours: Laboratory 6.

The development of advanced and experimental web design.

ARTGR 5790: Wayfinding Design

(Dual-listed with ARTGR 4790).

Credits: 3. Contact Hours: Studio 6.

Study of the navigational challenges of built environments and outdoor spaces, including site analysis, development of navigational plans, and design of wayfinding sign systems. Issues of function, accessibility, legibility, and fabrication are considered.

ARTGR 5830: Science + Design: Interpretation of Natural Resources in Montana

(Cross-listed with NREM 5830).

Credits: 3. Contact Hours: Lecture 1, Studio 4.

Interdisciplinary service-learning. Design and production of natural resource related interpretive signs for Montana natural areas. Field-work experience followed by on-campus studio. (Typically Offered: Fall)

ARTGR 5840: Selected Studies in Graphic Design

(Dual-listed with ARTGR 4840).

Credits: 1-3. Contact Hours: Studio 6.

Repeatable, maximum of 12 credits.

Special issues related to graphic design. Topics vary each time offered.

Topics not to be repeated. Graduation Restriction: Topics may not be repeated. (Typically Offered: Fall, Spring, Summer)

ARTGR 5870: Graphic Design History/Theory/ Criticism I

(Dual-listed with ARTGR 3870).

Credits: 3. Contact Hours: Lecture 3.

Late nineteenth century to the 1990s. This course will explore the cultural, social, political, industrial, and technological forces that have influenced the practice of graphic design in Britain, Europe, and the United States. Students will study the historical issues and problems facing designers, their clients, and their publics. Meets International Perspectives Requirement. (Typically Offered: Fall)

ARTGR 5880: Graphic Design History/Theory/ Criticism II

(Dual-listed with ARTGR 3880).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Graduate enrollment in the Graphic Design Program or graduate enrollment in College of Design or permission of instructor

Critical issues that affect the contemporary practice of graphic design as it relates to the United States. Students will study a variety of issues that include, but are not exclusive to, new media, gender, class, design and the public sphere, design as social action, postmodern design theory, sustainability, and ethical practice. Meets U.S. Diversity Requirement. (Typically Offered: Spring)

ARTGR 5890: Design and Ethics

(Cross-listed with HCI 5890).

Credits: 3. Contact Hours: Lecture 3.

Issues in ethics and decision-making as they relate to technology, design, design research, HCI, and the design industry. (Typically Offered: Fall, Spring)

ARTGR 5900A: Special Topics: Theory, Criticism, and Methodology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTGR 5900B: Special Topics: Two-Dimensional Design

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Written approval of instructor and department chair on required form in advance of semester of enrollment. (Typically Offered: Fall, Spring, Summer)

ARTGR 5900C: Special Topics: Three-Dimensional Design

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Written approval of instructor and department chair on required form in advance of semester of enrollment. (Typically Offered: Fall, Spring, Summer)

ARTGR 5910: Publication Design

(Dual-listed with ARTGR 4910).

Credits: 3.

The philosophy, concepts, and structures of publication design.

ARTGR 5920: Graphic Design Systems Thinking

(Dual-listed with ARTGR 4920).

Credits: 3. Contact Hours: Studio 6.

The philosophy, concepts, and structures of systems thinking in graphic design.

ARTGR 5930: Workshop

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Intensive 2 to 4 week studio exploration. Topics vary each time offered.

ARTGR 5950: Graphic Design Abroad

(Dual-listed with ARTGR 4950).

Credits: 3.

International study abroad program with visits to design studios, art museums, and educational facilities. (Typically Offered: Summer)

ARTGR 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**ARTGR 6100: Thesis Preparation Studio**

Credits: 3. Contact Hours: Studio 6.

Initial development and exploration of graduate thesis topic, investigation of design research and creative scholarship. Determine Faculty Committee and Program of Study and file forms with Graduate College. (Typically Offered: Spring)

ARTGR 6200: Graduate Thesis Studio I

Credits: 3. Contact Hours: Laboratory 6.

Advanced creative scholarship in specialized area of focus within graphic design. Culminates in a development plan, preliminary design work, and supporting documentation. (Typically Offered: Fall)

ARTGR 6300: Graduate Thesis Studio II

Credits: 3. Contact Hours: Studio 6.

Advanced research component in specialized area of focus within graphic design. Advances a development plan, preliminary design work, and supporting documentation. (Typically Offered: Spring)

ARTGR 6900: Advanced Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

ARTGR 6990: Research-Thesis

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Health Studies (HS)

Courses primarily for undergraduates:**HS 1050: First Aid and Emergency Care**

Credits: 2.

Discussion and application of the basic techniques of utilizing bloodborne pathogen safety measures, administering first aid and cardiopulmonary resuscitation. ARC layperson certification available. (Typically Offered: Fall, Spring, Summer)

HS 1100: Personal and Consumer Health

Credits: 3. Contact Hours: Lecture 3.

Physical, mental, emotional and social aspects of health as a basis for understanding and promoting health, and preventing poor health conditions. Study of personal responsibility on the long-term benefits of maintaining a high level of wellness and health. Identification and mitigation of negative lifestyle habits. (Typically Offered: Fall, Spring)

HS 1670X: The Science of Health Behavior Change

Credits: 3. Contact Hours: Lecture 3.

A theory- and evidence-based approach to the understanding of health behavior change. Practical approaches to promote introspection, increase self-awareness, motivation, confidence, and alignment between lifestyle and personal values. Meets U.S. Diversity Requirement. (Typically Offered: Summer)

HS 2750: Health Education in the Elementary School

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 1020 or HDFS 2260

The application of instructional strategies related to health education and physical education for teachers at the elementary level. Graduation Restriction: Credit for both HS 2750 and 3750 may not be applied toward graduation. (Typically Offered: Fall, Spring)

HS 2850: Pre-Internship in Kinesiology and Health

(Cross-listed with KIN 2850).

Credits: 1-2.

Prereq: Kinesiology and Health major; credit or concurrent enrollment in KIN 2580; Permission of Internship Coordinator

Pre-internship experience with a health organization based on option.

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

HS 2900: Independent Study

Credits: 1. Repeatable, maximum of 3 credits.

Prereq: 2nd semester Freshmen or Sophomore classification; Permission of Instructor

Study under supervision of faculty. (Typically Offered: Fall, Spring)

HS 3050: Instructor's First Aid and Cardiopulmonary Resuscitation

Credits: 2.

Prereq: HS 1050

Discussion and practice of skills needed to teach CPR, AED, and first aid content related to the American Red Cross curriculum. Instructor candidates must possess valid certification for adult and pediatric CPR/AED/First Aid at beginning of course. (Typically Offered: Fall, Spring)

HS 3100: Community and Public Health

Credits: 3. Contact Hours: Lecture 3.

Prereq: HS 1100

Introduction to community health problems, programs of prevention, environmental health agencies, and health services. Study of local, state, and national community health agencies, their purposes and functions. (Typically Offered: Fall, Spring)

HS 3500: Human Diseases

Credits: 3. Contact Hours: Lecture 3.

Prereq: HS 1100 and BIOL 2550, BIOL 2560

Discussion of disease process and ill-health in the twentieth century. Emphasis on epidemiology, prevention, treatment, and the understanding of the etiology of communicable and noncommunicable diseases. (Typically Offered: Fall, Spring, Summer)

HS 3750: Teaching-Learning Process in Health Education

Credits: 3. Contact Hours: Lecture 3.

Prereq: HS 1050; HS 1100

Principles, methods, materials, and resources involved in the teaching of health. Includes organization and development of the health education curriculum (K-12). Graduation Restriction: Credit for both HS 2750 and 3750 may not be applied toward graduation. (Typically Offered: Fall)

HS 3800: Worksite Health Promotion

Credits: 3. Contact Hours: Lecture 3.

Prereq: KIN 2580

The design and implementation of worksite health promotion programs and the benefits these programs have for both employees and employers. Review of various health risk appraisals and planning theory-based incentive programs designed to promote positive lifestyles. (Typically Offered: Fall, Spring)

HS 3850: Preparation and Search Strategies for Kinesiology and Health Internships

(Cross-listed with KIN 3850).

Credits: Required. Contact Hours: Lecture 0.5.

Prereq: Junior classification

Preparation of relevant material for a successful internship/career search. Specific internship timeline, process, procedures will be reviewed. Course needs to be taken a minimum of two semesters prior to required internship. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

HS 4170A: Supervised Teaching in Health Education in the Secondary School: Initial Endorsement

Credits: 16.

Prereq: HS 3750

Students must be fully admitted to Teacher Education and must apply for approval to enroll at the beginning of the semester prior to registering. (Typically Offered: Fall, Spring)

HS 4170B: Supervised Teaching in Health Education in the Secondary School: Additional Endorsement

Credits: 1-30.

Prereq: HS 3750

Students must be fully admitted to Teacher Education and must apply for approval to enroll at the beginning of the semester prior to registering. (Typically Offered: Fall, Spring)

HS 4300: Community Health Program Development

Credits: 3. Contact Hours: Lecture 3.

Techniques of needs assessment, program design, administration, and evaluation of community health education programs in various settings. (Typically Offered: Fall)

HS 4640: Physical Activity Epidemiology

Credits: 3. Contact Hours: Lecture 3.

Prereq: (HS 3500 or KIN 3580); (STAT 1010 or STAT 1040 or STAT 2260)

Understanding health benefits of physical activity on chronic disease prevention and health promotion throughout the life span, from clinical and public health perspectives. Discussion and application of real-life physical activity assessment, research, guidelines, and promotion in population levels. (Typically Offered: Fall, Spring)

HS 4850: Internship in Health Studies

Credits: 8-12.

Prereq: Senior classification; Permission of Internship Coordinator

Advance registration required. Supervised experience in health related agencies. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

HS 4850A: Internship in Health Studies: Community and Public Health

Credits: 8-12.

Prereq: KIN major; C- or better in (KIN 3580; KIN 3590; KIN 3660; HS 3100; HS 3500; HS 4300); Cumulative GPA 2.0; Permission of Internship Coordinator

Observation and practice in selected community and public health agencies. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

HS 4850B: Internship in Health Studies: Physical Activity and Health Promotion

Credits: 8-12.

Prereq: KIN major; C- or better in (KIN 3580; KIN 3590; KIN 3660; KIN 4580; KIN 4670; HS 3500); Cumulative GPA 2.0; Permission of Internship Coordinator

Observation and practice in selected physical activity and health promotion agencies. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

HS 4900: Independent Study

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course
(Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

HS 5640: Physical Activity Epidemiology

Credits: 3. Contact Hours: Lecture 3.

Prereq: (HS 3500 or KIN 3580); (STAT 1010 or STAT 1040 or STAT 2260)

Understanding health benefits of physical activity on chronic disease prevention and health promotion throughout the life span, from clinical and public health perspectives. Discussion and application of real-life physical activity assessment, research, guidelines, and promotion in population levels. (Typically Offered: Fall, Spring)

Healthcare Management (HCM)

Courses primarily for undergraduates:

HCM 3010: Introduction to the US Healthcare Industry

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Introduces and provides an overview of the US healthcare delivery system for healthcare managers. Includes the theoretical basis for the system, its history and development, the resources that comprise it, as well as its overall planning, organization, management, evaluation, quality, professions, and its major health policy issues. Examines how healthcare policy is developed at the federal and state levels, considers the influence of all constituencies in policy formation, and compares existing policy and policy formation in other countries to the U.S. Explores how the healthcare policy environment affects the work of healthcare managers. (Typically Offered: Fall, Spring, Summer)

HCM 3020: Economics for Healthcare Managers

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010 and ECON 1020 and credit or enrollment in HCM 3010

Explores the economic influences and underpinnings of the healthcare delivery system. Examines the importance of economics in healthcare decisions, both demand and supply-side factors, and how third-party payers and public policy influence consumption and production of healthcare. Introduces evaluation of clinical outcomes using cost-effectiveness and other decision-analysis tools, as well as topics such as asymmetry of information, comparative healthcare systems, and healthcare policy. (Typically Offered: Fall, Spring)

HCM 3030: Healthcare Quality Management

(Cross-listed with SCM 3030).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment in HCM 3010

Addresses the manager's role in improving healthcare quality and outcomes, including clinical and organizational improvement, and quality improvement practices. Explores how healthcare delivery systems can better measure outcomes from both patient and organizational perspectives. Analyzes quality improvement programs and examines their adaptability to the healthcare environment. (Typically Offered: Fall, Spring)

HCM 3910: Internship in Healthcare Management

Credits: 3. Repeatable.

Prereq: Instructor Permission for Course

The internship is an integrative experience in a healthcare setting that allows students to apply the skills and knowledge obtained through their academic preparation in healthcare management. The internship consists of a minimum of 120 contact hours. Students are required to submit written and/or oral reports to the instructor of record on the internship experience as it relates to the healthcare management curriculum. Students may be responsible for facility-specific fees associated with the completion of organizational requirements, such as training and immunization.

HCM 3980: Cooperative Education

Credits: Required. Repeatable.

Prereq: Instructor Permission for Course

Students who wish to remain enrolled in Iowa State and work full-time in a healthcare management position can complete the Cooperative Education course. The cooperative education experience in a healthcare setting that allows students to apply the skills and knowledge obtained through their academic preparation in healthcare management. Students are required to submit written and/or oral reports to the instructor of record on the internship experiences as it relates to the healthcare management curriculum. Students may be responsible for facility-specific fees associated with completion of organizational requirements, such as training and immunization. Offered on a satisfactory-fail basis only.

HCM 4010: Financial Management for Healthcare Organizations

(Cross-listed with ACCT 4010).

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3010 and credit or enrollment in HCM 3010

Examination of the current accounting system for, and the financing of, health care and the factors affecting the industry. Exploration and analysis of budgetary concepts, financial management, cost accounting, and management under rate control and competition, as well as the differences between the goods and service industries. Additional areas of discussion include the practical application of health care finance theory as it applies to the current healthcare environment. The revenue and expense applications will be explored in-depth, particularly in relation to the delivery of health care services. Specific emphasis will be placed on understanding the components of the income statement and balance sheet, developing a budget, and using these financial statements for analyzing operational changes. (Typically Offered: Fall, Spring)

HCM 4020: Law and Regulatory Environment in Healthcare

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 2150 and PHIL 2300 and credit or enrollment in HCM 3010

An in-depth look at the legal and regulatory environment of healthcare management and practice. Explores aspects of employer-employee relations in the health care setting and legal ramifications of patient treatment and medical records. Discusses the importance of healthcare managers being familiar with the laws and regulations of healthcare. Included may be considerations of governmental, accreditation, and professional associations' oversight.

HCM 4030: Healthcare Information Systems

(Cross-listed with MIS 4030).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MIS 3010 and credit or enrollment in HCM 3010

Explores the critical role information technologies and systems play in healthcare organizations. The focus is on evaluating and implementing software and IT systems that facilitate delivery of health care; understanding information technology governance, data privacy, and security; planning and project management; and tracking future developments of information technology in healthcare management. Introduction to Electronic Health Records (EHR) and other Management and Financial Information System applications used by healthcare organizations.

HCM 4040: Cost-Effectiveness Analysis in Healthcare

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 1130 and FIN 3010 and STAT 2260

Introduces cost-effectiveness analysis in the healthcare context. Examines different forms of economic evaluations for healthcare interventions or technology, and how this impacts managerial decision-making. Includes cost-effectiveness, cost-utility, cost-benefit, cost-consequence, and cost-minimization analyses. Develops knowledge and skills in how to use these methods for evidence-based and ethical decisions in healthcare and other types of organizations. (Typically Offered: Spring)

HCM 4530X: Current Issues in Healthcare Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: HCM 3010

Designed to complement the required curriculum in the Healthcare Management (HCM) major. Explores a rotating selection of cutting edge and timely topics in the area of HCM, with an emphasis on the application of HCM knowledge and skills to the challenges facing today's organizations. Develops an awareness and understanding of the range, scope, and complexity of management-related issues in the modern (and post-pandemic) healthcare organization. Opportunities to apply introduced HCM knowledge, skills, and tools through class projects and exercises.

HCM 4900: Independent Study in Healthcare Management

Credits: 3. Repeatable.

Prereq: Instructor Permission for Course

Students may accumulate knowledge of practices informing the discharge of healthcare management duties via an independent research effort. Students will be expected to independently identify a focus area of healthcare management for further study and complete a comprehensive review of the relevant academic literature. On the basis of those findings, students will propose and execute a research study that addresses a meaningful gap in knowledge with practical applications. Successfully completing this activity will require extensive data collection (including integration with the University's Institutional Review Board), analysis and synthesis. The culmination of these efforts will be a formal research manuscript (minimum 30 pages, exclusive of references, tables and figures) and an oral presentation to faculty and peers detailing the outcomes of the student's investigation as it pertains to informing HCM practices.

Courses primarily for graduate students, open to qualified undergraduates:

HCM 5040X: Advanced Cost-Effectiveness Analysis in Healthcare

Credits: 3. Contact Hours: Lecture 3.

Focuses on cost-effectiveness analysis as a decision-oriented tool that takes both costs and consequences of actions into account in a systematic way. Includes methods such as decision analysis, Markov models, and different ways of conducting sensitivity analysis. Discusses ethical implications of using cost-effectiveness analysis for managerial decision-making in healthcare organizations. (Typically Offered: Fall, Spring)

Higher Education (HGED)

Courses primarily for graduate students, open to qualified undergraduates:

HGED 5040: History of Higher Education in the United States

Credits: 3. Contact Hours: Lecture 3.

Survey course in the history of higher education in the United States, from the colonial era to the present. Emphasis is placed on enduring debates about the purpose(s) of higher education and issues of equity and access along lines of race, class, and gender. Readings include primary and secondary materials.

HGED 5380: Foundations of Engineering Education

(Cross-listed with ENGR 5380/ AERE 5380).

Credits: 3. Contact Hours: Lecture 3.

Introduction to the field of engineering education, with an emphasis on engineering education history, existing challenges, teaching and learning pedagogies and theories, research opportunities, and research methodologies. The course goal is to develop students as scholars and to have students think critically about engineering and education. Students will apply the knowledge gained from this course to propose a research project related to their own discipline. The proposal is intended to help students learn and apply the key elements of engineering education research. This course is intended for students with a variety of interests and career goals, including those interested in learning to conduct engineering education research, exploring research discoveries about teaching and learning, and engaging with the engineering education community. (Typically Offered: Fall)

HGED 5440: Foundations of Leadership & Learning

Credits: 3. Contact Hours: Lecture 3.

Introduction to leading and learning in higher education. Course will include concepts, competencies, and skills necessary for leading higher education organizations, the various roles leaders may fill within the higher education sector, using assessment for improvement as a leader in higher education.

HGED 5520: Introduction to Higher Education in the United States

Credits: 3. Contact Hours: Lecture 3.

Overview of higher education in the United States, including a brief history, the functions, organization, external influences, funding, and the major issues impacting postsecondary institutions today.

HGED 5610: College Teaching

Credits: 3. Contact Hours: Lecture 3.

Educational theories, methods and strategies for the improvement of college instruction. Assist potential college instructors in developing knowledge of protocol, assessment, and the scholarship and art of teaching. Emphasis on the unique challenge of college teaching in a changing student population environment.

HGED 5620: Curriculum Development in Colleges

Credits: 3. Contact Hours: Lecture 3.

Modes of curriculum design, development, and change in colleges. Development of curricular leadership and evaluation strategies.

HGED 5680: Global Education Policy Analysis

Credits: 3. Contact Hours: Lecture 3.

Assessment of global education policy issues in education. Analysis of policies, implementation strategies, and policy outcomes.

HGED 5720: Resource Management in Higher Education

Credits: 3. Contact Hours: Lecture 3.

Prereq: Graduate standing

An examination of resource management in higher education. Planning, allocation, and administration of financial, human, and physical resources in colleges and universities.

HGED 5730: Equity, Diversity, and Inclusion in Student Affairs

Credits: 3. Contact Hours: Lecture 3.

Explores theories of equity, diversity, and inclusion to build knowledge and skills related to social justice in student affairs practice.

HGED 5740: Student Affairs Practice in Higher Education

Credits: 3. Contact Hours: Lecture 3.

Introduction to the profession of Student Affairs in higher education. As a survey course, readings, learning artifacts, and class discussions will be used to uncover a breadth of topics related to the student affairs profession. Course content is organized around, but will not be limited to, the history, philosophical underpinnings, values, ethics, and standards espoused, as well as the concepts of learning and community development.

HGED 5750: Organization and Administration of Student Affairs

Credits: 3. Contact Hours: Lecture 3.

Topics related to organization and administration of student affairs in higher education. The course surveys organizational and administrative aspects of student affairs within the broader context of post-secondary education with particular attention paid to organizational development, budget and finance, and law and policy.

HGED 5760: Student Development in Higher Education

Credits: 3. Contact Hours: Lecture 3.

Theories of student and adult development and their applications in student affairs programs, services, and activities are reviewed. Emphasis is placed on theories exploring psychosocial, cognitive, moral, and social identity development as well as on integrated theories of development.

HGED 5770: Campus Environments and Cultures

Credits: 3. Contact Hours: Lecture 3.

Study of the impact of the college environment on students and use of environmental theory to create positive learning situations for students.

HGED 5780: Students in U.S. Higher Education

Credits: 3. Contact Hours: Lecture 3.

The relationship between college students and characteristics from 1950 to the present. Traditional assumptions about the impact of higher education on students will be reviewed and challenged. Campus issues and concerns relative to commuters and residential life. Participants will analyze institutional responses to students through college missions, organizational development, structure, core curriculum and retention.

HGED 5790: Advising and Supporting

Credits: 3. Contact Hours: Lecture 3.

Development of effective, basic counseling skills. Understanding of group dynamics. Ability to work effectively in groups.

HGED 5800: Current Topics in Community Colleges

Credits: 3. Contact Hours: Lecture 3.

Current issues and new directions in community college practice, policy, and research.

HGED 5810: Community College Partnerships

Credits: 3. Contact Hours: Lecture 3.

Prereq: Graduate standing

Overview of the community environment in which community colleges serve and the external groups with whom they partner, including environmental scanning, partner development, strategic planning, and maintaining relationships.

HGED 5820: The Comprehensive Community College

Credits: 3. Contact Hours: Lecture 3.

The community college as a unique social and educational institution: its history, philosophy, functions, programs, faculty and student characteristics, organization and finance, trends, and issues. Reviews current research and exemplary community college practices internationally, nationally, and in Iowa.

HGED 5830X: Governance and Oversight of Higher Education

Credits: 3. Contact Hours: Lecture 3.

Introduction to governance and oversight of higher education, including federal and state roles, boards of trustees, governance structures, external oversight, regulation, strategic planning, and legal issues.

HGED 5900A: Special Topics: Student Services

Credits: 1-4.

Prereq: Instructor Permission for Course

Independent study on specific topics arranged with an instructor.

HGED 5900B: Special Topics: Community Colleges

Credits: 1-4.

Prereq: Instructor Permission for Course

Independent study on specific topics arranged with an instructor.

HGED 5900C: Special Topics: Current Issues

Credits: 1-4.

Prereq: Instructor Permission for Course

Independent study on specific topics arranged with an instructor.

HGED 5900D: Special Topics: International Higher Education

Credits: 1-4.

Prereq: Instructor Permission for Course

Independent study on specific topics arranged with an instructor.

HGED 5900E: Special Topics: Federal and State Affairs

Credits: 1-4.

Prereq: Instructor Permission for Course

Independent study on specific topics arranged with an instructor.

HGED 5900F: Special Topics: Law in Higher Education

Credits: 1-4.

Prereq: Instructor Permission for Course

Independent study on specific topics arranged with an instructor.

HGED 5900G: Special Topics: Institutional Research

Credits: 1-4.

Prereq: Instructor Permission for Course

Independent study on specific topics arranged with an instructor.

HGED 5910: Supervised Field Experience

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

Supervised on-the-job field experience.

HGED 5930: Workshops

Credits: 1-5. Contact Hours: Lecture 5.

Repeatable.

HGED 5980: Capstone Seminar

Credits: 3. Contact Hours: Lecture 3.

The primary goal of this course is for advanced students to demonstrate their preparedness to progress in the field of Student Affairs as educators who are able to apply concepts and formal (and informal) theories addressed in previous course and fieldwork to their professional student affairs thinking and practices.

HGED 5990: Creative Component

Credits: 1-30.

*Prereq: Instructor Permission for Course***Courses for graduate students:****HGED 6150A: Seminars in Higher Education: Student Services**

Credits: 1-4. Contact Hours: Lecture 4.

HGED 6150B: Seminars in Higher Education: Community Colleges

Credits: 1-4. Contact Hours: Lecture 4.

HGED 6150C: Seminars in Higher Education: Current Issues

Credits: 1-4. Contact Hours: Lecture 4.

HGED 6150D: Seminars in Higher Education: International Higher Education

Credits: 1-4. Contact Hours: Lecture 4.

HGED 6150E: Seminars in Higher Education: Federal and State Affairs

Credits: 1-4. Contact Hours: Lecture 4.

HGED 6150F: Seminars in Higher Education: Law in Higher Education

Credits: 1-4. Contact Hours: Lecture 4.

HGED 6150G: Seminars in Higher Education: Institutional Research

Credits: 1-4. Contact Hours: Lecture 4.

HGED 6150H: Seminars in Higher Education: Research Designs in Higher Education

Credits: 1-4. Contact Hours: Lecture 1.

HGED 6580: Program Evaluation & Decision-Making in Community Colleges

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: Graduate standing

Focus on theoretical and practical issues of program evaluation and decision-making within the community college sector of higher education. Includes components of theory, design, implementation, analysis, and application of results for program improvement.

HGED 6630: Community College Students

Credits: 3. Contact Hours: Lecture 3.

Comprehensive understanding of students in American community colleges while enhancing research skills and a scholar-practitioner approach to working with students. Examine the curricula in place that serve a diverse student population with different educational objectives. Examine student types found in comprehensive community colleges including transfer, career & technical, adult basic education, and English language learners.

HGED 6640: College Organization and Administration

Credits: 3. Contact Hours: Lecture 3.

Examination of administrative organization and behavior using theories and lenses to understand topics such as: communications, leadership, resource allocation, strategic planning, and institutional governance.

HGED 6650: Financing Higher Education

Credits: 3. Contact Hours: Lecture 3.

Lectures, discussions, and individual investigation relating to financial administration in colleges and universities. Budgeting, auxiliary enterprises, administration of financial planning, fund raising, examination of theories on expenditures. Designed for persons aspiring to serve as college administrators.

HGED 6660: Academic Issues and Cultures

Credits: 3. Contact Hours: Lecture 3.

Examination of institutional culture and issues in higher education focusing on the roles and responsibilities of faculty and academic administrators.

HGED 6670: Leadership & Change in Community Colleges

Credits: 3. Contact Hours: Lecture 3.

Prereq: Admission to Ed.D. program

An examination of advanced community college leadership practice. Team-based leadership, leadership strategies, planning, and change.

HGED 6680: Workforce, Economic & Community Development in Community Colleges

Credits: 3. Contact Hours: Lecture 3.

Prereq: Admission to Ed.D. program

This course provides an overview of how community colleges influence workforce, economic, and community development through their education missions.

HGED 6730: Diversity and Inclusion in Higher Education

Credits: 3. Contact Hours: Lecture 3.

Critical understanding of issues of diversity and inclusion in higher education. There are multiple dimensions to diversity and inclusion, far too complicated to cover in one course. Therefore, the goal of this seminar is to provide a general understanding of theory, research, and practices related to diversity and inclusion issues. Considers intersectional perspectives of diversity and inclusion within higher education.

HGED 6760: Student Development Theory II

Credits: 3. Contact Hours: Lecture 3.

An examination of social identity theories including those exploring race, ethnicity, gender, class, ability, sexuality, and spirituality. An exploration of how social identity is influenced by the dynamics of power and oppression in education and society and how to enhance the college experiences of students from diverse backgrounds.

HGED 6900: Advanced Special Topics

Credits: 1-4. Repeatable.

*Prereq: Instructor Permission for Course***HGED 6990: Research**

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

History (HIST)

Courses primarily for undergraduates:**HIST 1950: Introduction to History**

Credits: 1. Contact Hours: Lecture 1.

Introduction to the discipline of history and how historians think and work. Focus on research methodologies, writing and analytical practices of historians, and specialization in the discipline.

HIST 2010: Introduction to Western Civilization I

Credits: 3. Contact Hours: Lecture 3.

Western civilization from ancient Mediterranean world to 1500. Social and cultural developments; economic and political ideas and institutions; problems of historical change and continuity. Meets International Perspectives Requirement. (Typically Offered: Fall)

HIST 2020: Introduction to Western Civilization II

Credits: 3. Contact Hours: Lecture 3.

Western civilization from 1500 to present. Social and cultural developments; economic and political ideas and institutions; problems of historical change and continuity. Meets International Perspectives Requirement. (Typically Offered: Spring)

HIST 2070: Chinese Civilization

Credits: 3. Contact Hours: Lecture 3.

Origins, development, decline and transformation of China from earliest times to 1911. Meets International Perspectives Requirement.

HIST 2110: Ancient Empires: From Sargon to Caesar

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Development of empires in the Near East and Mediterranean from the Akkadians to the fall of Rome. Discussion of the Hittites, Assyrians, Persians, Athenians, Macedonians (including the conquests of Alexander the Great), Carthaginians, and Romans; examination of imperialism as well as the social, cultural, and economic consequences of empire. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

HIST 2120: Medieval Kingdoms

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Survey of political, social, and cultural developments in western Europe for the entire medieval period, 300-1500.

HIST 2210: Survey of United States History I

Credits: 3. Contact Hours: Lecture 3.

Colonial foundations: revolution, confederation, and constitution; nationalism and democracy; sectional disunity, Civil War, and reunion. (Typically Offered: Fall)

HIST 2220: Survey of United States History II

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Industrialization; emergence as a great power; boom and depression; war, internationalism and Cold War; modern industrial society. (Typically Offered: Spring)

HIST 2550: Modern World History, Globalization in Perspective

Credits: 3. Contact Hours: Lecture 3.

World history from 1500 to present. Globalization; colonization and empire; political revolutions; industrialization; modernization. Meets International Perspectives Requirement.

HIST 2710: The History of Sports in the United States

Credits: 3. Contact Hours: Lecture 3.

Professionalization of sports from their origins as invented recreational activities to their present status as fiscally privileged, legally protected cultural icons. Covering the period from the 17th to the end of the 20th century. (Typically Offered: Spring)

HIST 2800: Introduction to History of Science I

Credits: 3. Contact Hours: Lecture 3.

Ideas of nature from ancient Greece to the seventeenth-century scientific revolution. Meets International Perspectives Requirement.

HIST 2810: Introduction to History of Science II

Credits: 3. Contact Hours: Lecture 3.

Science from seventeenth-century scientific revolution to Darwin and Einstein. Meets International Perspectives Requirement.

HIST 2840: Wonders of the World, Global History of Innovation

Credits: 3. Contact Hours: Lecture 3.

Innovation across cultures from the ancient 'Seven Wonders of the World' to the modern world, with developments in Egypt, Greece, Rome, the Islamic World, India, China, Europe, and the Americas. Topics include major inventions, agricultural technologies, architecture, manufacturing, warfare, engineering, printing, entertainment, transport, and communications. Meets International Perspectives Requirement. (Typically Offered: Fall)

HIST 3010: The Historian's Toolbox

Credits: 3. Contact Hours: Lecture 3.

Prereq: History major; Sophomore classification

Foundations of the discipline with emphasis on the purpose, practice, and methodology of History. Required of majors. (Typically Offered: Fall, Spring)

HIST 3040: Cultural Heritage of the Ancient World

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Historical examination of art, literature, thought, and religious beliefs of major civilizations of the ancient Mediterranean countries until the end of the 8th century.

HIST 3070: American Popular Culture

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Social practices, beliefs and material traits of everyday life in America from the mid-19th century to the present. Includes literature, music, theater and other entertainments. Dime novels, vaudeville, rock and roll music, Hollywood and establishment of professional athletic leagues are among the cultural artifacts and phenomena considered.

HIST 3100: Africa to 1880

(Cross-listed with AFAM 3100).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Survey of the history of African societies, cultures and civilizations from earliest times to 1880. Evolution of states across the continent; social, economic, political, and cultural developments; nature and consequences of African interactions and relationship with Europeans. Meets International Perspectives Requirement.

HIST 3110: Africa under Colonial Rule

(Cross-listed with AFAM 3110).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Development of Africa from imposition of colonial rule to independence, including processes of European domination, African reaction and resistance, emergence of nationalism, and dismantling of colonialism. Meets International Perspectives Requirement.

HIST 3180: History of Early Modern Europe, 1450-1789

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Survey of major themes in the social, political, cultural, and religious history of early modern Europe, including the eras of renaissance and reformation, the age of exploration, development of the modern individual and household, and enlightenment.

HIST 3200: History of Modern Europe, 1789 to Present

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Survey of major themes in the social, political, and religious history of Europe from the French Revolution to the present. Topics to be covered include the French Revolution, nationalism, the Industrial Revolution, the Russian Revolution, World Wars I and II, the Cold War, the fall of the Soviet Union, and the history of globalization. Meets International Perspectives Requirement. (Typically Offered: Fall)

HIST 3250: Society and Politics in England, 1525-1700

Credits: 3. Contact Hours: Lecture 3.

Social, cultural, demographic, and economic experiences. Religious Reformation. Growth of the State (and Empire) and political institutions.

HIST 3270: History of the British Empire

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Development of British Empire from origins in the seventeenth century to dissolution in the twentieth century. Attention given to empire in S. Pacific, N. America, India and S. Asia, Hong Kong, Africa and the Middle East, as well as theories of empire and the impact of immigration on British society. Irish history also covered. Meets International Perspectives Requirement.

HIST 3310: History of the Islamic World to 1800

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Survey of the Islamic world from pre-Islamic Arabia to the 19th century covering the life of the Prophet Muhammad, the spread of Islam through the Arab conquests and the Caliphal dynasties of the Umayyads and the Abbasids, the Mongol conquests, Turkic migrations from Central Asia, and the rise of the Ottoman Empire. (Typically Offered: Fall)

HIST 3360: Ancient China

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

History of China from the beginning of civilization through the Opium War; examines social, political, economic, and cultural developments. Meets International Perspectives Requirement.

HIST 3370: Modern China

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

History of China from the Opium War through the founding of the PRC; examines the reforms and revolutions in China's road toward modernity. Meets International Perspectives Requirement.

HIST 3390: US-Asian Relations

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Survey of US-East Asian (Japan, China, Korea) relations from the late 18th century to the end of the Cold War. Meets International Perspectives Requirement.

HIST 3400: Colonial Latin America

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Colonial Latin American history from European discovery and colonization to 1825.

HIST 3410: Modern Latin America

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Modern Latin American history from 1826 to present. Meets International Perspectives Requirement.

HIST 3450X: History of American Business

Credits: 3. Contact Hours: Lecture 3.

American business history from the Revolution to present; reviews agriculture, industrialization, technological change, depressions, wars, globalization.

HIST 3530: History of African Americans I

(Cross-listed with AFAM 3530).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Examines African roots of black culture and the African American experience in the United States from the colonial period through the Civil War. Topics include Atlantic Slave Trade, slavery and American identity, abolition, the emergence of Black Nationalism, and black participation in the Civil War. Meets U.S. Diversity Requirement.

HIST 3540: History of African Americans II

(Cross-listed with AFAM 3540).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Explores African American political thought and political action from Reconstruction to the present. Topics include rise of Jim Crow segregation, urban migration, Garvey movement, Harlem Renaissance, Depression and world wars, Pan-Africanism, civil rights, Black Power, and black feminism. Meets U.S. Diversity Requirement.

HIST 3570: American Family History

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

The impact on American families from colonial times onward of agricultural change, industrialization, urbanization, and wars and depressions.

HIST 3620: Global Environmental History

(Cross-listed with ENVS 3620).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Survey of the interactions of human communities with their environments from the beginnings of human history to the present. Topics include the domestication of animals, the agricultural revolution, industrialization, urbanization, deforestation, hydraulic management, fossil fuel consumption, and climate change. (Typically Offered: Fall)

HIST 3630: U. S. Environmental History

(Cross-listed with ENVS 3630).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Survey of the interactions of human communities with the North American environment. Focus on the period from presettlement to the present, with a particular concentration on natural resources, disease, settlement patterns, land use, and conservation policies.

HIST 3640: The Mythic Wild West

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Examination of the history of the mythic American West, including how people have thought about the region, the myths that emerged from the West, and the role the mythical West played in the formation of American identity. (Typically Offered: Summer)

HIST 3650: American Agriculture I: The Maya to McCormick's Reaper

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

North American agricultural development to 1865. American Indian agricultural systems, European background and agricultural revolution, agriculture in the colonial era, early republic and antebellum period. Topics include origins of modern crops, agriculture's role in the economy, politics, and settlement of the U.S., slavery, rural and frontier life, and mechanization.

HIST 3660: American Agriculture II: Homestead Act to GMOs

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

American agricultural development since 1865. Post-Civil War adjustments; westward expansion; economic boom and bust; mechanization; Dust Bowl and environmental challenges; Great Depression and New Deal; changing rural life; scientific and technological advances; farm crisis and late twentieth century challenges.

HIST 3670: America Eats

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Thematic approach to the development of the American agricultural system through the topics of food and eating. Changes in American food systems from Native American, pre-contact diets through modern innovations such as fast food, organics, and eating locally.

HIST 3700: History of Iowa

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Survey of major social, cultural and economic developments in Iowa from the late 1700s. Emphasis on minority groups, pioneer life, early economic development, industrial development, educational and religious development, and outstanding personalities.

HIST 3710: Mexican American History

(Cross-listed with USLS 3710).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

History of the Mexican American community in the U.S. from the 1820s to the present. Topics include community development, employment, social marginalization, racism/discrimination, depression and world wars, civil rights, ethnic power and politics. Offered even-numbered years. Meets U.S. Diversity Requirement. (Typically Offered: Fall)

HIST 3720: Latina/o History

(Cross-listed with USLS 3720).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Historical and cultural heritage of Latinas/os in the United States. The histories of Mexican, Puerto Rican, Cuban, and other Latin American peoples in the U.S. emphasizing political and cultural convergence and congruencies. Meets U.S. Diversity Requirement.

HIST 3740: Sex, Gender, and Culture in the Ancient Mediterranean World

(Cross-listed with CLST 3740/ WGS 3740).

Credits: 3. Contact Hours: Lecture 3.

Survey of the roles of women and others on the margins and the issues that impacted them in the ancient Greek and Roman worlds. Evidence from literature, the visual arts, and archaeology. Contemporary approaches to studying women, gender, and sexuality in ancient history. Intersections of gender categories with ideas of slave and free status, citizenship, and ethnicity. Readings from ancient and modern sources. Meets International Perspectives Requirement.

HIST 3800: History of Women in Science, Technology, and Medicine

(Cross-listed with WGS 3800).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

History of women's relationship to the fields of science, technology, and medicine, as students and professionals, consumers, subjects and patients, family members, workers and citizens. Concentrates especially on 19th and 20th century United States, concluding with an examination of current issues of special interest to women in science, technology, and medicine. Meets U.S. Diversity Requirement.

HIST 3820: History and Philosophy of the Scientific Revolution

(Cross-listed with PHIL 3820).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits in PHIL or Permission of Instructor

The emergence of empirical science as the authoritative methodology for production of knowledge about the natural world in the period between Copernicus and Kant. Scientific progress achieved during the period, including the work of Galileo, Descartes, and Newton. The re-shaping of epistemology in the Western intellectual tradition. Implications for philosophy and historiography. Offered odd-numbered years. (Typically Offered: Spring)

HIST 3830: Technology, Public Science, and European Culture, 1715-Present

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

A survey from the Age of Enlightenment to the end of the twentieth century of the relationship between science, technology, and public or popular culture in a comparative European context (including Russia and the former Soviet Union). Meets International Perspectives Requirement.

HIST 3840: Roman Italy: An Introduction

(Cross-listed with CLST 3840).

Credits: 2. Contact Hours: Lecture 2.

Repeatable.

Prereq: Instructor Permission for Course

Introduction to the topography, history, archaeology, monuments, and art of Rome from the 8th century BCE to the 5th century CE; attention given to the culture of modern Italy, preparatory to study abroad in Rome. Enrollment limited to students participating in CLST 3850/HIST 3850. Meets International Perspectives Requirement. (Typically Offered: Spring)

HIST 3850: Study Abroad: Roman Italy: Building the Empire

(Cross-listed with CLST 3850).

Credits: 3. Repeatable, maximum of 6 credits.

Prereq: CLST 3840/HIST 3840, Instructor Permission Required

Supervised on-site instruction in the history, archaeology, monuments, and art of Rome and environs from the 8th century BCE to the 5th century CE; attention given to the culture of modern Italy. Meets International Perspectives Requirement. (Typically Offered: Summer)

HIST 3860: History of Women in America

(Cross-listed with WGS 3860).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

A survey of social, economic, and political aspects of women's role from colonial era to present; emphasis on employment, education, concepts of sexuality, and changing nature of the home. Meets U.S. Diversity Requirement.

HIST 3870: First Ladies in U.S. History

(Cross-listed with POLS 3870/ WGS 3870).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Evolution of the role and office of the First Lady in U.S. history, including her political activism, social impact, and international influence. Analysis of the authority, intersectionality and agency of First Ladies in the aggregate and exploration of how individual First Ladies have interpreted and adapted this unique public position. Offered even-numbered years. (Typically Offered: Fall)

HIST 3890: American Military History

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

American military experience from the Pequot War to Vietnam, including King Philip's War, the French & Indian Wars, the American Revolution, the War of 1812, the Mexican-American War, the Civil War, the Spanish-American War, World Wars I & II, and the Korean War. Meets International Perspectives Requirement.

HIST 3900: World Military History

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Covers military history from the Napoleonic era through the mid- and late-19th century wars, the First and Second World Wars, and wars of national liberation and regional conflicts since 1945. Meets International Perspectives Requirement.

HIST 3910: American Diplomatic History

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

A study of US foreign relations during the twentieth century, including the rise to global power, the First World War, diplomacy during prosperity and depression, the Second World War, the Cold War, relations with Latin America, East and South Asia and Africa, the search for markets, and the perceptions of American foreign policy held by the US, its allies and adversaries, and others.

HIST 3960A: Topics in History: Europe

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Prereq: Sophomore classification

Specialized topics in history; topics vary each time offered.

HIST 3960B: Topics in History: U.S. and North America

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Prereq: Sophomore classification

Specialized topics in history; topics vary each time offered.

HIST 3960C: Topics in History: Global

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Prereq: Sophomore classification

Specialized topics in history; topics vary each time offered.

HIST 4020: Greek Civilization

(Cross-listed with CLST 4020).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Ancient Greece from the Bronze Age to the Hellenistic period; evolution of the Greek polis and its cultural contributions, with a particular emphasis on the writings of Herodotus and Thucydides.

HIST 4030: Roman Civilization

(Cross-listed with CLST 4030).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Ancient Rome from the Regal Period to the fall of the Western Empire; evolution of Roman institutions and Rome's cultural contributions studied through original sources.

HIST 4050: Transformations of the Early Medieval World

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Examines major political, religious, and cultural transformations in Western Europe and the Mediterranean, 300-1000. Major topics include the fall of Rome, rise of Christianity, Germanic kingdoms, and Carolingian empire.

HIST 4060: The Birth of Europe in the High Middle Ages

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Examines political, economic, religious, and cultural forms emerging in Europe, 1000-1300, that still characterize Western society to this day. Major topics include the medieval agricultural revolution, English and French monarchies, crisis of church and state, and growth of the papacy and personal religion.

HIST 4070: Crises of the Late Middle Ages

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Examines major political, economic, religious, and intellectual crises that beset Europe, 1300-1500, paving the way for early modernity. Major topics include Black Death, 100 Years War, papal schism, and origins of Renaissance and Reformation.

HIST 4100: The Holocaust in History

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Historical and historiographical coverage of the Holocaust. Actions of perpetrators, experiences of the murdered, and inaction or action of bystanders within global, European, German, and Jewish history. Topics include history, historical methods, and contemporary and historical commemoration of the Holocaust. Seminar discussion format. Meets International Perspectives Requirement. (Typically Offered: Spring)

HIST 4140: European Cultural and Intellectual History

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

A study of the development of key themes in European thought: nature, man, God, society, history, and creativity from Rousseau to Post-Modernism.

HIST 4190: History of Modern France

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

From absolutism to revolution and the rise of modern democracy.

HIST 4200: France's Revolutionary Century, 1715-1815

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

An in-depth investigation of the French Revolution, its causes and consequences, beginning in the Ancien Regime and ending with the fall of Napoleon.

HIST 4210: History of Russia I

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Russia to 1850. Origins of Russian people; Byzantine influences; Mongol invasion; rise of Moscow; Westernization. Meets International Perspectives Requirement.

HIST 4220: History of Russia II

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Russia since 1850. Reform and revolution; transformation of society; USSR as a world power; recent changes. Meets International Perspectives Requirement.

HIST 4230: The Russian and Soviet Mind: Intellectual and Cultural Life, 1762-1991

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Russian intellectual history from the reign of Catherine the Great to the collapse of Communism. Discussion of Russian literary, philosophical and cultural trends in the nineteenth century and the relationship between intellectual & cultural figures and the Soviet state in the twentieth century.

HIST 4240: History of Modern Germany

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Political, social, and cultural history of Germany from the 19th century to the present. Meets International Perspectives Requirement.

HIST 4270: Crime and Policing in England 1550-1850

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Course examines different forms and ideas of criminality and the nature and development of law enforcement in England between 1550 and 1856. Significant issues will include the nature of criminal records and statistics, the legal system, the politics of the law and its links with social relations, policing, female crime, juvenile delinquency, organized crime, riots, 'social crime,' and the treatment of crime in creative literary texts.

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Explores the history of punishing criminals in England and shows how interdisciplinary perspectives, ideas, and practices of punishment are related to mentalities, and socio-economic change. Issues of significance examined: violence, civility, manners, madness, public punishment, execution, imprisonment, transportation, mercy, the rise of asylums, and penal reform.

HIST 4290: Monstrous London: London's Histories 1500-1800

Credits: 3-4.

Prereq: Sophomore classification

Study of London's social, economic, cultural, political, and environmental history 1500-1800, using both quantitative and qualitative methods to examine contemporary and secondary sources. Course combines standard lecture and discussion format with one week of intensive study abroad for 4th hour of course credit.

HIST 4310: Modern England

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

England since 1850. Parliamentary and constitutional development; social reform and economic change; imperial Britain; welfare state. Meets International Perspectives Requirement.

HIST 4350: History of the Modern Middle East

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Ottoman and Qajar reform movements; constitutional revolutions; European legal imperialism; colonialism; World War I and the mandate system; Israeli-Palestinian conflict; Arab nationalism; the Islamic Revolution in Iran; Islamist movements; oil resources; terrorism; sectarianism. Meets International Perspectives Requirement. (Typically Offered: Spring)

HIST 4410: History of Modern Mexico and Central America

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Political, economic, and social development of Mexico and Central America in nineteenth and twentieth centuries.

HIST 4420: Rebellions and Revolutions in Latin America

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Survey of rebellions, revolutionary movements, and social revolutions in the twentieth century, including Guatemalan, Cuban, Mexican, Chilean, and Nicaraguan cases. Meets International Perspectives Requirement.

HIST 4490: US Gilded Age, 1877-1900

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

U.S. History from the end of Reconstruction to the turn of the twentieth century. Discussion of prominent themes, including the opening of the West, the emergence of big business, rapid urbanization, immigration, race relations, American imperialism, and social reform. Offered even-numbered years. (Typically Offered: Spring)

HIST 4500: Colonial America

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Exploration, colonization, and development of political, economic, religious, and cultural institutions of North American colonies before 1754. Topics also include social history, emergence of African-American slavery, relations with American Indians.

HIST 4510: American Revolutionary Era

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Participants, ideas, and events leading to independence and the foundation of the United States, 1754 to 1789. Topics include political, military, social, cultural history, also issues of gender and race relations.

HIST 4530: Law and Society in U.S. History: Crime, Race, Family, Work and Property

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

The development of both law and the legal system from colonial times to the present, highlighting their crucial role in aspects of American life such as marriage, family, employment, racial identification, and economic exchange. Topics will include important past legal disputes, the different levels of courts, the various actors in the legal process (e.g., police, prosecutors, prisoners, judges and juries), the relationship between the individuals and institutions that comprise the legal system.

HIST 4540: Early American Republic

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Examination of the United States from the Constitutional Convention up to the Mexican War. Topics include the Washington, Jefferson, and Jackson administrations, the War of 1812, slavery and the South, economic and social development, Westward expansion and reform.

HIST 4550: U.S. Civil War and Reconstruction Era

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Examination of the social and economic contradictions that led to Civil War and the reconstruction of American freedom and democracy. Topics include the Mexican War, sectional conflict and the crisis of disunion, economic, political and social aspects of civil war, emancipation, and reconstruction.

HIST 4570: History of American Sexualities

(Cross-listed with WGS 4570).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

The social construction of American sexualities from the colonial era to the present with particular emphasis on how ideas about sex and sexuality have shaped American public life, including education, public policy, party politics, and racial justice. Meets U.S. Diversity Requirement.

HIST 4580: U.S. 1900 to 1945

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

America in transition and crisis: Progressivism, World War I, the twenties, the Great Depression, and World War II.

HIST 4590: U.S. 1945 to the Present

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Modern American history with an emphasis on political, socio-cultural, ethno-racial, and military history. Topics include the Cold War, the wars in Korea and Vietnam, civil rights and Black/ethnic Power, modern feminism, and the conservative movement.

HIST 4600: The Great Plains

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

History of the Great Plains from prehistoric period. Emphasis on agricultural and rural development, Native Americans, cattle ranching, land policy, agrarian reform movements and federal policy.

HIST 4610: The American South

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

History of the American South from colonial period to present. Emphasis on economic, social, and political change in this rural region.

HIST 4650: The American West

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

History of trans-Mississippi West from 1800 to present, concentrating on settlement and regional identity. Emphasis on the state, the environment, urbanization, agriculture, Native Americans, and minority communities.

HIST 4680: History of Rural America

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

History of rural America from the colonial period to the present. Emphasizes immigration, ethnicity, religion, social and cultural change, and agriculture in relation to rural settlement, institution building, demographic change, gender, class, and political and economic development.

HIST 4730: Civil Rights and Ethnic Power

(Cross-listed with AFAM 4730/ USLS 4730).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Comparative history of the civil rights and ethnic power movements (African American, Chicano, American Indian, Puerto Rican, among others) in the U.S. from World War II to the present. Topics include institutional foundations, leadership, gender and racial dynamics, and the convergences and divergences of these differing ethnic struggles for rights. Meets U.S. Diversity Requirement.

HIST 4790: China and the Cold War

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Important events in China's Cold War involvement, connections between domestic and foreign affairs, factors and rationales in China's foreign policy making the relationship between China's Cold War experience and recent developments.

HIST 4800A: Pre-Student Teaching Experience III: History/Social Sciences

(Cross-listed with EDUC 4800A).

Credits: 2. Repeatable, maximum of 2 credits.

Prereq: Admitted to the Educator Preparation Program

Supervised participation in a 5-12 school setting. Permission of History/Social Sciences coordinator required prior to enrollment. Two, half-days per week needed for school experience. Clinical Supervision Level 3. (Typically Offered: Fall)

HIST 4810: Public History

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 credits.

Prereq: Sophomore classification

Development of theories and methods in the field of public history. Emphasis on practical applications such as archival research, museum interpretation, historic preservation, and oral history within the context of United States history. (Typically Offered: Fall)

HIST 4820: Birth, Death, Medicine, and Disease

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

History of medicine, sickness, and public health from ancient times to the twenty-first century in the US, Europe, and around the world. Topics include changing ideas of health and illness, development of doctors and hospitals, social and ethical issues in health care, and epidemics from cholera to AIDS.

HIST 4880: American Stuff, Colonial Times to the Present

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Inventions, innovations, artifacts, and material culture in the United States, from homespun cloth and the Colt revolver, through the transcontinental railroad and Model T, to fast food and the iPhone.

HIST 4890: The World at War

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Sophomore classification

In-depth exploration of a particular global conflict (topic varies; e.g., the French and Indian War, the Napoleonic Wars, World War I, World War II, the Vietnam War, and post-Cold War U.S. overseas conflicts) by focusing on multiple aspects of that conflict such as belligerents' justification, diplomacy, manpower policy, technology, strategies and tactics, morality, protest, civilian and military experiences, gender roles, the aftermath of conflict, and collective memory and memorialization. (Typically Offered: Spring)

HIST 4900: Independent Study

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Reading and reports on problems selected in conference with each student. No more than 6 credits of HIST 4900 may be counted toward graduation with a major in History. No credits of HIST 4900 may count toward a minor in History. Graduation Restriction: No more than 6 credits of HIST 4900 may be counted toward graduation with a major in History. No credits of HIST 4900 may count toward a minor in History.

HIST 4950: Historiography and Research Writing

Credits: 3. Contact Hours: Lecture 3.

Variable topics seminar that focuses on historiographical and research skills and writing. Required of majors. (Typically Offered: Fall, Spring)

HIST 4960A: Advanced Topics in History: Europe

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Prereq: Sophomore classification

Specialized topics in history, topics vary each time offered.

HIST 4960B: Advanced Topics in History: U.S. and North America

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Prereq: Sophomore classification

Specialized topics in history, topics vary each time offered.

HIST 4960C: Advanced Topics in History: Global

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Prereq: Sophomore classification

Specialized topics in history, topics vary each time offered.

HIST 4980: Methods of Teaching History/Social Sciences

(Cross-listed with EDUC 4980).

Credits: 3. Contact Hours: Lecture 3.

Theories and processes of teaching and learning secondary history/social sciences. Emphasis on development and enactment of current methods, assessments, and curriculum materials for providing appropriate learning experiences. (Typically Offered: Fall, Spring)

Courses primarily for graduate students, open to qualified undergraduates:

HIST 5100: Readings Seminar in East Asian History

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings in East Asian history. Topics vary each time offered.

HIST 5110A: Readings Seminar in American History: Colonial Period

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings in American history. Topics vary each time offered.

HIST 5110B: Readings Seminar in American History: Nineteenth Century

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings in American history. Topics vary each time offered.

HIST 5110C: Readings Seminar in American History: Twentieth Century

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings in American history. Topics vary each time offered.

HIST 5110E: Readings Seminar in American History: Social and Cultural

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings in American history. Topics vary each time offered.

HIST 5110F: Readings Seminar in American History: West

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings in American history. Topics vary each time offered.

HIST 5110G: Readings Seminar in American History: The South

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings in American history. Topics vary each time offered.

HIST 5120A: Readings Seminar in European History: Ancient

(Cross-listed with CLST 5120A).

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings in European history.

HIST 5120B: Readings Seminar in European History: Medieval and Early Modern

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings in European history.

HIST 5120C: Readings Seminar in European History: Modern

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings in European history.

HIST 5130: Readings Seminar in Latin American History

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings in Latin American history. Topics vary each time offered.

HIST 5300: Readings Seminar in Modern Russian/Soviet History

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings in modern Russian history. Topics vary each time offered.

HIST 5500B: Proseminar in European Rural and Agricultural History: Twentieth Century Europe

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Proseminar in European Rural and Agricultural History: Twentieth Century Europe.

HIST 5520A: Readings Seminar in American Rural and Agricultural History: American Agriculture

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings in American agricultural history. Topics vary each time taught.

HIST 5520B: Readings Seminar in American Rural and Agricultural History: Agrarian Reform Movements

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings on American agrarian reform movements. Topics vary each time taught.

HIST 5520C: Readings Seminar in American Rural and Agricultural History: Midwestern Rural Society

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings on American Midwestern rural society. Topics vary each time taught.

HIST 5520D: Readings Seminar in American Rural and Agricultural History: Women in Rural Life

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings on American women and rural life. Topics vary each time taught.

HIST 5540A: Readings Seminar in Environmental History: American

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings in American environmental history. Topics vary each time offered.

HIST 5540B: Readings Seminar in Environmental History: European

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings in European environmental history. Topics vary each time taught.

HIST 5540C: Readings Seminar in Environmental History: Global

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings in global environmental history. Topics vary each time taught.

HIST 5750: Readings Seminar in the History of Technology

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Readings in the history of technology. Topics vary each time taught.

HIST 5830A: Historical Methods: Narrative

Credits: 3. Contact Hours: Lecture 3.

Study of the methodologies of historical narrative.

HIST 5830B: Historical Methods: Statistical Evidence and Analysis

Credits: 3. Contact Hours: Lecture 3.

Study of methodologies of using statistical evidence in writing history.

HIST 5830C: Historical Methods: Issues in Historiography

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Study of issues surrounding the development of historiography and historical theories.

HIST 5850: Teaching Methods for the Modern Europe Survey

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Pedagogy and historiography of Europe, from the Protestant Reformation to the present. Pedagogical topics covered include general principles of survey-course construction, lecture technique, and textbook evaluation; historiographical topics will include the Reformation, the Enlightenment, the Industrial Revolution, the French Revolution, the rise of Nationalism, imperialism, the two World Wars, the Cold War and decolonization. (Typically Offered: Spring)

HIST 5860: Readings Seminar in Women's and Gender History

(Cross-listed with WGS 5860).

Credits: 3. Contact Hours: Lecture 3.

Readings in women's and gender history.

HIST 5900: Special Topics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

HIST 5910: Directed Readings in History

Credits: 1-3. Repeatable, maximum of 9 credits.

Individually directed readings in History for doctoral students preparing for preliminary examinations in Rural, Agricultural, Technological and Environmental History (RATE). Graduation Restriction: Only 9 credits of HIST 5910 may count toward graduation. (Typically Offered: Fall, Spring, Summer)

HIST 5930A: Research Seminar in American History: Colonial Period

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Topics vary each time offered.

HIST 5930B: Research Seminar in American History: Nineteenth Century

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Topics vary each time offered.

HIST 5930C: Research Seminar in American History: Twentieth Century

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Topics vary each time offered.

HIST 5930F: Research Seminar in American History: West

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Topics vary each time offered.

HIST 5940A: Research Seminar in European History: Ancient

(Cross-listed with CLST 5940A).

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Topics vary each time offered.

HIST 5940B: Research Seminar in European History: Medieval and Early Modern

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Topics vary each time offered.

HIST 5940C: Research Seminar in European History: Modern

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Topics vary each time offered.

HIST 5980: Methods of Teaching History/Social Sciences

Credits: 3. Contact Hours: Lecture 3.

Theories and processes of teaching and learning secondary history/social sciences. Emphasis on development and enactment of current methods, assessments, and curriculum materials for providing appropriate learning experiences. (Typically Offered: Fall, Spring)

HIST 5990: Creative Component

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**HIST 6100: Research Seminar in American Rural and Agricultural History**

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Emphasis varies each time offered.

HIST 6120: Research Seminar in Environmental History

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Emphasis varies each time offered.

HIST 6140: Research Seminar in the History of Technology

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Emphasis varies each time offered.

HIST 6990: Research

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

Graduate student thesis research. (Typically Offered: Fall, Spring, Summer)

Honors (HON)

Courses primarily for undergraduates:**HON 1210: First-Year Honors Seminar**

Credits: 1. Contact Hours: Laboratory 2.

Orientation to Iowa State University and to the University Honors Program. Students will meet and work with other high-ability students for the purpose of exchanging ideas and considering alternative futures as a basis for launching personalized academic programs and professional careers. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

HON 2900: Special Problems

Credits: 1-2.

Independent study on topics of an interdisciplinary nature. Intended primarily for freshmen and sophomores. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

HON 2900H: Honors

Credits: 1-2.

Independent research study as a part of the First-Year Honors Mentor program (FHMP), which offers first-year honors students the opportunity to get research experiences with a faculty mentor. The main objectives of the FHMP are to develop students' interest in and understanding of academic research and to help them identify a research area for an honors capstone project. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

HON 2900U: Undergraduate Research

Credits: 1-30.

Prereq: Membership in the University Honors Program; Permission of the University Honors Program Director

Independent study as a continuation of the First-Year Honors Mentor program (FHMP), which offers second-year honors students the opportunity to continue research experiences with the same FHMP faculty mentor as in the HON 2900H course. The main objectives are to extend students' involvement in research and understanding of an academic field and to help them identify a research area for an honors capstone project. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

HON 3020: First-Year Honors Leadership Development

Credits: 2. Contact Hours: Laboratory 2, Lecture 1.

Prereq: Permission of the Director for First-Year Honors Program

For students serving as leaders of First-Year Honors Seminars, under faculty supervision. Development of teaching and leadership skills to augment the experiential education students are gaining by co-instructing Honors 1210. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

HON 3210: University Honors Seminars

Credits: 1-2. Contact Hours: Lecture 2.

Repeatable.

Prereq: Membership in the University Honors Program

Interdisciplinary seminars on topics to be announced in advance. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

HON 3220: University Honors Seminars

Credits: 1-2. Contact Hours: Lecture 2.

Repeatable.

Prereq: Membership in the University Honors Program

Interdisciplinary seminars on topics to be announced in advance. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

HON 3230: University Honors Seminars

Credits: 1-2. Contact Hours: Lecture 2.

Repeatable.

Prereq: Membership in the University Honors Program

Interdisciplinary seminars on topics to be announced in advance. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

HON 3240: University Honors Seminars

Credits: 1-2. Contact Hours: Lecture 2.

Repeatable.

Prereq: Membership in the University Honors Program

Interdisciplinary seminars on topics to be announced in advance. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

HON 4900: Independent Study

Credits: 1-30. Repeatable.

Prereq: Department Permission for Course

Independent study on topics of an interdisciplinary nature. Intended primarily for juniors and seniors. (Typically Offered: Fall, Spring)

Horticulture (HORT)

Courses primarily for undergraduates:

HORT 1100: Professional and Educational Development in Horticulture

Credits: 1. Contact Hours: Lecture 1.

Intended for first-year students and others new to the horticulture curriculum. Introduction to professional and educational development within horticulture. Focus is on university and career acclimation. Assessed service-learning component. (Typically Offered: Fall)

HORT 1210: Home Horticulture

Credits: 3. Contact Hours: Discussion 1, Lecture 2.

Growing plants in and around the home including requirements for growing indoor plants, plant propagation, landscape design, and maintaining trees, lawns, flower, fruit, and vegetable gardens. Recitation includes demonstrations and hands-on activities that illustrate principles of designing, growing and maintaining plants for both indoor and outdoor gardens. (Typically Offered: Fall, Spring)

HORT 1310: Floral Design

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Introduces basic geometric design of fresh arrangements, corsages, and holiday arrangements. Includes use of tools and supplies. (Typically Offered: Fall, Spring)

HORT 1320: Wedding and Event Floral Design

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Prereq: HORT 1310

Principles of design and proper mechanics for ceremony flowers, reception flowers, personal flowers, bridal bouquets, and event florals. Flower and plant materials that are commonly used in the event industry. Plan, design, cost, order, and create florals for a wedding, then present as the final project for implementation. (Typically Offered: Fall, Spring)

HORT 1930A: Topics in Horticulture: Greenhouse Crops

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Practical courses in the field of horticulture. Graduation Restriction: A maximum of 6 credits of HORT 1930 may be used toward the total of 1280 credits required for graduation. (Typically Offered: Fall, Spring, Summer)

HORT 1930B: Topics in Horticulture: Nursery Crops

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Practical courses in the field of horticulture. Graduation Restriction: A maximum of 6 credits of HORT 1930 may be used toward the total of 1280 credits required for graduation. (Typically Offered: Fall, Spring, Summer)

HORT 1930C: Topics in Horticulture: Turfgrass

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Practical courses in the field of horticulture. Graduation Restriction: A maximum of 6 credits of HORT 1930 may be used toward the total of 1280 credits required for graduation. (Typically Offered: Fall, Spring, Summer)

HORT 1930D: Topics in Horticulture: Fruit Crops

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Practical courses in the field of horticulture. Graduation Restriction: A maximum of 6 credits of HORT 1930 may be used toward the total of 1280 credits required for graduation. (Typically Offered: Fall, Spring, Summer)

HORT 1930E: Topics in Horticulture: Vegetable Crops

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Practical courses in the field of horticulture. Graduation Restriction: A maximum of 6 credits of HORT 1930 may be used toward the total of 1280 credits required for graduation. (Typically Offered: Fall, Spring, Summer)

HORT 1930F: Topics in Horticulture: Cross-Commodity

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Practical courses in the field of horticulture. Graduation Restriction: A maximum of 6 credits of HORT 1930 may be used toward the total of 1280 credits required for graduation. (Typically Offered: Fall, Spring, Summer)

HORT 1930G: Topics in Horticulture: Landscape Horticulture

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable, maximum of 6 credits.

Practical courses in the field of horticulture. Graduation Restriction: A maximum of 6 credits of HORT 1930 may be used toward the total of 1280 credits required for graduation. (Typically Offered: Fall, Spring, Summer)

HORT 2210: Principles of Horticulture Science

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Credit or enrollment in BIOL 2110

Biological principles of growing horticultural crops including anatomy, reproduction, light, temperature, water, nutrition, and growth and development. Laboratory exercises emphasize environmental factors and permit detailed observation of plant growth. (Typically Offered: Fall, Spring)

HORT 2330: House Plants and Interiorscaping

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Basic introduction to indoor houseplants and interiorscapes. Understand plant selection, identification, maintenance, and problem solving.

Learn current houseplant trends, commercial interior plant design, and installation. A beneficial course for students with an interest in house plants, retail plant sales, Interiorscaping, event design, or gardening.

(Typically Offered: Fall, Spring)

HORT 2400: Trees, Shrubs, and Woody Vines for Landscaping

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Identification of trees, shrubs, and woody vines. Factors influencing the horticultural use of woody plants. Field trips outside of regular class time may be required. (Typically Offered: Fall)

HORT 2760: Understanding Grape and Wine Science

(Cross-listed with FSHN 2760).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

A scientific introduction to viticulture (grape-growing) and enology (wine-making) and grape and wine chemistry. Topics include grape biology and cultivars, vineyard management, geography of wine, wine production, wine classification, grape and wine chemistry, wine sensory. No wine tasting. (Typically Offered: Spring)

HORT 2810: Landscape Graphics

Credits: 2. Contact Hours: Studio 4.

Introduction to computer and hand rendering techniques of landscape graphics. Students will gain proficiency in plan view and elevation graphics. Intensive studio and computer based instruction. (Typically Offered: Fall)

HORT 2830: Pesticide Application Certification

(Cross-listed with AGRON 2830/ FOR 2830/ ENT 2830).

Credits: 2. Contact Hours: Lecture 2.

Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized. (Typically Offered: Spring)

HORT 2910A: Horticulture Professional Development: Turfgrass Competition

Credits: 1. Contact Hours: Laboratory 2.

Repeatable, maximum of 4 credits.

Prereq: Instructor Permission for Course

Intensive training in preparation for intercollegiate competition in turfgrass, planting, design, plant identification, installation, cost estimating, and other skills at national contests in horticulture. Students must compete in related national competition to earn credit. Graduation Restriction: Only one credit of HORT 2910A, 2910B, or 2910C may count toward Horticulture credits for graduation. A maximum of four credits of any combination of HORT 2910A, 2910B, and 2910C may count toward credits for graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

HORT 2910B: Horticulture Professional Development: Landscape Competition

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 4 credits.

Prereq: Instructor Permission for Course

Intensive training in preparation for intercollegiate competition in planting, design, plant identification, installation, cost estimating, and other skills at national contests in horticulture. Students must compete in related national competition to earn credit. Graduation Restriction: Only one credit of HORT 2910A, 2910B, or 2910C may count toward Horticulture credits for graduation. A maximum of four credits of any combination of HORT 2910A, 2910B, and 2910C may count toward credits for graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

HORT 2910C: Horticulture Professional Development: Cross-Commodity

Credits: 1. Contact Hours: Laboratory 2.

Repeatable, maximum of 4 credits.

Prereq: Instructor Permission for Course

Intensive training in preparation for intercollegiate competition in planting, plant identification and other skills at national contests in horticulture. Students must compete in related national competition to earn credit. Graduation Restriction: Only one credit of HORT 2910A, 2910B, or 2910C may count toward Horticulture credits for graduation. A maximum of four credits of any combination of HORT 2910A, 2910B, and 2910C may count toward credits for graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

HORT 3210: Horticulture Physiology

Credits: 3. Contact Hours: Lecture 3.

Prereq: HORT 2210 or BIOL 2110

Principles of plant physiology relating to growth and development of horticultural plants including plant water relations, membrane transport, photosynthesis, photomorphogenesis, respiration, and phytohormones. Emphasis on plant's responses to environmental factors (temperature, water, and light) including cellular and whole-plant physiology under stressful environments. (Typically Offered: Fall)

HORT 3220: Plant Propagation

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: HORT 2210 or BIOL 2110

Fundamental principles underlying sexual and asexual propagation of plants; practice in reproducing plants by use of seeds, cuttings, layering, grafting and budding and tissue culture. (Typically Offered: Spring)

HORT 3300: Herbaceous Ornamental Plants

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: HORT 2210 or Permission of Instructor

Identification, botanical characteristics, origins, propagation, uses and general culture of herbaceous annual and perennial plants for Midwestern gardens and landscapes. (Typically Offered: Fall)

HORT 3310: Hydroponic Crop Production

Credits: 2. Contact Hours: Lecture 2.

Prereq: AGRON 1810 or HORT 2210 or 3 credits in Biological Sciences

Principles and practices of hydroponic systems, crop production and culture, aquaponic systems, and new food and medicinal crops for hydroponic systems. Offered odd-numbered years. (Typically Offered: Fall)

HORT 3320: Greenhouse and Nursery Operations and Management

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: HORT 2210

Operation and management of greenhouses, nurseries, and other controlled environment agriculture structures and facilities. Principle of site selection, facility design and methods of monitoring and manipulating environmental, cultural, and management factors such as light, temperature, fertility, substrate, etc., to maximize production efficiency. Emphasis placed on the principles of production of both ornamental and food crops. Greenhouse analysis project required. (Typically Offered: Spring)

HORT 3380: Seed Science and Technology

(Cross-listed with AGRON 3380).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: (AGRON 1810 or HORT 2210); 3 credits of BIOL

Seed production, maturation, dormancy, vigor, deterioration, and related aspects of enhancement, conditioning, storage, and quality evaluation. Aspects of the seed industry and regulation of seed marketing. (Typically Offered: Fall)

HORT 3410: Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs

Credits: 2. Contact Hours: Lecture 2.

Prereq: HORT 2400 or LA 2210 or LA 2220

Cultivars of the most prevalent and economically important woody landscape plants will be taught. The importance of cultivars to the nursery and landscaping professions and suggestions for their proper usage will be discussed. (Typically Offered: Spring)

HORT 3420: Landscape Plant Installation, Establishment, and Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: HORT 2400 or LA 2210 or LA 2220

Principles and practices involved with the establishment and management of landscapes. Laboratory work involves site evaluation, installation techniques, postplant care, and management of established landscape plants. (Typically Offered: Spring)

HORT 3510: Turfgrass Establishment and Management

(Cross-listed with AGRON 3510).

Credits: 3. Contact Hours: Lecture 3.

Prereq: HORT 2210 or AGRON 1810 or BIOL 2110

Principles and practices of turfgrass propagation, establishment, and management. Specialized practices relative to professional lawn care, golf courses, athletic fields, highway roadsides, and seed and sod production. The biology and control of turfgrass pests. (Typically Offered: Fall)

HORT 3510L: Turfgrass Establishment and Management Laboratory

(Cross-listed with AGRON 3510L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment in HORT 3510

Those enrolled in the horticulture curriculum are required to take 3510L in conjunction with 3510 except by permission of the instructor. (Typically Offered: Fall)

HORT 3540: Soils and Plant Growth

(Cross-listed with AGRON 3540).

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 1820; 3 credits of BIOL

Effects of chemical, physical, and biological properties of soils on plant growth, with emphasis on nutritive elements, pH, organic matter maintenance, and rooting development. (Typically Offered: Fall, Spring)

HORT 3540L: Soils and Plant Growth Laboratory

(Cross-listed with AGRON 3540L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: AGRON or HORT major with Credit or concurrent enrollment in AGRON 3540

Laboratory exercises in soil testing that assess a soil's ability to support nutritive requirements for plant growth. (Typically Offered: Fall, Spring)

HORT 3760: Fundamentals of Field Production of Horticultural Food Crops

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 1810 or HORT 2210

An introduction to field production of fruit and vegetable crops and the theoretical and practical knowledge required for successfully producing them. Topics will include basic principles and practices of fruit and vegetable production, site selection, soil techniques, irrigation management, equipment and tools, integrated pest management, season extension strategies, postharvest handling and food safety, marketing, and basic business planning for fruit and vegetable enterprises. Additionally, this course will prepare students for HORT 4610 and HORT 4710, that are advanced level courses focusing on fruit and vegetable production. (Typically Offered: Fall)

HORT 3800: Principles of Garden Composition

Credits: 2. Contact Hours: Lecture 2.

Functional and aesthetic aspects of landscape planning as a basis for design decisions; emphasis on spatial design and plant selection. Includes site analysis, design process, and design principles. (Typically Offered: Spring)

HORT 3810: Beginning Garden Composition Studio

Credits: 2. Contact Hours: Studio 4.

Prereq: HORT 2810; (HORT 2400 or HORT 3300); concurrent enrollment in HORT 3800

Introduction to landscape design process. Intensive studio-based projects implementing principles of landscape design, concept development, and graphic communication. (Typically Offered: Spring)

HORT 3910: Horticultural Management Experience

Credits: 1. Repeatable.

Prereq: HORT 2210; Department Permission

A structured work experience for the student to gain insight into management operations associated with production and management of horticultural crops. A report of 10 or more pages describing the student's experience is required. One credit is given for each term the student is enrolled in the course. Graduation Restriction: A maximum of two credits may be used toward the horticultural sciences course requirements, and two additional credits may be used toward the 128 credits required for graduation. (Typically Offered: Fall, Spring, Summer)

HORT 3980: Cooperative Education

Credits: Required. Repeatable.

Prereq: Department Permission for Course

Students must register for this course before commencing each work period. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

HORT 4210: Introduction to Plant Breeding

(Cross-listed with AGRON 4210).

Credits: 3. Contact Hours: Lecture 3.

Prereq: GEN 3200 or BIOL 3130

Fundamental principles of plant breeding and cultivar development, breeding methods for self-pollinated, cross-pollinated and clonal crops. (Typically Offered: Fall)

HORT 4240: Sustainable and Environmental Horticulture Systems

(Cross-listed with ENVS 4240).

Credits: 3. Contact Hours: Lecture 3.

Inquiry into ethical issues and environmental consequences of horticultural cropping systems, production practices and managed landscapes. Emphasis on systems that are resource efficient, environmentally sound, socially acceptable, and profitable. Offered odd-numbered years. (Typically Offered: Spring)

HORT 4340: Floriculture Crop Production

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: HORT 3320

Principles and practices of flowering and ornamental greenhouse crop production. Emphasis is placed on production of flowering potted plants, cut flowers, and foliage crops produced in greenhouses and other controlled environments. An overnight class field trip outside scheduled class time is required. Offered odd-numbered years. (Typically Offered: Fall)

HORT 4350: Landscape Plant Production

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: HORT 3320

Principles and practices of producing herbaceous and woody landscape plants for gardens, landscapes, restoration and other outdoor uses. Emphasis is placed on the production of: seedling plugs and rooted cuttings; container grown herbaceous annual and perennials; tree, shrubs, and vines; and native plants. An overnight class field trip outside scheduled class time is required. Offered odd-numbered years. (Typically Offered: Spring)

HORT 4440: Landscape Construction Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Principles and practices of residential landscape construction. Encompasses project management, landscape estimating and overview of common landscape materials. Laboratory work involves field trips and project installation. (Typically Offered: Fall)

HORT 4510: Professional Turfgrass Management

Credits: 2. Contact Hours: Lecture 2.

Prereq: HORT 3510

Turfgrass science including the study of (1) specific information on soil chemistry and soil modification as they relate to the development and maintenance of turfgrass areas, (2) specialized management practices used in athletic field care, professional lawn care, and golf course industries, and (3) construction methods for golf courses and sports fields. Offered odd-numbered years. (Typically Offered: Spring)

HORT 4520: Integrated Management of Diseases and Insect Pests of Turfgrasses

(Cross-listed with ENT 4520/ PLP 4520).

Credits: 3. Contact Hours: Lecture 3.

Prereq: HORT 3510

Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments. Offered even-numbered years. (Typically Offered: Spring)

HORT 4530: Sports Turf Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: HORT 3510

Management techniques for today's specialized athletic fields. The horticultural and budgetary aspects of football, soccer, baseball, and softball fields will be presented. Field trips and laboratory exercises will develop a practical understanding of actual principles in field development, construction, and management. Offered even-numbered years. (Typically Offered: Fall)

HORT 4540: Turf & Landscape Irrigation

Credits: 3. Contact Hours: Lecture 3.

Irrigation systems and principles for turf and landscape environments. Topics include design, installation, equipment, management, and troubleshooting of irrigation systems for golf, athletic fields, residential lawns and landscapes. Participation in practical exercises and local field trips to irrigation sites is required. Offered odd-numbered years. (Typically Offered: Fall)

HORT 4610: Fruit Crop Production and Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: HORT 2210

Principles and practices of small fruit; tree fruit, and nut culture and production. Morphology, physiology of growth and development, plant establishment, pest management, pruning, training, harvesting, storage, and marketing of commercial temperate fruit and nut crops. Emphasis on sustainable practices. Participation in practical exercises and local field trips is required. Offered odd-numbered years. (Typically Offered: Spring)

HORT 4710: Vegetable Production and Management

(Dual-listed with HORT 5710).

Credits: 2. Contact Hours: Lecture 2.

Prereq: HORT 2210

Principles of vegetable production with emphasis on sustainable production practices, market outlets, business aspects, and risk management. Topics will include crop classification and rotation; planting methods; crop climatic conditions, physiological growth & development; soil, water, and pest management; cover cropping; season extension strategies; harvest and postharvest management and marketing. Involves visits to growers fields to observe/experience their production enterprise. Offered even-numbered years. (Typically Offered: Spring)

HORT 4710L: Vegetable Production and Management Lab

(Dual-listed with HORT 5710L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Junior or Senior classification; concurrent enrollment in HORT 4710

Hands-on training in the area of vegetable crop production. Opportunity to grow a variety of vegetables in a heated greenhouse and also conduct greenhouse and lab experiments. The lab also involves visits to vegetable production sites in Iowa to observe/experience and learn from growers and other agricultural professionals. Offered even-numbered years. (Typically Offered: Spring)

HORT 4750: Urban Forestry

(Cross-listed with FOR 4750).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: Junior or senior classification, 3 credits in BIOL

Discussion of establishment and management of woody perennials in community-owned urban greenspaces, consideration of urban site and soil characteristics, plant physiology, plant culture, urban forest valuation, inventory methods, species selection, and urban forest maintenance (health care and pest management). (Typically Offered: Fall)

HORT 4760: Horticultural Postharvest Technology

(Dual-listed with HORT 5760).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: HORT 2210

Study of pre- and post-harvest factors, procedures, and challenges that affect market quality of horticultural commodities. Emphasis on storage and handling technologies to preserve quality and extend storage life of edible and ornamental horticultural crops. Field trips outside scheduled class time required. Offered odd-numbered years. (Typically Offered: Fall)

HORT 4810: Advanced Garden Composition

Credits: 2. Contact Hours: Studio 4.

Prereq: HORT 2400 and HORT 3300 and HORT 3800 and HORT 3810

Priority given to Landscape Design Installation and Management option students. Development of residential landscapes using design principles and the design process. Projects encompass site analysis, concept development, preliminary design, final design, and graphic presentation techniques. Techniques will include hand and computer rendering. (Typically Offered: Fall)

HORT 4840: Organic Agricultural Theory and Practice

(Dual-listed with AGRON 5840/ HORT 5840/ SUSAG 5840). (Cross-listed with AGRON 4840).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 9 credits in biological or physical sciences

Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives. Offered odd-numbered years. (Typically Offered: Spring)

HORT 4900A: Independent Study: Greenhouse Crops

Credits: 1-30. Repeatable, maximum of 4 credits.

Prereq: Junior or Senior classification in HORT; Permission of Instructor

Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. Graduation Restriction: A maximum of 4 credits of HORT 4900 and an additional 2 credits of 4900 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 4900B: Independent Study: Nursery Crops

Credits: 1-30. Repeatable, maximum of 4 credits.

Prereq: Junior or Senior classification in HORT; Permission of Instructor

Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. Graduation Restriction: A maximum of 4 credits of HORT 4900 and an additional 2 credits of 4900 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 4900C: Independent Study: Turfgrass

Credits: 1-30. Repeatable, maximum of 4 credits.

Prereq: Junior or Senior classification in HORT; Permission of Instructor

Investigation of topic holding special interest to the student.

Comprehensive report required. Election of course and topic must be approved by department head. Graduation Restriction: A maximum of 4 credits of HORT 4900 and an additional 2 credits of 4900 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 4900D: Independent Study: Fruit Crops

Credits: 1-30. Repeatable, maximum of 4 credits.

Prereq: Junior or Senior classification in HORT; Permission of Instructor

Investigation of topic holding special interest to the student.

Comprehensive report required. Election of course and topic must be approved by department head. Graduation Restriction: A maximum of 4 credits of HORT 4900 and an additional 2 credits of 4900 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 4900E: Independent Study: Vegetable Crops

Credits: 1-30. Repeatable, maximum of 4 credits.

Prereq: Junior or Senior classification in HORT; Permission of Instructor

Investigation of topic holding special interest to the student.

Comprehensive report required. Election of course and topic must be approved by department head. Graduation Restriction: A maximum of 4 credits of HORT 4900 and an additional 2 credits of 4900 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 4900F: Independent Study: Cross-Commodity

Credits: 1-30. Repeatable, maximum of 4 credits.

Prereq: Junior or Senior classification in HORT; Permission of Instructor

Investigation of topic holding special interest to the student.

Comprehensive report required. Election of course and topic must be approved by department head. Graduation Restriction: A maximum of 4 credits of HORT 4900 and an additional 2 credits of 4900 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 4900G: Independent Study: Landscape Horticulture

Credits: 1-30. Repeatable, maximum of 4 credits.

Prereq: Junior or Senior classification in HORT; Permission of Instructor

Investigation of topic holding special interest to the student.

Comprehensive report required. Election of course and topic must be approved by department head. Graduation Restriction: A maximum of 4 credits of HORT 4900 and an additional 2 credits of 4900 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 4900H: Independent Study: Honors

Credits: 1-30. Repeatable, maximum of 4 credits.

Prereq: Junior or Senior classification in HORT; Permission of Instructor

Investigation of topic holding special interest to the student.

Comprehensive report required. Election of course and topic must be approved by department head. Graduation Restriction: A maximum of 4 credits of HORT 4900 and an additional 2 credits of 4900 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 4900I: Independent Study: International Study

Credits: 1-30. Repeatable, maximum of 4 credits.

Prereq: Junior or Senior classification in HORT; Permission of Instructor

Investigation of topic holding special interest to the student.

Comprehensive report required. Election of course and topic must be approved by department head. Graduation Restriction: A maximum of 4 credits of HORT 4900 and an additional 2 credits of 4900 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 4900J: Independent Study: Entrepreneurship

Credits: 1-30. Repeatable, maximum of 4 credits.

Prereq: Junior or Senior classification in HORT; Permission of Instructor

Investigation of topic holding special interest to the student.

Comprehensive report required. Election of course and topic must be approved by department head. Graduation Restriction: A maximum of 4 credits of HORT 4900 and an additional 2 credits of 4900 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 4910: Seed Science Internship Experience

(Cross-listed with AGRON 4910).

Credits: 1-2. Repeatable, maximum of 2 credits.

Prereq: AGRON 3380; Permission of Instructor

A professional work experience and creative project for seed science secondary majors. The project requires the prior approval and participation of the employer and instructor. The student must submit a written report. Advanced approval and participation of employer and instructor required. (Typically Offered: Fall, Spring, Summer)

HORT 4930: Workshop in Horticulture

Credits: 1-30. Repeatable.

Off campus. Offered as demand warrants. Workshops in horticulture.

HORT 4940A: Service Learning: International

Credits: 1-30. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

Selected projects that result in outcomes benefiting a non-Iowa State University entity while instilling professional ethics and accomplishing student learning goals. Course expenses paid by student. Assessed service-learning component. Graduation Restriction: A maximum of 4 credits of HORT 4940 may be used toward the Horticulture credits required for graduation. (Typically Offered: Fall, Spring, Summer)

HORT 4940B: Service Learning: Domestic

Credits: 1-30. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

Selected projects that result in outcomes benefiting a non-Iowa State University entity while instilling professional ethics and accomplishing student learning goals. Course expenses paid by student. Assessed service-learning component. Graduation Restriction: A maximum of 4 credits of HORT 4940 may be used toward the Horticulture credits required for graduation. (Typically Offered: Fall, Spring, Summer)

HORT 4950: Horticulture Travel Course Preparation

Credits: Required. Contact Hours: Lecture 1.

Repeatable.

Prereq: Instructor Permission for Course

Limited enrollment. Students enrolled in this course also intend to register for Hort 496 the following term. Topics include preparation for safe international travel, the horticultural/agricultural industries, climate, crops, economics, geography, history, marketing, soils, culture, traditions, and horticultural/agricultural development of the country to be visited. Students enroll in this course the term immediately before travel to the foreign country. (Typically Offered: Fall, Spring, Summer)

HORT 4960: Horticulture Travel Course

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

Limited enrollment. Study and tour of production methods in major horticultural regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, cultures, and history of horticultural crops. Location and duration of tours will vary. Tour expenses paid by students. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

HORT 4970X: Domestic Horticulture Travel Course

Credits: 1-4. Contact Hours: Lecture 4.

Repeatable.

Study and tour of production methods in major horticultural regions of the US. Influence of climate, economics, geography, soils, landscapes, markets, cultures, and history of horticultural crops. Location and duration of tours will vary. Tour expenses paid by students. Limited enrollment. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

HORT 5060: Crop Genetics

(Cross-listed with AGRON 5060).

Credits: 3. Contact Hours: Lecture 3.

Introduction to plant reproductive systems, gene segregation and linkage analysis, molecular nature of genes and how genes confer phenotypes, mutation and biotechnology, quantitative inheritance and population genetics to prepare students for subsequent courses in crop improvement. Enrollment is restricted to off-campus MS in Plant Breeding students. (Typically Offered: Fall)

HORT 5110: Integrated Management of Tropical Crops

(Cross-listed with ENT 5110/ PLP 5110).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (ENT 3700 or ENT 3760 or HORT 2210 or PLP 4080 or PLP 4160) or Graduate Classification

Applications of Integrated Crop management principles (including plant pathology, entomology, and horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by a 10-day tour of Costa Rican agriculture during spring break, then writeup of individual projects. Offered odd-numbered years. Meets International Perspectives Requirement. (Typically Offered: Spring)

HORT 5240: Sustainable and Environmental Horticulture Systems

Credits: 3. Contact Hours: Lecture 3.

Inquiry into ethical issues and environmental consequences of horticultural cropping systems, production practices and managed landscapes. Emphasis on systems that are resource efficient, environmentally sound, socially acceptable and profitable. Offered odd-numbered years. (Typically Offered: Spring)

HORT 5300: Research Orientation

Credits: 2. Contact Hours: Lecture 2.

Instruction in scientific methods and communication skills. (Typically Offered: Fall)

HORT 5380: Seed Physiology and the Environment

(Cross-listed with AGRON 5380).

Credits: 2. Contact Hours: Lecture 2.

Prereq: AGRON 3160; CHEM 2310 or CHEM 3310 or graduate standing
Physiological aspects of seed development, maturation, longevity, dormancy, and germination of agronomic and horticultural crops and their interactions with field and storage environments. Emphasis on current literature and advanced methodology. Offered even-numbered years. (Typically Offered: Fall)

HORT 5420A: Introduction to Molecular Biology Techniques: DNA Techniques

(Cross-listed with BMS 5420A/ EEOB 5420A/ FSHN 5420A/ GDCB 5420A/ BBMB 5420A/ NREM 5420A/ NUTRS 5420A/ VDPAM 5420A/ VMPM 5420A).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

HORT 5420B: Introduction to Molecular Biology Techniques: Protein

(Cross-listed with BMS 5420B/ EEOB 5420B/ FSHN 5420B/ GDCB 5420B/ BBMB 5420B/ NREM 5420B/ NUTRS 5420B/ VDPAM 5420B).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only. (Typically Offered: Spring, Summer)

HORT 5420C: Introduction to Molecular Biology Techniques: Cell Techniques

(Cross-listed with BMS 5420C/ EEOB 5420C/ FSHN 5420C/ GDCB 5420C/ BBMB 5420C/ NREM 5420C/ NUTRS 5420C/ VMPM 5420C/ VDPAM 5420C).

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. ular biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

HORT 5420D: Introduction to Molecular Biology Techniques: Plant Transformation

(Cross-listed with BMS 5420D/ EEOB 5420D/ FSHN 5420D/ GDCB 5420D/ BBMB 5420D/ NREM 5420D/ NUTRS 5420D/ VMPM 5420D/ VDPAM 5420D).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of tranformants. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

HORT 5420E: Introduction to Molecular Biology Techniques: Proteomics

(Cross-listed with BMS 5420E/ EEOB 5420E/ FSHN 5420E/ GDCB 5420E/ BBMB 5420E/ NREM 5420E/ NUTRS 5420E/ VMPM 5420E/ VDPAM 5420E).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

HORT 5420F: Introduction to Molecular Biology Techniques: Metabolomics

(Cross-listed with BMS 5420F/ EEOB 5420F/ FSHN 5420F/ GDCB 5420F/ BBMB 5420F/ NREM 5420F/ NUTRS 5420F/ VMPM 5420F/ VDPAM 5420F).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

HORT 5420G: Introduction to Molecular Biology Techniques: Genomic

(Cross-listed with BMS 5420G/ EEOB 5420G/ FSHN 5420G/ GDCB 5420G/ BBMB 5420G/ NREM 5420G/ NUTRS 5420G/ VMPM 5420G/ VDPAM 5420G).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

HORT 5430: Seed Physiology

(Cross-listed with STB 5430).

Credits: 2. Contact Hours: Lecture 2.

Brief introduction to plant physiology. Physiological aspects of seed development, maturation, longevity, dormancy and germination. Links between physiology and seed quality. Offered even-numbered years. (Typically Offered: Fall)

HORT 5460: Strategies for Diversified Food and Farming Systems

(Cross-listed with AGRON 5460/ SUSAG 5460).

Credits: 3. Contact Hours: Lecture 3.

Project-focused engagement in food and farming systems using tools and perspectives drawn from multiple disciplines. Includes a field component. Offered odd-numbered years. (Typically Offered: Spring)

HORT 5510: Growth and Development of Perennial Grasses

(Cross-listed with AGRON 5510).

Credits: 2. Contact Hours: Lecture 2.

Selected topics onatomy, morphology, and physiology relative to growth and development of perennial grasses. Emphasis on growth and development characteristics peculiar to grasses and variations of such characteristics under natural and managed conditions. Offered even-numbered years. (Typically Offered: Spring)

HORT 5520: Integrated Management of Diseases and Insect Pests of Turfgrasses

(Cross-listed with ENT 5520/ PLP 5520).

Credits: 3. Contact Hours: Lecture 3.

Prereq: HORT 3510 or Graduate Classification

Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments. Offered even-numbered years. (Typically Offered: Spring)

HORT 5710: Vegetable Production and Management

(Dual-listed with HORT 4710).

Credits: 2. Contact Hours: Lecture 2.

Prereq: HORT 221 or Graduate Classification

Principles of vegetable production with emphasis on sustainable production practices, market outlets, business aspects, and risk management. Topics will include crop classification and rotation; planting methods; crop climatic conditions, physiological growth & development; soil, water, and pest management; cover cropping; season extension strategies; harvest and postharvest management and marketing. Involves visits to growers fields to observe/experience their production enterprise. Offered even-numbered years. (Typically Offered: Spring)

HORT 5710L: Vegetable Production and Management Lab

(Dual-listed with HORT 4710L).

Credits: 1. Contact Hours: Laboratory 3.

Hands-on training in the area of vegetable crop production. Opportunity to grow a variety of vegetables in a heated greenhouse and also conduct greenhouse and lab experiments. The lab also involves visits to vegetable production sites in Iowa to observe/experience and learn from growers and other agricultural professionals. Offered even-numbered years. (Typically Offered: Spring)

HORT 5760: Horticultural Postharvest Technology

(Dual-listed with HORT 4760).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: HORT 2210

Study of pre- and post-harvest factors, procedures, and challenges that affect market quality of horticultural commodities. Emphasis on storage and handling technologies to preserve quality and extend storage life of edible and ornamental horticultural crops. Field trips outside scheduled class time required. Offered odd-numbered years. (Typically Offered: Fall)

HORT 5810: Experience in Plant Science Extension and Outreach

(Cross-listed with AGRON 5810/ ENT 5810/ PLP 5810).

Credits: 1.

A supervised learning experience in several extension delivery methods used in the plant sciences. Participation in Iowa State University-based extension programs that may include field crops horticulture, or Master Gardener programming. Offered odd-numbered years. (Typically Offered: Summer)

HORT 5840: Organic Agricultural Theory and Practice

(Dual-listed with AGRON 4840/ HORT 4840/ SUSAG 4840). (Cross-listed with AGRON 5840/ SUSAG 5840).

Credits: 3. Contact Hours: Lecture 3.

Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives. Offered odd-numbered years. (Typically Offered: Spring)

HORT 5900: Special Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

HORT 5930A: Workshop in Horticulture: Greenhouse Crops

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Workshops in horticulture, with emphasis on off-campus instruction.

HORT 5930B: Workshop in Horticulture: Nursery Crops

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Workshops in horticulture, with emphasis on off-campus instruction.

HORT 5930C: Workshop in Horticulture: Turfgrass

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Workshops in horticulture, with emphasis on off-campus instruction.

HORT 5930D: Workshop in Horticulture: Fruit Crops

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Workshops in horticulture, with emphasis on off-campus instruction.

HORT 5930E: Workshop in Horticulture: Vegetable Crops

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Workshops in horticulture, with emphasis on off-campus instruction.

HORT 5930F: Workshop in Horticulture: Cross-Commodity

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Workshops in horticulture, with emphasis on off-campus instruction.

HORT 5930G: Workshop in Horticulture: Landscape Horticulture

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Workshops in horticulture, with emphasis on off-campus instruction.

HORT 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Courses for graduate students:

HORT 6100: Graduate Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

HORT 6900: Advanced Topics

Credits: 1-30. Repeatable.

HORT 6960: Research Seminar

(Cross-listed with AGRON 6960/ BBMB 6960/ FOR 6960/ GDCB 6960/ PLBIO 6960).

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

HORT 6980: Horticulture Teaching Practicum

Credits: 1. Contact Hours: Lecture 1.

Discussions are intended to foster the development of graduate students as teaching assistants and future horticulture/plant science teachers.

Topics include establishing a classroom presence, improving lectures, motivating students, dealing with difficult or disruptive students, and developing a teaching philosophy. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

HORT 6990A: Thesis and Dissertation Research: Greenhouse Crops

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

HORT 6990B: Thesis and Dissertation Research: Nursery Crops

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

HORT 6990C: Thesis and Dissertation Research: Turfgrass

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

HORT 6990D: Thesis and Dissertation Research: Fruit Crops

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

HORT 6990E: Thesis and Dissertation Research: Vegetable Crops

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

HORT 6990F: Thesis and Dissertation Research: Cross-Commodity

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

HORT 6990G: Thesis and Dissertation Research: Landscape Horticulture

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

HORT 6990I: Thesis and Dissertation Research: Biotechnology

Credits: 1-30. Repeatable.

Hospitality Management (HSPM)

Courses primarily for undergraduates:

HSPM 1010: Introduction to the Hospitality Industry

Credits: 3. Contact Hours: Lecture 3.

Introduction to the foodservice, lodging, and tourism components of the hospitality industry. Background information, current issues, and future challenges in various segments of the industry. (Typically Offered: Fall, Spring)

HSPM 1330: Food Safety Certification

Credits: 1. Contact Hours: Lecture 1.

Introduction to safety and sanitation principles in foodservice operations. Characteristics of food, supplies, and equipment as related to quality, sanitation, and safety are discussed. Application of sanitation principles in restaurants are covered as well. Students must pass a National Sanitation Certification Examination to receive credit. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

HSPM 2010: Casino Management I

Credits: 3. Contact Hours: Lecture 3.

An overview of the casino gaming industry. Emphasis will be placed on examination of the history and development of gaming, casino operations, casino games, marketing of the core gaming products, and social and economic impacts of the gaming industry. (Typically Offered: Fall)

HSPM 2250: Introduction to Food Service Operations

Credits: 3. Contact Hours: Lecture 3.

Introduction to food service operations within the hospitality and event industry. Management concepts, distinct features, sustainability, current issues, and trends. (Typically Offered: Spring)

HSPM 2300: Introduction to Hospitality Performance Analysis

Credits: 3. Contact Hours: Lecture 3.

Introduction to Uniform Systems of Accounts for hospitality industry, profitability, income statements, budgeting, managing cash, accounts receivable and payable, costs control, pricing, and evaluation related to restaurant, lodging, and club industry. Preparation for a hospitality accounting certification exam. (Typically Offered: Fall, Spring)

HSPM 2330: Hospitality Sanitation and Safety

Credits: 3. Contact Hours: Lecture 3.

Sanitation and safety principles in hospitality operations. Issues impacting consumers and operators. (Typically Offered: Fall, Spring)

HSPM 2480: Introduction to Senior Living Management

Credits: 3. Contact Hours: Lecture 3.

Survey course provides a comprehensive overview of the history, current issues, and future trends of the senior living industry. Basics about major aspects of senior living management. (Typically Offered: Fall)

HSPM 2600: Global Tourism Management

Credits: 3. Contact Hours: Lecture 3.

Overview of the global tourism industry: hospitality and related services, destination/ attractions, tourist behaviors, and destination marketing. Introduction to destination mix, socio-economic and cultural impacts of tourism, destination organizations, tourist motivations, destination image, marketing, promotions, tourism distribution system, and the future of tourism. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

HSPM 2800: Non-Alcoholic Beverages and Cafe Operations

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or concurrent enrollment in HSPM 1330

Advanced knowledge, preparation, and service of non-alcoholic beverages applied for cafe operations. (Typically Offered: Fall, Spring)

HSPM 2890: Contemporary Club Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: HSPM 1010

Organization and management of private clubs including city, country, and other recreational and social clubs. Field trip may be required. (Typically Offered: Spring)

HSPM 2900: Independent Study

Credits: 1-2. Repeatable, maximum of 4 credits.

Prereq: Freshman or Sophomore Classification. Permission of instructor, advisor, and department chair.

Independent study on topics of special interest to the student, facilitated by approved faculty member. Graduation Restriction: Maximum of 9 credits combined of HSPM 2900 and HSPM 4900 can be applied to graduation. (Typically Offered: Fall, Spring, Summer)

HSPM 3010: Hospitality Revenue Management

Credits: 3. Contact Hours: Lecture 3.

An overview of the revenue management in the lodging and food service industry will be provided. Emphasis will be placed on the application of analytical and forecasting techniques to formulate and implement pricing strategies in responses to daily operation complexities. (Typically Offered: Fall)

HSPM 3150: Hospitality Law

Credits: 3. Contact Hours: Lecture 3.

Laws relating to ownership and operation of hospitality organizations. The duties and rights of both hospitality business operators and customers. Legal implications of various managerial decisions. (Typically Offered: Spring)

HSPM 3200: Attractions and Amusement Park Administration

Credits: 3. Contact Hours: Lecture 3.

Prereq: HSPM 1010 or permission of instructor

Examination of current issues in the attractions and amusement park industry. Emphasis will be placed on development and design along with the functional departments of modern amusement parks and themed attractions. (Typically Offered: Spring)

HSPM 3330: Hospitality Operations Cost Controls

Credits: 3. Contact Hours: Lecture 3.

Introduction to revenue and cost systems in the hospitality industry. Application of principles related to procurement, production, and inventory controls. (Typically Offered: Fall)

HSPM 3520: Lodging Operations Management I

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or concurrent enrollment in HSPM 1010

Introduction to functional department activities and current issues of lodging organizations with emphasis on front office operations and guest services including reservation activities, forecasting, and auditing exercises. (Typically Offered: Fall)

HSPM 3580: Economics for Senior Living Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: HSPM 2480

Overview of supply and demand, product/service development, consumption, and financials of the senior living industry from a management perspective. (Typically Offered: Fall)

HSPM 3800: Food Production Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: HSPM 1330 or 2 cr MICRO; FSHN 1110 or FSHN 2140; FSHN 1150 or FSHN 2150; at least junior classification; enrollment in HSPM 3800L

Principles of and procedures used in food production management including menu planning, costing, work methods, food production systems, quality control, and service. (Typically Offered: Fall, Spring)

HSPM 3800L: Food Production Management Experience

Credits: 3. Contact Hours: Lecture 1, Laboratory 6.

Prereq: HSPM 1330 or 2 cr MICRO; FSHN 1110 or FSHN 2140; FSHN 1150 or FSHN 2150; at least junior classification; enrollment in HSPM 3800

Application of food production and service management principles and procedures in the program's foodservice operation. Field trip. (Typically Offered: Fall, Spring)

HSPM 3830: Wine and Spirits in Hospitality Management

Credits: 2. Contact Hours: Lecture 2.

Prereq: Must be at least 21 years old to register

Introduction to history and methods of production for a variety of wines and spirits. Beverage tasting and sensory analysis; product knowledge; service techniques; sales; and alcohol service related to the hospitality industry. Field trip. Must be age 21 or older by first day of class. . (Typically Offered: Fall, Spring)

HSPM 3830L: Wine, Spirits, and Mixology Laboratory in Hospitality Management

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Prereq: Must be at least 21 years old to register

The application of the management principles and procedures related to the sale and service of alcohol, specialty beverages, and cocktails served in the beverage and hospitality industry. Beverage tasting and sensory analysis of products commonly served in the beverage industry. Field trip. Must be age 21 or older by first day of class. . (Typically Offered: Fall, Spring)

HSPM 3850: Beer and Brewed Beverages in Hospitality Management

Credits: 1. Contact Hours: Lecture 2.

Prereq: Must be at least 21 years old to register

Introduction to history and methods of production for a variety of beer, cider, perry, mead, sake and other brewed alcoholic beverages. Beverage tasting and sensory analysis; product knowledge; and service techniques related to the beverage and hospitality industry. Field trip. 8-week course. Must be age 21 or older by first day of class. . (Typically Offered: Fall, Spring)

HSPM 3910: Foodservice Systems Management I

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or concurrent enrollment in HSPM 3800 and HSPM 3800L

Principles and techniques related to basic management, leadership, and human resource management of foodservices in health care and other on-site foodservice settings. Food safety and sanitation for on-site foodservice operations. Graduation Restriction: Credit for either HSPM 3910 or AESHM 2870 and AESHM 4380 may count toward graduation. Not accepted for credit toward a major in Hospitality Management. (Typically Offered: Fall)

HSPM 3920: Foodservice Systems Management II

Credits: 3. Contact Hours: Lecture 3.

Prereq: HSPM 3910

Introduction to cost control in foodservice operations: procedures for controlling food and labor variable costs. Application of principles related to food product selection, specification, purchase, and storage in health care and other onsite operations. Interpretation and application of financial records. Graduation Restriction: Credit for either HSPM 3920 or HSPM 2330 and HSPM 3330 may count toward graduation. Not accepted for credit toward a major in Hospitality Management. (Typically Offered: Spring)

HSPM 3930AX: Workshop: Confectionary Art

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Repeatable.

Intensive 2-to-8-week workshop exploration. Topics vary each time offered. Graduation Restriction: Maximum of 6 credits of HSPM 393 can be applied toward graduation.

HSPM 3930B: Hospitality Management Industry Workshop: Baking and Pastry Art

Credits: 3. Repeatable.

Introduces students with practical experience working in a realistic bakeshop situation to restaurant kitchens and bakeries. Students will become familiar with producing a variety of baked goods as well as setting up "Mise En Place", different baking techniques, and dessert plating techniques for the dining room and banquet situations. Focus on weights, measurements, formulas, general baking classifications, handling, and storage of ingredients, safety and handling, production of yeast raised dough products, cakes, cookies, batters, bread, biscuits, muffins, pies, and special dessert preparation. Introduction to various ingredients and how they affect the finished product by giving a tender crumbed and a well-developed crust. The essential basic functions of ingredients and the techniques of scaling, pan preparation, and sifting. (Typically Offered: Fall, Spring, Summer)

HSPM 3930M: Hospitality Management Industry Workshop: Molecular Gastronomy

Credits: 3. Repeatable.

Introduction to molecular gastronomy as a type of modern and innovative cuisine through both sweet and savory culinary applications. Develop and apply basic and advanced culinary skills. Basic principles of chemistry, biology, and physics and how they can be used in combination with culinary arts techniques to create unique culinary experiences. (Typically Offered: Fall, Spring, Summer)

HSPM 4200: Fairs, Festivals, and Events Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: HSPM 3200

Examine current issues within fairs and festivals. Emphasis placed on the evolution of exhibitions to modern day fairs and festivals, along with the processes necessary for operating fairs and festivals. (Typically Offered: Fall)

HSPM 4330: Hospitality Financial Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 2840; ECON 1010; HSPM 3330; credit or concurrent enrollment in STAT 1010

Fundamental concepts and issues in hospitality finance and investment. Application of financial statement analysis, accounting ratio analysis, and financial instruments in management decision-making. (Typically Offered: Spring)

HSPM 4370: Hospitality Technology Applications

Credits: 3. Contact Hours: Lecture 3.

Prereq: HSPM 1010

Introduction to hospitality technology. Emphasis will be placed on basic computer software and hardware components, property managements, point-of-sales systems; customer relationship management, selecting and purchasing computer systems, electronic distribution systems, and communication networks. (Typically Offered: Fall)

HSPM 4390: Advanced Hospitality Human Resource Management

Credits: 3. Contact Hours: Lecture 3.

Emphasis on development of management personnel in hospitality organizations. Case studies. (Typically Offered: Fall)

HSPM 4520: Lodging Operations Management II

Credits: 3. Contact Hours: Lecture 3.

Prereq: HSPM 3520

Development of business plan and evaluation of business performance in a simulated environment. Operational decision making practices by applying concepts of management, operations, marketing, and finance for a computer-mediated environment. (Typically Offered: Spring)

HSPM 4550: Strategic Management in Hospitality

Credits: 3. Contact Hours: Lecture 3.

Prereq: AESHM 2380 and AESHM 3400; credit or concurrent enrollment in HSPM 4330

Introduction to strategic management principles and practices with an application of human resources, operations, marketing, and financial management concepts. Case studies. (Typically Offered: Spring)

HSPM 4700: Supervised Professional Internship

Credits: 3. Repeatable.

Prereq: Instructor Permission for Course

Supervised work experience with a cooperating firm or organization, documentation of experience, and completion of an internship project. Coursework includes weekly self-reflection and topics related to current issues and career advancement. Employer/experience should be different than employer/experience used for AESHM 1700 and AESHM 2700. Graduation Restriction: No more than 12 credits from AESHM 1700, AESHM 2700, or HSPM 4700 may be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

HSPM 4870: Fine Dining Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: HSPM 3800, HSPM 3800L, and HSPM 1330, or ServSafe® Certification

Exploration of the historical and cultural development of the world food table. Creative experiences with U.S. regional and international foods. Application of management and financial principles in food preparation and service in fine dining settings. Meets International Perspectives Requirement. (Typically Offered: Fall)

HSPM 4890: Issues in Food Safety

(Cross-listed with ANS 4890/ FSHN 4890/ VDPAM 4890).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (Credit or concurrent enrollment in FSHN 1010 or FSHN 2720 or HSPM 2330); (FSHN 4190 or FSHN 4200); FSHN 4030

Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective. (Typically Offered: Spring)

HSPM 4900B: Independent Study: Hospitality Management

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Independent Study in Hospitality Management. (Typically Offered: Fall, Spring, Summer)

HSPM 4900D: Independent Study: Lodging Operations

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

HSPM 4900E: Independent Study: Foodservice Operations

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

HSPM 4900H: Independent Study: Honors

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

HSPM 5050: Hospitality Management Scholarship and Applications

Credits: 1-3. Contact Hours: Laboratory 3.

Repeatable.

Focus on teaching and research scholarship involving the hospitality industry. (Typically Offered: Fall, Summer)

HSPM 5060: Research Seminar in Hospitality Management

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Focus on current research in hospitality industry. Discuss research designs and methods commonly used in hospitality management research; Introduce research proposal development procedures. (Typically Offered: Spring)

HSPM 5070X: Teaching, Career Planning & Professional Development

Credits: 1. Contact Hours: Lecture 1.

Seminar course focused on developing teaching skill, planning career, and practicing professionalism for graduate students in hospitality and tourism management. Introduces and discusses a number of topics regarding the high-impact instructional methods and teaching techniques needs for the future hospitality educators at the college level. Discussion of career planning and professional development for graduate students encompasses the activities and resources that can help students sharpen a skill set to secure their future career as a hospitality educator in the higher education. (Typically Offered: Fall)

HSPM 5330: Financial Decision Making in Hospitality Organizations

Credits: 3. Contact Hours: Lecture 3.

Concepts of financial management applied to strategic decision making. Offered odd-numbered years. (Typically Offered: Spring)

HSPM 5380: Human Resources Development in Hospitality Organizations

Credits: 3. Contact Hours: Lecture 3.

Theories of human resources management. Practices and principles related to development of management personnel. Offered odd-numbered years. (Typically Offered: Fall)

HSPM 5400: Strategic Marketing

Credits: 3. Contact Hours: Lecture 3.

Application of marketing principles in developing effective marketing strategies for hospitality, apparel, and retail organizations. Evaluation of multi-dimensional marketing functions in hospitality organizations. Offered even-numbered years. (Typically Offered: Fall)

HSPM 5550: Strategic Management in Hospitality Organizations

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Strategic management process as a planning and decision-making framework; integration of human resources, operations, marketing, and financial management concepts. Offered even-numbered years. (Typically Offered: Spring)

HSPM 5600: Tourism Management and Tourist Behavior

Credits: 3. Contact Hours: Lecture 3.

Tourism theories and research. Overview of tourism industry, tourism theories, methods, and current issues in destination marketing and management and travel behavior. Evaluation of tourism and destination research. (Typically Offered: Spring)

HSPM 5870: Fine Dining Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Exploration of the historical and cultural development of the world food table. Creative experiences with U.S. regional and international foods. Application of management and financial principles in food preparation and service in fine dining settings. Meets International Perspectives Requirement. (Typically Offered: Fall)

HSPM 5900B: Special Topics: Hospitality Management

Credits: 1-30. Repeatable, maximum of 3 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

HSPM 5900C: Special Topics: Tourism

Credits: 1-30. Repeatable, maximum of 3 credits.

Special topics in tourism. (Typically Offered: Fall, Spring, Summer)

HSPM 5900D: Special Topics: Lodging Operations

Credits: 1-30. Repeatable, maximum of 3 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

HSPM 5900E: Special Topics: Commercial/Retail Foodservice Operations

Credits: 1-30. Repeatable, maximum of 3 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

HSPM 5900F: Special Topics: Onsite Foodservice Operations

Credits: 1-30. Repeatable, maximum of 3 credits.

(Typically Offered: Fall, Spring, Summer)

HSPM 5900G: Special Topics: Event Management

Credits: 1-30. Repeatable, maximum of 6 credits.

Special Topics in Event Management. Graduation Restriction: Only 6 credits of HSPM 5900G can be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

HSPM 5990: Creative Component

Credits: 1-30.

Prereq: Instructor Permission for Course

Creative component as arranged with instructor. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:

HSPM 6040: Professional Writing

Credits: 2. Contact Hours: Lecture 2.

Development of professional written communication with emphasis on abstracts, proposals, and manuscripts. (Typically Offered: Spring, Summer)

HSPM 6080: Administrative Problems

Credits: 1-4. Contact Hours: Lecture 4.

Repeatable, maximum of 4 credits.

Advanced administrative problems; case studies in foodservice and lodging organizations. (Typically Offered: Fall, Spring, Summer)

HSPM 6330: Advanced Hospitality Financial Management

Credits: 3. Contact Hours: Lecture 3.

Theories and research in financial management with emphasis on financial performance and financing decisions. (Typically Offered: Fall, Summer)

HSPM 6380: Advanced Human Resources Management in Hospitality Organizations

Credits: 3. Contact Hours: Lecture 3.

Research in human resources management with an emphasis on organization or unit administration. (Typically Offered: Fall, Summer)

HSPM 6400: Seminar on Marketing Thoughts

Credits: 3. Contact Hours: Lecture 3.

Conceptual and theoretical development of marketing strategies. Analytical and critical review of marketing research and industry practices. (Typically Offered: Fall, Summer)

HSPM 6520: Advanced Lodging Operations

Credits: 3. Contact Hours: Lecture 3.

Analysis and applications of concepts and theories of operations research for lodging operations. (Typically Offered: Spring, Summer)

HSPM 6600: Research Seminar in Tourism Management

Credits: 3. Contact Hours: Lecture 3.

Advanced graduate course on tourism and destination theories and research. Analysis and application of theories, research findings, and research methods in tourism and destination management. Offered odd-numbered years. (Typically Offered: Spring)

HSPM 6800: Analysis of Research in Foodservice Operations

Credits: 3. Contact Hours: Lecture 3.

Analysis and application of theories, research, and research methods in foodservice operations. Offered even-numbered years. (Typically Offered: Spring)

HSPM 6900B: Advanced Topics: Hospitality Management

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable, maximum of 30 credits.

Prereq: Instructor Permission for Course

Advanced study of current topics in hospitality management. (Typically Offered: Fall, Spring, Summer)

HSPM 6900C: Advanced Topics: Tourism

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable, maximum of 30 credits.

Prereq: Instructor Permission for Course

Advanced study of current topics in hospitality management. (Typically Offered: Fall, Spring, Summer)

HSPM 6900D: Advanced Topics: Lodging Operations

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable, maximum of 30 credits.

Prereq: Instructor Permission for Course

Advanced study of current topics in hospitality management. (Typically Offered: Fall, Spring, Summer)

HSPM 6900E: Advanced Topics: Commercial/Retail Foodservice Operations

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable, maximum of 30 credits.

Advanced study of current topics in hospitality management. (Typically Offered: Fall, Spring, Summer)

HSPM 6900F: Advanced Topics: Onsite Foodservice Operations

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable, maximum of 30 credits.

Advanced study of current topics in hospitality management. (Typically Offered: Fall, Spring, Summer)

HSPM 6900G: Advanced Topics: Event Management

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable, maximum of 30 credits.

Advanced study of current topics in event management and hospitality management. (Typically Offered: Fall, Spring, Summer)

HSPM 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Research. (Typically Offered: Fall, Spring, Summer)

HCI 4250: Optimization Methods for Complex Designs

(Cross-listed with ME 4250).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 2650; ME 1600

Optimization involves finding the 'best' according to specified criteria. Review of a range of optimization methods from traditional nonlinear to modern evolutionary methods such as Genetic algorithms. Examination of how these methods can be used to solve a wide variety of design problems across disciplines, including mechanical systems design, biomedical device design, biomedical imaging, and interaction with digital medical data. Students will gain knowledge of numerical optimization algorithms and sufficient understanding of the strengths and weaknesses of these algorithms to apply them appropriately in engineering design. Experience includes code writing and off-the-shelf routines. Numerous case-studies of real-world situations in which problems were modeled and solved using advanced optimization techniques. (Typically Offered: Fall)

Courses primarily for graduate students, open to qualified undergraduates:

HCI 5040: Evaluating Technology-based Learning Environments

(Cross-listed with EDUC 5040).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EDUC 5010

Principles and procedures to plan, design, and conduct effective evaluation studies (formative, summative, usability) in different settings are studied. Opportunities to engage in real or simulated evaluation projects of substantial scope are provided. Create evaluation instruments, develop methods with which to evaluate a product or program, conduct try-outs or usability sessions, analyze the data, report the findings, and recommendations are some of the course activities. (Typically Offered: Spring)

HCI 5100: Foundations of Game-based Learning

(Cross-listed with EDUC 5100).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 12 graduate credits

Theories, principles and best practices of utilizing games in educational environments. Topics include the theoretical foundations of learning games and game play, identity development in online environments, and assessment of learning in and out of games. (Typically Offered: Spring)

Human Computer Interaction (HCI)

Courses primarily for undergraduates:

HCI 5150: Statistical Natural Language Processing

(Cross-listed with ENGL 5150/ LING 5150).

Credits: 3. Contact Hours: Lecture 3.

Introduction to computational techniques involving human language and speech in applications such as information retrieval and extraction, automatic text categorization, word prediction, intelligent Web searching, spelling and grammar checking, speech recognition and synthesis, statistical machine translation, n-grams, POS-tagging, word-sense disambiguation, on-line lexicons and thesauri, markup languages, corpus analysis, and Python programming language.

HCI 5200: Computational Analysis of English

(Cross-listed with ENGL 5200/ LING 5200).

Credits: 3. Contact Hours: Lecture 3.

Concepts and practices for analysis of English by computer with emphasis on the applications of computational analysis to problems in applied linguistics such as corpus analysis and recognition of learner language in computer-assisted learning and language assessment.

HCI 5210: Cognitive Psychology of Human Computer Interaction

(Cross-listed with PSYCH 5210).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Graduate classification

Biological, behavioral, perceptual, cognitive and social issues relevant to human computer interactions.

HCI 5220: Scientific Methods in Human Computer Interaction

(Cross-listed with PSYCH 5220).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Graduate classification

Basics of hypothesis testing, experimental design, analysis and interpretation of data, and the ethical principles of human research as they apply to research in human computer interaction. Offered odd-numbered years. (Typically Offered: Spring)

HCI 5230X: Qualitative Research Methods in HCI

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Introduction to qualitative research methods specific to human computer interaction and user experience research, both from an academic perspective and applied industry perspective. Conduct, write, and critique qualitative research. Examples and projects will be drawn from human computer interaction domains, e.g., mobile apps, web applications, automated vehicle, self-checkout stations, etc. Methods include focus groups, interviews, surveys, and many others. (Typically Offered: Fall)

HCI 5250: Optimization Methods for Complex Designs

(Cross-listed with ME 5250).

Credits: 3. Contact Hours: Lecture 3.

Optimization involves finding the 'best' according to specified criteria. Review of a range of optimization methods from traditional nonlinear to modern evolutionary methods such as Genetic algorithms. Examination of how these methods can be used to solve a wide variety of design problems across disciplines, including mechanical systems design, biomedical device design, biomedical imaging, and interaction with digital medical data. Students will gain knowledge of numerical optimization algorithms and sufficient understanding of the strengths and weaknesses of these algorithms to apply them appropriately in engineering design. Experience includes code writing and off-the-shelf routines. Numerous case-studies of real-world situations in which problems were modeled and solved using advanced optimization techniques. (Typically Offered: Fall)

HCI 5300X: Perspectives in HCI

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

An exploration of different perspectives in HCI that covers: inclusive and humane design; the intersection of technology and race, gender, age, and class; technology around the world; the impact of technology on democracy; social engineering and cybersecurity; and other relevant topics students would like to explore. (Typically Offered: Summer)

HCI 5710: Augmented Reality

Credits: 3. Contact Hours: Lecture 3.

Fundamental technologies enabling augmented reality (AR) application development. Assessment and integration of the hardware and software systems necessary for AR including, tracking, image processing and rendering. Programming skills in C++ and GPU-based optimization are developed to enable evaluation of interaction devices and modalities afforded by AR.

HCI 5740: Computational Implementation and Prototyping in HCI

Credits: 3. Contact Hours: Lecture 3.

Fundamental concepts of software programming and the practical use of the Python programming language. Assignments include user interaction and interface design, information visualization, as well as other computational HCI tools. Intended for graduate students without prior background in software development. Requires programming during class lectures. (Typically Offered: Spring)

HCI 5750: Computational Perception

(Cross-listed with COMS 5750/ CPRE 5750).

Credits: 3. Contact Hours: Lecture 3.

This class covers statistical and algorithmic methods for sensing, recognizing, and interpreting the activities of people by a computer. This semester we will focus on machine perception techniques that facilitate and augment human-computer interaction. The main goal of the class is to introduce computational perception on both theoretical and practical levels. Participation in small groups to design, implement, and evaluate a prototype of a human-computer interaction system that uses one or more of the techniques covered in the lectures. (Typically Offered: Spring)

HCI 5790X: Methods for Interdisciplinary Research

(Cross-listed with ARCH 5790X).

Credits: 3. Contact Hours: Lecture 3.

Introduction to qualitative, quantitative, and experimental methods for interdisciplinary research. Themes drawn from architectural history, design fields, human computer interaction, and applied social sciences; guest speakers attend to present their research methodologies. Students develop a research paper on a topic of their choice.

HCI 5800: Virtual Environments, Virtual Worlds, and Application

(Cross-listed with ME 5800).

Credits: 3. Contact Hours: Lecture 3.

A systematic introduction to the underpinnings of Virtual Environments (VE), Virtual Worlds, advanced displays and immersive technologies; and an overview of some of the applications areas particularly virtual engineering. Offered even-numbered years. (Typically Offered: Spring)

HCI 5840: Python Application Development in HCI

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: Instructor Permission for Course

Implement Python code and write design documents ("specs") and complement their code with sufficiently detailed documentation in development of a large Python project of the student's choosing. Typical development process: idea, specification, prototyping and implementation (including debugging, testing, refactoring) and documentation and result in a demo-able final product. Fulfills the implementation requirement of the HCI program. Offered even-numbered years. (Typically Offered: Summer)

HCI 5850: Developmental Robotics

(Cross-listed with CPRE 5850).

Credits: 3. Contact Hours: Lecture 3.

An introduction to the emerging interdisciplinary field of Developmental Robotics, which crosses the boundaries between robotics, artificial intelligence, developmental psychology, and philosophy. The main goal of this field is to create autonomous robots that are more intelligent, more adaptable, and more useful than the robots of today, which can only function in very limited domains and situations. Offered odd-numbered years. (Typically Offered: Spring)

HCI 5870: Models and Theories in Human Computer Interaction

Credits: 3. Contact Hours: Lecture 3.

Survey of the multidisciplinary models and theories that form the foundation of the science of Human Computer Interaction. Application of the scientific method to solve practical problems by using analyses or approaches from the behavioral and social sciences, and information and computer technology.

HCI 5890: Design and Ethics

(Cross-listed with ARTGR 5890).

Credits: 3. Contact Hours: Lecture 3.

Issues in ethics and decision-making as they relate to technology, design, design research, HCI, and the design industry. (Typically Offered: Fall, Spring)

HCI 5900: Special Topics

Credits: 1-30. Repeatable, maximum of 30 credits.

Prereq: Instructor Permission for Course

Investigation of problems of special interest in human computer interaction.

HCI 5910: Seminar in Human Computer Interaction

Credits: 1-3. Contact Hours: Lecture 1.

Repeatable.

HCI 5950: Visual Design of HCI

Credits: 3. Contact Hours: Lecture 3.

Human interaction design as it applies to HCI. Aspects of audience analysis, design methodologies for creating concepts and solutions, techniques of concept prototyping, and the fundamentals of visual design such as color, type, symbolism, and grid structure. Class discussions, tutorials, and hands-on projects. (Typically Offered: Summer)

HCI 5960: Emerging Practices in Human-Computer Interaction

Credits: 3. Contact Hours: Lecture 3.

Innovative or newly emerging ideas within the HCI research field or applied industry practice, e.g., based on changing cultures or attitudes, new technologies, and new economic forces. (Typically Offered: Summer)

HCI 5990: Creative Component

Credits: 3.

Prereq: Instructor Permission for Course

Creative component for nonthesis option of Master of Science degree.
Offered on a satisfactory-fail basis only.

Courses for graduate students:**HCI 6030: Advanced Learning Environments Design**

(Cross-listed with EDUC 6030).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EDUC 5030

Exploration of advanced aspects of the learning environments design process. Application of analysis, design, development and production, evaluation, implementation, and project management principles. Theory and research in educational technology provides the foundation for design decisions. Focus on current trends in learning environment design and the production and use of educational technology. (Typically Offered: Spring)

HCI 6080: Social Media and Education

(Cross-listed with EDUC 6080).

Credits: 3. Contact Hours: Lecture 3.

Increase understanding of how social media is changing traditional concepts of identity, literacy, citizenship and more. Develop an online social presence through active social media participation. (Typically Offered: Fall)

HCI 6550: Organizational and Social Implications of Human Computer Interaction

(Cross-listed with MIS 6550).

Credits: 3. Contact Hours: Lecture 3.

Examine opportunities and implications of information technologies and human computer interaction on social and organizational systems. Explore ethical and social issues appurtenant to human computer interaction, both from a proscriptive and prescriptive perspective. Develop informed perspective on human computer interaction. Implications on research and development programs.

HCI 6810: Cognitive Engineering

(Cross-listed with IE 6810).

Credits: 3. Contact Hours: Lecture 3.

Provides an overview of human cognitive capabilities and limitations in the design of products, workplaces, and large systems. Contexts vary broadly and could range from simple use of mobile devices to an air-traffic control or nuclear plant command center. Course focuses on what we can infer about users' thoughts and feelings based on what we can measure about their performance and physiological state. Covers the challenge of designing automated systems.

HCI 6970: HCI Internship

Credits: Required. Repeatable.

*Prereq: Instructor Permission for Course***HCI 6990: Research**

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Human Development and Family Studies (HDFS)

Courses primarily for undergraduates:**HDFS 1020: Human Development**

Credits: 3. Contact Hours: Lecture 3.

Overview of life-span developmental tasks (physical, cognitive, language, social, emotional) examined from various theoretical perspectives. Discussion of topics related to family diversity, individual/family health and well-being and reciprocal relationships as affected by external factors. (Typically Offered: Fall, Spring, Summer)

HDFS 1100: Freshman Learning Community Orientation

Credits: 1. Contact Hours: Lecture 1.

Introduction to the Department of Human Development and Family Studies including academic requirements and opportunities, strategies for transitioning to college, learning and study strategies, reading and reflection, and career awareness. (Typically Offered: Fall)

HDFS 1110: New Transfer Student Seminar

Credits: 1. Contact Hours: Lecture 1.

Introduction to HDFS curricula and faculty for students in CHFS, FCEDS or FCP. Department and University policies and procedures, degree audits, and registration. Exploration of campus resources and strategies for student success. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

HDFS 1830: Personal Finance in Early Adulthood

Credits: 1. Contact Hours: Lecture 1.

Introduction to basic concepts and budgeting practices for management of resources and prevention of financial problems commonly associated with college, including credit and student loans. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

HDFS 2080: Early Childhood Education Teacher Orientation

Credits: Required. Contact Hours: Lecture 1.

Prereq: Major in Early Childhood Education

Overview of early childhood education (birth-grade 3) teacher licensure requirements. Program planning and university procedures. Required of all students majoring in early childhood education. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

HDFS 2180: Professional Orientation and Service Learning

Credits: 2. Contact Hours: Lecture 2.

Prereq: Credit or concurrent enrollment in HDFS 1020; major in Human Development and Family Studies

Ethics, professional development, and career exploration in child, adult and family services. Visits to and service learning with programs that serve children, adults and families with diverse needs. Participation in service learning project required. (Typically Offered: Fall, Spring)

HDFS 2230: Child Development and Health

Credits: 3. Contact Hours: Lecture 3.

Typical and atypical development of children prenatal through middle childhood. Examination of healthy development and potential impact of health issues in children. Discussion of influence of the family and society on development. Graduation Restriction: Either HDFS 2230 or HDFS 2240, but not both, may be applied toward graduation. (Typically Offered: Spring)

HDFS 2240: Development in Young Children: Birth through Age 8

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 1020

Learning, growth, and development (typical and atypical) of children from birth through age eight. Explores importance of family, programs, and a diverse society. Strategies for observing, recording, and interpreting children's cognitive, communication, motor, social, and emotional development. Practicum. Graduation Restriction: Either HDFS 2230 or HDFS 2240, but not both, may be applied toward graduation. (Typically Offered: Fall, Spring)

HDFS 2260: Development and Guidance in Middle Childhood

Credits: 3. Contact Hours: Lecture 3.

Prereq: PSYCH 2300 or HDFS 1020

Physical, cognitive, socioemotional, and identity development from 5 to 12 years of age. Development within the contexts of family, school, peers, and society. Guidance of children in family and group settings. (Typically Offered: Fall)

HDFS 2270: Adolescence and Emerging Adulthood

Credits: 3. Contact Hours: Lecture 3.

Prereq: PSYCH 2300 or HDFS 1020

Physical, cognitive, and socioemotional development of adolescents and emerging adults in the context of family, relationships, and culture. (Typically Offered: Fall, Spring)

HDFS 2340: Adult Development

(Cross-listed with GERON 2340).

Credits: 3. Contact Hours: Lecture 3.

Prereq: PSYCH 2300 or HDFS 1020

Introductory exploration of the health, individual and social factors associated with adult development including younger adulthood, middle age and older adulthood. Information is presented from a life-span developmental framework. (Typically Offered: Spring)

HDFS 2390: Consumer Issues

Credits: 3. Contact Hours: Lecture 3.

Introduction to factors affecting consumer decisions of individuals and families, including housing, healthcare, and personal finances. Emphasis on accessibility and affordability, community contexts for families; and consumer protection, legislation and regulation, and consumer fraud. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

HDFS 2400: Literature for Children

Credits: 3. Contact Hours: Lecture 3.

Evaluation of literature for children, including an emphasis on diversity and inclusion; cultural competence. Roles of literature in the overall development of children. Literature selection and use in the home and educational settings. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

HDFS 2490: Parenting and Family Diversity Issues

Credits: 3. Contact Hours: Lecture 3.

Evidence-based, best-practice approaches to child-rearing, guidance, adult-child relationships, and parenting education programs. Theoretical perspectives related to caregiving processes across the lifespan. (Typically Offered: Fall, Spring)

HDFS 2700: Family Communications and Relationships

Credits: 3. Contact Hours: Lecture 3.

Family communication and its function to develop, maintain, enrich and limit family relationships. Family theories related to communication and ethical considerations when working with families. Typically Offered: Fall (annually), Spring (annually), Summer (odd-numbered years). Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring, Summer)

HDFS 2760: Human Sexuality

Credits: 3. Contact Hours: Lecture 3.

Behavioral, biological, and psychological aspects of human sexuality within the social context of family, culture, and society. Role of sexuality in human development. Critical analysis of media and research. Communication and decision-making skills relating to sexuality issues and relationships. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring, Summer)

HDFS 2830: Personal and Family Finance

Credits: 3. Contact Hours: Lecture 3.

Introduction to basic principles of personal and family finance. Budgeting, record keeping, checking and savings accounts, consumer credit, insurance, investments, and taxes. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

HDFS 2830H: Personal and Family Finance: Honors

Credits: 3. Contact Hours: Lecture 3.

Introduction to basic principles of personal and family finance. Budgeting, record keeping, checking and savings accounts, consumer credit, insurance, investments, and taxes. Additional work required to meet Honors requirements. (Typically Offered: Fall, Spring)

HDFS 3170B: Field Experiences: Human Development and Family Studies

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

Consult department office for procedure. Supervised field experience in human development and family studies programs. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

HDFS 3170G: Field Experiences: Family Finance Programs

Credits: 1-6. Repeatable.

Prereq: Department Permission for Course

Consult department office for procedure. Supervised field experience in human development and family studies programs. (Typically Offered: Fall, Spring, Summer)

HDFS 3170H: Field Experiences: Honors

Credits: 1-6. Repeatable.

Prereq: 9 credits in HDFS; Department Permission

Consult department office for procedure. Supervised field experience in human development and family studies programs. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

HDFS 3400: Assessment and Curriculum: Ages Birth through 2 Years

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Assessment strategies for infants and toddlers, including those with special needs. Curricula, learning environments, teaching strategies, health and nutritional practices, and schedules that are developmentally, individually, and culturally appropriate. Using assessment to plan, implement, and evaluate activities to promote physical, motor, cognitive, communication, and social emotional development. Practicum. (Typically Offered: Fall, Spring)

HDFS 3410: Income Tax Planning for Families

Credits: 3. Contact Hours: Lecture 3.

Practice and planning to minimize tax liability and maximize after-tax returns for individuals and families. Addresses components of the US personal income tax system including tax forms, filing status, income, exemptions, exclusions, deductions, adjustments, credits, penalties, and tax rates. The case-problem approach prepares students to plan for themselves and to advise others. (Typically Offered: Fall)

HDFS 3420: Social and Emotional Development and Child-centered Guidance in Early Childhood

Credits: 3. Contact Hours: Lecture 2.

Prereq: HDFS 2240

Guiding prosocial development, self-regulation, and task engagement of children birth to age 8. Focus is on promoting prosocial behaviors through supportive relationships and environments within diverse home, center, or school settings. Functional behavior assessment and ongoing progress monitoring for targeted and intensive interventions. Practicum. Must take HDFS 3400, 3430, or 3440 the same semester. (Typically Offered: Fall, Spring)

HDFS 3430: Assessment and Curriculum: Ages 3 through 6 Years

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: HDFS 2240; HDFS 2400; admission to Educator Preparation program

Assessment strategies for preschool and kindergarten children, including those with special needs. Learning environments, schedules, activities, nutritional practices, and teaching strategies that are developmentally, individually, and culturally appropriate. Using assessment to plan, implement, and evaluate activities to promote physical motor, cognitive, communication, and social emotional development. Practicum. (Typically Offered: Fall, Spring)

HDFS 3440: Programming for Children in Early Care and Education

Credits: 4. Contact Hours: Lecture 3.

Prereq: HDFS 2240

Programming in inclusive child care centers and family child care homes, including those with special needs, aged birth through 8 years. Developing, implementing, and evaluating learning environments; activities and materials; behavioral guidance and classroom management practices; health and nutritional practices; and schedules to ensure developmental, individual, and cultural appropriateness. Monitoring children's development and behavior to promote physical, motor, cognitive, communication, and social emotional development. Learning to collaborate effectively with parents and staff. Practicum. (Typically Offered: Fall, Spring)

HDFS 3450: Inclusive Teaching and Interaction Strategies

Credits: 3. Contact Hours: Lecture 3.

Prereq: (HDFS 2240; SPED 2500) or Permission of Instructor

Instructional strategies, adaptations and specialized materials and equipment to meet the developmental needs of all young learners ages birth through 8 years old, especially those with diverse learning needs and multiple disabilities. Addressing inclusivity, the history of early childhood special education, and the planning and writing of individualized education plans. (Typically Offered: Fall, Spring)

HDFS 3600: Housing and Services for Families and Children

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 credits from the following courses: AESHM 4210; AFAM 3300; AMD 1650, 3620, 4670; AMIN 3100, 2150, 3220; ANTHR (except 2020); CJ (except 2200, 3320); ECON; FSHN 3420; INTST 2350; LING 2190, 2750, 4710; POLS; PSYCH (except 1310); SOC; WGS 2010, 2030, 3010, 3200, 3270, 3280, 3460, 3500, 3850

Approaches to and assessment of housing and services that assist those with special needs including those with disabilities, low-income, children at risk, single-parents, and the homeless. Emphasis on community settings; e.g., residential facilities, group housing, shelters and transitional housing. Meets U.S. Diversity Requirement. (Typically Offered: Fall)

HDFS 3670: Abuse and Illness in Families

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits from the following courses: AESHM 4210; AFAM 3300; AMD 1650, 3620, 4670; AMIN 3100, 2150, 3220; ANTHR (except 2020); CJ (except 2200, 3320); ECON; FSHN 3420; INTST 2350; LING 2190, 2750, 4710; POLS; PSYCH (except 1310); SOC; WGS 2010, 2030, 3010, 3200, 3270, 3280, 3460, 3500, 3850

Causes and consequences of family stressors including physical, sexual, and emotional abuse; substance abuse; and mental and physical illness across the life span. Interplay between victims, offenders, and the treatment system. Typically Offered: Fall (annually), Spring (annually), Summer (even-numbered years). (Typically Offered: Fall, Spring, Summer)

HDFS 3690: Research Methods in Human Development and Family Studies

Credits: 3. Contact Hours: Lecture 3, Laboratory 1.

Prereq: (HDFS 1020 or PSYCH 2300); Junior or Senior classification

Understanding and evaluating research. Use of primary and secondary data to identify and study problems related to human development and family issues. An introduction to statistical concepts and data analysis. Computer laboratory experience. (Typically Offered: Fall, Spring)

HDFS 3730: Death as a Part of Living

(Cross-listed with GERON 3730).

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 1020

Consideration of death in the life span of the individual and the family with opportunity for exploration of personal and societal attitudes. (Typically Offered: Fall, Spring, Summer)

HDFS 3770: Aging and the Family

(Cross-listed with GERON 3770).

Credits: 3. Contact Hours: Lecture 3.

Interchanges of older adults and their families. Emphasis on role changes, social interaction, and independence as influenced by health, finances, lifestyles, and community support. (Typically Offered: Fall, Summer)

HDFS 3780: Retirement Planning and Employee Benefits

(Cross-listed with GERON 3780).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits in ECON, HDFS, or FIN

Financial needs analysis for retirement, characteristics of employer-sponsored and individual retirement plans, tax implications of retirement plans, Social Security funding and benefits, strategies for meeting varying retirement needs in a diverse society, financial counseling and planning practice, and overview of employee benefits. (Typically Offered: Spring)

HDFS 3830: Fundamentals of Financial Planning

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 2830

Fundamental principles of the financial planning process, client/planner interactions, time value of money applications as well as analyses of ethics review, financial statements, cash flow and debt management, education planning, retirement planning, tax planning, and estate planning needs of families. (Typically Offered: Spring)

HDFS 3840: Family Insurance Planning

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 2830

Strategies for managing family financial risk with insurance. Emphasis on communication and planning process and the use of risk mitigation and insurance within families. Risk analysis and management within the comprehensive family financial planning process. (Typically Offered: Spring)

HDFS 3870: Applying Evidence-Based Practices in Human Services

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior or Senior Classification

Practicing skills required to work with individuals and families in assessment, engagement, and intervention. Applying strategies including motivational interviewing and trauma informed care. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

HDFS 3950: Children, Families, and Public Policy

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 3690 or Permission of Instructor

Public policy and public service programs as they affect children and families. Examination of how individuals and groups influence policy. Investigation of current issues and programs influencing the well-being and welfare of children and families. (Typically Offered: Fall, Spring, Summer)

HDFS 4160: Human Development and Family Studies Seminar

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Prereq: 8 credits in HDFS

Intensive study of a selected topic in human development and family studies. (Typically Offered: Fall, Spring, Summer)

HDFS 4170C: Supervised Student Teaching: Early Childhood Special Education Programs.

Credits: 8. Repeatable.

Teaching experience with preschool children with disabilities. (Typically Offered: Fall, Spring)

HDFS 4180A: Professional Practice Reflection/Discussion: Teaching

Credits: 0.5.

Prereq: Taken concurrently with HDFS 4170

Discussion of HDFS 4170 student teaching field experience. (Typically Offered: Fall, Spring)

HDFS 4180B: Professional Practice Reflection/Discussion: Internships

Credits: 2. Contact Hours: Lecture 2.

Prereq: HDFS 2180; Junior or Senior classification

Process and development of skills necessary for professional preparation and practice including career planning, resume writing, and interviewing. Strategies for successful career management. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

HDFS 4490: Program Evaluation and Proposal Writing

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior or Senior Classification

Theory and practice of program evaluation and proposal writing in human services including needs assessment, outcome development and measurement, and proposal components. Assessment of programs' success in meeting goals. (Typically Offered: Fall, Spring)

HDFS 4550: Curriculum and Interventions: Ages 3 through 6 Years

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: HDFS 3430, HDFS 3450, SPED 4050 and SPED 4580

Program models and methods leading to development and organization of appropriate curricula in preschool and kindergarten programs for young children with diverse learning needs. Government regulations and professional standards for child programming. Teaming with parents, colleagues, and paraprofessionals to plan, implement, and evaluate developmentally and culturally appropriate individualized education plans in inclusive settings. Practicum. (Typically Offered: Fall, Spring)

HDFS 4560: Working with Families in Early Intervention

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 3400 or HDFS 3440 or Permission of Instructor

Applying family systems theory and family centered principles in early intervention. Understanding the impact of disability on families and young children. Utilizing strategies for delivering family-centered interventions and service coordination in home-based and natural environments. Building trusting relationships, teaming with families and interdisciplinary colleagues to create, implement, and evaluate Individualized Family Service Plans (IFSPs) for children birth to age three. Understanding foundations of theory and policy and empowering families through effective supports and services. Experiences with families. (Typically Offered: Fall, Spring)

HDFS 4790: Family Dynamics Through a Social and Cultural Lens

Credits: 3. Contact Hours: Lecture 3.

Prereq: (HDFS 1020 or PSYCH 2300); (HDFS 3690 or Permission of Instructor); Junior or Senior classification

Exploration of social and cultural factors that influence family dynamics. Outcomes for families examined through a social justice lens. Students will examine how their social and cultural contexts impact their work within their chosen careers. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

HDFS 4820: Family Savings and Investments

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 3830, ECON 1010; STAT 1010

Management of family financial resources; emphasis on savings and the investment planning process; issues facing financial planners who manage family assets. Identification of investment options including common stocks, fixed income securities, convertible securities, and related choices. (Typically Offered: Fall)

HDFS 4840: Estate Planning for Families

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 2830

Study of estate planning focusing on efficient conservation and transfer of wealth, consistent with client's goals. Legal, tax, financial and non-financial aspects of estate planning process; trusts, wills, probate, advanced directives, charitable giving, wealth transfers and related taxes. (Typically Offered: Spring)

HDFS 4850: Capstone: Family Financial Planning

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 3410, HDFS 3780, HDFS 3830, HDFS 4820, and HDFS 3840 or FIN 3610

Development and refinement of competencies required by personal financial planners to work with individuals and families in meeting financial objectives. Utilization of skills obtained in financial planning emphasis to complete one or more financial planning narratives. (Typically Offered: Spring)

HDFS 4860: Administration of Human Services Programs

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 3690, junior or senior classification, and 3 credits in HDFS at 3000 level or above

Examination of purpose, policies, staffing, operations, and clientele of organizations serving children, adults and families with diverse needs. Management/leadership principles and techniques. Introduction to financial management. Administrators/supervisors roles in employee management as well as development of client-oriented programs, fundraising, goal setting, strategic planning, and advocacy. (Typically Offered: Fall, Spring)

HDFS 4890: Financial Counseling

Credits: 2. Contact Hours: Lecture 2.

Prereq: HDFS 2830

Personal, social/psychological and legal climates affecting family financial decisions. A life cycle approach to financial decision making. Development of financial counseling and planning skills to assist families and individuals to become self-sufficient in family financial management. (Typically Offered: Fall)

HDFS 4890L: Financial Counseling Laboratory

Credits: 1. Contact Hours: Laboratory 2.

Repeatable, maximum of 2 credits.

Prereq: HDFS 2830

Hands-on financial counseling experience using preventative, remedial, and productive strategies in one-on-one and/or group situations. Students work with clients to develop diverse and inclusive decision-making and problem-solving methods to achieve goals or to remove barriers. (Typically Offered: Fall)

HDFS 4900: Independent Study

Credits: 1-30. Repeatable.

Prereq: 6 credits in HDFS; Permission of Instructor

Consult department office for procedure.

HDFS 4900H: Independent Study: Honors

Credits: 1-30. Repeatable.

Prereq: 6 credits in HDFS; Permission of Instructor

Consult department office for procedure.

HDFS 4900I: Independent Study: Human Development and Family Studies

Credits: 1-30. Repeatable.

Prereq: 6 credits in HDFS; Permission of Instructor

Consult department office for procedure.

HDFS 4910: Internship

Credits: 4-9. Repeatable, maximum of 9 credits.

Prereq: Instructor Permission for Course

Supervised work experience related to the student's curriculum. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

HDFS 4930: Workshop

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Workshop in HDFS. (Typically Offered: Fall, Spring, Summer)

HDFS 4990: Research

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Supervised research experience. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

HDFS 5010: Graduate Studies, Research, and Ethics in HDFS

Credits: Required. Contact Hours: Lecture 2.

Overview of graduate study, research, ethics, and professional development in the field of human development and family studies. Curriculum, programs of study, portfolios, faculty research interests, dissemination of research, career planning, and teaching discussed. (Typically Offered: Fall)

HDFS 5020: Professional Development in Human Development and Family Studies

Credits: 2. Contact Hours: Lecture 2.

Overview of professional skills, portfolio building, preparation for academic and nonacademic jobs, leadership fundamentals and project management training, time management, work balance issues, and professional ethics. Opportunities for graduate students to work on their professional development tailored to individual needs of students. Develop an individual professional portfolio. Offered even-numbered years. (Typically Offered: Spring). (Typically Offered: Spring)

HDFS 5030: Introduction to Research Design

Credits: 4. Contact Hours: Lecture 4.

Basic research skills including developing research questions, posing testable hypotheses, determining appropriate data collection and analyses, and identifying the benefits and limitations of various sampling strategies. Measurement theory, observational assessments, survey research, experimental and quasi-experimental designs, analysis of secondary data, and qualitative research methods. (Typically Offered: Fall)

HDFS 5040: Qualitative Research Methods

Credits: 3. Contact Hours: Lecture 3.

Introduction to qualitative research methodology. Application of fieldwork methods, analysis, interpretation, and writing through individual qualitative research projects. (Typically Offered: Spring)

HDFS 5050: Application of Quantitative Research Methods

Credits: 3. Contact Hours: Lecture 3.

Descriptive and inferential statistics, hypothesis testing, scales of measurement, comparisons of proportions, correlations between variables, the t distribution, analysis of variance, and multiple regression. (Typically Offered: Spring)

HDFS 5100: Theories of Human Development

Credits: 3. Contact Hours: Lecture 3.

Theoretical approaches and current research in child, adolescent, and adult development. Individual life span perspectives. Implications for research, policy and practice. (Summer course offering is on-line). (Typically Offered: Fall, Summer)

HDFS 5110: Family Theory

Credits: 3. Contact Hours: Lecture 3.

Theoretical approaches and current research in family development. Review the nature and value of theory to the study of the family and evaluate the use of theory in empirical research. Implications for research, policy and practice. (Typically Offered: Spring)

HDFS 5300: Perspectives in Gerontology

(Cross-listed with GERON 5300).

Credits: 3. Contact Hours: Lecture 3.

Overview of current aging issues including theory and research, critical social and political issues in aging, the interdisciplinary focus of gerontology, career opportunities, and aging in the future. (Typically Offered: Fall)

HDFS 5340: Adult Development

(Cross-listed with GERON 5340).

Credits: 3. Contact Hours: Lecture 3.

Exploration of the biological, psychological and social factors associated with aging. Although the focus is on the later years, information is presented from a life-span developmental framework. Empirical studies are reviewed and their strengths, limitations and implications for normative and optimal functioning are discussed. (Typically Offered: Spring)

HDFS 5380: Developmental Disabilities

(Cross-listed with PSYCH 5380).

Credits: 3. Contact Hours: Lecture 3.

Theories, research, and current issues regarding the intersection of development and disabilities. Investigation of interventions with individuals and families (Online course offering via Distance Education). Offered odd-numbered years. (Typically Offered: Fall)

HDFS 5410: Housing and Real Estate in Family Financial Planning

(Cross-listed with FFP 5410).

Credits: 3. Contact Hours: Lecture 3.

The role of housing and real estate in the family financial planning process, including taxation, mortgages, financial calculations, legal concerns, and ethical issues related to home ownership and real estate investments. Emphasis on emerging issues in the context of housing and real estate. Offered even-numbered years. (Typically Offered: Summer)

HDFS 5450: Economics, Public Policy, and Aging

(Cross-listed with GERON 5450).

Credits: 3. Contact Hours: Lecture 3.

Policy development in the context of the economic status of the older adult population. Retirement planning and the retirement decisions; social security and public transfer programs; intra-family transfers to/from the aged; private pensions; financing medical care; prospects and issues for the future. (Typically Offered: Fall)

HDFS 5550: Current Issues and Research in Early Childhood Services

Credits: 3. Contact Hours: Lecture 3.

Analysis of contemporary and historical early childhood/early intervention/early childhood special education model programs and services. Examination of relationships among service systems and implementation, program quality, teacher effectiveness, and outcomes for children with and without disabilities (Online course offering via Distance Education). Offered even-numbered years. (Typically Offered: Fall)

HDFS 5630: Environments for the Aging

(Cross-listed with GERON 5630).

Credits: 3. Contact Hours: Lecture 3.

Emphasis on independent living within residential settings including specialized shelter, supportive services and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities. (Typically Offered: Spring)

HDFS 5660: Family Policy

Credits: 3. Contact Hours: Lecture 3.

An introduction to policy for family researchers and practitioners. Examination of relevant policies through a family lens via discussion of theory and student interests in current and enduring family policies and programs. Descriptions of work roles in family policy and the interaction of family researchers and policymakers. Offered even-numbered years. (Typically Offered: Fall)

HDFS 5670: Family Stress, Abuse, and Illness

Credits: 3. Contact Hours: Lecture 3.

Explores research related to family stress within romantic, parent-child, and sibling relationships. Examines contemporary theory and research on the nature, causes, and consequences of family stressors. These stressors include but are not limited to economic distress; physical and emotional abuse; substance abuse; and mental and physical illness across the life span (Online course offering via Distance Education). Offered even-numbered years. (Typically Offered: Fall)

HDFS 5680: Individual and Family Assessment

Credits: 3. Contact Hours: Lecture 3.

Use of interviews, observational assessments, direct tests with individuals and families for research and intervention. Opportunities to practice assessments. Offered even-numbered years. (Typically Offered: Spring)

HDFS 5750: Cross-cultural Perspectives about Families and Children

Credits: 3. Contact Hours: Lecture 3.

Review of current research regarding family diversity including an examination of cultural and structural influences on the development and well-being of families and children. Discussion of the impact on human rights and social justice (Online course offering via Distance Education). Offered even-numbered years. (Typically Offered: Spring)

HDFS 5770: Aging in the Family Setting

(Cross-listed with GERON 5770).

Credits: 3. Contact Hours: Lecture 3.

Theories and research related to personal and family adjustments in later life affecting older persons and their intergenerational relationships. Related issues including demographics also are examined through the use of current literature. (Typically Offered: Spring)

HDFS 5790: Family Well-being Across the Lifespan

Credits: 3. Contact Hours: Lecture 3.

Review of current research to provide a theoretical and practical understanding of the economic, social, and psychological factors that influence interpersonal relationships and individual well-being within the institution of the family system. Economic and policy effects considered (Online course offering via Distance Education). Offered odd-numbered years. (Typically Offered: Spring)

HDFS 5810A: International Study in HDFS: Practicum

Credits: 1-12. Repeatable, maximum of 12 credits.

Limited enrollment. Supervised international study experiences in Human Development and Family Studies. Countries vary. (Typically Offered: Fall, Spring, Summer)

HDFS 5810B: International Study in HDFS: Exchange

Credits: 1-12. Repeatable, maximum of 12 credits.

Limited enrollment. Supervised international study experiences in Human Development and Family Studies. Countries vary. (Typically Offered: Fall, Spring, Summer)

HDFS 5810C: International Study in HDFS: Group Study

Credits: 1-12. Repeatable, maximum of 12 credits.

Limited enrollment. Supervised international study experiences in Human Development and Family Studies. Countries vary. (Typically Offered: Fall, Spring, Summer)

HDFS 5830: Investing for the Family's Future

(Cross-listed with FFP 5830).

Credits: 3. Contact Hours: Lecture 3.

Evaluation of investment markets for the household. Analysis of how families choose where to put their savings. Emphasis is on using the family's overall financial and economic goals to help inform investment choices. (Typically Offered: Fall)

HDFS 5840: Program Evaluation and Research Methods in Gerontology

(Cross-listed with GERON 5840).

Credits: 3. Contact Hours: Lecture 3.

Overview of program evaluation, research methods, and grant writing in gerontology. Includes application of quantitative and qualitative methods in professional settings. (Typically Offered: Spring)

HDFS 5850: Program Evaluation

Credits: 3. Contact Hours: Lecture 3.

Theoretical and practical issues related to design and implementation of program evaluation in social sciences. Includes theory, design, implementation, analysis and proposal writing to assist programs to be successful in meeting program goals. Offered odd-numbered years. (Typically Offered: Spring)

HDFS 5880: Family, Income, and the Economy

Credits: 3. Contact Hours: Lecture 3.

Analysis of family income, wealth, and economic well-being. Emphasis on effects of family behavior and public policies on the adequacy and security of income across the family life cycle. Implications of resource allocation within the family for adult and child well-being. Offered odd-numbered years. (Typically Offered: Fall)

HDFS 5890: Financial Counseling

Credits: 2. Contact Hours: Lecture 2.

Personal, social/psychological and legal climates affecting family financial decisions. A life cycle approach to financial decision making. Development of financial counseling and planning skills to assist families and individuals to become self-sufficient in family financial management. (Typically Offered: Fall)

HDFS 5890L: Financial Counseling Laboratory

Credits: 1. Contact Hours: Laboratory 2.

Repeatable, maximum of 2 credits.

Hands-on financial counseling experience using preventative, remedial, and productive strategies in one-on-one and/or group situations. Students work with clients to develop diverse and inclusive decision-making and problem-solving methods to achieve goals or to remove barriers. (Typically Offered: Fall)

HDFS 5900I: Special Topics: Human Development and Family Studies

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Consult department office on procedure for filing a written plan of study.

HDFS 5900R: Special Topics

Credits: 1-30. Repeatable.

Consult department office on procedure for filing a written plan of study. (Typically Offered: Fall, Spring, Summer)

HDFS 5910I: Internship: Human Development and Family Studies

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Supervised experience in an area of human development and family studies. (Typically Offered: Fall, Spring, Summer)

HDFS 5930: Workshop

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Workshop in HDFS. (Typically Offered: Fall, Spring, Summer)

HDFS 5940: Professional Seminar in Gerontology

(Cross-listed with GERON 5940).

Credits: 3. Contact Hours: Lecture 3.

An integrative experience for gerontology students designed to be taken near the end of the degree program. By applying knowledge gained in earlier coursework, students will strengthen skills in ethical decision-making behavior, applying these skills in gerontology-related areas such as advocacy, professionalism, family and workplace issues. Students from a variety of professions will bring their unique perspectives to bear on topics of common interest. (Typically Offered: Summer)

HDFS 5990: Creative Component

Credits: 1-30.

Prereq: Instructor Permission for Course

Nonthesis creative component (e.g., a special report, capstone course, integrated field experience, annotated bibliography, research project, design, or other creative endeavor). (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**HDFS 6030: Advanced Quantitative Methods**

Credits: 3. Contact Hours: Lecture 3.

Methodological and analytical issues in research in human development and family studies. Advanced research design and measurement, selection of statistical techniques, and issues in the interpretation of findings. (Typically Offered: Fall)

HDFS 6040: Advanced Qualitative Methods

Credits: 3. Contact Hours: Lecture 3.

Research methodologies including phenomenology, grounded theory, ethnography, and case studies. Methods of data collection and analysis procedures. Issues of ethics and interpretation of findings (Online course offering via Distance Education). Offered even-numbered years. (Typically Offered: Spring)

HDFS 6050: Multi-level Modeling

(Cross-listed with PSYCH 6050).

Credits: 3. Contact Hours: Lecture 3.

Rationale for and interpretation of random coefficient models. Strategies for the analysis of multi-level and panel data including models for random intercepts, random slopes, and growth curves. Offered odd-numbered years. (Typically Offered: Spring)

HDFS 6060: Advanced Structural Equation and Longitudinal Modeling

Credits: 3. Contact Hours: Lecture 3.

Rationale for and interpretation of advanced structural equation modeling for the analysis of longitudinal data. Emphasis will be placed on developing a working familiarity with some of the common statistical procedures, coupled with their application through the use of statistical software. Offered even-numbered years. (Typically Offered: Spring)

HDFS 6070: Mixed Methods

Credits: 3. Contact Hours: Lecture 3.

Foundations of mixed methods research, controversies, and philosophical concerns. Rationale for and interpretation of mixed methods designs. Research design, sampling, data collection, data analysis, results, and interpretation (Online course offering via Distance Education). Offered odd-numbered years. (Typically Offered: Spring)

HDFS 6080: Grant Writing for Research

Credits: 3. Contact Hours: Lecture 3.

Understand how to identify funding sources as well as the fundamental components of a federal research grant proposal such as the abstract or summary, background and significance, specific aims/goals and objectives, project design and methods, sustainability, assessment, broader impacts, dissemination, budget, budget justification, and cover letter. (Typically Offered: Fall)

HDFS 6160: Seminar

Credits: 1-30. Contact Hours: Lecture 30.

May be repeated. F.S.SS.

HDFS 6310: Child Health and Development

Credits: 3. Contact Hours: Lecture 3.

Young children's cognitive, physical, communication, and social-emotional health and development will be examined. Both typical and atypical trajectories will be explored. Research on current trends in the field will be emphasized (Online course offering via Distance Education). Offered even-numbered years. (Typically Offered: Fall)

HDFS 6320: Behavioral Interventions in Early Childhood

Credits: 3. Contact Hours: Lecture 3.

Issues related to behavioral development and needs of children ages 3-8. Design and implementation of group and individual behavioral interventions. Discussion of coaching strategies to improve intervention implementation (Online course offering via Distance Education). Offered odd-numbered years. (Typically Offered: Spring)

HDFS 6330: Infant Mental Health

Credits: 3. Contact Hours: Lecture 3.

Examination of the individual, interpersonal, and familial factors that influence infant (birth through age 3) mental health. Analysis of the risk and protective factors that influence these systems and their potential effects on social-emotional development. Current issues relating to effective programs for improving parent-infant interactions and additional supports available to families (Online course offering via Distance Education). Offered even-numbered years. (Typically Offered: Spring)

HDFS 6340: Adolescent and Emerging Adult Health and Development

Credits: 3. Contact Hours: Lecture 3.

Theory and research on biopsychosocial, cognitive, physical and sexual health and development from early adolescence to emerging adulthood. Contexts of development including families, peers, schools, neighborhoods, romantic relationships, economics and public policies are considered (Online course offering via Distance Education). Offered even-numbered years. (Typically Offered: Spring)

HDFS 6350: Adult Development, Aging, and Health

(Cross-listed with GERON 6350).

Credits: 3. Contact Hours: Lecture 3.

Review of the impact of the growing older adult population as well as individual development and aging on individuals, families, and society. Exploration of theoretical perspectives applied to adult development and aging and distinction of normative and non-normative changes in adulthood. Discussion of methods to assess development across adulthood and consideration of the role of individual and environmental factors impacting efforts to optimize adult development. Offered odd-numbered years. (Typically Offered: Fall)

HDFS 6400: Biomarkers and Family Research

Credits: 3. Contact Hours: Lecture 3.

Research on the biological underpinnings of human development and the biobehavioral health of the family. Exposure to interdisciplinary research and practice on biomarkers in the family, with particular emphasis on health-and wellbeing-related measures. Application of biomarker collection, measurement, analysis and dissemination. Offered odd-numbered years. (Typically Offered: Spring)

HDFS 6900I: Advanced Topics: Human Development and Family Studies

Credits: 1-30. Repeatable.

*Prereq: Instructor Permission for Course***HDFS 6910A: Internship: College Teaching**

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Supervised practice and experience in college-level teaching. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

HDFS 6910B: Internship: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Supervised practice and experience in conducting research. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

HDFS 6910D: Internship: Professional Experience

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Supervised practice and experience in relevant professional experiences. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

HDFS 6990I: Research: Human Development and Family Studies

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Thesis and dissertation research. Offered on a satisfactory-fail basis only.

Human Sciences (HSCI)

Human Sciences courses provide integrative study and enriching experiences in areas that cut across the diverse curricula of the College of Human Sciences. These may include such areas as leadership, global understanding, social justice/responsibility, and ethics. Students in any college may take these courses.

Courses primarily for undergraduates:**HSCI 1100: Orientation and Human Sciences Career Exploration**

Credits: 2. Contact Hours: Lecture 2.

Orientation and adjustment to the university and college; review of policies and procedures; academic resources; and course selection and planning. Comprehensive approach to career development; intensive self-analysis; and in-depth examination of majors in Human Sciences. Required for all students declared as an Undecided major in the College of Human Sciences. (Typically Offered: Fall, Spring)

HSCI 1500: Dialogues on Diversity

Credits: 1. Contact Hours: Lecture 1.

An exploration of diversity within the context of the Iowa State University community through understanding human relations issues. (Typically Offered: Fall, Spring)

HSCI 3010: Introduction to Global Human Sciences

Credits: 1. Contact Hours: Lecture 1.

Introduction to global aspects of human sciences disciplines. Emphasis on the core conceptual dimensions of global citizenship and how they connect to becoming a human scientist. Development and application of critical skills for civic literacy in a global context. Examination of global issues; connections among global, national, and local issues; and collaborative actions to find solutions to global challenges. Meets International Perspectives Requirement. (Typically Offered: Fall)

HSCI 3020: Global Human Sciences Capstone

Credits: 2. Contact Hours: Lecture 2.

Prereq: AESHM 4210; HSCI 3010

Capstone experience for the Global Human Sciences Minor. Continued focus on global aspects of human sciences disciplines, global citizenship, critical skills for civic literacy, and becoming a human scientist. Development and public presentation of a creative component that represents the culmination of international experiences gained through the minor. Meets International Perspectives Requirement. (Typically Offered: Spring)

HSCI 3980: Cooperative Education

Credits: Required. Repeatable, maximum of 2 times.

Prereq: Permission of CHS Career Services

For use for cooperative education students seeking full-time status while on internship. Students must register for this course prior to commencing each work period. No more than three credits may be taken in addition to HSCI 3980 during any given semester. Course cannot be used to fulfill degree requirements. Therefore, this cannot be used for a required, academic internship. This course cannot be used to fulfill degree requirements. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

HSCI 4900E: Entrepreneurship

Credits: 1-4.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Immunobiology (IMBIO)

Courses for graduate students:

IMBIO 6020: Current Topics Workshop in Immunology

Credits: 1. Contact Hours: Lecture 3.

Repeatable.

Lectures provided by off-campus experts. Students are required to participate in discussion sessions with lecturers. (Typically Offered: Fall)

IMBIO 6040: Seminar in Immunobiology

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Student and faculty presentation. (Typically Offered: Spring)

IMBIO 6610: Comparative Immunology and Infectious Disease

(Cross-listed with VPTH 6610).

Credits: 2. Contact Hours: Lecture 2.

Discuss and define similarities and differences of varied host responses to infectious challenge. Learning will focus on comparative aspects of the host response and the unique aspects of immunity from different organisms, while highlighting molecular and mechanistic similarities of pathogen recognition, response and resolution. Offered odd-numbered years. (Typically Offered: Spring)

IMBIO 6900: Special Topics

Credits: 1-30. Repeatable.

Advanced study of specific topics in specialized field of immunobiology.

IMBIO 6970: Graduate Research Rotation

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Graduate research projects performed under the supervision of selected faculty members in the Interdepartmental Immunobiology major.

IMBIO 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Industrial Design (INDD)

Courses primarily for undergraduates:

INDD 2010: Industrial Design Studio I

Credits: 6. Contact Hours: Studio 12.

Prereq: Enrollment in INDD major

This is the first studio in the program introducing students to the industrial design process by focusing on the fundamentals of problem solving, critical thinking, basic market research and subsequent idea generation, emphasizing on sketching, experimentation, model making, visual and physical communication, and presentation. (Typically Offered: Fall)

INDD 2020: Industrial Design Studio II

Credits: 6. Contact Hours: Studio 12.

Prereq: Enrollment in INDD major; INDD 2010

Through a series of exercises, the second studio in the program advances students' skills in sketching, modeling and visual, physical and communication skills required for industrial design practice. Students will be implementing the use of new technologies in digital drawing, computer aided design (CAD) and analog and digital fabrication. (Typically Offered: Spring)

INDD 2100: Fundamentals of Industrial Design

Credits: 3. Contact Hours: Lecture 3.

Introduction to the discipline of Industrial Design: its definition, scope and basic principles of the profession as a whole. Overview of technical, artistic and social context of the profession.

INDD 2200: Concepts of Sketching and Making I

Credits: 3.

Introduction to basic tools and techniques used in different phases of the industrial design process. This course is the first in a series of two addressing key aspects of analog and digital communication tools and fundamentals of prototyping from different modes of sketching to physical sketch models.

INDD 2400: Digital Tools For Industrial Design

Credits: 3. Contact Hours: Lecture 3.

Introduction of digital applications and workflows through the lens specific to industrial design tasks and professional practices.

INDD 2500: Activity-Centered Industrial Design

Credits: 3. Contact Hours: Lecture 3.

Introduction to design for complex and dynamic situations that include people, products, activities and environments. Emphasizes the relationship between internal and external factors that impact pleasure and performance in these systems. Includes an overview of human diversity and examines the role of the industrial designer in developing the artifacts of daily activity.

INDD 2600: Design Engineering: From Thought to Thing

Credits: 3. Contact Hours: Lecture 3.

What is making, building, constructing, engineering and technology and their roles for industrial design? Investigation of making techniques, engineering methods and technological advancements through case studies of everyday objects. Exploration of questions about the impact of materials choice and technologies of fabrication. Modeling, prototyping capabilities, and constructing a par with the engineering realm. Application of construction methods to industrial design in an inclusive 'makers-lab' environment.

INDD 2800: History of Industrial Design

Credits: 3. Contact Hours: Lecture 3.

Introduction to contemporary and historic factors influencing industrial design craft and practice. Discussion of social, political, cultural and technological context for industrial design.

INDD 3010: Industrial Design Studio III

Credits: 6. Contact Hours: Studio 12.

Prereq: Enrollment in INDD major; INDD 2020

Exploration and application of systematic design methodology including sustainable practices and integration of creative thinking techniques through a sequence of progressive exercises. (Typically Offered: Fall)

INDD 3020: Industrial Design Studio IV

Credits: 6. Contact Hours: Studio 12.

Prereq: (Enrollment in INDD major; INDD 3010) OR Permission of Instructor

Exploration of commercial factors in industrial design. Meets Industrial Design Experiential Learning Requirements.

INDD 3200: Design Research Methods

Credits: 3. Contact Hours: Lecture 3.

Qualitative and quantitative methods with an emphasis on contextual user-centered research. Integration of user data collection, visualization, and synthesis as a source for design.

INDD 3300: Creative Thinking in Design

Credits: 3. Contact Hours: Lecture 3.

Exploration and practice of strategies, methods, facilitation, and processes associated with creative thinking skills and problem solving. Investigation of the nature of creativity and its implications in different contexts.

INDD 3400: Digital Design Technologies

Credits: 3. Contact Hours: Studio 6.

Emphasis on computer-aided visualization techniques for 3D rendering and digital fabrication. Exploration and practice of several computer modeling applications as digitization tools for industrial design.

INDD 3450X: Sketchnoting

Credits: 1-3.

Focus on student learning engagement and knowledge retention through visual note-taking. Introduction to sketchnoting as a creative and non-traditional visual note-taking methodology fostering active listening and synthesis. Learn to create visual libraries as they pertain to select subjects and practice visual notetaking through live lectures and study note development. Reflection sketchnotes will provide students an opportunity to discover their own learning progress and connections across courses. (Typically Offered: Fall)

INDD 3500: Applied Human Factors Lab

Credits: 1. Contact Hours: Laboratory 1.

Theory and application of human factors issues in the industrial design field, specifically their impact on the relationship of the user, the product, the product systems, and environment.

INDD 3600: Materials and Processes for Industrial Design

Credits: 3. Contact Hours: Lecture 3.

Introduction to materials and manufacturing methods for mass production and distribution of products including design for assembly and disassembly.

INDD 3700: STEM literacy: How Things Work

Credits: 3. Contact Hours: Lecture 3.

Dismantling mysteries surrounding science and technology. Identifying key concepts from applied science, engineering and technology to obtain better understanding on how things work. Review and explanation of the principles behind the technologies that define our modern way of life. Common everyday technology such as building electronic gadgets, interface hardware with computers, writing applications, systems applications and making functional electronics units, are some of the examples illustrating scientific knowledge and applications.

INDD 3800: History and Culture of Objects

Credits: 3. Contact Hours: Lecture 3.

Critical examination of meanings of objects from the perspectives of history, design, material culture, philosophy and cultural studies. Discussion of social, political, cultural and technological context for industrial design.

INDD 3810X: Exploration of Design and Artisanry throughout Europe

Credits: 2. Repeatable.

Academic and cultural visits to major landmarks, production facilities, companies, museums in Germany, France, Belgium and the Netherlands that provide context for understanding more about the traditions and practice of design and craftsmanship. Meets International Perspectives Requirement. (Typically Offered: Summer)

INDD 3970: Industrial Design Internship

Credits: 1-6. Repeatable, maximum of 12 credits.

Prereq: Enrollment in INDD major; INDD 2020; 18 credits in INDD; Permission of Instructor

Professional industrial design, off-campus experience. Meets Industrial Design Experiential Learning Requirements.

INDD 4010: Industrial Design Studio V: Commercial Practices

Credits: 6. Contact Hours: Studio 12.

Repeatable, maximum of 18 credits.

Prereq: Enrollment in INDD major; INDD 3010

Advanced topics focused on industrial design applications in commercial industries. Topics vary each time offered. Meets Industrial Design Experiential Learning Credits.

INDD 4020: Industrial Design Studio: Design for Social Impact

Credits: 6. Contact Hours: Studio 12.

Repeatable.

Prereq: Enrollment in INDD major; INDD 3010

Advanced topics focused on industrial design applications in service-learning and community engagement projects. Topics vary each time offered. (Typically Offered: Fall, Spring, Summer)

INDD 4350: Strategic Design: Project Management

Credits: 3. Contact Hours: Lecture 3.

Review and development of executable strategies for entrepreneurial, commercial and business efforts. Focus on strategic thinking, economics of innovation, tactical approaches and effective measures in order to integrate a full cycle of product/service development. Advanced technical design processes, design management, decision-making and value proposition.

INDD 4400: Portfolio and Professional Practice

Credits: 3.

Prereq: Enrollment in INDD major; INDD 3010

Discussion of industrial design practices, job market and career roadmap planning. Development and preparation of personal promotional materials for a range of media, including professional websites, personal brand, resumes, cover letters, business cards, print and/or digital portfolios.

INDD 4600: Product Realization

Credits: 3. Contact Hours: Lecture 3.

Prereq: Enrollment in INDD major; INDD 2020

Advanced techniques of prototyping and model making for industrial design, using materials and manufacturing methods for product development. Exploration of the stages of design fabrication, systems-level implementation, testing, and constructing a par with the engineering realm. Use of typical prototyping materials, such as foam, wood, metal, plastic, plus new and emerging materials; CNC and 3D printing technologies will also be applied. Coupling the 'makers-lab' movement with design entrepreneurship, development of advanced functional models and high-fidelity prototypes.

INDD 4650X: Textiles for Softgoods

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

This course provides an introduction to the study of textiles and their use in industrial soft goods applications. Instructional methodology includes application-oriented projects focused on the manufacture, acquisition, and utilization of textiles for product development and industrial uses.

INDD 4900A: Special Topics: Theory, Criticism, Methodology

Credits: 1-6. Repeatable, maximum of 18 credits.

Prereq: Instructor Permission for Course

Advanced topics focused on theory, criticism, and methodologies in industrial design applications. (Typically Offered: Fall, Spring, Summer)

INDD 4900B: Special Topics: Experimental Techniques

Credits: 1-6. Repeatable, maximum of 18 credits.

Prereq: Instructor Permission for Course

Advanced topics focused on industrial design applications. Topics vary each time offered. (Typically Offered: Fall, Spring, Summer)

INDD 4900C: Special Topics: Three-Dimensional Design

Credits: 1-6. Repeatable, maximum of 18 credits.

Prereq: Instructor Permission for Course

Advanced topics focused on distributed collaboration in industrial design applications. Topics vary each time offered. (Typically Offered: Fall, Spring, Summer)

INDD 4900D: Special Topics: Distributed Collaboration

Credits: 1-6. Repeatable, maximum of 18 credits.

Prereq: Instructor Permission for Course

Advanced topics focused on distributed collaboration in industrial design applications. Topics vary each time offered. (Typically Offered: Fall, Spring, Summer)

INDD 4950: Study Abroad Option

Credits: 1-12. Contact Hours: Studio 12.

Repeatable, maximum of 12 credits.

Prereq: Enrollment in INDD major; INDD 2020; Permission of Instructor

Special topics in Industrial Design, design history, environmental design, historic and contemporary practice. Travel to relevant countries. General cultural and historical studies, topical projects, and individual inquiry. Courses may be taught by departmental faculty or faculty from approved Iowa State Study Abroad programs. See current offerings for detailed syllabus. Meetings industrial design experiential credit requirements. (Typically Offered: Fall, Spring, Summer)

INDD 4990: Senior Project

Credits: 6. Contact Hours: Studio 12.

Prereq: Enrollment in INDD major; (INDD 4010, INDD 3970, or INDD 4950);

Senior classification in INDD

Advanced practice in specialized area of industrial design. Topics vary.

Courses primarily for graduate students, open to qualified undergraduates:

INDD 5010: Industrial Design Graduate Studio I

Credits: 6. Contact Hours: Studio 12.

Fundamental concepts, design processes, and techniques for industrial design. Emphasis on project-based application of design models and procedures for form development, structure, function and communication.

INDD 5020: Industrial Design Graduate Studio II

Credits: 6. Contact Hours: Studio 12.

Advanced project-based application of industrial design theories and techniques. Emphasis on service and systems design, and its implications for community and social innovation. Application of entrepreneurial factors and systematic design methodology of complex design problems and innovative solutions.

INDD 5050: MInD Lab I

Credits: 3. Contact Hours: Lecture 1, Studio 4.

Repeatable, maximum of 3 credits.

Workshop training sessions based on project-based themes of industrial design: weekly series of 'how-tos' and other practical demos regarding fundamentals, concepts and techniques of Design. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

INDD 5070: Industrial Design Practicum

Credits: 6. Contact Hours: Studio 12.

Repeatable.

Studio project focused on topics generated with external partners. Topics vary. Meets Industrial Design Experiential Learning Requirements.

INDD 5100: MInD Lab II

Credits: 3. Contact Hours: Lecture 1, Studio 4.

Repeatable, maximum of 3 credits.

Advanced workshop training sessions on application of industrial design concepts and skills: emphasis on executive demos on design thinking, service and system design, and its implications for the community and industry outreach. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

INDD 5150: Graduate Colloquium

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Presentation and discussion of creative practices carried out in various design disciplines and their relationship to industrial design. Seminar sessions focusing on exemplary pieces of: design research undertaken by faculty; design education and learning pedagogies in design; and/or cross-disciplinary graduate work in design-related fields.

INDD 5200: Design Theory Methodology

Credits: 3. Contact Hours: Lecture 3.

Synthesis of methodological work in products of design. Theoretical framework that integrates in-depth concepts related to design activity, design science, research philosophies, cognitive models and cognitive biases, design processes from different fields, advanced creativity studies and problem reframing. User-centered research methods to examine the impact of design on humans, environments, and social contexts. Examination and critique of current research methods employed in industrial design, service design, design for interaction and user experience (UX) design.

INDD 5300: Design Thinking

Credits: 3. Contact Hours: Lecture 3.

Exploration of design thinking process, toolkits, and mindsets as creative problem solving approaches for systems, products, and processes, across diverse contexts. Strategies for problem-framing, creative solutions and co-evolution process, with a focus on collaborative and interdisciplinary design to investigate real-world problems and opportunities.

INDD 5400: Design Communication

Credits: 3. Contact Hours: Studio 6.

Emphasis on design narratives and story-telling. Exploration of creative digital media and multiple visual communication techniques which help break down complex information. Added professional development techniques such as positioning, intrapreneurship, design manifesto, design statement, client rapport, persuasive communication methods and speculative design will be applied.

INDD 5500: Human Factors: User Experience Design

Credits: 3. Contact Hours: Lecture 3.

Human factors issues and the study of relationships between the user, the product, and the human body and its physical functions. Advanced investigations of bio-mechanics, anthropometry, instrumental displays and control, and their measurement as they relate to the design process. Emphasis on experience design, user narratives, interactions and context mapping, mapping out issues of usability, design inclusivity, diversity and integrity.

INDD 5600: Change by Design: Disruptive Innovation

Credits: 3. Contact Hours: Lecture 3.

Exploration and execution of applied projects on civic entrepreneurship, social innovation and design activism. Through the 3 lenses of strategic, systems and critical thinking, it addresses the importance of design for social impact when applied to cases of service-learning, community-engagement, design ethics and transitional design. Change theory and management are central to examine diffusions and disruptions of innovation. (Typically Offered: Fall)

INDD 5700: Systems Thinking in Design

Credits: 3. Contact Hours: Lecture 3.

Emphasis on 21st Century Design Issues through systems thinking as language, problem-framing as pivoting process and transitional design as frame innovation model. Exploration of interconnected and dynamic 21st century global issues, where complexity and future industries play a key role. Issues such as societal transitions, loss of biodiversity and climate change, circular economy, eco-centric design, aging, equity, mobility, robotics, cybernetics, etc. are discussed and mapped out for industrial design applications. (Typically Offered: Fall)

INDD 5800: Material Culture and Values

Credits: 3. Contact Hours: Lecture 3.

Examination of the meanings of objects from the perspectives of design, material culture, philosophy and cultural studies. Critically examine the role of objects in everyday life. Concepts include: value of things, semiotics, object fetishism, product semantics, consumer value and production labor. Case studies of historic and contemporary objects will be discussed to understand key theoretical concepts and to make meaningful connection between theory and everyday objects. (Typically Offered: Spring)

INDD 5900: Special Topics

Credits: 1-6. Contact Hours: Lecture 2, Studio 2.

Repeatable, maximum of 18 credits.

Prereq: Instructor Permission for Course

Advanced topics focused on industrial design applications. Topics include theory, criticism, methodology, experimental techniques, three dimensional design, distributed collaboration. Meets Industrial Design Experiential Learning Requirements. (Typically Offered: Fall, Spring, Summer)

INDD 5920: Special Projects

Credits: 1-30. Repeatable.

Planned projects in topics related to theory, criticism, methodology, experimental techniques, three dimensional design, distributed collaboration. (Typically Offered: Fall, Spring, Summer)

INDD 5930: Experiential Learning Special Projects

Credits: 1-30. Repeatable.

Project based topics related to theory, criticism, methodology, experimental learning, three dimensional design, distributed collaboration that supports experiential learning. (Typically Offered: Fall, Spring, Summer)

INDD 5950: Study Abroad Option

Credits: 6. Contact Hours: Studio 12.

Repeatable.

International study abroad program. Visits to design studios, showrooms, museums and manufacturing facilities. Meets Industrial Design Experiential Learning Requirements. (Typically Offered: Fall, Spring, Summer)

INDD 5970: Internship

Credits: 1-6. Repeatable, maximum of 18 credits.

Professional industrial design, off-campus experience. Meets Industrial Design Experiential Learning Requirements. (Typically Offered: Fall, Spring, Summer)

INDD 5990X: Creative Component

Credits: 1-6. Repeatable, maximum of 6 credits.

The creative component is a comprehensive and in-depth study and development of a focused project chosen by the student and approved by the major professor. The completed project will culminate in an oral defense, comprehensive documentation and produce an artifact. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**INDD 6010: Industrial Design Graduate Studio III**

Credits: 6. Contact Hours: Studio 12.

Advanced studio-based creative component in specialized area of focus within industrial design or cross-disciplinary field. Prepares for graduate design project, culminating in a development plan, project initiation document and supporting documented inquiry.

INDD 6020: MInD Graduate Project

Credits: 6. Contact Hours: Studio 12.

Graduate project's creative component in specialized area of focus within industrial design or cross-disciplinary field. Culminates in a physical or digital artifact and supporting documentation such as graduate defense presentation and design process book.

INDD 6300: Critical Reflections for Thesis Preparation

Credits: 3. Contact Hours: Lecture 3.

Through the lenses of STEM literacy and critical thinking, exploration of why philosophy of science, technological and engineering literacies are connected to social justice and are related areas. Reflections on the effects of design projects on human health, social structures, and the environment, and examination of improvements in economic growth and quality of life. Case studies on the effects of Design and STEM to prepare for the formulation of graduate thesis or project topics, with proposed plan of investigations. (Typically Offered: Spring)

INDD 6400: Advanced Digital Technologies

Credits: 3. Contact Hours: Lecture 1, Studio 4.

Exploration of interactive technologies and digital thinking industries. Advanced concepts in computer to machine interface for manufacture, digital materiality, conversational interfaces, gamification, congruence, mixed reality AR/VR, and critical media for future industries.

INDD 6990: MInD Graduate Thesis

Credits: 6. Repeatable.

Prereq: Instructor Permission for Course

Advanced research component in specialized area of focus within industrial design. Culminates in a thesis document.

Industrial Engineering (IE)

Courses primarily for undergraduates:

IE 1010: Industrial Engineering Profession

Credits: Required. Contact Hours: Lecture 1.

Introduce students to the industrial engineering profession, its scope, industrial engineering tools, and future trends. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

IE 1480: Information Engineering

Credits: 3.

Prereq: Credit or concurrent enrollment in MATH 1430

Solving engineering problems with information-driven solutions. Effective communication via technical writing and presentations. Elements of computer science including the software development process, algorithm structure, computational thinking, and the human-computer interface. Database structure. Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, BME 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count towards graduation. (Typically Offered: Fall, Spring)

IE 2220: Design & Analysis Methods for System Improvements

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment in IE 2710

Study of system improvement methods and strategies. Specific areas of lean system improvements include continuous improvement, setup reduction, workplace organization, and inventory and waste reduction. Methods and strategies for productivity analysis to quantify the impact of changes. (Typically Offered: Spring)

IE 2480: Engineering System Design, Manufacturing Processes and Specifications

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Credit or concurrent enrollment in (IE 1010; MATE 2730); MATH 1660 or MATH 1660H; PHYS 2310 or PHYS 2310H

Introduction to metrology, engineering drawings and specifications. Engineering methods for designing and improving systems. Theory, applications, and quality issues related to machining processes. (Typically Offered: Fall)

IE 2710: Applied Ergonomics and Work Design

Credits: 3. Contact Hours: Lecture 3.

Prereq: PHYS 2310 and PHYS 2310L

Basic concepts of ergonomics and human factors in the context of work design. Their impact on worker and workplace productivity, and cost. Investigations of work physiology, biomechanics, anthropometry, work sampling, work evaluation methods, and their measurement as they relate to the design of human-machine systems. (Typically Offered: Spring)

IE 3050: Engineering Economic Analysis

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 1660

Time value of money principles applied to business, engineering, and personal economic decisions. Project evaluation and comparison based on equivalence calculations, net present worth, and rate of return analysis. Cash flows for engineering projects that consider life-cycle costs, borrowing, depreciation, taxes, and inflation. Engineering decisions with uncertainty and incorporation of risk into project valuations. (Typically Offered: Fall, Spring, Summer)

IE 3120: Optimization

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment in MATH 2670

Concepts, optimization and analysis techniques, and applications of operations research. Formulation of mathematical models for systems, concepts, and methods of improving search, linear programming and sensitivity analysis, network models, and integer programming. (Typically Offered: Fall)

IE 3410: Production Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or concurrent enrollment in IE 3120; STAT 2310

Introduction of key concepts in the design and analysis of production systems. Topics include inventory control, forecasting, material requirement planning, Kanban systems, project planning and scheduling including Critical Path Method (CPM). Advanced design, analysis, operation, and improvement of supply chains with effectiveness, efficiency, sustainability and social responsibility. (Typically Offered: Fall)

IE 3480: Solidification Processes

(Cross-listed with MATE 3480).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: IE 2480 and MATE 2730, or MATE 2150

Theory and applications related to metal casting, welding, polymer processing, powder metallurgy, and composites manufacturing, and related rapid manufacturing processes. (Typically Offered: Spring)

IE 3610: Statistical Quality Assurance

(Cross-listed with STAT 3610).

Credits: 3. Contact Hours: Lecture 3.

Prereq: STAT 2310, STAT 3010, STAT 3260, or STAT 5870

Statistical methods for process improvement. Simple quality assurance principles and tools. Measurement system precision and accuracy assessment. Control charts. Process capability assessment. Experimental design and analysis for process improvement. Significant external project in process improvement. (Typically Offered: Fall, Spring)

IE 4030: Introduction to Sustainable Production Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment IE 3410

Quantitative introduction of sustainability concepts in production planning and inventory control. Review of material recovery (recycling) and product/component recovery (remanufacturing) from productivity perspectives. Sustainability rubrics ranging from design and process to systems. Application to multi-echelon networks subject to forward/backward flow of material and information. Closed-loop supply chains. Comparative study of sustainable vs. traditional models for local and global production systems.

IE 4050: Advanced Engineering Economy for Complex Engineering Projects

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 2650, MATH 2670, STAT 2310 and IE 3050

Overview of engineering economic valuation and complex engineering projects. Stochastic dynamic programming for project valuation. Modeling and analysis of confounding factors of engineering projects. Integration and synthesis of valuation methodologies to complex projects. Applications to power plants, transmission networks, and satellites.

IE 4130: Stochastic Modeling, Analysis and Simulation

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Prereq: MATH 2650 and STAT 2310

Development of probabilistic models and simulation models using a simulation language. Fitting of parametric distributions to data. Introduction to Markov processes and queueing models. Model output analysis and utilization for improved decision-making. Application of models to engineering design of effective and efficient manufacturing and service systems. (Typically Offered: Fall)

IE 4200: Engineering Problem Solving with R

Credits: 3. Contact Hours: Lecture 3.

Prereq: STAT 2310

Introduction to data analytics using R programming language. Data manipulation. Exploratory data analysis via basic graphics. Basic statistical analysis including statistical tests and linear regression. R Markdown. Simulation by replicating a calculation. Conditional expressions, loops, and functions. High level data visualizations using ggplot graphics. Data extraction from text. Optimization via R build-in functions. Logistic regression. High performance computing tools. Project required for graduate credits. (Typically Offered: Spring)

IE 4300: Entrepreneurial Product Engineering

(Cross-listed with ENGR 4300).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Process of innovative product development in both entrepreneurial and intra-preneurial settings. Define, prototype and validate a product concept based on competitive bench-marking, market positioning and customer requirement evaluation in a target market into a product design that is consistent with defined business goals and strategies. Combination of lecture, discussion, problem solving and case study review. (Typically Offered: Fall, Spring)

IE 4320: Industrial Automation

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: PHYS 2320; PHYS 2320L

Overview of electrical circuit theory and its relationship to industrial control systems. Theory and application of transducers in the form of sensors and actuators, with applications in manufacturing, distribution and mechanical systems. Programmable Logic Controllers (PLC), their programming and use for automation solutions. Introduction of automated identification systems such as Radio Frequency Identification (RFID) and Bar Coding technologies. (Typically Offered: Spring)

IE 4340X: Entrepreneurial Product Engineering Design Project

(Cross-listed with ENGR 4340X).

Credits: 0-99. Contact Hours: Laboratory 4, Lecture 1.

Repeatable.

Prereq: IE 4300 or ENGR 4300

Open-ended design project related to creating, validating and launching a new engineered product into the marketplace. Fundamentals related to launching new engineered products in an Entrepreneurial way. Students submit new product ideas or select from a list of company supplied ideas. Application of engineering design principles including product definition, competitive evaluation, requirements evaluation, product design, manufacturing design, manufacturing costing, prototype creation, field validation, user evaluation. (Typically Offered: Spring)

IE 4370: Reliability and Safety Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: STAT 2310 or STAT 3050 or STAT 5870

Mathematical basics for dealing with reliability data, theory, and analysis. Bayesian reliability analysis. Engineering ethics in safety evaluations. Case studies of accidents in large technological systems. Fault and event tree analysis.

IE 4410: Industrial Engineering Design

Credits: 3. Contact Hours: Lecture 1, Laboratory 6.

Prereq: IE 2480, IE 2710, IE 3610; (credit or enrollment in IE 3410, IE 4130, AND IE 4480)

An engineering design project performed in a real-world company that requires students to develop quantitative objectives, conduct field-based current state measurements, and create multiple design alternatives to meet or exceed customer requirements. Student teams work with company stakeholders to document, quantitatively justify, and implement to the extent practical, solutions that generate substantive economic impact. (Typically Offered: Fall, Spring)

IE 4440: Micro/Nano Scale Additive Printing

Credits: 3. Contact Hours: Lecture 3.

Introduction of physical theory, design, analysis, fabrication, and characterization of micro/nano scale fabrication and manufacturing systems; introduction of micro/nano scale additive manufacturing; and deep understanding of additive printing for micro/nano scale applications. Focus on the fabrication/manufacturing of important types of microstructures used in micro/nano devices using additive printing, and the techniques and tools used to characterize them. Students are expected to finish a team project related applying additive printing experimentally or theoretically to the design of a sensor. (Typically Offered: Fall)

IE 4450: Additive Manufacturing and Rapid Production Methods

Credits: 3. Contact Hours: Lecture 3.

Introduction to additive manufacturing and other rapid prototyping and manufacturing methodologies. Operating principles and characteristics of current and developing processes. Use of rapid prototypes in product design, development, and service. Selection of rapid prototyping and manufacturing systems, from design to mass production. Hybrid manufacturing and other integration of rapid production methods.

IE 4460: Geometric Variability in Manufacturing

Credits: 3. Contact Hours: Lecture 3.

Assessment, accommodation, and control of geometric variability in manufacturing processes, specifically composites, metalcasting, welding, machining, powder metallurgy and additive processing. Techniques include the design of the component, tooling, process plan and inspection methodology.

IE 4470: Biomedical Design and Manufacturing

(Cross-listed with BME 4470).

Credits: 3. Contact Hours: Lecture 3.

Exploration of biology, materials, body mechanics, manufacturing, quality control, and ethics and the intersection of these subjects as they relate to biomedical manufacturing. Study of medical data (CT, MRI, etc.) processing, biomedical design, 3D bioprinting and additive manufacturing concepts.

IE 4480: Manufacturing Systems Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: IE 2480

Fixturing and tooling requirements for manufacturing process planning, geometric dimensioning and tolerancing, computer aided inspection, cellular and flexible manufacturing, facility layout and controlled flow production. (Typically Offered: Spring)

IE 4490: Computer Aided Design and Manufacturing

Credits: 3. Contact Hours: Lecture 3.

Prereq: IE 2480, and MATH 2650

Representation and interpretation of curves, surfaces and solids. Parametric curves and surfaces and solid modeling. Use of CAD software and CAD/CAM integration. Computer numerical control, CNC programming languages, and process planning.

IE 4500: Technical Sales for Engineers

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment in IE 3050

Technical sales process methodology, tools and techniques. Customer relationship management (CRM) sales automation applications, prospecting and lead qualification, market analysis and industry segmentation. Responding to prospective requests for quotation and proposal (RFQs and RFPs) in written and verbal form. Technical needs analysis, business value proposition development, proposal creation and competitive positioning. Evaluating organizational decision-making processes and people, being a trusted advisor, and practicing sales closing strategies. (Typically Offered: Fall)

IE 4520: Introduction To Systems Engineering And Analysis

(Cross-listed with AERE 4520).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior Classification in an Engineering Major

Principles of systems engineering to include problem statement formulation, stakeholder analysis, requirements definition, system architecture and concept generation, system integration and interface management, verification and validation, and system commissioning and decommissioning operations. Introduction to discrete event simulation processes. Students will work in groups to propose, research, and present findings for a systems engineering topic of current relevance. (Typically Offered: Summer)

IE 4530X: Engineering Problem Solving for Defense

Credits: 3.

Prereq: Permission of Instructor; Sophomore classification

The primary objective of IE 4530X is to obtain practice in comprehensive engineering and communication skills, while simultaneously honing personal effectiveness and entrepreneurial skills, through the development and completion of an engineering project sponsored by a Department of Defense (DOD) agency. Engineering expectations include applying both previously learned and newly acquired knowledge and skills to identify, formulate, and solve a complex engineering problem, which results in tangible deliverables for the DOD agency. The semester's projects will revolve around the theme of prototyping solutions for national security. Engineered solutions will consider extensive ramifications, including defense and security, political, ethical, environmental and energy, and global issues. Project developments will be communicated via the Lean Startup methodology made famous by Stanford University to iteratively cut through the complexity. Student teams will provide the DOD sponsor with a validated problem, a validated solution concept, and a prototyped Minimal Viable Product.

IE 4680: Large-Scale Complex Engineered Systems (LSCES)

(Cross-listed with AERE 4680).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Senior classification in an Engineering major or Permission of Instructor

Introduction to the theoretical foundation and methods associated with the design for large-scale complex engineered systems, including objective function formation, design reliability, value-driven design, product robustness, utility theory, economic factors for the formation of a value function and complexity science as a means of detecting unintended consequences in the product behavior. (Typically Offered: Spring)

IE 4700: Systems Engineering and Project Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment in IE 3050; or instructor permission; Credit or enrollment in STAT 2310 or STAT 3010 or STAT 3050 or STAT 3260 or STAT 4010 or STAT 5870; or instructor permission

Systems view of projects and the processes by which they are implemented. Focuses on qualitative and quantitative tools and techniques of project management. Topics will include organizational structure types; project selection methodologies; simulation and optimization; and earned value management. Case studies will be included, and a group project required.

IE 4720: Design and Evaluation of Human-Computer Interaction

(Dual-listed with IE 5720).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Human factors methods applied to interface requirements, design, prototyping, and evaluation. Concepts related to understanding user characteristics, design principles, usability analysis, methods and techniques for design and evaluation of the interface. The evaluation and design of the information presentation characteristics of a wide variety of interfaces: web sites (e-commerce), mobile applications, and information presentation systems (cockpits, instrumentation, etc.).

IE 4810: e-Commerce Systems Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: IE 1480.

Design, analysis, and implementation of e-commerce systems. Information infrastructure, enterprise models, enterprise processes, enterprise views. Data structures and algorithms used in e-commerce systems, SQL, exchange protocols, client/server model, web-based views.

IE 4830: Data Mining

Credits: 3. Contact Hours: Lecture 3.

Prereq: IE 1480, IE 3120, STAT 2310

Foundations of classification, data clustering and association rule mining. Techniques for data mining, with focus on tree-based methods for classification (simple trees, random forest and boosted trees), ensemble learning, optimization algorithms and deep learning with neural networks. Performance metrics and resampling methods for evaluating model quality. A computing project in R is required.

IE 4870: Big Data Analytics and Optimization

Credits: 3. Contact Hours: Lecture 3.

Prereq: IE 3120 and STAT 2310

Optimization and statistical learning related to big data problems. Modern modeling for data-driven optimization problems and their applications in big data analytics. Algorithms for optimization and statistical learning and their implementation. Applications in manufacturing sector and service sciences. (Typically Offered: Spring)

IE 4900: Independent Study

Credits: 1-5. Repeatable.

Prereq: Senior classification; Permission of Instructor

Independent study and work in the areas of industrial engineering design, practice, or research.

IE 4900H: Independent Study: Honors

Credits: 1-5. Repeatable.

Prereq: Senior classification; Permission of Instructor

Independent study and work in the areas of industrial engineering design, practice, or research.

Courses primarily for graduate students, open to qualified undergraduates:

IE 5010: I E Graduate Seminar

Credits: Required. Contact Hours: Lecture 1.

Repeatable.

Principles and practices for research tasks at the M.S. level including proposal writing, presentations, paper preparation, and project management. Offered on a satisfactory-fail basis only.

IE 5030: Introduction to Sustainable Production Systems

Credits: 3. Contact Hours: Lecture 3.

Quantitative introduction of sustainability concepts in production planning and inventory control. Review of material recovery (recycling) and product/component recovery (remanufacturing) from productivity perspectives. Sustainability rubrics ranging from design and process to systems. Application to multi-echelon networks subject to forward/backward flow of material and information. Closed-loop supply chains. Comparative study of sustainable vs. traditional models for local and global production systems.

IE 5050: Advanced Engineering Economy for Complex Engineering Projects

Credits: 3. Contact Hours: Lecture 3.

Overview of engineering economic valuation and complex engineering projects. Stochastic dynamic programming for project valuation. Modeling and analysis of confounding factors of engineering projects. Integration and synthesis of valuation methodologies to complex projects. Applications to power plants, transmission networks, and satellites.

IE 5080: Design and Analysis of Allocation Mechanisms

Credits: 3. Contact Hours: Lecture 3.

Market-based allocation mechanisms from quantitative economic systems perspective. Pricing and costing models designed and analyzed with respect to decentralized decision processes, information requirements, and coordination. Financial Engineering Techniques. Case studies and examples from industries such as regulated utilities, semiconductor manufacturers, and financial engineering services.

IE 5100: Network Analysis

Credits: 3. Contact Hours: Lecture 3.

Formulation and solution of deterministic network flow problems including shortest path, minimum cost flow, and maximum flow. Network and graph formulations of combinatorial problems including assignment, matching, and spanning trees. Solution algorithm design and analysis based on optimality conditions and duality.

IE 5130: Analysis of Stochastic Systems

Credits: 3. Contact Hours: Lecture 3.

Introduction to modeling and analysis of manufacturing and service systems subject to uncertainty. Topics include the Poisson process, renewal processes, Markov chains, and Brownian motion. Applications to inventory systems, production system design, production scheduling, reliability, and capacity planning.

IE 5140: Production Scheduling

Credits: 3. Contact Hours: Lecture 3.

Introduction to the theory of machine shop systems. Complexity results for various systems such as job, flow and open shops. Applications of linear programming, integer programming, network analysis. Enumerative methods for machine sequencing. Introduction to stochastic scheduling.

IE 5190: Simulation Modeling and Analysis

Credits: 3. Contact Hours: Lecture 3.

Event scheduling, process interaction, and continuous modeling techniques. Introduction of Bayesian simulation techniques and commonly used numerical methods. Probability and statistics related to simulation parameters including run length, metrics, inference, design of experiments, variance reduction, and stopping rules. Simulation of stochastic concepts and processes. Aspects of simulation languages. A computing project in a programming language is required.

IE 5200: Engineering Problem Solving with R

Credits: 3. Contact Hours: Lecture 3.

Introduction to data analytics using R programming language. Data manipulation. Exploratory data analysis via basic graphics. Basic statistical analysis including statistical tests and linear regression. R Markdown. Simulation by replicating a calculation. Conditional expressions, loops, and functions. High level data visualizations using ggplot graphics. Data extraction from text. Optimization via R build-in functions. Logistic regression. High performance computing tools. Project required for graduate credits. (Typically Offered: Spring)

IE 5310: Quality Control and Engineering Statistics

(Cross-listed with STAT 5310).

Credits: 3. Contact Hours: Lecture 3.

Prereq: STAT 5870 and STAT 5880

Statistical methods and theory applicable to problems of industrial process monitoring and improvement. Statistical issues in industrial measurement; Shewhart, CUSUM, and other control charts; feedback control; process characterization studies; estimation of product and process characteristics; acceptance sampling, continuous sampling and sequential sampling; economic and decision theoretic arguments in industrial statistics.

IE 5330: Reliability

(Cross-listed with STAT 5330).

Credits: 3. Contact Hours: Lecture 3.

Probabilistic modeling and inference in engineering reliability; lifetime models, product limit estimator, probability plotting, maximum likelihood estimation for censored data, Bayesian methods in reliability, system reliability models, competing risk analysis, acceleration models and analysis of accelerated test data; analysis of recurrent events and degradation data; planning studies to obtain reliability data. Offered even-numbered years. (Typically Offered: Spring)

IE 5340: Linear Programming

Credits: 3. Contact Hours: Lecture 3.

Formulation of optimization problems as mathematical models, such as linear programming, integer programming, and multi-objective optimization. Introduction to classic optimization algorithms, such as Simplex and cutting plane algorithms. Basic concepts of duality theory and sensitivity analysis. Using computer solvers to obtain optimal solutions to optimization models.

IE 5370: Reliability and Safety Engineering

Credits: 3. Contact Hours: Lecture 3.

Mathematical basics for dealing with reliability data, theory, and analysis. Bayesian reliability analysis. Engineering ethics in safety evaluations. Case studies of accidents in large technological systems. Fault and event tree analysis.

IE 5410: Inventory Control and Production Planning

Credits: 3. Contact Hours: Lecture 3.

Economic Order Quantity, dynamic lot sizing, newsboy, base stock, and (Q,r) models. Material Requirements Planning, Just-In-Time (JIT), variability in production systems, push and pull production systems, aggregate and workforce planning, and capacity management. Supply Chain Contracts.

IE 5440: Micro/Nano Scale Additive Printing

Credits: 3. Contact Hours: Lecture 3.

Prereq: IE 3480 or Graduate Classification

Introduction of physical theory, design, analysis, fabrication, and characterization of micro/nano scale fabrication and manufacturing systems; introduction of micro/nano scale additive manufacturing; and deep understanding of additive printing for micro/nano scale applications. Focus on the fabrication/manufacturing of important types of microstructures used in micro/nano devices using additive printing, and the techniques and tools used to characterize them. Students are expected to finish a team project related applying additive printing experimentally or theoretically to the design of a sensor. (Typically Offered: Fall)

IE 5450: Additive Manufacturing and Rapid Production Methods

Credits: 3. Contact Hours: Lecture 3.

Prereq: (IE 2480 and MATH 2650) or Graduate Classification

Introduction to additive manufacturing and other rapid prototyping and manufacturing methodologies. Operating principles and characteristics of current and developing processes. Use of rapid prototypes in product design, development, and service. Selection of rapid prototyping and manufacturing systems, from design to mass production. Hybrid manufacturing and other integration of rapid production methods.

IE 5460: Geometric Variability in Manufacturing

Credits: 3. Contact Hours: Lecture 3.

Prereq: (IE 3480 or MATE 2160 or ME 3240) or Graduate Classification

Assessment, accommodation, and control of geometric variability in manufacturing processes, specifically composites, metalcasting, welding, machining, powder metallurgy and additive processing. Techniques include the design of the component, tooling, process plan and inspection methodology.

IE 5470: Biomedical Design and Manufacturing

Credits: 3. Contact Hours: Lecture 3.

Exploration of biology, materials, body mechanics, manufacturing, quality control, and ethics and the intersection of these subjects as they relate to biomedical manufacturing. Study of medical data (CT, MRI, etc.) processing, biomedical design, 3D bioprinting and additive manufacturing concepts.

IE 5490: Computer Aided Design and Manufacturing

Credits: 3. Contact Hours: Lecture 3.

Representation and interpretation of curves, surfaces and solids. Parametric curves and surfaces and solid modeling. Use of CAD software and CAD/CAM integration. Computer numerical control, CNC programming languages, and process planning.

IE 5600: Engineering Risk Analysis

Credits: 3. Contact Hours: Lecture 3.

Overview of probabilistic risk analysis, modeling risks, and risk management. Topics include probability, influence diagrams, subjective probability assessment, fault tree analysis, decision making with uncertainty, risk perception, risk communication, and intelligent adversary. Use of Monte Carlo simulation to combine different sources of uncertainty and risk to generate probability distributions over an outcome. Application of probabilistic risk analysis to business investments, engineering systems, critical infrastructure, defense and security, and health systems.

IE 5610: Total Quality Management

Credits: 3. Contact Hours: Lecture 3.

Perspectives for how to analyze and implement total quality management in different organizations, to include manufacturing firms, service industries, the non-profit sector, and government agencies. Topics include the different viewpoints of quality (from the customer, workforce, and process perspective); aligning quality in an organization's goals; performance measurement; quality in supply chain management; and reliability. Some advanced statistical elements of quality control will also be discussed.

IE 5630: Engineering and Systems Management

Credits: 3. Contact Hours: Lecture 3.

Introduction to engineering management concepts and examples relevant to the engineering manager today. Topics include decision trees and associated probabilities; personnel issues and challenges; working with management, client and the project team; personality types; and documents/forms that are useful for the engineering manager. Case studies, and a group project required.

IE 5640: Decision Analysis

Credits: 3. Contact Hours: Lecture 3.

Application of normative decision theory to problems with uncertainty and/or multiple objectives. The first decision framework will be a single-objective decision problem with uncertainty that takes into account a decision maker's attitude towards risk. The second decision framework will be a multi-criteria decision problem in which a decision maker has multiple objectives. Topics include utility theory, value of information, sensitivity analysis, value-focused thinking, cost-effectiveness analysis, influence diagrams, and behavioral decision making. Examples will be drawn from business, systems engineering and design, and government.

IE 5650: Systems Engineering and Analysis

(Cross-listed with AERE 5650/ EE 5650).

Credits: 3. Contact Hours: Lecture 3.

Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test and evaluation, and systems engineering planning and organization. Graduation Restrictions: Not available for degrees in industrial engineering.

IE 5660: Applied Systems Engineering

Credits: 3. Contact Hours: Lecture 3.

Design for reliability, maintainability, usability, supportability, producibility, disposability, and life cycle costs in the context of the systems engineering process. Students will be required to apply the principles of systems engineering to a project including proposal, program plan, systems engineering management plan, and test and evaluation plan. Graduation Restriction: Not available for degrees in industrial engineering.

IE 5680: Large-Scale Complex Engineered Systems (LSCES)

(Cross-listed with AERE 5680).

Credits: 3. Contact Hours: Lecture 3.

Introduction to the theoretical foundation and methods associated with the design for large-scale complex engineered systems, including objective function formation, design reliability, value-driven design, product robustness, utility theory, economic factors for the formation of a value function and complexity science as a means of detecting unintended consequences in the product behavior. (Typically Offered: Spring)

IE 5700: Systems Engineering and Project Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: IE 3050 and (STAT 2310 or STAT 3050) and Junior classification or Graduate Classification

Systems view of projects and the processes by which they are implemented. Focuses on qualitative and quantitative tools and techniques of project management. Topics will include organizational structure types; project selection methodologies; simulation and optimization; and earned value management. Case studies will be included, and a group project required.

IE 5710: Occupational Biomechanics

Credits: 3. Contact Hours: Lecture 3.

Anatomical, physiological, and biomechanical bases of physical ergonomics. Anthropometry, body mechanics, strength of biomaterials, human motor control. Use of bioinstrumentation, passive industrial surveillance techniques and active risk assessment techniques. Acute injury and cumulative trauma disorders. Static and dynamic biomechanical modeling. Emphasis on low back, shoulder and hand/wrist biomechanics.

IE 5720: Design and Evaluation of Human-Computer Interaction

(Dual-listed with IE 4720).

Credits: 3. Contact Hours: Lecture 3.

Human factors methods applied to interface requirements, design, prototyping, and evaluation. Concepts related to understanding user characteristics, design principles, usability analysis, methods and techniques for design and evaluation of the interface. The evaluation and design of the information presentation characteristics of a wide variety of interfaces: web sites (e-commerce), mobile applications, and information presentation systems (cockpits, instrumentation, etc.).

IE 5760: Human Factors in Product Design

Credits: 3. Contact Hours: Lecture 3.

Investigation of the human interface to consumer and industrial systems and products, providing a basis for their design and evaluation. Discussions of human factors in the product design process: modeling the human during product use; usability; human factors methods in product design evaluation; user-device interface; safety, warnings, and instructions for products; considerations for human factors in the design of products for international use.

IE 5770: Human Factors

Credits: 3. Contact Hours: Lecture 3.

Physical and psychological factors affecting human performance in systems. Signal detection theory, human reliability modeling, information theory, and performance shaping applied to safety, reliability, productivity, stress reduction, training, and human/equipment interface design. Laboratory assignments related to system design and operation.

IE 5800X: Introduction of Project Management for Thesis Research

(Cross-listed with CHE 5800X/ MSE 5800X).

Credits: 1. Contact Hours: Lecture 1.

Tools and skills of Project Management (PM) adapted from industry to improve efficiency in thesis research. Project charter initiation for thesis, timeline and meeting scheduling tools, expectation management, and communication with advisors. Practice of the PM skills using student's own thesis. Presentation of a project charter. Demonstration of knowledge of related PM skills and the ability of utilizing these skills for thesis research. Sharing thesis ideas and learning experience in the Graduate for Advancing Professional Skills (GAPS) learning community. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

IE 5810: e-Commerce Systems Engineering

Credits: 3. Contact Hours: Lecture 3.

Design, analysis, and implementation of e-commerce systems. Information infrastructure, enterprise models, enterprise processes, enterprise views. Data structures and algorithms used in e-commerce systems, SQL, exchange protocols, client/server model, web-based views.

IE 5820: Enterprise Modeling and Integration

Credits: 3. Contact Hours: Lecture 3.

The design and analysis of enterprise models to support information engineering of enterprise-wide systems. Representation of system behavior and structure including process modeling, information modeling, and conceptual modeling. Applications in enterprise application integration, enterprise resource planning systems, product data management systems, and manufacturing execution systems.

IE 5830: Data Mining

Credits: 3. Contact Hours: Lecture 3.

Foundations of classification, data clustering and association rule mining. Techniques for data mining, with focus on tree-based methods for classification (simple trees, random forest and boosted trees), ensemble learning, optimization algorithms and deep learning with neural networks. Performance metrics and resampling methods for evaluating model quality. A computing project in R is required.

IE 5850: Requirements and Architecture Engineering

Credits: 3. Contact Hours: Lecture 3.

Principles and practices for requirements engineering as part of the product development process with emphasis on software systems engineering. Problem definition, problem analysis, requirements analysis, requirements elicitation, validation, specifications. Case studies using requirements engineering methods and techniques.

IE 5870: Big Data Analytics and Optimization

Credits: 3. Contact Hours: Lecture 3.

Optimization and statistical learning related to big data problems. Modern modeling for data-driven optimization problems and their applications in big data analytics. Algorithms for optimization and statistical learning and their implementation. Applications in manufacturing sector and service sciences. (Typically Offered: Spring)

IE 5880: Information Systems for Manufacturing

Credits: 3. Contact Hours: Lecture 3.

Design and implementation of systems for the collection, maintenance, and usage of information needed for manufacturing operations, such as process control, quality, process definition, production definitions, inventory, and plant maintenance. Topics include interfacing with multiple data sources, methods to utilize the information to improve the process, system architectures, and maintaining adequate and accurate data for entities internal and external to the enterprise to achieve best manufacturing practices.

IE 5900: Special Topics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Advanced study of a research topic in the field of industrial engineering.

IE 5990: Creative Component

Credits: 1-30.

Prereq: Instructor Permission for Course

Offered on a satisfactory-fail basis only.

Courses for graduate students:**IE 6130: Stochastic Production Systems**

Credits: 3. Contact Hours: Lecture 3.

Modeling techniques to evaluate performance and address issues in design, control, and operation of systems. Markov models of single-stage make-to-order and make-to-stock systems. Approximations for non-Markovian systems. Impact of variability on flow lines. Open and closed queuing networks.

IE 6310: Nonlinear Programming

Credits: 3. Contact Hours: Lecture 3.

Develop nonlinear models, convex sets and functions, optimality conditions, Lagrangian duality, unconstrained minimization techniques. Constrained minimization techniques covering penalty and barrier functions, sequential quadratic programming, the reduced gradient method, nonlinear control concepts.

IE 6320: Integer Programming

Credits: 3. Contact Hours: Lecture 3.

Integer programming including cutting planes, branch and bound, and Lagrangian relaxation. Introduction to complexity issues and search-based heuristics.

IE 6330: Stochastic Programming

Credits: 3. Contact Hours: Lecture 3.

Mathematical programming with uncertain parameters; modeling risk within optimization; multi-stage recourse and probabilistically constrained models; solution and approximation algorithms including Benders decomposition and progressive hedging; and applications to planning, allocation and design problems.

IE 6340: Computational Optimization

Credits: 3. Contact Hours: Lecture 3.

Theory, algorithm, and computer implementation of optimization models. Simplex, Benders decomposition, computational complexity, mixed integer linear program, linear program with complementarity constraints, inverse optimization, bilevel discrete optimization. Open source and commercial optimization solvers will be introduced and used.

IE 6420: Simultaneous Engineering in Manufacturing Systems

Credits: 3. Contact Hours: Lecture 3.

Current engineering methods for the product life cycle process. Feature-based design, computer-aided process planning, and data-driven product engineering.

IE 6710: Research Practicum in Human Factors and Ergonomics

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Research topic development, literature evaluation, experimental design, use of bioinstrumentation, data collection, basic data interpretation, statistical analysis, manuscript preparation.

IE 6720: Human Factors in Automation Design

Credits: 3. Contact Hours: Lecture 3.

Concepts in human-automation systems, including levels of automation, types of automation, and level of control. Implications of how adaptive automation affects error, trust, workload, situation awareness, and performance. Understand how human operators are affected by automation implementation in real-world systems. Apply human factors concepts to the design and evaluation of human-automation systems. Offered even-numbered years. (Typically Offered: Fall)

IE 6730: Spine Biomechanics

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Gross and fine anatomy of spine, mechanism of pain, epidemiology, in vitro testing, psychophysical studies, spine stability models, bioinstrumentation: intradiscal pressure, intra-abdominal pressure and electromyography. Biomechanics of lifting and twisting, effects of vibration, effects of posture/lifting style, lifting belts, physical models, optimization models, mathematical models, muscle models, finite element models, current trends in medical management and rehabilitation, chiropractic. Offered odd-numbered years. (Typically Offered: Fall)

IE 6810: Cognitive Engineering

(Cross-listed with HCI 6810).

Credits: 3. Contact Hours: Lecture 3.

Provides an overview of human cognitive capabilities and limitations in the design of products, workplaces, and large systems. Contexts vary broadly and could range from simple use of mobile devices to an air-traffic control or nuclear plant command center. Course focuses on what we can infer about users' thoughts and feelings based on what we can measure about their performance and physiological state. Covers the challenge of designing automated systems.

IE 6900: Advanced Topics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Advanced topics related to Ph.D. research in industrial engineering under the direction of the instructor.

IE 6970: Engineering Internship

Credits: Required. Repeatable.

One Fall OR Spring semester combined with one summer, maximum per academic year. Excludes Fall/Spring combination. Professional work period. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

IE 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Integrated Studio Arts (ARTIS)

Courses primarily for undergraduates:**ARTIS 1700: Exploring the Visual Arts**

Credits: 3. Contact Hours: Lecture 3.

Visual arts and how it relates to individuals, their community, and the importance in a cultural and global context. Understand vocabulary of the visual arts, and develop strategies for observation and critical thinking through assignments including reflective writing and observational analysis on various works of art. Engage with various visual art topics and disciplines such as: defining what art is, learning about types of art and its use and meaning of materials, how art plays a role in the expression of humanity, and how personal awareness and perspective can benefit from the engagement of art. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

ARTIS 2010: Creative Visual Thinking

Credits: 3.

Exploration of the nature of visual perception in relation to issues of visual communication, problem solving, envisioning information, and visual thinking. Studio assignments to be digitized and sent to instructor electronically for evaluation and critique. (Typically Offered: Fall, Spring)

ARTIS 2020: Studio Fundamentals: Wood

Credits: 2. Contact Hours: Studio 4.

Prereq: Sophomore classification

Half-semester course. Introduction to wood's physical properties, its potential as an expressive medium, and basic wood working hand tools and techniques. (Typically Offered: Fall, Spring)

ARTIS 2030: Studio Fundamentals: Jewelry/Metalsmithing

Credits: 2. Contact Hours: Studio 4.

Prereq: Sophomore classification

Half semester course. Introduction to basic jewelry/metals design and fabrication. Forming, texturing, and joining techniques (soldering/riveting) will be explored and applied to two projects. (Typically Offered: Fall, Spring)

ARTIS 2040: Studio Fundamentals: Ceramics

Credits: 2. Contact Hours: Studio 4.

Prereq: Sophomore classification

Half-semester course providing an introduction to ceramic techniques including hand-building, high fire and low fire glaze applications and expressive approaches that will be applied to two projects. The emphasis is on creative communication through ceramics. (Typically Offered: Fall, Spring)

ARTIS 2060: Studio Fundamentals: Printmaking

Credits: 2. Contact Hours: Studio 4.

Prereq: Sophomore classification

Introduction to relief, monoprint, intaglio, lithography, and screen printing as methods for visual communication and expression. (Typically Offered: Fall, Spring)

ARTIS 2080: Color

Credits: 2. Contact Hours: Studio 8.

Prereq: Sophomore classification

Half-semester course. Introduction to color theory and color systems using various media for visual communication and creative expression. (Typically Offered: Fall, Spring)

ARTIS 2100: Studio Fundamentals: Photo

Credits: 2. Contact Hours: Studio 4.

Prereq: Sophomore classification

Introduction to film camera operation and traditional black and white darkroom methods for visual communication and creative expression. Film cameras required for class but may be checked out for short periods during semester. (Typically Offered: Fall, Spring)

ARTIS 2120: Studio Fundamentals: Digital Media

Credits: 3. Contact Hours: Studio 6.

Prereq: Sophomore classification

Introduction to digital media tools and concepts and digital fabrication processes to create two dimensional, three dimensional, and time-based artworks. Students will be introduced to major digital art and design software packages. (Typically Offered: Fall, Spring)

ARTIS 2130: Studio Fundamentals: Painting

Credits: 2. Contact Hours: Studio 4.

Prereq: Sophomore classification

Half-semester course. Introduction to preparation of painting grounds, color mixing, manipulation of paint and pictorial space as methods for visual communication and expression. (Typically Offered: Fall, Spring)

ARTIS 2140: Studio Fundamentals: Textiles

Credits: 2. Contact Hours: Studio 4.

Prereq: Sophomore classification

Half semester course. Introduction to two-dimensional and three-dimensional textile techniques used for visual communication and expression. (Typically Offered: Fall, Spring)

ARTIS 2270: Introduction to Creative Digital Photography

Credits: 3. Contact Hours: Studio 6.

The functions and operations of the digital camera, scanning and other image input devices, digital image manipulation, software usage and support, color management and printing, presentation of images, compositional dynamics and the development of 'seeing' as a medium of design, expression, and communication. Students should have access to a good or high quality digital camera with the ability to separately adjust shutter speed, f/stop and exposure, a laptop with updated Adobe Photoshop software, and enough digital storage for all class assignments.

ARTIS 2270H: Introduction to Creative Digital Photography: Honors

Credits: 3-4. Contact Hours: Studio 6.

The functions and operations of the digital camera, scanning and other image input devices, digital image manipulation, software usage and support, color management and printing, presentation of images, compositional dynamics and the development of 'seeing' as a medium of design, expression, and communication. Students should have access to a good or high quality digital camera with the ability to separately adjust shutter speed, f/stop and exposure, a laptop with updated Adobe Photoshop software, and enough digital storage for all class assignments.

ARTIS 2300: Drawing II

Credits: 3. Contact Hours: Studio 6.

Prereq: DSNS 1020, DSNS 1310, and DSNS 1830

A continuation of DSNS 1310. Further development of perceptual drawing skills from a variety of subject matter. Continued practice with drawing materials and techniques with emphasis on tonal and color media. (Typically Offered: Fall, Spring)

ARTIS 2330: Watercolor Painting

Credits: 3. Contact Hours: Studio 6.

Fundamentals of painting using water-based media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, architectural space, and the human form.

ARTIS 2330H: Watercolor Painting: Honors

Credits: 3-4. Contact Hours: Studio 6.

Prereq: ARTIS 2300

Fundamentals of painting using water-based media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, architectural space, and the human form.

ARTIS 2380: Painting I

Credits: 3. Contact Hours: Studio 6.

Prereq: ARTIS 2300

Fundamentals of painting using acrylic and oil media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, and the human form. (Typically Offered: Fall, Spring)

ARTIS 2380H: Painting I: Honors

Credits: 3-4. Contact Hours: Studio 6.

Prereq: ARTIS 2300

Fundamentals of painting using acrylic and oil media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, and the human form. (Typically Offered: Fall, Spring)

ARTIS 3050: Collage, Assemblage, and the Found Object

(Dual-listed with ARTIS 5050).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Prereq: Instructor Permission for Course

Explores the significance of recycling, sustainable methods of art making, and thrift-store culture as medium and subject matter for artists in both 2D and 3D studio projects. Through selected readings, slide presentations, and studio activities, we will address the environmental cause and effect of materials and methods, consumption and waste, and personal responsibility as stewards for the planet we share. Emphasis will be on conceptual development.

ARTIS 3080: Computer Modeling, Rendering and Virtual Photography

Credits: 3.

Introduction to 3D modeling using computer and available software. Modeling, texturing, lighting, and rendering with respect to 3D object and still scene creation.

ARTIS 3080H: Computer Modeling, Rendering and Virtual Photography: Honors

Credits: 3-4. Contact Hours: Lecture 9.5.

Introduction to 3D modeling using computer and available software. Modeling, texturing, lighting, and rendering with respect to 3D object and still scene creation.

ARTIS 3100: Sources and Methods of Visual Art

Credits: 3.

Study and application of methods used by contemporary artists for the purpose of generating ideas for new work. Field trip.

ARTIS 3110: Contemporary Issues in Studio Art

Credits: 3. Contact Hours: Studio 6.

Exploration of issues and directions in current art. Readings, discussions, and studio research projects to build an experimental and applied knowledge base for understanding each student's place in the contemporary art world.

ARTIS 3200: Introduction to Furniture Design

Credits: 3. Contact Hours: Studio 6.

Prereq: ARTIS 2020 or permission of instructor.

Design and production of basic furniture forms in wood. Introduction to power tools. Develop an individual design process including an understanding of scale and proportion. Develop a deeper understanding of wood and the issues of sustainability in furniture design.

ARTIS 3200H: Introduction to Furniture Design: Honors

Credits: 3-4. Contact Hours: Studio 6.

Prereq: ARTIS 2020 or permission of instructor.

Design and production of basic furniture forms in wood. Introduction to power tools. Develop an individual design process including an understanding of scale and proportion. Develop a deeper understanding of wood and the issues of sustainability in furniture design.

ARTIS 3220: Intermediate Ceramics Studio

Credits: 3. Contact Hours: Studio 6.

Prereq: ARTIS 2040 or permission of instructor.

Investigation of expressive forms and techniques in ceramics; introduction to throwing on the wheel, to exploration of utilitarian and sculptural approaches in the medium, and to glaze-making research and electric kiln firing.

ARTIS 3220H: Intermediate Ceramics Studio: Honors

Credits: 3-4. Contact Hours: Studio 6.

Prereq: ARTIS 2040 or permission of instructor.

Investigation of expressive forms and techniques in ceramics; introduction to throwing on the wheel, to exploration of utilitarian and sculptural approaches in the medium, and to glaze-making research and electric kiln firing.

ARTIS 3230: Scientific Illustration Principles and Techniques

(Cross-listed with BPMP 3230).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Prereq: (ARTIS 2300; BIOL 2110 or BIOL 2120) or Permission of Instructor

Studio basics and professional techniques in black & white, continuous tone, and color. Introduction to professional practice and principles of communicating science through art. Emphasis on tools, materials, and rendering.

ARTIS 3240: Jewelry/Metalsmithing II

Credits: 3. Contact Hours: Studio 6.

Prereq: ARTIS 2030 or Permission of Instructor

Hands-on studio experience. Focusing on traditional and contemporary metalsmithing techniques applicable to jewelry, functional objects, and sculptural art forms. Topics include fabrication, forming and cold joinery, with an emphasis on design and progressive skill development. Basic stone setting and lost wax casting introduced.

ARTIS 3240H: Jewelry/Metalsmithing II: Honors

Credits: 3-4. Contact Hours: Studio 6.

Prereq: ARTIS 2030 or Permission of Instructor

Hands-on studio experience. Focusing on traditional and contemporary metalsmithing techniques applicable to jewelry, functional objects, and sculptural art forms. Topics include fabrication, forming and cold joinery, with an emphasis on design and progressive skill development. Basic stone setting and lost wax casting introduced.

ARTIS 3250: Integrated Studio Arts Seminar

Credits: 2. Contact Hours: Lecture 2.

Repeatable, maximum of 6 credits.

Contemporary issues in studio arts explored through lectures, presentations and critiques.

ARTIS 3260: Illustration and Illustration Software

(Cross-listed with BPMI 3260).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Prereq: ARTIS 3230/BPMI 3230, or permission of the instructor

An introduction to digital illustration software. Application of painting, drawing and image making techniques using vector and raster based programs.

ARTIS 3270: Illustration as Communication

(Cross-listed with BPMI 3270).

Credits: 3. Contact Hours: Studio 6.

Prereq: ARTIS 3230/BPMI 3230, or permission of the instructor

Investigation of illustration as a form of communication. Emphasis on problem solving, effective composition, and advancement of rendering skills.

ARTIS 3290: Creative Photography

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 6 credits.

Prereq: ARTIS 2100 or permission of instructor

Continuation and expansion of concepts and processes from introductory photography. The class begins with advanced film camera techniques and experimentation with medium format cameras. It then moves into digital and color photography while also addressing output and presentation. Emphasis will be on the use of photography for visual communication and creative expression.

ARTIS 3290H: Creative Photography: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable, maximum of 6 credits.

Prereq: ARTIS 2100 or permission of instructor

Continuation and expansion of concepts and processes from introductory photography. The class begins with advanced film camera techniques and experimentation with medium format cameras. It then moves into digital and color photography while also addressing output and presentation. Emphasis will be on the use of photography for visual communication and creative expression.

ARTIS 3300: Drawing III: Life Drawing

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Prereq: ARTIS 2300

Drawing from the human figure.

ARTIS 3300H: Drawing III: Life Drawing: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable.

Prereq: ARTIS 2300

Drawing from the human figure.

ARTIS 3310: Alternative materials for Artist/Designer

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: 6 credits ARTIS courses or permission of instructor

Exploration of alternative materials (primarily non-metallics, both natural and manufactured) applicable to the design and creation of small designed objects and adornment. Students will learn additive and reductive processes, experiment with found object inclusion, rubber mold-making, and resin casting. A series of finished pieces will result. Open to all majors in the College of Design. (Typically Offered: Fall, Spring)

ARTIS 3370: Application of Scientific Illustration Techniques

(Cross-listed with BPMI 3370).

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 6 credits.

Prereq: ARTIS 3270

Rendering techniques applied to different types of biological and scientific subjects emphasizing communication. The use of traditional and digital media. Term project required. (Typically Offered: Spring)

ARTIS 3380: Painting II

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Prereq: ARTIS 2380 or ARTIS 2130 and ARTIS 2300

Painting using acrylic and oil media; composition and expression.

ARTIS 3380H: Painting II: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable.

Prereq: ARTIS 2380 or ARTIS 2130 and ARTIS 2300

Painting using acrylic and oil media; composition and expression.

ARTIS 3450: Introduction to Weaving

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Prereq: ARTIS 2140 or permission of instructor

Introduction to woven textile construction with emphasis on technical development of weaving as a means for creative expression. Students may explore tapestry, off-loom and/or 4-harness weaving.

ARTIS 3450H: Introduction to Weaving: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable.

Prereq: ARTIS 2140 or permission of instructor

Introduction to woven textile construction with emphasis on technical development of weaving as a means for creative expression. Students may explore tapestry, off-loom and/or 4-harness weaving.

ARTIS 3460: Natural Dyes

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Introduction to natural dyes. Course includes a historical overview of natural dyes with attention to global perspectives. Emphasis on technical skill development and application of research in the creation of contemporary textile artwork, apparel and home furnishings. (Typically Offered: Fall, Spring)

ARTIS 3460H: Natural Dyes: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable.

Introduction to natural dyes. Course includes a historical overview of natural dyes with attention to global perspectives. Emphasis on technical skill development and application of research in the creation of contemporary textile artwork, apparel and home furnishings. (Typically Offered: Fall, Spring)

ARTIS 3470: Dyed and Printed Textiles

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Fabric dyeing and printing techniques including block, stencil and experimental screen-printing, and resists using synthetic dyes, discharging agents, and pigments. Printing with plant-based dyes may also be explored. Digital printing and transfer printing on fabric may be introduced. Emphasis on research and development of dyed and printed textile design techniques as a means for creative expression. (Typically Offered: Fall, Spring)

ARTIS 3470H: Printed Textile Design: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable.

Textile hand-printing methods on fabric including block, stencil and experimental screen-printing using synthetic dyes, discharging agents and pigments. Printing with plant-based dyes will also be explored. Digital printing and transfer printing on fabric will be introduced. Emphasis on research and development of printed textile design techniques as a means for personal expression. (Typically Offered: Fall, Spring)

ARTIS 3560: Relief Printmaking: Digital/Traditional

(Dual-listed with ARTIS 5560).

Credits: 3-4. Contact Hours: Studio 6.

Repeatable, maximum of 6 credits.

Prereq: ARTIS 2060 and credit or enrollment in ARTIS 2300, or instructor permission

In-depth exploration of digital or traditional design and block cutting processes (computer/laser cutter/CNC router or drawing/chisels). Use relief printmaking to create a unified body of prints from those blocks. Emphasis is on experimental and creative use of printmaking with study of contemporary trends. (Typically Offered: Fall, Spring)

ARTIS 3560H: Relief Printmaking: Digital/Traditional: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable, maximum of 6 credits.

Prereq: ARTIS 2060 and credit or enrollment in ARTIS 2300, or instructor permission

Explore the techniques and aesthetic qualities of black and white and color relief printmaking with woodcuts, computer/laser cutter/CNC router blocks, or photopolymer plates. Emphasis is on experimental and creative use of printmaking with study of contemporary trends. (Typically Offered: Fall, Spring)

ARTIS 3570: Intaglio and Monotype Printmaking: Digital / Traditional
(Dual-listed with ARTIS 5570).

Credits: 3-4. Contact Hours: Studio 6.

Repeatable, maximum of 9 credits.

Prereq: ARTIS 2060 and credit or enrollment in ARTIS 2300, or instructor permission

Explore the techniques and aesthetic qualities of black and white and color intaglio printmaking primarily through etching, aquatint, laser-cut plates and collagraph processes. Students will generate imagery through traditional drawing, collage and digital processes. Unique, one-of-a-kind black and white and color prints from Plexiglas will also be introduced. Emphasis is on experimental and creative use of printmaking for artistic expression. (Typically Offered: Fall, Spring)

ARTIS 3570H: Intaglio and Monotype Printmaking: Digital/Traditional: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable, maximum of 9 credits.

Prereq: ARTIS 2060 and credit or enrollment in ARTIS 2300, or instructor permission

Explore the techniques and aesthetic qualities of black and white and color intaglio printmaking primarily through etching, aquatint, laser-cut plates and collagraph processes. Students will generate imagery through traditional drawing, collage and digital processes. Unique, one-of-a-kind black and white and color prints from Plexiglas will also be introduced. Emphasis is on experimental and creative use of printmaking for artistic expression. (Typically Offered: Fall, Spring)

ARTIS 3580: Lithography: Digital / Traditional

(Dual-listed with ARTIS 5580).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Prereq: ARTIS 2060 and credit or enrollment in ARTIS 2300, or instructor permission

Examine the techniques and aesthetic qualities of lithography primarily through hand-drawn and photographic plates. Students may generate imagery through traditional drawing, collage or digital processes. Emphasis is on experimental and creative use of printmaking for artistic expression. For those taking the course for a second semester, focus is on stone lithography and increased work with color. (Typically Offered: Fall, Spring)

ARTIS 3580H: Lithography: Digital/Traditional: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable.

Prereq: ARTIS 2060 and credit or enrollment in ARTIS 2300, or instructor permission

Examine the techniques and aesthetic qualities of lithography primarily through hand-drawn and photographic plates. Students may generate imagery through traditional drawing, collage or digital processes. Emphasis is on experimental and creative use of printmaking for artistic expression. For those taking the course for a second semester, focus is on stone lithography and increased work with color. (Typically Offered: Fall, Spring)

ARTIS 3990: BFA Professional Practice

Credits: 2. Contact Hours: Lecture 2.

Prereq: Admission to Integrated Studio Arts BFA; junior classification or above

Introduction to professional practices including development of portfolio (visual and written components). Lecture and presentation topics include applying to graduate school, internships, applying for jobs, grants/funding opportunities, professional networking, exhibition opportunities, and best practices for studio artists. Half-semester course. Required of all ISA majors. (Typically Offered: Spring)

ARTIS 4060X: Introduction to 3D Organic Modeling in ZBrush

(Cross-listed with BPMI 4060X).

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 2 times.

Introduction to organic 3D model creation in ZBrush. Digital clay sculpting informed by traditional techniques. 3D printing pipeline. Emphasis on science research and visual design thinking for science communication. Some experience with other 3D modeling software beneficial, but not required. (Typically Offered: Spring)

ARTIS 4070: Principles of Character Animation

(Dual-listed with ARTIS 5070).

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 9 credits.

Prereq: ARTIS 3080

Animation techniques using the computer and available software.

Principles of character animation. Prior knowledge of modeling, lighting, texturing and rendering with available software is assumed.

ARTIS 4070H: Principles of Character Animation: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable, maximum of 9 credits.

Prereq: ARTIS 3080

Animation techniques using the computer and available software.

Principles of character animation. Prior knowledge of modeling, lighting, texturing and rendering with available software is assumed.

ARTIS 4080: Principles of 3D Animation

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Prereq: ARTIS 3080

Animation techniques using the computer and available software.

Principles of animation. Prior knowledge of modeling, lighting, texturing, animation and rendering with computer and available software is assumed.

ARTIS 4080H: Principles of 3D Animation: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable.

Prereq: ARTIS 3080

Animation techniques using the computer and available software.

Principles of animation. Prior knowledge of modeling, lighting, texturing, animation and rendering with computer and available software is assumed.

ARTIS 4090: Computer/Video Game Design and Development

(Dual-listed with ARTIS 509/ HCI 509).

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 12 credits.

Independent project based creation and development of 'frivolous and non-frivolous' computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of Indie development and computer/video game history will be discussed.

ARTIS 4090H: Computer/Video Game Design and Development: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable, maximum of 12 credits.

Independent project based creation and development of 'frivolous and non-frivolous' computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of Indie development and computer/video game history will be discussed. (Typically Offered: Fall, Spring, Summer)

ARTIS 4200: Advanced Furniture Design

(Dual-listed with ARTIS 5200).

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 12 credits.

Prereq: ARTIS 3200

Design and creation of increasingly complex furniture forms with consideration of precedents and innovative techniques and approaches. Continued development of a unique personal approach to the design and making of furniture. Refined sensitivity to wood, and continued consideration of various sustainable practices. (Typically Offered: Fall, Spring)

ARTIS 4200H: Advanced Furniture Design: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable, maximum of 12 credits.

Prereq: ARTIS 3200

Design and creation of increasingly complex furniture forms with consideration of precedents and innovative techniques and approaches. Continued development of a unique personal approach to the design and making of furniture. Refined sensitivity to wood, and continued consideration of various sustainable practices. (Typically Offered: Fall, Spring)

ARTIS 4220: Advanced Ceramic Studio

(Dual-listed with ARTIS 5220).

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 12 credits.

Prereq: ARTIS 3220

Creation of a body of work in personal ceramic forms and unique surface treatments. Exploration of kiln firings, research into contemporary ceramic artists and development of a body of increasingly skilled work are emphasized. Students are expected to be capable of independent studio work and take responsibility for firings. (Typically Offered: Fall, Spring)

ARTIS 4220H: Advanced Ceramic Studio: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable, maximum of 12 credits.

Prereq: ARTIS 3220

Creation of a body of work in personal ceramic forms and unique surface treatments. Exploration of kiln firings, research into contemporary ceramic artists and development of a body of increasingly skilled work are emphasized. Students are expected to be capable of independent studio work and take responsibility for firings. Honors project developed with supervision from instructor. (Typically Offered: Fall, Spring)

ARTIS 4240: Jewelry/Metalsmithing III

(Dual-listed with ARTIS 5240).

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 12 credits.

Prereq: ARTIS 3240 or Permission of Instructor

Hands-on studio experience. Focusing on traditional and contemporary metalsmithing techniques applicable to jewelry, functional objects, and sculptural art forms. Topics include fabrication, forming and cold joinery, with an emphasis on design and progressive skill development. Basic stone setting and lost wax casting introduced. (Typically Offered: Fall, Spring)

ARTIS 4240H: Jewelry/Metalsmithing III: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable, maximum of 12 credits.

Prereq: ARTIS 3240 or Permission of Instructor

Hands-on studio experience. Focusing on traditional and contemporary metalsmithing techniques applicable to jewelry, functional objects, and sculptural art forms. Topics include fabrication, forming and cold joinery, with an emphasis on design and progressive skill development. Basic stone setting and lost wax casting introduced. (Typically Offered: Fall, Spring)

ARTIS 4290: Advanced Photography

(Dual-listed with ARTIS 5290).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Prereq: ARTIS 3290

Independent, advanced work in traditional alternative and/or digital photographic processes. Emphasis is on development of a unified body of work and research into contemporary photographers and aesthetic concern. (Typically Offered: Fall, Spring)

ARTIS 4290H: Advanced Photography: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable.

Prereq: ARTIS 3290

Independent, advanced work in traditional alternative and/or digital photographic processes. Emphasis is on development of a unified body of work and research into contemporary photographers and aesthetic concern. (Typically Offered: Fall, Spring)

ARTIS 4300: Drawing IV

(Dual-listed with ARTIS 5300).

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 9 credits.

Prereq: ARTIS 3300

Figurative and/or non-figurative drawing with advanced work in media, composition, and theory. (Typically Offered: Fall, Spring)

ARTIS 4300H: Drawing IV: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable, maximum of 9 credits.

Prereq: ARTIS 3300

Figurative and/or non-figurative drawing with advanced work in media, composition, and theory. (Typically Offered: Fall, Spring)

ARTIS 4310: Character and Scene Design

(Dual-listed with ARTIS 5310).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Prereq: (DSNS 1310; ARTIS 2300; ARTIS 3300); or instructor permission

Drawing directed toward designing characters and environments to be used for telling stories in a variety of contexts. Emphasis on ideation, research, concept art and other process work over finished art. (Typically Offered: Fall)

ARTIS 4320: Sequential Narrative Drawing

(Dual-listed with ARTIS 5320).

Credits: 3. Contact Hours: Studio 6.

Prereq: (DSNS 1310; ARTIS 2300; ARTIS 3300); or instructor permission

Studio course in drawing focusing on the fundamentals of communicating a narrative through sequential images in a variety of applications. Emphasis will be placed on visual research, ideation, concept art and process sketching. (Typically Offered: Spring)

ARTIS 4380: Painting III

(Dual-listed with ARTIS 5380).

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 9 credits.

Prereq: ARTIS 3380

Figurative and non-figurative painting with advanced work in media, composition, and theory. (Typically Offered: Fall, Spring)

ARTIS 4380H: Painting III: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable, maximum of 9 credits.

Prereq: ARTIS 3380

Figurative and non-figurative painting with advanced work in media, composition, and theory. (Typically Offered: Fall, Spring)

ARTIS 4470: Dyed and Printed Textiles

(Dual-listed with ARTIS 5470).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Prereq: ARTIS 3470 or Permission of Instructor for ARTIS 4470

Fabric dyeing and printing techniques including block, stencil and experimental screen-printing, and resists using synthetic dyes, discharging agents, and pigments. Printing with plant-based dyes may also be explored. Digital printing and transfer printing on fabric may be introduced. Emphasis on research and development of dyed and printed textile design techniques as a means for creative expression. (Typically Offered: Fall, Spring)

ARTIS 4480: Digital Textile Design

(Dual-listed with ARTIS 5480).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Prereq: Junior classification in College of Design or junior classification in AMD

This hands-on studio course will allow students to explore digital printing technology and its application to textile design for those working within industry as well as independent studio practitioners. Digital design development includes pattern repeats and photo manipulation to create unique textile designs for fashion, interior and fine art applications. (Typically Offered: Fall, Spring)

ARTIS 4580: Advanced Printmaking

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Prereq: ARTIS 3560, ARTIS 3570, or ARTIS 3580, and Permission of Instructor

Independent, advanced work in printmaking processes. Emphasis is on development of a unified body of work and research into contemporary artists. (Typically Offered: Fall, Spring)

ARTIS 4580H: Advanced Printmaking: Honors

Credits: 3-4. Contact Hours: Studio 6.

Repeatable.

Prereq: ARTIS 3560, ARTIS 3570, or ARTIS 3580, and Permission of Instructor

Independent, advanced work in printmaking processes. Emphasis is on development of a unified body of work and research into contemporary artists. (Typically Offered: Fall, Spring)

ARTIS 4600: Sustainable Design and Fabrication of Furniture

Credits: 3. Contact Hours: Studio 6.

Prereq: Senior or Graduate classification or Permission of Instructor

Issues in the design and fabrication of furniture focusing on sustainable practices. An exploration of current practices and their environmental effects, consumer demands, and alternative processes and materials. (Typically Offered: Fall, Spring)

ARTIS 4620: Community-Engaged Arts Management

Credits: 3.

Introduction to aspects of community arts management and art gallery operations. Class meets at ISU Design on Main Gallery, a community arts space in the Main Street Cultural District of Ames. Students will staff the gallery and assist in the conception, design and realization of exhibitions. (Typically Offered: Fall, Spring)

ARTIS 4650: Artists, Designers and Sustainable Development

Credits: 3. Contact Hours: Studio 6.

Prereq: Senior or Graduate classification or Permission of Instructor

The artist/designer's role in sustainable development with a focus on cultural understanding of the collaborating communities. Class discussion, visual exercises, and the creation of creative collaborative service-learning projects such as product design, habitat design, and visual arts projects. Preorientation for travel to Ghana in ARTIS 4660/5660X. Meets International Perspectives Requirement. (Typically Offered: Spring)

ARTIS 4660: Studio Abroad: Africa

Credits: 3. Contact Hours: Studio 6.

Prereq: ARTIS 4650 or Permission of Instructor

Traveling studio to Africa; an experiential tour of arts and history combined with design-focused collaborative service-learning projects. Projects may include product development, design consultation, sustainable building design, and learning and teaching of visual arts. Student teams will develop projects in partnership with in-country nationals. Meets International Perspectives Requirement. (Typically Offered: Summer)

ARTIS 4700X: Data, Code, and Form

(Dual-listed with ARTIS 5700X). (Cross-listed with BPMI 4700X).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Data visualization: strategies, principles, and tools for encoding data in visual art, applied art, and creative industry practices. The aesthetics of encoded data in creative practices. An overview of working with data as artistic and visual communication media including data acquisition, organization, representing, and interacting with data through art and design. Producing data display outputs that include a range of displays from screen to installation. (Typically Offered: Fall, Spring, Summer)

ARTIS 4730: Video Art

(Dual-listed with ARTIS 5730).

Credits: 3. Contact Hours: Studio 6.

Prereq: ARTIS 2120 OR Permission of Instructor

Usage of professional video editing software and application of best practices for video production and post-production to realize original artworks. Creation of narrative and non-narrative videos and site specific video installations. Prominent examples in the history of video art provide context for the coursework. Non-repeatable for graduate students.

ARTIS 4750: Interactive Art

(Dual-listed with ARTIS 5750).

Credits: 3. Contact Hours: Studio 6.

Prereq: ARTIS 2120 OR Permission of Instructor

Create software and integrate the sensors required to create interactive artworks, video games, and installations. Prominent examples in the history of interactive art provide context for the coursework.

ARTIS 4820: Selected Topics in Studio Art

(Dual-listed with ARTIS 5820).

Credits: 1-3. Contact Hours: Studio 6.

Repeatable.

Prereq: Instructor Permission for Course

Special issues related to studio art. Topics vary each time offered.

(Typically Offered: Fall, Spring)

ARTIS 4900B: Independent Study: Ceramics

Credits: 1-6. Repeatable.

Prereq: Department Permission for Course

Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 4900C: Independent Study: Computer Art and Design

Credits: 1-6. Repeatable.

Prereq: Department Permission for Course

Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 4900D: Independent Study: Drawing

Credits: 1-6. Repeatable.

Prereq: Department Permission for Course

Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 4900E: Independent Study: Textiles

Credits: 1-6. Repeatable.

Prereq: Department Permission for Course

Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 4900F: Independent Study: Illustration

Credits: 1-6. Repeatable.

Prereq: Department Permission for Course

Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 4900G: Independent Study: Metals

Credits: 1-6. Repeatable.

Prereq: Department Permission for Course

Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 4900H: Independent Study: Honors

Credits: 1-6. Repeatable.

Prereq: Department Permission for Course

Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 4900I: Independent Study: Painting

Credits: 1-6. Repeatable.

Prereq: Department Permission for Course

Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 4900J: Independent Study: Photography

Credits: 1-6. Repeatable.

Prereq: Department Permission for Course

Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 4900K: Independent Study: Printmaking

Credits: 1-6. Repeatable.

Prereq: Department Permission for Course

Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 4900L: Independent Study: Furniture

Credits: 1-6. Repeatable.

Prereq: Department Permission for Course

Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 4900M: Independent Study: Mixed Media

Credits: 1-6. Repeatable.

Prereq: Department Permission for Course

Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 4910: Post Baccalaureate Capstone Course

Credits: 1.

Exhibition of artwork completed in the Post Baccalaureate program, required for fulfillment of certificate. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ARTIS 4930B: Workshop: Ceramics

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Prereq: Instructor Permission for Course

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 4930C: Workshop: Computer Art and Design

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Prereq: Instructor Permission for Course

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 4930D: Workshop: Drawing

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Prereq: Instructor Permission for Course

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 4930E: Workshop: Textiles

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Prereq: Instructor Permission for Course

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 4930F: Workshop: Illustration

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Prereq: Instructor Permission for Course

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 4930G: Workshop: Metals

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Prereq: Instructor Permission for Course

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 4930H: Workshop: Honors

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Prereq: Instructor Permission for Course

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 4930I: Workshop: Painting

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Prereq: Instructor Permission for Course

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 4930J: Workshop: Photography

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Prereq: Instructor Permission for Course

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 4930K: Workshop: Printmaking

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Prereq: Instructor Permission for Course

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 4930L: Workshop: Furniture

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Prereq: Instructor Permission for Course

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 4930M: Workshop: Mixed Media

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Prereq: Instructor Permission for Course

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 4940: Integrated Studio Arts in Europe Seminar

Credits: 1. Contact Hours: Lecture 1.

Prereq: Instructor Permission for Course

Cultural and historical aspects of art and design in Western Europe in preparation for study abroad. Area of study varies each time offered. Offered on a satisfactory-fail basis only. Offered on a satisfactory-fail basis only. Meets International Perspectives Requirement.

ARTIS 4950: Integrated Studio Arts in Europe

(Dual-listed with ARTIS 5950).

Credits: 3.

International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Meets International Perspectives Requirement.

ARTIS 4960: Art and Design Field Study

Credits: Required. Repeatable.

Prereq: Instructor Permission for Course

Study and tours of museums, galleries, artist and/or designer studios and other areas of interest within art and design. Offered on a satisfactory-fail basis only.

ARTIS 4970: Studio Internship

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Junior or senior classification; permission of department

Written approval of supervising instructor and department chair on required form in advance of semester of enrollment. Supervised experience with a cooperating artist or studio. Offered on a satisfactory-fail basis only.

ARTIS 4990: BFA Exhibition

Credits: 1.

Prereq: ARTIS 3990; senior classification in Integrated Studio Arts BFA
Capstone experience for the BFA degree, including the refinement of a final portfolio (visual and written components). Guest lecturers cover range of topics relevant to the professional practice of art and design. Course culminates in the planning, design and installation of the BFA group exhibition in a formal gallery setting. Half-semester course. Required of all ISA majors. (Typically Offered: Spring)

Courses primarily for graduate students, open to qualified undergraduates:

ARTIS 5050: Collage, Assemblage, and the Found Object

(Dual-listed with ARTIS 3050).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Explores the significance of recycling, sustainable methods of art making, and thrift-store culture as medium and subject matter for artists in both 2D and 3D studio projects. Through selected readings, slide presentations, and studio activities, we will address the environmental cause and effect of materials and methods, consumption and waste, and personal responsibility as stewards for the planet we share. Emphasis will be on conceptual development.

ARTIS 5070: Principles of Character Animation

(Dual-listed with ARTIS 4070).

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 9 credits.

Animation techniques using the computer and available software.

Principles of character animation. Prior knowledge of modeling, lighting, texturing and rendering with available software is assumed.

ARTIS 5080: Computer Aided Animation and Visualization

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 6 credits.

Prereq: ARTIS 4080 or graduate classification and permission of instructor

Further investigations begun in ARTIS 4080. Attention given to the workflow and management of creating animation and visualizations.

ARTIS 5090: Computer/Video Game Design and Development

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 12 credits.

Independent project based creation and development of 'frivolous and non-frivolous' computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of Indie development and computer/video game history will be discussed.

ARTIS 5110: Seminar in Teaching

Credits: 3. Contact Hours: Lecture 3.

Readings and discussions about aspects and expectations of teaching at the university level. Course development, research and teaching portfolio development, and best practices in design education. Other aspects of faculty expectations that include research, institutional or professional service, promotion, institutional structures, procedures, and professional responsibilities.

ARTIS 5200: Advanced Furniture Design

(Dual-listed with ARTIS 4200).

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 12 credits.

Design and creation of increasingly complex furniture forms with consideration of precedents and innovative techniques and approaches. Continued development of a unique personal approach to the design and making of furniture. Refined sensitivity to wood, and continued consideration of various sustainable practices. (Typically Offered: Fall, Spring)

ARTIS 5220: Advanced Ceramic Studio

(Dual-listed with ARTIS 4220).

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 12 credits.

Creation of a body of work in personal ceramic forms and unique surface treatments. Exploration of kiln firings, research into contemporary ceramic artists and development of a body of increasingly skilled work are emphasized. Students are expected to be capable of independent studio work and take responsibility for firings. (Typically Offered: Fall, Spring)

ARTIS 5240: Jewelry/Metalsmithing III

(Dual-listed with ARTIS 4240).

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 12 credits.

Hands-on studio experience. Focusing on traditional and contemporary metalsmithing techniques applicable to jewelry, functional objects, and sculptural art forms. Topics include fabrication, forming and cold joinery, with an emphasis on design and progressive skill development. Basic stone setting and lost wax casting introduced. (Typically Offered: Fall, Spring)

ARTIS 5290: Advanced Photography

(Dual-listed with ARTIS 4290).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Independent, advanced work in traditional, alternative and/or digital photographic processes. Emphasis is on development of a unified body of work and research into contemporary photographers and aesthetic concerns. (Typically Offered: Fall, Spring)

ARTIS 5300: Drawing IV

(Dual-listed with ARTIS 4300).

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 9 credits.

Figurative and non-figurative drawing with advanced work in media, composition, and theory. (Typically Offered: Fall, Spring)

ARTIS 5310: Character and Scene Design

(Dual-listed with ARTIS 4310).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Drawing directed toward designing characters and environments to be used for telling stories in a variety of contexts. Emphasis on ideation, research, concept art and other process work over finished art. (Typically Offered: Fall)

ARTIS 5320: Sequential Narrative Drawing

(Dual-listed with ARTIS 4320).

Credits: 3. Contact Hours: Studio 6.

Studio course in drawing focusing on the fundamentals of communicating a narrative through sequential images in a variety of applications. Emphasis will be placed on visual research, ideation, concept art and process sketching. (Typically Offered: Spring)

ARTIS 5380: Painting III

(Dual-listed with ARTIS 4380).

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 9 credits.

Prereq: ARTIS 3380 or Graduate Classification

Figurative and non-figurative painting with advanced work in media, composition, and theory. (Typically Offered: Fall, Spring)

ARTIS 5470: Dyed and Printed Textiles

(Dual-listed with ARTIS 4470).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Fabric dyeing and printing techniques including block, stencil and experimental screen-printing, and resists using synthetic dyes, discharging agents, and pigments. Printing with plant-based dyes may also be explored. Digital printing and transfer printing on fabric may be introduced. Emphasis on research and development of dyed and printed textile design techniques as a means for creative expression. (Typically Offered: Fall, Spring)

ARTIS 5480: Digital Textile Design

(Dual-listed with ARTIS 4480).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

This hands-on studio course will allow students to explore digital printing technology and its application to textile design for those working within industry as well as independent studio practitioners. Digital design development includes pattern repeats and photo manipulation to create unique textile designs for fashion, interior and fine art applications. (Typically Offered: Fall, Spring)

ARTIS 5550X: Relief Printmaking: Digital/Traditional

Credits: 3. Contact Hours: Studio 6.

Repeatable, maximum of 3 times.

In-depth exploration of digital or traditional design and block cutting processes (computer/laser cutter/CNC router or drawing/chisels). Use relief printmaking to create a unified body of prints from those blocks. Emphasis is on experimental and creative use of printmaking with study of contemporary trends.

ARTIS 5560: Relief Printmaking: Digital/Traditional

(Dual-listed with ARTIS 3560).

Credits: 3-4. Contact Hours: Studio 6.

Repeatable, maximum of 6 credits.

In-depth exploration of digital or traditional design and block cutting processes (computer/laser cutter/CNC router or drawing/chisels). Use relief printmaking to create a unified body of prints from those blocks. Emphasis is on experimental and creative use of printmaking with study of contemporary trends. (Typically Offered: Fall, Spring)

ARTIS 5570: Intaglio and Monotype Printmaking: Digital / Traditional

(Dual-listed with ARTIS 3570).

Credits: 3-4. Contact Hours: Studio 6.

Repeatable, maximum of 9 credits.

Explore the techniques and aesthetic qualities of black and white and color intaglio printmaking primarily through etching, aquatint, laser-cut plates and collagraph processes. Students will generate imagery through traditional drawing, collage and digital processes. Unique, one-of-a-kind black and white and color prints from Plexiglas will also be introduced. Emphasis is on experimental and creative use of printmaking for artistic expression. (Typically Offered: Fall, Spring)

ARTIS 5580: Lithography: Digital / Traditional

(Dual-listed with ARTIS 3580).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Examine the techniques and aesthetic qualities of lithography primarily through hand-drawn and photographic plates. Students may generate imagery through traditional drawing, collage or digital processes. Emphasis is on experimental and creative use of printmaking for artistic expression. For those taking the course for a second semester, focus is on stone lithography and increased work with color. (Typically Offered: Fall, Spring)

ARTIS 5700X: Data, Code And Form

(Dual-listed with ARTIS 4700X).

Credits: 3. Contact Hours: Studio 6.

Repeatable.

Data visualization: strategies, principles, and tools for encoding data in visual art, applied art, and creative industry practices. The aesthetics of encoded data in creative practices. An overview of working with data as artistic and visual communication media including data acquisition, organization, representing, and interacting with data through art and design. Producing data display outputs that include a range of displays from screen to installation. (Typically Offered: Fall, Spring, Summer)

ARTIS 5710A: Graduate Seminar: Grants, Residencies, Exhibitions, Entrepreneurialism

Credits: 3. Contact Hours: Lecture 3.

Through directed readings, individual assignments, guest presentations, local field trips, and group discussions, students learn strategies to create and apply a personalized plan that will guide them toward successful studio practice at all stages of their careers. Topics include professional opportunities and avenues of support available to studio artists, development in preparing visual portfolios, artists statements, and applications for grants, residencies and exhibitions.

ARTIS 5710B: Graduate Seminar: Critique and Creative Process

Credits: 3. Contact Hours: Lecture 3.

Ongoing weekly critiques and dialog about sources, methods, and progress of studio projects. Graduate students will learn to articulate their ideas from concept to creation. The interaction of students at different levels in a broad spectrum of studio courses will reveal commonalities and connections among all of the visual arts, accelerating individual creative development.

ARTIS 5730: Video Art

(Dual-listed with ARTIS 4730).

Credits: 3. Contact Hours: Studio 6.

Usage of professional video editing software and application of best practices for video production and post-production to realize original artworks. Creation of narrative and non-narrative videos and site specific video installations. prominent examples in the history of video art provide context for the coursework. Non-repeatable for graduate students.

ARTIS 5750: Interactive Art

(Dual-listed with ARTIS 4750).

Credits: 3. Contact Hours: Studio 6.

Create software and integrate the sensors required to create interactive artworks, video games, and installations. Prominent examples in the history of interactive art provide context for the coursework.

ARTIS 5820: Selected Topics in Studio Art

(Dual-listed with ARTIS 4820).

Credits: 1-3. Contact Hours: Studio 6.

Repeatable.

Special issues related to studio art. Topics vary each time offered.

(Typically Offered: Fall, Spring)

ARTIS 5900B: Special Topics: Ceramics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 5900C: Special Topics: Computer Art and Design

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 5900D: Special Topics: Drawing

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 5900E: Special Topics: Textiles

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 5900F: Special Topics: Illustration

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 5900G: Special Topics: Metals

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 5900I: Special Topics: Painting

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 5900J: Special Topics: Photography

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 5900K: Special Topics: Printmaking

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 5900L: Special Topics: Furniture

Credits: 1-30. Repeatable.

Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 5900M: Special Topics: Mixed Media

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 5930B: Workshop: Ceramics

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 5930C: Workshop: Computer Art and Design

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 5930D: Workshop: Drawing

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 5930E: Workshop: Textiles

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 5930F: Workshop: Illustration

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 5930G: Workshop: Metals

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 5930I: Workshop: Painting

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 5930J: Workshop: Photography

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 5930K: Workshop: Printmaking

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 5930L: Workshop: Furniture

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 5930M: Workshop: Mixed Media

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 5950: Integrated Studio Arts in Europe

(Dual-listed with ARTIS 4950).

Credits: 3. Contact Hours: Studio 6.

Prereq: Graduate classification, ARTIS 4940 or permission of instructor

International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Meets International Perspectives Requirement.

Courses for graduate students:**ARTIS 6050: Research Methods**

Credits: 3. Contact Hours: Lecture 3.

Research strategies related to fine art and technology. Application of selected methods to specific issues.

ARTIS 6070: Intermedia

Credits: 3. Contact Hours: Laboratory 6.

Exploration and application of media with various materials, methods and ideas. (Typically Offered: Fall, Spring)

ARTIS 6970: Studio Internship

Credits: 1-30.

Prereq: Instructor Permission for Course

Supervised off-campus learning experience with a prominent artist, designer, or firm.

ARTIS 6980: Current Issues in Studio Arts

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Selected issues in contemporary studio arts. Topics and readings vary each time offered. (Typically Offered: Fall, Spring)

ARTIS 6990A: Research: Thesis

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Research thesis.

ARTIS 6990B: Research: Thesis-exhibition

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Research exhibition.

Interdisciplinary Graduate Studies (IGS)

Courses primarily for graduate students, open to qualified undergraduates:**IGS 5990: Creative Component**

Credits: 1-30. Repeatable.

Courses for graduate students:**IGS 6990: Thesis Research**

Credits: 1-30. Repeatable.

Interior Design (ARTID)

Courses primarily for undergraduates:**ARTID 2500: Fundamentals of Interior Design**

Credits: 2. Contact Hours: Lecture 2.

The profession, issues, and the role of interior design. (Typically Offered: Fall)

ARTID 2510: Human Factors in Interior Design

Credits: 3. Contact Hours: Lecture 3.

Overview of issues related to the human/built environment interface: introduction to health and safety factors, ergonomics, anthropometrics, sensory perception, psycho-behavioral response, physical performance, cultural factors and universal design. Emphasis on application of human factor methods to the analysis, solution, and evaluation of design problems. (Typically Offered: Spring)

ARTID 2550: Forces That Shape Interior Space

Credits: 3. Contact Hours: Lecture 3.

A survey of variables influencing the nature and function of 'interior' environments. Review of professional, geo-political, utilitarian, social-cultural, economic, humanistic, historical, technological, and other factors as generators of form and space. (Typically Offered: Fall, Spring)

ARTID 2610: Graphic Communication for Interior Design I

Credits: 3. Contact Hours: Lecture 2, Studio 2.

Prereq: Admission to the Interior Design BFA; ARTID 2650

Perspective drawing, design sketching, and presentation drawings. Introduction to technical drawing conventions, and design drawings. Emphasis on drawing layout, line quality, and lettering. Use of various rendering media and techniques on 2D and 3D drawings. Overview of presentation techniques, both visual and verbal. (Typically Offered: Fall)

ARTID 2630: Graphic Communication for Interior Design II

Credits: 3. Contact Hours: Lecture 2, Studio 2.

Prereq: ARTID 2610 and Credit or concurrent enrollment in ARTID 2670

Computer visualization techniques and applications; projects employing computer graphic methods. (Typically Offered: Spring)

ARTID 2650: Interior Design Studio I

Credits: 4. Contact Hours: Lecture 1, Studio 6.

Prereq: Admission to the Interior Design BFA; ARTID 2500; ARTID 2610

Enhanced creative interior design problem solving. Emphasis on research, spatial composition theories and graphic ideation and communication as applied to the interior design of small scale environments. Modeling and manual visualization techniques. (Typically Offered: Fall)

ARTID 2670: Interior Design Studio II

Credits: 4. Contact Hours: Lecture 1, Studio 6.

Prereq: ARTID 2650

Human factors issues including ergonomics, human behavior and the requirements of special groups. Color theories related to interior spaces. Residential interior design and medium scale projects. Detail drawings, and expansion of visualization techniques. (Typically Offered: Spring)

ARTID 3500: Interior Finish Materials

Credits: 3. Contact Hours: Lecture 3.

Prereq: Admission to a College of Design program

Exploration of concepts, materials, and assemblies associated with development of interior elements including floors, walls, ceiling, windows, and finishes. Fiber, plastic, sheet metal, and other surfacing materials. Attention to related human factors, testing, detailing, specifications writing and end-use application. To take this course, students must have drafting skills to complete scaled orthographic drawings. (Typically Offered: Spring)

ARTID 3510: Interior Regulations and Guidelines

Credits: 3. Contact Hours: Lecture 3.

Prereq: ARTID 2670 OR Permission of Instructor

Exploration of interior design concepts, materials, and assemblies as they contribute to the user, health, safety and general well-being. Wood, steel, masonry, and glass assemblies. Attention to related human factors, testing, codes, detailing, specifications writing and end-use application. (Typically Offered: Fall)

ARTID 3520: Interior Building Systems

Credits: 3. Contact Hours: Lecture 3.

Exploration of concepts, materials, assemblies associated with building service systems. Overview of electrical, lighting, acoustical, HVAC, plumbing and other non-structural building features. Attention to related human factors, testing, codes, detailing, specifications writing and end-use application. (Typically Offered: Spring)

ARTID 3530: Interior Construction and Details

Credits: 3. Contact Hours: Lecture 3.

Exploration of building construction concepts, materials, and assemblies and their influence on interior design. Attention to human factors, codes, detailing, and other interior design issues related to buildings. (Typically Offered: Fall)

ARTID 3540X: Textiles for Interiors

Credits: 2.

Attention to fibers, yarn, weaves, construction, and finishes of textiles. Technical and practical considerations, such as pattern, performance, and appearance, for end-use textile application for a wide range of interior spaces. An overview on the selection, manufacturer, and specification of furniture. (Typically Offered: Fall)

ARTID 3550: Interior Design History/Theory/Criticism I

Credits: 3. Contact Hours: Lecture 3.

Theoretical approaches to evaluation of interior finishes, furnishings, and decorative arts in relation to parallel developments in art and architecture, from a critical, historical and multicultural perspective. Focus on pre-1850. Meets International Perspectives Requirement. (Typically Offered: Fall)

ARTID 3560: Interior Design History/Theory/Criticism II

Credits: 3. Contact Hours: Lecture 3.

Prereq: ARTID 3550 or Permission of Instructor

Advanced theoretical approaches to evaluation of interior finishes, furnishings, and decorative arts in relation to parallel developments in art and architecture from a critical, historical, and multicultural perspective. Focus on mid-nineteenth and twentieth century. Meets International Perspectives Requirement. (Typically Offered: Spring)

ARTID 3570: Made in Italy

Credits: 2. Contact Hours: Lecture 2.

An investigation of the 20th century roots of modern Italian design and its contemporary form. Lectures and seminar presentations highlight major Italian designers and internationally significant design in the 20th century. Focus is on innovative design that exhibits a synthesis of formal and social functions. Meets International Perspectives Requirement. (Typically Offered: Fall)

ARTID 3600: Interior Design Internship Seminar I

Credits: 1. Contact Hours: Lecture 1.

Prereq: ARTID 2670

Procedural and ethical concerns relating to interior design internship. Preparation of documents for internship search. Formulation of personal internship and career goals. (Typically Offered: Fall)

ARTID 3610: Interior Design Internship Seminar II

Credits: 1. Contact Hours: Lecture 1.

Prereq: ARTID 3600

Procedural and ethical concerns relating to interior design internship. Refinement of placement credentials and personal goals. Internship search process and agreements. (Typically Offered: Spring)

ARTID 3650: Interior Design Studio III

Credits: 4. Contact Hours: Lecture 1, Studio 6.

Prereq: ARTID 2630; ARTID 2670; Current enrollment in ARTID 3590

Refined methods of problem identification design programming and problem solving, including theoretically-based concept development and refinement. Emphasis and compliance with codes and standards. Produce small and large scale projects. Alternative manual and computer-based visualization methods. Teamwork. Multi-cultural, study abroad option. (Typically Offered: Fall)

ARTID 3670: Interior Design Studio IV

Credits: 4. Contact Hours: Lecture 1, Studio 6.

Prereq: ARTID 3650

Emphasis on three-dimensional spatial development in large scale, multiple scale unit institutional projects. Inclusion of extensive design documentation. Expansion of alternative manual and computer-based visualization methods. Teamwork. (Typically Offered: Spring)

ARTID 3670H: Interior Design Studio IV: Honors

Credits: 4-5. Contact Hours: Lecture 1, Studio 9.

Prereq: ARTID 3650

Emphasis on three-dimensional spatial development in large scale, multiple scale unit institutional projects. Inclusion of extensive design documentation. Expansion of alternative manual and computer-based visualization methods. Teamwork. (Typically Offered: Spring)

ARTID 4600: Interior Design Internship Documentation

Credits: 1. Contact Hours: Lecture 1.

Prereq: ARTID 3500, ARTID 3600, and ARTID 3650

Documentation of professional interior design off-campus experience. (Typically Offered: Fall)

ARTID 4610: Interior Design Professional Practices

Credits: 2. Contact Hours: Lecture 2.

Prereq: ARTID 4600

Organization and general management of the interior design office: agreements, business procedures, and professional ethics. Professional interior design issues and concerns. (Typically Offered: Spring)

ARTID 4610H: Interior Design Professional Practices: Honors

Credits: 2. Contact Hours: Lecture 2.

Prereq: ARTID 4600

Organization and general management of the interior design office: agreements, business procedures, and professional ethics. Professional interior design issues and concerns. (Typically Offered: Spring)

ARTID 4650: Interior Design Studio V

(Dual-listed with ARTID 5650).

Credits: 4. Contact Hours: Lecture 1, Studio 6.

Prereq: ARTID 4600 OR Permission of Instructor

Design research and refined problem solving methods including functional analysis, programming and detailing. (Typically Offered: Fall)

ARTID 4670: Interior Design Studio VI

(Dual-listed with ARTID 5670).

Credits: 4. Contact Hours: Lecture 1, Studio 6.

Prereq: ARTID 4650

Refinement of technical, analytical and theoretical problem-solving methods and comprehensive design documentation. In-depth development of interior design projects. Current issues in interior design. (Typically Offered: Spring)

ARTID 4680: Interior Design in an Urban Setting

Credits: 3. Contact Hours: Lecture 3.

Prereq: ARTID 3650

Study of selected interior design projects and designers practicing in an urban setting. Studio project examining issues related to interior design in an urban context. (Typically Offered: Spring)

ARTID 4680H: Interior Design in an Urban Setting: Honors

Credits: 3-4. Contact Hours: Lecture 3.

Prereq: ARTID 3650

Study of selected interior design projects and designers practicing in an urban setting. Studio project examining issues related to interior design in an urban context. (Typically Offered: Spring)

ARTID 4900: Independent Study

Credits: 1-6. Repeatable.

Prereq: Department Permission for Course

Student must have completed related interior design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis. (Typically Offered: Fall, Spring, Summer)

ARTID 4900H: Independent Study: Honors

Credits: 1-6. Repeatable.

Prereq: Department Permission for Course

Student must have completed related interior design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis. (Typically Offered: Fall, Spring, Summer)

ARTID 4930: Workshop

Credits: 1-3. Contact Hours: Studio 3.

Repeatable, maximum of 3 credits.

Prereq: ARTID 3670

Intensive 2 to 4 week studio exploration. Topics vary each time offered. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

ARTID 5510A: Design Humanics: Sensory Perception & Ergonomic Factors

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Human factors related to the nature, performance and accommodation of the individuals and small groups, including sensation and perception, physical requirements, anthropometrics, safety and other issues connecting human needs and built environmental responses. Topics vary each time offered. (Typically Offered: Fall, Spring)

ARTID 5510B: Design Humanics: Environment & Behavior

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Human factors issues related to the nature, performance and accommodation of medium to large groups and settings. Emphasis on psychological, sociological, cultural, interpersonal safety, and related human needs and built environmental responses. Topics vary each time offered. (Typically Offered: Fall, Spring)

ARTID 5520A: Evidence-Based Design: Investigation Analysis

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 10 credits.

Methods of design research, analysis, programming and theory formulation. (Typically Offered: Fall, Spring)

ARTID 5520B: Evidence-Based Design: Synthesis

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 10 credits.

Methods of synthesizing design concepts and solutions. (Typically Offered: Fall, Spring)

ARTID 5520C: Evidence-Based Design: Communication

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 10 credits.

Methods of managing, translating, communicating and otherwise utilizing text, image, abstract and other forms of information. (Typically Offered: Fall, Spring)

ARTID 5520D: Evidence-Based Design: Procedural Alternatives

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 10 credits.

New and specialized methodological trends, including subject or setting-specific methods. (Typically Offered: Fall, Spring)

ARTID 5540: Interior Design Teaching Practicum

Credits: 3. Repeatable.

Prereq: Instructor Permission for Course

Supervised practical application of interior design theory, materials, and practice to the educational process. (Typically Offered: Fall, Spring, Summer)

ARTID 5590: Graduate Interior Design Field Study

Credits: 1-3. Repeatable.

Study and tours of places of interior design-related interest such as manufacturers, design studios, related professional offices, showrooms, museums, and historical sites.

ARTID 5650: Interior Design Studio V

(Dual-listed with ARTID 4650).

Credits: 4. Contact Hours: Lecture 1, Studio 6.

Design research and refined problem solving methods including functional analysis, programming and detailing. (Typically Offered: Fall)

ARTID 5670: Interior Design Studio VI

(Dual-listed with ARTID 4670).

Credits: 4. Contact Hours: Lecture 1, Studio 6.

Refinement of technical, analytical and theoretical problem-solving methods and comprehensive design documentation. In-depth development of interior design projects. Current issues in interior design. Open to non-majors. (Typically Offered: Spring)

ARTID 5680: Experimental Interior Design

Credits: 4. Contact Hours: Studio 8.

Repeatable, maximum of 16 credits.

Application of alternative design methods and sources of insight to the solution of human environmental design problems. Focus on the identification, formulation, refinement and application of theory to the design process. Emphasis on the pursuit of new discovery and innovative problem solving. Approaches, settings and scales vary each time offered. (Typically Offered: Fall, Spring)

ARTID 5690: Advanced Studies in Interior Design: Variable Topics

Credits: 3. Contact Hours: Lecture 3.

Examination of special issues with emphasis on their translation into design application.

ARTID 5700X: Social Entrepreneurship in Aging

Credits: 3. Contact Hours: Discussion 1.5, Lecture 1.5.

Repeatable.

Examination of critical issues of older adults in our society with emphasis on human-environment interactions. Enhanced creative and innovative design solutions to address the complex issues. Produce a semester-long project and improve social entrepreneurial mindset.

ARTID 5710: Advanced Visualization in Interior Design

Credits: 3. Contact Hours: Lecture 3.

Exploration of an advanced level of computer visualization techniques and applications with relevance to interior design. Introduction to the latest graphic communication software and technologies focuses on data visualization, hybrid digital perspective, 3D modeling & photo-realistic rendering, real-time video making, and Virtual Reality.

ARTID 5720: Preservation & Cultural Heritage

Credits: 3. Contact Hours: Lecture 3.

Examination of special issues with emphasis on their translation into design application.

ARTID 5730: Advanced Color Theory

Credits: 3. Contact Hours: Lecture 3.

Examination of special issues with emphasis on their translation into design application.

ARTID 5740: Inclusive Environments

Credits: 3. Contact Hours: Lecture 3.

Examination of special issues with emphasis on their translation into design application.

ARTID 5900: Special Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

ARTID 5930: Workshop

Credits: 1-3. Contact Hours: Studio 3.

Repeatable.

Intensive 2 to 4 week studio exploration. Topics vary each time offered. (Typically Offered: Fall, Spring, Summer)

ARTID 5980: Research Forum

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 credits.

Presentation and discussion of cross-disciplinary design research theory, methods, and application. Focus on the investigation, application, and communication of types of design research. (Typically Offered: Fall, Spring)

ARTID 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**ARTID 6600: Research Methods**

Credits: 3. Contact Hours: Lecture 3.

Research strategies related to design. Application of selected methods to specific issues. Open to non-majors. (Typically Offered: Spring)

ARTID 6680: Advanced Experimental Interior Design

Credits: 4. Contact Hours: Lecture 1, Studio 6.

Repeatable, maximum of 16 credits.

Application of alternative design methods and sources of insight to the solution of human environmental design problems. Focus on the identification, formulation, refinement and application of theory to the design process. Emphasis on the pursuit of new discovery and innovative problem solving. Approaches, settings and scales vary each time offered. (Typically Offered: Fall, Spring)

ARTID 6900: Advanced Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

ARTID 6970: Design Practicum

Credits: 1-9. Repeatable, maximum of 9 credits.

Applied, off campus, professional interior design-related experience.

(Typically Offered: Fall, Spring, Summer)

ARTID 6990A: Thesis

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

ARTID 6990B: Thesis-Exhibition

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

International Studies (INTST)

Courses primarily for undergraduates:

INTST 2350: Introduction to International Studies

Credits: 3. Contact Hours: Lecture 3.

Overview of international studies, emphasizing cultural, geographic, economic, and political characteristics of major world areas and nations.

Meets International Perspectives Requirement. (Typically Offered: Fall, Summer)

INTST 2500: The World's Regions in a Global Context

Credits: 3. Contact Hours: Lecture 3.

Comparative study of the world's regions beyond North America (Africa, Asia, Europe, Latin America and the Caribbean, and the Middle East) within the context of globalization and regionalization. Framework for understanding how environmental, demographic, political and socio-cultural relationships in each region are affected by geographic connections. Exploration of how these relationships will shape future regional geographies. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

INTST 2950: International Experience Abroad

Credits: 1-8. Repeatable, maximum of 9 credits.

Supervised instruction in an international setting, augmented by practical living experience. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

INTST 3500: Topics in International Studies

Credits: 2-4. Contact Hours: Lecture 4.

Exploration of key topics and themes in International Studies. Topics vary each time offered. Meets International Perspectives Requirement.

INTST 3950A: Interdisciplinary Study Abroad: Pre-Departure Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Multi-faceted exploration of a selected world region directed at developing a comprehensive understanding of a selected culture's role in contemporary society.

INTST 3950B: Interdisciplinary Study Abroad: Humanities

Credits: 1-4. Repeatable.

Multi-faceted exploration of a selected world region directed at developing a comprehensive understanding of a selected culture's role in contemporary society.

INTST 3950C: Interdisciplinary Study Abroad: Communications

Credits: 1-4. Repeatable.

Multi-faceted exploration of a selected world region directed at developing a comprehensive understanding of a selected culture's role in contemporary society.

INTST 3950D: Interdisciplinary Study Abroad: Mathematics and Natural Science

Credits: 1-4. Repeatable.

Multi-faceted exploration of a selected world region directed at developing a comprehensive understanding of a selected culture's role in contemporary society.

INTST 3950E: Interdisciplinary Study Abroad: Social Sciences

Credits: 1-4. Repeatable.

Multi-faceted exploration of a selected world region directed at developing a comprehensive understanding of a selected culture's role in contemporary society.

INTST 4300: Seminar in International Studies

Credits: 3. Contact Hours: Lecture 3.

Prereq: INTST 2350; Junior classification or higher

Capstone seminar in international studies focused on economic development, women's issues, war and ethnic conflict, population, the environment, globalization, human rights, international trade and business and other issues. Students develop a project on a subject linked to their area of professional interest or academic specialization. Meets International Perspectives Requirement. (Typically Offered: Spring)

INTST 4900: Independent Study

Credits: 1-3. Repeatable, maximum of 9 credits.

Prereq: Permission of Instructor; Permission of International Studies Director

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered or to integrate areas of study appropriate to special problems with international foci. Graduation Restriction: No more than 3 credits of INTST 4900 may be used in the International Studies major or minor.

INTST 4910: Experiences Abroad: Learning to Think Globally

(Cross-listed with WLC 4910).

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 2 credits.

Prereq: Minimum of 3 credits of study abroad and/or internship abroad

Students returning from study abroad gain perspective on the personal, academic, and professional impact of their time spent abroad through readings and discussions. Students will be expected to make one presentation about the culture they experienced to an audience outside ISU. Offered on a satisfactory-fail basis only.

Iowa Lakeside Laboratory (IALL)

Courses primarily for undergraduates:

IALL 1010: Earth, Air, and Sky

Credits: 1-4.

Essentials of earth science, including astronomy, meteorology, geology, and paleontology; includes laboratory and fieldwork. Offered irregularly. (Typically Offered: Summer)

IALL 2930: Natural History Workshop

Credits: 1-2. Repeatable, maximum of 2 credits.

A specific aspect of the upper Midwest's natural history, or techniques for studying natural history; amphibians and reptiles, birds and birding, nature photography, mushrooms and other fungi, Iowa's trees and forests, fish biology, prairies, common algae, common insects, aquatic plants, life in rivers, life in lakes, mosses and liverworts, natural history of Iowa Great Lakes region, field archaeology, scuba diving, astronomy, nature sketching; five-day, nontechnical introductions. Offered irregularly. (Typically Offered: Summer)

IALL 3100: Science Teaching Methods

Credits: 1-3. Repeatable.

Development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology, geology, and environmental courses; exercises built around common organisms and ecosystems in Iowa; animal biology, plant biology, fungi and lichens, aquatic ecology, prairie ecology, wetland ecology, limnology, animal behavior, insect ecology, biology of invertebrates, noninvasive use of living organisms, Project WET; field trips. Offered irregularly. (Typically Offered: Summer)

IALL 3110: Field Mycology

Credits: 2.

Identification and classification of the common fungi; techniques for identification, preservation, and culture practiced with members of the various fungi groups. Offered irregularly. (Typically Offered: Summer)

IALL 3120: Ecology

Credits: 4.

An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems. Requirements: two semesters of introductory biology. Offered irregularly. (Typically Offered: Summer)

IALL 3140: Nature Based, Early Childhood Teaching Methods Using 'The Project Approach'

Credits: 3-4.

Examination of the value of young children's direct experiences in nature through inquiry-based learning; 'The Project Approach' builds on children's natural curiosity and enables them to interact, question, connect, problem solve, communicate, and reflect; students follow steps for implementing a nature-based project within their own classroom setting as they insure the needs of diverse learners are met for both social and academic learning; designed for early childhood teachers. Offered irregularly. (Typically Offered: Summer)

IALL 3150: Soil Formation and Landscape Relationships

Credits: 2-4.

Relationships between soil formation, geomorphology, environment; soil description, classification, geography, mapping, interpretation for land use. Offered irregularly. (Typically Offered: Summer)

IALL 3160: Animal Behavior

Credits: 2.

Examination of ecological and evolutionary theories of animal behavior through field studies of animal coloniality, courtship, territoriality, predator defense, habitat selection, foraging, mating systems, and parental care. Requirements: two biology courses. Offered irregularly. (Typically Offered: Summer)

IALL 3170: Glacial Geomorphology

Credits: 2-4.

Field-based introduction to glacial environments and processes including the origin of sediments, landforms, and landscapes produced in glacial and associated environments; aeolian (wind) processes, river and lacustrine systems, and mechanisms and chronologies of climate change. Offered irregularly. (Typically Offered: Summer)

IALL 3260: Ornithology

Credits: 2-4.

The biology, ecology, and behavior of birds with emphasis on field studies of local avifauna. Group projects stress techniques of population analysis and methodology for population studies. Offered irregularly. (Typically Offered: Summer)

IALL 3340A: Topics in Ecology and Sustainability: Acoustic Ecology

Credits: 1-4. Repeatable.

Scientific introduction at intermediate level to ecology and evolution of important groups of organisms: algae to vertebrates, different ecological phenomena (e.g., fire and climate change), varying landforms, different ecosystems (e.g., prairies and aquatic systems); emphasis on sustainability with introduction to concepts, issues, and practices; ability to communicate environmental information through a variety of means. Requirements: one general biology course. Offered irregularly. (Typically Offered: Summer)

IALL 3340B: Topics in Ecology and Sustainability: Lichen Diversity

Credits: 1-4. Repeatable.

Scientific introduction at intermediate level to ecology and evolution of important groups of organisms: algae to vertebrates, different ecological phenomena (e.g., fire and climate change), varying landforms, different ecosystems (e.g., prairies and aquatic systems); emphasis on sustainability with introduction to concepts, issues, and practices; ability to communicate environmental information through a variety of means. Requirements: one general biology course. Offered irregularly. (Typically Offered: Summer)

IALL 3340D: Topics in Ecology and Sustainability: Biology Illustration

Credits: 1-4. Repeatable.

Scientific introduction at intermediate level to ecology and evolution of important groups of organisms: algae to vertebrates, different ecological phenomena (e.g., fire and climate change), varying landforms, different ecosystems (e.g., prairies and aquatic systems); emphasis on sustainability with introduction to concepts, issues, and practices; ability to communicate environmental information through a variety of means. Requirements: one general biology course. Offered irregularly. (Typically Offered: Summer)

IALL 3340F: Topics in Ecology and Sustainability: Herpetology

Credits: 1-4. Repeatable.

Scientific introduction at intermediate level to ecology and evolution of important groups of organisms: algae to vertebrates, different ecological phenomena (e.g., fire and climate change), varying landforms, different ecosystems (e.g., prairies and aquatic systems); emphasis on sustainability with introduction to concepts, issues, and practices; ability to communicate environmental information through a variety of means. Requirements: one general biology course. Offered irregularly. (Typically Offered: Summer)

IALL 3340G: Topics in Ecology and Sustainability: Ichthyology

Credits: 1-4. Repeatable.

Scientific introduction at intermediate level to ecology and evolution of important groups of organisms: algae to vertebrates, different ecological phenomena (e.g., fire and climate change), varying landforms, different ecosystems (e.g., prairies and aquatic systems); emphasis on sustainability with introduction to concepts, issues, and practices; ability to communicate environmental information through a variety of means. Requirements: one general biology course. Offered irregularly. (Typically Offered: Summer)

IALL 3340J: Topic in Ecology and Sustainability: Environmental Nonfiction

Credits: 2.

Learn the ways scientists can better communicate discoveries and ideas. Learn the importance of identifying your audience and how you can adapt your writing based upon your understanding of those varying audiences. (Typically Offered: Summer)

IALL 3340K: Topics in Ecology and Sustainability: Making Kin With(in)**Place: Literature & Multispecies Kinship**

Credits: 3.

Exploration of what it means to build kin with a place, while in a place-specifically, Lake Okoboji and the grounds of the Lakeside Laboratory. Consideration of the human impact on our planet and the inherent demand issued by climate change to abandon anthropocentrism and fundamentally alter human relationships with our environments, places, and the species therein. After discussing the cultural and human dimensions of climate change, we will consider multispecies kinship systems and how to build meaningful relationships with place. (Typically Offered: Summer)

IALL 3340M: Topics in Ecology and Sustainability: Introduction to Geographical Information Systems

Credits: 2.

History, purpose, functionality and basic uses of geographical information systems (GIS) as a tool for demonstrating information in relation to locations on the earth and moments in time. While map data may often serve as the basis for using or understanding geographical information, more complex data and systems may be analyzed using GIS tools to grow understanding of geographical phenomena. For the sake of consistency, ArcGIS tools will be used to familiarize students with the basic application and function of GIS technology in relation to data. (Typically Offered: Spring)

IALL 3340N: Topics in Ecology and Sustainability: Design Ecologies

Credits: 1-4. Repeatable.

Scientific introduction at intermediate level to ecology and evolution of important groups of organisms: algae to vertebrates, different ecological phenomena (e.g., fire and climate change), varying landforms, different ecosystems (e.g., prairies and aquatic systems); emphasis on sustainability with introduction to concepts, issues, and practices; ability to communicate environmental information through a variety of means. Requirements: one general biology course. (Typically Offered: Summer)

IALL 3410: Environmental Policy

Credits: 3. Repeatable.

Theory and practice of environmental policies, including the study of U.S. federal environmental policies with direct and indirect bearings on water issues; focus on policy history, implementation, and effectiveness; how policies interact with each other, how local stakeholders perceive their pros and cons, and linkages between local implementation efforts and regional and large-scale impacts. Offered irregularly. (Typically Offered: Summer)

IALL 3670: Plant Taxonomy

Credits: 2-4.

Principles of classification and evolution of vascular plants; taxonomic tools and collection techniques; use of keys. Field and laboratory studies emphasizing identification of local flowering plants and recognition of major plant families. Offered irregularly. (Typically Offered: Summer)

IALL 4080: Aquatic Ecology

Credits: 2-4.

Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals. Requirements: ecology, chemistry, and physics courses. (Typically Offered: Summer)

IALL 4120: Restoration Ecology

Credits: 2.

Ecological principles for restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations; emphasis on prairie restoration and wetland vegetation. Requirements: ecology courses. Offered irregularly. (Typically Offered: Summer)

IALL 4220: Prairie Ecology

Credits: 4.

Basic patterns and underlying physical and biotic causes of both regional and local distributions of plants and animals of North American prairies; field and laboratory analyses and projects. Requirements: familiarity with basic principles of biology and ecology. Offered irregularly. (Typically Offered: Summer)

IALL 4230: Prairie Ecology I

Credits: 2.

Recognition of Iowa prairie plants and understanding the systems in which they exist; emphasis on identification of tallgrass prairie flora by sight recognition, family, genus, species, and common names. Requirements: basic familiarity with biology and ecology. Offered irregularly. (Typically Offered: Summer)

IALL 4240: Prairie Ecology II

Credits: 2.

Hands-on learning experiences demonstrating dynamic, human-influenced (anthropogenic) systems which have impacted prairie ecosystems for the past 10,000 years or more; emphasis on identification of tallgrass prairie flora by sight recognition, family, genus, species, and common names. Requirements: general familiarity with biology and ecology. Offered irregularly. (Typically Offered: Summer)

IALL 4270: Field Archaeology

Credits: 3-4.

Nature of cultural and environmental evidence in archaeology and how they are used to model past human behavior and land use; emphasis on Iowa prehistory; basic reconnaissance surveying and excavation techniques. Offered irregularly. (Typically Offered: Summer)

IALL 4360: Illustrating Nature II Photography

Credits: 1-2.

Beginning to intermediate technical and compositional aspects of color photography of natural areas and their plants and animals. Offered irregularly. (Typically Offered: Summer)

IALL 4800: Ecology and Systematics of Diatoms

Credits: 2-4.

Field and laboratory study of freshwater diatoms; techniques in collection, preparation, and identification of diatom samples; study of environmental factors affecting growth, distribution, taxonomic characters; project design and execution including construction of reference and voucher collections and data organization and analysis. Offered irregularly. (Typically Offered: Summer)

IALL 4820: Ecology and Systematics of Algae

Credits: 2-4. Contact Hours: Lecture 4.

Ecology, morphological structure, phylogeny, and taxonomy of freshwater algae based on field material collected; emphasis on genus-level identifications, biodiversity, ecology; habitat visits to lakes, fens, streams, rivers; algal ecology. Offered irregularly. (Typically Offered: Summer)

IALL 4900: Undergraduate Independent Study

Credits: 1-4. Repeatable.

Research opportunities for undergraduate students in the biological sciences. Requirements: junior or senior standing. Offered irregularly. (Typically Offered: Summer)

IALL 4950: Introduction to Research and Inquiry

Credits: 1-3.

How data transforms to information and ultimately knowledge through scientific investigations; examinations and applications include steps formulating the scientific method using 21st-century data, conditions, and related challenges; deliverables include a thoroughly documented scientific experiment beginning with research questions and hypotheses, recommended methods, and concluding with anticipated results. Offered irregularly. (Typically Offered: Summer)

Courses primarily for graduate students, open to qualified undergraduates:

IALL 5160X: Animal Behavior

Credits: 2. Contact Hours: Lecture 2.

Examination of ecological and evolutionary theories of animal behavior through field studies of animal coloniality, courtship, territoriality, predator defense, habitat selection, foraging, mating systems, and parental care. Requirements: two biology courses. (Typically Offered: Summer)

IALL 5210: Ecology and Systematics of Diatoms

Credits: 2-4.

(Typically Offered: Summer)

IALL 5340K: Topics in Ecology and Sustainability: Making Kin With(in)**Place: Literature & Multispecies Kinship**

Credits: 3.

Exploration of what it means to build kin with a place, while in a place—specifically, Lake Okoboji and the grounds of the Lakeside Laboratory. Consideration of the human impact on our planet and the inherent demand issued by climate change to abandon anthropocentrism and fundamentally alter human relationships with our environments, places, and the species therein. After discussing the cultural and human dimensions of climate change, we will consider multispecies kinship systems and how to build meaningful relationships with place. (Typically Offered: Summer)

IALL 5900: Graduate Independent Study

Credits: 1-4. Repeatable.

(Typically Offered: Summer)

Italian (ITAL)

Courses primarily for undergraduates:

ITAL 1070: Intensive Beginning Italian

Credits: 4. Contact Hours: Lecture 4.

A communicative approach to grammar and vocabulary within the context of Italian culture for students whose native language is not Italian. Taught in Italian. (Typically Offered: Fall, Spring)

Journalism and Mass Communication (JLMC)

Courses primarily for undergraduates:

JLMC 1010: Mass Media and Society

Credits: 3. Contact Hours: Lecture 3.

Communication theory models and their application to the mass media; the mass communication process; organization, characteristics and responsibilities of the mass media; media literacy process. (Typically Offered: Fall, Spring, Summer)

JLMC 1100: Orientation to Journalism and Communication

Credits: Required. Contact Hours: Lecture 1.

Orientation to professional and pre-professional opportunities, writing for the mass media and curriculum requirements in the Greenlee School. Basic media writing preparation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

JLMC 1400X: Identity, Diversity and the Media

Credits: 3. Contact Hours: Lecture 3.

Understand perspectives and biases within journalism, advertising and public relations content, including content shared through social-media platforms. Analyze content generated by others. Topics include media literacy, source evaluation, portrayals of diverse groups, identification of diverse sources and strategies for reducing bias in media work. Meets U.S. Diversity Requirement.

JLMC 2010: Reporting and Writing for the Mass Media

Credits: 3.

Prereq: (ADVRT, JLMC, or PR major; credit or enrollment in JLMC 1100) or Permission of Department

Generating story ideas, exercising news judgment and gathering information via interviews, observation and documentary sources to produce news and informational material for the mass media. Emphasis on analyzing and organizing information, as well as accuracy and principles of good writing. Use of AP Style.

JLMC 2400: Principles of Journalism

Credits: 3. Contact Hours: Lecture 3.

Analysis of journalism industry and specific audiences served by print, electronic, visual and digital media. Introduction to core values of journalism and guiding principles that encompass literacy, ethics, law, history, the economy and cultural and societal implications. (Typically Offered: Fall, Spring)

JLMC 2420: Visual Principles for Mass Communicators

Credits: 3. Contact Hours: Lecture 3.

Understanding and analysis of the visual message. Visual perception, visual communication theory, design syntax, design elements and how they are applied in mass communication. (Typically Offered: Fall, Spring)

JLMC 2600: Media Controversies in Science and Technology

Credits: 3. Contact Hours: Lecture 3.

Understanding science communication in the media. Exploring audience perceptions, media portrayals, underlying theories and social controversies related to communication of science and technology.

JLMC 3020: Intermediate Reporting and Writing for the Mass Media

Credits: 3.

Prereq: JLMC 1100 and Minimum of C+ in JLMC 2010

Researching, organizing and writing for newspapers, magazines and digital media. Enhancing and refining skills in developing sources and generating story ideas. Information-gathering techniques, reporting and writing.

JLMC 3030: Reporting and Writing for Broadcast Media

Credits: 3.

Prereq: JLMC 1100 and Minimum of C+ in JLMC 2010

Researching, organizing, and writing for radio, television and digital media. Basic principles of news programming and storytelling across broadcast media platforms. An emphasis on development, content and structure.

JLMC 3060: Broadcast Media Production

Credits: 3.

Prereq: Minimum of C+ in JLMC 2010

Introduction to studio production using professional equipment. Course focus on visual concepts, maintenance and practical operation of studio equipment. (Typically Offered: Fall, Spring)

JLMC 3070: Digital Video Production

Credits: 3.

Creation of video productions for use as communication tools in advertising, promotions, short documentaries and public relations. Technical and artistic fundamentals of video production including planning, scripting, shooting, lighting and digital editing.

JLMC 3080: Broadcast News Gathering and Production

Credits: 3.

Prereq: Minimum of C+ in JLMC 2010

Field techniques in single-camera video production used to shoot and edit visual stories. Introduction to broadcast news gathering.

JLMC 3100: Fundamentals of Photojournalism

Credits: 3.

Prereq: Minimum of C+ in JLMC 2010

Basic photojournalism techniques. Includes camera operation, lighting, composition and photo reproduction techniques for print or computer-mediated applications. Emphasis on using the camera as a reporting tool. Basic use of digital imaging and editing software. Ethical issues involving photojournalism. (Typically Offered: Fall, Spring)

JLMC 3110: Fundamentals of Mobile Photography

Credits: 3. Contact Hours: Lecture 3.

Basic photographic techniques for publication. Includes smartphone operation, lighting, composition and historical overview of photography and use in digital platforms. Basic use of image editing software. Ethical issues involving photo publication in media platforms. A smartphone camera is required.

JLMC 3120: Advanced Techniques in Photojournalism

Credits: 3.

Prereq: JLMC 3100 or Permission of Instructor

Advanced techniques and problem solving, both ethical and technical, for photographers who seek to be members of newsgathering teams. Photographic storytelling using a combination of audio and still photography techniques to report stories for print and web publications. Hands on experience with latest digital imaging technology. A digital SLR camera is required. Offered irregularly. (Typically Offered: Fall, Spring)

JLMC 3150: Digital Storytelling

Credits: 3.

Prereq: JLMC 3080 or JLMC 3100 or JLMC 3160

Identify and critically evaluate multimedia elements in journalistic storytelling. Produce audio, photographic and video story packages for a variety of outlets. Choose and work with appropriate digital tools. Learn economic, social and ethical issues that influence media today. Computer design proficiency recommended. (Typically Offered: Fall, Spring)

JLMC 3160: Visual Communication Design

Credits: 3.

Prereq: Minimum of C+ in JLMC 2010

Beginning techniques in layout, photo editing, and vector artwork. Application of visual principles and creative problem-solving to digital, social media, and print design projects. Use of industry-standard tools such as Adobe Photoshop, Illustrator, and InDesign. (Typically Offered: Fall, Spring)

JLMC 3170: Publishing for Mobile Devices

Credits: 3.

Prereq: JLMC 3160

Creating, designing and publishing content for mobile devices through use of industry-standard tools. Exposure to animation and HTML. Computer design proficiency recommended. (Typically Offered: Spring)

JLMC 3440: Feature Writing

Credits: 3.

Prereq: Minimum of C+ in JLMC 3020; (JLMC 3030 or PR 3210)

Reporting and writing short- and long- form stories for magazines, newspapers, corporate communication and the Web. Focus on departmental stories, personal essays, trend or conflict articles and personality profiles. Emphasis on immersion reporting.

JLMC 3460: Public Affairs Reporting

Credits: 3.

Prereq: Minimum of C+ in JLMC 3020; (JLMC 3030 or PR 3210)

Reporting and writing about government, business, and other institutions; identification of and access to public records; investigative reporting techniques; developing major stories about government and nonprofit organizations; and ethical issues.

JLMC 3470: Science Communication

Credits: 3.

Understanding and practicing science communication. Emphasis on building skills to report on science topics, telling science stories using different kinds of media, and understanding factors that impact how different audiences interpret scientific information. Explorations of science communication products relevant to health, natural resources, social science, and technology.

JLMC 3490: News and Feature Editing

Credits: 3.

Prereq: Minimum of C+ in JLMC 3020; (JLMC 3030 or PR 3210)

Editing content for multiple platforms, including websites, magazines, newspapers, and newsletters. Adapting material for audiences, including selection and organization of text and visuals, grammar, punctuation, usage, logic and accuracy. Designing print and online layouts. Using search engine optimization and social media to promote content.

JLMC 3900: Professional Skills Development

(Cross-listed with ADVRT 3900/ PR 3900).

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: (Minimum of C+ in JLMC 2010; JLMC major or ADVRT major or PR major) or Permission of Instructor

Check with Greenlee School for course availability. (Typically Offered: Fall, Spring)

JLMC 3910: Short Course Intensive

(Cross-listed with ADVRT 3910/ PR 3910).

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 6 credits.

Focused short courses on timely concepts. Check with Greenlee School for course availability. Offered on a satisfactory-fail basis only.

JLMC 4010: Mass Communication Theory

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Theory and research in mass communication processes and effects; the scientific process; methods of measuring, evaluating and reporting mass communication research.

JLMC 4060: Media Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Decision-making functions of media. Basic media market analysis, media organization and management, circulation and audience development, technological developments affecting management decisions, and relationships with labor and regulatory agencies that affect media operations.

JLMC 4140X: Digital Newsroom

Credits: 3.

Fundamentals of digital content creation for use in online news service. Emphasis on reporting, writing and editing skills with additional training in digitizing content. Includes production of photography, slide shows, audio production, video production and blogs.

JLMC 4600: Law of Mass Communication

Credits: 3. Contact Hours: Lecture 3.

Prereq: (JLMC 1100; minimum of C+ in JLMC 2010; Junior classification) or Permission of Instructor

First Amendment law, libel, privacy, obscenity, contempt, copyright, trademark, the Federal Communications Act; laws affecting advertising, legal publication, and other business activities of the media.

JLMC 4610: History of American Journalism

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Role of the mass media, including advertising and public relations, in shaping the social, economic and political history of America; impact of change in these areas on the development, traditions and philosophies of the media.

JLMC 4620: Media Ethics, Freedom, Responsibility

Credits: 3. Contact Hours: Lecture 3.

Prereq: JLMC 1100; minimum of C+ in JLMC 2010; ADVRT, JLMC, or PR major

Ethics and professionalism in the practice of journalism, public relations and advertising.

JLMC 4640: Journalism and Literature

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

A study of journalism's impact on literary writing and literature's impact on journalism, as seen through the works of esteemed American author-journalists.

JLMC 4730: Social Media Strategy

(Cross-listed with ADVRT 4730/ PR 4730).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

The strategic use of social media, from both an advertising and public relationship standpoint, to the advantage of a client or organization.

Examination and analysis of the social media space from a business perspective. Best practices in the areas of strategic planning, tactical execution, and measurement of social media platforms. (Typically

Offered: Fall, Spring)

JLMC 4740: Communication Technology and Social Change

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Examination of historical and current communication technologies, including how they shape and are shaped by the cultural and social practices into which they are introduced. Meets International Perspectives Requirement.

JLMC 4760: World Communication Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

World communication systems and social, political, and economic factors determining flow, character, and volume of news. Impact of media information, advertising and public relations on nations and societies. Comparative analysis of role and impact of traditional modes of communication, the mass media and computer-mediated systems. Meets International Perspectives Requirement.

JLMC 4770: Diversity in the Media

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Portrayals of ethnic groups, gender, sexual orientation and social class in the media in news, advertising, information and entertainment; the effects of mass media on social issues and population groups. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring, Summer)

JLMC 4900: Independent Study in Communication

Credits: 1-30. Repeatable.

Prereq: Junior standing or Permission of Instructor

Projects during which students may study problems associated with a medium, a professional specialization, a philosophical or practical concern, a reportorial method or writing technique, or a special topic in their field. Credit is not given for working on student or professional media without an accompanying research component. Graduation Restriction: No more than 3 credits of ADVRT/JLMC/PR 4900 may be used toward a degree in the Greenlee School.

JLMC 4970: Special Topics in Communication

(Cross-listed with ADVRT 4970/ PR 4970).

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Junior classification

Seminars or one-time classes on topics of relevance to students in communication. See Schedule of Classes for topics.

JLMC 4990A: Professional Media Internship: Required

Credits: 3.

Prereq: ([JLMC major; JLMC 1100; minimum of C+ in JLMC 3020 or JLMC 3030] or [ADVRT major; JLMC 1100; ADVRT 3010 or PR 3010; minimum of C+ in JLMC 2010] or [PR major; JLMC 1100; ADVRT 3010 or PR 3010; minimum of C+ in PR 3210]); Advisor Approval

Initial, required internship. A 400-hour (for 3 credits) internship in the student's specialization. Assessment based on employer evaluations, student reports and faculty reviews. Available only to Greenlee School majors. Offered on a satisfactory-fail basis only.

JLMC 4990B: Professional Media Internship: Optional

Credits: 1-3. Repeatable.

Prereq: ([JLMC major; JLMC 1100; minimum of C+ in JLMC 3020 or JLMC 3030] or [ADVRT major; JLMC 1100; ADVRT 3010 or PR 3010; minimum of C+ in JLMC 2010] or [PR major; JLMC 1100; ADVRT 3010 or PR 3010; minimum of C+ in PR 3210]); Advisor Approval

Optional internship in the student's specialization. Assessment based on employer evaluations, student reports and faculty reviews. Available only to Greenlee School majors. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

JLMC 5010: Theories of Mass Communication

Credits: 3. Contact Hours: Lecture 3.

Prereq: Graduate classification or Permission of Instructor

Historical overview of mass communication theories. Examination of major areas of research activity and theoretical development related to organization, functions, and effects of mass communication.

JLMC 5020: Fundamentals of Communication Research Methods

Credits: 3. Contact Hours: Lecture 3.

Research methods in journalism and mass communication, including problem selection, sampling, hypothesis formulation, research design, data collection and analysis. Designing a research strategy appropriate for a variety of communication-related questions and assessing the appropriateness, validity, and generalizability of research results.

JLMC 5060: Media Management

Credits: 3. Contact Hours: Lecture 3.

Decision-making functions of media. Basic media market analysis, media organization and management, circulation and audience development, technological developments affecting management decisions, and relationships with labor and regulatory agencies that affect media operations.

JLMC 5100: Strategies of Communication

Credits: 3. Contact Hours: Lecture 3.

The process of developing professional communication and persuasion strategies, with emphasis on problem definition, behavioral objectives, situation analysis, strategy formulation, and justification through application of communication theories and research.

JLMC 5200: Public Relations Theory and Methods

Credits: 3. Contact Hours: Lecture 3.

Overview of dominant theories and research methods applied to the study and practice of public relations.

JLMC 5210: Theories of Visual Communication

Credits: 3. Contact Hours: Lecture 3.

Explores the theoretical frameworks in visual communication, including concepts of perception, visual language, visual persuasion, and the social, political and cultural implications of the use of images. Understanding the function of images in changing knowledge, attitudes and behavior.

JLMC 5470: Science Communication

Credits: 3.

Understanding and practicing science communication. Emphasis on building skills to report on science topics, telling science stories using different kinds of media, and understanding factors that impact how different audiences interpret scientific information. Explorations of science communication products relevant to health, natural resources, social science, and technology.

JLMC 5600: Risk Perception and Communication

Credits: 3. Contact Hours: Lecture 3.

Study of risk communication principles, models and theories applicable to any risk communication situation. Emphasis on science, technology and risk issues, such as food, health, agriculture and the environment. Examines roles of scientists and communicators in cultivating a public informed about scientific and technological issues.

JLMC 5610: Media and Society: Interrelationships

Credits: 3. Contact Hours: Lecture 3.

Media roles and functions in society including interrelationships between the media and a variety of social actors and forces. Theories and practices regarding social networking and communication via social media; influence of social media and social networking.

JLMC 5740: Communication Technologies and Social Change

Credits: 3. Contact Hours: Lecture 3.

Personal, organizational, and social implications of the use of communication technologies. Includes theories and empirical research across the continuum of perspectives, from techno-utopianism through an anti-technology stance. Meets International Perspectives Requirement.

JLMC 5760: World Communication Systems

Credits: 3. Contact Hours: Lecture 3.

World communication systems and social, political, and economic factors determining flow, character, and volume of news. Impact of media information, advertising and public relations on nations and societies. Comparative analysis of role and impact of traditional modes of communication, the mass media and computer-mediated systems. Meets International Perspectives Requirement.

JLMC 5900A: Special Topics: Media Studies

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

JLMC 5900B: Special Topics: Professional Specialization

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

JLMC 5900C: Special Topics: Research Problems and Methods

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

JLMC 5900D: Special Topics: Technique and Style

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

JLMC 5900E: Special Topics: Specialized Communication

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

JLMC 5910: Professional Internship

Credits: 1-2.

Prereq: Instructor Permission for Course

Supervised internship experience. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

JLMC 5920: Introduction to Graduate Study in Journalism and Mass Communication

Credits: Required. Contact Hours: Lecture 1.

Overview of advanced study in journalism and mass communication with special emphasis on requirements for obtaining the master of science degree.

JLMC 5980A: Seminars in Mass Communication: Audiences and Effects

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

JLMC 5980B: Seminars in Mass Communication: Communication Technology

Credits: 1-3. Repeatable.

JLMC 5980C: Seminars in Mass Communication: Professional Communication

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

JLMC 5980D: Seminars in Mass Communication: Development Communication

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

JLMC 5980E: Seminars in Mass Communication: Evaluation Methods

Credits: 1-3. Repeatable.

JLMC 5980F: Seminars in Mass Communication: International Communication

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

JLMC 5980G: Seminars in Mass Communication: Mass Communication History

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

JLMC 5980H: Seminars in Mass Communication: Mass Communication Law

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

JLMC 5980I: Seminars in Mass Communication: Media Management

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

JLMC 5980J: Seminars in Mass Communication: Research Methods

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

JLMC 5980K: Seminars in Mass Communication: Society and Mass Communication

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

JLMC 5980L: Seminars in Mass Communication: Journalism and Mass Communication Education

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

JLMC 5980M: Seminars in Mass Communication: Visual Communication

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

JLMC 5980N: Seminars in Mass Communication: Broadcast Communication

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

JLMC 5980O: Seminars in Mass Communication: Communication Theory

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

JLMC 5980P: Seminars in Mass Communication: Computer Mediated Communication

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

JLMC 5980Q: Seminars in Mass Communication: Science, Technology and Risk Communication

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

JLMC 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Courses for graduate students:**JLMC 6990: Thesis Research**

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Kinesiology (KIN)

Courses primarily for undergraduates:

KIN 1010: Swimming I

Credits: 1. Contact Hours: Laboratory 3.

Basic course for nonswimmers. Emphasis on two fundamental strokes and personal water safety skills. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 1020: Swimming II

Credits: 1. Contact Hours: Laboratory 3.

Prereq: KIN 1010

Intermediate course. Emphasis on learning and improving five basic strokes and personal water safety skills. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

KIN 1080: Aquatic Fitness

Credits: 1. Contact Hours: Laboratory 3.

Prereq: KIN 1020 or Permission of Instructor

Water related exercises, activities, and swimming workouts to improve physical fitness. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

KIN 1220: Badminton

Credits: 1. Contact Hours: Laboratory 2.

Introduction to fundamental badminton skills and strategic game play. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 1290: Bowling

Credits: 1. Contact Hours: Laboratory 2.

Introduction to bowling skills and strategic game play. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 1350: Golf

Credits: 1. Contact Hours: Laboratory 2.

Introduction to fundamental golf skills and strategic game play. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 1440: Racquetball

Credits: 1. Contact Hours: Laboratory 2.

Introduction to fundamental racquetball skills and strategic game play. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 1530: Ice Skating

Credits: 1. Contact Hours: Laboratory 2.

Introduction to fundamental ice skating skills and strategic game play. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 1580: Tennis

Credits: 1. Contact Hours: Laboratory 2.

Introduction to basic skills (forehand, backhand, service) and basic knowledge of game play. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 1630: Physical Fitness

Credits: 1. Contact Hours: Laboratory 3.

Evaluation of fitness status. Exercises, activities, and programs to improve physical fitness. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 1640: Walking for Fitness

Credits: 1. Contact Hours: Laboratory 3.

Fitness walking as an activity to improve health and fitness; values of this type of activity as a lifetime endeavor with knowledge and usage of pedometers. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 1650: Running for Fitness

Credits: 1. Contact Hours: Laboratory 2.

Running as a physical activity to improve physical fitness and health. Promotion of this activity as a lifetime endeavor. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 1660: Weight Training

Credits: 1. Contact Hours: Laboratory 3.

Introduction to fundamental skills of weight training and strategic game play. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 1680: Judo

Credits: 1.

Fundamentals of self defense, focusing on throwing with the hands, hips and feet as well as applying pins, chokes and arm-bars. The physical skills will be taught focused on training through development of courtesy, integrity, perseverance, self control, & indomitable spirit. Emphasis on learning a way of life that promotes personal development, physical health and citizenship. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 1700: Tae Kwon Do/Karate I

Credits: 1. Contact Hours: Laboratory 2.

Teaches fundamentals of self-defense, focusing on hand and foot striking and blocking techniques. The physical skills will be taught focused on training through development of courtesy, integrity, perseverance, self-control and indomitable spirit. It will be emphasized that each student learns a way of life that promotes personal development, physical health and citizenship. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

KIN 1710: Tae Kwon Do/Karate II

Credits: 1. Contact Hours: Laboratory 2.

Teaches advanced application of self-defense focusing on hand and foot striking and blocking techniques. The physical skills will be taught focused on training through development of courtesy, integrity, perseverance, self-control and indomitable spirit. It will be emphasized that each student learns a way of life that promotes personal development, physical health and citizenship. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

KIN 1730: Hap Ki Do/Martial Self-Defense

Credits: 1. Contact Hours: Laboratory 2.

Teaches fundamentals of self-defense focusing on joint locks, pressure points and throwing techniques to escape from an attacker. The physical skills will be taught focused on training through development of courtesy, integrity, perseverance, self-control and indomitable spirit. It will be emphasized that each student learns a way of life that promotes personal development, physical health & citizenship. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

KIN 1820: Volleyball

Credits: 1. Contact Hours: Laboratory 2.

Introduction to fundamental volleyball skills and strategic game play. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 1850: Soccer

Credits: 1. Contact Hours: Laboratory 2.

Introduction to fundamental soccer skills and strategic game play. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 2100: Concepts of Fitness and Wellness

Credits: 2. Contact Hours: Lecture 2.

Coverage of behavioral skills needed to adopt and maintain lifestyles conducive to fitness and wellness. Provides students with knowledge and skills needed to adopt and maintain healthy lifestyles. Includes self-assessments and content on physical activity, nutrition, weight control, stress management and other lifestyle behaviors related to health. For non-kinesiology majors. (Typically Offered: Fall, Spring)

KIN 2310: Fundamentals of Tumbling and Gymnastics

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Physical Education Teacher Education Specialization

Fundamentals of tumbling and gymnastics apparatus. Skill enhancement, analysis, understanding practice and the development of progressions. (Typically Offered: Fall)

KIN 2320: Fundamentals of Team Sports

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Physical Education Teacher Education Specialization

Fundamentals of indoor and outdoor team sports, for example basketball, volleyball, flag football, and soccer. Skill enhancement, analysis, understanding practice and the development of progressions. (Typically Offered: Fall)

KIN 2360: Fundamentals of Individual Sports and Fitness

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Physical Education Teacher Education Specialization

Fundamentals of individual sports and fitness, for example disc golf, bowling, badminton, and weight training. Skill enhancement, analysis, understanding practice and the development of progressions. (Typically Offered: Spring)

KIN 2420: Planning for Success in a Health Career

Credits: 0.5. Contact Hours: Lecture 0.5.

Prereq: Pre-Health Professions Specialization; Sophomore classification

Reflection and discovery to better understand skills needed for admission to professional and graduate school. Facilitate preparation of relevant materials and develop professional school admission strategies. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

KIN 2520: Introduction to the Discipline of Kinesiology

Credits: 1. Contact Hours: Lecture 1.

Relevant societal issues and research within the discipline of Kinesiology (the study of movement) are addressed. (Typically Offered: Fall, Spring)

KIN 2530: Orientation and Learning Community in Kinesiology and Health

Credits: 1. Contact Hours: Lecture 1.

Overview of ISU policies and procedures, academic advising operations, degree requirements, program of study planning, and campus resources. Students will have out-of-class activities and work with faculty, staff and mentors to explore careers in Kinesiology and complete assignments related to identification & development of their skills and interests. Department of Kinesiology students only. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

KIN 2580: Principles of Physical Fitness and Conditioning

Credits: 2. Contact Hours: Lecture 1, Laboratory 3.

Introduction to five components of fitness: cardiorespiratory, muscular strength, muscular endurance, flexibility, and body composition. Students will be introduced to basic exercise prescription and evaluation principles, develop skills to assess each component of fitness, and learn different exercise modalities to enhance each component. (Typically Offered: Fall, Spring)

KIN 2590: Leadership Techniques for Fitness Programs

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: KIN 2580

Development of exercise leadership skills for a variety of activities. Includes planning, promotion, and teaching techniques for developing fitness in others using a variety of exercise modalities including group fitness and weight training. Kinesiology and health majors only. (Typically Offered: Fall, Spring)

KIN 2660: Advanced Strength Training and Conditioning

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Prereq: KIN 2580

This course is designed to enhance the student's current level of knowledge and expertise to an advanced level in the area of strength training and conditioning. The course will prepare students interested in taking the National Strength and Conditioning Association Certified and Conditioning Specialist's exam. The course will focus on the assessment and implementation of training programs with strong emphasis on the areas of resistance training, metabolic training, flexibility, reaction time, speed, and agility. Kinesiology and health majors only and permission of instructor needed. (Typically Offered: Fall, Spring)

KIN 2800: Directed Field Experience in Elementary Physical Education

Credits: 1.

Prereq: Physical Education Teacher Education Specialization

Observing, planning, and facilitating movement experiences of children in an elementary school setting. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

KIN 2810: Directed Field Experience in Secondary Physical Education

Credits: 1.

Prereq: Physical Education Teacher Education Specialization

Observing, planning, and facilitating movement experiences of students in a middle and/or high school setting. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

KIN 2820: Field Experience with Educational Outreach

Credits: 1.

Prereq: admission to Educator Preparation program

Planning and facilitating physical education experiences for children in a community outreach setting. Experiences take place on campus. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

KIN 2840: Elementary and Pre-school Movement Education

Credits: 3.

Prereq: 3 credits in HDFS

Approaches to teaching movement skills, health-related fitness and school-based physical activities (in the classroom, in PE, during recess) to pre-school and elementary school age children are covered. Emphasis is placed on planning and conducting developmentally appropriate movement experiences for preschool and elementary aged children throughout the school day based upon educational psychology, exercise psychology and motor development research. Practical experience is provided. (Typically Offered: Fall, Spring)

KIN 2850: Pre-Internship in Kinesiology and Health

(Cross-listed with HS 2850).

Credits: 1-2.

Prereq: Kinesiology and Health major; credit or concurrent enrollment in KIN 2580; Permission of Internship Coordinator

Pre-internship experience with a health organization based on option. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

KIN 2900: Independent Study

Credits: 1. Repeatable, maximum of 3 credits.

Prereq: 2nd semester Freshmen or Sophomore classification; Permission of Instructor

Study under supervision of faculty. (Typically Offered: Fall, Spring)

KIN 3120: Movement Education in Elementary School Physical Education

Credits: 3.

Prereq: admission to Educator Preparation program

Planning for management and instruction of developmentally appropriate physical education for children pre-school through grade six. Laboratory experience required. Graduation Restriction: Credit for only one of KIN 2840 or KIN 3120 may be applied toward graduation. (Typically Offered: Fall)

KIN 3130: Teaching Secondary Physical Education

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: admission to Educator Preparation program

Current theory, practice and research on teaching focusing on management, instructional, and learning styles of students in secondary schools. (Typically Offered: Spring)

KIN 3150: Coaching Theory and Administrative Issues

Credits: 3. Contact Hours: Lecture 3.

Study in the theory, ethics, strategy, and mechanics of coaching various interscholastic and/or intercollegiate sports. Emphasis on formulating a philosophy, identifying goals and psychological aspects, teaching skills, and developing strategies. (Typically Offered: Fall, Spring, Summer)

KIN 3450: Management of Health-Fitness Programs and Facilities

Credits: 3. Contact Hours: Lecture 3.

Application of management concepts to the fitness industry, e.g., understanding customers, marketing, program management, financial management, legal issues, and evaluation and planning. (Typically Offered: Fall, Spring, Summer)

KIN 3550: Biomechanics

Credits: 3. Contact Hours: Lecture 3.

Prereq: PHYS 1150 or PHYS 1310

Mechanical basis of human performance; application of mechanical principles to exercise, sport and other physical activities. (Typically Offered: Fall, Spring, Summer)

KIN 3580: Exercise Physiology

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2550 and BIOL 2560

Physiological basis of human performance; effects of physical activity on body functions. (Typically Offered: Fall, Spring, Summer)

KIN 3590: Exercise Physiology Lab

Credits: 1. Contact Hours: Laboratory 2.

Prereq: Credit or concurrent enrollment in KIN 3580

Learning lab techniques in Exercise Physiology and engaging in the experimental process. (Typically Offered: Fall, Spring, Summer)

KIN 3600: Sociology of Physical Activity and Health

Credits: 3. Contact Hours: Lecture 3.

Prereq: SOC 1340

Provide an overview of sociology to enhance students understanding of societal forces influencing behavior; Provide insights about people, environments, organization and policies that impact Kinesiology professionals. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

KIN 3630: Basic Electrocardiography

Credits: 2. Contact Hours: Lecture 2.

Understanding of human electrocardiography, including normal and abnormal 12-lead ECGs and arrhythmia identification. Offered even-numbered years. (Typically Offered: Fall, Spring)

KIN 3650: Sport Psychology

Credits: 3. Contact Hours: Lecture 3.

Prereq: PSYCH 1010 or PSYCH 2300

Psychological factors that influence performance in sport settings. The influence of personality, anxiety, motivation and social factors. Psychological skills training and strategic methods for improvement of athletic performance. (Typically Offered: Fall, Spring, Summer)

KIN 3660: Exercise Psychology

Credits: 3. Contact Hours: Lecture 3.

Prereq: PSYCH 1010 or PSYCH 2300

Psychological theories for understanding and predicting health-oriented exercise behavior. Psychological and psychobiological responses to exercise. Psychological interventions for increasing exercise participation and adherence rates. (Typically Offered: Fall, Spring, Summer)

KIN 3720: Motor Control and Learning Across the Lifespan

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2550, BIOL 2560, (PSYCH 1010 or PSYCH 2300)

Introduction to major concepts of neuromotor control, behavioral motor control and motor learning in the child, adult and older adult, with emphasis on the adult system. (Typically Offered: Fall, Spring, Summer)

KIN 3730: Biomechanics and Motor Control Laboratory

Credits: 1. Contact Hours: Laboratory 2.

Prereq: Credit or concurrent enrollment in (KIN 3550; KIN 3720)

Introduction to lab techniques in Biomechanics and Motor Control by engaging in the experimental process. Reinforces and integrates concepts from KIN 3550 and KIN 3720. Performance of hands-on collection of biomechanical and motor control data and analysis and explanation of human movement from mechanical, behavioral, and neural perspectives.

KIN 3810A: Study Abroad Experience in Kinesiology: Preparing for the Experience

Credits: 1. Contact Hours: Lecture 1.

Prereq: KIN 2520; KIN 2530; major in ATR or KIN; Sophomore classification; minimum GPA of 2.5

Prepares student for a study abroad experience focused on the discipline of Kinesiology in another country. Precedes a multi-credit KIN 3810B course that is the actual study abroad experience. The prerequisite for this course is having been accepted to study abroad by the Program Director of your intended program. Offered even-numbered years. Offered on a satisfactory-fail basis only. Meets International Perspectives Requirement. (Typically Offered: Spring)

KIN 3810B: Study Abroad Experience In Kinesiology

Credits: 2.

Prereq: KIN 3810A; Permission of Instructor

First-person perspective into the discipline of Kinesiology in another country as well as provide enrichment experiences related to the history and culture of that country. Follows a 1 credit KIN 3810A course that was intended to prepare you for this study abroad experience. Offered even-numbered years. Meets International Perspectives Requirement. (Typically Offered: Summer)

KIN 3850: Preparation and Search Strategies for Kinesiology and Health Internships

(Cross-listed with HS 3850).

Credits: Required. Contact Hours: Lecture 0.5.

Prereq: Junior classification

Preparation of relevant material for a successful internship/career search. Specific internship timeline, process, procedures will be reviewed. Course needs to be taken a minimum of two semesters prior to required internship. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

KIN 3910: Service Learning Leadership Experience

Credits: 1-3. Repeatable, maximum of 6 credits.

Applied service learning experiences designed to provide students with opportunities to apply classroom knowledge to real world applications. Students will gain professional skills and programming experience while supporting health, education and wellness programming in school, work site or community settings. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

KIN 3950: Adapted Physical Education

(Dual-listed with KIN 5950).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: admission to Educator Preparation program

Etiology, characteristics, needs, and movement experiences for individuals with disabilities. Designed to provide appropriate methods of physical education instruction for students including those with disabilities as identified by the Individuals with Disabilities Education Act and students who are talented and gifted. Assessments and strategies to differentiate instruction and to adapt activities for all exceptional learners will be addressed. Laboratory experience required. Graduation Restriction: KIN 5950 may not be taken by students who previously earned credit in KIN 3950. (Typically Offered: Fall)

KIN 3990: Recreational Sport Management

Credits: 3. Contact Hours: Lecture 3.

The role of sport in developing fitness, recreational opportunities, and tourism, with special emphasis on issues related to youth sport, volunteerism, and the marketing of sport events and facilities. (Typically Offered: Fall)

KIN 4170: Supervised Teaching in Physical Education in the Secondary School

Credits: 1-30.

Supervised teaching in the secondary schools. (Typically Offered: Fall, Spring)

KIN 4180: Supervised Teaching in Physical Education in the Elementary School

Credits: 8.

Supervised teaching in the elementary schools. (Typically Offered: Fall, Spring)

KIN 4550: Research Topics in Biomechanics

Credits: 3. Contact Hours: Lecture 3.

Prereq: KIN 3550 or Permission of Instructor

Examination of biomechanics and kinesiology research literature to evaluate the application of mechanical principles and analyses to human movement in exercise, sport, physical activity, and activities of daily living and to assess research outcomes and their implications for motor performance, movement energetic, musculoskeletal loading, and injury.

KIN 4580: Principles of Fitness Assessment and Exercise Prescription

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: Minimum of C- in KIN 3580

Principles of cardiac risk factor identification and modification; risk classification of potential exercise clients; fitness assessments; developing comprehensive exercise prescriptions for individuals. (Typically Offered: Fall, Spring)

KIN 4590: Internship in Exercise Leadership

Credits: 1. Contact Hours: Laboratory 3.

Observation and practice of exercise leadership techniques in an on-campus adult fitness program. (Typically Offered: Fall, Spring)

KIN 4620: Medical Aspects of Exercise

Credits: 3. Contact Hours: Lecture 3.

Prereq: Minimum of C- in KIN 3580

The role of exercise in preventive medicine. Impact of exercise on various diseases, and the effect of various medical conditions on the ability to participate in vigorous exercise and competitive sports. Principles of exercise testing and prescription for individuals with these conditions. Environmental and nutritional aspects of exercise. (Typically Offered: Fall, Spring)

KIN 4660: Exercise for Mental Health

Credits: 3. Contact Hours: Lecture 3.

Prereq: KIN 3660 or Senior classification in Psychology or Permission of Instructor

Understand the state-of-the-knowledge of the mental health benefits of physical activity both in the prevention and in the treatment of clinical mental health and other psychological conditions. Focus on both the neurobiological bases of mental health disorders and the effects of exercise on these factors. Practical approach to encouraging changes in physical activity across populations suffering from psychological disturbances as part of treatment. (Typically Offered: Spring)

KIN 4670: Exercise and Health: Behavior Change

(Dual-listed with KIN 5670).

Credits: 3. Contact Hours: Lecture 3.

Prereq: KIN 3660 or Permission of Instructor

Advanced analysis of theoretical health behavior models and their application to physical activity behavior. Includes practical techniques, tools and interventions (e.g., counseling skills, motivational interviewing) to enhance exercise prescription and motivation, and considerations for working with special populations. (Typically Offered: Fall, Spring)

KIN 4710: Measurement in Physical Education

(Dual-listed with KIN 5710).

Credits: 3. Contact Hours: Lecture 3.

Prereq: admission to Educator Preparation program

Current theory, practice and research on measurement and evaluation in physical education and youth physical activity settings. Statistics, grading, and specific assessments including fitness, motor skill, sport skill, physical activity, affective, and cognitive testing will be addressed. Graduation Restriction: KIN 5710 may not be taken by students who previously earned credit in KIN 4710. (Typically Offered: Spring)

KIN 4720: Neural Basis of Human Movement

(Dual-listed with KIN 5720).

Credits: 3. Contact Hours: Lecture 3.

Prereq: KIN 3720 or PSYCH 3100

Addresses the role of the central nervous system in the control of voluntary human movement, with the focus on the cerebral cortex, basal ganglia and cerebellum. Content organized around specific nervous system damage (such as stroke, apraxia, spasticity, or spinal cord damage) and functional movements (such as reaching and grasping, balance and gait). Converging evidence from human movement disorders, brain imaging, animal lesion and single cell studies provide the primary basis for the content. (Typically Offered: Fall, Spring)

KIN 4730: Physical Dimensions of Aging

Credits: 3. Contact Hours: Lecture 3.

Prereq: KIN 3550 or KIN 3580 or KIN 3720

Understanding the physiological, behavioral, and cognitive changes associated with aging with focus on the effects of physical activity on the aging human system. Discussions of what it means to become older, what a person can expect during the aging process, and what kind of control a person has over the aging process. (Typically Offered: Spring)

KIN 4740X: Music and Neuroscience

(Cross-listed with MUSIC 4740X).

Credits: 3. Contact Hours: Lecture 3.

Understanding how music is processed in the brain and the implications for healthy care and education. Online discussions about how music changes all aspects of the brain from neurotransmitters to cortical reorganization. (Typically Offered: Fall)

KIN 4750: Physical Education Curriculum Design and Program Organization

(Dual-listed with KIN 5750).

Credits: 3. Contact Hours: Lecture 3.

Current theory, practices and principles applied to curriculum development for programs in physical education, K-12. Organizing for teaching in a variety of school settings. (Typically Offered: Fall)

KIN 4800: Functional Anatomy

Credits: 3. Contact Hours: Lecture 3.

Prereq: (BIOL 1550 or BIOL 2550); BIOL 2560; KIN 3550

The structure and function of human muscular, skeletal and nervous systems. The relationship of these systems to efficient and safe human motion. (Typically Offered: Fall, Spring)

KIN 4810: Biomechanics Lab

Credits: 1. Contact Hours: Laboratory 2.

Learning lab techniques in Biomechanics and engaging in the experimental process.

KIN 4830: Exercise Psychology Lab

Credits: 1. Contact Hours: Laboratory 2.

Learning lab techniques in Exercise Psychology and engaging in the experimental process.

KIN 4840: Assessment and Control of Locomotion

Credits: 1. Contact Hours: Laboratory 2.

Learning lab techniques in Motor Control and engaging in the experimental process.

KIN 4850A: Internship in Exercise Science

Credits: 8-12. Repeatable.

Prereq: Senior classification; Exercise Science specialization; C- or better in (KIN 3550; KIN 3580; KIN 3590; KIN 3660; KIN 3720; KIN 4580; KIN 4590; KIN 4620; HS 3500); Cumulative GPA 2.0; Permission of Internship Coordinator

Observation and practice in selected exercise science agencies. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 4900A: Independent Study: Exercise and Sport Science

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Independent study of problems of areas of interest in exercise and sport science and related areas. 6 credits from KIN advanced core recommended. (Typically Offered: Fall, Spring, Summer)

KIN 4900H: Independent Study: Honors

Credits: 1-2. Repeatable, maximum of 4 credits.

Prereq: Instructor Permission for Course

Independent study of problems of areas of interest in exercise and sport science and related areas. 6 credits from KIN advanced core recommended. (Typically Offered: Fall, Spring, Summer)

KIN 4910: Undergraduate Teaching Experience

Credits: 1-2. Repeatable, maximum of 6 credits.

Prereq: Permission of Instructor; Junior classification

Undergraduate teaching assistant opportunity in Kinesiology. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 4940A: Practicum in Motivational Interviewing for Health: Principles of Motivational Interviewing

Credits: 1. Contact Hours: Lecture 1.

Prereq: Permission of Instructor; Junior classification

Introduction to the principles of 'motivational interviewing' for behavior change and health coaching applications. Students interested in gaining practical experience in health coaching should enroll in the associated practicum course (KIN 4940B). Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 4940B: Practicum in Motivational Interviewing for Health: Supervised Experience

Credits: 1-2. Contact Hours: Laboratory 4.

Repeatable, maximum of 5 credits.

Prereq: KIN 4940A; Permission of Instructor

This supervised practicum course is designed for students interested in gaining experience in applying 'motivational interviewing' strategies in behavior change and health coaching applications. Students will have opportunities to practice motivational interviewing skills with adult clients and receive on-going support and assistance needed to refine their skills. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 4950: Special Topics in Kinesiology

Credits: 1-3. Contact Hours: Lecture 3.

Prereq: Junior classification or above

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

KIN 5010: Research Methods in Physical Activity

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: Graduate classification

Methods and techniques used in the design and interpretation of research involving physical activity. Emphasis on styles of writing, library use, and computer applications.

KIN 5050: Research Laboratory Techniques in Exercise Physiology

Credits: 3. Contact Hours: Lecture 1, Laboratory 4.

Prereq: KIN 3580

Application and use of laboratory research equipment in exercise physiology, including operation, calibration, and use in selected situations.

KIN 5100: Advanced Medical Aspects of Exercise

Credits: 2. Contact Hours: Lecture 2.

The role of exercise in preventive medicine. Impact of exercise on various diseases, and the effect of various medical conditions on the ability to participate in vigorous exercise and competitive sports. Principles of exercise testing and prescription for individuals with these conditions.

KIN 5110: Physical Activity Strategies for Youth

Credits: 3. Contact Hours: Lecture 3.

Provide adequate opportunities to develop a more in-depth understanding of (a) the challenges in youth physical activity (PA), (b) the relevant theoretical models that are popular in youth PA, (c) the strategies that can be implemented to promote PA in youth.

KIN 5120: Movement Education in Elementary School Physical Education

Credits: 3.

Planning for management and instruction of developmentally appropriate physical education for children pre-school through grade six. Laboratory experience required. Emphasis on evaluating published research on physical education and school-wide physical activity. (Typically Offered: Fall)

KIN 5150: Injury Biomechanics

Credits: 3. Contact Hours: Lecture 3.

Prereq: KIN 3550 or Permission of Instructor

Utilization of biomechanical principles to model injury mechanisms. Introduction to tissue mechanics of bone, articular cartilage, ligament, tendon, muscle, and nerve. Biomechanics of lower extremity, upper extremity, and head/neck/trunk injuries. Offered odd-numbered years. (Typically Offered: Fall)

KIN 5160: Quantitative Analysis of Human Movement

Credits: 3. Contact Hours: Lecture 3, Laboratory 1.

Prereq: KIN 3550

Application of the principles of mechanics to the analysis of human motion. Investigation of the effects of kinematics and kinetics on the human body with special emphasis on exercise and sport applications. Includes consideration of two-dimensional and three-dimensional imaging techniques and force measurements.

KIN 5170: Musculoskeletal Modeling

Credits: 3. Contact Hours: Lecture 3.

Prereq: KIN 3550 or Permission of Instructor

Systematic problem-solving approaches and design of computer programs for biomechanical analyses. Estimation of anthropometric parameters and mechanical properties of muscles, bones, and joints. Integration of anthropometrics, kinematics, EMG, and muscle mechanics into simulations of human movement. Offered even-numbered years. (Typically Offered: Fall)

KIN 5180: Student Teaching in Elementary Physical Education

Credits: 8.

Prereq: KIN 5120, KIN 5700, KIN 5750

Student teaching for 8 weeks in an elementary school. (Typically Offered: Fall, Spring)

KIN 5190: Student Teaching in Secondary Physical Education

Credits: 8.

Prereq: KIN 5120, KIN 5700, KIN 5750

Student teaching for 8 weeks in a middle or high school. (Typically Offered: Fall, Spring)

KIN 5210: Advanced Topics in Exercise and Sport Psychology

Credits: 3. Contact Hours: Lecture 3.

Prereq: KIN 3650 or KIN 3660, 3 courses in psychology; open to Kin majors only

Aspects of psychology which form a basis for understanding and explaining behavior in the context of exercise and sport. Emphasis on evaluating published research, particularly theory and research methodology. Student presentations.

KIN 5490: Advanced Vertebrate Physiology I

(Cross-listed with ANS 5490/ NUTRS 5490).

Credits: 4. Contact Hours: Lecture 4.

Overview of mammalian physiology. Cell biology, endocrinology, cardiovascular, respiratory, immune, digestive, skeletal muscle and reproductive systems. (Typically Offered: Fall)

KIN 5500: Advanced Physiology of Exercise I

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: KIN 5050

Analysis of factors affecting work capacity and performance. Concepts and measurement of human energy metabolism and bioenergetic adaptations to training.

KIN 5510: Advanced Physiology of Exercise II

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: KIN 5050

Analysis of factors affecting cardiovascular and respiratory function in response to multiple stressors including exercise. Influence of environment will also be discussed.

KIN 5600: Principles of Neuromotor Control and Learning

Credits: 3. Contact Hours: Laboratory 3, Lecture 2.

Prereq: KIN 3720

Theoretical perspectives of neuromotor control and learning will be examined as well as factors that facilitate motor learning. Neuromotor control and learning will also be addressed by studying functional tasks such as reach-to-grasp and locomotion.

KIN 5610: Motor Development and Physical Activity

Credits: 2-3. Contact Hours: Lecture 2.

Prereq: PSYCH 2300

Addresses theories and underlying mechanisms of motor development and motor control applied to typically and atypically developing children. Developmental control of balance, locomotion, reach-to-grasp, and other functional skills will be discussed, as will the role of physical activity in a child's life.

KIN 5670: Exercise and Health: Behavior Change

(Dual-listed with KIN 4670).

Credits: 3. Contact Hours: Lecture 3.

Prereq: KIN 3660 or Permission of Instructor

Advanced analysis of theoretical health behavior models and their application to physical activity behavior. Includes practical techniques, tools and interventions (e.g., counseling skills, motivational interviewing) to enhance exercise prescription and motivation, and considerations for working with special populations. (Typically Offered: Fall, Spring)

KIN 5700: Physical Activity Assessment for Health Related Research

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

This course will cover the broad scope of research in physical activity and public health. Emphasis will be placed on the application of physical activity assessment techniques since accurate measures are needed to more accurately assess the health benefits from physical activity and to evaluate the effectiveness of behavioral interventions designed to promote physical activity.

KIN 5710: Measurement in Physical Education

(Dual-listed with KIN 4710).

Credits: 3. Contact Hours: Lecture 3.

Current theory, practice and research on measurement and evaluation in physical education and youth physical activity settings. Statistics, grading, and specific assessments including fitness, motor skill, sport skill, physical activity, affective, and cognitive testing will be addressed. Graduation Restriction: KIN 5710 may not be taken by students who previously earned credit in KIN 4710. (Typically Offered: Spring)

KIN 5720: Neural Basis of Human Movement

(Dual-listed with KIN 4720).

Credits: 3. Contact Hours: Lecture 3.

Prereq: KIN 3720 or PSYCH 3100

Addresses the role of the central nervous system in the control of voluntary human movement, with the focus on the cerebral cortex, basal ganglia and cerebellum. Content organized around specific nervous system damage (such as stroke, apraxia, spasticity, or spinal cord damage) and functional movements (such as reaching and grasping, balance and gait). Converging evidence from human movement disorders, brain imaging, animal lesion and single cell studies provide the primary basis for the content. (Typically Offered: Fall, Spring)

KIN 5730X: Impact of Physical Activity on Healthy Aging

Credits: 3. Contact Hours: Lecture 3.

Issues of aging from multiple kinesiological perspectives, such as the role of physical activity on brain health, on muscle health, on bone health, and on emotional health. Presentation of research article by students, and discussion; or research articles. Guest professors will present within their area of expertise and lead the discussions. Each student will complete a major writing assignment and verbal presentation in which a review of literature on a related topic will be presented. Offered odd-numbered years. (Typically Offered: Fall)

KIN 5750: Physical Education Curriculum Design and Program Organization

(Dual-listed with KIN 4750).

Credits: 3. Contact Hours: Lecture 3.

Prereq: KIN 2800; KIN 2810; Admission to Educator Preparation Program

Current theory, practices and principles applied to curriculum development for programs in physical education, K-12. Organizing for teaching in a variety of school settings. (Typically Offered: Fall)

KIN 5900A: Special Topics: Physical Education

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

KIN 5900B: Special Topics: Health and Exercise Promotion

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

KIN 5900D: Special Topics: Exercise Physiology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

KIN 5900E: Special Topics: Sport Sociology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

KIN 5900F: Special Topics: Sport/Exercise Psychology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

KIN 5900G: Special Topics: Motor Behavior

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

KIN 5900H: Special Topics: Biomechanics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

KIN 5900I: Special Topics: Research Ethics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

KIN 5910A: Supervised Field Experience: Physical Education

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

Supervised on-the-job field experience in special areas. (Typically Offered: Fall, Spring, Summer)

KIN 5910B: Supervised Field Experience: Health and Exercise Promotion

Credits: 1-6. Repeatable.

Supervised on-the-job field experience in special areas.

KIN 5910D: Supervised Field Experience: Exercise Physiology

Credits: 1-6. Repeatable.

Supervised on-the-job field experience in special areas.

KIN 5920: Practicum in College Teaching

Credits: 1-3. Repeatable, maximum of 3 credits.

Prereq: Instructor Permission for Course

Supervised experience with teaching an upper division, classroom-based course. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

KIN 5950: Adapted Physical Education

(Dual-listed with KIN 3950).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Junior classification or above

Etiology, characteristics, needs, and movement experiences for individuals with disabilities. Designed to provide appropriate methods of physical education instruction for students including those with disabilities as identified by the Individuals with Disabilities Education Act and students who are talented and gifted. Assessments and strategies to differentiate instruction and to adapt activities for all exceptional learners will be addressed. Laboratory experience required. Graduation Restriction: KIN 5950 may not be taken by students who previously earned credit in KIN 3950. (Typically Offered: Fall)

KIN 5990: Creative Component

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**KIN 6150: Seminar**

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring, Summer)

KIN 6200: Advance Research Methods in Physical Activity

Credits: 3. Contact Hours: Lecture 3.

Prereq: KIN 5010, STAT 4020 and STAT 5870. Doctoral students only

Culminating seminar designed to synthesize statistical and design courses with practical research issues using data from physical activity. (Typically Offered: Spring)

KIN 6610: Advanced Topics in Neuroscience

(Cross-listed with BBMB 6610/ GDCB 6610/ NEURO 6610).

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: NEURO 5560 (or comparable course) or permission of instructor

Students will present three journal articles and two overview lectures on topics in neuroscience that are related but outside of their own research interest. Offered even-numbered years. (Typically Offered: Spring)

KIN 6700: Molecular Biology of Muscle

(Cross-listed with ANS 6700).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BBMB 4050, BBMB 4200

Ultrastructure of muscle; chemistry, structure, function, and molecular biology of muscle proteins. Molecular aspects of muscle contraction, development and turnover. Cytoskeletal proteins and dynamics. Offered odd-numbered years. (Typically Offered: Spring)

KIN 6990: Research

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Landscape Architecture (LA)

Courses primarily for undergraduates:**LA 1710: City Play!**

Credits: 3. Contact Hours: Lecture 3.

Exploration of play in cities. Introduction to two important concepts: how play has become a central theme in the economic development and sustainability of cities around the world; and, how the design of cities needs to make room for equitable access to play for everyone.

LA 2010: Studio: Landscape Interpretation and Representation

Credits: 6. Contact Hours: Studio 12.

Prereq: Landscape Architecture professional program

Reading and representing varied landscapes; development of aesthetic sensitivity to the geomorphology, vegetation, and cultural influences on these landscapes. Small-scale interventions and exploration of landscape phenomena and change. Emphasis on a variety of documentation and drawing techniques. (Typically Offered: Fall)

LA 2020: Studio: Site Design I

Credits: 6. Contact Hours: Studio 12.

Prereq: LA 2010

Fundamental issues of landscape planning and design at a site scale. Projects introduce a variety of (objective and subjective) site inquiry methods, space and place making, and sensitive integration of architecture and landscape for specific land uses. User needs, precedent study, programming, site engineering, planting design, and outdoor space design expressed through a variety of three-dimensional modeling, graphic, and written media. (Typically Offered: Spring)

LA 2110: Digital Design Methods for Landscape Architecture

(Cross-listed with CRP 2110).

Credits: 3. Contact Hours: Lecture 3.

Foundational knowledge and basic skills in 2D, 3D, and 4D computer applications used for design development and communication, with emphasis on 3D modeling and workflow interoperability. (Typically Offered: Spring)

LA 2210: Native Plants of the Savanna Ecotone

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: Landscape Architecture professional program

Observation and study of the wetland, prairie, and woodland vegetation native to the savanna ecotone. Emphasis on plant communities, their distribution, structure, habitat and aesthetics. Plant identification and use in landscape design. Precedent and case studies of vegetation preservation, restoration and use in built works. (Typically Offered: Fall)

LA 2220: Introduced Plants of the Midwest

Credits: 3. Contact Hours: Lecture 2, Studio 3.

Prereq: LA 2210

Identification, observation, and study of plants introduced to cultivation in the Midwest region. Plant cultural requirements, including adaptations to climate changes, solar exposure, and soil conditions. Investigation of history of plant introduction and use in designed landscape, including consequent impacts of plant introduction such as plant invasion. Introduction to planting design at the site scale, including matching plant cultural requirements to site conditions, functional uses of plants and expressive composition using plant form, texture and color. (Typically Offered: Spring)

LA 2410: Developing Identity as a Landscape Architect

Credits: 1. Contact Hours: Lecture 1.

Prereq: Landscape Architecture professional program

Development of life skills for conflict resolution, effective interpersonal communication, and CPR/First Aid. Examination of personal values as they relate to the backgrounds, abilities, attitudes, and values of others; exploration of how these influence personal decision-making and group interaction. Reading, discussion, class activities, journal-keeping, writing. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

LA 2700: Foundations in Natural Resource Policy and History

(Cross-listed with ENVS 2700/ NREM 2700).

Credits: 3. Contact Hours: Lecture 3.

The development of natural resource conservation philosophy and policy from the Colonial Era to the present. North American wildlife, forestry, and environmental policy; national parks and other protected lands; federal and state agencies. Relationship to cultural contexts, including urban reform and American planning movement. Discussion of common pool resources, public and private lands. (Typically Offered: Fall)

LA 2720: Landscape Studies

Credits: 3. Contact Hours: Lecture 3.

Prereq: Landscape Architecture professional program

Exploration of landscapes, from broad settlement patterns to individual sites. Investigation of relationships between vernacular and designed landscapes. Landscapes considered as modes of cultural production that shape and are shaped by social, political, and economic processes. Lectures, reading, field studies, and writing. Meets U.S. Diversity Requirement. (Typically Offered: Fall)

LA 2740: The Social and Behavioral Landscape

Credits: 3. Contact Hours: Lecture 3.

Exploration of social and behavioral factors pertinent to design of the domestic, civic, and commercial landscape. Focus on working familiarity with design principles as they relate to the behavior and activities of people across a broad demographic and cultural spectrum; application of these principles to design of outdoor environments. Lectures and discussions, including group exercises and field trips. Meets U.S. Diversity Requirement. (Typically Offered: Spring)

LA 2810: Investigating Landscape Form, Process, and Detail

Credits: 3. Contact Hours: Lecture 1, Laboratory 6.

Prereq: Landscape Architecture professional program

Exploration of the poetics and principles of landscape construction. Investigation and interpretation of landform and geomorphic processes such as the hydrologic cycle, erosion, and sedimentation. Close observation and representation of detail design, with an emphasis on material types, their connections, and weathering. Readings, field studies, and drawings in analog and digital media. (Typically Offered: Fall)

LA 2820: Landscape Dynamics

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Sophomore classification

Understand design implications presented by geotechnical and ecological processes in the landscape including ecology, vegetation, soils and water. Understand the influence of landforms, geology, plants, soils, and water on the creation of landscape designs. Course relates current issues including water quality impairment, erosion, and invasive species with design strategies such as stormwater management, soil quality management, and plant community restoration. Field trips. (Typically Offered: Spring)

LA 3010: Site Design II

Credits: 6. Contact Hours: Studio 12.

Prereq: LA 2020

Development of half-acre to hundred-acre landscape design and planning proposals, potentially in collaboration with students in other programs. Apply critical methodological frameworks to shape site systems while providing appropriate support for diverse user groups and creating culturally meaningful places. Assess and interpret a program of use, organize subjective and objective site inventory and analysis, develop functional and poetic design strategies for infrastructure and natural systems, and craft artistic and functionally explicit landscape architectural proposals. Development of appropriate technique and high level of craft in representations to support design thinking process and final scheme presentation. (Typically Offered: Fall)

LA 3020: Ecological Design

Credits: 6. Contact Hours: Studio 12.

Prereq: LA 2820, LA 3010, LA 3810 and NREM 1200

Exploration and application of ecological theories and processes in design and planning to include hundred plus-acre scale in urban, urban fringe, and rural landscapes. Apply advanced landscape analysis of soil, water, topography, and vegetation utilizing geographic information systems with an emphasis on inventory and analysis mapping. (Typically Offered: Spring)

LA 3090: Field Travel

Credits: 1-2. Repeatable, maximum of 2 times.

Prereq: Landscape Architecture professional program

Observation of and reflection on professional practice and landscapes in urban, rural, and wilderness areas. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

LA 3220: Fundamentals of Planting Design

Credits: 3.

Prereq: LA 2020

The art and techniques of creating plant compositions in the landscape that respond to cultural and biophysical contexts. Investigation of soil properties and plant/soil relationships relevant to the built environment. Methods of site inventory and analysis, developing plant palettes and composing plant assemblages that address expressive and functional needs. Introduction to the techniques of preparing planting plans, including standards for plant selection, plant lists and plant specification.

LA 3410: Contemporary Landscape Architecture

Credits: 1. Contact Hours: Lecture 1.

Prereq: LA 3010, LA 3810 and NREM 1200

Exploration of contemporary landscape architectural practice through individualized research into practicing firms. Preparation of paper and presentation outlining broad framework and specific parameters of a selected area of contemporary practice using specific projects as examples. Work may result in invitation of current practitioner(s) as a lecture series or event. Resume and portfolio preparation in advance of required off-campus semester (LA 4440 A, B or C). (Typically Offered: Spring)

LA 3710: History of Modern Landscapes, 1750 to Present

Credits: 3. Contact Hours: Lecture 3.

Investigation of landscape design concepts and trends as observed over time, from approximately 1750 to the present, with emphasis on the United States and Europe. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers. (Typically Offered: Spring)

LA 3730: Gardens and Landscapes from Antiquity to 1750

Credits: 3. Contact Hours: Lecture 3.

Investigation of international landscape design concepts and trends as observed over time, from pre-history to the mid 18th century. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers. Meets International Perspectives Requirement. (Typically Offered: Fall)

LA 3810: Shaping the Land

Credits: 3. Contact Hours: Laboratory 1, Lecture 2.

Prereq: LA 2820 and (MATH 1430 or MATH 1450 or MATH 1650)

Design of landforms to achieve aesthetic, functional, and safety goals. Landform changes to accommodate human uses and activities. Impacts and implications of landform transformation on the surrounding environment. Surface and subsurface drainage design, storm water runoff best management practices, contour manipulation to incorporate slopes, swales, culverts, pads, retaining walls, walks, steps, terraces, buildings, and other structures in the landscape. Road layout and alignment, parking lot design, and earthwork volume estimates. Design communication using CAD, perspectives, cross-sections, contour maps, landform models, and narratives. Class exercises, case study precedents, and preliminary construction documents. (Typically Offered: Fall)

LA 4010: Community Design

Credits: 6. Contact Hours: Studio 12.

Prereq: LA 4020

Physical planning and design of places utilizing community-based methods. Projects address social and cultural dimensions of placemaking such as reuse of abandoned sites, in-fill development, and community visioning. Emphasis on development of user-client relationship skills and design research. Integrated seminar component. (Typically Offered: Fall)

LA 4010H: Community Design: Honors

Credits: 7. Contact Hours: Studio 12.

Prereq: LA 4020

Physical planning and design of places utilizing community-based methods. Projects address social and cultural dimensions of placemaking such as reuse of abandoned sites, in-fill development, and community visioning. Emphasis on development of user-client relationship skills and design research. Integrated seminar component. (Typically Offered: Fall)

LA 4020: Urban Design

Credits: 6. Contact Hours: Studio 12.

Prereq: LA 3020

Comprehensive planning and design for urban sites or for sites within urban contexts. Projects typically include planning for a variety of integrated land uses, and cover the full range of design scales from master planning to proposals for site details. Emphasis on written and verbal as well as graphic communications. Integrated seminar component. (Typically Offered: Fall)

LA 4020H: Urban Design: Honors

Credits: 7. Contact Hours: Studio 12.

Repeatable.

Prereq: LA 3020

Comprehensive planning and design for urban sites or for sites within urban contexts. Projects typically include planning for a variety of integrated land uses, and cover the full range of design scales from master planning to proposals for site details. Emphasis on written and verbal as well as graphic communications. Integrated seminar component. (Typically Offered: Fall)

LA 4030H: Senior Thesis Preparation Tutorial

Credits: 2.

Prereq: LA 4020 or LA 4020H; permission of thesis advisor; enrollment in Honors Program

Preparation for senior thesis. (Typically Offered: Fall)

LA 4040: Advanced Landscape Architectural Design

Credits: 6. Contact Hours: Studio 12.

Repeatable, maximum of 2 times.

Prereq: LA 4020

Advanced forum for the demonstration of sophistication in landscape architectural design. Experimentation and innovation are encouraged. (Typically Offered: Fall)

LA 4040H: Advanced Landscape Architectural Design: Honors

Credits: 6-7. Contact Hours: Studio 12.

Repeatable, maximum of 2 times.

Prereq: LA 4020

Advanced forum for the demonstration of sophistication in landscape architectural design. Experimentation and innovation are encouraged. (Typically Offered: Fall)

LA 4050H: Senior Thesis

Credits: 6. Contact Hours: Studio 15.

Prereq: LA 4010; LA 4020; LA 4030; Department Permission; Enrollment in Honors Program

Individual advanced forum for the demonstration of sophistication in landscape architectural design. Experimentation and innovation are expected.

LA 4420: Professional Practice

(Dual-listed with LA 5420).

Credits: 2. Contact Hours: Lecture 2.

Prereq: LA 4810

Studies of conventional and developing forms of public and private practice. Explore relationships between professional life and the culture of the professional design firm; investigate firm identities and structures; understand design projects, their delivery process, and contractual agreements. Lecture and class discussion. (Typically Offered: Spring)

LA 4440A: Landscape Architecture Independent Educational Enrichment: Professional Internship

Credits: Required. Repeatable, maximum of 3 times.

Prereq: LA 3410 or Permission of Advisor and Chair

Independent educational enrichment through exploration of landscape architectural practice in a professional internship, international studies, or out-of-region national study experience. (Typically Offered: Fall, Spring, Summer)

LA 4440B: Landscape Architecture Independent Educational Enrichment: Study Abroad

Credits: Required. Repeatable, maximum of 3 times.

Prereq: LA 3410 or Permission of Advisor and Chair

Independent educational enrichment through exploration of landscape architectural practice in a professional internship, international studies, or out-of-region national study experience. (Typically Offered: Fall, Spring, Summer)

LA 4440C: Landscape Architecture Independent Educational Enrichment: National Student Exchange

Credits: Required. Repeatable, maximum of 0 credits.

Prereq: LA 3410 or Permission of Advisor and Chair

Independent educational enrichment through exploration of landscape architectural practice in a professional internship, international studies, or out-of-region national study experience. (Typically Offered: Fall, Spring, Summer)

LA 4540: Fundamentals of Remote Sensing and Spatial Analysis

(Dual-listed with CRP 5540/ LA 5540). (Cross-listed with CRP 4540).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CRP 3510

Introduction to image processing techniques needed for analysis of optical remote sensing imagery, including filtering, enhancement, and classification. Analysis of elevation surfaces, hydrology, distance, overlays and visual programming with Model Builder. Practical applications in a variety of topics to understand how to analyze imagery. (Typically Offered: Spring)

LA 4590: Digital Design Methods for Landscape Architecture

(Dual-listed with LA 5590).

Credits: 3. Contact Hours: Lecture 3.

Introduction to digital tools used by landscape architects for design communication, visualization, and design development, with emphasis on 3D modeling and workflow interoperability. (Typically Offered: Spring)

LA 4780A: Topical Studies in Landscape Architecture: Landscape Design

(Dual-listed with LA 5780A).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Prereq: LA 2020 OR Senior or Graduate classification

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 4780B: Topical Studies in Landscape Architecture: Planting Design

(Dual-listed with LA 5780B).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Prereq: LA 2020 OR Senior or Graduate classification

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 4780C: Topical Studies in Landscape Architecture: Construction

(Dual-listed with LA 5780C).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Prereq: LA 2020 OR Senior or Graduate classification

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 4780D: Topical Studies in Landscape Architecture: History/Theory/ Criticism

(Dual-listed with LA 5780D).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Prereq: LA 2020 OR Senior or Graduate classification

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 4780E: Topical Studies in Landscape Architecture: Landscape Planning

(Dual-listed with LA 5780E).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 credits.

Prereq: LA 2020 OR Senior or Graduate classification

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 4780F: Topical Studies in Landscape Architecture: Urban Design

(Dual-listed with LA 5780F).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Prereq: LA 2020 OR Senior or Graduate classification

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 4780G: Topical Studies in Landscape Architecture: Graphics

(Dual-listed with LA 5780G).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Prereq: LA 2020 OR Senior or Graduate classification

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 4780H: Topical Studies in Landscape Architecture: Honors

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Prereq: LA 2020 OR Senior or Graduate classification

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 4780I: Topical Studies in Landscape Architecture: Interdisciplinary Studies

(Dual-listed with LA 5780I).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Prereq: LA 2020 OR Senior or Graduate classification

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 4780J: Topical Studies in Landscape Architecture: International Studies

(Dual-listed with LA 5780J).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Prereq: LA 2020 OR Senior or Graduate classification

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 4780K: Landscape Architecture: Computer Applications

(Dual-listed with LA 5780K).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable.

Prereq: LA 2020 OR Senior or Graduate classification

Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits. (Typically Offered: Fall, Spring, Summer)

LA 4780L: Topical Studies in Landscape Architecture: Ecological Design

(Dual-listed with LA 5780L).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Prereq: LA 2020 OR Senior or Graduate classification

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 4780M: Topical Studies in Landscape Architecture: Landscape Architecture: Social/Behavioral

(Dual-listed with LA 5780M).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Prereq: LA 2020 OR Senior or Graduate classification

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 4780N: Topical Studies in Landscape Architecture: Natural Resources

(Dual-listed with LA 5780N).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Prereq: LA 2020 OR Senior or Graduate classification

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 4810: Landscape Construction

Credits: 3. Contact Hours: Lecture 3.

Prereq: LA 3810

Development of construction details with an emphasis on the aesthetic and functional use of landscape materials. Explore characteristics, applications, systems, and uses of wood, paving, walls, masonry, concrete, and metals in the landscape. Preliminary preparation of construction documents and design documentation software. (Typically Offered: Fall)

LA 4820: Landscape Construction Documentation

Credits: 3. Contact Hours: Lecture 3.

Prereq: LA 4810

Development of advanced construction documents, including documentation processes, cost estimation, sheet coordination, and specification writing. Emphasis on documentation software as a tool for design communication. (Typically Offered: Spring)

LA 4900A: Independent Study: Landscape Design

Credits: 1-6. Repeatable, maximum of 3 times.

Prereq: Department Permission for Course

Investigation of a topic of special interest to the student. (Typically Offered: Fall, Spring, Summer)

LA 4900B: Independent Study: Planting Design

Credits: 1-6. Repeatable, maximum of 3 times.

Prereq: Department Permission for Course

Investigation of a topic of special interest to the student. (Typically Offered: Fall, Spring, Summer)

LA 4900C: Independent Study: Construction

Credits: 1-6. Repeatable, maximum of 3 times.

Prereq: Department Permission for Course

Investigation of a topic of special interest to the student. (Typically Offered: Fall, Spring, Summer)

LA 4900D: Independent Study: History/Theory/Criticism

Credits: 1-6. Repeatable, maximum of 3 times.

Prereq: Instructor Permission for Course

Investigation of a topic of special interest to the student. (Typically Offered: Fall, Spring, Summer)

LA 4900E: Independent Study: Landscape Planning

Credits: 1-6. Repeatable, maximum of 3 times.

Prereq: Department Permission for Course

Investigation of a topic of special interest to the student. (Typically

Offered: Fall, Spring, Summer)

LA 4900F: Independent Study: Urban Design

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Department Permission for Course

Investigation of a topic of special interest to the student. (Typically

Offered: Fall, Spring, Summer)

LA 4900G: Independent Study: Graphics

Credits: 1-6. Repeatable, maximum of 3 times.

Prereq: Department Permission for Course

Investigation of a topic of special interest to the student. (Typically

Offered: Fall, Spring, Summer)

LA 4900H: Independent Study: Honors

Credits: 1-6. Repeatable, maximum of 3 times.

Prereq: Department Permission for Course

Investigation of a topic of special interest to the student. (Typically

Offered: Fall, Spring, Summer)

LA 4900I: Independent Study: Interdisciplinary Studies

Credits: 1-6. Repeatable, maximum of 3 times.

Prereq: Department Permission for Course

Investigation of a topic of special interest to the student. (Typically

Offered: Fall, Spring, Summer)

LA 4900J: Independent Study: International Studies

Credits: 1-6. Repeatable, maximum of 3 times.

Prereq: Department Permission for Course

Investigation of a topic of special interest to the student. (Typically

Offered: Fall, Spring, Summer)

LA 4900K: Independent Study: Computer Applications

Credits: 1-6. Repeatable, maximum of 3 times.

Prereq: Department Permission for Course

Investigation of a topic of special interest to the student. (Typically

Offered: Fall, Spring, Summer)

LA 4900L: Independent Study: Ecological Design

Credits: 1-6. Repeatable, maximum of 3 times.

Prereq: Department Permission for Course

Investigation of a topic of special interest to the student. (Typically

Offered: Fall, Spring, Summer)

LA 4900M: Independent Study: Social/Behavioral

Credits: 1-6. Repeatable, maximum of 3 times.

Prereq: Department Permission for Course

Investigation of a topic of special interest to the student. (Typically

Offered: Fall, Spring, Summer)

LA 4900N: Independent Study: Natural Resources

Credits: 1-6. Repeatable, maximum of 3 times.

Prereq: Department Permission for Course

Investigation of a topic of special interest to the student. (Typically

Offered: Fall, Spring, Summer)

LA 4910: Environmental Law and Planning

(Cross-listed with ENVS 4910/ CRP 4910).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 credits natural sciences or permission of instructor

Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

(Typically Offered: Spring)

Courses primarily for graduate students, open to qualified undergraduates:

LA 5090: Field Travel

Credits: 1. Repeatable, maximum of 2 times.

Observation of and reflection on professional and academic practice and landscapes. Field study and travel to conferences and educational events. Reading and final report. Offered on a satisfactory-fail basis only.

LA 5220: Advanced Plant Technology

Credits: 3. Contact Hours: Lecture 2, Studio 2.

Introduction to the science that supports green technologies. Plant and soil design for performance in the built environment. Design studies and lab explorations will complement readings, lecture and project case study presentations by practitioners. Green streets, green roofs, bio-phyto-remediation and other technologies are introduced. Final project integrates scientific and technical knowledge in a holistic landscape design. (Typically Offered: Fall)

LA 5410: Design Inquiry

Credits: 3. Contact Hours: Lecture 3.

Examination of design inquiry and introduction to research methods relevant to design. Consideration of where knowledge comes from, and how different research methods help create knowledge in various contexts. Readings, discussions, and sketch problems. Preparation of a written research proposal. (Typically Offered: Spring)

LA 5420: Professional Practice

(Dual-listed with LA 4420).

Credits: 2. Contact Hours: Lecture 2.

Studies of conventional and developing forms of public and private practice. Explore relationships between professional life and the culture of the professional design firm; investigate firm identities and structures; understand design projects, their delivery process, and contractual agreements. Lecture and class discussion. (Typically Offered: Spring)

LA 5430: Colloquium: Landscape Architecture Research

Credits: 1. Contact Hours: Lecture 1.

Forum on current research in landscape architecture. Weekly presentation and discussion of scholarship relevant to the field. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

LA 5450: Colloquium II: Interdisciplinary Research

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Prereq: LA 5430 or graduate classification

Student-run graduate forum on current research in landscape architecture and related disciplines. Weekly presentations by invited faculty from the departments across the College of Design, University, and professional guests. Readings, discussions, and writing. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

LA 5540: Fundamentals of Remote Sensing and Spatial Analysis

(Dual-listed with CRP 4540/ LA 4540). (Cross-listed with CRP 5540).

Credits: 3. Contact Hours: Lecture 3.

Introduction to image processing techniques needed for analysis of optical remote sensing imagery, including filtering, enhancement, and classification. Analysis of elevation surfaces, hydrology, distance, overlays and visual programming with Model Builder. Practical applications in a variety of topics to understand how to analyze imagery. (Typically Offered: Spring)

LA 5570: Landscape Parametrics & Design Coding

Credits: 3. Contact Hours: Lecture 3.

Introduction to parametric landscape design through computer programming of the landscape palette. Terrain, vegetation, water, weather, and lighting effects are modeled and represented algorithmically in Rhino-Grasshopper. Computational thinking, logic, and interactivity are combined to address core design principles. (Typically Offered: Fall)

LA 5580: Web Mapping and Spatial Data Visualization

(Cross-listed with CRP 5580).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Use and development of online mapping tools and coding to support participatory GIS, Volunteered Geographic Information, information sharing, geodesign, and decision-making actions. Geoprocessing, spatial data science, and user interface design. Laboratory emphasis on practical applications and uses of Web GIS.

LA 5590: Digital Design Methods for Landscape Architecture

(Dual-listed with LA 4590).

Credits: 3. Contact Hours: Lecture 3.

Introduction to digital tools used by landscape architects for design communication, visualization, and design development, with emphasis on 3D modeling and workflow interoperability. (Typically Offered: Spring)

LA 5710: Landscape Architectural Theory

Credits: 3. Contact Hours: Lecture 3.

Examination of the development of landscape architectural ideas in their historical contexts and in relation to social and cultural practices. Emphasis on exposure to key modern and contemporary texts and projects in landscape architecture, architecture, art, and related fields. Readings, discussions, and writings. (Typically Offered: Fall)

LA 5780A: Topical Studies in Landscape Architecture: Landscape Design

(Dual-listed with LA 4780A).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 5780B: Topical Studies in Landscape Architecture: Planting Design

(Dual-listed with LA 4780B).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 5780C: Topical Studies in Landscape Architecture: Construction

(Dual-listed with LA 4780C).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 5780D: Topical Studies in Landscape Architecture: History/Theory/Criticism

(Dual-listed with LA 4780D).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 5780E: Topical Studies in Landscape Architecture: Landscape Planning

(Dual-listed with LA 4780E).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 5780F: Topical Studies in Landscape Architecture: Urban Design

(Dual-listed with LA 4780F).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 5780G: Topical Studies in Landscape Architecture: Graphics

(Dual-listed with LA 4780G).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 5780I: Topical Studies in Landscape Architecture: Interdisciplinary Studies

(Dual-listed with LA 4780I).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 5780J: Topical Studies in Landscape Architecture: International Studies

(Dual-listed with LA 4780J).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 5780K: Landscape Architecture: Computer Applications

(Dual-listed with LA 4780K).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable.

Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits. (Typically Offered: Fall, Spring, Summer)

LA 5780L: Topical Studies in Landscape Architecture: Ecological Design

(Dual-listed with LA 4780L).

Credits: 2-3. Contact Hours: Lecture 6.

Repeatable, maximum of 3 times.

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 5780M: Topical Studies in Landscape Architecture: Landscape Architecture: Social/Behavioral

(Dual-listed with LA 4780M).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 5780N: Topical Studies in Landscape Architecture: Natural Resources

(Dual-listed with LA 4780N).

Credits: 2-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Offerings vary with each term; check with department for available sections. (Typically Offered: Fall, Spring, Summer)

LA 5800: Thesis, Creative Component Tutorial

Credits: 1-4. Repeatable, maximum of 4 credits.

Prereq: Instructor Permission for Course

Hands-on participation in a creative or research activity in the student's area of specialization. Development of a detailed prospectus that defines the thesis or creative component. (Typically Offered: Fall, Spring, Summer)

LA 5830: Landscape TopoGraphics

Credits: 3. Contact Hours: Lecture 3.

Prereq: LA 6020

Design of landforms to achieve aesthetic, functional, and safety goals. Impacts and implications of landform transformation on the surrounding environment. Design communication using CAD, perspectives, cross-sections, contour maps, landform models, and narratives. Class exercises, case study precedents, and preliminary construction documents. (Typically Offered: Fall)

LA 5870: Landscape Construction

Credits: 3. Contact Hours: Lecture 1, Studio 4.

Prereq: LA 5830

Introduction to construction practices in landscape architecture. Emphasis on the aesthetic and functional components of built environments including materials, assemblies, and techniques. Introduction to the preparation of construction documents and design documentation software. (Typically Offered: Spring)

LA 5900A: Special Topics: Landscape Design

Credits: 1-6. Repeatable, maximum of 2 times.

Prereq: Instructor Permission for Course

Investigation of a topic of special interest to the student. (Typically Offered: Fall, Spring, Summer)

LA 5900B: Special Topics: Planting Design

Credits: 1-6. Repeatable, maximum of 2 times.

Prereq: Instructor Permission for Course

Investigation of a topic of special interest to the student. (Typically Offered: Fall, Spring, Summer)

LA 5900C: Special Topics: Construction

Credits: 1-6. Repeatable, maximum of 2 times.

Prereq: Instructor Permission for Course

Investigation of a topic of special interest to the student. (Typically Offered: Fall, Spring, Summer)

LA 5900D: Special Topics: History/Theory/Criticism

Credits: 1-6. Repeatable, maximum of 2 times.

Prereq: Instructor Permission for Course

Investigation of a topic of special interest to the student. (Typically Offered: Fall, Spring, Summer)

LA 5900E: Special Topics: Landscape Planning

Credits: 1-6. Repeatable, maximum of 2 times.

Prereq: Instructor Permission for Course

Investigation of a topic of special interest to the student. (Typically Offered: Fall, Spring, Summer)

LA 5900F: Special Topics: Urban Design

Credits: 1-6. Repeatable, maximum of 2 times.

Prereq: Instructor Permission for Course

Investigation of a topic of special interest to the student. (Typically Offered: Fall, Spring, Summer)

LA 5900G: Special Topics: Graphics

Credits: 1-6. Repeatable, maximum of 2 times.

Prereq: Instructor Permission for Course

Investigation of a topic of special interest to the student. (Typically Offered: Fall, Spring, Summer)

LA 5900I: Special Topics: Interdisciplinary Studies

Credits: 1-6. Repeatable, maximum of 2 times.

Prereq: Instructor Permission for Course

Investigation of a topic of special interest to the student. (Typically Offered: Fall, Spring, Summer)

LA 5900J: Special Topics: International Studies

Credits: 1-6. Repeatable, maximum of 2 times.

Prereq: Instructor Permission for Course

Investigation of a topic of special interest to the student. (Typically Offered: Fall, Spring, Summer)

LA 5900K: Special Topics: Computer Applications

Credits: 1-6. Repeatable, maximum of 2 times.

Prereq: Instructor Permission for Course

Investigation of a topic of special interest to the student. (Typically Offered: Fall, Spring, Summer)

LA 5900L: Special Topics: Ecological Design

Credits: 1-6. Repeatable, maximum of 2 times.

Prereq: Instructor Permission for Course

Investigation of a topic of special interest to the student. (Typically Offered: Fall, Spring, Summer)

LA 5900M: Special Topics: Social/Behavioral

Credits: 1-6. Repeatable, maximum of 2 times.

Prereq: Instructor Permission for Course

Investigation of a topic of special interest to the student. (Typically Offered: Fall, Spring, Summer)

LA 5900N: Special Topics: Natural Resources

Credits: 1-6. Repeatable, maximum of 2 times.

Prereq: Instructor Permission for Course

Investigation of a topic of special interest to the student. (Typically Offered: Fall, Spring, Summer)

LA 5910: Environmental Law and Planning

(Cross-listed with CRP 5910).

Credits: 3. Contact Hours: Lecture 3.

Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs. (Typically Offered: Spring)

LA 5940: Environmental Justice in Built Environments

Credits: 3. Contact Hours: Lecture 3.

Disproportionate environmental exposures threaten sustainable and resilient cities. Focus on cumulative effects of climate change, social exclusion, and physical isolation on vulnerable populations. Empirical research and visual surveys are synthesized into planning and design strategies for human well-being. Mapping in GIS and spatial analysis assess potential urban environmental burdens. (Typically Offered: Spring)

LA 5990: Creative Component

Credits: 1-8. Repeatable, maximum of 8 credits.

Prereq: Instructor Permission for Course

Comprehensive study and original development of a project selected by the student and approved by the major professor. Completed project must be submitted to and approved by a graduate faculty committee as evidence of mastery of the principles of landscape architecture. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**LA 6010: Studio I: Design Representation**

Credits: 6. Contact Hours: Studio 12.

Introduction to the techniques and conventions of landscape architectural design. Emphasis on creative space and place making at the site scale using the landscape palette. Exploration of two- and three-dimensional representation, both digital and analog, as a means of testing design ideas. (Typically Offered: Fall)

LA 6020: Studio II: Land Form and Plant Scape

Credits: 6. Contact Hours: Studio 12.

Prereq: LA 6010

Landscape design integrating knowledge of land patterns, plant ecosystems, and human processes. Project involve landform and plants at varied scale of design. Emphasis on competencies in design based in natural process, human behavior, and representation. (Typically Offered: Spring)

LA 6030: Studio III: Performance Landscapes

Credits: 6. Contact Hours: Studio 12.

Prereq: LA 6020

Theory and methods of landscape design at a variety of scales to achieve desired cultural and biophysical impacts. Development and use of performance metrics drawn from design, humanities, and science. Construction of integrated rhetorical structures of representation and analysis and critical viewpoints to create rigorous design 'arguments' and meaningful, just and vibrant environments. (Typically Offered: Spring)

LA 6040: Studio IV: City Matters

Credits: 6. Contact Hours: Studio 12.

Prereq: LA 6030

Exploration of sociopolitical, ecological, and visual-spatial conditions of the urban environment through design at multiple scales. Focus on urban projects that highlight the complexity of human, ecological, and emerging infrastructural systems. Development of innovative strategies for sustainable, healthy, and just cities. Special attention is paid to new technologies and building material in cities. (Typically Offered: Spring)

LA 6050: Studio V: Land Works/Land Digits

Credits: 6. Contact Hours: Studio 12.

Prereq: LA 6040

Landscape design focusing on broadening the representational palette for landscape architectural concepts applied to complex sites at multiple scales. Emphasis on ideation and technical competency through advanced conceptualization, performance metrics, and skills in design research, digital representation, and teamwork.

LA 6990: Thesis Research

Credits: 1-8. Repeatable, maximum of 8 credits.

Prereq: Instructor Permission for Course

Advanced and original scholarship in a specialized area. Culminates in a thesis document submitted to and approved by a graduate faculty committee as evidence of mastery of research in landscape architecture. (Typically Offered: Fall, Spring, Summer)

Latin (LATIN)

Courses primarily for undergraduates:**LATIN 1010: Elementary Latin I**

Credits: 3. Contact Hours: Lecture 3.

Grammar and vocabulary of classical Latin, within the context of Roman culture; reading knowledge through texts adapted from classical authors. (Typically Offered: Fall)

LATIN 1020: Elementary Latin II

Credits: 3. Contact Hours: Lecture 3.

Grammar and vocabulary of classical Latin, within the context of Roman culture; reading knowledge through texts adapted from classical authors. Meets International Perspectives Requirement. (Typically Offered: Spring)

LATIN 4900: Independent Study

Credits: 1-6. Repeatable, maximum of 9 credits.

Prereq: 9 credits in LATIN; Permission of Department Chair

Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. Graduation Restriction: No more than 9 credits in LATIN 4900 may be counted toward graduation.

Leadership Studies (LDST)

Courses primarily for undergraduates:

LDST 1220: Leading with Purpose

Credits: 1. Contact Hours: Lecture 1.

Designed for emerging student leaders. Basic leadership skills covering personal skills development, goal achievement, values-based behaviors and mission statement development. (Typically Offered: Fall, Spring)

LDST 2700: Campus Leadership Development

Credits: 3. Contact Hours: Lecture 3.

Introduce effective leadership practices for emerging leaders. Engage in experiential campus leadership opportunities. (Typically Offered: Fall, Spring, Summer)

LDST 2900: Independent Study

Credits: 1-3.

Prereq: Instructor Permission for Course

Independent study in leadership studies. Graduation Restriction: No more than 6 credits of LDST 2900 or LDST 4900 may count toward graduation. (Typically Offered: Fall, Spring, Summer)

LDST 2910A: Leading Change: General

Credits: 1-4. Contact Hours: Lecture 4.

Repeatable, maximum of 6 credits.

Understand leading change and analyzing social issues through meaningful experiential learning. (Typically Offered: Fall, Spring, Summer)

LDST 2910B: Leading Change: U.S. Diversity

Credits: 1-4. Contact Hours: Lecture 4.

Repeatable, maximum of 6 credits.

Understand leading change and analyzing social issues through meaningful experiential learning with a U.S. Diversity focus. (Typically Offered: Fall, Spring, Summer)

LDST 2910C: Leading Change: International Perspectives

Credits: 1-4. Contact Hours: Lecture 4.

Repeatable, maximum of 6 credits.

Understand leading change and analyzing social issues through meaningful experiential learning with an international perspectives focus. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

LDST 2930: Special Projects

Credits: 1-3.

Prereq: Instructor Permission for Course

Special projects for the Leadership Studies Program. (Typically Offered: Fall, Spring, Summer)

LDST 3010: Leadership Theory and Practice

Credits: 3. Contact Hours: Lecture 3.

Critical examination of historical and contemporary leadership theory. Apply leadership theory to practice. (Typically Offered: Fall, Spring, Summer)

LDST 3220: Leadership in a Diverse Society

Credits: 3. Contact Hours: Lecture 3.

Experiential opportunity to understand, develop, and apply diversity-informed leadership practices. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring, Summer)

LDST 3330: Women, Gender, and Leadership

(Cross-listed with WGS 3330).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

An intersectional approach to understanding gender and leadership as it relates to women from various races, ethnicities, gender identities, sexual orientations and abilities. Meets U.S. Diversity Requirement.

LDST 3600: Cultural Competency and Global Leadership

Credits: 3. Contact Hours: Lecture 3.

Development of an intercultural mindset and leadership practice in international contexts. An analysis and development of global leadership capacities. Typically Offered: Fall (irregularly), Spring (annually), Summer (annually). Meets International Perspectives Requirement.

LDST 3700: Special Topics

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Seminar on special topics, research, or theory in leadership studies. Students must register for a different topic each time. Offered irregularly. (Typically Offered: Fall, Spring, Summer)

LDST 4220: Leadership Capstone Seminar: Theory to Practice

Credits: 3. Contact Hours: Lecture 3.

Prereq: LDST 3010 or LDST 3220 or Permission of Instructor

Analysis of adaptive leadership theory to inform practice, with emphasis on ethical leadership and creating change. (Typically Offered: Spring)

LDST 4900: Independent Study

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Independent study in leadership studies. Graduation Restriction: No more than 6 credits of LDST 2900 or LDST 4900 may count toward graduation. (Typically Offered: Fall, Spring, Summer)

Learning and Leadership Sciences (LLS)

Courses primarily for undergraduates:

LLS 1120: Foundations of Learning and Productive Team Membership

Credits: 2. Contact Hours: Lecture 2.

Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world. (Typically Offered: Fall)

LLS 1140: Developing Responsible Learners and Effective Leaders

Credits: 2. Contact Hours: Lecture 2.

Prereq: Credit or concurrent enrollment in LLS 1120

Focus on team and community. Application of fundamentals of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders. (Typically Offered: Spring)

LLS 2120: Habits of Mind and Decision-Making in Leadership

Credits: 2. Contact Hours: Lecture 2.

Prereq: Credit or concurrent enrollment in LLS 1140

Application of theories about habits of mind, mindset, and critical thinking to structured cross-disciplinary problem-solving scenarios. Development and utilization of personal and team action plans for specific habits of mind associated with leadership. (Typically Offered: Fall)

LLS 3120: Problem Solving and Action Planning in Leadership

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or concurrent enrollment in LLS 2120

Transfer of theories about learning and leadership to practice. Leading for change. Using knowledge of self and interactive skills to explore interdependence. Development of an action plan that addresses a real-world problem. (Typically Offered: Spring)

LLS 4120: Learning and Leadership in Practice

Credits: 3.

Prereq: Credit or concurrent enrollment in LLS 3120

Teamwork in a practicum to execute a project that will positively change the community. Application of learning and leadership theory: framing a problem, justifying approaches, taking action, getting feedback, and planning new actions. Application to be accompanied by continual reflection and feedback. Development of final portfolio to showcase cumulative leadership growth in the Learning and Leadership Sciences minor. (Typically Offered: Fall)

Liberal Arts and Sciences Cross-Disciplinary Studies (LAS)

Courses primarily for undergraduates:

LAS 1010: Orientation for Open Option and Preprofessional Students

Credits: 1. Contact Hours: Discussion 0.5, Lecture 0.5.

Introduction to all undergraduate colleges. Provides information about university resources and services, assists with a successful academic transition to the university, and helps initiate the process of identifying academic major(s) and eventual career paths. Required of all first-year students in Open Option and Preprofessional Programs. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

LAS 1030A: Frontiers of Research: General

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Introduction to "cutting edge" research activities of faculty members.

Graduation Restriction: A maximum of three total credits of LAS 1030A, 1030B, 1030C, 1030D, 1030E can count for graduation. Offered on a satisfactory-fail basis only.

LAS 1030B: Frontiers of Research: Humanities

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Introduction to "cutting edge" research activities of faculty members.

Graduation Restriction: A maximum of three total credits of LAS 1030A, 1030B, 1030C, 1030D, 1030E can count for graduation. Offered on a satisfactory-fail basis only.

LAS 1030C: Frontiers of Research: Communication

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Introduction to "cutting edge" research activities of faculty members.

Graduation Restriction: A maximum of three total credits of LAS 1030A, 1030B, 1030C, 1030D, 1030E can count for graduation. Offered on a satisfactory-fail basis only.

LAS 1030D: Frontiers of Research: Mathematics and Natural Sciences

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Introduction to "cutting edge" research activities of faculty members.

Graduation Restriction: A maximum of three total credits of LAS 1030A, 1030B, 1030C, 1030D, 1030E can count for graduation. Offered on a satisfactory-fail basis only.

LAS 1030E: Frontiers of Research: Social Sciences

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Introduction to "cutting edge" research activities of faculty members.

Graduation Restriction: A maximum of three total credits of LAS 1030A, 1030B, 1030C, 1030D, 1030E can count for graduation. Offered on a satisfactory-fail basis only.

LAS 1050: BOLD Learning Community Orientation

Credits: 1. Contact Hours: Lecture 1.

Orientation to the university for the 'Bridging Opportunities in Leadership and Diversity' (BOLD) Learning Community students. Support for academic, social, and leadership development. Opportunity to connect with campus and college resources, explore career opportunities and build group identity. Includes regular one to one peer mentoring with multicultural student leaders. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

LAS 1060: BOLD Learning Community Seminar

Credits: 1. Contact Hours: Lecture 1.

Continued exploration of university services, academic, social, and leadership development for BOLD Learning Community students. Individual and group identity development. Includes regular one-on-one peer mentoring with multicultural student leaders and an assessed service-learning component. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

LAS 1250A: Special Topics: General

Credits: 1. Contact Hours: Lecture 1.

Prereq: Freshman Classification

Non-disciplinary-specific special topics. Offered on a satisfactory-fail basis only.

LAS 1250B: Special Topics: Humanities

Credits: 1. Contact Hours: Lecture 1.

Prereq: Freshman Classification

Humanities special topics. Offered on a satisfactory-fail basis only.

LAS 1250C: Special Topics: Communication

Credits: 1. Contact Hours: Lecture 1.

Prereq: Freshman Classification

Communication special topics. Offered on a satisfactory-fail basis only.

LAS 1250D: Special Topics: Mathematics and Natural Sciences

Credits: 1. Contact Hours: Lecture 1.

Prereq: Freshman Classification

Special topics in mathematics and natural sciences. Offered on a satisfactory-fail basis only.

LAS 1250E: Special Topics: Social Sciences

Credits: 1. Contact Hours: Lecture 1.

Prereq: Freshman Classification

Special topics in social science. Offered on a satisfactory-fail basis only.

LAS 1510: Dean's Leadership Seminar I

Credits: 1. Contact Hours: Lecture 1.

Prereq: College Director Permission for Course

Beginning to study leadership through applied examples, including the importance of community, communication, trust, shared responsibility, modeling the way, and inspiring a shared vision. Students will be introduced to campus leadership opportunities. Selection based on application. (Typically Offered: Fall)

LAS 2030: Professional Career Preparation

Credits: 1. Contact Hours: Lecture 1.

Prereq: Sophomore classification

Overview of practical skills such as writing resumes and cover letters, implementing an internship or job search, interviewing, evaluating offers, professional etiquette, and networking. Exploration of resources and online professional tools. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

LAS 2050X: Multicultural Leadership in Practice

Credits: 1.

Second year experience for students in the BOLD learning community to support the diverse representation and retention of undergraduate multicultural students in the College of Liberal Arts and Sciences. Continued discussion on multicultural leadership practice in higher education (i.e., current/historic leaders of color at Iowa State and other higher education institutions). Students are provided with the opportunity to design and execute student-focused campus leadership projects. Includes regular one-on-one and group peer mentoring with multicultural students leaders. (Typically Offered: Fall)

LAS 2060X: Multicultural Leadership and Communication

Credits: 1.

Second year experience for students in the BOLD learning community to support the diverse representation and retention of undergraduate multicultural students in the College of Liberal Arts and Sciences. The course expands on previous BOLD courses by delving into communication through a multicultural leadership perspective. Through a combination of guest lectures, group discussions, and interactive exercises, students will learn how to effectively communicate with and lead individuals from different cultural backgrounds as multicultural leaders themselves, as well as develop strategies for creating inclusive and equitable environments. (Typically Offered: Fall, Spring, Summer)

LAS 2400: Pre-Law Seminar

Credits: 1. Contact Hours: Lecture 1.

Preparation for law school and careers in law. Introduction to the culture of law school, law school application process and admission criteria, strategies for Law School Admissions Test preparation, and how to finance a legal education. Offered on a satisfactory-fail basis only.

LAS 2450: STEM Scholars Seminar

Credits: 1. Contact Hours: Lecture 1.

Introduction to the culture of science at a research university. Concepts and strategies supporting success in science courses and in career pathways in science. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

LAS 2900: Independent Study

Credits: 1-3. Repeatable.

Prereq: College Director Permission for Course

Independent work as appropriate to the student's degree program. Academic work under faculty supervision may include written projects, presentations, reports, and guided readings. (Typically Offered: Fall, Spring, Summer)

LAS 2910A: Service Learning: General

Credits: 1-4. Repeatable, maximum of 6 credits.

Prereq: College Director Permission for Course

Integration of meaningful service work with instruction and reflection. Academic work may include written projects, presentations, reports, and guided readings. (Typically Offered: Fall, Spring, Summer)

LAS 2910B: Service Learning: U.S. Diversity Project

Credits: 1-4. Repeatable, maximum of 6 credits.

Prereq: College Director Permission for Course

Integration of meaningful service work with instruction and reflection with a US Diversity focus. Academic work may include written projects, presentations, reports, and guided readings. (Typically Offered: Fall, Spring, Summer)

LAS 2910C: Service Learning: International Perspectives Project

Credits: 1-4. Repeatable, maximum of 6 credits.

Prereq: College Director Permission for Course

Integration of meaningful service work with instruction and reflection with an International Perspectives focus. Academic work may include written projects, presentations, reports, and guided readings. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

LAS 2930A: Special Projects: LAS Ambassadors

Credits: 1-3. Repeatable.

Prereq: College Director Permission for Course

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

LAS 2930B: Special Projects: Advising Project

Credits: 1-3. Repeatable.

Prereq: College Director Permission for Course

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

LAS 2930C: Special Projects: Career Services

Credits: 1-3. Repeatable.

Prereq: College Director Permission for Course

Special Project supervised by LAS Career Services. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

LAS 2930D: Special Projects: General

Credits: 1-3. Repeatable.

Prereq: College Director Permission for Course

Special project supervised by the College of Liberal Arts and Sciences. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

LAS 2980: Internship/Co-op

Credits: Required. Repeatable, maximum of 2 times.

Students participating in an internship or co-op on a full-time or part-time basis must register for this course prior to beginning their work experience to remain in student status. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

LAS 3450: Innovation and Entrepreneurship I

Credits: 1. Contact Hours: Lecture 1.

Prereq: College Director Permission for Course

Introduction to the entrepreneurial mindset and key concepts related to innovation and entrepreneurship. Application of principles through case studies, group work and direct mentoring. Opportunities for experiential learning with LAS mentors, entrepreneurs, and alumni. (Typically Offered: Fall)

LAS 3460: Innovation and Entrepreneurship II

Credits: 1. Contact Hours: Lecture 1.

Prereq: LAS 3450; College Permission

Exploration of key concepts related to innovation and entrepreneurship. Application of principles through case studies, group work and direct mentoring. Opportunities for experiential learning with LAS mentors, entrepreneurs, and alumni. (Typically Offered: Spring)

LAS 3500A: Topics in Interdisciplinary Studies: Interdisciplinary

Credits: 2-4. Contact Hours: Lecture 4.

Repeatable, maximum of 8 credits.

LAS 3500B: Topics in Interdisciplinary Studies: Humanities

Credits: 2-4. Contact Hours: Lecture 4.

Repeatable, maximum of 8 credits.

LAS 3500C: Topics in Interdisciplinary Studies: Mathematics and Natural Science

Credits: 2-4. Contact Hours: Lecture 4.

Repeatable, maximum of 8 credits.

LAS 3500D: Topics in Interdisciplinary Studies: Social Sciences

Credits: 2-4. Contact Hours: Lecture 4.

Repeatable, maximum of 8 credits.

LAS 3990: Undergraduate Research

Credits: Required. Repeatable.

Prereq: College Director Permission for Course

Supervised research. (Typically Offered: Fall, Spring, Summer)

LAS 4900A: Independent Study: General

Credits: 1-30. Repeatable, maximum of 9 credits.

Prereq: College Director Permission for Course

Independent work as appropriate to the student's degree program.

Academic work under supervision; may include written projects,

presentations, reports, and guided readings. Graduation Restriction:

No more than 9 credits of LAS 4900 may be applied toward graduation.

(Typically Offered: Fall, Spring, Summer)

LAS 4900E: Independent Study: Entrepreneurship

Credits: 1-30. Repeatable, maximum of 9 credits.

Prereq: College Director Permission for Course

Independent work as appropriate to the student's degree program.

Academic work under supervision; may include written projects,

presentations, reports, and guided readings. This section intended for

students in the Entrepreneurship Minor. Graduation Restriction: No more

than 9 credits of LAS 4900 may be applied toward graduation. (Typically

Offered: Fall, Spring, Summer)

LAS 4910A: Advanced Service Learning: General

Credits: 1-4.

Prereq: College Director Permission for Course

Integration of meaningful service work with advanced instruction and

reflection. Academic work may include written projects, presentations,

reports, and guided readings. (Typically Offered: Fall, Spring, Summer)

LAS 4910B: Advanced Service Learning: U.S. Diversity Project

Credits: 1-4.

Prereq: College Director Permission for Course

Integration of meaningful service work with advanced instruction and

reflection with a U.S. Diversity focus. Academic work may include written

projects, presentations, reports, and guided readings. (Typically Offered:

Fall, Spring, Summer)

LAS 4910C: Advanced Service Learning: International Perspectives Project

Credits: 1-4.

Prereq: College Director Permission for Course

Integration of meaningful service work with advanced instruction and

reflection with an International Perspectives focus. Academic work may

include written projects, presentations, reports, and guided readings.

Meets International Perspectives Requirement. (Typically Offered: Fall,

Spring, Summer)

LAS 4980: Internship/Co-op

Credits: Required. Repeatable, maximum of 2 times.

Students participating in an internship or co-op on a full-time or part-

time basis must register for this course prior to beginning their work

experience to remain in student status. Offered on a satisfactory-fail

basis only. (Typically Offered: Fall, Spring, Summer)

LAS 4990: Internship

Credits: 1-4. Repeatable.

Semester-long internship appropriate to the student's degree program.

Must include an academic component under faculty supervision such

as written projects, reports, and guided reading. Students must register

for this course prior to beginning their internship. (Typically Offered: Fall,

Spring, Summer)

Library (LIB)

Courses primarily for undergraduates:

LIB 1600: Introduction to College Level Research

Credits: 1. Contact Hours: Lecture 1.

Eight-week course required for undergraduate degree. Provides a

foundation for college level research. Students will develop the critical

thinking skills necessary to successfully navigate the research process:

developing a research question, searching strategically, evaluating

sources, and using information ethically. To be taken as early as possible

in the student's undergraduate career. See course descriptions of

ENGL 1500 and ENGL 2500 for requirements related to LIB 1600. Offered

on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Linguistics (LING)

Courses primarily for undergraduates:

LING 1010: Introduction to the Study of Linguistics

Credits: 1. Contact Hours: Lecture 1.

Cross-disciplinary perspectives on the study of linguistics. Applications of linguistics to real world problems. Careers in linguistics. (Typically Offered: Spring)

LING 1190: Introduction to World Languages

(Cross-listed with WLC 1190).

Credits: 3. Contact Hours: Lecture 3.

Study of language diversity and the personal, social and political effects of diversity. Language families, attitudes toward language and language use, language and culture, multilingualism, foreign language learning, written codes, official languages, and language policy. Meets International Perspectives Requirement.

LING 1200: Computers and Language

(Cross-listed with ENGL 1200).

Credits: 3. Contact Hours: Lecture 3.

Introduction to the use of linguistic knowledge in computer applications today and the basic computational techniques used in such applications. The development of these techniques throughout the history of computational linguistics. How the study of language has contributed to the advancement of technology and how certain computational problems have influenced the way linguists study language.

LING 2070: Introduction to Symbolic Logic

(Cross-listed with PHIL 2070).

Credits: 3. Contact Hours: Lecture 3.

Introduction to fundamental logical concepts and logical symbolism. Development of natural deduction through first order predicate logic with identity. Applications to arguments in ordinary English and to philosophical issues. Linguistics majors should take LING/PHIL 2070 as early as possible. (Typically Offered: Fall, Spring)

LING 2190: Introduction to Linguistics

(Cross-listed with ENGL 2190).

Credits: 3. Contact Hours: Lecture 3.

Introduction to linguistic concepts and principles of linguistic analysis with English as the primary source of data. Sound and writing systems, sentence structure, vocabulary, and meaning. Issues in the study of usage, regional and social dialects, language acquisition, and language change. (Typically Offered: Fall, Spring)

LING 2200: Descriptive English Grammar

(Cross-listed with ENGL 2200).

Credits: 3. Contact Hours: Lecture 3.

Overview of grammatical structures and functions. Parts of speech; phrase, clause, and sentence structure; sentence types and sentence analysis; rhetorical grammar and sentence style; terminology. Not a remedial, English composition, or ESL course. (Typically Offered: Fall, Spring)

LING 3090: Introduction to Culture and Language

(Cross-listed with ANTHR 3090).

Credits: 3. Contact Hours: Lecture 3.

Introduction to study of language, culture and society from an anthropological perspective. Focus on language and thought, ethnography of speaking, discourse and narrative, writing and literacy, and media communication. Discussion of key theories and methods of linguistic anthropology. ANTHR 2010 recommended. Meets International Perspectives Requirement.

LING 3180: Introduction to ESL methods and materials

(Cross-listed with ENGL 3180).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2190 or LING 2190

Introduction to methods and materials for teaching English as a Second Language (ESL) for elementary and secondary students. Strategies and resources for teaching reading, writing, speaking and listening skills. Elementary Education students must take this course in the same semester as either EDUC 2800S or EDUC 4800S. (Typically Offered: Fall)

LING 3190: Studies in Language and Diversity

(Cross-listed with ENGL 3190).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Prereq: ENGL 2500

Special topics related to the role of language and linguistics in US diversity, such as Dialects and American literature, American English Accents, Legal and Social Aspects of English-only Laws in the US. Connections between language use and social diversity. (Typically Offered: Fall)

LING 3200: Topics in Linguistic Structure

(Cross-listed with ENGL 3200).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Prereq: ENGL 2190/LING 2190 or ENGL 2200/LING 2200

Special topics related to the study of linguistic structure. Focus on language structure in areas not covered in detail by existing courses. Topics include field linguistics, morphology, forensic linguistics, neurolinguistics, semantics, non-English phonology, acoustic phonetics, linguistic universals, and historical linguistics. (Typically Offered: Spring)

LING 3220: Language and Society

(Cross-listed with ENGL 3220).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2190 or LING 2190

Introduction to variation in language use in society. Survey of factors affecting language use, including background characteristics of language users, location, and purpose of interaction in addition to institutional, state, and national language policies. (Typically Offered: Spring)

LING 3240: Introduction to Teaching ESL Literacy

(Cross-listed with ENGL 3240).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2190 or LING 2190

Introduction to the issues and methods involved in teaching literacy skills to English as a second language (ESL) learners. The nature of literacy and materials and methods for developing ESL literacy at the middle school, high school, and adult ages across multiple levels of competency. (Typically Offered: Fall)

LING 3250: Teaching Methods for ESL Learners: Oral Communication Skills

(Cross-listed with ENGL 3250).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2190 or LING 2190

Issues and methods in teaching oral communication skills (listening, speaking, pronunciation) to English as a second language (ESL) learners. The nature of oral language ability. Materials and Methods for developing oral communication skills at middle school, high school, and adult contexts. (Typically Offered: Spring)

LING 3310: Theory of Computing

(Cross-listed with COMS 3310).

Credits: 3. Contact Hours: Lecture 3, Discussion 1.

Prereq: Minimum of C- in (COMS 2280; MATH 1660; ENGL 2500); (COMS 2300 or CPRE 3100)

Models of computation: finite state automata, pushdown automata and Turing machines. Study of grammars and their relation to automata. Limits of digital computation, unsolvability and Church-Turing thesis. Relations between classes of languages. (Typically Offered: Fall, Spring)

LING 3510: Introduction to Spanish-English Translation

(Cross-listed with SPAN 3510/ USLS 3510).

Credits: 3. Contact Hours: Lecture 3.

Prereq: SPAN 3030A or SPAN 3030B or SPAN 3040

Introduction to the theory, methods, techniques, and problems of translation. Consideration of material from business, literature, and the social sciences. Taught in Spanish. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

LING 3520: Spanish Pronunciation

(Cross-listed with SPAN 3520).

Credits: 3. Contact Hours: Lecture 3.

Prereq: SPAN 3030A or SPAN 3030B or SPAN 3040

An introductory study of the articulation, classification, distribution, and regional variations of the sounds of the Spanish language. Taught in Spanish. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

LING 3540: Introduction to Spanish-English Interpretation

(Dual-listed with SPAN 5540/ LING 5540). (Cross-listed with SPAN 3540).

Credits: 3. Contact Hours: Lecture 3.

Prereq: SPAN 3510

Introduction to the theory, methods, techniques, and problems of consecutive and simultaneous interpretation. Consideration of material from business, agriculture, law, design, medicine, literature, advertisement, and sports. Taught in Spanish. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

LING 3710: Phonetics and Phonology

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2190

Terminology, theory, research, and applications of the science of the sounds of spoken language. Emphasis on American English and International Phonetic Alphabet.

LING 3950: Study Abroad

Credits: 3. Repeatable, maximum of 2 times.

Instruction in issues of language policy, practice and learning.

Observation and experience with language use outside of the United States. Meets International Perspectives Requirement.

LING 4100: Language as Data

(Cross-listed with ENGL 4100).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior standing

Methods of discovering language patterns in text documents solve practical text analysis problems in the disciplines. Fundamentals of linguistics and its role in text analysis. Practice writing R scripts to perform text analysis and visualize textual data. (Typically Offered: Spring)

LING 4130: Psychology of Language

(Cross-listed with PSYCH 4130).

Credits: 3. Contact Hours: Lecture 3.

Prereq: PSYCH 1010

Introduction to psycholinguistics. Topics may include origin of language, speech perception, language comprehension, reading, bilingualism, brain bases of language, and computational modeling of language processes. (Typically Offered: Spring)

LING 4200: History of the English Language

(Cross-listed with ENGL 4200).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2190/LING 2190 or ENGL 2200/LING 2200

Comparison of English to other languages by family background and by type. Analysis of representative Old, Middle, Early Modern and present-day English texts, including both literary works and non-literary documents. (Typically Offered: Fall, Spring)

LING 4220: Women, Men, and the English Language

(Cross-listed with ENGL 4220/ WGS 4220).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2190 or LING 2190

The ways men and women differ in using language in varied settings and the ways in which language both creates and reflects gender divisions. (Typically Offered: Spring)

LING 4250: Second Language Learning and Teaching

(Cross-listed with ENGL 4250).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2190/LING 2190 and Junior classification

The process of second language learning and principles and techniques of teaching second languages. Learning and teaching in specific situations and for particular purposes. Current applications of technology in teaching and assessment. (Typically Offered: Spring)

LING 4370: Grammatical Analysis

(Cross-listed with ENGL 4370).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (ENGL 2190 or LING 2190); (ENGL 2200 or LING 2200); Junior classification

Theories and methods for analysis of syntax and morphology. (Typically Offered: Fall)

LING 4620: Contrastive Analysis of Spanish/ English for Translators

(Cross-listed with SPAN 4620).

Credits: 3. Contact Hours: Lecture 3.

Prereq: SPAN 3510

Linguistic study of the major differences between the Spanish and English grammatical systems and their applications in the translation of Spanish to English. Taught in Spanish.

LING 4630: Contemporary Spanish Linguistics

(Dual-listed with SPAN 5630/ LING 5630). (Cross-listed with SPAN 4630).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: SPAN 3520

Study of various topics related to the Spanish language. Topics may include bilingualism, historical linguistics and dialectology, Spanish in the U.S., language assessment, computer-assisted language learning and instruction, and second language acquisition. Taught in Spanish. Meets International Perspectives Requirement.

LING 4710: Language and Reading Development in Children

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2190 or LING 2190 or PSYCH 2300

Development of spoken language, reading and writing covering semantics, syntax, morphology, phonology, and pragmatics.

LING 4860: Methods in Elementary School World Language Instruction

(Cross-listed with EDUC 4860/ WLC 4860).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 25 credits in a World Language

Planning, implementation, and assessment of standards-based, student-centered, and thematic instruction in the elementary (K-8) classroom. Special emphasis on K-8 students' communicative skills, cultural knowledge, and content learning. (Typically Offered: Fall)

LING 4870: Methods in Secondary School World Language Instruction

(Cross-listed with EDUC 4870/ WLC 4870).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 25 credits in a world language; Department Permission

Theories and principles of contemporary world language learning and teaching. Special emphasis on designing instruction and assessments for active learning. Admission to teacher education required. (Typically Offered: Fall)

LING 4900B: Independent Study: Linguistics

(Cross-listed with ENGL 4900B).

Credits: 1-30. Repeatable, maximum of 9 credits.

Prereq: 9 credits in English beyond ENGL 2500; Junior classification; Department Permission

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. Graduation Restriction: No more than 9 credits of ENGL 4900 may be used toward graduation. (Typically Offered: Fall, Spring)

LING 4900D: Independent Study: Linguistic Anthropology

(Cross-listed with ANTHR 4900D).

Credits: 1-5. Repeatable, maximum of 9 credits.

Prereq: 9 credits in ANTHR; Permission of Instructor

Graduation Restriction: No more than 9 credits of ANTHR 4900 may be counted toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

LING 5100: Introduction to Computers in Applied Linguistics

(Cross-listed with ENGL 5100).

Credits: 3. Contact Hours: Lecture 3.

Use of software and web applications for language teaching, linguistic analysis, and statistical analysis. Issues and problems in applied linguistics related to computer methods. (Typically Offered: Fall)

LING 5110: Introduction to Linguistic Analysis

(Cross-listed with ENGL 5110).

Credits: 3. Contact Hours: Lecture 3.

Principles and methods of linguistic analysis with emphasis on phonology, morphology, and syntax. Description of linguistic variation and current theoretical approaches to linguistics. (Typically Offered: Fall)

LING 5120: Second Language Acquisition

(Cross-listed with ENGL 5120).

Credits: 3. Contact Hours: Lecture 3.

Theory, methods, and results of second language acquisition research with emphasis on approaches relevant to second language teaching.

LING 5130: Language Assessment Practicum

(Cross-listed with ENGL 5130).

Credits: 3.

Advanced practicum in language assessment. (Typically Offered: Fall, Spring, Summer)

LING 5140: Sociolinguistics

(Cross-listed with ENGL 5140).

Credits: 3. Contact Hours: Lecture 3.

Theories and methods of examining language in its social setting. Analysis of individual characteristics (e.g., age, gender, ethnicity, social class, region), interactional factors (e.g., situation, topic, purpose) and national policies affecting language use.

LING 5150: Statistical Natural Language Processing

(Cross-listed with HCI 5150/ ENGL 5150).

Credits: 3. Contact Hours: Lecture 3.

Introduction to computational techniques involving human language and speech in applications such as information retrieval and extraction, automatic text categorization, word prediction, intelligent Web searching, spelling and grammar checking, speech recognition and synthesis, statistical machine translation, n-grams, POS-tagging, word-sense disambiguation, on-line lexicons and thesauri, markup languages, corpus analysis, and Python programming language.

LING 5160: Methods of Formal Linguistic Analysis

(Cross-listed with ENGL 5160).

Credits: 3. Contact Hours: Lecture 3.

Data and knowledge structures for formal representation of natural language and speech data. Designing and implementing algorithms for automating linguistic analysis tasks. Conceptual issues for natural language and speech processing programming. Offered even-numbered years. (Typically Offered: Spring)

LING 5170: Corpus Linguistics

(Cross-listed with ENGL 5170).

Credits: 3. Contact Hours: Lecture 3.

Corpus linguistics methods of language analysis, including corpus design, construction and annotation; data in corpus studies; tools and methods of analysis. Corpus methods applied in vocabulary, grammar, register and dialect variation, language change, pragmatics, semantics, stylistics, language learning and teaching, and language testing. Offered even-numbered years. (Typically Offered: Spring)

LING 5190: Second Language Assessment

(Cross-listed with ENGL 5190).

Credits: 3. Contact Hours: Lecture 3.

Principles of second language assessment including reliability, validity, authenticity and practicality. Constructing, scoring, interpreting, and evaluating second language tests for a variety of situations. (Typically Offered: Spring)

LING 5200: Computational Analysis of English

(Cross-listed with HCI 5200/ ENGL 5200).

Credits: 3. Contact Hours: Lecture 3.

Concepts and practices for analysis of English by computer with emphasis on the applications of computational analysis to problems in applied linguistics such as corpus analysis and recognition of learner language in computer-assisted learning and language assessment.

LING 5240: Literacy: Issues and Methods for Nonnative Speakers of English

(Cross-listed with ENGL 5240).

Credits: 3. Contact Hours: Lecture 3.

Theoretical and practical issues and techniques in the teaching of literacy in a variety of contexts, involving children and adults at basic skill levels and teens and adults in academic and vocational programs. Offered even-numbered years. (Typically Offered: Fall)

LING 5250: Research and Teaching of Second Language Pronunciation

(Cross-listed with ENGL 5250).

Credits: 3. Contact Hours: Lecture 3.

Theoretical and practical issues and techniques in the teaching of second language pronunciation as it relates to other areas of language, especially listening and speaking skills. Topics will include segmental and suprasegmental features; intelligibility; pronunciation in language assessment; classroom, technology and individual instruction; and research issues. Topics will be relevant to those intending to teach or research in various contexts. Offered odd-numbered years. (Typically Offered: Fall)

LING 5260: Technology for Language Learning

(Cross-listed with ENGL 5260).

Credits: 3. Contact Hours: Lecture 3.

Theory, research, and practice in computer use for teaching nonnative speakers of English. Methods for planning and evaluating computer-based learning activities. Offered odd-numbered years. (Typically Offered: Spring)

LING 5270: Discourse Analysis

(Cross-listed with ENGL 5270).

Credits: 3. Contact Hours: Lecture 3.

Methods and theoretical foundations for linguistic approaches to discourse analysis. Applications of discourse analysis to the study of texts in a variety of settings, including academic and research contexts. Offered odd-numbered years. (Typically Offered: Spring)

LING 5280: English for Specific Purposes

(Cross-listed with ENGL 5280).

Credits: 3. Contact Hours: Lecture 3.

Issues and techniques in analyzing, teaching, and assessing English for specific purposes. Topics include theories of specific purpose language use, analysis of learner needs in target language contexts, and corpus-informed syllabus and materials development for teaching and assessment.

LING 5300: Technology and Oral Language

(Cross-listed with ENGL 5300).

Credits: 3. Contact Hours: Lecture 3.

Structure and description of oral language and discourse. How spoken language is linguistically described, analyzed, and taught for research and for education. Using technology to record, transcribe, and analyze spoken language at all levels of linguistic structure. Offered even-numbered years. (Typically Offered: Fall)

LING 5370: Corpus Approaches to Grammatical Analysis

(Cross-listed with ENGL 5370).

Credits: 3. Contact Hours: Lecture 3.

Corpus-informed analysis of syntax in authentic writing and speech, with emphasis on approaches used in applied linguistics.

LING 5540: Introduction to Spanish-English Interpretation

(Dual-listed with SPAN 3540/ LING 3540). (Cross-listed with SPAN 5540).

Credits: 3. Contact Hours: Lecture 3.

Prereq: SPAN 3510

Introduction to the theory, methods, techniques, and problems of consecutive and simultaneous interpretation. Consideration of material from business, agriculture, law, design, medicine, literature, advertisement, and sports. Taught in Spanish. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

LING 5630: Contemporary Spanish Linguistics

(Dual-listed with SPAN 4630/ LING 4630). (Cross-listed with SPAN 5630).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: SPAN 3520

Study of various topics related to the Spanish language. Topics may include bilingualism, historical linguistics and dialectology, Spanish in the U.S., language assessment, computer-assisted language learning and instruction, and second language acquisition. Taught in Spanish.

LING 5880: Supervised Practice Teaching in Teaching English as a Second Language

(Cross-listed with ENGL 5880).

Credits: 3. Contact Hours: Lecture 1, Laboratory 5.

Intensive observation of ESL instruction and supervised practice in teaching learners of English in a context appropriate to the student teacher's goals. Graduation Restriction: ENGL 5880 cannot be used for teacher licensure. (Typically Offered: Fall, Spring)

LING 5900B: Special Topics: Teaching English as a Second Language (TESL)/Applied Linguistics

(Cross-listed with ENGL 5900B).

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

LING 5900G: Special Topics: Applied Linguistics and Technology

(Cross-listed with ENGL 5900G).

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

LING 5910: Studies in Applied Linguistics

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Intensive study of applied linguistic theory as it relates to specific issues in language acquisition, teaching, or use.

LING 5910B: Directed Readings: Teaching English as a Second Language (TESL)/Applied Linguistics

(Cross-listed with ENGL 5910B).

Credits: 1-30. Repeatable.

(Typically Offered: Fall, Spring, Summer)

LING 5910G: Directed Readings: Applied Linguistics and Technology

(Cross-listed with ENGL 5910G).

Credits: 1-30. Repeatable.

(Typically Offered: Fall, Spring, Summer)

Courses for graduate students:

LING 6230A: Research Methods in Applied Linguistics: Quantitative

(Cross-listed with ENGL 6230A).

Credits: 3. Contact Hours: Lecture 3.

Survey of quantitative research methods used in applied linguistics.

Offered odd-numbered years. (Typically Offered: Spring)

LING 6230B: Research Methods in Applied Linguistics: Qualitative

(Cross-listed with ENGL 6230B).

Credits: 3. Contact Hours: Lecture 3.

Survey of qualitative research methods used in applied linguistics.

Offered even-numbered years. (Typically Offered: Spring)

LING 6260: Computer-Assisted Language Testing

(Cross-listed with ENGL 6260).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 5190 or LING 5190

Principles and practices for the use and study of computers and the Internet in second language assessment. Offered even-numbered years. (Typically Offered: Spring)

LING 6300: Seminar in Applied Linguistics

(Cross-listed with ENGL 6300).

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Topic changes each semester. Topics include advanced methods in natural language processing, technology and literacy in a global context, feedback in CALL programs, technology and pronunciation, and advances in language assessment.

Management (MGMT)

Courses primarily for undergraduates:

MGMT 3200: Corporate Entrepreneurship

(Cross-listed with ENTSP 3200).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Introduces entrepreneurial approaches aimed at the identification, development and exploitation of technical and organizational innovations, the management of new product or process developments, and the effective management of new ventures. Focuses on mid-size to large corporations, especially in the manufacturing and service industries. Develops an awareness and understanding of the range, scope, and complexity of issues related to the creation of a corporate environment that is supportive of entrepreneurial endeavors as well as the effective implementation of technological and organizational innovations in corporate settings. (Typically Offered: Fall, Spring)

MGMT 3700: Managing Organizations

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Introduction to management as a field and function within organizations. Provides an overview of what managers do in organizations, including how they deal with multiple stakeholders; make decisions about organizational goals, strategies, and structures that align with the external and internal environment; as well as how they lead and manage human resources effectively. (Typically Offered: Fall, Spring, Summer)

MGMT 3710: Organizational Behavior

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Introduction to the attitudes and behaviors of individuals and groups in organizations, as well as their antecedents: e.g., individual characteristics, interpersonal processes, manager and leader influences, and organizational characteristics and practices. Builds awareness of one's own and others' characteristics, attitudes, behaviors, and interpersonal and decision-making skills to improve as an employee and a manager. (Typically Offered: Fall, Spring)

MGMT 3720: Ethical and Responsible Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Introduces the many aspects of ethical and responsible management in today's organization, including the ethical implications of business decision-making (and the implications of having multiple stakeholders); corporate social responsibility; ethical leadership and other leadership styles as they pertain to responsible management; and the role of corporate governance and ethical codes in developing and institutionalizing an ethical organization. Builds ethical decision-making strategies and awareness of one's own ethical leadership philosophy.

(Typically Offered: Fall, Spring)

MGMT 3770: Competitive Strategy

Credits: 3. Contact Hours: Lecture 3.

Developing competitive strategy and achieving competitive advantage in firms, including: industry analysis, generic strategies, hypercompetition, competing against time, and building distinctive capabilities. (Typically Offered: Fall)

MGMT 3810: Managing Family Businesses

(Cross-listed with ENTSP 3810).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Introduction to the important role family businesses play in the domestic and global economies as well as the complex and unique challenges and opportunities encountered by such businesses and their family members and other employees. Explores best practices for successfully managing family businesses.

MGMT 4140: International Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Explains complexities managers face when doing business in countries where political, legal, economic, and cultural systems are different and require making decisions about the change, innovation, or adaptation needed to successfully formulate strategies for entering and operating in international markets. (Typically Offered: Fall, Spring)

MGMT 4150: Managing New Ventures

Credits: 3. Contact Hours: Lecture 3.

Examination of business problems and main issues concerning new ventures. Students work in teams to identify problems in growing and new firms. The emphasis is on analyzing and solving an existing business problem. Includes a field project, a report, and a presentation to a business owner. (Typically Offered: Fall, Spring)

MGMT 4190: Social Responsibility of Business

Credits: 3. Contact Hours: Lecture 3.

A consideration of the role of business in society. Critical analysis of ethical, managerial, and public issues as they affect the corporation. (Typically Offered: Spring)

MGMT 4210X: Personality and Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: MGMT 3710

Surveys the literature relating to personality, individual differences, and management. Explores the significant implications of personality for important topics in human resource management, organizational behavior, and strategic management, as well as the other functional areas of business, including leadership, motivation, perception, decision making, organizational citizenship behavior, job satisfaction, and much, much more. Allows students to explore their own personalities using rigorous academic measurement scales and discover what academic research says about how personality is related to a variety of management topics. (Typically Offered: Fall, Spring)

MGMT 4220: Negotiation and Conflict Resolution

Credits: 3. Contact Hours: Lecture 3.

Prereq: MGMT 3700 or MGMT 3710

Introduces the theory and practice of negotiation (i.e., the art and science of securing an agreement between two or more interdependent parties) in a variety of settings, especially those faced by managers and professionals in organizations. Focuses on understanding the behavior of individuals, groups and organizations in the context of competitive situations, and the underlying interdependent relationships and processes. Builds analytical skills needed to discover optimal solutions to problems and a broad array of negotiation skills needed in order for those solutions to be accepted and implemented.

MGMT 4510X: Current Issues in Human Resource Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: MGMT 4710

Designed to complement the required curriculum in the Human Resource Management (HRM) major. Explores a rotating selection of cutting edge and timely topics in the area of HRM, with an emphasis on the application of HRM knowledge and skills to the challenges facing today's organizations. Develops an awareness and understanding of the range, scope, and complexity of issues related to managing human resources in the modern (and post-pandemic) organization. Opportunities to apply introduced HRM knowledge, skills, and tools through class projects and exercises.

MGMT 4520X: Current Issues in Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: MGMT 3700

Designed to complement the required curriculum in the Management (MGMT) major. Explores a rotating selection of cutting edge and timely topics in the area of management, with an emphasis on the application of managerial knowledge and skills to the challenges facing today's organizations. Develops an awareness and understanding of the range, scope, and complexity of issues related to managing in the modern (and post-pandemic) organization. Opportunities to apply introduced managerial knowledge, skills, and tools through class projects and exercises.

MGMT 4700: Leadership and Change Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: MGMT 3700 or MGMT 3710

Focuses on the practical application of leadership skills required in today's evolving business environment, including the need to effectively manage change. Develops through multiple hands-on activities an understanding of how leaders are able to inspire and lead their peers, direct reports, as well as themselves, and how leaders can create a culture that supports and inspires change within an organization. (Typically Offered: Fall, Spring, Summer)

MGMT 4710: Introduction to Human Resource Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: MGMT 3710 and STAT 2260 and ENGL 2500

Introduces the field of human resource management (HRM) and its relevance to managers, employees, and organizational strategic goal achievement. Explains how HRM practices can be a source of competitive advantage for organizations and develops knowledge and skills in the functional areas of HRM, including job analysis, selection, recruitment, compensation, and training and development. Builds skills critical to HRM (and other) professionals, such as communication, feedback, and teamwork skills. (Typically Offered: Fall, Spring)

MGMT 4720: Diversity, Equity, and Inclusion in Organizations

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification or above and BUSAD 2030

Introduces the important topics of diversity, equity, and inclusion in organizations. Focuses on understanding dimensions of diversity and the importance of inclusion; effectively managing legal, ethical, media, and marketing issues in this area; and managing organizational change initiatives in this area. Builds students' abilities to work within and lead diverse teams and organizations and develops critical thinking about one's identity and equality of opportunity in organizations. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

MGMT 4730: Evidence-Based Decision Making in Human Resource Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 1130 and ENGL 2500 and STAT 2260 and MGMT 3710

Focuses on evidence-based analysis of short- and long-term consequences of specific talent management practices on the organization and on society as a whole. Introduces, and provides hands-on experience with, measurement and analytic techniques applicable to business professionals. Builds knowledge and skills to describe, diagnose and improve processes pertaining to planning, recruiting, selecting, training, and developing talent in an organization as well as compensating, retaining, and managing the performance and careers of a diverse and talented workforce. (Typically Offered: Fall)

MGMT 4740: Compensation and Benefits

Credits: 3. Contact Hours: Lecture 3.

Prereq: MGMT 4710

Introduces the fundamental elements of employee compensation and benefits (including strategies, structures, and practices), within the larger context of total rewards. Discusses impact of compensation and benefits on employee recruitment, retention, and engagement, the employer/employee relationship, as well as individual, organizational and societal returns. Provides tools and a holistic understanding to competently assess, manage and negotiate compensation and benefits, not only as a management/human resource professional but also as an employee (in any phase of their own compensation lifecycle). (Typically Offered: Fall, Spring)

MGMT 4750: Employment Law for Human Resource Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 2150 and MGMT 4710

Introduces fundamentals of U.S. employment law necessary for human resource management. Topics include sources of employment law, classification of workers, lawful hiring practices, liability arising from harassment and discrimination, worker's rights and duties, employment contract issues, and lawful termination of an employee. Builds knowledge and skills for effectively managing each of these areas. (Typically Offered: Fall, Spring)

MGMT 4760: Applied Projects in Human Resource Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: MGMT 4710 and MGMT 4740 and MGMT 4750

Takes an experiential and holistic view to address human resource management (HRM) issues, especially in small and mid-sized companies. Project-based format includes partnering with local companies to understand, research, and propose evidence-based HRM solutions that support the organization's overall strategy and business needs. Requires consideration and application of multiple HRM perspectives including hiring, employee development and retention, performance management, compensation and benefits, legal considerations, etc. Emphasis on developing situation-specific solutions that integrate multiple HRM best practices. (Typically Offered: Summer)

MGMT 4780: Strategic Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment in (ACCT 2850;

ENTSP 3100; FIN 3010; MKT 3400; (MGMT 3700 or MGMT 3710);

SCM 3010; MIS 3010); Senior classification

Examines why some organizations perform better than others, with an emphasis on how taking a holistic view of the organization and environment can lead to sustained competitive advantage. Evaluates how capabilities in various organizational functions can help enable and determine organizational strategy, and considers how strategic choices affect expectations of various functional areas and their interdependence. Emphasis on case analysis and discussion to build student competencies in the areas of internal and external analysis, complex decision-making, and the formulation, implementation, and evaluation of strategies. (Typically Offered: Fall, Spring, Summer)

MGMT 4810X: Nonprofit Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Executives in nonprofits are recognizing the need to incorporate contemporary management skills into their organization and connect their organizations to related business. Executives in for-profit businesses interact with the nonprofit sector in business operations or in service as a board member for a nonprofit organization. Management practices that can be applied across lines in both nonprofit organization and for-profit businesses. Focus on the strategy, governance, management and leadership of nonprofit organizations and explore how this sector fits into the business landscape. (Typically Offered: Spring)

MGMT 4900: Independent Study

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Courses primarily for graduate students, open to qualified undergraduates:

MGMT 5020: Organizational Behavior

Credits: 3. Contact Hours: Lecture 3.

Understanding human behavior in organizations and the nature of sustainable organizations from a managerial perspective. Special emphasis is placed on how individual differences, such as perceptions, personality, and motivation, influence individual and group behavior in organizations and on how behavior can be influenced by job design, leadership, groups, and the structure of organizations. (Typically Offered: Fall)

MGMT 5030: Professional Responsibility in Business and Society

Credits: 3. Contact Hours: Lecture 3.

Ethical and social responsibilities of top managers in corporations. Topics include stakeholder management, corporate social responsibilities, strategies for sustainable development, pursuit of societal and corporate goals, board and chief executive leadership roles, governance reform and ethics, and executive leadership style and values. The presentation of course concepts is facilitated by the use of cases, discussion scenarios, and ethical dilemmas.

MGMT 5040: Strategic Management

Credits: 3. Contact Hours: Lecture 3.

Critical analysis of case studies in strategic management with an emphasis on integrative decision making. Strategy implementation in light of the global, legal, economic, cultural, and political contexts of business.

MGMT 5200X: Corporate Entrepreneurship, Innovation and Technology Management

(Cross-listed with ENTSP 5200X).

Credits: 3. Contact Hours: Lecture 3.

Management of venture creation and innovation at large and established organizations. New ideas, concepts, and techniques on how to stimulate and exploit innovative activities to make established firms not only more responsive and flexible, but also more proactive and opportunity-creating. Related approaches combine activities targeted at the individual, team, organization, industry, regional, national and global level. Introduction to how today's large and established corporations (1) identify, develop and exploit innovative opportunities, (2) manage product development processes, and (3) create, spin-in, spin-off and manage new innovative ventures. This case-based course introduces emerging, non-traditional, evidence-based approaches, such as agile product development, design-thinking, entrepreneurial leadership, entrepreneurial ecosystems, open innovation and blue-ocean strategies. (Typically Offered: Fall, Spring, Summer)

MGMT 5220: Negotiation and Conflict Resolution

Credits: 3. Contact Hours: Lecture 3.

Theory and practice of negotiation in a variety of settings, while focusing on understanding the behavior of individuals, groups and organizations in the context of competitive situations. Team work and team building is integrated to better understand interdependent relationships and processes.

MGMT 5230X: Leadership

Credits: 3. Contact Hours: Lecture 3.

Applied overview of organizational leadership and teamwork, with special emphasis on the ability to successfully influence in a variety of contexts. Areas of emphasis include: research to better understand the influence process; leadership, followership, and management as a process; change and how to better lead and manage change in organizations.

MGMT 5250: Evidence-Based Talent Management

Credits: 3. Contact Hours: Lecture 3.

Introduces talent management as integral to the ongoing success of any organization, with a focus on contemporary, evidence-based approaches to effectively managing talent. Highlights best practices related to the capture, integration, and utilization of employee data for making decisions about talent and talent management practices, and builds practical skills related to the identification and development of talent. Intended for current managers from any functional background.

MGMT 5300: Leadership and Conflict Resolution

Credits: 3. Contact Hours: Lecture 3.

Introduction to the theory and practice of leadership and negotiation. Emphasis on the science of influencing and resolving conflict, and securing an agreement between two or more interdependent parties. Behavior of individuals, groups, and organizations in the context of demanding situations.

MGMT 5600X: Leadership Development

Credits: 2. Contact Hours: Lecture 2.

Applied overview of organizational leadership leveraging a 360 leadership evaluation, with special emphasis on the ability to be successful in a variety of contexts. The 360 leadership evaluation will form the foundation to create a leadership action plan. This will great assist in increasing one's leadership effectiveness as the students' strengths and weaknesses discovered. (Typically Offered: Spring)

MGMT 5650: Early Stage Entrepreneurship - Mind to Market

Credits: 3. Contact Hours: Lecture 3.

Commercialization of new technology. Topics covered include market analysis, intellectual property, product development, feasibility analysis, and new business evaluation.

MGMT 5710: Seminar in Personnel and Human Resources Management

Credits: 3. Contact Hours: Lecture 3.

Topics and issues in personnel management with a focus on the management of human resources in organizations. Current personnel practices, philosophies, and behavioral science research. (Typically Offered: Spring)

MGMT 5720: Personality and Management

Credits: 3. Contact Hours: Lecture 3.

Critical analysis of case studies in strategic management with an emphasis on integrative decision making. Strategy implementation in light of the global, legal, economic, cultural, and political contexts of business.

MGMT 5820: Corporate Governance and Top Management

(Cross-listed with ACCT 5820).

Credits: 3. Contact Hours: Lecture 3.

Duties, structure, and functioning of top management teams and corporate boards of directors. CEO/board tenure and succession planning, top management compensation, board committee composition, assessment of CEO and board performance, theories of corporate governance, management of the corporate strategic agenda, governance codes, international governance, and chairman/CEO duality. Case studies and contemporary issues discussed.

MGMT 5830: Formulating and Implementing Innovation Strategies

(Cross-listed with ENTSP 5830).

Credits: 3. Contact Hours: Lecture 3.

Key strategies, models, and tools to foster and drive organizational innovation. Analysis of industry dynamics, sources and types of innovations, timing of entry; formulation of innovation strategies; developing innovation portfolios and collaboration strategies, protecting innovation; implementing technological innovation strategy, including new product development and deployment strategy. Essential traits of innovative strategic leaders. Critical analysis and discussion of cases focused on entrepreneurship and innovation and project requiring hands-on practical application of course concepts.

MGMT 5840: Management Consulting

Credits: 3. Contact Hours: Lecture 3.

Provides the opportunity for students to understand the role of the professional consultant, the issues facing the management consulting industry, the competencies of various management consulting firms, the nature and form of strategic consulting engagement, and the nature and scope of strategic change in business firms. Students will learn about management consulting functions and will practice the consultant role through cases and field studies.

MGMT 5900: Special Topics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

For students wishing to do individual research in a particular area of management. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**MGMT 6010: Philosophy of Science**

Credits: 3. Contact Hours: Lecture 3.

This course provides a philosophical introduction to the theoretical and empirical development of scientific knowledge. It focuses on a variety of basic problems common to the social sciences: the nature of explanation, the structure of theories, forms of knowledge, scientific laws, nature of theory and ethics. The purpose of the course is to help doctoral students define a research context by addressing the purposes, assumptions and primary components of scientific inquiry.

MGMT 6020: Organizational Theory

Credits: 3. Contact Hours: Lecture 3.

This seminar involves the examination of the core theories and perspectives in organizational theory, as well as their applications and extensions. This material addresses the fundamental rationale for organizations in modern society, basic processes of organizing and organizational structure, a consideration of inter-organizational relationships and the external environment, and a variety of factors that help determine organizational effectiveness.

MGMT 6030: Strategic Management of Technology and Innovation

Credits: 3. Contact Hours: Lecture 3.

This course will offer a critical review of organizational decision making with respect to technology and innovation. Students will learn how technological change can alter the basis of competition; how competitive strategy drives technology investment decisions; how market-orientation should be the other backbone of technological innovation; and best practices of organizing and managing the new product development process to achieve strategic goals.

MGMT 6040: Seminar in Organizational Behavior

Credits: 3. Contact Hours: Lecture 3.

The purpose of this seminar is to introduce behavioral science literature relevant to the study of behavior in organizational settings. The course will focus on the individual's role within organizations and cover topics such as individual differences, motivation, leadership, decision-making. Learning, risk taking, interpersonal relations, etc. Both theoretical and empirical contributions will be examined, with emphasis on integration of diverse theoretical perspectives.

MGMT 6050: Seminar in Strategic Management

(Cross-listed with ENTSP 6050).

Credits: 3. Contact Hours: Lecture 3.

Critical review of theory and research in the field of strategic management. Introduction to representative conceptual and empirical research. Review theories that provide the foundation for management research, and review current research in associate research streams. The review will cover fundamental questions in strategy. Offered odd-numbered years. (Typically Offered: Fall)

MGMT 6060: Historical Foundations of Entrepreneurship Research

(Cross-listed with ENTSP 6060).

Credits: 3. Contact Hours: Lecture 3.

Seminal readings, theoretical perspectives, and historical roots of Entrepreneurship research. A broad variety of core foundational theories, perspectives, and approaches are discussed.

MGMT 6070: Current Topics in Entrepreneurship Research

(Cross-listed with ENTSP 6070).

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Current theoretical perspectives and methodological approaches in entrepreneurship research. Current entrepreneurship research is inherently interdisciplinary such that we will draw on insight from scholars across a range of disciplines. Offered even-numbered years. (Typically Offered: Spring)

MGMT 6080: Human Resources Management Theory & Research

Credits: 3. Contact Hours: Lecture 3.

Advanced research seminar in human resources management. The scope and coverage of the seminar is designed to representatively reflect the important content areas in the field, and the major theoretical and empirical contributions in each area. The seminar will be decidedly research focused with discussions concentrating on critical reviews and evaluations of existing work, and the identification of potential directions for theory development and future research. Through reading assignments, weekly papers, and the development of a theoretical paper, students should gain an appreciation for the current status of theory and research, and begin to articulate major issues and challenges facing the field of human resources management. (Typically Offered: Spring)

MGMT 6090: Organizational Research Methods

(Cross-listed with ENTSP 6090).

Credits: 3. Contact Hours: Lecture 3.

Solid methodological foundation that will prepare you to be a productive producer and educated consumer of scientific research in the field of Management, Entrepreneurship, and other related disciplines.

Introduction to numerous concepts and techniques with relevance to your future scholarship in this domain. Conceptual underpinnings necessary to appreciate the strengths and limitations of various approaches used in these fields and the interplay between theoretical advancement and rigorous empirical investigation. (Typically Offered: Fall)

MGMT 6120X: Seminar in Micro Management Topics

Credits: 3. Contact Hours: Lecture 3.

Foundation in micro research including domains of organizational behavior (OB) and human resource management (HR). Discuss classic micro topics (e.g., job performance), as well as topics that exemplify recent advances within the OB/HR literatures (e.g., big data). Multiple levels of analysis and consider how micro topics complement other areas of management research (i.e., entrepreneurship and macro topics). Theory and empirical research within the applied context of the OB/HR environment. Emphasize a systematic and scientific approach to deepening collective knowledge and understanding of topics. (Typically Offered: Fall)

MGMT 6200AX: Special Topics: Resources and Capabilities

Credits: 1. Contact Hours: Lecture 3.

Prereq: Graduate classification

Provide students with a deeper content knowledge of foundational and contemporary research on organizational resources and capabilities. Concepts (e.g., resources, capabilities, sustainable competitive advantage, knowledge, etc.) theoretical frameworks (e.g., Resource-based Theory; Dynamic Capabilities; Resource-dependency Theory; Knowledge-based view), and relevant findings in this area of research. Multiple levels of analysis and consideration of how these topics emerge across different areas of management (micro and macro) and entrepreneurship research. Theory and empirical research embedded within the applied context of the management field. Emphasis on a systematic and scientific approach to deepening our knowledge and understanding of topics. (Typically Offered: Spring)

MGMT 6200BX: Special Topics: Leadership

Credits: 1. Contact Hours: Lecture 3.

Prereq: Graduate classification

Provide a deeper content knowledge of leadership. Review major behavioral styles of leadership, as well as leader-follower relationships and a variety of other current leadership issues. Multiple levels of analysis and consideration of how these topics emerge across different areas of management (micro and macro) and entrepreneurship research. Theory and empirical research embedded within the applied context of the management field. Emphasis on a systematic and scientific approach to deepening the knowledge and understanding of topics. (Typically Offered: Spring)

MGMT 6200CX: Special Topics: Groups and Teams

Credits: 1. Contact Hours: Lecture 3.

Prereq: Graduate classification

Provide content knowledge of research in teams within the field of management, broadly defined. Covers research on teams from the perspective of the input-mediator-output-input model, which considers teams as complex, dynamic, and adaptive systems. Discussion of questions concerning composition and structure, processes and emergent states, and multilevel as well as temporal dynamics. Consideration of teams in students' specific area of study (e.g., entrepreneurial teams, top management teams). Blend of theory and empirical research within the applied context of the management field. Emphasis on a systematic and scientific approach to deepening knowledge and understanding of topics. (Typically Offered: Spring)

MGMT 6200DX: Special Topics: Crafting Research Ideas

(Cross-listed with ENTSP 6200DX).

Credits: 1. Contact Hours: Lecture 3.

Role as a scholar is more than publishing research. The purpose of scholarship is to add to usable knowledge - which means knowledge that can be used to solve real - world problems. To publish an article, students need to convince other scholars of the quality of their research. To create usable knowledge, you need to solve a problem that managers face and communicate that solution to managers. Most managers do not read academic journals, so the publication of an article does not guarantee that anyone who needs the knowledge will find it. Introduction an ideal form of scholarship that Andy Van de Ven calls 'engaged scholarship.' This form of scholarship requires the rigorous theory and methods by adds the additional component of connecting research to practitioners throughout the research process. (Typically Offered: Spring)

MGMT 6200EX: Special Topics: Effective Academic Writing

(Cross-listed with ENTSP 6200EX).

Credits: 1. Contact Hours: Lecture 3.

Provide skills and training necessary to navigate the professional landscape of the management and entrepreneurship fields. Discussion of effective academic writing, focusing on the discipline of management (but certainly applicable beyond this field). Blend of theory, research and practice focused on understanding one's role as a scholar, the implications of scholarly work, and successful advancement through career stages. (Typically Offered: Spring)

MGMT 6200FX: Special Topics: Professional Development in Management and Entrepreneurship Research

(Cross-listed with ENTSP 6200FX).

Credits: 1. Contact Hours: Lecture 3.

Repeatable, maximum of 2 times.

Provide skills and training necessary to navigate the professional landscape of the management/entrepreneurship fields. Includes topics such as research collaborations and networking, the peer review process, ethics, scholarly writing, presenting scholarly work, developing a research identity, understanding the research process, receiving and utilizing feedback, and navigating career milestones. Blend of theory, research, and practice focused on understanding one's role as a scholar, the implications of scholarly work, and successful advancement through career stages. (Typically Offered: Fall)

MGMT 6200GX: Special Topics: Bayesian Analysis in Management and Entrepreneurship Research

(Cross-listed with ENTSP 6200GX).

Credits: 1. Contact Hours: Lecture 3.

Provides a deeper understanding of research methodology. Introduces the fundamental concepts of Bayesian statistics as an advanced methodology to empirically investigate entrepreneurship and management phenome. Analytical topics include Bayes theorem, prior specification, likelihood functions, Markov Chain Monte Carlo simulations, analysis diagnostics, and posterior distributions. Application topics include Bayesian point estimates, intervals, predictions and hypothesis tests. Contrasts Bayesian approaches with frequentist paradigms such as statistical null-hypothesis significance tests. Designed to complement knowledge of MGMT 6090 Organizational Research Methods. Focus on exercises and discussions regarding how to collect, analyze and interpret empirical data to develop and advance micro- and macro-level theories in management and entrepreneurship. (Typically Offered: Fall)

MGMT 6200IX: Mergers and Acquisitions

(Cross-listed with ENTSP 6200IX).

Credits: 1. Contact Hours: Lecture 3.

Provide a deeper content knowledge of mergers and acquisitions (M&As). Cover various M&A topics (premiums, deal completion, CEO characteristics, post-merger integration, acquisition performance, etc.), theoretical frameworks, as well as relevant findings of M&A research. Consider course topics from multiple levels of analysis and consider how these topics emerge across different areas of management (micro and macro) and entrepreneurship research. Blend of theory and empirical research within the applied context of the management field. Emphasis on a systematic and scientific approach to deepening knowledge and understanding of topics. (Typically Offered: Spring)

MGMT 6200JX: Artificial Intelligence, Machine Learning and Big Data in Management and Entrepreneurship Research

(Cross-listed with ENTSP 6200JX).

Credits: 1. Contact Hours: Lecture 3.

Repeatable, maximum of 2 times.

Provide a deeper understanding of research methodology implications of artificial intelligence, machine learning and big data for management and entrepreneurship scholars. Introduce students to the fundamental concepts and emerging capabilities of artificial intelligence and machine learning and investigate their applications in the context of data collection, data analysis and communication of research findings. Explore broader implications of these technologies for the objects of management research: organizations and their members. Designed to complement knowledge students can gain in MGMT 6090 Organizational Methods and ENTSP/MGMT 6200GX Bayesian Alysis in management and Entrepreneurship Research. (Typically Offered: Fall, Spring, Summer)

MGMT 6200KX: How to Manage the Revise and Resubmit Process

(Cross-listed with ENTSP 6200KX).

Credits: 1. Contact Hours: Lecture 3.

Prereq: Enrollment in the PhD Program

Provide skills and training necessary to navigate the professional landscape of the management and entrepreneurship fields. Explore how to successfully manage the R&R (revise and resubmit process) at scholarly journals. Discussion of the purpose and stages of the peer review process. Blend of theory, research, and practice focused on understanding one's role as a scholar, the review process and implications of reviewing, and successful advancement through career stages. (Typically Offered: Spring)

MGMT 6200LX: Social Influence and Conflict: From Status to Stigma

Credits: 1. Contact Hours: Lecture 3.

Prereq: Graduate classification

Provide content knowledge of social influence processes. Explore how status and stigma impact individual and team influence and conflict outcomes. Discuss how social influence individual characteristics such as political skill will influence these processes. Evaluate course topics from multiple levels of analysis and consider how these topics emerge across different areas of management (micro and macro) and entrepreneurship research. Blend of theory and empirical research within the applied context of the management field. Emphasis on a systematic and scientific approach to deepening knowledge and understanding of topics. (Typically Offered: Spring)

MGMT 6200MX: Ethics and Values in Management and Entrepreneurship
(Cross-listed with ENTSP 6200MX).

Credits: 1. Contact Hours: Lecture 3.

Provides content knowledge of business ethics, especially the variety of behavioral ethics. Offers an exposure to business ethics literature, experiments with blending different methodology with substantive content and develops interesting research questions related to business ethics & values. Evaluate course topics from multiple levels of analysis and consider how these topics emerge across different areas of management (micro and macro) and entrepreneurship research. Blend of theory and empirical research within the applied context of the management field. Emphasis on a systematic and scientific approach to deepening knowledge and understanding of topics. (Typically Offered: Spring)

MGMT 6200NX: Corporate Governance and Upper Echelons

Credits: 1. Contact Hours: Lecture 3.

Prereq: Graduate classification

Provide content knowledge of macro topics in management, specifically corporate governance and upper echelons. Covers research related to agency theory, the role of the board of directors, executive compensation and incentives, upper echelons theory, CEO succession, CEO characteristics, and external governance (e.g., the role of social movement, media, shareholder activists). Blend of theory and empirical research within the applied context of the management field. Emphasis on a systematic and scientific approach to deepening knowledge and understanding of topics. (Typically Offered: Fall, Spring)

MGMT 6200OX: Employee Participation

Credits: 1. Contact Hours: Lecture 3.

Prereq: Graduate classification

Provide content knowledge of employee participation. Explore how organizations encourage and foster employee involvement through the implementation of engagement-oriented policies and practices. Examine how these policies and practices motivate and empower individuals to be involved in the workplace, ultimately leading to participatory behaviors (voice, issue, selling, upward influence, etc.). Blend of theory and empirical research within the applied context of the management field. Emphasis on a systematic and scientific approach to deepening knowledge and understanding of topics. (Typically Offered: Fall, Spring)

MGMT 6500: Research Practicum I

Credits: 1.

Prereq: Instructor Permission for Course

Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

MGMT 6510: Research Practicum II

Credits: 1.

Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

MGMT 6990: Dissertation

Credits: 1-12.

Research.

Management Information Systems (MIS)

Courses primarily for undergraduates:

MIS 2070: Fundamentals of Programming for Business and Analytics

Credits: 0-99. Contact Hours: Lecture 3.

Prereq: MATH 1500 or credit or enrollment in MATH 1400 or higher

Introduction to programming (what it is and how it works) and problem-solving methods, emphasizing the basics of good programming techniques and style. Covers data types, control and data structures, functions, parameter passing, library functions, and object-oriented design to develop business and analytics applications. (Typically Offered: Fall, Spring)

MIS 3010: Management Information Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 1130

The role of information technology in organizations. Overview of methodologies for design and development of systems including decision support systems, expert systems, data bases, end-user computing, etc. Computer applications relate concepts to practice. Lecture and laboratory work emphasizes the enabling role of IT in contemporary organizations. (Typically Offered: Fall, Spring, Summer)

MIS 3070: Intermediate Business Programming

Credits: 3. Contact Hours: Lecture 3.

Prereq: MIS 2070 and credit or enrollment in MIS 3010

Introduction to the concepts and use of data structures, file accesses and object oriented programming methodologies in contemporary business environments. Application development environments will be covered.

MIS 3100: Information Systems Analysis

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment in MIS 3010

Critical analysis of business processes, data and process modeling, feasibility studies, CASE tools, and developing system design specifications.

MIS 3150: Business Data Streams and Issues

(Cross-listed with ACCT 3150).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 2840 and MIS 3010

Identification of open data sources and other private data sources. Develop methods of data access, collection, and sharing; develop methods to validate and standardize data sources; develop methods to assess data worthiness (risk). Typically Offered: Fall (even-numbered years), Spring (odd-numbered years), Summer (annually).

MIS 3200: Database Management Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment in MIS 3010

Database design, development, and implementation. Focus on data models, both classical and object oriented. Uses relational and/or object oriented database management systems.

MIS 3400: Project Management

(Cross-listed with SCM 3400).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment in MIS 3010

Equips students to support team activities in the general project management environment and better manage their careers. Practical experience using project management techniques and tools. Course topics include project initiation and execution, risk assessment, estimating and contracts, planning, human factors, and standard methods.

MIS 3670: Consultative Problem Solving

(Cross-listed with MKT 3670).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Consultative problem-solving approach to address complex problems in marketing and related fields. Topics include problem definition, issue tree dis-aggregation, hypotheses development and the Pyramid Principle. Development of skills such as formulating problems, structuring and prioritizing problems, synthesizing results and communicating intuition from quantitative analyses. (Typically Offered: Fall, Spring)

MIS 3680: Marketing Analytics

(Cross-listed with MKT 3680).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400 and STAT 2260 or equivalent

Use of different tools to conduct various analyses to support marketing strategies. Topics include data visualization and exploration, forecasting, social media analytics and other marketing techniques. Development of skills such as structuring problems, and synthesizing results from quantitative analyses. (Typically Offered: Fall, Spring)

MIS 4030: Healthcare Information Systems

(Cross-listed with HCM 4030).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MIS 3010 and credit or enrollment in HCM 3010

Explores the critical role information technologies and systems play in healthcare organizations. The focus is on evaluating and implementing software and IT systems that facilitate delivery of health care; understanding information technology governance, data privacy, and security; planning and project management; and tracking future developments of information technology in healthcare management. Introduction to Electronic Health Records (EHR) and other Management and Financial Information System applications used by healthcare organizations.

MIS 4070: Advanced Business Programming

Credits: 3. Contact Hours: Lecture 3.

Prereq: MIS 3070.

Advanced software development and topics in contemporary programming languages. Topics include basic syntax, advanced programming techniques, file structures and management, database access, algorithm design, web forms and graphical user interfaces.

MIS 4100X: Blockchain and Cryptocurrency

(Dual-listed with MIS 5100X).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MIS 2070 or COMS 2070 or COMS 2270

The design and application aspects of blockchain technologies, cryptocurrencies, and the key value these technologies bring - distributed consensus and trust disintermediation. Study of how blockchain technology works with consideration to its potential disruptive impact on business and society. Key concepts include mining, hashing, proof-of-work, proof-of-stake, public key cryptography, smart contracts, and the double-spend problem. (Typically Offered: Spring)

MIS 4350: Cybersecurity in Business

Credits: 3. Contact Hours: Lecture 3.

Prereq: MIS 3010

Introduction to fundamental concepts in networking and cloud computing and related cybersecurity concepts. Examination of network and cloud architectures, technologies, management and governance, security controls and techniques used to design, deploy, and protect resources in those environments. Exposure to cybersecurity tools in hands-on labs and explore methods of implementing and maintaining effective networks and cybersecurity programs in private, public, and cloud infrastructures.

MIS 4360: Introduction to Business Analytics

Credits: 3. Contact Hours: Lecture 3.

Prereq: (MIS 3200 or ACCT 3840) and credit or enrollment in STAT 3260 or STAT 3410

Introduction to the field of business analytics (BA). Students will examine BA processes and techniques used in transforming data to knowledge and creating value for organizations. Business cases, presentations by business professionals, class lectures and discussions on data analysis, design and modeling, and extensive hands-on analytical exercises.

MIS 4390: Topics in Management of Information Systems

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: MIS 3010

A variety of topics will be covered and topics may vary between semesters. Some of the topics are information resources management, electronic commerce, decision support systems, and expert systems.

MIS 4400: Supply Chain Information Systems

(Cross-listed with SCM 4400).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MIS 3010, SCM 3010

Internal and inter-organizational information systems necessary for a supply chain to achieve competitive advantage. Topics include: design, development, implementation, and maintenance of supply chain information systems; enterprise resource planning; advanced planning and scheduling, manufacturing execution systems; and the interface between manufacturing planning and control processes, logistics processes, and the information system.

MIS 4450: Enterprise Cybersecurity

Credits: 3. Contact Hours: Lecture 3.

Prereq: MIS 3010

Introduction to the elements of a cybersecurity program in the administrative, technical, and physical security domains. Learn methods to analyze and assess organizational risk and determine appropriate controls, be exposed to offensive and defensive cybersecurity tools in hands-on labs, and explore methods of implementing and maintaining effective cybersecurity programs. Examination of policy, frameworks, laws, regulations, and compliance and how they influence and contribute to cybersecurity programs.

MIS 4460: Advanced Business Analytics

Credits: 3. Contact Hours: Lecture 3.

Prereq: (MIS 3200 or ACCT 3840) and credit or enrollment in STAT 3260 or STAT 3410

Projects-based course which provides an in-depth understanding of BA methods of visualization, data mining, text mining, web-mining, and predictions through the use of specific BA tools. For students who are interested in understanding advanced techniques and applications of data analytics and acquiring hands-on skills for making intelligent business decisions in data-rich organizations.

MIS 4470: Information Systems Development

Credits: 3. Contact Hours: Lecture 3.

Prereq: MIS 3010 and MIS 3100

Design of business systems using contemporary tools and methods such as SQL, CASE tools, OOD tools, etc. Focuses on synthesizing concepts from earlier MIS courses.

MIS 4500: Enterprise Resource Planning Systems in Supply Chain

(Cross-listed with SCM 4500).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (MIS 3010 and SCM 3010) or (IE 1480 and IE 3410)

Enterprise Resource Planning Systems in Supply Chain.

MIS 4900: Independent Study

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

MIS 4950: Executive Presentation and Analysis

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: MIS 3010

Students explore different practical scenarios related information systems projects and cases. Students acquire necessary skills and knowledge to solve practical issues associated with presented cases and problems. Students compete at different venues around the country. Graduation Restriction: Only 3 credits of MIS 4950 may count as a MIS major or minor choice elective. (Typically Offered: Fall)

Courses primarily for graduate students, open to qualified undergraduates:

MIS 5010: Management Information Systems

Credits: 3. Contact Hours: Lecture 3.

Current theories and practices appropriate for understanding the role and application of information systems for individuals, organizations, and society within a globally competitive context. Focus on information technology and its uses in improving work practices, products, and tools for individuals and organizations. Issues pertaining to current and emerging topics in the development and use of technology, the role of technology in and its alignment with organizational strategy and sustainable business practices, information system planning and the development of enterprise architectures, and human interface and personal characteristics in the design and use of technology. (Typically Offered: Fall, Spring)

MIS 5100X: Blockchain and Cryptocurrency

(Dual-listed with MIS 4100X).

Credits: 3. Contact Hours: Lecture 3.

The design and application aspects of blockchain technologies, cryptocurrencies, and the key value these technologies bring - distributed consensus and trust disintermediation. Study of how blockchain technology works with consideration to its potential disruptive impact on business and society. Key concepts include mining, hashing, proof-of-work, proof-of-stake, public key cryptography, smart contracts, and the double-spend problem. (Typically Offered: Fall)

MIS 5150: Big Data for Business

Credits: 3. Contact Hours: Lecture 3.

Understanding the issues and challenges of data from multiple sources, different velocities, in large volumes with questionable veracity. (Typically Offered: Fall)

MIS 5200X: Healthcare Analytics

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

A project-based course that provides an in-depth understanding of Healthcare Analytics methods of visualization, data mining, and predictions through the use of specific analytics tools. For students interested in understanding advanced techniques and applications of healthcare analytics and acquiring hands-on skills to apply to medicine and healthcare. (Typically Offered: Spring)

MIS 5210X: Health Care Data Privacy, Security & Compliance

Credits: 3. Contact Hours: Lecture 3.

Focus on healthcare data, the intricacies of security and privacy in the healthcare industry, and problems with compliance and reporting. Exposure to many sorts of data sources and data components used in healthcare as a health IT professional. Emphasis on fundamental terms used in healthcare data as well as the delicate nature of protected health information. Detailed coverage of HIPAA and the dangers of security lapses, malware, and phishing. In depth attention of some of the most significant laws and rules that are unique to the healthcare industry and the significance of compliance. (Typically Offered: Fall)

MIS 5320: Programming Foundations for Business Analytics

Credits: 3. Contact Hours: Lecture 3.

Explores the application of structured programming techniques for business analytics. Topics include data collection, processing, analysis, and more. Focus is on individual and group activities that reinforce skills development and provide the basis for later advanced work in data modeling. (Typically Offered: Summer)

MIS 5330: Data Management for Decision Makers

Credits: 3. Contact Hours: Lecture 3.

Addresses data needs of functions such as marketing, finance, and production. Advanced skills needed to design, develop and use database, data warehousing and data mining systems for effective decision support. Emphasis on importance of contemporary technologies.

MIS 5350: Networks and Information Security Management

Credits: 3. Contact Hours: Lecture 3.

Issues involved in the management of telecommunications function. Overview of communications technology used in various business applications, local area network, wide area network, broad band network, wireless and voice networks. Internet technologies and protocols. Analyzing the strategic impact of these technologies on organizations. Strategic planning for telecommunications, including network planning and analysis.

MIS 5360: Business Analytics Foundation

Credits: 3. Contact Hours: Lecture 3.

Introduction to Business Analytics (BA) concepts and tools. Hands-on lab exercises and business case studies in data preparation, data querying and data visualization. Also covers various modeling techniques in predictive and prescriptive analytics.

MIS 5370: Project Management

Credits: 3. Contact Hours: Lecture 3.

Prepares students to support team activities in the general project management environment and provides them with a working understanding of the full scope of project management activities. Students will also have practical experience using project management techniques and tools. Course topics include project initiation and execution, risk assessment, estimating and contracts, planning, human factors, and standard methods. The course follows the recommended content areas of the Project Management Institute, and provides students with a recognized foundational training in project management.

MIS 5380: Business Process Systems

Credits: 3. Contact Hours: Lecture 3.

Examine current and historical perspectives on business process management. Topics include process identification, mapping, and improvement. Additional topics will address business process automation and integration, business process outsourcing. Investigate current and potential tools and methods for business process management. Include process management projects.

MIS 5390: Topics in Management of Information Systems

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

A variety of topics may be offered in different semesters. Topics may include electronic commerce, information resources management, decision support systems, and expert systems.

MIS 5410: Analytics in Finance

(Cross-listed with FIN 5410).

Credits: 3. Contact Hours: Lecture 3.

Introduction to Business Analytics (BA) in finance and the insurance industry. The concepts and tools discussed in this course, to be followed and complemented by more advanced courses in the area. Basic analytical thinking and business acumen focusing on applications from finance and insurance. Practical data analytic skills based on building real analytic applications on real data. (Typically Offered: Spring)

MIS 5440: Social Media Business Applications and Analytics

Credits: 3. Contact Hours: Lecture 3.

The role of new collaborative social technologies and analysis of social media data. Exploration of strategic and operational applications of social media and of tools that support the analysis of social network and social media data. Application of text analysis and social network theory. (Typically Offered: Summer)

MIS 5450: Enterprise Cybersecurity Management

Credits: 3. Contact Hours: Lecture 3.

Challenges, technologies, and practices of information security management in enterprise operations. (Typically Offered: Spring)

MIS 5460: Advanced Business Analytics

Credits: 3. Contact Hours: Lecture 3.

Prereq: MIS 5360

An in-depth discussion of various advanced topics in Business Analytics (BA) such as Big Data Analytics, Text Analytics, and Web Analytics. Extensive hands-on exercises of using BA tools to solve real-world problems. Preparation for students' capstone projects. (Typically Offered: Fall, Spring)

MIS 5470: Teams, Projects, and Analytics Leadership

Credits: 3. Contact Hours: Lecture 3.

Provides business analytics students with an intensive preparation in teamwork and project management skills necessary to prosper in the program and carry forward into their professional lives. Topics include project management, team management, in class exercises, and case studies. Practical experience using project management techniques and tools. (Typically Offered: Summer)

MIS 5480: Applications of Machine Learning for Business Intelligence

Credits: 3. Contact Hours: Lecture 3.

Introduction to applications for data science concepts in the business domain. As big data, machine learning, business analytics, business intelligence and other concepts grow in business applications, it is essential for students to understand the underlying concepts, data, models, and applications to be successful in a data-driven world. Learn to determine problem types, data restrictions, model selection, tool choice, and analysis of data science concepts for greater business value. (Typically Offered: Fall)

MIS 5510: IT Strategy & Execution

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Explore the building blocks of IT strategy in alignment with the business strategy. Emphasis on business aspects. Evaluate the impact of technologies on IT strategy. Explore IT strategy framework, understand the latest trends and exercise critical thinking with relevant case studies and discussion. Small groups will analyze a fictitious company as assigned and develop a future state IT vision and IT strategy that supports the business goals. Guest lecturers. (Typically Offered: Fall)

MIS 5560: Business Analytics Capstone Project

Credits: 3.

Synthesize analytics concepts, skills, and practices learned during the program of study to complete a course project. Projects proposals relevant to a firm are proposed and accepted midway through the program. Student cohort teams will complete the capstone project under the supervision of an advisory team of faculty. At the completion of the course teams will present their project marking the completion of the program of study. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

MIS 5680: Marketing Analytics

(Cross-listed with MKT 5680).

Credits: 3. Contact Hours: Lecture 3.

Integration of various concepts to solve problems using appropriate tools. Specifically, the course consist of the following three components: (a) help students develop consultative problem-solving skills; (b) introduce various newly developed consumer behavior theories; (c) provide an overview of quantitative models in the field of marketing analytics. Hands-on experiences to enhance skills such as formulating problems, structuring and prioritizing problems, synthesizing results and communicating intuition from complicated analyses. (Typically Offered: Fall, Spring)

MIS 5900: Special Topics

Credits: 1-3. Repeatable, maximum of 3 credits.

Prereq: Instructor Permission for Course

For students wishing to do individual research in a particular area of MIS. (Typically Offered: Fall, Spring, Summer)

MIS 5980: Research Seminar in Management Information Systems

Credits: 3. Contact Hours: Lecture 3.

Examines issues such as the nature and content of information systems research; aspects of starting and pursuing research topics in information systems; exploring and understanding relevant research methods and tools. Develop preliminary research proposals.

MIS 5990: Creative Component

Credits: 3. Repeatable.

Prereq: Instructor Permission for Course

Preparation and writing of creative component.

Courses for graduate students:**MIS 6010: Introduction to Information Systems Research I**

Credits: 3. Contact Hours: Lecture 3.

The state of behavioral research in the IS function. MIS activities in an organization span the following three major areas: design and implementation of the MIS, use of the MIS, and management of the MIS function. Each of these processes is carried out at several levels: individual, group, organizational and inter-organizational. Identify behavioral issues of relevance for the cells defined by the process and level dimensions. Reading and discussion of the research literature surrounding the development, use, and implications of information technology.

MIS 6020: Introduction to Information Systems Research II

Credits: 3. Contact Hours: Lecture 3.

Three fundamental areas of Information Systems, namely, infrastructure, management, and processes. Infrastructure studies examine the IT architecture including computing, communication, data, and application. Management focuses on addressing the value added notion of IT. Finally processing addresses topics related to enabling role of IT in myriad of areas.

MIS 6030: Seminar on IT Strategy and Structure

Credits: 3. Contact Hours: Lecture 3.

Strategic issues in IT management. Address issues such as aligning IT strategy with corporate strategy and functional strategies, IT structure, valuation, governance and control, and related topics. Provide students with research skills related to the boundary between IT and the firm's external environment.

MIS 6040: Collaboration, Knowledge, and Intelligence in Organizations

Credits: 3. Contact Hours: Lecture 3.

Research issues in the emerging areas of collaboration, knowledge management, and enterprise intelligence. Topics will include emerging and contemporary technologies of Data Mining, Knowledge Discovery from Databases, Web Mining, organizational memory, and knowledge management.

MIS 6050: Technical Research Methods in Information Systems

Credits: 3. Contact Hours: Lecture 3.

Focuses on analytical modeling and empirical analyses using methods drawn from economics, management science, and statistics/econometrics, etc. Example topics include economics of information goods; impact of information technologies on firm performance and policy outcomes; and analysis of data generated from social media and business transactions. (Typically Offered: Spring)

MIS 6060: Economic Research Methods in Information Systems

Credits: 3. Contact Hours: Lecture 3.

Focuses on analytical modeling and empirical analyses using methods drawn from economics, management science, and statistics/econometrics, etc. Example topics include economics of information goods; impact of information technologies on firm performance and policy outcomes; and analysis of data generated from social media and business transactions. (Typically Offered: Spring)

MIS 6200: Overview of MIS Research

Credits: 3. Contact Hours: Lecture 3.

Introduce doctoral students to the most cited research in IS, as well as to various behavioral research methods. Readings on research topics will cover categories of IS knowledge including: IS development, IT & individuals, IT & groups, IT & organizations, and IT & markets. Offered odd-numbered years. (Typically Offered: Fall)

MIS 6250: Analytical Research in Information Systems

Credits: 3. Contact Hours: Lecture 3.

Mathematical models to capture the essence or abstractions of real-world problems and applying established techniques to derive optimal solutions or business insights. Application of theories and tools from operations research, economics, computer science, and statistics to tackle problems regarding the development, marketing, utilization, and management of information technologies and systems in organizations and the society. Offered odd-numbered years. (Typically Offered: Spring)

MIS 6300: Empirical Research in MIS

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 2 times.

Intermediate level statistical and econometric methods used in MIS research. Preparation to conduct rigorous longitudinal analyses. Statistical and econometric methods used to examine phenomena that can evolve with the passage of time. Methods used for analyzing cross-sectional data. Application of advanced empirical methods in combination with rigorous theoretical arguments. (Typically Offered: Fall)

MIS 6350: Computational Research in MIS

Credits: 3. Contact Hours: Lecture 3.

Introduction for doctoral students to Information Systems research methods rooted in computational thinking. Topics include important issues in IS research that benefit from computational thinking; and computational methodologies commonly used in IS research.

MIS 6500: Research Practicum I

Credits: 1.

Prereq: Instructor Permission for Course

Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project. (Typically Offered: Fall, Spring, Summer)

MIS 6510: Research Practicum II

Credits: 1.

Prereq: Instructor Permission for Course

Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

MIS 6550: Organizational and Social Implications of Human Computer Interaction

(Cross-listed with HCI 6550).

Credits: 3. Contact Hours: Lecture 3.

Examine opportunities and implications of information technologies and human computer interaction on social and organizational systems. Explore ethical and social issues appurtenant to human computer interaction, both from a proscriptive and prescriptive perspective. Develop informed perspective on human computer interaction. Implications on research and development programs.

MIS 6990: Research

Credits: 3-6. Repeatable.

Prereq: Instructor Permission for Course

Research. (Typically Offered: Fall, Spring, Summer)

Marketing (MKT)

Courses primarily for undergraduates:**MKT 3400: Principles of Marketing**

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment in ECON 1010

The role of marketing in society. Markets, marketing institutions, and marketing functions with emphases on product, price, marketing communication, and marketing channel decisions. (Typically Offered: Fall, Spring, Summer)

MKT 3420: Foundation Of Personal Selling

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

The process of selling and how to sell effectively. Focus on selling in a business environment and applying to concepts to general interpersonal settings in personal life. Students will actively participate in class, collaborate with teammates to develop skills to sell ideas and become more effective in representing themselves and their company and its products and services. Develop skills necessary to build long-term, profitable relationships with clients. (Typically Offered: Fall, Spring)

MKT 3510: Services Marketing

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400

In-depth appreciation and understanding of the unique challenges inherent in creating, managing, and delivering quality services. Students will be introduced to and have the opportunity to work with concepts, tools, and strategies that address these challenges. (Typically Offered: Fall)

MKT 3610: Social Media Marketing Strategy

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400

The course will cover marketing, advertising and communications strategies in the new media landscape where traditional media (e.g., television, print) and the online social media (i.e., Web 2.0; e.g., online social networks, user-generated content, blogs, forums) co-exist. Students will be expected to have knowledge about the fundamentals of traditional advertising methods and strategies. With this background knowledge, the primary focus of this course will be on understanding social media, how to build social media marketing strategies, and how to track their effectiveness. This course will not look at more tactical aspects of advertising/communications such as creative, message management, and publicity. This will first and foremost be a marketing strategy course.

MKT 3620: Digital Marketing

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400

A survey course that explores key topics and competencies that will help formulate a digital marketing strategy and power a digital marketing campaign. Digital marketing is a broader toolkit that includes search engine marketing (SEM), search engine optimization (SEO), content marketing, mobile marketing, email marketing, landing page optimization, social media marketing, and more. (Typically Offered: Fall, Spring, Summer)

MKT 3630X: Creative Tools for Digital Marketing

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

An interactive course that explores the basics of design software (Canva, Photoshop, Lightroom, Illustrator, InDesign), non-linear editing software (Premiere Pro, After Effects, Media Encoder) photography, videography and lighting (DSLR and mobile), and working with and manipulating assets developed by designers to promote companies, brands, events, and products on digital platforms. (Typically Offered: Fall, Spring)

MKT 3670: Consultative Problem Solving

(Cross-listed with MIS 3670).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Consultative problem-solving approach to address complex problems in marketing and related fields. Topics include problem definition, issue tree dis-aggregation, hypotheses development and the Pyramid Principle. Development of skills such as formulating problems, structuring and prioritizing problems, synthesizing results and communicating intuition from quantitative analyses. (Typically Offered: Fall, Spring)

MKT 3680: Marketing Analytics

(Cross-listed with MIS 3680).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400 and STAT 2260 or equivalent

Use of different tools to conduct various analyses to support marketing strategies. Topics include data visualization and exploration, forecasting, social media analytics and other marketing techniques. Development of skills such as structuring problems, and synthesizing results from quantitative analyses. (Typically Offered: Fall, Spring)

MKT 4100: Promotional Strategy

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400

Principles, concepts, and problems involved in the development and implementation of promotional strategies. Coordination of a variety of promotional elements: advertising, sales promotion, direct marketing, public relations and publicity of web communications, and personal selling. (Typically Offered: Fall, Spring)

MKT 4420: Sales Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400 and STAT 2260 or equivalent

Functional aspects of sales force management; personal selling methods; procedures for recruiting, selecting, and training new salespeople; compensation and expense control systems; problems of sales force motivation and supervision; methods of territorial and quota assignment; sales department budgets; distributor-dealer relations; other selected topics. (Typically Offered: Fall, Spring)

MKT 4430: Strategic Marketing Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 4440 and (MKT 3420 or MKT 4470)

Analysis of major elements of strategic marketing management. May include case studies or business simulations involving decision making using marketing tools from previous courses. (For marketing majors only.). (Typically Offered: Fall, Spring, Summer)

MKT 4440: Fundamentals of Marketing Analytics

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400 and STAT 2260 or equivalent

Marketing research techniques: problem formulation, research design, questionnaire construction, sampling, data collection procedures, and analysis and interpretation of data related to marketing decisions. (Typically Offered: Fall, Spring)

MKT 4450: Customer Relationship Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400 and STAT 2260 or equivalent

Examines how customer data can be used to enhance decisions relating to acquisition, development and retention. Topics include customer lifetime value, customer as assets, customer loyalty programs and customization. (Typically Offered: Fall, Spring)

MKT 4470: Consumer Behavior

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400

Study of how consumers select, purchase, use, and dispose of goods and services. Includes analyses of how markets and others influence these processes. Application of concepts and methods of the behavioral sciences to marketing management decision making. (Typically Offered: Fall, Spring)

MKT 4480: Global Marketing

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400

Marketing from a global perspective and familiarity with the problems and perspectives that global companies face. Concepts and principles of marketing strategies, market assessment, identify marketing opportunities, entry decision, emerging markets, effects of political, legal, economic and cultural environments, and decisions relating to segmentation, positioning, branding, product, price, distribution and promotions in a global setting. (Typically Offered: Fall, Spring)

MKT 4500: Advanced Professional Selling

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400; (IE 4500 or MKT 3420)

Analysis of the theory and practice of personal selling with the context of relationship marketing and salesforce automation. Topics include: goal setting, prospecting, time/territory management, questioning, presentations, objections, commitment and customer service; simulations of selling situations.

MKT 4510: Omnichannel Marketing

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400

Focuses on marketing channels, the downstream part of a value chain, companies that come together to bring products and services from their point of origin to the point of consumption. Topics include channel institutions, channel design, channel coordination and implementation. Highlights international and technological aspects of marketing channels so that students can successfully develop and manage marketing channels in a contemporary business environment. (Typically Offered: Fall, Spring)

MKT 4520: Sales Enablement Tools and Technology

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400

An applied study of the concepts, practice, and technical skills required to perform meaningful analytics in support of professional selling. Topics include: nature and aims of sales analytics; customer relationship management platform basics; sales data structure; data visualization; dashboard construction; predictive analytics; artificial intelligence. (Typically Offered: Fall)

MKT 4530: Brand Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400

Examines the role of brands and branding in market environments characterized by intense competition and consumer power. Covers issues relating to why branding is important to firms, what brands represent to consumers, and what should be done to manage them effectively. (Typically Offered: Fall, Spring)

MKT 4540: Entrepreneurial Marketing

(Cross-listed with ENTSP 4540).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400

Basic understanding of marketing for those interested in creating or working for a start-up or an innovation-oriented company or consultancy. Relevant to marketing roles in entrepreneurial firms across both B2B and B2C markets. Integrates theory and practice, and provides insight into how entrepreneurs take both strategic and tactical marketing decisions in uncertain business environments. For hands-on perspective, incorporates projects involving real-world marketing problems confronting start-ups, and guest talks from entrepreneurs and frequent case analyses. (Typically Offered: Fall)

MKT 4550X: Managing for Creativity and Innovation

(Dual-listed with MKT 5550X).

Credits: 3.

Prereq: MKT 3400

Understanding the managerial space between how people enhance their individual creativity and the deployment of human and technology resources at group and department levels. Each class session focuses on a different managerial practice (e.g., hiring, assembling teams, job assignments) and how to enhance organizational creativity through them. Psychological and social factors applicable to those practices and that impinge on creativity will be discussed, and business cases related to the practices will be used to close the gap between theory and practice. (Typically Offered: Spring)

MKT 4560X: Digital Marketing Analytics

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400 and STAT 2260 or equivalent

Digital marketing provides marketers with a lot of consumer data. This course explores topics such as organic and paid search, social media, and email marketing to understand how they contribute to a cohesive online presence. Identification of key performance indicators to determine the performance of the digital marketing activity in each channel, as well as how to leverage these insights to formulate future strategies are key objectives. (Typically Offered: Spring)

MKT 4570X: Digital Marketing Applications in Customer Journey

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400

When visitors interact with your brand (e.g., website), you want to ensure that they have the most memorable and satisfying experience as possible. A customer journey is a story about your users and their interactions along the various touchpoints as they interact with your organization. Customer journey mapping can shorten and personalize the journey, resulting in a more positive experience. Learn how to build awareness, increase consideration, get conversion, enhance retention, and get customer advocacy so that you lay the foundation for a successful and profitable customer journey. These are sought after skills are key to a digital marketer. (Typically Offered: Fall)

MKT 4580X: New Product Marketing

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400 and MKT 4440

A project-driven course focused on the knowledge and skills needed to successfully develop and launch product or service innovations into today's competitive marketplace. From need identification through conceiving, evaluation, and introduction, this course applies foundational marketing principles and processes along with new concepts such as pricing and forecasting. Student teams will work to turn opportunities and ideas into viable businesses, in collaboration with students studying new product design/development in other colleges. (Typically Offered: Fall, Spring)

MKT 4590X: Sustainable Marketing

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: MKT 3400

Focus on sustainable marketing strategies. (Typically Offered: Fall)

MKT 4840: Technology, Globalization and Culture

(Cross-listed with ME 4840/ WLC 4840).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior or Senior Classification

Cross-disciplinary examination of the present and future impact of globalization with a focus on preparing students for leadership roles in diverse professional, social, and cultural contexts. Facilitate an understanding of the threats and opportunities inherent in the globalization process as they are perceived by practicing professionals and articulated in debates on globalization. Use of a digital forum for presenting and analyzing globalization issues by on-campus and off-campus specialists. Meets International Perspectives Requirement. (Typically Offered: Fall)

MKT 4900: Independent Study

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

MKT 4920: Comparative Marketing

Credits: 3. Contact Hours: Lecture 3.

Prereq: MKT 3400

Provides experience to students in culture, social, economic, and political environment of marketing in a foreign country. Students complete a term project (e.g., a marketing plan) based on information collected in the foreign country. Students attend briefings by experts/officials of private and public organizations. (Typically Offered: Summer)

MKT 4950: Live Cases in Marketing

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 credits.

Prereq: MKT 3400

Teamwork with companies to solve their current marketing challenges. Opportunity to gain critical thinking skills, experience with quantitative analysis, client management experience, professional presentation skills, strategies for effective teamwork, practice giving and receiving feedback, and practical marketing experience. Experience will strengthen student resume, make connections with industry, and practice applying marketing concepts in real-world situations. The companies and challenges will be different each semester. Graduation Restriction: Only 3 credits of MKT 4950 may count as a MKT major or minor choice elective. (Typically Offered: Fall, Spring)

Courses primarily for graduate students, open to qualified undergraduates:

MKT 5010: Marketing

Credits: 3. Contact Hours: Lecture 3.

An analytical approach to the study of marketing issues and challenges of business firms and nonprofit organizations. Emphasis on the influence of the global marketplace and the marketing environment on marketing decision making; the determination of the organization's products, prices, channels and communication strategies; an orientation that ensures sustainability of marketing operations; and the organization's system for planning and controlling its marketing effort.

MKT 5420: New Product Strategy and Analytics

Credits: 3. Contact Hours: Lecture 3.

Principles and concepts of new product development and introduction; decision areas include market definition and structure, idea generation, concept evaluation, test marketing, launch tracking, and global product planning; models and techniques of new product evaluation used by consumer product companies. (Typically Offered: Spring)

MKT 5470: Consumer Behavior

Credits: 3. Contact Hours: Lecture 3.

The behavior of consumers. Intensive review of literature from relevant disciplines. Applications of concepts and methods of the behavioral sciences to marketing management decision making. (Typically Offered: Spring)

MKT 5480X: Customer Relationship Management Strategy and Analytics

Credits: 3. Contact Hours: Lecture 3.

Companies are shifting their focus from products to customers in response to increased globalization and intensity of competition in most markets. New technologies and tools that capture customer data in real time are now available because of the Internet revolution. These two trends in combination have opened up a new way of addressing customers and capturing value from customers—termed 'Customer Relationship management'. Focus on the adoption of CRM practices and key strategies that contribute to improved customer and firm performance. Key topics covered include CRM definition and strategy, customer satisfaction and loyalty models, social media and customer engagement, retention and churn models, campaign management and customer value metrics and drivers. Use of customer databases and analytical modeling of important CRM outcomes. Offered even-numbered years. (Typically Offered: Spring)

MKT 5520: Strategic Marketing Analytics

Credits: 3. Contact Hours: Lecture 3.

Integrate various concepts to solve problems in marketing. Enhance skills such as formulating problems, structuring and prioritizing problems, synthesizing results and communicating intuition from complicated analyses. Topics include problem definition, issue tree dis-aggregation and the Pyramid Principle. Overview of various newly developed marketing theories and analytical tools.

MKT 5530X: Brand Management

Credits: 3. Contact Hours: Lecture 3.

With dwindling product differences, branding has become an important managerial tool for developing competitive advantage. A brand name, and its associated brand equity, is one of the most valuable assets any firm has. Although brand management has been in vogue among select consumer product companies for the last 40 to 50 years, service firms and B2B firms have discovered its usefulness only recently. Moreover, management education has not always paid sufficient attention to managing brands. To address this oversight, this course addresses important branding decisions faced by organizations. We believe that knowledge of theory and practice relating to brand management is a must for every marketing student. (Typically Offered: Fall)

MKT 5550X: Managing for Creativity and Innovation

(Dual-listed with MKT 4550X).

Credits: 3.

Understanding the managerial space between how people enhance their individual creativity and the deployment of human and technology resources at group and department levels. Each class session focuses on a different managerial practice (e.g., hiring, assembling teams, job assignments) and how to enhance organizational creativity through them. Psychological and social factors applicable to those practices and that impinge on creativity will be discussed, and business cases related to the practices will be used to close the gap between theory and practice. (Typically Offered: Spring)

MKT 5680: Marketing Analytics

(Cross-listed with MIS 5680).

Credits: 3. Contact Hours: Lecture 3.

Integration of various concepts to solve problems using appropriate tools. Specifically, the course consist of the following three components: (a) help students develop consultative problem-solving skills; (b) introduce various newly developed consumer behavior theories; (c) provide an overview of quantitative models in the field of marketing analytics. Hands-on experiences to enhance skills such as formulating problems, structuring and prioritizing problems, synthesizing results and communicating intuition from complicated analyses. (Typically Offered: Fall, Spring)

MKT 5840: Technology, Globalization and Culture

(Cross-listed with ME 5840/ WLC 5840).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Graduate classification

Cross-disciplinary examination of the present and future impact of globalization with a focus on preparing students for leadership roles in diverse professional, social, and cultural contexts. Facilitate an understanding of the threats and opportunities inherent in the globalization process as they are perceived by practicing professionals and articulated in debates on globalization. Use of a digital forum for presenting and analyzing globalization issues by on-campus and off-campus specialists. Meets International Perspectives Requirement. (Typically Offered: Fall)

MKT 5900: Special Topics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

For students wishing to do individual research in a particular area of marketing.

Courses for graduate students:**MKT 6010: Seminar in Consumer Behavior**

Credits: 3. Contact Hours: Lecture 3.

A rigorous foundation of the major conceptual and methodological paradigms in the consumer-behavior literature. Seeks to aid students in understanding the psychological, sociological, and anthropological roots of consumer behavior research. Read the latest research in the area reported in leading consumer behavior/psychology journals.

MKT 6020: Marketing Strategy

Credits: 3. Contact Hours: Lecture 3.

Review major contributions and recent developments in marketing strategy research and practice. Review commonly used modeling approaches and research methods to study strategic interaction between firms seeking to build competitive advantages. Provide an overview of empirical research regarding measurement, level and persistence of business success and implications of findings for theory and strategy development.

MKT 6030: Marketing Strategy II

Credits: 3. Contact Hours: Lecture 3.

Addresses key strategy and implementation issues behind customer management. Topics such as typology of CM strategies, antecedents and outcomes; environmental and managerial influences on strategy formation; technology and impact on CM strategy; and value of CM strategy. Examine theories and concepts behind important CM issues such as customer satisfaction, customer loyalty and customer profitability.

MKT 6040: Marketing Issues in Inter-Organizational Relations

Credits: 3. Contact Hours: Lecture 3.

Inter-firm and network competition; relationship among suppliers, distributors, alliance partners, external employees, and internal employees. Theories including agency theory, network theory, relationship marketing, channels of distribution theories on cooperation versus competition, IOS theories.

MKT 6050: Marketing Analytics: Quantitative Models and Applications

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Survey of quantitative methods used in the field of marketing analytics. Topics include discrete choice models, unobserved heterogeneity, endogeneity, Hidden Markov models and other newly-developed techniques. Understand, develop and estimate quantitative models and understand main topics in marketing analytics. Offered odd-numbered years. (Typically Offered: Fall)

MKT 6060: Seminar in Consumer Behavior II

Credits: 3. Contact Hours: Lecture 3.

A rigorous foundation of the major conceptual and methodological paradigms in the consumer-behavior literature. Seeks to further develop and study issues contained in MKT 6010. Offered odd-numbered years. (Typically Offered: Fall)

MKT 6500: Research Practicum I

Credits: 1.

Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

MKT 6510: Research Practicum II

Credits: 1.

Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

MKT 6990: Dissertation

Credits: 12. Repeatable.

Research.

Materials Engineering (MATE)

Courses primarily for undergraduates:

MATE 1010: Materials Science & Engineering Learning Community Seminar

Credits: Required. Contact Hours: Lecture 1.

Introduction to the Materials Science & Engineering Department and resources available to support student success. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

MATE 1700: Numeric, Symbolic, and Graphical Methods for Materials Engineering

Credits: 3.

Prereq: ENGR 1600

Introduction to computer-based problem solving techniques including data analysis, data visualization, and materials simulation using spreadsheet, array, and symbolic methods that are necessary for materials science. Introduction to 3D CAD with consideration for additive manufacturing techniques. (Typically Offered: Spring)

MATE 2140: Structural Characterization of Materials

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: (MATE 2150 or MATE 2730 or MATE 3920); PHYS 2310

Structural characterization of materials. Techniques include optical and electron microscopy, x-ray diffraction, and thermal analysis. Identification of materials type, microstructure, and crystal structure. (Typically Offered: Fall, Spring)

MATE 2150: Introduction to Materials Science and Engineering I

Credits: 3. Contact Hours: Lecture 3.

Prereq: (CHEM 1670 or CHEM 1770); MATH 1650

Introduction to the structure and properties of engineering materials. Structure of crystalline solids and imperfections. Atomic diffusion. Mechanical properties and failure of ductile and brittle materials. Dislocations and strengthening mechanisms. Phase equilibria, phase transformations, microstructure development, and heat treatment principles of common metallurgical systems including steels and aluminum alloys. Engineering applications. Graduation Restriction: Only one of MATE 2150, MATE 2730, or MATE 3920 may count toward graduation. (Typically Offered: Fall, Spring)

MATE 2150L: Introduction to Materials Science and Engineering I - Lab

Credits: 1. Contact Hours: Laboratory 2.

Prereq: MATE 2150 or MATE 2730 or MATE 3920

Materials Engineering majors only. Laboratory exercise in materials. (Typically Offered: Fall, Spring)

MATE 2160: Introduction to Materials Science and Engineering II

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATE 2150, MATE 2730 or MATE 3920; credit or enrollment in PHYS 2320

Materials Engineering majors only. Fundamentals of ceramic, polymeric, and composite materials; electronic, thermal, magnetic, and optical properties of materials. Materials for energy, biomaterials, and nanomaterials. (Typically Offered: Fall, Spring)

MATE 2160L: Introduction to Materials Science and Engineering II - Lab

Credits: 1. Contact Hours: Laboratory 2.

Prereq: Credit or enrollment in MATE 2160

Materials Engineering majors only. Laboratory exercise in materials. (Typically Offered: Fall, Spring)

MATE 2200: Globalization and Sustainability

(Cross-listed with ANTHR 2200/ ENVS 2200/ GLOBE 2200/ ME 2200/ SOC 2200).

Credits: 3. Contact Hours: Lecture 3.

An introduction to understanding the key global issues in sustainability. Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Graduation Restriction: Cannot be used for technical elective credit in any engineering department. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

MATE 2730: Principles of Materials Science and Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: (CHEM 1670 or CHEM 1770); MATH 1650

Introduction to the structure and properties of engineering materials. Structure of crystalline solids and imperfections. Atomic diffusion. Mechanical properties and failure of ductile and brittle materials. Dislocations and strengthening mechanisms. Phase equilibria, phase transformations, microstructure development, and heat treatment principles of common metallurgical systems including steels and aluminum alloys. Structure and mechanical properties of ceramic, polymeric and composite materials. Thermal properties of materials. Corrosion and degradation. Basic electronic properties of materials. Engineering applications. Graduation Restriction: Only one of MATE 2150, MATE 2730, or MATE 3920 may count toward graduation. (Typically Offered: Fall, Spring)

MATE 3010: Materials Engineering Professional Planning

Credits: Required. Contact Hours: Lecture 1.

Prereq: Sophomore classification and MATE majors only

Preparation for a career in industry or advanced study in graduate school; Lectures and guest speakers discuss various topics, including: experiential learning, resumes, interviewing, leadership, networking, professional ethics, and graduate school opportunities. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

MATE 3110: Thermodynamics in Materials Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 1780, MATE 2150 or MATE 2730 or MATE 3920, and credit or enrollment in MATE 2160 and MATH 2670

Basic laws of thermodynamics applied to phase equilibria, transformations, and reactions in multicomponent multiphase materials systems; thermodynamic descriptions of heterogeneous systems; binary and ternary phase diagrams; interfaces, surfaces, and defects. (Typically Offered: Fall)

MATE 3140: Kinetics and Phase Equilibria in Materials

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATE 2140; MATE 2160; MATE 3110

Kinetic phenomena and phase equilibria relevant to the origins and stability of microstructure in metallic, ceramic and polymeric systems. Application of thermodynamics to the understanding of stable and metastable phase equilibria, interfaces and their effects on stability: defects and diffusion, empirical rate equations for transformation kinetics, driving forces and kinetics of nucleation, diffusional and diffusionless phase transformations. (Typically Offered: Spring)

MATE 3170: Introduction to Electronic Properties of Materials

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATE 2160; PHYS 2320

Materials Engineering majors only. Introduction to electronic properties of materials and their practical applications. Classical conduction models and electronic properties of metallic and ceramic materials. Elementary quantum mechanics and band theory of electron states in solids. Quantum theory of metallic conduction. Elementary semiconductor theory and devices. Polarization and dielectric properties of materials. (Typically Offered: Fall)

MATE 3190: Mechanics of Structures and Materials

Credits: 3. Contact Hours: Lecture 3.

Prereq: PHYS 2310; credit or concurrent enrollment in MATH 1660

Fundamentals of engineering mechanics as applied to materials. Forces and moments; stresses in loaded bodies; elasticity and stress analysis including stress / strain relationships. Graduation Restriction: Only one of MATE 3190 or EM 3240 may be used for graduation requirements. (Typically Offered: Spring)

MATE 3210: Introduction to Ceramic Science

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATE 2160

Ceramic crystal structures, defects, diffusion and transport. Phase equilibria and microstructures. Thermal, electronic, optical and magnetic properties of ceramics. (Typically Offered: Fall)

MATE 3220: Introduction to Ceramic Processing

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: MATE 3210

Synthesis and characterization of ceramic powders. Colloidal phenomena, rheology of suspensions, ceramic forming methods, and drying. High temperature ceramic reactions, liquid and solid-state sintering, grain growth, microstructure development. Processing/ microstructure/property relationships. (Typically Offered: Spring)

MATE 3320: Semiconductor Materials and Devices

(Cross-listed with EE 3320).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CPRE and EE majors: EE 2300, MATE majors: MATE 3170

Introduction to semiconductor material and device physics. Quantum mechanics and band theory of semiconductors. Charge carrier distributions, generation/recombination, transport properties. Physical and electrical properties and fabrication of semiconductor devices such as MOSFETs, bipolar transistors, laser diodes and LED's. (Typically Offered: Spring)

MATE 3340: Electronic & Magnetic Properties of Metallic Materials

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATE 3170

Electronic conduction in metals and the properties of conducting materials. Quantum mechanical behavior of free electrons and electrons in potentials wells, bonds and lattices. Development of the band theory of electron states in solids and the Free and Nearly Free Electron models. Density-of-states in energy bands and the Fermi-Dirac statistics of state occupancy. Quantum mechanical model of metallic conduction; Brillouin zones and Fermi surfaces. Additional topics include the thermal properties of metals, electron phase transitions in metallic alloys and the BCS theory of superconductivity. Classical and quantum mechanical treatment of the origins of magnetism in materials; orbital and spin angular momentum. Theory of magnetic behavior in dia-, para-magnetic, ferromagnetic materials. Offered odd-numbered years. (Typically Offered: Spring)

MATE 3410: Metals Processing

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATE 2150 or MATE 2730 or MATE 3920

Theory and practice of metal processing, including: extractive metallurgy; casting and solidification; welding and joining; deformation processes (e.g., forging, extrusion); powder metallurgy; and additive manufacturing. (Typically Offered: Fall)

MATE 3420: Structure/Property Relations in Nonferrous Metals

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATE 2150 or MATE 2730 or MATE 3920

Physical properties of non-ferrous metals and their dependence on compositions microstructure and microstructures. Strengthening mechanisms in non-ferrous metals and alloys. Principles and practices to engineer compositions and processes to enhance these properties. Shape memory and elastocaloric alloy development and applications. (Typically Offered: Spring)

MATE 3480: Solidification Processes

(Cross-listed with IE 3480).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: IE 2480 and MATE 2730, or MATE 2150

Theory and applications related to metal casting, welding, polymer processing, powder metallurgy, and composites manufacturing, and related rapid manufacturing processes. (Typically Offered: Spring)

MATE 3500: Polymers and Polymer Engineering.

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATE 2160 or MATE 2730 or MATE 3920

Fundamental concepts of soft matter, including polymer, colloid and surfactant. Their physical and chemical properties, rheology and production methods. Applications of polymers in the chemical industry. Related topics in surface, diffusion and stability. (Typically Offered: Spring)

MATE 3510: Introduction to Polymeric Materials

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATE 2160

Introduction to polymer synthesis, structure, and properties. Develop a foundation in polymer chemistry and physics for in-depth polymer engineering. Relationship between polymer composition, processing, and properties. (Typically Offered: Fall)

MATE 3620: Principles of Nondestructive Testing

(Cross-listed with EM 3620).

Credits: 3. Contact Hours: Lecture 3.

Prereq: PHYS 1320 OR PHYS 2320 or PHYS 2320H

Radiography, ultrasonic testing, magnetic particle inspection, eddy current testing, dye penetrant inspection, and other techniques. Physical bases of nondestructive tests, materials to which applicable, effects of material condition, types of defects detectable, calibration standards, and reliability safety precautions. (Typically Offered: Spring)

MATE 3620L: Nondestructive Testing Laboratory

(Cross-listed with EM 3620L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment in MATE 3620 or EM 3620

Application of nondestructive testing techniques to the detection and sizing of flaws in materials and to the characterization of material's microstructure. Included are experiments in hardness, dye penetrant, magnetic particle, x-ray, ultrasonic and eddy current testing. (Typically Offered: Fall, Spring)

MATE 3910: Introduction to US Women's Roles in Industry and Preparation for Summer Study

Credits: 3. Contact Hours: Lecture 3.

Prereq: Instructor Permission for Course

Introduction to the historical role of women as related to US industry, family and community with emphasis on the years 1830 - 1945, but also related to the current climate. Topics completed in 3920 with arranged lectures at Brunel University. Orientation for Brunel summer study program. Graduation Restriction: Credit for graduation allowable only upon completion of summer study abroad program. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

MATE 3920: Principles of Materials Science and Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: (CHEM 1670 or CHEM 1770); MATH 1650; MATE 3910

Introduction to the structure and properties of engineering materials. Structure of crystalline solids and imperfections. Atomic diffusion. Mechanical properties and failure of ductile and brittle materials. Dislocations and strengthening mechanisms. Phase equilibria, phase transformations, microstructure development, and heat treatment principles of common metallurgical systems including steels and aluminum alloys. Structure and mechanical properties of ceramic, polymeric and composite materials. Thermal properties of materials. Corrosion and degradation. Basic electronic properties of materials. Engineering applications. Graduation Restriction: Only one of MATE 2150, MATE 2730, or MATE 3920 may count toward graduation. Meets International Perspectives Requirement. (Typically Offered: Summer)

MATE 4130: Materials Design and Professional Practice I

Credits: 3. Contact Hours: Lecture 3.

Prereq: Senior classification or above

Fundamentals of engineering team behavior and professional preparation; Materials selection and design. Analysis of design problems, development of solutions, selected case studies. Oral presentation skills. Preparations for continued project in MATE 4140. MATE 4130-4140 sequence is intended for students in their final two semesters before graduation. (Typically Offered: Fall, Spring)

MATE 4140: Materials Design and Professional Practice II

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: MATE 4130

Team projects specified by either industry or academic partners. Written and oral final project reports. Integration of materials processing, structure/composition, properties and performance principles in materials engineering problems. Multi-scale design of materials, materials processing, case studies including cost analysis, ethics, risk and safety. (Typically Offered: Fall, Spring)

MATE 4180: Mechanical Behavior of Materials

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATE 2160; Credit or enrollment in MATE 3190

Mechanical behavior of ceramics, metals, polymers, and composites. Relationships between materials processing and atomic aspects of elasticity, plasticity, creep, fracture, and fatigue. Life prediction, stress-and failure analysis. (Typically Offered: Fall)

MATE 4190: Magnetism and Magnetic Materials

(Cross-listed with EE 4190).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EE 3110 or MATE 3170 or PHYS 3640

Introduction to thermal and catalytic processes for the conversion of biomass to biofuels and other biobased products. Topics include gasification, fast pyrolysis, hydrothermal processing, syngas to synfuels, and bio-oil upgrading. Application of thermodynamics, heat transfer, and fluid dynamics to bioenergy and biofuels. Offered odd-numbered years. (Typically Offered: Fall).

MATE 4250: Glass Science and Engineering

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: MATE 3210

Composition, structure, properties manufacturing, and applications of inorganic glasses. Mechanical, structural, thermal, optical, ionic, electronic, and biological applications of inorganic glasses, especially silicate glasses. Contemporary topics in glass science and engineering such as glass optical fiber communication and flat panel display technologies. Laboratory exercises in the preparation and characterization of silicate glasses. (Typically Offered: Fall)

MATE 4320: Microelectronics Fabrication Techniques

(Cross-listed with EE 4320).

Credits: 4. Contact Hours: Lecture 2, Laboratory 4.

Prereq: CPRE and EE majors: EE 2300, MATE majors: MATE 3170

Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and micro-electro-mechanical systems (MEMS).

MATE 4330: Advanced Ceramics and Electronic Materials

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATE 3170 and MATE 3210

Charged point defects and formation equations. Non-stoichiometric conductors, dielectric, ferroelectric, and piezoelectric materials and applications. Optical properties, optical spectra of materials, optoelectronic devices. Magnetic and superconducting materials. Contemporary topics in advanced ceramics. (Typically Offered: Spring)

MATE 4370: Electronic Properties of Materials

(Cross-listed with EE 4370).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EE 3320 or MATE 3170 or PHYS 3220

Magnetic fields, flux density and magnetization. Magnetic materials, magnetic measurements. Magnetic properties of materials. Domains, domain walls, domain processes, magnetization curves and hysteresis.

Types of magnetic order, magnetic phases and critical phenomena.

Magnetic moments of electrons, theory of electron magnetism.

Technological application, soft magnetic materials for electromagnets, hard magnetic materials, permanent magnets, magnetic recording technology, biomedical applications of magnetism, magnetic evaluation of materials. (Typically Offered: Spring)

MATE 4430: Physical Metallurgy of Ferrous Alloys

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATE 3110

Production and processing of ferrous metals. Extraction of pig iron from ore. Steelmaking processes. Equilibrium and nonequilibrium phases in the Fe-C system. Properties and processing of cast irons, plain carbon and alloy steels, stainless and specialty steels. Transformation diagrams, hardenability, and surface treatments. Continuous casting, forging, hot rolling, quenching, and tempering as they apply to ferrous materials.

Cost and mechanical performance considerations in cast iron and steel selection and heat treatment. (Typically Offered: Fall)

MATE 4440: Corrosion and Failure Analysis

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: MATE 2150 or MATE 2730 or MATE 3920

Failure analysis. Characteristics of common types of metallic failures, case studies of failures, designing to reduce failure risk. Corrosion and corrosion control of metallic systems. Fundamentals of corrosion and oxidation, classification of different types of metallic corrosion/oxidation, their properties of various engineering alloys, and their engineering control. (Typically Offered: Spring)

MATE 4520: Scanning and Auger Electron Microscopy

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: PHYS 2320

Characterization of materials using scanning electron microscopes (SEM) and variants thereof, including electron microprobe, Auger spectrometer, and DualBeam focused ion beams (FIB)/SEMs).

Compositional determination using energy and wavelength dispersive x-ray and Auger spectroscopies. Orientation determination using electron backscattered diffraction. Specimen preparation. Laboratory covers SEM operation. (Typically Offered: Fall)

MATE 4530: Physical and Mechanical Properties of Polymers

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: MATE 3510

Overview of polymer chemical composition, microstructure, thermal and mechanical properties, rheology, and principles of polymer materials selection. Intensive laboratory experiments include chemical composition studies, microstructural characterization, thermal analysis, and mechanical testing. (Typically Offered: Fall)

MATE 4540: Polymer Composites and Processing

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATE 3510

Basic concepts in polymer composites, blends, and block copolymers.

Phase separation and miscibility, microstructures and mechanical behavior. Fiber reinforced and laminated composites. Viscosity, rheology, viscoelasticity of polymers. Polymer melt processing methods such as injection molding and extrusion; selection of suitable processing methods and their applications. (Typically Offered: Spring)

MATE 4560: Biomaterials

(Dual-listed with MSE 5560). (Cross-listed with BME 4560).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 1780 and (MATE 2160 or MATE 2730 or MATE 3920)

Presentation of the basic chemical and physical properties of biomaterials, with special emphasis on metallic, ceramic, polymeric, and composite biomaterials, as they are related to their manipulation by the engineer for incorporation into living systems. Role of microstructure and properties needed to select and design biomaterials used in medical devices, artificial organs, implants, and prostheses. Overview of medical science vis-à-vis materials science. (Typically Offered: Fall)

MATE 4570: Chemical and Physical Metallurgy of Rare Earth Metals

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATE 3110 or CHEM 3250

Electronic configuration, valence states, minerals, ores, beneficiation, extraction, separation, metal preparation and purification. Crystal structures, phase transformations and polymorphism, and thermochemical properties of rare earth metals. Chemical properties: inorganic and organometallic compounds, alloy chemistry, nature of the chemical bonding. Physical properties: mechanical and elastic properties, magnetic properties, resistivity, and superconductivity. Offered even-numbered years. (Typically Offered: Spring)

MATE 4880: Eddy Current Nondestructive Evaluation

(Cross-listed with EE 4880).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 2650 and (MATE 2160 or MATE 2730 or MATE 3920 or EE 3110 or PHYS 3640)

Electromagnetic fields of various eddy current probes. Probe field interaction with conductors, crack and other material defects. Ferromagnetic materials. Layered conductors. Elementary inversion of probe signals to characterize defects. Special techniques including remote-field, transient, potential drop nondestructive evaluation and the use of Hall sensors. Practical assignments using a 'virtual' eddy current instrument will demonstrate key concepts. Offered odd-numbered years. (Typically Offered: Fall)

MATE 4900: Independent Study

Credits: 1-30. Repeatable.

Prereq: Department Permission for Course

Investigation of individual research or special topics. Independent study that is being proposed to be used toward graduation or minor requirements. This course requires an approved proposal to the MSE Department's Undergraduate Curriculum Committee prior to the beginning of the semester. (Typically Offered: Fall, Spring, Summer)

MATE 4900H: Independent Study: Senior Honors Project

Credits: 1-30.

Prereq: Department Permission for Course

Independent study that is being proposed to be used for an honors project. This course requires an approved proposal to the College of Engineering Honors Committee. (Typically Offered: Fall, Spring, Summer)

MATE 4990: Undergraduate Research Opportunity

Credits: Required. Repeatable, maximum of 12 times.

Prereq: Department Permission for Course

Independent study working in research lab with faculty member. Designed to allow students opportunity to gain experience that may assist them in obtaining future employment. Graduation Restriction: The course cannot be applied toward any graduation requirements. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Materials Science and Engineering (MSE)

Courses primarily for graduate students, open to qualified undergraduates:

MSE 5010: Fundamentals of Materials Science and Engineering I

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

An examination of structure-property-process relationships in materials, focusing on control and measurement of end-use performance characteristics. Materials design fundamentals are discussed as they pertain to various critical industries, applications, and manufacturing technologies. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

MSE 5020: Fundamentals of Materials Science and Engineering II

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 1 credits.

An examination of the physical behavior of materials, as underpinned by multiphase multicomponent thermodynamics, transport phenomena, interfaces, defect structures, the kinetics of phase transformations, and the mechanistic origins of structure-property-processing relationships in various types of materials. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

MSE 5030: Fundamentals of Materials Science and Engineering III

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Directed study of advanced topics in Materials Science and Engineering. Fundamental principles and relationships connecting structure, chemistry, stability, physical behavior, properties, and processing response are reviewed. Experimental and computational methods for materials research are emphasized. Offered on a satisfactory-fail basis only. (Typically Offered: Summer)

MSE 5100: Fundamentals of Structure and Chemistry of Materials

Credits: 3. Contact Hours: Lecture 3.

Geometric and algebraic representations of symmetry. Pair distribution function. Structure, chemistry, and basic properties of covalent, ionic, and metallic solids, glasses and liquids, and polymers. Interactions of materials with particles and waves. Relationships between direct and reciprocal spaces. The kinematical theory of diffraction, with an introduction to the dynamical theory. (Typically Offered: Fall)

MSE 5190: Magnetism and Magnetic Materials

(Dual-listed with EDUC 5190). (Cross-listed with EE 5190).

Credits: 3. Contact Hours: Lecture 3.

Magnetic fields, flux density and magnetization. Magnetic materials, magnetic measurements. Magnetic properties of materials. Domains, domain walls, domain processes, magnetization curves and hysteresis. Types of magnetic order, magnetic phases and critical phenomena. Magnetic moments of electrons, theory of electron magnetism. Technological application, soft magnetic materials for electromagnets, hard magnetic materials, permanent magnets, magnetic recording technology, magnetic measurements of properties for materials evaluation. Offered odd-numbered years. (Typically Offered: Fall)

MSE 5200: Thermodynamics and Kinetics in Multicomponent Materials

Credits: 3. Contact Hours: Lecture 3.

A review of the fundamental principles of heat, work, basic thermodynamic relations, and criteria for equilibrium. Analytical treatments for the thermodynamic description of multicomponent chemical solutions and reacting systems are developed and employed to predict phase equilibria in materials systems. Builds on the thermodynamic construction to treat the kinetics of chemical reactions and phase transformations. Topics include general first order and second order transitions, along with chemical diffusion. Detailed examples involving nucleation and diffusion limited growth, spinodal decomposition, martensitic transformations, magnetic and electric transitions, and glass formation will be considered. (Typically Offered: Fall)

MSE 5210: Mechanical Behavior and Manufacturing of Polymers and Composites

(Cross-listed with ME 5210).

Credits: 3. Contact Hours: Lecture 3.

Effect of chemical structure and morphology on properties. Linear viscoelasticity, damping and stress relaxation phenomena. Structure and mechanics of filler and fiber reinforced composites. Mechanical properties and failure mechanisms. Material selection and designing with polymers. Processing of polymer and composite parts. (Typically Offered: Spring)

MSE 5300: Solid State Science

Credits: 3. Contact Hours: Lecture 3.

Development of a quantitative description of the electronic structure of solids starting with fundamentals of atoms, atomic bonding, basic crystallography, and band theory of solids. Continuum properties of solids in response to electromagnetic fields and thermal gradients. Quantitative description of the atomistic properties of solids through electron-electron interactions, electron-phonon interactions, and dipole interactions. (Typically Offered: Spring)

MSE 5320: Microelectronics Fabrication Techniques

(Cross-listed with EE 5320).

Credits: 4. Contact Hours: Lecture 2, Laboratory 4.

Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and micro-electro-mechanical systems (MEMS).

MSE 5370: Electronic Properties of Materials

(Cross-listed with EE 5370).

Credits: 3. Contact Hours: Lecture 3.

Magnetic fields, flux density and magnetization. Magnetic materials, magnetic measurements. Magnetic properties of materials. Domains, domain walls, domain processes, magnetization curves and hysteresis. Types of magnetic order, magnetic phases and critical phenomena. Magnetic moments of electrons, theory of electron magnetism. Technological application, soft magnetic materials for electromagnets, hard magnetic materials, permanent magnets, magnetic recording technology, biomedical applications of magnetism, magnetic evaluation of materials. (Typically Offered: Spring)

MSE 5400: Mechanical Behavior of Materials

Credits: 3. Contact Hours: Lecture 3.

Mechanical behavior of materials with emphasis on micromechanics of deformation in three generic regimes: elasticity, plasticity, and fracture. A materials science approach is followed to understand and model the mechanical behavior that combines continuum mechanics, thermodynamics, kinetics, and microstructure. Some topics include elastic properties of materials, permanent deformation mechanisms at different temperatures (e.g., via dislocation motion and creep), and fracture in ductile and brittle materials. Specific classes of materials that are studied: metals, ceramics, polymers, glasses and composites. (Typically Offered: Spring)

MSE 5500: Nondestructive Evaluation

(Cross-listed with EM 5500).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Principles of five basic NDE methods and their application in engineering inspections. Materials behavior and simple failure analysis. NDE reliability, and damage-tolerant design. Advanced methods such as acoustic microscopy, laser ultrasonics, thermal waves, and computed tomography are analyzed. Computer-based experiments on a selection of methods: ultrasonics, eddy currents, x-rays are assigned for student completion. (Typically Offered: Spring)

MSE 5510: Characterization Methods in Materials Science

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Characterization of ceramic, metal, polymer and glassy materials using modern analytical techniques. Spectroscopic (IR, Raman, UV/VIS/NIR, and NMR), thermal (DSC, DTA/TGA, and DMA) methods, mechanical and rheological testing, magnetic and electrical characterization, and powder characterization. (Typically Offered: Spring)

MSE 5520: Scanning and Auger Electron Microscopy

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Characterization of materials using scanning electron microscopes (SEM) and variants thereof, including electron microprobe, Auger spectrometer, and DualBeam focused ion beams (FIB)/SEMs). Compositional determination using energy and wavelength dispersive x-ray and Auger spectroscopies. Orientation determination using electron backscattered diffraction. Specimen preparation. Laboratory covers SEM operation. (Typically Offered: Fall)

MSE 5530: Physical and Mechanical Properties of Polymers

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Overview of polymer chemical composition, microstructure, thermal and mechanical properties, rheology, and principles of polymer materials selection. Intensive laboratory experiments include chemical composition studies, microstructural characterization, thermal analysis, and mechanical testing. (Typically Offered: Fall)

MSE 5540: Polymer Composites and Processing

Credits: 3. Contact Hours: Lecture 3.

Basic concepts in polymer composites, blends, and block copolymers. Phase separation and miscibility, microstructures and mechanical behavior. Fiber reinforced and laminated composites. Viscosity, rheology, viscoelasticity of polymers. Polymer melt processing methods such as injection molding and extrusion; selection of suitable processing methods and their applications. (Typically Offered: Spring)

MSE 5560: Biomaterials

(Dual-listed with BME 4560/ MATE 4560).

Credits: 3. Contact Hours: Lecture 3.

Presentation of the basic chemical and physical properties of biomaterials, with special emphasis on metallic, ceramic, polymeric, and composite biomaterials, as they are related to their manipulation by the engineer for incorporation into living systems. Role of microstructure and properties needed to select and design biomaterials used in medical devices, artificial organs, implants, and prostheses. Overview of medical science vis-à-vis materials science. (Typically Offered: Fall)

MSE 5570: Chemical and Physical Metallurgy of Rare Earth Metals

Credits: 3. Contact Hours: Lecture 3.

Electronic configuration, valence states, minerals, ores, beneficiation, extraction, separation, metal preparation and purification. Crystal structures, phase transformations and polymorphism, and thermochemical properties of rare earth metals. Chemical properties: inorganic and organometallic compounds, alloy chemistry, nature of the chemical bonding. Physical properties: mechanical and elastic properties, magnetic properties, resistivity, and superconductivity. (Typically Offered: Spring)

MSE 5640: Fracture and Fatigue

(Cross-listed with AERE 5640/ ME 5640/ EM 5640).

Credits: 3. Contact Hours: Lecture 3.

Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue. Offered even-numbered years. (Typically Offered: Fall)

MSE 5690: Mechanics of Composite and Combined Materials

(Cross-listed with AERE 5690/ EM 5690).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EM 3240

Mechanics of fiber-reinforced materials. Micromechanics of lamina. Macromechanical behavior of lamina and laminates. Strength and interlaminar stresses of laminates. Failure criteria. Stress analysis of laminates. Thermal moisture and residual stresses. Joints in composites. Offered even-numbered years. (Typically Offered: Spring)

MSE 5800X: Introduction of Project Management for Thesis Research

(Cross-listed with CHE 5800X/ IE 5800X).

Credits: 1. Contact Hours: Lecture 1.

Tools and skills of Project Management (PM) adapted from industry to improve efficiency in thesis research. Project charter initiation for thesis, timeline and meeting scheduling tools, expectation management, and communication with advisors. Practice of the PM skills using student's own thesis. Presentation of a project charter. Demonstration of knowledge of related PM skills and the ability of utilizing these skills for thesis research. Sharing thesis ideas and learning experience in the Graduate for Advancing Professional Skills (GAPS) learning community. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

MSE 5810: Computational Modeling of Materials

Credits: 3. Contact Hours: Lecture 3.

Introduction to the basic methods used in the computational modeling and simulation of materials, from atomistic simulations to methods at the mesoscale. Students will be expected to develop and run sample programs. Topics to be covered include, for example, electronic structure calculations, molecular dynamics, Monte Carlo, phase-field methods, etc. (Typically Offered: Fall)

MSE 5880: Eddy Current Nondestructive Evaluation

(Cross-listed with EE 5880).

Credits: 3. Contact Hours: Lecture 3.

Electromagnetic fields of various eddy current probes. Probe field interaction with conductors, crack and other material defects. Ferromagnetic materials. Layered conductors. Elementary inversion of probe signals to characterize defects. Special techniques including remote-field, transient, potential drop nondestructive evaluation and the use of Hall sensors. Practical assignments using a 'virtual' eddy current instrument will demonstrate key concepts. Offered odd-numbered years. (Typically Offered: Fall)

MSE 5900: Special Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

MSE 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**MSE 6010: Materials Seminar**

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Seminar course - presentations given on a weekly basis by leading U.S. and International researchers that are experts in their respective fields closely related to Materials Science. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

MSE 6200: Fundamentals of Phase Transformations

Credits: 3. Contact Hours: Lecture 3.

Explores various advanced theoretical treatments of the energetics and kinetics of multicomponent materials. Topics include analytical and computational descriptions of thermodynamic quantities, experimental measurement of essential physical properties, analytical and computational treatments of kinetic processes, and the use of theoretical predictions of phase equilibria and evolution in materials systems. (Typically Offered: Spring)

MSE 6300: Physical Properties of Solids

Credits: 3. Contact Hours: Lecture 3.

Advanced course in the behavior of solids within the framework of solid state physics and chemistry. Includes magnetic, dielectric, transport, and optical phenomena in solids. Influence of phase transformations and crystal symmetry on the physical properties.

MSE 6510: Powder Diffraction Methods

Credits: 3. Contact Hours: Lecture 3.

Advanced structural characterization of materials using powder diffraction. Production of X-ray and neutron radiation. Review of symmetry, group and kinematical theories of diffraction. Mathematical and computational backgrounds of powder diffraction data. Introduction to single crystal diffraction methods, origin of powder diffraction pattern, history of the technique. Modern powder diffraction methods. Indexing of powder diffraction patterns, figures of merit, precise lattice parameters. Phase problem, determining crystal structures from symmetry and geometry, Patterson, direct and Fourier methods. Rietveld method, precise crystal structures: atomic parameters, qualitative and quantitative phase identification, preferred orientation, grain size, strain, residual stress, order-disorder. Powder diffraction at non-ambient conditions. Applications of powder diffraction: data bases, phase transformations, phase diagrams, local structures, magnetism. (Typically Offered: Spring, Summer)

MSE 6520: Transmission Electron Microscopy

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Theory and application of transmission electron microscopy to inorganic materials. Specimen preparation, selected area and convergent beam electron diffraction, bright field/dark field/high resolution imaging. Compositional analysis using X-ray and electron energy loss spectroscopy. (Typically Offered: Spring)

MSE 6900: Advanced Topics in Materials Science

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

MSE 6970: Engineering Internship

Credits: Required. Repeatable.

One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

MSE 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Mathematics (MATH)

Courses primarily for undergraduates:

MATH 1010: Orientation in Mathematics

Credits: 1. Contact Hours: Lecture 1.

A required orientation for all first-year and transfer students in mathematics. Provides information about campus resources and opportunities available to students, assists with transition to the University, and academic planning. Offered on a satisfactory/fail basis only. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

MATH 1040: Introduction to Probability

Credits: 3. Contact Hours: Lecture 3.

Prereq: Satisfactory math placement test score (ALEKS 15+)

Permutations, combinations, probability, expected value, and applications. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>.

Graduation Restriction: Either MATH 1040 or MATH 1500 may be counted toward graduation, but not both. (Typically Offered: Fall, Spring, Summer)

MATH 1050: Introduction to Mathematical Ideas

Credits: 3. Contact Hours: Lecture 3.

Prereq: Satisfactory math placement test score (ALEKS 15+)

Introduction to the use of basic mathematics to solve real-world problems in the areas of voting issues, measuring power in situations where people have different numbers of votes, apportionment, fair division, and elementary game theory. No prior background in politics or history is necessary for this course. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. (Typically Offered: Fall, Spring, Summer)

MATH 1390: College Algebra Supplement

Credits: 1. Contact Hours: Lecture 1.

Prereq: Satisfactory math placement test score (ALEKS 15+)

Math concepts to provide supplemental assistance with course topics of MATH 1400. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

MATH 1400: College Algebra

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Prereq: Satisfactory math placement test score (ALEKS, 39+) or concurrent enrollment in MATH 139

Coordinate geometry, quadratic and polynomial equations, functions, graphing, rational functions, exponential and logarithmic functions, inverse functions, quadratic inequalities, systems of linear equations. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. (Typically Offered: Fall, Spring, Summer)

MATH 1430: Preparation for Calculus

Credits: 4. Contact Hours: Lecture 2, Discussion 2.

Prereq: Satisfactory performance on placement assessment or MATH 1400

Preparation for MATH 1600 or MATH 1650. Functions, graphing, basic trigonometry, logarithms, exponentials. Emphasis on co-variational reasoning. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>.

Graduation Restriction: Only one of MATH 1430 and MATH 1450 may count toward graduation. (Typically Offered: Fall, Spring)

MATH 1450: Applied Trigonometry

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Prereq: Satisfactory performance on placement assessment or MATH 1400

Mathematical ideas regarding the conception of space. General trigonometry, with an emphasis on the calculation of lengths, areas, and angles. The Law of Sines and the Law of Cosines. Polar, cylindrical, and spherical coordinate systems. Conic sections and quadric surfaces.

Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of MATH 1430 and MATH 1450 may count toward graduation. (Typically Offered: Fall, Spring)

MATH 1490: Discrete Mathematics for Business and Social Sciences Supplement

Credits: 1. Contact Hours: Lecture 1.

Prereq: Satisfactory math placement test score (ALEKS 15+)

Math concepts to provide supplemental assistance with course topics of MATH 1500. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

MATH 1500: Discrete Mathematics for Business and Social Sciences

Credits: 3. Contact Hours: Lecture 3.

Prereq: Satisfactory math placement test score (ALEKS, 39+)

Linear equations and inequalities, matrix algebra, linear programming, discrete probability. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Either MATH 1040 or MATH 1500 may be counted toward graduation, but not both. (Typically Offered: Fall, Spring, Summer)

MATH 1510: Calculus for Business and Social Sciences

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Prereq: Satisfactory math placement test score (ALEKS, 51+)

Differential calculus, applications to max-min problems, integral calculus and applications. Will not serve as prerequisite for MATH 2650 or MATH 2660. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of MATH 1510, MATH 1600, or the sequence MATH 1650-MATH 1660 may be counted towards graduation. (Typically Offered: Fall, Spring, Summer)

MATH 1600: Survey of Calculus

Credits: 4. Contact Hours: Lecture 4.

Prereq: Satisfactory performance on placement assessment or minimum of C- in (MATH 1400 or MATH 1430)

Analytic geometry, derivatives and integrals of elementary functions, simple differential equations, and applications. Will not serve as a prerequisite for MATH 2650 or MATH 2660. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of MATH 1510, MATH 1600, or the sequence MATH 1650-MATH 1660 may be counted towards graduation. (Typically Offered: Fall, Spring)

MATH 1630X: Elements of Calculus

Credits: 4. Contact Hours: Lecture 4.

Preparation for MATH 1600 and MATH 1650. Functions, graphing, basic trigonometry, logarithms, exponentials, limits, continuity, basics of differentiation. Graduation Restriction: Only one of MATH 1630 and MATH 1650 may count toward graduation. Also, only one of MATH 1430 and MATH 1630 may count toward graduation. (Typically Offered: Fall)

MATH 1640X: Advanced Elements of Calculus

Credits: 3. Contact Hours: Lecture 4.

Advanced differentiation, applications of the derivative, introduction to integral calculus. Graduation Restriction: Only one of MATH 1510 or MATH 1600 or MATH 1640 or MATH 1650 may be counted towards graduation. (Typically Offered: Spring)

MATH 1650: Calculus I

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Prereq: Minimum C- in MATH 1430 or satisfactory score on placement exam

Differential calculus, applications of the derivative, introduction to integral calculus. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of MATH 1510, MATH 1600, or the sequence MATH 1650-MATH 1660 may be counted towards graduation. (Typically Offered: Fall, Spring, Summer)

MATH 1660: Calculus II

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Prereq: MATH 1650 or satisfactory placement on Calculus II placement exam (by department permission)

Integral calculus, applications of the integral, parametric curves and polar coordinates, power series and Taylor series. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of MATH 1510, MATH 1600, or the sequence MATH 1650-MATH 1660 may be counted towards graduation. (Typically Offered: Fall, Spring, Summer)

MATH 1660H: Calculus II: Honors

Credits: 4. Contact Hours: Lecture 4.

Prereq: MATH 1650 or satisfactory placement on Calculus II placement exam (by department permission)

Integral calculus, applications of the integral, parametric curves and polar coordinates, power series and Taylor series. Additional material of a theoretical, conceptual, computational, or modeling nature. Some of the work may require more ingenuity than is required for MATH 1660. Preference will be given to students in the University Honors Program. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation restriction: Only one of MATH 1510 or MATH 1600, or the sequence MATH 1650-MATH 1660 may be counted towards graduation. (Typically Offered: Fall)

MATH 1950: Mathematics for Elementary Education I

Credits: 3.

Prereq: Satisfactory performance on placement assessment; Early or Elementary Education major

Whole number operations through analysis of properties, theoretical and hands-on models, mathematical analysis of elementary students' thinking; standard and non-standard algorithms; structure of the decimal system; linear measurement; two- and three-dimensional measurement, shapes and spatial sense; number theory; algebra as it relates to elementary curricula/teaching profession. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Students in the College of Liberal Arts and Sciences may not count MATH 1950 toward General Education Requirements. (Typically Offered: Fall, Spring)

MATH 1960: Mathematics for Elementary Education II

Credits: 3.

Prereq: Minimum of C- in MATH 1950 and enrollment in elementary education or early childhood education.

Integer, fraction and decimal operations through analysis of properties, theoretical and hands-on models, mathematical analysis of elementary students' thinking; standard and non-standard algorithms; continuation of two- and three-dimensional measurement, shapes and spatial sense; probability and statistics; proportional reasoning; algebra as it relates to elementary curricula/teaching profession. (Typically Offered: Fall, Spring)

MATH 2010: Introduction to Proofs

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 1660 or MATH 1660H

Transition to advanced mathematics. Communicating mathematics. Logical arguments; techniques of proofs regarding sets, numbers (natural and real), functions, relations, and limits. (Typically Offered: Fall, Spring)

MATH 2020: Career Development in Math and Statistics

(Cross-listed with STAT 2020).

Credits: 1. Contact Hours: Laboratory 2.

Career development in the mathematics and statistics disciplines with an emphasis on contemporary social issues. Presentations by professionals in STEM fields about occupations, decision-making strategies, and career goal implementation; development of job searching, resume writing, negotiating, and interviewing techniques. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

MATH 2070: Matrices and Linear Algebra

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 1660 or MATH 1660H

Systems of linear equations, determinants, vector spaces, linear transformations, orthogonality, least-squares methods, eigenvalues and eigenvectors. Emphasis on applications and techniques. Graduation Restriction: Only one of MATH 2070 and MATH 3170 may be counted toward graduation. (Typically Offered: Fall, Spring, Summer)

MATH 2300: Discrete Computational Structures

(Cross-listed with COMS 2300).

Credits: 3. Contact Hours: Lecture 3, Discussion 1.

Prereq: Minimum of C- in COMS 2270 and MATH 1650; ENGL 1500

Concepts in discrete mathematics as applied to computer science. Logic, set theory, functions, relations, cardinality of sets, combinatorics, graph theory and number theory. Proof techniques, induction and recursion. (Typically Offered: Fall, Spring, Summer)

MATH 2400: Mathematics of Investment and Credit

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 1660 or MATH 1660H

Interest rates, time value of money, annuities. Loans, bonds, yield rates. Term structure of interest rates, asset and liability management. Duration, convexity, immunization. (Typically Offered: Fall, Spring)

MATH 2650: Calculus III

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Prereq: Minimum of C- in MATH 1660 or MATH 1660H

Geometry of space and vectors, multivariable differential calculus, multivariable integral calculus, vector calculus. (Typically Offered: Fall, Spring, Summer)

MATH 2650H: Calculus III: Honors

Credits: 4. Contact Hours: Lecture 4.

Prereq: Permission of the instructor; and minimum of C- in MATH 1660 or MATH 1660H

Geometry of space and vectors, multivariable differential calculus, multivariable integral calculus, vector calculus. Additional material of a theoretical, conceptual, computational, or modeling nature. Some of the work may require more ingenuity than is required in MATH 2650. Preference will be given to students in the University Honors Program. (Typically Offered: Fall, Spring)

MATH 2660: Elementary Differential Equations

Credits: 3. Contact Hours: Lecture 3.

Prereq: Minimum of C- in MATH 1660 or MATH 1660H

Solution methods for ordinary differential equations. First order equations, linear equations, constant coefficient equations. Eigenvalue methods for systems of first order linear equations. Introduction to stability and phase plane analysis. Graduation Restriction: Credit for either MATH 2670 or the MATH 2660, 2680 pair of courses, but not both, may be applied toward graduation. Credit for only one of the following courses may be applied toward graduation: MATH 2670, MATH 2660, MATH 2690. (Typically Offered: Fall, Spring, Summer)

MATH 2670: Elementary Differential Equations and Laplace Transforms

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Prereq: Minimum of C- in MATH 1660 or MATH 1660H

Same as MATH 2660 but also including Laplace transforms and power series solutions to ordinary differential equations. Graduation Restriction: Credit for either MATH 2670 or the MATH 2660, 2680 pair of courses, but not both, may be applied toward graduation. Credit for only one of the following courses may be applied toward graduation: MATH 2670, MATH 2660, MATH 2690. (Typically Offered: Fall, Spring, Summer)

MATH 2680: Laplace Transforms

Credits: 1. Contact Hours: Lecture 1.

Prereq: MATH 2660; Department Permission

Laplace transforms and power series solutions to ordinary differential equations. Graduation Restriction: Credit for either MATH 2670 or the MATH 2660, 2680 pair of courses, but not both, may be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

MATH 2690: Systems of Differential Equations

Credits: 1. Contact Hours: Lecture 1.

Prereq: Department Permission for Course

Systems portion of MATH 2660 and MATH 2670: Eigenvalue methods for systems of first order linear equations. Introduction to stability and phase plane analysis. For students supplementing transfer courses in differential equations in order to earn credit in MATH 2660 or 2670. Familiarity with ordinary differential equations of first and second order required. Graduation Restriction: Students with credit in MATH 2660 or MATH 2670 may not earn credit in MATH 2690. (Typically Offered: Fall, Spring, Summer)

MATH 2900: Independent Study

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Independent study.

MATH 2900H: Independent Study: Honors

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Independent study.

MATH 2970: Intermediate Topics for School Mathematics

Credits: 3.

Prereq: Minimum of C- in MATH 1960; Early or Elementary Education major
Mathematical reasoning and topics in Euclidean and non-Euclidean geometry, including transformations, congruence, and similarity; exploration of probability with simulations; linearity and connections to Calculus; fractals and fractal dimension. (Typically Offered: Fall)

MATH 3010: Abstract Algebra I

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 1660 or MATH 1660H, MATH 3170, and grade of C- or better in MATH 2010

Basic properties of integers, divisibility and unique factorization. Polynomial rings over a field. Congruence. Introduction to abstract rings, homomorphisms, ideals. Roots and irreducibility of polynomials. Introduction to groups. Emphasis on proofs. (Typically Offered: Fall, Spring)

MATH 3040: Combinatorics

Credits: 3. Contact Hours: Lecture 3.

Prereq:

(MATH 1660 or MATH 1660H); (MATH 2010 or COMS 2300 or CPRE 3100)

Enumeration strategies involving permutations, combinations, partitions, binomial coefficients, inclusion-exclusion principle, recurrence relations, generating functions. Additional topics selected from probability, algebraic combinatorics, and applications. (Typically Offered: Fall)

MATH 3140: Graph Theory

Credits: 3. Contact Hours: Lecture 3.

Prereq:

(MATH 1660 or MATH 1660H); (MATH 2010 or COMS 2300 or CPRE 3100)

Structure and extremal properties of graphs. Topics are selected from: trees, networks, colorings, paths and cycles, connectivity, planarity, directed graphs, matchings, Ramsey theory, forbidden structures, enumeration, applications. (Typically Offered: Spring)

MATH 3170: Theory of Linear Algebra

Credits: 4. Contact Hours: Lecture 4.

Prereq: Credit or concurrent enrollment in MATH 2010 or COMS 2300 or CPRE 3100

Systems of linear equations, determinants, vector spaces, inner product spaces, linear transformations, eigenvalues and eigenvectors. Emphasis on writing proofs and results. Graduation Restriction: Only one of MATH 2070 and MATH 3170 may be counted toward graduation. (Typically Offered: Fall, Spring)

MATH 3410: Introduction to the Theory of Probability and Statistics I

(Cross-listed with STAT 3410).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: MATH 2650 or MATH 2650H

Probability; distribution functions and their properties; classical discrete and continuous distribution functions; multivariate probability distributions and their properties; moment generating functions; transformations of random variables; simulation of random variables and use of the R statistical package. Graduation Restriction: Credit for only one of the following courses may be applied toward graduation: STAT 3410, STAT 3470, STAT 4470, or STAT 5880. (Typically Offered: Fall, Spring)

MATH 3420: Introduction to the Theory of Probability and Statistics II

(Cross-listed with STAT 3420).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: (MATH 2070 or MATH 3170); (STAT 1010 or STAT 1040 or STAT 1050 or STAT 2010 or STAT 2260 or STAT 2310 or STAT 3050 or STAT 3220 or STAT 3300); STAT 3410

Sampling distributions; confidence intervals and hypothesis testing; theory of estimation and hypothesis tests; linear model theory; resampling methods; introduction to Bayesian inference; use of the R statistical package for simulation and data analysis. (Typically Offered: Fall, Spring)

MATH 3500: Number Theory

(Cross-listed with COMS 3500).

Credits: 3. Contact Hours: Lecture 3, Discussion 1.

Prereq: COMS 2300 or CPRE 3100 or MATH 2010

Divisibility, integer representations, primes and divisors, linear diophantine equations, congruences, and multiplicative functions. Applications to cryptography. Additional topics, chosen at the discretion of the instructor. (Typically Offered: Spring)

MATH 3650: Complex Variables with Applications

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 2650

Functions of a complex variable, including differentiation, integration, series, residues, and conformal mappings. (Typically Offered: Spring)

MATH 3730: Introduction to Scientific Computing

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 2650

Vector and matrix programming and graphing in MATLAB for scientific applications. Polynomial interpolation and approximation. Systems of linear equations and numerical linear algebra. Numerical differentiation and integration. Root-finding methods for solving nonlinear equations and optimization in one and several variables. Fast Fourier transform. Emphasis on effective use of mathematical software and understanding of its strengths and limitations. (Typically Offered: Fall)

MATH 3850: Introduction to Partial Differential Equations

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 2650 and one of MATH 2660, MATH 2670

Method of separation of variables for linear partial differential equations, including heat equation, Poisson equation, and wave equation. Topics from Fourier series, Sturm-Liouville theory, Bessel functions, spherical harmonics, and method of characteristics. (Typically Offered: Fall, Spring)

MATH 3920X: Mathematical Communication

Credits: 3. Contact Hours: Lecture 3.

Principles of mathematical communication. How to create convincing logical arguments in written, oral, and visual formats. Using LaTeX for document preparation. (Typically Offered: Fall)

MATH 3970: Teaching Secondary Mathematics Using University Mathematics

Credits: 3.

Prereq: MATH 2010 and MATH 3010
