* Choose elective courses to total equal to or greater than 120 credits.

This sequence is only an example. The number of credits taken each semester should be based on the individual student's situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point considerations.

More information on the Food Science, Food Safety, and Food and Society minors can be found here: <http://catalog.iastate.edu/collegeofhumansciences/foodscienceandhumannutrition/#undergraduateminortext>.

The Department of Food Science and Human Nutrition offers a Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) in Food Science and Technology. More information can be found here: <https://www.grad-college.iastate.edu/academics/programs/apresults.php?id=50>.

Food Science and Human Nutrition

The Department of Food Science and Human Nutrition is jointly administered by the College of Agriculture and Life Sciences and the College of Human Sciences. All curricula offered by the department are available to students in either college. These majors include:

- Culinary food science
- Dietetics
- Diet and exercise
- Food science
- Nutritional science
- Nursing

Visit the department web site at: www.fshn.hs.iastate.edu (<http://www.fshn.hs.iastate.edu>).

Undergraduate Study

Culinary Food Science

Culinary food science is an interdisciplinary degree combining a strong food science foundation with acquisition of culinary skills. The program includes chemistry, organic chemistry, biology, microbiology, and biochemistry as well as quantity food production, fine dining management, and food safety and sanitation. Internship experience in the food industry or culinary business is required. Culinary food science graduates are qualified to work as managers and specialists in food research, product development, culinary applications, and food marketing and sales. For more information: <https://fshn.hs.iastate.edu/find-your-major/culinary-food-science/>

Dietetics

The Didactic Program in Dietetics (DPD) is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. The dietetics undergraduate curriculum meets the academic requirements as the DPD. Additionally, the curriculum for concurrent bachelor's and master's degrees in diet and exercise meets the academic requirements of the DPD. Graduates of the program are eligible to apply for admission to accredited dietetics internships/supervised practice programs. Upon successful completion of the experience program and a master's degree, graduates are eligible to take the national examination administered by the Commission on Dietetic Registration to become a Registered Dietitian Nutritionist (RDN) and to practice in the field of dietetics. There is a \$30 fee for a statement of verification of completion of the DPD.

For information about verification statements policies, see the dietetics program website: <https://fshn.hs.iastate.edu/find-your-major/dietetics/>.

The dietetics program includes study in basic sciences, nutrition, and food science with applications to medical dietetics, nutrition counseling and education, and community nutrition. Foodservice management is also an important aspect of the program. Graduates work in clinical settings, consulting, food companies, food services, sports or athletic programs, corporate wellness programs, care facilities for patients from neonatal to geriatric, and community or school health programs.

Diet and Exercise

A program for concurrent Bachelor of Science and Master of Science (B.S./M.S.) degrees in diet and exercise (<https://fshn.hs.iastate.edu/find-your-major/diet-and-exercise/>) is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FSHN), within the College of Agriculture and Life Sciences and College of Human Sciences, and the Department of Kinesiology within the College of Human Sciences. Students interested in this program enroll as pre-diet and exercise students. In the fall of the third year, students apply for admission to the BS/MS program. Students not accepted into the program can continue toward completion of the BS degree in dietetics or kinesiology and health. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of B.S./M.S. degrees in diet and exercise.

Food Science

Food science is a discipline in which the principles of biological and physical sciences are used to study the nature of foods, the causes of their deterioration, and the principles underlying the processing and preparation of food. It is the application of science and technology to the provision of a safe, wholesome, and nutritious food supply. Biotechnology and toxicology interrelate with food science in the area of food safety. In the food industry, food scientists work in research and development of products or processes, production supervision, quality control, marketing and sales, test kitchens and recipe development, product promotion and communication. Food scientists also work in government regulatory agencies and academic institutions.

The food science major is approved by the Institute of Food Technologists, the national professional organization of food science. Career options include quality control/assurance; production supervision; management and sales; research careers in the food industry, government, or academia; business; journalism; food product formulation and recipe development; food promotion and communication; and consumer services in government and industry. For more information: <https://fshn.hs.iastate.edu/find-your-major/food-science/>

Students in food science have the opportunity to pursue a Master of Business Administration (<http://www.fshn.hs.iastate.edu/undergraduate-programs/food-science/>) (MBA) concurrently with the Bachelor of Science (B.S.) degree in food science. The program is designed so students can earn both the B.S. in food science and MBA in five years, to meet the needs of students who are interested in management careers in the food industry. Students apply for admission to the MBA program in the spring of the third year. The program for concurrent B.S. in food science/MBA degrees is a rigorous 5-year program, and admission is very selective.

Nutritional Science

Nutritional science looks at the connection between diet and health. Students learn how diet can play a crucial role in the cause, treatment, and prevention of many diseases. There are degree program focuses within nutritional science. The pre-health and research coursework prepares students for work in research laboratories, graduate study in nutrition or biological sciences, or entrance into health professional programs, such as medical, dental, physician assistant, and pharmacy schools. Students gain a strong science education along with human nutrition expertise. The health coach and nutrition and wellness coursework prepare students for work positions in program planning and evaluation for community, public health, non-profit, and corporate wellness programs addressing the growing public interest in nutrition, wellness, and preventative health. Students learn about the role of nutrition and healthy eating for disease prevention and wellness. For more information: <https://fshn.hs.iastate.edu/find-your-major/nutritional-science/>

Nursing

The Bachelor of Science in Nursing (BSN) program at Iowa State University is a RN-to-BSN program, designed for those who are already a Registered Nurse (RN), and desire to further their nursing career and education to the next level. Iowa State's RN-to-BSN program provides interactive learning opportunities where students can apply their real-world experiences and education to inspire innovation in their places of care. RN-to-BSN students will be challenged to enhance health promotion and disease prevention, apply nursing science and evidenced-based patient-centered care, focus on the culture of health for nurses, individuals, and communities, and demonstrate the continuum of care, from a nurse's self-care to patient care to community and population health.

The baccalaureate nursing program at Iowa State University of Science and Technology located in Ames, Iowa is approved by the:

Iowa Board of Nursing (IBON)

Riverpoint Business Park
400 SW 8th St., Suite B
Des Moines, IA 50309

(515) 281-3255

The baccalaureate nursing program at Iowa State University of Science and Technology located in Ames, Iowa is accredited by the:

Accreditation Commission for Education in Nursing (ACEN)

3390 Peachtree Road NE, Suite 1400

Atlanta, GA 30326

(404) 975-5000

The most recent accreditation decision made by the ACEN Board of Commissioners for the baccalaureate nursing program is initial accreditation.

View the public information disclosed by the ACEN regarding this program at <http://www.acenursing.com/accreditedprograms/programSearch.htm>. (<http://www.acenursing.com/accreditedprograms/programSearch.htm>)

For more information and RN-to-BSN learning outcomes: <https://fshn.hs.iastate.edu/find-your-major/nursing/>

FSHN Departmental Learning Outcomes

Upon graduation, students should be able to:

- Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
- Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
- Participate effectively in a group or team.
- Integrate creativity, innovation, or entrepreneurship in ways that produce value.
- Describe sociocultural competence relative to diversity, equity and/or inclusion.
- Explain how human activities impact the natural environment and how societies are affected.
- Meet program specific learning outcomes.

For more information: <https://fshn.hs.iastate.edu/staff-and-faculty/resources/outcomes-assessment/learning-outcomes/>.

Communication Proficiency is certified by a grade of C or better in 6 credits of coursework in composition (ENGL 1500 Critical Thinking and Communication and ENGL 2500 Written, Oral, Visual, and Electronic Composition or other communication-intensive courses) and a grade of C or better in 3 credits of coursework in oral communication.

Minors - Undergraduate

The department offers minors in:

- culinary food science
- food and society

- food safety (interdepartmental minor)
- food science
- nutrition

All minors require at least 15 credits, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Prerequisites: Students must complete prerequisite requirements for courses included in the minor.

Minor in Culinary Food Science

FSHN 1010	Food and the Consumer	3
FSHN 1150	Food Preparation Laboratory	1-2
or FSHN 2150	Advanced Food Preparation Laboratory	
FSHN 2140	Scientific Study of Food	3
Select additional credits from the following list for a minimum of 15 credits for the minor:		
FSHN 2200	American Food and Culture	3
FSHN 3050	Food Quality Management and Control	2
FSHN 3110	Food Chemistry	4
& 3110L	and Food Chemistry Laboratory	
FSHN 4030	Food Laws and Regulations	2
FSHN 4110	Food Ingredient Interactions and Formulations	2
FSHN 4910D	Supervised Work Experience: Culinary Science	1-4
ANS 2700	Foods of Animal Origin	3
& 2700L	and Foods of Animal Origin Laboratory	
ANS 4600	Science and Technology of Value Added Meat Products	3
HSPM 1330	Food Safety Certification	1
HSPM 3800	Food Production Management	6
& 3800L	and Food Production Management Experience	
HSPM 3830	Wine and Spirits in Hospitality Management	2
or FSHN 5090	Sensory Evaluation of Wines	
HSPM 4870	Fine Dining Management	3

Minor in Food and Society (16-17 credits required)

FSHN 1010	Food and the Consumer	3
FSHN 1670	Introductory Human Nutrition and Health	3
FSHN 2420	The US Food System	3
FSHN 3420	World Food Issues: Past and Present	3
FSHN 4420	Issues in Food and Society	2
Select 2-3 additional credits from:		2-3
AGRON 4500	Issues in Sustainable Agriculture	

FSHN 2200	American Food and Culture	
FSHN 3640	Nutrition and Prevention of Chronic Disease	
FSHN 3650	Obesity and Health	
FSHN 4030	Food Laws and Regulations	
FSHN 4600	Global Nutrition, Health and Sustainability	
FSHN 4630	Community Nutrition and Health	
FSHN 4960A	Food Science and Human Nutrition Travel Course: International travel	
MATE 2200	Globalization and Sustainability	
SOC 3450	Population and Society	
SOC 3480	Global Poverty, Resources and Sustainable Development	
SOC 4440	Sociology of Food and Agricultural Systems	

Interdepartmental Minor in Food Safety

FSHN 1010	Food and the Consumer	3
or HSPM 2330	Hospitality Sanitation and Safety	
FSHN 4030	Food Laws and Regulations	2
FSHN 4200	Food Microbiology	3
FSHN 4890	Issues in Food Safety	1

Select 3 credits from the Food Microbiology area

FSHN/MICRO 4070	Microbiological Safety of Foods of Animal Origins	
FSHN/MICRO 4210	Food Microbiology Laboratory	
MICRO 3100	Medical Microbiology	

Select 3 credits from the Food Processing area:

FSHN 2070	Processing of Foods: Basic Principles and Applications	
FSHN 3050	Food Quality Management and Control	
ANS 2700 & 2700L	Foods of Animal Origin and Foods of Animal Origin Laboratory	
ANS 3600	Fresh Meat Science and Applied Muscle Biology	
FSHN 4710	Food Processing	
FSHN 4720	Food Processing Laboratory	

Minor in Food Science:

FSHN 1010	Food and the Consumer	3
FSHN 2070	Processing of Foods: Basic Principles and Applications	3

Select 9 additional credits:

Food chemistry:		
FSHN 3110	Food Chemistry (lab optional: FSHN 3110L)	3

FSHN 4100	Food Analysis	3
FSHN 4110	Food Ingredient Interactions and Formulations	2
Food microbiology:		
FSHN 4070	Microbiological Safety of Foods of Animal Origins	3
FSHN 4190	Foodborne Hazards	3
FSHN 4200	Food Microbiology	3
FSHN 4210	Food Microbiology Laboratory	3
Food processing/engineering:		
FSHN 3510	Introduction to Food Engineering Concepts	3
FSHN 4710	Food Processing	3
FSHN 4720	Food Processing Laboratory	2

General food science:

FSHN 3050	Food Quality Management and Control	2
FSHN 4030	Food Laws and Regulations	2
FSHN 4060	Sensory Evaluation of Food	3

Select additional credits from the following list to meet a minimum of 15 credits for the minor:

FSHN 3140	Professional Development for Culinary Food Science and Food Science Majors	1
FSHN 3150	Professional Skills for Culinary Food Science and Food Science Majors	1

Minor in Nutrition: For students from outside the FSHN department

FSHN 1670	Introductory Human Nutrition and Health	3
FSHN 2650	Nutrition for Active and Healthy Lifestyles	3
FSHN 3600	Advanced Nutrition and the Regulation of Metabolism in Health and Disease	3

Select at least 6 credits from:

FSHN 3610	Nutrition and Health Assessment	2
FSHN 3620	Nutrition and Health Throughout the Lifecycle	3
FSHN 3640	Nutrition and Prevention of Chronic Disease	3
FSHN 3650	Obesity and Health	3
FSHN 4630	Community Nutrition and Health	3
FSHN 4670	Molecular Basis of Nutrition in Disease Etiology and Health Promotion	3
FSHN 4920	Research Concepts in Human Nutrition	2
NUTRS 5010	Biochemical and Physiological Basis of Nutrition: Macronutrients and Micronutrients	4

Minor in Nutrition: For students majoring in culinary food science or food science

FSHN 2650	Nutrition for Active and Healthy Lifestyles	3
FSHN 3600	Advanced Nutrition and the Regulation of Metabolism in Health and Disease	3

Select at least 9 credits from:

FSHN 3610	Nutrition and Health Assessment	2
FSHN 3620	Nutrition and Health Throughout the Lifecycle	3
FSHN 3640	Nutrition and Prevention of Chronic Disease	3
FSHN 3650	Obesity and Health	3
FSHN 4630	Community Nutrition and Health	3
FSHN 4670	Molecular Basis of Nutrition in Disease Etiology and Health Promotion	3
FSHN 4920	Research Concepts in Human Nutrition	2
NUTRS 5010	Biochemical and Physiological Basis of Nutrition: Macronutrients and Micronutrients	4

Graduate Study

The Food Science and Human Nutrition (FSHN) Department offers coursework for the degrees master of science and doctor of philosophy with majors in food science and technology and in nutritional sciences, and minors in food science and technology and in nutrition. Graduate work in meat science is offered as a co-major in animal science and food science and technology.

Prerequisite to major work is a baccalaureate degree in food science, nutrition, or other physical or biological sciences or engineering that is substantially equivalent to those at Iowa State University.

Students taking major work for the degree doctor of philosophy either in food science and technology or in nutritional sciences may choose minors from other fields including anthropology, biorenewable resources and technology, chemistry, biochemistry, economics, education, journalism, microbiology, psychology, physiology, statistics, toxicology, or other related fields.

The Food Science and Technology (FST) graduate program offers MS and PhD degrees in the general areas of Food Chemistry and Functionality, Food Safety and Microbiology, and Food Processing. The FST core curriculum and interdisciplinary faculty team provides holistic graduate student training. Individuals with an undergraduate or graduate degree from a variety of academic training backgrounds, such as food sciences and the various disciplines of biology, chemistry, and agricultural sciences, may enter the FST program.

The interdepartmental graduate program in nutritional sciences, administered through the Graduate College, under the auspices of the Chairs of FSHN and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. Graduate students will be able to select from three specializations: animal nutrition, human nutrition, or molecular/biochemical nutrition. The three main departments are FSHN, Animal Science, and Kinesiology, whereas other departments (such as; Biochemistry, Biophysics, and Molecular Biology; Agronomy;

and Statistics) may also be involved. (See Nutritional Sciences interdepartmental graduate major).

The Master of Professional Practice in Dietetics program is an online, course-work only, 12-month long, integrated graduate program that combines didactic coursework and on-site supervised experiential learning to train future Registered Dietitian Nutritionists. In addition to the required didactic coursework, students complete a minimum of 1000 hours of supervised experiential learning to meet the eligibility requirements to take the national credentialing exam for Registered Dietitian Nutritionists. Prerequisite for the program is graduation from a Didactic Program in Dietetics.

The department also offers an online 12-13 credit Graduate Certificate in Food Safety and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas State University and the University of Missouri through the Great Plains Interactive Distance Education Alliance. Course topics include food microbiology, food defense, food toxicology, HACCP, and additional topics related to food safety. Students may be admitted if qualified for admission to the food science master's degree program.

The department offers work for concurrent B.S. and M.S. degree programs that allow students to obtain both the B.S. and M.S. degrees in 5 years. The programs are available to students majoring in nutritional science or pre-diet and exercise, and students progress toward M.S. degrees in nutritional sciences or diet and exercise, respectively. Students interested in these programs should contact the department for details. Application for admission to the Graduate College should be made during the junior year. Students begin research for the M.S. thesis or creative component during the summer after their junior year and are eligible for research assistantships.

Students graduating with advanced degrees in nutritional sciences and in food science and technology will demonstrate competency in their chosen discipline. Measurable outcomes will include the ability to:

- Apply scientific thinking to the analysis, synthesis and evaluation of knowledge within the discipline of food science, nutritional sciences, or dietetics
- Apply ethical reasoning within the discipline of food science, nutritional sciences or dietetics
- Effectively communicate discipline-specific information in written and oral forms to scientific audiences
- Effectively interact within scientific teams
- Facilitate learning within FSHN courses

Minors - Graduate

The department offers coursework for graduate minors in:

- food science/technology (<https://fshn.hs.iastate.edu/graduate-students/graduate-programs/food-science-and-technology/>)

- nutritional sciences (<https://fshn.hs.iastate.edu/graduate-students/graduate-programs/interdepartmental-graduate-program-in-nutritional-sciences/>)

Food Science and Technology Graduate Minor students must complete the following:

- 9 to 12 credits. Students without a background in food chemistry, food engineering/processing, and/or food microbiology are required to take FSHN 5110 and two 6000-level courses in two different competency areas.
- 9 credits of graduate level food science coursework as approved by the POS committee.
- Maximum of 3 credits at the 4000 level.

Nutritional Sciences Graduate Minor students must complete the following:

- 9 to 12 credits are required. Students who have not taken FSHN 3600 or its equivalent (advanced nutrition with a biochemistry prerequisite) will need to take FSHN 3600, in which case the Nutrition Graduate minor will constitute 12 credits.
- 9 credits of graduate level nutrition courses as approved by the POS Committee.
- NUTRS 5010

Certificate - Undergraduate

Health Coach (<https://kin.hs.iastate.edu/current-students/academics/health-coach-certificate/>)

The undergraduate health coach certificate provides a rigorous academic and theoretical background in three components of health (nutrition, exercise and motivational coaching) required to prepare workers for the challenges of being a health coach.

Certificates - Graduate

Food Safety and Defense (<http://www.fshn.hs.iastate.edu/graduate-program/food-safety-defense/>)

The department offers an online 12-13 credit Graduate Certificate in Food Safety and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas State University and the University of Missouri through the Great Plains Interactive Distance Education Alliance. Students may be admitted if qualified for admission to the food science master's degree program.

Courses primarily for undergraduates:

FSHN 1010: Food and the Consumer

Credits: 3. Contact Hours: Lecture 3.

The food system from point of harvest to the consumption of the food by the consumer. Properties of food constituents. Protection of food against deterioration and microbial contamination. Introduction of foods into the marketplace. Processes for making various foods. Government regulations. Use of food additives. Current and controversial topics. High school biology and chemistry or 3 credits of college level biology and chemistry recommended. (Typically Offered: Fall, Spring, Summer)

FSHN 1020: Nutrition for Sport Performance

Credits: 1. Contact Hours: Lecture 1.

A scientific evaluation of dietary needs, dietary supplementation, and pop-culture claims relative to physical/sport performance. Discussion of safe and effective practices to enhance physical/sport performance. (Typically Offered: Fall, Spring)

FSHN 1040: Introduction to Professional Skills in Culinary Science

Credits: 1. Contact Hours: Laboratory 6.

Prereq: Major in CUFSA or CUFSH or Culinary Science minor

Introduction to culinary science. Students will develop fundamental culinary skills by arranged on-campus work experience (100 hours). Sessions with instructor arranged. (Typically Offered: Spring)

FSHN 1100: Professional and Educational Preparation

Credits: 1. Contact Hours: Lecture 1.

Introduction to professional and educational development within the food science and human nutrition disciplines. Focus is on university and career acclimation as well as enhancement of communication skills. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

FSHN 1110: Fundamentals of Food Preparation

Credits: 2. Contact Hours: Lecture 2.

Prereq: (FSHN 1010 or FSHN 1670); concurrent enrollment in FSHN 1150

Principles involved in preparation of food products of standard quality. Influence of composition and techniques on properties of food products. (Typically Offered: Spring)

FSHN 1150: Food Preparation Laboratory

Credits: 1. Contact Hours: Laboratory 3.

Prereq: (FSHN 1010 OR FSHN 2140) AND Major in NUTRS, DIET, FCEDS, HSPM

Practice standard methods of food preparation with emphasis on quality, nutrient retention, and safety. (Typically Offered: Fall, Spring)

FSHN 1200: The Biochemistry of Beer

(Cross-listed with BBMB 1200).

Credits: 2. Contact Hours: Lecture 2.

An introduction to the major classes of biomolecules, basic biochemical concepts, enzymology, metabolism and genetic engineering as they apply to the production and flavor of beer. All aspects of the biochemistry of beer will be covered, including the malting of barley, starch conversion, yeast fermentation and the chemical changes that occur during the aging of beer. Intended for non-majors. (Typically Offered: Fall)

FSHN 1200L: Biochemistry of Beer Laboratory

(Cross-listed with BBMB 1200L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment in BBMB 1200

An introduction to biochemical methods related to the production of beer. Laboratory exercises related to water chemistry, mash enzymology, hop compound extraction and analysis, and yeast biology will be performed. Closely follows the material being taught in BBMB 1200. Graduation Restriction: Natural science majors are limited to elective credit only.

FSHN 1670: Introductory Human Nutrition and Health

Credits: 3. Contact Hours: Lecture 3.

Understanding and implementing present day knowledge of nutrition. The role of nutrition in the health and well being of the individual and family. High school biology or 3 credits of biology recommended. (Typically Offered: Fall, Spring, Summer)

FSHN 2020X: Food Literacy through Film

Credits: 1. Contact Hours: Lecture 1.

An introduction to food literacy using systems thinking. Exploration of movies and documentaries to identify how one's food choices can support personal health, community, and the environment. Development of skills to assess potential bias of multi-media messages. (Typically Offered: Fall)

FSHN 2030: Contemporary Issues in Food Science and Human Nutrition

Credits: 1. Contact Hours: Lecture 1.

Introduction to presentation of published research and discussion of current issues in food science and human nutrition. Emphasis on sources of credible information, ethics, and communication. (Typically Offered: Fall, Spring)

FSHN 2070: Processing of Foods: Basic Principles and Applications

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: FSHN 1010

Lecture and lab-based instruction on principles of food processing and packaging. Food product-based discussion and activities will highlight raw food materials; unit operations; food quality and safety; processing plant sanitation; food forming and extrusion; fermentation; properties and selection of packaging materials. (Typically Offered: Spring)

FSHN 2140: Scientific Study of Food

Credits: 3. Contact Hours: Lecture 3.

Prereq: FSHN 1670 or FSHN 2650; CHEM 2310 or CHEM 3310; plus concurrent enrollment in FSHN 1150 or 2150

Composition and structure of foods. Principles of preparation of standard quality food products. Behavior and interactions of food constituents. (Typically Offered: Fall, Spring)

FSHN 2150: Advanced Food Preparation Laboratory

Credits: 2. Contact Hours: Laboratory 6.

Prereq: Credit or enrollment in FSHN 2140

Practice standard methods of food preparation with emphasis on quality, nutrient retention, and safety. Development of culinary skills and advanced food preparation. (Typically Offered: Fall, Spring)

FSHN 2200: American Food and Culture

Credits: 3. Contact Hours: Lecture 3.

American cuisine reflects the history of the U.S. It is the unique blend of diverse groups of people from around the world, including indigenous Native American Indians, Africans, Asians, Europeans, Pacific Islanders, and South Americans. Explore factors that impact the American Cuisine of today including diverse ethnic and cultural group influences, historical events related to food diversity in the U.S., and agriculture and industrial impacts on food production. Practical knowledge and basic food preparation techniques related to the U.S. food system and trends. Class sessions will include lectures, class discussions and Tasting Immersion activities. (Typically Offered: Fall, Spring)

FSHN 2410: Introduction to Manufacturing Processes for Plastics

(Cross-listed with TSM 2410).

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Prereq: MATH 1450 or higher.

A study of selected materials and related processes used in plastics manufacturing. Lecture and laboratory activities focus on materials, properties, and processes. (Typically Offered: Fall, Spring)

FSHN 2420: The US Food System

Credits: 3. Contact Hours: Lecture 3.

Prereq: FSHN 1010 or FSHN 1670

Exploration of the components of our food system including production, processing, and access. A systems approach is used to evaluate the social, environmental, and nutrition/health implications of the US food system. Controversial topics related to how food is produced, processed, marketed and consumed will be discussed. (Typically Offered: Spring)

FSHN 2640: Fundamentals of Nutritional Biochemistry

Credits: 3. Contact Hours: Lecture 3.

Prereq: FSHN 1670; CHEM 1630, CHEM 1630L; 3 credits in BIOL

Digestion, absorption, metabolism, and biochemical functions of nutrients. Biochemical aspects of nutrient deficiencies. (Typically Offered: Fall)

FSHN 2650: Nutrition for Active and Healthy Lifestyles

Credits: 3. Contact Hours: Lecture 3.

Prereq: FSHN 1670; (credit or enrollment in FSHN 2640 or credit or enrollment in 3 credits in BBMB)

Fundamentals of nutrient metabolism and nutrient requirements. Role of macronutrient metabolism in physical performance and disease prevention. Effect of manipulation of macronutrient metabolism on physical performance and disease prevention. Applications of nutrient metabolism principles to dietary recommendations and planning. (Typically Offered: Spring, Summer)

FSHN 2670X: Clinical Perspectives on Human Nutrition and Health

Credits: 1. Contact Hours: Lecture 1.

Through case scenarios presented by practicing physicians and other health care professionals of various specializations, students will gain appreciation for the actual clinical impact of nutrition on health and disease. Through interactions with clinicians, students will learn about the current and future status of health care. (Typically Offered: Spring)

FSHN 2760: Understanding Grape and Wine Science

(Cross-listed with HORT 2760).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

A scientific introduction to viticulture (grape-growing) and enology (wine-making) and grape and wine chemistry. Topics include grape biology and cultivars, vineyard management, geography of wine, wine production, wine classification, grape and wine chemistry, wine sensory. No wine tasting. (Typically Offered: Spring)

FSHN 3010: Nutrigenomics: From Basic Science to Translational Impact

Credits: 1. Contact Hours: Lecture 2.

Introduction to the concepts of nutrigenomics and nutrigenetics and how it affects consumers of food, as well as the implications for human diseases. The potential impact of personalized nutrition and full genome sequencing on health maintenance, chronic disease prevention, and the ethical implications of this knowledge will be explored. (Typically Offered: Fall)

FSHN 3050: Food Quality Management and Control

Credits: 2. Contact Hours: Lecture 2.

Prereq: 3 credits in statistics

Fundamentals of statistical decision-making processes and quality control procedures used in food quality assurance programs. (Typically Offered: Spring)

FSHN 3110: Food Chemistry

Credits: 3. Contact Hours: Lecture 3.

Prereq: BBMB 3000 or higher; (CHEM 2310 or CHEM 3310); ENGL 2500

The structure, properties, and chemistry of food constituents and animal and plant commodities. (Typically Offered: Fall)

FSHN 3110L: Food Chemistry Laboratory

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or concurrent enrollment in FSHN 3110

The laboratory practices of structure, properties, and chemistry of food constituents. (Typically Offered: Fall)

FSHN 3140: Professional Development for Culinary Food Science and Food Science Majors

Credits: 1. Contact Hours: Lecture 1.

Prereq: Major or minor in Culinary Food Science or Food Science; Junior or senior classification.

Introduction to the roles culinary scientists and food scientists hold within industry. Discussions focused on professional and educational development and emerging issues and trends in the food industry. (Typically Offered: Fall)

FSHN 3150: Professional Skills for Culinary Food Science and Food Science Majors

Credits: 1. Contact Hours: Lecture 1.

Prereq: Major or minor in FSHN

Focus on the importance of professional skills and application of those skills to potential job situations. Professional skills include communication, team building, leadership vs. management styles, business ethics, and continual learning. Junior classification recommended. (Typically Offered: Fall)

FSHN 3400: Foundations of Dietetic Practice

Credits: 2. Contact Hours: Lecture 2.

Prereq: Major in Dietetics (A or H) or Pre-Diet and Exercise; Junior classification

Introduction to the profession of dietetics and responsibilities associated with dietetic professional practice. Emphasis on exploring career options in dietetics and preparation for supervised practice and graduate school. Leadership and professional career development for the dietitian is addressed through self reflection and creation of materials for post-baccalaureate programs. Professional issues related to dietetic practice include Code of Ethics, legal credentialing and standards of professional practice, leadership and future trends in the profession. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

FSHN 3420: World Food Issues: Past and Present

(Cross-listed with ENVS 3420/ AGRON 3420).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Issues associated with global agricultural and food systems including ethical, social, economic, environmental, and policy contexts. Investigation of various causes and consequences of overnutrition/ undernutrition, global health, poverty, hunger, access, and distribution. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

FSHN 3510: Introduction to Food Engineering Concepts

Credits: 3. Contact Hours: Lecture 3.

Prereq: (FSHN 2070; [MATH 1600 or MATH 1650]; [PHYS 1310 or PHYS 2310]) or Permission of Instructor

Methodology for solving problems in food processing and introduction to food engineering concepts including food properties, material and energy balances, sources of energy, thermodynamics, fluid flow, heat transfer, and mass transfer. Graduation Restriction: Credit for only FSHN 3510 or CHE 3570 may be applied toward graduation for the Food Science major or Food Science minor. (Typically Offered: Spring)

FSHN 3600: Advanced Nutrition and the Regulation of Metabolism in Health and Disease

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500; FSHN 2650

Physiological and biochemical basis for nutrient needs; assessment of nutrient deficiency and toxicity; examination of nutrient functions and the regulation of metabolism; nutrient-gene interactions; mechanistic role of nutrients in health and disease. 3 credits or concurrent enrollment in 3000-level or above Biochemistry recommended. 3 credits in physiology recommended. (Typically Offered: Fall)

FSHN 3610: Nutrition and Health Assessment

Credits: 2. Contact Hours: Lecture 2, Laboratory 2.

Prereq: FSHN 2650

The assessment of nutritional status in healthy individuals. Laboratory experiences in food composition and assessment of dietary intake, body composition, and biochemical indices of nutritional status. (Typically Offered: Spring)

FSHN 3620: Nutrition and Health Throughout the Lifecycle

Credits: 3. Contact Hours: Lecture 3.

Molecular, biochemical and physiological basis to understand the nutritional aspects of human development and aging. Nutrient needs and various disease states at each stage of human life cycle. (Typically Offered: Spring)

FSHN 3640: Nutrition and Prevention of Chronic Disease

Credits: 3. Contact Hours: Lecture 3.

Prereq: (BIOL 2560 and BIOL 2560L) or enrolled in NRS major

Overview of nutrients, their functions, metabolism, food sources and optimal choices for the promotion of health and wellness. Nutrition strategies for the prevention of chronic disease, including cancer, diabetes and obesity, as they apply to individuals or the wider population will be discussed. (Typically Offered: Fall)

FSHN 3650: Obesity and Health

Credits: 3. Contact Hours: Lecture 3.

Multifactorial aspects of obesity, maintenance of healthy weight, and the relationship of weight status and chronic disease prevention. Traditional and novel nutrition and exercise theories as well as current popular diet and exercise trends will be discussed. (Typically Offered: Spring)

FSHN 3660: Communicating Nutrition Messages

Credits: 3. Contact Hours: Lecture 3.

Prereq: FSHN 2640 or FSHN 2650

Theory and application of adult learning and behavior change as it relates to the role of nutrition in health promotion and disease prevention. Discussion of nutrition education and interventions relative to various models. Focus on communication strategies for providing nutrition messages to diverse community audiences using various forms of media and outreach. (Typically Offered: Spring)

FSHN 3670: Medical Terminology for Health Professionals

Credits: 1. Contact Hours: Lecture 1.

An independent course focused on medical terminology, abbreviations, and simple clinical mathematical calculations. (Typically Offered: Fall, Spring, Summer)

FSHN 3730: Science and Practice of Brewing

(Cross-listed with ME 3730).

Credits: 3. Contact Hours: Lecture 1.5, Laboratory 4.5.

Introduction to brewing science and technology. Understanding the role of malts, hops, water, and yeast in production of ale and lager beers. Unit operations in brewing. Health, safety, and environmental sustainability in alcohol production and consumption. Weekly laboratory in practical aspects of beer production. (Typically Offered: Fall, Spring)

FSHN 3760X: Science and Practice of Cheesemaking

Credits: 2. Contact Hours: Lecture 2.

Science and Practice of Cheesemaking is designed to provide students with applied knowledge about milk chemistry and microbiology, sanitation, and cheesemaking. Small teams will engage in various aspects of research and development, including brainstorming, basic market research, food processing, sensory evaluation, and marketing pitches for a new cheese with beer or wine. The course culminates with an invitational culinary event, designed and executed by the students. (Typically Offered: Fall)

FSHN 3920: Food and Nutrition Services Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: HSPM 3800; HSPM 3800L

Functions and responsibilities related to the management of foodservice systems and nutrition services, including planning, marketing, human resource management, and cost accounting. Graduation Restriction: Only one of HSPM 3920 or FSHN 3920 may count toward graduation. (Typically Offered: Spring)

FSHN 4030: Food Laws and Regulations

Credits: 2. Contact Hours: Lecture 2.

Prereq: 3 credits in FSHN at 2000-level or above

History of food law in the US and the world. Relationship between policy, legislation and regulation. Introduction to primary US regulatory agencies and enforcement principles. Discussion of key laws related to food safety and nutrition. Overview of federal and independent research tools and sources of food law. (Typically Offered: Spring, Summer)

FSHN 4060: Sensory Evaluation of Food

(Dual-listed with FSHN 5060).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: FSHN 3050 and credit or enrollment in FSHN 4110; 3 credits in statistics

Sensory evaluation techniques used to evaluate the appearance, aroma, flavor, texture and acceptability of foods. Relationships between sensory and instrumental measurements of color and texture. Work independently and cooperatively (in a team) to identify sensory evaluation objectives, write hypotheses, design and conduct experiments, and analyze and interpret data. (Typically Offered: Fall)

FSHN 4070: Microbiological Safety of Foods of Animal Origins

(Dual-listed with FSHN 5070/ MICRO 5070). (Cross-listed with MICRO 4070).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 2010 or MICRO 3020

Examination of the various factors in the production of foods, from production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. Upon successful completion of this class, the student will receive both the Preventive Controls for Human Foods certificate (FDA program) and the International HACCP Alliance certificate (USDA-FSIS program). Recommended: FSHN 4200 or MICRO 4200 and one semester of Microbiology Laboratory. (Typically Offered: Fall, Spring)

FSHN 4080: Dairy Products Evaluation

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Instructor Permission for Course

Gain experience in identifying quality defects in dairy products including milk, cottage cheese, cheddar cheese, strawberry yogurt, butter, and vanilla ice cream. Intensive training for the National Collegiate Dairy Products Evaluation competition and for dairy product evaluation in the food industry. (Typically Offered: Spring)

FSHN 4100: Food Analysis

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: FSHN 2140 or FSHN 3110 or CHEM 2110

An introduction to the theory and application of chemical and instrumental methods for determining the constituents of food. Use of standard procedures for food analysis and food composition data bases. (Typically Offered: Fall, Spring)

FSHN 4110: Food Ingredient Interactions and Formulations

Credits: 2. Contact Hours: Lecture 1, Laboratory 3.

Prereq: (FSHN 1150; FSHN 2150; FSHN 2140) or (FSHN 3110; FSHN 3110L); 3 credits in STAT

Application of food science principles to ingredient substitutions in food products. Laboratory procedures for standard formulations and instrumental evaluation, with emphasis on problem-solving and critical thinking. (Typically Offered: Fall)

FSHN 4120: Food Product Development

(Dual-listed with FSHN 5120).

Credits: 3. Contact Hours: Lecture 1, Laboratory 6.

Prereq: FSHN 4110; senior classification

Principles of developing consumer packaged food products. Application of skills gained in food chemistry, formulation, quality, sensory and processing. Emphasis on teamwork and effective communication. (Typically Offered: Spring)

FSHN 4190: Foodborne Hazards

(Cross-listed with MICRO 4190/ TOX 4190).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 2010 or MICRO 3020; 3 credits in BBMB

Pathogenesis of human microbiological foodborne infections and intoxications, principles of toxicology, major classes of toxicants in the food supply, governmental regulation of foodborne hazards. Assessed service-learning component. Offered even-numbered years. Graduation Restriction: Only one of FSHN 4190 and FSHN 5190 may count toward graduation. (Typically Offered: Spring)

FSHN 4200: Food Microbiology

(Cross-listed with MICRO 4200/ TOX 4200).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 2010 or MICRO 3020

Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications. (Typically Offered: Fall)

FSHN 4210: Food Microbiology Laboratory

(Cross-listed with MICRO 4210).

Credits: 3. Contact Hours: Lecture 1, Laboratory 5.

Prereq: MICRO 2010 or MICRO 3020; MICRO 2010L or MICRO 3020L. Credit or enrollment in FSHN/MICRO 4200

Standard techniques used for the microbiological examination of foods. Independent and group projects on student-generated questions in food microbiology. Emphasis on oral and written communication and group interaction. (Typically Offered: Spring)

FSHN 4300: U.S. Health Systems and Policy

(Dual-listed with FSHN 5300).

Credits: 2. Contact Hours: Lecture 2.

Prereq: Graduate or senior level status or Permission of Instructor

Introduction to public policy for health care professionals. Emphasis on understanding the role of the practitioner for participating in the policy process, interpreting government policies and programs such as Medicare and Medicaid, determining reimbursement rates for eligible services, and understanding licensure and accreditation issues. Discussion and exploration of federal, state and professional policy-relevant resources. (Typically Offered: Fall, Spring)

FSHN 4350: Analysis of Food Markets

(Cross-listed with ECON 4350).

Credits: 3. Contact Hours: Lecture 3.

Prereq: STAT 2260, ECON 2350, and ECON 3010

Food market analysis from an economics perspective; food markets and consumption; methods of economic analysis; food industry structure and organization; food and agriculture regulations; labeling; consumer concerns; agricultural commodity promotion. Final project required. (Typically Offered: Spring)

FSHN 4420: Issues in Food and Society

Credits: 2. Contact Hours: Lecture 2.

Prereq: Sophomore classification

In-depth discussion, synthesis, and analysis of domestic and global food issues from a systems approach. Mutually reinforcing interactions between culture, biology, and environmental influences on human dietary habits, nutrition and health will be emphasized. Historical and current foodways of cultural groups will be presented with specific attention to understanding cultural differences. Students will demonstrate how to locate, interpret, evaluate and use professional literature to inform about current food and society issues. Meets U.S. Diversity Requirement. (Typically Offered: Fall)

FSHN 4450: Strategies for Personal Food Waste Reduction

Credits: 1. Contact Hours: Lecture 1.

Prereq: Junior standing or Permission of Instructor

In-depth analysis and discussion of economic, environmental, social, and ethical implications of food waste. Overview of personal food waste reduction strategies, food recycling/recovery, and responsible waste disposal methods. Discussion and application of advocacy tactics for the promotion of food waste reduction in local communities. (Typically Offered: Spring)

FSHN 4600: Global Nutrition, Health and Sustainability

(Dual-listed with FSHN 5600).

Credits: 3. Contact Hours: Lecture 3.

An overview of current global nutrition and health-related issues in relation to the Sustainable Development Goals. The etiology, epidemiology, and program/policy responses to topics will be discussed, in relation to the sociocultural, biological, economic, and environmental context of health and disease. Topics include childhood malnutrition, growth stunting, micronutrient deficiencies, global nutrition transition, parasitic infections, sanitation, and chronic disease incidence. Participatory course, students will engage in a series of class activities, discussions, and presentations. Meets International Perspectives Requirement. Meets International Perspectives Requirement. (Typically Offered: Spring)

FSHN 4610: Medical Nutrition and Disease I

Credits: 4. Contact Hours: Lecture 4.

Prereq: (BIOL 2560; 2560L) or BIOL 3350; FSHN 3600; FSHN 3610; FSHN 3670

Pathophysiology of selected chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state to optimize nutritional status and improve health. (Typically Offered: Fall)

FSHN 4630: Community Nutrition and Health

(Dual-listed with NUTRS 5630).

Credits: 3. Contact Hours: Lecture 3.

Prereq: FSHN 2650 or FSHN 3600

Dual-listed with NUTRS 5630. Survey of current public health nutrition challenges and assets among nutritionally vulnerable individuals and groups. Culturally informed interventions or improvements of community nutrition and public health programs will be developed through needs assessment and primary research literature review. Significant emphasis on written and oral communication at the lay and professional level as it relates to community nutrition and health. Students should have a prior background in nutrition or social sciences. Meets U.S. Diversity Requirement. Meets U.S. Diversity Requirement. (Typically Offered: Fall)

FSHN 4640: Medical Nutrition and Disease II

(Dual-listed with NUTRS 5640).

Credits: 4. Contact Hours: Lecture 4.

Prereq: FSHN 4610

(Dual-listed with NUTRS 5640) Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state to optimize nutritional status and promote health. (Typically Offered: Spring)

FSHN 4660: Nutrition Counseling and Education Methods

(Dual-listed with FSHN 5660).

Credits: 3.

Prereq: FSHN 3610 and FSHN 3620

Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories. (Typically Offered: Fall, Spring)

FSHN 4670: Molecular Basis of Nutrition in Disease Etiology and Health Promotion

Credits: 3. Contact Hours: Lecture 3.

Prereq: FSHN 3600

Understanding the molecular basis for the role of nutrients, nutrient-derivatives, and bioactive compounds in the development, prevention, and treatment of common diseases including diabetes, cancer, vascular disease, obesity, neurological disease, aberrant mineral metabolism, and autoimmune disease. Translating this understanding into practical approaches for improving the health of individuals and populations. Credit for FSHN 3600 suggested. (Typically Offered: Spring)

FSHN 4710: Food Processing

Credits: 3. Contact Hours: Lecture 2.5, Discussion 0.5.

Prereq: (AE 4510 or CHE 3570 or FSHN 3510); (MICRO 2010 or 3020)

Principles and application of food processing using both thermal (ex., blanching, pasteurization, canning, drying, freezing, evaporation, aseptic processing, extrusion) and non-thermal (ex., high pressure, irradiation, pulsed electric field, fermentation) unit operations. Emphasis on microbial inactivation, process heat and mass balance, and numerical problem solving. (Typically Offered: Fall)

FSHN 4720: Food Processing Laboratory

Credits: 2. Contact Hours: Lecture 1, Laboratory 3.

Prereq: (FSHN 4710; Senior classification) or Permission of Instructor

Hands-on and demonstration laboratory activities related to food processing principles and applications using lab and pilot-scale equipment. Laboratory experiences include important food processing operations, e.g., blanching/pasteurization, canning, freezing, drying, corn wet milling, fermentation, baking etc. Emphasis on mass balance, interpreting data, writing reports, and presentations. Occasional field trips. (Typically Offered: Spring)

FSHN 4890: Issues in Food Safety

(Cross-listed with ANS 4890/ HSPM 4890/ VDPAM 4890).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (Credit or concurrent enrollment in FSHN 1010 or FSHN 2720 or HSPM 2330); (FSHN 4190 or FSHN 4200); FSHN 4030

Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective. (Typically Offered: Spring)

FSHN 4900A: Independent Study: Dietetics

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Independent work in food science, nutrition, or dietetics. Graduation Restriction: A maximum of 6 credits of FSHN 4900 may be used toward graduation. (Typically Offered: Fall, Spring, Summer)

FSHN 4900B: Independent Study: Food Science

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Independent work in food science, nutrition, or dietetics. Graduation Restriction: A maximum of 6 credits of FSHN 4900 may be used toward graduation. (Typically Offered: Fall, Spring, Summer)

FSHN 4900C: Independent Study: Nutrition

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Independent work in food science, nutrition, or dietetics. Graduation Restriction: A maximum of 6 credits of FSHN 4900 may be used toward graduation. (Typically Offered: Fall, Spring, Summer)

FSHN 4900D: Independent Study: International Experience

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Independent work in food science, nutrition, or dietetics. Graduation Restriction: A maximum of 6 credits of FSHN 4900 may be used toward graduation. (Typically Offered: Fall, Spring, Summer)

FSHN 4900E: Independent Study: Entrepreneurship

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Independent work in food science, nutrition, or dietetics. Graduation Restriction: A maximum of 6 credits of FSHN 4900 may be used toward graduation. (Typically Offered: Fall, Spring, Summer)

FSHN 4900H: Independent Study: Honors

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Independent work in food science, nutrition, or dietetics. Graduation Restriction: A maximum of 6 credits of FSHN 4900 may be used toward graduation. (Typically Offered: Fall, Spring, Summer)

FSHN 4910A: Supervised Work Experience: Dietetics

Credits: 1-4. Repeatable, maximum of 4 credits.

Prereq: Permission of Instructor; Permission of Advisor

Supervised off-campus work experience relevant to the academic major. Graduation Restriction: A maximum of 4 credits of FSHN 4910 may be used toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

FSHN 4910B: Supervised Work Experience: Food Science

Credits: 1-4. Repeatable, maximum of 4 credits.

Prereq: Permission of Instructor; Permission of Advisor

Supervised off-campus work experience relevant to the academic major. Graduation Restriction: A maximum of 4 credits of FSHN 4910 may be used toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

FSHN 4910C: Supervised Work Experience: Nutrition

Credits: 1-4. Repeatable, maximum of 4 credits.

Prereq: Permission of Instructor; Permission of Advisor

Supervised off-campus work experience relevant to the academic major. Graduation Restriction: A maximum of 4 credits of FSHN 4910 may be used toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

FSHN 4910D: Supervised Work Experience: Culinary Science

Credits: 1-4. Repeatable, maximum of 4 credits.

Prereq: Permission of Instructor; Permission of Advisor

Supervised off-campus work experience relevant to the academic major. Graduation Restriction: A maximum of 4 credits of FSHN 4910 may be used toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

FSHN 4920: Research Concepts in Human Nutrition

Credits: 2.

Prereq: (FSHN 3600; Senior classification) or Permission of Instructor

Students will develop and implement research projects with faculty supervision, based on knowledge gained from nutrition, biology and chemistry courses and write a formal science paper to share the results of their research. Students will gain appreciation for independent research and experience creative and innovative aspects of nutrition research. (Typically Offered: Fall)

FSHN 4930: Food Preparation Workshop

Credits: 1-3. Repeatable, maximum of 3 credits.

Selected topics in food preparation including scientific principles, culture and culinary techniques. Variable format may include laboratory, recitation, and lecture. Offered on a satisfactory-fail basis only.

FSHN 4960A: Food Science and Human Nutrition Travel Course: International travel

(Dual-listed with FSHN 5960A).

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

FSHN 4960B: Food Science and Human Nutrition Travel Course: Domestic travel

(Dual-listed with FSHN 5960B).

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students. (Typically Offered: Fall, Spring, Summer)

FSHN 4980: Cooperative Education

Credits: Required. Repeatable, maximum of 0 credits.

Prereq: Department Chair Permission for Course

Required for students completing professional work periods in a cooperative education program. Students must register prior to commencing each work period. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

FSHN 4990: Undergraduate Research

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Research under staff guidance. Graduation Restriction: A maximum of 6 credits of FSHN 4990 may be used toward graduation. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

FSHN 5060: Sensory Evaluation of Food

(Dual-listed with FSHN 4060).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Sensory evaluation techniques used to evaluate the appearance, aroma, flavor, texture and acceptability of foods. Relationships between sensory and instrumental measurements of color and texture. Work independently and cooperatively (in a team) to identify sensory evaluation objectives, write hypotheses, design and conduct experiments, and analyze and interpret data. (Typically Offered: Fall)

FSHN 5070: Microbiological Safety of Foods of Animal Origins

(Dual-listed with FSHN 4070/ MICRO 4070). (Cross-listed with MICRO 5070).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 4200 or Graduate Classification

Examination of the various factors in the production of foods, from production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. Upon successful completion of this class, the student will receive both the Preventive Controls for Human Foods certificate (FDA program) and the International HACCP Alliance certificate (USDA-FSIS program). Recommended: FSHN 4200 or MICRO 4200 and one semester of Microbiology Laboratory. (Typically Offered: Fall, Spring)

FSHN 5080: Consumer Perceptions and Nutrition Communication

Credits: 2. Contact Hours: Lecture 2.

Examination of current consumer food and nutrition trends. Critical analysis of consumer perceptions relative to current research base. Use of various media to create effective nutrition messages for consumers. Activities designed to meet accreditation standards. (Typically Offered: Fall, Spring, Summer)

FSHN 5090: Sensory Evaluation of Wines

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Principles of sensory evaluation and their application to wine evaluation. Sensory testing methods such as discrimination tests, ranking, descriptive analysis and scoring of wines will be covered. Students will have the opportunity to evaluate and learn about major types and styles of wines of the world. Lab fee. (Typically Offered: Spring)

FSHN 5110: Integrated Food Science

Credits: 3. Contact Hours: Lecture 3.

Critical review of the key principles of food science and applications in the chemistry, microbiology, and processing of food. Understanding of the impact of processing on the quality of foods with respect to composition, quality and safety. (Typically Offered: Fall)

FSHN 5120: Food Product Development

(Dual-listed with FSHN 4120).

Credits: 3. Contact Hours: Lecture 1, Laboratory 6.

Principles of developing consumer packaged food products. Application of skills gained in food chemistry, formulation, quality, sensory and processing. Emphasis on teamwork and effective communication. (Typically Offered: Spring)

FSHN 5160: Advanced Nutrition I

Credits: 2. Contact Hours: Lecture 2.

Examination of current literature relative to molecular, cellular, and physiologic aspects of macronutrient and micronutrient metabolism. Integration of current evidence-based information, including peer-reviewed literature, to inform nutrition practice. Activities designed to meet accreditation standards. (Typically Offered: Fall)

FSHN 5170: Gut Microbiome: Implications for Health and Diseases

(Cross-listed with ANS 5170/ MICRO 5170/ VMPM 5170).

Credits: 3. Contact Hours: Lecture 3.

Explore current research on gut microbiome including modern tools used to study the gut microbiome. Examine the linkages between gut microbiome and health status, diseases, and manipulation of gut microbiome to improve health. (Typically Offered: Fall)

FSHN 5180: Advanced Nutrition II

Credits: 3. Contact Hours: Lecture 3.

Principles of research design/methods and interpreting results/statistics in the current peer-reviewed scientific literature. Critical evaluation of the evidence-base to inform nutrition practice. Activities designed to meet accreditation standards. (Typically Offered: Spring)

FSHN 5210: Microbiology of Food

Credits: 2. Contact Hours: Lecture 2.

Identification, enumeration, and characterization of bacteria, yeasts, and mold associated with foods and food processing. Effects of physical and chemical agents on micro-organisms will be studied. Microbiological problems in food spoilage, food preservation, food fermentation, and food-borne disease will be discussed. (Typically Offered: Spring, Summer)

FSHN 5220: Advanced Food Microbiology and Biotechnology

Credits: 2. Contact Hours: Lecture 2.

Basic principles in biotechnology and applied food microbiology, including current topics of interest in food biotechnology. Introduction to recombinant DNA techniques and how they are applied to genetically modify microorganisms, the use of nucleic acids as tools of rapid detection of microorganisms in foods, basic enzyme immobilization and down-stream processing techniques, and regulatory aspects of food biotechnology. Offered odd-numbered years. (Typically Offered: Spring).

FSHN 5230: A Multidisciplinary Overview of Food Safety and Security

Credits: 2. Contact Hours: Lecture 2.

Multidisciplinary food safety and security perspectives provided by numerous subject matter experts. Topics include food safety policy, ag bioterrorism, border security, animal ID, food defense and site security, risk analysis, crisis communication, epidemiology, HACCP, and more. (Typically Offered: Fall, Summer)

FSHN 5240: Food Microbiology

Credits: 3. Contact Hours: Lecture 3.

Food Microbiology looks at the nature, physiology, and interactions of microorganisms in foods. The course is an introduction to food-borne diseases, the effect of food processing systems on the microflora of foods, principles of food preservation, food spoilage, and foods produced by microorganisms. Additionally, the course looks at food plant sanitation and criteria for establishing microbial standards for food products. (Typically Offered: Fall)

FSHN 5250: Principles of HACCP

Credits: 2. Contact Hours: Lecture 2.

A comprehensive study of the Hazard Analysis and Critical Control Point System and its application in the food industry. (Typically Offered: Fall)

FSHN 5260: Ethnic Foods: Food Safety, Food Protection and Defense

Credits: 2. Contact Hours: Lecture 2.

Understanding of the various factors that impact safety of ethnic and imported ethnic foods; knowledge about the handling, preparation, processing and storage of ethnic and imported foods and food products; science-based characterization of representative ethnic foods. (Typically Offered: Summer)

FSHN 5270: Microbiology of Fermented Foods

Credits: 2. Contact Hours: Lecture 2.

Microbiology of fermented foods covers the physiology, biochemistry, and genetics of microorganisms important in food fermentations. The course looks at how microorganisms are used in fermentations and the effects of processing and manufacturing conditions on production of fermented foods. (Typically Offered: Summer)

FSHN 5280: Food Protection and Defense-Essential Concepts

Credits: 2. Contact Hours: Lecture 2.

This course will provide students with an understanding of the principles required in a food defense program for a food manufacturing, warehousing or distribution center. The topics covered include: defining threats and aggressors; the Bioterrorism Act; food defense teams; vulnerability assessments; security programs; recall and traceability basics; security inspections; crisis management; emergency preparedness; and workplace violence. (Typically Offered: Spring)

FSHN 5290: Foodborne Toxicants

(Cross-listed with TOX 5290).

Credits: 2. Contact Hours: Lecture 2.

Mechanisms of action, metabolism, sources, remediation/detoxification, risk assessment of major foodborne toxicants of current interest, design of HACCP plans for use in food industries targeting foodborne toxicants, discussion of toxicants from a food defense perspective. Offered online only. (Typically Offered: Fall, Spring, Summer)

FSHN 5300: U.S. Health Systems and Policy

(Dual-listed with FSHN 4300).

Credits: 2. Contact Hours: Lecture 2.

Introduction to public policy for health care professionals. Emphasis on understanding the role of the practitioner for participating in the policy process, interpreting government policies and programs such as Medicare and Medicaid, determining reimbursement rates for eligible services, and understanding licensure and accreditation issues. Discussion and exploration of federal, state and professional policy-relevant resources. (Typically Offered: Fall, Spring)

FSHN 5330: Diet and Integrative Therapies for Prevention and Treatment of Diseases

Credits: 2. Contact Hours: Lecture 2.

Explore the role of specific nutrients, dietary bioactive compounds and integrative therapies on disease prevention and treatment. Activities designed to meet accreditation standards. (Typically Offered: Fall)

FSHN 5370: Leadership and Management in Dietetics

Credits: 3. Contact Hours: Lecture 3.

Application of leadership and management theories and approaches relevant to dietetics practice. Use of self-reflection and self-assessment to assist in recognition and development of leadership behaviors.

Activities designed to meet accreditation standards. (Typically Offered: Summer)

FSHN 5380: Advanced Medical Nutrition Therapy

Credits: 3. Contact Hours: Lecture 3.

Nutritional biochemistry and physiology related to selected pathophysiology of disease with emphasis on treatment of complex medical problems and current issues. The nutrition care process will be utilized. Evidenced-based practice will be integrated into each disease state covered to optimize nutritional status and promote health. Activities designed to meet accreditation standards. (Typically Offered: Spring)

FSHN 5420A: Introduction to Molecular Biology Techniques: DNA Techniques

(Cross-listed with BMS 5420A/ EEOB 5420A/ BBMB 5420A/ GDCB 5420A/ HORT 5420A/ NREM 5420A/ NUTRS 5420A/ VDPAM 5420A/ VMPM 5420A).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

FSHN 5420B: Introduction to Molecular Biology Techniques: Protein

(Cross-listed with BMS 5420B/ EEOB 5420B/ BBMB 5420B/ GDCB 5420B/ HORT 5420B/ NREM 5420B/ NUTRS 5420B/ VDPAM 5420B).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only. (Typically Offered: Spring, Summer)

FSHN 5420C: Introduction to Molecular Biology Techniques: Cell Techniques

(Cross-listed with BMS 5420C/ EEOB 5420C/ BBMB 5420C/ GDCB 5420C/ HORT 5420C/ NREM 5420C/ NUTRS 5420C/ VMPM 5420C/ VDPAM 5420C).

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. ular biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

FSHN 5420D: Introduction to Molecular Biology Techniques: Plant Transformation

(Cross-listed with BMS 5420D/ EEOB 5420D/ BBMB 5420D/ GDCB 5420D/ HORT 5420D/ NREM 5420D/ NUTRS 5420D/ VMPM 5420D/ VDPAM 5420D).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of tranformants. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

FSHN 5420E: Introduction to Molecular Biology Techniques: Proteomics

(Cross-listed with BMS 5420E/ EEOB 5420E/ BBMB 5420E/ GDCB 5420E/ HORT 5420E/ NREM 5420E/ NUTRS 5420E/ VMPM 5420E/ VDPAM 5420E).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

FSHN 5420F: Introduction to Molecular Biology Techniques: Metabolomics

(Cross-listed with BMS 5420F/ EEOB 5420F/ BBMB 5420F/ GDCB 5420F/ HORT 5420F/ NREM 5420F/ NUTRS 5420F/ VMPM 5420F/ VDPAM 5420F).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

FSHN 5420G: Introduction to Molecular Biology Techniques: Genomic

(Cross-listed with BMS 5420G/ EEOB 5420G/ BBMB 5420G/ GDCB 5420G/ HORT 5420G/ NREM 5420G/ NUTRS 5420G/ VMPM 5420G/ VDPAM 5420G).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

FSHN 5540: Supervised Experience in Food Systems Management

Credits: 3.

Supervised experiential learning in food service and management. Capstone project. Experiences and activities designed to meet accreditation standards. (Typically Offered: Summer)

FSHN 5550: Supervised Experience in Community Nutrition

Credits: 3.

Supervised experiential learning in community nutrition. Capstone project. Experiences and activities designed to meet accreditation standards. (Typically Offered: Fall)

FSHN 5560: Supervised Experience in Medical Nutrition Therapy

Credits: 5.

Supervised experiential learning in medical nutrition therapy. Capstone project. Experiences and activities designed to meet accreditation standards. (Typically Offered: Spring)

FSHN 5600: Global Nutrition, Health and Sustainability

(Dual-listed with FSHN 4600).

Credits: 3. Contact Hours: Lecture 3.

An overview of current global nutrition and health-related issues in relation to the Sustainable Development Goals. The etiology, epidemiology, and program/policy responses to topics will be discussed, in relation to the sociocultural, biological, economic, and environmental context of health and disease. Topics include childhood malnutrition, growth stunting, micronutrient deficiencies, global nutrition transition, parasitic infections, sanitation, and chronic disease incidence.

Participatory course, students will engage in a series of class activities, discussions, and presentations. Meets International Perspectives Requirement. Meets International Perspectives Requirement. (Typically Offered: Spring)

FSHN 5620: Advanced Nutrition Assessment

Credits: 4. Contact Hours: Lecture 4.

Overview and practical applications of methods for assessing nutritional status, including: theoretical framework of nutritional health and disease, dietary intake, biochemical indices, nutrition focused physical exam and body composition across the lifecycle. Activities designed to meet accreditation standards. (Typically Offered: Fall)

FSHN 5660: Nutrition Counseling and Education Methods

(Dual-listed with FSHN 4660).

Credits: 3.

Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories. (Typically Offered: Fall)

FSHN 5680X: Foundations of Sustainable, Resilient, and Healthy Food Systems

Credits: 3. Contact Hours: Lecture 3.

Utilize a systems-based approach to critically analyze current and future societal issues specific to nutrition, health, and policy in the US food system. Controversial topics influencing multiple sectors of the US food system will be explored. Pathways forward for local and regional food system transformation will be explored and community-based solutions will be proposed. (Typically Offered: Fall)

FSHN 5690X: Food Disconnected - What We Eat Matters

Credits: 3. Contact Hours: Lecture 3.

Our food systems are at a crossroad and sustainability is a pressing need. In this course, students will apply a systems-based approach to critically evaluate food production and processing challenges in the US food system using domestic and global case studies. We will consider how food production can be done in environmentally friendly way and reflect on whether consumers can play a role through their food choices. Finally, students will enhance their knowledge regarding food literacy and the ability to apply skills to engage in enterprises that can transform current food systems. (Typically Offered: Fall)

FSHN 5700X: Sustainable and Healthy Eating Patterns

Credits: 3. Contact Hours: Lecture 3.

This course will utilize a system-based approach to consider multisectoral actions integrating health, economic considerations, environmental impacts, and sociocultural wellbeing to comprehensively explore sustainable diets. We will discuss topics related to the benefits and challenges of transitioning to sustainable diets in the context of current and future food systems. The course will also address the role of food environments, link nutrition guidelines to sustainability issues, review complex ethical issues, and identify how sustainable diets fit in the context of global environmental goals. Food systems frameworks and models will be applied to evaluate the sustainability of select foods and eating patterns at the local and global level. (Typically Offered: Spring)

FSHN 5750: Processed Foods

Credits: 3. Contact Hours: Lecture 3.

This course will examine effect of industrial and domestic food processing on the nutrient content of food and risk of developing chronic disease. Offered odd-numbered years. (Typically Offered: Spring).

FSHN 5800: Orientation to Food Science and Nutrition Research

Credits: 1. Contact Hours: Lecture 1.

Orientation to and discussion of research interests in food science and nutrition. Discussion of policy and ethical issues in the conduct of research. Intended for entering students in FSHN. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

FSHN 5810: Seminar

Credits: 1. Contact Hours: Lecture 1.

Discussion and practice of oral presentation of scientific data in a professional setting. Discussion of issues related to data presentation. Intended for graduate students in their first or second semester in FSHN. (Typically Offered: Fall)

FSHN 5890: Systems Neuroscience: Brain, Behavior, and Nutrition-Related Integrative Physiology

(Cross-listed with NUTRS 5890/ GERON 5890/ NEURO 5890/ PSYCH 5890).

Credits: 2. Contact Hours: Lecture 2.

Structural, functional, and biochemical aspects of brain and non-motor behavior across the human lifespan. Types of neuroimaging used to assess the brain. Current research is leveraged to gauge how nutrition, diseases related to nutrition, and associated physiological processes influence the brain, particularly for common developmental, psychological, and neurological disorders. (Typically Offered: Spring)

FSHN 5900A: Special Topics: Nutrition

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

FSHN 5900B: Special Topics: Food Science

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

FSHN 5900C: Special Topics: Teaching

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

FSHN 5960A: Food Science and Human Nutrition Travel Course:**International Travel**

(Dual-listed with FSHN 4960A).

Credits: 1-4. Repeatable.

(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

FSHN 5960B: Food Science and Human Nutrition Travel Course:**Domestic travel**

(Dual-listed with FSHN 4960B).

Credits: 1-4. Repeatable.

(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students. (Typically Offered: Fall, Spring, Summer)

FSHN 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Nonthesis option only. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**FSHN 6060: Advanced Food Analysis and Instrumentation**

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Instrumental methods for measuring chemical and physical properties of foods, food quality and functionality. Techniques for methods development, sample preparation, optimization of operating conditions, and data analysis needed to obtain accurate, reproducible results by means of instrumentation. Offered even-numbered years. (Typically Offered: Fall). .

FSHN 6110: Advanced Food Processing

Credits: 3. Contact Hours: Lecture 3.

Recent advances in the science and technology of food processing and preservation; examples include both thermal and non-thermal processes, including cold plasma, nanotechnology, and extrusion. Advances in extraction and separation technologies, by-product utilization, and sustainability in food processing industry will also be discussed. Students to research on select topics and present. Offered odd-numbered years. (Typically Offered: Fall).

FSHN 6120: Advanced Food Chemistry

Credits: 3. Contact Hours: Lecture 3.

Structure, chemical and physical properties of lipids, proteins and carbohydrates, and their food and industrial applications. Changes in functionalities during processing and storage. Offered even-numbered years. (Typically Offered: Spring).

FSHN 6260: Advanced Food Microbiology

(Cross-listed with MICRO 6260/ TOX 6260).

Credits: 3. Contact Hours: Lecture 3.

Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and mode of action of antimicrobials. Offered odd-numbered years. (Typically Offered: Spring)

FSHN 6270: Rapid Methods in Food Microbiology

(Cross-listed with MICRO 6270/ TOX 6270).

Credits: 2. Contact Hours: Lecture 2.

Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.), existing commercial test formats and kits, automation in testing, sample preparation and 'next generation' testing formats now in development. (Typically Offered: Fall, Spring, Summer)

FSHN 6530: Food and Agricultural Traceability

Credits: 3. Contact Hours: Lecture 3.

Current issues and concepts of food and agricultural product traceability in the U.S., from production to consumption. Food types, microbial agents of concern, adulterants, disease investigations, risk analysis, risk mitigation, prevention and regulatory policy and advocacy. Travel to Washington, D.C. (Typically Offered: Fall)

FSHN 6810: Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 2 credits.

Presentation of thesis or dissertation research. Must be taken once for each graduate program; once for the M.S. program and once for the Ph.D. program. (Typically Offered: Fall, Spring, Summer)

FSHN 6820: Seminar Reflection

Credits: Required. Contact Hours: Lecture 1.

Repeatable.

Active listening and critical thinking activities related to research seminars in food science and human nutrition. Required each semester for all FSHN graduate students. Electronic documentation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

FSHN 6900: Special Problems

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

FSHN 6950: Grant Proposal Writing

(Cross-listed with NUTRS 6950).

Credits: 1. Contact Hours: Lecture 1.

Grant proposal preparation experiences including writing and critiquing of proposals and budget planning. Understanding the grant funding process from federal, foundation, and commodity agencies. Includes preparing a grant for possible submission and participation in the review of proposals. Discussion of the role of successful grant writing in career development. (Typically Offered: Fall, Spring)

FSHN 6990: Research in Food Science and Technology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Gerontology

Interdepartmental Undergraduate and Graduate Minors and Graduate Degree Programs

The gerontology program is designed for students interested in improving their understanding of adult development and aging across contexts and desiring careers in a variety of aging-related fields. Graduates understand the ways in which individual and societal aging influence, and are impacted by, developments in their major field of study. They have an appreciation and understanding of the interdisciplinary aspects of human aging.

Undergraduate

Undergraduate students may elect to minor in Gerontology, complementing their major. Courses prepare students to apply aging-related expertise to their field of study.

Graduate

Students enrolled in the on-campus master's and doctoral programs are able to choose a home department in any unit across campus including, but not limited to Design, Human Development and Family Studies, Kinesiology, Political Science, School of Education, and Sociology. Students take courses and engage in research and outreach to develop the necessary interdisciplinary breadth which, in combination with other disciplinary training, can prepare them for diverse career pathways. Students work with their Major Professor and Program of Study Committee members to chart a course of study. Current Iowa State graduate students can enroll in the Gerontology graduate minor.

Students enrolled in the online graduate certificate and master's programs take courses from experts across partnering institutions to prepare them for translational and applied positions in the field of aging. The program is designed to be flexible and meet student needs.

Undergraduate Study

Undergraduate study in this program provides the student with an opportunity to develop a minor in gerontology. A balanced grouping of courses assists the student in developing both a sensitivity to the issues and the ability to synthesize ideas from the variety of disciplines important to the study of the aging process.

Minor

Undergraduate students may minor in gerontology by taking 16 semester hours of gerontology related courses. Nine of these credits must come from the following courses:

GERON 3730	Death as a Part of Living	3
GERON 3770	Aging and the Family	3
GERON 3780	Retirement Planning and Employee Benefits	3

Students will participate in a prepracticum seminar, GERON 4660 Gerontology Prepracticum Seminar, and will complete a supervised field practicum after all gerontology coursework is completed (GERON 4670 Gerontology Practicum). A minimum of 3 semester credits must be selected from a list of supportive gerontology related courses. Supportive courses include units or topics related to aging and can be used to complement the student's major interests. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. The student's minor program must be approved by the undergraduate gerontology coordinator.

Graduate Minor

A graduate minor in Gerontology is available to any current ISU graduate student and consists of a minimum of 12 credits taken from a list of acceptable courses, and from at least two departments. Nine of the 12 credits must be in courses that are focused specifically on aging. One 5900 course (3 credits maximum) can be taken as part of the 12 credits. At least one member of the Gerontology faculty will be on a student's Program of Study Committee.

On-Campus Programs

Our on-campus Gerontology master's and doctoral degree programs are interdepartmental in nature. This means students receive content and training in Gerontology as well as a complementary discipline. We believe an interdisciplinary and collaborative approach allows students to enhance their experiences, training, and skills and ultimately their marketability and career success. Students work with their Major Professor and committee members to craft a program of study which encompasses core Gerontology and home department curriculum while fitting the unique needs of the student.

Online Programs

Iowa State University offers a Master's degree in Family and Consumer Sciences with specialization in Gerontology. This is an interinstitutional online program offered through the Great Plains Interactive Distance Education Alliance (or GPIDEA). The student selects a home institution (Iowa State), which ultimately grants the degree. After admission to Iowa State, the student takes courses from Iowa State and the other

participating institutions North Dakota State University, Oklahoma State University, Texas Tech University, and University of Arkansas.

The master's degree consists of 36 credits, 24 required credits and 12 elective credits (<https://online.hs.iastate.edu/graduate-degrees/gerontology/>). This program does not require a thesis.

Graduate Certificate

The 15-credit Graduate Certificate in Gerontology (<https://online.hs.iastate.edu/graduate-degrees/gerontology/>) is offered completely online through the Great Plains Interactive Distance Education Alliance (or GPIDEA). The student selects a home institution (Iowa State), which ultimately grants the certificate. After admission to Iowa State, the student takes courses from Iowa State and the other participating institutions North Dakota State University, Oklahoma State University, Texas Tech University, and University of Arkansas. This is a stand-alone graduate certificate available to any student with a bachelor's degree.

Courses primarily for undergraduates:

GERON 2340: Adult Development

(Cross-listed with HDFS 2340).

Credits: 3. Contact Hours: Lecture 3.

Prereq: PSYCH 2300 or HDFS 1020

Introductory exploration of the health, individual and social factors associated with adult development including younger adulthood, middle age and older adulthood. Information is presented from a life-span developmental framework. (Typically Offered: Spring)

GERON 3730: Death as a Part of Living

(Cross-listed with HDFS 3730).

Credits: 3. Contact Hours: Lecture 3.

Prereq: HDFS 1020

Consideration of death in the life span of the individual and the family with opportunity for exploration of personal and societal attitudes. (Typically Offered: Fall, Spring, Summer)

GERON 3770: Aging and the Family

(Cross-listed with HDFS 3770).

Credits: 3. Contact Hours: Lecture 3.

Interchanges of older adults and their families. Emphasis on role changes, social interaction, and independence as influenced by health, finances, lifestyles, and community support. (Typically Offered: Fall, Summer)

GERON 3780: Retirement Planning and Employee Benefits

(Cross-listed with HDFS 3780).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits in ECON, HDFS, or FIN

Financial needs analysis for retirement, characteristics of employer-sponsored and individual retirement plans, tax implications of retirement plans, Social Security funding and benefits, strategies for meeting varying retirement needs in a diverse society, financial counseling and planning practice, and overview of employee benefits. (Typically Offered: Spring)

GERON 4660: Gerontology Prepracticum Seminar

Credits: 1. Contact Hours: Lecture 1.

Prepracticum training for students planning a gerontology practicum. Exploration of possible agencies for the practicum, in-depth study of a selected agency, and development of goals and objectives for the practicum. (Typically Offered: Fall, Spring, Summer)

GERON 4670: Gerontology Practicum

Credits: 3-6. Repeatable.

Supervised field experience related to aging. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

GERON 4900: Independent Study

Credits: 1-30.

Prereq: Instructor Permission for Course

Consult program coordinator for procedure. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

GERON 5010: Seminar

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

(Typically Offered: Fall, Spring, Summer)

GERON 5010J: Gerontology Seminar: Gerontechnology

Credits: 3. Contact Hours: Lecture 3.

Gerontology Seminar: Gerontechnology. (Typically Offered: Fall, Spring, Summer)

GERON 5010M: Gerontology Seminar: Spiritual & Aging

Credits: 3. Contact Hours: Lecture 3.

Gerontology Seminar: Spiritual & Aging. (Typically Offered: Fall, Spring, Summer)

GERON 5100: Survey of Gerontology

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Provides an overview of important gerontological issues. (Typically Offered: Fall, Spring, Summer)

GERON 5210: Biological Principles of Aging

(Dual-listed with BIOL 4210). (Cross-listed with EEOB 5210).

Credits: 3. Contact Hours: Lecture 3.

Basic biological principles of aging. Course modules include an introduction to the aging process, body systems and normal aging, and environment and the biology of aging. In addition, disorders and diseases of aging, prevention and treatment and exercise and aging topics will be covered. (Typically Offered: Summer)

GERON 5220: Long-Term Care

Credits: 3. Contact Hours: Lecture 3.

Administration principles involved in the planning, organizing and directing of long-term care agencies. Includes an in-depth exposure to federal and state standards and regulations governing long-term care. (Typically Offered: Fall)

GERON 5230: Mental Health and Aging

Credits: 3. Contact Hours: Lecture 3.

Introduction to the range of issues involved in aging and mental health.

From a systems framework the major emotional and psychiatric problems encountered in old age will be examined including mood, anxiety, adjustment and personality disorders, dementia, cognitive problems, substance abuse, and suicide. Barriers to treatment and cohort and cultural issues will be explored. (Typically Offered: Spring)

GERON 5240: Cognitive Health

Credits: 3. Contact Hours: Lecture 3.

Cognitive skills form the foundation for functioning in everyday life and these skills take on added importance in older adulthood. This course focuses on selected theoretical approaches and current research related to cognitive aging. We will review normative and non-normative cognitive changes, assessment techniques, and prevention/intervention efforts. Throughout the course we will keep the role of environment and life-span implications in the forefront of our discussion. (Typically Offered: Summer)

GERON 5300: Perspectives in Gerontology

(Cross-listed with HDFS 5300).

Credits: 3. Contact Hours: Lecture 3.

Overview of current aging issues including theory and research, critical social and political issues in aging, the interdisciplinary focus of gerontology, career opportunities, and aging in the future. (Typically Offered: Fall)

GERON 5310: Foundations in Integrative Aging Studies

Credits: 3. Contact Hours: Lecture 3.

Introduction to foundational concepts in the interdisciplinary field of aging studies, including: core theories of adult development and aging how to be critical consumers of aging research; developing writing and other professional skills; and exploring career options in aging. Offered even-numbered years. (Typically Offered: Spring)

GERON 5340: Adult Development

(Cross-listed with HDFS 5340).

Credits: 3. Contact Hours: Lecture 3.

Exploration of the biological, psychological and social factors associated with aging. Although the focus is on the later years, information is presented from a life-span developmental framework. Empirical studies are reviewed and their strengths, limitations and implications for normative and optimal functioning are discussed. (Typically Offered: Spring)

GERON 5400: Nutrition and Physical Activity in Aging

(Cross-listed with DIET 5400).

Credits: 3. Contact Hours: Lecture 3.

WWW only. Basic physiologic changes during aging and their impacts in health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed. (Typically Offered: Fall)

GERON 5450: Economics, Public Policy, and Aging

(Cross-listed with HDFS 5450).

Credits: 3. Contact Hours: Lecture 3.

Policy development in the context of the economic status of the older adult population. Retirement planning and the retirement decisions; social security and public transfer programs; intra-family transfers to/ from the aged; private pensions; financing medical care; prospects and issues for the future. (Typically Offered: Fall)

GERON 5630: Environments for the Aging

(Cross-listed with HDFS 5630).

Credits: 3. Contact Hours: Lecture 3.

Emphasis on independent living within residential settings including specialized shelter, supportive services and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities. (Typically Offered: Spring)

GERON 5710: Design for All People

(Cross-listed with ARCH 5710).

Credits: 3. Contact Hours: Lecture 3.

Principles and procedures of inclusive design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of History, Theory, Culture requirements. (Typically Offered: Spring)

GERON 5770: Aging in the Family Setting

(Cross-listed with HDFS 5770).

Credits: 3. Contact Hours: Lecture 3.

Theories and research related to personal and family adjustments in later life affecting older persons and their intergenerational relationships. Related issues including demographics also are examined through the use of current literature. (Typically Offered: Spring)

GERON 5840: Program Evaluation and Research Methods in Gerontology

(Cross-listed with HDFS 5840).

Credits: 3. Contact Hours: Lecture 3.

Overview of program evaluation, research methods, and grant writing in gerontology. Includes application of quantitative and qualitative methods in professional settings. (Typically Offered: Spring)

GERON 5890: Systems Neuroscience: Brain, Behavior, and Nutrition-Related Integrative Physiology

(Cross-listed with FSHN 5890/ NUTRS 5890/ NEURO 5890/ PSYCH 5890).

Credits: 2. Contact Hours: Lecture 2.

Structural, functional, and biochemical aspects of brain and non-motor behavior across the human lifespan. Types of neuroimaging used to assess the brain. Current research is leveraged to gauge how nutrition, diseases related to nutrition, and associated physiological processes influence the brain, particularly for common developmental, psychological, and neurological disorders. (Typically Offered: Spring)

GERON 5900: Special Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Consult program coordinator for procedure. (Typically Offered: Fall, Spring, Summer)

GERON 5910: Internship

Credits: 1-9. Repeatable, maximum of 9 credits.

Prereq: Instructor Permission for Course

Supervised experience in an area of gerontology. (Typically Offered: Fall, Spring, Summer)

GERON 5940: Professional Seminar in Gerontology

(Cross-listed with HDFS 5940).

Credits: 3. Contact Hours: Lecture 3.

An integrative experience for gerontology students designed to be taken near the end of the degree program. By applying knowledge gained in earlier coursework, students will strengthen skills in ethical decision-making behavior, applying these skills in gerontology-related areas such as advocacy, professionalism, family and workplace issues. Students from a variety of professions will bring their unique perspectives to bear on topics of common interest. (Typically Offered: Summer)

GERON 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**GERON 6300: Theories of Aging**

Credits: 3. Contact Hours: Lecture 3.

Historical, contemporary, and interdisciplinary basis of aging theory. Biological, psychological, sociological, and human developmental conceptualizations of aging will be critically assessed. Emphasis will be placed on conceptual models, as well as theoretical development and application within gerontological research and the field of aging. (Typically Offered: Summer)

GERON 6350: Adult Development, Aging, and Health

(Cross-listed with HDFS 6350).

Credits: 3. Contact Hours: Lecture 3.

Review of the impact of the growing older adult population as well as individual development and aging on individuals, families, and society. Exploration of theoretical perspectives applied to adult development and aging and distinction of normative and non-normative changes in adulthood. Discussion of methods to assess development across adulthood and consideration of the role of individual and environmental factors impacting efforts to optimize adult development. Offered odd-numbered years. (Typically Offered: Fall)

GERON 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Global Human Sciences Minor

Students can earn a Global Human Sciences Minor by completing a minimum of 15 credits (17 for those participating in International Student Teaching), including 6 credits of required core courses and between 9 and 11 credits selected from a designated list of courses offered by the

departments and school in the College of Human Sciences. This minor is available to any undergraduate student at Iowa State University.

The Global Human Sciences Minor will contribute to students' ability to:

- Develop and demonstrate effective and professional oral and written communication skills regarding global human sciences
- Reflect on their experience with global human sciences and on how it has influenced their understanding of what it means to be a human scientist
- Analyze how social, cultural, technological, and economic contexts have affected the development of human sciences disciplines at home and abroad
- Identify and explain how issues of ethics, diversity, and social responsibility influence global human sciences

Required Core Courses (6 credits)

HSCI 3010	Introduction to Global Human Sciences	1
HSCI 3020	Global Human Sciences Capstone	2
AESHM 4210	Developing Global Leadership: Maximizing Human Potential	3

Additional Courses (9-11 credits)

All students except International Student Teaching participants: Select 9 credits from the list below.

CHS students only: Select at least 3 credits from the list below that are outside the home department or school.

International Student Teaching participants only: select 8 credits from EDUC 4160D, EDUC 4160E, or EDUC 4170N, and 3 credits from the list below outside the School of Education for a total of 11 credits.

AMD 3540	Euro-American Dress History: Prehistoric to Mid-19th Century	3
AMD 3620	Global Dress in the Fashion System and Society	3
AMD 3720	Sourcing and Global Issues	3
AESHM 2810	Orientation to International Field Study	1
AESHM 3810D	International Field Study: Hospitality Management	1-3
AESHM 3810F	International Field Study: Event Management	1-3
AESHM 3810N	International Field Study: Apparel, Merchandising, and Design	1-3
ATR 5490A	Athletic Training Clinical Education Study Abroad: Preparing for the Experience	1
ATR 5490B	Athletic Training Clinical Education Study Abroad	2
DANCE 2110	Fundamentals and Methods of Social and World Dance	1
DANCE 2700	Dance Appreciation	3
DANCE 3850	Methods of Teaching Dance	2

EDUC 2750	International Travel Study - Pre-departure Orientation	1
EDUC 4160D	Supervised Student Teaching - Elementary: International Student Teaching - Primary Grades	8
EDUC 4160E	Supervised Student Teaching - Elementary: International Student Teaching - Intermediate Grades	8
EDUC 4170N	Student Teaching: International	8
EDUC 4750	International Travel Study in Education	1-6
EVENT 4230	International Meetings and Conferences Management	3
FSHN 3420	World Food Issues: Past and Present	3
FSHN 4420	Issues in Food and Society	2
FSHN 4600	Global Nutrition, Health and Sustainability	3
FSHN 4900D	Independent Study: International Experience	1-6
FSHN 4960A	Food Science and Human Nutrition Travel Course: International travel	1-4
HDFS 4790	Family Dynamics Through a Social and Cultural Lens	3
HDFS 5750	Cross-cultural Perspectives about Families and Children	3
HSPM 2600	Global Tourism Management	3
HSPM 4870	Fine Dining Management	3
KIN 3810A	Study Abroad Experience in Kinesiology: Preparing for the Experience	1
KIN 3810B	Study Abroad Experience In Kinesiology	2
NRS 4900C	Independent Study: International Experience	1-2
Internship or work experience course		1-6
Courses completed at an international institution as part of a study abroad experience from the following options *		1-6
Accademia Italiana		
Australia: Semester at University of Deakin		
Australia: Semester at University of Newcastle		
Fu Jen Catholic University Exchange		
Glasgow Caledonian University Exchange		
London College of Fashion		
Lorenzo de' Medici Institute		
New Zealand: Semester at University of Otago		
Paris American Academy		

* Coursework must be in a human sciences discipline.

Students may request a review of coursework to be completed as part of a study abroad experience at other international institutions that would meet this requirement.

Health Coach Certificate

Health Coach - Certificate

The undergraduate health coach certificate provides a rigorous academic and theoretical background in three components of health (nutrition, exercise and motivational coaching) required to prepare workers for the challenges of being a health coach. The certificate provides additional credentials for students already pursuing a bachelor's degree in food science and human nutrition, kinesiology, or psychology. Students would be able to sit for the American Council on Exercise exam should they choose to do so.

Any Iowa State University student may apply for the undergraduate health coach certificate. Students should contact their academic advisor to add the Health Coaching Certificate.

The Health Coach certificate requires 23 credits:

Note: Pre-requisites apply for all courses required in the health coach certificate.

FSHN 2650	Nutrition for Active and Healthy Lifestyles	3
FSHN 3640	Nutrition and Prevention of Chronic Disease	3
or FSHN 3650	Obesity and Health	
FSHN 3610	Nutrition and Health Assessment	2
KIN 4580	Principles of Fitness Assessment and Exercise Prescription	4
KIN 4670	Exercise and Health: Behavior Change	3
PSYCH 4220	Counseling Theories and Techniques	3
PSYCH 4850	Health Psychology	3
KIN 4940A	Practicum in Motivational Interviewing for Health: Principles of Motivational Interviewing	2
or KIN 4940B	Practicum in Motivational Interviewing for Health: Supervised Experience	

Total Credits **23**

Hospitality Management

Administered by the Department of Apparel, Events, and Hospitality Management

The Hospitality Management program offers study for the degree of Bachelor of Science with a major in hospitality management. As the only 4-year hospitality program in the state of Iowa, the program prepares undergraduate students with essential principles of managing a variety of hospitality organizations, such as hotels, restaurants,

clubs, and foodservice companies. Students also develop expertise in managing diverse areas, such as: (a) food/beverage management, (b) lodging management, (c) senior living management, and (d) tourism and attractions.

Students get hands-on experience at the Joan Bice Underwood Tearoom and SPARKS. The Joan Bice Underwood Tearoom is a 105-seat learning laboratory where students take responsibility for meal preparation and service. The Joan Bice Underwood Tearoom is the earliest established student run restaurant that is still in operation on a college campus in the United States. SPARKS is the student operated café in the Student Innovation Center, where students have the opportunity to manage all the operations of the facility from menu development, inventory, human resources, and much more.

Our students participate in internships locally, nationally, and internationally with a range of hotels, restaurants, caterers, theme parks, sports facilities, cruise ships convention and visitors' bureaus, independent businesses, and country clubs. Courses provide students with opportunities to develop and apply management techniques in hospitality organizations. The Hospitality Management curriculum provides students with the opportunity to obtain professional certifications in multiple areas.

The Hospitality Management program mission is to create, share, and apply knowledge to provide hospitality consumers with products, services, and experiences to enhance overall well-being. We accomplish our mission with a personalized, nationally ranked program. Our students learn in a nurturing, safe, and inclusive environment, with caring faculty with industry experience.

Student Learning Outcomes

Upon graduation, students should be able to:

1. Identify and apply the knowledge and skills necessary for hospitality and tourism operations
2. Develop and integrate a core set of business skills necessary to successfully operate a hospitality and tourism organization
3. Demonstrate competence in the communication skills necessary for hospitality and tourism management
4. Formulate business decisions in hospitality and tourism management
5. Evaluate leadership principles necessary in the diverse and global hospitality and tourism industry

UNDERGRADUATE STUDY

The program offers a Bachelor of Science degree in hospitality management. Coursework is planned to provide students with a general education plus professional preparation for supervisory and executive

positions in hospitality organizations such as clubs, hotels, dining, theme parks, cruise lines, and casinos. Principles of business management are presented, as well as fundamentals of hospitality operations.

Graduates demonstrate leadership characteristics and make decisions based on integrating knowledge of financial, human resources, marketing, and operational principles for managing hospitality operations. They demonstrate best practices in meeting customer expectations and use of technology (e.g., Point-of-Sales systems, property management systems, and revenue management systems) to achieve operational efficiency and effectiveness.

Learning experiences are provided in the food and beverage, casino, lodging, senior living, and tourism industries and other approved establishments. Students are required to have a total of at least 800 hours of relevant work experience prior to graduation. Of the 800 hours, 200 hours are required prior to completing one year in the program.

The Bachelor of Science Degree

Total credits required: 123, including a minimum of 18 credits from the AESHM Department at Iowa State University for the degree.

The program offers a **concurrent B.S. and M.S. degree** that allows students to obtain a B.S. and M.S. degree in hospitality management in *five* years. Application for admission to the Graduate College should be made in the junior year.

Minor in Hospitality Management

The Hospitality Management minor (HSPM) requires the completion of at least 15 credits from the Hospitality Management curriculum. The minor must include at least 6 credits in courses numbered 3000 or above taken at ISU. All course pre-requisites must be completed prior to taking the course. All minor courses must be taken for a grade.

Minor in Beverage Management

The Beverage Management minor (BVM) requires the completion of at least 15 credits from the Beverage Management minor curriculum. The minor must include at least 6 credits in HSPM courses and 6 credits in courses numbered 3000 or above taken at ISU. All course pre-requisites must be completed prior to taking the course. All minor courses must be taken for a grade.

Curriculum in Hospitality Management

Administered by the Apparel, Events, and Hospitality Management Department. Leading to the Bachelor of Science degree.

The curriculum in Hospitality Management develops students as leaders for the hospitality professions.

A minor in Hospitality Management is available; see requirements under Hospitality Management, Courses and Programs.

Students majoring in Hospitality Management are required to earn C- or better in all AESHM and HSPM courses. Communication Proficiency Requirement: Grade of C or better in ENGL 1500 Critical Thinking and Communication, and ENGL 2500 Written, Oral, Visual, and Electronic Composition.

Degree Requirements

10 Communications and Library

ENGL 1500	Critical Thinking and Communication (Grade of C or better required in ENGL 1500)	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition (Grade of C or better required in ENGL 2500)	3
LIB 1600	Introduction to College Level Research	1

US Diversity and International Perspectives Requirement: Students in HSPM fulfill the US Diversity and International Perspectives Requirements by choosing 3 credits of coursework from each of the University-approved lists.

Note: This sequence is only an example. The number of credits taken each semester should be based on the individual student's situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

¹ BIOL 1010 required if student has not completed high school biology

² When the 4-year plan indicates HSPM Group or General Electives, choice depends on courses available. However, you must have a total of 13-15 credits of HSPM electives and 11-17 credits of General Electives (HSPM courses may be taken to meet General Electives requirements).

³ CHEM 1600 required if student has not completed high school chemistry

Hospitality Management Minor

A minor in Hospitality Management can be earned by successfully completing the following for a total of 15 credits. The minor must include at least six (6) credits in courses numbered 3000 or above taken at ISU. All course prerequisites must be completed prior to taking the course. All minor courses must be taken for a grade. The Hospitality Minor requires

students to complete HSPM 1010, HSPM 1330, and HSPM 2330. The remaining 8 credits may be selected from any HSPM designated course, as well as AESHM 2380, AESHM 2870, AESHM 3400, and AESHM 4740.

The Hospitality Minor requires students to complete the following courses:

HSPM 1010	Introduction to the Hospitality Industry	3
HSPM 1330	Food Safety Certification	1
HSPM 2330	Hospitality Sanitation and Safety	3
Total Credits		7

The remaining eight (8) credits may be selected from the following:

AESHM 2380	Human Resource Management	3
AESHM 2870	Principles of Management in Human Sciences	3
AESHM 3400	Hospitality and Apparel Marketing Strategies	3
AESHM 4740	Entrepreneurship in Human Sciences	3
HSPM 2010	Casino Management I	3
HSPM 2250	Introduction to Food Service Operations	3
HSPM 2300	Introduction to Hospitality Performance Analysis	3
HSPM 2480	Introduction to Senior Living Management	3
HSPM 2600	Global Tourism Management	3
HSPM 2800	Non-Alcoholic Beverages and Cafe Operations	3
HSPM 2890	Contemporary Club Management	3
HSPM 3010	Hospitality Revenue Management	3
HSPM 3150	Hospitality Law	3
HSPM 3200	Attractions and Amusement Park Administration	3
HSPM 3520	Lodging Operations Management I	3
HSPM 3580	Economics for Senior Living Management	3
HSPM 3830	Wine and Spirits in Hospitality Management	2
HSPM 3830L	Wine, Spirits, and Mixology Laboratory in Hospitality Management	2
HSPM 3850	Beer and Brewed Beverages in Hospitality Management	1
HSPM 4200	Fairs, Festivals, and Events Management	3
HSPM 4330	Hospitality Financial Management	3
HSPM 4370	Hospitality Technology Applications	3
HSPM 4520	Lodging Operations Management II	3
HSPM 4550	Strategic Management in Hospitality	3

Beverage Management Minor

The AESHM Department offers a minor in Beverages through the Hospitality Management program. The minor can be earned by successfully completing the following for a total of 15 credits. The minor must include at least six (6) credits in HSPM courses, six (6) credits in

courses numbered 3000 or above taken at ISU. All course prerequisites must be completed prior to taking the course. All minor courses must be taken for a grade. The Beverages Minor requires students to complete HSPM 1010 and HSPM 1330. The remaining 11 credits may be selected from any of the courses below.

The Beverage Management Minor requires students to complete the following courses:

HSPM 1010	Introduction to the Hospitality Industry	3
HSPM 1330	Food Safety Certification	1
Total Credits		4

The remaining eleven (11) credits may be selected from the following:

BBMB 1200	The Biochemistry of Beer	2
BBMB 1200L	Biochemistry of Beer Laboratory	1
HORT 2760	Understanding Grape and Wine Science	3
FSHN 5090	Sensory Evaluation of Wines	2
HSPM 2800	Non-Alcoholic Beverages and Cafe Operations	3
HSPM 3150	Hospitality Law	3
HSPM 3830	Wine and Spirits in Hospitality Management	2
HSPM 3830L	Wine, Spirits, and Mixology Laboratory in Hospitality Management	2
HSPM 3850	Beer and Brewed Beverages in Hospitality Management	1
HSPM 4200	Fairs, Festivals, and Events Management	3
HSPM 4870	Fine Dining Management	3

Graduate Study

The Hospitality Management program offers work for the Master of Science and Doctor of Philosophy degrees in hospitality management. Graduates of the program are able to interpret trends and adapt operating practices of hospitality organizations to changing economic, social, political, technological, and environmental conditions. The master's degree program is designed to prepare individuals for managerial and leadership positions in industry, business, and non-profit organization; teaching careers; and continued graduate study.

The doctoral program is designed to prepare individuals to teach in programs at the university level; provide leadership in non-profit organizations; and/or conduct advanced research at the corporate level or with research firms.

A degree in hospitality management is the usual background for graduate study; however, applicants with preparation in dietetics, business, or closely related fields are encouraged to apply. Ph.D. applicants must have two (2) years of professional work experience in the field.

The Master of Science degree requires either a thesis or non-thesis (creative component) project. Students also are required to take three core courses out of the four offered in the core areas (human resources, financial management, marketing, and strategic management).

The Ph.D. program requires a minimum of 72 credits, up to 30 of which may be applied from the master's degree. All Ph.D. students take a minimum of 15 research/dissertation credits.

Human Development and Family Studies

Administered by the Department of Human Development and Family Studies. Leading to the degree of Bachelor of Science.

Total credits required: 120. The human development and family studies curriculum prepare graduates to pursue careers in helping professions with employment opportunities in government, non-profit, and private agencies, as well as continue on to graduate studies programs. Students select an option within the major: child development and guidance; advocacy, administration, and policy; or health, well-being, and prevention.

Student Learning Outcomes

The following set of learning goals was established for the bachelor's degree in Human Development and Family Studies (HDFS). Upon completion of the undergraduate degree in HDFS, students will:

Learning Objective 1: Demonstrate an understanding of the central concepts, research, and theories within the field.

Learning Objective 2: Demonstrate professional development and self-reflection skills.

Learning Objective 3: Demonstrate an ability to access and evaluate peer-reviewed research.

A minor in human development and family studies is available; see requirements under Human Development and Family Studies, Undergraduate Minor.

The following requirements are for the HDFS major by option.

Child Development & Guidance Option Human Development and Family Studies Core: 23-24 credits

HDFS 1020	Human Development	3
HDFS 1100	Freshman Learning Community Orientation	1
or HDFS 1110	New Transfer Student Seminar	
HDFS 1830	Personal Finance in Early Adulthood	1
HDFS 2180	Professional Orientation and Service Learning	2

HDFS 3690	Research Methods in Human Development and Family Studies	3
HDFS 4180B	Professional Practice Reflection/Discussion: Internships	2
HDFS 4790	Family Dynamics Through a Social and Cultural Lens	3
HDFS 4910	Internship	8-9
Total Credits		23-24

Individual and Family Development: 12 credits

Select 4 courses from: 12

HDFS 2240	Development in Young Children: Birth through Age 8
or HDFS 223 Child Development and Health	
Note: HDFS 2240 is a prerequisite to HDFS 3420 and HDFS 3440	
HDFS 2260	Development and Guidance in Middle Childhood
HDFS 2270	Adolescence and Emerging Adulthood
HDFS 2340	Adult Development
HDFS 2490	Parenting and Family Diversity Issues
HDFS 2700	Family Communications and Relationships
HDFS 3770	Aging and the Family

Total Credits 12

Child Development & Guidance Option: 24 credits

Emphasis classes. Select 4 from 12-13

HDFS 2400	Literature for Children
HDFS 3420	Social and Emotional Development and Child-centered Guidance in Early Childhood
HDFS 3440	Programming for Children in Early Care and Education
HDFS 3450	Inclusive Teaching and Interaction Strategies
HDFS 4560	Working with Families in Early Intervention
HDFS 4860	Administration of Human Services Programs

Supporting classes. Select 4 from: 12

HDFS 2390	Consumer Issues
HDFS 2760	Human Sexuality
HDFS 2830	Personal and Family Finance

GRADUATE PROGRAMS

More information on the variety of graduate programs offered through the Department of Human Development and Family Studies can be found here: <https://hdfs.hs.iastate.edu/graduate-students/graduate-programs/>.

Human Development and Family Studies Department

The Department of Human Development and Family Studies offers courses that focus on the interactions among individuals, families, their resources, and their environments throughout the life span. The department offers work for the Bachelor of Science degree in five curricula: Early Childhood Education, Family and Consumer Sciences Education and Studies, Financial Counseling and Planning, Human Development and Family Studies, and an affiliated program: Early Childcare Education and Programming (a distance education program offered in collaboration with six other universities).

Students graduating in Human Development and Family Studies will

1. Communicate with clear purpose, workable organization and effective style in written, oral, visual and electronic (WOVE) formats to foster collaboration, provide information and advance knowledge related to child, adult, family, and community services.
2. Consistently and realistically analyze and evaluate one's own knowledge, abilities and actions in comparison to professional standards and create action plans to enhance personal and professional efficacy related to working with children, adults, families and communities.
3. Understand content related to working with children, adults, families, and communities within a chosen program. Use critical thinking skills to evaluate and utilize evidence-based practices. Use logical and ethical reasoning to make decisions and solve problems.
4. Understand the diverse needs of children, adults, and families. Ensure equitable access of children, adults, and families to appropriate environments that support healthy living. Engage children, adults, and families with socially responsible and respectful behavior.

Communication Proficiency requirement: A student must achieve a grade of C or higher in ENGL 1500, Critical Thinking and Communication, and ENGL 2500, Written, Oral, Visual, and Electronic Composition. A student achieving a grade of C– or lower in 1500 and/or 2500 must either repeat the course(s), earning a minimum grade of C, or, in consultation with

the advisor and the coordinator of freshman English, complete another appropriate English writing course with a minimum grade of C.

The **Human Development and Family Studies** curriculum leads to work in helping professions with employment opportunities in public and private agencies. Graduates of the program are prepared for employment in agencies and organizations serving children, youth, families, and adults in the areas of education/prevention, treatment, and administration. This flexible program provides a broad emphasis in theory, research, and application in child, adult and family services including attention to community issues and public policy.

Students in Human Development and Family Studies may choose coursework that leads to becoming a Certified Family Life Educator (CFLE), a program that has been approved by the National Council on Family Relations. These courses provide the basic education for students interested in working with families, including adolescents, parents, or adults working to strengthen relationships. The student takes courses that support the development of knowledge and skills in family life content areas selected by the National Council on Family Relations. The certification is a voluntary credential that requires the individual to complete a degree in an approved program and to have at least two years of work experience in family life education settings. Iowa State University does not grant the Certified Family Life Educator credential. The certification is granted only by the National Council on Family Relations. See <https://hdfs.hs.iastate.edu/future-students/find-your-major/certified-family-life-educator/> and/or <http://www.ncfr.org/cfle-certification>.

The curriculum in **Early Childhood Education – Unified** prepares graduates to teach young children and work with their families. This curriculum has been approved by the Iowa Department of Education and meets requirements for candidates to seek teacher licensure in early childhood education – unified, which permits individuals to teach general and special education for children from birth through third grade. Graduates may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through third grade) or in home-based programs. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and the School of Education. For more information about the program, see <https://hdfs.hs.iastate.edu/find-your-major/early-childhood-education/>.

Students who enroll in the early childhood education – unified program must apply to and be accepted into the teacher education program prior to enrolling in advanced courses.

Family and Consumer Sciences Education and Studies offers a curriculum for the Bachelor of Science degree.

(<http://catalog.iastate.edu/collegeofhumansciences/familyandconsumerscienceseducationandstudies>)

The curriculum in Family and Consumer Sciences Education and Studies (FCEDS) prepares graduates with a broad understanding of individual and family well-being. Graduates apply knowledge and research in family and consumer sciences content in global professional settings. They work in an integrative fashion to improve well-being by addressing and acting on complex problems confronting individuals, families, and communities. The study of Family and Consumer Sciences Education incorporates the following 16 content areas (https://opi.mt.gov/Portals/182/Page%20Files/Career%20%26%20Technical%20Education/Docs/FCS/15FCS_NationalStandards.pdf): Career, Community and Family Connections; Consumer and Family Resources; Consumer Services; Education and Early Childhood; Facilities Management and Maintenance; Family; Family and Community Services; Food Production and Services; Food Science, Dietetics, and Nutrition; Hospitality, Tourism and Recreation; Housing and Interior Design; Human Development; Interpersonal Relationship; Nutrition and Wellness; Parenting; and Textiles, Fashion and Apparel.

Students in the program choose one of three options, Teacher Licensure, Communications, or Professional Studies.

Students in Family and Consumer Sciences Education and Studies may choose coursework that leads to becoming a Certified Family Life Educator (CFLE), a program that has been approved by the National Council on Family Relations. These courses provide the basic education for students interested in working with families, including adolescents, parents, or adults working to strengthen relationships. The student takes courses that support the development of knowledge and skills in family life content areas selected by the National Council on Family Relations. The certification is a voluntary credential that requires the individual to complete a degree in an approved program and to have at least two years of work experience in family life education settings. Iowa State University does not grant the Certified Family Life Educator credential. The certification is granted only by the National Council on Family Relations. See <https://hdfs.hs.iastate.edu/future-students/find-your-major/certified-family-life-educator/> and/or <http://www.ncfr.org/cfle-certification> (<http://www.ncfr.org/cfle-certification/>).

Graduates may also choose from one of several nationally recognized professional certifications available from the American Association of Family and Consumer Sciences (AAFCS) Council for Certification. This program measures competencies of FCS professionals using high-quality, rigorous assessments. Certifications that are currently available are (<http://www.aafcs.org/home> (<https://www.aafcs.org/home/>)): CFCS: Certified in Family and Consumer Sciences; CFCS-HDFS: Certified in Human Development and Family Studies; CFCS-HNFS: Certified in

Hospitality, Nutrition, and Food Science; and CPFFE: Certified Personal and Family Finance Educator.

There is also an opportunity to take courses that will allow you to be recommended for a family and consumer sciences endorsement or teacher licensure as a post baccalaureate student.

The **Financial Counseling and Planning (FCP)** curriculum prepares students for careers in family financial services. Financial Counseling and Planning is a growing career field and appeals to students who want to work with individuals and families to help them meet their financial goals and improve their financial capability to better meet financial challenges. Coursework provides students with the family resource management and interpersonal skills needed to help families remain financially secure. Based on career goals, students select a path that leads to fulfilling the education requirements for the leading designations and certifications in financial counseling and planning. Graduates of the program are prepared for employment in personal banking, financial services, insurance, financial counseling and planning, and human service organizations. Laboratory and practicum opportunities exist in the Iowa State University Financial Counseling Clinic and with program partners in the financial services industry. A field work experience helps students apply their studies and experience the profession in real-world settings.

Financial Counseling and Planning majors are also prepared to enter graduate programs in family financial planning, financial education, economics, finance, and law.

Juniors and seniors in Financial Counseling and Planning who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a B.S. in Financial Counseling and Planning and a M.S. in Human Development and Family Studies or a B.S. in Financial Counseling and Planning and a Graduate Certificate in Family Financial Planning. Under concurrent enrollment, students simultaneously take undergraduate and graduate courses and may be eligible for assistantships. See Graduate Study for more information (<https://hdfs.hs.iastate.edu/graduate-students/graduate-programs/>).

The Financial Counseling and Planning major is registered with Certified Financial Planner Board of Standards Inc. as a CFP Board-registered Program. ISU courses satisfy CFP Board's education requirement, allowing an individual to sit for the CFP® Certification Examination.

Iowa State University does not certify individuals to use the CFP® CERTIFIED FINANCIAL PLANNER™ title. CFP certification is granted only by Certified Financial Planner Board of Standards Inc. to those persons who, in addition to completing an educational requirement such as this CFP Board-Registered Program, have met its ethics, experience and

examination requirements (CFP Board of Standards website <https://www.cfp.net/>).

Certified Financial Planner Board of Standards Inc. owns the certification marks CFP®, CERTIFIED FINANCIAL PLANNER™ and the federally registered CFP (with flame logo), which it awards to individuals who successfully complete initial and ongoing certification requirements.

FCP majors also satisfy the education requirements for the Accredited Financial Counselor (AFC®) designation offered through the Association for Financial Counseling and Planning Education (AFCPE).

Affiliated Programs

The **Early Childcare Education and Programming (ECP)** curriculum, offered by the Great Plains Interactive Distance Education Alliance (GPIDEA), is designed to prepare graduates to work in a variety of early care and education programs in local communities and on military installations. Some of these programs are childcare centers and homes, infant/toddler and preschool programs, Head Start programs, and before and after-school programs for children ages birth to eight. This is an online program offered through a collaboration of seven universities as part of GPIDEA where the program is referred to as Early Care and Education for a Mobile Society. For more information see <https://www.gpidea.org/program/early-care-and-education-in-a-mobile-society> (<https://www.gpidea.org/program/early-care-and-education-in-a-mobile-society/>).

The ECP curriculum is designed to provide content for the final two years of a student's program; the content is focused specifically on topics directly relevant to the major. Students will complete a total of 120 credits for the major, 51 of which are specific to the ECP curriculum. These 51 credit hours are comprised of 12 core courses and 3 practica; the final practicum will be a 6-credit capstone experience. Students must complete 30 credits of college work, a lifespan development course, and have a 2.5 GPA to be admitted to ECP. If students prefer to be admitted to ISU before being admitted to the ECP major, they can enroll as Pre ECP (PECP) students until they are eligible for the ECP major. For more information about the program at Iowa State, see <https://online.hs.iastate.edu/early-childcare-programming> (<https://online.hs.iastate.edu/early-childcare-programming/>).

Curricula:

- **Early Childhood Education – Unified**
- **Family and Consumer Sciences Education and Studies**
- **Financial Counseling and Planning**
- **Human Development and Family Studies**
- **Affiliated Program: Early Childcare Education and Programming (GPIDEA program)**

Minors

The department offers minors in Human Development and Family Studies and Financial Counseling and Planning. Minors consist of at least 15 credits including 6 credits taken at Iowa State University in courses numbered 3000 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

The **Human Development and Family Studies** minor may be earned by completing 15 credits.

HDFS 1020	Human Development	3
One of the following:		3
HDFS 2230	Child Development and Health	
HDFS 2260	Development and Guidance in Middle Childhood

Graduate Study

The department offers work for the Master of Science (thesis or non-thesis options) and Doctor of Philosophy degrees with the major in Human Development and Family Studies. Minors are also available for students taking major work in other departments. Graduates of M.S. and Ph.D. programs in the department will understand and apply relevant theories to educational, research, and/or intervention or prevention programs. It is intended that they will produce and disseminate research results and provide leadership in human development and family studies professions.

Graduate study in Human Development and Family Studies at Iowa State University is multidisciplinary and focuses on research and practice in several content areas such as adolescent/youth development, adult development and aging, family studies and policy, family economic well-being and financial planning, infant and child development, health and well-being; and lifespan development.

Prerequisite to work in the major is the completion of a related undergraduate program with basic courses and/or experiences in areas such as child/human development, community and regional planning, economics, education, family studies, psychology, or sociology. Additional coursework or prerequisites (e.g., basic statistics) may be required depending on the undergraduate program and program of study. Students

may be admitted to our doctoral program with either a bachelor's (M.S./Ph.D. Track, 5 years) or a master's degree (Ph.D. Track only, 3 years). Students admitted to the Ph.D. Track without a prior master's degree complete requirements for a thesis-based master's degree as part of their doctoral program of study.

All students take a core set of courses; the program of study is then completed with a selection of courses that meet the individual needs of the student. The variety of and flexibility in the coursework allows a student to tailor a program to specific academic interests. The graduate programs are based on a theory, research, and application interactive paradigm with all three areas integrated into content and method courses.

The department offers a graduate minor in Human Development and Family Studies. For more detailed information about the minor, see the Graduate Minors tab.

The department also offers four Graduate Certificates available to HDFS majors as well as students in other departments and professionals in the field.

The department also participates in several Master of Family and Consumer Sciences (MFCS) degree programs (<http://catalog.iastate.edu/collegeofhumansciences/familyandconsumersciences/>). Admission to the youth (YTH), family financial planning (FFP) and gerontology (GERON) specialization programs require submission of the Graduate College application form, transcripts, 2 letters of recommendation, resume and a goal statement. Students in a MFCS program select one of the options listed below.

1. Master of Family and Consumer Sciences - Human Development and Family Studies (MFCS-HDFS). The Master of Family and Consumer Sciences degree specialization track in Human Development and Family Studies (HDFS) provides students with the opportunity to enhance their background knowledge and skills for working with children and families (37 credits).
2. Master of Family and Consumer Sciences - Youth Development (MFCS-YD). This is an entirely online degree focusing on the skills to serve today's young people. The degree uses a strengths-based curriculum that supports you to grow socially, emotionally, and cognitively. There are also two youth development related certificates available for students (see Graduate Certificates tab for details) (36 credits).
3. Master of Family and Consumer Sciences - Family Financial Planning Program (MFCS-FFP). This is a master's degree program offered entirely online, designed to prepare individuals to work in the financial planning field (36 credits). Completion of course works in the master's degree, or a graduate certificate meets the educational

requirements to sit for the Certified Financial Planner (CFP) Board of Standards Certification Examination.

The department offers a Financial Counseling and Planning (FCP) concurrent degree program that allows students to obtain a B.S. in FCP and an M.S. in HDFS or a B.S. in FCP and a Graduate Certificate in Family Financial Planning in 5 years. Application for admission to the Graduate College should be made near the end of the junior year. Under concurrent enrollment, students simultaneously take undergraduate and graduate courses and may be eligible for assistantships. Students interested in these programs should contact the department for details.

Finally, the department collaborates with the interdepartmental Gerontology program; students may declare a minor in Gerontology. The Master of Family and Consumer Sciences - Gerontology program (MFCS-GERON) and the Graduate Gerontology Certificate program are designed to prepare professionals who work directly with older people or are involved in education and research related to older adults. Professionals offering direct services often are involved in health promotion programs, directing inter-generational activities, managing senior centers or retirement communities, counseling older people and their families, and helping people plan for retirement. Professionals involved in education and research may evaluate community-based services, teach others about the aging process, develop policies and programs to serve the needs of older adults, and work with business and industry on issues related to an aging work force.

Graduate Minors

The department offers a graduate minor in Human Development and Family Studies. To earn this minor, students in a master's program must take 9 credits in HDFS graduate courses (5000, 6000 level) with a limit of 3 credits in seminar or workshop credit (credits in 5910 or 6910 not allowed). To earn a minor in HDFS students in a Doctoral program must take 12 credits in HDFS graduate courses (5000, 6000 level) with a limit of 3 credits in seminar or workshop credit (credits in 5910 or 6910 not allowed). A graduate faculty member from the minor program must serve on the student's POS Committee.

HDFS Certificates

The department offers four Graduate Certificates available to HDFS majors as well as students in other departments and professionals in the field. The certificates emphasize application and relevance to growing diversity and demands on the work force. The four certificate areas are:

1. Developmental and Family Sciences Advanced Research Design and Methods (15 credits)
2. Family Well-Being in Diverse Society (12 credits)
3. Infant and Early Childhood Mental Health (12 credits, online)
4. Life-Span Development (12 credits, online)

For more information about courses for the certificates, go to <https://hdfs.hs.iastate.edu/graduate-students/graduate-programs/graduate-certificates/>. (<https://hdfs.hs.iastate.edu/graduate-students/graduate-programs/graduate-certificates/>)

Youth Development Certificates

The department also collaborates to offer two certificates related to youth development through the MFCS program. Both certificates are designed to prepare individuals who work directly with youth or are involved in education and research related to youth. For more information, go to <http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/>.

1. Youth Development Specialist Certificate (13 credits)
2. Youth Program Management and Evaluation Certificate (13 credits)

Family Financial Planning Certificates

The MFCS – Family Financial Planning (FFP) program also offers two certificates listed below. More information can be found at <http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-ffp/>.

1. FFP certificate. Master of Family and Consumer Sciences with Family Financial Planning (FFP) specialization graduate certificate program (18 credits)
2. FHC certificate. Master of Family and Consumer Sciences Financial and Housing Counseling (FHC) specialization graduate certificate program (18 credits)

Kinesiology

Mission

We promote health and well-being by creating and disseminating knowledge about physical activity and active living. Through discovery, learning and engagement we improve the lives of citizens of Iowa, the United States and the world.

Goals

The department has identified the following goals to support this mission:

1. We seek to improve the lives of citizens of Iowa, the United States, and the world by the creation and dissemination of knowledge about physical activity and its relationship to health and well-being.
2. We prepare scholars and professionals in the study of physical activity at the undergraduate and graduate levels.
3. We educate the public and the University community in the scientific aspects of physical activity especially exercise, sport, and the role of movement throughout the lifespan.

UNDERGRADUATE STUDY

The Department of Kinesiology offers a Bachelor of Science degree in Kinesiology & Health. The undergraduate curriculum major/option is comprised of three components: general education, required departmental courses and the major/option courses. The intent of the general education component is to promote intellectual and personal growth and to prepare students for success in the basic, advanced and major/option components. Required courses provide an introduction to the field and fundamental principles of physical activity, fitness, health and disease.

B.S. degree in Kinesiology & Health

The Kinesiology & Health major includes five specialization options. Options comprise a focused area of study within Kinesiology and Health. Coursework within each specialization option builds upon personal and scholarly learning by enabling students to master content and skills specific to career applications. Options available are:

1. Community and Public Health
2. Exercise Science
3. Physical Activity and Health Promotion
4. Physical Education Teacher Education
5. Pre-Health Professions

Academic options within the Kinesiology & Health major

Students in the **Community and Public Health** option are prepared for professional employment at local, state or national health agencies, medical centers, and other public or private organizations that seek to promote health in the population.

Students in the **Exercise Science** option is prepared for professional roles as health and fitness leaders or program managers. Employment opportunities include work in corporate fitness programs, health/fitness facilities, clinics, or hospitals. Graduates are able to plan, implement and supervise exercise programs which will improve fitness and health. Graduates also have a basic understanding of management issues related to business applications in the health and fitness field.

Students in the **Physical Activity and Health Promotion** option are prepared for careers focused on health and physical activity. This option provides more emphasis on behavioral and psychological aspects of physical activity. Students are prepared for careers in community-based settings, including work sites, schools, hospitals, and other community agencies.

Students in the **Physical Education/Teacher Education** option is prepared to teach physical education in grades K-12 and to meet the State of Iowa learning outcomes for teachers. Graduates can plan developmentally appropriate physical education and individualize instruction and assessment for diverse audiences.

Students in the **Pre-Health Professions** option utilize an interdisciplinary approach to the study of human movement. In so doing, they become prepared for graduate study in Kinesiology or advanced study leading to careers in human medicine, physical therapy, physician assistant or other healthcare professions.

Student Learning Outcomes for the Undergraduate Degree

Despite the diversity of options, the learning outcomes comprise a common framework for each student as they progress through Iowa State University.

The learning outcomes emphasized in academic coursework in the Department of Kinesiology are:

COMMUNICATION

Uses clear and effective written, oral, visual, and electronic (WOVE) communication techniques to foster inquiry, collaboration, and engagement in physical activity and health related settings.

LIFELONG LEARNING, ASSESSMENT, AND SELF-REFLECTION

Analyzes and evaluates one's own knowledge, abilities and actions relative to professional standards, seeks opportunities to grow professionally, and utilizes self-assessment and assessment of others to foster physical, cognitive, social, and emotional well-being.

CONTENT KNOWLEDGE, DISCOVERY, AND CRITICAL THINKING

Understands fundamental concepts of physical activity and health, conducts scientific inquiry, and applies critical thinking to solve problems from personal, scholarly, and professional perspectives.

ETHICS, DIVERSITY, AND SOCIAL JUSTICE

Demonstrates leadership and social responsibility to improve quality of life for others and ensures equitable access for diverse groups by creating appropriate environments to initiate and maintain a physically active, healthy lifestyle.

Other Program Offerings:

ENDORSEMENT TO COACH INTERSCHOLASTIC ATHLETICS

The State Department of Education has provided for the endorsement of licensed teachers for the coaching of athletic teams in schools. The endorsement does not lead to licensure to teach physical education. For requirements of the program, leading to the coaching endorsement, see School of Education, Teacher Education. More information can be found at: <http://www.kin.hs.iastate.edu/>. (<http://www.kin.hs.iastate.edu/>)

ENDORSEMENT TO TEACH HEALTH EDUCATION

Those interested in teaching health education in the public schools may get a primary licensure or an additional endorsement. The State Department of Education has approved the Health Teaching Licensure for grades 5-12.

BASIC ACTIVITY INSTRUCTION PROGRAM

The department offers a wide selection of beginning, intermediate, and advanced courses in the areas of aquatics, dance, fitness, martial arts, and sports. These courses are designed to serve general education purposes for all students.

DANCE

Coursework in dance provides opportunities for students to develop an understanding and appreciation of dance as part of a liberal education. Those interested in teaching dance and physical education in the public schools may major in Kinesiology and Health (Physical Education Teacher Education) and minor in Dance.

An interdisciplinary Performing Arts major with a Dance emphasis is available through the College of Liberal Arts and Sciences. For further information see Index: Performing Arts to find Performing Arts Major, Emphasis in Dance.

Curriculum in Athletic Training

The athletic training major prepares students for a career as an athletic trainer in high school, college or professional settings or for work in other settings (such as sports medicine clinics, the military, industry, and fitness centers). Program details including course requirements, admission procedures and technical standards can be found at <http://www.kin.hs.iastate.edu/programs/athletic-training/#program-information-and-requirements>.

Curriculum in Kinesiology and Health

The curriculum in Kinesiology and Health is designed for students preparing to enter professional areas related to the medical, health, physical activity, exercise or sport science fields. Students majoring in Kinesiology & Health may select one of five options:

1. Community and Public Health
2. Exercise Science
3. Physical Activity and Health Promotion
4. Physical Education Teacher Education
5. Pre-Health Professions

Minors in dance, exercise science, health promotion, and kinesiology, are available; see requirements under Kinesiology, Undergraduate Programs.

A major in Performing Arts with a dance emphasis is available; see requirements under Curriculum in Performing Arts Program, Dance.

Communication Proficiency

In order to meet graduation requirements, all students must earn an average of C (2.0) or better in ENGL 1500 and ENGL 2500, with the ENGL 1500 grade being no lower than a C- and the ENGL 2500 grade no lower

than a C. Students not meeting this condition must earn a C or better in an advanced writing course:

ENGL 3020	Business Communication	3
or ENGL 3140	Technical Communication	
LIB 1600	Introduction to College Level Research	1
SPCM 2120	Fundamentals of Public Speaking	3

U.S. Diversity and International Perspectives

In order to meet graduation requirements, all students must complete 3 cr. of course work in U.S. Diversity and 3 cr. in International Perspectives. KIN 3600 meets the U.S. Diversity requirement and DANCE 2700 meets the International Perspectives requirement. See university approved list for other courses.

General Education:

Physical and Life Sciences:

BIOL 2550	Fundamentals of Human Anatomy	3
BIOL 2550L	Fundamentals of Human Anatomy Laboratory	1
BIOL 2560	Fundamentals of Human Physiology	3
BIOL 2560L	Fundamentals of Human Physiology Laboratory	1

Additional option-specific requirements are:

Community and Public Health

BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
CHEM 1630	College Chemistry	4
CHEM 1630L	Laboratory in College Chemistry	1

SPCM 2120	Fundamentals of Public Speaking	3

One of the following 3

ENGL 3020	Business Communication
or ENGL 314	Technical Communication
or SPCM 312	Business and Professional Speaking

Program requirements:

The following courses are required in all majors and options:

HS 1100	Personal and Consumer Health	3

HS 3500	Human Diseases (*)	3

KIN 2520	Introduction to the Discipline of Kinesiology	1

KIN 2530	Orientation and Learning Community in Kinesiology and Health	1

KIN 2580	Principles of Physical Fitness and Conditioning	2

KIN 3580	Exercise Physiology (*)	3

KIN 3590	Exercise Physiology Lab (*)	1

* A grade of C- or better is required.

Total cr. required to graduate: A minimum of 124 credits is required, with a minimum of 46 credits in courses numbered 3000 or above.

Courses for Kinesiology and Health Major

Option 1. Community and Public Health

This option prepares students for a diverse array of careers in public and private health agencies as well as local, state and federal government programs. Students are qualified for careers in a variety of health and human service agencies, community organizations, and hospitals. This option also provides the ideal background training for credentials as a Certified Health Education Specialist (CHES).

Option Requirements:

PR 2200	Principles of Public Relations	3
or PR 3050	Publicity Methods	
HS 1050	First Aid and Emergency Care	2
HS 2850	Pre-Internship in Kinesiology and Health	1-2
KIN 3600	Sociology of Physical Activity and Health (*)	3
HS 3100	Community and Public Health (*)	3
HS 3850	Preparation and Search Strategies for Kinesiology and Health Internships	0.5
HS 4300	Community Health Program Development	3
HS 4640	Physical Activity Epidemiology	3
or VDPAM 4280	Principles of Epidemiology and Population Health	
HS 4850A	Internship in Health Studies: Community and Public Health	8-12
HDFS 2700	Family Communications and Relationships	3
HDFS 4490	Program Evaluation and Proposal Writing	3
or ENGL 3090	Proposal and Report Writing	
PSYCH 4850	Health Psychology	3
One of the following		
HDFS 3770	Aging and the Family	3
or HDFS 3950	Children, Families, and Public Policy	
Electives: 8-12 credits		

* A grade of C- or better is required.

Option 2. Exercise Science

This option prepares students for careers in exercise/fitness promotion. Students are prepared as health/fitness specialists, personal trainers, strength and conditioning specialists, and health coaches. Students find work in fitness centers, worksite health programs, medical facilities, cardiac rehabilitation centers, and other agencies that provide fitness services. Students are eligible to sit for certification exams offered by the American College of Sports Medicine and the National Strength & Conditioning Association.

Option Requirements:

KIN 2590	Leadership Techniques for Fitness Programs	3

KIN 2660	Advanced Strength Training and Conditioning	2
KIN 2850	Pre-Internship in Kinesiology and Health	1-2
KIN 3450	Management of Health-Fitness Programs and Facilities	3
KIN 3550	Biomechanics (*)	3
KIN 3660	Exercise Psychology (*)	3
KIN 3720	Motor Control and Learning Across the Lifespan (*)	3
KIN 3730	Biomechanics and Motor Control Laboratory	1
HS 3850	Preparation and Search Strategies for Kinesiology and Health Internships	
KIN 4580	Principles of Fitness Assessment and Exercise Prescription (*)	4
KIN 4590	Internship in Exercise Leadership	1
KIN 4620	Medical Aspects of Exercise	3
KIN 4800	Functional Anatomy	3
KIN 4850A	Internship in Exercise Science	8-12
HS 3800	Worksite Health Promotion	3
ATR 2200	Basic Athletic Training	2
or HS 3050	Instructor's First Aid and Cardiopulmonary Resuscitation	

Electives: 12-16 credits

* A grade of C- or better is required.

Option 3. Physical Activity and Health Promotion

This option prepares students for a variety of career outlets focused on health and physical activity promotion. The coursework provides the ideal background for students interested in worksite wellness programming. Students are also well suited to pursue career opportunities in health coaching and health promotion in schools, community agencies, as well as clinical settings. This option provides ideal background training for students interested in pursuing the Physical Activity in Public Health Specialist Certification offered by the American College of Sports Medicine.

Option Requirements:

FSHN 3650	Obesity and Health	3
HS 2850	Pre-Internship in Kinesiology and Health	1-2
HS 3100	Community and Public Health (*)	3
HS 3800	Worksite Health Promotion	3
HS 3850	Preparation and Search Strategies for Kinesiology and Health Internships	
HS 4300	Community Health Program Development	3
HS 4640	Physical Activity Epidemiology	3

HS 4850B	Internship in Health Studies: Physical Activity and 8-12 Health Promotion	
KIN 2590	Leadership Techniques for Fitness Programs	3
KIN 3600	Sociology of Physical Activity and Health (*)	3
KIN 3660	Exercise Psychology (*)	3
KIN 4580	Principles of Fitness Assessment and Exercise Prescription (*)	4
KIN 4670	Exercise and Health: Behavior Change	3

Electives: 15-19 credits

* A grade of C- or better is required.

Option 4. Physical Education Teacher Education

This option is for students seeking a license to teach K-12 physical education. All courses required for licensure have a minimum grade requirement of a C or C-. Students interested in a coaching and/or a health endorsement must complete additional coursework.

Option Requirements:

KIN 2310	Fundamentals of Tumbling and Gymnastics (*)	1
KIN 2320	Fundamentals of Team Sports (*)	1
KIN 2360	Fundamentals of Individual Sports and Fitness (*)	1
KIN 2590	Leadership Techniques for Fitness Programs	3
KIN 2800	Directed Field Experience in Elementary Physical Education	1
KIN 2810	Directed Field Experience in Secondary Physical Education	1
KIN 2820	Field Experience with Educational Outreach	1
KIN 3120	Movement Education in Elementary School Physical Education (**)	3
KIN 3130	Teaching Secondary Physical Education (**)	3
KIN 3550	Biomechanics (*)	3
KIN 3650 or KIN 3660	Sport Psychology (*) Exercise Psychology	3
KIN 3720	Motor Control and Learning Across the Lifespan (*)	3
KIN 3950	Adapted Physical Education (**)	3
KIN 4170	Supervised Teaching in Physical Education in the Secondary School (**)	8
KIN 4180	Supervised Teaching in Physical Education in the Elementary School (**)	8
KIN 4710	Measurement in Physical Education (**)	3
KIN 4750	Physical Education Curriculum Design and Program Organization (**)	3
DANCE 2110	Fundamentals and Methods of Social and World Dance (*)	1

EDUC 2040	Social Foundations of Education in the United States: Secondary	3
EDUC 4060	Social Justice Education and Teaching: Secondary	3
HS 1050	First Aid and Emergency Care (*)	2
HS 3050	Instructor's First Aid and Cardiopulmonary Resuscitation (*)	2
Electives: 5 credits		

* A grade of C- or better is required.

** A grade of C or better is required.

Option 5. Pre-Health Professions

This option is for students interested in graduate study or for those who are preparing for professional programs in medicine, physical therapy, physician assistant, and other healthcare professions. Course work provides background in human movement while completing the requirements for entry into graduate or professional school.

Option Requirements:

BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
BIOL 2120	Principles of Biology II	3
BIOL 2120L	Principles of Biology Laboratory II	1
KIN 2420	Planning for Success in a Health Career	0.5
KIN 3550	Biomechanics (*)	3
KIN 3650 or KIN 3660	Sport Psychology (*) Exercise Psychology	3
KIN 3720	Motor Control and Learning Across the Lifespan (*)	3
KIN 3730	Biomechanics and Motor Control Laboratory	1
9 cr. from the following		9
HS 4640	Physical Activity Epidemiology	3
KIN 4550	Research Topics in Biomechanics	3
KIN 4580	Principles of Fitness Assessment and Exercise Prescription	4
KIN 4620	Medical Aspects of Exercise	3
KIN 4660	Exercise for Mental Health	3
KIN 4670	Exercise and Health: Behavior Change	3
KIN 4720	Neural Basis of Human Movement	3
KIN 4730	Physical Dimensions of Aging	3
KIN 4800	Functional Anatomy	3

Specialization Requirements: Other prerequisites as required by professional schools.

Electives: 6-14 credits

* A grade of C- or better is required.

FOUR YEAR PLANS

Students must complete a 3-credit course in US diversity and a 3-credit course in international perspectives. Check the ISU homepage for a list of approved courses. You must complete a minimum of 46 credits in 3000/4000 level courses and a total of 124 credits for graduation. Four-year plans are arranged with courses in prerequisite sequence and within the term a course is usually offered. These are SAMPLE plans - use the degree audit as "official" documentation of progress toward your degree.

Minors

Dance

The minor requires a minimum of 15 credits and may be earned by completing the following:

6 cr. from the following:

DANCE 2700	Dance Appreciation	3
DANCE 3200	Sound and Movement	3
DANCE 3600	History and Philosophy of Dance	3

4 cr. from the following:

DANCE 2200	Modern Dance Composition	2
DANCE 3840	Teaching Children's Dance	2

DANCE 3850	Methods of Teaching Dance	2
DANCE 3860	Teaching Dance Technique and Composition	2
5 cr. from the following:		
DANCE 2220	Modern Dance II	1
DANCE 2230	Modern Dance III	1
DANCE 2240	Concert and Theatre Dance	1
DANCE 2320	Ballet II	1
DANCE 2330	Ballet III	1
DANCE 2420	Jazz II	1
DANCE 2500	Yoga Movement	1
DANCE 3700	Advanced Studies in Dance	1
DANCE 4900	Independent Study	

Exercise Science

The minor requires a minimum of 18 credits and may be earned by completing the following:

KIN 2580	Principles of Physical Fitness and Conditioning	2
KIN 3580	Exercise Physiology	3
KIN 3590	Exercise Physiology Lab	1
KIN 3660	Exercise Psychology	3
KIN 4580	Principles of Fitness Assessment and Exercise Prescription	4

5 cr. from the following

ATR 2200	Basic Athletic Training	
KIN 2590	Leadership Techniques for Fitness Programs	
KIN 2660	Advanced Strength Training and Conditioning	
KIN 3450	Management of Health-Fitness Programs and Facilities	
KIN 4620	Medical Aspects of Exercise	
KIN 4670	Exercise and Health: Behavior Change	

Health Promotion

The minor requires a minimum of 18 credits and may be earned by completing the following:

HS 1100	Personal and Consumer Health	3
HS 3500	Human Diseases	3
HS 3800	Worksite Health Promotion	3

3-6-cr. from the following

HS 3050	Instructor's First Aid and Cardiopulmonary Resuscitation	
HS 3100	Community and Public Health	

3-6 cr. from the following

HS 4300	Community Health Program Development	

HS 4640	Physical Activity Epidemiology
KIN 4670	Exercise and Health: Behavior Change

Kinesiology

The minor requires a minimum of 16 credits and may be earned by completing the following: (For non-majors only)

KIN 3550	Biomechanics	3
KIN 3580	Exercise Physiology	3
KIN 3590	Exercise Physiology Lab	1
KIN 3600	Sociology of Physical Activity and Health	3
KIN 3720	Motor Control and Learning Across the Lifespan	3
KIN 3650	Sport Psychology	3
or KIN 3660	Exercise Psychology	

Gerontology

The department participates in the interdepartmental minor in gerontology (see Index).

Health Coach Certificate

Students pursuing a bachelor's degree in kinesiology can seek additional credentials through the Health Coach Certificate. More information on the certificate can be found at: Health Coach Certificate.

The Kinesiology Department offers two concurrent undergraduate and graduate programs.

B.S./M.A.T.R. degree in Athletic Training

Certified Athletic Trainers are allied medical health professionals who specialize in the prevention, assessment, treatment and rehabilitation of injuries to athletes and physically active individuals who are engaged in physical and athletic activities. To gain certification, candidates must graduate from a CAATE accredited athletic training education program and successfully pass the Board of Certification (BOC) examination. In addition to BOC certification, many states also have licensure requirements to practice athletic training. The Athletic Training program at Iowa State University, accredited since 2001 has transitioned to the new M.A.T.R. degree program, which includes various athletic training clinical rotations including high school, physical therapy clinics, surgical observation experiences, and emergency room observation. More information on the B.S./M.A.T.R. degree in Athletic Training.

B.S./M.S. DEGREE IN DIET AND EXERCISE

A combined Bachelor of Science and Master of Science (B.S./M.S.) degree in Diet and Exercise is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FSHN), and the Department of Kinesiology. Students interested in this program must enroll as freshmen in the Pre-Diet and Exercise program. In the fall of the junior year, students will apply for admission to the B.S./M.S. program. Students not accepted into the program will continue

toward completion of a B.S. degree in Dietetics or Kinesiology & Health. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of B.S./M.S. degrees in Diet and Exercise. More information can be found at: <https://fshn.hs.iastate.edu/find-your-major/diet-and-exercise/>. (<https://fshn.hs.iastate.edu/find-your-major/diet-and-exercise/>)

Graduate Study

The Department of Kinesiology graduate program seeks to integrate discovery and learning by preparing graduate students to understand and create basic and applied knowledge in the study of physical activity, exercise and sport. The normal prerequisite to major graduate work is the satisfactory completion of a curriculum essentially equivalent to that required of undergraduate students in kinesiology at this university. However, it is possible for students to qualify for graduate study if undergraduate preparation has been in a related area.

Students in the M.S. and Ph.D. degrees are required to complete original research and write a thesis or dissertation. There is a non-thesis degree option for M.S. students requiring more coursework and an internship experience or other creative component. Specific information about the requirements for these degree options is available from the department office or from the department web site (<http://www.kin.hs.iastate.edu/graduate> (<http://www.kin.hs.iastate.edu/graduate/>)).

Nursing OVERVIEW

The Bachelor of Science in Nursing (BSN) program at Iowa State University is a RN-to-BSN program, designed for those who are already a Registered Nurse (RN), and desire to further their nursing career and education to the next level. Iowa State's RN-to-BSN program provides interactive learning opportunities where students can apply their real-world experiences and education to inspire innovation in their places of care. RN-to-BSN students will be challenged to enhance health promotion and disease prevention, apply nursing science and evidenced-based patient-centered care, focus on the culture of health for nurses, individuals, and communities, and demonstrate the continuum of care, from a nurse's self-care to patient care to community and population health.

Students in the Bachelor of Science in Nursing program who wish to add an additional major, must pursue multiple degrees. Likewise, students in other programs who wish to add a Bachelor of Science in Nursing must pursue multiple degrees.

The baccalaureate nursing program at Iowa State University of Science and Technology located in Ames, Iowa is approved by the:

Iowa Board of Nursing (IBON)

Riverpoint Business Park
400 SW 8th St., Suite B
Des Moines, IA 50309
(515) 281-3255

The baccalaureate nursing program at Iowa State University of Science and Technology located in Ames, Iowa is accredited by the:

Accreditation Commission for Education in Nursing (ACEN)

3390 Peachtree Road NE, Suite 1400
Atlanta, GA 30326
(404) 975-5000

The most recent accreditation decision made by the ACEN Board of Commissioners for the baccalaureate nursing program is initial accreditation.

View the public information disclosed by the ACEN regarding this program at <http://www.acenursing.com/accreditedprograms/programSearch.htm>

Student Learning Outcomes

Upon graduation, students should be able to:

1. Synthesize theory and concepts from the arts and humanities, natural and social sciences, and nursing in the holistic practice of professional nursing.
2. Integrate knowledge of historical and contemporary nursing with leadership skills and principles to facilitate optimal patient and systems outcomes.
3. Translate research findings to support evidence-based, competent, safe, and effective nursing care to individuals, families, and communities in diverse settings across the lifespan.
4. Utilize current technology effectively and efficiently to communicate, manage knowledge, mitigate error, support decision making and accomplish goals related to the delivery of safe, quality care for diverse individuals, families, and the community.
5. Examine how healthcare policies, including financial and regulatory, influence healthcare systems, nursing practices and population health.
6. Incorporate principles of effective communication and collaboration when working with members of the health team, recipients of care and interested groups to improve health outcomes for individuals, groups and communities.
7. Integrate concepts of health promotion and disease management, health literacy and patient-centered care to improve population health.
8. Engage in professional, culturally competent, and ethically congruent care that reflects dignity and uniqueness of individuals and groups in diverse populations and locations.
9. Demonstrate a commitment to professionalism and model the values of advocacy, compassion, integrity, human dignity, cultural competence and social justice while embracing the concept of continuous learning.

RN-to-BSN Admissions Criteria

Applications for the RN-to-BSN program are individually reviewed.

Minimum requirements for admission to the BSN program include:

- Licensure as a Registered Nurse
- Meet all Iowa State University admission criteria for transfer students
- Official college transcripts from all colleges and universities attended
- Minimum of 2.5 cumulative GPA for all college coursework
- Achievement of minimum "C" (not C-) for all prerequisite courses listed below

English Composition I and II (ENGL 1500 and ENGL 2500 equivalent)

Introduction to Chemistry (CHEM 1630 or CHEM 1T equivalent)

Statistics (STAT 1010 or STAT 1040 equivalent)

Introduction to Human Nutrition (FSHN 1670 equivalent)

Introduction to Sociology (SOC 1340 equivalent)

Admissions requirements are congruent with the Iowa Action Coalition, RN-to-BSN Task Force Recommendations.

RN-to-BSN Progression Criteria

- Must earn a "C" grade or better in all NRS courses and meet the university's academic standards for progress toward a degree

RN-to-BSN Graduation Requirements

- At least 32 credits earned in residence at Iowa State University, and the final 32 credits taken through Iowa State University prior to graduation.
- All general education requirements at Iowa State University must be met.
- The BSN curriculum consists of 21 credits of NRS courses, 8 credits of FSHN courses, and 3 elective credits for a total of 32 credits in addition to prerequisite coursework.
- Electives are selected by students to meet identified career interests, and total elective credits needed will vary based on individual transfer credits.
- Minimum credits for graduation is 120 credits.

* Denotes Practicum Courses.

** Denotes courses that may be taken before starting the nursing program.

Plan of study does not include any unmet ISU general education requirements.

Nutritional Science (HSCI)

Nutritional science looks at the connection between diet and health. Students learn how diet can play a crucial role in the cause, treatment, and prevention of many diseases. There are degree program focuses within nutritional science:

- Pre-health and research coursework prepares students for work in research laboratories, graduate study in nutrition or biological sciences, or entrance into health professional programs, such as medical, dental, physician assistant, and pharmacy schools. Students gain a strong science education along with human nutrition expertise.
- Health coach and nutrition and wellness coursework prepares students for work positions in program planning and evaluation for community, public health, non-profit, and corporate wellness programs addressing the growing public interest in nutrition, wellness, and preventative health. Students learn about the role of nutrition and healthy eating for disease prevention and wellness.

The department also offers a nutrition minor.

Student Learning Outcomes

Upon graduation, students should be able to:

- Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
- Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
- Participate effectively in a group or team.
- Integrate creativity, innovation, or entrepreneurship in ways that produce value.
- Describe sociocultural competence relative to diversity, equity and/or inclusion.
- Explain how human activities impact the natural environment and how societies are affected.

- Meet program specific learning outcomes for the Nutritional Science major.

The department also offers a nutrition minor.

Degree Requirements

Administered by the Department of Food Science and Human Nutrition

- Pre-Health and Research Program Focus
- Health Coach Program Focus
- Nutrition and Wellness Program Focus

PRE-HEALTH AND RESEARCH PROGRAM FOCUS

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 13 cr.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
Select from:		3
ENGL 3020	Business Communication	
ENGL 3090	Proposal and Report Writing	
ENGL 3140	Technical Communication	
LIB 1600	Introduction to College Level Research	1
SPCM 2120	Fundamentals of Public Speaking	3

Total Credits 13

Humanities and Social Sciences: 6-12 cr.

Select Humanities courses from approved list	3
Select Social Science course from approved list	3
If HSCI student, select:	6
Additional Humanities course	
Additional Humanities or Social Science course	

Ethics: 3 cr.

FSHN 3420	World Food Issues: Past and Present	3

Mathematical Sciences: 6-12 cr.

Select at least 3 credits from:		3-8
MATH 1400	College Algebra	
MATH 1430	Preparation for Calculus	
MATH 1600	Survey of Calculus	
MATH 1650	Calculus I	

MATH 1650	Calculus I	
& MATH 1660	and Calculus II	
Select at least 3 credits from:		3-4
STAT 1010	Principles of Statistics	
STAT 1040	Introduction to Statistics	

Total Credits **6-12**

Physical Sciences: 13 cr.

CHEM 1770	General Chemistry I	4
CHEM 1770L	Laboratory in General Chemistry I	1
CHEM 1780	General Chemistry II	3
CHEM 1780L	Laboratory in College Chemistry II	1
CHEM 2310	Elementary Organic Chemistry	3
	or CHEM 3310 Organic Chemistry I	
CHEM 2310L	Laboratory in Elementary Organic Chemistry	1
	or CHEM 3310L Laboratory in Organic Chemistry I	

Total Credits **13**

Biological Sciences: 24-29 cr.

BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
BIOL 2120	Principles of Biology II	3
BIOL 2120L	Principles of Biology Laboratory II	1
BIOL 2550	Fundamentals of Human Anatomy	3
BIOL 2550L	Fundamentals of Human Anatomy Laboratory	1

Select at least 3 credits from: 3-4

BIOL 2560	Fundamentals of Human Physiology	
& 2560L	and Fundamentals of Human Physiology Laboratory	
	or BIOL 335C Principles of Human and Other Animal Physiology	

BIOL 3130	Principles of Genetics	3

Select at least 3 credits from: 3-6

BBMB 3010	Survey of Biochemistry	
BBMB 3160	Principles of Biochemistry	

BBMB 4040	Biochemistry I	
& BBMB 4050	and Biochemistry II	

MICRO 2010	Introduction to Microbiology	2-3
	or MICRO 3020 Biology of Microorganisms	

MICRO 2010L	Introductory Microbiology Laboratory	1
	or MICRO 3020L Microbiology Laboratory	

Total Credits **24-29**

Food Science and Human Nutrition: 30 cr.

FSHN 1100	Professional and Educational Preparation	1
FSHN 1670	Introductory Human Nutrition and Health	3

FSHN 2650	Nutrition for Active and Healthy Lifestyles	3

FSHN 3600	Advanced Nutrition and the Regulation of Metabolism in Health and Disease	3

FSHN 3610	Nutrition and Health Assessment	2

FSHN 3620	Nutrition and Health Throughout the Lifecycle	3

FSHN 4670	Molecular Basis of Nutrition in Disease Etiology and Health Promotion	3

FSHN 4920	Research Concepts in Human Nutrition	2

Select at least 10 additional credits from: 10

FSHN 2030	Contemporary Issues in Food Science and Human Nutrition	

FSHN 2140	Scientific Study of Food	
& FSHN 2150	and Advanced Food Preparation Laboratory (or FSHN 1150 lab)	

FSHN 2420	The US Food System	

FSHN 2670X	Clinical Perspectives on Human Nutrition and Health	

FSHN 3010	Nutrigenomics: From Basic Science to Translational Impact	

FSHN 3640	Nutrition and Prevention of Chronic Disease	

FSHN 3650	Obesity and Health	

FSHN 3670	Medical Terminology for Health Professionals	

FSHN 4300	U.S. Health Systems and Policy	

FSHN 4600	Global Nutrition, Health and Sustainability	

FSHN 4610	Medical Nutrition and Disease I	

FSHN 4630	Community Nutrition and Health	

FSHN 4640	Medical Nutrition and Disease II	

FSHN 4660	Nutrition Counseling and Education Methods	

FSHN 4900C	Independent Study: Nutrition	

FSHN 4990	Undergraduate Research	

NUTRS 5010	Biochemical and Physiological Basis of Nutrition: Macronutrients and Micronutrients	

NUTRS 5040	Nutrition and Epigenetic Regulation of Gene Expression	

BIOL 3140	Principles of Molecular Cell Biology	

CHEM 3320	Organic Chemistry II	

CHEM 3320L	Laboratory in Organic Chemistry II	

PHYS 1310	General Physics I	
& 1310L	and General Physics I Laboratory	

	or PHYS 2310 Introduction to Classical Physics I and Introduction to Classical Physics I Laboratory	

	& 2310L	

PHYS 1320	General Physics II	
& 1320L	and General Physics II Laboratory	

or PHYS 232 Introduction to Classical Physics II
and Introduction to Classical Physics II Laboratory
& 2320L

Total Credits 30

Electives: 2-25 cr. Select from any university coursework to earn at least 120 total credits. Students planning to apply to health professional programs should review entrance requirements and select appropriate courses as electives.

Concurrent B.S. and M.S. Program: Well-qualified students in Nutritional Science, pre-health and research option, who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a Bachelor of Science (B.S.) degree in Nutritional Science and a Master of Science (M.S.) degree in Nutritional Sciences. For more information, refer to www.fshn.hs.iastate.edu (<http://www.fshn.hs.iastate.edu>)

HEALTH COACH / NUTRITION & WELLNESS PROGRAM FOCUS

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications/Library: 10 cr.

FSHN 3640	Nutrition and Prevention of Chronic Disease	3
FSHN 3650	Obesity and Health	3
FSHN 4300	U.S. Health Systems and Policy	2
FSHN 4450	Strategies for Personal Food Waste Reduction	1
FSHN 4630	Community Nutrition and Health	3
COMST 4500B	Special Topics in Communication Studies: Health Communication	3
Total Credits		34

Additional courses for Health Coach Program Focus: 18 credits

KIN 2580	Principles of Physical Fitness and Conditioning	2
KIN 3580	Exercise Physiology	3
KIN 4580	Principles of Fitness Assessment and Exercise Prescription	4
PSYCH 1010	Introduction to Psychology	3
	or PSYCH 2300 Developmental Psychology	
PSYCH 4220	Counseling Theories and Techniques	3
PSYCH 4850	Health Psychology	3
Total Credits		18

Select additional electives to reach 120 total semester credits.

Additional courses for Nutrition & Wellness Program Focus: 18-30 credits of electives

At least 9 credits of electives must be 3000-4000 level courses. Select from any university coursework to earn at least 120 total credits.

NOTE:

Students are encouraged to pursue a minor, such as:

- Communication studies
- Culinary food science
- Entrepreneurship
- Environmental studies
- Event management
- Exercise science
- Global health
- Health promotion
- Hospitality management
- Human development and family studies
- Leadership studies
- Sustainability

Go to FSHN courses.

More information on the Nutrition minor can be found here: <http://catalog.iastate.edu/collegeofagricultureandlifesciences/foodscienceandhumannutrition/#undergraduateminiortext>.

The Department of Food Science and Human Nutrition offers a Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) in Nutritional Sciences. More information can be found here: <https://www.grad-college.iastate.edu/academics/programs/apresults.php?id=84>.

Professional Practice in Dietetics

Master of PROFESSIONAL PRACTICE IN DIETETICS (M.P.P.)

The Department of Food Science and Human Nutrition offers a 30-credit, non-thesis, online, professional master's degree with two possible tracks. Track 1 (RD2B track) is for individuals who are interested in becoming Registered Dietitian Nutritionists and track 2 (DI track) is for graduates of a dietetic internship (DI) who wish to earn a master's degree. Students interested in further graduate study (PhD) may require additional coursework and/or research beyond the MPP to gain admission into a doctoral program.

The RD2B track is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Admission requirements for this MPP track include successful completion of at least a Bachelor's degree and a verification statement from any ACEND accredited didactic program in dietetics (DPD). A minimum GPA of 3.0 (on a 4.0 scale) both overall and in the DPD are desired. A professional goal statement (≤ 750 words), three letters of recommendation from faculty, work supervisors or those who can attest to the applicant's ability to succeed in an online program in the field of dietetics are also required. Students in the DI track, must have successfully completed a graduate DI and may be eligible to transfer some of these graduate DI courses towards the MPP. The Graduate Record Examination (GRE) is not required for either track.

More information on the program can be found here: <https://www.grad-college.iastate.edu/academics/programs/apresults.php?id=140>.

School of Education

Mary Gresham, Interim Director of the School of Education

School of Education (<http://www.education.iastate.edu>)

The School of Education at Iowa State University is committed to engaging in rigorous and socially meaningful research. We are preparing leaders and practitioners across the P-20 continuum who support rich, equitable learning opportunities for all students. Supporting public education as a cornerstone of a healthy, vibrant, and just society, the School of Education strives to be a national leader in educational theory, policy, and practice, as we honor the land-grant tradition and the broader mission of the university to serve the people of Iowa.

Undergraduate Study

The School of Education provides the professional education coursework to support the completion of the Educator Preparation Program. Program completers can then be recommended for licensure to the Iowa Board of Education Examiners. Majors offered in the School include **Elementary Education (K-6)**, and **Early Childhood Education-Unified (birth through third grade, inclusive)**. The Early Childhood Education-Unified major is an interdepartmental program administered by the School of Education and the Department of Human Development and Family Studies. In addition, the School of Education offers the secondary major in Education. This secondary major is available to candidates pursuing English Education, History/Social Sciences Education, Mathematics Education, Science Education, and World Languages and Cultures Education.

Undergraduate students who are interested in teaching at the secondary level (5-12) or at the K-12 level major in a specific discipline and either pursue the secondary major in Education or complete additional required educational coursework in the School of Education and the department to complete the Educator Preparation Program. K-12 and secondary education programs include: Agriculture Education, English Education, Family and Consumer Sciences Education, Health Education, History-Social Sciences Education, Mathematics Education, Music Education, Physical Education, Science Education (Biology, Chemistry, Earth Science, and Physics), and World Languages and Cultures Education (French, German, and Spanish).

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Educator Preparation Program (<https://iastate.box.com/s/n8eewbs3fznazf8alerv0qbf216fno7e/>)
- Decision Point 1 - Early Admission to the Educator Preparation Program for Transfer Students (<https://iastate.box.com/s/r3ap8wej7m3bmd0cehixe12epxtekxax/>)

In order to be eligible for student teaching, candidates must have completed all degree program requirements and specific coursework. Decision Point 2 - Requirements Students Must Meet Prior to Student Teaching (<https://iastate.box.com/s/hewm5y0era2j76cdvllaphappmsg43cs/>)

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer. Decision Point 3

- Recommendation for Licensure (<https://iastate.box.com/s/tvfae96b3b1y87wbyfna2oonhmfoba7g/>)

All Educator Preparation Program candidates must complete the professional core coursework (information found under each program) and required pedagogy and field experience coursework for their program. In addition, all prospective teachers are required to meet general education requirements as a part of their preparation. They must complete studies in the following general education groups. General education courses may be found in many departments. Credits listed are minimum requirements. Specific departments and/or colleges may require specific coursework to meet these requirements or additional credits. Credits used to satisfy these general education requirements typically satisfy department and college general education requirements:

For Educator Preparation general education requirements, please visit the School of Education website: <https://education.iastate.edu/current-students/educator-preparation-program/resources/curriculum-requirements/>.

Early Childhood Education – Unified

The curriculum in Early Childhood Education – Unified prepares graduates to teach young children and work with their families. This program leads to careers working with young children (both those who are typically developing and those with special needs) from birth through third grade, inclusive. Program completers who apply for licensure are recommended for licensure to the Iowa Board of Educational Examiners. Individuals who are licensed may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through 3rd grade) or in home-based programs. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and the School of Education. For more information about the program, see Early Childhood Education - Unified Curriculum <https://hdfs.hs.iastate.edu/find-your-major/early-childhood-education/>.

Students who enroll in the early childhood education – unified program must apply to and be accepted into the Educator Preparation Program prior to enrolling in advanced courses. Admission requirements can be found at: <https://www.education.iastate.edu/educator-prep-program/admission/>.

Early Childhood Education majors must complete all of the required degree curriculum. This can be found at: http://catalog.iastate.edu/collegeofhumansciences/earlychildhood_education/

Candidates must receive a minimum of a “C” in all education (EDUC), human development and family studies (HD FS), special education (SP ED) courses and all content-specific pedagogy/methods courses required for program completion and endorsement completion.

Candidates must receive a minimum of a “C-” in all major department courses/content courses required for teacher program completion and endorsement completion (content coursework).

Candidates can pursue an additional endorsement in K-8 reading. Information about this endorsement can be found at: <https://iastate.app.box.com/s/m4tr3ogr9ouwmibz5dhv9catryr2jqf> (<https://iastate.app.box.com/s/m4tr3ogr9ouwmibz5dhv9catryr2jqf/>)

Contact an Early Childhood Education academic advisor for additional information.

Elementary Education

The undergraduate curriculum in elementary education leads to the Bachelor of Science degree. The curriculum in elementary education is designed for candidates preparing to teach at the elementary school level. This program leads to careers in working with school-aged children in kindergarten through sixth grade. Program completers who apply for licensure are recommended for licensure to the Iowa Board of Educational Examiners. Individuals who are licensed will be qualified to teach in elementary classrooms in either public or private schools. Elementary Education majors must complete all of the required degree curriculum. This can be found at: <http://catalog.iastate.edu/collegeofhumansciences/elementaryeducation/>

Candidates must receive a minimum of a “C” in all education (EDUC), human development and family studies (HD FS), special education (SP ED) courses and all content-specific pedagogy/methods courses required for program completion and endorsement completion.

Candidates must receive a minimum of a “C-” in all major department courses/content courses required for teacher program completion and endorsement completion (content coursework).

In addition to pursuing a degree in Elementary Education, candidates are required to pursue an endorsement in at least one additional area. Candidates will be prepared to teach students in grades kindergarten through eighth grade in this area. Endorsements in the following areas are available for elementary education majors:

- K-8 English/Language Arts & Reading
- K-12 English as a Second Language (ESL)
- K-8 Health
- K-8 Mathematics
- K-8 Science
- K-8 Social studies
- K-8 Special education (Instructional Strategist I: Mild/Moderate Disabilities K-8)

Candidates can pursue additional endorsements in any of the above listed areas and in the following areas:

- K-8 Reading
- K-12 Coaching
- 5-8 Algebra for HS Credit

Information about these additional endorsements can be found at: <https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jqf> (<https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jqf/>)
Contact an Elementary Education academic advisor for additional information.

Elementary education majors must satisfy a world languages requirement for graduation. Students must complete two years of a foreign language in high school or one year of a foreign language in college.

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Educator Preparation Program (<https://iastate.box.com/s/n8eewbs3fznazf8alerv0qbf216fno7e/>)
- Decision Point 1 - Early Admission to the Educator Preparation Program for Transfer Students (<https://iastate.box.com/s/r3ap8wej7m3bmd0cehixe12epxtekxax/>)

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer. Decision Point 3 - Recommendation for Licensure (<https://iastate.box.com/s/tvfae96b3b1y87wbyfna2oonhmfoba7g/>)

K-12 and Secondary Education

Students wanting to pursue K-12 or Secondary Teacher Education major in the content area in which they want to focus. They then pursue one of two options depending upon their program: 1) complete the secondary major in Education or 2) complete additional coursework required to complete the Educator Preparation Program. Program completers who apply for licensure are recommended to the Iowa Board of Educational Examiners.

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Educator Preparation Program (<https://iastate.box.com/s/n8eewbs3fznazf8alerv0qbf216fno7e/>)
- Decision Point 1 - Early Admission to the Educator Preparation Program for Transfer Students (<https://iastate.box.com/s/r3ap8wej7m3bmd0cehixe12epxtekxax/>)

In order to be eligible for student teaching, candidates must have completed all degree program requirements and specific coursework. Decision Point 2 - Requirements Students Must Meet Prior to Student Teaching (<https://iastate.box.com/s/hewm5y0era2j76cdvllaphappmsg43cs/>)

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer. Decision Point 3 - Recommendation for Licensure (<https://iastate.box.com/s/tvfae96b3b1y87wbyfna2oonhmfoba7g/>)

Secondary Major in Education

A secondary major in Education at Iowa State University prepares candidates to teach at the middle school and high school levels. K-12/Secondary Educator Preparation Programs eligible to pursue the secondary major in Education are:

- English Education
- History/Social Sciences Education - History
- History/Social Sciences Education - Political Science
- Mathematics Education
- Science Education – Biology
- Science Education – Chemistry
- Science Education – Earth Science
- Science Education – Physics
- World Languages and Cultures Education – French
- World Languages and Cultures Education – German
- World Languages and Cultures Education – Spanish

Secondary majors in education must complete all of the required degree curriculum. This can be found at: <http://www.catalog.iastate.edu/collegeofhumansciences/educationsecondary/>

Additional Endorsements and Minors

Candidates pursuing the secondary major in Education have the opportunity to pursue additional endorsements and minors:

- K-12 Coaching Endorsement
- K-12 English as a Second Language Endorsement

- 5-12 Reading Endorsement
- Additional Science Endorsements
 - 5-12 Basic Science
- Additional Social Sciences Endorsements
 - 5-12 American Government
 - 5-12 Anthropology
 - 5-12 Economics
 - 5-12 Psychology
 - 5-12 Sociology
- 5-12 Speech and Theatre Endorsement

(See <https://education.iastate.edu/future-students/find-your-major/endorsements/> for additional information)

- Learning Technologies Minor

(See <https://education.iastate.edu/find-your-major/learning-technologies-minor/>)

Specific program requirements can be found within each department that houses the endorsement. Information on K-12 Coaching, K-12 English as a Second Language, and 5-12 Reading can be found at: <https://iastate.app.box.com/s/m4tr3ogr9ouwmibz5dhv9catryr2jqf> (<https://iastate.app.box.com/s/m4tr3ogr9ouwmibz5dhv9catryr2jqf/>)

Curriculum in secondary major in Education

Educator Preparation Program Admission Requirements

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Educator Preparation Program (<https://iastate.box.com/s/n8eewbs3fznazf8alerv0qbf216fno7e/>)
- Decision Point 1 - Early Admission to the Educator Preparation Program for Transfer Students (<https://iastate.box.com/s/r3ap8wej7m3bmd0cehix12epxtekxax/>)

In order to be eligible to student teaching (EDUC 417), candidates must have completed all degree program requirements and content specific coursework.

- Decision Point 2 - Requirements Students Must Meet Prior to Student Teaching (<https://iastate.box.com/s/hewm5y0era2j76cdvllaphappmsg43cs/>)

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer.

Decision Point 3 - Recommendation for Licensure (<https://iastate.box.com/s/tvfae96b3b1y87wbyfna2oonhmfoba7g/>)

All Educator Preparation Program candidates must complete the professional core coursework (information found under each program) and required pedagogy and field experience coursework for their program. In addition, all prospective teachers are required to meet general education requirements as a part of their preparation. They must complete studies in the following general education groups. General education courses may be found in many departments. Credits listed are minimum requirements. Specific departments and/or colleges may require specific coursework to meet these requirements or additional credits. Credits used to satisfy these general education requirements typically satisfy department and college general education requirements.

Educator Preparation General Education Requirements

- Natural Sciences: 6 credits
- Mathematics or Statistics: 3 credits
- Social Sciences: 9 credits
- Humanities: 6 credits
- Communication Skills: 9 credits that must include ENGL 1500 and 250 or an equivalent
- Library Skills: LIB 1600 for 1 credit
- Other:
 - HDFS 1020 or PSYCH 2300
 - One course in American history or government
 - One course that develops interpersonal or group presentation skills

NOTE: Specific majors will provide approved options to meet these requirements.

Secondary major in Education Requirements for English Education Candidates

Educator Preparation Field Experiences:

EDUC 2800L Pre-Student Teaching Experience I: Secondary Education – 0.5 credits

EDUC 3800A Pre-Student Teaching Experience II: Core Experience – 2 credits

ECON 4800 Intermediate Environmental and Resource Economics – 2 credits

ENGL 4170E Student Teaching: English and Literature – 16 credit

Educator Preparation Professional Core Coursework:

EDUC 2020 Educational Technologies in the 7-12 Classroom – 3 credit

EDUC 2040 Social Foundations of Education in the United States:

Secondary – 3 credits

PSYCH 3330 Educational Psychology – 3 credits
 EDUC 3950 Teaching Disciplinary Literacy – 3 credits
 EDUC 4060 Social Justice Education and Teaching: Secondary – 3 credits
 SPED 4010 Teaching Secondary Students with Exceptionalities in General Education – 3 credits

Educator Preparation Pedagogy/Methods Coursework:

ENGL 3960 Teaching the Reading of Young Adult Literature – 3 credits
 ENGL 3970 Practice and Theory of Teaching Writing in the Secondary Schools – 3 credits
 ENGL 4940 Practice and Theory of Teaching Literature in the Secondary Schools – 3 credits
 EDUC 4260 Principles of Secondary Education – 3 credits

Please check departmental information in regards to specific content coursework requirements.

Secondary major in Education Requirements for History/Social Sciences Education Candidates

Educator Preparation Orientation Course Requirement:

EDUC 2190 Orientation to Teacher Education: English, FCS, History, Math, Science and World Language Majors – 1 credit

Educator Preparation Field Experiences:

EDUC 2800L Pre-Student Teaching Experience I: Secondary Education – 0.5 credits
 EDUC 3800A Pre-Student Teaching Experience II: Core Experience – 2 credits
 ECON 4800 Intermediate Environmental and Resource Economics – 2 credits
 EDUC 4170 Student Teaching – 16 credits

Educator Preparation Professional Core Coursework:

EDUC 2020 Educational Technologies in the 7-12 Classroom – 3 credit
 EDUC 2040 Social Foundations of Education in the United States: Secondary – 3 credits
 PSYCH 3330 Educational Psychology – 3 credits
 EDUC 3950 Teaching Disciplinary Literacy – 3 credits
 EDUC 4060 Social Justice Education and Teaching: Secondary – 3 credits
 SPED 4010 Teaching Secondary Students with Exceptionalities in General Education – 3 credits

Educator Preparation Pedagogy/Methods Coursework:

EDUC 4980 Methods of Teaching History/Social Sciences – 3 credits
 EDUC 4260 Principles of Secondary Education – 3 credits

Please check departmental information in regards to specific content coursework requirements.

Secondary major in Education Requirements for Mathematics Education Candidates

Educator Preparation Orientation Course Requirement:

EDUC 2190 Orientation to Teacher Education: English, FCS, History, Math, Science and World Language Majors – 1 credit

Educator Preparation Field Experiences:

EDUC 2800L Pre-Student Teaching Experience I: Secondary Education – 0.5 credit
 EDUC 3800A Pre-Student Teaching Experience II: Core Experience – 2 credits
 ECON 4800 Intermediate Environmental and Resource Economics – 2 credits
 EDUC 4170 Student Teaching – 16 credits

Educator Preparation Professional Core Coursework:

EDUC 2020 Educational Technologies in the 7-12 Classroom – 3 credit
 EDUC 2040 Social Foundations of Education in the United States: Secondary – 3 credits
 PSYCH 3330 Educational Psychology – 3 credits
 EDUC 3950 Teaching Disciplinary Literacy – 3 credits
 EDUC 4060 Social Justice Education and Teaching: Secondary – 3 credits
 SPED 4010 Teaching Secondary Students with Exceptionalities in General Education – 3 credits

Educator Preparation Pedagogy/Methods Coursework:

MATH 4970 Teaching Secondary School Mathematics – 3 credits

Please check departmental information in regards to specific content coursework requirements.

Secondary major in Education Requirements for Science Education Candidates (Biology, Chemistry, Earth Science, Physics)

Educator Preparation Orientation Course Requirement:

EDUC 2190 Orientation to Teacher Education: English, FCS, History, Math, Science and World Language Majors – 1 credit

Educator Preparation Field Experiences:

EDUC 2800L Pre-Student Teaching Experience I: Secondary Education – 0.5 credits
 EDUC 3800A Pre-Student Teaching Experience II: Core Experience – 2 credits
 ECON 4800 Intermediate Environmental and Resource Economics – 2 credits
 EDUC 4170 Student Teaching – 16 credits

Educator Preparation Professional Core Coursework:

EDUC 2020 Educational Technologies in the 7-12 Classroom – 3 credit
 EDUC 2040 Social Foundations of Education in the United States: Secondary – 3 credits
 PSYCH 3330 Educational Psychology – 3 credits
 EDUC 3950 Teaching Disciplinary Literacy – 3 credits
 EDUC 4060 Social Justice Education and Teaching: Secondary – 3 credits
 SPED 4010 Teaching Secondary Students with Exceptionalities in General Education – 3 credits

Educator Preparation Pedagogy/Methods Coursework:

EDUC 4180 Secondary Science Methods I – 3 credits

EDUC 4190 Secondary Science Methods II – 3 credits

Please check departmental information in regards to specific content coursework requirements.

Secondary major in Education Requirements for World Languages and Cultures Education Candidates (French, German, Spanish) Educator Preparation Orientation Course Requirement:

EDUC 2190 Orientation to Teacher Education: English, FCS, History, Math, Science and World Language Majors – 1 credit

Educator Preparation Field Experiences:

EDUC 2800L Pre-Student Teaching Experience I: Secondary Education – 0.5 credits

EDUC 3800A Pre-Student Teaching Experience II: Core Experience – 2 credits

ECON 4800 Intermediate Environmental and Resource Economics – 2 credits

EDUC 4170 Student Teaching – 16 credits

Educator Preparation Professional Core Coursework:

EDUC 2020 Educational Technologies in the 7-12 Classroom – 3 credit

EDUC 2040 Social Foundations of Education in the United States: Secondary – 3 credits

PSYCH 3330 Educational Psychology – 3 credits

EDUC 3950 Teaching Disciplinary Literacy – 3 credits

EDUC 4060 Social Justice Education and Teaching: Secondary – 3 credits

SPED 4010 Teaching Secondary Students with Exceptionalities in General Education – 3 credits

Educator Preparation Pedagogy/Methods Coursework:

ENGL 3180 Introduction to ESL methods and materials – 3 credits

EDUC 4260 Principles of Secondary Education – 3 credits

Please check departmental information in regards to specific content coursework requirements.

It is our expectation that students know the requirements of their academic program and develop and follow an academic plan based on their academic catalog and degree audit using their individual academic adviser as a resource in this process.

Candidates Pursuing Educator Preparation: Non-secondary major programs

Iowa State offers the following undergraduate K-12/secondary Educator Preparation Programs not associated with this secondary major:

K-12 Music Education

K-12 Physical Education Teacher Education

Agriculture Education

Family and Consumer Sciences Education

For additional information on these programs please see: <https://education.iastate.edu/find-your-major/secondary-education-middle-or-high-school/>

K-12 and secondary education candidates must complete a professional core course sequence. In general, the sequence includes:

EDUC 2020	Educational Technologies in the 7-12 Classroom	3
EDUC 2040	Social Foundations of Education in the United States: Secondary	3
PSYCH 3330	Educational Psychology	3
EDUC 4060	Social Justice Education and Teaching: Secondary	3
EDUC 4260	Principles of Secondary Education	3
SPED 4010	Teaching Secondary Students with Exceptionalities in General Education	3
Total Credits		18

Coursework in content-specific pedagogy and field experience coursework also needs to be successfully completed.

Please check departmental information in regards to specific requirements for each program.

Candidates can choose to pursue additional endorsements.

- K-12 Coaching
- K-12 English as a Second Language
- 5-12 Agriscience/Agribusiness
- 5-12 Multi-occupations
- 5-12 Reading (contact the English Education academic advisor for a list of required courses)
- Science
 - 5-12 Basic Science
- Social Sciences
 - 5-12 American Government
 - 5-12 Anthropology
 - 5-12 Economics
 - 5-12 Psychology
 - 5-12 Sociology
- 5-12 Speech Communications and Theater

Specific program requirements can be found within each department that houses the endorsement. Information on K-12 Coaching, K-12 English as a Second Language, and 5-12 Reading can be found at: <https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jqf> (<https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jqf/>)

LEARNING TECHNOLOGIES MINOR

The School of Education offers a Learning Technologies minor available to all teacher education candidates. In order to earn this minor, candidates must register for the minor and complete the following sequences of courses:

EDUC 2010	Educational Technologies in the PK-6 Classroom	3
EDUC 2020	Educational Technologies in the 7-12 Classroom	3
EDUC 2800B	Pre-Student Teaching Experience I: Educational Technologies	1
EDUC 3020	Principles and Practices of Learning with Technology	3
EDUC 4070	Online Education in Pre-K-12 Classrooms: Hybrid, Virtual, and Blended Approaches	3
EDUC 4540	Emerging Topics in Educational Technologies (take for a total of 3 credits)	3
One of the following:		3
COMS 1070	Windows Application Programming	3
COMS 2070	Fundamentals of Computer Programming	3
EDUC 3700	Toying with Technology	3

Candidates must receive a "C" or above in all courses

Additional information can be found at: <https://www.education.iastate.edu/find-majors/learning-technologies-minor/>

Graduate Study

The School of Education is comprised of two graduate divisions: Higher Education and Teaching, Learning, Leadership, and Policy (TLLP). Within these divisions, the School offers coursework and experiences for the degrees Doctor of Philosophy, Doctor of Education, Master of Science, and Master of Education with a major in education. Students can pursue graduate programs, including a Master of Arts in Teaching degree, leading to completion of a teacher preparation program and recommendation for teacher licensure are offered in secondary science and secondary mathematics. In addition, endorsements in reading and special education can also be pursued by graduate students. Graduate students interested in educational leadership may also participate in our educator preparation programs in educational leadership. Program completers may be recommended for administrative licensure for roles as principals and superintendents. The School of Education offers graduate coursework leading to a minor for masters and doctoral students in other fields of study. Several graduate certificate programs are offered through the School of Education.

Doctoral Degree Programs

The School of Education offers two doctoral degree programs: the Ph.D. and the Ed.D. Students pursuing a Ph.D. in the division of Higher

Education may earn an education degree with an emphasis in higher education administration. Students pursuing a Ph.D. in the division of TLLP may earn an education degree with an emphasis in one of the following areas: educational leadership, organizations, and policy; instructional technology; mathematics education; science education; literacy; special education; or social and cultural studies of education.

Specific information about the requirements of and options available within the Ph.D. degree in education are available from the School office or on the School of Education Graduate Programs (<https://www.education.iastate.edu/graduate-programs/>) website.

Graduates of the Ph.D. program in education are prepared to pursue careers as scholars, leaders, and administrators in various educational settings, including public and private colleges and universities, community colleges, public and private educational agencies, non-profits, and corporate training settings.

Students in the School of Education may complete an Education Doctorate (Ed.D.) with a major in education. Students may earn an education degree with an emphasis in Community College Leadership or in P-12 Systems Level Leadership. Specific information about the requirements of the Ed.D. degree in education are available on the School of Education Graduate Programs website. Graduates of the Ed.D. program in education are prepared to pursue careers as scholar-practitioners in leadership roles in community colleges and K-12 educational systems including school districts, public and private education agencies, and state departments of education. Students who complete the K-12 Systems Level Leadership program can be recommended for Iowa licensure as a school superintendent.

Master's Degree Programs

The School of Education offers two master's degrees: the Master of Science and the Master of Education. In the division of Higher Education, students may earn an M.Ed in education with an emphasis in either student affairs or higher education. In the division of TLLP, students may earn an M.S. or an M.Ed. in education with an emphasis in one of the following areas: educational leadership, organizations and policy; instructional technology; mathematics education; science education; literacy; special education; or social and cultural studies of education.

Specific information about the requirements of and options available within M.S. or M.Ed. degrees in education are available from the School office or on the website School of Education Graduate Programs website <https://www.education.iastate.edu/graduate-programs/>

Graduates of the master's degree programs are prepared to pursue careers as educational leaders, higher education professionals, researchers, and advanced practitioners in colleges and universities, community colleges, public and private schools, education agencies, and informal (free-choice) education settings. Students who complete

the M.Ed. in Educational Administration can be recommended for Iowa licensure as a P-12 school principal.

Other graduate programs related to education (including Interdisciplinary Graduate Studies) may be planned for students on the basis of previous education and experiences as well as future plans and needs. For more information, students should refer to Agricultural Education and Studies, Family and Consumer Sciences Education, Kinesiology, and Interdisciplinary Graduate Studies or to graduate level course offerings within other departments.

Graduate minor in education

A minor in Education is available at both the master's and doctoral level. Graduate students in other majors may pursue a graduate minor in Education. A minor for doctoral students requires 15 credits in education courses, while a minor for master's students requires 9 credits. Students should identify a faculty member who will serve as the minor representative on their Program of Study Committee and work with this person to identify an appropriate set of courses to fit the student's interests. The minor is not an appropriate option for students whose primary interests are in research methodology; the graduate certification Applied Research in the Human Sciences should be used instead. Doctoral students are reminded that a minor must be declared before the preliminary oral examination.

Graduate Teacher and Educational Leadership Preparation Programs

The School of Education offers a Masters of Arts in Teaching - Science Education and a Masters of Arts in Teaching - Mathematics Education for candidates who currently have a bachelor's degree in a science area (or a closely related field) or in mathematics (or a closely related field), respectively. In addition, the School of Education offers a Masters of Arts in Teaching - Secondary Education that is currently available for individuals with an English degree or a history/social sciences degree interested in becoming a teacher. In these teacher preparation programs, program completers who apply for licensure are recommended for teacher licensure to the Iowa Board of Educational Examiners.

Teacher preparation programs at the graduate level are also offered in Agricultural Education (College of Agriculture and Life Sciences) and Physical Education (College of Human Sciences). The School of Education provides the professional core education coursework for these programs. Students in a graduate teacher preparation program must complete specific courses. Specific information about these programs can be found by contacting these departments.

Graduate level programs leading to recommendation for teaching endorsements, including Reading endorsements and Instructional

Strategist II: Behavior Disorders/Learning Disabilities, are offered through the School of Education.

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy:

- Decision Point 1 - Admission to the Educator Preparation Program (<https://iastate.box.com/s/n8eewbs3fznazf8alerv0qbf216fno7e/>)

In order to be eligible for student teaching, candidates must have completed all degree program requirements and specific coursework. Decision Point 2 - Requirements Students Must Meet Prior to Student Teaching (<https://iastate.box.com/s/hewm5y0era2j76cdvllaphappmsg43cs/>)

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer. Decision Point 3 - Recommendation for Licensure (<https://iastate.box.com/s/tvfae96b3b1y87wbyfna2oonhmfoba7g/>)

Graduate students who seek a teaching endorsement in reading or special education, but do not wish to pursue a master's degree can incorporate those courses in a professional certificate program. Endorsement programs include Instructional Strategist II: Behavior Disorders/Learning Disabilities, Reading K-8 and Reading 5-12. Information about these endorsements can be found at: <https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jqf> (<https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jqf/>)

The School of Education offers graduate programs for students seeking careers as principals and superintendents. The Transformative School Leader Program (TSLP) is designed for working professionals and includes coursework and field experiences in a principal preparation program.

Candidates must complete the program as a Master of Education degree.

The Ed.D. in Education with an emphasis in P-12 systems-level leadership is designed for working professionals and includes coursework and field experiences in a superintendent preparation program.

Program completers who apply for licensure are recommended for licensure to the Iowa Board of Educational Examiners.

Graduate Certificate Programs

The School of Education offers Graduate Certificate programs to allow students to enhance their skills outside of full degree programs. The Certificate programs currently offered include Applied Research Methods in the Human Sciences, Instructional Design, Literacy Coaching, Education for Social Justice and Special Education. Certificate programs require a minimum of 12 graduate credits (several require more than this) and can be earned in conjunction with a degree program. More information about graduate certificate programs can be found on the School of Education web site.

Courses:

Education (EDUC)

Educational Administration (EDADM)

Educational Leadership and Policy Studies (EL PS)

Higher Education (HG ED)

Human Sciences (H SCI)

Research and Evaluation (RESEV)

Special Education (SP ED)

Educator Preparation Program at Iowa State University

Educator Preparation (<http://www.education.iastate.edu/educator-prep-program/>): <https://education.iastate.edu/current-students/educator-preparation-program/>

The Educator Preparation Program at Iowa State University is a shared responsibility that spans three colleges. All candidates who are recommended by Iowa State University for licensure must be considered a program completer by meeting the requirements of the Educator Preparation Program and be recommended by their department, college, and the ISU recommending official. Students who successfully complete the requirements for any of the endorsement areas offered at ISU must demonstrate the skills, knowledge, and dispositions / professional practices required of educators.

Undergraduate Educator Preparation Programs

An undergraduate student seeking a bachelor's degree must be enrolled in the department in which he or she plans to major and must meet the graduation requirements of that department and college.

All Educator Preparation Program candidates must complete the professional core coursework (information found under each program) and required pedagogy and field experience coursework for their program. In addition, all prospective teachers are required to meet general education requirements as a part of their preparation. They must complete studies in the following general education groups. General education courses may be found in many departments. Credits listed

are minimum requirements. Specific departments and/or colleges may require specific coursework to meet these requirements or additional credits. Credits used to satisfy these general education requirements typically satisfy department and college general education requirements.

For Educator Preparation general education requirements, please visit the School of Education website: <https://education.iastate.edu/current-students/educator-preparation-program/resources/curriculum-requirements/>

Currently, there are fifteen undergraduate Educator Preparation areas offered at Iowa State University. These areas and their corresponding grade levels are listed below:

Agricultural Education (grades 5-12)

Biology (grades 5-12)

Chemistry (grades 5-12)

Early Childhood Education-Unified (birth-grade 3, inclusive)

Earth Science (grades 5-12)

Elementary Education (grades K-6)

English (grades 5-12)

Family and Consumer Sciences (grades 5-12)

Health Education (grades 5-12)

History-Social Sciences (grades 5-12)

Mathematics (grades 5-12)

Music (grades K-12)

Physical Education (grades K-12)

Physics (grades 5-12)

World Languages and Cultures (French, German, and Spanish) (grades 5-12)

Endorsements Areas

Early Childhood Education

Candidates can also choose to pursue an endorsement in K-8 reading.

Elementary Education

Candidates pursuing a degree in Elementary Education are required to pursue an endorsement in at least one additional area. Endorsements in the following areas are available for elementary education majors:

- K-8 English/Language Arts & Reading
- K-12 English as a Second Language (ESL)
- K-8 Health
- K-8 Mathematics
- K-8 Science
- K-8 Social studies
- K-8 Special education (Instructional Strategist I: Mild/Moderate Disabilities K-8).

Additional information about these endorsements can be found at:
<https://www.education.iastate.edu/find-majors/elementary-education/>

Elementary Education Candidates can pursue additional endorsements in any of the above listed areas and in the following areas:

- K-8 Reading
- K-12 Coaching
- 5-8 Algebra for HS Credit

Information about these additional endorsements can be found at:
<https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jqf>
 (https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jqf/)

Contact an Elementary Education academic advisor for the requirements for these endorsements.

K-12 Education and Secondary Education

Candidates can choose to pursue additional endorsements. These can include any of the above listed endorsement and the following:

- K-12 Coaching
- K-12 English as a Second Language
- 5-12 Agriscience/Agribusiness
- 5-12 Multi-Occupations
- 5-12 Reading (contact the English Education academic advisor for a list of required courses)
- Science
 - 5-12 Basic Science
- Social Sciences
 - 5-12 American Government
 - 5-12 Anthropology
 - 5-12 Economics
 - 5-12 Psychology
 - 5-12 Sociology
- 5-12 Speech Communications and Theater
- World Languages and Cultures
 - 5-12 Chinese
 - 5-12 Russian

Information about endorsements can be found at: <https://education.iastate.edu/future-students/find-your-major/endorsements/>

Minors

Students in the Educator Preparation Program may also choose to pursue a minor in Learning Technologies. Additional information can be found at: <https://www.education.iastate.edu/find-majors/learning-technologies-minor/>

Post-Bachelor's Educator Preparation Programs

Students holding an appropriate bachelor's degree may complete the K-12 or secondary educator preparation program in order to be recommended for teacher licensure.

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Educator Preparation Program (<https://iastate.box.com/s/n8eewbs3fznazf8alerv0qbf216fno7e/>)
- Decision Point 1 - Early Admission to the Educator Preparation Program for Transfer Students (<https://iastate.box.com/s/r3ap8wej7m3bmd0cehixe12epxtekxax/>)

In order to be eligible for student teaching, candidates must have completed all degree program requirements and specific coursework. Decision Point 2 - Requirements Students Must Meet Prior to Student Teaching (<https://iastate.box.com/s/hewm5y0era2j76cdvllaphappmsg43cs/>)

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer. Decision Point 3 - Recommendation for Licensure (<https://iastate.box.com/s/tvfae96b3b1y87wbyfna2oonhmfoba7g/>)

Candidates would be required to complete the Professional Core requirements of the program. In general, the sequence includes:

EDUC 2020	Educational Technologies in the 7-12 Classroom	3
EDUC 2040	Social Foundations of Education in the United States: Secondary	3
PSYCH 3330	Educational Psychology	3
EDUC 4060	Social Justice Education and Teaching: Secondary	3
EDUC 4260	Principles of Secondary Education	3
SPED 4010	Teaching Secondary Students with Exceptionalities in General Education	3

Total Credits **18**

Coursework in content-specific pedagogy and field experience coursework also need to be successfully completed. Please check department information regarding to specific requirements for each program.

Candidates must have at least one course in each of the following five general education groups identified for undergraduate students identified in the previous section: Natural Sciences, Mathematics and Statistics, Social Sciences, Humanities, and Communication Skills. Specific departments and/or colleges may require specific coursework to meet these requirements or additional credits.

Interested students should consult with the program coordinator of the area in which they plan to specialize so that an individualized program of study can be developed.

Educator Preparation Programs for which post-bachelor candidates take undergraduate Educator Preparation courses include;

English (grades 5-12)

Health Education (grades 5-12)

History-Social Sciences (grades 5-12)

World Languages and Cultures (French, German, and Spanish) (grades 5-12)

GRADUATE DEGREE PROGRAMS WITH EDUCATOR PREPARATION PROGRAM COMPLETION

Currently, there are four graduate teacher-educator preparation programs. These programs are designed for students who do not currently hold a teaching license. The programs are listed below:

Agricultural Education (M.S.)

General Education Mathematics Education (M.A.T.)

Physical Education (M.S.)

Secondary Science Education (M.A.T.)

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Educator Preparation Program (<https://iastate.box.com/s/n8eewbs3fznazf8alerv0qbf216fno7e/>)

In order to be eligible for student teaching, candidates must have completed all degree program requirements and specific coursework. Decision Point 2 - Requirements Students Must Meet Prior to Student Teaching (<https://iastate.box.com/s/hewm5y0era2j76cdvllaphppmsg43cs/>)

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer. Decision Point 3

- Recommendation for Licensure (<https://iastate.box.com/s/tvfae96b3b1y87wbyfna2oonhmfoba7g/>)

Graduate level programs leading to recommendation for additional teaching endorsements are offered through the School of Education. Graduate students who seek a teaching endorsement in reading or special education, but do not wish to pursue a master's degree can incorporate the coursework in a professional certificate program. Endorsement programs include Instructional Strategist II: Behavior Disorders/Learning Disabilities, Reading K-8 and Reading 5-12.

Graduate programs are also available for those who wish to pursue educational leadership as a profession as PK-12 school principals or PK-12 superintendents. (See Educational Leadership and Policy Studies in Courses and Programs section of this catalog.)

Master's Programs with Teacher Preparation AGRICULTURAL EDUCATION

The Agricultural Education and Studies Department offers a Master's of Science program that prepares Agricultural Education teachers for grades 5-12

See coordinator for program requirements.

Secondary MATHEMATICS

The School of Education offers a Master's of Education program that prepares Mathematics teachers for grades 5-12

Physical Education

The Department of Kinesiology offers a Master's of Arts in Teaching program that prepares Physical Education teachers for grades K-12.

Secondary Education

The School of Education offers a Master's of Arts in Teaching program that prepares secondary teachers for grades 5-12. Currently this program is available for English Education candidates and History/Social Sciences Education candidates.

See coordinator for program requirements.

Secondary Sciences

The School of Education offers a Master's of Arts in Teaching program that prepares Secondary Science teachers for grades 5-12

See coordinator for program requirements.

IOWA STATE UNIVERSITY TEACHER EDUCATION STANDARDS (INTASC STANDARDS)

The Learner and Learning

Standard #1: Learner Development. The teacher understands how learners grow and develop, recognizing that patterns of learning and

development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.

Standard #2: Learning Differences. The teacher uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.

Standard #3: Learning Environments. The teacher works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

Content

Standard #4: Content Knowledge. The teacher understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.

Standard #5: Application of Content. The teacher understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.

Instructional Practices

Standard #6: Assessment. The teacher understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher's and learner's decision making.

Standard #7: Planning for Instruction. The teacher plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.

Standard #8: Instructional Strategies. The teacher understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.

Standard #8A: Technology. The teacher integrates current and emerging technology in instruction to encourage student creativity, problem solving, collaboration, and digital literacy. Teachers practice and advocate safe, legal, and responsible use of information and technology (this standard is unique to the Iowa State University Teacher Preparation Program).

Professional Responsibility

Standard #9: Professional Learning and Ethical Practice. The teacher engages in ongoing professional learning and uses evidence to

continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.

Standard #10: Leadership and Collaboration. The teacher seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

EDUCATOR PREPARATION PROGRAM ADMISSION REQUIREMENTS

Educator Preparation Program Candidates must have:

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Educator Preparation Program (<https://iastate.box.com/s/n8eewbs3fznazf8alerv0qbf216fno7e/>)
- Decision Point 1 - Early Admission to the Educator Preparation Program for Transfer Students (<https://iastate.box.com/s/r3ap8wej7m3bmd0cehixe12epxtekxax/>)

More information about admission requirements can be found at: <https://www.education.iastate.edu/educator-prep-program/admission/>

THE PROFESSIONAL CORE REQUIREMENT FOR EDUCATOR PREPARATION Undergraduate Students

Educator Preparation Program candidates must complete certain studies related directly to the profession of teaching. All undergraduate candidates in the educator preparation program must take the following courses prior to student teaching, unless the student's program area has an approved content-area course deemed to be equivalent. Candidates must receive a minimum of a "C" in all education (EDUC) / Curriculum Instruction (C I) , Human Development and Family Studies (HD FS), Special Education (SP ED) courses and all content-specific pedagogy/methods courses required for licensure. (See program coordinator for more information).

EARLY CHILDHOOD EDUCATION-Unified

EDUC 2010	Educational Technologies in the PK-6 Classroom	3
EDUC 2050	Social Foundations of Education in the United States: Early Childhood and Elementary Education	3
EDUC 2450	Landscape of Teaching	3
EDUC 3320	Educational Psychology of Early Childhood and Elementary Education	3
EDUC 4050	Social Justice Education and Teaching: Early Childhood and Elementary	3

SPED 2500	Education of the Exceptional Learner	3
Total Credits		18

In addition, Early Childhood Education majors must complete all degree curriculum requirements. These can be found here: http://catalog.iastate.edu/collegeofhumansciences/earlychildhood_education/

ELEMENTARY EDUCATION:

EDUC 2010	Educational Technologies in the PK-6 Classroom	3
EDUC 2050	Social Foundations of Education in the United States: Early Childhood and Elementary Education	3
EDUC 2450	Landscape of Teaching	3
HDFS 1020	Human Development or PSYCH 2300 Developmental Psychology	3
HDFS 2400	Literature for Children	3
SPED 2500	Education of the Exceptional Learner	3
EDUC 3320	Educational Psychology of Early Childhood and Elementary Education	3
Total Credits		21

Elementary Education majors must meet all degree curriculum requirements. These can be found here: <http://www.catalog.iastate.edu/collegeofhumansciences/elementaryeducation/>

K-12 AND SECONDARY EDUCATION:

EDUC 2020	Educational Technologies in the 7-12 Classroom	3
EDUC 2040	Social Foundations of Education in the United States: Secondary	3
PSYCH 3330	Educational Psychology	3
EDUC 4060	Social Justice Education and Teaching: Secondary	3
EDUC 4260	Principles of Secondary Education	3
SPED 4010	Teaching Secondary Students with Exceptionalities in General Education	3

In addition, candidates must complete all degree program discipline-specific pedagogy coursework, field experience coursework, and content-specific coursework. These requirements can be found in the home department of the major.

Post-Bachelor's Students

Students who hold an appropriate bachelor's degree and seek a teaching license must complete an educator preparation program. This includes the professional education requirements listed above. The requirements can be met through course work or examination.

Master's Students

Prospective teachers must complete certain studies related directly to the profession of teaching. All students enrolled in Master's programs that lead to completion of an educator preparation program must take the

following courses prior to student teaching, unless the student's program area has an approved content area course deemed to be equivalent. (See Master's Programs section below for details.)

EDUC 5050	Using Technology in Learning and Teaching	3
EDUC 5060	Social Justice Education and Teaching: Advanced	3
EDUC 5260	Principles of Secondary Education ^{Not all programs require this course. Check with program coordinator}	3
EDUC 5290	Educational Psychology and the Secondary Classroom	3
or EDUC 5210	Introduction to the Teaching and Learning of Mathematics and Science	
EDUC 5800	Studies in the Foundations of Education in the United States	3
SPED 5010	Teaching Secondary Students with Exceptionalities in General Education	3

In addition, candidates must complete all degree program discipline-specific pedagogy coursework, field experience coursework, and content-specific coursework. These requirements can be found in the home department of the major.

CLINICAL EXPERIENCES

The Standards for Practitioner and Administrator Preparation Programs 281–79.14(256) Teacher preparation clinical practice standard states, "The unit and its school partners shall provide field experiences and student teaching opportunities that assist candidates in becoming successful teachers in accordance with the following provisions."

This includes:

- **79.14(5)** Teacher candidates admitted to a teacher preparation program must complete a minimum of 80 hours of pre-student teaching field experiences, with at least 10 hours occurring prior to acceptance into the program.
- **79.14(7)** The unit is responsible for ensuring that the student teaching experience for initial licensure:
 - a. Includes a full-time experience for a minimum of 14 consecutive weeks in duration during the teacher candidate's final year of the teacher preparation program. (Iowa State University policy requires a full semester experience.)

For most programs, there are four levels for clinical experiences used to meet these requirements. Level 1 involves observation in local schools and is typically completed prior to admission to the educator preparation program. Level 2 involves actively teaching in the classroom with one-two lessons, at minimum. Level 3 involves actively teaching in the classroom with two lessons, at minimum and being observed by a supervisor during teaching. Level 4 is student teaching and involves actively teaching for

a semester-long experience where the student teacher bears primary responsibility for planning and instruction within the classroom for a minimum of four weeks during the semester. Level 2, 3 and 4 field experiences involve a course fee, which ranges from \$75.00 to \$450.00 and are assessed to cover the costs of supervision and placement with a cooperating teacher. Course fees are increased when students teach nationally or internationally. For current course fees, consult the Schedule of Classes. For level 2, 3 and 4 field experiences, the student needs access to transportation because the placement may be within 60 miles of the university. The time commitment for clinical experiences ranges from 1/2 day for level 2 and 3 to the full day for level 4. Students complete a background check before initial placement in schools and other appropriate locations.

Specific field experience course requirements can be found in program/degree requirements.

PROGRAM CURRICULUM

Undergraduate Students

Early Childhood Education – Unified

The curriculum in Early Childhood Education – Unified prepares graduates to teach young children and work with their families. This program leads to careers working with young children (both those who are typically developing and those with special needs) from birth through third grade, inclusive. Program completers can be recommended for licensure to the Iowa Board of Educational Examiners. Individuals who are licensed may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through 3rd grade) or in home-based programs. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and the School of Education. For more information about the program, see Early Childhood Education - Unified Curriculum <http://www.education.iastate.edu/undergraduate-studies/early-childhood-education> (<http://www.education.iastate.edu/undergraduate-studies/early-childhood-education/>). (<https://hdfs.hs.iastate.edu/find-your-major/early-childhood-education/>).

In addition to being admitted Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Educator Preparation Program (<https://iastate.box.com/s/n8eewbs3fznazf8alerv0qbf216fno7e/>)

- Decision Point 1 - Early Admission to the Educator Preparation Program for Transfer Students (<https://iastate.box.com/s/r3ap8wej7m3bmd0cehix12epxtekxax/>)

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer. Decision Point 3 - Recommendation for Licensure (<https://iastate.box.com/s/tvfae96b3b1y87wbyfna2oonhmfoba7g/>)

All early childhood education – unified candidates must meet general education requirements in order to complete the Educator Preparation Program.

Elementary Education

In addition to pursuing a degree in Elementary Education, candidates are required to pursue an endorsement in at least one additional area. Candidates will be prepared to teach students in grades kindergarten through eighth grade in this area of specialization. Endorsements in the following areas are available for elementary education majors:

- K-8 English/Language Arts & Reading
- K-12 English as a Second Language (ESL)
- K-8 Health
- K-8 Mathematics
- K-8 Science
- K-8 Social studies
- K-8 Special education (Instructional Strategist I: Mild/Moderate Disabilities K-8)

Additional information about these endorsements can be found at: <https://www.education.iastate.edu/find-majors/elementary-education/>

Candidates can pursue additional endorsements in any of the above listed areas and in the following areas:

- K-8 Reading
- K-12 Coaching

Information about these additional endorsements can be found: <https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jqf/> (<https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jqf/>)

Contact an Elementary Education academic advisor for additional information.

Elementary education majors must satisfy a world languages requirement for graduation. Students must complete two years of a foreign language in high school or one year of a foreign language in college.

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Educator Preparation Program (<https://iastate.box.com/s/n8eewbs3fznazf8alerv0qbf216fno7e/>)
- Decision Point 1 - Early Admission to the Educator Preparation Program for Transfer Students (<https://iastate.box.com/s/r3ap8wej7m3bmd0cehixel2epxtekxax/>)

In order to be eligible for student teaching, candidates must have completed all degree program requirements and specific coursework. Decision Point 2 - Requirements Students Must Meet Prior to Student Teaching (<https://iastate.box.com/s/hewm5y0era2j76cdvllaphappmsg43cs/>)

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer. Decision Point 3 - Recommendation for Licensure (<https://iastate.box.com/s/tvfae96b3b1y87wbyfna2oonhmfoba7g/>)

K-12 and Secondary Education

Students wanting to pursue K-12 or Secondary Teacher Education declare a major in the content area in which they want to focus.

They then pursue one of two options depending upon their program: 1) complete the secondary major in Education or 2) complete additional coursework required to complete the Educator Preparation Program.

K-12/Secondary Educator Preparation Programs eligible to pursue the secondary major in Education are:

- English Education
- History/Social Sciences Education
- Mathematics Education
- Science Education – Biology
- Science Education – Chemistry
- Science Education – Earth Science
- Science Education – Physics
- World Languages and Cultures Education – French
- World Languages and Cultures Education – German
- World Languages and Cultures Education – Spanish

Iowa State offers the following undergraduate K-12/secondary Educator Preparation Programs not associated with this secondary major:

- K-12 Music Education
- K-12 Physical Education Teacher Education
- Agriculture Education
- Family and Consumer Sciences Education

In addition to being admitted Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Educator Preparation Program (<https://iastate.box.com/s/n8eewbs3fznazf8alerv0qbf216fno7e/>)
- Decision Point 1 - Early Admission to the Educator Preparation Program for Transfer Students (<https://iastate.box.com/s/r3ap8wej7m3bmd0cehixel2epxtekxax/>)

In order to be eligible for student teaching, candidates must have completed all degree program requirements and specific coursework. Decision Point 2 - Requirements Students Must Meet Prior to Student Teaching (<https://iastate.box.com/s/hewm5y0era2j76cdvllaphappmsg43cs/>)

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer. Decision Point 3 - Recommendation for Licensure (<https://iastate.box.com/s/tvfae96b3b1y87wbyfna2oonhmfoba7g/>)

Post-Bachelor's Students

Students holding an appropriate bachelor's degree who wish to complete a teacher preparation program in order to pursue teacher licensure must have at least one course in each of the following five general education groups identified for undergraduate students in the preceding section: Natural Sciences, Mathematics or Statistics, Social Sciences, Humanities, and Communication Skills. Individual departments preparing teachers may require additional credits in general education. (See program coordinator for more information).

In addition to being admitted Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Educator Preparation Program (<https://iastate.box.com/s/n8eewbs3fznazf8alerv0qbf216fno7e/>)

In order to be eligible for student teaching, candidates must have completed all degree program requirements and specific coursework. Decision Point 2 - Requirements Students Must Meet Prior to Student Teaching (<https://iastate.box.com/s/hewm5y0era2j76cdvllaphppmsg43cs/>)

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer. Decision Point 3 - Recommendation for Licensure (<https://iastate.box.com/s/tvfae96b3b1y87wbyfna2oonhmfoba7g/>)

Graduate Students

Each Master's program will determine what, if any, general education requirements Master's students must fulfill beyond a bachelor's degree from a regionally accredited institution. (See program coordinator for more information.)

In addition to being admitted Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Educator Preparation Program (<https://iastate.box.com/s/n8eewbs3fznazf8alerv0qbf216fno7e/>)

In order to be eligible for student teaching, candidates must have completed all degree program requirements and specific coursework. Decision Point 2 - Requirements Students Must Meet Prior to Student Teaching (<https://iastate.box.com/s/hewm5y0era2j76cdvllaphppmsg43cs/>)

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer. Decision Point 3 - Recommendation for Licensure (<https://iastate.box.com/s/tvfae96b3b1y87wbyfna2oonhmfoba7g/>)

See coordinator for program requirements.

EDUCATOR PREPARATION PROGRAM COMPLETION REQUIREMENTS

In order to be recommended for licensure to the Iowa Board of Educational Examiners by Iowa State University, candidates must have completed all degree program requirements and be considered an educator preparation program completer. Decision Point 3 - Recommendation for Licensure (<https://iastate.box.com/s/tvfae96b3b1y87wbyfna2oonhmfoba7g/>)

REGENTS ALTERNATIVE PATHWAY TO IOWA LICENSURE

The Regents Alternative Pathway to Iowa Licensure is a collaborative program involving the three Iowa Regents' universities. The program is designed for adult learners holding a baccalaureate degree with work experience who are seeking 5-12 licensure. For more information: <https://iowateacherintern.org>

Youth Development Interinstitutional Graduate Program

Iowa State University offers a Master's degree in Family and Consumer Sciences with a specialization in Youth Development. This is an interinstitutional online program offered through the Great Plains Interactive Distance Education Alliance (or GPIDEA). The student selects a home institution (Iowa State), which ultimately grants the degree. After admission to Iowa State, the student takes courses from Iowa State and the other participating institutions: Michigan State University, North Dakota State University, Texas Tech University, University of Missouri, and University of Nebraska-Lincoln.

The **Master of Family and Consumer Sciences with Youth Development specialization** is an online degree available focusing on developing knowledge and skills to serve today's youth. Students become immersed in a strengths-based curriculum and learn a methodology that supports youth, enabling them to grow socially, emotionally, and cognitively. The program has its roots in positive youth development. Rather than focusing solely on corrective measures, a positive youth development approach equips individuals in the second decade of life with the skillset necessary for a successful transition into adulthood.

The masters degree consists of 36 credits, 27 required credits, 6 elective credits, and 3 or more credits of creative component and/or internship (<https://online.hs.iastate.edu/graduate-degrees/youth-development/>). This program does not require a thesis.

Youth Development Certificates

The Youth Development certificates (<https://online.hs.iastate.edu/graduate-degrees/youth-development/>) are offered completely online through the Great Plains Interactive Distance Education Alliance (or GPIDEA). The student selects a home institution (Iowa State), which ultimately grants the certificate. After admission to Iowa State, the student takes courses from Iowa State and the other participating institutions: Michigan State University, North Dakota State University, Texas Tech University, University of Missouri, and University of Nebraska-Lincoln. Both are stand-alone graduate certificates available to any student with a bachelor's degree.

- 12-credit Youth Development Specialist Graduate Certificate
- 12-credit Youth Program Management and Evaluation Graduate Certificate

Courses primarily for graduate students, open to qualified undergraduates:

YTH 5020: Foundations of Positive Youth Development

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Fundamentals of positive youth development, theories, and principles utilized in the youth development profession. Ethical, professional, and historical elements of youth development as it has evolved toward professionalization. (Typically Offered: Fall, Spring, Summer)

YTH 5100: Adolescents and Their Families

Credits: 3. Contact Hours: Lecture 3.

Adolescent development as it is related to and intertwined with family development; reciprocal influences between adolescents and their families are examined. Working with youth vis a vis the family system will be highlighted. (Typically Offered: Fall, Spring)

YTH 5200: Positive Youth Development in Community Settings

Credits: 3. Contact Hours: Lecture 3.

Focus on the national emphasis of a strength-based or asset approach to community youth development, encompassing individual development (i.e., positive youth development) and adolescent interrelationships with environments. Emphasis is placed upon research, theory, and practice applied in communities throughout the U.S. Students will explore existing models, read theoretical and applied literature, and examine current community efforts as a basis for understanding community youth development. (Typically Offered: Fall, Spring)

YTH 5300: Youth in Cultural Contexts

Credits: 3. Contact Hours: Lecture 3.

Examination of the cultural context factors that affect youth from a holistic perspective within and outside the family unit. The course will provide an understanding of the cultural heritage of differing family structures and types. Students will explore the social and educational processes experienced by youth through in-depth reading, writing, discussion, critical listening, viewing of contemporary videos, and informal interviews with youth. Students will be encouraged to think critically about society and culture, gain further knowledge of how ethnic groups fit historically into society, and examine the results of how history has shaped the current cultural climate of the U.S. (Typically Offered: Fall, Spring)

YTH 5400: Youth Professionals as Consumers of Research

Credits: 3. Contact Hours: Lecture 3.

This course will help youth development professionals understand and evaluate research reports to reduce anxiety about applying research results and theories to practice. Specific emphasis will be on research and theory reports related to youth development. (Typically Offered: Fall, Spring)

YTH 5500: Youth Policy

Credits: 3. Contact Hours: Lecture 3.

Various federal and state policies designed specifically for youth. Students will examine how and why policies for youth are constructed. A guiding question that will be used to evaluate existing state and national policies is whether they contribute to, or act as, barriers to desired developmental outcomes. (Typically Offered: Fall, Spring)

YTH 5600: Youth-Adult Relationships

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

The role of youth-adult relationships in promoting the positive development of youth. Attitudes and activities that support youth engagement and agency. Research and practice of mentorship, youth-adult partnerships, and youth leadership. (Typically Offered: Fall, Spring)

YTH 5700JX: Contemporary Youth Issues: Adolescent Sexuality, Pregnancy, and Parenthood

Credits: 3. Contact Hours: Lecture 3.

This course explores adolescent sexuality development, sexual behaviors, and pregnancy/parenthood. These topics will be explored with respect to normative development and the reciprocal influences of the youth's ecology (i.e., family, school, community). Implications for professionals working with youth sexuality, pregnancy, and parenthood will be explored and highlighted.

YTH 5700L: Contemporary Youth Issues: Mental Health

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Understand optimal mental health in youth and how it can be promoted. Current theories and research related to optimal mental health and how promoting positive development is both similar to and different from preventing negative outcomes. Learn to assess a given youth development program in terms of its potential to promote positive mental health. Offered odd-numbered years. (Typically Offered: Summer)

YTH 5700M: Contemporary Youth Issues: Working with Adolescents with Difficulties

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Examines cognitive, self, and social transitions during adolescence. Topics include issues of identity, society's understanding of adolescents, and how adolescents and their parents, siblings, peers, teachers, and society interact. Offered odd-numbered years. (Typically Offered: Summer)

YTH 5700N: Contemporary Youth Issues: Understanding Normative Behavior in Immigrant & Minority Youth

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Explores the etiology of adolescent deviance using a positive, cross-national/crosscultural perspective. Includes implications of theory, empirical research, current prevention programs and needs assessments. Offers a look at deviance from different perspectives as well as a comparison of normative and non-normative development of youth. (Typically Offered: Fall)

YTH 5700P: Contemporary Youth Issues: Youth, Families & Technology

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Understand the interconnectedness of technology and youth/family. Formulate constructive and realistic strategies to enrich the life of a family or a youth in a society heavily dependent on technology. Topics of the course include identity formation, privacy, race, class, gender, subculture, risky behavior, policing, education, globalization, health, and policies. Offered odd-numbered years. (Typically Offered: Summer)

YTH 5700R: Contemporary Youth Issues: Sports, Youth and Society

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Examination of how sports and society help us better understand what we value, how we become who we are, and how we may be able to realize social justice in a larger social context. Offered even-numbered years. (Typically Offered: Summer)

YTH 5700TX: Contemporary Youth Issues: Systems of Care for Youth at Risk

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

CYI: Issues faced by youth today and associated risk and resiliency factors. A different topic will be presented each year, with the course rotating among participating universities. Topics have included Adolescent Health and Sexuality, Systems of Care for Youth at Risk, Mental Health, Immigrant and Minority Youth, Sports, Technology, etc. The course may be taken more than once, as long as the content is different each time. Offered odd-numbered years. (Typically Offered: Spring)

YTH 5700UX: Contemporary Youth Issues: Adolescent Health & Sexuality

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

CYI: Issues faced by youth today and associated risk and resiliency factors. A different topic will be presented each year, with the course rotating among participating universities. Topics have included Adolescent Health and Sexuality, Systems of Care for Youth at Risk, Mental Health, Immigrant and Minority Youth, Sports, Technology, etc. The course may be taken more than once, as long as the content is different each time. (Typically Offered: Fall)

YTH 5800: Youth Development Personnel and Program Management

Credits: 3. Contact Hours: Lecture 3.

Introduction to the development, administration and management of youth-serving organizations. (Typically Offered: Fall, Spring)

YTH 5850: Design and Evaluation of Youth Programs

Credits: 3. Contact Hours: Lecture 3.

Theoretical, methodological, and pragmatic issues involved in conducting programs and scholarship. Overview of the program development process and outcome evaluation of children and family programs. Modes of outcome scholarship and their implications for community-based programs are discussed. Students will develop knowledge through participating in a community-based project involving the practical application of program design and evaluation methods. (Typically Offered: Fall, Spring)

YTH 5890: Grant Development and Management.

Credits: 3. Contact Hours: Lecture 3.

Grant-getting process and an overview of what happens after a project is funded. The following topics will be covered: researching funding sources, generating cutting edge ideas, assessing needs, planning a project, establishing credibility, formulating a sustainable budget, designing an evaluation plan, managing the funded project, and disseminating project results. (Typically Offered: Fall)

YTH 5990: Creative Component

Credits: 1-30. Repeatable.

Nonthesis students creative component (e.g., a special report, capstone course, integrated field experience, annotated bibliography, research project, design, or other creative endeavor). A minimum of five credits of independent work is required on the programs of study (POS). Creative component format determined cooperation with the POS committee. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:

YTH 6340: Youth Development

Credits: 3. Contact Hours: Lecture 3.

Introduction to the developmental period of adolescence. The theory and research of positive youth development will be the lens through which this developmental period is examined. The course will emphasize how the developmental tasks of this life stage are influenced by (and influence) family and home, school, peers, and other contextual forces. The course will help students recognize and become familiar with the major issues and transitions adolescents face as they successfully navigate this developmental stage by critically examining the theoretical and research literature. (Typically Offered: Fall, Spring)

YTH 6900: Advanced Topics

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Advanced topics. (Typically Offered: Fall, Spring, Summer)

YTH 6910: Internship

Credits: 1-30. Repeatable.

Supervised practice and experience in college teaching, research, professional experience. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

COLLEGE OF LIBERAL ARTS AND SCIENCES

Beate Schmittmann, Dean

Monic Behnken, Associate Dean

Arne Hallam, Associate Dean

Leslie Hogben, Associate Dean

Kent Kerby, Assistant Dean

Jo Anne Powell-Coffman, Associate Dean

Amy Slagell, Associate Dean

Zora D. Zimmerman, Associate Dean Emerita

www.las.iastate.edu/ (<http://www.las.iastate.edu/>)

The College of Liberal Arts and Sciences (LAS) is a world-class learning and research community. Iowa State's most academically diverse college, LAS educates students to become global citizens, providing rigorous academic programs in the sciences, humanities and social sciences within a supportive, student-centered learning environment that emphasizes career readiness. The college also is home to the Open Option Program that prepares students for any curriculum at the University.

Learning Goals

The primary mission of the college is to promote learning in all its dimensions by providing students with ample opportunities to acquire the requisite knowledge, abilities, and skills to succeed in the world beyond the university. Through coursework within the major and in general education, students will develop skills in reasoning, analysis, and communication; achieve an understanding of the intellectual, historical, and artistic foundations of culture; and work to strengthen their abilities to interact with people, cultures, and the environment in an ethical and sensitive manner. To achieve these learning goals, the college asks students to acquire depth in learning within disciplines of their own choosing, and to acquire breadth through general education courses and electives. The breadth and depth requirements of our liberal arts and sciences degree programs prepare students for a lifetime of evolving career opportunities.

The College of Liberal Arts and Sciences offers over forty majors. Students can earn Bachelor of Arts, Bachelor of Science, Bachelor of Music, or Bachelor of Liberal Studies degrees. In collaboration with the College of Engineering, the College of Liberal Arts and Sciences also participates in a program of study leading to the Bachelor of Science in Software Engineering.

Preparation for Entering the College of Liberal Arts and Sciences

Students entering the college are expected to have high school preparation with at least 4 years of English, 3 years each of Social Studies, Mathematics and Science. Students are also encouraged to have coursework in computer applications. The study of a world language is highly encouraged; three or more years of a single world language in high school meets the world language graduation requirement in the College of Liberal Arts and Sciences.

Students often enter the College of Liberal Arts and Sciences as transfer students. Prospective transfer students are urged to contact the College of Liberal Arts and Sciences well before arriving on campus so that pre-transfer courses are appropriate to the planned major and transferable toward graduation from ISU. Early planning can improve the transfer process and support a timely graduation. Details regarding the criteria for graduation with distinction and other academic honors are available under Scholastic Recognition.

For information on articulation/transfer agreements that apply to students who have earned Associate of Arts degrees from an Iowa public community college or who have satisfied general education requirements at the University of Northern Iowa or in the College of Liberal Arts at the University of Iowa, see Articulation/Transfer Agreements in the Admission Transfer Information section of the catalog.

Transfer students in the College of Liberal Arts and Sciences may choose to graduate under the catalog in effect at the time of their graduation or under one of the five immediately preceding catalogs, provided that it covers the period of their enrollment either at Iowa State or any other accredited school. Full requirements of the chosen catalog must be met though adjustments will be made in instances where courses are no longer available or where programs have been changed. Transfer students are responsible for reviewing their transfer credit evaluation with the academic advisor during the first semester of enrollment.

Academic Advising

Each student in the College of Liberal Arts and Sciences is assigned an academic advisor in their area of study. This advisor assists the student in developing a program of study designed to meet the degree requirements while also meeting a student's goals outside of and beyond the classroom by incorporating activities such as study abroad, internships, Honors Program and undergraduate research. Advisors are a first point of contact for referral to university and college resources and services and play a crucial role in student success.

Academic advising begins during orientation programming prior to entry and continues through a student's graduation. Through the process of advising, students will develop academic plans that reflect their unique interests and goals as well as learn about the university resources

available to assist them academically, professionally, and personally. Advisors help students understand how their interests, skills and goals connect to fields of study and careers, including how a liberal arts education enhances their academic development.

Departments and Programs of the College

Majors, minors and certificates in the College of Liberal Arts and Sciences are administered by the following departments and programs.

Departments

- Air Force Aerospace Studies
- Biochemistry, Biophysics, and Molecular Biology
- Chemistry
- Computer Science
- Ecology, Evolution, and Organismal Biology
- Economics
- English
- Genetics, Development, and Cellular Biology
- Geological and Atmospheric Sciences
- Greenlee School of Journalism and Communication
- History
- Mathematics
- Military Science (Army Reserve Officers' Training Corps)
- Music and Theatre
- Naval Science
- Philosophy and Religious Studies
- Physics and Astronomy
- Political Science
- Psychology
- Sociology and Criminal Justice
- Statistics
- World Languages and Cultures

Cross-Disciplinary and Interdisciplinary Programs

The College of Liberal Arts and Sciences has a variety of interdisciplinary and cross-disciplinary programs that draw on faculty expertise across multiple departments. Students may enroll in courses offered by these programs, declare majors, certificates or minors where offered, or propose an Interdisciplinary Studies major.

- African and African American Studies Program
- American Indian Studies Program
- Bachelor of Liberal Studies Program
- Biological/Premedical Illustration Program
- Communication Studies
- Data Science

- Environmental Science and Environmental Studies
- Interdisciplinary Studies Program
- International Studies Program
- Leadership Studies
- Premedical and Preprofessional Health Programs
- Sustainability Program
- U.S. Latino/a Studies Program
- Women's and Gender Studies Program

MAJORS

Students majoring in the College of Liberal Arts and Sciences must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated for the major.

- Advertising, B.A.
- Anthropology, B.A., B.S.
- Biochemistry, B.S.
- Bioinformatics and Computational Biology B.S.
- Biological/Pre-Medical Illustration, B.A.
- Biology, B.S.
- Biophysics, B.S.*
- Chemistry, B.A., B.S.
- Climate Science, B.S.
- Communication Studies, B.A.
- Computer Science, B.A., B.S.
- Criminal Justice, B.A.
- Data Science, B.S.
- Earth Science, B.A., B.S.
- Economics, B.S.
- English, B.A., B.S.
- Environmental Science, B.S.
- Environmental Studies (secondary major only)
- French (see World Languages and Cultures, below)
- Genetics, B.S.
- Geology, B.S.
- German (see World Languages and Cultures, below)
- History, B.A., B.S.
- Interdisciplinary Studies, B.A., B.S.
- International Studies (secondary major only)
- Journalism and Mass Communication, B.S.
- Liberal Studies, B.L.S. (a general studies degree)
- Linguistics, B.A.
- Mathematics, B.S.
- Meteorology, B.S.

- Music, B.A., B.Mus.
- Performing Arts, B.A.
- Philosophy, B.A.
- Physics, B.S.
- Political Science, B.A.
- Professional Studies, B.L.S. (a general studies degree)
- Psychology, B.A., B.S.
- Public Relations, B.S.
- Religious Studies, B.A.
- Sociology, B.A., B.S.
- Software Engineering, B.S.
- Spanish (See World Languages and Cultures, below)
- Speech Communication, B.A. (<http://catalog.iastate.edu/collegeofliberalartsandsciences/speechcommunication/>)*
- Statistics, B.S.
- Technical Communication, B.S.
- Women's and Gender Studies, B.A., B.S.
- World Languages and Cultures B.A.:
 - French
 - German
 - Spanish

**This program will be discontinued Fall 2023 pending Board of Regents State of Iowa approval; the Biochemistry major now has a formal program focus in biophysics.*

A secondary major must be taken in conjunction with a primary major.

MINORS

In addition to University policies governing minors, LAS minors require at least 6 credits in courses numbered 3000 and above, taken at ISU with a grade of C or higher. Completed minors will be recorded on the transcript.

- Advertising
- African and African American Studies
- American Indian Studies
- Anthropology
- Astronomy
- Biochemistry
- Bioinformatics and Computational Biology
- Biological/Pre-Medical Illustration
- Biology
- Chemistry
- Chinese Studies
- Classical Studies

- Communication Studies
- Computer Science
- Criminal Justice
- Data Science
- Economics
- English
- Entrepreneurship*
- Environmental Studies
- Ethics
- French
- Genetics
- Geology
- German
- Gerontology*
- History
- International Studies
- Journalism and Mass Communication
- Leadership Studies
- Linguistics
- Mathematics
- Meteorology
- Middle Eastern Studies
- Military Studies (Army Reserve Officers' Training Corps)*
- Music
- Music Technology
- Performing Arts
- Philosophy
- Physics
- Political Science
- Psychology
- Public Relations
- Religious Studies
- Russian Studies
- Sociology
- Spanish
- Spanish Translation and Interpretation Studies
- Speech Communication (<http://catalog.iastate.edu/collegeofliberalartsandsciences/speechcommunication/>)
- Statistics
- Sustainability*
- Teaching English as a Second Language
- Technical Communication

- U.S. Latino/a Studies
- Women's and Gender Studies
- World Film Studies

*The College of Liberal Arts and Sciences participates in these interdepartmental minors.

Certificate Programs

University policies governing Certificate Programs are found in the Degree Planning section of the catalog.

- Actuarial Science Certificate
- Computing Applications Certificate
- Data Science Certificate
- Latin American Studies Certificate
- Leadership Studies Certificate
- Science Communication Certificate

LAS College Requirements

To obtain a bachelor's degree in any program offered by the College of Liberal Arts and Sciences, an undergraduate student must meet all university graduation requirements including:

- minimum of 120 credits
- minimum of 32 semester credits earned in residence at Iowa State University
- last 32 credits in residence
- GPA of 2.0 or better on courses taken at Iowa State University
- Information Literacy Requirement (credit for LIB 1600 Introduction to College Level Research)
- Communication Proficiency Requirement (credit for ENGL 1500, ENGL 2500*, and upper-level coursework)
- U.S. diversity and international perspectives requirements

**The College of Liberal Arts and Sciences aligns with the University Communication Proficiency Grade Requirement. At a minimum, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500; some majors set higher requirements for communication proficiency. For other university policies governing ISU degree programs, see Academics.*

Students with majors leading to Bachelor of Science or Bachelor of Arts degrees, must also meet all college and program specific requirements including:

- General Education
- World Language
- Advanced Credits

- Career Proficiency
- Completion of the Major

General Education

Requirements in a major are designed to develop depth, or mastery of a specific field or discipline, while courses in general education are designed to establish breadth, or a strong, intellectual foundation to support learning for all majors.

General Education Requirements and Learning Goals

The general education areas with their minimum credit requirements for the College of Liberal Arts and Sciences are:

- Arts and Humanities— (Minimum 12 credits). The student should develop an understanding of human cultural heritage and history, and an appreciation of reasoning and the aesthetic value of human creativity.
- Mathematical Disciplines and Natural Sciences — (Minimum 11 credits, including 3 in the mathematical disciplines and 8 in the natural sciences). The student should appreciate mathematics as a valuable tool of the sciences and as an intrinsically important way of thinking and should experience science as a rational search for understanding the structure and behavior of the natural world.
- Social Sciences— (Minimum 9 credits). The student should develop an appreciation of the principal methods of studying human behavior and an understanding of the structure and functioning of institutions.

Lists of courses approved for the three general education areas are available on the LAS College website (<http://www.las.iastate.edu/students/academics/general-education/>). Students may not apply the same course in more than one general education area.

Because students fulfill, in part, the learning goals of the area of their first major by taking courses in their programs of study, the minimum number of general education credits required in the area of the first major is reduced from that listed above by 3 credits. Students in Liberal Studies or Interdisciplinary Studies majors must complete the minimum requirements in all three areas.

Consistent with its breadth goal, courses with the designator of a student's first major may not be applied to general education requirements. Courses cross-listed with a course in the student's first major may be used to satisfy either major requirements or general education requirements but may not be used more than once. Courses taken to meet the requirements of a second major, third major or certificate may be counted in the general education groups.

Seminars and experimental courses may be acceptable as general education; advisors should consult with the LAS college office. Orientation courses, independent study courses (usually numbered 2900

or 4900), cooperative courses, courses numbered 5000 and above, and courses taken on a satisfactory-fail (S-F) or pass-not pass (P-NP) basis cannot be applied to a general education group.

World Language Requirement

The faculty of the College of Liberal Arts and Sciences believes that undergraduate students should acquire elementary practical experience in a second language, should be introduced to the theoretical study of language structure, and should begin to develop an understanding of a second culture through study of that culture's language. Students meet this expectation by satisfying a graduation requirement equivalent to the first year of university-level study in one world language.

Students may meet this requirement through several pathways:

- Completing three or more years of high-school world language study in a single language.
- Passing the exam for credit at the 1020 level.
- Receiving a passing grade in an ISU 1020 world language or American Sign Language (ASL) course, an approved ISU intensive or accelerated world language course, or equivalent transfer course.
- Receiving a passing grade in a world language course taught in a language other than English at the 2000-level or higher.
- Being a native speaker of a language other than English.
- Completing a major in any world language.

Questions about the World Language Requirement and how to meet it should be directed to the College Academic Services office in 102 Catt Hall. Credits applied toward the World Language Requirement cannot be used to satisfy the general education requirements, but students who have fulfilled the World Language Requirement may apply approved courses in world languages toward the appropriate general education areas.

Advanced Credit Requirements

To obtain a bachelor's degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, a student must earn at least 45 credits at the 3000 level or above taken at a four-year college. All such credits, including courses taken on a pass/not pass basis, may be used to meet this requirement.

Career Proficiency Requirement

Students will demonstrate knowledge of foundational career preparation topics such as internship and job search resources and processes, identifying and developing personal strengths and experiences, preparing application materials, interviewing, negotiating offers, and understanding ISU career services resources.

The minimum expectations of this career-readiness requirement will be met by successful completion of LAS 2030 Professional Career Preparation.

Students are expected to complete the minimum requirement before their third year (before their third semester at ISU for transfer students) and are encouraged to continue developing their career proficiency beyond the minimum through internships, co-ops, research, entrepreneurial activities and other professional development experiences and coursework during their Junior and Senior years.

The Major

Students must show they have achieved depth in a specialized area by completing successfully the requirements and learning goals of a major. A major comprises 24 to 50 credits in a program of study as determined by the faculty. Tracks within a major must have a common core that supports learning outcomes of the major. Some courses outside the major discipline may also be required as supporting work for the major. (See Majors, Minors and Certificates to find individual department and program requirements.)

The average grade of all courses in the major (those courses listed under major on the degree audit) must be 2.0 or higher. The major must contain at least 8 credits in courses taken at Iowa State University that are numbered 3000 or above and in which the student's grade is C or higher. Some majors have specific GPA requirements for key courses or groups of courses.

Courses with the designator of the first major listed on the degree program may not be counted in the general education groups.

The major in Interdisciplinary Studies (B.A., B.S.) is available for undergraduate students who have unique interdisciplinary educational goals. Such a major is designed by the faculty and the student and is approved only when the educational goals cannot be met by a reasonable combination of existing majors, minors, and certificates.

Additional Majors

Students may elect an additional major from the departments and program areas in the College of Liberal Arts and Sciences, or from a different major field offered for the bachelor's degree in another college of the university.

When choosing an additional major, students must confirm that the additional major is allowable; currently the following combinations of majors are not allowed, as multiple majors or multiple degrees:

- Economics with Business Economics
- Any combination of Journalism and Mass Communication, Advertising, and Public Relations.

Students interested in pursuing multiple majors should talk to their advisor about the process. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department of the primary major. If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In all cases, the student must satisfy the requirements of each major and the general education and other degree requirements for the primary major. Students with a primary major in another college who wish to take a second major in the College of Liberal Arts and Sciences must meet all requirements of the second major, but are exempt from the LAS College General Education, World Language, Career Proficiency and Advanced Credits requirements.

University policies for students wishing to double major or earn two bachelor's degrees are found in the Degree Planning section of the catalog.

Minors and Certificates

In addition to earning a major a student may want to complete a minor or certificate to indicate a special concentration of study. University policies related to minors and certificates and lists of all minors and certificates are available in the catalog. See the Degrees, Majors, Minors and Certificates tab in the LAS section of the catalog for all minors and certificates offered by the college. In addition to University policies governing minors, LAS minors require at least 6 credits in courses numbered 3000 and above, taken at ISU with a grade of C or higher. Completed minors and certificates will be recorded on the transcript.

Bachelor of Music Curriculum

In addition to the major in music leading to a Bachelor of Arts degree, the LAS College offers a Bachelor of Music degree (B.Mus.). In order to pursue teacher certification and recommendation for licensure in music, students must earn the Bachelor of Music degree. Bachelor of Music students select one of the following options: music education [vocal or instrumental], performance [voice, piano, organ, string instruments, wind or percussion instrument], or composition. For details about both degrees, see Music, Degree Requirements.

Bachelor of Liberal Studies Curriculum

The LAS College also administers the Bachelor of Liberal Studies (B.L.S.) degree, a bachelor's degree program established by Iowa Board of Regents and offered by all three Regents institutions. The B.L.S. is a general studies degree. While the B.L.S. does not have traditional majors focused on a specific discipline, students may choose to pursue the Liberal Studies Major, taking coursework in three areas of distribution, or the Professional Studies Major, taking coursework aimed to develop broad professional competencies in critical thinking, communication, leadership/teamwork, and technology. With the assistance of a B.L.S. advisor, students can structure a program that meets their individual educational, vocational or personal goals. Students in the B.L.S. program

are not eligible for additional majors, but they may earn a Certificate or minor by completing all of the requirements of those programs. Criteria for graduating with distinction and other academic honors with a B.L.S. degree are available under Scholastic Recognition.

For specific degree requirements, see Bachelor of Liberal Studies.

Software Engineering Curriculum

A Bachelor of Science degree in software engineering is jointly administered by the College of Liberal Arts and Sciences and the College of Engineering. The program is aimed at creating high-quality software in a systematic, controlled, and efficient manner. The specific objective of the program is to educate students on principles, processes, techniques, and tools for producing, analyzing, specifying, designing and evolving software. A broader objective is to cultivate among students' intellectual curiosity, problem-solving skills, good learning habits, effective communication skills, leadership, and teamwork.

This cross-college program enables students to take a range of Software Engineering courses, as well as elective courses from both Computer Science and Computer Engineering as part of their degree program.

For specific degree requirements, see Software Engineering.

Additional Curricular Policies

In addition to the policies outlined in the above discussion of the curricula of the LAS College:

- Elective courses as well as general education courses may be used to meet the requirements of a minor, certificate or additional major, provided that they are taken on a graded basis.
- Courses taken on a pass/not pass basis may be counted toward the required total of 120 credits and may be used to meet the advanced credit requirement, if appropriate, but may not be used to satisfy any other graduation requirement.
- No more than 9 credits of 4900 (Independent Study) courses may be counted toward graduation.
- Criteria for graduating with distinction and other academic honors are available under [Scholastic Recognition](#).
- Students whose high school study of world languages meets the College World Language Requirement may not enroll in or receive credit for 1010 or 1020 in that language.
- Students are responsible for talking to their academic advisors, using the degree audit, and reviewing other University policies. See the Academics section of the catalog.

Open Option

Students who enter Iowa State University and want time to explore the best match between their academic interests, abilities, and career goals may do so as Open Option students. The Open Option experience

is designed to help students explore majors and careers, become acquainted with the entire university, and make successful adjustments to the academic expectations of Iowa State.

Open Option students are assigned academic advisors who specialize in working with students who have not declared a major. First-year Open Option students take LAS 1010 and participate in the HOME learning community. This orientation experience introduces students to campus resources as well as to all of the colleges and majors on campus.

Aided by their advisor, Open Option students select courses that allow them to explore their academic interests before committing to a specific university major. Open Option students typically declare a major during their second or third semester. In addition, students who may have started in a specific field and have discovered it is not meeting their needs may transfer into Open Option for a semester or two while they decide on a new major.

For more information, visit the Open Option webpage (<https://openoption.iastate.edu/>).

Opportunities for Students

The College of Liberal Arts and Sciences provides many opportunities for students to enhance their knowledge, skills and credentials beyond traditional academic work in their majors, minors or certificate programs.

Honors Program

Students enrolled in the College of Liberal Arts and Sciences are encouraged to participate in the University Honors Program.

Liberal Arts and Sciences Honors is designed to add depth, breadth and challenge to enrich students' programs of study and intellectual development. Students in Liberal Arts and Sciences Honors benefit from the resources and capabilities of a large and dynamic research university along with the intellectual community that characterizes smaller, selective liberal arts colleges. Membership in LAS Honors offers specific benefits to students such as collaborations with individual faculty members on Honors projects, extended library loan privileges, 24-hour use of the Jischke Honors Building and priority registration for classes.

LAS Honors encourages freshmen as well as more advanced students to apply. Upon graduation, students who fulfill all of the requirements of the Honors Program are recognized by a special notation on their diploma and permanent record. Honors students wear white Honors cords at graduation.

Learning Communities

Students in the LAS College can participate in a variety of learning community options that support student success by supporting the transition to college life. There are various kinds of learning communities

both within and across majors. Most learning communities involve small groups of students who take one or more classes in common and have a staff person or peer mentor who supports students as they make connections and get engaged at ISU.

See <http://www.lc.iastate.edu/> for more information.

Teacher Preparation

Teaching licenses are issued by the Iowa Board of Educational Examiners. The Recommending Officer for the ISU University Teacher Education Program submits each candidate file after that candidate is determined to be eligible for recommendation. Recommendations for teaching licensure are issued for a specific teaching level, e.g., grades 5-12. Subject area endorsements are listed on the candidate's license. The College of Liberal Arts and Sciences collaborates with the School of Education to prepare students for recommendations for licensure in approved programs. Students who plan to teach in secondary schools (grades 5-12) may work toward completing an approved teacher preparation program in one of the following majors:

- Biology
- Chemistry
- Earth Science
- English
- History
- Mathematics
- Music (through the Bachelor of Music curriculum) *
- Physics
- Political Science
- World Languages and Cultures (Endorsements are available in French, German, and Spanish.)

Students may also prepare for recommendation for additional endorsements. For further information, see Educator Preparation.

*Students in the College of Liberal Arts and Sciences who complete the approved teacher preparation program in music education (B.Mus. degree with Vocal K-12 option or Instrumental K-12 option) and meet all other requirements may be recommended for a teaching license that allows them to teach music in grades K-12.

Preprofessional Programs

Any major in the College of Liberal Arts and Sciences provides excellent preparation for entry to professional schools. Students may enter the college with a designation of Pre-Med, Pre-Law or Preprofessional Health. Most students will earn a bachelor's degree in the major of their choosing while also completing the courses required for admission to professional schools. Some students will spend one to three years as students in the

college before transferring to a professional school where they have been accepted to complete their studies.

Preprofessional students are encouraged to pursue a major that interests them and where they excel. Advisors work with students to develop a program of study within their major that meets admission requirements to professional school and develops a student's credentials for the competitive application process to professional schools. For further information, see Opportunities for Preprofessional Study.

The College of Liberal Arts and Sciences participates in a 3+3 program with the Law Schools at Drake University and at the University of Iowa which allows qualified students to complete three years at Iowa State and transfer coursework from the first year of law school to complete their bachelor's degree requirements. Visit the Liberal Arts and Sciences Student Services office for details.

Reserve Officers' Training Corps Programs (ROTC)

The College of Liberal Arts and Sciences also offers students the opportunity to combine their academic programs with ROTC programs in Military Science (Army), Naval Science (Navy, Marine Corps), and Air Force Aerospace Studies (Air Force, Space Force). See Officer Education Programs for more information.

Study Abroad and National Student Exchange

The LAS College offers many study abroad and domestic exchange program options to enhance the undergraduate experience. Every year hundreds of students expand their horizons through these programs while they stay on track for graduation.

LAS Study Abroad provides international study, work, and service opportunities for all Iowa State students. LAS supports faculty and staff to facilitate learning opportunities abroad, and partners with organizations to offer a breadth of program options.

International learning opportunities for LAS students come in varied formats, from semester-long experiences focused on language immersion to three-week long global seminars that focus on interdisciplinary subjects. Faculty-led programs are among the most sought-after by our undergraduates, as they pair faculty expertise and ISU credit with the opportunity to explore other lands and cultures. Other program types available to students are exchanges, direct-enroll and affiliate programs.

LAS students can also work with the ISU National Student Exchange program to explore options to study out-of-state at one of more than 200 universities within the United States, US Territories, and Canada.

Visit LAS Study Abroad (<https://abroad.las.iastate.edu/>) or the National Student Exchange website (<https://www.nse.dso.iastate.edu/>) for more information.

Undergraduate Research

The LAS College has hundreds of faculty members actively engaged in research and most majors have designated independent study and/or research courses. Students are encouraged to talk to faculty about how they can be involved in the process of discovery.

LAS Innovation and Entrepreneurship Academy

The College of Liberal Arts and Sciences I+E Academy (<https://las.iastate.edu/students/lasinnovates/>) offers a two-year program open to all LAS majors, where students engage in online, face-to-face, and interactive activities to experience and develop an innovative and entrepreneurial mindset. The program matches students with a mentor in the second year and connects students with other on campus opportunities such as ISU's Pappajohn Center for Entrepreneurship (<https://www.isupjcenter.org/>) and Student Innovation Center offerings (<https://sictl.iastate.edu/>) where students can further develop their innovative ideas.

Career Services and Internships

LAS Career Services supports students' career exploration, career development, and professional career search assistance. The career development process requires students to proactively plan and engage with applied learning experiences, such as internships, research, and leadership positions, throughout their time on campus. LAS Career Services strongly recommends students have 1-2 internships before entering the workforce.

LAS Career Services offers career advising, internship and job search resources, and organizes events such as career fairs that connect students with employers. Services are available to undergraduates, graduate students, and alumni. Academic credit may be available for internships/co-op through departments and LAS Career Services.

For additional information, explore the LAS Career Services website (<https://careers.las.iastate.edu/>) or visit their office on the first floor of Carver Hall.

Advertising

ADVERTISING

<http://www.greenlee.iastate.edu> (<http://www.greenlee.iastate.edu/>)

The advertising major prepares students for careers in business and industry or for graduate education. Students majoring in advertising find career opportunities in professions requiring applied communication

expertise. Graduates are qualified for positions in the creative and account sides of advertising within businesses, agencies and media. Coursework in this major focuses on writing, research, digital and emerging media, and professional abilities. Students are required to complete a capstone internship experience to practice and refine their skills.

The Greenlee School of Journalism and Communication prepares students for the field of communication. The school offers three majors:

- Advertising Bachelor of Arts (ADVRT)
- Journalism and Mass Communication Bachelor of Science (JLMC)
- Public Relations Bachelor of Science (PR)

In addition, the Greenlee School offers a 4+1 program allowing students to complete their B.A. or B.S. and earn an M.S. in journalism and mass communication in fewer semesters.

Professional skills are taught and practiced alongside academic requirements using the latest technology and leading-edge communication trends and methods.

Founded in 1905, the unit was one of the first journalism programs to be accredited in 1948 and continues to be one of the longest continuously accredited programs in the country. Accreditation is based on the principle that students need a broad-based, liberal arts education and solid core courses within the discipline. Students taking one major at the school may not seek an additional major or a minor in the school. All students are required to take an additional major or a minor outside the school as an area of expertise.

Student Learning Outcomes

Students who major in programs of the Greenlee School of Journalism and Communication are expected to develop competencies in 10 key areas:

- Apply the principles and laws of freedom of speech and press, in a global context, and for the country in which the institution that invites ACEJMC is located;
- Demonstrate an understanding of the multicultural history and role of professionals and institutions in shaping communications;
- Demonstrate culturally proficient communication that empowers those traditionally disenfranchised in society, especially as grounded in race, ethnicity, gender, sexual orientation and ability, domestically and globally, across communication and media contexts;
- Present images and information effectively and creatively, using appropriate tools and technologies;
- Write correctly and clearly in forms and styles appropriate for the communications professions, audiences and purposes they serve;

- Demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity;
- Apply critical thinking skills in conducting research and evaluating information by methods appropriate to the communications professions in which they work;
- Effectively and correctly apply basic numerical and statistical concepts;
- Critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness;
- Apply tools and technologies appropriate for the communications professions in which they work.

The Advertising Major

To receive a Bachelor of Arts degree in advertising, a student must earn at least 120 credits. A minimum of 72 credits must come from courses other than ADVRT, JLMC or PR. At least 50 of these credits must come from the liberal arts and sciences. Overall, at least 45 credits must be from 3000-level courses or above.

The degree requirements allow for a minimum of 34 credits and a maximum of 48 credits to be taken in ADVRT, JLMC or PR. These include:

JLMC 1100	Orientation to Journalism and Communication	1
JLMC 2010	Reporting and Writing for the Mass Media (C+ or better)	3
ADVRT 2300	Advertising Principles	3
ADVRT 3010	Research and Strategic Planning for Advertising and Public Relations	3
One of the following two courses with C+ or better		
ADVRT 3340	Advertising Creativity	3
	or ADVRT 3360 Advertising Account Management	
3000-level ADVRT, JLMC, or PR Electives		6
One of the following two courses:		
ADVRT 4340	Advertising Campaigns	3
	or ADVRT 4360 Advertising Creative Portfolio	
JLMC 4600	Law of Mass Communication	3
JLMC 4620	Media Ethics, Freedom, Responsibility	3
4000-level ADVRT, JLMC, or PR Elective		3
ADVRT 4990A	Professional Media Internship: Required	3
Total Credits		34

Advertising majors are also required to take:

MKT 3400	Principles of Marketing	3
STAT 1010	Principles of Statistics (or another approved statistics course)	4

As majors in the College of Liberal Arts and Sciences, advertising students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

University Requirement: Students in all ISU majors must complete a three-credit course in U.S. Diversity, as well as a three-credit course in International Perspectives. The approved course lists are found at the following web addresses: (U.S. Diversity) <http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses> (<http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses>) and (International Perspectives) <http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/> (<http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/>). Students must also demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500.

College of LAS Requirement: Minimum of 120 credits, including a minimum of 45 credits at the 3000-level and above. You must also complete the LAS world language requirement, LAS career proficiency requirement, and any unmet ISU admission requirements.

Greenlee majors and minors cannot take ADVRT, JLMC or PR courses pass/not pass.

Minor or Additional Major: Students are required to fulfill a secondary area of expertise. This requirement can be met by declaring a minor or an additional major outside of the Greenlee School of Journalism and Communication. Students taking one major at the school may not seek an additional major or minor in the school.

Juniors can apply to a concurrent degree program and earn a B.A. in advertising and an M.S. in journalism and mass communication in fewer semesters. Contact the Director of Graduate Education for more information on the Greenlee School's 4+1 Program.

Minor in Advertising

Students cannot select more than one minor in the Greenlee School of Journalism and Communication. Minors in the Greenlee School are not available to Greenlee majors.

For a minor in advertising, students complete 15 credits. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

JLMC 1010	Mass Media and Society	3
ADVRT 2300	Advertising Principles	3
ADVRT 3010	Research and Strategic Planning for Advertising and Public Relations	3
6 credits from the following:		6
ADVRT 3350	Advertising Media Planning	
JLMC 3070	Digital Video Production	
JLMC 3900		
JLMC 4010	Mass Communication Theory	
JLMC 4060	Media Management	
JLMC 4740	Communication Technology and Social Change	
JLMC 4760	World Communication Systems	
JLMC 4770	Diversity in the Media	
ADVRT 4970	Special Topics in Communication	
Total Credits		15

Greenlee majors and minors cannot take ADVRT, JLMC or PR courses pass/not pass.

Concurrent Undergraduate and Graduate Programs

The Greenlee School offers three concurrent degree programs:

- B.A. Advertising/M.S. Journalism and Mass Communication
- B.S. Journalism/M.S. Journalism and Mass Communication
- B.S. Public Relations/M.S. Journalism and Mass Communication

Enrollment in the Greenlee School's concurrent degree programs enables students to complete coursework for the undergraduate and graduate programs on a five-year accelerated timeline – rather than the typical six-year timeline for the two degrees. See Journalism and Mass Communication Concurrent Undergraduate and Graduate Programs for more information on combining the B.A. in Advertising and the M.S. in Journalism and Mass Communication.

GRADUATE PROGRAMS

Master of Science

The Greenlee School of Journalism and Communication offers work for a Master of Science degree in journalism and mass communication.

Concurrent Programs

The Greenlee School's concurrent degree programs enable interested students the opportunity to complete coursework for the undergraduate

and graduate programs on a five-year accelerated timeline – rather than the typical six-year timeline for the two degrees.

Graduate Minor

The Greenlee School graduate program offers minor work for students majoring in other departments.

See Journalism and Mass Communication Graduate Programs for more information on the M.S. in Journalism and Mass Communication.

African and African American Studies

Interdepartmental Undergraduate Program

African and African American Studies, a cross-disciplinary program in the College of Liberal Arts and Sciences, offers students the opportunity to explore the African Americans' experience and African American contributions to American culture. Students in the program analyze and learn about African American experiences through the study of history, literature, art, religion, and society. They gain knowledge and develop skills and sensitivities to help them function effectively in today's diverse society.

African and African American Studies at Iowa State University is an expanding program. Many of the courses in the program satisfy general education requirements in the College of Liberal Arts and Sciences, the human relations requirement for teachers, and the university's diversity requirement; please consult official lists. Students can minor or even design their own Interdisciplinary Studies major with an emphasis in African American Studies. Relevant courses are offered through other departments.

Undergraduate Minor

A minor in African and African American Studies requires six courses in the program with a minimum of 18 credits, including AFAM 2010 Introduction to African American Studies and AFAM 4600 Seminar in African American Culture. The remaining credits must come from at least two departments, with at least two courses taken at the junior level or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Independent study and internship opportunities are available for credit, but do not count in the minimum requirements for the minor.

Air Force Aerospace Studies Program

The Department of Air Force Aerospace Studies (AFAS) is set within the College of Liberal Arts and Science as an interdisciplinary program but does not offer an academic Degree. The courses offered in the program are developed by the Air Force Air Education and Training Command and approved by the Department of the Air Force. The Department of Air Force Aerospace Studies aims to provide qualified student leaders

the opportunity to earn a commission as active duty officers in the United States Air Force (USAF) or United States Space Force (USSF). All AFAS courses are open to any ISU student who has met the course prerequisites. Entry into the Air Force Reserve Officer Training Corps (AFROTC) program is not dependent on a departmental major or year in the university and is open to all qualified students; however, it is intended for students who have at least three years of coursework remaining.

For further information on AFAS and AFROTC, please get in touch with afrotc@iastate.edu or call 515-294-1716.

Undergraduate Study

The curriculum is divided into two basic phases: the General Military Course (GMC) and the Professional Officer Course (POC). The GMC is introductory and open to all ISU students. It consists of four consecutive one-hour courses normally taken during the freshman and sophomore years.

Selection for entry into the POC is on a competitive basis. Cadets enrolling in this course must meet certain academic, mental, and physical requirements as well as having high moral standards. If selected, cadets who have completed the GMC will attend Field Training, a two-week intensive summer program aimed at evaluating a cadet's leadership, followership, and problem solving skills. Field Training includes officer training, physical training, career orientation, expeditionary training, and an introduction to military base functions. Successful completion of Field Training is a requirement to enter the POC.

Upon enrollment and acceptance into the POC, all cadets complete a contractual agreement with the Air Force, committing them to serve at least four years on active duty as a U.S. Air Force (USAF) or U.S. Space Force (USSF) officer after graduation. Cadets interested in an aviation career are able to compete for positions as a pilot, combat systems operator (CSO), remotely-piloted aircraft (RPA) operator, or air battle manager (ABM).

Example schedules for GMC and POC cadets: GMC

- 1 hour per week in the AFAS academic course
- 3 hours per week of physical training which is typically held at 6 am on Monday, Wednesday and Thursday
- 2 hours per week of Leadership Laboratory (LLAB) held Tuesday mornings at 6 am

POC

- 3 hours per week in the AFAS academic course
- 3 hours per week of physical training which is typically held at 6 am on Monday, Wednesday and Thursday
- 2 hours per week of Leadership Laboratory (LLAB) held Tuesday mornings at 6 am

AFROTC scholarships are available and provide payment for up to full tuition and fees. In addition, scholarship cadets receive a \$300-\$500 monthly subsistence allowance and \$900 per year book allowance. Scholarships can be awarded for periods from two to five years, depending on academic major. Upon acceptance of a scholarship, students complete a contractual agreement with the Air Force, which commits them to serve at least four years on active duty as a USAF or USSF officer after graduation. To determine eligibility and initiate application procedures for the scholarship program, interested students should contact the AFAS department.

Military Studies Minor

The College of Liberal Arts and Sciences offers a minor in Military Studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from one or more of the ROTC programs. At least six credits must be in courses numbered 3000 or above.

American Indian Studies Minor

American Indian Studies is a cross-disciplinary minor in the College of Liberal Arts and Sciences that allows students to learn more about the contemporary and historical realities of native communities in North America, to appreciate the variety of native cultures and experiences, and to be prepared for an attentive lifelong learning experience in a diverse world.

Courses focus on critical thinking and the application of knowledge in complex, diverse situations. Courses in American Indian Studies thus not only provide knowledge on specific native issues, but also prepare students for careers and further studies in fields such as community development and planning, social work, law, sociology, education, history, anthropology, agriculture, resource extraction, literature, policy, engineering, or environmental issues.

Today, 80% of American Indians live outside of reservation communities. American Indian Studies students will gain the knowledge and skills they need for living and working with, in, and around native communities and people who live everywhere in North America, and, increasingly, the world.

For students who are interested in deeper knowledge on the issues, a major can be pursued through the Interdisciplinary Studies major in the College of Liberal Arts and Sciences. Faculty members also are available to provide expertise to graduate students working on specific issues that involve American Indian themes.

The minor in American Indian Studies is 15 credits and includes:

AMIN 2100 Introduction to American Indian Studies

And 12 additional credits of AM IN coursework, of which at least 9 credits need to be 3000-level courses or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Coursework will be established in consultation with the program director through the Curriculum Change Form.

Anthropology Overview

The ISU program in Anthropology is housed in the Department of World Languages and Cultures (<http://catalog.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures/>).

Anthropology students develop a well-rounded professional education in cultural anthropology, archaeology, and biological anthropology. An undergraduate major in Anthropology can serve as the nucleus for a general liberal education, or as the prerequisite for graduate training qualifying a person for positions in (1) college and university teaching, (2) research, and (3) administrative and applied positions in government, development organizations, museums, and private businesses or corporations.

Anthropology majors may choose either a Bachelor of Arts or a Bachelor of Science degree, both of which require 33 credits in anthropology. A Bachelor of Arts degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Area I (Arts and Humanities) or III (Social Sciences) or a combination of both. A Bachelor of Science degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Area IIA (Mathematics) or IIB (Natural Sciences) or a combination of both. All students must also complete a minor or a second major as part of their degree requirements.

Student Learning Outcomes

Upon completion of the major in anthropology, students will be able to:

1. Explain what it means to be human through the study of culture and society, the biology and evolution of humans and other primates, and through the study of past human communities and material culture.
2. Demonstrate knowledge of the important historical and contemporary issues in the subdisciplines of archaeological, biological, and cultural anthropology.
3. Describe and evaluate local and global issues from an anthropological perspective.
4. Demonstrate an understanding of the value of cultural diversity.

Degree Requirements

Undergraduate students with majors in anthropology are required to take the following anthropology core courses:

ANTHR 2010	Introduction to Cultural Anthropology	3
ANTHR 2020	Human Origins	3
ANTHR 3060	Culture and Interpretation	3
ANTHR 3070	Biological Anthropology	3
ANTHR 3080	Archaeology	3
ANTHR 4500	Approaches in Anthropology	3
One of the following methods courses is required:		3
ANTHR 3190	Skeletal Biology	
or ANTHR 32 Archaeological Discovery and Analysis		
or ANTHR 43 Ethnographic Methods		

In addition to the above, 15 ANTHR choice credits are required. 15

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of a C or better in ENGL 2500.

ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
or ENGL 2500H Written, Oral, Visual, and Electronic Composition: Honors		

Additionally, the Anthropology Program requires a grade of C or better in one of the following courses:

ENGL 3020	Business Communication	
ENGL 3090	Proposal and Report Writing	
ENGL 3140	Technical Communication	

The principal sub-disciplines of anthropology are represented by the following:

1. Cultural anthropology:

ANTHR 2010	Introduction to Cultural Anthropology	3
ANTHR 2300	Globalization and the Human Condition	3
ANTHR 3060	Culture and Interpretation	3
ANTHR 3090	Introduction to Culture and Language	3
ANTHR 3100	Environmental Anthropology	3
ANTHR 3130	Kinship and Marriage in a Global Perspective	3
ANTHR 3220	Peoples and Cultures of Native North America	3
ANTHR 3230		3
ANTHR 3320		3
ANTHR 3360	Culture and Capitalism	3
ANTHR 3400	Magic, Witchcraft, and Religion	3
ANTHR 3420	Culture, Sex, and Gender	3
ANTHR 3540	War and the Politics of Humanitarianism	3
ANTHR 3550	Understanding Sub-Saharan Africa	3
ANTHR 4110	Anthropology in Professional Applications	3

ANTHR 4310	Ethnographic Methods	3
ANTHR 4340B	Internship: Cultural Anthropology	2-6
ANTHR 4340D	Internship: Linguistic Anthropology	2-6
ANTHR 4500	Approaches in Anthropology	3
ANTHR 4510B	Practicum in Anthropology: Cultural Anthropology	1-3
ANTHR 4510D	Practicum in Anthropology: Linguistic Anthropology	1-3
ANTHR 4900B	Independent Study: Cultural Anthropology	1-5
ANTHR 4900D	Independent Study: Linguistic Anthropology	1-5

2. Archaeology:

ANTHR 2020	Human Origins	3
ANTHR 3080	Archaeology	3
ANTHR 3150	Archaeology of North America	3
ANTHR 3200	Great Plains Archaeology	3
ANTHR 3210	World Prehistory	3
ANTHR 3280	Archaeological Discovery and Analysis	3
ANTHR 4290	Topics in Archaeological Laboratory Methods and Techniques: Archaeological Field School	4-6
ANTHR 4340A	Internship: Archaeology	1-6
ANTHR 4500	Approaches in Anthropology	3
ANTHR 4510A	Practicum in Anthropology: Archaeology	1-3
ANTHR 4900A	Independent Study: Archaeology	1-5

3. Biological Anthropology:

ANTHR 2020	Human Origins	3
ANTHR 3070	Biological Anthropology	3
ANTHR 3170	Primate Behavior, Ecology, and Evolution	3
ANTHR 3190	Skeletal Biology	3
ANTHR 4240	Forensic Anthropology	3
ANTHR 4340C	Internship: Biological Anthropology	1-6
ANTHR 4450	Biological Field School	4-6
ANTHR 4510C	Practicum in Anthropology: Biological Anthropology	1-3
ANTHR 4900C	Independent Study: Biological Anthropology	1-5

As majors in the College of Liberal Arts and Sciences, Anthropology students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. You must also complete the LAS world language requirement and career proficiency requirement.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses.

Students in Anthropology have the option of pursuing a B.S. or a B.A. A B.S requires six additional group requirement credits in natural science or mathematics disciplines. A B.A. requires six additional group requirement credits in social or humanities disciplines.

Anthropology B.S., B.A.

or ANTHR 3190	Skeletal Biology	
or ANTHR 3220	World Prehistory	

Or ANTHR 4820A, ANTHR 4820B, ANTHR 4820C, ANTHR 4820D

Three additional credits in ANTHR at the 3000+ level 3

Graduate Programs

The department offers a master of arts degree with a major in anthropology. Graduate courses are offered in the areas of archaeology, biological anthropology, and cultural anthropology. Competence in statistics or a methodology relevant to the student's program of study must be demonstrated. Students are required to do original field, archival, or laboratory research that will result in a scholarly thesis.

Biochemistry and Biophysics Overview

The Roy J. Carver Department of Biochemistry, Biophysics and Molecular Biology (<https://www.bbmb.iastate.edu>) offers majors in biochemistry in the College of Liberal Arts and Sciences and in the College of Agriculture and Life Sciences. Biochemists seek to understand life processes in terms of chemical and physical principles. Students in the biochemistry majors develop foundational analytical skills while exploring frontiers in biotechnology and medicine. Graduates in biochemistry will have a rigorous background in chemistry, biology, and physics. Biochemistry coursework focuses on the development of problem-solving skills, critical thinking, communication, and research design. The Biochemistry degree includes focused specializations towards professional goals, including three prescribed options: **Research & Biotechnology**, **Pre-Medicine**, and **Biophysics**.

Graduates with a Biochemistry B.S. degree will be prepared for postgraduate studies in the chemical or biological sciences, medical and health professional training, or immediate laboratory research in biochemistry, biotechnology, or pharmacy. Graduates are also equipped to pursue careers in teaching, technical writing, science communication and policy, intellectual property law, and biotechnology entrepreneurship. The biochemistry major is accredited by the American Society for Biochemistry and Molecular Biology (ASBMB). As such our learning objectives align with ASBMB core concepts.

Student Learning Outcomes

Upon graduation, students should be able to:

- Explain and provide examples to illustrate the biochemical principles underlying the following:
 - a. How energy is required and transformed in biological systems.
 - b. How macromolecular structure determines function and regulation.
 - c. How information storage and flow are dynamic and interactive.
 - d. How biochemistry and biology are driven by evolution and homeostasis

- Apply and justify appropriate techniques to characterize and quantify biomolecules in biological systems.
- Execute effective multimodal communication of the research process and results.
- Implement and justify best practices for laboratory safety and research ethics.

Biochemistry Major in the College of Liberal Arts and Sciences

The Bachelor of Science (B.S.) degree in Biochemistry requires the Biochemistry Core and one of the following three prescribed options. The options represent focused specializations for professional goals, including *Research & Biotechnology*, *Pre-Medicine*, and *Biophysics*. As majors in the College of Liberal Arts and Sciences, Biochemistry students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated below. Focus option-approved science course lists can be found on the Biochemistry website (<https://www.bbmb.iastate.edu/approved-course-lists/>).

Biochemistry Core

The major in biochemistry requires completion of the Biochemistry Core and one of three focus options. Each defined option includes specific supporting coursework in Biology; Chemistry; Mathematics and/or Statistics.

BBMB 1010	Introduction to Biochemistry	1
BBMB 1020	Introduction to Biochemistry Laboratory	1
BBMB 2010	Chemical Principles in Biological Systems	2
BBMB 3110	Writing Scientific Reports in Biochemistry ¹	1
BBMB 3120	Experimental Research Skills in Biochemistry	2
BBMB 4040	Biochemistry I	3-4
or BBMB 5040 & BBMB 5050	Amino Acids and Proteins and Bioenergetics and Metabolism	
BBMB 4050	Biochemistry II	3-4
or BBMB 5060 & BBMB 5070	Membrane Biochemistry and Biochemistry of Nucleic Acids	
BBMB 4100	Analysis of Scientific Literature	2
BBMB 4110	Techniques in Biochemical Research	4
BBMB 4610	Molecular Biophysics	2
BBMB 5610L	Laboratory in Molecular Biophysics	2-3
or CHEM 3220L	Laboratory in Physical Chemistry	
PHYS 2310 & 2310L	Introduction to Classical Physics I and Introduction to Classical Physics I Laboratory	5

PHYS 2320 & 2320L	Introduction to Classical Physics II and Introduction to Classical Physics II Laboratory	5
BBMB 4990	Undergraduate Research (highly encouraged elective)	arr †

Total Credits **33-36**
†

† Arranged with instructor.

¹ BBMB 3110 fulfills the ISU upper-level Communication Proficiency requirement.

Biochemistry Program of Study: Research & Biotechnology

Students interested in careers in biotechnology research and/or graduate studies in biochemistry, chemistry, or bioscience fields may opt for the Research & Biotechnology Option.

In addition to the Biochemistry Core (above):

CHEM 2010 or CHEM 1770 & CHEM 1780	Advanced General Chemistry General Chemistry I and General Chemistry II	5-7
CHEM 2010L or CHEM 1770L or CHEM 1770LL	Laboratory in Advanced General Chemistry Laboratory in General Chemistry I Laboratory in General Chemistry I	1
CHEM 3250	Chemical Thermodynamics	3
CHEM 3310	Organic Chemistry I	3
CHEM 3320	Organic Chemistry II	3
CHEM 3330L or CHEM 3310LL	Laboratory in Organic Chemistry I (for Chemistry and Biochemistry Majors) Laboratory in Organic Chemistry I	1-2
CHEM 3340L or CHEM 3320LL	Laboratory in Organic Chemistry II (for Chemistry and Biochemistry Majors) Laboratory in Organic Chemistry II	1-2
MATH 1650 & MATH 1660	Calculus I and Calculus II	8
MATH 2650 or MATH 2660 or MATH 2670 or STAT 2010 or STAT 3050	Calculus III Elementary Differential Equations Elementary Differential Equations and Laplace Transforms Introduction to Statistical Concepts and Methods Engineering Statistics	3-4
BIOL 2110	Principles of Biology I	3
BIOL 2120	Principles of Biology II	3

BIOL 3130 & 3130L	Principles of Genetics and Genetics Laboratory	4
BIOL 3140	Principles of Molecular Cell Biology	3
	Molecular Sciences from approved list	3

Total Credits **44-49**

Biochemistry Program of Study: Pre-Medicine

Students interested in qualifying for medical school training for careers as a Doctor of Medicine (MD) or Doctor of Osteopathic Medicine (DO) may opt for the Pre-Medicine Option. Allied health professions (e.g., Physician Assistant, Dentistry, and Ophthalmology) may also consider the Pre-Medicine Option.

In addition to the Biochemistry Core (above):

CHEM 1770 & 1770L & CHEM 1780 & CHEM 1780L or CHEM 2010 & 2010L	General Chemistry I and Laboratory in General Chemistry I and General Chemistry II and Laboratory in College Chemistry II Advanced General Chemistry and Laboratory in Advanced General Chemistry	6-9
CHEM 3250	Chemical Thermodynamics	3
CHEM 3310 & 3310L	Organic Chemistry I and Laboratory in Organic Chemistry I	4
CHEM 3320 & 3320L	Organic Chemistry II and Laboratory in Organic Chemistry II	4
MATH 1650 & MATH 1660	Calculus I and Calculus II	8
STAT 2010 or STAT 3050	Introduction to Statistical Concepts and Methods Engineering Statistics	3-4
PSYCH 1010 or PSYCH 2300	Introduction to Psychology Developmental Psychology	3
SOC 1340	Introduction to Sociology	3
BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
BIOL 2120	Principles of Biology II	3
BIOL 2120L	Principles of Biology Laboratory II	1
BIOL 3130	Principles of Genetics	3
BIOL 3140	Principles of Molecular Cell Biology	3
	Health & Biosciences from approved list	3
Total Credits		51-55

Biochemistry Program of Study: Biophysics

Students interested in research careers focused on the biophysical basis of life processes may opt for the Biophysics Option. *The Biophysics major will be discontinued Fall 2023 pending Board of Regents State of Iowa approval; the Biochemistry major now has a formal program focus in biophysics.*

In addition to the Biochemistry Core (above):

CHEM 2010	Advanced General Chemistry	5-7
or CHEM 1770	General Chemistry I	
& CHEM 1780	and General Chemistry II	
CHEM 2010L	Laboratory in Advanced General Chemistry	1
or CHEM 1770N	Laboratory in General Chemistry I	
or CHEM 1770LL	Laboratory in General Chemistry II	
CHEM 3240	Introductory Quantum Mechanics	3
CHEM 3250	Chemical Thermodynamics	3
CHEM 3310	Organic Chemistry I	3
CHEM 3320	Organic Chemistry II	3
MATH 1650	Calculus I	8
& MATH 1660	and Calculus II	
MATH 2650	Calculus III	4
MATH 2660	Elementary Differential Equations	3
MATH 3170	Theory of Linear Algebra	4
COMS 2070	Fundamentals of Computer Programming	3
BIOL 2110	Principles of Biology I	3
BIOL 2120	Principles of Biology II	3
Physical Sciences from approved list		3
Total Credits		49-51

As majors in the College of Liberal Arts and Sciences, Biochemistry students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to the requirements for the major.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. You must also complete the LAS world language requirement and LAS career proficiency requirement.

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

Minor

The Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology offers a minor in Biochemistry.

BBMB 4040	Biochemistry I	3
BBMB 4050	Biochemistry II	3
BBMB 3120	Experimental Research Skills in Biochemistry	2
One course from the following:		2-3
BBMB 4610	Molecular Biophysics (2 cr)	
BBMB 5610	Molecular Biophysics (2 cr)	
CHEM 3250	Chemical Thermodynamics (3 cr)	
3000+ level courses in BBMB or CHEM to 15 cr total		5-6
Total Credits		15-17

All minors require at least 15 credits, including at least 6 credits in course numbered 3000 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Concurrent Programs

Concurrent Bachelor of Science (B.S.)/ Master of Science (M.S.) Degrees

The department offers a concurrent enrollment degree program in either Biochemistry or Biophysics that allows ISU undergraduate students to obtain both the B.S. and M.S. degrees in about five years. The program is open to undergraduate students in the College of Liberal Arts and Sciences and in the College of Agriculture and Life Sciences. The concurrent degrees can be useful to students entering various career tracks. For those considering careers as research specialists, entry positions with higher-level responsibilities, and a higher-level salary, are made possible with the M.S. degree. For those considering careers as research directors, which require advanced study, the M.S. degree provides an advantage for admission into Ph.D. programs at the most competitive and prestigious graduate schools. Similarly, the M.S. degree can be a competitive advantage for admission in to medical, dental, law, veterinary medicine, or other professional schools.

Application to the program is made near the end of the junior undergraduate (third) year. Concurrent B.S./M.S. degree students begin research for the M.S. thesis during the summer semester after their junior year and are eligible for research assistantships, which are renewable based on academic standing and satisfactory research performance. The M.S. thesis requires intensive experience in original, independent laboratory research under the close supervision of a faculty mentor. To apply, see the concurrent B.S./M.S. application instructions found on the department's Graduate Study web page.

Concurrent Bachelor of Science/Graduate Certificate

The Bachelor of Science /Graduate Certificate program is intended for exceptional undergraduate students majoring in Biochemistry. In this program, the student completes all of the requirements for the B.S. degree and the graduate certificate in a four-year period by combining the requirements of the two programs. The student enters the Graduate College after he/she achieves junior status and develops a plan of coursework (graduate and undergraduate) subject to the approval of the Director of Certificate (DOC). Required graduate courses are BBMB 5040, 5050, 5060, 5070, 5610 and 5610L. The student must satisfy the requirements of the B.S. in Biochemistry (121 credits) and the Graduate Certificate in Biochemistry (12 credits). Six credits of graduate coursework can satisfy some requirements of the B.S. degree. To apply for the B.S./Graduate Certificate, submit the application form found on the Graduate College Forms web page.

Graduate Programs

Introduction

Biochemistry and Biophysics are the science and technology used to understand the mechanisms underlying biological processes at the molecular level, with an emphasis on the fundamental relationships among the chemical, physical, and biological sciences. The Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology (BBMB) administers Doctor of Philosophy (Ph.D.), Master's (M.S.), and Graduate Certificate programs that lead to an advanced degree or certificate in these disciplines. The prerequisite to graduate study is a sound undergraduate background in biology, chemistry, mathematics, and physics.

BBMB offers Doctor of Philosophy and Master's degrees in Biochemistry and in Biophysics that are designed to train students to independently conceive and carry out original research. BBMB also offers two graduate certificate programs in Biochemistry that provide a mechanism for formal recognition of focused graduate study in a specialized area that is less comprehensive than that required for a master's degree. BBMB participates in the Interdepartmental majors of Bioinformatics and Computational Biology; Genetics and Genomics; Immunobiology; Molecular, Cellular, and Developmental Biology; Neuroscience; Plant Biology; and Toxicology. All graduate degree students in BBMB are required to teach as part of their training.

Master of Science (M.S.) Degree

The M.S. degree programs in Biochemistry and in Biophysics are useful for students who prefer to undertake research training without the longer-term commitment required for the Ph.D. degree. It is also useful for students interested more in the technical aspects of research rather than in careers as research directors. The program requires about 3 years on average to complete and the successful defense of an independent research dissertation is required. About half the time required to earn the degree is spent on advanced coursework and professional seminars, and the other half is devoted to research undertaken in the laboratory under the close supervision of a faculty mentor. Financial support is available. To apply, applicants first submit the free BBMB online application found on the department website, which is used as a screening tool.

NOTE: Students interested in a research career are encouraged to consider the Ph.D. track. Students may enter the Biochemistry or Biophysics M.S. degree program as a direct admit to a faculty research group at any time during the year.

Doctor of Philosophy (Ph.D.) Degree

The Ph.D. programs in Biochemistry and in Biophysics are designed to train students in the ability to independently conceive and carry out original research in the general area of the chemistry or physics of the processes of life. The programs require about 5-6 years on average

to complete and the successful defense of an independent research dissertation. The majority of the time required to earn the degree is spent doing research on the dissertation project in the laboratory under the close supervision of a faculty mentor. Considerable time also is devoted to advanced coursework and professional seminars. Financial support is available. To apply, applicants first submit the free BBMB online application found on the department website, which is used as a screening tool. Students may enter the Biochemistry or Biophysics Ph.D. degree programs either as a rotation student in the fall semester or as a direct admit to a faculty research group at any time during the year.

Graduate Minor in Biochemistry

Graduate students in other M.S. and/or Ph.D. programs at ISU can earn a graduate minor in Biochemistry by completing 12 credits of the following courses with a grade point average of 3.0 or above: at least 6 credits from BBMB 5040, BBMB 5050, BBMB 5060 and BBMB 5070 and at least 6 credits of other BBMB 5000- and 6000-level courses. A student wishing to declare a minor in Biochemistry should arrange for a member of the graduate faculty in Biochemistry to serve on the POS Committee and submit the required form found on the Graduate College Forms page.

Graduate Certificate Programs

The graduate certificate program is designed for students who wish to continue or expand their knowledge in Biochemistry at the graduate level without the time commitment or lab experience required for a formal Master's or Ph.D. program. A certificate program can be an attractive option for individuals who have a bachelor's degree and are interested in broadening their expertise, or who are working in the sciences or industry and want to continue their education at the graduate level. BBMB offers two graduate certificate programs in Biochemistry: a concurrent B.S. / Graduate Certificate and a Graduate Certificate. The standards of admission and the course standards to which a certificate student is held are equivalent to those expected of a master's student. Each graduate certificate requires at least 12 graduate credits, all of which are available either on campus or online. A graduate supervisor will be appointed to oversee the certification for each student.

If a person who completes a graduate certificate program decides to continue for a graduate degree in Biochemistry or Biophysics, program approval is required. Credits earned for the graduate certificate may be used to meet course requirements for the graduate degree program.

Graduate Certificate in Biochemistry

The graduate certificate in Biochemistry is designed for students who have a B.S. degree in Biochemistry or a related field and wish to advance their knowledge by taking additional coursework at the graduate level. The graduate certificate courses may be taken either on-line or on campus. Candidates for a graduate certificate in Biochemistry are admitted in the Graduate College. A total of 12 credits is required that includes: BBMB 5040, BBMB 5050, BBMB 5060 and BBMB 5070, plus

four additional credits of BBMB coursework at the 5000-level. The 12 credits earned in the graduate certificate program may be applied to meet the course requirements of a M.S. or Ph.D. program in Biochemistry at Iowa State University (ISU) if the student is accepted into one of these programs. To apply for the graduate certificate in Biochemistry, submit the ISU online application.

Bioinformatics and Computational Biology

Undergraduate study in BCBIO is jointly administered by the Department of Computer Science, the Department of Genetics, Development, and Cell Biology, and the Department of Mathematics. The undergraduate B.S. degree is offered through the College of Liberal Arts and Sciences.

Bioinformatics and Computational Biology is an interdisciplinary science at the interfaces of the biological, informational and computational sciences. The science focuses on a variety of topics. These include gene identification, expression, and evolution; RNA, protein, and genome structure; and molecular and cellular systems and networks. The large group of participating faculty provides students with a multidimensional perspective on bioinformatics and computational biology and presents them with broad range of possibilities to get involved in research.

This major will prepare students for careers at the interfaces of biological, informational and computational sciences. BCBIO graduates with a B.S. seeking direct employment will find ready markets for their talents in agricultural and medical biotechnology industries, as well as in academia, national laboratories, and clinics. Although some students find employment directly after their baccalaureate training, many students will continue their education in one of the many excellent graduate programs in bioinformatics and computational biology that now exist.

Participation in this field requires that students achieve a high level of competence not only in biology, but also in mathematics, computer science, and statistics. As a result, the program includes required courses from many different disciplines. Graduates demonstrate an above-average ability to synthesize methods from these different disciplines to solve problems.

Student Learning Outcomes

By completing their studies, students earning the BS degree in BCBIO are expected to:

- 1. Develop critical thinking skills by implementing the scientific method through bioinformatics data analysis.
- 2. Explain and complete simple applications of the common bioinformatics and computational biology methods used for DNA, RNA, and protein analysis.

- 3. Understand the central dogma of biology and how bioinformatic analyses of high throughput biological next-generation sequencing proteomics datasets can help answer fundamental questions about the biology of DNA, RNA, and proteins.
- 4. Define systems biology and explain its importance in understanding biology; undertake basic data analyses in systems biology.
- 5. Identify common formats for biological data and be able to convert among different formats.
- 6. Summarize fundamental bioinformatics software tools, know when to apply them, and be able to use them.
- 7. Combine existing software tools into bioinformatic data processing pipelines.
- 8. Evaluate the limits of traditional algorithms and data analysis techniques as they apply to big data in biology.
- 9. Identify and appraise noise in high throughput biological datasets and uncertainty in the conclusions of data analysis.
- 10. Interpret bioinformatics and computational biology analyses individually and in collaborative learning environments.

As majors in the College of Liberal Arts and Sciences, Bioinformatics and Computational Biology students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated below for the major.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. You must also complete the LAS world language requirement and career proficiency requirement.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

A. Complementary Courses for the BCBIO Major

A minimum of 5 credits from the following: 5-8

CHEM 1630 & 1630L	College Chemistry and Laboratory in College Chemistry
or	
CHEM 1770 & 1770L & CHEM 1780	General Chemistry I and Laboratory in General Chemistry I and General Chemistry II
or	
CHEM 2010 & 2010L	Advanced General Chemistry and Laboratory in Advanced General Chemistry

A minimum of 4 credits from the following: 4-8

CHEM 2310 & 2310L	Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry

or

CHEM 3310 & 3310L	Organic Chemistry I and Laboratory in Organic Chemistry I

and

CHEM 3320 & 3320L	Organic Chemistry II and Laboratory in Organic Chemistry II

5 credits from the following: 5

PHYS 1150 & 1150L	Physics for the Life Sciences and Laboratory in Physics for the Life Sciences

or

PHYS 1310 & 1310L	General Physics I and General Physics I Laboratory

or

PHYS 2310 & 2310L	Introduction to Classical Physics I and Introduction to Classical Physics I Laboratory

STAT 3300 Probability and Statistics for Computer Science 3

STAT 4830 Empirical Methods for the Computational Sciences 3

BIOL 2110 Principles of Biology I 4
& 2110L and Principles of Biology Laboratory IBIOL 2120 Principles of Biology II 4
& 2120L and Principles of Biology Laboratory II

BIOL 3140 Principles of Molecular Cell Biology 3

or

BIOL 3150 Biological Evolution

or

GEN 4090 Molecular Genetics

Total Credits 31-38

Complementary courses note: The following other STAT courses may be substituted for STAT 3300 and STAT 4830, with permission of the BC BIO Major.

STAT 3300: STAT 1010, 1040, 2010, 2310, 3050, or 3410

STAT 4830: STAT 3010, 3420, or 4320

B. Core Courses Within the BC BIO Major

GEN 3130 Principles of Genetics 4
& 3130L and Genetics LaboratoryCOMS 2270 Object-oriented Programming 7
& COMS 2280 and Introduction to Data Structures
(recommended when developing course plan)

COMS 2300 Discrete Computational Structures 3

COMS 3110 Introduction to the Design and Analysis of Algorithms 3

MATH 1650 Calculus I 8
& MATH 1660 and Calculus II (recommended when developing
course plan)

BCBIO 1100 BCBIO Orientation 0.5

BCBIO 3220 Introduction to Bioinformatics and Computational Biology 3

BCBIO 4010 Bioinformatics of Sequences 3

BCBIO 4060 Bioinformatics of OMICS 3

BCBIO 4900 Independent Study 1-5
or BCBIO 4910 Team Research Projects**Total Credits 35.5-39.5**

Core courses note: The COMS 2270/2280 and MATH 1650/1660 core course series is required for BCBIO majors. However, students transferring into the major who have already earned credit for COMS 2070/2080 and/or the Math 1810/1820 can substitute those courses for the respective COMS 2270/2280 and/or MATH 1650/1660 series. Students will need permission of the instructors to enroll in any upper-level course that requires a pre-req in COMS 2270/2280 and/or MATH 1650/1660.

C. Support Electives

3-9 credits to be chosen from the following list:

BBMB 4040 Biochemistry I 3

BBMB 4050 Biochemistry II 3

BBMB 4610 Molecular Biophysics 2

BIOL 3280 Molecular and Cellular Biology of Human Diseases 3

BIOL 4230 Developmental Biology 3

BIOL 4510 Plant Evolution and Phylogeny 4

BIOL 4620 Evolutionary Genetics 3

BIOL 4870 Microbial Ecology 3

COMS 2520 Linux Operating System Essentials 3

COMS 3090 Software Development Practices 3

COMS 3190 Construction of User Interfaces 3

COMS 3270 Advanced Programming Techniques 3

COMS 3630 Introduction to Database Management Systems 3

COMS 4250 High Performance Computing for Scientific and Engineering Applications 3

COMS 4260 Introduction to Parallel Algorithms and Programming 4

GEN 3400 Human Genetics 3

GEN 4100 Analytical Genetics 3

MATH 2070	Matrices and Linear Algebra	3
or MATH 3170	Theory of Linear Algebra	
MATH 2650	Calculus III	4
MATH 2660	Elementary Differential Equations	3
or MATH 2670	Elementary Differential Equations and Laplace Transforms	
MATH 3040	Combinatorics	3
MATH 3140	Graph Theory	3
MATH 3730	Introduction to Scientific Computing	3
MICRO 4020	Microbial Genetics and Genomics	3
STAT 3420	Introduction to the Theory of Probability and Statistics II	4
STAT 4710	Introduction to Experimental Design	3
STAT 4740	Introduction to Bayesian Data Analysis	3
STAT 4750	Introduction to Multivariate Data Analysis	3
STAT 4860	Introduction to Statistical Computing	3
STAT 5810	Analysis of Gene Expression Data for the Biological Sciences	3

D. The communications and English proficiency requirements of the LAS college are met by:

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
or ENGL 2500H	Written, Oral, Visual, and Electronic Composition: Honors	

And one of the following:

ENGL 3090	Proposal and Report Writing	3
or		
ENGL 3120	Communicating Science and Public Engagement	
or		
ENGL 3140	Technical Communication	

BCBIO majors must earn a minimum grade of C in ENGL 2500 Written, Oral, Visual, and Electronic Composition or ENGL 2500H Written, Oral, Visual, and Electronic Composition: Honors.

Bioinformatics and Computational Biology, B.S.

Freshman

Total Credits: 121.5-132.5

Minor in Bioinformatics and Computational Biology

The administering departments offer a minor in Bioinformatics and Computational Biology, which requires the following courses.

BIOL 2110	Principles of Biology I	3
BIOL 2120	Principles of Biology II	3
GEN 3130	Principles of Genetics	3
COMS 2270 & COMS 2280	Object-oriented Programming and Introduction to Data Structures	7

STAT 3300	Probability and Statistics for Computer Science	3
BCBIO 3220	Introduction to Bioinformatics and Computational Biology	3
BCBIO 4010	Bioinformatics of Sequences	3
BCBIO 4060	Bioinformatics of OMICS	3
Total Credits		28

Note: The following other STAT courses may be substituted for STAT 3300, with permission of the BCBIO Major: STAT 1010, 1040, 2010, 2310, 3050, or 3410.

2. The COMS 2270/2280 course series is required for the BCBIO minor. However, students transferring into the minor who have already earned credit for COMS 2070/2080 can substitute those courses for the COMS 2270/2280 series. Students will need permission of the instructors to enroll in any upper-level course that requires a pre-req in COMS 2270/2280.

Most students pursuing a minor in Bioinformatics and Computational Biology will be biology, genetics, computer science, computer engineering, statistics, or mathematics students who have already taken some of these courses for their major. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Graduate Study

Work is offered for the Master of Science and Doctor of Philosophy degrees with a major in Bioinformatics and Computational Biology (BCB). Faculty are drawn from several departments: Agronomy; Animal Science; Astronomy and Physics; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemical and Biological Engineering; Chemistry; Computer Science; Ecology, Evolution, and Organismal Biology; Electrical and Computer Engineering; Entomology, Genetics, Development and Cell Biology; Materials Science and Engineering; Mathematics; Plant Pathology; Statistics; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

The BCB program emphasizes interdisciplinary training in nine related areas of focus: Bioinformatics, Computational Molecular Biology, Structural and Functional Genomics, Macromolecular Structure and Function, Metabolic and Developmental Networks, Integrative Systems Biology, information Integration and Data Mining, Biological Statistics, and Mathematical Biology. Additional information about research areas and individual faculty members is available at: www.bcb.iastate.edu (<http://www.bcb.iastate.edu>).

BCB students are trained to develop an independent and creative approach to science through an integrative curriculum and thesis research projects that include both computational and biological components. First year students are appointed as research assistants

and participate in BCB 6970 Graduate Research Rotation, working with three or more different research groups to gain experience in both "wet" (biological) and "dry" (computer) laboratory environments. In the second year, students initiate a thesis research project under the joint mentorship of two BCB faculty mentors, one from the biological sciences and one from the quantitative/computational sciences. The M.S. and Ph.D. degrees are usually completed in two and five years, respectively.

Before entering the graduate BCB program, prospective BCB students should have taken courses in mathematics, statistics, computer science, biology, and chemistry. A course load similar to the following list would be considered acceptable:

MATH 2650	Calculus III	4
STAT 3410	Introduction to the Theory of Probability and Statistics I	4
COMS 2270	Object-oriented Programming	4
COMS 2280	Introduction to Data Structures	3
COMS 2300	Discrete Computational Structures	3
CPRE 3100	Theoretical Foundations of Computer Engineering	3
CHEM 1630	College Chemistry	4
CHEM 2310	Elementary Organic Chemistry	3
BBMB 3010	Survey of Biochemistry	3
BIOL 3130	Principles of Genetics	3
BIOL 3150	Biological Evolution	3

During the first year, BCB students are required to address any background deficiencies in calculus, molecular genetics, computer science, statistics and discrete structures, with specific courses determined by prior training. Among the total course requirements for Ph.D. students are four core courses in Bioinformatics, three of which are mandatory in the BCB program:

BCB 5670	Bioinformatics Algorithms	3
BCB 5680	Statistical Bioinformatics	3
BCB 5690	Structural Bioinformatics	3
BCB 5700	Systems Biology	3

And also should include

GDCB 5110	Advanced Molecular Genetics	3
BCB 6900	Student Seminar in Bioinformatics and Computational Biology	
BCB 6910	Faculty Seminar in Bioinformatics and Computational Biology	
BCB 5930	Workshop in Bioinformatics and Computational Biology	

M.S. students take the above background and core courses, take at least 6 credits of advanced coursework, and may elect to participate in

fewer seminars and workshops. Additional coursework may be selected to satisfy individual interests or recommendations of the Program of Study Committee. All graduate students are encouraged to teach as part of their training for an advanced degree. (For curriculum details and sample programs of study, see: www.bcb.iastate.edu (<http://www.bcb.iastate.edu>)).

Biological/Pre-Medical Illustration Overview

The interdepartmental undergraduate BPMI major is designed for students who want to combine their interests and aptitudes in science and art. Based on the theme of *Communicating Science Through Art*, the major prepares students for careers in biological visualization/illustration or for graduate education in medical visualization/illustration. Graduates enter fields such as biocommunications, environmental display design, freelance illustration, UX/UI and museum display design, creative technologies, instructional design, and various careers in the publishing, research and education, and visual communication industries.

Student Learning Outcomes

Throughout its over 35-year existence, the underlying philosophy of BPMI has been to emphasize both art and science; students take approximately equal credit hours in the two major areas. Another important guiding principle has been visual thinking and problem-solving, and a third is maintaining student proficiency in a wide range of visual communication methods and technologies so they have the skill to choose the most effective tools for a given communication objective. Upon completion of the BPMI Program, graduates will:

- Implement effective academic research methods and concept development processes for producing meaningful educational visual solutions.
- Demonstrate advanced science knowledge in a science focus area of choice (for example, pre-medical, or non-medical areas of life and earth science).
- Demonstrate the ability to deconstruct and visualize complex science in order to create accessible, accurate, aesthetic, and meaningful visual representations, including diagrammatic, realistic, and symbolic, for a range of outputs (print, modeled, online, mobile).
- Implement interdisciplinary thinking in team-based and independent projects.
- Flexibly adapt to new technology and communication challenges.
- Showcase and analyze works by articulating key visual elements in formal presentations, in written and oral format, and during assessments and critiques.
- Demonstrate effective use of design principles, problem solving skills, and visual organization.

- Demonstrate career-readiness and professional practice competencies.
- Exhibit an academic trajectory for engaging in life-long learning.

Entrance Requirements

Entrance into the BPMI program is by application to the BPMI Advisory Committee. Eligibility is based on an academic standard of at least 2.00 cumulative GPA on 30 credits of university level work and a consideration of artistic ability as demonstrated through submission of a portfolio of representative drawings or another artwork. Freshman and transfer students usually declare pre-BPMI as their major while satisfying the conditions for entrance into the major, although other majors can be declared.

Degree Requirements

The information below outlines the specific requirements for a B.A. degree in Biological/Pre-Medical Illustration (BPMI). There are four components to a degree in BPMI:

- Liberal arts general education
- Science core and advanced courses
- Art core and advanced courses
- Electives

Part 1. College Requirements

a. Communication Proficiency Requirements

ENGL 1500	Critical Thinking and Communication (grade of C or better)	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition (grade of C or better)	3
LIB 1600	Introduction to College Level Research	1
Choose one course from the following:		3
ENGL 3020	Business Communication	
ENGL 3160	Creative Writing: Playwriting	
Two semesters of college-level world language		0-8
Students with 3 years in high school world language are exempt		
Total Credits		10-18

B. Liberal Arts and Sciences Requirements*

Arts and Humanities **		12
Natural Sciences and Mathematical Disciplines		
MATH 1040	Introduction to Probability	3-4
or MATH 1400 College Algebra		
or MATH 1430 Preparation for Calculus		
or MATH 1650 Calculus I		
or STAT 1010 Principles of Statistics		
or STAT 1040 Introduction to Statistics		

or COMS 1070	Windows Application Programming	
or more advanced		
CHEM 1630 & 1630L	College Chemistry and Laboratory in College Chemistry	5
or CHEM 1770 & 1770L	General Chemistry I and Laboratory in General Chemistry I	
CHEM 2310 & 2310L	Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry	4
Social Sciences ***		9
Total Credits		33-34

* Choose courses to meet *International Perspectives & US Diversity* requirements

**See <https://las.iastate.edu/students/academics/general-education/>
Consider HIST 2800, HIST 2810; ARTH 2800, ARTH 2810; DSNS 1830

***See <https://las.iastate.edu/students/academics/general-education/>

Part 2. Course Requirements for Major in BPMI (continued in Part 3)

A. Biological Sciences Core

LAS 2930D	Special Projects: General (F.)	1
or LAS 1010	Orientation for Open Option and Preprofessional Students	
BIOL 2110 & 2110L	Principles of Biology I and Principles of Biology Laboratory I (F.S.)	4
BIOL 2120 & 2120L	Principles of Biology II and Principles of Biology Laboratory II (F.S.)	4
BIOL 2550 & 2550L	Fundamentals of Human Anatomy and Fundamentals of Human Anatomy Laboratory	4-5
or BIOL 2560 & BIOL 2550L	Fundamentals of Human Physiology and Fundamentals of Human Anatomy Laboratory	
or BIOL 3130 & 3130L	Principles of Genetics and Genetics Laboratory	
or BIOL 3350 & 3350L	Principles of Human and Other Animal Physiology and Principles of Human and Other Animal Physiology Laboratory	
or BIOL 3500	Comprehensive Human Anatomy	
or BIOL 3510	Comparative Chordate Anatomy	
or BIOL 3650	Vertebrate Biology	
Note: BIOL 3500, 3510 and 3650 courses include labwork.		
BIOL 3560	Dendrology	3-4
or BIOL 3660	Plant Systematics	
or BIOL 4510	Plant Evolution and Phylogeny	
or BIOL 4540	Plant Anatomy	

GEOL 1020 & 1020L	History of the Earth and History of the Earth: Laboratory	3-4
or BIOL 3120	Ecology	
or BIOL 3150	Biological Evolution	
Total Credits		19-22

B. Art Core

DSNS 1310	Drawing I (F.S.)	4
ARTIS 2300	Drawing II (F.S.)	3
ARTIS 2330	Watercolor Painting (F.S.)	3
ARTIS 3080	Computer Modeling, Rendering and Virtual Photography (F.S.)	3
ARTIS 3300	Drawing III: Life Drawing (F.S.)	3
BPMI 3230	Scientific Illustration Principles and Techniques (F.)	3
BPMI 3260	Illustration and Illustration Software (S.)	3
BPMI 3270	Illustration as Communication (F.)	3
BPMI 3370	Application of Scientific Illustration Techniques (S.)	3
BPMI 4970	Illustration Internship	1
Total Credits		29

Beyond the core preparation, students must take 9 credits in the advanced science area and 12 credits in the advanced art area. The courses acceptable in these areas follow. Other courses in art and biological science may be acceptable. See BPMI advisors and/or the BPMI Advisory Committee.

C. Advanced Art Area

Select 12 total credits from below. At least 6 credits must be studio classes. Some courses can be considered either pre-med illustration or general art; speak with your advisor for guidance.

Pre-Med Illustration Area		
ARCH 3350	Three-Dimensional Studio	3
ARTIS 3300	Drawing III: Life Drawing	3
ARTIS 4080	Principles of 3D Animation	3
ARTIS 4300	Drawing IV (F.S.)	3
ARTIS 4310	Character and Scene Design	3
ARTIS 4320	Sequential Narrative Drawing	3
ARTIS 4750	Interactive Art	3
ARTIS 4820	Selected Topics in Studio Art	1-3
BPMI 3230	Scientific Illustration Principles and Techniques	3
BPMI 3260	Illustration and Illustration Software	3
BPMI 3370	Application of Scientific Illustration Techniques	3
BPMI 4900	Independent Study	1-3

BPMI 4910	Portfolio Design and Professional Development (S.)	2	AECL 4590	Mammalogy (S.)	2
BPMI 4940	Special Topics in Illustration	1-3	ANTHR 3070	Biological Anthropology (S.)	3
General Art Area			ANTHR 3190	Skeletal Biology (F.)	3
ARTIS 2130	Studio Fundamentals: Painting (F.S.)	2	ANTHR 4240	Forensic Anthropology (S.)	3
ARTIS 2270	Introduction to Creative Digital Photography	3	BBMB 3010	Survey of Biochemistry (S.SS.)	3
ARTIS 2380	Painting I (F.S.)	3	BIOL 3120	Ecology (F.SS.)	4
ARTIS 3290	Creative Photography	3	BIOL 2550	Fundamentals of Human Anatomy	4
ARTIS 3380	Painting II	3	& 2550L	and Fundamentals of Human Anatomy Laboratory	
ARTIS 3560	Relief Printmaking: Digital/Traditional	3-4	BIOL 2560	Fundamentals of Human Physiology	4
ARTIS 3570	Intaglio and Monotype Printmaking: Digital / Traditional	3-4	& 2560L	and Fundamentals of Human Physiology Laboratory	
ARTIS 3580	Lithography: Digital / Traditional	3	BIOL 3130L	Genetics Laboratory (F.S.)	1
ARTIS 4070	Principles of Character Animation	3	BIOL 3150	Biological Evolution (F.S.)	3
ARTIS 4090	Computer/Video Game Design and Development	3	BIOL 3280	Molecular and Cellular Biology of Human Diseases (F.)	3
ARTIS 4380	Painting III (F.S.)	3	BIOL 3360	Ecological and Evolutionary Animal Physiology	3
ARTIS 4730	Video Art	3	BIOL 3500	Comprehensive Human Anatomy (F.)	4
BPMI 3950	Field Illustration (S.SS.)	1-3	BIOL 3510	Comparative Chordate Anatomy	5
BPMI 4060X	Introduction to 3D Organic Modeling in ZBrush	3	BIOL 3530	Introductory Parasitology (S.)	3
BPMI 4700X	Data, Code, and Form	3	BIOL 3540	Animal Behavior (F.)	3
JLMC 3060	Broadcast Media Production (F.S.)	3	BIOL 3550	Plants and People (S.)	3
JLMC 3150	Digital Storytelling (F.S.)	3	BIOL 3560	Dendrology (F.)	3
STAT 3320	Visual Communication of Quantitative Information	3	BIOL 3640	Invertebrate Biology (F.)	3-4
D. Advanced Science Area			BIOL 3650	Vertebrate Biology (F.)	4
Select 9 credits total from below.			BIOL 3660	Plant Systematics (S.)	4
Pre-Med Illustration Science Area - required/recommended courses by most graduate schools			BIOL 3930A	North American Field Trips in Biology: Pre-trip Seminar	1
BBMB 3160	Principles of Biochemistry (F.)	3	or BIOL 3930B	North American Field Trips in Biology: North American Field trip	
BIOL 3130	Principles of Genetics (F.S.SS.)	3	BIOL 3940A	International Field Trips in Biology: Pre-trip Seminar	1
BIOL 3140	Principles of Molecular Cell Biology (F.S.)	3	or BIOL 3940B	International Field Trips in Biology: Field Trip to International Location	
BIOL 3350	Principles of Human and Other Animal Physiology (S.)	3	BIOL 4020	Introduction to Pathology	3
BIOL 3520	Vertebrate Histology (S.)	4	BIOL 4300	Principles of Plant Physiology	3
BIOL 4230	Developmental Biology (S.)	3	BIOL 4360	Neurobiology (F.)	3
BMS 3290	Anatomy and Physiology of Domestic Animals	3	BIOL 4510	Plant Evolution and Phylogeny	4
BMS 4480	Principles of Human Gross Anatomy	4	BIOL 4540	Plant Anatomy (F.)	4
GEN 3400	Human Genetics (F.S.SS.)	3	BIOL 4550	Bryophyte and Lichen Biodiversity	3
General Science Area			BIOL 4560	Principles of Mycology (F.)	3
AECL 3210	Fish Biology (S.)	3	BIOL 4740	Plant Ecology (S.)	3
AECL 3660	Natural History of Iowa Vertebrates (S.)	3	BIOL 4880	Identification of Aquatic Organisms (F.S.)	1
AECL 4570	Herpetology (F.)	2	BPMI 3950	Field Illustration (S.SS.)	1-3
AECL 4580	Ornithology (S.)	2			

DS 2010	Introduction to Data Science	3
DS 2020	Data Acquisition and Exploratory Data Analysis	3
ENT 3700	Insect Biology (F.)	3
ENT 3740	Insects and Our Health (S.)	3
GEOL 1020	History of the Earth	3
GEOL 1030	Age of Dinosaurs	1
GEOL 1080	Introduction to Oceanography	3
GEOL 1110	Geological Disasters	1
GEOL 1400	Climate and Society	3
GEOL 1600	Water Resources of the World	3
GEOL 3240	Energy and the Environment	3
GEOL 4120	Micropaleontology	3
GEOL 4150	Paleoclimatology	3
MICRO 3020	Biology of Microorganisms (F.S.SS.)	3
MICRO 3020L	Microbiology Laboratory (F.S.)	1
MICRO 3100	Medical Microbiology (F.)	3
MTEOR 2060	Introduction to Weather and Climate	3
MTEOR 3600	Ocean-Atmosphere Interactions	3
MTEOR 4040	Global Change	3
NREM 3010	Natural Resource Ecology and Soils (F.)	4
NREM 3300	Principles of Interpretation (S.)	3
PSYCH 3100	Brain and Behavior (F.S.)	3
VPTH 4010	Basics of Medical Terminology	1

As majors in the College of Liberal Arts and Sciences, Biological/Pre-Medical Illustration students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. You must also complete the LAS world language requirement and career proficiency requirement.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

Biological/Pre-Medical Illustration, B.A. 120 minimum credits required.

Freshman

Fall	Credits	Spring	Credits	Summer	Credits
LAS 1010		1 LIB 1600		1 Prepare application for BPMI entry / apply during second year	
ENGL 1500		3 Humanities		3 Consider taking a science course over the summer	
CHEM 1630		4 BIOL 2120		3

Humanities/ Social Elective	3 Humanities/ Social Sci/ Elective	3-6
BPMI 4970	1 Advance English or Elective (ENGL 3020 through ENGL 3160 count as Advanced English)	3
Advanced English or Elective	2-3	
12-18		12-19

Minor

A minor in biological/pre-medical illustration is offered. A minimum of 17 credits must be taken, including 8 credits in biological science courses and 9 credits in art and design courses. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

The biological sciences must include:

BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
BIOL 2120	Principles of Biology II	3
BIOL 2120L	Principles of Biology Laboratory II	1

The art and design courses must include:

BPMI 3230	Scientific Illustration Principles and Techniques	3
BPMI 3370	Application of Scientific Illustration Techniques	3
Advanced drawing, illustration, electronic media or painting course		3

For more information, contact the BPMI advisor or view the website listed above.

Biology

Interdepartmental Undergraduate Program

Iowa State University is a major center for research and education in the biological sciences. With over 200 faculty in the life sciences, students have the opportunity to learn from some of the nation's leaders in biological research and teaching and to participate in innovative,

meaningful research projects that explore frontiers of biology. Few other universities have such a wealth of faculty expertise available to undergraduate students, making Iowa State's Biology Program the logical choice for those who want to participate in a thriving academic community.

The faculties of the Department of Ecology, Evolution, and Organismal Biology and the Department of Genetics, Development, and Cell Biology jointly offer the undergraduate biology major. This high-quality academic program has the flexibility to accommodate a range of career goals while taking advantage of the university's strengths in science and technology. A bachelor's degree in biology provides excellent preparation for graduate study in biological disciplines ranging from the molecular to the ecological levels, and for entrance into various professional schools, such as human medicine, physical therapy, or veterinary medicine. The major is well suited for those who plan to teach biology, who wish to enter government or industrial employment in health or environmental professions, or who prefer educational breadth as an end in itself. By working with our professional advisors, it is possible to design a unique program of study that will meet student needs and objectives.

Students with special interests and aptitudes should consider combining biology with a minor or a second major in another subject, such as chemistry, environmental studies, journalism, mathematics, music, statistics, or many other subjects offered by the university.

Customizing a Degree

Biology encompasses an amazing diversity of disciplines and scales of study ranging from molecules to the biosphere. The biology major offers a rich variety of coursework addressing most of the areas of biology. The major's curriculum requirements offer tremendous flexibility in creating an individualized program of study to facilitate achievement of a student's career goals, while simultaneously assuring some exposure to all areas of biology and providing complementary knowledge from supporting courses in chemistry, physics, and math/statistics.

While flexibility is the hallmark of the biology major, the breadth of the field can also be challenging. Thus, in an effort to provide more guidance to students who desire such, the major also provides six advising tracks, or areas of specialization, for students who wish to focus on subfields of biology or who have specific career goals in mind. Course plans for each area of specialization are listed on the biology web site. The areas are:

Pre-medical and Human Health Professions—This area emphasizes preparation for further study in medical school or allied human health professions such as dentistry, optometry, genetic counseling, physical therapy, occupational therapy, physician assistant, nursing, chiropractic, and others. It also will prepare students for a broad range of careers in the biological sciences. Students are urged to determine the specific entrance requirements for the professional schools where they might

study and to plan a program of study accordingly, in addition to following the basic plan.

Pre-veterinary--An eventual degree in Veterinary Medicine can lead to a wide variety of careers, including private clinical practice in small animal medicine or agricultural animal production. But pre-veterinary students can also prepare themselves for careers in animal research, public health, laboratory animal medicine, food safety, regulatory medicine, and education. Specific requirements for entrance to the Iowa State Veterinary College or other schools should be consulted as programs of study are planned, in addition to following the basic plan.

Molecular and Cellular Biology--Students specializing in this field will explore the structure, function, and interactions of the molecules and sub-cellular features that make up living cells. This area is particularly designed for those who plan to pursue a career in research in molecular or cell biology or in related areas such as biochemistry, genetics, microbiology, developmental biology, human medicine, or veterinary medicine. Many students in this area will choose to go on to graduate school.

Ecology and Conservation Biology--Ecologists examine the interactions and relationships that living organisms have with each other and their environment. Conservation biologists study the nature and status of Earth's biodiversity with the aim of protecting species, their habitats, and ecosystems from excessive rates of extinction and loss. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Evolution and Biodiversity--This area provides students with a sound understanding of evolutionary principles and the biological patterns that result from evolutionary change. Students have the opportunity to explore, in depth, the biodiversity found within a wide range of groups of organisms. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Teacher licensure--Biology majors seeking recommendation for licensure to teach biology in secondary schools must meet requirements of the Teacher Education Program as well as those of the Biology Program. In addition, they must apply formally for admission to the teacher education program. See the section on Teacher Education for a list of licensure areas, degree requirements, and other information about this program.

Other Opportunities

Undergraduate research--Students who have interests in biological research are encouraged to become involved in the research projects of faculty members on campus. Those doing so may receive credit for the

experience in BIOL 4990 Undergraduate Research Experience. Making the effort to find a suitable research mentor and engaging in research work can be one of the most valuable experiences of an undergraduate education. Internship experiences are often available at other universities, zoos, museums, governmental and non-governmental entities focused on environmental issues, and industrial or government laboratories. Students participating in such projects may receive internship credit in BIOL 4940 Biology Internship.

Field trip courses -- The Biology Program offers two field trip courses: BIOL 3930 (North American Field Trips in Biology) and BIOL 3940 (International Field Trips in Biology). In recent years field trip opportunities to Honduras and Spain have been available. These courses involve a pre-trip seminar followed by one-week to one-month long field trip at a time when academic year classes are not in session. The classes are low enrollment and allow extensive interaction between instructors and students in locations of biological interest.

International experience--Because major discoveries in science often result from global efforts, biology majors are encouraged to include an international or study abroad component in their degree programs. This can be done by participating in international field trips originating from the ISU campus in BIOL 3940 International Field Trips in Biology. In addition, many students choose to study abroad, attending a university in another country for up to a year as an exchange student. Minors in a foreign language can also add an international emphasis to a degree in biology.

Courses Offered at Other Locations

In addition to biological science courses taught on campus, students may take courses at various remote locations and arrange to have the credits count toward the advanced courses required in the biology major. Attending a summer field station adds an important component to an undergraduate program of study.

Gulf Coast Research Laboratory--The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for marine biology courses and transfer credit to their degree programs under the number BIOL 4800 Studies in Marine Biology. Written permission of the Biology Program Director is required for this arrangement.

Summer Biological Field Stations--Courses taken at summer field stations may be transferred to Iowa State University as credit in BIOL 4810 Summer Field Studies. Such stations are found throughout the country and often offer courses that emphasize the adaptation of plants and animals to unique environments. See www.biology.iastate.edu (<http://www.biology.iastate.edu/>) for links to Iowa Lakeside Laboratory and other field stations in different biomes, e.g., marine/coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mts., etc.

Organization for Tropical Studies—Iowa State students may register for courses in tropical biology taught in Costa Rica by the Organization for Tropical Studies. Credit is transferred to Iowa State as BIOL 4820 Tropical Biology. For further information, contact the Biology Student Services Office in 103 Bessey Hall.

Student Learning Outcomes

Upon graduation, students should be able to:

- Explain and apply the core biological concepts of:
 - Evolution
 - Structure and function
 - Information flow, exchange, and storage
 - Pathways and transformations of energy and matter
 - How systems are interconnected and interact:
- Apply the process of science.
- Use quantitative reasoning.
- Use modeling and simulation.
- Utilize, communicate with, and collaborate with other disciplines.
- Understand the relationship between science and society.

Undergraduate Study

Biology majors start their studies in the biological sciences by taking a two-semester long Principles of Biology course sequence:

BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
BIOL 2120	Principles of Biology II	3
BIOL 2120L	Principles of Biology Laboratory II	1

During the first year, students also take BIOL 1100 Introduction to Biology and BIOL 1110 Opportunities in Biology, which are half-semester courses designed to introduce the student to the discipline of biology and opportunities for careers in biology. Students transferring into the biology major take BIOL 1120 in place of BIOL 1100 and BIOL 1110.

Students then explore, in any order depending on their interests, four upper-level core courses including: concepts of ecology in BIOL 3120; the principles of genetics in BIOL 3130 and BIOL 3130L; cell and molecular biology in BIOL 3140; and evolutionary biology in BIOL 3150. Biology majors must take an additional 21 credits of advanced biological science courses at the 3000 level, or above, from an approved list of courses. Many of these courses have as prerequisites BIOL 2110/L and BIOL 2120/L, so students do not need to complete the four upper-level core courses before taking advanced courses. Of these advanced courses, at least 9 credits must be taken as BIOL courses, and a minimum of two laboratory or field courses must also be included from an approved list.

Biology majors should carefully consider their selection of upper-level courses to allow them to emphasize one, or more, of the sub-disciplines of Biology relevant to their post-baccalaureate objectives. Most biology courses numbered 3000 or above can be used to satisfy the additional credit requirement. Some courses taught in other departments can also be applied to the biology major. Advanced students should consider including 5000 level courses in their programs. The Biology Program's web site has a complete listing of acceptable upper-level life science courses.

Biology majors must demonstrate competency in their understanding of the biological sciences. A 2.0 cumulative average is required in biology and advanced biology coursework. In order to graduate, a student must have a cumulative average in the major of at least 2.00.

General requirements

Students may earn the B.S. degree in Biology from either the College of Liberal Arts and Sciences or from the College of Agriculture and Life Sciences. Students in the College of Liberal Arts and Sciences must fulfill the College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated for the major. Students in the College of Agriculture and Life Sciences must meet University-wide requirements for graduation and requirements for that college. Contact the Student Services Office for details regarding differences in general education and course requirements that are specific to these colleges.

Supporting course requirements – Understanding biology requires a basic understanding of the physical sciences and mathematics. Consequently, a minimum number of credits in general chemistry, organic chemistry, biochemistry, and physics is required. See the Biology Program Web Site for specific supporting science requirements.

The Math requirement is competency based. After demonstrating competency in algebra and trigonometry, biology majors must take two semesters of calculus; or two semesters of Statistics; or one semester of calculus and one semester of Statistics chosen from a list of approved courses available on the Biology Program Web Site and in the Biology Program Office.

Given the important role of communications in the modern sciences, biology majors must demonstrate communication competency by earning a minimum of C in ENGL 2500 Written, Oral, Visual, and Electronic Composition or equivalent composition courses and in one advanced writing course numbered ENGL 3020 through ENGL 3160, or JLMC 3470, or SPCM 2120. (Students in the College of Agriculture and Life Sciences are required to earn a C or better in ENGL 1500, as well.)

Curriculum in Biology

Administered by the Departments of Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology. Students should consult the Biology Student Services Office, 103 Bessey (or biology@iastate.edu) for the appropriate course selections for professional or graduate school preparation.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Biology: 23.5 cr.

2.00 GPA average required.

BIOL 1100	Biology Major Orientation	1
BIOL 1110	Opportunities in Biology	0.5
BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
BIOL 2120	Principles of Biology II	3
BIOL 2120L	Principles of Biology Laboratory II	1
BIOL 3120	Ecology	4
BIOL 3130	Principles of Genetics	3
BIOL 3130L	Genetics Laboratory	1
BIOL 3140	Principles of Molecular Cell Biology	3
BIOL 3150	Biological Evolution	3
Total Credits		23.5

Advanced Biology: 21 cr.

2.00 GPA average required. Must include two approved Advanced Biology labs. See the Biology Program website for list of approved Advanced Biology courses, or consult an advisor in the Biology Student Services office, 103 Bessey Hall.

Biology advanced courses (from approved list)	9
Additional approved biology advanced courses	12
Total Credits	21

Mathematical Sciences 7 cr.

Students in College of Agriculture and Life Sciences must have a Math and Statistics.

MATH 1600 or MATH 1650 and STAT 1010 or STAT 1040	
Or	
MATH 1650	Calculus I
& MATH 1660	and Calculus II
Or	
STAT 1010 or STAT 1040 and STAT 3010	4-7

Physical Sciences

U.S. Diversity: 3 cr.

Communication/Information Literacy

Students must earn a C or better in ENGL 2500 and the advanced communication course. Additionally, students in the College of Agriculture and Life Sciences must earn a C or better in ENGL 1500. Students should consult their advisor to discuss advanced communication course options other than SPCM 2120.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
LIB 1600	Introduction to College Level Research	1
SPCM 2120	Fundamentals of Public Speaking	3

Total Credits	10

Humanities and Social Sciences

Chosen from approved lists.

LAS - Biology

Note: Students must have completed 3 years of a single world language or take 4-8 credits of university level world language.

Humanities	12
Social Sciences	9
Career Preparation (LAS 2030)	1
Total Credits	22

Humanities and Social Sciences

Chosen from approved lists.

CALS - Biology

Note: Students in CALS - Biology must take an approved speech course and an approved Math and Statistics course.

Humanities	3
Social Sciences	3
Ethics	3
Total Credits	9

Biology Teacher Preparation Focus

Biology majors seeking certification to teach Biology in secondary schools follow the requirements of the B.S. degree in Biology. In addition, they must take the complementary coursework listed below and meet all of the requirements of the Secondary Major in Education including EDUC 4170, student teaching.

Complementary Coursework

PSYCH 2300	Developmental Psychology	3
EDUC 4180	Secondary Science Methods I	3
EDUC 4190	Secondary Science Methods II	3
One course in American History or Government		3

Some students decide to complete the biology major and continue their studies as graduate students in Iowa State's Science Education, Masters of Teaching (M.A.T.) program (<https://education.iastate.edu/graduate-students/graduate-programs/division-of-teaching-learning-leadership-and-policy/educator-prep-programs-for-licensure-recommendation/science-education-m-a-t/>).

Note: Teacher license requirements are established by the Iowa Department of Education and the Iowa Board of Educational Examiners and are subject to change. Recent changes may not be reflected in this catalog, but advisers and faculty will be aware.

Total Credits: 120.5-121.5

This is only a suggested outline plan. Students may choose or be forced to deviate from this plan to satisfy unmet requirements, for scheduling reasons, or to add a minor or double major. We strongly suggest student involvement in internships, study abroad, summer field stations, Iowa Lakeside Lab, Field Trips in Biology or research opportunities at ISU. These will enhance your program of study but may add credits or time to your degree plan.

* Students should meet with a Biology Program advisor to determine the proper plans for chemistry, math and physics before selecting those options above.

Biology, B.S. (College of Liberal Arts and Sciences)

Pre-Medical Sample Plan

Please note that professional school requirements vary by program.

Freshman					
Fall	Credits	Spring	Credits	Summer	Credits

Total Credits: 120.5-123.5**Minor**

A minor in Biology is offered by the Biology Program. The minor requires 15 credits in Biology and includes the completion of the specific courses listed below and 7 credits in biology courses numbered 3000 or above. Nine (9) credits of the required courses must apply only to the minor. For more information, see the Biology Program web site or contact the Student Services Office in 103 Bessey Hall.

BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
BIOL 2120	Principles of Biology II	3
BIOL 2120L	Principles of Biology Laboratory II	1
Total Credits		8

Graduate Programs

Biology is an undergraduate major only. Persons interested in graduate study in the biological sciences should apply directly to one of the life science graduate programs at Iowa State University.

Programs

- Bioinformatics and Computational Biology
- Ecology and Evolutionary Biology
- Genetics
- Molecular Cellular and Developmental Biology
- Neuroscience
- Plant Biology
- Toxicology
- Immunobiology
- Environmental Science

Interdisciplinary Graduate Studies

A non-thesis master's degree in Interdisciplinary Graduate Studies (biological sciences) has been established particularly for those who wish to have a more diversified program of advanced study than that generally permitted by specific departments and programs.

Chemistry Overview

The department of Chemistry offers Bachelor of Science and Bachelor of Arts degrees in Chemistry in the College of Liberal Arts and Sciences.

Graduates holding the B.S. degree in Chemistry qualify in many fields as: teachers of Chemistry, supervisors in industry, technical sales personnel, and research chemists in federal, state, municipal, academic, or industrial laboratories. Students with high scholastic standing often continue with graduate work, where they may explore more thoroughly the specialized areas of chemistry in which they are interested.

The B.A. degree is useful for students who intend to pursue studies in parallel areas, such as secondary school teaching, to obtain additional majors, minors, or for pursuing professional school (such as medical, dental, or pharmacy school) outside of Chemistry. The B.S. degree is recommended for students who wish to pursue graduate studies or a research career in Chemistry.

Student Learning Outcomes

Upon graduation students should:

- Have firm foundations in the fundamentals and application of current chemical theories.
- Be able to design, carry-out, record, and analyze the results of chemical experiments.

- Use modern instrumentation and classical techniques to identify and solve chemical problems as well as explore new areas of research.
- Communicate the results of their work to chemists, as well as non-chemists.
- Understand the ethical and environmental dimensions of problems and issues facing chemists.
- Follow the proper procedures and regulations for safe storage, labeling, use of chemicals, and disposal of chemicals.
- Be able to use chemical literature (perform searches for, read, evaluate, and appropriately cite publications)
- Be skilled in problem solving, critical thinking, and analytical reasoning.

These skills may be applied to careers in education and industry; in professions such as law, medicine, environmental sciences, and forensic sciences. The curricula in Chemistry are approved by the American Chemical Society (ACS). Students who complete the program obtain an ACS certified baccalaureate degree provided they also take one Biochemistry course, typically BBMB 3010 Survey of Biochemistry, BBMB 3160 Principles of Biochemistry or BBMB 4040 Biochemistry I and (<http://catalog.iastate.edu/azcourses/bbmb/>)BBMB 4050 Biochemistry II.

Liberal arts majors who wish to transfer into Chemistry at the end of their second year may still complete all degree requirements and graduate within five years.

Degree Requirements

As majors in the College of Liberal Arts and Sciences, Chemistry students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated below for the major.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. You must also complete the LAS world language requirement and career proficiency requirement.

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500. The department requires a grade of C- or better in ENGL 3140.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

Chemistry, B.S.

Undergraduate students seeking the Bachelor of Science (B.S.) degree in Chemistry have the following courses in their degree programs as minimum requirements.

CHEM 1770 & CHEM 1780	General Chemistry I and General Chemistry II or CHEM 2010 Advanced General Chemistry or CHEM 1670 General Chemistry for Engineering Students	4-7
CHEM 1770L or CHEM 1770M or CHEM 2010L or CHEM 1670L	Laboratory in General Chemistry I Laboratory in General Chemistry I Laboratory in Advanced General Chemistry Laboratory in General Chemistry for Engineering	1
CHEM 2110	Quantitative and Environmental Analysis	2
CHEM 2110L	Quantitative and Environmental Analysis Laboratory	2
CHEM 3010	Inorganic Chemistry	2
CHEM 3160	Instrumental Methods of Chemical Analysis	2
CHEM 3160L	Instrumental Analysis Laboratory	2
CHEM 3220L	Laboratory in Physical Chemistry	3
CHEM 3240	Introductory Quantum Mechanics	3
CHEM 3250	Chemical Thermodynamics	3
CHEM 3310	Organic Chemistry I	3
CHEM 3320	Organic Chemistry II	3
CHEM 3310L or CHEM 3330L	Laboratory in Organic Chemistry I Laboratory in Organic Chemistry I (for Chemistry and Biochemistry Majors)	1
CHEM 3320L or CHEM 3340L	Laboratory in Organic Chemistry II Laboratory in Organic Chemistry II (for Chemistry and Biochemistry Majors)	1
CHEM 4020	Advanced Inorganic Chemistry	3
CHEM 4010L	Inorganic Chemistry Laboratory	1
Two advanced Chemistry courses (min 4 credits)		4-6
CHEM 3990 Undergraduate Research or CHEM 4990 Senior Research is strongly recommended. Credits earned in 3990/4990/4900 may only be used to meet one of the advanced course requirements.		
The following are required as supporting work:		
ENGL 1500	Critical Thinking and Communication	3
ENGL 2500 or ENGL 2500H	Written, Oral, Visual, and Electronic Composition Written, Oral, Visual, and Electronic Composition: Honors	3
ENGL 3140	Technical Communication	3
LIB 1600	Introduction to College Level Research	1
LAS 2030	Professional Career Preparation	1

MATH 1650	Calculus I	4
MATH 1660	Calculus II	4
MATH 2650	Calculus III	4
PHYS 2310	Introduction to Classical Physics I	4
PHYS 2310L	Introduction to Classical Physics I Laboratory	1
PHYS 2320	Introduction to Classical Physics II	4
PHYS 2320L	Introduction to Classical Physics II Laboratory	1

Chemistry, B.A.

Undergraduate students seeking the Bachelor of Arts (B.A) degree in Chemistry have the following courses in their degree programs as minimum requirements.

One of the following sequences: 6-8

CHEM 1770	General Chemistry I	
& CHEM 1780	and General Chemistry II	
or CHEM 201	Advanced General Chemistry	
or CHEM 167	General Chemistry for Engineering Students	
CHEM 1770L	Laboratory in General Chemistry I	1
or CHEM 1770N	Laboratory in General Chemistry I	
or CHEM 2010L	Laboratory in Advanced General Chemistry	
or CHEM 1670L	Laboratory in General Chemistry for Engineering	
CHEM 2110	Quantitative and Environmental Analysis	2
CHEM 2110L	Quantitative and Environmental Analysis Laboratory	2
CHEM 3010	Inorganic Chemistry	2
CHEM 3160	Instrumental Methods of Chemical Analysis	2
CHEM 3160L	Instrumental Analysis Laboratory	2
CHEM 3240	Introductory Quantum Mechanics	3
CHEM 3210L	Laboratory in Physical Chemistry	2-3
or CHEM 3220L	Laboratory in Physical Chemistry	
CHEM 3250	Chemical Thermodynamics	3
CHEM 3310	Organic Chemistry I	3
CHEM 3310L	Laboratory in Organic Chemistry I	1
CHEM 3320	Organic Chemistry II	3
CHEM 3320L	Laboratory in Organic Chemistry II	1
The following are required as supporting work:		12
ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
or ENGL 2500H	Written, Oral, Visual, and Electronic Composition: Honors	
ENGL 3140	Technical Communication	3
LIB 1600	Introduction to College Level Research	1
LAS 2030	Professional Career Preparation	1

MATH 1650	Calculus I	4
MATH 1660	Calculus II	4
PHYS 2310	Introduction to Classical Physics I	4
PHYS 2310L	Introduction to Classical Physics I Laboratory	1
PHYS 2320	Introduction to Classical Physics II	4
PHYS 2320L	Introduction to Classical Physics II Laboratory	1

Teacher Preparation Focus

Chemistry majors seeking certification to teach Chemistry in secondary schools can follow the requirements of either the B.S. or the B.A. degree in Chemistry. In addition, they must take the complementary coursework listed below and meet all of the requirements of the Secondary Major in Education.

Complementary Coursework

PSYCH 2300	Developmental Psychology	3
EDUC 4180	Secondary Science Methods I	3
EDUC 4190	Secondary Science Methods II	3

One course in Biology (BIOL 2110 & 2110L recommended)

One course in American History or Government

Note: Teacher license requirements are established by the Iowa Department of Education and the Iowa Board of Educational Examiners and are subject to change. Recent changes may not be reflected in this catalog, but advisers and faculty will be aware.

¹ Advanced high school chemistry and strong algebra skills are necessary for success in CHEM 2010. Math ACT of 24 or greater is strongly recommended.

² Students may substitute the following courses, if necessary.

- CHEM 2010 for 1770 and 1780;
- CHEM 1770L for 1770N or 2010L.
- CHEM 3310L and 3320L for 3330L and 3340L; however, this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.
- CHEM 3210L for 3220L; however this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.
- PHYS 1310/1310L and 1320/1320L for PHYS 2310/2310L and 2320/2320L, however PHYS 2310/2310L and 2320/2320L are highly recommended.

³ Required of Chemistry Learning Community Members.

⁴ Completion of three years of foreign language in high school fulfills this requirement.

F Class offered Fall Semester only.

S Class offered Spring Semester only.

Individuals earning a B.A. degree in Chemistry who have taken 3310L, 3340L and 3220L can obtain American Chemical Society certification by taking an additional advanced chemistry lecture course of BBMB 3010 or 4040. CHEM 5500 may not be used to satisfy the Advanced Chemistry requirement.

- CHEM 3310L and 3320L for 3330L and 3340L; however, this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.

³ Completion of three years of foreign language in high school fulfills this requirement.

⁴ The completion of two courses (minimum of 2 credits each) are required to meet this requirement. (In addition to advanced Chemistry courses, certain courses in Biochemistry-Biophysics, Chemical Engineering, Computer Science, Mathematics and Materials Science and Engineering are acceptable.) Up to four credits in undergraduate research (CHEM 3390 and/or 4990) can be counted as one of the two advanced chemistry courses. CHEM 5500 may not be used to satisfy the Advanced Chemistry requirement.

⁵ The program as listed above meets the standard for a certified degree of the American Chemical Society's Committee on Professional Training if BBMB 3010 or 4040 is one of the Advanced Chemistry Courses.

F Class offered Fall Semester only.

S Class offered Spring Semester only.

Chemistry Minor

The Department offers a minor in chemistry which may be earned by credit in:

CHEM 1770	General Chemistry I	4
CHEM 1770L	Laboratory in General Chemistry I	1
or		
CHEM 1670 & 1670L	General Chemistry for Engineering Students and Laboratory in General Chemistry for Engineering	5
CHEM 1780	General Chemistry II	3
CHEM 2110	Quantitative and Environmental Analysis	2
CHEM 2110L	Quantitative and Environmental Analysis Laboratory	2
CHEM 3240	Introductory Quantum Mechanics	3
CHEM 3310 & CHEM 3320	Organic Chemistry I and Organic Chemistry II	3-6
	or CHEM 2310 Elementary Organic Chemistry	
CHEM 3310L & CHEM 3320L	Laboratory in Organic Chemistry I and Laboratory in Organic Chemistry II	1-2
	or CHEM 2310L Laboratory in Elementary Organic Chemistry	
And one of the following:		2-5
CHEM 3010	Inorganic Chemistry	
CHEM 3160 & 3160L	Instrumental Methods of Chemical Analysis and Instrumental Analysis Laboratory	
CHEM 3250 & CHEM 3210L	Chemical Thermodynamics and Laboratory in Physical Chemistry	
	or CHEM 3220 Laboratory in Physical Chemistry	
CHEM 3320 & 3320L	Organic Chemistry II and Laboratory in Organic Chemistry II	

The total minimum credits in Chemistry thus will be 20 to 23 depending on which advanced courses are selected. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

The concurrent Chemistry/MBA program is designed to be completed in five academic years, with three years of undergraduate coursework followed by two years of MBA studies alongside the remaining undergraduate courses.

Concurrent students are part of the full-time MBA program. Admission to the concurrent MBA program is competitive. You should apply during your junior year. Successful candidates demonstrate superior academic ability, strong leadership attributes, and clear career focus. Previous business coursework is not a requirement for application.

Internships, co-op experiences, extracurricular, and leadership activities are highly valued in the MBA candidate selection process. However, you aren't required to have additional coursework in business in preparing for the MBA.

Admitted students typically have a cumulative GPA of 3.00 or above and have scored 600 or higher on the GMAT exam or GRE equivalent. If you're interested in the concurrent MBA program, you should apply by **March 15** of your junior year to be considered for scholarships and assistantships. The final application deadline is June 1.

Graduate Programs

The Department offers work for the degrees Master of Science and Doctor of Philosophy with majors in Chemistry, Analytical, Inorganic, Organic, and Physical Chemistry. Co-majors may be taken between areas within Chemistry or between one of the areas in Chemistry and another department. Courses in other areas of Chemistry as well as courses in other departments may be used to satisfy the requirement for coursework outside the major field. A Ph.D. student in Chemistry may choose an additional specialty in one of six areas: Materials Chemistry, Industrial Chemistry, Biomolecular Sciences, Chemistry Education, Chemical Instrumentation, and Forensic Chemistry. A minimum of ten credits is required for each additional specialty. A course which counts towards an additional specialty may also count toward the outside course requirement. A minor in Chemistry is available to students in other departments. The Department participates in the interdepartmental major in Toxicology.

The Department of Chemistry requires all graduate students majoring in Chemistry to teach as part of their training for an advanced degree. Prerequisite to major graduate work is the completion of undergraduate work in Chemistry, Mathematics, and Physics substantially equivalent to that required of undergraduate Chemistry majors at this institution.

Classical Studies

The cross-disciplinary Classical Studies Program engages students with the civilizations of ancient Greece and Rome and their influence, both past and present, on western and world cultures. The Classical Studies minor and Interdisciplinary Studies major include an integrated curriculum of courses in the cultures, literatures, history, archaeology, and art of ancient Greece and Rome from prehistoric times to the reign of the Emperor Constantine. Students also study Elementary Latin. Current information about the Program may be found at: <http://language.iastate.edu/academic-programs/classical-studies/>. (<http://language.iastate.edu/academic-programs/classical-studies/>)

Courses in Classical Studies provide background and a classical context for students whose major fields of study or career interests include History, Anthropology, English, World Languages and Cultures, Philosophy, Women's and Gender Studies, material culture, law, medicine, political science, the life sciences, and related fields.

Students interested in pursuing an Interdisciplinary Studies major or minor in Classical Studies should meet with an academic advisor

in the Department of World Languages and Cultures (<https://language.iastate.edu/advising/>) and the Classical Studies Program director (<https://language.iastate.edu/directory/#clst>).

(Note: neither this major nor minor prepares students for graduate study in Classical Studies.)

Student Learning Outcomes

Upon the completion of their program of study, students with an interdisciplinary studies major in Classical Studies will demonstrate proficiency in three goal areas: Knowledge and Evidence, Interdisciplinarity, and Cross-Cultural Literacy.

1. Knowledge and Evidence: acquisition and communication of knowledge about the ancient Greco-Roman world through the use, critical evaluation, and contextualization of diverse bodies of evidence.
2. Interdisciplinarity: integration of subdisciplines and other fields and their methodologies to understand the complexities and limitations of various bodies of evidence and connect texts and artifacts to their cultural contexts.
3. Cross-Cultural Literacy: meaningful and creative engagement with multiple perspectives, ability to think from the perspective of a different value system and imagine different everyday experiences and different social norms.

Interdisciplinary Studies Major in Classical Studies (CL ST)

Students interested in pursuing an Interdisciplinary Studies major in Classical Studies should consult the Program Chair (see "Program Faculty" at <https://language.iastate.edu/classical-studies/>) or an Academic Advisor in the Department of World Languages and Cultures (<https://language.iastate.edu/advising/>).

Required Latin Languages Courses (6 Credits)

(1000-level courses cannot count toward major credit requirements.)		
LATIN 1010	Elementary Latin I	3
LATIN 1020	Elementary Latin II	3

The major requires 36 credits and permits great flexibility while maintaining academic rigor, breadth, and focus. Many courses are cross listed with those in other departments (see course descriptions, below).

A. Required Foundation Course: (3 credits)

CLST 2730	Greek and Roman Mythology	3
or CLST 2750	The Ancient City	

B. Required Ancient History Courses: (6 credits)

CLST 4020	Greek Civilization	3
CLST 4030	Roman Civilization	3

C. Additional Courses: Students must take at least 27 credits chosen from a, b, and c below (or approved by the Program Committee), with a minimum of 3 credits from each section (not including the course used for the Required Foundation Course).

a) Material Culture and Art: (at least 3 credits)

CLST 3690	Ancient Egypt	3
CLST 3760A	Classical Archeology: Bronze Age and Early Iron Age Greece	3
CLST 3760B	Classical Archeology: Archaic through Hellenistic Greece (ca 700-30 BCE)	3
CLST 3760C	Classical Archaeology: Roman Archaeology (ca 1000 BCE-400 CE)	3
CLST 3830	Greek and Roman Art	3
CLST 3840	Roman Italy: An Introduction	2
CLST 3850	Study Abroad: Roman Italy: Building the Empire	3
CLST 3940	The Archaeology of Greece: An Introduction	2
CLST 3950	Study Abroad: The Archaeology of Greece	2-6

b) Literature: (at least 3 credits)

CLST 3530	World Literature: Western Foundations through Renaissance	3
CLST 3720	Greek and Roman Tragedy and Comedy	3
CLST 3730	Heroes of Greece, Rome, and Today	3

c) Cultural Studies: (at least 3 credits)

CLST 2730	Greek and Roman Mythology	3
CLST 2750	The Ancient City	3
CLST 3100	Ancient Philosophy	3
CLST 3500	Rhetorical Traditions	3
CLST 3670	Christianity in the Roman Empire	3
CLST 3680	Religions of Ancient Greece and Rome	3
CLST 3740	Sex, Gender, and Culture in the Ancient Mediterranean World	3
CLST 4300	Foundations of Western Political Thought	3
CLST 4800	Seminar in Classical Studies	3
CLST 4900	Independent Study	1-6
LATIN 4900	Independent Study	1-6
CLST 5120A	Readings Seminar in European History: Ancient	3
CLST 5300	Foundations of Western Political Thought	3
CLST 5940A	Research Seminar in European History: Ancient	3

Notes

1. The list of acceptable courses may include courses not currently in the list above. Contact the Classical Studies Program director for information on eligible courses.

2. The general requirements for the Interdisciplinary Studies major in the College of Liberal Arts and Sciences must be met. All courses in the major must be at the 2000-level or higher. At least 15 credits must be at the 3000-level or higher with at least 6 credits at the 4000-level or higher. An average grade of C or better must be earned in 15 credits at the 3000-level or higher in the major.

3. Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500 Written, Oral, Visual, and Electronic Composition (or ENGL 2500H Written, Oral, Visual, and Electronic Composition: Honors). In addition, the Department requires a grade of C or better in any course numbered between 3500 and 3790 in Classical Studies.

4. LATIN 4900 Independent Study (1-6 credits, repeatable up to 9 credits): This option will only occasionally be available and only to students who have successfully completed intermediate-level Latin coursework elsewhere.

As majors in the College of Liberal Arts and Sciences, Interdisciplinary Studies students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. You must also complete the LAS world language requirement and career proficiency requirement.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

Minor in Classical Studies

The minor in Classical Studies requires 18 credits: 6 credits of Latin and 12 credits of CLST courses taught in English. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

a) The following set of courses in Latin: (6 credits)

LATIN 1010	Elementary Latin I	3
LATIN 1020	Elementary Latin II	3

b) One of the following introductory courses: (3 credits)

CLST 2730	Greek and Roman Mythology (or)	
CLST 2750	The Ancient City	

c) One course in ancient history from those listed below or approved by the program committee: (3 credits)

CLST 4020	Greek Civilization	

CLST 4030	Roman Civilization	
d) Two additional courses (not used to meet other CL ST minor requirements) from those listed below or approved by the program committee: (6 credits)		6
One of these classes (3 crs) must be at the 3000-level or above.		
CLST 2730	Greek and Roman Mythology	
CLST 2750	The Ancient City	
CLST 3100	Ancient Philosophy	
CLST 3500	Rhetorical Traditions	
CLST 3530	World Literature: Western Foundations through Renaissance	
CLST 3670	Christianity in the Roman Empire	
CLST 3680	Religions of Ancient Greece and Rome	
CLST 3690	Ancient Egypt	
CLST 3720	Greek and Roman Tragedy and Comedy	
CLST 3730	Heroes of Greece, Rome, and Today	
CLST 3740	Sex, Gender, and Culture in the Ancient Mediterranean World	
CLST 3760A	Classical Archeology: Bronze Age and Early Iron Age Greece	
CLST 3760B	Classical Archeology: Archaic through Hellenistic Greece (ca 700-30 BCE)	
CLST 3760C	Classical Archaeology: Roman Archaeology (ca 1000 BCE-400 CE)	
CLST 3830	Greek and Roman Art	
CLST 3840	Roman Italy: An Introduction	
CLST 3850	Study Abroad: Roman Italy: Building the Empire	
CLST 3940	The Archaeology of Greece: An Introduction	
CLST 3950	Study Abroad: The Archaeology of Greece	
CLST 4020	Greek Civilization	
CLST 4030	Roman Civilization	
CLST 4300	Foundations of Western Political Thought	
CLST 4800	Seminar in Classical Studies	
CLST 4900	Independent Study	
CLST 5120A	Readings Seminar in European History: Ancient	
CLST 5300	Foundations of Western Political Thought	
CLST 5940A	Research Seminar in European History: Ancient	
LATIN 4900	Independent Study	

Climate Science

Climate impacts global environmental and ecological systems, human health, water availability, agricultural systems and food security, human migrations, and economic systems. Future climate change is projected

to further worsen food insecurity, water scarcity, human migrations, and global conflict.

This major is designed to give the students a solid foundation on how the climate system works and competency in areas of data analysis, planning and mitigation, and science communication. Students will take core courses in climate science and complementary areas and select at least one focus area for additional specialization. Focus areas includes: advanced climate science; data visualization; design and planning for sustainability; food, agriculture and biodiversity; policy and human behavior; and science communication.

Student Learning Outcomes:

Graduates of the Climate Science degree will have the skills and knowledge to:

1. Understand scientific principles and their application to scientific inquiry and to societal concerns relating to climate science.
2. Demonstrate a broad understanding of the climate system, how it works on multiple timescales, and the utility of tools, such as models, and their strengths and limitations in the context of climate science.
3. Demonstrate a broad understanding of climate issues and policies.
4. Think critically about the range of climate information, data, and literature coming from a variety of sources and distill application-relevant knowledge.
5. Demonstrate proficiency in data analysis and problem-solving of relevant climate systems, issues, and challenges.
6. Understand societal concerns related to climate change to develop and/or promote practical and applied research within the climate change research community.
7. Work with diverse teams whose members have a range of professional and disciplinary skills relevant to climate issues.
8. Work to identify climate-related needs and develop strategies to address these needs.
9. Use systems thinking approaches to better understand/solve climate change issues.
10. Effectively communicate in oral, written, and visual formats.

Climate Science Core Curriculum

CRP 2930	Environmental Planning	3
or MATE 2200 Globalization and Sustainability		
ECON 3800	Energy, Environmental and Resource Economics	3
GEOL 1000	How the Earth Works	3
or GEOL 1010 Environmental Geology: Earth in Crisis		
GEOL 1000L	How the Earth Works: Laboratory	1
GEOL 3240	Energy and the Environment	3
GEOL 4150	Paleoclimatology	3

JLMC 3470	Science Communication	3
MTEOR 1400	Climate and Society	3
MTEOR 2060	Introduction to Weather and Climate	3
MTEOR 3600	Ocean-Atmosphere Interactions	3
MTEOR 4040	Global Change	3
Capstone Choice		2
Total Credits		33

Required Supporting Courses

CHEM 1630	College Chemistry	5-6
& 1630L	and Laboratory in College Chemistry *	
or CHEM 1670	General Chemistry for Engineering Students	
& 1670L	and Laboratory in General Chemistry for Engineering	
or CHEM 2010	Advanced General Chemistry	
& 2010L	and Laboratory in Advanced General Chemistry	
ECON 1010	Principles of Microeconomics	3
MATH 1600	Survey of Calculus (MATH 1650 required for Advanced Climate Science Pathway)	4
or MATH 1650	Calculus I	
PHYS 1310	General Physics I	5
& 1310L	and General Physics I Laboratory	
or PHYS 2310	Introduction to Classical Physics I	
& 2310L	and Introduction to Classical Physics I Laboratory	
STAT 3050	Engineering Statistics	3
or STAT 1010	Principles of Statistics	
or STAT 1040	Introduction to Statistics	
Total Credits		20-21

* Students with previously earned credit for CHEM 1770 and CHEM 1770L may use it to meet this requirement.

Pathway Requirement

Students must complete one specialized pathway. All pathways require at least 15 credits; students choosing the Advanced Climate Science Pathway will complete 20 credits. All pathways require 9 credits at the 3000-level or higher. Students are encouraged to carefully review course prerequisites when planning course selections in their chosen pathways.

- Advanced Climate Science
- Data Visualization
- Design and Planning for Sustainability
- Food, Agriculture and Biodiversity
- Policy and Human Behavior
- Science Communication

Advanced Climate Science

Advanced Climate Science requires MATH 1660; PHYS 1320 or PHYS 2320; plus 12 credits from the choices listed. The pathway requires 9 credits at the 3000-level or higher.

MATH 1660	Calculus II	4
PHYS 1320	General Physics II	4
or PHYS 2320	Introduction to Classical Physics II	
12 credits from the following:		
AGRON 4050	Soil-Plant-Animal-Atmosphere Physics	3
AGRON 4060	World Climates	3
GEOL 4020	Watershed Hydrology	3
GEOL 4110	Hydrogeology	4
GEOL 4520	Intro GIS for Geoscientists (or other advanced GIS course such as GEOL 4880)	3
GEOL 4680	Applied Geostatistics for Geoscientists	3
GEOL 4740	Glacial and Quaternary Geology	3
GEOL 4790	Surficial Processes	3
GEOL 4830	Environmental Biogeochemistry	3
GEOL 4890	Survey of Remote Sensing Technologies	3
MTEOR 2270	Computational Meteorology I (or other computer programming course such as GEOL 5590)	3
MTEOR 3010	General Meteorology	4
MTEOR 3410	Atmospheric Physics I	3
MTEOR 4080X	Numerical Weather and Climate Prediction	3
MTEOR 4520	Climate Modeling	3

Data Visualization

Data Visualization requires 15 credits from the choices listed. The pathway requires 9 credits at the 3000-level or higher.

ARCH 4390	Computational Design Theory	3
ARTIS 2120	Studio Fundamentals: Digital Media	3
ARTIS 3080	Computer Modeling, Rendering and Virtual Photography	3
ARTIS 4080	Principles of 3D Animation	3
ARTIS 4700X	Data, Code, and Form	3
ARTIS 4730	Video Art	3
ARTIS 4750	Interactive Art	3
CRP 2510	Fundamentals of Geographic Information Systems	3
CRP 3510	Intermediate Geographic Information Systems	3
CRP 4490	Geodesign: Planning for Sustainable Futures	3
CRP 4560	GIS Programming and Automation	3
GEOL 4520	Intro GIS for Geoscientists	3
GEOL 4880	Raster GIS for Geoscientists	3
LA 2110	Digital Design Methods for Landscape Architecture	3

LA 4540	Fundamentals of Remote Sensing and Spatial Analysis	3
LA 4590	Digital Design Methods for Landscape Architecture	3
STAT 3320	Visual Communication of Quantitative Information	3

Design and Planning for Sustainability

Design and Planning for Sustainability requires 15 credits from the choices listed. The pathway requires 9 credits at the 3000-level or higher.

ARCH 4510	Whole Building Energy Performance Modeling	3
ARCH 5580	Sustainability and Green Architecture	3
CRP 2510	Fundamentals of Geographic Information Systems	3
CRP 2910	World Cities and Globalization	3
CRP 2930	Environmental Planning	3
CRP 3010	Urban Analytical Methods	4
CRP 3510	Intermediate Geographic Information Systems	3
CRP 3830	Theory of the Planning Process	3
CRP 4450	Transportation Policy and Planning	3
CRP 4490	Geodesign: Planning for Sustainable Futures	3
CRP 4490	Geodesign: Planning for Sustainable Futures	3
CRP 4570	Geogames for Civic Engagement	3
CRP 4600	Social Justice and Planning	3
CRP 4840	Sustainable Communities	3
CRP 4920	Planning Law, Administration and Implementation	3
GEOL 4520	Intro GIS for Geoscientists	3
GEOL 4880	Raster GIS for Geoscientists	3
LA 2700	Foundations in Natural Resource Policy and History	3

Food, Agriculture and Biodiversity

Food, Agriculture and Biodiversity requires 15 credits from the choices listed. The pathway requires 9 credits at the 3000-level or higher.

AECL 2310	Principles of Wildlife & Fisheries Conservation	3
BIOL 4710	Introductory Conservation Biology	3
AGRON 1800	Global Agriculture in a Changing World	3
AGRON 1810	Introduction to Crop Science	3
AGRON 1820	Introduction to Soil Science	3
AGRON 3160	Crop Structure-Function Relationships	3
AGRON 3170	Principles of Weed Science	3
AGRON 3340	Forage Crop Management	3
AGRON 3420	World Food Issues: Past and Present	3
AGRON 4050	Soil-Plant-Animal-Atmosphere Physics	3
AGRON 4060	World Climates	3
BIOL 2040	Biodiversity	2

BIOL 2110	Principles of Biology I	3
BIOL 3120	Ecology	4
BIOL 3550	Plants and People	3
BIOL 3660	Plant Systematics	4
BIOL 3700	GIS for Ecology and Environmental Science	3
or NREM 4460	Integrating GPS and GIS for Natural Resource Management	
ENT 3700	Insect Biology	3
or AECL 3660	Natural History of Iowa Vertebrates	
or BIOL 3540	Animal Behavior	
ENT 3740	Insects and Our Health	3
ENT 4710	Insect Ecology	3
GLOBE 3040	Socio-Economic Global Resource Systems	3
GLOBE 3600	Global Health	3
HORT 3420	Landscape Plant Installation, Establishment, and Management	3
HORT 4750	Urban Forestry	3
NREM 3010	Natural Resource Ecology and Soils	4
NREM 3110	Field Ecology in Montana	4
NREM 3900	Fire Ecology and Management	3
NREM 4520	Ecosystem Management: Integrating Ecology, Society, and Policy	3

Policy and Human Behavior

Policy and Human Behavior requires POLS 2830 plus 12 credits from the choices listed. The pathway requires 9 credits at the 3000-level or higher.

POLS 2830	Introduction to Environmental Politics and Policies	3
12 credits from the following:		
HIST 3620	Global Environmental History	3
HIST 3630	U. S. Environmental History	3
PHIL 2300	Moral Theory and Practice	3
PHIL 3300	Ethical Theory	3
PHIL 3340	Environmental Ethics	3
POLS 3350	Science, Technology, and Public Policy	3
POLS 3440	Public Policy	3
POLS 4430	Energy Policy	3
POLS 4800	Ethics and Public Policy	3
PSYCH 3180	Judgment and Decision Making	3
MATE 2200	Globalization and Sustainability	3
SOC 3820	Environmental Sociology	3
SOC 3310	Social Class and Inequality	3

SOC 3480	Global Poverty, Resources and Sustainable Development	3

Science Communication

Science Communication requires 15 credits from the choices listed.
The pathway requires 9 credits at the 3000-level or higher.

BPMI 3230	Scientific Illustration Principles and Techniques	3
BPMI 3260	Illustration and Illustration Software	3
BPMI 3270	Illustration as Communication	3
COMST 3270	Persuasion and Social Influence	3
ENGL 3320	Visual Communication of Quantitative Information	3
ENGL 3550	Literature and the Environment	3
ENGL 4770	Seminar in Technical Communication	3
JLMC 2600	Media Controversies in Science and Technology	3
JLMC 4010	Mass Communication Theory	3
JLMC 4740	Communication Technology and Social Change	3
JLMC 4760	World Communication Systems	3
PHIL 2060	Introduction to Logic and Scientific Reasoning	3
PR 2200	Principles of Public Relations	3
PR 3050	Publicity Methods	3
PR 3230X	Strategic Communication in Agriculture and the Environment	3

As majors in the College of Liberal Arts and Sciences, Climate Science students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. You must also complete the LAS world language requirement.

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

Climate Science 4-Year Plan

This plan is an example only; students should discuss their graduation plan with their advisor.

Communication Studies

The Communication Studies Major

comst.las.iastate.edu (<https://comst.las.iastate.edu/>)

The Communication Studies Program focuses on human communication, exploring the ways humans create and negotiate meaning. Communication Studies majors master a focused course of inquiry into interpersonal processes as they create and sustain relationships and impact individuals, groups, and organizations. The Communication Studies curriculum builds primarily on social science traditions in developing a liberal arts education emphasizing human communication. Students in the Communication Studies major study applied communication theory and research in interpersonal, small group, organizational, intercultural, and other contexts.

The Communication Studies (COMST) major teaches students how to think critically, giving them the ability to examine complex communication issues, and develop and implement strategies grounded in evidence-based research. This prepares students for careers in business and industry and graduate education. Students majoring in COMST will find their career opportunities enhanced in professions requiring applied communication expertise, e.g., human resource management, public relations, training and development, sales management, recruitment, event planning, sales, management, organizational development, business communication, law, and international and intercultural relations.

Student Learning Outcomes

Upon graduation Communication Studies majors will...

- Develop foundational knowledge of human communication.
- Apply human communication strategies in a diverse world.
- Evaluate and utilize evidence-based research.
- Cultivate communication competence.

University-wide Requirements

To meet the University's Communication Proficiency requirement students are required to take:

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
	or ENGL 2500H Written, Oral, Visual, and Electronic Composition: Honors	
Plus one of the following:		3
ENGL 3020	Business Communication	
ENGL 3090	Proposal and Report Writing	
ENGL 3140	Technical Communication	
ENGL 4150	Business and Technical Editing	

A grade of C or higher is required in ENGL 2500 Written, Oral, Visual, and Electronic Composition (or ENGL 2500H Written, Oral, Visual, and Electronic Composition, Honors).

Total Credits	9

Students in all majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. (COMST 3100 fulfills the international perspective requirement/COMST 2100 and SPCM 3230 fulfill the U.S. diversity requirement). Approved courses are listed at: <http://www.registrar.iastate.edu/courses/div-ip-guide.html> (<http://www.registrar.iastate.edu/students/div-ip-guide/>). Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

LAS College Requirements

As majors in the College of Liberal Arts and Sciences, Communication Studies students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. Students must also complete the LAS world language requirement, career proficiency requirement and LAS general education requirements. In accordance with college requirements, an overall average in Communication Studies courses of C (2.0) or better is required. This means students need a 2.0 GPA in the 33 hours taken to fulfill the major requirements in Communication Studies.

The Communication Studies Major

Communication Studies majors must earn at least 120 credits, with 45 credits at the 3000-4000 levels, and a minimum of 33 credits in COMST.

Core Requirements (15 credits)

COMST 1010	Introduction to Communication Studies	3
COMST 2110	Interpersonal Communication	3
COMST 3010	Human Communication Theory	3
COMST 3030	Introduction to Communication Research Methods	3
Plus one of the following:		3
COMST 2140	Professional Communication	
COMST 2180	Conflict Management	
COMST 2100	Communication and U.S. Diversity	
SPCM 2120	Fundamentals of Public Speaking	
Total Credits		15

Upper Division Requirements (15 credits). Select five courses from the following

COMST 3100	Intercultural Communication	3
COMST 3110	Relational Communication	3
COMST 3130	Leadership Communication Theories	3

COMST 3140	Organizational Communication	3
COMST 3170	Small Group Communication	3
COMST 3190	Communication Training and Development	3
COMST 3250	Nonverbal Communication	3
COMST 3270	Persuasion and Social Influence	3
COMST 3300	Computer Mediated Communication	3
COMST 4500A	Special Topics in Communication Studies: General	3
or COMST 450C	Special Topics in Communication Studies: Health Communication	
SPCM 3230	Gender and Communication	3
Total Credits		15

Capstone Course Requirement (3 credits)

COMST 4040	Research Seminar	3

Additional Recommended Course

STAT 1010	Principles of Statistics	4

Communication Studies, B.A.

Freshman

The Communication Studies Minor (18 credits)

The requirements for a minor in COMST may be fulfilled by credit in:

COMST 1010	Introduction to Communication Studies	3
COMST 3010	Human Communication Theory	3
Select one (1) 2000-Level course:		3

COMST 2100	Communication and U.S. Diversity
COMST 2110	Interpersonal Communication
COMST 2140	Professional Communication
COMST 2180	Conflict Management

Plus 3 3000-level courses, (9) credits from the following: 9

COMST 3100	Intercultural Communication
COMST 3110	Relational Communication
COMST 3130	Leadership Communication Theories
COMST 3140	Organizational Communication
COMST 3170	Small Group Communication
COMST 3190	Communication Training and Development
COMST 3250	Nonverbal Communication
COMST 3270	Persuasion and Social Influence
COMST 3300	Computer Mediated Communication

COMST 4500A	Special Topics in Communication Studies: General	3
or COMST 450C	Special Topics in Communication Studies: Health Communication	

Students must earn an overall average of C (2.0) or better in all courses taken for the minor.

The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Total Credits

21

Computer Science Overview

<http://www.cs.iastate.edu>

The department of Computer Science offers Bachelor of Science and Bachelor of Arts degrees in Computer Science in the College of Liberal Arts and Sciences.

The undergraduate curriculum in Computer Science leading to the Bachelor of Science degree is accredited by the Computing Accreditation Commission of ABET, <http://www.abet.org>. This degree equips students with a sound knowledge of the foundations of Computer Science as well as problem-solving and system design skills necessary to create robust, efficient, reliable, scalable, and flexible software systems. The B.S. degree in Computer Science prepares students for graduate study in Computer Science and for various business, industry, and government positions including computer scientists, information technologists, and software developers.

The purpose of the Bachelor of Arts degree in Computer Science is to accommodate students who wish to pursue a major in Computer Science while taking more courses outside of the major than a Bachelor of Science degree program permits. This will include students pursuing double majors, students pursuing one or more strong minors, and students pursuing broader liberal educations. The B.A. program retains the rigor of our B.S. program while allowing students to spread the breadth of their education over other disciplines in addition to Computer Science.

The main educational objectives of the B.S. degree program in Computer Science at Iowa State University are that its graduates demonstrate expertise, engagement, and learning within two to five years after graduation.

- **Expertise:** Graduated students should have the ability to establish peer-recognized expertise in the discipline. They should have the ability to articulate this expertise by formulating and solving problems of interest, by creating or deriving value through the application of technology, and by using mathematical foundations, algorithmic principles, and computer science theory in designing, implementing and evaluating computer-based systems and processes which meet the desired needs of their employers.
- **Engagement:** Graduated students should have the ability to be engaged in the profession through the practice of computer science in industry, academia, or the public sector. They should demonstrate

effective teaming and commitment to working with others by applying communications skills and professional knowledge.

- **Learning:** Graduated students should have the ability to engage in sustained learning through graduate work, professional improvement opportunities, and self-study so that they can adapt to the role played by information processing in ever-changing areas of science, technology, and society.

Student Learning Outcomes

Upon graduation, students should have:

1. An ability to analyze a complex computing problem, and to apply principles of computing and other relevant disciplines to identify solutions.
2. An ability to design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. An ability to communicate effectively in a variety of professional contexts.
4. An ability to recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. An ability to function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
6. An ability to apply computer science theory and software development fundamentals to produce computing-based solutions.

Undergraduate Curriculum in Software Engineering

The Department of Computer Science, together with the Department of Electrical and Computer Engineering, also offer a curriculum leading to an undergraduate degree in Software Engineering. The Software Engineering curriculum offers emphasis areas in Software Engineering principles, process, and practice. Students may also take elective courses in Computer Engineering and Computer Science.

Degree Requirements

As majors in the College of Liberal Arts and Sciences, students pursuing both the B.A. and the B.S. in Computer Science must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated below for the major.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. You must also complete the LAS world language requirement and career proficiency requirement.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of

approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

Degree requirements for the B.S. in Computer Science:

The B.S. departmental requirements consist of a minimum of 49 credits in Computer Science and satisfaction of written and oral requirements.

The following courses are required:

COMS 1010	Orientation	
COMS 1270	Introduction to Computer Programming	3
COMS 2270	Object-oriented Programming	4
COMS 2280	Introduction to Data Structures	3
COMS 3090	Software Development Practices	3
COMS 3110	Introduction to the Design and Analysis of Algorithms	3
COMS 3210	Introduction to Computer Architecture and Machine-Level Programming	3
COMS 3270	Advanced Programming Techniques	3
COMS 3310	Theory of Computing	3
COMS 3420	Principles of Programming Languages	3
COMS 3520	Introduction to Operating Systems	3
COMS 4020		

At least 15 credits, including at least 6 credits of 4000-level courses, 15 all with a grade of C- or better, from the following:

COMS 3190	Construction of User Interfaces	
COMS 3360	Introduction to Computer Graphics	
COMS 3620	Object-Oriented Analysis and Design	
COMS 3630	Introduction to Database Management Systems	
COMS 4070	Applied Formal Methods	
COMS 4090	Software Requirements Engineering	
COMS 4100	Distributed Development of Software	
COMS 4120	Formal Methods in Software Engineering	
COMS 4130	Program Analysis	
COMS 4150	Software System Safety	
COMS 4170	Software Testing	
COMS 4180	Introduction to Computational Geometry	
MATH 4210	Logic for Mathematics and Computer Science	
COMS 4240	Introduction to High Performance Computing	
COMS 4250	High Performance Computing for Scientific and Engineering Applications	
COMS 4260	Introduction to Parallel Algorithms and Programming	
COMS 4300	Concurrent Programming in Practice	
COMS 4330	Molecular Programming of Nanoscale Devices and Processes	

COMS 4350	Algorithms for Large Data Sets: Theory and Practice	
COMS 4370	Computer Game and Media Programming	
COMS 4400	Principles and Practice of Compiling	
COMS 4410	Programming Languages	3
COMS 4530	Privacy Preserving Algorithms and Data Security	
COMS 4540	Distributed Systems	
COMS 4550	Simulation: Algorithms and Implementation	
COMS 4610	Principles and Internals of Database Systems	
COMS 4720	Principles of Artificial Intelligence	
COMS 4740	Introduction to Machine Learning	
COMS 4760	Motion Planning for Robotics and Autonomous Systems	
COMS 4770	Foundations of Robotics and Computer Vision	
COMS 4810	Numerical Methods for Differential Equations	
COMS 4870	Introduction to Network Programming and Cloud Computing	
COMS 4880	Computer Networks	
CPRE 4160	Software Evolution and Maintenance	
CPRE 4190	Software Tools for Large Scale Data Analysis	
CPRE 4300	Network Protocols and Security	
CPRE 4310	Basics of Information System Security	
CPRE 4580	Real Time Systems	
CPRE 4890	Computer Networking and Data Communications	

Total Credits **49**

COMS 4140 **may not** be applied towards fulfilling the 4000-level electives.

Toward satisfying the requirements of the College of Liberal Arts and Sciences, the following courses should be included:

PHIL 3430	Philosophy of Technology	3
SPCM 2120	Fundamentals of Public Speaking	3
LAS 2030	Professional Career Preparation	1
At least 17 credits of Math and Statistics		17
MATH 1650	Calculus I	4
MATH 1660	Calculus II	4
COMS 2300	Discrete Computational Structures	3
One Statistics course from:		
STAT 3050	Engineering Statistics	3
STAT 3300	Probability and Statistics for Computer Science	3
STAT 3410	Introduction to the Theory of Probability and Statistics I	4
STAT 3470	Probability and Statistical Theory for Data Science	4

At least one Math course from:

MATH 2070	Matrices and Linear Algebra	3
MATH 2650	Calculus III	4
MATH 2660	Elementary Differential Equations	3
MATH 2670	Elementary Differential Equations and Laplace Transforms	4
MATH 3040	Combinatorics	3
MATH 3140	Graph Theory	3
MATH 3170	Theory of Linear Algebra	4

One of the following 2-course Natural Science sequences (with labs):

BIOL 2110 & 2110L	Principles of Biology I and Principles of Biology Laboratory I	8
& BIOL 2120 & BIOL 2120L	and Principles of Biology II and Principles of Biology Laboratory II	

Or

BIOL 2550 & 2550L	Fundamentals of Human Anatomy and Fundamentals of Human Anatomy Laboratory	8
& BIOL 2560 & BIOL 2560L	and Fundamentals of Human Physiology and Fundamentals of Human Physiology Laboratory	

Or

CHEM 1770 & 1770L	General Chemistry I and Laboratory in General Chemistry I	9
& CHEM 1780 & CHEM 1780L	and General Chemistry II and Laboratory in College Chemistry II	

Or

GEOL 1000 & 1000L	How the Earth Works and How the Earth Works: Laboratory	8
& GEOL 1020 & GEOL 1020L	and History of the Earth and History of the Earth: Laboratory	

Or

PHYS 2310 & 2310L	Introduction to Classical Physics I and Introduction to Classical Physics I Laboratory	10
& PHYS 2320 & PHYS 2320L	and Introduction to Classical Physics II and Introduction to Classical Physics II Laboratory	

The following courses meet the communication proficiency requirement:

LIB 1600	Introduction to College Level Research	1
ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
One of the following		
ENGL 3020	Business Communication	3
ENGL 3050	Creative Writing: Nonfiction	3

ENGL 3090	Proposal and Report Writing	3
ENGL 3140	Technical Communication	3

Degree requirements for the B.A. in Computer Science:

The B.A. departmental requirements consist of a minimum of 31 credits in Computer Science and satisfaction of written and oral requirements.

The following courses are required:

Computer Science core:

COMS 1010	Orientation	
COMS 1270	Introduction to Computer Programming	3
COMS 2270	Object-oriented Programming	4
COMS 2280	Introduction to Data Structures	3
COMS 3090	Software Development Practices	3
COMS 3110	Introduction to the Design and Analysis of Algorithms	3

Advanced Computer Science, five 3000/4000-level courses chosen from lists (a) and (b) below, with at least one at the 4000-level and at least two chosen from list (a). COMS 4140 may not be applied towards fulfilling the 4000-level electives.

(a) Software and Hardware Systems:

COMS 3210	Introduction to Computer Architecture and Machine-Level Programming	
COMS 3270	Advanced Programming Techniques	
COMS 3420	Principles of Programming Languages	
COMS 3520	Introduction to Operating Systems	
COMS 3620	Object-Oriented Analysis and Design	
COMS 3630	Introduction to Database Management Systems	
COMS 4090	Software Requirements Engineering	
COMS 4100	Distributed Development of Software	
COMS 4120	Formal Methods in Software Engineering	
COMS 4130	Program Analysis	
COMS 4150	Software System Safety	
COMS 4170	Software Testing	
COMS 4400	Principles and Practice of Compiling	

COMS 4410	Programming Languages	3
COMS 4540	Distributed Systems	
COMS 4870	Introduction to Network Programming and Cloud Computing	

COMS 4880	Computer Networks	

(b) Other Advanced Computer Science:

COMS 3310	Theory of Computing	
COMS 3360	Introduction to Computer Graphics	

COMS 4180	Introduction to Computational Geometry	
MATH 4210	Logic for Mathematics and Computer Science	
COMS 4330	Molecular Programming of Nanoscale Devices and Processes	
COMS 4350	Algorithms for Large Data Sets: Theory and Practice	
COMS 4370	Computer Game and Media Programming	
COMS 4550	Simulation: Algorithms and Implementation	
COMS 4720	Principles of Artificial Intelligence	
COMS 4740	Introduction to Machine Learning	
COMS 4760	Motion Planning for Robotics and Autonomous Systems	
COMS 4770	Foundations of Robotics and Computer Vision	
Total Credits		34

Toward satisfying the requirements of the College of Liberal Arts and Sciences, the following courses should be included:

Mathematics Core (3 courses):

MATH 1650	Calculus I
MATH 1660	Calculus II
COMS 2300	Discrete Computational Structures

Additional Mathematics (1 course from the following):

COMS 3310	Theory of Computing
MATH 2070	Matrices and Linear Algebra
MATH 2650	Calculus III
MATH 2660	Elementary Differential Equations
MATH 2670	Elementary Differential Equations and Laplace Transforms
MATH 3040	Combinatorics
MATH 3140	Graph Theory
MATH 3170	Theory of Linear Algebra

Statistics (1 course from the following):

STAT 3050	Engineering Statistics	
STAT 3300	Probability and Statistics for Computer Science	
STAT 3410	Introduction to the Theory of Probability and Statistics I	
STAT 3470	Probability and Statistical Theory for Data Science	
SPCM 2120	Fundamentals of Public Speaking	3
Natural Sciences: minimum 8 credits from approved College list		

The following courses meet the communication proficiency requirement:

LIB 1600	Introduction to College Level Research	1
ENGL 1500	Critical Thinking and Communication	3

ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
One of the following		
ENGL 3020	Business Communication	3
ENGL 3050	Creative Writing: Nonfiction	3
ENGL 3090	Proposal and Report Writing	3
ENGL 3140	Technical Communication	3

The following pertains to both the B.S. and the B.A. in Computer Science:

Students must earn at least a C- in MATH 1650, MATH 1660, and each Computer Science course taken to fulfill the Degree Program. The LAS College requires the major must contain at least 8 credits in courses taken at Iowa State University that are numbered 3000 or above and in which the student's grade is C or higher.

According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500. The Department requires a C or higher in the upper-level ENGL course (3020, 3050, 3090, 3140).

To obtain a bachelor's degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, a student must earn at least 45 credits at the 3000 level or above taken at a four-year college. All such credits, including courses taken on a pass/not pass basis, may be used to meet this requirement.

Students must take at least 15 credits of Computer Science courses at the 3000 level or higher at Iowa State University while resident here. Computer Science transfer courses need to be a minimum grade of C or higher to be considered for course substitution.

Note: The B.A. in Computer Science, like other B.A. degrees in LAS, gives students more freedom than the B.S. to design their own curricula.

However, LAS degree requirements impose some rigor on this freedom. For example, the B.A. requires 24 upper-level credits in Computer Science, Mathematics, and Statistics, but LAS requires at least 45 upper-level credits, so a substantial fraction of B.A. students' extra freedom will be confined to upper-level courses.

Undergraduate Minor in Computer Science

The Department of Computer Science offers an undergraduate minor in Computer Science. The minor requires at least 16 credits in computer science courses. COMS 4140 cannot be used to fulfill minor requirements.

A minimum grade of C- is required in COMS 2270 and COMS 2280. A minimum grade of C is required in both COMS 3110 and the three credits of 3000-level Computer Science courses and above. Students must meet all prerequisites for Computer Science courses taken to fulfill the minor. At least 6 credits of the minor must be in courses numbered 3000 and above and taken at ISU with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

COMS 2270	Object-oriented Programming	4
COMS 2280	Introduction to Data Structures	3
COMS 2300	Discrete Computational Structures	3
COMS 3110	Introduction to the Design and Analysis of Algorithms	3
3 credits in COMS courses at the 3000 level or above		3

Certificate in Computing Applications

Students interested in the computing applications, may want to explore the Certificate in Computing Applications; it is a cross-disciplinary course of study in the Colleges of Liberal Arts and Sciences, Engineering, and Business.

Concurrent Bachelors and Masters Degrees

The concurrent B.S./M.S. degree in Computer Science offers highly motivated and focused students the opportunity for accelerated study. Students will be allowed to double count up to 12 credits. This program will pair undergraduate students in the concurrent program with research teams of graduate students and dedicated faculty members prominent in their fields of expertise. Students that declare concurrent enrollment will be considered graduate-level students, and therefore eligible for graduate research assistantships and scholarships. Click here for application instructions (<https://www.cs.iastate.edu/concurrent-bsms-computer-science/>).

More information can be found here: <https://www.cs.iastate.edu/cs.iastate.edu/concurrent-comajor-transfer>. (<https://www.cs.iastate.edu/cs.iastate.edu/concurrent-comajor-transfer/>)

Graduate Programs

The department offers graduate programs leading to degrees of Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) with a major in Computer Science. The Doctor of Philosophy degree may also be earned with computer science as a co-major with some other discipline. Additionally, the department offers a minor for the students majoring in other disciplines. The department also offers a Master of Science (M.S.) in Artificial Intelligence. This program is for graduate-level students with strong quantitative backgrounds who are interested in learning AI and machine-learning techniques.

Established research areas include algorithms, artificial intelligence, computational complexity, computer architecture, bioinformatics, computational biology, computer networks, database systems, formal methods, information assurance, machine learning and neural networks, multimedia, operating systems, parallel and distributed computing, programming languages, robotics, and software engineering. There are also numerous opportunities for interdisciplinary research.

Typically, students beginning graduate work in the Department of Computer Science have completed a bachelor's degree or equivalent in Computer Science. However, some students with undergraduate majors in other areas, such as Mathematical, physical, or biological science or engineering become successful graduate students in Computer Science.

For the degree Master of Science, 31 - 34 semester credits are required. A thesis or a creative component demonstrating research and the ability to organize and express significant ideas in computer science is required.

The purpose of the doctoral program is to train students to do original research in Computer Science. Each student is also required to attain knowledge and proficiency commensurate with a leadership role in the field. The Ph.D. requirements are governed by the student's program of study committee within established guidelines of the department and the graduate college. They include coursework (demonstrating breadth and depth of knowledge), a research skills requirement, a preliminary examination, and a doctoral dissertation and final oral examination. The department recommends that all graduate students majoring in Computer Science teach as part of their training for an advanced degree.

Computing Applications Certificate

The Certificate in Computing Applications is a cross-disciplinary course of study in the Colleges of Liberal Arts and Sciences, Engineering, and Business. It is designed for undergraduates not already enrolled in majors in Computer Science, Software Engineering, or Computer Engineering who wish to enhance their degree and employment possibilities by adding expertise in computing applications. The certificate program focuses on teaching students the essential skills required to develop and use computing applications in their subject domains. This certificate program will help students to be successful in today's workplace, ensuring they have the basic knowledge of programming languages and computer systems needed to enhance their employment opportunities.

The certificate program is offered jointly among the three colleges and their respective departments housing the majors of computer science, computer engineering, software engineering, and management information systems.

The program consists of 9 credit hours selected from the core and 12 credit hours in electives.

Enrollment in the certificate

Students should fill the form at <https://www.registrar.iastate.edu/sites/default/files/uploads/forms/Curriculum%20Change%20Form%201%2021.pdf> and bring it to Computer Science Advising Center, 1200 Communications Building.

Requirements

- 21 required credits.
- Courses applied to the certificate may not be taken on a pass not-pass basis.
- At least 9 of the credits taken at Iowa State University must be in courses numbered 3000 or above.
- A minimum of 9 credits used for the certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 3000 or above.
- A student may not receive both an undergraduate major and a certificate of the same name.
- For students earning an Iowa State University baccalaureate degree, a certificate is awarded concurrent with or after the Iowa State University baccalaureate degree.
- A certificate is not awarded until baccalaureate requirements are finished.
- After receiving a baccalaureate degree from any accredited institution, a student may enroll at Iowa State University to earn a certificate.
- A cumulative grade point average of at least 2.00 is required in courses taken at ISU for a certificate.
- A notation of completed certificate will be made on the transcript.

Part I - Core
9-10 Credits

Students will complete either Sequence 1 or Sequence 2		
SEQUENCE 1		9-10 Credits
COMS 1070	Windows Application Programming	3
or COMS 1270 Introduction to Computer Programming		
or COMS 2070 Fundamentals of Computer Programming		
COMS 1060	Introduction to Web Programming	3
or COMS 1130 Introduction to Spreadsheets and Databases		
COMS 2520	Linux Operating System Essentials	3
or DS 2010 Introduction to Data Science		
SEQUENCE 2		10 Credits
COMS 2270	Object-oriented Programming	4
COMS 2280	Introduction to Data Structures	3
COMS 2520	Linux Operating System Essentials	3
or DS 2010 Introduction to Data Science		

Part II - Electives
12 Credits

Designated Electives for the Certificate

Students will choose one elective course from the following list of courses and are responsible for satisfying the course pre-requisites of the elective selected.

- CPRE 2300 Cyber Security Fundamentals
- BCBIO 3220 Introduction to Bioinformatics and Computational Biology
- LA 2110 Digital Design Methods for Landscape Architecture
- CRP 2510 Fundamentals of Geographic Information Systems
- STAT 3010 Intermediate Statistical Concepts and Methods
- PSYCH 3010 Research Design and Methodology
- SOC 3020 Research Methods for the Social Sciences
- ECON 2070 Applied Economic Optimization
- Any course at 3000 level or above in Computer Science (COMS), Computer Engineering (CPRE), Management Information Systems (MIS), or Software Engineering (SE)

The remaining 9 credits of electives are intended to allow students to develop further computing applications expertise especially within their major. These 9 elective credits can be advanced courses in their major, courses on the above electives list, or any other coursework approved by the Computer Science Advisor on the “request for undergraduate certificate.” At least 9 of the 12 elective credits must be in courses numbered 3000 or above and taken at Iowa State University.

Criminal Justice

The Criminal Justice program in the College of Liberal Arts and Sciences offers a Bachelor of Arts degree and a minor in Criminal Justice.

Your adventure begins with your academic advisor. Please contact cjsocadvising@iastate.edu for more information.

Students in this major will learn about the components of the juvenile and criminal justice systems, become acquainted with the issues affecting these systems, apply theoretical concepts to real-world phenomena, interface with criminal justice and social service providers, and plan an academic and/or applied career in criminal justice.

Student Learning Outcomes

Graduates of this program will:

- Understand theories of crime, victimization, and criminal justice (i.e., theories about social bonds, learning, social control, conflict, labeling, rehabilitation, alternatives to incarceration).
- Think critically about crime, victimization, and criminal justice (i.e., be able to apply, critique, compare, and integrate knowledge in the area).

- Understand how race/ethnicity, gender, wealth, and power are related to crime, victimization, and criminal justice.
- Understand and be able to use basic social science research methods, as well as those most relevant to the study of crime, victimization, and criminal justice.
- Be familiar with career paths in the criminal justice system and make career choices that best fit their career interests.
- Make appropriate decisions, think creatively and be able to express themselves in written and oral communication to supervisors and clients.

Degree Requirements

University Requirements

International Perspectives	3
US Diversity	3
Total Credits	6

Communication Proficiency

According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 1500 and ENGL 2500. In addition, majors must also take an advanced course in ENGL 3020 or ENGL 3090 or ENGL 3140 with a grade of C or better.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
LIB 1600	Introduction to College Level Research	1
ENGL 3020	Business Communication	3
or ENGL 3090	Proposal and Report Writing	
or ENGL 3140	Technical Communication	
Total Credits		10

World Language and career proficiency

3 years of High School

SPAN 0970	Accelerated Spanish Review	
2 semesters at the college level		8
LAS 2030	Professional Career Preparation	1
Total Credits		9

General Education Coursework

Students must select from a variety of LAS approved general education courses in each area listed below. A full list of approved courses can be found at <https://las.iastate.edu/students/academics/general-education/>.

Arts and Humanities	12
Math	3
Natural Sciences	8

Social Sciences	9
Total Credits	32

Program of Study

A program of study that meets the needs and interests of the student and departmental requirements will be developed in consultation with the major advisor. Students must maintain a GPA of 2.0 or higher in their core courses.

SOC 1150	Orientation to Sociology	1
or CJ 1200	The Criminal Justice League Learning Community Seminar	
CJ 2400	Introduction to the U.S. Criminal Justice System	3
CJ 2410	Youth and Crime	3
CJ 2420	Criminology	3
CJ 3400	Deviant and Criminal Behavior	3
CJ 4020	White-Collar Crime	3
or CJ 4030	Criminal Offenders	
or CJ 4060	Gender and Crime	
CJ 4600	Criminal and Juvenile Justice Internship	3
Select one of the following courses		3
CJ 3200	American Judicial Process	
CJ 3320	Philosophy of Law	
PHIL 3390	Liberty and Law in America	
CJ 4040	Criminal Justice Policies	
PSYCH 3830	Psychology and Law	
Select 5 of the following courses		15
CJ 3200	American Judicial Process	
CJ 3320	Philosophy of Law	
CJ 3350	Race, Ethnicity, and the US Criminal Justice System	
PHIL 3390	Liberty and Law in America	
CJ 3510	Police and Society	
CJ 3520	Punishment, Corrections, and Society	
CJ 3540	Prevention of Crime and Delinquency	
CJ 3600	Latinas and Victimization	
CJ 4020	White-Collar Crime	
CJ 4040	Criminal Justice Policies	
CJ 4050	Drugs and Crime	
CJ 4060	Gender and Crime	
CJ 4100	Capital Punishment	
CJ 4510	Contemporary Issues in Policing	
CJ 4700	Ethical Issues in Criminal Justice	
CJ 4840	Topical Studies in Criminal and Juvenile Justice	

PSYCH 3830	Psychology and Law	
Total Credits		37

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 3000/4000 level**. You must also complete the LAS world language requirement and career proficiency requirement.

As majors in the College of Liberal Arts and Sciences, Criminal Justice students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

Criminal Justice, B.A.

*May take up to 9 credits of CJ 4840 special topics.

Note: This is an example four-year plan. Your actual semester schedules may vary.

Criminal Justice Minor

The Criminal Justice minor offers an opportunity for students to learn about the components of the criminal and juvenile justice systems, to become acquainted with the issues and problems affecting these systems, to apply theoretical concepts to real world problems, and to plan a career in the criminal justice field.

Students who declare a minor in Criminal Justice are required to complete 18 total credits. Students may do up to nine credits of SOC 4600 but only three of those credits may be applied to the minor. Nine credits must be at the 3000 or 4000 level. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students must have a minimum grade point average of 2.0 in courses for the minor.

CJ 2400	Introduction to the U.S. Criminal Justice System	3
CJ 4600	Criminal and Juvenile Justice Internship	3
Four additional C J courses		12
Total Credits		18

Data Science Overview

Data Science is a rapidly growing academic discipline fueled by the proliferation of rich and complex data emerging from activities in science,

industry, and governments. As a result, there is strong demand for data science professionals today in Iowa as well as across the nation and globe, and this market is expected to continue to grow in the next decade. The data science programs are intended for students who wish to study the data science discipline for its own sake as well as for students studying any discipline at Iowa State University with the goal of enabling them to work in data science. The courses in the data science program are designed to provide students with the requisite background that would enable them to take jobs with significant data science components, e.g., establishing and operating data analysis pipelines. The capstone will provide an opportunity for students to apply data science concepts to a domain problem while working in a multi-disciplinary team setting.

The Data Science major is intended for students with strong quantitative backgrounds and has the goal of educating students on the technical fundamentals of Data Science, with a focus on developing the knowledge and skills needed to transform data into insights. The major is an excellent opportunity for individuals who want to prepare themselves for the exciting Data Scientist positions that are in high demand today.

The minor in Data Science is intended for students studying any discipline at Iowa State and is designed to give students an in-depth understanding of data science as it is applied to a variety of domains.

The certificate in Data Science is intended for students studying any discipline at Iowa State and is designed to prepare them for future work with significant data science components. The capstone will provide an opportunity for students to apply data science concepts to a domain problem while working in a multi-disciplinary team setting.

Student Learning Outcomes for Data Science Major

After successfully completing the program, students majoring in Data Science will demonstrate:

1. An understanding of and an ability to apply the following data science concepts, tools and methods to data analysis pipelines:
 - a. data acquisition
 - b. data preprocessing
 - c. exploratory data analysis
 - d. inferential and predictive thinking, modeling and analysis
 - e. computational thinking, data structures, and algorithms
2. An understanding of ethical, legal, societal, and economic concerns in the application of data science concepts.
3. An ability to visualize, interpret and communicate the output of data analysis pipelines to stakeholders.
4. An ability to function on multi-disciplinary teams using concepts and tools from data science.

See Undergraduate Minor and Undergraduate Certificate subpages for the respective learning outcomes.

Data Science Major

Purpose

The Bachelor of Science degree program in Data Science is intended for students with strong quantitative backgrounds and has the goal of educating students on the technical fundamentals of data sciences, with a focus on developing the knowledge and skills needed to manage and analyze large-scale, heterogeneous data to address a wide range of problems.

Requirements

The B.S. in Data Science consists of 120 total credit hours including: (1) 39 credit hours in the major core, three credits of which constitute a capstone course that is expected to provide experiential learning; (2) 9 credit hours in an application emphasis area to examine applications and theory of data sciences in a specific area; and (3) 23 credit hours of foundation courses. The capstone course will provide an opportunity for students to apply data science concepts to an application area while working in a multi-disciplinary team setting.

Data Science Major Requirements

Data Science Core Courses		39
DS 1100	Orientation to Data Science	
DS 2010	Introduction to Data Science	3
DS 2020	Data Acquisition and Exploratory Data Analysis	3
DS 3030	Concepts and Applications of Machine Learning	3
DS 4010	Data Science Capstone	3
COMS 2280	Introduction to Data Structures	3
COMS 2300	Discrete Computational Structures	3
or CPRE 3100	Theoretical Foundations of Computer Engineering	
COMS 3110	Introduction to the Design and Analysis of Algorithms	3
COMS 3630	Introduction to Database Management Systems	3
CPRE 4190	Software Tools for Large Scale Data Analysis	4
STAT 3010	Intermediate Statistical Concepts and Methods	4
STAT 3470	Probability and Statistical Theory for Data Science	4
STAT 4770	Introduction to Categorical Data Analysis	3

At least 9 credits from the following categories to fulfill the emphasis area:

At least 6 credits from courses at the 3000, 4000, or 5000 level from the following designations: 6

ABE, ADVRT, AGRON, ANS, ARCH, BCBIO, COMS, CRP, CPRE, CYBE, CYBSC, DS, EE, ECON, FIN, GIS, IE, JLMC, LA, LING, MATH, MIS, MKT, POLS, SE, SOC, STAT, TSM		
At least 3 credits from one of the following courses:		3
BCBIO 4010	Bioinformatics of Sequences	
BCBIO 4060	Bioinformatics of OMICS	
COMS 3420	Principles of Programming Languages	
COMS 4130	Program Analysis	
MATH 4210	Logic for Mathematics and Computer Science	
COMS 4240	Introduction to High Performance Computing	
COMS 4260	Introduction to Parallel Algorithms and Programming	
COMS 4350	Algorithms for Large Data Sets: Theory and Practice	
COMS 4400	Principles and Practice of Compiling	
COMS 4540	Distributed Systems	
COMS 4610	Principles and Internals of Database Systems	
COMS 4740	Introduction to Machine Learning	
CPRE 3880	Embedded Systems II: Mobile Platforms	
CPRE 4160	Software Evolution and Maintenance	
CPRE 4250	High Performance Computing for Scientific and Engineering Applications	
CPRE 4310	Basics of Information System Security	
EE 4250	Machine learning: A Signal Processing Perspective	
IE 3120	Optimization	
IE 4830	Data Mining	
IE 4870	Big Data Analytics and Optimization	
MATH 3730	Introduction to Scientific Computing	
MATH 4070	Applied Linear Algebra	
MATH 4240	Introduction to High Performance Computing	
MATH 4810	Numerical Methods for Differential Equations	
STAT 4710	Introduction to Experimental Design	
STAT 4730	Introduction to Survey Sampling	
STAT 4750	Introduction to Multivariate Data Analysis	

Total Credits 9

Toward satisfying pre-requisites and requirements of the College of Liberal Arts and Sciences, the following courses or their equivalents are also required:

COMS 1270	Introduction to Computer Programming	3
COMS 2270	Object-oriented Programming	4
MATH 1650	Calculus I	4
MATH 1660	Calculus II	4

MATH 2650	Calculus III	4
MATH 2070	Matrices and Linear Algebra	3
STAT 2010	Introduction to Statistical Concepts and Methods	4
World Language 3 years in high school or 1 year in college		0 - 8
Natural Science		8
Social Science		9
Arts and Humanities		12
LAS 2030	Professional Career Preparation	1

The following courses meet the communication proficiency requirement:

LIB 1600	Introduction to College Level Research	1
ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
One of the following:		
ENGL 3020	Business Communication	3
ENGL 3140	Technical Communication	3
ENGL 3320	Visual Communication of Quantitative Information	3
(cross-listed as STAT 3320)		

As majors in the College of Liberal Arts and Sciences, Data Science students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level or above taken at a four-year college. All such credits, including courses taken on a pass/not pass basis, may be used to meet this requirement. You must also complete the LAS world language requirement and career proficiency requirement.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500. The Data Science program requires a C or higher in the upper-level ENGL course (3020, 3140, or 3320).

13		13

The major elective courses will come from Data Science emphasis areas as outlined on the Undergraduate Major page. A student must take at least 9 credits of 3000+ courses from a wide variety of designations.

Additionally, 3 credits must be chosen from a list of elective courses with a data or analysis emphasis.

All students are required to take at least 45 hours of courses at the 3000+ level or above. This may require taking additional electives.

Data Science Minor

Purpose

The minor in data science is intended for students studying any discipline at Iowa State and is designed to give students an in-depth understanding of data science as it is applied to a variety of domains. The minor in data science will prepare students with the technical and communication skills to enter the workforce as domain experts with data science skills.

Learning Outcomes for Data Science Minor

After completing the minor in data science, students will demonstrate:

- An ability to apply data science concepts, tools and technologies to data analysis pipelines,
- An understanding of ethical, legal, societal, and economic concerns in application of data science concepts,
- An ability to visualize, interpret and communicate the output of data analysis pipelines to stakeholders, and
- An ability to function on multi-disciplinary teams using concepts and tools from data science.

Requirements

The minor in data science requires the completion of 15 credit hours, including 9 credits from the data science core and 6 credits from approved data science electives.

At least 6 credits in courses numbered 3000-level or above taken at ISU with a grade of C or higher.

At least 9 credits used for the minor cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 3000 or above.

Courses for the minor cannot be taken on a pass/not-pass basis.

Course Requirements for Data Science Minor

Core Courses (9 credits)

DS 2010	Introduction to Data Science (Required)	3
DS 2020	Data Acquisition and Exploratory Data Analysis (Required)	3
DS 3010	Applied Data Modeling and Predictive Analysis (Required)	3

* DS 3010 has a prerequisite of an introductory statistics course: STAT 1010, STAT 1040, STAT 1050, STAT 2010, STAT 2260, STAT 2310, STAT 3050, STAT 3220, or STAT 3300.

Electives (6 credits)		
ABE 3160	Applied Numerical Methods for Agricultural and Biosystems Engineering	3
ADVRT 3350	Advertising Media Planning	3
ADVRT 4970	Special Topics in Communication	1-3
AGRON 2700	Geospatial Technologies	3
AGRON 4250	Crop and Soil Modeling	3
BCBIO 3220	Introduction to Bioinformatics and Computational Biology	3
COMS 3110	Introduction to the Design and Analysis of Algorithms	3
COMS 3630	Introduction to Database Management Systems	3
COMS 4240	Introduction to High Performance Computing	3
COMS 4350	Algorithms for Large Data Sets: Theory and Practice	3
COMS 4530	Privacy Preserving Algorithms and Data Security	3
COMS 4740	Introduction to Machine Learning	3
CRP 2510	Fundamentals of Geographic Information Systems	3
CRP 3510	Intermediate Geographic Information Systems	3
CRP 4520	Geographic Data Management and Planning Analysis	3
CRP 4540	Fundamentals of Remote Sensing and Spatial Analysis	3
CRP 4560	GIS Programming and Automation	3
CPRE 4190	Software Tools for Large Scale Data Analysis	4
CPRE 4260	Introduction to Parallel Algorithms and Programming	4
ECON 3710	Introductory Econometrics	4
EE 4280X	Image Analysis using Machine Learning	3
ENGL 3320	Visual Communication of Quantitative Information	3
FIN 4500	Analytical Methods in Finance	3
IE 3120	Optimization	3
IE 4830	Data Mining	3
LA 5580	Web Mapping and Spatial Data Visualization	3
LING 4100	Language as Data	3
MATH 3040	Combinatorics	3
MATH 3140	Graph Theory	3
MATH 3730	Introduction to Scientific Computing	3
MATH 4220X	Mathematical Principles of Data Science	3
MIS 4360	Introduction to Business Analytics	3
MIS 4460	Advanced Business Analytics	3
MKT 3680	Marketing Analytics	3
STAT 3010	Intermediate Statistical Concepts and Methods	4

STAT 3300	Probability and Statistics for Computer Science	3
STAT 4750	Introduction to Multivariate Data Analysis	3
STAT 4770	Introduction to Categorical Data Analysis	3
STAT 4830	Empirical Methods for the Computational Sciences	3
STAT 4860	Introduction to Statistical Computing	3
TSM 4330	Precision Agriculture	3

Data Science Certificate

Purpose

The certificate in data science is intended for students studying any discipline at Iowa State and is designed to prepare them for future work with significant data science components. The data science certificate is also available to students who have already earned a Baccalaureate degree from Iowa State or elsewhere. The capstone will provide an opportunity for students to apply data science concepts to a domain problem while working in a multi-disciplinary team setting. The certificate in data science will prepare students with the technical and communication skills to enter the workforce as domain experts with data science skills.

Learning Outcomes for Data Science Certificate

After completing the certificate in data science, students will demonstrate:

- An ability to apply data science concepts, tools and technologies to data analysis pipelines,
- An understanding of ethical, legal, societal, and economic concerns in application of data science concepts,
- An ability to visualize, interpret and communicate the output of data analysis pipelines to stakeholders, and
- An ability to function on multi-disciplinary teams using concepts and tools from data science.

Requirements

The certificate in data science requires the completion of 21 credit hours, including 9 credits from the data science core, 9 credits from approved data science electives, and a three-credit data science capstone experience.

At least 9 credits must be taken in courses numbered at the 3000-level or above.

At least 9 credits used for the certificate cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 3000 or above.

Courses for the certificate cannot be taken on a pass/not-pass basis.

Course Requirements for Data Science Certificate

Core Courses (9 credits)

DS 2010	Introduction to Data Science (Required)	3
DS 2020	Data Acquisition and Exploratory Data Analysis (Required)	3
DS 3010	Applied Data Modeling and Predictive Analysis (Required)	3

* DS 3010 has a prerequisite of an introductory statistics course:

STAT 1010, STAT 1040, STAT 1050, STAT 2010, STAT 2260, STAT 2310, STAT 3050, STAT 3220, or STAT 3300.

Earth Science

Earth Science

The Earth Science major is a program leading to the Bachelor of Arts (B.A.) or Bachelor of Science (B.S.).

The B.A. emphasizes an interdisciplinary field and prepares the student primarily for a career in secondary education. The B.S. program provides a broad overview of geology and supporting sciences. This degree pathway is also suitable for students who may want to pursue a career in secondary education or continue on to graduate school. If a student chooses this option and is interested in secondary education, they should contact Dr. Cinzia Cervato for additional guidance.

Student Learning Outcomes

Upon graduation, students should be able to:

- Demonstrate the ability to think critically;
- Exhibit a broad understanding of Earth systems and processes;
- Demonstrate scientific literacy and its application to scientific inquiry and societal concerns;
- Demonstrate proficiency in data collection, management, and analysis including understanding sources of error and/or uncertainty;
- Demonstrate competency with geoscience-specific techniques and field methods.
- Read and critically evaluate relevant literature and information;
- Use appropriate tools from chemistry, physics, biology, mathematics, and data science to solve discipline-specific problems;
- Present information effectively in written and oral forms;
- Work in a team environment in alignment with the ISU principles of community;
- Work independently;

- Attain employment in the geosciences or related fields or pursue graduate studies.

EARTH SCIENCE

Students can pursue either the Bachelor of Arts (B.A.) or the Bachelor of Science (B.S.) degree with a major in Earth Science. They can also prepare to teach Earth Science.

Required courses for the B.A. include:

GEOL 1000	How the Earth Works	3
or GEOL 1010	Environmental Geology: Earth in Crisis	
or GEOL 2010	Geology for Engineers and Environmental Scientists	
GEOL 1000L	How the Earth Works: Laboratory	1
GEOL 1020	History of the Earth	3
GEOL 1020L	History of the Earth: Laboratory	1
GEOL 3020	Summer Field Studies	6
GEOL 3150	Mineralogy and Earth Materials	3
GEOL 3150L	Laboratory in Mineralogy and Earth Materials	1
GEOL 3160	Optical Mineralogy	1
GEOL 3560	Structural Geology and Tectonics	4
GEOL 3570	Geological Mapping and Field Methods	1
GEOL 3650	Igneous and Metamorphic Petrology	3
GEOL 3680	Sedimentary Geology	4
MTEOR 2060	Introduction to Weather and Climate	3
ASTRO 1200	The Sky and the Solar System	3
ASTRO 1500	Stars, Galaxies, and Cosmology	3
And 3 credits of geology electives		3
Total Credits		43

Required supporting courses for the B.A. include:

CHEM 1770	General Chemistry I	4
CHEM 1770L	Laboratory in General Chemistry I	1
CHEM 1780	General Chemistry II	3
CHEM 1780L	Laboratory in College Chemistry II	1
PHYS 1310	General Physics I	4
PHYS 1310L	General Physics I Laboratory	1
PHYS 1320	General Physics II	4
PHYS 1320L	General Physics II Laboratory	1

One of the following

MATH 1510	Calculus for Business and Social Sciences	3
or MATH 1600	Survey of Calculus	
or MATH 1650	Calculus I	

One of the following

STAT 1010	Principles of Statistics	4

or STAT 1040	Introduction to Statistics	
And one course in Biology		3
Total Credits		29

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500. The department requires a grade of C or better in ENGL 3090 or ENGL 3140.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
or ENGL 2500H	Written, Oral, Visual, and Electronic Composition: Honors	

One of the following:

ENGL 3090	Proposal and Report Writing	3
or ENGL 3140	Technical Communication	

Total Credits		9

Required courses for the B.S. include:

GEOL 1000	How the Earth Works	3
or GEOL 1010	Environmental Geology: Earth in Crisis	
or GEOL 2010	Geology for Engineers and Environmental Scientists	
GEOL 1000L	How the Earth Works: Laboratory	1
GEOL 1020	History of the Earth	3
GEOL 1020L	History of the Earth: Laboratory	1
GEOL 3020	Summer Field Studies	6
GEOL 3150	Mineralogy and Earth Materials	3
GEOL 3150L	Laboratory in Mineralogy and Earth Materials	1
GEOL 3160	Optical Mineralogy	1
GEOL 3560	Structural Geology and Tectonics	4
GEOL 3570	Geological Mapping and Field Methods	1
GEOL 3650	Igneous and Metamorphic Petrology	3
GEOL 3680	Sedimentary Geology	4
GEOL 4790	Surficial Processes	3
MTEOR 2060	Introduction to Weather and Climate	3

And 8 credits of electives in agronomy, astronomy, environmental science, or other approved areas.

Total Credits		45

Required supporting courses for the B.S. include:

CHEM 1770	General Chemistry I	4
CHEM 1770L	Laboratory in General Chemistry I	1
CHEM 1780	General Chemistry II	3
CHEM 1780L	Laboratory in College Chemistry II	1

MATH 1650	Calculus I	4
MATH 1660	Calculus II	4
PHYS 1310	General Physics I	4
PHYS 1310L	General Physics I Laboratory	1
PHYS 1320	General Physics II	4
PHYS 1320L	General Physics II Laboratory	1
STAT 1010	Principles of Statistics	3-4
or STAT 1040	Introduction to Statistics	
Total Credits		30-31

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500. The department requires a grade of C or better in the below communication courses.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
or ENGL 2500H	Written, Oral, Visual, and Electronic Composition: Honors	
ENGL 3090	Proposal and Report Writing	3
or ENGL 3140	Technical Communication	
or ENGL 3020	Business Communication	
or JLMC 3470	Science Communication	
Total Credits		9

Required for B.A. and B.S.

As majors in the College of Liberal Arts and Sciences, Earth Science students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level in addition to the LAS world language and cultures and career preparation requirement (LAS 2030 Professional Career Preparation). At least 8 credits in the major from 3000+ courses must earn grade C or better. The average grade of all courses in the major must be 2.0 or higher.

Teacher Preparation Focus

Earth Science majors seeking certification to teach Earth Science in secondary schools can follow the requirements of either the B.A. or the B.S. degree in Earth Science. In addition, they must take the

complementary coursework listed below and meet all of the requirements of the Secondary Major in Education. Some of these courses, and some of the required coursework for the Secondary Major in Education, may also apply to LAS general education requirements.

Complementary Coursework

PSYCH 2300	Developmental Psychology	3
EDUC 4180	Secondary Science Methods I	3
EDUC 4190	Secondary Science Methods II	3
One course in American History or Government		

Notes: Teacher license requirements are established by the Iowa Department of Education and the Iowa Board of Educational Examiners and are subject to change. Recent changes may not be reflected in this catalog, but advisers and faculty will be aware. Some students pursuing the Earth Science decide to complete the Earth Science major and continue their studies as graduate students in Iowa State's Science Education, Masters of Teaching (M.A.T.) program (<https://education.iastate.edu/graduate-students/graduate-programs/division-of-teaching-learning-leadership-and-policy/educator-prep-programs-for-licensure-recommendation/science-education-m-a-t/endorsements/>).

Earth Science, B.A.

NOTE: Course plan, sequence and credit amounts will vary depending upon which endorsement area(s) a student chooses to pursue. In addition, this plan is solely an example of one possible academic layout. This plan can and likely will be modified based on transfer credit, advanced placement (AP) credit, dual enrollment credit, "test out" credit, course offerings, schedule conflicts and entry term. *It is our expectation that students know the requirements of their academic program and develop and follow an academic plan based on their academic catalog and degree audit using their individual academic advisor as a resource in this process.*

Potential pathway for the B.A. major in Earth Science with the Secondary Major in Education:

Freshman

Graduate Programs

The department offers programs leading to the Master of Science and Doctor of Philosophy with majors in Geology, Earth Science, and Meteorology. Students desiring a major in the above fields normally will have a strong undergraduate background in the physical and mathematical sciences. Individuals desiring to enter a graduate program are evaluated by considering their undergraduate preparation and performance along with their expressed goals in the statement of purpose. All prospective students should reach out to individual faculty members who they wish to work with prior to applying.

Programs of study are designed on an individual basis in accordance with requirements of the Graduate College and established requirements for each departmental major. Additional coursework is normally taken in complementary areas such as aerospace engineering, agronomy (soil science), chemistry, civil and construction engineering, computer engineering, computer science, engineering mechanics, environmental science, materials engineering, mathematics, mechanical engineering, microbiology, physics, or statistics. Departmental requirements provide a strong, broad background in the major and allow considerable flexibility in the program of each individual.

A dissertation is required of all Ph.D. candidates.

M.S. students in Geology are required to complete a thesis. The M.S. in Earth Science is available to students electing the non-thesis (Creative Component) option in Geology or Meteorology.

Graduates in Geology specialize in a sub-discipline, but they comprehend and can communicate the basic principles of geology and supporting sciences. They possess the capacity for critical and independent thinking. They are able to write a fundable research proposal, evaluate current relevant literature, carry out the proposed research, and communicate the results of their research to peers at national meetings and to the general public. They work as consultants on engineering and environmental problems, explorers for new minerals and hydrocarbon resources, researchers, teachers, writers, editors, and museum curators.

Ecology, Evolution, and Organismal Biology

Overview

Within the Biological Sciences, studies of ecology, evolution, and organismal biology are essential in understanding the complex

relationships of life on Planet Earth. Ecology focuses on the interactions among organisms as well as the interactions between organisms and their physical environments. Evolutionary theory addresses the origins and interrelationships of species. Organismal biology studies both the diversity of biological organisms and the structure and function of individual organisms.

Undergraduate Study

The Department of Ecology, Evolution, and Organismal Biology (<https://www.eeob.iastate.edu/>) (EEOB) offers several undergraduate majors with other departments. Students interested in the areas of ecology, evolution, and organismal biology should major in Biology, Environmental Science, or Genetics. The Biology Major is administered and offered jointly by the EEOB (<https://www.eeob.iastate.edu/>) and GDCB (<https://www.gdcb.iastate.edu/>) departments. The faculty of EEOB, together with those in GDCB and BBMB (<https://www.bbmb.iastate.edu/>), administer and offer the Genetics Major. Faculty in EEOB, in cooperation with faculty from other departments on campus, administer and offer the Environmental Science Major. Each of these majors is available through the College of Liberal Arts and Sciences or through the College of Agriculture and Life Sciences. Faculty in the EEOB Department also teach undergraduate courses at Iowa Lakeside Laboratory (see the Iowa Lakeside Laboratory listing).

Graduate Study

The department offers graduate work leading to both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees. EEOB graduate students major in one of several interdepartmental majors including Bioinformatics and Computational Biology, Ecology and Evolutionary Biology, Environmental Science, Genetics, Interdisciplinary Graduate Studies, Neuroscience, and Toxicology. The EEOB faculty members are active in the interdepartmental graduate majors and teach a wide range of graduate courses. Faculty research programs cover a wide range of specializations including physiology and physiological ecology; microbiology; animal behavior; evolutionary genetics of plants and animals; modeling of evolutionary and ecological processes; plant and animal systematics; neurobiology; developmental biology; aquatic and wetland ecology; functional, population, community, landscape, and ecosystem ecology; and conservation biology. For further information on faculty research interests check the EEOB web site (www.eeob.iastate.edu (<http://www.eeob.iastate.edu>)). Some EEOB faculty teach graduate courses at Iowa Lakeside Laboratory. Field Station courses are also available through the Gulf Coast Marine Laboratory and the Organization for Tropical Studies (see the Biology listing).

Students who are enrolled in the interdepartmental graduate majors with EEOB affiliation are required to participate in departmental seminars, to participate in research activities, and to show adequate progress and professional development while pursuing their degree. For both the M.S.

and Ph.D. degrees, it is expected that research conducted by the student will culminate in the writing and presentation of a thesis or dissertation. Requirements and guidelines for study are provided by the Graduate College, the EEOB faculty, and the individual student's major professor and Program of Study Committee. General information about graduate study requirements can be found at the web site for the Graduate College and requirements for the interdepartmental majors can be found by following the links from the EEOB web site above. Although not a formal requirement, the EEOB faculty recommends that students pursuing the Ph.D. include teaching experience in their graduate training.

Economics Overview

www.econ.iastate.edu (<http://www.econ.iastate.edu>)

Economics teaches the ability to reason clearly and to address complex issues using tools and decision-making models from economics, mathematics, and statistics, as well as concepts from the biological, physical, and social sciences. The study of economics also helps students to: develop an understanding of the interactions of technology, human activity, and the environment; apply systematic approaches to making optimal choices; analyze quantitative information; and communicate concepts and findings to industry professionals, organizations, governments, and the general public.

Strong training in economic reasoning serves as a foundation for a variety of rewarding careers and for advanced study in a range of professional and academic fields. Economics majors are provided the tools of critical analysis and human relations skills that are essential for being informed citizens, finding and excelling in many career fields, and becoming lifelong learners.

In addition to the Economics major, the Department of Economics offers degrees in Business Economics and Agricultural Business.

Student Learning Outcomes

Graduates from the Department of Economics at Iowa State University are expected to be able to:

1. Understand and apply concepts of scarcity, marginal analysis, opportunity cost and comparative advantage.
2. Critically analyze the efficiency and equity implications of market and non-market processes of allocation.
3. Evaluate policies, regulations, and business strategies using economic models and theories.
4. Use quantitative and qualitative information to evaluate economic questions.

5. Understand the determinants of differences in economic performance over time and across space.

Degree Requirements

Economics Major, College of Liberal Arts and Sciences

The Economics major in the College of Liberal Arts and Sciences prepares students for advanced studies in Economics, Finance, and Analytics, for professional degrees such as medicine, law and business administration (MBA), and for careers in finance, business and economic research, management, insurance, brokerage, real estate, labor relations, international development, and government service. Candidates for the Bachelor of Science degree with a major in Economics must fulfill requirements established by the College of Liberal Arts and Sciences. For details of undergraduate curricula in liberal arts and sciences, see College of Liberal Arts and Sciences. A double major in Economics and Agricultural Business is permitted. A double major in Economics and Business Economics is not permitted. A major in Business Economics with a minor in Economics is not permitted. A minor in Economics cannot be combined with a major in Agricultural Business, and minors in both Agricultural Business and Economics are not permitted.

Students majoring in Economics are required to take the following courses within the General Education Area of Mathematics:

Choose one of the following pairs:

7-8

MATH 1600 Survey of Calculus
& ECON 2070 and Applied Economic Optimization

MATH 1650 Calculus I
& ECON 2070 and Applied Economic Optimization *

MATH 1650 Calculus I
& MATH 1660 and Calculus II

Choose one of the following pairs:

6

STAT 2260 Introduction to Business Statistics I
& STAT 3260 and Introduction to Business Statistics II

STAT 3410 Introduction to the Theory of Probability and
& STAT 3420 Statistics I
and Introduction to the Theory of Probability and
Statistics II

Students planning to attend graduate programs in Economics or related fields are encouraged to take MATH 1650 Calculus I, MATH 1660 Calculus II, STAT 3410 Introduction to the Theory of Probability and Statistics I, and STAT 3420 Introduction to the Theory of Probability and Statistics II.

Students planning for careers in the finance industry or government sectors are encouraged to enroll in STAT 2260 Introduction to Business Statistics I and STAT 3260 Introduction to Business Statistics II.

Students must complete the following courses in economics:

ECON 1010	Principles of Microeconomics	3
ECON 1020	Principles of Macroeconomics	3
ECON 3010	Intermediate Microeconomics	3-4
ECON 3020	Intermediate Macroeconomics	3
ECON 3710	Introductory Econometrics	4
Three credits of ECON 2300-2390, 3000-3890, 4000-4890 courses.		3
Nine credits of 4000-4890 level ECON courses.		9
ECON 4920	Graduating Senior Survey	

A minimum of 18 credits of economics coursework must be earned at Iowa State University. Economics majors must earn a minimum GPA of 2.0 across ECON 1010 Principles of Microeconomics, ECON 1020 Principles of Macroeconomics, ECON 3010 Intermediate Microeconomics, and ECON 3020 Intermediate Macroeconomics, with no grade in these lower than a C-.

Communication Proficiency Requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500. In addition, the Economics major requires a grade of C or better in ENGL 3020 or ENGL 3140.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition or ENGL 2500H Written, Oral, Visual, and Electronic Composition: Honors	3
ENGL 3020	Business Communication or ENGL 3140 Technical Communication	3

Students in all ISU majors must complete a three-credit course in both U.S. Diversity and in International Perspectives. The two courses may simultaneously meet the following graduation requirements: Social Science, Arts/Humanities, ECON 4000-4890, or Econ courses from approved list. Please discuss with your advisor.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 3000/4000 level**. Three of the required 45 credits at the 3000+ level must be earned in a general education group outside the group of your major. Economics majors must meet or complete the LAS world language requirement and career proficiency requirement.

As majors in the College of Liberal Arts and Sciences, Economics students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

Four Year Plan
Bachelor of Science in Economics

Freshman

Total Credits: 120

Students in all ISU majors must complete a three-credit course in both U.S. Diversity and in International Perspectives. The two courses may simultaneously meet the following graduation requirements: Social Science, Arts/Humanities, ECON 4000-4890, or Econ courses from approved list. Please discuss with our advisor. LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 3000/4000 level**. Three of the required 45 credits at

the 3000+ level must be earned in a general education group outside the group of your major. Econ majors must meet or complete the LAS world language requirement. In addition, Econ majors must earn a minimum of 18 credits from courses taught by the Department of Economics at ISU.

- a MATH 1650 (Calculus I) and MATH 1660 (Calculus II) may be substituted for MATH 1600 and ECON 2070.
- b STAT 3410 (Introduction to Theory of Probability & Stats I) and STAT 3420 (Introduction to Theory of Probability & Stats II) may be substituted for STAT 2260 and 3260.

Minor
Economics Minor, College of Liberal Arts and Sciences

For a minor in Economics, students complete a minimum of 15 credits. The minor must include at least 9 credits that are not used to meet any other Department, College, or University requirement.

ECON 1010	Principles of Microeconomics	3
ECON 1020	Principles of Macroeconomics	3
ECON 3010	Intermediate Microeconomics *	3-4
Three credits of ECON 2300-2390, 3000-3890, 4000-4890 courses.		3
Three credits of ECON 3000-3890, 4000-4890 courses.		3
Total Credits		15-16

* Pre-reqs for ECON 3010 include MATH 1660 Calculus II or ECON 2070 Applied Economic Optimization.

The Department of Economics has concurrent Bachelor of Science/ Master of Science (B.S./M.S.) programs designed especially for seniors who wish to pursue advanced studies. Concurrent BS/MS programs are economics (B.S.) with economics (M.S.) or agricultural economics (M.S.). The concurrent B.S./M.S. program allows seniors to complete an M.S. degree within 12 months of B.S. completion.

For more information about our concurrent undergraduate and graduate programs in Economics, visit: <https://www.econ.iastate.edu/iowa-state-ms-econ-programs> (<https://www.econ.iastate.edu/iowa-state-ms-econ-programs/>).

Graduate Programs
Graduate Programs in Economics and Agricultural Economics

The Department of Economics offers work toward the degrees Master of Science and Doctor of Philosophy with majors in Economics and Agricultural Economics. The Department also offers minors to students with majors in other departments. For more information, visit our web site at www.econ.iastate.edu (<http://www.econ.iastate.edu>).

Students do not need to have an undergraduate major in Economics or Agricultural Economics to qualify for graduate work in the Department. However, students must have completed undergraduate coursework in macroeconomics, microeconomics, statistics, calculus, and matrix algebra. Some background in math courses emphasizing logic and proofs is preferred, particularly for the Ph.D.

Candidates for the degree Master of Science (thesis option) are required to complete satisfactorily 30 credits of acceptable graduate work, including preparation of a thesis.

Candidates for the degree Master of Science (non-thesis option) may fulfill requirements by satisfactorily completing 32 credits of acceptable graduate work, including preparation of a creative component.

Programs of study for the doctorate are organized by each student in consultation with the major professor and the student's committee. Subject to staffing constraints, the Department offers coursework to support the following fields of concentration: agricultural economics, applied econometrics, environmental and resource economics, financial economics, human resources, industrial organization, international economics, and macroeconomics. Students must complete advanced courses in microeconomic and macroeconomic theory, quantitative methods and econometrics, and two fields from the list above. Students are required to participate in workshops and demonstrate competence in theory by passing qualifying examinations.

English

UNDERGRADUATE STUDY

Students in the undergraduate majors offered through the English department (<https://engl.iastate.edu/>) develop critical thinking, cultural awareness, effective communication, imagination, leadership, pedagogy, and agency as citizens.

In a communication-rich and globally connected world, these skills play a crucial role in every profession. Studying in English expands and deepens individual engagement in the social, cultural, artistic, scientific, technical, and environmental work of society.

Students interested in majoring in English can choose from this range of options:

- **BA in English** (designed so that majors experience the broad, diverse scope of English studies and create a course plan to match their personal interests and professional goals)
- **BA with a Secondary Major in Education** (for students seeking licensure in secondary education with an opportunity to earn an ESL endorsement as well)

- **BS in English** (by fulfilling BA in English requirements and taking 12 additional credits in natural science, social science, or mathematics)

The English major offers a flexible degree that allows students to gain experience in fields such as literature, rhetoric, creative writing, English education, film, literary editing, and professional communication.

Please visit the Department of English website (<https://engl.iastate.edu/>) to learn more about the opportunities available to English majors as well as the other specialized undergraduate majors offered by the department. The diverse majors within English prepare students for careers that span law, medicine, theology, business, education, advocacy, event planning, management, marketing, publishing, nonprofit and government communication, public service, sales, and speech writing, library science, web design and communication consulting, editing, software documentation, usability and user experience, as well as scientific, technical, and environmental writing.

Adding a major or minor in English to your field of study at Iowa State increases your communication, analytical, and critical thinking skills and will play a key role in your life as a student and in your life after graduation.

BA/BS in English Learning Outcomes

Students who major in English (with a B.A. or B.S.) will be able to:

- Analyze how texts and media reflect, shape, or challenge diverse intellectual, political, and/or cultural concerns in their eras and our own.
- Understand, apply, analyze, synthesize, and evaluate content knowledge. Competencies include discipline-specific terms, history of the field, theories in the field, elements of criticism, and cultural knowledge.
- Engage in critical thinking and effective communication by analyzing and interpreting information and ideas, conducting research, and making connections between and among divergent views.
- Plan, prepare, present, and evaluate written, oral, visual, and electronic communication. These competencies include scholarly skills and tools; communication that is analytical, persuasive, and/or expressive; and peer and self-editing.

Students who choose the English Education Emphasis will additionally be prepared to

- Understand how learners grow and develop, valuing individual differences and cultural diversity to ensure inclusive learning environments.
- Apply the content area's central concepts and structures by using a variety of instructional strategies, including technology, to encourage student creativity, problem solving, and collaboration.

- Use multiple methods of assessment to engage learners in their own growth, monitor learner progress, and guide the teacher’s and learner’s decision making.
- Create instructional plans that support students in meeting rigorous learning goals by drawing upon the content area knowledge, curriculum, cross-disciplinary skills, and pedagogy.
- Evaluate one’s pedagogy for the effects of choices and actions on others (learners, families, other professionals, and the community).

B.A. and B.S. in English Requirements

The English major offers a flexible degree that allows students to gain experience in fields such as literature, rhetoric, creative writing, English education, film, literary editing, and professional communication. The Undergraduate Program of Study is designed so that majors can experience the broad, diverse scope of English studies and configure a course plan to match their personal interests and professional goals. Suggested degree plans for several customizations are available and students may choose and combine courses in any way that meets the requirements for the degree.

Students interested in the B.A. degree in English need to complete 36 credits, based on the table below. Students interested in the B.S. degree in English need to complete the B.A. requirements, plus 12 additional credits in linguistics, natural science, mathematics, social science, or selected courses in kinesiology. Students seeking to complete the English Major and be recommended for teacher licensure need to complete specified coursework in English and meet the requirements of the Secondary Major in Education.

To graduate with a major in the English department and meet the university-wide Communication Proficiency Grade Requirement, a student must have the following:

- Earned credit for or received a grade of at least a C in ENGL 1500 Critical Thinking and Communication and ENGL 2500 Written, Oral, Visual, and Electronic Composition.
- Completed and earned at least a C in one of the department’s advanced communications courses.
- Earned at least a C or higher in each of the ENGL courses applied to the ENGL major.

As majors in the College of Liberal Arts and Sciences, English students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated below for the major. LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 3000/4000 level**. You must also complete the LAS world language and career proficiency (LAS 2030) requirements. Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of

approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

The first table below lays out the requirements and options of the English major. The second table shares the specific requirements for English majors seeking licensure in English education. The English major requires a minimum of 15 credits of major requirements earned at the 3000 level and a total of 9 credits of major requirements earned at the 4000 level. English majors transferring from other institutions must earn at least 18 of their credits in English from Iowa State.

Historical Perspective Requirement. A minimum of 9 credits of coursework in Historical Perspective is required. This Requirement may overlap with the above requirements. Courses listed above with an * next to them or any of the courses in the following list can apply to this requirement.

ENGL 3600	Studies in American Literature to 1800	
ENGL 3620	Studies in 19th Century American Literature	
ENGL 3640	Studies in American Literature: 1900 to the Present	
ENGL 3700	Shakespeare	
ENGL 3730	Studies in British Literature: The Middle Ages	
ENGL 3750	Studies in British Literature: The Restoration and 18th Century	
ENGL 3760A	Studies in British Literature: Romantic	
ENGL 3760B	Studies in British Literature: Victorian	
ENGL 3930	The History of Children's Literature	
ENGL 3950A	Study and Travel: Literature	
ENGL 4200	History of the English Language	

Minimum of 12 additional English Electives at the 2000, 3000, and 4000 level (does not include ENGL 2500). A total of 15 credits of major requirements must be at the 3000 level. A total of nine credits of major requirements must be at the 4000 level.

Total Credits **48**

English Major with Teacher Preparation Focus

All students preparing to become teachers need to complete the requirements of the major as laid out below and also complete the requirements of the Secondary Major in Education, including completion of Student Teaching (ENGL 4170E Student Teaching: English and Literature). Credits in ENGL 4170E can apply toward the 4000 level courses requirement of the English major. Note: Teacher license requirements are established by the Iowa Department of Education and the Iowa Board of Educational Examiners and are subject to change. Recent changes may not be reflected in this catalog, but advisers and faculty will be aware.

Complementary Coursework for Teacher Preparation

These courses, expected as part of the Teacher Preparation program, may also apply to college general education requirements. Some of the required coursework for the Secondary Major in Education may also apply.

Complementary Coursework		9
PSYCH 2300	Developmental Psychology	
SPCM 2120	Fundamentals of Public Speaking	
	or THRE 3530 Oral Interpretation	
And one course in American History or Government		

ESL Endorsement Requirements

At Iowa State University, ESL is an add-on endorsement, which means that students need to be certified in another area and to take all basic teacher preparation courses. The growing number of English learners in our public schools make the ESL endorsement a useful addition to a teaching license.

To add English as a Second Language, students must earn credits in the following courses. In some cases, relevant special topics courses or experimental courses may be substituted. Some courses have prerequisites. Endorsement requirements are established by the Iowa Department of Education and the Iowa Board of Educational Examiners and are subject to change. Recent changes may not be reflected in this catalog, but advisers and faculty will be aware.

ENGL 2190	Introduction to Linguistics	3
ENGL 2220X	Artificial Intelligence and Writing	3
ENGL 4250	Second Language Learning and Teaching	3
ENGL 3220	Language and Society	3
	or USLS 4200 Bilingualism & The Education of Latinx Youth	
	or EDUC 5200 Bilingualism & The Education of Latinx Youth

& ENGL 3240	and Introduction to Teaching ESL Literacy (ENGL/LING 3180, ENGL/LING 3240)	
OR		
ENGL 3240	Introduction to Teaching ESL Literacy	6
& ENGL 3250	and Teaching Methods for ESL Learners: Oral Communication Skills (ENGL/LING 3240, ENGL/LING 3250)	
Practicum courses taken through the School of Education at ISU		
EDUC 2800S	Pre-Student Teaching Experience I: English as a Second Language (ESL)	1
EDUC 4800S	Pre-Student Teaching Experience III: English as a Second Language (ESL)	2

Reading Endorsement Requirements

At Iowa State University, the 5-12 reading endorsement is an add-on endorsement, which means that students need to be certified in another area and to take all basic teacher preparation courses. The reading endorsement is a useful addition to a teaching license.

To add a Reading Endorsement, students must earn credits in the following courses. In some cases, relevant special topics courses or experimental courses may be substituted. Some courses have prerequisites. Some courses may apply to both the English major and to the Reading Endorsement. Endorsement requirements are established by the Iowa Department of Education and the Iowa Board of Educational Examiners and are subject to change. Recent changes may not be reflected in this catalog, but advisers and faculty will be aware.

ENGL 2190	Introduction to Linguistics	3
	or LING 4710 Language and Reading Development in Children	
EDUC 3950	Teaching Disciplinary Literacy	3

English Minor Requirements

The minor in English prepares students in any discipline for which communication activities are needed to succeed in their professions. Minors in English will complete 15 credits beyond ENGL 1500 Critical Thinking and Communication and ENGL 2500 Written, Oral, Visual, and Electronic Composition; ENGL 2500 and additional courses require a grade of C or higher (not C-), 9 of which will be at the 3000 or 4000 levels. Twelve of these hours must be taken at Iowa State. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

GRADUATE STUDY

The Department of English offers graduate work leading to three Master of Arts degrees, one Master of Fine Arts degree, two Doctor of Philosophy degrees, and one TESL/TEFL Certificate. The department also offers two concurrent degree programs in which undergraduate students can earn a Master of Arts degree with one additional year of study. Information on application requirements and procedures for all majors is available on the Graduate Studies "How To Apply" (<http://www.engl.iastate.edu/graduate-students/prospective-students/how-to-apply-2/>) website.

The MA in English (<https://www.engl.iastate.edu/english/>) degree program offers advanced study of literature, film, research, writing, and the teaching of reading. Students admitted to the M.A. in English choose between two areas of specialization: (1) Literature or (2) Literature and the Teaching of Reading. These tracks prepare students for a variety of career paths, including teaching at the secondary or college levels, publishing, research, administration, and work in nonprofit sectors. For individuals interested in pursuing research at the Ph.D. level and/or teaching at the high school, college, or university level, the specialization in Literature provides excellent preparation through this program's small class sizes, research opportunities, and professionalization. The specialization in Literature and the Teaching of Reading is designed for licensed teachers who wish to take graduate literature courses and work toward a reading endorsement by taking three reading courses in Education.

The MA in Rhetoric, Composition, and Professional Communication (RCPC) (<https://engl.iastate.edu/ma-coursework-program-of-study/>) prepares students for careers as professional communicators, including careers in technical and business writing, web design, web usability, and technical editing. Graduates also are prepared to teach writing, including business and technical communication, at the

postsecondary level. Students can choose to complete a thesis or one of two creative-component options.

The MA in TESL/Applied Linguistics (TESL/AL) (<https://apling.engl.iastate.edu/ma-program-in-tesl-applied-linguistics/>) prepares students for careers in teaching English to non-native speakers of English, either in the U.S. or abroad. Students with M.A. degrees in TESL teach adults and younger learners in a wide variety of contexts, supervise language programs, work for testing organizations, and create language teaching materials. Students admitted to the degree program can use their elective courses to pursue extended expertise in areas such as Computer-Assisted Language Learning, Language Assessment, English for Specific Purposes (ESP), or Corpus and Computational Linguistics. The MA in TESL/Applied Linguistics (<https://apling.engl.iastate.edu/ma-program-in-tesl-applied-linguistics/>) has a foreign language requirement that may be fulfilled in a number of ways. Students whose native language is other than English are considered to have met the language requirement after satisfying the Graduate College English requirement. For undergraduates at ISU, the MA in TESL/AL can also be completed through the concurrent degree option, which allows linguistics majors who meet admissions requirements to pursue an MA degree in TESL/AL with just one additional year of study.

The Master of Arts (M.A.) degree programs require a minimum of 30 hours of graduate credit, including a final thesis or creative component (3 credits).

The Master of Fine Arts (MFA) program in Creative Writing and Environment (CWE) (<https://www.engl.iastate.edu/creative-writing/mfa-program-in-creative-writing-and-environment/>) cultivates in its students an interdisciplinary approach to research and writing. The program's unique design allows writers to develop a heightened environmental imagination that finds expression in quality, publishable works of fiction, nonfiction, poetry, and drama. The program is designed to prepare students for careers as writers, teachers, editors, and environmental educators. The MFA degree requires 54 hours of graduate credit: a core of creative writing and other English courses, a book-length thesis (6 credits), experiential environmental fieldwork (3 credits), and 12 credits in disciplines other than English (such as Landscape Architecture, Anthropology, or Environmental Science, among many others) relevant to an individual student's research interests and thesis project.

The Doctor of Philosophy (PhD) in Applied Linguistics and Technology (ALT) (<https://apling.engl.iastate.edu/ph-d-in-applied-linguistics-and-technology/>) focuses on English language description, teaching, learning, and assessment, with particular emphasis on issues and practices related to technology: analysis of language using computational and corpus linguistic methods as well as the study of computer technology in English language teaching, learning, assessment, and second language pronunciation. The degree prepares students for a variety of academic

appointments in departments of applied linguistics and English and for professional opportunities in research and development, international publishing, and government agencies in the U.S. and around the world where English is taught and used for specific educational, vocational, and professional purposes. Candidates are required to complete 72 hours of graduate credit including a dissertation, to meet a foreign language requirement that may be fulfilled in a number of ways (students whose native language is other than English are considered to have met the language requirement after satisfying the Graduate College English requirement), and to pass a portfolio assessment, a preliminary examination (consisting of a dissertation proposal and an oral defense of the proposal), and an oral defense of the completed dissertation.

The PhD in Rhetoric and Professional Communication (RPC) (<https://www.engl.iastate.edu/rpc/graduate-programs/phd-rpc/>) applies rhetorical theory to the practice of written, oral, and visual communication in professional communities (e.g., industry and science) and in public spaces that frame deliberation, controversy, and communal identity. The degree prepares graduates for academic positions in rhetoric, in multimodal composition, and in business, professional, and technical communication, as well as for work in the private and public sectors as professional communication specialists, editors, designers, and communication managers. Candidates are required to complete 72 hours of graduate credit, including a dissertation, and to pass a portfolio assessment, a preliminary examination, and an oral defense of the dissertation.

A Graduate Certificate in Teaching English as a Second Language/Teaching English as a Foreign Language (TESL/TEFL) (<https://apling.engl.iastate.edu/tesltefl-graduate-certificate/>) prepares students to teach English to non-native speakers of English either in the U.S. or abroad. It offers students grounding in the linguistic understanding of English and a flexible program of study with courses in teaching methodology, language assessment, and the use of technology to address students' language needs. This 12-credit program has two prerequisites, one core requirement, and three graduate course electives.

The department offers qualified graduate students an opportunity to gain professional experience through teaching and research assistantships, fieldwork and internships, and departmental research activities. Graduate teaching assistants are responsible for teaching, with faculty supervision, courses in ISUComm Foundation Courses, ISUComm Advanced Communication (business and technical communication), ISUComm Speech Communication, and English as a Second Language (ESL). Research assistants may be assigned to faculty members engaged in research projects. Various admissions awards are available as well: the Janet Anderson-Hsieh Scholarship is awarded each year to one Applied Linguistics and Technology doctoral student; one or more Pearl Hogrefe Fellowships in Creative Writing (<https://www.engl.iastate.edu/creative-writing/how-to-apply/pearl-hogrefe-fellowship-in-creative-writing/>),

covering stipend and tuition, are awarded each year to outstanding graduate students; Freda Huncke Endowment Graduate Teaching Fellowships are awarded to select students each year.

The English Department offers minors in each of its graduate programs. A graduate minor at the M.A. level requires 9 credits of English at the 5000 or 6000 level in the respective major (English, RCPC, TESL/AL). A graduate minor within the MFA program in Creative Writing and Environment requires an approved application and completion of 12 graduate credits of creative writing. A graduate minor at the Ph.D. level requires 12 credits at the 5000 or 6000 level in the respective major (ALT or RPC).

GRADUATE PROGRAM LEARNING OUTCOMES

MA in English

- Expand knowledge related to the study of literature and film that includes a diversity of authors/directors, genres, theories, and cultural-historical contexts.
- Communicate research effectively through oral and written presentations.
- Conduct independent scholarship in ways that consistently demonstrate ethical practice and professionalism.
- For graduate students who receive a teaching assistantship, develop strategies for the effective teaching of undergraduate students.

MA in Rhetoric, Composition, and Professional Communication

The RCPC program combines the pedagogy focus of a degree in rhetoric and composition with the technical skill and practicality of a degree in professional communication. Upon graduation, students will demonstrate the ability to

- Understand the interplay of rhetoric, composition, and professional communication in local and global contexts.
- Analyze a rhetorical situation and develop communication that responds to it effectively and ethically.
- Develop communication that helps build a socially just society.
- Use communication to contribute to an affirming and inclusive classroom/workplace environment.
- Apply the historical and theoretical understanding necessary to assess the use of specific communication technologies within complex organizations.
- Combine verbal and visual communication skills to produce effective communication in contemporary organizations.

Measures for evaluating a student's success in meeting these objectives includes:

- Achievement on coursework
- Familiarity with useful and common software programs and technologies
- Successful completion of a thesis or a creative-component project

MA in TESL/Applied Linguistics

- Demonstrate independence, reflective practices, and professionalism in teaching and assessment of English as a second language.
- Demonstrate knowledge of and confidence with the use of computer applications relevant to English language teaching.
- Formulate important research questions for guiding investigations that contribute to theory and practice in one or more areas of applied linguistics.
- Carry out research in one area of applied linguistics that will increase understanding of English language teaching.
- Evaluate research in the field to identify its contribution to theory, research, and practice in applied linguistics.
- Communicate ideas, discoveries, and findings to others in a professional and creative manner.
- Collaborate with other professionals to create and investigate new knowledge, practices, and products for English language teaching.

MFA in Creative Writing and Environment

- Demonstrate understanding of craft and professional practice through coursework, workshops, and completion of refined imaginative literary manuscripts in multiple genres.
- Identify, research, and examine—through coursework, fieldwork, and literary practice—the natural world and the environmental imagination.
- Broaden and deepen understanding of literary and theoretical traditions of the major genres and the methodologies of craft analysis and practice.
- Broaden and deepen understanding of the cultural and natural environment through significant coursework in environmental courses available at Iowa State University both within and beyond the MFA program and English department.
- Design, write, workshop, refine, and defend a significant body of publishable- or production-quality imaginative writing, including a full-length thesis manuscript, which demonstrates professional understanding and application of craft and technique, literary tradition, and the environmental imagination.
- Gain practical training and experience in creating and fostering a healthy literary community and sustaining a professional life in letters through teaching and research assistantships and internships, literary journal editorial internships and positions, as well as land stewardship, reading series, and other outreach opportunities.

PhD in Applied Linguistics and Technology

- Demonstrate knowledge of and confidence with the use of computer applications relevant to teaching, learning, research, and assessment in applied linguistics.
- Design, implement, and evaluate algorithms for automating linguistic analysis tasks based on knowledge of natural language and speech processing programming.
- Formulate important research questions for guiding investigations that contribute to theory and practice in one or more areas of applied linguistics.
- Apply principles of research methodology to design data collection and analysis procedures to address research questions in at least one area of applied linguistics.
- Interpret and evaluate findings in view of their contribution to theory, research, and practice in the relevant area.
- Communicate ideas, discoveries, and findings to others in a professional and creative manner.
- Collaborate with other professionals to create and investigate new knowledge, practices, and products.
- Demonstrate independence and professionalism in teaching and research.

PhD in Rhetoric and Professional Communication

At the time of graduation, RPC students will demonstrate an ability to

- Understand theories, research methods, and concepts in rhetoric, professional communication, and multimodal composition.
- Apply these theories, research methods, and concepts in scholarly activity, including research and teaching.
- Use a variety of technologies and media for scholarly research and for developing audience-centered communication.
- Analyze, synthesize, and critique communication in a variety of organizational and public contexts.
- Analyze, synthesize, and critique research related to rhetoric, professional communication, and multimodal composition.
- Develop scholarship that makes a significant contribution to the field.
- Develop communication that helps build a socially just society.

Measures for evaluating a student's success in meeting these objectives includes:

- Display of an ability to develop a clear and cogent argument using relevant evidence in coursework
- Annual reviews
- Qualifying examination (i.e., portfolio assessment)
- Preliminary exams (written and oral)
- Completion and defense of a dissertation

Graduate Certificate in TESL/TEFL

- Demonstrate growth in reflective practice and professionalism in English language teaching.
- Demonstrate metalinguistic knowledge of English structure and use.
- Evaluate research in the field to identify its contribution to English language teaching practice.
- Communicate and collaborate with others to achieve professional goals for English language teaching.

Environmental Science Interdepartmental Undergraduate Programs

Environmental Science provides an integrated, quantitative, and interdisciplinary approach to the study of environmental systems. The magnitude and complexity of environmental problems are creating a growing need for scientists with rigorous, interdisciplinary training in environmental science. The Environmental Science program is designed to prepare students for positions of leadership in this rapidly changing discipline. Environmental Science graduates have a solid foundation in biological and physical natural sciences and the specialized training necessary for integrated analysis of environmental systems.

Undergraduate Study

The Environmental Science undergraduate major is offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Sciences. Environmental Science majors complete foundation courses in natural sciences and mathematics, plus a major consisting of an integrated core of Environmental Science courses and additional advanced course work in Environmental Science. Scientific rigor is stressed throughout the program, beginning with the foundation courses in the first two years of the curriculum. The upper level core courses emphasize a dynamic systems approach that provides a framework for integrating physical, chemical, and biological aspects of environmental systems. Beyond the required core, students select from a broad array of advanced courses to either develop greater breadth, or specialization in areas including, but not limited to, water resources, climate impacts and adaptation, environmental restoration and management, and geographic information systems (see <https://www.ensci.iastate.edu/> for additional information on areas of specialization).

Student Learning Outcomes

Upon graduation, students should be able to:

Demonstrate a broad understanding of environmental systems and issues utilizing an interdisciplinary framework to integrate ideas and concepts from biological and physical natural sciences

Demonstrate proficiency in data analysis and problem-solving of relevant environmental systems/problems

Use a systems approach to conduct integrated, quantitative, and interdisciplinary analyses and modeling of environmental systems and problems

College of Liberal Arts and Sciences

<http://www.ensci.iastate.edu>

Students seeking an Environmental Science major complete the following:

1. A foundation of approved supporting courses in science and mathematics including biology, chemistry, earth science, physics, mathematics, and statistics.
2. 33 credits of course work in the major, including a required core of 21 credits.

A combined average grade of C or higher is required in courses applied in the major.

1. Environmental Science: 33 credits

ENSCI 1100	Orientation to Environmental Science	1
ENGL 2010	Introduction to Literature	3
ENSCI 2020	Exploration of Environmental and Sustainability Issues	1
ENSCI 2030	Exploration of Environmental Science	1
ENSCI 2500	Environmental Geography	3
ENSCI 2510	Biological Processes in the Environment	3
ENSCI 3120	Ecology	4
ENSCI 3180	Introduction to Ecosystems	3
ENSCI 3190	Analysis of Environmental Systems	3
Additional ENSCI choice courses		12
Total Credits		34

2. Mathematics & Statistics: 6-8 credits

Choose one of the following:		3-4
MATH 1040	Introduction to Probability	
MATH 1500	Discrete Mathematics for Business and Social Sciences	
MATH 1510	Calculus for Business and Social Sciences	
MATH 1600	Survey of Calculus	
MATH 1650	Calculus I	
COMS 1060	Introduction to Web Programming	
COMS 1070	Windows Application Programming	
DS 2010	Introduction to Data Science	
DS 2020	Data Acquisition and Exploratory Data Analysis	

Choose one of the following: 3-4

STAT 1010	Principles of Statistics
STAT 1040	Introduction to Statistics

Total Credits 6-8**3. Physical & Life Sciences: 21-24 credits**

BIOL 2110 Principles of Biology I 3

Choose from one of the following: 5-6

CHEM 1630 & 1630L	College Chemistry and Laboratory in College Chemistry
CHEM 1670 & 1670L	General Chemistry for Engineering Students and Laboratory in General Chemistry for Engineering

CHEM 1770 General Chemistry I
& 1770L and Laboratory in General Chemistry I

CHEM 2010 Advanced General Chemistry
& 2010L and Laboratory in Advanced General Chemistry

Choose from one of the following: 3-4

CHEM 2310 Elementary Organic Chemistry
& 2310L and Laboratory in Elementary Organic Chemistry

CHEM 3310 Organic Chemistry I
& 3310L and Laboratory in Organic Chemistry I

BBMB 2210 Structure and Reactions in Biochemical Processes

AGRON 2590 Organic Compounds in Plants and Soils

Choose 3 of the following: 9

AGRON 1820 Introduction to Soil Science

AGRON 2820 Soil Conservation and Land Use

GEOL 1000 How the Earth Works
or GEOL 2010 Geology for Engineers and Environmental Scientists

MTEOR 2060 Introduction to Weather and Climate

BIOL 2120 Principles of Biology II

CHEM 1780 General Chemistry II
& 1780L and Laboratory in College Chemistry II

PHYS 1150 Physics for the Life Sciences

or PHYS 1310 General Physics I

or PHYS 2310 Introduction to Classical Physics I

Total Credits 20-22**4. Communications: 7-10 credits**

ENGL 1500 Critical Thinking and Communication 3

ENGL 2500 Written, Oral, Visual, and Electronic Composition 3

LIB 1600 Introduction to College Level Research 1

Embedded communication coursework in ENSCI 2030 and ENSCI 3120

Total Credits 7**Additional communication courses required of majors in the College of Agriculture and Life Sciences**

Choose 1 of the following: 3

SPCM 2120	Fundamentals of Public Speaking
AGEDS 3110	Presentation and Sales Strategies for Agricultural Audiences

COMST 2140 Professional Communication

Total Credits 3**5. General Education: 15-21 credits****Additional general education requirements in the College of Agriculture and Life Sciences**

Humanities 3

Social Science 3

Ethics 3

International Perspectives course from university approved list 3

US Diversity course from university approved list 3

Total Credits 15**additional general education requirements in the College of Liberal Arts and Sciences**

Arts and Humanities courses from college approved list 12

Social Science courses from college approved list 9

(Select courses to include 3 cr. of International Perspectives and 3 cr. of US Diversity)

Students must have completed 3 years of a single world language in high school or take 4-8 credits of World Languages at the university level

LAS 2030 Professional Career Preparation 1

Total Credits 22**Electives (28-35 credits)**

As majors in the College of Liberal Arts and Sciences, Environmental Science students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. You must also complete the LAS world language requirement and career proficiency requirement.

Bachelor of Science B.S. (LAS)**Freshman**

Fall	Credits Spring	Credits

Students in all ISU majors must complete a 3 credits in U.S. diversity and a 3 credits in international perspectives. Check the Environmental Science website (<http://www.ensci.iastate.edu>) for a list of approved courses.

Minimum of 120 credits required, including a minimum of 45 credits at the 300/400 level.

¹ Students complete at least 32 credits in Environmental Science including ENSCI 1100, ENGL 2010, ENSCI 2500, ENSCI 3120, ENSCI 3180, ENSCI 3190 and 12 additional credits of approved ENSCI coursework.

² Students complete at least 12 credits in arts and humanities and 9 credits in social science from approved lists. These credits can also be used to meet the U.S. Diversity and International Perspectives requirements.

³ Students choose one course from the following Physical or Life Science related courses: AGRON 1820, AGRON 2820, BIOL 2120, CHEM 1780 & CHEM 1780L, GEOL 1000, GEOL 2010, MTEOR 2060, PHYS 1150, PHYS 1310, PHYS 2310. Students choose from one of the following Organic Chemistry options: CHEM 2310 & CHEM 2310L, CHEM 3310 & CHEM 3310L, BBMB 2210, or AGRON 2590.

Graduate Study

Contact information for the graduate program:

Lynette Edsall

camelot@iastate.edu (mstolt@iastate.edu)

515-294-1191

<https://enscigrad.iastate.edu/>

The Environmental Science graduate program offers an interdepartmental curriculum leading to M.S. and Ph.D. degrees with a major in Environmental Science. Faculty from the colleges of Agriculture and Life Sciences, Engineering, and Liberal Arts and Sciences cooperate to offer courses and research opportunities covering a broad array of environmental topics. Cooperating departments include Agricultural and Biosystems Engineering; Agronomy; Animal Science; Civil, Construction and Environmental Engineering; Ecology, Evolution and Organismal Biology; and Geological and Atmospheric Sciences.

Applicants should have completed an undergraduate or master's degree in one of the biological, chemical, physical, or engineering sciences or should have equivalent preparation.

The Environmental Science Graduate Program emphasizes fundamental concepts and research, which at the same time address major

environmental issues. The curriculum is designed to provide the interdisciplinary approach needed in environmental science education and research. In addition to work in their chosen area of specialization, students are afforded a broad exposure to the biological, chemical and physical aspects of environmental systems and the specialized training necessary for integrated analysis of these systems.

Information on application procedures, curriculum requirements, and faculty research areas is available on the Environmental Science Graduate Program website (<https://enscigrad.iastate.edu/>).

Environmental Studies

Environmental Studies

Interdepartmental Undergraduate Program

Environmental Studies deals with the relationship and interactions between humans and the environment. Students in any college at ISU may elect to take a secondary major or minor in Environmental Studies. The curriculum is designed to give students an understanding of current and emerging environmental issues and an appreciation of different perspectives regarding these issues. Courses are provided for students pursuing careers related to the environment and for others who simply want to know more about environmental issues.

Student Learning Outcomes

Upon graduation, students should be able to:

- Demonstrate a broad understanding and appreciation for a range of environmental issues spanning natural and human systems.
- Demonstrate an understanding and appreciation of different perspectives regarding environmental issues.
- Demonstrate an understanding of approaches used in addressing environmental problems including data analysis and problem-solving.

Secondary Major

The Environmental Studies secondary major is taken in addition to a primary major and provides the breadth of preparation and integrated perspective necessary to understand environmental issues. Students seeking a major in Environmental Studies complete 24 credits of ENVS coursework including:

At least one general survey course chosen from:

ENVS 1010	Environmental Geology: Earth in Crisis
ENVS 1200	Introduction to Renewable Resources
ENVS 1730	Environmental Biology
ENVS 2010	Introduction to Environmental Issues

At least one integrative/issues course chosen from:

ENVS 1600	Water Resources of the World
ENVS 2040	Biodiversity

ENVS 3240	Energy and the Environment
ENVS 3420	World Food Issues: Past and Present
ENVS 4040	Global Change
ENVS 4240	Sustainable and Environmental Horticulture Systems
ENVS 4500	Issues in Sustainable Agriculture

At least two human/societal perspectives courses chosen from:

ENVS 2700	Foundations in Natural Resource Policy and History
ENVS 2830	Introduction to Environmental Politics and Policies
ENVS 2930	Environmental Planning
ENVS 3200	Ecofeminism
ENVS 3340	Environmental Ethics
ENVS 3450	Population and Society
ENVS 3550	Literature and the Environment
ENVS 3630	U. S. Environmental History
ENVS 3800	Energy, Environmental and Resource Economics
ENVS 3820	Environmental Sociology
ENVS 4840	Sustainable Communities
ENVS 4910	Environmental Law and Planning

Beyond these three requirements, any Environmental Studies course and up to six credits of approved environmental coursework outside of Environmental Studies may be applied toward the 24-credit total for the major. Regardless of their home college, Environmental Studies majors must complete at least 9 credits in natural sciences from the LAS General Education approved course list. Unless prohibited by program or college rules, courses used to fulfill requirements of the Environmental Studies major may also be used to satisfy general education and other requirements of departments and colleges. A combined average grade of C or higher is required in courses applied to the major.

Minor

Students seeking a minor in Environmental Studies complete 15 credits of approved Environmental Studies coursework including:

At least one general survey course chosen from:

ENVS 1010	Environmental Geology: Earth in Crisis
ENVS 1200	Introduction to Renewable Resources
ENVS 1730	Environmental Biology
ENVS 2010	Introduction to Environmental Issues

At least one integrative/issues course chosen from:

ENVS 1600	Water Resources of the World
ENVS 2040	Biodiversity
ENVS 3240	Energy and the Environment

ENVS 3420	World Food Issues: Past and Present
ENVS 4040	Global Change
ENVS 4240	Sustainable and Environmental Horticulture Systems
ENVS 4500	Issues in Sustainable Agriculture
At least two human/societal perspectives courses chosen from:	
ENVS 2700	Foundations in Natural Resource Policy and History
ENVS 2830	Introduction to Environmental Politics and Policies
ENVS 2930	Environmental Planning
ENVS 3200	Ecofeminism
ENVS 3340	Environmental Ethics
ENVS 3450	Population and Society
ENVS 3550	Literature and the Environment
ENVS 3630	U. S. Environmental History
ENVS 3800	Energy, Environmental and Resource Economics
ENVS 3820	Environmental Sociology
ENVS 4840	Sustainable Communities
ENVS 4910	Environmental Law and Planning

A combined average grade of C or higher is required in courses applied to the minor, and the minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Genetics

Genetics is the scientific study of heredity. Understanding the basis of heredity is fundamental to all aspects of the life sciences, from the most basic molecular study to applied studies of agricultural species. At Iowa State University the study of the life sciences is interdepartmental, involving faculty in the basic, agricultural, and veterinary sciences. Faculty in 20 different departments are involved in genetics research. This large group of faculty presents a broad range of possibilities for students to learn from faculty who are at the forefront of research in many areas of genetics.

UNDERGRADUATE STUDY

Undergraduate study in genetics is jointly administered by three departments: the Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology; the Department of Genetics, Development, and Cell Biology; and the Department of Ecology, Evolution, and Organismal Biology. Undergraduate degrees are offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Science. Programs of study for genetics majors leading to a B.S. degree are available.

Training in genetics may lead to employment in teaching, research, or a variety of health-related professions. Although some students find

employment directly after their baccalaureate training, many students continue their education in graduate or professional programs. Students with the B.S. degree may find employment in the biotechnology, health, or food industries. Recent graduates have also developed careers in conservation biology, technical writing, science journalism, technical sales, and business.

The required course work and associated electives provide students with the foundation in basic life sciences, mathematics, chemistry, and physics that is essential for professions involving modern biological/ biomedical sciences. As part of these courses, students develop skills in problem solving, critical thinking, writing, and research-related activities in the biological sciences.

Specific entrance requirements for medical and health-related professions are established by the professional schools. Students interested in fulfilling pre-professional requirements for such professions as dentistry, human medicine, genetic counseling, optometry, pharmacy, physical therapy, physician assistant, and veterinary medicine can major in genetics while fulfilling the pre-professional requirements.

Student Learning Outcomes:

Upon graduation, students earning the BS degree in Genetics are expected to have achieved the following skills and capabilities:

- Comprehensive, detailed understanding of the chemical basis of heredity.
- Comprehensive and detailed understanding of genetic methodology and how quantification of heritable traits in families and populations provides insight into cellular and molecular mechanisms.
- Understanding of how genetic concepts affect broad societal issues including health and disease, food and natural resources, environmental sustainability, etc.
- Understanding the role of genetic mechanisms in evolution.
- The knowledge required to design, execute, and analyze the results of genetic experimentation in animal and plant model systems.
- The ability to recognize the experimental rationale of genetic studies as they are described in peer-reviewed research articles and grant proposals to federal and other funding agencies.
- The ability to evaluate conclusions that are based on genetic data.
- Insight into the mathematical, statistical, and computational basis of genetic analyses that use genome-scale data sets in systems biology settings.
- Understanding the role of genetic technologies in industries related to biotechnology, pharmaceuticals, energy, and other fields.
- Communication skills required in the discipline including oral presentations of research data, published research articles, grant proposals, and poster presentations at conferences.

- Teamwork and leadership skills including group analysis of data, working together in the research laboratory, joint compositions of written reports, substantive participation in research group meetings, etc.

CURRICULUM IN GENETICS - REQUIREMENTS

Total Degree Requirement: 120 cr.

A maximum of 65 cr. from a two-year institution can be applied that may include up to 16 technical cr.; up to 9 Pass-Not Pass cr. of free electives can be applied; a cumulative GPA of at least 2.0 is required for graduation. Program-approved lists can be found on the Genetics website.

1. Genetics and Life Sciences

A grade of C– or better is required in all Genetics and Life Science courses.

A. Courses required of all Genetics majors		
GEN 1100	Genetics Orientation	1
BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
BIOL 2120	Principles of Biology II	3
BIOL 2120L	Principles of Biology Laboratory II	1
GEN 3130	Principles of Genetics	3
GEN 3130L	Genetics Laboratory	1
BIOL 3140	Principles of Molecular Cell Biology	3
BIOL 3150	Biological Evolution	3
One of the following:		3-4
GEN 3220	Introduction to Bioinformatics and Computational Biology	
GEN 3490	The Genome Perspective in Biology	
BCBIO 4060	Bioinformatics of OMICS	
GEN 4090	Molecular Genetics	3
GEN 4100	Analytical Genetics	3
One of the following:		3
GEN 4620	Evolutionary Genetics	
EEOB 5610	Evolutionary and Ecological Genomics	
EEOB 5630	Molecular Phylogenetics	
GEN 4910	Undergraduate Seminar, Professional Practice in Genetics Disciplines	1
MICRO 3020	Biology of Microorganisms	3
Total Credits		35-36

B. Course required of majors in the College of Agriculture and Life Sciences only

A minimum of 3 cr. of coursework in the area of environmental science from program approved list	3
Total Credits	3

2. Advanced Sciences Electives: 6 cr. from program approved list

A grade of C- or better is required in each course. No more than 3 cr. of GEN 4900, 4900R, 4900H, 4920, 4960, 4990, or 4990H may be used to meet this requirement.

3. Mathematical Sciences

Complete at least one calculus course from MATH, minimum of 4 credits.

MATH 1600	Survey of Calculus	
MATH 1650	Calculus I	
Complete at least one course from STAT, minimum of 3 credits.		3-4
STAT 1010	Principles of Statistics	
STAT 1040	Introduction to Statistics	
Complete at least one additional course from MATH or STAT, minimum of 4 credits.		4
MATH 1660	Calculus II	
STAT 3010	Intermediate Statistical Concepts and Methods	
Total Credits		11-12

4. Supporting Sciences

CHEM 1770	General Chemistry I	4
CHEM 1770L	Laboratory in General Chemistry I	1
CHEM 1780	General Chemistry II	3
CHEM 1780L	Laboratory in College Chemistry II	1
CHEM 3310	Organic Chemistry I	3
CHEM 3310L	Laboratory in Organic Chemistry I	1
CHEM 3320	Organic Chemistry II	3
CHEM 3320L	Laboratory in Organic Chemistry II	1
PHYS 1310	General Physics I	4
PHYS 1310L	General Physics I Laboratory	1
PHYS 1320	General Physics II	4
PHYS 1320L	General Physics II Laboratory	1
Choose one of the following options		6-7
Option 1		
BBMB 4040	Biochemistry I	
And one of the following:		
BBMB 4050	Biochemistry II	
BBMB 4110	Techniques in Biochemical Research	

CHEM 2110 Quantitative and Environmental Analysis
& 2110L and Quantitative and Environmental Analysis
Laboratory

CHEM 3250 Chemical Thermodynamics

Option 2

BBMB 4200 Mammalian Biochemistry

And one of the following:

BBMB 4110 Techniques in Biochemical Research

CHEM 2110 Quantitative and Environmental Analysis
& 2110L and Quantitative and Environmental Analysis
Laboratory

CHEM 3250 Chemical Thermodynamics

Total Credits 33-34

5. International Perspectives: 3 cr. from university approved list

This course can satisfy **both** the university requirement for International Perspectives and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

6. U.S. Diversity: 3 cr. from university approved list

This course can satisfy **both** the university requirement for U.S. Diversity and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

7. Communications/Information Literacy

A. Courses required of all Genetics majors

Grades of C or better are required in ENGL 2500 and advanced writing. (The College of Agriculture and Life Sciences requires a C or better in ENGL 1500, as well.)

ENGL 1500 Critical Thinking and Communication 3

ENGL 2500 Written, Oral, Visual, and Electronic Composition 3
or ENGL 2500H Written, Oral, Visual, and Electronic Composition:
Honors

LIB 1600 Introduction to College Level Research 1

One advanced English writing course from program approved list 3

Total Credits 10

B. Course required of majors in the College of Agriculture and Life Sciences only.

A grade of C or better is required by the college.

SPCM 2120 Fundamentals of Public Speaking 3

or AGEDS 3110 Presentation and Sales Strategies for Agricultural
Audiences

Total Credits 3

8. General Education electives

Courses from college approved lists that also appear on university approved lists of U.S. Diversity or International Perspectives courses can be used to satisfy both requirements.

A. College of Agriculture and Life Sciences

Humanities course from college approved list 3

Social Science course from college approved list 3

Ethics course from college approved list 3

Total Credits 9

B. College of Liberal Arts and Sciences

Humanities courses from college approved list; one of these should be a Science/Humanities bridge course from program approved list 12

Social Science courses from college approved list 9

Students must have completed 3 years of a single world language in high school or take 4-8 credits of World Languages at the university level.

Total Credits 21

As majors in the College of Liberal Arts and Sciences, Genetics (LAS) students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. You must also complete the LAS world language requirement and career proficiency requirement.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

Undergraduate Minor

The minor in Genetics may be earned by completing the following courses. At least 9 cr. must be used **only** to fulfill the requirements of the minor and not be applied to any other major, college, or university requirement.

GEN 3130	Principles of Genetics	3
GEN 3130L	Genetics Laboratory	1
BIOL 3140	Principles of Molecular Cell Biology	3

GEN 4100	Analytical Genetics	3
GEN 4090	Molecular Genetics	3
Two or more additional credits in Genetics at the 3000 level or above.		2
Total Credits		15

Geology

Geology

The **Bachelor of Science major in Geology** prepares the student for a professional career and/or graduate study in the geological sciences. Graduates work to understand natural processes on Earth and other planets. They are able to apply their knowledge of forces and factors that shape the Earth to reconstruct past environments and anticipate future problems. Graduates provide essential information for solving problems for resource management, environmental protection, and public health, safety, and welfare. They work as consultants on engineering and environmental problems, explorers for new minerals and hydrocarbon resources, researchers, staff members in state and U.S. geological surveys, government regulators, teachers, writers, editors, and museum curators. Graduates are able to integrate field and laboratory data and to prepare reports. They are able to make presentations that include maps and diagrams that illustrate the results of their studies.

Geology as an Additional Major: Geology as an additional major is available to all students on campus. The Geology program has identified the core of 31 credits of geology courses that can complement a B.S. degree or major in materials engineering, civil engineering, environmental science, meteorology, or biology for students wishing to earn an additional major in geology. This pathway to earning a Geology major allows students in these academic programs with affinity to geology to complete both programs. Students should work closely with their advisors in each department to ensure that all requirements are met. These programs prepare students for careers or graduate study in the geosciences.

Student Learning Outcomes

Upon graduation, students should be able to:

- Demonstrate the ability to think critically.
- Exhibit a broad understanding of Earth systems and processes.
- Demonstrate scientific literacy and its application to scientific inquiry and societal concerns.
- Demonstrate proficiency in data collection, management, and analysis including understanding sources of error and/or uncertainty.
- Demonstrate competency with geoscience-specific techniques and field methods.
- Read and critically evaluate relevant literature and information.

- Use appropriate tools from chemistry, physics, biology, mathematics, and data science to solve discipline-specific problems.
- Present information effectively in written and oral forms.
- Work in a team environment in alignment with the ISU principles of community.
- Work independently.
- Attain employment in the geosciences or related fields or pursue graduate studies.

Combined Degrees: A concurrent program is offered which combines a Bachelor of Science degree in geology and a Master of Science degree in geology.

Geology

Required courses for B.S. in Geology include:

GEOL 1000	How the Earth Works	3
or GEOL 1010 Environmental Geology: Earth in Crisis		
or GEOL 2010 Geology for Engineers and Environmental Scientists		
GEOL 1000L	How the Earth Works: Laboratory	1
GEOL 1020	History of the Earth	3
GEOL 1020L	History of the Earth: Laboratory	1
GEOL 3020	Summer Field Studies	6
GEOL 3150	Mineralogy and Earth Materials	3
GEOL 3150L	Laboratory in Mineralogy and Earth Materials	1
GEOL 3160	Optical Mineralogy	1
GEOL 3560	Structural Geology and Tectonics	4
GEOL 3570	Geological Mapping and Field Methods	1
GEOL 3650	Igneous and Metamorphic Petrology	3
GEOL 3680	Sedimentary Geology	4
GEOL 4790	Surficial Processes	3
And 9 credits of geology electives at the 3000+ level.		9
Total Credits		43

Required supporting courses include:

MATH 1650	Calculus I	4
MATH 1660	Calculus II	4
CHEM 1770	General Chemistry I	4
CHEM 1770L	Laboratory in General Chemistry I	1
CHEM 1780	General Chemistry II	3
CHEM 1780L	Laboratory in College Chemistry II	1
PHYS 1310	General Physics I	4
PHYS 1310L	General Physics I Laboratory	1
PHYS 1320	General Physics II	4
PHYS 1320L	General Physics II Laboratory	1

And 6 additional credits of either geology electives or courses from an approved departmental list of science, engineering, and mathematical disciplines outside of geology.	6

Total Credits **33**

Geology as an Additional Major: The requirements for the Geology Additional Major are the same as the requirements for the primary major listed above, including the required Geology courses and required supporting courses. The additional major is available to all students. For students whose primary B.S. degree or major is materials engineering, civil engineering, environmental science, meteorology, or biology, the 31 credit core below constitutes the additional major. This reduction in requirements is due to the complementary nature of requirements in the primary program of study. The requirements of the 31 credit core are below. Please review information on the department website and contact the current program head for more information and sample four year plans for the Geology as an additional major program.

Required courses in Geology as an Additional Major, for specified primary majors above:

GEOL 1000	How the Earth Works	3
or GEOL 1010	Environmental Geology: Earth in Crisis	
or GEOL 2010	Geology for Engineers and Environmental Scientists	
GEOL 1000L	How the Earth Works: Laboratory	1
GEOL 1020	History of the Earth	3
GEOL 1020L	History of the Earth: Laboratory	1
GEOL 3020	Summer Field Studies	6
GEOL 3150	Mineralogy and Earth Materials	3
GEOL 3150L	Laboratory in Mineralogy and Earth Materials	1
GEOL 3160	Optical Mineralogy	1
GEOL 3560	Structural Geology and Tectonics	4
GEOL 3570	Geological Mapping and Field Methods	1
GEOL 3650	Igneous and Metamorphic Petrology	3
GEOL 3680	Sedimentary Geology	4
Total Credits		31

No more than 9 credits in 4900 may be counted toward a degree in Geology.

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500. The department requires a grade of C or better in ENGL 3090 or ENGL 3140.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3

or ENGL 2500H Written, Oral, Visual, and Electronic Composition: Honors	

One of the following: **3**

ENGL 3090	Proposal and Report Writing
ENGL 3140	Technical Communication

Total Credits **9**

As majors in the College of Liberal Arts and Sciences, Geology students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. At least 8 credits in the major from 3000+ courses must earn grade C or better. The average grade of all courses in the major must be 2.0 or higher. You must also complete the LAS world language requirement and LAS career proficiency requirement.

FOUR YEAR PLAN

Below is a suggested pathway for new majors. This plan is an example only; students should discuss their graduation plan with their advisor.

Geology, B.S.

Freshman			
Fall	Credits	Spring	Credits
GEOL 1120	1	GEOL 1130	1
GEOL 1000 or 1010	3	GEOL 1020	3
GEOL 1000L	1	GEOL 1020L	1
CHEM 1770	4	CHEM 1780	3
CHEM 1770L	1	CHEM 1780L	1
ENGL 1500	3	MATH 1650	4
Social	3	Arts &	3

Advanced Geology Elective Choice ¹		3 Social Science Choice (3000+ level)	3

Arts & Humanities Choice (3000+ level)	3 Arts & Humanities Choice	3
World Language 1010 Choice	4 World Language 1020 Choice/ Elective	4
13		13

Total Credits: 124

¹ Choose from list of approved courses available from an advisor or the departmental office.

Students may double-count some courses to complete the degree requirements in 120 credits.

Minor - Geology

A minor in Geology may be earned by taking 15 credits of geology coursework, including:

GEOL 1000	How the Earth Works	3
or GEOL 2010	Geology for Engineers and Environmental Scientists	
or GEOL 1010	Environmental Geology: Earth in Crisis	
GEOL 1000L	How the Earth Works: Laboratory	1
GEOL 1020	History of the Earth	3
GEOL 1020L	History of the Earth: Laboratory	1

Although many students will take GEOL 1000 as the first course in this sequence, GEOL 1010 or GEOL 2010 may be taken in place of GEOL 1000. Note: all students must take GEOL 1000L (How the Earth Works: Laboratory). The remainder of the coursework should be at the 3000 level or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Concurrent Undergraduate and Graduate Programs

A concurrent program is offered which combines a Bachelor of Science degree in geology and a Master of Science degree in geology. This program gives well-qualified Iowa State juniors and seniors the opportunity to begin working on the M.S. degree before completing the B.S. degree, reducing by at least one year the normal time period necessary to complete both degrees separately. Additionally, a concurrent program exists that gives highly motivated and career-focused students the opportunity to receive a Bachelor of Science in geology and an M.B.A. (Master of Business Administration). Review the department

website (<https://ge-at.iastate.edu/>) or contact Dr. Cinzia Cervato for more information regarding these programs.

Graduate Study

The department offers programs leading to the Master of Science and Doctor of Philosophy with majors in Geology, Earth Science, and Meteorology. Students desiring a major in the above fields normally will have a strong undergraduate background in the physical and mathematical sciences. Individuals desiring to enter a graduate program are evaluated by considering their undergraduate preparation and performance along with their expressed goals in the statement of purpose. All prospective students should reach out to individual faculty members who they wish to work with prior to applying.

Programs of study are designed on an individual basis in accordance with requirements of the Graduate College and established requirements for each departmental major. Additional coursework is normally taken in complementary areas such as aerospace engineering, agronomy (soil science), chemistry, civil and construction engineering, computer engineering, computer science, engineering mechanics, environmental science, materials engineering, mathematics, mechanical engineering, microbiology, physics, or statistics. Departmental requirements provide a strong, broad background in the major and allow considerable flexibility in the program of each individual.

A dissertation is required of all Ph.D. candidates.

M.S. students in Geology are required to complete a thesis. The M.S. in Earth Science is available to students electing the non-thesis (Creative Component) option in Geology or Meteorology.

Graduates in Geology specialize in a subdiscipline, but they comprehend and can communicate the basic principles of geology and supporting sciences. They possess the capacity for critical and independent thinking. They are able to write a fundable research proposal, evaluate current relevant literature, carry out the proposed research, and communicate the results of their research to peers at national meetings and to the general public. They work as consultants on engineering and environmental problems, explorers for new minerals and hydrocarbon resources, researchers, teachers, writers, editors, and museum curators.

History Overview

The History department offers Bachelor of Arts and Bachelor of Science degrees in History, a Master of Arts degree in History, and a Ph.D. in Rural, Agricultural, Technological and Environmental History. Many history majors also pursue a minor in another discipline, a second major, or secondary teacher certification.

The department offers a variety of survey courses (2000 series) for first- and second-year students as either general education courses or as introductions to advanced courses in history or other subject areas. In addition to 2000-level survey courses, it offers advanced undergraduate courses in the history of Europe, Asia, Africa, Latin America, the United States, technology and science, agriculture, and other selected topics.

Student Learning Outcomes

Upon graduation, students should be able to:

1. Display the appropriate level of cognitive knowledge of historical themes and events based upon the student's course of study.
2. Display an understanding of past cultures and social organizations, based on the course of study.
3. Develop the fundamental methodological skills of the historical craft: the ability to contextualize and analyze primary source evidence; familiarity with the concepts of historical argument and interpretation, and the ability to formulate effective argumentation in written and oral forms; awareness of the basic historiography in selected research area; and the ability to conduct research and to write a historical essay based upon primary and secondary source research. Students receive an introduction to these concepts in HIST 3010 The Historian's Toolbox.
4. Display a sophisticated understanding of the relationship between past events and the present. For purposes of outcomes assessment, History majors must complete three credits from the following list: HIST 4950 Historiography and Research Writing; if qualified and willing, one graduate-level research seminar; or if qualified and pursuing teacher certification HIST 4980 Methods of Teaching History/Social Sciences.

Requirements for the History Major

The B.S. in History requires a minimum 36 total credits of HIST with 2.0 GPA or higher *including*:

1. Maximum 12 credits at 2000-level HIST or below
2. Minimum 24 credits 3000+ level HIST *including*:
3. HIST 3010 (minimum grade C)
4. HIST 4950, EDUC 4980, or HIST graduate-level research seminar (minimum grade C)
5. Maximum 12 credits 3000-level HIST in addition to HIST 3010
6. Minimum 9 credits 4000-level HIST in addition to HIST 4950, EDUC 4980 or HIST graduate-level research seminar
7. Minimum 15 credits 3000+ level HIST taken at Iowa State University

Communication Proficiency requirement: History majors must receive a grade of C or better in ENGL 2500 (or ENGL 2500H), HIST 3010 and HIST 4950 or HIST 4980.

The B.A. in History requires the equivalent of 2 years of college-level study in the same world language. Six credits of electives may be replaced by 6 additional credits of world language.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 3000/4000 level**. For a history major, 15 credits of history at the 3000/4000 level must be taken at ISU. You must also complete the LAS world language and career proficiency requirements (LAS 2030 Professional Career Preparation).

As majors in the College of Liberal Arts and Sciences, History students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated for the major.

Teacher Preparation Focus

History majors seeking teacher certification in History/Social Sciences Education must meet all of the requirements of the History major while taking the specific History classes required for certification by the State of Iowa. Students must also meet the requirements of the Secondary Major in Education including PSYCH 2300 and student teaching EDUC 4170. Students will complete the requirements below, earning a minimum grade of B- in all content courses used for licensure and a minimum grade of C in all other required courses.

Also, students complete the requirements for one additional fifteen-credit endorsement in Political Science, Psychology, Economics, Anthropology or Sociology. Specific requirements of each endorsement are available from the history department. Teacher license requirements are established by the Iowa Department of Education and the Iowa Board of Educational Examiners and are subject to change. Recent changes may not be reflected in this catalog, but advisers and faculty will be aware.

Requirements to complete endorsements in American History and World History.

¹ The BA in History requires the equivalent of 2 years of college-level study in the same world language. Six credits of electives may be replaced by 6 additional credits of world language.

Minor

The department offers a minor in History, which may be earned with 15 credits in History courses, of which at least 9 must be in courses numbered 3000 or above, excluding HIST 4900 Independent Study. A minimum of 9 credits numbered 3000 or above must be taken at Iowa State. The College of Liberal Arts and Sciences requires students to earn a C or higher in at least 6 of the required 3000-level credits. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. A student may count a maximum of 3 hours of cross-listed courses originating in another teaching department toward the minor in History. The History minor is most frequently chosen by students majoring in Political Science, English, Journalism, Computer Science, and Business.

Graduate Study

The History Department offers two graduate degrees: an M.A. in History and a Ph.D. in Rural, Agricultural, Technological and Environmental History.

Most history graduate courses are either readings seminars or research seminars. Readings seminars acquaint students with the historical literature of a field and prepare them for careers in teaching and research. Research seminars require students to conduct original historical research and to write research papers reporting the results.

The M.A. in history includes both thesis and non-thesis options. See the departmental website on the M.A. in History for a full discussion of the options and requirements. An M.A. in History serves as the basis for continued study in history, as well as preparation for careers in law, education, business, and government service. Throughout world history human beings have depended on rural and agricultural communities as well as on the technologies developed and employed by these communities to sustain lives. Iowa State's Doctoral Program in Rural, Agricultural, Technological and Environmental History offers a scholarly community and learning environment dedicated to the close examination of pervasive and enduring questions about these basic aspects of human history. Such questions can best be answered through the multi-faceted perspectives provided by rural, agricultural, technological, and environmental history. The result is a dynamic learning experience that leads to comparative and transnational analysis shaped by a broad range of methods drawn from the humanities and social/physical sciences. The Program's aim is to produce students who are excellent researchers and engaging teachers, capable of succeeding in a broad variety of professional positions, both inside and outside of academia.

The Ph.D. in Rural, Agricultural, Technological and Environmental History is designed for students who have completed an M.A. in history. Those who have not yet completed an M.A. will be expected to complete the degree while progressing toward the Ph.D. Thirty semester hours of

graduate credit are required for the M.A. and 72 for the Ph.D. Students who continue beyond the M.A. are expected to pass preliminary examinations in four areas of specialization, complete a dissertation, and defend it orally in the Ph.D. final examination. See the departmental website on the program for a full description of requirements.

International Studies

Overview

Interdepartmental Undergraduate Secondary Major and Minor, Administered by the College of Liberal Arts and Sciences

Through a combination of coursework and study abroad, students who complete a secondary major or minor in International Studies can prepare for careers or advanced study in the international arena, such as foreign service, journalism, advocacy organizations, scientific or research institutions, business, nongovernmental development organizations (NGOs), humanitarian agencies, environmental organizations, human rights organizations, think tanks, international agriculture, and international engineering. Students in International Studies gain an understanding of global issues, learn to communicate across cultures, develop awareness of cultural ideas and attitudes, and are well positioned to become global leaders in their chosen field.

A secondary major and a minor in International Studies are available for undergraduates. The program requirements are structured around a combination of a designated Topical Module and a Geographic Region, both selected by the student. Each student's program of study is designed to reflect opportunities at Iowa State University as well as the academic, intellectual, and professional interests of the student.

Student Learning Outcomes

Upon completion of the second major in International Studies, students will be able to:

1. Read, write and speak a language other than their native language at an intermediate level to effectively communicate with people from other cultures.
2. Understand factual knowledge about world economic and political systems, events, cultures, and geography and to critically analyze global issues, especially as they relate to globalization.
3. Understand, interpret, and articulate the major processes, theories, and problems of a selected contemporary global issue within a selected world region to also recognize interconnections between local and global issues and events.
4. Live, study, work, and/or volunteer in a selected world region in order to understand, interpret and articulate major cultural values and issues

and to appreciate the impact of one's own cultural and educational experience on their perception of the world.

Secondary Major

A student seeking a secondary major in International Studies must successfully complete two core courses plus courses in a selected Geographic Region and Topical Module; demonstrate proficiency in a language relevant to the selected geographic region (see below); and participate in a required study, service, or work abroad program (see below).

Requirements for the Secondary Major in International Studies:

- INTST 2350 Introduction to International Studies
- INTST 4300 Seminar in International Studies
- 9 credits of coursework (at least 6 of which are numbered 3000 or above) from one of the following Geographic Regions:
 - Africa and the Middle East
 - Asia
 - Latin America
 - Western Europe
 - Russia, East Europe and Central Asia
- 9 credits of coursework (at least 6 of which are numbered 3000 or above) from one of the following Topical Modules:
 - Global Environmental Issues
 - Globalization and Economic Development
 - International Issues in Science and Technology
 - International Communication
 - International Conflict
 - Social and Cultural Change

Click here (<https://intst.las.iastate.edu/academics/secondary-major/>) for courses approved for credit for the Geographic Regions and Topical Modules.

- 3 additional credits of coursework selected from either the Geographic Region or Topical Module.

Language Proficiency

- Proficiency in a world language that is relevant to the selected geographic region. This can be achieved by completing the 2020 level (or higher) of the language. Students whose first language is not English must still meet this requirement if their first language is not relevant to their selected geographic region.

Study/Service/Work Abroad Experience

- Study, service, or internship abroad for a minimum of 3 weeks, earning a minimum of 3 credits. The credits must be transferable to Iowa State.

The major must include a minimum of 12 credits not used to meet any other department, college, or university requirement.

Minor

A student seeking a minor in International Studies must successfully complete two core courses plus courses in a selected Geographical Region and Topical Module; demonstrate proficiency in a language relevant to the selected geographic region (see below); and participate in a required study, service, or work abroad program (see below).

Requirements for the Minor in International Studies:

- INTST 2350 Introduction to International Studies
- INTST 4300 Seminar in International Studies
- 6 credits of coursework (at least 3 of which are numbered 3000 or above) from one of the following Geographic Regions:
 - Africa and the Middle East
 - Asia
 - Latin America
 - Western Europe
 - Russia, East Europe and Central Asia
- 6 credits of coursework (at least 3 of which are numbered 3000 or above) from one of the following Topical Modules:
 - Global Environmental Issues
 - Globalization and Economic Development
 - International Issues in Science and Technology
 - International Communication
 - International Conflict
 - Social and Cultural Change
- Proficiency in a world language that is relevant to the selected geographic region. This can be achieved by completing the 2020 level (or higher) of the language.
- Study, service, or internship abroad for a minimum of 3 weeks, earning a minimum of 3 credits. The credits must be transferable to Iowa State.

Click here (<https://iastate.box.com/shared/static/2egqdgik8da0qiipayf.pdf>) for courses approved for credit for the Geographic Regions and Topical Modules.

The minor must include a minimum of 9 credits not used to meet any other department, college, or university requirement.

Language Proficiency

- Proficiency in a world language that is relevant to the selected geographic region. This can be achieved by completing the 2020 level (or higher) of the language or by passing an approved exam. Students whose first language is not English must still meet this requirement if their first language is not relevant to their selected geographic region.

Study/Service/Work Abroad Experience

- Study, service, or internship abroad for a minimum of 3 weeks, earning a minimum of 3 credits. The credits must be transferable to Iowa State.

Journalism and Mass Communication

<http://www.greenlee.iastate.edu> (<http://www.greenlee.iastate.edu/>)

The journalism and mass communication major prepares students for careers that involve all aspects of news and information. Emphasis is placed on generating ideas, organizing, writing, editing, and presenting information for various media platforms and audiences. Students work with advisors to develop a program of study that prepares them for work in communication-specific areas including broadcast media, magazines and/or newspapers, photojournalism, science communication, visual communication, and digital media. Coursework in this major focuses on writing, research, digital and emerging media, and professional abilities. Students are required to complete a capstone internship experience to practice and refine their skills.

The Greenlee School of Journalism and Communication prepares students for the field of communication. The school offers three majors:

- Advertising Bachelor of Arts (ADVRT)
- Journalism and Mass Communication Bachelor of Science (JLMC)
- Public Relations Bachelor of Science (PR)

In addition, the Greenlee School offers a 4+1 program allowing students to complete their B.A. or B.S. and earn an M.S. in journalism and mass communication in fewer semesters.

Professional skills are taught and practiced alongside academic requirements using the latest technology and leading-edge communication trends and methods.

Founded in 1905, the unit was one of the first journalism programs to be accredited in 1948 and continues to be one of the longest continuously accredited programs in the country. Accreditation is based on the principle that students need a broad-based, liberal arts education and solid core courses within the discipline. Students taking one major at the school may not seek an additional major or a minor in the school. All

students are required to take an additional major or a minor outside the school as an area of expertise.

Student Learning Outcomes

Students who major in programs of the Greenlee School of Journalism and Communication are expected to develop competencies in 10 key areas:

- Apply the principles and laws of freedom of speech and press, in a global context, and for the country in which the institution that invites ACEJMC is located.
- Demonstrate an understanding of the multicultural history and role of professionals and institutions in shaping communications.
- Demonstrate culturally proficient communication that empowers those traditionally disenfranchised in society, especially as grounded in race, ethnicity, gender, sexual orientation and ability, domestically and globally, across communication and media contexts.
- Present images and information effectively and creatively, using appropriate tools and technologies.
- Write correctly and clearly in forms and styles appropriate for the communications professions, audiences and purposes they serve.
- Demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity.
- Apply critical thinking skills in conducting research and evaluating information by methods appropriate to the communications professions in which they work.
- Effectively and correctly apply basic numerical and statistical concepts.
- Critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness.
- Apply tools and technologies appropriate for the communications professions in which they work.

The Journalism and Mass Communication Major

To receive a Bachelor of Science degree in journalism and mass communication, a student must earn at least 120 credits. A minimum of 72 credits must come from courses other than ADVRT, JLMC or PR. At least 50 of these credits must come from the liberal arts and sciences. Overall, at least 45 credits must be from 3000-level or above.

The degree requirements allow for a minimum of 34 credits and a maximum of 48 credits to be taken in ADVRT, JLMC and PR. These include:

JLMC 1100	Orientation to Journalism and Communication	1
JLMC 2400	Principles of Journalism	3

JLMC 2010	Reporting and Writing for the Mass Media (C+ or better)	3
One of the following two courses with C+ or better:		
JLMC 3020	Intermediate Reporting and Writing for the Mass Media	3
or JLMC 3030	Reporting and Writing for Broadcast Media	
3000-level ADVRT, JLMC or PR Electives		9
JLMC 4600	Law of Mass Communication	3
JLMC 4620	Media Ethics, Freedom, Responsibility	3
4000-level ADVRT, JLMC, or PR Electives		6
JLMC 4990A	Professional Media Internship: Required	3
Total Credits		34

Journalism and mass communication majors are also required to take:

STAT 1010	Principles of Statistics (or another approved statistics course)	4

As majors in the College of Liberal Arts and Sciences, journalism and mass communication students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

University Requirement: Students in all ISU majors must complete a three-credit course in U.S. Diversity, as well as a three-credit course in International Perspectives. The approved course lists are found at the following web addresses: (U.S. Diversity) <http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses> (<http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses/>) and (International Perspectives) <http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current> (<http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/>). Students must also demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500.

College of LAS Requirement: Minimum of 120 credits, including a minimum of 45 credits at the 3000-level and above. You must also complete the LAS world language requirement, LAS career proficiency requirement, and any unmet ISU admission requirements.

Greenlee majors and minors cannot take ADVRT, JLMC or PR courses pass/not pass.

Minor or Additional Major: Students are required to fulfill a secondary area of expertise. This requirement can be met by declaring a minor or an additional major outside of the Greenlee School of Journalism and Communication. Students taking one major at the school may not seek an additional major or a minor in the school.

Juniors can apply to a concurrent degree program and earn a B.S. and an M.S. in journalism and mass communication in fewer semesters. Contact the Director of Graduate Education for more information on the Greenlee School's 4+1 Program.

Minor in Journalism and Mass Communication

Students cannot select more than one minor in the Greenlee School of Journalism and Communication. Minors in the Greenlee School are not available to Greenlee majors.

For a minor in journalism and mass communication, students complete 15 credits. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

JLMC 1010	Mass Media and Society	3
JLMC 2400	Principles of Journalism	3
9 credits from the following:		9
JLMC 2420	Visual Principles for Mass Communicators	
JLMC 3070	Digital Video Production	
JLMC 3470	Science Communication	
JLMC 3900	Professional Skills Development	
JLMC 4010	Mass Communication Theory	
JLMC 4060	Media Management

JLMC 4640	Journalism and Literature	
JLMC 4740	Communication Technology and Social Change	
JLMC 4760	World Communication Systems	
JLMC 4770	Diversity in the Media	
JLMC 4970	Special Topics in Communication	
Total Credits		15

Greenlee majors and minors cannot take ADVRT, JLMC or PR courses pass/not pass.

Concurrent Undergraduate and Graduate Programs

The Greenlee School offers three concurrent degree programs:

- B.A. Advertising/M.S. Journalism and Mass Communication
- B.S. Journalism/M.S. Journalism and Mass Communication
- B.S. Public Relations/M.S. Journalism and Mass Communication

Enrollment in the Greenlee School's concurrent degree programs enables students to complete coursework for the undergraduate and graduate programs on a five-year accelerated timeline – rather than the typical six-year timeline for the two degrees. Graduates of the concurrent degree program will be prepared to face today's rapidly changing media environment and contribute to society by becoming a leader within the communication field. Upon completion of the undergraduate program (bachelor's degree), students can choose between two tracks in the master's program (master's degree): one for students who desire specialized study in communication theory and research and one for students who wish to develop or strengthen their professional and strategic communication skills. At the master's level, the school is well known for developing practitioners and scholars in science communication, political communication, multicultural communication and media industries. The ISU Graduate Handbook outlines policies and requirements for concurrent degree programs. Concurrent degree students must complete all academic requirements and required coursework for both degrees.

To be eligible for a concurrent degree program, currently enrolled Greenlee ADVRT, JLMC or PR students must 1) be defined as seniors by their number of cumulative ISU credits (90 credits or more) and 2) have successfully completed JLMC 2010 (required of all three undergraduate majors) with a C+ or better. Before beginning graduate coursework, concurrent degree candidates must formally indicate their interest by contacting the Greenlee School's Director of Graduate Education. Interested students must then apply to the master's program no later than March 1 of the year prior to taking graduate coursework. Application and admissions requirements for the master's program (<https://greenlee.iastate.edu/graduate/graduate-admissions/>) are the same for concurrent students as those applying to the master's program after completing an undergraduate degree. A thesis or creative component is required for all concurrent degree students.

To receive a Bachelor of Science/arts degree from the Greenlee School in advertising, journalism or public relations, a student must earn at least 120 credits and complete all required courses. To receive a Master of Science degree from the Greenlee School in journalism and mass communication, a student must earn at least 32 credits and complete all required courses.

Preference for assistantships will be given to students who have completed all of their undergraduate coursework.

Student Learning Outcomes

1. To develop an understanding of the central issues and current research important to the field of journalism and communication.
2. To be familiar with the breadth and depth of the journalism and communication profession.
3. To be able to communicate acquired knowledge in the field.

4. To be aware of ethical issues that pertain to the field of journalism and communication.
5. To develop the ability to design and present an independent and meaningful research project.

Graduate Programs

Master of Science

The Greenlee School of Journalism and Communication offers work for a Master of Science degree in journalism and mass communication.

Majors plan a program of study in one of two tracks:

I. Academic track – The School offers advanced academic preparation in communication theory and research, leading to the Master of Science degree. Graduate work prepares students to use and contribute to research and scholarship in the field of communication. This track requires a thesis based on original research, which must be defended successfully before a committee at the end of the program.

Areas of research emphasis includes: science and risk communication, media effects, advertising, public relations, political communication, communication technology, law and ethics, international communication, visual communication and emerging media.

II. Professional track – The School offers advanced professional study in journalism and mass communication leading to the Master of Science degree. Graduate work prepares students for professional careers in a variety of mass communication fields. Students with limited training or experience in journalism and mass communication may include skills courses in their programs, but the credits for those courses may not count toward the graduate degree. This track requires a creative component which must be defended successfully before a committee at the end of the program.

All graduate students must complete 32 credits for graduation, comprised of four core classes, at least two electives outside the Greenlee School, and at least four thesis or creative component credits. The following core courses account for 10 credits of the needed 32 credits.

JLMC 5010	Theories of Mass Communication	3
JLMC 5020	Fundamentals of Communication Research Methods	3
JLMC 5920	Introduction to Graduate Study in Journalism and Mass Communication	1
JLMC 5980	Seminars in Mass Communication	

Each student selects elective courses based on his/her area of emphasis and career goal, in consultation with the student's major professor and Program of Study Committee.

Student Learning Outcomes

1. To develop an understanding of the central issues and current research important to the field of journalism and communication.
2. To be familiar with the breadth and depth of the journalism and communication profession.
3. To be able to communicate acquired knowledge in the field.
4. To be aware of ethical issues that pertain to the field of journalism and communication.
5. To develop the ability to design and present an independent and meaningful research project.

Graduate Minor

The Greenlee School graduate program offers minor work for students majoring in other departments. The M.S. minor requires:

JLMC 5010, JLMC 5100 and one other course in journalism and mass communication for a total of 9 credits taken within the Greenlee School.

Concurrent Programs

The Greenlee School's concurrent degree programs enable interested students the opportunity to complete coursework for the undergraduate and graduate programs on a five-year accelerated timeline – rather than the typical six-year timeline for the two degrees.

Latin American Studies Certificate Interdepartmental Undergraduate Program

The certificate in Latin American Studies is a cross-disciplinary course of study in the College of Liberal Arts and Sciences and is designed for undergraduates in any major who wish to enhance their degree and employment possibilities by adding expertise in Latin America and competence in the Spanish language.

Objectives

- Provide opportunities for students to develop skills and understanding about issues concerning Latin America by bringing them into contact with faculty members from many different academic backgrounds
- Provide students with an international immersion experience where they gain cultural awareness and sensitivity
- Prepare students for work or advanced study in Latin America, such as in foreign service, journalism, advocacy organizations, scientific or research institutions
- Help students acquire proficiency in one of the principal languages of Latin America (Spanish)

- Guide students in interdisciplinary study leading to an understanding of the multi-faceted picture of the past, present, and future of Latin America

Learning Outcomes

Upon Completion of the Certificate in Latin American Studies, students will be able to:

- Demonstrate understanding of key concepts pertaining to Latin American cultural, historical and political events
- Understand, interpret and articulate the major processes, theories and problems of selected contemporary and historical issues in Latin America
- Demonstrate oral, aural, and written proficiency in Spanish equivalent to the mid-advanced level
- Effectively communicate with persons of Latin American cultures
- Become effective global citizens through knowledge and comparison of the cultures and issues of the United States and Latin American countries
- Be able to read Latin American cultural, literary, and historical texts in the target language with comprehension and analytical insight
- Demonstrate awareness of cultural values, beliefs, and ideologies of the various Latin American countries
- Demonstrate a thorough knowledge of the geography of the Latin American countries

General Requirements

Requirements for the Certificate in Latin American Studies are satisfied through formal language instruction and by completing a minimum of 21 credits at the 3000 level or above. Students will take coursework in at least three different disciplines and departments (Spanish, Anthropology, and Political Science) with other possible course offerings in LAS, History, Agriculture, and Agronomy.

Course Requirements

Students will complete 6 credits of core courses:

SPAN 3220	Latin American Civilization	3
or SPAN 3240	Latin America Today	
ANTHR 3230		3

Students should consult with their advisor for alternative courses in the event a course is not available.

Other Requirements

Students will complete an additional 15 credits selected from the approved list of courses in Latin American Studies or courses approved by the Latin American Studies Certificate advisor at the 3000 level or above.

- No more than 3 credits may be taken as a 4900, independent study, and the topic must deal with Latin America.
- A minimum of 9 credits applied toward the Certificate cannot be used to meet any other departmental, college, or university requirement.
- Students may receive credit on a pre-approved basis for internships completed in Latin America. No more than 3 credits from this area may be applied to the Certificate.
- Courses taken for the Certificate may not be taken on a pass not-pass basis.
- Credits for a Certificate may be used to satisfy the credit requirement for graduation and to meet the credit requirements for courses numbered 3000 and above.
- A certificate is not awarded if the baccalaureate degree is not finished.
- For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree.
- After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate.
- A cumulative grade point average of at least 2.00 is required in courses taken at ISU for a certificate.

LANGUAGE REQUIREMENT

- The minimum requirement in formal language instruction is completion of two years or the equivalent of Spanish at the university level. At ISU the completion of Spanish 2020 satisfies this requirement.
- Native speakers, or those with in-field experience of another Latin American language with a level equivalent to 2020 or higher can have the language requirement waived. Equivalence will normally be assessed by a faculty member/CLEP exam in the Dept. of World Languages and Cultures.
- While students are encouraged to enroll in language instruction courses (i.e., conversation and composition) above the 3000 level, no more than 6 credits of language study (3010,3030,3040) may be applied toward fulfilling language requirements for the Certificate. Students should be aware that all 3000-level literature and culture/civilization courses in the Dept. of World Languages and Cultures have prerequisites.

Study Abroad

Students are required to participate in an ISU-approved study abroad program in a Latin American country with a minimum duration of 4 consecutive weeks. The Study Abroad Office has a list of ISU-approved programs. Students may elect to participate in other study abroad programs with the approval of the Latin American Studies Advisory Committee.

Approved courses available toward the Certificate:

The decision as to whether or not a course can be counted toward the certificate is based primarily on course title and description as it appears in the current ISU course catalog. Courses which primarily deal with Spain or Portugal and their cultures do not count toward the certificate. Students should consult with the advisor for the Latin American Studies Undergraduate Certificate program before registering to be sure a particular travel course or field school offering can apply toward the certificate.

Leadership Studies

Overview

The Leadership Studies Program provides a strong foundation of coursework and experiences for undergraduate students who seek

to study, understand and apply the principles of leadership in their current activities and, eventually, in their careers. This interdisciplinary program, designed for students in all majors, consists of a 21-credit-hour leadership studies certificate, a 15-credit leadership studies minor, and a suite of leadership studies courses. Students earning either the certificate or minor in leadership studies will develop the knowledge and skills to effect positive change as they enter the public, nonprofit or private sectors. The certificate and minor are awarded by the College of Liberal Arts and Sciences and noted on the student's transcript. To learn more about the program, visit our website: <https://leadership.las.iastate.edu/>.

Objectives

- Develop students' leadership capacity—which encompasses individual-level capabilities of self-awareness, integrity and commitment; group-level capabilities of collaboration, shared purpose and handling controversy with civility; and community-level capabilities of citizenship and civic responsibility.
- Provide opportunities for students to study leadership by learning effective communication practices, organizational theories, ethical principles, an appreciation of diversity, intrapersonal development and the value of community service.
- Cultivate students' understanding of social empowerment and social justice to create positive and sustainable change.
- Challenge students to critically examine leadership at the intrapersonal, interpersonal, team, organizational and societal levels.
- Bring students into contact with community leaders and faculty members from diverse academic departments, backgrounds and leadership experiences.
- Prepare students to undertake leadership roles in their careers and in service to their community through coursework and co-curricular engagement.

Learning Outcomes

Upon completion of the certificate or minor in leadership studies, students will be able to:

- Recognize leadership as a set of skills, knowledge and attitudes that can be learned.
- Understand traditional and emergent leadership theories and apply them in practice.
- Comprehend key concepts of communication theories, organizational theories, contemporary diversity issues and ethical principles.
- Practice and evaluate their own capacity to lead effectively within teams, organizations and diverse communities.
- Develop and implement plans for continually improving their leadership capacity.
- Demonstrate proficiencies in written and oral communication.

Leadership Studies Minor

The minor in leadership studies requires the completion of 15 credit hours through three 3-credit-hour required courses in leadership and organizational theory, and an additional 6 credit hours earned from approved leadership electives.

At least 9 credits must be taken in courses numbered at the 3000-level or above. At least 9 credits used for the minor cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 3000 or above. Courses for the minor cannot be taken on a pass/not-pass basis. A cumulative grade point average of at least 2.0 is required in courses taken for the minor.

Core Courses: 9 required credits

LDST 3010	Leadership Theory and Practice	3
LDST 3220	Leadership in a Diverse Society	3
MGMT 3720	Ethical and Responsible Management	3
	or MGMT 4220 Negotiation and Conflict Resolution	

Leadership Electives: Choose 6 credits from the following:

AESHM 2110	Leadership Experiences and Development (LEAD)	3
AESHM 4210	Developing Global Leadership: Maximizing Human Potential	3
AGEDS 3150	Personal, Professional, and Entrepreneurial Leadership in Agriculture	3
COMST 2180	Conflict Management	3
COMST 3130	Leadership Communication Theories	3
ENGR 1500	Foundations of Leadership Development and Learning	1
ENGR 2500	Leadership in Engineering Teams	1
ENGR 3500	Dean's Leadership Seminar	1
LDST 1220	Leading with Purpose	1
LDST 2700	Campus Leadership Development	3
LDST 2910A	Leading Change: General	4
LDST 2910B	Leading Change: U.S. Diversity	4
LDST 2910C	Leading Change: International Perspectives	4
LDST 2930	Special Projects	3
LDST/WGS 3330	Women, Gender, and Leadership	3
LDST 3700	Special Topics	1-3
LDST 4220	Leadership Capstone Seminar: Theory to Practice	3
ME 4120	Ethical Responsibilities of a Practicing Engineer	3
MGMT 3720	Ethical and Responsible Management	3
MGMT 4220	Negotiation and Conflict Resolution	3

MGMT 4720	Diversity, Equity, and Inclusion in Organizations	3
PHIL 2350	Ethical Issues in a Diverse Society	3
SPCM 3120	Business and Professional Speaking	3

Leadership Studies Certificate

The certificate in leadership studies requires the completion of 21 credit hours including the 9-credit leadership studies core. An additional 12 credit hours are earned from approved electives including 3 hours in communication, 6 hours in leadership, and 3 hours of a capstone experience through a course, internship or study abroad. The capstone course should focus on the scholarship of leadership in the student's field of study, whereas an internship or a study abroad should provide a leadership-in-practice experience.

At least 9 credits must be taken in courses numbered at the 3000-level or above. At least 9 credits used for the certificate cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Courses for the certificate cannot be taken on a pass/not-pass basis. A cumulative grade point average of at least 2.0 is required in courses taken for the certificate.

Core Courses:

9 credits of required core courses

LDST 3010	Leadership Theory and Practice	3
LDST 3220	Leadership in a Diverse Society	3
MGMT 3720	Ethical and Responsible Management	3
	or MGMT 4220 Negotiation and Conflict Resolution	

Communication Electives:

Choose 3 credits from the following:

COMST 2140	Professional Communication	3
COMST 3100	Intercultural Communication	3
COMST 3140	Organizational Communication	3
ENGL 3020	Business Communication	3
SPCM 2120	Fundamentals of Public Speaking	3
SPCM 3120	Business and Professional Speaking	3
SPCM/WGS 3230	Gender and Communication	3

Leadership Electives:

Choose 6 credits from the following:

AESHM 2110	Leadership Experiences and Development (LEAD)	3
AESHM 2220	Creativity on Demand	3
AESHM 2870	Principles of Management in Human Sciences	3

AESHM 4210	Developing Global Leadership: Maximizing Human Potential	3
AESHM 4740	Entrepreneurship in Human Sciences	3

POLS 4750	Management in the Public Sector	3
POLS 4870	Electronic Democracy	3
SOC 3100	Community	3

SOC/POLS 3340	Politics and Society	3
SPCM 1100	Listening	3
SPCM/POLS 4170	Campaign Rhetoric	3
UST 3150	Cyclone Aide Leaders Seminar	2
WGS 3010	International Perspectives on Women and Gender	3
WGS 4350	Gender, Globalization and Development	3

Capstone Courses:

Choose 3 credits of the following:

LDST 4220	Leadership Capstone Seminar: Theory to Practice	3
LDST 4900	Independent Study (Must include a leadership focus and be pre-approved by the leadership studies faculty.)	1-3

Study abroad: Must include a leadership focus and be pre-approved by the leadership studies faculty.

Other capstones may be approved with leadership studies faculty permission if they include a significant leadership component (e.g., COMST 4040 or AESHM 4210 with a leadership-based project). Students wishing to take a capstone course not listed here must receive approval prior to registering for the course and must demonstrate in writing how the course includes a significant leadership component.

Bachelor of Liberal Studies

Bachelor of Liberal Studies Degree

The Bachelor of Liberal Studies degree (B.L.S.) is a general studies degree in the liberal arts. It was established by the three Iowa Regent universities primarily to meet the needs of Iowans who want to earn a college degree but whose circumstances present obstacles to completing a traditional on-campus degree program. While the B.L.S. does not have traditional majors focused on a specific discipline and students have more flexibility in choosing courses that apply to their program, the requirements for the degree are as rigorous as requirements for other degree programs offered by Iowa State University. With the assistance of a B.L.S. advisor, students can structure a program that meets their individual educational, vocational or personal goals.

The B.L.S degree is a transfer-friendly degree. Work done in community colleges or other accredited colleges and universities can be applied toward the degree and can often meet requirements for one of the B.L.S. majors. Up to three-fourths of the total degree requirements can be transferred from accredited institutions. Students with military or professional and technical credits with outcomes contributing to the learning outcomes of the distribution areas of either major are encouraged to submit coursework for review to potentially apply such

credits to the major. The B.L.S. degree has no residence requirements, but students are expected to have 30 credits from ISU earned during the junior and/or senior year. Students who have completed an Associate of Arts degree at an Iowa, Illinois, or Minnesota community college will not have to take any additional courses to satisfy the General Education Areas for the College of Liberal Arts and Sciences. Transfer coursework will first be applied to the General Education Areas for the College and the academic advisor will mark any unmet general education credits as satisfied. Unused transfer coursework can apply in the distribution areas; an academic advisor will assist in determining course placement.

Students can earn the Bachelor of Liberal Studies Degree by choosing to major in either Liberal Studies or Professional Studies.

Declaring the B.L.S. Degree

Students must have completed at least 24 semester credits of collegiate work acceptable toward graduation at ISU to declare the B.L.S.

Student Learning Outcomes of the Liberal Studies Major

In addition to meeting the learning goals of the general education program of the College of Liberal Arts and Sciences and meeting University wide learning goals, Liberal Studies graduates should be able to:

- Use appropriate learning strategies to gain new knowledge.
- Integrate knowledge and modes of thinking from multiple disciplines.
- Apply their knowledge to evaluate issues and solve problems.
- Connect their learning to their professional goals.

Student Learning Outcomes of the Professional Studies Major

In addition to meeting the learning goals of the general education program of the College of Liberal Arts and Sciences and meeting University-wide learning goals, Professional Studies graduates should be able to:

- Apply their knowledge to evaluate issues and solve problems.
- Express thoughts and ideas clearly and effectively.
- Demonstrate awareness of the strengths of others and build collaborative relationships with diverse team members to achieve common goals.
- Demonstrate ability to select and use appropriate technology in order to accomplish a given task.
- Connect their learning to their professional goals.

Requirements for the B.L.S. Degree With a Major in Liberal Studies

All students seeking a B.L.S. degree must meet the University-wide requirements (<https://catalog.iastate.edu/collegescurricula/>) for

graduation, including earning a total of 120 credits. The Liberal Studies major requires 36 credits of coursework across three of five areas of distribution according to the requirements laid out below. Students determine which distribution areas to emphasize in their degree program through consultation with their Bachelor of Liberal Studies academic advisor.

Liberal Studies students must also meet the General Education, World Languages/Cultures and Career Proficiency Requirements of the College of Liberal Arts and Sciences and earn a minimum of 39 credits at the 3000/4000 level. Courses taken at Iowa State University on a pass/not pass basis may be counted toward graduation only as electives.

University-wide Requirements

Communication Proficiency: Foundation Courses		6
ENGL 1500	Critical Thinking and Communication	
ENGL 2500	Written, Oral, Visual, and Electronic Composition (with a grade of C or better)	
or equivalent of ENGL 1500, ENGL 2500		
Communication Proficiency: Upper-level curricula (grade C- or better)		3
ENGL 3020	Business Communication	
or ENGL 305 Creative Writing: Nonfiction		
or ENGL 309 Proposal and Report Writing		
or ENGL 314 Technical Communication		
or comparable extensive writing experience		
International Perspectives*		3
U.S. Diversity*		3

*Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how these courses can apply to your graduation plan.

LAS General Education, World Languages/Cultures, and Career Proficiency Requirements

Arts and humanities*		12
Mathematics, statistics, or computer science*		3
Natural sciences*		8
Social sciences*		9
World languages/Cultures**		3-8
LAS 2030	Professional Career Preparation	1

*A list of courses acceptable in the general education groups can be obtained from the college website (<http://www.las.iastate.edu/students/academics/general-education/>).

**The requirement may be met by completion of three or more years of high school study in one world language; by meeting the LAS World Language requirement; or by taking six credits from the list of International Perspectives courses, three credits of which cannot be used to satisfy another degree requirement.

Distribution Requirements and Electives

A minimum of 12 credits is required in each of three of the five distribution areas listed below. Students determine which distribution areas to include in their degree program through consultation with their Bachelor of Liberal Studies academic advisor.

Distribution Areas (Three of five below, with a minimum of 6 credits at 36 the 3000 level or above in each of the three)

Humanities (for example, literature, philosophy, history, religion, art and music appreciation)

Communications and arts (for example, journalism, speech, writing, drama, art, world language, communication studies, advertising, public relations)

Natural sciences and computational disciplines (for example, chemistry, physics, biology, geological and atmospheric sciences, mathematics, statistics, computer science, data science, environmental science)

Social sciences (for example, sociology, psychology, economics, political science, anthropology, geography)

Professional fields (for example, business, education, family and consumer sciences, agriculture, engineering – generally courses taught outside the College of Liberal Arts and Sciences)

Electives to bring total credits to at least 120

Varies

Other Requirements

Included in the minimum of 120 credits needed for graduation must be the following:

30 credits from ISU earned during the junior/and or senior year.

39 upper-level (3000 level or above) credits from an accredited four-year college with a grade point average of 2.0 or higher.

A minimum grade point average of at least 2.00 (a C average).

No more than 9 credits of 4900 (Independent Study) courses may be counted toward graduation.

Students in the B.L.S. program are not eligible for additional majors, but in consultation with their advisor they may earn a Certificate or minor. Minors attached to a B.L.S. must include 6 credits taken at Iowa State University in upper-level (3000 level or above) courses and must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Criteria for graduating with distinction and other academic honors with a B.L.S. degree are available under Scholastic Recognition.

Requirements for the B.L.S. Degree With a Major in Professional Studies

All students seeking a B.L.S. degree must meet the University-wide requirements (<https://catalog.iastate.edu/collegescurricula/>) for graduation, including earning a total of 120 credits. Students pursuing the Professional Studies major will take coursework across multiple areas aimed to develop broad professional competencies in critical thinking, communication, leadership/teamwork, and technology. Studies may be focused on coursework in closely related disciplines or diversified over several disciplines.

The Professional Studies major requires 33 credits that meet the distribution area requirements laid out below. Professional Studies students must also meet the General Education, World Languages/Cultures and Career Proficiency Requirements of the College of Liberal Arts and Sciences and earn a minimum of 39 credits at the 3000/4000 level. Courses taken at Iowa State University on a pass/not pass basis may be counted toward graduation only as electives.

University-wide Requirements

Communication Proficiency: Foundation Courses		6
ENGL 1500	Critical Thinking and Communication	
ENGL 2500	Written, Oral, Visual, and Electronic Composition (with a grade of C or better)	
or equivalent of ENGL 1500, ENGL 2500		
Communication Proficiency: Upper-level curricula (grade C- or better)		3
ENGL 3020	Business Communication	
or ENGL 305 Creative Writing: Nonfiction		
or ENGL 309 Proposal and Report Writing		
or ENGL 314 Technical Communication		
or comparable extensive writing experience		
International Perspectives*		3
U.S. Diversity*		3

*Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how these courses can apply to your graduation plan.

LAS General Education, World Languages/Cultures, and Career Proficiency Requirements

Arts and humanities*	12
Mathematics, statistics, or computer science*	3
Natural sciences*	8

Social sciences*	9
World languages/Cultures**	3-8
LAS 2030 Professional Career Preparation	1

*A list of courses acceptable in the general education groups can be obtained from the college website (<http://www.las.iastate.edu/students/academics/general-education/>).

**The requirement may be met by completion of three or more years of high school study in one world language; by meeting the LAS World Language requirement; or by taking six credits from the list of International Perspectives courses, three credits of which cannot be used to satisfy another degree requirement.

Distribution Requirements and Electives

Students determine which distribution areas to emphasize in their degree program through consultation with their Bachelor of Liberal Studies academic advisor. Students are encouraged to select classes that prepare them for particular labor sectors and to talk with their advisor about adding at least one minor or certificate.

Distribution Areas (Three credits in each of the four areas below, 33 with a minimum of 9 credits in at least two of the areas. 15 of the 33 credits required for this major must be at the 3000 level or above.)

- Critical Thinking (for example, history, philosophy, political science, psychology)
- Communication (for example, communication studies, journalism, speech, writing, world language, advertising, public relations)
- Leadership/Teamwork (for example, classes that apply to the Leadership Studies certificate or minor)
- Technology (for example, computer science, engineering, and other coursework focused on using technology)

Electives to bring total credits to at least 120 Varies

Other Requirements

Included in the minimum of 120 credits needed for graduation must be the following:

- 30 credits from ISU earned during the junior/and or senior year.
- 39 upper-level (3000 level or above) credits from an accredited four-year college with a grade point average of 2.0 or higher.
- A minimum grade point average of at least 2.00 (a C average).
- No more than 9 credits of 4900 (Independent Study) courses may be counted toward graduation.
- Students in the B.L.S. program are not eligible for additional majors, but in consultation with their advisor they may earn a Certificate or minor. Minors attached to a B.L.S. must include 6 credits taken at Iowa State

University in upper-level (3000 level or above) courses and must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Criteria for graduating with distinction and other academic honors with a B.L.S. degree are available under Scholastic Recognition.

Linguistics Overview

Linguistics is a cross-disciplinary program designed to meet the needs of students interested in various aspects of language—its structure, history, varieties, meanings, and uses. The program includes courses in anthropology, computer science, English, psychology, and world languages and cultures, thus providing a multi-disciplinary approach to the study of human language.

Courses in linguistics serve as background for students interested in any career that involves working with language, such as teaching English as a first and as a second language, second language studies, speech-language pathology, cross-cultural communication, law, linguistic anthropology, computational linguistics, and psycholinguistics.

In the College of Liberal Arts and Sciences, courses in linguistics can be applied as electives or as part of the group requirements. They may also be used in a minor or in a major. Linguistics majors earn a Bachelor of Arts.

Learning Outcomes

Students who major in Linguistics at Iowa State University will be able to

- display extensive knowledge of the primary areas of linguistics, especially syntax, morphology, and phonology/phonetics.
- identify and analyze descriptive and prescriptive approaches to language description.
- display a sophisticated understanding of the hierarchical and systematic nature of human language.
- demonstrate skills in the intersection of language analysis and technology.
- develop methodological skills for carrying out linguistic analysis, including;
 - analyzing organized and unorganized linguistic data.
 - conducting research, including carrying out literature searches and reviews, formulating testable questions, developing protocols for collecting data, and drawing conclusions based on research goals.
 - formulating effective linguistic arguments in spoken and written form.

- display understanding of how languages change over time by appealing to examples of change in at least three languages.

Linguistics Degree Requirements

Majors in linguistics complete a minimum of 36 hours in linguistics with a grade of C or better in each linguistics course. Courses specifically required are:

LING 1190	Introduction to World Languages	3
LING 2070	Introduction to Symbolic Logic	3
LING 2190	Introduction to Linguistics	3
LING 2200	Descriptive English Grammar	3
LING 3710	Phonetics and Phonology	3
LING 4130	Psychology of Language	3
LING 4200	History of the English Language	3
LING 4370	Grammatical Analysis	3

In addition, linguistics majors must choose 12 credits of elective courses. Discuss choices with the advisor. Suggested areas of further study are:

Computers and Linguistics

LING 3200	Topics in Linguistic Structure	3
LING 3310	Theory of Computing	3
LING 4100	Language as Data	3

Second Language Studies

ENGL 3220	Language and Society	3
ENGL 3240	Introduction to Teaching ESL Literacy	3
ENGL 3250	Teaching Methods for ESL Learners: Oral Communication Skills	3
LING 4250	Second Language Learning and Teaching	3

Sociolinguistics and Language

ENGL 3190	Studies in Language and Diversity	3
ENGL 3220	Language and Society	3
LING 4220	Women, Men, and the English Language	3

Spanish Linguistics

LING 3510	Introduction to Spanish-English Translation	3
LING 3520	Spanish Pronunciation	3
LING 3540	Introduction to Spanish-English Interpretation	3
LING 4620	Contrastive Analysis of Spanish/ English for Translators	3
LING 4630	Contemporary Spanish Linguistics	3

Additional courses in linguistics include ANTHR 3090 and special topics offered through LING 3190 and LING 3200, which are repeatable for

different topics. They also include courses for study abroad, especially LING 3950, and independent studies through LING 4900. Majors in linguistics must show proficiency in a second language equivalent to that achieved after two years of university-level study. Alternatively, majors in linguistics can demonstrate university-level study in two other languages of at least one year each.

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
	or ENGL 2500H Written, Oral, Visual, and Electronic Composition: Honors	

LIB 1600	Introduction to College Level Research	1
Continuing Communication Proficiency is based on one course from ENGL 3140; WLC 3700A, 3700B or 3700C.		

For information about using linguistics courses in an interdisciplinary studies major, see Interdisciplinary Studies.

As majors in the College of Liberal Arts and Sciences, Linguistics students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. You must also complete the LAS world language requirement and career proficiency requirement.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

Undergraduate Minor in Linguistics

Minors in linguistics are individually tailored to the interests of the student, who consults with the linguistics advisor to develop the minor program of study. All minors must have a minimum of 15 credits in linguistics, of which 6 must be in courses numbered over 3000. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. All programs must include LING 2190 Introduction to Linguistics.

Minor in TESL (Teaching English as a Second Language)

Minor in Teaching English as a Second Language (Minor in TESL) is for undergraduate students.

The Minor in TESL provides concentrated coursework that prepares students to teach English to nonnative speakers of English, either in community programs in the United States or in an overseas location.

Students from any program may complete the minor without further studies in linguistics.

For more information, please contact the Linguistics Undergraduate Advisor.

Concurrent B.A. in Linguistics and M.A. in TESL/Applied Linguistics

A concurrent B.A. in Linguistics and M.A. in TESL and Applied Linguistics offers well-qualified students the opportunity for accelerated study, achieving both degrees within a 5-year time frame. A student enrolled in this program pursues a graduate M.A. degree while simultaneously completing the requirements for the B.A. in Linguistics. Completing the concurrent degree program would enable students to enter the workforce one year earlier than through the traditional M.A. degree pathway. Up to six credits can be double-counted toward the requirements for both degrees. Students applying for the concurrent degree program should be motivated, focused, and able to handle a 16+ credit hour/semester schedule.

Eligibility (all qualifications must be met to apply):

1. A minimum 45 credits in undergraduate program complete
2. Two years of ISU foreign language study or bilingualism demonstrated by an approved language test (completed or in progress)
3. At least 12 credits of Linguistics courses completed with a major GPA of 3.2 or higher,
4. A minimum cumulative ISU GPA of 3.0

Timeline

Students should know by the middle of their sophomore year if they are interested in pursuing the concurrent program. We recommend that students plan ahead, and notify the undergraduate linguistics adviser as soon as they know of their intent to apply for the concurrent degree; if possible, the linguistics adviser should be notified of intent to pursue the concurrent degrees by the end of the 4th semester.

Students should apply for concurrent enrollment by the end of the 5th semester of study (and no later than the end of the 6th semester) by filing the Request for Concurrent Enrollment form from the Graduate College and submitting the application materials (listed below).

If accepted into the concurrent enrollment program, students should begin taking graduate courses (by the onset of the fourth year of study). Students accepted into the concurrent enrollment program will continue to work with the undergraduate linguistics adviser until the B.A. degree requirements are met. By the onset of the fifth year of study, students should have identified an area for their thesis/creative component and establish a program of study committee (including a major professor).

Students become full-time graduate students upon acceptance into the concurrent degree program. Students are eligible for research assistantships upon entry into the concurrent degree program, although it should be noted that these opportunities are rare. Student are eligible to apply for a teaching assistantship once all requirements for the B.A. degree are met; TA selection will follow the standard procedures for the department (including GRE scores).

How to Apply

The following components make up your application:

1. Fill out the Request for Concurrent Enrollment form from the Graduate College.
2. Write a statement of purpose, usually 1-2 pages, explaining why you want to pursue the M.A. degree.
3. Obtain three letters of recommendation.
4. Create a curriculum plan with the undergraduate linguistics adviser, who works closely with members of the graduate faculty.
5. Writing sample (which can be a paper written for an undergraduate course at ISU).
6. Submit your materials by e-mail to Teresa Smiley in the Graduate English Office at englgrad@iastate.edu.
7. GRE scores (not required for initial application; required if applying for a teaching assistantship).

The admission criteria are generally the same as those required for all graduate students in the department. Application materials are reviewed by the graduate faculty in linguistics, the department's Director of Graduate Education (DOGE), and the department chair; their recommendations are forwarded on to the ISU Graduate College.

BA in Linguistics

120 credits

- 45 credits at 3000+
- 36 credits in major (6 graduate credits can double count with graduate degree requirements)
- 9 credits English communication (such as ENGL 3140 Technical Communication)
- 12-16 credits of foreign language
- 29 credits in general education: 9 in A&H, 9 in SS, 8 in NS, 3 in math
- Possible linguistics electives:
 - LING 3090, LING 3180, LING 3190, LING 3200, LING 3220, LING 3240, LING 3250, LING 4220, LING 4250, 3000-level Spanish LING courses

MA in TESL/Applied Linguistics

**6 credits (including 5100) can count as an elective in the B.A. degree

Graduate Minor

A graduate minor in linguistics permits students to investigate various aspects of linguistics, emphasizing the ability to think about language in a systematic and disciplined way and to apply the methods of the field to research problems in their own disciplines. Graduate courses for the minor may be cross-listed with courses in Anthropology, Communication Disorders, Computer Science, English, Psychology, and World Languages and Cultures.

For those pursuing a master's degree, a declared minor in linguistics consists of 9 credits in linguistics including two foundation courses:

LING 5110	Introduction to Linguistic Analysis	3
One of the following:		3
LING 5140	Sociolinguistics	
LING 5270	Discourse Analysis	
LING 5370	Corpus Approaches to Grammatical Analysis	
And one elective from the list of courses approved for graduate credit		3
Total Credits		9

For those pursuing a Ph.D. degree, the minor consists of 12 credits in linguistics including:

LING 5110	Introduction to Linguistic Analysis	3
LING 5370	Corpus Approaches to Grammatical Analysis	3
And two electives from the list of courses approved for graduate credit		6
Total Credits		12

Additional courses beyond those listed below may be used as electives. The chair of the supervisory committee can provide information about these.

At least one member of the linguistics faculty will serve on a student's program of study committee. A list of faculty members may be obtained from the Linguistics program website. Ph.D. candidates will write one section of the preliminary examination on an area of linguistics. Students in the Master's in Teaching English as a Second Language/Applied Linguistics are not eligible for a graduate minor in linguistics.

Mathematics

The program in mathematics offers training for students planning to work in mathematics and computation for industry, to continue their studies in graduate school, or to enter secondary education teaching. Students may satisfy the major requirements in several ways, which are designed to meet these various career objectives.

Student Learning Outcomes

Our graduates will

- Understand the fundamentals of a broad range of areas of mathematics, including algebra, analysis, discrete mathematics, geometry, and numerical analysis.
- Demonstrate problem solving skills, critical thinking, and analytical reasoning as applied to mathematical problems and modeling.
- Construct and effectively communicate rigorous arguments to demonstrate mathematical facts in oral, written, and electronic formats.
- Participate in meaningful learning experiences, recognize the central role of mathematics in our society, and develop an appreciation for mathematics as a fundamental intellectual pursuit.

Curriculum

As majors in the College of Liberal Arts and Sciences, Math students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated below for the major.

Mathematics Core

All Math majors are required to earn credit for the following core courses:

MATH 1010	Orientation in Mathematics	1
MATH 1650	Calculus I	4
MATH 1660	Calculus II	4
MATH 2010	Introduction to Proofs	3
MATH 2650	Calculus III	4
One of the following:		3-4
MATH 3170	Theory of Linear Algebra	
MATH 4070	Applied Linear Algebra	
Total Credits		19-20

To complete the major, leading to a Bachelor of Science degree, students must choose from one of the following four pathways:

Standard Mathematics Major

This degree program is designed for students planning to work in industry or those who plan to continue their studies mathematics at the graduate level. Students are required to earn credit for the following courses:

One of the following:		3-4
MATH 2660	Elementary Differential Equations	
MATH 2670	Elementary Differential Equations and Laplace Transforms	
MATH 3010	Abstract Algebra I	3

MATH 4140	Analysis I	3
Additional MATH courses at the 3000, 4000, or 5000 level		15
Total Credits		24-25

Additionally, the courses must include one of the following sequences:

MATH 3010	Abstract Algebra I	6
& MATH 4030 and Intermediate Abstract Algebra		
MATH 3040	Combinatorics	6
& MATH 3140 and Graph Theory		
MATH 3730	Introduction to Scientific Computing	6
& MATH 4810 and Numerical Methods for Differential Equations		
MATH 4140	Analysis I	6
& MATH 4150 and Analysis II		
MATH 4350	Geometry I	6
& MATH 4360 and Geometry II		

Mathematics Major with Actuarial Science Certificate

This degree program is designed for students pursuing a career as an actuary or in the financial sector. Students are required to earn credit for the following courses:

MATH 2400	Mathematics of Investment and Credit	3
MATH 3410	Introduction to the Theory of Probability and Statistics I	4
MATH 4140	Analysis I	3
MATH 4410	Life Contingencies I	3
MATH 4420	Life Contingencies II	3
Total Credits		16

Additionally, students must meet the requirements for the Actuarial Science Certificate (see www.catalog.iastate.edu/collegeofbusiness/actuarialscience/#certificatetext).

Mathematics Major with Applications

This degree program is for students who want to specialize in the application of mathematics to an area of study. It is recommended for those who plan to work in industry or those who plan to continue studying their specialization area at the graduate level. Students are required to earn credit for the following courses:

One of the following:		3-4
MATH 2660	Elementary Differential Equations	
MATH 2670	Elementary Differential Equations and Laplace Transforms	
Four of the following:		12-13
MATH 3010	Abstract Algebra I	
MATH 3040	Combinatorics	

MATH 3140	Graph Theory	
MATH 3410	Introduction to the Theory of Probability and Statistics I	
MATH 3500	Number Theory	
MATH 3650	Complex Variables with Applications	
MATH 3730	Introduction to Scientific Computing	
MATH 3850	Introduction to Partial Differential Equations	
MATH 4140	Analysis I	
MATH 4210	Logic for Mathematics and Computer Science	
MATH 4230	Mathematical Modeling in Biology	
MATH 4240	Introduction to High Performance Computing	
MATH 4690	Introduction to Discrete Mathematics	
MATH 4810	Numerical Methods for Differential Equations	
Courses at the 3000, 4000, or 5000 level from the following designations: AERE ABE, ASTRO, BBMB, BCB, BCBIO, BIOL, BME, BMS, CHE, CHEM, CE, CPRE, COMS, CONE, DS, ECON, EE, EM, ENSCI, FIN, GEN, GEOL, IE, MATE, ME, MIS, MTEOR, MICRO, NUCE, PHIL, PSYCH, PHYS, SE, SOC, STAT		12
Total Credits		27-29

Mathematics Major for Teacher Preparation

This degree program prepares students for a career in secondary education.

All students preparing to become teachers need to complete the core Math classes required of all Math majors, the courses laid out below, and the requirements of the Secondary Major in Education including Student Teaching. Note: Teacher license requirements are established by the Iowa Department of Education and the Iowa Board of Educational Examiners and are subject to change. Recent changes may not be reflected in this catalog, but advisers and faculty will be aware.

COMS 1070	Windows Application Programming	3-4
	or COMS 2070 Fundamentals of Computer Programming	
	or COMS 2270 Object-oriented Programming	
STAT 2010	Introduction to Statistical Concepts and Methods	4
MATH 2660	Elementary Differential Equations	3-4
	or MATH 2670 Elementary Differential Equations and Laplace Transforms	
MATH 3010	Abstract Algebra I	3
MATH 3410	Introduction to the Theory of Probability and Statistics I	4
MATH 4140	Analysis I	3
MATH 4350	Geometry I	3
MATH 4360	Geometry II	3

MATH 3970	Teaching Secondary Mathematics Using University Mathematics	3
MATH 4970	Teaching Secondary School Mathematics	3
Total Credits		32-34

Complementary Coursework for Teacher Preparation

In addition to the courses required for the Math Major and those required for the Secondary Major in Education, the complementary coursework below is required for those seeking licensure in mathematics. Some of these courses, and some of the required coursework for the Secondary Major in Education, can also apply to LAS general education requirements.

PSYCH 2300	Developmental Psychology	3
	or HDFS 1020 Human Development	
EDUC 2800J	Pre-Student Teaching Experience I: Mathematics Clinic	1
EDUC 4800C	Pre-Student Teaching Experience III: Mathematics	0.5-2
	And one course in American History or Government	3
Total Credits		7.5-9

University and College Requirements

In addition to the core and pathway courses, students are also required to earn credit for the following courses:

Courses from General Education Area I - Arts and Humanities	¹	12
Courses from General Education Area IIB - Natural Sciences	¹	8
Courses from General Education Area III - Social Sciences	¹	9
LAS Career Proficiency Requirement (LAS 2030)		1
Courses meeting the international perspectives requirement	²	3
Courses meeting the U.S. diversity requirement	²	3
LIB 1600	Introduction to College Level Research	1
ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	³ 3
One of the following:	⁴	3
ENGL 3020	Business Communication	
ENGL 3030	Free-Lance Writing for Popular Magazines	
ENGL 3050	Creative Writing: Nonfiction	
ENGL 3090	Proposal and Report Writing	
ENGL 3140	Technical Communication	
MATH 4910	Undergraduate Thesis	⁵

¹ Possible choices can be found here: <https://las.iastate.edu/students/academics/general-education/>

² Courses used to meet the U.S. Diversity and International Perspectives requirements can also be used to fulfill general education requirements.

³ Students must earn a grade of C or better.

⁴ Students must earn a grade of C- or better.

⁵ With departmental approval.

Furthermore, students must earn a minimum of 120 credits, including a minimum of 45 credits at the 3000 or 4000 level, and including at least 8 credits in the major at the 3000/4000 level with a grade of C or better. At least 55 of these credits must be earned at a four-year institution, and the last 32 credits must be earned at Iowa State University. A maximum of 16 technical credits are allowed, and a maximum of 9 P-NP credits of free electives may apply. Students must also meet the LAS World Language requirement and have a minimum 2.00 ISU cumulative Grade Point Average.

Four Year Plans

Mathematics Major

Freshman

Undergraduate Minor

The department offers a minor in mathematics. The minor requires at least 16 credits, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University. At least 9 credits must apply exclusively towards the minor and cannot be used to meet any other department, college, or university requirement. Students are required to earn credit for the following courses:

MATH 2010	Introduction to Proofs	3
MATH 2650	Calculus III	4
One of the following:		3-4

MATH 2660	Elementary Differential Equations	
MATH 2670	Elementary Differential Equations and Laplace Transforms	
One of the following:		3-4
MATH 3170	Theory of Linear Algebra	
MATH 4070	Applied Linear Algebra	
One of the following:		3-4
MATH 3010	Abstract Algebra I	
MATH 3040	Combinatorics	
MATH 3140	Graph Theory	
MATH 3410	Introduction to the Theory of Probability and Statistics I	
MATH 3500	Number Theory	
MATH 3650	Complex Variables with Applications	
MATH 3730	Introduction to Scientific Computing	
MATH 3850	Introduction to Partial Differential Equations	
MATH 4140	Analysis I	
MATH 4210	Logic for Mathematics and Computer Science	
MATH 4230	Mathematical Modeling in Biology	
MATH 4350	Geometry I	
MATH 4360	Geometry II	
MATH 4690	Introduction to Discrete Mathematics	
Total Credits		16-19

Graduate Study

The department offers programs leading to a Master of Science or Doctor of Philosophy degree in mathematics or applied mathematics, as well as minor work for students whose major is in another department.

Students desiring to undertake graduate work leading to the M.S. or Ph.D. degree should prepare themselves by taking several upper division mathematics courses.

The M.S. degree requires a student to take at least 30 credit hours and to write a creative component or thesis. Additionally, students must pass a comprehensive oral examination over their coursework and their creative component or thesis. See the online Mathematics Graduate Handbook for specific requirements.

The Ph.D. degree requires a student to take 42 credit hours of coursework in addition to research hours, pass written qualifying examinations, pass an oral preliminary exam, and perform an original research project culminating in a dissertation which is defended by an oral exam.

Ph.D. candidates must have at least one year of supervised teaching experience. See the online Mathematics Graduate Handbook for specific requirements.

Meteorology Overview

Offered by the Department of Geological and Atmospheric Sciences.
(<https://ge-at.iastate.edu/>)

The Bachelor of Science Major in Meteorology: The study of meteorology involves the description of the earth's atmosphere and the processes responsible for its behavior. Students majoring in Meteorology earn a Bachelor of Science. The major satisfies guidelines specified by the American Meteorological Society and meets education requirements for employment with the National Weather Service and the World Meteorological Organization. Successful preparation for professional or graduate work in Meteorology requires that the student develop and integrate a diverse range of skills and knowledge bases. These include weather observing, the physics and dynamics of the global atmosphere, application of new weather technologies, advanced mathematical tools, computer programming and modeling, and effective oral and written communication. The faculty view the senior thesis (MTEOR 4990 Senior Research), in particular, as a capstone experience in which students demonstrate they have achieved this integration. Also, contemporary meteorology is an earth-system science with ties to a variety of human experiences. The electives and general education requirements of the college are further experiences that the meteorology student must integrate with their core meteorology knowledge in order to function effectively in a globally oriented profession.

Meteorology as an Additional Major: The Meteorology program allows students in academic programs with affinity to meteorology to complete an additional major in meteorology through an accelerated pathway. Students earning a B.S. degree in electrical or aerospace engineering who complete the designated Meteorology coursework of at least 25 credit hours can earn an additional major in Meteorology. Students should work closely with their advisors in each department to ensure that all requirements are met. Please review the information on the department website or contact the current program head for more information and sample four-year plans to earn an additional major in Meteorology.

Student Learning Outcomes

Upon graduation, students should be able to:

- Demonstrate the ability to think critically.
- Exhibit a broad understanding of atmospheric systems and processes.
- Demonstrate scientific literacy and its application to scientific inquiry and societal concerns.
- Demonstrate proficiency in data collection, management, and analysis including understanding sources of error and/or uncertainty.
- Read and critically evaluate relevant literature and information.

- Use appropriate tools from chemistry, physics, biology, mathematics, and data science to solve discipline-specific problems.
- Present information effectively in written and oral forms.
- Work in a team environment in alignment with the ISU principles of community.
- Work independently.
- Attain employment in meteorology, atmospheric science or related fields, or pursue graduate studies.

Degree Requirements

The program requires the following courses:

MTEOR 1110	Synoptic Applications	1
MTEOR 2010	Introductory Seminar	
MTEOR 2060	Introduction to Weather and Climate	3
MTEOR 2270	Computational Meteorology I	3
MTEOR 3010	General Meteorology	4
MTEOR 3110	Introduction to Synoptic Meteorology	2
MTEOR 3410	Atmospheric Physics I	3
MTEOR 3420	Atmospheric Physics II	3
MTEOR 3990	Writing for Research	2
MTEOR 4110	Synoptic Meteorology	3
MTEOR 4170	Mesoscale Forecasting Laboratory	3
MTEOR 4320	Instrumentation and Measurements	3
MTEOR 4430	Dynamic Meteorology I	3
MTEOR 4540	Dynamic Meteorology II	3
MTEOR 4990	Senior Research	2
Total Credits		38

An additional 9 credits must be chosen from:

NREM 4020	Watershed Hydrology	3
MTEOR 4040	Global Change	3
MTEOR 4050	Soil-Plant-Animal-Atmosphere Physics	3
MTEOR 4060	World Climates	3
MTEOR 4070	Mesoscale Meteorology	3
MTEOR 4160	Hydrologic Modeling and Analysis	3
MTEOR 4350	Radar Applications in Meteorology	3
MTEOR 4400	Tropical Meteorology	3
MTEOR 4520	Climate Modeling	3
MTEOR 4890	Survey of Remote Sensing Technologies	3
MTEOR 4890L	Satellite Remote Sensing Laboratory	1
MTEOR 4900	Independent Study	1-3
GEOL 4150	Paleoclimatology	3

GEOL 4520	Intro GIS for Geoscientists	3
CE 3720	Engineering Hydrology and Hydraulics	3

Supporting work is required in areas at least equivalent to:

One of the following sequences 5

CHEM 1630 & 1630L	College Chemistry and Laboratory in College Chemistry	

Or

CHEM 1770 & 1770L	General Chemistry I and Laboratory in General Chemistry I	

PHYS 2310 & 2310L	Introduction to Classical Physics I and Introduction to Classical Physics I Laboratory	5

PHYS 2320	Introduction to Classical Physics II	4

MATH 1650	Calculus I	4

MATH 1660	Calculus II	4

MATH 2650	Calculus III	4

MATH 2660	Elementary Differential Equations	3

STAT 3050	Engineering Statistics	3

SPCM 2120	Fundamentals of Public Speaking	3

Total Credits 35

A grade of C or better (not C-) is required in each of the following courses to meet minimum graduation requirements for a bachelor of science degree in Meteorology:

MTEOR 2060	Introduction to Weather and Climate	3
MTEOR 3010	General Meteorology	4

Several co-op programs are available for upper-division undergraduates. Although a range of opportunities exists for men and women who terminate their studies with a Bachelor of Science, students who meet the necessary academic standards are encouraged to continue their studies in a graduate program. For these students, additional coursework is recommended in mathematics or physical science. Other students can choose a wide range of supporting courses that will contribute to their particular area of interest in meteorology.

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500.

ENGL 1500	Critical Thinking and Communication	3

ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
or ENGL 2500H	Written, Oral, Visual, and Electronic Composition: Honors	

MTEOR 3990	Writing for Research	2
MTEOR 4990	Senior Research	2

As majors in the College of Liberal Arts and Sciences, Climate Science students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

Liberal Arts and Sciences (LAS) majors require a minimum of 120 credits, **including a minimum of 45 credits at the 3000/4000 level**. You must also complete the Communication Proficiency, LAS world language requirements, and LAS career proficiency requirement. Six semesters of one foreign language in high school satisfies the World Language requirement.

Students in all ISU majors must complete a 3-credit course in U.S. diversity and a 3-credit course in international perspectives. Discuss with your advisor how the two courses that you select can be applied to address general education requirements. Check for a list of approved courses at: <http://www.registrar.iastate.edu/courses/div-ip-guide.html>.

Four Year Plans

These plans are examples only; students should discuss their graduation plans with their advisor.

Path 1 for students prepared to start in calculus

Freshman

Total Credits: 120-125¹ Students taking CHEM 1770 should plan to take CHEM 1780 as well.² Students must select at least 9 credits from a list of optional courses.³ Students should select a humanities or social science course based on need. If these LAS requirements have been satisfied, students may select a meteorology elective or alternate course. Students should discuss possible alternate course options with their advisor.**Minor**

The department offers a minor in Meteorology which may be earned by completing 15 credits including MTEOR 1110 Synoptic Applications

(only 1 credit may count toward the minor), MTEOR 2060 Introduction to Weather and Climate and MTEOR 3010 General Meteorology. The minor must include at least 6 credits in the courses numbered 3000 or above taken at Iowa State University and must include at least 9 credits that are not used to meet any other department, college or university requirement. Further information concerning programs of study, including sample degree programs, is available from the department.

Concurrent Programs

Combined Degrees: A concurrent program is offered which combines a Bachelor of Science degree in meteorology and a Master of Science degree in meteorology. This program gives well-qualified Iowa State juniors and seniors the opportunity to begin working on the M.S. degree before completing the B.S. degree, reducing by at least one year the normal time period necessary to complete both degrees separately. Additionally, a concurrent program exists that gives students the opportunity to receive a B.S. in meteorology and an M.B.A. (Master of Business Administration) within five years. Review the department website or contact the current program head for more information regarding these options.

Graduate Meteorology

The department offers programs leading to the master of science (M.S.) and doctor of philosophy (Ph.D.) in Meteorology. Students desiring a major in Meteorology normally will have a strong undergraduate background in the physical and mathematical sciences. Individuals desiring to enter a graduate program are evaluated by considering their undergraduate preparation and performance along with their expressed goals in the statement of purpose. Prospective students are encouraged to reach out to individual faculty members who they wish to work with prior to applying.

Programs of study are designed on an individual basis in accordance with the requirements of the Graduate College and established requirements for each departmental major. Additional coursework is normally taken in complementary areas such as aerospace engineering, agronomy (soil science), chemistry, civil and construction engineering, computer engineering, computer science, engineering mechanics, environmental science, materials engineering, mathematics, mechanical engineering, microbiology, physics, or statistics. Departmental requirements provide a strong, broad background in the major and allow considerable flexibility in the program of each individual.

A thesis is required of all M.S. candidates, and a dissertation is required of all Ph.D. candidates.

Course requirements for the M.S. degree include MTEOR 5420 and MTEOR 5430, along with at least four courses from the graduate Meteorology electives (MTEOR 5020, MTEOR 5040, MTEOR 5050, MTEOR 5070, MTEOR 5160, MTEOR 5180, MTEOR 5350, MTEOR 5400, MTEOR 5520, MTEOR 5680, MTEOR 5890, or MTEOR 6050) or from outside the department according to the students' professional goals and interests, in

consultation with their advisor and POS committee. Students without prior synoptic meteorology course work must complete MTEOR 5110 and may substitute these credits in place of other elective courses.

Graduates in Meteorology have a good comprehension of basic principles, a capacity for critical and independent thought, and an ability to communicate effectively with scientific colleagues. They have an appropriate breadth in their understanding of meteorology with a suitable specialization. Graduates are able to undertake thorough research and explain the results in a scientifically reasonable fashion.

Middle Eastern Studies Minor Overview

The cross-disciplinary Middle Eastern Studies Minor is designed for students who seek to explore the cultures, languages, history, society, politics, international relations, economics, technology, and environment of the Middle East, including the Arab world, North Africa, Turkey, and Iran. The Middle Eastern Studies Minor's courses provide the background and training for students whose major fields of study might include Anthropology, History, Philosophy and Religious Studies, Political Science, and World Languages and Cultures. The minor should be of special interest to students with interests in graduate studies or career interests in international business, education, translation, law, diplomacy, intelligence, the military, national security, non-governmental organizations, and/or international organizations.

Student Learning Outcomes

After completing the minor in Middle Eastern Studies, students will demonstrate:

- Some proficiency in oral and written Arabic with an ability to comprehend authentic Arabic texts.
- Knowledge of the history of the Middle East from classical to modern times.
- Knowledge of the geographic features of the Middle East and of the major political boundaries, alliances, and power struggles that characterize the contemporary Middle East.
- An understanding of cultural diversity issues in the Middle East in the context of the prevalent political, social, and cultural institutions and structures.

The minor in Middle Eastern Studies requires 15 credit hours

Required course work in core courses (9 credits total)

HIST 4350	History of the Modern Middle East	3
POLS 3500	Politics of the Middle East	3
RELIG 3580	Islam	3

At least 6 additional credits of elective courses from the following list (this list may change/be updated as new elective courses become available)

ARABC 2010	Intermediate Arabic I	4
ARABC 2020	Intermediate Arabic II	4
ARABC 3750	Arab Culture	3
ARTH 3840	Art of Islam	3
ECON 4960	Economics International Travel Course	1-3
HIST 3310	History of the Islamic World to 1800	3
RELIG 2420	History of Christianity: Early to Medieval	3
RELIG 3590	The Quran	3
WLC 3700B	Topics in World Languages and Cultures in English Translation: Middle East	3

Language co-requisite: All students pursuing the minor in Middle Eastern Studies must complete and receive a passing grade in:

ARABC 1010 Elementary Arabic I and ARABC 1020 Elementary Arabic II [completion of the beginning level of other languages spoken in the Middle East (e.g. Hebrew, Farsi, Kurdish, Turkish, Pashto, etc.) will be accepted in lieu of beginner Arabic upon petition to the program Directors]

Military Science Program Overview

The Military Science Department is embedded within the College of Liberal Arts and Sciences as an interdisciplinary program, but does not offer an academic degree. The mission of the department is derived directly from regulations governing Army Reserve Officers' Training Corps (AROTC), which are issued by the U.S. Army Cadet Command and U.S. Army Training and Doctrine Command and cannot be modifiable by this department.

Freshmen Year Learning Outcomes

The student will have a working knowledge of the following areas: The Role of the Army, Roles and Origins of the Army, Army Customs and Traditions, Branches (Jobs) in the Army and Military Operations and Tactics, U.S. Army leadership and character development.

Sophomore Year Learning Outcomes

The student will have a working knowledge of the following areas: The Role of an Officer, Role of the Officer and Noncommissioned Officer, communications, code of conduct, first aid, principles of war and military operations and tactics, and begin to apply U.S. Army leadership through observed activities and demonstrate character development traits.

Junior Year Learning Outcomes

The student will have a working knowledge of the following areas: Small Unit Training, Command and Staff Functions, Nuclear, Biological and Chemical Warfare, Law of War, Weapons, Human Behavior, Math Reasoning, Computer Science and Military Operations and Tactics; Cadets will actively analyze character development and assess leadership skills.

Senior Year Learning Outcomes

The student will have a working knowledge of the following areas: Transition to Becoming an Officer, Military Justice, Intelligence and Electronic Warfare, Army Personnel Management, Army Logistics, Post and Installation Support and Military Operations and Tactics; Cadets will internalize and adhere to the U.S. Army's profession through active leadership and congruence of character development.

The mission of the Army Reserve Officers' Training Corps (AROTC) is to commission the future leaders of the United States Army. Since ROTC produces over 65 percent of the Army's Officer Corps, our task is one of the most important undertakings in the Army and our country today. We seek top quality college students. We train these potential leaders, assess their abilities, and challenge them with the highest standards of profession/professionalism. Those who successfully complete the program, receive a commission as a second lieutenant in the U.S. Army. A commission as an Army officer affords the opportunity to pursue a profession in one or several of the 300 different jobs held by Army officers. Students may request to serve as an officer in either the active army, or part time in the Army Reserve or National Guard. Regardless of the method of service, officers in today's Army can be proud to know that they are doing their share in the defense of the United States of America.

The ISU Military Science program is divided into two segments, the basic program and the advanced program. The basic program (courses numbered 1010-2900) is designed primarily for freshmen and sophomores. No military obligation is incurred by a person participating in the basic program. The basic program is designed to be informative and to acquaint students with the military as a profession. The basic program or an allowed substitute is a prerequisite for the advanced program. Financial assistance is available on a competitive basis.

Persons interested in Military Science should visit the department located on the second floor of the Armory (east side).

Basic Program

The basic program courses are primarily for freshmen and sophomore students and, except for persons with prior military service and basic training graduates, are required for entry into the advanced program. Each scholarship cadet in the Basic Program receives a monthly allowance for up to 10 months. The curriculum is designed to train freshmen and sophomores in individual and team skills. It also helps the

Professor of Military Science identify individual leader developmental needs.

Advanced Program

The advanced program courses are for students who have completed the basic program (or received equivalent credit) and are mandatory for potential commissioning upon contracting at the beginning of their junior year. Each cadet receives a monthly allowance for up to 10 months. These courses are primarily taught to academic juniors and seniors.

Successful completion normally obligates the student to military service on active or reserve duty. In addition to the advanced program of study, a student (cadet) will be expected to pass the Army Physical Fitness Test (precondition for commissioning) each semester and continually maintain military appearance standards in both personal grooming and uniform. Physical fitness training is regularly conducted outside of class and laboratory hours in a separate course, MS 1500 Army Physical Readiness. Students are encouraged to attend and participate in this class.

Professional Military Science Education (PME) coursework outside of the military science curriculum is also a precondition to commissioning. The PME component consists of Basic Academic proficiency standards. These standards are explained to prospective students as they consider enrollment in the advanced program. Army Uniforms will be worn at least once a week. The 300-level courses are designed to prepare cadets for the Advanced Course, which is a 37 day summer internship/training program where cadets are trained to Army standards, develop leadership skills, and have their officer potential evaluated. The 400-level courses are the final preparation for commissioning as a second lieutenant in the United States Army. Students must meet academic alignment criteria and receive basic program credit before entering the advanced program.

Military Studies Minor

The College of Liberal Arts and Science offers a minor in Military Studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from one or a number of the ROTC programs. At least 6 credits must be in courses numbered 300 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Military Studies Minor Interdepartmental Minor

The Military Studies program is designed for students interested in learning about military skills and careers. The mission of the Reserve Officers' Training Corps (ROTC) programs is threefold. First, students are developed mentally, morally, and physically in order to make them strong leaders. Second, a desire for development in mind and character is instilled in students so they may assume the highest responsibilities of

command, citizenship, and government. Finally, students are imbued with the highest ideals of duty, honor, and loyalty in order to graduate with a basic professional background and motivation toward their careers.

The Military Science, Naval Science and Air Force Aerospace departments accomplish this mission through detailed courses of instruction occurring throughout a typical student's college career. All academic courses offered by these departments focus on the development of professional military skills and their application. Each department offers courses unique to its branch of the military. Students in Army ROTC classes gain an appreciation for ground warfare and doctrine, while students in Naval Science develop an appreciation for naval surface and maritime engineering. The Air Force Aerospace Studies curriculum familiarizes students with Air Force structure and doctrine. On a broader scale, all three departments offer courses promoting leadership and sound management practices that investigate the military's role in American domestic and foreign policy, and can be employed in any career path.

Military Science, Naval Science and Air Force Aerospace courses are offered in the interdepartmental Military Studies program in the following participating departments: Military Science, Naval Science and Air Force Aerospace Studies. Students may contact any one of the three departments for additional information on the minor.

Undergraduate Minor

Undergraduate study in this program provides the student with an opportunity to develop a minor in Military Studies. The three Iowa State University ROTC programs offer over 64 credits of specialized coursework. The minor in Military Studies is open to any Iowa State University student.

Undergraduate students may minor in Military Studies by taking 15 credits of coursework from a combination of any of the three ROTC programs - regardless of whether or not a commission in the Armed Forces is tendered. At least 6 of the 15 credits must be in courses numbered 300 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

See the Military Studies Overview tab for links to the three departments.

Music

Administered by the Department of Music and Theatre Undergraduate Study

The Department of Music and Theatre offers a strong undergraduate music program, where students study with full-time faculty professionals in a supportive environment that encourages students to become their best. Two degrees are offered in music: a Bachelor of Music, which is more specialized and contains fewer general education requirements; and a Bachelor of Arts degree with a major in music. (The Department of Music and Theatre also administers the Theatre Program, see Theatre and Performing Arts.)

The music curriculum provides:

1. A comprehensive program of professional studies for students who wish to prepare for careers in music, including teaching, performance, and composition, and for students who plan to pursue graduate studies in music.
2. Courses in music literature, theory and areas of performance for all students, regardless of major.

The department embodies the land-grant philosophy of service to the people of the state with a faculty of active scholars, teachers, and artists committed to excellence in teaching, creative/scholarly work, and arts outreach. The department is an accredited institutional member of the National Association of Schools of Music (NASM).

Student Learning Outcomes

Music graduates will understand and demonstrate:

1. Knowledge of music cultural heritage and history.
2. Appreciation for musical creativity, reasoning, and the aesthetic value of music.
3. Knowledge of organization and structures of music.
4. Analytical skills necessary for listening, performing, and teaching.
5. Skills necessary to perform music from a variety of periods, styles, and genres.
6. Necessary abilities to communicate ideas musically, verbally, and in writing.

7. Awareness of the diversity of musical ideas throughout the world's cultures.
8. For Music Education students: success in meeting the ISU Teaching Standards as outlined by the University Teacher Education Program.

Assessment measures include the continuation examination, graduating senior surveys and exit interviews, public performances, senior projects, course grades, teacher certification (for music education students), and the National Association of Schools of Music accreditation review.

Curricula Available to Music Majors

Students interested in pursuing an emphasis in music theater should see Theatre and Performing Arts.

As majors in the College of Liberal Arts and Sciences, Music students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated below for the degree (Bachelor of Music) or major (Music Major, B.A.).

Bachelor of Music

This curriculum leads to the degree bachelor of music. This degree is more specialized and contains fewer general education requirements than the bachelor of arts degree with a major in music. Students in this curriculum choose between options in education, performance, and composition. To obtain a bachelor of music degree, a student must earn a minimum of 122 credits, including a minimum of 32 credits in residence at Iowa State University and a minimum of 45 advanced credits in courses numbered 3000 or above and must meet all of the requirements specified below.

Courses taken on a pass/not pass basis may be counted toward the required total credits, and may be used to meet the advanced credit requirement, if appropriate, but may not be used to satisfy any other graduation requirement.

Degree Requirements

Bachelor of Arts—Music Major

A more general degree than the bachelor of music, the bachelor of arts degree requires no formal specialization. It includes more general education requirements and provides a broader course of academic study.

As majors in the College of Liberal Arts and Sciences, Music Majors (Music, B.A.) students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated below for the major.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. You must also complete the LAS world language requirement and career proficiency requirement.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

Candidates for the degree bachelor of arts with a music major will normally complete 48 credits of music including the following required courses:

4 credits:		4
MUSIC 1190	Applied Music for Majors	
MUSIC 1200	Introduction to Music Literature and Styles	3
4 credits:		4
MUSIC 2190	Applied Music for Majors	
MUSIC 2240	Music Theory I	4
MUSIC 2250	Aural Theory I	1
MUSIC 2340	Music Theory II	3
MUSIC 2350	Aural Theory II	1

MUSIC 3190	Applied Music for Majors	
MUSIC 3340	Music Theory III	3
MUSIC 3350	Aural Theory III	1
MUSIC 3440	Music Theory IV	3
MUSIC 3450	Aural Theory IV	1
MUSIC 3830	History of Music I	3
MUSIC 3840	History of Music II	3
4 credits from:		4
MUSIC 1110	Wind Ensemble	
MUSIC 1130	Jazz Ensemble	
MUSIC 1150	Symphonic Band	
MUSIC 1410	Lyrica Ensemble	
MUSIC 1510A	University Chorus: Cantamus Women's Choir	1
	or MUSIC 1510I University Chorus: Statesmen Men's Choir	
MUSIC 1610	Iowa State Singers	
MUSIC 1810	Symphony Orchestra	
MUSIC 3210	Advanced Ensemble	
MUSIC 3010A	Opera Studio: Opera/Operetta	1-3
	or MUSIC 3010I Opera Studio: Music Theater	
Music Electives		8
Total Credits		48-50

Bachelor of arts students whose chief professional interest lies in research are encouraged to minor in world languages and cultures, history, literature, or philosophy.

General Requirements

Entrance Audition.

In order to be accepted as a music major, a prospective student must pass an entrance audition for the applied faculty in his/her performance area (piano, organ, woodwinds, strings, percussion, brass, or voice). Passing the audition is dependent on the demonstration of performance skills appropriate for college level instruction and the potential to perform at a professional level. In addition, the number of students accepted must balance with the space available in the corresponding applied studios. Once accepted, a student must complete a placement examination in keyboard skills. This examination is normally given by members of the departmental faculty the week preceding the opening of classes for fall semester.

Seminars and Recitals.

All music majors enrolled for applied music courses will attend a weekly 1-hour seminar in their areas, departmental recitals, and 12 recitals of their choosing each semester.

Ensemble Requirement.

See the options above for additional ensemble requirements.

All Bachelor of Music students:

Enrollment in an ensemble course, chosen from the lists below, each semester of full-time enrollment (except during student teaching) is required.

Students in a music education option:

At least six semesters of large ensemble and one semester of chamber music ensemble, chosen from the lists below, are required. One semester of 1140A may count as a large ensemble.

Bachelor of Music students in options other than education:

At least 2 semesters of large ensemble and one semester of chamber music ensemble, chosen from the lists below, are required.

Large Ensembles:

MUSIC 1110	Wind Ensemble	1
MUSIC 1150	Symphonic Band	1
MUSIC 1410	Lyrica Ensemble	1
MUSIC 1510A	University Chorus: Cantamus Women's Choir or MUSIC 1510I University Chorus: Statesmen Men's Choir	1
MUSIC 1610	Iowa State Singers	1
MUSIC 1810	Symphony Orchestra	1

Chamber music ensembles:

MUSIC 1130	Jazz Ensemble	1
MUSIC 1610	Iowa State Singers	1
MUSIC 3010A	Opera Studio: Opera/Operetta or MUSIC 3010B Opera Studio: Music Theater	1-3
MUSIC 3210	Advanced Ensemble	

Continuation Examination

To be approved for continuation as a music major on the junior level, and enroll in MUSIC 3190, a student must pass a continuation examination taken normally at the end of the fourth semester as a music major. Before taking this examination, the student must complete the requisite forms as well as write an essay including:

1. his/her personal goals
2. a self-assessment of his/her progress thus far
3. an assessment of what he/she expects to accomplish before graduation

The student taking the Continuation Examination performs for a Continuation Examination Committee. Requirements include the performance of three works representing different periods or styles selected by, and studied with, the applied teacher, a self-prepared piece, and sight reading. The student must display acceptable solo ability and

performance techniques in at least one of the applied areas. A written evaluation will be given each student following his/her performance. This evaluation will include a candid assessment of the student's potential to achieve his/her goals. In addition, the student may arrange to meet with members of the Continuation Examination Committee at a later date to discuss the results of his/her Continuation Examination. See Piano Proficiency below. For details and forms go to: <http://www.music.iastate.edu>

Piano Proficiency Requirement

All music majors must demonstrate proficiency in functional skills at the piano. Keyboard music majors (students whose primary instrument is piano or organ) accomplish this through courses in their curricula. All other students accomplish this by satisfactorily completing MUSIC 2280. All entering non-keyboard music majors with previous piano experience meet with the class piano instructor, usually the week before classes start in the fall semester, to determine the appropriate piano class (1270, 1280, 2270, 2280) for their initial piano enrollment. Some students are deemed to have met the piano proficiency at this time. Non-keyboard music majors with no previous piano experience should enroll in MUSIC 1270, Class Piano I. Continuous enrollment in piano classes is REQUIRED until successful completion of the piano proficiency requirement. **Important:** The piano proficiency must be met, either through completion of MUSIC 2280 or demonstration of proficiency, to pass the continuation examination. Failure to do so could delay a student's graduation. All students must fulfill the piano proficiency requirement in order to pass the continuation examination and enroll in MUSIC 3190.

Graduation Proficiency

To be recommended for graduation, a music student should demonstrate to the music faculty mature acquaintance with performance styles, technique, and repertoire. All music majors will participate in departmental recitals to the satisfaction of the department. Candidates for the Bachelor of Music degree will present a graduation recital.

*** According to the university-wide Communication Proficiency Grade Requirement, Students must demonstrate their communication proficiency by earning a grade of a C or better in ENGL 2500 (or engl 2500H). In ADDITION, the Communication Proficiency must be certified through one of the following options:**

1. Certification of writing skills, by the instructor, after completion of one of the following:

MUSIC 1200	Introduction to Music Literature and Styles	3
MUSIC 3830	History of Music I	3
MUSIC 3840	History of Music II	3
MUSIC 4720	History of American Music	3
MUSIC 4730	Topics in Advanced Music History	3

MUSIC 4750	Music of the Romantic Era	3
MUSIC 4760	Music of the Twentieth Century	3

(Passing one of these courses does not automatically satisfy the requirements for Communication Proficiency.)

2. Satisfactory completion of an advanced writing course:

ENGL 3020	Business Communication	3
ENGL 3050	Creative Writing: Nonfiction	3
ENGL 3140	Technical Communication	3

¹ A placement examination in keyboard skills determines the student's placement in the Class Study in Piano courses. Students with a concentration in piano or organ do not take Class Study in Piano. Students not required to take four semesters of class piano will take additional music elective credits.

² Four credits chosen from the following ensembles are required: 1110, 1130, 1150, 1410, 1510, 1610, 1910, 3210.

³ ENGL 1500 recommends concurrent enrollment in LIB 1600.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 3000/4000 level**. The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: (<https://las.iastate.edu/students/academics/general-education/>) All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. A list of approved courses can be found at: (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) The courses taken to meet these requirements may also be used to meet other requirements.

Scheduling of the general education requirements where specific courses are not indicated can be flexible. Music courses are best kept in the order/semesters indicated. (Most music courses are offered one semester each year.)

¹ A placement examination in keyboard skills determines the student's placement in the Class Study in Piano courses. Students with a concentration in piano or organ do not take Class Study in Piano.

^{**} Students should take the major area (WW or brass) with which they are least familiar first to gain more experience in lab band. However, WW

players planning to gain additional skills on a 2nd WW, might choose to take that area first. Non-WW players should take 3510 before 3520. 3580B must be taken concurrently with each tech course (3500-3550). ++Alternate year courses. String players take 4900B and 4640. WW and brass players take 3680 and 4640.

c These courses which appear in the same semester must be taken concurrently.

The LAS world language requirement must be met. The U.S. diversity and international perspectives requirements are automatically met with courses required for this degree option (EDUC 4060 and MUSIC 3830). Many general education and education (EDUC) courses can easily be taken in different semesters than indicated as well as summer. Music courses are best kept in the order/semesters indicated (Most music courses are offered one semester each year).

16-18		14-16

¹ A placement examination in keyboard skills determines the student's placement in the Class Study in Piano courses. Students with a concentration in piano or organ do not take Class Study in Piano. Students placing out of class piano may need to take additional elective credits to earn the required 124.5 cr. for the BM degree.

² ENGL 1500 recommends concurrent enrollment in LIB 1600.

³ Alternate year course, taught in odd number years, spring semester. Some advanced theory and history courses are not offered every semester. Semesters of offerings are listed in the course descriptions in the catalog. The BM in composition requires one advanced history course (3 cr.) and 9 credits of advanced theory from the following courses: 3460, 4400, 4460, 4900B, 5900I. Advanced theory courses must include 3460 or 4460.

* The BM degree requires a minimum of 124.5 credits, **including a minimum of 45 credits at the 3000/4000 level.** The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: (<https://las.iastate.edu/students/academics/general-education/>) All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives (which is satisfied with MUSIC 3830). A list of approved courses can be found at: (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>)) The courses taken to meet these requirements may also be used to meet other requirements.

Minor in Music

Candidates for the minor in music will complete 15 credits in music including:

MUSIC 1010	Fundamentals of Music	2
or MUSIC 2240 Music Theory I		
Three of the following		9
MUSIC 1020	Introduction to Music Listening	
MUSIC 1200	Introduction to Music Literature and Styles	
or MUSIC 30 Masterpieces of Music and Art in Western Culture		
MUSIC 3040	History of American Rock 'n' Roll	
MUSIC 3830	History of Music I	
4 credits chosen from the following		4
MUSIC 1110	Wind Ensemble	
MUSIC 1130	Jazz Ensemble	

MUSIC 1140A	Marching and Pep Bands: Marching Band	
MUSIC 1140B	Marching and Pep Bands: Pep Band	
MUSIC 1150	Symphonic Band	
MUSIC 1410	Lyrca Ensemble	
MUSIC 1510A	University Chorus: Cantamus Women's Choir	1
or MUSIC 1510I	University Chorus: Statesmen Men's Choir	
MUSIC 1610	Iowa State Singers	
MUSIC 1810	Symphony Orchestra	
MUSIC 3010A	Opera Studio: Opera/Operetta	1-3
or MUSIC 3010B	Opera Studio: Music Theater	
MUSIC 3210	Advanced Ensemble	
MUSIC 1180	Applied Music for Non-Majors	
MUSIC 3180	Applied Music for Non-Majors	
MUSIC 2900F	Special Problems: Applied Music	

At least 6 of the 15 credits must be in courses numbered 3000 and above taken at ISU with a grade of C or better. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Students pursuing a music minor must meet the audition requirements and/or prerequisites for all courses they wish to take.

MINOR IN MUSIC TECHNOLOGY

Candidates for the minor in music technology will complete 15 credits including:

MUSIC 2460	Introduction to Creative Digital Music	2
MUSIC 3460	Computer Music Programming Design	3
MUSIC 4460	Sound Synthesis Design for Electronic Music	3
7 credits from the following		7
COMS 1070	Windows Application Programming	
COMS 2070	Fundamentals of Computer Programming	
or COMS 227	Object-oriented Programming	
COMS 2280	Introduction to Data Structures	
COMS 3090	Software Development Practices	
COMS 3270	Advanced Programming Techniques	
CPRE 3290	Software Project Management	
EE 2010	Electric Circuits	
EE 2240	Signals and Systems I	
EE 3240	Signals and Systems II	
ME 4510	Engineering Acoustics	
SE 3190	Construction of User Interfaces	
MUSIC 1010	Fundamentals of Music	
or MUSIC 10	Basic Musicianship	

MUSIC 1020	Introduction to Music Listening	
MUSIC 1180	Applied Music for Non-Majors	
MUSIC 1200	Introduction to Music Literature and Styles	
or MUSIC 3020	Masterpieces of Music and Art in Western Culture	
MUSIC 2240	Music Theory I	
MUSIC 2250	Aural Theory I	
MUSIC 2340	Music Theory II	
MUSIC 2350	Aural Theory II	
MUSIC 2900F	Special Problems: Applied Music	
MUSIC 3040	History of American Rock 'n' Roll	
MUSIC 3180	Applied Music for Non-Majors	
MUSIC 3830	History of Music I	
MUSIC 3840	History of Music II	
MUSIC 4720	History of American Music	
MUSIC 4900I	Independent Study: Electronic Music	

Total Credits 15

Music courses that may be taken by music majors to meet the requirements for the Music Technology minor are limited to the following:

MUSIC 2460	Introduction to Creative Digital Music	2
MUSIC 3460	Computer Music Programming Design	3
MUSIC 4460	Sound Synthesis Design for Electronic Music	3
MUSIC 4900I	Independent Study: Electronic Music	1-30
MUSIC 5900I	Special Topics: Electronic Music	1-30

At least six of the fifteen credits must be taken at Iowa State University in courses numbered 3000 or above with a grade of C or higher. The minor must include at least nine credits not used to meet any other department, college, or university requirement. Students pursuing a minor in music technology must meet the audition requirements and/or prerequisites for all music courses they wish to take.

Naval Science Program

The Department of Naval Science is embedded within the College of Liberal Arts and Sciences as an interdisciplinary program but does not offer an academic degree. The courses offered by the Department are developed by the Department of the Navy. The Naval Science Department and Naval ROTC (NROTC) Program develop individuals mentally, morally, and physically, and imbue in them the highest ideals of duty and loyalty, in order to commission them upon graduation as Navy and Marine Corps officers. Program graduates possess a basic professional background, are motivated towards careers in the Naval Service, and have a potential for future development in mind and character so as to assume the highest responsibilities of command, citizenship, and

government. Emphasis is placed on the core values of courage, honor and commitment.

Naval Science courses are open to any ISU student who has met the course prerequisites. To participate in the Naval ROTC Program, students must apply through one of two programs: the NROTC Scholarship Program (full scholarship; which includes a book stipend, tuition, laboratory fees, uniforms, and a monthly stipend), or the College Program (non-scholarship, with limited financial assistance). Applicants for the Scholarship Program are selected through a comprehensive nationwide competition. Applicants for the College Program are selected by the Professor of Naval Science from among students already in attendance at, or selected for admission by, the university. The College Program involves limited financial assistance by application for a 2 or 3-year scholarship. Upon application, students choose between the Navy Option and Marine Corps Option, for the purposes of training focus. NROTC students pursue their studies like other university students except that they must meet certain additional requirements that will prepare them to serve as naval officers upon graduation.

A Marine Corps Option student incurs a minimum 4-year active duty military obligation as a commissioned officer after graduation; a Navy Option student incurs a minimum 5-year active duty obligation.

Further information is available from the Professor of Naval Science, Iowa State University, isunrotc@iastate.edu, 515-294-6050.

While in the NROTC Program, Scholarship Program students will participate (with pay) in at-sea training cruises during the summer. College Program students, accepted to receive a 2 or 3-year scholarship, will participate in at-sea training during the summer between their Junior and Senior year based on the specifics of their scholarship. Students are also exposed to regular and extracurricular activities that teach leadership principles and help them decide which field of the Navy or Marine Corps they wish to enter. These activities also include weekly leadership laboratory periods and opportunities for involvement in several student societies.

Undergraduate Study

Naval Science courses are primarily for those students in the NROTC program, however, other university students may also enroll. Students enrolled in the NROTC program must fulfill the following requirements:

NS 1110	Introduction to Naval Science	3
NS 2120	Seapower and Maritime Affairs	3
NS 2200	Leadership and Management	3
NS 2300	Navigation	3
NS 3200	Naval Ship Systems I (Engineering)	3
NS 3300	Naval Ship Systems II (Weapons)	3
NS 4100	Naval Operations and Seamanship	3

NS 4120	Leadership and Ethics	3
NS 4400	Senior Naval Science Seminar	1

Marine option students will complete:

NS 1110	Introduction to Naval Science	3
NS 2120	Seapower and Maritime Affairs	3
NS 2200	Leadership and Management	3
NS 2400	Fundamentals of Maneuver Warfare	3
NS 3210	Evolution of Warfare	3
NS 4120	Leadership and Ethics	3
NS 4400	Senior Naval Science Seminar	1

In addition to the normal Naval Science courses, all NROTC students are required to participate in laboratory periods that supplement the various academic courses. The Leadership Lab emphasizes human relations principles, teaches basic military formations, movements, commands, courtesies, and honors, and provides practice in unit leadership. Non NROTC program students enrolled in Naval Science courses are not required to participate in laboratory periods.

Military Studies Minor

The College of Liberal Arts and Sciences offers a minor in Military Studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from one or more of the ROTC programs. At least six credits must be in courses numbered 3000 or above.

Officer Education Programs

Iowa State University offers Reserve Officers Training Corps (ROTC) programs for the professional training of officers for the Air Force, Army, Navy and Marines.

For specific programs and courses:

- Air Force Aerospace Studies
- Military Science
- Naval Science

The purpose of these programs is to provide an avenue for interested students to become reserve or regular officers in one of the United States military services, and the university regards this training as the foundation for possible careers in the military. The Air Force and the Navy require a period of active duty service upon completion of the ROTC program. Graduates from Army ROTC serve in either active Army, the Army Reserve, or the National Guard.

All students enrolled in advanced ROTC programs receive financial allowances, which are described under Student Financial Aid.

Scholarships are also available for all services as outlined in the section on financial aid.

Philosophy Overview

The philosophy major (33 credits) and minor (15 credits) offer Iowa State University students the opportunity to explore fundamental human questions through reflection and argumentation. Do we have free will? Can machines think? What makes actions right or wrong? What is the nature of knowledge and what can we hope to know? What does justice require, politically and economically? Philosophy classes explore answers to deep questions such as these, encouraging each student to develop and rationally defend their own views.

Philosophy offers a structured but flexible program to help students graduate on time while pursuing their interests. 2000-level courses introduce students to essential questions and methods of philosophical thought. In 3000-level courses, students engage in close examination of central topics in both contemporary thought and the history of philosophy. Seminars at the 4000-level offer the opportunity to study topics in-depth alongside a committed team of faculty and students.

Philosophy fosters skills of communication and critical thinking that are valuable across work, family, and civic life. The program equips students to logically analyze and develop new responses to the challenges faced by humanity. It also emphasizes clarity of thought and communication as part of rigorous engagement with both abstract and applied areas of thought. These skills of logical analysis, careful reading, original thought, and clear communication are in high demand across different fields of work and post-graduate study. Philosophy majors typically achieve some of the highest scores on standardized tests such as the LSAT and GRE and have mid-career salaries higher than many other majors.

Student Learning Outcomes

Upon graduation, students should be able to:

1. Explain central problems in key areas of philosophy, such as metaphysics, epistemology, ethics, logic, political philosophy, philosophy of language, and the philosophy of science.
2. Explain the views of historically important philosophers and place them in the context of significant philosophical movements.
3. Identify and critically evaluate arguments by developing objections and replies.
4. Communicate ideas and arguments, both orally and in writing, with clarity and precision.

5. Engage with different points of view with open-mindedness, intellectual curiosity, and a willingness to learn from the ideas and arguments of others.

Philosophy Degree Requirements

As majors in the College of Liberal Arts and Sciences, Philosophy students must meet College of Liberal Arts and Sciences and university-wide requirements for graduation in addition to those stated below for the major.

The degree program in philosophy requires a minimum of 33 credits, plus the zero credit PHIL 4920 course. The following courses compose the core program of the major from which 15 credits shall be chosen. Additionally, two courses at the 4000 level or above (other than PHIL 4900 and PHIL 4920) are required.

Ethical theory: One course required.

PHIL 3300	Ethical Theory	3
PHIL 3350	Social and Political Philosophy	3
PHIL 5350	Contemporary Political Philosophy	3

History: Two courses required.

PHIL 3100	Ancient Philosophy	3
PHIL 3140	17th Century Philosophy	3
or PHIL 3150	18th Century Philosophy	

Metaphysics and Epistemology: One course required.

PHIL 3640	Metaphysics: God, Minds, and Matter	3
PHIL 3660	Truth, Belief, and Reason	3
PHIL 3800	Philosophy of Science	3

Logic: One course required.

PHIL 2070	Introduction to Symbolic Logic	3

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check <http://www.registrar.iastate.edu/courses/div-ip-guide.html> for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 3000/4000 level**. Three of the required 45 3000+ level credits must be earned in a general education group outside the group of the major. You must also complete the LAS world language requirement and LAS career proficiency requirement.

According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500.

Minor in Philosophy

The department offers a minor in philosophy which may be earned by completing a total of 15 credits in philosophy. At least 9 credits must be in courses numbered 3000 or above (only 3 credits of which may be in PHIL 4900). The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

MINOR IN ETHICS

The Department Philosophy and Religious Studies offers a minor in ethics. Ethics is the branch of human thought that addresses questions of human morality. It seeks to define right and wrong at the theoretical level and to guide action across diverse fields of practice. An ethics minor provides opportunities for students to develop an understanding of both the theoretical foundations and the practical applications of ethics. It serves students who wish to understand how ethical thought complements their chosen majors, but also students who have an interest in learning about ethics more generally.

The minor in ethics requires 15 credits; at least 6 credits must be in courses numbered 3000 or above. The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

All students pursuing the minor in ethics must complete either PHIL 2300 Moral Theory and Practice or PHIL 3300 Ethical Theory. In addition, students must complete 6 credits of courses chosen from a list of core ethics courses (Table A below), as well as 6 credits of courses chosen from a broader list of courses with a significant ethics focus (Table A and Table B combined).

CORE ETHICS COURSES (TABLE A)

PHIL 2300	Moral Theory and Practice	3
PHIL 2350	Ethical Issues in a Diverse Society	3
PHIL 3200	Existentialism	3
PHIL 3300	Ethical Theory	3
PHIL 3310	Moral Problems in Medicine	3
PHIL 3320	Philosophy of Law	3
PHIL 3340	Environmental Ethics	3
PHIL 3350	Social and Political Philosophy	3
or PHIL 5350	Contemporary Political Philosophy	
PHIL 3360	Bioethics and Biotechnology	3
PHIL 3430	Philosophy of Technology	3
PHIL 4300	Value Theory	3
PHIL 4500	Agency and Free Will	3

ADDITIONAL ETHICS COURSES (TABLE B)

ACCT 4890	Corporate Social Responsibility Reporting	3
EE 3880	Sustainable Engineering and International Development	3
ANTHR 2200	Globalization and Sustainability	3
ANTHR 2300	Globalization and the Human Condition	3
CPRE 2340	Legal, Professional, and Ethical Issues in Cyber Systems	3
ECON 3210	Economics of Discrimination	3

EDUC 2050	Social Foundations of Education in the United States: Early Childhood and Elementary Education	3
EDUC 4050	Social Justice Education and Teaching: Early Childhood and Elementary	3
EDUC 4810 or EDUC 5810	Philosophy of Education	3
ENGR 3270	Voices of Public Policy	3
ENTSP 4100	Social Entrepreneurship	3
GLOBE 2200	Globalization and Sustainability	3
JLMC 4620	Media Ethics, Freedom, Responsibility	3
MGMT 3720	Ethical and Responsible Management	3
NREM 4600	Controversies in Natural Resource Management	3
NS 4120	Leadership and Ethics	3
PHIL 3380	Feminist Philosophy	3
PHIL 3390	Liberty and Law in America	3
POLS 2350	Introduction to Ethics and Politics	3
POLS 4800	Ethics and Public Policy	3
RELIG 3600	Religion and Ethics	3
RELIG 3700	Religion and Politics	3
RELIG 3800	Catholic Social Thought	3
SOC 3340	Politics and Society	3
SOC 3620	Applied Ethics in Agricultural and Rural Development	3
WGS 1600	Gender Justice	1

Philosophy - Graduate Study

The department offers work for a graduate minor in philosophy. For those taking the M.A. or M.S., the minor requirement is two courses above 3000 (but not PHIL 4900), each taken in conjunction with PHIL 5900. For those taking the Ph.D., the requirement is four courses above 3000, at least one of which is above 4000 (but not PHIL 4900), each taken in conjunction with PHIL 5900. Interested students should ask the chair to assign a minor advisor.

The department participates in the interdepartmental program in general graduate studies.

Physics and Astronomy

The Physics Major

Physics and astronomy are basic natural sciences which attempt to describe and provide an understanding of both our world and our universe. Physics serves as the underpinning of many different disciplines including the other natural sciences and technological areas. Graduates are proficient in the methods of rigorous scientific analysis, relevant mathematical techniques, and modern computational and

laboratory methods. They have a broad knowledge of physics, including mechanics, electricity and magnetism, thermodynamics, and modern physics. They are able to communicate clearly and effectively at general and technical levels. They are prepared to pursue a wide range of careers as a professional physicist, astronomer, or science educator. They are also prepared to pursue advanced studies and careers in areas as diverse as engineering, medicine, law, and business administration. Many opportunities exist for students who terminate their studies with a bachelor's degree, especially when combined with technology studies in other areas. Students who meet the necessary scholastic standards often continue their studies in a graduate college, exploring and contributing to new developments in the field.

Faculty have approved a variety of completion pathways for the physics major for students who wish to establish a clear strength in a field of application of physics, such as computer science, science education, mechanical engineering, or even science writing. These pathways make double majors more feasible and are appropriate for students planning to enter the job market with their bachelor's degree.

Student Learning Outcomes

The expected outcomes for students in the program are:

1. A broad knowledge of physics, including mechanics, electricity and magnetism, thermodynamics, wave motion and modern physics.
2. Proficiency in laboratory methods.
3. Proficiency in modern scientific computational methods.
4. A sound foundation in the liberal arts including proficiency in communication skills.

DEGREE REQUIREMENTS

All Physics students complete 49 credits of required classes in Physics and Math and additional credits of Advanced Coursework. For the Advanced Coursework, students choose one of three focus areas selected based on the career goals of the student: Standard Physics, Teacher Preparation, or Physics Applications.

Physics Core

PHYS 1990	Introductory Seminar	1
PHYS 2410	Principles and Symmetries in Classical Physics I *	5
PHYS 2420	Principles and Symmetries in Classical Physics II *	5
PHYS 3210	Introduction to Modern Physics I	3
PHYS 3210L	Introductory Laboratory in Modern Physics I	1
PHYS 3610	Classical Mechanics	3
PHYS 3640	Electricity and Magnetism I	3
PHYS 3040	Thermal Physics	3
PHYS 4800	Quantum Mechanics I	3

* PHYS 2310/PHYS 2310L and PHYS 2320/PHYS 2320L may be substituted for PHYS 2410 and PHYS 2420.

Total Credits 27

Math Core

MATH 1650	Calculus I	4
MATH 1660	Calculus II	4
MATH 2650	Calculus III	4
MATH 2670	Elementary Differential Equations and Laplace Transforms	4
MATH 3850	Introduction to Partial Differential Equations	3
MATH 2070	Matrices and Linear Algebra	3-4
	or MATH 3170 Theory of Linear Algebra	

All physics majors are encouraged to take STAT 3410.

Total Credits 22-23

Advanced Coursework

In addition to the 49-credit core, students choose one of three focus areas: Standard Physics, Teacher Preparation, or Physics Applications.

Standard Physics Focus

Students with the Standard Physics focus will complete these additional 19 credits.

PHYS 3220 & 3220L	Introduction to Modern Physics II and Introductory Laboratory in Modern Physics II	4
PHYS 3620	Intermediate Mechanics	3
PHYS 3650	Electricity and Magnetism II	3
PHYS 3100	Electronic Instrumentation for Experimental Physics	4

A minimum of 2 additional lab credits from the following: 2

ASTRO 3440L	Astronomy Laboratory
ASTRO 4500L	Undergraduate Research
PHYS 3110	Intermediate Laboratory
PHYS 3110T	Intermediate Laboratory for Secondary Physics Teachers
PHYS 4500L	Undergraduate Research
PHYS 4700L	Applied Physics Laboratory

And at least 3 credits from: 3

ASTRO 3420	Introduction to Solar System Astronomy
ASTRO 3460	Introduction to Astrophysics
ASTRO 4050	Astrophysical Cosmology
PHYS 4210	Ultrafast Laser Science and Spectroscopy
PHYS 4220	Foundations of Quantum Computing
PHYS 4320	Molecular and Cell Biophysics
PHYS 4810	Quantum Mechanics II *

PHYS 4960	Modern Optics
PHYS 5110	Condensed Matter Physics I
PHYS 5260	Particle and Nuclear Physics
PHYS 5280	Mathematical Methods for the Physical Sciences
PHYS 5310	Statistical Mechanics
PHYS 5340	Symmetry and Group Theory in Physics
PHYS 5410	General Relativity

*Students intending to pursue graduate study in physics or astronomy/astrophysics should choose the option PHYS 4810 Quantum Mechanics II.

Total Credits 19

Optional Minor

Students completing the Standard Physics Focus who plan to continue their studies in Astronomy and Astrophysics should complete the Astronomy minor by using the following courses. The department has created a sample four-year plan (<https://www.physastro.iastate.edu/undergraduate-programs/>) for those who want to add this minor to their Physics major.

ASTRO 1500	Stars, Galaxies, and Cosmology	3
ASTRO 3420	Introduction to Solar System Astronomy	3
ASTRO 3440L	Astronomy Laboratory (*)	3
ASTRO 3460	Introduction to Astrophysics	3
ASTRO 4050	Astrophysical Cosmology	3

*ASTRO 3440L can be applied to meet the requirements for the ASTRO Minor and to meet the additional 2 credit lab experience requirement of the major.

Total Credits 15

Teacher Preparation Focus

Students who are preparing to become a teacher meet the advanced coursework requirement of the Physics Major by completing the following 20 credits and meeting the requirements of the Secondary Major in Education. Note: Teacher license requirements are established by the Iowa Department of Education and the Iowa Board of Educational Examiners and are subject to change. Recent changes may not be reflected in this catalog, but advisers and faculty will be aware.

STAT 2010	Introduction to Statistical Concepts and Methods	4
PHYS 3220	Introduction to Modern Physics II	3
PHYS 3110T	Intermediate Laboratory for Secondary Physics Teachers	3
ASTRO 1500	Stars, Galaxies, and Cosmology	3
	or ASTRO 1200 The Sky and the Solar System	
PHYS 3990	Seminar on Secondary School Physics	1-2
EDUC 4180	Secondary Science Methods I	3

EDUC 4190	Secondary Science Methods II	3
Total Credits		20-21

Students who are seeking to add a Math endorsement to their Teacher Preparation program in Physics will also need to complete the following courses in Mathematics.

MATH 3970	Teaching Secondary Mathematics Using University Mathematics	3
MATH 4970	Teaching Secondary School Mathematics	3
MATH 4350	Geometry I	3

Physics Applications Focus

Students who are not planning to attend graduate school in Physics or become teachers, can meet the advanced coursework requirements of the Physics major by completing one of several approved completion pathways for the physics major. This coursework can help a Physics graduate establish a clear strength in a field of application of physics, such as computer science, mechanical engineering, data science, or even science writing. These pathways, ranging from 16 to 24 additional credits, also make double majors with physics more feasible. Contact the Physics advisor for further information concerning programs of study in Physics Applications. Sample Physics with applications programs are listed at the department web site (<https://www.physastro.iastate.edu/undergraduate-programs/>).

Additional Requirements

As majors in the College of Liberal Arts and Sciences, Physics students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major. This includes meeting the university-wide Communication Proficiency Grade Requirement, by earning credit for ENGL 1500, a grade of C or better in ENGL 2500 (or ENGL 2500H) and a grade of C- or better in ENGL 3020, ENGL 3050, ENGL 3090 or ENGL 3140.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 3000/4000 level**. You must also complete the LAS world language and career proficiency requirements (LAS 2030 Professional Career Preparation).

Physics, B.S

	Elective	3
13		14

¹ Students must earn a minimum of two laboratory credits from PHYS 3110, 3110T, 4500L, 4700L; ASTRO 3440L, 4500L.

² Recommended but not required. Highly recommended for those students planning gradate study.

Four year plans for advanced coursework options to complete the Physics major are listed at <https://www.physastro.iastate.edu/undergraduate-programs> (<https://www.physastro.iastate.edu/undergraduate-programs/>).

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

Minor in Physics

The department offers a minor in physics which may be earned by completing 20 credits in physics courses chosen as follows:

PHYS 2410	Principles and Symmetries in Classical Physics I *	5
PHYS 2420	Principles and Symmetries in Classical Physics II *	5
PHYS 3210	Introduction to Modern Physics I	3

One of the following

PHYS 3210L	Introductory Laboratory in Modern Physics I
PHYS 3220L	Introductory Laboratory in Modern Physics II
PHYS 3100	Electronic Instrumentation for Experimental Physics
PHYS 3110	Intermediate Laboratory
PHYS 3110T	Intermediate Laboratory for Secondary Physics Teachers

Other acceptable courses

PHYS 3040	Thermal Physics
PHYS 3060	Physics of Wave Motion
PHYS 3220	Introduction to Modern Physics II
PHYS 3610	Classical Mechanics
PHYS 3620	Intermediate Mechanics
PHYS 3640	Electricity and Magnetism I
PHYS 3650	Electricity and Magnetism II
PHYS 4210	Ultrafast Laser Science and Spectroscopy
PHYS 4320	Molecular and Cell Biophysics
PHYS 4800	Quantum Mechanics I
PHYS 4810	Quantum Mechanics II
PHYS 4960	Modern Optics

*PHYS 2310/231L and PHYS 2320/232L may be substituted for PHYS 2410 and PHYS 2420

Minor in Astronomy

The department offers a minor in astronomy which may be earned by completing 15 credits as laid out below. 12 or more credits must be at the

3000 level or higher. Note that only ASTRO 3440L may be used to satisfy both the requirements of a physics major and an astronomy minor.

ASTRO 3440L	Astronomy Laboratory	3
ASTRO courses*		9-12
3 credits from the following (if only 9 Astro credits)		3
PHYS 3040	Thermal Physics	
PHYS 3210	Introduction to Modern Physics I	
PHYS 3610	Classical Mechanics	
PHYS 3620	Intermediate Mechanics	
PHYS 3640	Electricity and Magnetism I	
PHYS 3650	Electricity and Magnetism II	
PHYS 4800	Quantum Mechanics I	
PHYS 4810	Quantum Mechanics II	
PHYS 4960	Modern Optics	
AERE 3510	Astrodynamics I	

The department has a set of recommended courses for Physics students interested in pursuing graduate school in Astronomy and Astrophysics.

The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Graduate Study

The department offers studies for the degrees Master of Science and Doctor of Philosophy with majors at both levels in astrophysics, condensed matter physics, high energy physics, nuclear physics, and physics; and minor credit courses for students majoring in other departments.

Facilities of various research groups of the department and the Ames Laboratory are available for research.

Students with bachelor's degrees in physics or astronomy from other institutions ordinarily will qualify for graduate study at Iowa State University provided they have satisfactorily completed course work similar to that suggested for undergraduate majors here intending to go on to graduate school. In some cases, additional instruction at the intermediate level may be required.

Graduates have a broad understanding of physical science, as well as mastery of state-of-the-art methods in their area of specialization. They are able to communicate effectively to a wide range of audiences, from the general public to research colleagues. Their skills in rigorous scientific thinking prepare them for leadership in the broader community. They are skilled in carrying out research, communicating research results, and soliciting research support. They have considerable teaching

experience. They have developed problem solving skills that prepare them for careers in either industry or academia.

All candidates for an advanced degree in physics are expected to complete:

PHYS 5310	Statistical Mechanics	3
PHYS 5640	Advanced Classical Mechanics	3
PHYS 5710	Electricity and Magnetism I	3
PHYS 5720	Electricity and Magnetism II	3
PHYS 5910	Quantum Physics I	4
PHYS 5920	Quantum Physics II	4

Candidates for an advanced degree in astrophysics should complete:

PHYS 5310	Statistical Mechanics	3
or PHYS 5640	Advanced Classical Mechanics	
PHYS 5710	Electricity and Magnetism I	3
PHYS 5910	Quantum Physics I	4
ASTRO 5050	Astrophysical Cosmology	3
ASTRO 5100	Observational Astrophysics	3

Astrophysics Ph.D. candidates must take at least three of the 5800 level Astro courses, while candidates for the M.S. must take at least two 5800 level Astro courses.

A thesis is always required for all Ph.D. majors. The degree Master of Science is offered both with and without thesis. For all graduate majors the basic requirements for the M.S. are the same: at least 30 credits of acceptable graduate work must be completed, not less than 21 of which must be in physics or astronomy. Students choosing a M.S. degree with thesis may apply up to 8 credits of 6990 but no credits of 5990 toward the minimum 30 credits. Students choosing a degree without thesis should apply 2 credits of 5990, but may not apply any credits of 6990, toward the minimum 30 credits.

In addition to course work in the major area of study, all candidates for the Ph.D. degree must complete 9 credits of graduate course work outside this area including at least one 5000 or 6000 level introductory course in another area of physics. Each candidate for the Ph.D. degree is required to teach one year of elementary physics or astronomy.

Graduate students interested in a physics minor should contact the department for requirements.

Political Science

Overview of Political Science

The study of political science is designed to enable students to understand the nature of politics, public values, and policy, as well as the institutions and processes that produce these outcomes.

Students completing a major in political science will understand and be able to interrelate the leading theories, literature, and approaches in the subfields of American government, political theory, international relations, comparative politics, and public policy. Graduates can analyze and formulate effective argumentation in written and oral forms, with the ability to appreciate and accommodate diverse political ideas and to collect and critique information and ideas of others in support of original arguments. Graduates appreciate the knowledge and civic responsibilities required for effective participation in political life.

The political science major is often chosen by students preparing for a career in law. Students with this goal should consult with the department in selecting courses.

Several internship options are available to the political science major, offering students the opportunity to experience practical application of the knowledge learned in academic courses.

Expected Student Learning Outcomes

Upon graduation, students should be able to:

- Understand the nature of politics, public values, and the institutions and processes of politics in their various forms.
- Understand and be able to interrelate the leading theories, literature, and approaches in the subfields of American government, political theory and methods, international relations, comparative politics, and public policy.
- Be able to analyze and formulate effective argumentation in written and oral forms, including the ability to appreciate and accommodate diverse political ideas, and to collect and critique information in ideas of others in support of original arguments.
- Appreciate the knowledge and civic responsibilities required for effective participation in political life.

Political Science, B.A.

All Political Science majors must satisfactorily complete 34 credits of Political Science, including at least 18 credits of Political Science courses numbered 3000 or above and at least 9 credits of Political Science courses numbered 4000 or above. No more than 3 credits of POLS 4900, POLS 4960, POLS 4970, or POLS 4990, alone or in combination, may count towards the major. Only Political Science courses in which a student earns a grade of C- or higher will count for the major. At least

15 credits of Political Science coursework must be earned at Iowa State University.

POLS 1010	Exploring Political Science	1
At least two subfield-introduction courses		6
POLS 1110	Introduction to American Government	
POLS 1210	Introduction to International Politics	
POLS 1250	Democracy and Dictatorship: Introduction to Comparative Politics	
At least two career gateway courses		6
POLS 2220X	Global Engagement	3
POLS 2320X	Politics of Business	3
POLS 2350	Introduction to Ethics and Politics	
POLS 2710	Public Organizations and Leadership	
POLS 2830	Introduction to Environmental Politics and Policies	
At least one research-methods course		3
POLS 2610	Thinking Like a Political Scientist: Qualitative Approaches	
POLS 2620	Thinking Like a Political Scientist: Quantitative Approaches	
POLS 4010	Political Analysis and Research	
Additional POL S 3000-level and above coursework to complement other course choices and to meet the minimums required for the major		18
At least 18 credits of POLS courses numbered 3000 or above		
At least 9 credits of POLS courses numbered 4000 or above		
As part of the 3000-level and above coursework, a capstone from at least one of the following:		
POLS 4910	Senior Thesis (3 cr. minimum)	
POLS 4990	Internship in Political Science (3 cr. minimum)	
POLS course numbered 5000 or above (3 cr. minimum)		
Study-abroad experience approved by the department		
POLS 4920	Graduating Senior Survey	
Total Credits		40

Complementary Course Requirements

One Statistics course

STAT 1010	Principles of Statistics	3-4
or STAT 1040 Introduction to Statistics		
or STAT 2260 Introduction to Business Statistics I		
Total Credits		3-4

Communication Proficiency

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
ENGL 3020	Business Communication	3
or ENGL 3090 Proposal and Report Writing		
or ENGL 3140 Technical Communication		
Total Credits		9

As majors in the College of Liberal Arts and Sciences, Political Science students must meet College of Liberal Arts and Sciences (<https://catalog.iastate.edu/collegeofliberalartsandsciences/>) and university-wide requirements (<https://catalog.iastate.edu/collegescurricula/>) for graduation in addition to those stated above for the major. The university-wide Communication Proficiency Grade Requirement requires a grade of C or better in ENGL 250. Students in all ISU majors must also complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 3000/4000 level**. You must also complete the LAS world language requirement and career proficiency requirement.

Political Science with Teacher Preparation Focus

Students seeking teacher certification in American Government must meet all of the requirements of the Political Science major while taking the specific Political Science classes required for certification by the State of Iowa. This coursework must include POLS 1110 Introduction to American Government and a minimum of 12 additional credits in American Government (see options below). Students must also complete at least one additional endorsement in either American History or World History. Most students will complete a total of three endorsement areas; the third might include American or World History, Psychology, Economics, Anthropology or Sociology. Specific requirements of each endorsement are available from your advisor. Teacher license requirements are established by the Iowa Department of Education and the Iowa Board of Educational Examiners and are subject to change. Recent changes may not be reflected in this catalog, but advisers and faculty will be aware.

Students must also meet the requirements of the Secondary Major in Education including student teaching (EDUC 4170). Students must earn a minimum grade of B- in all content courses used for licensure and a minimum grade of C in all other required courses.

In addition to completing the requirements of the Secondary Major in Education, students will complete the following:

PSYCH 2300	Developmental Psychology	3

EDUC 4260	Principles of Secondary Education	3
EDUC/HIST 4980	Methods of Teaching History/Social Sciences	

Political Science Course Options for American Government Teacher Certification

POLS 1110	Introduction to American Government	3
Minimum of 12 additional credits in American Government		12
POLS 1210	Introduction to International Politics	
POLS 1250	Democracy and Dictatorship: Introduction to Comparative Politics	
POLS 2710	Public Organizations and Leadership	
POLS 2830	Introduction to Environmental Politics and Policies	
POLS 3060	Public Opinion and Voting Behavior	
POLS 3100	State and Local Government	
POLS 3180	Campaigns and Elections	
POLS 3190	Law and Politics	
POLS 3200	American Judicial Process	
POLS 3330	Democracy and Diversity in America	
POLS 3340	Politics and Society	
POLS 3350	Science, Technology, and Public Policy	
POLS 3390	Liberty and Law in America	
POLS 3440	Public Policy	
POLS 3580	United States Foreign Policy	
POLS 3590	Current Issues in American Foreign Policy	
POLS 3600	American Institutions: Congress	
POLS 3610	American Institutions: The Presidency	
POLS 3630	American Institutions: Media	
POLS 3640	Political Parties and Interest Groups	
RELIG 3700	Religion and Politics	
POLS 3810	International Political Economy	
POLS 3850	Women in Politics	
POLS 4190	The Judiciary	
POLS 4200	Constitutional Law	
POLS 4210	Constitutional Freedoms	
POLS 4300	Foundations of Western Political Thought	
POLS 4310	Modern Political Thought	
POLS 4530	International Organization	
POLS 4600	American Political Institutions

¹ Meets International Perspectives requirement.

² Meets LAS College Mathematical Disciplines requirement.

³ May be cross-listed to fulfill other requirements. POLS 3330, POLS 3390, POLS 3530, and POLS 3850 fill this requirement.

Minor in Political Science

The department offers a minor in political science that may be earned by completing 15 credits of coursework in political science, fulfilling all of the following criteria:

- At least 9 of the credits must be in courses numbered 3000 or above.
- At least 9 of the credits must have been taken at Iowa State University.
- At least 6 of the credits must be in courses numbered 3000 or above, be taken at Iowa State University, and have a minimum grade of C.
- No more than 3 credits of POLS 4900 may be included.
- None of the credits may be in courses offered only on a satisfactory/fail basis.
- At least 9 of the credits must not be used to meet other department, college, or university requirement.

BA/MA PROGRAM

The concurrent BA/MA (<https://www.pols.iastate.edu/combined-b-a-m-a/>) classification offers well-qualified Iowa State juniors and seniors the opportunity to start working on a master's degree in political science before completing a bachelor's degree. Contact the department's Director of Graduate Education for more information about applying.

Graduate Study

The department offers work for a Master of Arts degree (M.A.) with a major in political science and minor for students in other departments. The department also offers work for a Graduate Certificate of Public Management and Policy (GCPMP) for those interested in an educational certificate program that requires less work than a full master's program. In addition, the Department of Political Science offers work for a Master of Science in Information Assurance (MSIA) and a joint Master of Arts/Juris Doctor (M.A./JD) program with the Law School of Drake University. Information with detailed requirements for all graduate degrees may be obtained at the department's web page at <https://www.pols.iastate.edu/academics/graduate/>. (<https://www.pols.iastate.edu/academics/graduate/>)

Master of Arts (MA)

This is a 30-credit master's degree that gives students the opportunity to explore the field of political science in order to pursue a Ph.D., go to law school, improve research skills, or understand politics better. The three concentration areas are American Politics, Global Politics, and Public Policy. Although it is not a formal concentration, some students have worked heavily in the area of political theory. Top students are eligible for graduate assistantships that make graduate study much more affordable and provide opportunities for assisting faculty with teaching and research. These are awarded on a merit basis. The degree can also

be pursued jointly with a JD at the Law School of Drake University (see below).

MA graduates have a broad substantive understanding of the political process and the academic study of politics. They also have in-depth knowledge of one or more subfields in political science. Graduates are skilled at conducting research and preparing thorough research summaries. They are able to identify and address complex political questions, taking into account related ethical, legal, economic, and social issues.

The prerequisites for major graduate work in the M.A. program normally are completion of at least 12 credits in political science or related courses. During their program of study, all students are expected to complete STAT 5870, POLS 5010, and a thesis or creative component. Additional information including detailed graduation requirements can be found at <https://www.pols.iastate.edu/graduate/political-science-m-a/>.

Master of Science in Cybersecurity

The Master of Science in Cybersecurity is a multi-disciplinary program designed to provide students with diverse backgrounds and interests the opportunity to obtain professional training in the emerging field of information assurance. The core of the Cybersecurity program is built around a series of courses taught in Electrical and Computer Engineering, Mathematics, and Computer Science that introduce students to software and hardware aspects of cryptography and computer security. The program also recognizes, however, that information assurance defined in terms of security, privacy, access, and reliability is not simply a technical problem but also involves important societal dimensions, including policy, education, ethics, and management. Recognizing that political science offers many potential intersections with information assurance (e.g., public sector management of information technology; forensics and computer crime; information technology policy and law; information technology and international relations; information warfare; etc.), students with interests in these areas are encouraged to select the Department of Political Science as their home department.

Students opting to pursue a Cybersecurity degree through the Department of Political Science can expect to acquire skills and background knowledge relevant to a career in public policy or public sector management of information assurance technologies. The Cybersecurity degree can also help prepare students who wish to go on to pursue a Ph.D. in information politics and policy.

Students interested in the Cybersecurity degree program should consider Political Science as a home department if their future career and/or educational interests lie in such areas as: institutional issues related to the Internet and information technologies; electronic government and electronic democracy; information technology, international security, and

information warfare; information technology policy and law; and public administration and public sector management of information technology.

Admission requirements generally follow the same guidelines as the M.A. in Political Science. Degree requirements are specified by the Cybersecurity program in cooperation with Political Science. More in-depth information on the program including detailed graduation requirements can be found at <https://www.pols.iastate.edu/graduate/master-of-science-in-information-assurance-ms-ia/>.

Master of Arts/Juris Doctorate Program (MA/JD)

The Drake Law School and the Department of Political Science at Iowa State University are co-sponsors of the Master of Arts/Juris Doctorate degree. This degree combines courses at both Iowa State University and the Drake Law School and follows most of the same requirements as a double degree. However, the student must have full admission to both schools. Detailed information for the MA/JD can be found at the ISU Political Science webpage as well as the Drake Law School website (under Joint Degree): <http://www.law.drake.edu/> (<http://www.law.drake.edu/>).

The increasing attention being focused on the solution of social problems by state and federal governments has created a need for persons with advanced training in both law and political science. The Drake Law School and the ISU Department of Political Science jointly administer a M.A./JD program to provide an opportunity for students at the Drake Law School to achieve, concurrently, a JD degree in law and a M.A. degree in political science, and for graduate students in political science at Iowa State University to achieve a degree in law.

Successful completion of this program will enable students at Drake Law School to receive both a JD and an M.A. degree within a three-year period, while graduate students in political science at Iowa State University will be able to transfer a substantial number of hours to the Drake Law School toward the fulfillment of the JD requirements in a similar amount of time. Additional information including detailed graduation requirements can be found at <https://www.pols.iastate.edu/graduate/master-of-arts-juris-doctorate-program-m-a-j-d/>.

Graduate Minor

Students in other graduate programs may obtain a minor in political science by completing at least 9 credits of political science courses. Interested students should consult the Graduate College Handbook for additional information on graduate minors.

THE GRADUATE CERTIFICATE OF PUBLIC MANAGEMENT AND POLICY (GCPMP)

The Political Science Department offers a Graduate Certificate of Public Management and Policy (GCPMP). The GCPMP is a 15-credit certificate. Students who are interested in public management and policy, but unsure about committing to a full master's degree, can aim for the certificate knowing that those courses will also count toward a master's degree if they choose to continue on. Iowa State graduate students in other fields may want to pursue the certificate to improve their credentials on the job market if their interest overlaps with public management and policy. For example, doctoral students in higher education and education administration can earn all 9 of their "outside" credits in the GCPMP coursework, add the 6 more elective credits, and earn a GCPMP along with their Ph.D.

Requirements for admission are a graduate school application, an essay stating purposes for study, college transcripts, the GRE (waived for those with five or more years of public or nonprofit sector experience), three letters of recommendation, and the TOEFL for international students. More information on the program including curricular requirements can be found at <https://www.pols.iastate.edu/graduate/graduate-certificate-of-public-management-and-policy/>.

Psychology

Psychology Overview

For college-level requirements in undergraduate curricula leading to the degrees of Bachelor of Arts and Bachelor of Science, see College of Liberal Arts and Sciences.

An undergraduate major in psychology provides a liberal arts and science education, which also can serve as preparation for graduate study in psychology, law, or the health professions. The undergraduate major in psychology enables graduates to understand and apply the scientific principles, facts, and basic methods of psychology to their personal and professional activities. Students with a bachelor's degree (B.A./B.S.) in psychology may qualify for a variety of positions including those in social sciences, mental health, corrections, rehabilitation, developmental disability centers, and business (management, insurance, opinion polls). Professional work as a psychologist in academic, business, clinical, government, and school settings requires graduate degrees. Depending on professional goals, a minor in another discipline may be desirable.

Student Learning Outcomes

Following the recommendations of the American Psychological Association, the undergraduate curriculum in psychology is designed to allow each student to:

1. Develop a detailed knowledge of psychology

2. Develop an understanding of scientific inquiry and demonstrate critical thinking
3. Understand the role of ethics and diversity in human behavior
4. Be able to communicate effectively in the discourse of psychology
5. Develop skills supporting employment or graduate/professional education

Degree Requirements

COMMUNICATION PROFICIENCY REQUIREMENT

According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
	or ENGL 2500H Written, Oral, Visual, and Electronic Composition: Honors	

The Department requires a C- or better in one of the following:

PSYCH 3020	Research Methods in Psychology	3
ENGL 3020	Business Communication	3
ENGL 3090	Proposal and Report Writing	3
ENGL 3140	Technical Communication	3

The major must include the following psychology courses each with a minimum grade of C- and an overall average of C or better:

PSYCH 1110	Orientation to Psychology	1
	or PSYCH 1120 Psychology Learning Community Seminar	
PSYCH 1010	Introduction to Psychology *	3
PSYCH 2110	Career Opportunities in Psychology	1
PSYCH 3010	Research Design and Methodology *	3
PSYCH 4400	Psychological Measurement I *	3

The major also must include at least one course from four of the following six areas:

Area A		
PSYCH 2300	Developmental Psychology	3
PSYCH 3350	Child and Adolescent Psychopathology	3
Area B		
PSYCH 2800	Social Psychology	3
PSYCH 3800	Social Cognition	3
Area C		
PSYCH 3100	Brain and Behavior	3
PSYCH 3150	Drugs and Behavior	3
Area D		

PSYCH 3120	Sensation and Perception	3
PSYCH 3130	Learning and Memory	3
PSYCH 3160	Cognitive Psychology	3
PSYCH 3180	Judgment and Decision Making	3

Area E

PSYCH 3600	Personality Psychology	3
PSYCH 4600	General Psychopathology	3

Area F

PSYCH 2500	Psychology of the Workplace	3
PSYCH 3500	Human Factors in Technology	3

Three additional 3-credit courses in psychology 9

Three additional 3-credit courses in psychology must be taken. Area courses may be used to meet this requirement, but variable credit courses (PSYCH 2910, PSYCH 4900, PSYCH 4910, and PSYCH 4920) may not.

In accordance with college requirements, a C or better average is required in the courses used to satisfy the major.

Departmental requirements for the B.A. and B.S. include the following supporting courses:

6 credits in Philosophy including		6
PHIL 2010	Introduction to Philosophy (not 207)	3

Two of the following

BIOL 1010	Introductory Biology	3
or BIOL 2110	Principles of Biology I	
or BIOL 2120	Principles of Biology II	
BIOL 1550	Human Biology	3
or BIOL 2550	Fundamentals of Human Anatomy	
or BIOL 2560	Fundamentals of Human Physiology	
CHEM 1600	Chemistry in Modern Society	3
or CHEM 1630	College Chemistry	
PHYS 1010	Physics for the Nonscientist (or higher)	3
STAT 1010	Principles of Statistics *	3-4
or STAT 1040	Introduction to Statistics	

3 credits in Mathematics from selected course list**

* minimum grade of C-

** Popular choices include MATH 1040, MATH 1400, MATH 1500, MATH 1650, and STAT 3010. See general education mathematics list for alternative options. Neither MATH 1050 nor MATH 1060 may be used to satisfy this requirement.

Students pursuing a B.S. degree also must complete PSYCH 3020 Research Methods in Psychology with a minimum grade of C- and a

minimum of 10 additional credits from courses listed in the LAS Gen Ed Natural Sciences and Mathematical Disciplines Area as follows: six additional credits in natural sciences, one additional credit in a laboratory course, and three additional credits in mathematics. It should be noted that either MATH 1040 or MATH 1500 may be counted toward the B.S. degree requirement, but not both.

Students electing a B.A. degree also must complete an ISU approved minor, certificate or additional major.

As majors in the College of Liberal Arts and Sciences, Psychology students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 3000/4000 level**. You must also complete the LAS world language requirement and career proficiency requirement.

Psychology Undergraduate Minor

The department offers a minor in psychology. The minor requires completing 18 credits in psychology, including PSYCH 1010 Introduction to Psychology and PSYCH 3010 Research Design and Methodology, each with a minimum grade of C-. At least 9 of the 18 credits must be in 3000 level courses (or above), but no more than three credits total may be from PSYCH 2910 Introductory Research Experience, PSYCH 4900 Independent Study, PSYCH 4910 Research Practicum, and PSYCH 4920. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. In addition to an overall C average or better in courses used to satisfy the minor, a C- or better is required in each course. Contact the psychology advising office for more information.

Graduate Study

The department offers work for the degree of Doctor of Philosophy in psychology. A Master of Science may be earned as part of that degree.

The department offers a doctoral specialization in counseling (<https://counseling.psych.iastate.edu/>) psychology (APA accredited) and doctoral areas of concentration in cognitive (<https://psychology.iastate.edu/graduate-study/doctoral-programs/cognitive-psychology/>) psychology

and social (<https://psychology.iastate.edu/graduate-study/doctoral-programs/social-psychology/>) psychology.

A basic goal of graduate study in the Department of Psychology is to provide all students with a broad base of knowledge in psychological science, as well as exposure to the content and methodological skills necessary for effective performance in teaching, research and professional practice. Accordingly, graduates have an extensive knowledge of psychological principles and the conceptual and quantitative skills to conduct psychological research and to communicate the results to the scientific community, students in the classroom, and the general public. Graduates in counseling psychology are skilled in delivering services to diverse clientele in a variety of settings.

The department also participates in the interdepartmental programs in human computer interaction (<http://www.vrac.iastate.edu/hci/>), neuroscience (<http://www.neuroscience.iastate.edu/>) (<http://www.neuroscience.iastate.edu/>) and in the interdepartmental minor in gerontology (<http://www.gerontology.iastate.edu/programs/>).

A formal class and a supervised practicum in the teaching of psychology is recommended for all doctoral students whose future plans may include teaching at the college level. A 12-month internship in a training site or agency approved by the faculty is required of all doctoral students in counseling psychology.

Public Relations

PUBLIC RELATIONS

<http://www.greenlee.iastate.edu> (<http://www.greenlee.iastate.edu/>)

The public relations major provides students with the concepts, skills and expertise needed to help organizations build mutually beneficial relationships with diverse publics. The knowledge and tools students develop through the PR curriculum ensure they can enter fields such as corporate communication, government affairs, and public relations firms. Coursework in this major focuses on writing, research, digital and emerging media, and professional abilities. Students are required to complete a capstone internship experience to practice and refine their skills.

The Greenlee School of Journalism and Communication prepares students for the field of communication. The school offers three majors:

- Advertising Bachelor of Arts (ADVRT)
- Journalism and Mass Communication Bachelor of Science (JLMC)
- Public Relations Bachelor of Science (PR)

In addition, the Greenlee School offers a 4+1 program allowing students to complete their B.A. or B.S. and earn an M.S. in journalism and mass communication in fewer semesters.

Professional skills are taught and practiced alongside academic requirements using the latest technology and leading-edge communication trends and methods.

Founded in 1905, the unit was one of the first journalism programs to be accredited in 1948 and continues to be one of the longest continuously accredited programs in the country. Accreditation is based on the principle that students need a broad-based, liberal arts education and solid core courses within the discipline. Students taking one major at the school may not seek an additional major or minor in the school. All students are required to take an additional major or a minor outside the school as an area of expertise.

Student Learning Outcomes

Students who major in programs of the Greenlee School of Journalism and Communication are expected to develop competencies in 10 key areas:

- Apply the principles and laws of freedom of speech and press, in a global context, and for the country in which the institution that invites ACEJMC is located.
- Demonstrate an understanding of the multicultural history and role of professionals and institutions in shaping communications.
- Demonstrate culturally proficient communication that empowers those traditionally disenfranchised in society, especially as grounded in race, ethnicity, gender, sexual orientation and ability, domestically and globally, across communication and media contexts.
- Present images and information effectively and creatively, using appropriate tools and technologies.
- Write correctly and clearly in forms and styles appropriate for the communications professions, audiences and purposes they serve.
- Demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity.
- Apply critical thinking skills in conducting research and evaluating information by methods appropriate to the communications professions in which they work.
- Effectively and correctly apply basic numerical and statistical concepts.
- Critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness.
- Apply tools and technologies appropriate for the communications professions in which they work.

The Public Relations Major

To receive a Bachelor of Science degree in public relations, a student must earn at least 120 credits. A minimum of 72 credits must come from courses other than ADVRT, JLMC or PR. At least 50 of these credits must come from the liberal arts and sciences. Overall, at least 45 credits must be from 3000-level or above.

The degree requirements allow for a minimum of 34 credits and a maximum of 48 credits to be taken in ADVRT, JLMC and PR. These include:

JLMC 1100	Orientation to Journalism and Communication	1
PR 2200	Principles of Public Relations	3
JLMC 2010	Reporting and Writing for the Mass Media (C+ or better)	3
PR 3010	Research and Strategic Planning for Advertising and Public Relations	3
PR 3210	Public Relations Writing (C+ or better)	3
3000-level ADVRT, JLMC or PR Electives		6
PR 4240	Public Relations Campaigns	3
JLMC 4600	Law of Mass Communication	3
JLMC 4620	Media Ethics, Freedom, Responsibility	3
4000-level ADVRT, JLMC, or PR Elective		3
PR 4990A	Professional Media Internship: Required	3
Total Credits		34

Public relations majors are also required to take:

STAT 1010	Principles of Statistics (or another approved statistics course)	4

As majors in the College of Liberal Arts and Sciences, public relations students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

University Requirement: Students in all ISU majors must complete a three-credit course in U.S. Diversity, as well as a three-credit course in International Perspectives. The approved course lists are found at the following web addresses:(U.S. Diversity) <http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses> (<http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses/>) and (International Perspectives) <http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current> (<http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/>). Students must also demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500.

College of LAS Requirement: Minimum of 120 credits, including a minimum of 45 credits at the 3000-level and above. You must also complete the LAS world language requirement, LAS career proficiency requirement, and any unmet ISU admission requirements.

Greenlee majors and minors cannot take ADVRT, JLMC or PR courses pass/not pass.

Minor or Additional Major: Students are required to fulfill a secondary area of expertise. This requirement can be met by declaring a minor or an additional major outside of the Greenlee School of Journalism and Communication. Students taking one major at the school may not seek an additional major or minor in the school.

Juniors can apply to a concurrent degree program and earn a B.S. in public relations and an M.S. in journalism and mass communication in fewer semesters. Contact the Director of Graduate Education for more information on the Greenlee School's 4+1 Program.

Minor in Public Relations

Students cannot select more than one minor in the Greenlee School of Journalism and Communication. Minors in the Greenlee School are not available to Greenlee majors.

For a minor in public relations, students complete 15 credits including at least 6 credits in the courses numbered 3000 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

JLMC 1010	Mass Media and Society	3
PR 2200	Principles of Public Relations	3
9 credits from the following:		9
PR 3010	Research and Strategic Planning for Advertising and Public Relations	
PR 3050	Publicity Methods	
PR 4200	Crisis Communication	
PR 3230X	Strategic Communication in Agriculture and the Environment	
JLMC 3070	Digital Video Production	
JLMC 3900	Professional Skills Development	1-3
JLMC 4010	Mass Communication Theory	
JLMC 4060	Media Management	
JLMC 4740	Communication Technology and Social Change	
JLMC 4760	World Communication Systems	
JLMC 4770	Diversity in the Media	
PR 4970	Special Topics in Communication	

Greenlee majors and minors cannot take ADVRT, JLMC or PR courses pass/not pass.

Concurrent Undergraduate and Graduate Programs

The Greenlee School offers a 4+1 program allowing students to complete their B.A. or B.S. and earn an M.S. in journalism and mass communication in fewer semesters.

The Greenlee School offers three concurrent degree programs:

B.A. Advertising/M.S. Journalism and Mass Communication
B.S. Journalism/M.S. Journalism and Mass Communication
B.S. Public Relations/M.S. Journalism and Mass Communication

Enrollment in the Greenlee School's concurrent degree programs enables students to complete coursework for the undergraduate and graduate programs on a five-year accelerated timeline – rather than the typical six-year timeline for the two degrees. See Journalism and Mass Communication Concurrent Undergraduate and Graduate Programs for more information on combining the B.S. in Public Relations and the M.S. in Journalism and Mass Communication.

GRADUATE PROGRAMS

Master of Science

The Greenlee School of Journalism and Communication offers work for a Master of Science degree in journalism and mass communication.

Concurrent Programs

The Greenlee School's concurrent degree programs enable interested students the opportunity to complete coursework for the undergraduate and graduate programs on a five-year accelerated timeline – rather than the typical six-year timeline for the two degrees.

Graduate Minor

The Greenlee School graduate program offers minor work for students majoring in other departments.

See Journalism and Mass Communication Graduate Programs for more information on the M.S. in Journalism and Mass Communication.

Religious Studies

The Religious Studies major (27 credits) and minor (15 credits) offer Iowa State University students the opportunity to expand their knowledge about diverse religions in the United States and the world. The major and minor allow students to design their own unique program of study by taking courses that spark their interest. Religious Studies teaches students to explore religion objectively, critically, and empathetically. It equips students to apply academic theories and methods to understand how religions shape and are shaped by history, politics, culture, society, and human psychology. As their religious literacy increases, students will develop their own ideas about the nature of religion, life's big questions, and the wide range of human ideas, practices, and motivations.

The major in Religious Studies provides both breadth and depth. The program's 2000-level courses introduce students to the academic study of religion, providing a foundation that students build on throughout their undergraduate career. In 3000-level courses, students closely investigate particular traditions, topics, or themes. Throughout their undergraduate

career, students have opportunities to connect their program of study to their own professional and personal goals.

The Religious Studies program provides students skills relevant to building a career based on their interests and passions. Contrary to popular myths, employers in today's modern workplace value college graduates with liberal arts degrees. In Religious Studies, these include the "hard skills" of writing, reading, and conducting organized research. Students also gain so-called "soft skills." These include communication strategies, learning to adapt to new environments, and the capacity to work with and understand people from diverse backgrounds. The flexibility of these skills opens up a wide range of career paths. Religious Studies graduates pursue careers in non-profits, community organizations, and people-focused industries. They apply to graduate and professional schools in areas such as law, education, and ministry. A Religious Studies degree doesn't just help students *get* a job. It helps them advance and grow, both professionally and personally, well into their lives.

Student Learning Outcomes

Upon graduation, students should be able to:

1. Describe religious diversity in the United States and around the world, including diversity within traditions.
2. Identify key beliefs, doctrines, practices, and expressions of multiple religions.
3. Explain how religion has shaped and been shaped by human history, culture, and society, drawing on historical, cultural, and textual analyses.
4. Distinguish between confessional and academic understandings of religion.
5. Assess data produced by and about religious communities in an objective, critical, and empathetic manner.
6. Create and convey original insights using effective reading, research, writing, and conversation skills.

Religious Studies - Undergraduate Study

Students pursuing a major in religious studies must complete a minimum of 27 credits, including the requirements below. Students may also choose to do a senior thesis under the supervision of a religious studies faculty advisor. This option may earn 3-6 credits toward the completion of the major.

Two of the following introductory survey courses of which one must be either 2050 or 2100 6

RELIG 2050 World Religions

or RELIG 2100 Religion in America

RELIG 2150 Religion and Popular Culture

RELIG 2420 History of Christianity: Early to Medieval

RELIG 2430 History of Christianity: Modern

RELIG 2770 Religion and Society

Five of the following 3000+ level courses 15

RELIG 3220 The New Testament

RELIG 3250 Religion, Law, and Justice

RELIG 3280 Native American Religions

RELIG 3320 Catholicism

RELIG 3340 Africana Religions

RELIG 3360 Religion, Sex and Gender

RELIG 3390 Goddess Religions

RELIG 3400 Magic, Witchcraft, and Religion

RELIG 3480 Psychology of Religion

RELIG 3490 Cognitive Science of Religion

RELIG 3500 Philosophy of Religion

RELIG 3520 Religions of India

RELIG 3580 Islam

RELIG 3590 The Quran

RELIG 3670 Christianity in the Roman Empire

RELIG 3680 Religions of Ancient Greece and Rome

RELIG 3700 Religion and Politics

RELIG 3800 Catholic Social Thought

RELIG 3890 Exhibiting Religion

Any other RELIG 3000- or 4000-level course

Minimum of 6 credits of elective Religious Studies courses 6

Total Credits 27

Communication Proficiency

ENGL 1500 Critical Thinking and Communication 3

ENGL 2500 Written, Oral, Visual, and Electronic Composition 3

To meet the upper-level ISU Communication requirement, Religious Studies majors choose from one of the following: 0-3

ENGL 3020 Business Communication

or ENGL 309 Proposal and Report Writing

or ENGL 314 Technical Communication

or RELIG 322 The New Testament

or RELIG 325 Religion, Law, and Justice

or RELIG 328 Native American Religions

or RELIG 332 Catholicism

or RELIG 352 Religions of India

or RELIG 358 The Quran

or RELIG 389 Exhibiting Religion

Total Credits 6-9

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 3000/4000 level**. Students must also complete the LAS College requirements, including the world language requirement and career proficiency requirement.

¹ Laboratory science recommended.

The program offers a minor that may be earned by completing a total of 15 credits in religious studies including either RELIG 2050 World Religions or RELIG 2100 Religion in America. Nine hours must be in courses at the 3000 level or above (no more than 3 hours of seminar and no more than 3 hours of independent study). The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

Religious Studies - Graduate Study

Religious studies may be one of the three areas used for the interdisciplinary graduate studies master's degree.

Science Communication Certificate

The science communication certificate provides an opportunity for students to develop their public communication skills, to interface with students and faculty across disciplinary and science-public divides, and to give students an edge in the job market where successful communication with a multitude of stakeholders is essential. As a discipline, science communication brings together theory and practice to communicate scientific information to the public, with an emphasis on two-way and strategic communication with the public.

This certificate is designed to encourage students who are interested in the intersection of science and society to pursue coursework that provides them with the skills to practice public-facing science and effectively engage the public around complex and sometimes controversial scientific topics. In addition, the certificate is designed to facilitate convergence across disciplines and encourage team-based collaboration at the undergraduate level.

The certificate is open to students of any major, but may be of particular value to students who are planning to pursue science, environmental, health or agricultural communication as a career or students pursuing a career in a science, engineering, math and other technical fields interested in strengthening their communication skills.

Objectives

- Encourage students to engage with community members, other students and faculty across interdisciplinary boundaries, diverse backgrounds, and divergent interests.
- Prepare students to communicate scientific findings and technological advances in a clear and compelling manner while also encouraging inclusive communication that acknowledges others' values and concerns.
- Cultivate students' understanding of the origins and dynamics of science related controversies and conflicts.
- Challenge students to identify and address scientific misinformation, scientific skepticism, and science denial across social media, blogs, and other social and online networks.
- Prepare students to engage in constructive conversations with diverse audiences over contested science, environmental, health, and agricultural topics.

Student Learning Outcomes

Students who complete the proposed science communication certificate will be able to:

- Create, co-produce, and evaluate public-facing science communication
- Understand and address the ethical, social, cultural, and historical factors that influence both the public communication of science and the rise and spread of science-related controversies
- Promote public and cross-disciplinary understanding of scientific information
- Co-produce knowledge with community stakeholders through public-facing projects
- Create effective and appropriate science messages across diverse and emergent media platforms, addressed to diverse audiences
- Critically analyze science messages addressed to public audiences around science
- Identify and address misinformation across social media, blogs, and other social and online networks
- Engage in constructive conversations about contested science, environmental, health, and agricultural topics

To prepare students for the challenge of communicating effectively at the intersection of science and society, students will take a core of 12-credits from the Greenlee School of Journalism and Communication, the English Department, and the Department of Philosophy and Religious Studies and 9-credits of electives from three tracks: science in practice, science and society, and communication in practice.

The certificate requires 21 credits, where 9 of the credits taken do not fulfill any other requirements for other majors or general education.

Students must complete ENGL 2500 before enrolling in the certificate. To successfully complete the certificate, students must submit and receive approval for a final portfolio consisting of a minimum of three applied, public-facing projects developed during or outside of their course work. A cumulative grade point average of at least 2.0 is required in courses taken for the certificate.

Core Courses (12 credits)

JLMC 2600	Media Controversies in Science and Technology	3
PHIL 2060	Introduction to Logic and Scientific Reasoning	3
ENGL 3120	Communicating Science and Public Engagement	3
JLMC 3470	Science Communication	3

Electives (9 credits)

Students will take one course from each of the three categories of electives: Science in Practice, Science and Society, and Communication in Practice.

- 6 of the 9 credits must be at the 3000+ level.
- Students who engage in an internship or research experience (including those connected to courses) may seek approval from the steering committee to have this experience counted as an elective course. This experience must include a public-facing communication/outreach component, and the steering committee will decide which of the 3 categories of electives this experience would fulfill. Students who wish to count the internship toward the certificate must track their hours as well as complete a final paper about their experiences.

Sociology

Undergraduate Study in Sociology

The Department of Sociology offers course work leading to either a Bachelor of Arts, Bachelor of Science, or a minor in sociology. Additionally, a Bachelor of Science in Agricultural & Rural Policy Studies is offered.

Student Learning Outcomes

Graduates of all these programs will understand and demonstrate:

1. General knowledge of sociology
2. Research methods in sociology
3. Critical thinking skills
4. Application of sociology to pressing social issues
5. Sociological and professional values
6. Information technology skills
7. Communication skills
8. Personal and career development

Graduates understand how social institutions, communities, and organizations work and change; they can examine the causes and consequences of conformity, deviance, and inequality. They can apply sociological understanding of human behavior to practical work situations and everyday life. Graduates can read critically, think independently, and communicate effectively about social issues and social policy.

Degree Requirements

As majors in the College of Liberal Arts and Sciences, Sociology students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated below for the major.

University Requirements:

International Perspective	3
US Diversity	3

See <http://www.registrar.iastate.edu/courses/div-ip-guide.html> for a list of approved courses.

Total Credits		8

Departmental Requirements for Sociology Majors

A program of study that meets the needs and interests of the student and department requirements will be developed in consultation with the major advisor. Students must maintain a GPA of 2.0 or higher in their core courses. Programs of study will include:

SOC 1150	Orientation to Sociology	1
SOC 1340	Introduction to Sociology	3
SOC 3020	Research Methods for the Social Sciences	3
SOC 4010	Contemporary Sociological Theories	3
6 credits of 2000+ Sociology courses		6
18 credits of 3000+ Sociology courses		18
Total Credits		34

Bachelor of Arts or Bachelor of Science Degree

In addition to the program of study above, students must select complementary courses that will lead to a bachelor of arts or bachelor of science degree. Programs leading to a bachelor of arts degree will emphasize additional coursework in groups I and III of the general education requirements. Programs leading to a bachelor of science degree will emphasize additional coursework in groups IIA and IIB of the general education requirements. Some of the possible areas of coursework include criminal justice, community (urban and rural) sociology, family sociology, sociology of work, research methods and statistics, social change and development, social inequality, social psychology and sociological theory.

Bachelor of Arts complementary coursework:

STAT 1010	Principles of Statistics	4
or STAT 1040	Introduction to Statistics	

At least 9 additional arts and humanities and/or social science courses	9

LAS approved arts and humanities and/or social sciences courses. General education courses cannot be cross-listed or dual-listed with Sociology courses that count toward the major.

Total Credits	13

Bachelor of Science complementary coursework:

STAT 1010	Principles of Statistics	4
or STAT 1040	Introduction to Statistics	

At least 9 additional credits in natural science, math, or statistics	9

LAS approved mathematics and/or natural science courses. In addition, these courses may be used: STAT 3010, STAT 4010D, STAT 4040, STAT 4070, STAT 4150, STAT 4210, STAT 4790; PSYCH 4400; HDFS 4490; ECON 3080, ECON 3760; CRP 4510 and WGS 4020. General education courses cannot be cross-listed or dual-listed with Sociology courses that count toward the major.

Total Credits	13

LAS majors require a minimum of 120 credits to graduate, **including a minimum of 45 credits at the 3000/4000 level.** You must also complete the LAS world language requirement and career proficiency requirement.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

Majors must complete both ENGL 1500 Critical Thinking and Communication and ENGL 2500 Written, Oral, Visual, and Electronic Composition. According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500. In addition, majors must also take an advanced course in ENGL 3020 Business Communication or ENGL 3090 Proposal and Report Writing or ENGL 3140 Technical Communication with a grade of C or better.

Sociology, Bachelor of Arts (B.A.) and Bachelor of Science (B.S.)

Sociology Minor

The department offers a minor in sociology which may be earned by completing 15 credits in sociology with a minimum 2.0 GPA. At least 9 of the 15 credits must be at the 3000 level or higher with a minimum of 6 of those credits taken at ISU. The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

Students are required to earn credit for the following courses:

SOC 1340	Introduction to Sociology	3
Additional 12 credits in Sociology courses		12
9 credits must be 3000+		

Total Credits	15

Graduate Study

The Department offers study toward the **Master of Science** and **Doctor of Philosophy** degrees, with majors available in **Sociology** and **Rural Sociology**, as well as a graduate minor in **Sociology** for students majoring in other departments. The Department offers concentrations in a number of areas, e.g., community studies and development; sociology of families, inequality, food systems, agriculture and environment; criminal justice/ criminology; methodology; social change and development; and social psychology. The Department of Sociology does not offer a non-thesis option master's degree program.

The Department accepts applicants for the Ph.D. program from students who hold a master's degree, as well as from students who wish to enter the program directly with a bachelor's degree.

Contact information: Kyle Burgason, 202 East Hall, 515-294-9898 or burgason@iastate.edu.

Graduates have a broad understanding of sociology, address complex societal problems, and communicate effectively with scientific colleagues and the general public in both formal and informal settings. They understand sociological theory, conduct research, and are prepared to educate college students and contribute to public policy. Although the Department stipulates no language requirement for either the degree Master of Science or the degree Doctor of Philosophy, specifying competence in one or more languages may be desirable in some instances.

The Department also participates in the interdepartmental graduate major in **Sustainable Agriculture**, and the interdepartmental graduate minor in **Gerontology**.

Course requirements are listed below. Information about examinations, theses and dissertations, POS committees and other requirements are available on the Department of Sociology website.

Ph.D. Core Degree Requirements

Although responsibility for determining the student's course work resides with the Plan of Study (POS) committee, the Department of Sociology outlines core courses that must be taken by all students. A graduate course taken elsewhere can be substituted for the Ph.D. core requirements with approval by the Director of Graduate Education (DOGE) in consultation with the student's POS committee.

A minimum of 72 semester credits (including master's degree credits) is required for graduation.

Required Courses for the Ph.D. Degree

STAT 5820	Regression for Social and Behavioral Research	3
SOC 5060	Classical Sociological Theory	3
SOC 5110	Research Methodology for the Social Sciences	3
SOC 5120	Applied Multivariate Statistics for Social and Behavioral Research	3
SOC 5130	Qualitative Research Methods	3
SOC 5340	Race, Class and Gender Inequality	3
SOC 5910	Orientation to Sociology	1
SOC 6070	Contemporary Sociological Theory	3
SOC 6990A	Dissertation Research: General Sociology	1-8
or SOC 6990B	Dissertation Research: Rural Sociology	
14 three-credit elective courses as specified on the POS		42
No more than 12 credits of 5900 (special topics) may be applied toward the Ph.D. degree requirements.		

Total Credits 65-72

Ph.D. Minor / Co-Major Requirements

Required Courses for the Ph.D. Minor

SOC 5060	Classical Sociological Theory	3
or SOC 6070	Contemporary Sociological Theory	
SOC 5110	Research Methodology for the Social Sciences	3
One of the following two courses:		
SOC 5120	Applied Multivariate Statistics for Social and Behavioral Research	3
or SOC 5130	Qualitative Research Methods	
Two 3-credit graduate-level courses in Sociology.		6
Total Credits		15

Required Courses for the Ph.D. Co-Major

STAT 5820	Regression for Social and Behavioral Research	3
SOC 5060	Classical Sociological Theory	3

SOC 5110	Research Methodology for the Social Sciences	3

One Course in Advanced Methodology:

SOC 5120	Applied Multivariate Statistics for Social and Behavioral Research	
SOC 5130	Qualitative Research Methods	
SOC 5340	Race, Class and Gender Inequality	3
SOC 5910	Orientation to Sociology	1
SOC 6070	Contemporary Sociological Theory	3
3 additional three-credit graduate-level courses in Sociology		9

A minimum of 28 total credits is required for the Ph.D. co-major

Co-Major Requirements for the Graduate Program in Sustainable Agriculture

The Graduate Program in Sustainable Agriculture (GPSA) develops student competence and expertise in the design, implementation, and evaluation of sustainable agricultural systems. The program's curriculum satisfies the formal requirements for the MS and Ph.D. degrees, as established by the ISU Graduate College, and fosters transdisciplinary and systems-level thinking.

The Department does not offer double majors in sociology.

For admission to the co-major program contact the graduate program coordinator.

M.S. Core Degree Requirements

Although responsibility for determining the student's course work resides with the POS committee, the Department of Sociology outlines core courses that must be taken by all students. A graduate course taken elsewhere can be substituted for the core requirements with approval by the Director of Graduate Education (DOGE) in consultation with the student's POS Committee.

Required Courses for the M.S. Degree

STAT 5870	Statistical Methods for Research Workers	4
SOC 5060	Classical Sociological Theory	3
or SOC 6070	Contemporary Sociological Theory	
SOC 5110	Research Methodology for the Social Sciences	3
SOC 5130	Qualitative Research Methods	3
or STAT 5820	Regression for Social and Behavioral Research	
SOC 5910	Orientation to Sociology	1
SOC 6990A	Dissertation Research: General Sociology	1-8
or SOC 6990B	Dissertation Research: Rural Sociology	
4 three-credit elective courses as specified on the POS		12
No more than 6 credits of 5900 (special topics) may be applied toward the M.S. degree requirements.		

Total Credits 27-34

M.S. Minor / Co-Major Requirements

Required Courses for the M.S. Minor

SOC 5060	Classical Sociological Theory	3
or SOC 6070	Contemporary Sociological Theory	
SOC 5110	Research Methodology for the Social Sciences	3
Two 3-credit graduate-level courses in Sociology.		6
Total Credits		12

Required Courses for the M.S. Co-Major

STAT 5870	Statistical Methods for Research Workers	4
SOC 5060	Classical Sociological Theory	3
or SOC 6070	Contemporary Sociological Theory	
SOC 5110	Research Methodology for the Social Sciences	3
One Course in Advanced Methodology:		
STAT 5820	Regression for Social and Behavioral Research	3
or SOC 5130	Qualitative Research Methods	
SOC 5910	Orientation to Sociology	1
2 additional three-credit graduate-level courses in sociology		6
A minimum of 20 total credits is required for the M.S. co-major		

The department does not offer double majors in sociology at the graduate level. Admission requirements to the co-major program are the same as for the major.

Co-Major Requirements for the Graduate Program in Sustainable Agriculture

The Graduate Program in Sustainable Agriculture (GPSA) develops student competence and expertise in the design, implementation, and evaluation of sustainable agricultural systems. The program's curriculum satisfies the formal requirements for the M.S. and Ph.D. degrees, as established by the ISU Graduate College, and fosters transdisciplinary and systems-level thinking.

Software Engineering

Administrated by the College of Engineering and the College of Liberal Arts and Sciences.

For the undergraduate curriculum in Software Engineering (<http://www.se.iastate.edu>) leading to the degree Bachelor of Science. The Software Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the commission's General Criteria and Program Criteria for Software and Similarly Named Engineering Programs.

A software engineer uses their expertise to design, develop, and evaluate software, configure and install computer systems, and build and maintain software systems throughout their lifecycle. Specific tasks software

engineers perform evolve quickly, reflecting changes in technology, as well as the needs of employers. Software engineers work as members of teams that may include experts in engineering, marketing, manufacturing, accounting, training, and design.

The Software Engineering Program provides undergraduate students with the opportunity to learn Software Engineering fundamentals, to study applications of state-of-the art software technologies, and to prepare for the practice of Software Engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research, and outreach programs.

Student learning outcomes

Graduates of the Software Engineering curriculum should have, at the time of graduation:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PROGRAM EDUCATIONAL Objectives

Within five years of graduation, the graduates should:

1. Attain a **productive career** in Software Engineering or related fields.
2. Attain **leadership** roles and become **effective collaborators** to advance professional and organizational goals.
3. Engage in **lifelong learning** and professional development.
4. Encourage and support **diversity** and **inclusiveness** in their workplace.

We expect that these objectives will be manifested in our graduates through the following five key attributes: (a) *peer-recognized expertise*, (b) *engagement in professional practice*, (c) *sustained learning*, (d) *leadership* and (e) *teamwork*.

Demonstration of expertise involves applying state-of-the-art practices for solving problems in the design, development, validation, evolution and sustainment of (software) products. Demonstration of professional engagement involves contributing locally and globally to the use of ethical, competent, and creative practices in industry, academia or the public sector. Demonstration of sustained learning involves the ability to adapt to rapid technological, environmental, and organizational changes through self-study and group study and through opportunities of professional development or graduate study. Demonstration of leadership involves the ability to take initiative, and to facilitate the advancements of individuals and the community by influencing others and by having a widespread, positive impact on critical issues and projects. Finally, demonstration of teamwork involves the ability to work with collaborators who have varied expertise, and with diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the College of Engineering and the College of Liberal Arts and Sciences provide opportunities for each student to have experience with broadening activities. Students have the opportunity to gain practical industry experience in the cooperative education and internship program. Students have the opportunity to participate in advanced research activities. Through international exchange programs, students learn about engineering practices in other parts of the world.

Curriculum in Software Engineering

Degree requirements leading to the degree Bachelor of Science in Software Engineering.

Total credits required: 125 cr.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Engineering Basic Program GPA, or Software Engineering Core GPA). See also Engineering Basic Program and Special Programs. Note: Pass/Not Pass credits cannot be used to meet graduation requirements.

International Perspectives: 3 cr. ¹

U.S. Diversity: 3 cr. ¹

Communication Proficiency/Library requirement:

ENGL 1500	Critical Thinking and Communication (C or better in this course)	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition (C or better in this course)	3

LIB 1600	Introduction to College Level Research	1
Choose one of the following:		3
ENGL 3090	Proposal and Report Writing (C or better in this course)	
ENGL 3140	Technical Communication (C or better in this course)	
Total Credits		10

General Education Requirements: 21 cr. ²

Choose 1 course from the following:		3
ECON 1010	Principles of Microeconomics	
ECON 1020	Principles of Macroeconomics	
IE 3050	Engineering Economic Analysis	
Approved Arts and Humanities or Social Sciences courses		9
ENGL 2500	Written, Oral, Visual, and Electronic Composition (C or better in this course)	3
Choose one of the following ENGL courses (C or better in this course)		3
ENGL 3090	Proposal and Report Writing	
ENGL 3140	Technical Communication	
SPCM 2120	Fundamentals of Public Speaking	3
Total Credits		21

Engineering Basic Program: 24 cr.

A minimum GPA of 2.00 is required for this set of courses (please note that transfer course grades will not be calculated into the Engineering Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 1670	General Chemistry for Engineering Students	4
or CHEM 1770 General Chemistry I		
ENGL 1500	Critical Thinking and Communication (C or better in this course)	3
SE 1010	Software Engineering Orientation	
SE 1850	Problem Solving in Software Engineering ³	3
LIB 1600	Introduction to College Level Research	1
MATH 1650	Calculus I	4
MATH 1660	Calculus II	4
PHYS 2310	Introduction to Classical Physics I	4
PHYS 2310L	Introduction to Classical Physics I Laboratory	1
Total Credits		24

Math and Physical Science: 17 cr.

COMS 2270	Object-oriented Programming (C- or better in this course)	4

COMS 2280	Introduction to Data Structures (C- or better in this course)	3
MATH 2670	Elementary Differential Equations and Laplace Transforms	4
Math Elective: Choose one of the following:		3
MATH 2070	Matrices and Linear Algebra	
MATH 2650	Calculus III	
MATH 3040	Combinatorics	
MATH 3140	Graph Theory	
MATH 3170	Theory of Linear Algebra	
STAT 3300	Probability and Statistics for Computer Science	3
Total Credits		17

Software Engineering Core: 37 cr.

A minimum GPA of 2.00 is required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Software Engineering Core GPA):

CPRE 2810	Digital Logic	4
Choose one of the following:		3
COMS 3270	Advanced Programming Techniques	
CPRE 2880	Embedded Systems I: Introduction	
Choose one of the following:		3
COMS 3210	Introduction to Computer Architecture and Machine-Level Programming	
CPRE 3810	Computer Organization and Assembly Level Programming	
Choose one of the following:		3
COMS 3520	Introduction to Operating Systems	
CPRE 3080	Operating Systems: Principles and Practice	
Choose one of the following:		3
COMS 2300	Discrete Computational Structures	
CPRE 3100	Theoretical Foundations of Computer Engineering	
COMS 3110	Introduction to the Design and Analysis of Algorithms	3
COMS 3630	Introduction to Database Management Systems	3
SE 3090	Software Development Practices	3
SE 3170	Introduction to Software Testing	3
SE 3190	Construction of User Interfaces	3
SE 3390	Software Architecture and Design	3
SE 4210	Software Analysis and Verification for Safety and Security	3

Note: CPRE 2880, CPRE 3810, and CPRE 3080 are 4-credit courses.

The Software Engineering Core credit requirement (37 credits) is given in terms of 3-credit courses. If the 4-credit courses are taken instead, then the extra credits will be used as credits for Supplemental Electives.

Total Credits	37

Other Remaining Courses: 26 cr.

SE 4910	Senior Design Project I and Professionalism	3
SE 1660	Careers in Software Engineering	
SE 4920	Senior Design Project II	2
Software Engineering Electives ²		9
Supplemental Electives ²		9
Open Elective ²		3
Total Credits		26

Optional Co-op/Internships

Co-op (ENGR 3980) or internship (ENGR 3960) is optional

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 3000-level or above in professional and technical courses earned at ISU in order to receive a Bachelor of Science in Software Engineering. These 30 credits must include SE 4910 Senior Design Project I and Professionalism and SE 4920 Senior Design Project II. The Software Engineering degree program requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S Diversity and International Perspectives courses may not be taken Pass/Not Pass.
2. Choose from approved lists (<http://www.se.iastate.edu/academics/>).
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Engineering Basic Program.

See also: A 4-year plan of study grid showing course template by semester.

Note: International Perspectives and U.S. Diversity courses are used to meet the General Education Electives (<http://www.se.iastate.edu/academics/>).

Total Credits: 125

* Total credits required - 125 credits. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be

calculated into the ISU Cumulative GPA, Engineering Basic Program GPA, or Software Engineering Core GPA). See also Basic Program and Special Programs.

Engineering Basic Program - A minimum GPA of 2.00 is required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Engineering Basic Program GPA)

Must receive a C or better grade in required English classes.

Must receive a C- or better grade in MATH 1650, MATH 1660, COMS 2270, and COMS 2280.

General Educational Elective courses to be selected in consultation with Software Engineering Academic Advisors from a list of approved courses. They must include courses that satisfy university and college general education requirements. These courses include courses or categories of courses such as International Perspectives and U.S. Diversity, World Language, Arts and Humanities, and Social Sciences. Pass/Not Pass credit is not accepted.

Software Engineering Electives and Supplemental Electives must be selected from the program-approved list (<http://www.se.iastate.edu/academics/>).

- ¹ Software Engineering Core (A minimum GPA of 2.00 is required for this set of courses, including any transfer courses but transfer course grades will not be calculated into the Software Engineering Core GPA)
- ² Students who take the 4-credit lab courses CPRE 2880, CPRE 3080, and CPRE 3810 instead of the corresponding 3-credit alternatives can apply the additional credits toward Supplemental Electives. The total number of credits required in the Software Engineering Program remains the same for all students.

The Software Engineering Program has established concurrent undergraduate and graduate programs with the Department of Computer Science, the Department of Electrical and Computer Engineering, and the Ivy College of Business. Please visit <https://se.iastate.edu/academics/> for details.

Statistics

Overview of Statistics

The curriculum in liberal arts and sciences with a major in statistics is designed to prepare students for (1) statistics positions in business, industry or commerce, nonprofit institutions, and in state or federal government; and (2) graduate study in statistics. Positions include the following types of work: statistical design, data visualization, analysis and interpretation of experiments and surveys; data processing and analysis using modern computation facilities and statistical computing systems; application of statistical principles and methods in commercial areas such as finance, insurance, industrial research, technology, marketing, manufacturing, sports analytics, quality control, and nonprofit

organizations, such as institutions involved in health care or medical research.

Given the application of statistical work to a broad range of fields, students majoring in statistics often obtain at least a minor in a field of application. Some common minors earned by statistics majors are Economics, General Business, and Mathematics. Students preparing for positions in data analysis should consider a minor or certificate in Data Science. Students preparing for a career in the field of actuarial science should consider a certificate in Actuarial Science. Students intending to pursue graduate study in Statistics are strongly advised to complete at least a minor in Mathematics (<https://catalog.iastate.edu/collegeofliberalartsandsciences/mathematics/#undergraduateminortext>) including credit in MATH 4140 Analysis I.

Many Statistics majors earn an additional major or degree in a field of application or in Mathematics. Your academic advisor can assist you in developing your course of study including other majors.

Student Learning Outcomes

Students completing the undergraduate degree in statistics should have a broad understanding of the discipline of statistics. Upon graduation, students should be able to:

- Design observational studies and experiments in order to efficiently collect data to help answer questions about science, technology, and society.
- Analyze data arising from observational studies and experiments in order to help answer questions about the world around them.
- Use modern statistical computing to aid in the collection and analysis of data.
- Explain and apply the mathematical and theoretical basis for probability and statistical inference to help answer questions about the world around them.
- Effectively communicate statistical findings using oral, visual and written formats.
- Effectively respond to ethical issues associated with data collection, data analysis, and communication of statistical findings.

Undergraduate Major

The requirements for the undergraduate major in statistics are:

STAT 1100	Orientation in Statistics	1
STAT 2010	Introduction to Statistical Concepts and Methods	4
STAT 3010	Intermediate Statistical Concepts and Methods	4
STAT 3410	Introduction to the Theory of Probability and Statistics I	4
STAT 3420	Introduction to the Theory of Probability and Statistics II	4

STAT 4710	Introduction to Experimental Design	3
STAT 4750	Introduction to Multivariate Data Analysis	3
STAT 4840	Computer Processing of Scientific Data	3
STAT 4860	Introduction to Statistical Computing	3

A minimum of 6 credits from the following:

STAT 3610	Statistical Quality Assurance
STAT 4720	Introduction to Time Series
STAT 4730	Introduction to Survey Sampling
STAT 4740	Introduction to Bayesian Data Analysis
STAT 4760	Introduction to Spatial Data Analysis
STAT 4770	Introduction to Categorical Data Analysis
STAT 4780	Introduction to Stochastic Process Models
STAT 4820	Regression for Social and Behavioral Research
STAT 4830	Empirical Methods for the Computational Sciences

Completion of one of the following options:

Option I

MATH 1650	Calculus I
MATH 1660	Calculus II
MATH 2650	Calculus III

Option II

MATH 1650	Calculus I
MATH 1660H	Calculus II: Honors
MATH 2650H	Calculus III: Honors

Credit in one of the following:

MATH 2070	Matrices and Linear Algebra
MATH 3170	Theory of Linear Algebra

Credit in one of the following:

COMS 1270	Introduction to Computer Programming
COMS 2070	Fundamentals of Computer Programming
COMS 2270	Object-oriented Programming

Credit in one of the following:

COMST 2110	Interpersonal Communication
SPCM 2120	Fundamentals of Public Speaking

Credit in one of the following (with a grade of C- or higher):

ENGL 3020	Business Communication
ENGL 3020H	Business Communication: Honors
ENGL 3140	Technical Communication
ENGL 3140H	Technical Communication: Honors

As majors in the College of Liberal Arts and Sciences, Statistics students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. You must also complete the LAS world language requirement and career proficiency requirement.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

Undergraduate Minor

The department offers a minor in statistics which may be earned by satisfying the following requirements:

- Credit in one introductory level course in statistics, chosen from the following list: STAT 1010, STAT 1040, STAT 2010, STAT 2260, STAT 2310, STAT 3050, STAT 3220, STAT 3300.
- Credit in one intermediate level course in statistics, chosen from the following list: STAT 3010, STAT 3260.
- At least 9 additional credits in statistics courses, chosen from the following list: STAT 3410, STAT 3420, STAT 3470, STAT 3610, STAT 4710, STAT 4720, STAT 4730, STAT 4740, STAT 4750, STAT 4760, STAT 4770, STAT 4780, STAT 4820, STAT 4830, STAT 4840, STAT 4860.

Courses selected to satisfy the minor must include at least 9 credits that are not used to meet any other department, college or university requirement other than the credit requirement for graduation and credit requirement for courses numbered 3000 or above.

Courses selected to satisfy the minor must include at least 6 credits in courses numbered 3000 and above taken at ISU with a grade of C or higher.

Graduate Study

The department offers graduate programs leading to both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees with a major in statistics. Graduate work leading to a minor in statistics is available for students majoring in other programs, at both the M.S. and Ph.D. levels. The Ph.D. degree is also offered as a co-major with other graduate programs. The department participates in inter-disciplinary graduate programs in Bioinformatics and Computational Biology, Ecology and Evolutionary Biology, Genetics, Human Computer Interaction, Nutritional Sciences, and Wind Energy Science, Engineering, and Policy.

Graduates of the M.S. program have an understanding of basic statistical theory and methods. Elective courses in the M.S. program provide an opportunity for students to emphasize particular areas of statistical methods or application in their program. Students complete a minimum of 34 semester credits, including work on a capstone project resulting in a written creative component under the direction of an individual major professor and presented in a final oral examination.

Graduates of the Ph.D. program in statistics have studied advanced theory and methods and have demonstrated the ability to conduct independent research resulting in an original contribution to the

discipline. Candidates for the Ph.D. degree in statistics complete a minimum of 72 semester credits, including at least 18 credits given for research activity, pass an oral preliminary examination, and submit a written dissertation containing original research that is defended in a final oral examination. Dissertation research is typically conducted in close collaboration with a major professor and usually results in publishable material. The department does not offer specific program tracks or areas of emphasis, but the diversity of elective courses and research areas of faculty allow students to tailor their individual programs to reflect areas of particular interest.

Graduates of co-major Ph.D. programs in statistics and an applied scientific discipline have mastered basic statistical theory and have studied advanced methodology. Students complete a minimum of 72 semester credits for courses in statistics and the chosen scientific discipline. Students conduct research that is a combination of statistical methodology and the scientific discipline. Co-major professors work with the student to prepare for an oral preliminary examination and conduct research leading to a single dissertation project that produces an original contribution to at least one of the two disciplines that is defended in a final oral examination.

Graduates of co-major Ph.D. programs in statistics and an area of theoretical mathematics have mastered basic statistical methods and have studied advanced statistical theory. Students complete a minimum of 72 semester credits. Co-major professors assist the student in preparing a dissertation that represents original research that makes a contribution at the interface of statistical theory and a sub-discipline of mathematics. The dissertation is defended in a final oral examination.

Teaching English as a Second Language (TESL) Minor

The Minor in TESL prepares students to teach English to nonnative speakers of English, either in community programs in the United States or in overseas locations. The Minor provides understanding of how languages work (ENGL 2190/LING 2190) and practical and theoretical applications in how English is taught to those who do not speak English natively (ENGL 3220/LING 3220, ENGL 3240/LING 3240, ENGL 3250/LING 3250, and ENGL 4250/LING 4250). The TESL Minor prepares students to cross cultural boundaries to learn about, interact with, and assist speakers of other languages in learning English, the leading global language today. A TESL Minor will help students become global citizens through interacting with and teaching those from around the world who come to the United States and by giving students skills that will allow them to live and work in other countries. All classes listed are requirements for the Minor in TESL (15 credits). A C or better is required in each course used to satisfy the minor. The minor must include

at least 9 credits that are not used to meet any other department, college, or university requirement.

Contact Isabella Perksen iperksen@iastate.edu for more information.

Requirements

ENGL 2190	Introduction to Linguistics	3
LING 3220	Language and Society	3
LING 3240	Introduction to Teaching ESL Literacy	3
LING 3250	Teaching Methods for ESL Learners: Oral Communication Skills	3
ENGL 4250	Second Language Learning and Teaching	3

Technical Communication

The Technical Communication major (and additional major or minor) prepares students for careers that involve information—particularly scientific or technical information. Students learn to write and design workplace texts, including responsive digital content (such as websites). They are taught to make complex scientific, business, and technical content clear and usable for its audiences. Courses emphasize writing, editing, design (print and online), organization, research, critical thinking, and collaboration (especially with subject-matter experts). Some students double major in Technical Communication and a technical or scientific field; Technical Communication is also often an additional major or minor for students who major in English (<http://catalog.iastate.edu/collegeofliberalartsandsciences/english/>).

BS in Technical Communication Learning Outcomes

Students who major in Technical Communication will be able to

- Compose a wide range of print and online documents for use in business, schools, and communities.
- Understand technical and scientific information and strategies for producing texts to communicate that information to others.
- Describe and use the theories that assess print and online documents, collaboration, organizational activities, and various technologies.
- Demonstrate mastery of concepts from organizational culture and visual communication, including collaborative writing and clear, responsive professional and technical documents.
- Identify specific audience needs in rapidly changing digital and print environments.
- Identify and create user-friendly interfaces; understand and put into practice strategies to enable the optimal usability of documents.

Technical Communication Major Requirements

Majors develop advanced skills in multiple aspects of technical communication and apply their knowledge of technical communication to a specific discipline. Technical communication majors must take 33 credits within the major and 6 hours in a designated area of concentration related to science, technology, or design (an acceptable minor will also fulfill this requirement).

ENGL 2140	Introduction to Technical Communication	3
ENGL 3100	Rhetorical Analysis	3
ENGL 3130	Rhetorical Website Design	3
ENGL 3140	Technical Communication	3
ENGL 4150	Business and Technical Editing	3
ENGL 4160	Visual Aspects of Business and Technical Communication	3
Electives: 9 credits (with at least 6 credits from 4000 or above courses)		9
ENGL 2220X	Artificial Intelligence and Writing	3
ENGL 3020	Business Communication	
ENGL 3090	Proposal and Report Writing	
SPCM 3120	Business and Professional Speaking	
ENGL 3120	Communicating Science and Public Engagement	
ENGL 3550	Literature and the Environment	
ENGL 4770	Seminar in Technical Communication	
ENGL 4870	Internship in Business, Technical, and Professional Communication	
ENGL 5420	Technical Editing and Publication Management	
ENGL 5490	Multimedia and Interaction Design	
Designated Area of Concentration (DAC) in technical, scientific, or design field		6
Total Credits		36

Technical Communication Major Requirements

Technical Communication majors are required to have, in addition to ISUComm foundation courses (ENGL 1500 (<http://catalog.iastate.edu/search/?P=ENGL%20150>) Critical Thinking and Communication and ENGL 2500 (<http://catalog.iastate.edu/search/?P=ENGL%20250>) Written, Oral, Visual, and Electronic Composition), at least 33 credits in TComm (including 6 credits in a designated area of concentration). Majors transferring from other institutions must take at least 18 of their credits in TComm while in residence at Iowa State.

To graduate with a major in Technical Communication and meet the university-wide Communication Proficiency Grade Requirement, a student must have credit for ENGL 1500 Critical Thinking and Communication and

earn at least a C (not C-) in ENGL 2500 Written, Oral, Visual, and Electronic Composition as well as in each of the courses taken to fulfill the program of study, including one advanced communication course.

Designated Area of Concentration Courses

The Designated Area of Concentration (DAC) is a student-designed grouping of related courses in a technical, scientific, or design field that will meet the student's professional or academic interests. Courses for the 6-credit DAC must be taken outside the English Department and approved by the Technical Communication Program Advisor.

An additional major or a minor in areas such as computer science, social science, natural science, entrepreneurial studies, design studies, engineering studies, or another technical, scientific, or design field may substitute for the DAC.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check <http://www.registrar.iastate.edu/courses/div-ip-guide.html> for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 3000/4000 level**. You must also complete the LAS world language requirement and career proficiency requirement.

As majors in the College of Liberal Arts and Sciences, Technical Communication students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

Technical Communication Minor Requirements

The department offers a minor in Technical Communication, which students may earn by completing the following:

ENGL 3140	Technical Communication	3
Choose 4:		12
ENGL 2140	Introduction to Technical Communication	
ENGL 3020	Business Communication	
ENGL 3090	Proposal and Report Writing	
ENGL 3100	Rhetorical Analysis	
ENGL 3120	Communicating Science and Public Engagement	
ENGL 3130	Rhetorical Website Design	
ENGL 3320	Visual Communication of Quantitative Information	
ENGL 3550	Literature and the Environment	

or with the appropriate prerequisites

ENGL 4110	Technology, Rhetoric, and Professional Communication
ENGL 4150	Business and Technical Editing
ENGL 4160	Visual Aspects of Business and Technical Communication
ENGL 4770	Seminar in Technical Communication
ENGL 5290	Content Management
ENGL 5420	Technical Editing and Publication Management
ENGL 5490	Multimedia and Interaction Design

Total Credits 15

Nine of the 15 credits must be 3000 level or above and students must earn a grade of C (not C-) or higher in each course taken in the minor. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students may design their minor programs around their own interests but are encouraged to work with the Technical Communication Program Advisor.

Note: Students should check the ISU catalog to be sure that they meet prerequisites if they intend to register for 4000+ courses.

Theatre and Performing Arts Overview

www.music.iastate.edu/theatre (<http://www.music.iastate.edu/theatre/>)

The Theatre and Performing Arts program:

- Utilizes a flexible, interdisciplinary curriculum.
- Focuses on undergraduate experiences, high impact learning, interdisciplinary and cross-community collaboration, and exceptional professional preparation and training.
- Engages in collaborative, innovative practices in both classroom and production settings.
- Empowers students to take an active role in an interconnected system of artistic community engagement and creative momentum.
- Is dedicated to individualized student-centered programming that is ambitious, relevant, and rigorous.

ISU Theatre impacts hundreds of students from majors throughout the university in our classes, productions and studios. Our students are compassionate, enthusiastic, aware, ambitious, dependable, dedicated, disciplined and generous. The Theatre and Performing Arts program offers a wide variety of courses that support the student's individual interests and specialization.

The major in performing arts offers the undergraduate student a cross-disciplinary core including 26 credits in three categories: Theatre, Music

and Dance. Students also select a 21-22 credit emphasis in one or more of the following areas of focus:

- Acting/Directing
- Dance
- Musical Theatre
- Theatrical Design and Technology

Additional professional development occurs within two required professional internships in which students can practice the skills and passions developed throughout their individualized plans of study. Preparation for these internships include various impactful experiences in theatre and the performing arts here at Iowa State. This work is vital for students to gain a practical understanding of the rigors of the field.

ISU Theatre and Performing Arts focuses solely on the undergraduate student artist, offering students many opportunities to participate in production experiences throughout the academic year. Students implement the theories and principles explored in the classroom with experiential learning through public performances. These productions vary in scope, taking place in the 435-seat proscenium space at Fisher Theatre as well as in other intimate and “found” venues both on and off campus. Performing arts majors must maintain a 2.0 GPA to participate in production activities. Scholarships and employment opportunities are available to both incoming and current students on a yearly basis. All areas of ISU Theatre and Performing Arts, including classes and productions, are open to all students regardless of major. Visit here (<https://www.music.iastate.edu/how-get-involved-theatre-and-performing-arts/>) to learn about scholarships and all of the ways to get involved with Theatre and the Performing Arts at ISU.

In addition to building a solid foundation in theatre, Performing Arts graduates enter the world as empathetic members of their community prepared to engage in civic life and meet the challenges of the work force or graduate school with strong skills in leadership, collaboration, and critical thinking.

Student Learning Outcomes

Upon graduation, students should be able to:

- Recognize the ways in which theatre and performing arts can reflect and change communities and culture.
- Apply collaboration principles to the creation of performing arts.
- Analyze dramatic literature and performances from dramaturgical, performative, sensory, aesthetic, and community perspectives.
- Organize and integrate resources - including human (self and others), technology, and systems - to solve abstract and practical problems.

- Compare and critique performing arts theory, practice, literature, design, performance, and one's own process and work within cultural and historical contexts.

Bachelor of Arts - Performing Arts Major (Perf)

As majors in the College of Liberal Arts and Sciences, students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated below for the major.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. You must also complete the LAS world language requirement and career proficiency requirement.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

All performing arts majors must complete both the performing arts core and at least one of the emphases listed below. A Minimum GPA of 2.00 in both the major core and the chosen emphasis is required to graduate.

The Core for the Performing Arts Major (26 credits)

MUSIC 1010	Fundamentals of Music	2
THTRE 1060	Introduction to the Performing Arts	3
	or THTRE 1100 Theatre and Society	
	or MUSIC 1020 Introduction to Music Listening	
THTRE 2500	Technical Theatre Practicum	2
THTRE 2510	Acting Foundations	3
THTRE 2550	Introduction to Theatrical Production	4
THTRE 2630	Script Analysis	3
PERF 1050	Performing Arts Seminar (Six semesters required at .5 credits per semester)	3
PERF 3100	Performing Arts Internship (2 professional internships required)	
	or THTRE 49 Theatre Internship	
PERF 4010	Performing Arts Capstone Seminar	2
Choose four credits of DANCE from the following:		4
DANCE 1200	Modern Dance I	
DANCE 1300	Ballet I	
DANCE 1400	Jazz I	
DANCE 1500	Tap Dance I	
DANCE 1600	Ballroom Dance I	

DANCE 2110	Fundamentals and Methods of Social and World Dance	
DANCE 2200	Modern Dance Composition	
DANCE 2220	Modern Dance II	
DANCE 2230	Modern Dance III	
DANCE 2320	Ballet II	
DANCE 2330	Ballet III	
DANCE 2420	Jazz II	
DANCE 2500	Yoga Movement	
DANCE 2700	Dance Appreciation	
DANCE 3200	Sound and Movement	
DANCE 3600	History and Philosophy of Dance	
DANCE 3700	Advanced Studies in Dance	
DANCE 3840	Teaching Children's Dance	
DANCE 3850	Methods of Teaching Dance	
DANCE 3860	Teaching Dance Technique and Composition	
Total Credits		26

Emphasis in Acting/Directing (22 Credits)

MUSIC 1250	Class Voice (1 semester of MUSIC 1250 or 118A required) or MUSIC 1180A Applied Music: Non-majors: Voice	1
THTRE 1510	Actor's Voice and Movement	3
THTRE 3930	Studies in Theatre Design and Production Workshop	
THTRE 4550	Directing	3
THTRE 4650	Theatre History: Ancient to 19th Century	3
THTRE 4660	Theatre History: 19th Century to Present	3
Choose 6 credits from the following:		6
THTRE 3510	Acting: Contemporary Scene Study	
THTRE 3520	Puppetry Design and Performance	
THTRE 3530	Acting for the Camera	
THTRE 4510	Acting: Period Styles	
THTRE 3160	Creative Writing: Playwriting	
THTRE 4560	Advanced Directing	
THTRE 5040B	Seminar: Acting Techniques	
THTRE 5040C	Seminar: Acting Styles	
THTRE 5040E	Seminar: Arts Management	
Total Credits		19

Emphasis in Theatrical Design and Technology (21 credits)

THTRE 4550	Directing	3
THTRE 4650	Theatre History: Ancient to 19th Century	3

THTRE 4660	Theatre History: 19th Century to Present	3
Choose 12 Credits from the following:		12
THTRE 3570	Stage Makeup	
THTRE 3930A	Studies in Theatre Design and Production Workshop: Costume Design	
THTRE 3930B	Studies in Theatre Design and Production Workshop: Scenic Design	
THTRE 3930C	Studies in Theatre Design and Production Workshop: Lighting Design	
THTRE 3930D	Studies in Theatre Design and Production Workshop: Sound Design	
THTRE 3930E	Studies in Theatre Design and Production Workshop: Stagecraft	
THTRE 3930F	Studies in Theatre Design and Production Workshop: Costume Draping and Patterning	
THTRE 3930G	Studies in Theatre Design and Production Workshop: Advanced Makeup	
THTRE 3930I	Studies in Theatre Design and Production Workshop: Stage Management	
THTRE 3930J	Studies in Theatre Design and Production Workshop: Technical Direction	
THTRE 3930K	Studies in Theatre Design and Production Workshop: Arts Management	
THTRE 3930L	Studies in Theatre Design and Production Workshop: Scenic Painting	
THTRE 3930M	Studies in Theatre Design and Production Workshop: Costume Construction	
THTRE 5040D	Seminar: Design and Technical Theatre	
THTRE 5040E	Seminar: Arts Management	
Total Credits		21

Emphasis in Musical Theatre (22 credits)

MUSIC 1250	Class Voice (4 semesters of MUSIC 1180A and/or 125 required) or MUSIC 1180A Applied Music: Non-majors: Voice	1
THTRE 3540	Musical Theatre History and Performance	3
THTRE 3550	Musical Theatre Auditions and Performance	3
THTRE 4650	Theatre History: Ancient to 19th Century or THTRE 4660 Theatre History: 19th Century to Present	3
Choose 9 credits from the following:		9
THTRE 1510	Actor's Voice and Movement	
THTRE 3510	Acting: Contemporary Scene Study	
THTRE 3520	Puppetry Design and Performance	
THTRE 3530	Acting for the Camera	

THTRE 3930	Studies in Theatre Design and Production Workshop
THTRE 4510	Acting: Period Styles
THTRE 4550	Directing
THTRE 4560	Advanced Directing
THTRE 5040A	Seminar: Musical Theatre
THTRE 5040B	Seminar: Acting Techniques
THTRE 5040C	Seminar: Acting Styles
THTRE 5040E	Seminar: Arts Management

Total Credits 19

Emphasis in Dance (21 credits)

DANCE 3600	History and Philosophy of Dance	3
12 Credits of DANCE in addition to DANCE 3600 and the six taken in the PERF core. At least 6 credits must be 3000+.		12
6 credits of 3000+ credits in THEATRE.		6

Total Credits 21

Suggested Four year plans for Performing Arts majors

Listed below are example pathways for completing the Performing Arts major. Students will work with their academic adviser to navigate their pathway through the curriculum requirements.

Total Credits: 120

Please see the Department advisors for more information about suggested Four Year Plans for the Emphases in Dance. Students in all ISU majors must complete a three-credit course in U.S. Diversity and a three-credit course in International Perspectives. Consult the catalogue for a list of approved courses. Discuss with your advisor how these two courses can be applied to your graduation plan.

Performing Arts Minor

To complete the minor in Performing Arts, students must take at least 15 credits of either Theatre or Performing Arts courses. Six credits must be 3000 level or higher. *THTRE 2240, 2500, 2900, 3010, 4690, 4900, and 4990 do not count toward the Performing Arts minor.* The minor must include at least 9 credits that are not used to meet any other department, college or university requirement. The following classes are required:

PERF 1050	Performing Arts Seminar (3 semesters)	
THTRE 2550	Introduction to Theatrical Production	4
THTRE 2630	Script Analysis	3

U.S. Latino/a Studies Program Overview

Latinos/as/x are the largest and fastest growing culturally diverse population in the United States, representing dynamic and thriving American realities.

U.S. Latino/a Studies at Iowa State University is a cross-disciplinary, coalition-building program that offers well-structured and creative coursework to students interested in the arts, cultures, economies, histories, politics, religions, and literatures of Latino/a/x communities throughout the United States. It facilitates the study of a vast array of communities and individuals with roots in the Caribbean and Latin America, and long-established U.S. citizen communities such as

Chicanos/as, Mexican Americans, Tejanos, Californios, Cuban-Americans, Dominican-Americans, and Puerto Ricans on the island and on the mainland.

The program aims to serve as a hub that connects classes, service and outreach opportunities across colleges, schools, and departments. Consequently, students can discover a stimulating field of critical and academic research, engage in an exciting platform on which to link different fields of study, and become part of outreach/community networks in which they will grow to become outstanding, conscientious leaders in their respective careers.

The Program in U.S. Latino/a Studies is well suited to careers in Education, Psychology, History, Sociology, Business, Journalism, Spanish Language and Cultures, Women's and Gender Studies, and Agriculture. A U.S. Latino/a Studies minor, or a double major with a Latino/a Studies track in Interdisciplinary Studies, strengthens student profiles as they compete for jobs on the global market because they have attained an in-depth experience of local and global experiences of Latin America and the Caribbean, as well as a sophisticated understanding of diversity and inclusion.

The US LS Program offers course work that meets the ISU U.S. Diversity requirement and also offers a 15 credit U.S. Latino/a Studies Minor (<https://usls.las.iastate.edu/minor/>).

U.S. Latina/o/x Studies Program Student Learning Outcomes

Upon the completion of their program of study, students with an interdisciplinary studies major in U.S. Latino/a/x Studies will demonstrate proficiency in four goal areas: Communication, Cross-Cultural Literacy, Critical Thinking, and Lifelong Learning Skills.

1. **Communication:** Key communication skills, including written, oral, and digital. Understanding textual and media sources and ability to apply media literacy to cross-cultural analysis. Working knowledge of social scientific and/or humanistic approaches in the field.
2. **Cross-Cultural Literacy:** Ability to communicate across communities and acknowledge different communicative styles and languages including Spanish, Portuguese, and Indigenous.
3. **Critical Thinking:** Ability to analyze from a transnational/transborder/translocal perspective and to objectively examine the interconnections between Latinx, Caribbean, and Latin American communities. Developing key skills, such as finding and understanding sources, comparing arguments, proposing solutions to discussed problems within an expansive historical perspective that includes class, ethnicity, gender, and race.
4. **Lifelong Learning Skills:** Acquisition of practical hands-on skills in community engagement, extension and outreach service, in different settings such as urban, rural, and international.

Interdisciplinary Studies Major, Track in U.S. Latino/a Studies

In addition to meeting the general requirements for the Interdisciplinary Studies major, students wishing to complete a track in U.S. Latino/a Studies must complete a minimum of 36 credits in the area of U.S. Latino/a Studies including USLS 2110 (Introduction to U.S. Latino/a Studies) and an experiential learning course (USLS 3250 or USLS 4990). At least 15 of the 36 credits must be in courses numbered 3000 and above and 6 credit hours must be earned at the 4000-level. Students must also meet the upper-level communication proficiency requirement by taking English 3020 or 3140. Students can work with the USLS program director and an Interdisciplinary Studies advisor to explore options within this individualized major program.

Required Courses (36 credits)

USLS 2110	Introduction to U.S. Latino/a Studies	3
One Experiential Learning course in USLS		3
USLS 3250	Culture and Community: Iowa and Midwest Latino/as	
US LS 3770	Latina/o/x Life Stories: Memoirs and Oral History	3
USLS 4990	Internship in US Latino/a Studies	
Two of the following Historical Foundations of USLS		6
USLS 3720	Latina/o History	
HIST 3400	Colonial Latin America	
HIST 3410	Modern Latin America	
Two of the following Social Science Foundations of USLS		6
USLS 3430	Latin American Government and Politics	
USLS 3470	U.S. Latino/a Psychology	
USLS 3600	Latinas and Victimization	
USLS 4730	Civil Rights and Ethnic Power	
ANTHR 3230A	Latin American Anthropology: Violence and Memory	3
or ANTHR 3230B Latin American Anthropology: Social movements and Democracy		
or ANTHR 3230C Latin American Anthropology: Race, Class and Gender		
or ANTHR 3230D Latin American Anthropology: Regional Focus		
or ANTHR 3230E Latin American Anthropology: Culture and Sport		
SOC 3320	The Latino/Latina Experience in U.S. Society	
SPAN 3220	Latin American Civilization	
SPAN 3240	Latin America Today	
Two of the following Literature and Language in USLS		6
SPAN 3040	Spanish for Global Professionals	
SPAN 3050	Spanish for Heritage Speakers	

SPAN 4450	Seminar on the Literatures and Cultures of Latin America	
And twelve additional credits from any USLS, USLS cross-listed, or other course listed above		12
Total Credits		42

Notes

1. The list of acceptable courses may include courses not currently listed. Contact the Director of US Latino/a Studies for information on eligible courses.
2. The student must have an average grade of C in courses applied to the major.
3. Fulfillment of the world language requirement with Spanish is strongly recommended, but not required. Students pursuing multiple majors can apply up to nine (9) credits of approved Spanish courses (3040, 3220, 3240, 4450) to both the USLS and their other major.

As majors in the College of Liberal Arts and Sciences, Interdisciplinary Studies students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. You must also complete the LAS world language requirement and career proficiency requirement.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

U.S. Latino/a Studies Minor

The minor in US Latino/a Studies requires a minimum of 15 credit hours including USLS 2110 (Introduction to U.S. Latino/a Studies) and an experiential learning course (USLS 3250 or USLS 4990). University policy indicates that minors must include at least 9 credits that are not applied to any other degree requirement.

Required course work

USLS 2110	Introduction to U.S. Latino/a Studies	3
One of the following:		3
USLS 3250	Culture and Community: Iowa and Midwest Latino/as	
US LS 3770	Latina/o/x Life Stories: Memoirs and Oral History	3
USLS 4990	Internship in US Latino/a Studies	

And nine credits from any USLS or USLS cross-listed course	9
Total Credits	18

Notes:

- 1. A limit of six (6) credits of approved Spanish courses (SPAN 3040, SPAN 3220, SPAN 3240, SPAN 4450) may be substituted for USLS courses.
- 2. A maximum of 3 credit hours of USLS 4900 (Independent Study) may applied toward the minor.

Women's and Gender Studies Overview

The Women's and Gender Studies Program is a cross-disciplinary program in the College of Liberal Arts and Sciences. The program offers students opportunities to analyze issues concerning women, gender, and sexuality in diverse cultural contexts and to investigate a variety of disciplines from feminist perspectives. The field of women's and gender studies creates an understanding that interrelated factors—e.g., race, ethnicity, class, age, disability, gender identity, religion, national origin, and sexual orientation—inform knowledge of women's history, culture, and social roles.

Women's and Gender Studies seeks to improve critical thinking and to provide students with the intellectual means to question prevailing assumptions. It encourages students to explore the contexts and ideological origins of knowledge and to examine the relationship between knowledge and power in society. By promoting social justice and inclusion, this area of study focuses on the connections between personal experience and political activity and validates student contributions and voices.

Graduates from this program are skilled in critical thinking, research methods, and effective communication. Because they have developed a thorough understanding of gender, race, and class, graduates work effectively with employers, colleagues, and clients to analyze and solve complex social problems. Women's and Gender Studies students also acquire strong backgrounds for careers in areas such as counseling, education, human resources, international development, public policy, politics, business, and law. The program includes core and cross-listed courses in anthropology, history, economics, English, history, health and human performance, political science, psychology, religion, sociology, speech communication, and world languages and cultures.

Student Learning Outcomes

Through student-driven discussions, based on engagement with critical and cultural texts by feminist scholars and activists, the Women's and Gender Studies Program curriculum will help students develop the necessary skills to:

- Increase awareness of women's history and experiences that affect representations of gender in contemporary society.
- Explore forms of social inequality through feminist theories and concepts
- Understand how intersecting identities shape individuals and their life experiences.
- Analyze gender dynamics in different types of relationships.

Degree Requirements Women's and Gender Studies (B.A., B.S.)

An undergraduate major requires a minimum 2.00 GPA in the 34 credits of core and cross-listed courses. Women's and Gender Studies' majors must satisfy the following requirements:

- 1. 16 credits selected from Women's and Gender Studies core courses (WGS).

A. Required core courses:

WGS 1600	Gender Justice	1
WGS 2010	Introduction to Women's and Gender Studies	3
WGS 3010	International Perspectives on Women and Gender	3
WGS 4010	Feminist Theories	3
WGS 4020	Feminist Research in Action	3
WGS 4910 or WGS 4990	Internship Senior Thesis	3
Total Credits		16

B. The remaining 18 credits of required coursework can be chosen from one of the following Areas of Emphasis: 1) Communication and Cultural Representation; 2) Identities and Sexualities; 3) Leadership and Social Justice; or students can work with their advisor to identify the set of courses that support their personal and professional goals.

1) Communication and Cultural Representation

Courses in this field offer diverse perspectives on how media and communication represent and shape culture in the US and around the world. Students engage with feminist literature, philosophy, art, and other expressions of culture in society. These themes are used to examine how the lives and roles of women have changed throughout history.

WGS 2100	Gender and Sexuality in American Pop Culture	3
WGS 3080	Write Like a Woman	3
WGS 3230	Gender and Communication	3
WGS 3250	Portrayals of Gender and Sexualities in the Media	3
WGS 3270	Gender and Sexualities in Society	3
WGS 3380	Feminist Philosophy	3
WGS 3450	Women's Literature	3
ENGL 3490	Multicultural Literatures of the United States	3

WGS 3520	Queer Literature	3
WGS 3700	Studies in English Translation	3
WGS 3740	Sex, Gender, and Culture in the Ancient Mediterranean World	3
WGS 4220	Women, Men, and the English Language	3
WGS 4300	Gender and Consumer Culture	3
WGS 4500	Topics in Women's and Gender Studies	3
WGS 4600	Seminar in Gender and Ethnicity	3
WGS 4900	Independent Study	1-3
WGS 4940	Women/Gender in Art	3
WGS 5450	Women's Literature	3
WGS 5940	Women/Gender in Art	3

2) Identities and Sexualities

This area highlights the growing emphasis in Women's and Gender Studies on how experiences and societal narratives shape and are impacted by gender identities and sexualities. Courses explore power relations, oppression, privilege, and resistance as ways of understanding these social identities. Students will learn about how issues of race, class, gender, sexuality, and other axes of difference intersect and enable political resistance.

WGS 2030	Introduction to Lesbian Communities	3
WGS 2050	Introduction to Queer Studies	3
WGS 2100	Gender and Sexuality in American Pop Culture	3
WGS 3080	Write Like a Woman	3
WGS 3250	Portrayals of Gender and Sexualities in the Media	3
WGS 3270	Gender and Sexualities in Society	3
WGS 3280	Sociology of Masculinities and Manhood	3
WGS 3360	Religion, Sex and Gender	3
WGS 3390	Goddess Religions	3
WGS 3440	Human Reproduction	3
WGS 3460	Psychology of Women	3
ENGL 3490	Multicultural Literatures of the United States	3
AFAM 3500	Women of Color in the U.S	3
WGS 3520	Queer Literature	3
WGS 3740	Sex, Gender, and Culture in the Ancient Mediterranean World	3
WGS 3800	History of Women in Science, Technology, and Medicine	3
WGS 3860	History of Women in America	3
WGS 4100	Human Trafficking	3
WGS 4250	Intersections of Race, Class and Gender	3
WGS 4300	Gender and Consumer Culture	3

WGS 4400	Gender Issues in Sports	3
WGS 4500	Topics in Women's and Gender Studies	3
WGS 4570	History of American Sexualities	3
WGS 4900	Independent Study	1-3
WGS 4940	Women/Gender in Art	3
WGS 5250	Intersections of Race, Class and Gender	3
WGS 5860	Readings Seminar in Women's and Gender History	3

3) Leadership and Social Justice

Courses in this area of specialization provide students with the tools and theories needed to become successful change agents, activists, and community organizers. These courses explore how social movements can transform communities, cultural norms, and global systems. Students will engage with critiques and the context of movements such as transnational feminism, Black Lives Matter, LGBTQIA+ Pride, and #MeToo.

WGS 2100	Gender and Sexuality in American Pop Culture	3
WGS 3070	Women in Science and Engineering	3
ENVS 3200	Ecofeminism	3
WGS 3210	Economics of Discrimination	3
WGS 3330	Women, Gender, and Leadership	3
WGS 3440	Human Reproduction	3
AFAM 3500	Women of Color in the U.S	3
WGS 3800	History of Women in Science, Technology, and Medicine	3
WGS 3850	Women in Politics	3
WGS 3860	History of Women in America	3
WGS 3870	First Ladies in U.S. History	3
WGS 4100	Human Trafficking	3
WGS 4250	Intersections of Race, Class and Gender	3
WGS 4350	Gender, Globalization and Development	3
WGS 4400	Gender Issues in Sports	3
WGS 4500	Topics in Women's and Gender Studies	3
WGS 4900	Independent Study	1-3
WGS 5860	Readings Seminar in Women's and Gender History	3

A minor or additional major is recommended. The typical degree awarded is a Bachelor of Arts; students interested in a Bachelor of Science degree in Women's and Gender Studies need to complete 12 credits in addition to the general education requirements across the areas of natural science, mathematics, and social science.

Communication Proficiency requirement:

The Women's and Gender Studies major requires credit for ENGL 1500; ENGL 2500 (or ENGL 2500H) (with a grade of C or better, per the university-wide Communication Proficiency Grade Requirement); and WGS 3010 or WGS 4010 or WGS 4020 (with a grade of C or better).

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 3000/4000 level**. You must also complete the LAS General Education requirements as well as the world language and career proficiency requirements.

As majors in the College of Liberal Arts and Sciences, Women's and Gender Studies students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated above for the major.

Total Credits: 120-124

Minor

Undergraduate students may minor in Women's and Gender Studies by taking 15 semester hours of Women's and Gender Studies classes, including the following:

WGS 2010	Introduction to Women's and Gender Studies	3
WGS 3010	International Perspectives on Women and Gender	3

One 4000-level WGS course and 6 additional credits in WGS; at least 3 of the additional credits must be at the 3000-4000 level.

University policy requires that at least 9 credits used for the minor stand alone and are not used to meet any other requirement. All WGS courses for the minor require a grade of C (not C-) or higher.

Any student can declare a major or minor in Women's and Gender Studies or choose to co-major in another program. Students interested in a minor or major in Women's and Gender Studies should contact the director or the undergraduate advisor in the program.

Graduate Study

The graduate minor in Women's and Gender Studies is designed to provide students with knowledge of theories and methods within a variety of approaches in feminist scholarship. The program seeks to integrate and synthesize knowledge from many disciplines and to offer students

opportunities for systematic study of gender and women's experiences and perspectives in all knowledge fields. Students will be prepared to take a leadership role in supporting gender equity and diversity in their careers in education, social service work, business, law, public policy, governmental and non-governmental organizations, and research.

The graduate minor requires 12 credits for students enrolled in a master's or a doctoral degree program. Students are required to take either WGS 5010 Contemporary Feminist Theories or WGS 5020 Advanced Seminar in Feminist Research Methods; taking both is strongly recommended. Students will also take two or three electives selected from the list of core and cross-listed Women's and Gender Studies courses approved for graduate study. At least one member of the Women's and Gender Studies faculty will serve on the program of study for doctoral students. A list of eligible faculty members may be obtained from the Director of the Women's and Gender Studies Program.

World Film Studies Minor

World Film Studies

The World Film Studies undergraduate minor is an interdisciplinary, cross-cultural program in the department of World Languages and Cultures that provides coursework in the history, theory, and aesthetics of world cinemas. Upon completion of the World Film Studies minor students will

- 1) Demonstrate solid skills of formal film analysis and knowledge of the essential theoretical concepts of cinema studies;
- 2) Become familiar with prominent film directors, influential cinematic works, and cinematic traditions across the world;
- 3) Gain an understanding of the evolution of cinema as an art form; understand the relations between cinema and other arts;
- 4) Acquire knowledge and understanding of cinema as a mode of cultural expression and communication; develop new perspectives on U.S. culture and cinema through comparison with other world cultures and cinemas.

A student seeking an undergraduate minor in World Film Studies must successfully complete a minimum of 15 credits, which must include WFS 2780 or ENGL 2370 Survey of Film History and 12 credits selected from the following list of electives. Of these, at least 6 credits must be from courses taught in the department of World Languages and Cultures. The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

Courses taught in WLC (at least 6 credits)

CHIN 3780	Chinese Film and Society	3
FRNCH 3260	French and Francophone Film	3
FRNCH 3780	French Cinema	3
GER 3780	German Film and Media Studies	3-4

RUS 3780	Russian Film Studies in English	3
SPAN 3260	Studies in Hispanic Art or Film	3
SPAN 3780	Hispanic Film Studies in English	3

Courses outside of WLC (up to 6 credits)

ENGL 3150	Creative Writing: Screenplays	3
ENGL 3350	Studies in Film	3
ENGL 4500	Seminar in Literary Genres	3
JLMC 3070	Digital Video Production	3
AMIN 2050	American Indians in the Movies	3

Curricular note: no more than 6 credits of each repeatable course (FRNCH 3260 and FRNCH 3780) may be applied to the minor. Both WLC 2780 and ENG 2370 (6 credits max) may count toward the minor.

World Languages and Cultures

OVERVIEW OF DEPARTMENT OFFERINGS

World language study should be an integral part of an academic program for most students. The theoretical understanding of and practical experience in language underlie many intellectual disciplines that try to meet the complex problems of contemporary society. Courses offered by the Department of World Languages and Cultures are designed to develop students' understanding of a second culture through the language spoken by that culture.

The Department of World Languages and Cultures offers the following majors:

- Anthropology (B.A. or B.S.)
- World Languages and Cultures (B.A.) with the following options:
 - French
 - German
 - Spanish
 - Language Teacher Preparation, for French, German, Spanish
- World Languages and Cultures Additional Major with the following options for students with a primary major in another field:
 - French - OR - French (Languages and Cultures for Professions)
 - German - OR - German (Languages and Cultures for Professions)
 - Spanish - OR - Spanish (Languages and Cultures for Professions)

The Department of World Languages and Cultures offers the following minors:

- Anthropology
- Chinese Studies
 - Chinese Studies (Option: Languages and Cultures for Professions)
- French
- German

- German (Option: Languages and Cultures for Professions)
- Middle Eastern Studies
- Russian Studies
 - Russian Studies (Option: Languages and Cultures for Professions)
- Spanish
 - Spanish (Option: Languages and Cultures for Professions)
- Spanish Translation and Interpretation Studies
- World Film Studies

Additional Language Instruction

- American Sign Language
- Arabic
- Classical Latin
- Italian
- Portuguese

The Department houses several College of Liberal Arts and Sciences Cross Disciplinary Studies Programs:

- American Indian Studies
- Classical Studies
- International Studies
- U.S. Latino/a Studies

Students at all levels of world language study will have access to the Language Studies Resource Center, located in 3142 Pearson. The Resource Center contains an extensive collection of world language materials, including audio-visual materials, electronic resources, music, books, language specific software and hardware, and other course-related materials.

WORLD LANGUAGES AND CULTURES, B.A.

World Languages and Cultures (B.A.) with the following options:

- French
- German
- Spanish
- Language Teacher Preparation, for French, German, Spanish

As majors in the College of Liberal Arts and Sciences, World Languages and Cultures students must meet College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated for the major and option.

WORLD LANGUAGES AND CULTURES ADDITIONAL MAJOR

The World Languages and Cultures Additional Major has six options, plus teacher preparation.

- French
- French (Languages and Cultures for Professions)
- German
- German (Languages and Cultures for Professions)
- Spanish
- Spanish (Languages and Cultures for Professions)
- Language Teacher Preparation, for French, German, Spanish

Student Learning Outcomes for the World Languages and Cultures Major

Upon the completion of their program of studies in the Department of World Languages and Cultures, majors with a concentration in French, German, or Spanish will demonstrate proficiency in five goal areas: Communication, Cultures, Connections, Comparisons, and Communities. Using their concentration language, students will be able to:

1. COMMUNICATION: understand, interpret, and present information, to negotiate meaning, and to communicate in spoken or written conversations to share information, reactions, feeling, and opinions to various audiences of listeners, readers, or viewers.
2. CULTURES: investigate, explain, and reflect on the relationship between the practices and the perspectives of the cultures studied.
3. CONNECTIONS: demonstrate their ability to build, reinforce, and expand their knowledge of other disciplines and to access and evaluate information from diverse perspectives, while also developing critical thinking to solve problems creatively.
4. COMPARISONS: investigate, explain, and reflect on the nature of language as well as the concept of culture through comparisons of their own culture with other cultures and the language studied.
5. COMMUNITIES: demonstrate an ability to use the language both within and beyond the classroom and to interact and collaborate in their community and the globalized world while also setting goals and reflecting on their progress in using languages for enjoyment, enrichment, and advancement.

Graduates will achieve both linguistic proficiency and cultural literacy through the study of the language and culture of their program. Linguistic proficiency entails the ability to function effectively in the target language and the ability to communicate competently with native speakers of the target language. Cultural literacy includes a general knowledge of the culture's history, familiarity with its literature, and basic knowledge of its social and political institutions.

GENERAL B.A. REQUIREMENTS

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. You must also complete the LAS world language requirement and career proficiency requirement.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

Communication Proficiency Requirements: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500 Written, Oral, Visual, and Electronic Composition (or ENGL 2500H Written, Oral, Visual, and Electronic Composition: Honors). As the upper-level communication requirement, the Department requires a grade of C or better in any course numbered between 3700 and 3790 taught by the Department of World Languages and Cultures (with the exception of Anthropology courses) or the interdepartmental program in Classical Studies. Such a course will also fill an LAS Area I (Arts and Humanities) requirement.

LANGUAGES AND CULTURES FOR PROFESSIONS (LCP)

What are Languages and Cultures for Professions? The primary objective of the LCP options is to provide learning environments within which students can achieve global literacy, linguistic proficiency, and intercultural competence. In the LCP curriculum, students will learn how professions are shaped by social and cultural forces and, alternatively, how professions shape society. In courses on contemporary culture and society, students will identify and analyze issues dealing with the complex interrelationships of languages and cultures and consider how they may affect their chosen profession. Students will experience living and working in diverse cultural settings through study abroad and internship opportunities offered through the LCP program and/or in collaboration with their respective primary-major colleges or the ISU Study Abroad Center.

Students can complete a World Languages and Cultures Additional Major with an option in French LCP, German LCP, or Spanish LCP. The following LCP minors are available: Chinese Studies (LCP), German (LCP), Russian Studies (LCP), Spanish (LCP). Students enrolled in an LCP option of the World Languages and Cultures Additional Major may receive non-graded academic credit for the successful completion of internships (WLC courses numbered 4990 in each language area).

For the LCP options of the World Languages and Cultures Additional Major, students will complete 30 credits within their language concentration (see specific language requirements to the right) beyond

the fourth-semester level, selected from the list of approved LCP core courses and electives designated for their respective college curricula. Students may only enroll in the LCP options as an WLC Additional Major and may not graduate with the LCP option in the WLC primary major.

Students in the College of Business may combine course work in the International Business (IB) Secondary Major with course work in LCP by selecting from a list of approved options. Students should consult their academic advisor in the College of Business and the WLC advisor for coursework and international experience that fulfill requirements in both the IB and LCP options.

American Sign Language (ASL)

The Department of World Languages and Cultures offers coursework in American Sign Language. There are no minors or major options.

A listing of American Sign Language Coursework is available in the A-Z course list and below.

Courses primarily for undergraduate students

ASL 1010: American Sign Language I

Credits: 4. Contact Hours: Lecture 4.

Introduction to American Sign Language (ASL). Development of expressive and receptive skills including vocabulary, grammar, usage, and cultural information. Note: Distinct from 'Signed English'. ASL is a natural language with its own rules of grammar and usage. (Typically Offered: Fall, Spring)

ASL 1020: American Sign Language II

Credits: 4. Contact Hours: Lecture 4.

Prereq: ASL 1010

Introduction to American Sign Language (ASL) II continues development of expressive and receptive skills introduced in American Sign Language I, including vocabulary, grammar, usage, and cultural information. Distinct from 'Signed English'. ASL is a natural language with its own rules of grammar and usage. (Typically Offered: Spring)

ASL 1070: Introduction to the Deaf-World

Credits: 1. Contact Hours: Lecture 1.

Nature and significance of the Deaf-World as a cultural and linguistic minority.

ASL 2010: Intermediate American Sign Language I

Credits: 4. Contact Hours: Lecture 4.

Prereq: ASL 1020

Development of fluency for intermediate conversational skills. Review of grammar and varying grammatical forms for both structured and unstructured social situations such as sharing opinions, discussing weekend activities, and exchanging views on current topics. (Typically Offered: Fall)

ASL 2020: Intermediate American Sign Language II

Credits: 4. Contact Hours: Lecture 4.

Prereq: ASL 2010

A continuation and further application of language principles learned in ASL 2010, to deepen ability to actively engage in dialogue both in structured and unstructured social situations. Further fluency in intermediate conversational skills will be developed, particularly in the areas of semantic equivalence and dialogic/monologic register. (Typically Offered: Spring)

ASL 2750: Topics in Deaf Culture

Credits: 3. Contact Hours: Lecture 3.

Focus on contemporary topics in Deaf Culture, Communities, and History. Readings and discussion from a wide range of sources. Topics vary according to faculty interest.

ASL 3050: ASL Classifiers and Depiction

Credits: 3. Contact Hours: Lecture 3.

Prereq: ASL 2010

Focused analysis, documentation, discussion, and increased development of classifiers and depiction in ASL. Investigation in how these grammatical features are deliberately incorporated into conversational, presentational, scientific, and artistic language production.

ASL 3250: Deaf Peoples: Pre-World War II

Credits: 3. Contact Hours: Lecture 3.

Prereq: ASL 2020 or Permission of Instructor

Perspectives on and treatment of deaf people as individuals and groups prior to World War II. Taught in American Sign Language. (Typically Offered: Fall)

ASL 4900: Independent Study

Credits: 1-6. Repeatable, maximum of 6 credits.

Designed to meet the needs of students in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. Graduation Restriction: No more than 6 credits of ASL 4900 may be counted towards graduation. (Typically Offered: Fall, Spring, Summer)

Arabic (ARABC)

The Department of World Languages and Cultures offers coursework in Arabic. There are no minors or major options.

A listing of Arabic Coursework is available in the A-Z course list and below.

ARABC 1010: Elementary Arabic I

Credits: 4. Contact Hours: Lecture 5.

Beginning level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture. Attention to the use of the Arabic alphabet. (Typically Offered: Fall)

ARABC 1020: Elementary Arabic II

Credits: 4. Contact Hours: Lecture 5.

Prereq: ARABC 1010 or placement by department exam

Continuation of ARABC 1010. Beginning level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture. Meets International Perspectives Requirement. (Typically Offered: Spring)

ARABC 1950: Study Abroad

Credits: 1-30.

Supervised instruction in Arabic language and culture, formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Arabic. (Typically Offered: Summer)

ARABC 2010: Intermediate Arabic I

Credits: 4. Contact Hours: Lecture 4.

Prereq: ARABC 1020 or placement by department exam

Intermediate level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture. Meets International Perspectives Requirement. (Typically Offered: Fall)

ARABC 2020: Intermediate Arabic II

Credits: 4. Contact Hours: Lecture 4.

Prereq: ARABC 2010 or placement by department exam

Continuation of ARABC 2010. Intermediate level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture. Meets International Perspectives Requirement.

ARABC 2950: Study Abroad

Credits: 1-30.

Prereq: ARABC 1020

Supervised instruction in Arabic language and culture, formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Arabic. (Typically Offered: Summer)

ARABC 3750: Arab Culture

Credits: 3. Contact Hours: Lecture 3.

Survey of contemporary Arab culture in the Middle East and North Africa as reflected in history, language, the arts, and social institutions with attention to the Arab Diaspora. Taught in English. Meets International Perspectives Requirement. (Typically Offered: Spring)

ARABC 4900: Independent Study

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

Independent study with focus on areas other than those in which courses are offered. Graduation Restriction: No more than 6 credits in ARABC 4900 may be counted toward graduation.

CHINESE

Minor in Chinese Studies

The Minor in Chinese Studies requires the following 17 credits:

CHIN 2010	Intermediate Mandarin Chinese I	4

CHIN 2020	Intermediate Mandarin Chinese II	4

Electives at the 3000 level and above

6-9 credits from the following	6-9

CHIN 3010	Advanced Mandarin Chinese I

CHIN 3020	Advanced Mandarin Chinese II

CHIN 3040	Chinese for Global Professionals

CHIN 3700	Chinese Literature in English Translation

CHIN 3720	Introduction to Chinese Culture

CHIN 3750	China Today

CHIN 3780	Chinese Film and Society

CHIN 4030A	Seminar in Chinese Language and Culture: Translating Contemporary Chinese Texts

or CHIN 403I	Seminar in Chinese Language and Culture: Topics on Business and Professions

or CHIN 403I	Seminar in Chinese Language and Culture: Reading Chinese Texts

0-3 credits from the following:

ARCH 4270	History, Theory, and Criticism of Chinese Architecture

HIST 3360	Ancient China

HIST 3370	Modern China

POLS 3420	Chinese Politics

Minor in Chinese Studies (Option: Languages and Cultures for Professions)

Students who complete a Minor in Chinese Studies (Languages and Cultures for Professions) seek to become culturally-competent global professionals and engage in language and cultural training. The minor requires the following 17 credits:

CHIN 2010	Intermediate Mandarin Chinese I	4

CHIN 2020	Intermediate Mandarin Chinese II	4

Electives at the 3000 level and above

6-9 credits from the following:	6-9

CHIN 3010	Advanced Mandarin Chinese I

CHIN 3020	Advanced Mandarin Chinese II

CHIN 3040	Chinese for Global Professionals

CHIN 3700	Chinese Literature in English Translation

CHIN 3720	Introduction to Chinese Culture

CHIN 3750	China Today

CHIN 3780	Chinese Film and Society

CHIN 4030A	Seminar in Chinese Language and Culture: Translating Contemporary Chinese Texts

or CHIN 403I	Seminar in Chinese Language and Culture: Topics on Business and Professions

or CHIN 403I	Seminar in Chinese Language and Culture: Reading Chinese Texts

CHIN 4990	Internship in Chinese

0-3 credits from the following:

ARCH 4270	History, Theory, and Criticism of Chinese Architecture

HIST 3360	Ancient China

HIST 3370	Modern China

POLS 3420	Chinese Politics

Students in the Chinese LCP Minor are encouraged to study abroad in a Chinese-speaking country or complete a relevant internship.

A listing of all Chinese Coursework is available in the A-Z course list.

FRENCH

World Languages and Cultures, B.A., French Option

See World Languages and Cultures, B.A. for general requirements.

W.L.C. (World Languages and Cultures) Students with a concentration in French must complete at least 30 credits beyond the intermediate level (FRNCH 2010 & FRNCH 2020).

Required Courses for the French Studies Option (12 credits)

FRNCH 3010	Language, Culture, Contexts	3

FRNCH 3020	Text and Media Analysis	3

FRNCH 3400	Cultural Expressions in the French-Speaking World	3

FRNCH 4400	Seminar in French and/or Francophone Studies	3

Additional Courses (at least 18 credits)

FRNCH 3040	French for Global Professionals	3

FRNCH 3050	French Conversation	3

FRNCH 3100	French Pronunciation	1

FRNCH 3200	France Today	3

FRNCH 3260	French and Francophone Film	3

FRNCH 3400	Cultural Expressions in the French-Speaking World	3

FRNCH 3700	French Studies in English	4
FRNCH 3750	Francophone Studies in English	4
FRNCH 3780	French Cinema	4
FRNCH 3950	Study Abroad	1-10

French Option WLC Majors must enroll in FRNCH 3700, FRNCH 3750, and/or FRNCH 3780 for 4 credits in French. No more than 12 credits from FRNCH 3700, FRNCH 3750, and/or FRNCH 3780 may be counted for the major. Credit from French 3950 "En France" or an approved study abroad program may be applied to the major.

Study Abroad: The department strongly recommends that all students of French participate in an approved study abroad program based in a French-speaking country. Credit from an approved study abroad program may be applied to the major or minor.

Additional Language Teacher Preparation Requirements

LING 4870	Methods in Secondary School World Language Instruction (same as WLC 4870 & LING 4870)	3
or ENGL 3180	Introduction to ESL methods and materials	
PSYCH 2300	Developmental Psychology	3
POLS 1110	Introduction to American Government (or a course in U.S. History)	3

Additional requirements of the Secondary Major in Education. See footnote for catalog link to requirements. ^{TP}

TPStudents preparing to teach a language declare the Secondary Major in Education and complete the additional course requirements.

World Languages and Cultures Additional Major, French Option

The requirements for the World Languages and Cultures Additional Major with the French Option are the same as the major requirements for the primary major listed above.

World Languages and Cultures Additional Major, French Language and Cultures for Professions (LCP) Option

Students who complete an additional major in World Languages and Cultures with LCP Option seek to become culturally competent global professionals and engage in language and cultural training. Note: Students may only enroll in the French Languages and Cultures for Professions (LCP) Option as an additional major; they may not graduate with this as a primary major.

Students are required to take at least 30 credits beyond the intermediate level (FRNCH 2010 & FRNCH 2020).

Required LCP Core Courses (16 credits)

FRNCH 3010	Language, Culture, Contexts	3
FRNCH 3020	Text and Media Analysis	3

FRNCH 3040	French for Global Professionals	3
FRNCH 3200	France Today	3
FRNCH 3400	Cultural Expressions in the French-Speaking World	3
FRNCH 4990	Internship in French	1-3

Additional Courses (at least 14 credits)

FRNCH 3050	French Conversation	3
FRNCH 3100	French Pronunciation	1
FRNCH 3260	French and Francophone Film	3
FRNCH 3400	Cultural Expressions in the French-Speaking World	3
FRNCH 3700	French Studies in English	4
FRNCH 3750	Francophone Studies in English	4
FRNCH 3780	French Cinema	4
FRNCH 3950	Study Abroad	1-10
FRNCH 4400	Seminar in French and/or Francophone Studies	3

French LCP Option WLC Majors must enroll in FRNCH 3700, FRNCH 3750 and/or FRNCH 3780 for 4 credits in French. No more than 12 credits from FRNCH 3700, FRNCH 3750 and/or FRNCH 3780 may be counted for the major. Credit from French 3950 "En France" or an approved study abroad program may be applied to the major.

MINOR IN FRENCH

The Minor in French requires at least 17 credits of courses taught in French beyond the elementary level (FRNCH 1010 Elementary French I & FRNCH 1020 Elementary French II).

Required Core Courses (11 credits)

FRNCH 2010	Intermediate French I	4
FRNCH 2020	Intermediate French II	4
FRNCH 3010	Language, Culture, Contexts	3

Additional Courses (at least 6 credits)

FRNCH 3020	Text and Media Analysis	3
FRNCH 3040	French for Global Professionals	3
FRNCH 3050	French Conversation	3
FRNCH 3200	France Today	3
FRNCH 3260	French and Francophone Film	3
FRNCH 3400	Cultural Expressions in the French-Speaking World	3
FRNCH 3950	Study Abroad	1-10
FRNCH 4400	Seminar in French and/or Francophone Studies	3

Credit from French 3950 "En France" or an approved study abroad program may be applied to the minor. French 3700, 3750, 3780, and 4760 cannot count toward the minor. Students who place into and earn credit in the 3000-level sequence may replace FRNCH 2010 & 2020 with test-out credit.

Study Abroad: The department strongly recommends that all students of French participate in an approved study abroad program based in a French-speaking country. Credit from an approved study abroad program may be applied to the major or minor.

A listing of all French Coursework is available in the A-Z course list.

GERMAN

World Languages and Cultures, B.A., German Option

See World Languages and Cultures, B.A. for general requirements.

Students with a concentration in German must complete at least 30 credits beyond the intermediate level (GER 2010 & GER 2020).

German Option Required Core Courses (22 credits)

GER 3010	Reading	3
GER 3020	Composition	3
GER 3040	German for Global Professionals	3
GER 3050	Conversation	3
GER 3200	Germany Today	3
GER 3300	German Literature and Culture	3
GER 4760	Topics in German Cultural Studies	4
Additional Courses (8 credits)		8

GER 3300	German Literature and Culture (Repeatable once when offered with a different topic.)	
GER 4990	Internship in German (Study Abroad and Internship Option)	

Courses taught in English (maximum of eight credits applicable towards the major; must enroll for 4 credits)

GER 3700	German Studies in English	
GER 3710	The Holocaust in Text, Image, and Memory	
GER 3750	Grimms' Tales	
GER 3780	German Film and Media Studies	

Study Abroad: The department strongly recommends that all students of German participate in an approved study abroad program based in a German-speaking country. Credit from an approved study abroad program may be applied to the major.

Additional Language Teacher Preparation Requirements

LING 4870	Methods in Secondary School World Language Instruction (same as WLC 4870 & LING 4870)	3
or ENGL 3180	Introduction to ESL methods and materials	
PSYCH 2300	Developmental Psychology	3
POLS 1110	Introduction to American Government (or a course in U.S. History)	3

Additional requirements of the Secondary Major in Education. See footnote for catalog link to requirements. ^{TP}

^{TP}Students preparing to teach a language declare the Secondary Major in Education and complete the additional course requirements.

World Languages and Cultures Additional Major, German Option

The requirements for the World Languages and Cultures Additional Major with the German Option are the same as the major requirements for the primary major listed above.

World Languages and Cultures Additional Major, German Language and Cultures for Professions (LCP) Option

Students who complete an additional major in World Languages and Cultures with LCP Option seek to become culturally competent global professionals and engage in language and cultural training. Note: Students may only enroll in the German Languages and Cultures for Professions (LCP) Option as an additional major; they may not graduate with this as a primary major.

Students must complete a minimum of 30 credits beyond the intermediate level (GER 2010 Intermediate German I & GER 2020 Intermediate German II).

Required German LCP Core Courses (19 credits)

GER 3010	Reading	3
GER 3040	German for Global Professionals	3
GER 3050	Conversation	3
GER 3200	Germany Today	3
GER 4760	Topics in German Cultural Studies	4
GER 4990	Internship in German (or approved credit-bearing study abroad experience)	3

Additional Courses (11 credits)

GER 3020	Composition	3
GER 3300	German Literature and Culture	3

Courses taught in English (maximum of eight credits applicable towards the major; must enroll for 4 credits)

GER 3700	German Studies in English	
GER 3710	The Holocaust in Text, Image, and Memory	
GER 3750	Grimms' Tales	
GER 3780	German Film and Media Studies	

Minor in German

The Minor in German requires at least 17 credits of courses taught in German. At least 9 credits must be 3000-level German courses, 3 credits of which must be chosen from GER 3200 and 3300.

GER 2010	Intermediate German I	4
GER 2020	Intermediate German II	4
3 credits must be in literature or culture taught in German		3
GER 3200	Germany Today or GER 3300 German Literature and Culture	
6 additional credits from the following		6
GER 3010	Reading	
GER 3020	Composition	
GER 3040	German for Global Professionals	
GER 3050	Conversation	
GER 3200	Germany Today	
GER 3300	German Literature and Culture	
Note: Courses taught primarily in English (German 3700, 3710, 3750, 3780, and 4760) cannot count toward the German minor.		

Minor in German (Option: Language and Cultures for Professions)

Students who complete a Minor in German (Option: Languages and Cultures for Professions) seek to become culturally competent global professionals and engage in language and cultural training. The German Minor (LCP Option) requires at least 17 credits of courses taught in German. At least 9 credits must be 3000-level German courses, including the required course GER 3040.

GER 2010	Intermediate German I	4
GER 2020	Intermediate German II	4
GER 3040	German for Global Professionals	3
6 additional credits from the following		6
GER 3010	Reading	
GER 3020	Composition	
GER 3050	Conversation	
GER 3200	Germany Today	
GER 3300	German Literature and Culture	
Note: Courses taught primarily in English (German 3700, 3710, 3750, 3780, and 4760) cannot count toward the German LCP Minor.		

A listing of all German Coursework is available in the A-Z course list.

Italian (ITAL)

The Department of World Languages and Cultures offers coursework in Italian. There are no minors or major options.

A listing of Italian Coursework is available in the A-Z course list and below.

ITAL 1070: Intensive Beginning Italian

Credits: 4. Contact Hours: Lecture 4.

A communicative approach to grammar and vocabulary within the context of Italian culture for students whose native language is not Italian. Taught in Italian. (Typically Offered: Fall, Spring)

Latin (LATIN)

The Department of World Languages and Cultures offers coursework in Latin. There are no minors or major options.

For courses in Latin literature taught in English, see Classical Studies.

A listing of Latin Coursework is available in the A-Z course list and below.

Courses primarily for undergraduate students

LATIN 1010: Elementary Latin I

Credits: 3. Contact Hours: Lecture 3.

Grammar and vocabulary of classical Latin, within the context of Roman culture; reading knowledge through texts adapted from classical authors. (Typically Offered: Fall)

LATIN 1020: Elementary Latin II

Credits: 3. Contact Hours: Lecture 3.

Grammar and vocabulary of classical Latin, within the context of Roman culture; reading knowledge through texts adapted from classical authors. Meets International Perspectives Requirement. (Typically Offered: Spring)

LATIN 4900: Independent Study

Credits: 1-6. Repeatable, maximum of 9 credits.

Prereq: 9 credits in LATIN; Permission of Department Chair

Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. Graduation Restriction: No more than 9 credits in LATIN 4900 may be counted toward graduation.

Portuguese (PORT)

The Department of World Languages and Cultures offers coursework in Portuguese. There are no minors or major options.

A listing of Portuguese Coursework is available in the A-Z course list and below.

Courses primarily for undergraduate students

PORT 1010: Elementary Portuguese I

Credits: 4. Contact Hours: Lecture 4.

An introduction to the Portuguese language through the communicative approach within the context of Luso-Brazilian culture.

PORT 1020: Elementary Portuguese II

Credits: 4. Contact Hours: Lecture 4.

Prereq: PORT 1010

An introduction to the Portuguese language through the communicative approach within the context of Luso-Brazilian culture. Meets International Perspectives Requirement.

PORT 1110: Intensive Beginning Portuguese

Credits: 3. Contact Hours: Lecture 3.

A communicative approach to grammar and vocabulary within the context of Luso-Brazilian culture for students whose native language is not Portuguese. Taught in Portuguese.

PORT 1120: Elementary Portuguese, Accelerated II

Credits: 3. Contact Hours: Lecture 3.

Prereq: PORT 1110

An introduction to the Portuguese language through the communicative approach within the context of Luso-Brazilian culture. Meets International Perspectives Requirement.

PORT 3750: Brazil Today

Credits: 3. Contact Hours: Lecture 3.

A survey of social, political, economic, and cultural topics relevant to contemporary Brazil. Includes an introduction to Portuguese language. Meets International Perspectives Requirement. (Typically Offered: Fall)

RUSSIAN
Minor in Russian Studies

The Minor in Russian Studies requires 17 credits, 9 of which must be at the 3000 level or higher.

RUS 2010	Intermediate Russian I	4
RUS 2020	Intermediate Russian II	4
9 credits must be at the 3000 level and above, including at least 3 credits in the Russian curriculum (courses taught in English or Russian).		9
RUS 3010	Composition and Conversation

SPANISH
World Languages and Cultures, B.A., Spanish Option

See World Languages and Cultures, B.A. for general requirements.

Students with a concentration in Spanish must complete a minimum of 30 credits beyond the intermediate level (SPAN 2010 Intermediate Spanish I & SPAN 2020 Intermediate Spanish II).

Spanish Required Core Courses (9 credits)

SPAN 3030A	Spanish Conversation and Composition: through Culture	3
or SPAN 3030B	Spanish Conversation and Composition: for Professionals	
SPAN 3140	Textual and Media Analyses	3
SPAN 3520	Spanish Pronunciation	3

Additional Courses: Students must take at least 15 credits chosen from A, B, and C below (minimum 3 credits from each).

A) At least 3 credits of literary studies chosen from the following:

SPAN 3300	Studies in Spanish Literature	
SPAN 3320	Studies in Latin American Literature	

B) At least 3 credits of cultural studies chosen from the following:

SPAN 3040	Spanish for Global Professionals	
SPAN 3210	Spanish Civilization	
SPAN 3220	Latin American Civilization	
SPAN 3230	Spain Today	
SPAN 3240	Latin America Today	
SPAN 3250	Culture and Community: Iowa and Midwest Latino/as	
SPAN 3260	Studies in Hispanic Art or Film	

C) At least 3 credits of applied language and linguistics chosen from the following:

SPAN 3020A	Mini-Modules for Global Professionals: Tourism and Hospitality	
SPAN 3020B	Mini-Modules for Global Professionals: Health and Medicine	
SPAN 3020C	Mini-Modules for Global Professionals: Criminal Justice and the Law	
SPAN 3050	Spanish for Heritage Speakers	
SPAN 3510	Introduction to Spanish-English Translation	
SPAN 3540	Introduction to Spanish-English Interpretation	
SPAN 4010	Advanced Composition and Grammar	
SPAN 4620	Contrastive Analysis of Spanish/ English for Translators	
SPAN 4630	Contemporary Spanish Linguistics	
SPAN 4990	Internship in Spanish	

Students may apply up to 6 credits of SPAN 3950 Study Abroad to section A, B, or C above (appropriate section based upon course content and assigned by the WLC advisor).

Students must take at least 6 credits of language, literature and/or culture at the 4000 level, chosen from the following (each repeatable to 6 credits):

SPAN 4400	Seminar on the Literatures and Cultures of Spain	
SPAN 4410	Seminar on Cervantes and the Golden Age	
SPAN 4450	Seminar on the Literatures and Cultures of Latin America	
SPAN 4630	Contemporary Spanish Linguistics	
Approved study abroad in a Spanish-speaking country or completion of an additional course from the approved options.		0-3

Study Abroad: The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-speaking country. Any student pursuing the World Languages and Cultures Major, Spanish (Hispanic Studies) Option who chooses not to participate in a department-approved study abroad program will be required to take 3 additional elective credits of Spanish at or above the SPAN 3210 level (for a total of 33 credits beyond the intermediate 2010-2020 level).

Additional Language Teacher Preparation Requirements

LING 4870	Methods in Secondary School World Language Instruction (same as WLC 4870 & LING 4870)	3
or ENGL 3180	Introduction to ESL methods and materials	
PSYCH 2300	Developmental Psychology	3
POLS 1110	Introduction to American Government (or a course in U.S. History)	3

Additional requirements of the Secondary Major in Education. See footnote for catalog link to requirements. ^{TP}

^{TP}Students preparing to teach a language declare the Secondary Major in Education and complete the additional course requirements.

World Languages and Cultures Additional Major, Spanish Option

The requirements for the World Languages and Cultures Additional Major with the Spanish Option are the same as the major requirements for the primary major listed above.

World Languages and Cultures Additional Major, Spanish Language and Cultures for Professions (LCP) Option

Students who complete an additional major in World Languages and Cultures with LCP Option seek to become culturally-competent global professionals and engage in language and cultural training. Note: Students may only enroll in the Spanish Languages and Cultures for Professions (LCP) Option as an additional major; they may not graduate with this as a primary major.

Students must complete a minimum of 30 credits beyond the intermediate level (SPAN 2010 Intermediate Spanish I & SPAN 2020 Intermediate Spanish II).

A. Required LCP Core Courses: (12 Credits)

SPAN 3030B	Spanish Conversation and Composition: for Professionals	3
SPAN 3040	Spanish for Global Professionals	3
SPAN 3510	Introduction to Spanish-English Translation	3
SPAN 4990	Internship in Spanish *	3
or SPAN 3950	Study Abroad	

B. Literature and Culture Courses: (9 Credits)

SPAN 3140	Textual and Media Analyses	3
SPAN 3230	Spain Today	3
or SPAN 3210	Spanish Civilization	
SPAN 3240	Latin America Today	3
or SPAN 3220	Latin American Civilization	

C. Additional Courses: Select one course from each of the following two categories (6 credits)

Category 1:

SPAN 3300	Studies in Spanish Literature	3
or SPAN 3320	Studies in Latin American Literature	

Category 2:

SPAN 4400	Seminar on the Literatures and Cultures of Spain	3
or SPAN 4410	Seminar on Cervantes and the Golden Age	
or SPAN 4450	Seminar on the Literatures and Cultures of Latin America	
or SPAN 4630	Contemporary Spanish Linguistics	

D. Additional 3 credits taken at the SPAN 3000-level or higher. 3

*Additional credit from an approved study abroad program may be applied to the major.

Minor in Spanish

The Minor in Spanish requires at least 15 credits, 12 of which must be at the 3000 level or higher. The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-speaking country. Any student who chooses not to participate in a department-approved study abroad program will be required to take 3 additional elective credits of Spanish at the 3000 level or higher.

Minor in Spanish (Option: Language and Cultures for Professions)

Students who complete a Minor in Spanish (Option: Languages and Cultures for Professions) seek to become culturally-competent global

professionals and engage in language and cultural training. The minor option requires the following 15 credits:

SPAN 3030B	Spanish Conversation and Composition: for Professionals	3
SPAN 3040	Spanish for Global Professionals	3
SPAN 3510	Introduction to Spanish-English Translation	3
One of the following		3
SPAN 3210	Spanish Civilization	
or SPAN 3220	Latin American Civilization	
or SPAN 3230	Spain Today	
or SPAN 3240	Latin America Today	
Approved study abroad in a Spanish-speaking country or completion of an additional course from the approved options.		3

Minor in Spanish Translation and Interpretation Studies

The Minor in Spanish Translation and Interpretation Studies requires the following 15 credits.

SPAN 3030B	Spanish Conversation and Composition: for Professionals	3
or SPAN 3040	Spanish for Global Professionals	
or SPAN 3050	Spanish for Heritage Speakers	
SPAN 3510 & SPAN 3540	Introduction to Spanish-English Translation and Introduction to Spanish-English Interpretation	6
Choose two of the following courses (6 credits)		6
SPAN 3520	Spanish Pronunciation	
SPAN 4620	Contrastive Analysis of Spanish/ English for Translators	
SPAN 4630	Contemporary Spanish Linguistics	

Transfer credit accepted at ISU or credit earned on an ISU-approved study abroad program can apply toward the minor. The minor is intended for students pursuing or holding a baccalaureate degree at ISU and open to any student with proficiency in Spanish that would place them into the 3000-level.

STUDY ABROAD ALTERNATIVES

The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-speaking country. For programs that allow an additional course instead of study abroad, any student who chooses not to participate in a department-approved study abroad program will be required to take 3 additional credits in culture chosen from the following:

SPAN 3210	Spanish Civilization	3
SPAN 3220	Latin American Civilization	3

SPAN 3230 Spain Today
or SPAN 3240 Latin America Today

Students taking either SPAN 3210 or SPAN 3230 must take either SPAN 3220 or SPAN 3240; students taking either SPAN 3220 or SPAN 3240 must take either SPAN 3210 or SPAN 3230.

A listing of all Spanish Coursework is available in the A-Z course list.

PLACEMENT POLICIES AND COURSE GUIDANCE

Students who have had formal training in world languages offered at Iowa State may obtain credit by passing appropriate examinations. Students with native fluency in languages taught at Iowa State may not enroll in or take the Exam for Credit in elementary or intermediate courses (1000 and 2000 level) in their native language. Students are considered to have native fluency if their ethnic first language as indicated on the matriculation form is the language in which they wish to enroll. Students are also considered to have native fluency if they have had substantial attendance at a secondary school or university where the language of instruction is the language in which they wish to enroll at ISU. Students with native fluency may be eligible to enroll in literature and civilization courses in their native language at the 3000 level or above; such students must also consult the department office to determine eligibility for advanced composition and conversation courses (3000 level and above). Students who have completed three or more years of high-school world language study may not enroll in or receive credit for 1010-1020 in those languages; credit may be obtained by passing the appropriate Exam for Credit or by completing an advanced sequence (2000-level or higher) in that language. Students who complete an approved sequence of courses in a single language at the 2000- or 3000-level (e.g., 2010 and 2020 or 3010 and 3020) with a grade of C- or higher are eligible to receive credit for 1010 and 1020 in that same language if they have not received credit for a 1010 or 1020 course in the language. Students who complete a 1020 course with a grade of C- or higher are eligible to receive credit for 1010 in that same language if they have not received credit for 1010 in the same language. Students should contact the department after completion of the course sequence to receive credit. Courses in the 1010-1020 level may not be taken on a remedial basis.

Students who have completed two years, but less than three years of a single high-school world language may not enroll in a 1010 course in that language. These students may enroll in either a 1020 course in that language, or in the case of Spanish, SPAN 0970 Accelerated Spanish Review. Before enrolling in either SPAN 0970 Accelerated Spanish Review or a 1020 language course, students are recommended to take the on-line placement test available at www.language.iastate.edu (<http://www.language.iastate.edu>). After completing the online placement test, students who believe that they have extenuating circumstances may

3 appeal to the Department of World Languages and Cultures in order to request enrollment in a 1010 language course.

SPAN 0970 Accelerated Spanish Review is designed for students who need additional work in the language at the first-year level (1010-1020) and are not planning to continue their language study at the second-year 2010-2020 level. Students who complete with a passing grade will have fulfilled the LAS world language requirement. Students who have completed SPAN 0970 Accelerated Spanish Review and wish to pursue further study in Spanish at the 2010-2020 level may enroll in 1020.

Students with disabilities who need to satisfy the world language requirement may direct questions to their academic advisor, the Department of World Languages and Cultures, or the Disability Resources Office.

Credit by examination in the Department of World Languages and Cultures for courses numbered 1010, 1020, 2010, and 2020 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is not normally available.

Language and literature courses numbered 3000 and above are principally taught in the target language; courses numbered in the 2700s, 3700s, and 4700s are taught in English. For courses taught in English about Ancient Greek and Rome, see Classical Studies. Students may not take intermediate (2000 level) courses for credit after successfully completing any advanced (3000/4000 level) course, except those in the 3700 series or courses taught in English translation. Students who have successfully completed any course in the intermediate (2000 level) sequence may not take a lower-numbered course in that sequence for a grade.

STUDY ABROAD

The Department also offers faculty-led summer study abroad programs in Costa Rica, France, Germany, Greece, Italy, and Spain; and semester study abroad programs in Spain. Programs and exchanges in other areas of the world are offered through study abroad providers. Information concerning these programs can be obtained directly from the Department.

Graduate Programs

Graduate Minor in Spanish

The Department of World Languages and Cultures offers course work leading to a graduate minor in Spanish. The graduate minor is designed to provide an opportunity for graduate students to further their knowledge of Spanish to complement work in their major disciplines and provides formal recognition of student achievement and expertise.

Prerequisites

Graduate students who wish to minor in Spanish must have 4000-level proficiency in Spanish. When this is not the case, the student may be

required to take a language course below the 4000-level, which would not count towards the graduate minor requirements.

Course Requirements

For the M.A. or M.S.: Three courses in Spanish. No more than three credits may be in courses numbered 4010, 4020, and 4030.

For the Ph.D.: Four courses in Spanish must include at least one three credit course at the 5000 level. No more than three credits may be in courses numbered 4010, 4020, or 4030.

At least two courses for the M.A. and the Ph.D. minors must be taken in residence at Iowa State University. Papers written for these courses are expected to have a content and depth commensurate with the graduate status of the student.

Courses primarily for undergraduates:**WLC 1070: Introduction to Swahili**

Credits: 1. Contact Hours: Lecture 1.

Basics of grammar and vocabulary within the context of the cultures where Swahili is spoken. For students whose native language is not Swahili. Taught in Swahili. Offered on-line. Offered irregularly. (Typically Offered: Spring)

WLC 1190: Introduction to World Languages

(Cross-listed with LING 1190).

Credits: 3. Contact Hours: Lecture 3.

Study of language diversity and the personal, social and political effects of diversity. Language families, attitudes toward language and language use, language and culture, multilingualism, foreign language learning, written codes, official languages, and language policy. Meets International Perspectives Requirement.

WLC 2050: World Religions

(Cross-listed with RELIG 2050).

Credits: 3. Contact Hours: Lecture 3.

An introduction to religious studies - the academic study of religion.

Religions from around the world will be discussed, including their myths, rituals, beliefs, values, and social forms. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

WLC 2100: Introduction to Asian American Studies

(Cross-listed with ANTHR 2100).

Credits: 3. Contact Hours: Lecture 3.

An interdisciplinary and chronological examination of Asian American immigration experiences from the early 19th century to the 21st century. Focus on how these immigration histories are accompanied by changing racial constructions. Discussion of racial stereotyping, the model minority myth, identity development, and efforts for social justice. Meets U.S. Diversity Requirement.

WLC 2700: Cultures in Transition

Credits: 3. Contact Hours: Lecture 3.

An interdisciplinary introduction to a world region in a state of rapid social and cultural transition. Discussion of the history, social and political institutions, arts, economy, agriculture, and environment of the new nations. Meets International Perspectives Requirement.

WLC 3520: Religions of India

(Cross-listed with RELIG 3520).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500 or Permission of Instructor

Study of texts, practices, beliefs, historical development, and mutual influence of a variety of the religious traditions of India. Emphasis on Vedic religion and the diversity of traditions of Classical Hinduism; survey of Buddhist, Jain, Sikh, and South Asian Islamic traditions. Meets International Perspectives Requirement.

WLC 3580: Islam

(Cross-listed with RELIG 3580).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500 or Permission of Instructor

An introduction to Islamic religion, culture, and society from its origins to the present. Topics include the Quran, the Prophet Muhammad, Islamic theology and philosophy, Islamic history, and Islam in America. Meets International Perspectives Requirement.

WLC 3590: The Quran

(Cross-listed with RELIG 3590).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500 or Permission of Instructor

A study of the Quran, the sacred text of Islam, with attention to its history, its major themes, and the diverse ways it is interpreted and applied. Meets International Perspectives Requirement.

WLC 3700A: Topics in World Languages and Cultures in English

Translation: Global Sustainability

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Topics vary according to faculty interest. Author, genre or period study, women's writing, cinema, or cultural studies of a non-English speaking world culture or cultures. Readings, discussion, and written work in English. Meets International Perspectives Requirement.

WLC 3700B: Topics in World Languages and Cultures in English

Translation: Middle East

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Topics vary according to faculty interest. Author, genre or period study, women's writing, cinema, or cultural studies of a non-English speaking world culture or cultures. Readings, discussion, and written work in English. Meets International Perspectives Requirement.

WLC 3700C: Topics in World Languages and Cultures in English

Translation: Global Urban Cultures

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Topics vary according to faculty interest. Author, genre or period study, women's writing, cinema, or cultural studies of a non-English speaking world culture or cultures. Readings, discussion, and written work in English. Meets International Perspectives Requirement.

WLC 3710X: The Arabian Nights

(Cross-listed with ARABC 3710X).

Credits: 3. Contact Hours: Lecture 3.

Focus on the tales of the famous '1001 Arabian Nights' book.

Discussions of the narrative tools, supernatural elements, and the culture of the Medieval Middle East. Readings, discussions, and papers in English. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

WLC 4170G: Student Teaching: World Language

(Dual-listed with EDUC 5170G/ WLC 5170G). (Cross-listed with EDUC 4170G).

Credits: 1-30. Repeatable.

Prereq: Minimum cumulative GPA of 2.5; Department Permission

Evaluation of instruction, lesson planning, and teaching in world languages, secondary grades. (Typically Offered: Fall, Spring)

WLC 4840: Technology, Globalization and Culture

(Cross-listed with ME 4840/ MKT 4840).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior or Senior Classification

Cross-disciplinary examination of the present and future impact of globalization with a focus on preparing students for leadership roles in diverse professional, social, and cultural contexts. Facilitate an understanding of the threats and opportunities inherent in the globalization process as they are perceived by practicing professionals and articulated in debates on globalization. Use of a digital forum for presenting and analyzing globalization issues by on-campus and off-campus specialists. Meets International Perspectives Requirement. (Typically Offered: Fall)

WLC 4860: Methods in Elementary School World Language Instruction

(Cross-listed with EDUC 4860/ LING 4860).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 25 credits in a World Language

Planning, implementation, and assessment of standards-based, student-centered, and thematic instruction in the elementary (K-8) classroom.

Special emphasis on K-8 students' communicative skills, cultural knowledge, and content learning. (Typically Offered: Fall)

WLC 4870: Methods in Secondary School World Language Instruction

(Cross-listed with EDUC 4870/ LING 4870).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 25 credits in a world language; Department Permission

Theories and principles of contemporary world language learning and teaching. Special emphasis on designing instruction and assessments for active learning. Admission to teacher education required. (Typically Offered: Fall)

WLC 4910: Experiences Abroad: Learning to Think Globally

(Cross-listed with INTST 4910).

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 2 credits.

Prereq: Minimum of 3 credits of study abroad and/or internship abroad

Students returning from study abroad gain perspective on the personal, academic, and professional impact of their time spent abroad through readings and discussions. Students will be expected to make one presentation about the culture they experienced to an audience outside ISU. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

WLC 5170G: Student Teaching: World Language

(Dual-listed with EDUC 4170G/ WLC 4170G). (Cross-listed with EDUC 5170G).

Credits: 1-30. Repeatable.

Prereq: Admitted to the Educator Preparation Program

Evaluation of instruction, lesson planning, and teaching in world languages, secondary grades. (Typically Offered: Fall, Spring)

WLC 5840: Technology, Globalization and Culture

(Cross-listed with ME 5840/ MKT 5840).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Graduate classification

Cross-disciplinary examination of the present and future impact of globalization with a focus on preparing students for leadership roles in diverse professional, social, and cultural contexts. Facilitate an understanding of the threats and opportunities inherent in the globalization process as they are perceived by practicing professionals and articulated in debates on globalization. Use of a digital forum for presenting and analyzing globalization issues by on-campus and off-campus specialists. Meets International Perspectives Requirement. (Typically Offered: Fall)

INTERDISCIPLINARY PROGRAMS

Interdepartmental programs are available at both graduate and undergraduate levels. An interdepartmental program is an administrative structure usually not functioning as a department, ordinarily headed by a supervisory committee, and offering a degree with major(s) in that subject area. Interdepartmental programs have been officially approved and may offer courses.

See individual programs for information regarding admission and academic requirements.

Cyber Security

INTERDEPARTMENTAL GRADUATE MAJOR

Iowa State University has been offering courses in cyber security since 1995 and has one of the largest programs in the country. Graduate degrees can be obtained in a traditional on campus setting or as an on-line program. For information about the online Cyber Security program visit Iowa State Online (<https://iowastateonline.iastate.edu/>).

Students graduating from the major will help to fill the need for well-educated system security specialists in the government, private sector, and academia. The program objectives identified as being critical to the accomplishment of this mission are:

1. Impart and enhance knowledge about information infrastructure security
2. Expand and develop the ability to engineer complex systems
3. Instill and nurture social awareness, and the ability to function in a team
4. Instill and nurture a sense of ethics
5. Develop an understanding of strategic and policy issues

We offer 4 different graduate degree options:

1. Masters of Science with thesis
2. Masters of Science without thesis
3. Masters of Engineering (coursework only)
4. Graduate certificate

Graduate Certificate

A graduate certificate in Cyber Security is offered, which consists of four courses (12 credits): The graduate certificate is targeted for off-campus students as a way to either supplement their education or as way to try out online education courses. All of the certificate courses will transfer into the MS or MENG degree in Cyber Security.

for Certificate in Cyber Security

CYBSC 5300	Network Protocols and Security	3
CYBSC 5310	Information System Security	3
CYBSC 5320	Information Warfare	3
MATH 5330	Cryptography	3
or CYBSC 5350 Steganography and Digital Image Forensics		
or CYBSC 5340 Legal and Ethical Issues in Cyber Security		
or CYBSC 5360 Computer and Network Forensics		
or CPRE 5370 Wireless Network Security		

Total Credits 12

For additional information students should visit <https://www.cyio.iastate.edu/>. (<http://www.iac.iastate.edu>)

Master of Science with & without thesis

The degree Master of Science with a major in Cyber Security is under a cooperative arrangement with various home departments including Electrical and Computer Engineering, Political Science, Information Systems and Business Analytics, and Mathematics.

The degree Master of Science with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component and is intended for students interested in a career in cybersecurity.

Students interested in the interdepartmental major apply and are admitted to both a home department (the department that is most closely aligned with the student's research interest and background) and to the program. The home department sets the admission standards, course requirements, and thesis standards. (**Note:** Electrical and Computer Engineering is the only home department for off-campus students pursuing the Master of Science in Cyber Security).

The program is broadly based and uses courses in the various departments. The program will consist of 24 course credits with 6 credits of research work for a Master of Science with thesis. A non-thesis Master of Science will consist of 27 credits of courses and 3 credits of creative component. The courses are divided into three categories: core, electives, and thesis research. A student's Program of Study Committee, in consultation with the student, determines the elective courses to be taken and the acceptability of transfer credits. The major professor will be selected from the discipline where the student is admitted (home department).

The basic prerequisite for admission to this program is a baccalaureate degree in engineering, mathematics, computer science, management information systems, political science, or closely related field. The GRE or GMAT examination may be required based on the standards of the home

department. If the GRE or GMAT is not required it will be considered in admissions decisions if offered. Potential students with baccalaureate degrees in the physical sciences, statistics, or other related fields will be considered on an individual basis, possibly with provisional admission.

Master of Engineering

The Master of Engineering (MENGR) in Cyber Security degree is only offered to off-campus students. This program is designed to assist all individuals who already have a bachelor's degree in computing or related areas to pursue an in-depth study in information assurance. The Master of Engineering program is based on coursework credits only (a thesis or creative component is not required). Courses are offered via digital streaming video. (**Note:** Electrical and Computer Engineering is the only home department for the Master of Engineering in Cyber Security).

A coursework only Master of Engineering degree in Cyber Security consists of 30 credits. The courses are divided into two categories: core and electives. (**Note:** Students pursuing the MENGR do not have a program of study committee and the major professor is the Cyber Security, Director of Graduate Education (DoGE)

Students interested in the MENGR in Cyber Security degree apply and are admitted to Cyber Security (CYBSC) with ECpE as the home department.

The admission requirements for students entering the program without work experience are the same as the admission requirements for the ECpE department. For students with 3 or more years of work experience in a computer related position the GRE and GPA minimum may be waived.

Students with an undergraduate degree in a non computing field that have at least 3 years of work experience in an information technology field may be admitted to the program.

Courses primarily for undergraduates:

CYBSC 1310: Introduction to Computer Security Literacy

(Cross-listed with CPRE 1310).

Credits: 1. Contact Hours: Lecture 1.

Basic concepts of practical computer and Internet security: passwords, firewalls, antivirus software, malware, social networking, surfing the Internet, phishing, and wireless networks. This class is intended for students with little or no background in information technology or security. Basic knowledge of word processing required. Offered on a satisfactory-fail basis only.

CYBSC 3320: Cyber Defense Competition

(Cross-listed with CPRE 3320).

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Participation in cyber defense competition driven by scenario-based network design. Includes computer system setup, risk assessment and implementation of security systems, as well as defense of computer and network systems against trained attackers. Team based. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

CYBSC 4300: Network Protocols and Security

(Cross-listed with CPRE 4300).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CPRE students: (CPRE 3080 OR COMS 2520 OR COMS 3520); EE students: CPRE 2880

Detailed examination of networking standards, protocols, and their implementation. TCP/IP protocol suite, network application protocols. Network security issues, attack and mitigation techniques. Emphasis on laboratory experiments.

Courses primarily for graduate students, open to qualified undergraduates:

CYBSC 5300: Network Protocols and Security

(Cross-listed with CPRE 5300).

Credits: 3. Contact Hours: Lecture 3.

Detailed examination of networking standards, protocols, and their implementation. TCP/IP protocol suite, network application protocols. Network security issues, attack and mitigation techniques. Emphasis on laboratory experiments.

CYBSC 5310: Information System Security

(Cross-listed with CPRE 5310).

Credits: 3. Contact Hours: Lecture 3.

Computer, software, and data security: basic cryptography, security policies, multilevel security models, attack and protection mechanisms, legal and ethical issues.

CYBSC 5320: Information Warfare

(Cross-listed with CPRE 5320).

Credits: 3. Contact Hours: Lecture 3.

Computer system and network security: implementation, configuration, testing of security software and hardware, network monitoring. Authentication, firewalls, vulnerabilities, exploits, countermeasures. Study and use of attack tools. Ethics in cyber security. Emphasis on laboratory experiments. (Typically Offered: Spring)

CYBSC 5330: Cryptography

(Cross-listed with CPRE 5330/ MATH 5330).

Credits: 3. Contact Hours: Lecture 3.

Basic concepts of secure communication, DES and AES, public-key cryptosystems, elliptic curves, hash algorithms, digital signatures, applications. Relevant material on number theory and finite fields.

(Typically Offered: Spring)

CYBSC 5340: Legal and Ethical Issues in Cyber Security

(Cross-listed with CPRE 5340/ POLS 5340).

Credits: 3. Contact Hours: Lecture 3.

Legal and ethical issues in computer security. State and local codes and regulations. Privacy issues. (Typically Offered: Spring)

CYBSC 5350: Steganography and Digital Image Forensics

(Cross-listed with CPRE 5350/ MATH 5350).

Credits: 3. Contact Hours: Lecture 3.

Basic principles of covert communication, steganalysis, and forensic analysis for digital images. Steganographic security and capacity, matrix embedding, blind attacks, image forensic detection and device identification techniques. Related material on coding theory, statistics, image processing, pattern recognition. (Typically Offered: Spring)

CYBSC 5360: Computer and Network Forensics

(Cross-listed with CPRE 5360).

Credits: 3. Contact Hours: Lecture 3.

Fundamentals of computer and network forensics, forensic duplication and analysis, network surveillance, intrusion detection and response, incident response, anonymity and pseudonymity, privacy-protection techniques, cyber law, computer security policies and guidelines, court testimony and report writing, and case studies. Emphasis on hands-on experiments.

CYBSC 5380: Reverse Engineering and Security Testing

(Cross-listed with CPRE 5380).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Techniques and tools for understanding the behavior of software/hardware systems based on reverse engineering. Flaw hypothesis, black, grey, and white box testing as well as other methods for testing the security of software systems. Discussion of counter-reverse engineering techniques. (Typically Offered: Spring)

CYBSC 5600: Data-Driven Security and Privacy

(Cross-listed with COMS 5600/ CPRE 5600).

Credits: 3. Contact Hours: Lecture 3.

Examination of applications of machine learning and big data techniques to various security and privacy problems, as well as secure and privacy-preserving machine learning algorithms. Offered irregularly. (Typically Offered: Spring)

CYBSC 5920: Seminar in Cyber Security

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Projects or seminar in Cyber Security. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**CYBSC 6310: Cyber Security Operations Practicum**

(Cross-listed with CPRE 6310).

Credits: 3. Contact Hours: Lecture 1.

Repeatable.

Practical experience in cyber operations. Cyber security threat analysis, malware analysis, and intrusion detection management. Cyber security data analysis methods. Pen testing tools and techniques. Weekly threat analysis briefings. Offered on a satisfactory-fail basis only.

CYBSC 6320: Cyber Security Capstone Design

(Cross-listed with CPRE 6320).

Credits: 3. Contact Hours: Lecture 3.

Capstone design course which integrates the security design process. Design of a security policy. Creation of a security plan. Implementation of the security plan. The students will attack each other's secure environments in an effort to defeat the security systems. Students evaluate the security plans and the performance of the plans. Social, political and ethics issues. Student self-evaluation, journaling, final written report.

CYBSC 6340: Current Research Problems in Cyber Security

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Discussion of complex cyber security problems. Students will learn how to apply research techniques, think clearly about these issues, formulate and analyze potential solutions, and communicate their results. Working in small groups under the mentorship of technical clients from government and industry, each student will formulate, carry out, and present original research on complex current cybersecurity problems of interest to the nation. This course will be run in a synchronized distance fashion, coordinating some activities with our partner schools and our technical clients. (Typically Offered: Fall, Spring)

CYBSC 6970: Cyber Security Summer Internship

Credits: Required.

One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

Dietetics - Graduate Program

INTERINSTITUTION GRADUATE PROGRAM

Iowa State University offers a master's degree in Family and Consumer Sciences with a specialization in Dietetics. This is an interinstitutional

online program offered through the Great Plains Interactive Distance Education Alliance (or GPIDEA). The student selects a home institution (Iowa State), which ultimately grants the degree. After admission to Iowa State, the student takes courses from Iowa State and the other participating institutions: Colorado State University, North Dakota State University, Oklahoma State University, South Dakota State University, University of Kansas Medical Center, and University of Nebraska-Lincoln.

The Master of Family and Consumer Sciences-Dietetics is designed for the Registered Dietitian or Registration-eligible Dietitian. The 36-credit program is non-thesis and seeks to develop research skills, stimulate independent thought, and provide up-to-date knowledge in foods, nutrition, and foodservice/business management. A special project, called a creative component, is required as part of the 36 required credits. This program prepares individuals to integrate and apply the principles from the biomedical sciences, human behavior, and management to design and lead effective food and nutrition programs in a variety of settings. Students may build a program of study from offerings of the partner institutions such as human nutrition, nutrient metabolism, biostatistics, health promotion/disease prevention, foodservice systems management, food science, lifespan nutrition, wellness, entrepreneurship, nutrition education, nutritional assessment and food safety. The online program is tailored for credentialed, practicing dietetics professionals who seek to enhance their knowledge in a specific area of dietetics practice or retool for new career opportunities in dietetics practice.

Admission procedures: Admission to the MFCS-Diet program requires exactly the same procedures as admission to the Graduate College. See the Graduate College Admission section of this catalog.

Registration: Students choosing to receive their degree from Iowa State University complete all the admissions, registration, and fee payment processes through ISU.

Courses primarily for graduate students, open to qualified undergraduates:

DIET 5110: Research Methods

Credits: 3. Contact Hours: Lecture 3.

An overview of diverse research approaches focusing on methods for collecting and analyzing quantitative and qualitative data. (Typically Offered: Fall, Spring)

DIET 5120: Nutritional Epidemiology

Credits: 3. Contact Hours: Lecture 3.

Important issues related to designing, conducting, and interpreting research on the role of diet or physical activity in the development of disease (& health) in human populations. Offered odd-numbered years. (Typically Offered: Spring)

DIET 5260: Obesity Across the Lifespan

Credits: 3. Contact Hours: Lecture 3.

Exploration of the affects that obesity has on public health, the healthcare system, and society in general. Overview of strategies to prevent obesity across the lifespan. (Typically Offered: Fall)

DIET 5300: Nutrition and Wellness

Credits: 3. Contact Hours: Lecture 3.

Addresses wellness promotion through nutrition. Nutritional risk and protective factors will be examined in relation to public health and individual nutrition. (Typically Offered: Spring)

DIET 5310: Nutrition Therapy for Eating Disorders

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

An online study of eating disorders management and nutrition care. Topics include eating disorders medical complications, clinical care guidelines, basic pharmacology, clinical nutrition education, nutrition care planning, psychology of eating disorders, team collaboration, and therapeutic modalities for nutrition counseling. (Typically Offered: Fall)

DIET 5320: Maternal and Child Nutrition

Credits: 3. Contact Hours: Lecture 3.

Critical examination of behavioral, physiological, and public health issues impacting dietary and nutritional factors that support normal growth and development. Content focuses on early stages of the life cycle: gestation, lactation, infancy, preschool, school age, and adolescence. Offered even-numbered years. (Typically Offered: Summer)

DIET 5340: Nutrition Education in the Community

Credits: 3. Contact Hours: Lecture 3.

Principles and practices of teaching individuals and groups to translate nutrition knowledge into action. Emphasis on research in and evaluation of nutrition education. (Typically Offered: Spring)

DIET 5380: Nutrition: A Focus on Life Stages

Credits: 3. Contact Hours: Lecture 3.

Explores influence of normal physiological stresses on nutritional needs throughout the life span. Evaluates dietary intake and identification of appropriate community nutrition services in on-line discussions. Specific considerations, such as the influence of age and cultural heritage, are incorporated.

DIET 5400: Nutrition and Physical Activity in Aging

(Cross-listed with GERON 5400).

Credits: 3. Contact Hours: Lecture 3.

WWW only. Basic physiologic changes during aging and their impacts in health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed. (Typically Offered: Fall)

DIET 5410: Food Culture

Credits: 3. Contact Hours: Lecture 3.

Survey of topics that affect how we perceive food in the modern world. Food is examined as a badge of cultural identity, focus of media scrutiny and promotion, symbol of religion, and driver of technology. Offered even-numbered years. (Typically Offered: Spring)

DIET 5440: Pediatric Clinical Nutrition

Credits: 3. Contact Hours: Lecture 3.

Pediatric Clinical Nutrition. (Typically Offered: Fall)

DIET 5460: Phytochemicals

Credits: 3. Contact Hours: Lecture 3.

Overview of phytochemicals (non-nutritive biologically active compounds) from fruits, vegetables, cereals and oilseeds. Covers recent findings of chemistry, physiological functions, and potential health implications of phytochemicals. Offered odd-numbered years. (Typically Offered: Fall)

DIET 5470: Functional Foods in Chronic Disease Prevention

Credits: 3. Contact Hours: Lecture 3.

Examination of nutritional science, food science, regulatory principles, and nutrient metabolism to understand and explain functional foods, nutraceuticals, and dietary supplements. Additionally students will evaluate the biochemical basis, technologies, legal requirements, and clinical assessment in the marketplace. Offered odd-numbered years. (Typically Offered: Fall)

DIET 5480: Nutrition and Physical Activity Assessment

Credits: 3. Contact Hours: Lecture 3.

Introduction to a variety of nutrition and physical activity assessment tools. Opportunity to discuss the strengths and weaknesses of different tools and gain experience collecting, analyzing, and interpreting nutrition and physical activity data. Offered odd-numbered years. (Typically Offered: Spring)

DIET 5510: Advanced Nutrition: Nutrigenomics, Nutrigenetics & Advanced Lipid Metabolism in Human Nutrition

Credits: 3. Contact Hours: Lecture 3.

Exploration and integration of topics and ideas that are at the forefront of the field of nutritional science. Examination of topics that are new and/or controversial and have implications that range from the cellular/molecular/biochemical level up to clinical/educational level. Emphasis on the integrative and complex nature of human nutrition research from basic science to clinical studies to population studies and dietary recommendations. (Typically Offered: Spring)

DIET 5540: Statistics

Credits: 3. Contact Hours: Lecture 3.

Tools used to make statistical decisions. Major emphasis on explanation and understanding of important concepts involved; basic theme is understanding of data and methods used to analyze such data. Offered irregularly. (Typically Offered: Fall, Spring, Summer)

DIET 5550: Public Health Nutrition

Credits: 3. Contact Hours: Lecture 3.

Examines U.S. public health and nutrition concerns in diverse U.S. populations, examines nutritional status in communities, looks at health communication, and considers nutrition policies and community-based nutrition interventions. Students explore roles of dietitians, nutritionists, and others in developing and delivering nutrition policies and interventions in U.S. communities. (Typically Offered: Fall, Spring)

DIET 5560: Micronutrients in Human Nutrition

Credits: 3. Contact Hours: Lecture 3.

Interrelationships of micronutrients in terms of biochemistry, physiology, genetics, and nutrition. Emphasis on developing understanding of how the coordination of structure and function is related to metabolic needs of the cell and its response to the environment. This integrated approach forms the basis for evaluating the micronutrient needs of humans in both normal and altered metabolic states. (Typically Offered: Spring, Summer)

DIET 5580: Advanced Human Nutrition: Macronutrients

Credits: 3. Contact Hours: Lecture 3.

Integration of the molecular, cellular and physiological aspects of macronutrients and energy metabolism in mammalian systems. Dietary energy, carbohydrates, fiber, lipids, proteins, their interactions, metabolic consequences, and major research methodologies. (Typically Offered: Summer)

DIET 5600: Advanced Medical Nutrition Therapy

Credits: 3. Contact Hours: Lecture 3.

Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention directed to medical nutrition needs of patients in the treatment of each disease state. (Typically Offered: Summer)

DIET 5650: International Nutrition and World Hunger

Credits: 3. Contact Hours: Lecture 3.

Identification and assessment of malnutrition in low-income countries. Social, cultural, political, economic, and geographic determinants of malnutrition. Protein-energy malnutrition, vitamin and mineral deficiencies. Intervention approaches; international efforts and local sustainability. (Typically Offered: Fall)

DIET 5660: Nutrition Counseling and Education Methods

Credits: 3.

Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories. (Typically Offered: Fall, Spring)

DIET 5680: Entrepreneurship Theory and Practice

Credits: 3. Contact Hours: Lecture 3.

Definition and discussion of entrepreneurship and its importance to economic and business environment. Offered odd-numbered years. (Typically Offered: Summer)

DIET 5690: Dietary and Herbal Supplements

Credits: 3. Contact Hours: Lecture 3.

Develop skills to partner with patients in making dietary supplement decisions. Explore the safe, efficacious use of botanicals and supplements in nutritional support of aging, maternal health and wellness. Discussions on supplementation in the prevention and treatment of chronic disease include: arthritis, cancer, cardiovascular, diabetes, digestive, liver and renal disorders. (Typically Offered: Summer)

DIET 5700: Nutrition and Human Performance

Credits: 3. Contact Hours: Lecture 3.

Develop an understanding of nutrition based on knowledge of the biochemical and physiological process and functions of specific nutrients in meeting nutritional requirements. Emphasis on the relationship of optimal nutrition and physical efficiency and performance. (Typically Offered: Spring)

DIET 5710: Foundation of Leadership in Dietetics

Credits: 3. Contact Hours: Lecture 3.

Using leadership theories to develop the fundamental concepts and skills to bridge the gap between theory and practice. Students will be able to successfully evaluate classic and contemporary leadership theories, investigate current leadership trends and identify positive applications in the dietetics community. (Typically Offered: Summer)

DIET 5720: Current Issues or Trends

Credits: 3. Contact Hours: Lecture 3.

Overview of current topics, issues, and trends in dietetics practice. (Typically Offered: Fall, Spring)

DIET 5740: Nutrition and Immunology

Credits: 3. Contact Hours: Lecture 3.

Principles and issues related to nutrition and immunology. Impact of nutrients and nutritional status on immune responses. Impact of disease states on nutritional status. Offered odd-numbered years. (Typically Offered: Spring)

DIET 5760: Diabetes Medical Nutrition Therapy

Credits: 3. Contact Hours: Lecture 3.

An in-depth study of diabetes management with emphasis in nutrition care. Topics will include diabetes pathophysiology, clinical care guidelines, basic pharmacology, clinical nutrition education and counseling strategies, and nutrition care planning.

DIET 5970: Nutritional Aspects of Oncology

Credits: 3. Contact Hours: Lecture 3.

Understanding of basic cancer biology and methodology used to study nutrition and cancer relationships. Using current research as a basis, the role of nutrition in specific cancers will be explored. Students will learn about sources of information for cancer prevention programs, and how to apply this information to clinical patient management. Offered odd-numbered years. (Typically Offered: Spring)

DIET 5980: Clinical Aspects of Nutrition Support

Credits: 3. Contact Hours: Lecture 3.

Specialized nutrition assessment and support. Review of energy expenditure and substrate utilization in specific disease states. Current Methods for the initiation and management of enteral and parenteral nutrition therapy including access, metabolic and mechanical complications. Evaluation of nutrition support methodology in selected disease states. (Typically Offered: Spring)

DIET 5990: Creative Component

Credits: 1-30. Repeatable.

For non-thesis option only. (Typically Offered: Fall, Spring, Summer)

Ecology and Evolutionary Biology

Interdepartmental Graduate Major

The Ecology and Evolutionary Biology (EEB) interdepartmental major is offered through ten departments – Agronomy; Ecology, Evolution and Organismal Biology; Entomology; Genetics, Development and Cell Biology; Geological and Atmospheric Sciences; Horticulture; Mathematics; Natural Resource Ecology and Management; Plant Pathology; Statistics, and World Languages and Cultures. Faculty in these departments cooperate to offer courses and direct research leading to M.S. and Ph.D. degrees with a major in Ecology and Evolutionary Biology.

The EEB major is designed for students interested in the study of mechanisms controlling the composition, structure, and functional processes of ecological systems and the mechanisms that regulate the pattern and rate of evolutionary change within and among species. Applicants should have completed an undergraduate or master of science or arts degree in one of the biological, physical, or mathematical sciences. Applicants also should have taken undergraduate courses in both basic ecology and evolution.

The EEB curriculum includes a core course, seminar courses, and an extended field trip. Cooperating departments provide courses and research opportunities in the following areas:

- Conservation and Restoration Ecology;
- Environmental Statistics, Stochastic Modeling, and Quantitative Ecology and Evolution;
- Evolutionary Ecology;
- Landscape Ecology, Modeling, and Spatial Dynamics;
- Natural Resources Ecology and Management;
- Physiological and Behavioral Ecology;
- Population, Community, and Ecosystems Ecology;
- Population, Quantitative, and Evolutionary Genetics; and
- Systematics, biodiversity, and biogeography.

In addition, offerings are available in the ethics and practice of research in the biological sciences as well as in science communication (both written and oral).

Students majoring in EEB are trained for careers focused on basic or applied ecology and evolutionary biology in a variety of settings, including academia, government, industry, and private organizations. Graduates have a broad understanding of ecology and evolutionary biology, experience designing and conducting research, writing grant proposals, and communicating effectively with scientific colleagues at meetings and through publications.

Information on admission procedures (<https://eeb.iastate.edu/admissions/>), academic requirements (<https://eeb.iastate.edu/academics/>), and faculty research areas (<https://www.eeb.iastate.edu/people/faculty/>) is available on the EEB website (<http://www.eeb.iastate.edu/>).

Courses primarily for graduate students, open to qualified undergraduates:

EEB 5110: Conceptual Foundations in Ecology and Evolutionary Biology

Credits: 4.

Introduction to key figures and ideas that have shaped the development of ecology and evolutionary biology. Covers major developments in ecology and evolutionary biology at five levels of biological organization: Genome, Organism, Population, Community, and Ecosystem. Impacts of these developments on current approaches to investigation and argument formulation. Effects of technological advances on the direction of scientific investigations. Introduction to analytical skills important for critical thinking in ecology and evolutionary biology and the impact of accepted lines of scientific reasoning on the objectives and conduct of research, such as explanation and prediction, design of studies as experimentation, and structured or unstructured observation. (Typically Offered: Fall)

EEB 5850A: Extended Field Trip: Pre-Trip Lecture

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Extended field trip to study major terrestrial and aquatic ecosystems. Location and duration vary. Report required. (Typically Offered: Fall, Spring, Summer)

EEB 5850B: Extended Field Trip: Travel

Credits: 1. Repeatable.

Extended field trip to study major terrestrial and aquatic ecosystems. Location and duration vary. Report required. (Typically Offered: Fall, Spring, Summer)

EEB 5900: Special Topics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

For students wishing to conduct in-depth study of a particular topic in ecology and evolutionary biology. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:

EEB 6980: Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Reports and discussion of recent research and literature. (Typically Offered: Fall, Spring)

EEB 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Thesis and dissertation research. (Typically Offered: Fall, Spring, Summer)

Engineering Management

Engineering Management Master's Degree

The Engineering Management Program focuses on developing an individual's engineering, science and management skills so they can succeed in a technology driven environment. There is a growing need for engineers that can build multi-disciplinary design teams, then lead those teams to solve technical and business challenges. The Iowa State University Master of Engineering in Engineering Management Program is designed to train leaders who can meet both the technical and managerial challenges in developing modern complex engineered systems. The program can be completed on line or in residence, part-time or full-time.

Admission Requirements

To be considered for admission, the applicant should have a bachelor's degree in engineering or related field from a college, university, or technical school of recognized standing. Non-engineering backgrounds will be considered on a case-by-case basis. High academic achievement or other persuasive evidence of professional accomplishments is expected for admission to the program. The GRE is not required.

Applicants for admission to this program apply through the ISU Graduate College. Each applicant must submit:

- Application and application fee
- Official academic transcripts
- Three letters of recommendation
- Resume

Applications should be submitted as early as possible before the beginning of the semester for which admission is sought. Individuals may also take up to nine credits at Iowa State as a non-degree seeking student and then transfer them to the program when they are admitted. (<https://iowastateonline.iastate.edu/apply-and-enroll/>)

The Master of Engineering in Engineering Management Program at Iowa State University is focused on supporting working professionals so teaching or research assistantships typically are not available.

Degree Requirements

Engineering Management Core:

Intro/Core (required first year)

IE 5630	Engineering and Systems Management	3
IE 5650	Systems Engineering and Analysis	3
Core (required)		
SCM 5240	Strategic Process Analysis and Improvement	3
IE 5700	Systems Engineering and Project Management	3

MGMT 5830	Formulating and Implementing Innovation Strategies	3
ACCT 5810	Accounting for Decision Making	3
Electives		
IE 5600	Engineering Risk Analysis	3
IE 5610	Total Quality Management	3
IE 5640	Decision Analysis	3
IE 5720	Design and Evaluation of Human-Computer Interaction	3
IE 5770	Human Factors	3
IE 5810	e-Commerce Systems Engineering	3
CONE 3800	Engineering Law	3
FIN 5010	Financial Valuation and Corporate Financial Decisions	3
MKT 5010	Marketing	3
MGMT 5030	Professional Responsibility in Business and Society (One course from any graduate program)	3
One course from any graduate program		3

Entrepreneurship Minor

Are you a problem-solver, innovator, or change maker? Do you want to make an impact in your community or change the world? By minoring in entrepreneurship, you will sharpen your creative thinking and problem-solving skills, develop your entrepreneurial mindset, start your own business, develop a new product, or become an innovator in an established company. The interdisciplinary Entrepreneurship Minor was designed to complement any major area of study by introducing knowledge and skills needed to create value through recognizing and developing opportunities.

UNIVERSITY-WIDE UNDERGRADUATE MINOR

A minor in entrepreneurship is available to all undergraduate students at ISU. The minor requires at least 15 credits from an approved list of courses, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students must follow college-specific rules in selecting courses. The college representatives to the supervisory committee will be responsible for advising students in their college and will inform students about the details of the college rules. Students with declared majors have priority over students with declared minors in courses with space constraints.

Non-business students with an Entrepreneurship minor are not permitted to major in Entrepreneurship. Business students interested

in entrepreneurship may choose to major in Entrepreneurship (<https://catalog.iastate.edu/collegeofbusiness/entrepreneurship/#undergraduatemajortext>) or pursue the Entrepreneurship minor.

A student seeking a minor in entrepreneurship must successfully complete a minimum of 15 credits in courses approved for use in the entrepreneurship program, including the following:

Required Courses (6 credits):

ENTSP 3100	Entrepreneurship and Innovation	3
ENTSP 3130	Feasibility Analysis for New Ventures	3
	or ENTSP 3200 Corporate Entrepreneurship	
	or ENTSP 4100 Social Entrepreneurship	

ENTSP 3100 Entrepreneurship and Innovation is the introductory course and provides an overview of the entire field.

ENTSP 3130 Feasibility Analysis for New Ventures emphasizes developing an idea for a new venture, conducting a feasibility study, researching the potential market, analyzing the competition, and preparing a formal business plan.

ENTSP 3200 Corporate Entrepreneurship introduces and examines state-of-the-art approaches to product innovation and technology development in today's large and established organizations.

ENTSP 4100 Social Entrepreneurship discusses issues related to the role of social entrepreneurship in helping to solve social problems, including innovation, opportunity recognition, planning and the launch of new non-profit organizations.

Elective Courses (6 credits):

Select TWO entrepreneurship-oriented electives from an approved course list (see below). Students are encouraged to take electives within their major college.

Experiential Learning (3 credits):

Students will engage in the process(es) of entrepreneurship to earn experiential learning credits. Students will either take a course that has been designated as an experiential learning course, or use some other experiential learning activity as the basis to receive credits through an independent study.

Detailed information about the Entrepreneurship minor, the list of approved electives, as well as information about the experiential learning options are available online at: <https://ivybusiness.iastate.edu/entrepreneurship-minor/>

FOR IVY COLLEGE OF BUSINESS STUDENTS ONLY: Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and

does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

GRADUATE CERTIFICATE

A graduate certificate in Entrepreneurship and Innovation offers post-undergraduate students the opportunity to learn the basics of starting a business. The certificate requires 4 courses (12 credits). The two required core courses are offered online by the Ivy College of Business. Elective courses are available across campus.

The graduate certificate in Entrepreneurship and Innovation focuses on strategies and resources for launching new ventures and helps students understand the role of innovation in entrepreneurship.

This interdisciplinary certificate provides a solid foundation in entrepreneurship and innovation through required core courses ENTSP 5660 Entrepreneurship and New Venture Startup and ENTSP 5830 Formulating and Implementing Innovation Strategies. At the same time, the program enables students to follow their own interests through electives offered by partners across campus.

For more information about the graduate certificate in Entrepreneurship and Innovation, please visit: <https://ivybusiness.iastate.edu/ei-certificate/>. (<https://ivybusiness.iastate.edu/ei-certificate/>)

CONTACTS

Entrepreneurship Faculty and Advisors

Faculty and advisors in each college are available to answer questions about the Entrepreneurship minor and course requirements. Please visit the link below for the contact in your college.

<https://ivybusiness.iastate.edu/entrepreneurship-minor/contacts/>

Feed Technology Minor

The agricultural economy is heavily dependent on feed technology. The Midwest is one of the largest feed production and grain processing regions in the world. Feed manufacturing is also a global business with a growing demand for qualified technical professionals.

Feed technology includes the areas of grain handling and storage, animal nutrition, feed formulation, feed manufacturing, biosecurity, and feed safety and quality. The Feed Technology minor (15 credits) covers the breadth of all these topics so that you can:

- Understand animal nutrition, feed mill operations management and their application to feed quality, safety, and profitability;
- Identify chemical, biological and physical hazards in grain and feed;
- Know practical ways to monitor, manage and mitigate hazards in grain handling and feed manufacturing facilities; and

- Be familiar with the importance, scope and trends of the global animal feed industry.

The minor requires 15 credits and must include at least 9 credits that are not used to meet any other department, college, or university requirement. Below is the list of courses used in the minor.

TSM 3220	Preservation of Grain Quality	3
or ABE 4690	Engineering for Grain Storage, Preservation, Handling, and Processing Systems	
TSM 4550	Feed Processing and Technology	3
TSM 4570	Feed Safety, Ingredient Quality and Analytics	3
ANS 3200	Animal Feeds and Feeding	3
or ANS 2190X	Survey of Animal Nutrition	
ANS 3240	Food Processing for Companion Animals	3
Total Credits		15

ANS 2190X, if offered, may be substituted for ANS 3200.

Forensic Sciences Certificate

Forensic Sciences Graduate Certificate

The forensic sciences graduate certificate program complements a program of study at Iowa State University that leads to any graduate degree in an established academic major. The forensic sciences certificate is also recommended for students who wish to strengthen their interdisciplinary skills. Coursework for the certificate is at the graduate level; however, qualified undergraduates may also enroll by admission to the Graduate College as a certificate student for a minimum of one semester. Completion of the certificate is noted on the student's transcript and via a certificate provided by the Registrar.

Learning Outcomes

Upon completion of the graduate certificate in forensic sciences, students will be:

- Educated in a diverse array of topics that contribute to the interdisciplinary field of forensic science.
- Well informed about the needs for research and development in forensic science.
- Able to propose a research project related to forensic science.
- Informed about forensic science as a career choice.
- Aware of the possibility of offering expertise to law enforcement agencies within the community.
- Aware that forensic sciences can be used as an educational tool in post-graduate capacity as a professor/teacher, parent, or community volunteer.

Requirements

- 12 credits of coursework and seminars at Iowa State University with a total GPA of 3.0 or higher.
- Attendance at all events hosted by the NIST Center for Excellence in Statistics and Applications in Forensic Evidence (CSAFE) at Iowa State.
- Attendance at a national or regional scientific meeting devoted to forensic science.
- Completion of the certificate within three contiguous calendar years.

Coursework

- 1 graduate credit seminar course in forensic science: **ANTHR 5410**. This seminar will be offered each fall semester. In this seminar, you will report on the off-campus conference you attend, and also on your research.
- 1 graduate credit of independent study: **ANTHR 5420**. You will choose a topic in forensics, ask the Director of Certificate Studies (DOCS) for approval, research it in the literature and write a paper on it. You will present this research project to the seminar group.
- At least 10 graduate credits from among the courses listed in the Certificate Electives course list. From this list, you may not choose any courses offered toward your academic major, and you must choose courses from at least two different departments entirely outside of your department or program. No credits may be transferred to ISU from other institutions.

All Certificate candidates are required to take ANTHR 5410 (1 credit) and ANTHR 5420 (1 credit). In addition, choose 10 credits from the following list of Certificate Electives:

AGRON 5020	Chemistry, Physics, and Biology of Soils	3
AGRON 5550	Environmental Soil Mineralogy	3
ANS 5610	Population and Quantitative Genetics for Breeding	4
AGRON 5630	Soil Formation and Landscape Relationships	3
ANTHR 5030	Biological Anthropology and Archaeology	3
ANTHR 5190	Skeletal Biology	3
ANTHR 5240	Forensic Anthropology	3
BMS 5540	General Pharmacology	3
CHEM 5110	Advanced Analytical Chemistry	3
CHEM 5130	Analytical Molecular and Atomic Spectroscopy	3
CHEM 5160	Analytical Separations	3
CHEM 5720	Spectrometric Identification of Organic Compounds	3
CHEM 5770	Mass Spectrometry	3
CPRE 5360	Computer and Network Forensics	3
ENT 6750	Insecticide Toxicology	3
GEN 4090	Molecular Genetics	3

GEN 4620	Evolutionary Genetics	3
GDCB 5110	Advanced Molecular Genetics	3
MATH 5350	Steganography and Digital Image Forensics	3
MSE 5500	Nondestructive Evaluation	4
MSE 5510	Characterization Methods in Materials Science	3
MSE 5520	Scanning and Auger Electron Microscopy	3
SOC 5840	Current Issues in Crime and Justice	3
STAT 5870	Statistical Methods for Research Workers	4
TOX 5460	Clinical and Diagnostic Toxicology	1-3
VMPM 5280	Principles of Epidemiology and Population Health	3
VMPM 5860	Medical Bacteriology	4
VMPM 5420	Introduction to Molecular Biology Techniques	

Genetics and Genomics

GRADUATE MAJOR

Work is offered for the master of science and doctor of philosophy degrees with a major in Genetics and Genomics in fourteen cooperating departments: Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Ecology, Evolution and Organismal Biology; Entomology; Food Science and Human Nutrition; Genetics, Development and Cell Biology; Horticulture; Materials Science and Engineering; Plant Pathology and Microbiology; Natural Resource Ecology and Management; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

Students are admitted by the approval of the Chair after review by the Genetics and Genomics Admissions Committee. Students are admitted either to participate in research rotations with several faculty before deciding on a major professor and laboratory, or by direct admission into a specific lab and department. First year students participating in rotations with Genetics and Genomics faculty will take GENET 6970 Graduate Research Rotation.

The diversity of faculty in the Genetics and Genomics major ensures a broad, well-balanced education from the best instructors, while offering flexibility in choice of research area. Genetics and Genomics faculty have strengths in many areas, from fundamental studies at the molecular, cellular, organismal, and population levels, to research with immediate practical application. Ongoing research projects span all the major areas of theoretical and experimental genetics, including genomics, molecular studies of gene regulation, gene mapping, genetics of disease, transposable element studies, developmental genetics, quantitative and statistical genetics, computational molecular biology, evolutionary genetics, and population genetics.

UNDERGRADUATE PREPARATION

Undergraduates wishing to prepare for graduate study in Genetics and Genomics should elect courses in basic biology, chemistry at least through organic chemistry, one year of college-level physics, mathematics at least through calculus, at least one thorough course in basic transmission and molecular genetics, one semester of upper level statistics and one semester of upper level biochemistry. Incoming students who have not completed an upper level statistics course and an upper level biochemistry course prior to beginning in the program will take STAT 5870 Statistical Methods for Research Workers and BBMB 4040 Biochemistry I during their first year of graduate training. A waiver may be requested for these courses by providing appropriate documentation (catalog description and syllabus) to the curriculum committee showing completion of an upper level statistics and upper level biochemistry course equivalent to STAT 5870 Statistical Methods for Research Workers and BBMB 4040 Biochemistry I.

See information from the College of Agriculture and Life Sciences or the College of Liberal Arts and Sciences for information on a bachelor of science degree in Genetics.

All Ph.D. candidates take a core curriculum comprising one course each from the following four categories and attend seminars and workshops as described:

Transmission Genetics

GDCB 5100	Transmission Genetics

Molecular Genetics

GDCB 5110	Advanced Molecular Genetics

Quantitative, Population, and Evolutionary Genetics

ANS 5610	Population and Quantitative Genetics for Breeding
EEOB 5070	Advanced Animal Behavior
EEOB 5610	Evolutionary and Ecological Genomics
EEOB 5630	Molecular Phylogenetics
EEOB 5660	Molecular Evolution
EEOB 5670	Empirical Population Genetics
GDCB 5360	Statistical Genetics

Genomics, Bioinformatics and Statistical Genetics

ANS 5560	Current Topics in Genome Analysis
BCB 5440	Fundamentals of Bioinformatics
STAT 5160	Statistical Design and Analysis of Gene Expression Experiments
STAT 5810	Analysis of Gene Expression Data for the Biological Sciences
BCB 5670	Bioinformatics Algorithms
BCB 5680	Statistical Bioinformatics

BCB 5690	Structural Bioinformatics
BCB 5700	Systems Biology
EEOB 5460	Computational Skills for Biological Data
COMS 5510	Genomic Data Science

Students will give two research presentations (GENET 6900 Graduate Student Seminar in Genetics), attend one genetics and genomics faculty seminar series (GENET 6910 Faculty Seminar in Genetics), and participate in two Workshops in Genetics and Genomics (GENET 5910 Workshop in Genetics) during their graduate training. First-year graduate students will take GENET 6920 Conceptual Foundations of Genetics.

Students may elect a computational molecular biology specialty within the genetics major. This requires that the research project be in the field of computational molecular biology. IGG majors will be expected to complete all of the courses required for the genetics and genomics major, except that one semester of BCB 6900 Student Seminar in Bioinformatics and Computational Biology can be substituted for GENET 6900 Graduate Student Seminar in Genetics. Students will be expected to take additional courses in the area of specialization.

M.S. students will take the above core courses and seminars with the following changes: participate in one Workshop in Genetics (GENET 5910 Workshop in Genetics) and present their research once (GENET 6900 Graduate Student Seminar in Genetics). Additional coursework may be selected to satisfy individual interests or departmental requirements.

The course designator Genet applies to graduate courses taught by the interdepartmental major in Genetics and Genomics.

Students wishing to minor in genetics and genomics must submit a complete application to the graduate program. Requirements for the successful completion of a minor at the Ph.D. or M.S. levels are: completion of three of the four categories of the common-core required lecture courses listed above. One semester of Seminar in Genetics is recommended.

GENET 6900	Graduate Student Seminar in Genetics	1
GENET 6910	Faculty Seminar in Genetics	1
GENET 6920	Conceptual Foundations of Genetics	1

One member of the POS committee must be a Genetics faculty member.

Student Outcomes: Most students awarded doctoral degrees continue their training as postdoctoral associates at major research institutions in the U.S. or abroad in preparation for research and/or teaching positions in academia, industry, or government. A few go directly to permanent research positions in industry. Many students awarded master's degrees continue their training as doctoral students; however, some choose

research support positions in academia, industry, or government. A more thorough list of outcomes is available at our web site.

Courses primarily for graduate students, open to qualified undergraduates:

GENET 5390: Ethics and Biological Sciences

Credits: 2. Contact Hours: Lecture 2.

Introduction to Bioethics through case studies, discussion of contemporary work on central bioethics topics, and discussion of important emerging ethical issues associated with recent research or technological development. Issues covered will vary somewhat from year to year, but will include at least some of the following: ethics and responsible research practice, animal ethics and the use of animals in teaching and research, cloning, human reproductive and stem cell research, regulation of genetically modified crops and foods, plant biotechnology, gene patents. Students will be divided into groups to develop their own case study, to be presented in class at the end of the term. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

GENET 5900: Special Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Contact individual faculty for special projects or topics. Graded. (Typically Offered: Fall, Spring, Summer)

GENET 5910: Workshop in Genetics

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Prereq: Instructor Permission for Course

Current topics in genetics research. Lectures by off-campus experts. Students read background literature, attend preparatory seminars, attend all lectures, meet with lecturers. (Typically Offered: Fall)

Courses for graduate students:

GENET 6900: Graduate Student Seminar in Genetics

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Research presentations by students to improve their ability to: orally present scientific work in a clear and meaningful way, critically evaluate oral presentations, and give and receive constructive criticism. Students may enroll in one seminar per school year. (Typically Offered: Fall, Spring)

GENET 6910: Faculty Seminar in Genetics

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Faculty research seminars that introduce students to the variety of genetics research projects on campus and provide an opportunity for students to become engaged in the scientific presentation to the point where they can think critically and ask meaningful questions. (Typically Offered: Fall)

GENET 6920: Conceptual Foundations of Genetics

Credits: 1. Contact Hours: Lecture 1.

Landmark papers in the development of genetics concepts. Papers are presented and discussions led by students, guided and mentored by the instructors. Instructors provide a broad overview and history of the development of fundamental concepts in genetics. (Typically Offered: Fall)

GENET 6930: Entrepreneurship for Graduate Students in Science and Engineering

(Cross-listed with AGRON 6930/ BCB 6930/ ENGR 6930/ EE 6930/ ME 6930).

Credits: 1. Contact Hours: Lecture 3.

Repeatable, maximum of 2 credits.

Understanding key topics of starting a technology based company, from development of technology-led idea to early-stage entrepreneurial business. Concepts discussed include: entrepreneurship basics, starting a business, funding your business, protecting your technology/ business IP. Subject matter experts and successful, technology-based entrepreneurs will provide real world examples from their experience with entrepreneurship. Learn about the world class entrepreneurship ecosystem at ISU and Central Iowa. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

GENET 6970: Graduate Research Rotation

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Graduate research projects performed under the supervision of selected faculty members in the graduate Genetics major. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

GENET 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Research. (Typically Offered: Fall, Spring, Summer)

Honors Program

Honors Program

The University Honors Program brings together some of Iowa State University's brightest and most motivated students to take advantage

of both intellectual and social opportunities. Honors scholars gain early exposure to research and leadership as well as benefit from creating an individualized educational path adding breadth and depth to their academic experience.

Students in the First-Year Honors Program (<https://www.honors.iastate.edu/program/fhp/>) typically enroll in five Honors credits in their first term (ENGL 2500H, LIB 1600, Honors 121) and may opt to participate in the First-Year Mentor Program (<https://www.honors.iastate.edu/program/fhp/first-year-mentor-program/>), a two-credit research experience during their second term. In the University Honors Program, students receive a variety of academic opportunities to help them optimize their undergraduate experience. They create individualized programs of study with opportunities to incorporate independent study and research. Grants (<https://www.honors.iastate.edu/scholarships/research-grants/>) are available to support Honors student research. Students who complete their work in the University Honors Program receive a notation on their transcript.

All Honors students take at least two Honors courses and two Honors seminars (listed as HON 321-324), complete an independent research or creative project (<https://www.honors.iastate.edu/program/uhp/project/>), and maintain an overall GPA of 3.5 or higher. Most Honors requirements also fulfill requirements for graduation. Depending on the college of their primary major, students may need to fulfill additional requirements (<https://www.honors.iastate.edu/program/uhp/college-reqs/>).

Honors credit for a course (<https://www.honors.iastate.edu/program/uhp/courses/>) is denoted by an "H" on the transcript and can be earned in the following ways: enrollment in an Honors section of a class, contracting an Honors Component within a class, enrollment in a 500-level graduate course.

Honors seminars (<https://www.honors.iastate.edu/program/uhp/seminars/>) are one- or two-credit special topic classes offered only to Honors students. With enrollment generally limited to 17 students, these seminars promote a crucial atmosphere of intellectual exchange and a high level of student involvement in learning.

Oversight of Honors students' progress is carried out by the Honors Program staff in coordination with the undergraduate colleges. Each college's Honors committee approves its students' programs of study and project proposals. The University Honors Program Committee is responsible for the program's curricular oversight. The Honors Program Office is located at 2130 Jischke Honors Building. For additional information, visit www.honors.iastate.edu (<https://www.honors.iastate.edu/>) or contact honors@iastate.edu.

HONORS PROGRAM

The Iowa State University Honors Program is designed for students who have demonstrated the ability and motivation to assume more

than the usual responsibility for their undergraduate education. The program enables honors students to gain the maximum benefit from their undergraduate education. Students who graduate in the Honors Program receive the honors designation on their transcripts and diplomas.

Special educational opportunities. Students in the Honors Program determine their educational objectives and devise an individualized program of study to meet them. An honors program may include substitutions for required courses, a combination of courses from several departments to form a new major or minor, Honors courses or seminars, independent study and research, and other forms of innovation.

Other benefits. Members of the Honors Program have 24-hour access to the Jischke Honors Building as a quiet place to study and visit with other honors students. Students also have off-campus opportunities such as attending honors semesters and conferences. Members receive extended loan privileges at the Library, priority scheduling, and the opportunity to apply for research funds.

ISU students who have a cumulative grade-point average of at least 3.5 become eligible to apply for admission to the Honors Program during their second semester in residence and continue to be eligible as long as they have at least 48 semester credits remaining before graduation. Transfer students with a G.P.A. of 3.5 or higher and more than 60 credits remaining are also eligible to apply.

FIRST-YEAR HONORS PROGRAM

Entering first-year students with outstanding high school records and academic ability may be eligible to participate in the First-Year Honors Program (FHP). The FHP, which introduces students to an honors education, consists of honors sections of English 250 and Library 160, an FHP seminar, and honors advisors. Students may also choose to participate in the Honors Mentor Program, which introduces students to scholarship and research. Participants are matched with faculty members conducting research in an areas of mutual interest. Admission to the FHP is limited, and is based on past academic achievement, potential, and interest in an honors education.

Further information concerning the University Honors Program and the First-Year Honors Program can be obtained from the Honors Program Office, 2130 Jischke Honors Building or www.honors.iastate.edu (<http://www.honors.iastate.edu>).

Human Computer Interaction Interdepartmental Graduate Program

Human Computer Interaction is an interdepartmental graduate program that seeks to improve the way individuals and groups use computers through an understanding of the social and cognitive aspects of the design and use of computational devices. Students in the program learn about cognitive psychology, graphic design principles, the impacts of

technology on society, evaluating system usability, and cutting edge computer programming for computational perception and language parsing.

Student research projects have explored the latest in virtual reality studies, improving natural interaction through touch screens and 3D camera gesture controls, virtual engineering using force feedback devices, and many other projects at the bleeding edge of technological innovation. Graduates of the program have gone to work at many of the largest technology firms in the US and abroad while others have gone on to positions in academia.

Degrees are offered for the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees with a major in Human Computer Interaction (HCI). A Graduate Certificate and an Online Master of Human Computer Interaction (M.HCI) degree are also offered; these degrees are especially targeted for the benefit of students working in business and industry wanting education in this field. The graduate program in Human Computer Interaction (HCI) welcomes applicants from a diverse collection of technical and creative fields whose unifying characteristic is the desire to develop new ways to bridge the gap between human and machine. The students must demonstrate skill in software development and proficiency in high-level, object-oriented programming. These skills can be acquired after admission to the program. Other entrance requirements will include an undergraduate degree and transcripts, test scores and other indicators that the applicant can be successful at the graduate level. All students admitted to the PhD program on campus must secure a graduate assistantship.

Program requirements can be found on the program's webpage (<http://www.vrac.iastate.edu/hci/>) and in the Human Computer Interaction Graduate Student Handbook.

All programs of study for the Ph.D. must include:

1. one core course of their choice from each of the categories of Implementation, Design, Evaluation and Phenomena, if not completed as part of the student's master's program
2. two more courses of their choice from a list of recommended electives
3. a minimum of nine research credits.

The M.S. degree calls for 30 credits of course work including appropriate credit for the master's thesis. M.S. students must take one core course of their choice from each of the categories of Implementation, Design, Evaluation and Phenomena. In addition to these courses, M.S. students will be required to take a minimum of 3 research credits.

The online M.HCI program is most appropriate for individuals with a bachelor's degree in a scientific, engineering, business, or artistic discipline, who are pursuing a professional career, and who already have a

strong base of information technology skills. Requirements for the online M.HCI Program include taking four courses, one each from the Design, Implementation, Phenomena and Evaluation categories. However, M.HCI students must take two additional courses of their choice from the list of core courses or the list of recommended electives. M.HCI students will therefore be required to take a total of six courses (18 credits) and the remaining four courses (12 credits) would be electives of your choosing.

Requirements for the HCI Graduate Certificate program include three core HCI courses plus one elective.

Information on applications procedures and specific requirements of the major can be obtained on the program webpage: <http://www.vrac.iastate.edu/hci/>

Immunobiology

Immunobiology Interdepartmental Graduate Program

Work is offered for the master of science and doctor of philosophy degrees with a major in Immunobiology. Faculty are drawn from twelve university departments along with researchers from the National Animal Disease Center. Participating departments include: Animal Science; Biochemistry, Biophysics, and Molecular Biology; Biomedical Sciences; Chemical & Biological Engineering; Entomology; Food Science and Human Nutrition; Kinesiology; Natural Resource Ecology & Management; Veterinary Clinical Sciences; Veterinary Diagnostic & Production Animal Medicine; Veterinary Microbiology & Preventative Medicine; and Veterinary Pathology. The diversity of faculty expertise ensures a broad education while offering flexibility in choice of specialization. Ongoing research projects include areas such as: antibody and cell-mediated immunity, gene expression, immunochemistry, immunogenetics, immunomodulation, immunophysiology, mucosal immunity and nutritional immunology. Additional information about program faculty members is available at: www.immunobiology.iastate.edu (<http://www.immunobiology.iastate.edu/>).

Students may enter the Immunobiology program in one of two ways; prospective students may apply directly to the major, or current ISU graduate students may be admitted as a co-major or minor in Immunobiology. Ph.D. students admitted into the Interdepartmental Immunobiology major will take IMBIO 6970 Graduate Research Rotation during their first two semesters. From these rotations the student will select a major professor and join a home department. Affiliating with a major professor is done by the end of the second semester.

Before entering the Immunobiology program, prospective students should have a strong background in the biological sciences; typically

including work in immunology, genetics and biochemistry. Prior research experience is highly encouraged.

Immunobiology students should include in their program of study a core of courses which will provide a broad coverage of the basic program in immunobiology. Formal courses should include immunology, biochemistry, and statistics. Additional coursework may be selected to satisfy individual interests or departmental requirements.

Graduates of the Immunobiology program will have a broad understanding of the interdisciplinary field of immunobiology and will be able to effectively integrate the principles of immunology with related disciplines. They are able to effectively communicate with scientific colleagues and the general public in both formal and informal settings. Graduates are able to integrate theory and research to address complex problems facing scientific professionals studying animal and human health, taking into account related ethical, social, legal and environmental issues. They are skilled at carrying out research, communicating research results, and writing persuasive grant proposals.

GRADUATE STUDY IN IMMUNOBIOLOGY

Curriculum Requirements for Immunobiology Doctoral Students

Ph.D. candidates majoring in Immunobiology must take at least 72 graduate credits. This 72 credits includes the below core course requirements and applicable research credits earned. Credits taken during a student's M.S. program in Immunobiology at Iowa State University will count towards their Ph.D. in Immunobiology.

Ph.D. students should take each of the following:

BBMB 4050	Biochemistry II	3
IMBIO 6020	Current Topics Workshop in Immunology ^{Repeated each Fall}	1
IMBIO 6040	Seminar in Immunobiology ^{Repeated each Spring}	1
IMBIO 6990	Research	
STAT 5870	Statistical Methods for Research Workers	4
VMPM 6150	Molecular Immunology	3
GRST 5650	Responsible Conduct of Research in Science and Engineering	1

Take one of the following two:

VMPM 5200	Principles of Immunology	3
VMPM 5750	Immunology	3

Take at least two courses from the following approved electives:

BBMB 5450	Molecular Signaling	2
IMBIO 6610	Comparative Immunology and Infectious Disease	2
GDCB 5280	Advances in Molecular Cell Biology	3
VMPM 5400	Livestock Immunogenetics	2

VMPM 6080	Molecular Virology	3
VMPM 6250	Mechanisms of Bacterial Pathogenesis	3
VMPM 6290	Advanced Topics in Cellular Immunology	2
VPTH 6610	Comparative Immunology and Infectious Disease	2

Curriculum Requirements for Immunobiology Master's Students

All M.S. students majoring in Immunobiology are required to complete a minimum of 30 graduate credits. These 30 credits includes core course requirements and applicable research credits earned. The requirements for M.S. students are the same as that for Ph.D. students with the exception of the elective credits. M.S. students are required to take **at least one course from the list of electives** as opposed to the two course minimum for Ph.D. students.

Curriculum Requirements for a Minor in Immunobiology at the PhD Level

Graduate students studying at Iowa State University with an interest in completing an Immunobiology minor for their Ph.D. studies are required to take a total of 12 credit hours of coursework including core courses and approved electives.

Students must be approved for the minor by the Immunobiology program and must follow Graduate College guidelines for POS Committee membership.

Graduate students wishing to seek a minor in Immunobiology are encouraged to contact the Immunobiology Interdepartmental Graduate Program Coordinator for further information. Inquiries can be submitted to: idgp@iastate.edu.

Immunobiology Minor Curriculum at the Ph.D. Level Includes:

One course from each of the following two categories:

Category A:

VMPM 5200	Principles of Immunology	3
VMPM 5750	Immunology	3

Category B:

VMPM 6150	Molecular Immunology	3
VMPM 6290	Advanced Topics in Cellular Immunology	2

One enrollment in the following:

IMBIO 6020	Current Topics Workshop in Immunology	1

Minimum of 2 courses from any of the following approved electives:

BBMB 5450	Molecular Signaling	2
GDCB 5280	Advances in Molecular Cell Biology	3
IMBIO 6610	Comparative Immunology and Infectious Disease	2
MICRO 4080	Virology	3

MICRO 5540	Virology	1
VMPM 5400	Livestock Immunogenetics	2
VMPM 6080	Molecular Virology	3
VMPM 6250	Mechanisms of Bacterial Pathogenesis	3
VMPM 6290	Advanced Topics in Cellular Immunology	2
VPTH 6610	Comparative Immunology and Infectious Disease	2

Interdisciplinary Graduate Studies

www.grad-college.iastate.edu/igs/ (<http://www.grad-college.iastate.edu/igs/>)

GRADUATE PROGRAM

The degree Master of Science or Master of Arts with a major in Interdisciplinary Graduate Studies (IGS) is available to graduate students who wish to have a more diversified program of advanced study than generally permitted for students who specialize in a single subject. The program is open to any qualified graduate student but is most useful to those who wish to improve their subject matter competence in more than one discipline.

Those who elect to pursue the Interdisciplinary Graduate Studies Program are allowed to take courses in three different graduate subject matter areas, each subject contributing a **minimum** of nine (9) semester credits toward the 35 graduate credits required for the degree. Courses which may be used for credit toward this degree are selected from those listed in the *Iowa State University Catalog*.

Both thesis and non-thesis options are available. In the thesis option, the student, with the guidance of a major professor, develops and reports in writing a research study. In the non-thesis option, a creative component is required in which the student demonstrates independent creativity such as a written report of laboratory, field, or library research, a project in fine arts, or some other original contribution. A minimum of three (3) and maximum of five (5) credits in either IGS 5990 Creative Component or IGS 6990 Thesis Research may be counted toward the total 35 semester credits.

The student, in consultation with their Program of Study Committee, will decide on the choice of option (i.e., thesis or non-thesis). The Program of Study Committee also aids the student in planning and approving a program of study and selecting appropriate courses.

A student majoring in Interdisciplinary Graduate Studies may participate in any one of the following areas of specialization:

- Arts and Humanities (<http://igs.grad-college.iastate.edu/areas-of-specialization/arts-and-humanities/>)
- Biological and Physical Sciences (<http://igs.grad-college.iastate.edu/areas-of-specialization/biological-and-physical-sciences/>)

- International Development Studies (<http://igs.grad-college.iastate.edu/areas-of-specialization/international-development-studies/>)
- Social Sciences (<http://igs.grad-college.iastate.edu/areas-of-specialization/social-sciences/>)

Because of the interdisciplinary nature of the Interdisciplinary Graduate Studies Program, students are expected to demonstrate that they can relate in a significant way at least two of the three chosen areas of study. This is usually done in the written work for the thesis research or creative component. In their final oral examination, students also are expected to be able to discuss the relationship among the three areas of study.

Courses primarily for graduate students, open to qualified undergraduates:

IGS 5990: Creative Component

Credits: 1-30. Repeatable.

Courses for graduate students:

IGS 6990: Thesis Research

Credits: 1-30. Repeatable.

Interdisciplinary Studies INTERDISCIPLINARY STUDIES UNDERGRADUATE MAJOR

Administered by the College of Liberal Arts and Sciences

A major in interdisciplinary studies is offered in the College of Liberal Arts and Sciences for undergraduate students who have unique interdisciplinary educational goals. The student, a faculty review board, and an academic advisor design the major. Leading to either the Bachelor of Arts or the Bachelor of Science degree, the major includes 36 to 48 credits of coursework chosen to provide a coherent, carefully planned program in an area of interest that bridges two or more disciplines. This specialized area is identified on the diploma. Learning goals are individually crafted for each proposed major. All interdisciplinary studies majors must also satisfy the requirements of the liberal arts and sciences curriculum in the College of Liberal Arts and Sciences.

A degree in Interdisciplinary Studies may be particularly attractive to students who wish to develop an area of interest based upon one of the College's cross-disciplinary programs; the faculty of the cross-disciplinary studies programs in Classical Studies and U.S. Latino/a Studies have laid out an interdisciplinary track for study in those areas.

Students have also worked with faculty to propose Interdisciplinary Studies tracks in areas of interest such as International Relations, Ecology Studies, African American Cultural Studies, Asian Studies, and Cognitive Studies. Currently students are working with faculty to

identify interdisciplinary programs of study in Climate Science and Health Science.

Learning Outcomes

As part of the proposal process students are expected to identify specific learning goals of their proposed interdisciplinary coursework. In addition to meeting the learning goals of the general education program of the College of Liberal Arts and Sciences and meeting university-wide learning goals, Interdisciplinary Studies majors graduates will be able to:

- Integrate knowledge and modes of thinking grounded in interdisciplinary inquiry.
- Use methods and tools from multiple disciplines to solve problems.
- Connect their learning to their professional goals.

Further information about the Interdisciplinary Studies major can be obtained from the LAS College Student Academic Services office.

HOW TO PROPOSE AN INTERDISCIPLINARY PROGRAM

A student seeking admission to the program in interdisciplinary studies develops a proposal in consultation with faculty and an advisor. The proposal will include a program of study and a letter of application that explains how the proposed major meets specific educational and learning goals. Since students are expected to earn at least 30 credits after they are admitted into the program, the proposal is ordinarily submitted to the LAS Associate Dean for Academic Programs during the sophomore or junior year. The proposal will be considered if the area of interest properly falls within the College of Liberal Arts and Sciences and if the student's educational goals cannot be met by a more traditional combination of existing majors, minors, and electives.

Specific Requirements for the Program of Study

The interdisciplinary studies major must meet College of Liberal Arts and Sciences and University-wide requirements for graduation. In addition, the proposed major must include 36 to 48 credits of coursework chosen to lead to a distinctive set of learning outcomes and bridge two or more disciplines. A major emphasizing the humanities or communicative arts normally leads to a B.A.; a major emphasizing the natural or social sciences normally leads to a B.S. Different requirement for the B.A. and B.S. degrees are determined by the nature of the chosen field of study. Courses listed in the individualized major may come from any department of the university with the following restrictions:

1. The selection of courses needs to focus on a single theme and be consistent with the career and educational goals of the student.
2. At least one half of the courses in the major will come from departments within the College of Liberal Arts and Sciences.
3. The courses will be chosen from at least two disciplines.

4. All courses in the major must be at the 2000-level or higher.
5. At least 15 credits must be at the 3000-level or higher with at least 6 credits at the 4000-level or higher.

An average grade of C or better must be earned in 15 credits at the 3000-level or higher in the major.

To meet the English and communication proficiency requirement, a grade of C or better must be earned in ENGL 2500 and in either an advanced English composition course or a course in the major with a significant writing component.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. You must also complete the LAS world language requirement and career proficiency requirement.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your advisor how the two courses that you select can be applied to your graduation plan.

Forms and sample proposals are available here (<https://iastate.box.com/s/mf3126yjf7tobnjoq9lf4jw67jmxm8iv/>). Further information may be obtained from the LAS College Student Academic Services office.

INTERDISCIPLINARY STUDIES MAJOR WITH A TRACK IN CLASSICAL STUDIES

Students may pursue an Interdisciplinary Studies Major with a track in Classical Studies by completing a program of study defined by faculty who work in this interdisciplinary program. Additional information is available on the Classical Studies page of the catalog.

INTERDISCIPLINARY STUDIES MAJOR WITH A TRACK IN U.S. LATINO/A STUDIES

Students may pursue an Interdisciplinary Studies Major with a track in U.S. Latino/a Studies (<http://catalog.iastate.eduhttps://collegeofliberalartsandsciences/uslatino-a-studies/#interdisciplinarymajortext>) by completing a program of study defined by faculty who work in this cross-disciplinary program. Additional information is available on the U.S. Latino/a Studies page of the catalog.

Iowa Lakeside Laboratory INTERINSTITUTIONAL PROGRAM

Iowa Lakeside Laboratory is run cooperatively by the Iowa Lakeside Laboratory Consortium whose members include Drake University, Iowa State University, the University of Northern Iowa, and the University of Iowa. Lakeside courses can be taken for credit through all Consortium members. Students should check with their advisors to determine

whether Lakeside courses can be used to satisfy major or minor requirements or college or university general education requirements.

The Laboratory was established in 1909 for the conservation and study of the rich flora and fauna of northwest Iowa, especially those of the Iowa Great Lakes region with its numerous lakes, wetlands, and prairies. Its campus is located on approximately 140 acres of restored prairie, wetland, and gallery forest along the west shore of West Okoboji Lake. Lakeside's mission is to provide undergraduate and graduate students an opportunity to get hands-on experience working with a variety of natural and human environments through its field-oriented summer courses and to provide research facilities and support for graduate students and faculty working on research projects in northwestern Iowa. Each summer, Iowa Lakeside Laboratory offers students a unique educational experience: small, full-immersion, field-oriented courses in the natural sciences (archaeology, ecology, environmental science, hydrology, evolution, geology, soils, taxonomy). All courses meet all day from Monday through Friday. The majority of courses run for 4 weeks. Enrollments in most courses are limited to 8 to 10 students.

Courses are taught at the undergraduate (sophomore and junior) and the senior/graduate level. Students obtain one credit for each week (40 hours) in class. One and two week courses are also available, including courses designed especially for teachers. Weather permitting, students normally spend at least part of each day doing field work, either as part of their class work or working on individual or group projects. Because some courses are offered intermittently, the current Iowa Lakeside Laboratory summer brochure or the Lakeside Lab Website (www.lakesidelab.org) (<http://www.lakesidelab.org>) should be consulted for the list of courses being offered in a given summer session. The Lakeside Lab Website (www.lakesidelab.org) (<http://www.lakesidelab.org>) also contains additional information about the Laboratory and about each course being offered.

Research projects by undergraduates, graduate students and faculty can be done either on the campus or at many nearby natural areas. Undergraduate and graduate students are strongly encouraged to do independent projects at Lakeside and graduate students are welcome to use it as a base for their thesis and dissertation research. Laboratory space and other facilities are available for long-term or short-term research projects.

Teaching and research facilities include eight laboratory buildings, a library, and a lecture hall. Living accommodations include cottages, motel-style units, and a large mess hall. All students are encouraged to stay at Lakeside while they are taking courses to take full advantage of its educational, professional, and social life.

Financial Aid

Iowa Lakeside Laboratory Scholarships are available to both undergraduates and graduate students. All scholarships cover room and board. Information about how to apply for Iowa Lakeside Laboratory Scholarships is included on the Website (www.lakesidelab.org (<http://www.lakesidelab.org>)). Students should also consult the Student Financial Aid Office for other scholarship, work study, and loan programs for which they are eligible.

Registration

Students can only enroll in Iowa Lakeside Lab courses by submitting an Iowa Lakeside Lab Registration and Scholarship form and Housing form to the Iowa Lakeside Laboratory Administrative Office. These forms are found on the Iowa Lakeside Laboratory Website:(www.lakesidelab.org (<http://www.lakesidelab.org>)).

Early registration is advisable. Because enrollment in Lakeside courses is limited, students should register before May 1 for the following summer session. Housing is also limited and students must apply for housing or indicate that they plan to live off campus at the time of registration.

IOWA LAKESIDE LABORATORY

Iowa Lakeside Laboratory is an off-campus teaching and research facility situated on a 140-acre campus on West Okoboji Lake in Northwest Iowa. It is run cooperatively by Iowa State University, the University of Iowa, the University of Northern Iowa, and Drake University. Each summer Iowa State University students can take up to three undergraduate and/or graduate courses in archaeology, biology, ecology, environmental science, and/or geology for credit at Lakeside (see course listings under Iowa Lakeside Laboratory). All Lakeside courses are small, full-immersion, field-oriented courses that run for 1-4 weeks. Lakeside also offers a variety of short courses for teachers and a series of nontechnical short courses on various aspects of the natural history of Iowa. Information about Lakeside courses as well as registration and housing information can be obtained from the Biology Program Office, 103 Bessey Hall or on the Lakeside Web site, <https://iowalakesidelab.org/>.

Molecular, Cellular, and Developmental Biology

MCDB Interdepartmental Graduate Program

Work is offered for the doctor of philosophy degree with a major in Molecular, Cellular, and Developmental Biology. Faculty are drawn from sixteen university departments along with researchers from the National Animal Disease Center. Participating departments include: Agronomy; Animal Science; Biochemistry, Biophysics & Molecular Biology; Biomedical Sciences; Chemistry; Chemical & Biological Engineering; Ecology, Evolution, & Organismal Biology; Entomology;

Food Science & Human Nutrition; Genetics, Development & Cell Biology; Horticulture; Kinesiology; Physics & Astronomy; Plant Pathology; Veterinary Microbiology & Preventive Medicine; and Veterinary Pathology. Facilities and qualified faculty are available in these departments for conducting fundamental research in the various aspects of molecular, cellular, and developmental biology. Ongoing research projects include molecular and cellular studies of viral, prokaryotic, fungal, plant, and animal systems. Additional information about the program and faculty is available at: www.mcdb.iastate.edu (<http://www.mcdb.iastate.edu/>).

Prospective students are admitted by the MCDB program following receipt of a complete application and after review by the MCDB Admissions Committee. Students are admitted either to participate in research rotations with several faculty before deciding on a major professor and laboratory, or by direct admission into a specific lab and department. Ph.D. students typically enter via rotation and are required to complete a minimum of three research lab rotations with faculty of interest and take MCDB 6970 Graduate Research Rotation during their first two semesters. At the end of their second semester, students on rotation must select a major professor from the faculty participating in the program. Current ISU graduate students may be admitted as a co-major or minor with MCDB.

Before entering the MCDB program, prospective students should have a strong background in the biological sciences; typically including work in biological sciences (two years), organic chemistry (one year), physics (one year), and mathematics (through one year of calculus). Prior research experience is highly encouraged.

UNDERGRADUATE STUDY

A special program in Molecular, Cellular, and Developmental Biology is not offered for the baccalaureate. Undergraduates wishing to prepare for graduate study in molecular, cellular, and developmental biology should elect courses in biochemistry, biology, genetics, microbiology; and mathematics through calculus; chemistry through organic; and one year of physics.

The following are recommended to undergraduates desiring an introduction to this area:

BIOL 3130	Principles of Genetics	3
BIOL 3130L	Genetics Laboratory	1
BIOL 3140	Principles of Molecular Cell Biology	3
BIOL 4230	Developmental Biology	3
BIOL 4230L	Developmental Biology Laboratory	1
BIOL 4280	Cell Biology	3

CURRICULUM REQUIREMENTS FOR MCDB

Ph.D. candidates majoring in MCDB must take at least 72 graduate credits. These 72 credits include the core course requirements (below) and applicable research credits earned.

Additional coursework may be selected by the student in consultation with their Program of Study (POS) Committee to meet departmental requirements and to satisfactorily prepare the student for their research project.

Graduate credits of B or better earned in another Iowa State program, or at another institution, may be transferred at the discretion of the POS Committee and with the approval of the MCDB Program and the ISU Graduate College.

Additional information relating to credits required for graduate degrees can be found in the ISU Graduate College Handbook (<http://www.grad-college.iastate.edu/common/handbook/>).

MCDB Core Curriculum requirements include:

BBMB 4040	Biochemistry I	3
BBMB 4050	Biochemistry II	3
Students with a Biochemistry background can elect to take the 500-level sequence (two of the following courses):		
BBMB 5040	Amino Acids and Proteins	2
BBMB 5050	Bioenergetics and Metabolism	2
BBMB 5060	Membrane Biochemistry	2
BBMB 5070	Biochemistry of Nucleic Acids	2

All Ph.D. students must take one course from each of the following areas: A) Cellular Biology, B) Developmental Biology, & C) Molecular Biology.

A. Cellular Biology

GDCB 5280	Advances in Molecular Cell Biology	3
GDCB 5450	Plant Molecular, Cell and Developmental Biology	3
BMS 5750	Cell Biology	3
BBMB 5450	Molecular Signaling	2

B. Developmental Biology

GDCB 5330	Advances in Developmental Biology	3
GDCB 5450	Plant Molecular, Cell and Developmental Biology	3

C. Molecular Biology

MICRO 5020	Microbial Genetics and Genomics	3
GDCB 5110	Advanced Molecular Genetics	3
GDCB 5450	Plant Molecular, Cell and Developmental Biology	3
VMPM 6080	Molecular Virology	3

*Footnote: GDCB 5450 - Plant Molecular, Cellular, and Developmental Biology may be used to fulfill any one of the required component areas.

In addition to the above course requirements, MCDB graduate students are required to take:

1. Two semesters of research seminar every year.

Fall semester students will enroll in 1) a "for credit" research seminar series offered by the student's home department, 2) a workshop comprised of a research seminar series, or 3) another ISU research seminar series, typically chosen from one of the following departments: Agronomy, Animal Science; Biochemistry, Biophysics & Molecular Biology; Biomedical Sciences; Chemistry; Chemical & Biological Engineering; Ecology, Evolution, & Organismal Biology; Entomology; Food Science & Human Nutrition; Genetics, Development & Cell Biology; Horticulture; Kinesiology; Physics & Astronomy; Plant Pathology; Veterinary Microbiology & Preventive Medicine; and Veterinary Pathology. (Options 2 and 3 are subject to approval by the POS committee).

Spring semester register for MCDB 6980, Seminar in Molecular, Cellular, and Developmental Biology. In seminar, students will make journal and research presentations and attend MCDB seminars. Three semesters of MCDB 6980 are required. Beyond this requirement, students must enroll in additional semesters of MCDB 6980 or enroll in seminar series as described above for fall semesters.

2. One credit hour of ethics training.

GRST 5650	Responsible Conduct of Research in Science and Engineering	1

Not required, but highly recommended for MCDB graduate students:

BCB 5440	Fundamentals of Bioinformatics	4

Non-native English speakers must pass the English Requirement as established by the university. Depending on the results of this exam additional courses may be required to meet English proficiency standards.

MCDB graduate students need to teach one semester as part of their training for an advanced degree. Students whose first language is not English must take and pass the Oral English Certification Test (OECT) to be eligible to teach.

Curriculum Requirements for Graduate Students Seeking a MCDB Minor

Graduate students studying at Iowa State University with an interest in completing a MCDB minor for their Ph.D. are required to complete the following curriculum requirements.

Students must be approved for the minor by the MCDB program and must follow Graduate College guidelines for POS Committee membership.

Graduate students wishing to seek a minor in MCDB are encouraged to contact the MCDB Interdepartmental Graduate Program Coordinator for further information. Inquiries can be submitted to idgp@iastate.edu.

MCDB Minor Curriculum at the Ph.D. Level Includes:

BBMB 4040	Biochemistry I	3
BBMB 4050	Biochemistry II	3

Students with a Biochemistry background can elect to take the 500-level sequence (two of the following courses):

BBMB 5040	Amino Acids and Proteins	2
BBMB 5050	Bioenergetics and Metabolism	2
BBMB 5060	Membrane Biochemistry	2
BBMB 5070	Biochemistry of Nucleic Acids	2

One course in each of two of the following three areas: A) Cellular Biology, B) Developmental Biology, & C) Molecular Biology.

A. Cellular Biology

GDCB 5280	Advances in Molecular Cell Biology	3
GDCB 5450	Plant Molecular, Cell and Developmental Biology	3
BMS 5750	Cell Biology	3
BBMB 5450	Molecular Signaling	2

B. Developmental Biology

GDCB 5330	Advances in Developmental Biology	3
GDCB 5450	Plant Molecular, Cell and Developmental Biology	3

C. Molecular Biology

MICRO 5020	Microbial Genetics and Genomics	3
GDCB 5110	Advanced Molecular Genetics	3
GDCB 5450	Plant Molecular, Cell and Developmental Biology	3
VMPM 6080	Molecular Virology	3

***Footnote: GDCB 545 - Plant Molecular, Cellular, and Developmental Biology may be used to fulfill any one of the required component areas.**

In addition to the above course requirements, MCDB graduate minors are required to register once for:

MCDB 6980	Seminar in Molecular, Cellular, and Developmental Biology	1-2

Courses primarily for graduate students, open to qualified undergraduates:

MCDB 5110: Advanced Molecular Genetics

(Cross-listed with GDCB 5110).

Credits: 3. Contact Hours: Lecture 3.

Mechanisms of molecular genetic processes in eukaryotes and prokaryotes, including DNA replication and repair, transcription, translation and regulation of gene expression. Critical evaluation and discussion of current primary literature, methodologies and experimental data. (Typically Offered: Spring)

MCDB 5280: Advances in Molecular Cell Biology

(Cross-listed with GDCB 5280).

Credits: 3. Contact Hours: Lecture 3.

Cell biological processes including cell signaling, cell division, intracellular trafficking, biogenesis of organelles, cell adhesion and motility. Offered even-numbered years. (Typically Offered: Fall)

MCDB 5330: Advances in Developmental Biology

(Cross-listed with GDCB 5330).

Credits: 3. Contact Hours: Lecture 3.

Fundamental principles in multicellular development. Emphasis on cellular and molecular regulation of developmental processes, and experimental approaches as illustrated in the current literature. Offered odd-numbered years. (Typically Offered: Fall)

MCDB 5450: Plant Molecular, Cell and Developmental Biology

(Cross-listed with GDCB 5450/ PLBIO 5450).

Credits: 3. Contact Hours: Lecture 3.

Plant nuclear and organelle genomes; regulation of gene expression; hormone signaling; organization, function, and development of plant cells and subcellular structures; regulation of plant growth and development. Offered odd-numbered years. (Typically Offered: Fall)

MCDB 5900: Special Topics

Credits: 1-30. Repeatable.

Courses for graduate students:

MCDB 6970: Graduate Research Rotation

Credits: 1-6. Repeatable.

Graduate research projects performed under the supervision of selected faculty members in the molecular, cellular, and developmental biology program. (Typically Offered: Fall, Spring)

MCDB 6980: Seminar in Molecular, Cellular, and Developmental Biology

(Cross-listed with BBMB 6980/ GDCB 6980/ MICRO 6980/ VMPM 6980).

Credits: 1-2. Contact Hours: Lecture 2.

Repeatable.

Student and faculty presentations. (Typically Offered: Spring)

MCDB 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Neuroscience

Neuroscience Interdepartmental Graduate Program

Work is offered for the master of science and doctor of philosophy degrees with a major in neuroscience. Cooperating departments include Animal Science; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemical and Biological Engineering; Chemistry; Ecology, Evolution and Organismal Biology; Food Science and Human Nutrition; Genetics, Development and Cell Biology; Kinesiology; Psychology; Veterinary Clinical Sciences; and Veterinary Diagnostic and Production Animal Medicine.

The diversity of faculty in the Interdepartmental Neuroscience major provides students with a variety of research opportunities and reflects the structure of contemporary neuroscience which has become a diverse and interdisciplinary field. Facilities and faculty are committed to research in the following areas: neuronal membrane functions, signal transduction, neuroanatomy, neurodegenerative diseases, neuroendocrinology, neurotoxicology, neuropathology, developmental neurobiology, neurogenetics, computational neuroscience, neural networks, behavioral neuroscience, tissue engineering, neuroregeneration and brain repair. Additional information about program faculty members is available at: www.neuroscience.iastate.edu (<http://www.neuroscience.iastate.edu/>).

An undergraduate or advanced degree in one of the basic or applied sciences is ordinarily a prerequisite for admission to the program. Typical program disciplines include majors in biochemistry, biology, biomedical sciences, human medicine, immunology, neurobiology, physiology, pharmacology, psychology, veterinary medicine, or zoology. Appropriate undergraduate coursework includes mathematics, chemistry, physics, and biological sciences. Prior research experience is highly encouraged. The submission of GRE General Test scores is required for admission.

Prospective students are admitted by the Neuroscience program following an internal application process and after review by the Neuroscience Admissions Committee. Students are admitted either to participate in research rotations with several faculty before deciding on a major professor and laboratory, or by direct admission into a specific lab and department. Ph.D. students typically enter via rotation and M.S. students typically enter via a direct admit. Those students entering through a rotation admit are required to complete a minimum of three research lab rotations with faculty of interest. At the end of their second semester, students on rotation must select a major professor from the faculty participating in the program.

CURRICULUM REQUIREMENTS FOR NEUROSCIENCE GRADUATE STUDENTS

M.S. Curriculum

Students seeking an M.S. degree must take a total of 30 credits, with not less than 22 credits earned at ISU. The following courses are the core curriculum. In addition, students are required to take a minimum of 6 credits of elective courses and an ethics course.

BMS 5370	Neuroanatomy	3
KIN 5720	Neural Basis of Human Movement	2-3
	or NEURO 5890 Systems Neuroscience: Brain, Behavior, and Nutrition-Related Integrative Physiology	
GDCB 5560	Cellular, Molecular and Developmental Neuroscience	3
NEURO 6960	Neuroscience Seminar	1
NEURO 6990	Research	
PSYCH 5190	Cognitive Neuropsychology	3
STAT 5870	Statistical Methods for Research Workers	4

Ph.D. Curriculum

Ph.D. candidates majoring in Neuroscience must take at least 72 graduate credits. These 72 credits includes the below core course requirements and applicable research credits earned. Credits taken during a student's M.S. program in Neuroscience at Iowa State University will count towards their Ph.D. in Neuroscience.

BMS 5370	Neuroanatomy	3
KIN 5720	Neural Basis of Human Movement	2-3
	or NEURO 5890 Systems Neuroscience: Brain, Behavior, and Nutrition-Related Integrative Physiology	
GDCB 5560	Cellular, Molecular and Developmental Neuroscience	3
NEURO 5570	Rotations in Neuroscience	2
NEURO 6610	Advanced Topics in Neuroscience (Repeatable)	3
NEURO 6960	Neuroscience Seminar (Taken every fall & spring)	1
NEURO 6990	Research	arr †
PSYCH 5190	Cognitive Neuropsychology	3
STAT 5870	Statistical Methods for Research Workers	4
MANDATORY ETHICS TRAINING: All Neuroscience students are also required to complete 1 credit hour of ethics training.		1

† Arranged with instructor.

In addition to the above coursework, all Neuroscience majors are expected to take a **minimum of six credits of approved elective neuroscience courses**.

Additional coursework for both Ph.D. and M.S. degrees is selected by the student in consultation with their POS Committee to meet departmental requirements and to satisfactorily prepare the student for their research project.

Graduate credits of B or better earned at another institution may be transferred at the discretion of the POS Committee and with the approval of the Neuroscience Program and the ISU Graduate College.

Additional information relating to credits required for graduate degrees can be found in the ISU Graduate College Handbook (<http://www.grad-college.iastate.edu/common/handbook/>).

Curriculum Requirements for Graduate Students Seeking a Neuroscience Minor

Graduate students interested in completing a Neuroscience minor are required to complete 12 credits from the list below.

Students must be approved for the minor by the Neuroscience Program and must follow Graduate College guidelines for POS Committee membership.

Graduate students wishing to seek a minor in Neuroscience are encouraged to contact the Neuroscience Interdepartmental Graduate Program Coordinator for further information. Inquiries can be submitted to idgp@iastate.edu.

Approved Neuroscience Minor Courses

BMS 5370	Neuroanatomy	3
KIN 5720	Neural Basis of Human Movement	3
GDCB 5560	Cellular, Molecular and Developmental Neuroscience	3
NEURO 5890	Systems Neuroscience: Brain, Behavior, and Nutrition-Related Integrative Physiology	2
NEURO 6960	Neuroscience Seminar	1
PSYCH 5190	Cognitive Neuropsychology	3

Courses primarily for graduate students, open to qualified undergraduates:

NEURO 5560: Cellular, Molecular and Developmental Neuroscience
(Cross-listed with BMS 5560/ GDCB 5560).

Credits: 3. Contact Hours: Lecture 3.

Fundamental principles of neuroscience including cellular and molecular neuroscience, nervous system development, and regulatory systems. Offered odd-numbered years. (Typically Offered: Fall)

NEURO 5570: Rotations in Neuroscience

(Cross-listed with GDCB 5570).

Credits: 2. Contact Hours: Lecture 2.

Rotation experiences in various neuroscience research methods and techniques related to our current faculty specialties. (Typically Offered: Fall, Spring)

NEURO 5890: Systems Neuroscience: Brain, Behavior, and Nutrition-Related Integrative Physiology

(Cross-listed with FSHN 5890/ GERON 5890/ NUTRS 5890/ PSYCH 5890).

Credits: 2. Contact Hours: Lecture 2.

Structural, functional, and biochemical aspects of brain and non-motor behavior across the human lifespan. Types of neuroimaging used to assess the brain. Current research is leveraged to gauge how nutrition, diseases related to nutrition, and associated physiological processes influence the brain, particularly for common developmental, psychological, and neurological disorders. (Typically Offered: Spring)

Courses for graduate students:

NEURO 6610: Advanced Topics in Neuroscience

(Cross-listed with BBMB 6610/ KIN 6610/ GDCB 6610).

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: NEURO 5560 (or comparable course) or permission of instructor

Students will present three journal articles and two overview lectures on topics in neuroscience that are related but outside of their own research interest. Offered even-numbered years. (Typically Offered: Spring)

NEURO 6960: Neuroscience Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Seminar in neuroscience, current research interests, and/or professional development. (Typically Offered: Fall, Spring)

NEURO 6990: Research

Credits: 1. Repeatable.

Prereq: Instructor Permission for Course

Nutritional Sciences GRADUATE PROGRAM

The Interdepartmental Graduate Program in Nutritional Sciences, administered through the Graduate College, under the auspices of the Chairs of Food Science and Human Nutrition (FS HN) and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. M.S. and Ph.D. degrees in Nutritional Sciences will be offered with three

specializations: Animal Nutrition, Human Nutrition, or Biochemical & Molecular Nutrition.

The following undergraduate course work is recommended of all applicants who are applying to the Interdepartmental Graduate Program in Nutritional Sciences, but may be modified depending upon the student's area of emphasis. Recommended course work includes organic chemistry with laboratory, physics, analytical chemistry, a nutrition course that requires biochemistry or organic chemistry as a prerequisite, and a course in biology/physiology or anatomy. Under certain circumstances students can be admitted or provisionally admitted with course work deficiencies. Students with an undergraduate degree will be generally admitted into the M.S. program and upon completion, they can then apply for admission into the Ph.D. program. However, exceptional students with experience can apply directly to the Ph.D. program.

The general requirements of the Nutritional Sciences degree at the M.S. level, in addition to those of Graduate College, are:

NUTRS 5010	Biochemical and Physiological Basis of Nutrition: Macronutrients and Micronutrients	4
BBMB 4040	Biochemistry I	3
BBMB 4050	Biochemistry II	3
or BBMB 4200	Mammalian Biochemistry	
STAT 5870	Statistical Methods for Research Workers	4
FSHN 5800	Orientation to Food Science and Nutrition Research	1
or ANS 5010	Survey of Animal Disciplines	
ANS 6030	Seminar in Animal Nutrition	1
or FSHN 6820	Seminar Reflection	
FSHN 5810	Seminar (or AN S equivalent)	1
FSHN 6810	Seminar (or AN S equivalent)	1
FSHN 5900C	Special Topics: Teaching	1-3
or ANS 5900L	Special Topics: Teaching	
Successful completion and defense of thesis		

Students are expected to complete the course work established by the Program of Study (POS) committee based on specialization with a minimum of 30 graduate-level semester credits, not less than 22 of which must be earned at Iowa State University.

The general requirements of the Nutritional Sciences degree at the Ph.D. level, in addition to those of the Graduate College, are:

- Completion of all requirements of the M.S. degree in Nutritional Sciences
- 3 additional credits of graduate-level biochemistry (6 credits total including those for the M.S.), graduate-level statistics (STAT 4710

Introduction to Experimental Design), and physiology (if not taken for the M.S.)

- Additional graduate-level courses in the field of study as deemed appropriate by the POS Committee and specialization, and additional teaching assistant requirements (FSHN 5900C Special Topics: Teaching).

Satisfactory completion of a preliminary examination, a written dissertation, seminar presentation of dissertation research, and defense of the dissertation is also required. Overall a minimum of 72 graduate-level semester credits, no less than 36 of which must be earned at Iowa State University

Plant Biology

(Interdepartmental Graduate Major)

The Interdepartmental Plant Biology major (IPB) coordinates graduate education and research in the areas of plant biology including but not limited to plant biochemistry, plant cellular and molecular biology and plant physiology. Graduate study in IPB, leading to the M.S. and Ph.D. Degrees, is offered through eight participating departments: Agronomy, Biochemistry, Biophysics & Molecular Biology, Chemical and Biological Engineering, Chemistry, Ecology, Evolution and Organismal Biology, Genetics Development & Cell Biology, Horticulture, and Plant Pathology.

Research conducted by the faculty and students of the major represents both basic and applied aspects of plant physiology, biochemistry and molecular biology. The experimental approaches represented in the major span the range of complexity from molecular studies, to cellular, organismal and the ecological level (crop monocultures and natural populations). Graduates have a broad understanding of basic, functional plant biology with emphases on fundamental biology, biochemistry, and molecular biology. They are able to address complex research and policy problems in agriculture, biotechnology, and basic plant biology.

M.S. Program

A total of 36 credits, which includes a minimum of 16 course credits and at least a B grade or better, are required for an M.S.

All M.S. candidates take a core curriculum comprising courses recommended from the following four categories, attend research seminars (PLBIO 6960), take research credits (PLBIO 6990 Research), and attend the annual Loomis Distinguished Lecture and mini-symposium and retreats. Students will take additional courses of interest as directed by their Program of Study (POS) Committee members.

Required: Complete the following core courses:

STAT 5870	Statistical Methods for Research Workers	4
BBMB 3160	Principles of Biochemistry	3-6

or BBMB 4040 Biochemistry I
& BBMB 4050 and Biochemistry II
or BBMB 5040 Amino Acids and Proteins
& BBMB 5050 and Bioenergetics and Metabolism

GDCB 5130	Plant Metabolism	2
GDCB 5450	Plant Molecular, Cell and Developmental Biology	3
GRST 5650	Responsible Conduct of Research in Science and Engineering	1
PLBIO 6960	Research Seminar *	1
PLBIO 6990	Research	1-30

Optional Courses

AGRON 5160	Crop Physiology
AGRON 6250	Genetic Strategies in Plant Breeding
BBMB 5310	Plant Biochemistry
BBMB 5450	Molecular Signaling
BBMB 6750	Nucleic Acid Structure and Function
BIOL 4540	Plant Anatomy
BIOL 4740	Plant Ecology
EEOB 5530	Agrostology
EEOB 5630	Molecular Phylogenetics
EEOB 5660	Molecular Evolution
GDCB 5100	Transmission Genetics
GDCB 5110	Advanced Molecular Genetics
GDCB 5280	Advances in Molecular Cell Biology
STAT 5810	Analysis of Gene Expression Data for the Biological Sciences

* Required enrollment each semester; must present 2 talks; a maximum of 2 credits of 6960 seminars are counted toward MS degree POSC. Make two seminar presentations and enroll each term in the Interdepartmental Plant Biology seminar PLBIO 6960 Research Seminar. The first seminar must be during the student's first year and is a 20-minute seminar. The last presentation must be an exit seminar. In addition to the required core courses, a wide selection of courses is available to IPB graduate students for broadening their scientific education, and increasing knowledge in topics related to their research. Decisions about which courses are taken and when they are taken are made by the student, initially in consultation with their temporary advisor, and then with their major advisor and eventually with POS Committee, which also serves as the Thesis or Dissertation Committee.

Ph.D. Program

A total of 72 credits, which includes a minimum of 24 course credits and at least a B grade or higher, are required for a Ph.D.

All Ph.D. candidates take a core curriculum comprising courses recommended from the following four categories, attend research seminars, research credits (PLBIO 6990 Research), annual Loomis Distinguished Lecture in Plant Biology and mini-symposium and retreats. Students will take additional courses of interest as directed by their Program of Study (POS) Committee members.

Required: Complete the following core courses:

STAT 5870	Statistical Methods for Research Workers	4
BBMB 3160	Principles of Biochemistry	3-6

or BBMB 4040 Biochemistry I
& BBMB 4050 and Biochemistry II
or BBMB 5040 Amino Acids and Proteins
& BBMB 5050 and Bioenergetics and Metabolism

GDCB 5130	Plant Metabolism	2
GDCB 5450	Plant Molecular, Cell and Developmental Biology	3
GRST 5650	Responsible Conduct of Research in Science and Engineering	1
PLBIO 6960	Research Seminar *	1
PLBIO 6990	Research	1-30

Optional Core Courses: Must take one of the following

GDCB 5100	Transmission Genetics
GDCB 5110	Advanced Molecular Genetics
EEOB 5510	Plant Evolution and Phylogeny
EEOB 5660	Molecular Evolution

Optional Courses

AGRON 5160	Crop Physiology
AGRON 6250	Genetic Strategies in Plant Breeding
BBMB 5310	Plant Biochemistry
BBMB 5450	Molecular Signaling
BBMB 6750	Nucleic Acid Structure and Function
BIOL 4540	Plant Anatomy
BIOL 4740	Plant Ecology
EEOB 5530	Agrostology
EEOB 5630	Molecular Phylogenetics
EEOB 5660	Molecular Evolution
GDCB 5100	Transmission Genetics
STAT 5810	Analysis of Gene Expression Data for the Biological Sciences

* Required enrollment each semester; must present 4 talks; up to 5 credits of 6960 seminars are counted toward Ph.D. Enroll each term in the Interdepartmental Plant Biology seminar PLBIO 6960 Research Seminar or its listed equivalent. The first seminar must be during the

student's first year and is a 20-minute seminar. The last presentation must be an exit seminar.

In addition to the required core courses, a wide selection of courses is available to IPB graduate students for broadening their scientific education, and increasing knowledge in topics related to their research. Decision about which courses to take and when they are to be taken are made by the student, initially in consultation with their temporary advisor, and then with their major advisor and eventually with their POS Committee, which also serves as the Thesis or Dissertation Committee.

Requirements for students seeking a Minor in Plant Biology:

Ph.D. and M.S. candidates in other programs who desire a graduate minor in Plant Biology must take the required courses listed below, achieving a grade of B or better. One member of the student's POS committee must have IPB faculty membership.

Prerequisite Courses:

STAT 5870	Statistical Methods for Research Workers	4
BBMB 4040	Biochemistry I	3

9 credits from the following:

AGRON 5160	Crop Physiology
BIOL 4540	Plant Anatomy
GDCB 5130	Plant Metabolism
GDCB 5450	Plant Molecular, Cell and Developmental Biology

Courses primarily for graduate students, open to qualified undergraduates:

PLBIO 5130: Plant Metabolism

(Cross-listed with GDCB 5130).

Credits: 2. Contact Hours: Lecture 2.

Photosynthesis, respiration, and other aspects of plant metabolism.

Offered even-numbered years. (Typically Offered: Fall)

PLBIO 5450: Plant Molecular, Cell and Developmental Biology

(Cross-listed with MCDB 5450/ GDCB 5450).

Credits: 3. Contact Hours: Lecture 3.

Plant nuclear and organelle genomes; regulation of gene expression; hormone signaling; organization, function, and development of plant cells and subcellular structures; regulation of plant growth and development.

Offered odd-numbered years. (Typically Offered: Fall)

Courses for graduate students:

PLBIO 6960: Research Seminar

(Cross-listed with AGRON 6960/ BBMB 6960/ FOR 6960/ GDCB 6960/ HORT 6960).

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

PLBIO 6990: Research

Credits: 1-30. Repeatable.

Seed Science

Administered by the Departments of Agricultural and Biosystems Engineering, Agronomy, Horticulture, and Plant Pathology.

Seed Science must be taken as a secondary major in conjunction with a primary major. The seed science program is designed for students with career interests in one or more aspects of the seed industry. Areas of study focus on seeds including production, conditioning, pathology, physiology, quality control, marketing, and seed plant designs.

Student Learning Outcomes

Upon graduation, students should be able to:

1. Demonstrate understanding of the science and principles of seed production systems, including seed quality assessment and conditioning, and clearly communicate the importance of seeds to our society.
2. Articulate the opportunities in the seed industry for seed-related careers.
3. Apply seed science and technology knowledge for solving seed quality and production problems encountered in the seed industry.

CURRICULUM IN SEED SCIENCE (SECONDARY MAJOR)

Total Degree Requirement: 128 cr.

COMPLETE COMMUNICATION AND LIBRARY REQUIREMENTS OF PRIMARY MAJOR AND 3 CR. FROM THE FOLLOWING:

ENGL 3020	Business Communication	3
ENGL 3090	Proposal and Report Writing	3
ENGL 3120	Communicating Science and Public Engagement	3
ENGL 3140	Technical Communication	3
SPCM 3120	Business and Professional Speaking	3

BIOLOGICAL SCIENCES: 7 CR.

BIOL 2110	Principles of Biology I	4
& 2110L	and Principles of Biology Laboratory I	
or BIOL 2120	Principles of Biology II	
& 2120L	and Principles of Biology Laboratory II	

AGRON 3200	Genetics, Agriculture and Biotechnology	3
or BIOL 3130	Principles of Genetics	

PHYSICAL SCIENCES: 8-9 CR.

CHEM 1630	College Chemistry	5
& 1630L	and Laboratory in College Chemistry	
or CHEM 1770	General Chemistry I	
& 1770L	and Laboratory in General Chemistry I	

One of the following:

AGRON 2590	Organic Compounds in Plants and Soils	3
BBMB 2210	Structure and Reactions in Biochemical Processes	3
CHEM 2310	Elementary Organic Chemistry	4
& 2310L	and Laboratory in Elementary Organic Chemistry	

MATHEMATICAL SCIENCES 6 CR.

MATH 1400	College Algebra	3
or MATH 1500	Discrete Mathematics for Business and Social Sciences	

Statistics course		3

AGRICULTURAL SCIENCES: 28-29 CR.

AGRON 1810	Introduction to Crop Science	3
or HORT 2210	Principles of Horticulture Science	
AGRON 1820	Introduction to Soil Science	3
AGRON 2060	Introduction to Weather and Climate	3
AGRON 2170	Weed Identification	1-2
or AGRON 3310	Crops Practicum	
AGRON 3160	Crop Structure-Function Relationships	3
or HORT 3210	Horticulture Physiology	
AGRON 3540	Soils and Plant Growth	3
9 credits from AGRON, HORT, or TSM (6 credits at 3000-4000 level)		9

ECONOMICS AND BUSINESS: 9 CR.

ECON 1010	Principles of Microeconomics	3
Six credits from the following:		6
ACCT 2840	Financial Accounting	
ECON 1020	Principles of Macroeconomics	
ECON 2300	Farm Business Management	
ECON 2340	Small Business Management	
ECON 2350	Introduction to Agricultural Markets	
ECON 2360	Agricultural Selling	
ECON 3340	Entrepreneurship in Agriculture	
MGMT 3700	Managing Organizations	
MKT 3400	Principles of Marketing	

SEED SCIENCE: 16 CR.

AGRON 3170	Principles of Weed Science	3
AGRON 3380	Seed Science and Technology	3
AGRON 4210	Introduction to Plant Breeding	3
ENT 3760	Fundamentals of Entomology and Pest Management	3
PLP 4080	Principles of Plant Path	3
One of the following:		
AGRON 3110	Professional Internship in Agronomy (seed related)	1
AGRON 4910	Seed Science Internship Experience	1-2
HORT 3910	Horticultural Management Experience	1

HUMANITIES: 3 CR.

3 cr. from approved humanities list: <http://www.cals.iastate.edu/student-services/humanities> (<http://www.cals.iastate.edu/student-services/humanities/>)

SOCIAL SCIENCES: 3 CR.

3 cr. from approved social sciences list: <http://www.cals.iastate.edu/student-services/social-sciences> (<http://www.cals.iastate.edu/student-services/social-sciences/>)

ETHICS: 3 CR.

3 cr. from approved ethics list: <http://www.cals.iastate.edu/student-services/ethics> (<http://www.cals.iastate.edu/student-services/ethics/>)

REMAINING CREDITS (STUDENT CHOICE).

Because seed science is a secondary major, the courses taken by the student during the first year will vary, depending on the primary major (see typical program for the primary major).

Seed Technology and Business

(Interdepartmental Graduate Major)

The Graduate Program in Seed Technology and Business (STB) offers students advanced study in the seed science and technology and business management appropriate for application in the seed sector.

The STB program is focused on preparing students for seed-related management roles by training the next generation of seed leaders. The program is offered by departments in the Ivy Colleges of Business and Agriculture and Life Sciences: Accounting, Agronomy, Finance, Horticulture, Agricultural Biosystems Engineering, Management Information Systems, Management, Marketing and Plant Pathology.

This multidisciplinary program offers a focused online curriculum for a Master of Science in Seed Technology and Business, along with Graduate Certificates in Seed Science and Technology and in Seed Business Management.

ONLINE GRADUATE PROGRAM IN SEED TECHNOLOGY & BUSINESS

The curriculum offers a set of scientific and technical courses that are focused on seed, with a set of basic management courses, similar to those in the core courses of an MBA program. The business courses will use examples drawn from the seed industry. A creative component is required for the Master of Science degree.

Prerequisite for the program is a bachelor's degree in business, agriculture, other biological discipline, or related degrees. Graduate training in these disciplines will also be considered.

Graduates of the Graduate Program in Seed Technology and Business will be prepared for roles in management and leadership within private and public seed and seed-related organizations.

All of the courses listed below are required for the Master of Science degree. The pace of the course sequence is designed to allow the students with work and other commitments to participate. Students will complete the creative component under the guidance of their Program of Study Committee. In many cases, the creative component topic will be associated with the student's work.

Graduates of the Master of Science curriculum will be prepared for roles in management and leadership within seed related organizations, private and public.

Master of Science in Seed Technology and Business

STB 5010	Strategic Management	2
STB 5030	Information Systems	2
STB 5040	Marketing and Logistics	3
STB 5070	Organizational Behavior	2
STB 5080	Accounting and Finance	3
STB 5090	International Seed Business Practices, Policies, & Regulation	3
STB 5100	Crop Improvement	3
STB 5130	Data Science for Agricultural Professionals	3
STB 5340	Seed and Variety, Testing and Technology	2
STB 5350	Introduction to the Seed Industry	1
STB 5390	Seed Conditioning and Storage	2
STB 5430	Seed Physiology	2
STB 5470	Seed Production	2
STB 5920	Seed Health Management	2
STB 5950	Seed Quality, Production, and Research Management	2
STB 5990	Creative Component	2-3

The program also offers two graduate certificates:

Graduate certificate in Seed Science and Technology

STB/AGRON 5100	Crop Improvement	3
STB/AGRON 5130	Data Science for Agricultural Professionals	3
STB/AGRON 5340	Seed and Variety, Testing and Technology	2
STB 5350	Introduction to the Seed Industry	1
STB/AGRON 5390	Seed Conditioning and Storage	2
STB/HORT 5430	Seed Physiology	2
STB/AGRON 5470	Seed Production	2
STB/PLP 5920	Seed Health Management	2
STB/AGRON 5950	Seed Quality, Production, and Research Management	2

Graduate certificate in Seed Business Management

STB 5350	Introduction to the Seed Industry	1
STB/BUSAD 5010	Strategic Management	2
STB/BUSAD 5030	Information Systems	2
STB/BUSAD 5040	Marketing and Logistics	3
STB/BUSAD 5070	Organizational Behavior	2
STB/BUSAD 5080	Accounting and Finance	3
STB/BUSAD 5090	International Seed Business Practices, Policies, & Regulation	3

Graduate certificate courses may be applied to the Master of Science in Seed Technology and Business. Those interested in these graduate certificates should contact the Program for details.

Information on application procedures and specific requirements of the major can be obtained at our website: <http://www.seedgrad.iastate.edu> or by writing to seedgrad@iastate.edu ([//seedgrad@iastate.edu](mailto:seedgrad@iastate.edu)).

Courses primarily for graduate students, open to qualified undergraduates:

STB 5010: Strategic Management

(Cross-listed with BUSAD 5010).

Credits: 2. Contact Hours: Lecture 2.

Critical analysis of current practice and case studies in strategic management with an emphasis on integrative decision making. Strategy formulation and implementation will be investigated in the context of complex business environments.

STB 5030: Information Systems

(Cross-listed with BUSAD 5030).

Credits: 2. Contact Hours: Lecture 2.

Introduction to a broad variety of information systems (IS) topics, including current and emerging developments in information technology (IT), IT strategy in the context of corporate strategy, and IS planning and development of enterprise architectures. Cases, reading, and discussions highlight the techniques and tactics used by managers to cope with strategic issues within an increasingly technical and data-driven competitive environment.

STB 5040: Marketing and Logistics

(Cross-listed with BUSAD 5040).

Credits: 3. Contact Hours: Lecture 3.

Integration of the business functions concerned with the marketing and movement of goods along the supply chain with the primary goal of creating value for the ultimate customer. Coordination of marketing, production, and logistics activities within the firm and with outside suppliers and customers in the supply chain.

STB 5070: Organizational Behavior

(Cross-listed with BUSAD 5070).

Credits: 2. Contact Hours: Lecture 2.

Understanding human behavior in organizations, and the nature of organizations from a managerial perspective. Special emphasis on how individual differences, such as perceptions, personality, and motivation, influence individual and group behavior in organizations and on how behavior can be influenced by job design, leadership, groups, and the structure of organizations.

STB 5080: Accounting and Finance

(Cross-listed with BUSAD 5080).

Credits: 3. Contact Hours: Lecture 3.

Survey of fundamental topics in accounting and finance. Financial statement reporting and analysis for agriculture firms, corporate governance issues related to financial reporting, (e.g., Sarbanes-Oxley). Basic tools and techniques used in financial management, including stock and bond valuation. How to assess and use capital budgeting methods to evaluate proposed firm investments.

STB 5090: International Seed Business Practices, Policies, & Regulation

(Cross-listed with BUSAD 5090).

Credits: 3. Contact Hours: Lecture 3.

Cultural, financial, economic, political, legal/regulatory environments shaping an organization's international business strategy. Topics include entry (and repatriation) of people, firms, goods, services, and capital. Special attention to the institutions of seed regulation and policy. Ethical issues facing managers operating in an international context.

STB 5100: Crop Improvement

(Cross-listed with AGRON 5100).

Credits: 3. Contact Hours: Lecture 3.

A study of agriculture from its origins with the domestication of crop plants through basic genetics, demonstrating the challenges and elements of breeding strategies intended to manage gene x environmental interactions. Elements of biotechnology including use of molecular markers, development of genetically modified cultivars, gene mapping, cloning, and gene editing will be covered. Methods to measure the effectiveness of plant breeding (genetic gain) and the impact of improved agronomic practices contributing to increased agricultural productivity will be covered. Use of intellectual property protection, and the conservation and utilization of exotic genetic resources.

STB 5130: Data Science for Agricultural Professionals

(Cross-listed with AGRON 5130).

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 1810 or equivalent, MATH 1400, STAT 1040

Quantitative methods for analyzing and interpreting agronomic information. Principles of experimental design, hypothesis testing, analysis of variance, regression, correlation, and graphical representation of data. Use of SAS and Excel for organization, analyzing, and presenting data. (Typically Offered: Fall, Spring)

STB 5340: Seed and Variety, Testing and Technology

(Cross-listed with AGRON 5340).

Credits: 2. Contact Hours: Lecture 2.

The components of seed quality and how they are assessed in the laboratory, including traits derived from modern biotechnology. The impact of new technologies on seed quality testing. Variety maintenance procedures and breeder seed. Variety identification: phenotype and grow-out trials, isozyme testing, and DNA marker testing. Procedures for evaluating varieties. The variance tests appropriate for fixed effects analysis of variance. Statistical inference and stratification for yield trials. Use of strip plot testing.

STB 5350: Introduction to the Seed Industry

Credits: 1. Contact Hours: Lecture 1.

This introductory course is a quick overview of the academic program and the seed industry. It describes how the STB program components relate to the seed industry scope; the role of the seed industry in global agriculture and society; public and private institutions involved in seed research, development, and regulation; quality management for seed products. Current issues including industry consolidation, ethical and economic issues related to biotechnology, and incorporation of digital technology in the seed business will be discussed by course instructors and guest lecturers from the seed industry.

STB 5360: Quantitative Methods for Seed

(Cross-listed with AGRON 5360).

Credits: 2. Contact Hours: Lecture 2.

Quantitative Methods for analyzing and interpreting agronomic and business information for the seed industry. Principles of experimental design and hypothesis testing, regression, correlation, analysis of variance, and graphical representation of data. Use of spreadsheets and statistical software for manipulating, analyzing and presenting data. (Typically Offered: Fall)

STB 5390: Seed Conditioning and Storage

(Cross-listed with AGRON 5390).

Credits: 2. Contact Hours: Lecture 2.

The technical operations which may be carried out on a seed lot from harvest until it is ready for marketing and use. The opportunities for quality improvement and the risks of deterioration which are present during that time. Analysis of the costs of and benefits of operations. Evaluation of equipment based on benefits to the customer and producer. Interpretation of the role of the conditioning plant and store as a focal points within the overall operations of a seed company.

STB 5430: Seed Physiology

(Cross-listed with HORT 5430).

Credits: 2. Contact Hours: Lecture 2.

Brief introduction to plant physiology. Physiological aspects of seed development, maturation, longevity, dormancy and germination. Links between physiology and seed quality. Offered even-numbered years. (Typically Offered: Fall)

STB 5470: Seed Production

(Cross-listed with AGRON 5470).

Credits: 2. Contact Hours: Lecture 2.

Survey of crop production; including management of soil fertility, planting dates, populations, weed control, and insect control. Analysis of the principles of seed multiplication and the key practices which are used to ensure high quality in the products. Field inspection procedures and production aspects that differ from other crop production. Foundation seed production. Analysis of the typical organization of field production tasks. Survey of the differences in seed production strategies between crops and the impact of these differences on seed production.

STB 5900: Special Topics

Credits: 1-3. Repeatable.

Guided instruction and self-study on special topics relevant to seed technology and business. (Typically Offered: Fall, Spring, Summer)

STB 5920: Seed Health Management

(Cross-listed with PLP 5920).

Credits: 2. Contact Hours: Lecture 2.

Occurrence and management of diseases during seed production, harvest, conditioning, storage, and planting. Emphasis on epidemiology, disease management in the field, seed treatment, effects of conditioning on seed health, and seed health testing. Graduation Restriction: Credit may not be obtained for both PLP/STB 5920 and PLP 5940. Offered even-numbered years. (Typically Offered: Spring)

STB 5950: Seed Quality, Production, and Research Management

(Cross-listed with AGRON 5950).

Credits: 2. Contact Hours: Lecture 2.

Advanced survey of the organization, staff capabilities and management characteristics typical in seed production and crop improvement in seed enterprises. Analysis of the use of quality information in the management of seed operations and sales. Process management applications for seed. Production planning for existing capacity. Analysis of the manager's tasks in the annual cycle and how the tasks of these managers relate to the general categories of business management roles. Difference in management strategies used with different situations and groups of employees.

STB 5990: Creative Component

Credits: 1-3. Repeatable.

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

Sustainability Minor

OVERVIEW OF THE MINOR IN SUSTAINABILITY

Sustainability is often defined as "meeting the needs of today without compromising the ability of future generations to meet their own needs." The minor in sustainability at Iowa State University is available to any ISU student who wants to further learn about sustainability issues affecting humans today and in the future.

The interdisciplinary minor in sustainability exposes students to ideas and issues related to a sustainable, balanced and ethical future for the planet and its inhabitants. The minor is at the interplay between environmental, social and economic factors in improving the quality of human life within the capacity of supporting ecosystems.

The minor will help students understand the dynamics of biological population growth and decline in the natural world, predator-prey models, over-exploitation of natural resources, energy balances, and much more. Students also will study how human behavior affects the natural world and the ability of earth to sustain life and understand how the

decisions they make as consumers, workers, resource owners, citizens and policymakers affect human welfare in this and future generations.

Student Learning Outcomes

As a result of their coursework for the sustainability program students will be able to:

- Articulate why some environmental, social and economic profiles are sustainable and others are not.
- Apply sustainable practices in their personal and professional lives.

The colleges of Agriculture and Life Sciences, Design, Engineering, and Liberal Arts and Sciences sponsor the minor in sustainability.

REQUIREMENTS FOR THE MINOR IN SUSTAINABILITY

The minor in sustainability may be earned by completing a total of 15 credits including two required courses and nine elective credits from an approved list. Of the nine elective credits, at least six credits must be at the 3000 level or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Required courses:

MATE 2200	Globalization and Sustainability	3
ANTHR 2300	Globalization and the Human Condition	3

Emphasis Electives:

ABE 3250	Biorenewable Systems	3
ABE 3800	Principles of Biological Systems Engineering	3
EE 3880	Sustainable Engineering and International Development	3
ABE 4800	Engineering Analysis of Biological Systems	3
AGRON 1200	Introduction to Renewable Resources	3
AGRON 1600	Water Resources of the World	3
AGRON 3420	World Food Issues: Past and Present	3
AGRON 4040	Global Change	3
AGRON 4500	Issues in Sustainable Agriculture	3
ANTHR 3360	Culture and Capitalism	3
ARCH 3450	Building Science and Technology I	2
ARCH 3460	Building Science and Technology II	3
ARCH 3460L	Building Science and Technology II Lab	2
ARCH 3470	Building Science and Technology III	3
ARCH 3470L	Building Science and Technology III Lab	2
ARCH 3480	Building Science and Technology IV	3
ARCH 3480L	Building Science and Technology IV Lab	2
ARCH 4450	Building Science and Technology V	2

ARCH 5580	Sustainability and Green Architecture	3
ARCH 5750	Contemporary Urban Design Theory	3
ARCH 5970	Seminar on the Built Environment III: Theory	3
ARTIS 4600	Sustainable Design and Fabrication of Furniture	3
ARTIS 4650	Artists, Designers and Sustainable Development	3
ARTIS 4660	Studio Abroad: Africa	3
BIOL 2040	Biodiversity	2
BIOL 3190	Analysis of Environmental Systems	3
BIOL 3550	Plants and People	3
BIOL 4710	Introductory Conservation Biology	3
BIOL 4840	Ecosystem Ecology	3
CE 3880	Sustainable Engineering and International Development	3
CRP 2010	The North American Metropolis	3
CRP 2910	World Cities and Globalization	3
CRP 2930	Environmental Planning	3
CRP 3200	Urban Geography	3
CRP 4170	Urban Revitalization	3
CRP 4290	Planning in Developing Countries	3
CRP 4450	Transportation Policy and Planning	3
CRP 4840	Sustainable Communities	3
CRP 4910	Environmental Law and Planning	3
ECON 3800	Energy, Environmental and Resource Economics	3
ECON 3850	Economic Development	3
ECON 4800	Intermediate Environmental and Resource Economics	3
EE 3880	Sustainable Engineering and International Development	3
ENGL 3550	Literature and the Environment	3
ENGL 2010	Introduction to Literature	3
ENSCI 3190	Analysis of Environmental Systems	3
ENSCI 4020	Watershed Hydrology	3
ENSCI 4040	Global Change	3
ENSCI 4800	Engineering Analysis of Biological Systems	3
ENSCI 4840	Ecosystem Ecology	3
ENT 4710	Insect Ecology	3
ENVS 1010	Environmental Geology: Earth in Crisis	3
ENVS 1080	Introduction to Oceanography	3
ENVS 1200	Introduction to Renewable Resources	3
ENVS 1600	Water Resources of the World	3
ENVS 2010	Introduction to Environmental Issues	2
ENVS 2040	Biodiversity	2

ENVS 2700	Foundations in Natural Resource Policy and History	3
ENVS 2930	Environmental Planning	3
ENVS 3190	Analysis of Environmental Systems	3
ENVS 3240	Energy and the Environment	3
ENVS 3340	Environmental Ethics	3
ENVS 3420	World Food Issues: Past and Present	3
ENVS 3450	Population and Society	3
ENVS 3550	Literature and the Environment	3
ENVS 3800	Energy, Environmental and Resource Economics	3
ENVS 3820	Environmental Sociology	3
ENVS 4040	Global Change	3
ENVS 4240	Sustainable and Environmental Horticulture Systems	3
ENVS 4500	Issues in Sustainable Agriculture	3
ENVS 4840	Sustainable Communities	3
ENVS 4910	Environmental Law and Planning	3
FOR 4520	Ecosystem Management: Integrating Ecology, Society, and Policy	3
FSHN 2420	The US Food System	3
FSHN 3420	World Food Issues: Past and Present	3
FSHN 4600	Global Nutrition, Health and Sustainability	3
GEOL 1010	Environmental Geology: Earth in Crisis	3
GEOL 1080	Introduction to Oceanography	3
GEOL 1600	Water Resources of the World	3
GEOL 3240	Energy and the Environment	3
GEOL 4020	Watershed Hydrology	3

SOC 3820	Environmental Sociology	3
SOC 4110	Social Change in Developing Countries	3
SUSE 5010	Sustainable Design in Communities	5
SUSE 5110	Sustainable Design Colloquium I	3
SUSE 5210	Foundation of Sustainable Design	3
SUSE 5310	Human Dimensions of Sustainability	3
SUSE 5400	Methods for Sustainable Design	3
SUSE 5500	Making Resilient Environments	3
TSM 3240	Soil and Water Conservation Management	3
TSM 3250	Biorenewable Systems	3
WLC 4840	Technology, Globalization and Culture	3

Toxicology

toxmajor@iastate.edu ([//toxmajor@iastate.edu](http://toxmajor@iastate.edu))

Interdepartmental Graduate Major

Toxicology is the science of studying the adverse effects of substances on living organisms. Students observe, gather data and predict risks and outcomes in populations. Whole organism research and cellular and molecular approaches are used to determine toxicant exposure and mechanisms. Work is offered for the degrees doctor of philosophy and master of science. Students majoring in toxicology will be affiliated with one of the following cooperating departments: Agricultural and Biosystems Engineering; Animal Science; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemistry; Entomology; Food Science and Human Nutrition; Genetics, Development and Cell Biology; Geological and Atmospheric Sciences; Natural Resource Ecology and Management; Physics; Plant Pathology and Microbiology; Veterinary Diagnostic and Production Animal Medicine; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

The prerequisites for entrance into the graduate toxicology major include an undergraduate degree in a relevant area of study; for example, chemical engineering, biology, biochemistry, chemistry, ecology, entomology, food science and technology, microbiology, nutritional science, zoology, or veterinary medicine. Minimum undergraduate coursework should include the following or their equivalent:

- 1 year of college mathematics, including calculus
- 1 year of inorganic chemistry with quantitative analysis
- 1 course in physics
- 1 year of organic chemistry
- 2 years of biological sciences including 1 course in physiology

Other courses that are considered desirable in undergraduate preparation include: biochemistry, physical chemistry, qualitative analysis, and some specialized courses such as histology or advanced physiology.

Facilities and faculty are available for fundamental research in such areas as agricultural toxicology, drug discovery and prevention, ecotoxicology, environmental fate and effects of chemicals, insect toxicology, aquatic toxicology, food safety, nutritional toxicology, mycotoxins, neurotoxicology, cellular and molecular toxicology, reproductive toxicology, and veterinary toxicology.

Ph.D. and M.S. Students should register for TOX 6890 (R) every fall and spring semester during their training.

Curriculum

Students majoring in toxicology will be affiliated with a cooperating department. All Ph.D. students take a core curriculum consisting of:

TOX 5010	Principles of Toxicology	3
TOX 5020	Toxicology Methods	3
TOX 5040	Toxicology Seminar (taken twice)	1
7 additional credits in approved toxicology courses		7
BBMB 4050	Biochemistry II (2 additional credits of biochemistry courses)	
BBMB 4040	Biochemistry I	
2 additional credits of upper level BBMB coursework. 3 credits in physiology, histology, pathology, neuroscience, immunobiology or cellular and molecular biology.		2 and 3
STAT 5710	Introduction to Experimental Design	3
STAT 5870	Statistical Methods for Research Workers	4
GRST 5650	Responsible Conduct of Research in Science and Engineering (or)	1
VPTH 5540	Ethics in Scientific Research and Writing	1

M.S. students take a core of:

TOX 5010	Principles of Toxicology	3
TOX 5020	Toxicology Methods	3
TOX 5040	Toxicology Seminar	1
3 additional credits in approved toxicology courses		3
BBMB 4040	Biochemistry I	3
BBMB 4050	Biochemistry II	3
STAT 5870	Statistical Methods for Research Workers	4
Additional coursework is selected to meet departmental requirements and to satisfy individual student research interests		
GRST 5650	Responsible Conduct of Research in Science and Engineering (or)	1
VPTH 5540	Ethics in Scientific Research and Writing	1

A graduate minor in toxicology is available for students enrolled in other majors.

A minor for an M.S. degree includes one semester of TOX 6890 and:

TOX 5040	Toxicology Seminar	1
TOX 5010	Principles of Toxicology	3
3 credits in other approved toxicology courses		3

A minor at the Ph.D. level includes one semester of TOX 6890 and:

TOX 5040	Toxicology Seminar	1
TOX 5010	Principles of Toxicology	3
6 credits in other approved toxicology course work		6

One member of the student’s program of study committee will be a member of the toxicology faculty.

Most students awarded doctoral degrees continue their training as postdoctoral associates at major research institutions in the U.S. or abroad in preparation for research and/or teaching positions in academia, industry, the military, veterinary research, or government environmental and public health institutions. A few go directly to permanent research positions in industry. Many students awarded master’s degrees continue their training as doctoral students; however, some choose research support positions (i.e., technician, chemist, research associate) in academia, industry, or government. A more thorough list of outcomes is available at our Web site.

Graduates of the Toxicology major will be able to carefully design, execute and analyze experiments that extend the knowledge of toxicology and closely related sciences. They will be able to clearly communicate research findings, and thoroughly evaluate the literature of toxicology, contributing significantly to the advancement of the field.

Courses primarily for undergraduates:

TOX 4010: Principles of Toxicology

(Dual-listed with TOX 5010).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BBMB 4040

Principles of toxicology governing entry, fate, and effects of toxicants on living systems. Includes toxicokinetics and foreign compound metabolism relative to toxification or detoxification. Fundamentals of foreign compound effects on metabolism, physiology, and morphology of different cell types, tissues, and organ systems. (Typically Offered: Fall)

TOX 4190: Foodborne Hazards

(Cross-listed with MICRO 4190/ FSHN 4190).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 2010 or MICRO 3020; 3 credits in BBMB

Pathogenesis of human microbiological foodborne infections and intoxications, principles of toxicology, major classes of toxicants in the food supply, governmental regulation of foodborne hazards. Assessed service-learning component. Offered even-numbered years. Graduation Restriction: Only one of FSHN 4190 and FSHN 5190 may count toward graduation. (Typically Offered: Spring)

TOX 4200: Food Microbiology

(Cross-listed with MICRO 4200/ FSHN 4200).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 2010 or MICRO 3020

Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications. (Typically Offered: Fall)

TOX 4260: Veterinary Toxicology

(Dual-listed with VDPAM 5260/ TOX 5260). (Cross-listed with VDPAM 4260).

Credits: 3. Contact Hours: Lecture 3.

Study of toxicological diseases of animals emphasizing clinical recognition, circumstances of poisoning, differential diagnosis with clinical and laboratory data, therapeutic procedures, preventive management and public health implications. Supplemented with case-based materials. (Typically Offered: Spring)

TOX 4500: Pesticides in the Environment

(Dual-listed with ENT 5500/ TOX 5500). (Cross-listed with ENT 4500).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 credits of BIOL or Permission of Instructor

Fate and significance of pesticides in soil, water, plants, animals, and the atmosphere. (Typically Offered: Spring)

TOX 4900: Independent Study

Credits: 1-2. Repeatable.

Prereq: Instructor Permission for Course

Independent study with a faculty mentor. Intended for students enrolled in the Pharmacology and Toxicology minor. Graduation Restriction: Students in the Pharmacology and Toxicology minor may use no more than 9 credits of university-wide 4900 credits towards the total of 120 credits required for graduation. (Typically Offered: Fall, Spring, Summer)

TOX 4990: Undergraduate Research

Credits: 1-3. Repeatable, maximum of 3 credits.

Prereq: Instructor Permission for Course

Independent research under faculty guidance. Intended for students enrolled in the Pharmacology and Toxicology minor. Graduation Restriction: Students may use no more than 9 credits of university-wide 4990 credits towards the total of 120 credits required for graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

TOX 5010: Principles of Toxicology

(Dual-listed with TOX 4010).

Credits: 3. Contact Hours: Lecture 3.

Principles of toxicology governing entry, fate, and effects of toxicants on living systems. Includes toxicokinetics and foreign compound metabolism relative to toxification or detoxification. Fundamentals of foreign compound effects on metabolism, physiology, and morphology of different cell types, tissues, and organ systems. (Typically Offered: Fall)

TOX 5020: Toxicology Methods

Credits: 3.

Provides demonstrations or laboratory experience in the application of methods used in toxicology, including safety procedures, calculation and data analysis, teratologic and morphologic evaluation, cellular/molecular toxicological techniques, electrophysiologic measures, in vitro enzyme induction/biotransformation, neural and behavioral toxicology testing. Offered even-numbered years. (Typically Offered: Spring)

TOX 5040: Toxicology Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 2 credits.

Presentation of a seminar about a current topic in toxicology as part of a weekly series of seminars by graduate students, faculty, and guest lecturers from off campus. Graduate student speakers will meet with the instructor at least one week prior to their formal presentation. (Typically Offered: Fall, Spring, Summer)

TOX 5150: Regulatory Toxicology

Credits: 2. Contact Hours: Lecture 2.

A survey course on risk analysis approaches used by toxicologists and other life and social scientists in government, industry and non-governmental organizations to inform regulatory policies and decisions under U.S. Federal statutes, including the Federal Food Drug and Cosmetic Act; the Food Quality Protection Act; the Federal Fungicide, Insecticide and Rodenticide Act; the Endangered Species Act; the Plant Protection Act; the National Environmental Policy Act; and the Toxic Substances Control Act. Topics covered include an overview of the roles and responsibilities of different U.S. Government Departments and Agencies in analyzing human; livestock and companion animal; and/or environmental risks and benefits of food products and food additives, cosmetics, drugs, pesticides, and consumer and industrial products. Offered odd-numbered years. (Typically Offered: Fall)

TOX 5260: Veterinary Toxicology

(Dual-listed with VDPAM 4260/ TOX 4260). (Cross-listed with VDPAM 5260).

Credits: 3. Contact Hours: Lecture 3.

Study of toxicological diseases of animals emphasizing clinical recognition, circumstances of poisoning, differential diagnosis with clinical and laboratory data, therapeutic procedures, preventive management and public health implications. Supplemented with case-based materials. (Typically Offered: Spring)

TOX 5290: Foodborne Toxicants

(Cross-listed with FSHN 5290).

Credits: 2. Contact Hours: Lecture 2.

Mechanisms of action, metabolism, sources, remediation/detoxification, risk assessment of major foodborne toxicants of current interest, design of HACCP plans for use in food industries targeting foodborne toxicants, discussion of toxicants from a food defense perspective. Offered online only. (Typically Offered: Fall, Spring, Summer)

TOX 5440: Aquatic Toxicology

Credits: 2. Contact Hours: Lecture 1, Discussion 1.

An overview of interactions between anthropogenic chemicals and aquatic ecosystems. Topics include history of aquatic toxicology, methods of toxicity testing, and species responses to toxicants. Emphasis is on aquatic pollutants of emerging concern (e.g., nanoparticles, microplastics). Offered odd-numbered years. (Typically Offered: Spring)

TOX 5460: Clinical and Diagnostic Toxicology

(Cross-listed with VDPAM 5460).

Credits: 1-3. Contact Hours: Laboratory 3.

Repeatable.

Advanced study of current problems and issues in veterinary toxicology. Emphasis on problem solving and interpreting clinical cases while utilizing clinical, epidemiological, and laboratory resources. Course consists highly of clinical case based material. (Typically Offered: Fall, Spring, Summer)

TOX 5500: Pesticides in the Environment

(Dual-listed with ENT 4500/ TOX 4500). (Cross-listed with ENT 5500).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 9 credits in BIOL or Graduate Classification

Fate and significance of pesticides in soil, water, plants, animals, and the atmosphere. (Typically Offered: Spring)

TOX 5540: General Pharmacology

(Cross-listed with BMS 5540).

Credits: 3. Contact Hours: Lecture 3.

General principles; drug disposition; drugs acting on the nervous, cardiovascular, renal, gastrointestinal, and endocrine systems. (Typically Offered: Spring)

TOX 5650: Methods in Biostatistics and Epidemiology

(Cross-listed with STAT 5650).

Credits: 3. Contact Hours: Lecture 3.

Statistical methods commonly used in epidemiology and human and animal health studies. Overview of cohort studies, case-control studies and randomized clinical trials. Topics include inference procedures for disease risk factors, analysis of time-to-event and survival data, analysis of longitudinal studies of disease progression and health status, diagnostic test evaluation, and meta-analysis. Examples will come from recent studies of physical and mental health, nutrition and disease progression in human and animal populations. Use of statistical software: SAS or R. Offered even-numbered years. (Typically Offered: Fall)

TOX 5690: Reproductive and Developmental Toxicology

(Cross-listed with ANS 5690).

Credits: 2. Contact Hours: Lecture 2.

Chemical agents that target developmental and reproductive systems in animals and humans, both male and female. The influence that timeline of developmental in utero and what part of reproductive organ have on outcome of environmental exposures will be developed. The physiological changes due to exposure, and mechanistic pathways activated by xenobiotics will be defined and the consequences of these changes will be explored. Offered even-numbered years. (Typically Offered: Fall)

TOX 5700: Risk Assessment for Food, Agriculture and Veterinary Medicine

(Cross-listed with AGRON 5700/ VDPAM 5700).

Credits: 3. Contact Hours: Lecture 3.

Risk assessment principles as applied to biological systems. Exposure and effects characterization in human and animal health and ecological risk assessment. Risk analysis frameworks and regulatory decision-making. Introduction to quantitative methods for risk assessment using epidemiological and distributional analysis. Uncertainty analysis. Offered odd-numbered years. (Typically Offered: Fall)

TOX 5750: Cell Biology

(Cross-listed with BMS 5750).

Credits: 3. Contact Hours: Lecture 3.

A multi-instructor course covering major topics in cell structure and function, including: universal features of prokaryotic and eukaryotic cells, types of utilization and conversion of energy, genetic control of cell shape and functionality, internal organization of cells, communication between cells and their environment, development of multicellular systems. Students have to write a term paper. (Typically Offered: Fall)

TOX 5900: Special Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Contact individual faculty for special projects or topics. Graded.

Courses for graduate students:**TOX 6260: Advanced Food Microbiology**

(Cross-listed with MICRO 6260/ FSHN 6260).

Credits: 3. Contact Hours: Lecture 3.

Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and mode of action of antimicrobials. Offered odd-numbered years. (Typically Offered: Spring)

TOX 6270: Rapid Methods in Food Microbiology

(Cross-listed with MICRO 6270/ FSHN 6270).

Credits: 2. Contact Hours: Lecture 2.

Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.), existing commercial test formats and kits, automation in testing, sample preparation and 'next generation' testing formats now in development. (Typically Offered: Fall, Spring, Summer)

TOX 6560: Cellular and Molecular Pathology II

(Cross-listed with VPTH 6560).

Credits: 3. Contact Hours: Lecture 3.

Cellular and molecular mechanisms of carcinogenesis. Offered even-numbered years. (Typically Offered: Spring)

TOX 6750: Insecticide Toxicology

(Cross-listed with ENT 6750).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: ENT 5550 or TOX 5010 or Graduate Classification

Principles of insecticide toxicology; classification, mode of action, metabolism, and environmental effects of insecticides. Offered even-numbered years. (Typically Offered: Fall)

TOX 6890: Current Topics in Toxicology

Credits: Required. Contact Hours: Lecture 1.

Repeatable.

Lecture and discussion participation on current topics in toxicology.

An 80% attendance is expected to satisfactorily complete the course.

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

TOX 6970: Graduate Research Rotation

Credits: 1-12. Contact Hours: Laboratory 12.

Repeatable, maximum of 12 credits.

Graduate research projects performed under the supervision of selected faculty members in the graduate Toxicology major. (Typically Offered: Fall, Spring, Summer)

TOX 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Research. (Typically Offered: Fall, Spring, Summer)

Courses primarily for professional curriculum students:**TOX 7354: General Pharmacology**

(Cross-listed with BMS 7354).

Credits: 3. Contact Hours: Lecture 3.

General principles; drug disposition; drugs acting on the nervous, cardiovascular, renal, gastrointestinal, and endocrine systems. (Typically Offered: Spring)

Transportation

Interdepartmental Graduate Major

The Master of Science in transportation offers opportunities for research in such areas as modeling and performance of transportation systems, highway safety and information systems, remote sensing, environmental analysis, techniques for urban and regional transportation system planning, environmental and social policy analysis of transportation systems, transportation policy analysis, analysis of transportation

technologies, commodity distribution, public administration of the transportation planning process, regional development and transportation system interrelationships, transportation economics and finance, and planning for logistics management.

Students majoring in transportation will develop a program of study under the guidance of a program of study committee selected by the student in consultation with and approved by the chair of the faculty supervisory committee. The student's home department will be the major professor's primary department.

A student must complete at least 34 credits of acceptable work including preparation of a 6 credit thesis or a 2-3 credit creative component. A structured minor requires 12 credits of approved transportation courses and a thesis or creative component on a transportation related topic.

A required core includes:

CE 5510	Urban Transportation Planning Models	3
CE 6910	Seminar in Transportation Planning	1
STAT 5870	Statistical Methods for Research Workers	4

Detailed requirements are available from the chair of the supervisory committee.

Graduate students pursuing a major in transportation are encouraged to consider a formal declared minor in transportation. Students considering a declared minor should consult with the chair of the supervisory committee about the requirements for it.

Students typically focus their program of study to support a career in one of five areas: transportation consulting, regional and statewide transportation planning, transportation service operations and management, transportation policy and economic analysis, and transportation planning and operation for local and state governments. Graduates will have specific knowledge in one or more of these focus areas and the skills to conduct research and analysis of transportation issues. These skills allow graduates to be productive immediately in positions related to a focus area or to continue in more advanced transportation graduate work.

Wind Energy Science, Engineering and Policy

Graduate Study

Wind Energy Science, Engineering and Policy (WESEP) is an interdisciplinary Ph.D. program that prepares graduates for wind energy related careers in industry, academia, and government institutions. WESEP is a unique integration of engineering, science, and policy-related

disciplines that provides students with an opportunity for breadth and depth in their program of study.

Students take a set of 11 courses and participate each semester in a one-credit seminar course. Of the 11 courses, two courses are introductory wind energy courses, eight are core courses, and one is an advanced specialization course in wind energy. The seminar course will address research methods and communications in science and engineering. Students are also required to pass a qualifying examination in the first 18 months of their program, a preliminary oral examination generally taken by the end of year three, and a final oral defense with written dissertation to complete the program.

Of the eight core courses, students select five courses from a primary thrust area, providing disciplinary depth, and three courses from a secondary thrust area, providing interdisciplinary breadth. Students can take additional courses within the other thrust areas as needed for their research, but this requirement ensures students are research-capable in two thrust areas.

WESEP Thrust areas

- Wind resource characterization and aerodynamics of wind farms
- Wind energy conversion system and grid operations
- Manufacturing, construction, and supply chain
- Turbine reliability & health monitoring
- Economics, policy and public perception

Admission Requirements

Applicants should have an undergraduate GPA of at least 3.0 (B average) and a B.S. degree from a calculus-based undergraduate curriculum. A calculus-based undergraduate curriculum is one in which students take the equivalent of two years of calculus, covering differential and integral calculus, multivariable and vector calculus, and differential equations, and one year of physics, covering mechanics, thermodynamics, electric circuits, electromagnetics, and optics. The GRE is not required. Applicants who do not meet these general standards will be evaluated on an individual basis.

GRADUATE COLLEGE

www.grad-college.iastate.edu/ (<http://www.grad-college.iastate.edu/>)

William R. Graves, Dean

Elena Cotos, Associate Dean of Professional Development

Heather Greenlee, Associate Dean of Student & Scholar Success

Michelle Soupir, Associate Dean of Operations

The Graduate College and graduate faculty at Iowa State University are responsible for the quality of graduate education, for administering students' graduate programs, and for promoting research support from various governmental, industrial, and private agencies.

The graduate faculty in various programs handle admission and classification of graduate students, establish requirements for advanced degrees, and have charge of instruction and research at the graduate level. Graduate faculty members also teach graduate courses, serve on program of study (POS) committees, and direct work of master's and doctoral students. All graduate courses offered for major or nonmajor credit are taught by graduate faculty members or graduate lecturers.

Graduate study was offered soon after the university was founded, and the first graduate degree was conferred in 1877. Experimentation and research also started early, first in agriculture and shortly thereafter in home economics, engineering, science, and veterinary medicine. In 1913, the graduate faculty was organized formally and an executive graduate committee was appointed. In 1915, the graduate faculty held its first meeting, and in 1916, it granted the first doctor of philosophy degree.

Graduate education is vital to the quality of university teaching. The creative efforts of graduate faculty members and graduate students result in knowledge necessary to help society solve problems in educational, scientific, technological, and socio-economic areas. The Graduate College encourages educational exchange and contact with undergraduate areas of the university to promote improved teaching on both the undergraduate and graduate levels. A part of this exchange is accomplished by the publication of books and technical articles which are made possible by graduate research.

The degrees Master of Arts, Master of Science, and Doctor of Philosophy are research oriented. In many fields master's degrees are also awarded without a thesis, but a written report of independent study, called a creative component, is generally required. Coursework only degrees are available for those individuals interested in advanced study directed toward meeting vocational or professional objectives. Information on other types of master's degrees can be found in the Graduate College Handbook, Appendix E (<https://www.grad-college.iastate.edu/handbook/appendix.php?id=E>).

The Graduate College Handbook (<https://www.grad-college.iastate.edu/handbook/>) lists policies and procedures of the Graduate College.

Graduate Appointments

Graduate assistantships, fellowships, and research grants have been established at Iowa State University to encourage graduate work and to promote research. Such appointments and research opportunities are available through the various departments of instruction and the research centers on campus.

Graduate assistantships, the most common form of graduate student support, are available in three categories: the research assistantship, the teaching assistantship, or the administrative assistantship. A half-time graduate assistantship (20 hours per week) permits the holder to enroll for a maximum of 12 semester credits. Recipients of these assistantships are assessed fees at full Iowa resident rates regardless of the number of credits for which they register. These students may also be eligible for tuition scholarship awards (50% of in-state tuition for most master's students and 100% of in-state tuition for most Ph.D. students and certain terminal master's students). Students who are graduates of a regionally accredited college or university in the United States or of a recognized institution in another country whose requirements for the bachelor's degree are substantially equivalent to those of Iowa State University, and who present the requisite undergraduate or graduate preparation, may apply for these appointments.

Starting in Fall 2024, master's scholarship awards are:

- 75% of full-time tuition per semester for each student on an assistantship appointment of 1/2-time or more or
- 37.5% of full-time tuition per semester for each student on assistantship appointment of 1/4-time or more, but less than 1/2-time.

For fall and spring semesters, a student must be on appointment for at least three months to qualify for a tuition scholarship. For summer session, a student must be on appointment for at least four weeks during the term to qualify for a tuition scholarship. For all terms, appointments must have been processed by the Graduate College before the end of the first full month of classes (i.e., usually around the fifth week of the fall or spring semesters). Graduate tuition scholarships not used by the due date of the second fee payment installment will be forfeited. Students who will not be on appointment for the summer session may still be eligible for the resident (GA) tuition rate. This tuition rate is restricted to a summer session following a nine-month appointment. No action is required to receive the resident tuition rate in the summer for students who held assistantships the prior fall and spring terms.

Students placed on academic probation are eligible for assistantship appointment only on a term-by-term basis and need special permission

to be approved for tuition scholarships. Students admitted as nondegree students are not eligible for assistantship appointments. Further information may be obtained by contacting the appropriate graduate program.

The satisfactory completion of one appointment, plus satisfactory academic performance, will ordinarily make a student eligible for reappointment. After a period of three years of full-time study for the master's degree or five years for the doctorate, the student will not normally be continued on assistantship support (shorter periods may be stipulated by the student's program or department).

Postdoctoral Study

Opportunities are provided for postdoctoral study through the extensive research programs of the university. Inquiries should be directed to the appropriate program, institute, or to the Postdoctoral Scholar Coordinator in the Graduate College.

Graduate Study by Staff Members

Any full-time member of the research, instructional, or extension staff at the rank of instructor, research associate, or assistant scientist may carry up to six course credits per semester and three credits per summer session, subject to the approval of the head of the program or section and provided it does not interfere with other duties. This privilege may be extended to members of the research, instructional, or extension staffs at the rank of assistant professor with approval of the college dean and the Dean of the Graduate College. Staff members at the rank of professor or associate professor cannot become candidates for graduate degrees from ISU.

Distance Education

Iowa State offers many graduate degree and certificate programs off-campus. For a listing of the degree programs, registrations for courses, and more information about distance education, consult the Iowa State University Web site at <https://iowastateonline.iastate.edu/>.

Other information about graduate requirements is available in the Graduate College Handbook at <https://www.grad-college.iastate.edu/handbook/>.

Graduate Courses Taken by Undergraduates

Courses at the 400 and 500 levels listed in the ISU Catalog may be used in the plan of study even though they were taken by the student as an undergraduate at ISU.

- Up to 9 credits earned as an ISU undergraduate may be used to meet the requirements of the graduate degree.

- These credits must be approved by the student's Program of Study Committee and DOGE.
- Up to 6 of these credits may be at the 400 level.
- Up to 6 of these credits could have been used to meet the undergraduate degree requirements.
- Grades of B or better are required in the courses that led to these credits.
- These credits must have been earned when the student was classified as an undergraduate, not as a nondegree undergraduate (special) student.

Graduate programs may accept 300-level courses taken by the student as an undergraduate at ISU to meet background deficiencies or to demonstrate proficiencies in subject matter necessary for the degree. These courses are not eligible for inclusion on the POSC form but may be articulated for transfer internally. The student would be required to meet the minimum number of credits required for the degree without the inclusion of these undergraduate-level courses.

Courses Taken as a Nondegree Undergraduate Student

A person classified as a "nondegree undergraduate" student may not use courses taken under that status in a graduate degree program. A student who has received the baccalaureate degree must register as a graduate student if they are to receive graduate credit for courses.

Graduate Majors

A complete list of all graduate majors can be found on the Graduate College website, <https://www.grad-college.iastate.edu/academics/programs/apprograms.php>, with links to admission requirements and program websites.

The Graduate College oversees the admission of students to pursue a graduate degree or credential or to take graduate courses in nondegree student status. The Office of Admissions and the various graduate programs partner with the Graduate College to sustain an admissions process that respects institutional standards and the diverse needs of faculty and students across all realms of advanced study and scholarship. The Graduate College sets baseline admission requirements for the university and makes admission decisions. Graduate programs share specific admissions requirements to prospective students via their websites and the Graduate College Program Pages (<https://www.grad-college.iastate.edu/academics/programs/apprograms.php>).

Application process

All application materials for graduate study are submitted via the online application.

The Graduate College establishes dates to open and close applications for particular academic terms. Graduate programs may establish deadlines earlier than the date on which the application closes by which applicants must submit all required materials to be considered for admission.

Departments and programs convey recommendations concerning admission to the Graduate College. Final decisions regarding admission rest with the Dean of the Graduate College. The Graduate College, or the Office of Admissions acting on behalf of the Graduate College, will seek to ensure the authenticity of application materials. Graduate programs are expected to uphold ethical practices as they evaluate applicants by using principles of holistic review. Official letters to applicants to report the outcomes of their applications are sent from the Dean of the Graduate College.

Application requirements

Required Application Documents

1. Online graduate application
2. Unofficial transcripts from all previously attended institutions for undergraduate and post-baccalaureate study.
 - a. Official transcripts are only required from applicants admitted to the Graduate College. Electronic copies provided by the applicant are not considered official.
3. Applicants whose first language is not English must submit a valid, official test report from the Test of English as a Foreign Language (TOEFL) or from an approved alternative examination. Applicants who otherwise will need to submit scores are exempt if they hold baccalaureate or higher degrees from countries where the only official language is English.
4. A statement of purpose for each major to which the applicant is applying.
5. Additional documents such as letters of recommendation, résumé/ curriculum vitae (CV), statement of purpose, writing samples, publications, portfolio, etc. may be required by programs.

Admission standards and requirements

A baccalaureate degree, or equivalent from a suitably accredited college or university is required. Evidence of a conferred baccalaureate is needed by the start of the second semester of graduate study. Any exceptions to this admission standard must be approved by the Dean of the Graduate College.

A cumulative grade point average of 3.00 on a 4.00 scale, or equivalent, in undergraduate work or in previous graduate work is expected. Recommendations from graduate programs to admit applicants who do not meet this standard will be reviewed by the Graduate College. The GPA may also be met through one of the following:

- Undergraduate degree with GPA greater than 3.00 (on a 4.00 scale)
- Completed 9 to 14 credits of graduate coursework with grade B or better in all courses.
- Completed 15 or more credits of graduate coursework with GPA above 3.00 and no F grades.

Minimum scores for tests of English are shown below. Graduate programs may set higher minima for applicants to their programs.

Students whose first language is English or those who earned degree from countries where the only official language is English (<https://secure.grad-college.iastate.edu/tools/graduate/international-scores/Graduate%20English%20Information.pdf>) are exempt from the language proficiency requirements.

Applicants whose native language is not English must demonstrate proficiency in English equivalent to a Test of English as a Foreign Language (TOEFL) score of at least 550 on the paper-based test, or 79 on the internet-based test as a part of the admissions process. International students may also submit IELTS (International English Language Testing System) scores in lieu of the TOEFL. The ISU Graduate College minimum is 6.5. PTE scores of at least 53 and Duolingo scores of at least 105 are also acceptable for meeting the English requirement for admission, but not for meeting the Graduate College English requirement. Duolingo is approved for admission through Spring 2025.

Special applicants

Non-degree seeking - Nondegree seeking graduate students are those who are not seeking a graduate degree. There is a limit of nine credits taken in this status that may be used to satisfy graduate degree requirements. Non-degree seeking students are not eligible for financial aid.

Undeclared - Undeclared graduate students are those who meet the Graduate College minimum requirements for admission but have not been admitted to a degree-seeking program. There is a limit to the number of courses taken in this status that may be used to satisfy degree requirements. Admission as an undeclared graduate student can only be recommended by the program if the applicant is not accepted for degree-seeking admission to that major. [effective fall 2024]

Re-admission - Previous applicants to the Graduate College who did not enroll within one academic year of admission must submit a new application and pay the required fee because the prior application is no longer valid.

Re-entry - Applicants who previously were active students within the Graduate College, have not registered for four or more consecutive fall and spring semesters, and seek readmission to the same degree program should submit a re-entry application through the reinstatement process.

In-Session - Current graduate students who seek to pursue additional graduate degrees should complete an in-session status change application. The DOGE or DOCS (or designee) is responsible for approving the admission to the new major.

Registration

Registration processes are administered through the Office of the Registrar. Policies regarding tuition, fees, and residency should be directed to the Registrar.

All students who attend classes at ISU must register and pay assessed tuition and fees. The ISU Office of the Registrar's website at <http://www.registrar.iastate.edu/students/registration> (<http://www.registrar.iastate.edu/students/registration/>) is the official source of information about registration for all students at ISU. Specific dates for registration are listed:

- on the Registrar's Web page,
- on the University Calendar, and
- in the Iowa State Daily

Full-Time Status

During the academic year, graduate students not on assistantship must be registered for a minimum of nine credits to be considered full-time students or five credits to be considered half-time students. Students on an assistantship appointment during the academic year are considered full-time.

CREDIT LIMITS

Registration in credit courses is limited to a maximum of 15 credits per semester (10 credits for summer session) for graduate students, per Board of Regents. See the Graduate College Handbook Ch.2.1.2 (<https://www.grad-college.iastate.edu/handbook/chapter.php?id=2>) at for more details.

Doctoral Post Prelim (Required Registration)

Even when Ph.D. graduate students have completed coursework, they are required to register and pay tuition and fees after successfully passing their preliminary oral examination, whether or not university facilities and equipment are used, or staff is consulted—either in person or in absentia.

After the preliminary oral examination is passed (with either full or conditional pass) and if university facilities, equipment, and staff time are used, the Ph.D. candidate must register for the appropriate number of credits in the major program and pay the appropriate graduate tuition and fees. The Ph.D. candidate may register for GRST 6810 and pay the

Doctoral Required Registration tuition and fees if all other coursework is completed.

The Ph.D. candidate must be aware that registration for GRST 6810 is allowed only after the Ph.D. candidate passes the preliminary oral examination; is required only in the fall and spring semesters, and not during the summer term; is not allowed after the completion of the final oral examination; and does not defer student loans.

If students take the final examination during the interim between terms (including the first day of classes), registration can be for the term either before or after the examination is held.

Auditing

Audit registration means taking courses without receiving formal credit. Audit provisions are as follows: Instructors must approve ALL audits; students must register for audits by day 10 of the semester; changes to or from an audit must be made in the first 10 days of the semester; students are assessed tuition and fees as though they were taking the course for credit; and the course DOES NOT count in determining full-time student status.

Audited courses do not appear on the student's permanent record unless the "Request for Audit(s) to Appear on Transcript" form is completed and signed by the student, course instructor, and major professor. Copies of this form, which are available from the Graduate College or from the Graduate College's web site at <https://www.grad-college.iastate.edu/student/forms/> must be filed with the Graduate College.

After the fifth-class day, if a student changes a regular course to an audit, that course will appear on the student's permanent record as a drop. Audits are not acceptable as registration for loan deferments or for meeting visa requirements.

Grading

Grades are the permanent official record of a student's academic performance. Iowa State uses A through F grading for most courses. S, P, and NP grades are given in some courses. The standard four-point scale is used to calculate a grade point average.

Grade Point Average (GPA)

All courses taken as a graduate student will be calculated into the graduate GPA, except for Creative Component/Research (5990 and 6990) credits, which are not used in the calculation of the GPA. The GPA is determined by dividing the number of grade points earned by the total number of ISU cumulative hours. The grade given when an incomplete (I) is resolved is figured into the cumulative grade point average, but not into a particular semester's average. Marks of I, S, P, NP, T, and X are not counted in the grade point average; a mark of F (even if taken S/F) is counted in the grade point average. In the case of repeated courses, only the grade achieved the most recent time the course is taken is used in

computing the grade point average. (However, grades in courses that are noted as repeatable courses in the catalog, such as certain repeatable seminars, will all be used in calculating the grade point average.)

Grading Research and Creative Component Credits

Creative Component/Research credits may be graded as A, B, C, D, I, S, or F. Plus and minus grades are optional. These credits are not calculated in a student's GPA.

Pass (P)/Not Pass (NP) Course Credit

Pass/Not Pass courses are those that a student, with the approval of the major professor, may take for personal enrichment, but not for satisfying prerequisites or deficiencies in the undergraduate background. P/NP marks may not be used in a POS (except for the Spring 2020 semester), nor do P/NP marks contribute to the student's GPA. Full credit for P/NP courses is used in calculating tuition assessment and credit load limitations. For more information, see the Graduate College Handbook.

Satisfactory/Fail (S/F) Grading

S/F grading is not the same as P/NP grading. S/F grading is by instructor option; all students in a particular course receive S/F grading. P/NP grading is generally a student option. A P mark is equivalent to at least a C grade whereas an S mark is equivalent to at least a B grade at the graduate level. No special registration procedures are required for S/F grading. An S mark in a course taken S/F is not counted in the grade point average, but an F mark in a course taken S/F is counted in the grade point average and is equivalent to an F in a regularly graded (A-F) course. No more than 20 percent of the total credits (excluding creative component, thesis or dissertation research) in the program of study may be earned on an S/F basis.

S/F grading may be used only for approved courses offered as seminars, symposia, workshops, special topics, and research. Programs must submit requests for S/F grading to the Dean of the Graduate College. The Graduate College Catalog and Curriculum Committee reviews and approves or rejects all S/F courses.

Grievances about Grades

A graduate student who feels that a course grade has been unjustly assigned, and whose attempts to resolve the matter with the instructor have failed, may appeal through the grievance procedures described in Ch.9.5.1. of the Graduate College Handbook (<https://www.grad-college.iastate.edu/handbook/chapter.php?id=9#9.5>).

Probation

If a graduate student does not maintain a cumulative 3.00 grade point average on all coursework taken, exclusive of research credit, they may be placed on academic probation by the Dean of the Graduate College. Grades earned by graduate students in undergraduate courses are included in the calculation of the grade point average. Academic probation judgments are made on the basis of grades in coursework

only. New, first-term, degree seeking graduate students who fall below a 3.00 GPA at the end of their first semester will be given a one term grace period to bring their grades back to a 3.00 GPA. These students will receive an academic probation warning, but not be placed on academic probation unless their cumulative GPA is below a 3.00 in a subsequent semester.

While on academic probation a student will not be admitted to candidacy for a degree and, if appointed to a graduate assistantship, the student will not receive a graduate tuition scholarship unless approval is given by the student's home department's academic college. If a student is to qualify for a tuition scholarship, they must be removed from probation by the tenth-class day of the term.

To ensure that registration does not take place without a review by the program, the Graduate College places a hold on future registrations by a student on probation. Before the student registers for each term, the program must review the student's record and recommend in writing if the Graduate College should permit further registration. Before graduation is approved, the student must complete all courses listed on the program of study with a minimum grade of C and have achieved a 3.00 GPA or greater.

English Proficiency - Admission

Applicants whose native language is not English must demonstrate proficiency in English equivalent to a Test of English as a Foreign Language (TOEFL) score of at least 550 on the paper-based test, or 79 on the internet-based test as a part of the admissions process. International students may also submit IELTS (International English Language Testing System) scores in lieu of the TOEFL. The ISU Graduate College minimum is 6.5. PTE scores of at least 53 and Duolingo scores of at least 105 are also acceptable for meeting the English requirement for admission, but not for meeting the Graduate College English requirement. Duolingo is approved for admission through Spring 2025.

English Requirement - graduation

Graduate students whose native language is not English and who did not graduate from a U.S. institution must take an English Placement Test at the beginning of their first semester of enrollment. This test is administered by the Department of English. A student who does not pass this examination is assigned to one or more courses in the English 99 and 101 series. This course work must be completed during the first year of study. (There is a developmental course fee for the English 99 course.). Non-native English speaking ISU graduate students who meet or exceed the TOEFL scores (640 or above on the paper-based test or 105 on the internet-based test) are exempted from taking the English Placement Test. (Self-enrollment in English 99 or 101 courses remains possible).

Oral english certification test - teaching assistantships

New teaching assistants (TAs) whose native language is not English are evaluated for their ability to communicate effectively in English before their assistantship assignments are made. The Oral English Certification Tests (OECT) are given before the beginning of each semester. The testing dates are announced on the International Teaching Assistants (ITA) program website. Registration for the test is held online through links posted on the ITA program homepage, <https://cce.grad-college.iastate.edu/speaking/english-180-courses> (<https://cce.grad-college.iastate.edu/speaking/english-180-courses/>), two to three weeks before the test is administered. TAs and faculty with questions about OECT testing should contact the Center for Communication Excellence (CCE) in the Graduate College. A prospective teaching assistant who does not pass these tests is required to successfully complete coursework and be retested. English 1800 is a series of communication courses designed to help new teaching assistants. Students focus on pronunciation, listening, question-handling, teaching and lecturing skills, and analyzing the culture of U.S. university life. Because enrollment is restricted, TAs cannot register for the courses online. TAs must contact the CCE immediately after they receive the test scores to obtain permission to enter the course.

Changes in graduate program or status

Students who have been admitted to a graduate program and to the Graduate College may request to transfer at a later date to another major or degree.

Prospective graduate students applying for a Fall 2024 admission term and beyond who wish to change their program of study (POS) in their application may do so, under certain conditions, by contacting their graduate program. Once approved by the program, the Office of Admissions can then make the change in Workday.

Applicants will be allowed to request a change to their Program of Study when the following conditions are met:

1. The original and new Program of Study are housed within the same department.

e.g., An applicant who applied to the Analytical Chemistry, Ph.D. POS changes to the Physical Chemistry, Ph.D. POS. Both of these POSs are housed in the Chemistry department. Similarly, an applicant who applied to the Ph.D. program in Analytical Chemistry may instead be recommended for admission in the M.S. program in Analytical Chemistry instead.

2. The applicant is seeking admission to a POS that is housed in more than one department and they are switching departments. In other words,

the student's departmental home, or academic unit has changed, but their major and degree pursuit has not.

e.g., An applicant is interested in the Ecology and Evolutionary Biology, Ph.D. program in EEOBA (CALS), but they want to switch to EEOBS (LAS)

3. An applicant seeking admission to the Double Degree program may choose to pursue only one of the two programs that make up the double degree program upon graduate program request.

e.g., A student is applying to the Business Administration, M.B.A. & Architecture, M.Arch. Graduate Double Degree, but they decide to pursue only the Business Administration, M.B.A.

Applicants must submit a new application in the following situations:

1. The original and new Program of Study are housed within different departments.

Most Program of Study changes will be completed through a new application for admission submitted by the applicant or admitted student. The standard application fees and fee-payment options will apply. A new application is required because the new department or interdepartmental program needs the opportunity to review the student's information before deciding whether to accept the student in their desired program of study.

The Office of Admissions will include previously submitted transcripts, exam scores, and other materials from the prior application in the new application, completing any action items the student has already provided at the request of the program. This should be included in the email to request the change.

The student will be prompted in the MyAccount to submit materials required of their new program of study that were not brought over or required by their previous program. Programs can waive any actions items that they require in the Admissions Staff Portal should they choose to.

After a student has been admitted for Fall 2024 or later, they will need to submit a new application for admission to change their program of study in most cases. In the following situations, students can request to change their programs of study after matriculation by contacting their graduate program for permission to make this change. If approved by the program, the program will then reach out to the Graduate College to make that change:

1. The student was admitted to a degree program and is recommended by the program to "level-down" to a master's or certificate program. With program approval, the Graduate College will administratively change the student's program of study in this situation.

2. The student is in a POS that is housed in more than one department, and they are switching departments. In other words, the student's departmental home, or academic unit, has changed, but their major and degree pursuit has not. With program approval, the Graduate College will administratively change the student's program of study in this situation.

3. The student is changing their program focus or adding/removing a graduate co-major or minor. With program approval, the Graduate College will administratively change the student's program of study.

Beginning in the Fall 2024 semester, graduate students will be able to initiate changes to their program foci, co-majors, and minors, and approvals will route to program DOGEs and the Graduate College for review.

Curriculum Change from Active Graduate to Active Undergraduate Status

Individuals who are in good standing in the Graduate College and who wish to transfer to an undergraduate curriculum must contact Office of the Registrar.

Curriculum Change from Inactive Graduate to Active Undergraduate Status

Individuals who were admitted to the Graduate College more than one year ago and who do not have active graduate status but who wish to change their status from inactive graduate to active undergraduate must follow the same procedures required of reentering undergraduate students and must begin the process by filing a completed "Undergraduate Reentry" form with the Office of the Registrar. When considering reinstatement, the undergraduate college may consider the student's overall fitness for continued studies including information about the student's conduct, employment, and education since the student's last enrollment.

Undergraduate Admission to Concurrent Graduate Degree/Certificate Programs

Several programs provide opportunities for qualified ISU juniors and seniors majoring in those curricula to apply for admission to a master's degree before they complete their bachelor's degree.

The graduate degree will be awarded only at the same time as, or after, the undergraduate degree is conferred. For a complete listing of the concurrent degree programs, consult Ch. 4.3.2 (<https://www.grad-college.iastate.edu/handbook/chapter.php?id=4#4.3>) of the Graduate College Handbook.

Interested students must submit an application for admission to the concurrent program for consideration.

Students interested in a research career may apply for graduate research assistantships during their last two years of study. Students should contact the graduate programs about applying to the graduate program early in their undergraduate careers. For more information about seeking admission to concurrent undergraduate/graduate degree programs that are not pre-approved by the Graduate College, or "individualized programs", the application process, and transferring credits, consult Ch. 4.3.2 of the Graduate College Handbook.

GRADUATE STUDENTS IN CONCURRENT UNDERGRADUATE PROGRAMS

Graduate students interested in enrolling in a concurrent undergraduate program should contact the Office of Admissions to obtain admission information (even if the student has been previously admitted as an undergraduate).

- Official enrollment and fee payment will be as a graduate student.
- The graduate credential will be awarded at the same time or after the undergraduate degree is conferred.
- Students may be appointed to graduate research assistantships.
- With approval of a student's Program of Study (POS) Committee, up to 6 ISU credits taken while in concurrent status may be applied to a bachelor's degree and a graduate credential that requires up to 41 credits. For master's degree programs that require at least 42 credits, students may instead, with POS approval, count up to 12 such ISU credits.
- For students pursuing a concurrent bachelor's degree and graduate certificate, with POS committee approval, up to 3 or 6 credits may be double counted when the certificate requires 15 or 18 credits or more, respectively. No double counting is permitted for certificates that require fewer than 15 credits.
- Credits transferred from the graduate permanent record to the undergraduate permanent record are no longer available for use on a graduate program of study.
- A student in a bachelor's and master's concurrent degree program cannot be on a doctoral track during the concurrent program.

Veterinary Medicine Students in Concurrent Graduate Degree/Certificate Programs

Students may be concurrently enrolled in the professional curriculum leading to the D.V.M. degree and in a graduate program leading to the M.S. or Ph.D. degree after completion of 90 undergraduate semester credits. The graduate program may be in the College of Veterinary Medicine or in another college.

Interested students must submit an application for admission to the concurrent program for consideration.

Concurrent Master's Degrees

Students may complete two-degree programs that lead to two concurrently awarded master's degrees by following these requirements:

- Complete and submit an application for admission for both master's programs.
- File separate Academic Plans and Committees for each degree,
- File separate applications for graduation for each degree,
- Complete separate projects or theses for each degree, if applicable,
- File separate "Final Oral Exam Requests" for each degree, if applicable, and
- Pass separate final oral examinations, if applicable.

Two awarded master's degrees require at least 22 hours of non-overlapping graduate credit in each major. If the two degrees are thesis or non-thesis degrees, they require two terminal projects (theses or creative components, respectively). Coursework-only degrees do not require a final project. These two degrees do not have to be awarded during the same term, since requirements for each are completed separately.

Master's Degrees

General requirements for all master's degrees are as follows:

General Requirements

The Graduate College Handbook outlines the general requirements for completion of a graduate degree at ISU. Faculty in a major field have the responsibility for establishing educational objectives for their graduate program, including specific course requirements and research requirements appropriate to the master's programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student's program of study (POS) committee beyond those listed in the Graduate College Handbook as deemed appropriate to the goals of the major program.

Faculty and graduate students are active participants in the academic programs of Iowa State University. As active participants, they have a collective impact on the success of those programs and of the university in fulfilling its mission. Each graduate program is encouraged to implement a mechanism for responding to feedback from graduate students as a valuable resource for continuing improvement.

Appointment of the Student's Program of Study (POS) Committee

New graduate students at ISU may be assigned a temporary academic advisor by the major program in the first semester of the student's residence. This faculty member guides the student in selection of a

field of study and in development of a graduate program of study until the major professor and POS committee are selected. After the POS committee has been selected, it guides and evaluates the student during the remainder of graduate study.

A thesis master's POS committee consists of at least three members of the graduate faculty. It must include two members, including the major professor, from the major or program. The committee must include member(s) from different fields of emphasis so as to ensure diversity of perspectives. A term member of the graduate faculty may participate in the direction of a student's master's research as a co-major professor if a member of the graduate faculty serves as a co-major professor and jointly accepts responsibility for the direction of a program of study. A non-thesis master's degree needs a minimum of one committee member. Programs may establish requirements for more than one member. For more information on duties and makeup of the committee as well as changes to the committee makeup, see Ch.6 (<https://www.grad-college.iastate.edu/handbook/chapter.php?id=6>) of the Graduate College Handbook.

Academic Plan. The student and major professor develop the academic plan with the consultation and approval of the POS committee. This agreement between the student and the Graduate College should be submitted as early as possible for approval. It is recommended that the committee be formed, and the committee and academic plan be submitted as early as the second semester of graduate study. In no case can the committee and academic plan be formed later than the term before the final oral examination for master's students.

Residency. There is no on-campus residency requirement for the master's degree.

Credits. Unless otherwise noted, at least 30 credits of acceptable graduate work must be completed in all master's programs. At least 22 graduate credits must be earned from Iowa State University.

Transfer Credits. At the discretion of the POS committee, and with the approval of the program and the Graduate College, graduate credits earned as a graduate student at another institution may be transferred if the grade was B or better. Such courses must have been acceptable toward an advanced degree at that institution and must have been taught by individuals having graduate faculty status at the institution. If a student wishes to transfer credits from graduate courses taken at or through another university as an undergraduate student, it is the student's responsibility to provide verification by letter from that institution that these graduate courses were not used to satisfy undergraduate requirements for a degree.

A transcript must accompany the academic plan in order to transfer credits. The POS committee may ask for other materials, such as a course outline or accreditation of the institution, to evaluate the course.

Transfer courses not completed when the academic plan is submitted must be completed the term before the student graduates. A transcript must then be submitted to the Graduate College for review and final approval.

Research credits earned at another institution are generally not transferred. In rare circumstances, the transfer of S or P marks may be accepted for research credits only. It is the responsibility of the POS committee to obtain a letter from the responsible faculty member at the other institution stating that research credits recommended for transfer with S or P marks are considered to be worthy of a B grade or better.

Major. A major is an approved area of study leading to a graduate degree. The exact number of credits in a major is not prescribed.

Minor. Minors are available in many disciplinary and interdepartmental graduate programs. Some programs offer only a minor. In other programs, students may declare either a major or a minor. Programs offering a major are not required to offer a minor. A student may not major and minor in the same discipline for a single degree or across multiple degrees. To illustrate, a student earning a Ph.D. in computer science may not minor in statistics for their Ph.D. program if they are also pursuing an M.S. in statistics.

The minor subject area must be tested at the final oral examination and cannot be placed on the transcript after graduation unless it was approved as part of the student's academic record. A minor cannot be added to a degree that has already been received.

Specific Master's Degrees

The number of credits in a major for a master's degree will vary according to various degrees. General credit requirements for all master's degrees include: a minimum of 30 graduate credits is required for all master's programs at ISU; at least 22 graduate credits must be earned at ISU; any transfer of graduate credits from another institution must be recommended in the academic plan by the POS committee; and graduate credit earned as a graduate student will be approved for transfer only if a B grade or better was earned. A transcript must accompany the academic plan. A complete listing of specific master's degrees can be found in Appendix D (<https://www.grad-college.iastate.edu/handbook/appendix.php?id=D>) of the Graduate College Handbook. A complete listing of all master's degrees can also be found online, <http://www.grad-college.iastate.edu/academics/gradprograms/index.php>. (<http://www.grad-college.iastate.edu/academics/gradprograms/>)

Master's Double Degree Programs

A double degree requires fulfillment of the requirements for two graduate majors for which two differently named master's degrees and two diplomas are granted at the same time. For double degrees with a thesis

or creative component, the final project (thesis or creative component) must integrate subject area from both majors.

The requirements for all students who are interested in pursuing double degree programs are listed below:

- The interested student must apply to an approved double degree program through the Office of Admissions or submit an individualized proposal for a double degree program to the Graduate College.
- Only **one** POS committee and academic plan will be submitted for the two degrees.
- For double degrees involving a creative component, there must be at least two graduate faculty members on the double degree POS committee. For double degrees involving a thesis, there must be at least three graduate faculty members on the double degree POS committee. Such POS committees for double degrees must include co-major professors from each of the majors.
- Although specific degree programs may require more, the program of study must include at least 48 hours of non-overlapping graduate credit (24 for each major) in the two degrees, and no less than 75% of the sum of the credits from each separate degree.
- If one or both of the degrees has a thesis or creative component, one final oral examination must be held covering the combined thesis or creative component. One thesis is submitted to satisfy the requirements of both degrees.
- If a thesis or non-thesis is combined with a coursework only degree, the thesis/non-thesis project should include information for both degrees.

Drake University Law School/Iowa State University Combined Degree

To provide training in the complementary fields of law and political science with a minimum amount of academic duplication, special arrangements for a combined degree program have been approved with the Drake University Law School. ISU and Drake offer a combined J.D./M.A. in political science. Drake Law School students are permitted to transfer the equivalent of nine semester credits of specified law courses to ISU for credit for the political science program. Because of the difference in grading systems, the Law School grades are transferred as passes, provided the student has achieved a grade of C or better in those courses at Drake. Applicants for the combined program must meet the regular entrance requirements of, and be admitted to, both the Drake Law School and the ISU Graduate College.

Doctor of Philosophy General Requirements

The degree Doctor of Philosophy is strongly research oriented. The primary requirements for the degree are:

- High attainment and proficiency of the candidate in their chosen field.
- Development of a dissertation which is a significant contribution to knowledge and which shows independent and creative thought and work.
- Successful passing of detailed examinations over the field of the candidate's major work with a satisfactory showing of preparation in related courses. General requirements for Ph.D. candidates follow.

The Graduate College Handbook outlines the general requirements for completion of a Ph.D. degree at ISU. Faculty in a major field have the responsibility for establishing educational objectives for their graduate program, including specific course requirements and research requirements appropriate to the Ph.D. programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student's program of study (POS) committee beyond those listed in the Graduate College Handbook as deemed appropriate to the goals for the major program.

Faculty and graduate students are active participants in the academic programs of Iowa State University. As active participants, they have a collective impact on the success of those programs and of the university in fulfilling its mission. Each graduate program is encouraged to implement a mechanism for responding to feedback from graduate students as a valuable resource for continuing improvement.

Appointment of the Student's Program of Study (POS) Committee

The POS committee for a doctoral program consists of at least five members of the graduate faculty. It must include at least three members, including the major professor, from within the student's major or program. The committee must include member(s) from different fields of emphasis so as to ensure diversity of perspectives. An associate member of the graduate faculty may participate in the direction of a student's dissertation research as a co-major professor if a member of the graduate faculty serves as a co-major professor and jointly accepts responsibility for direction of the dissertation.

Changes to POS committee

Recommendations for changes in the POS committee must have the approval of the student, the Graduate College, major professor, DOGE, and all committee members involved in the change. These changes must be approved before the preliminary or final oral examination is held.

Academic Plan

The student and the major professor develop the academic plan with the consultation and approval of the POS committee. Early selection of a major professor, appointment of a POS committee, and development of an academic plan are very important. It is recommended that the committee be formed as early as the second semester of graduate study.

In no case can the committee be formed later than the term before the preliminary oral examination.

Credits

A minimum of 72 graduate credits must be earned for a Ph.D. degree. At least 36 graduate credits, including all dissertation research credits, must be earned at Iowa State University. There is no specific university requirement regarding the number of credits to be taken inside or outside the major/program.

Transfer Credits

At the discretion of the POS committee, and with the approval of the program and the Graduate College, graduate credits earned as a graduate student at another institution may be transferred if the grade was B or better. Such courses must have been acceptable toward an advanced degree at that institution and must have been taught by individuals having graduate faculty status at that institution. If a student wishes to transfer credits from graduate courses taken at or through another university as an undergraduate student, it is that student's responsibility to provide verification by letter from that institution that those graduate courses were not taken to satisfy undergraduate requirements for a degree.

A transcript must accompany the academic plan in order to transfer credits. The POS committee may ask for other materials, such as a course outline or accreditation of the institution, to evaluate the course. Transfer courses not completed when the academic plan is submitted must be completed before the term in which the student graduates. A transcript must then be submitted to the Graduate College for review and final approval.

Research credits earned at another institution are generally not transferred. In rare circumstances, the transfer of S or P marks may be accepted for research credits only. It is the responsibility of the POS committee to obtain a letter from the responsible faculty member at the other institution stating that research credits recommended for transfer with S or P marks are considered to be worthy of a B grade or better.

Major

A major is the area of study or academic concentration in which a student chooses to qualify for the award of a graduate degree. Majors are listed on the Graduate College website here: <https://www.grad-college.iastate.edu/academics/programs/apprograms.php>. Opportunities also exist for majoring in more than one area of study (co-major programs).

Minor

Students may request a minor in any program approved to grant a graduate degree so long as the graduate program offers a minor and in programs approved to offer only a minor. Requirements for declared minors are determined by the minor program and the faculty member

representing the minor field on the student's POS committee. The minor subject area must be tested at the preliminary oral and final oral examinations. A minor cannot be added to a program of study after the preliminary oral examination has been taken, nor can a minor be placed on the transcript after graduation, unless it was approved on the graduate student's academic record. A student may not minor and major in the same field. A minor cannot be added to a degree that has already been awarded.

Time Limits

The Graduate College's time-to-degree limit for all graduate students, both master's and Ph.D., is seven years. **Graduate programs may establish more restrictive time-to-degree limits.** For example, at the program's discretion, a student beginning a Ph.D. degree program at ISU with a master's degree could be expected to complete the program within three or four or five years, while a student beginning a Ph.D. degree program without the master's degree could be expected to complete the program within five or six or seven years. This is an option that would be enforced at the department level. Requests to extend the seven-year time limit will be considered in situations involving medical or other extenuating circumstances. Cases in which the student leaves ISU during their graduate career and later returns are dealt with individually by the POS committee and the Graduate College.

The inclusion in the academic plan of coursework that is beyond the time limits ("expired" courses) must be justified in the Expired Course Petition. This petition will be required for students with expired courses are part of the academic plan submission. m.

Preliminary Examination

The Graduate College requires a preliminary oral examination of Ph.D. degree students; most programs add a written portion to the preliminary oral examination. The Ph.D. degree preliminary oral examination rigorously tests a graduate student's knowledge of major, minor, and supporting subject areas as well as the student's ability to analyze, organize, and present subject matter relevant to the field. A "Request for Preliminary Examination" must be submitted to the Graduate College at least two weeks before the proposed date of the examination.

The following conditions should be met before the "Request for Preliminary Examination" is submitted to the Graduate College:

- Admitted to full admission status in a Ph.D. granting program,
- Committee and Academic Plan approved no later than 3 months before the preliminary oral examination,
- English requirement met,
- Not on probation,
- Time limit not exceeded (see Chapter 4 (<https://www.grad-college.iastate.edu/handbook/chapter.php?id=4&search=preliminary%20oral%20exam&section=4.4#ttd>)),

- Qualifying examination (if required by program) passed,
- Registration for a minimum of one credit, or for Examination Only (GRST 6810B) if no course work is needed, during the term in which the preliminary oral examination is taken.

A preliminary oral examination will not be scheduled for a student on academic probation. Upon successful completion of the preliminary oral examination, the student is admitted to candidacy for the Ph.D. degree. If the graduate student fails all or part of the preliminary oral examination, the committee provides two options: gives a not pass and allows the student to retake the examination after six months or gives a not pass and does not allow the student to retake the examination. Six months must elapse between the first attempt and the next. The entire POS committee must be convened for the preliminary oral examination. The preliminary oral examination must be passed at least six months prior to the final oral examination. An exception to the rule is allowed if a request signed by the major professor(s) and the program's DOGE is approved by the Dean of the Graduate College.

Dissertation

A doctoral dissertation must demonstrate conclusively the ability of the author to conceive, design, conduct, and interpret independent, original, and creative research. It must attempt to describe significant original contributions to the advancement of knowledge and must demonstrate the ability to organize, analyze, and interpret data. In most instances, a dissertation includes a statement of purpose, a review of pertinent literature, a presentation of methodology and results obtained, and a critical interpretation of conclusions in relation to the findings of others. When appropriate, it involves a defense of objectives, design, and analytical procedures. Dissertation research should be worthy of publication and should appear in appropriate professional journals or in book form.

Responsibility for writing and editing of the dissertation rests with the student, under the supervision of the major professor, and not with the Graduate College. The Graduate College does not permit joint authorship of dissertations. It is the responsibility of the major professor to supervise the preparation of preliminary and final drafts of the dissertation, so as to assure the highest level of quality when the student presents the dissertation to the committee for final approval. Copies of the dissertation must be submitted to the POS committee at least two weeks before the final oral examination.

All theses and dissertations will be submitted electronically after the final oral examination is held. Please refer to the Graduate College Dissertation/Thesis website (<http://www.grad-college.iastate.edu/current/thesis/>) for requirements, fees, and other pertinent information.

Shortly after the submission of the "Application for Graduation," a one-time, nonrefundable thesis fee is billed by the university accounting system. In addition, a graduation fee will be assessed by the Registrar's Office. This fee is nonrefundable if a student does not cancel their graduation by the Graduate College's cancellation deadline.

Final Oral Examination

The Ph.D. final oral examination, conducted after the dissertation is finished, is oral and often limited to a defense of the dissertation. To receive the degree at the end of a given semester, the student must hold the final oral examination before the final oral examination deadline for the semester.

The candidate is responsible for initiating the "Request for Final Oral Examination," which must be submitted to the Graduate College at least two weeks before the examination. The entire POS committee must be convened for the final oral examination. For more information on the final oral examination, see Ch. 7.1.2 of the Graduate College Handbook.

Graduate Student Approval for Graduation

The Graduate College requires final approval from the student's program, which includes approval from the the major professor(s) and the DOGE(s), including co-major DOGE if applicable, after the student has passed the final oral examination and completed any necessary changes on the dissertation/thesis requested by the committee. A paper dissertation/thesis signature page is not required.

- A student must submit their final dissertation/thesis to ProQuest. A creative component student must submit their creative component to the ISU Digital Repository.
- Once the Graduate College receives approval from the program that the student is ready to graduate, a student's dissertation, thesis, or creative component will be reviewed for final approval.
- Final clearance of academic requirements will be made when current term grades have been submitted and evaluated by the Graduate College.

All incompletes from previous terms must be completed by the deadline for completion. An incomplete, non-report, or failing grade that a student receives for the term of graduation will result in removal from that term's graduation list. The student will need to complete a new Application for Graduation for the new term of graduation.

If a conditional pass was recommended at the final oral examination, the major professor and the committee members, if so specified, must notify the Graduate College that the conditions have been met before a degree will be conferred.

Graduate Programs

The Graduate College Handbook outlines the general requirements for completion of a graduate degree or credential at ISU. Faculty in a major field have the responsibility for establishing educational objectives for their graduate program, including specific course requirements and research requirements appropriate to the doctoral, master's, and certificate programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student's program of study (POS) committee beyond those listed in the Graduate College Handbook as deemed appropriate to the goals of the major program.

Faculty and graduate students are active participants in the academic programs of Iowa State University. As active participants, they have a collective impact on the success of those programs and of the university in fulfilling its mission. Each graduate program is encouraged to implement a mechanism for responding to feedback from graduate students as a valuable resource for continuing improvement.

Academic Program definitions

- **Program** - administrative infrastructure supporting the curriculum.
- **Curriculum** - the requirements for a major, certificate, or minor.
- **Major** - subject area of study that results in a named baccalaureate, master's, or doctoral degree upon completion of a set of requirements. A major appears on the academic transcript.
- **Certificate** - an academic credential in a focused area of study. A certificate appears on the academic transcript and may be earned concurrently with a degree or on its own.
- **Minor** - an academic area of emphasis that is in addition to a major. A minor appears on the academic transcript and must be earned in conjunction with a degree.

Ph.D. Programs

A complete list of Ph.D. Programs can also be found on <https://www.grad-college.iastate.edu/academics/programs/apprograms.php>. (<https://www.grad-college.iastate.edu/academics/programs/apprograms.php>)

Aerospace Engineering (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=2>)

Agricultural and Biosystems Engineering (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=5>)

Agricultural Economics (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=3>)

Agricultural Education (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=4>)

Agricultural Meteorology (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=7>)

Analytical Chemistry (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=9>)

Animal Breeding and Genetics (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=10>)

Animal Physiology (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=11>)

Animal Science (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=12>)

Graduate Minors

Minors are available in many disciplinary and interdepartmental graduate programs. Some programs offer only a minor. In other programs, students may declare either a major or a minor. Programs offering a major are not required to offer a minor. A student may not major and minor in the same discipline for a single degree or across multiple degrees. To illustrate, a student earning a Ph.D. in computer science may not minor in statistics for their Ph.D. program if they are also pursuing an MS in statistics.

Graduate Minor Only Programs

The following programs are available as minor only. These minors do not have an associated graduate major.

Applied Scientific Computing (<http://asc.aere.iastate.edu/>)

Criminal Justice (<https://soc-cj.iastate.edu/>)

Linguistics (<https://apling.engl.iastate.edu/>)

Philosophy

Spanish (<http://catalog.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures/>)

Speech Communication (<http://www.engl.iastate.edu/graduate-students/>)

Women's and Gender Studies (<https://womensstudies.las.iastate.edu/graduate/>)

COLLEGE OF VETERINARY MEDICINE

Dan Grooms, Dean of Veterinary Medicine

Jared A. Danielson, Senior Associate Dean for Academic and Student Programs Success and Innovation

vetmed.iastate.edu/ (<http://vetmed.iastate.edu/>)

Departments of the College

- Biomedical Sciences
- Veterinary Clinical Sciences
- Veterinary Diagnostic and Production Animal Medicine
- Veterinary Microbiology and Preventive Medicine
- Veterinary Pathology

Other units of the college include the Lloyd Veterinary Medical Center, Veterinary Diagnostic Laboratory, Veterinary Medical Research Institute, CVM Information Technology and The Office of Curricular Assessment and Teaching Support. The college participates in interdisciplinary graduate programs in genetics; molecular, cellular and developmental biology; toxicology; immunobiology; and neuroscience.

Objectives of the Curriculum

The instructional objective of the College of Veterinary Medicine is to enable students to assume vital roles in society as productive health care providers and biomedical scientists. Such an education provides students with general learning, communication, and problem solving abilities; veterinary medical practice and research skills; and professional and ethical values.

The curriculum incorporates basic biomedical and clinical principles, clinical decision making skills, and exceptional clinical experience in small animal medicine and surgery, equine medicine and surgery, food animal medicine and surgery, and production animal medicine. Companion animal medicine and surgery are provided within the regionally recognized referral hospital through the community practice unit and equine field services. The college is located in one of the most intensive livestock producing areas in the United States. Because of this, students have the opportunity to engage in extensive food supply veterinary medicine experiences and to experience numerous diagnostic cases.

The professional curriculum is a four-year course of study leading to the doctor of veterinary medicine degree. Each of the first three years of the curriculum consists of two semesters while the fourth year has three semesters. Students are admitted into the professional curriculum after

completing a minimum of 55 semester credits of required undergraduate coursework.

A strong and reputable basic science education during the first two years of the professional curriculum prepares veterinary students for a wide range of clinical experience during the last two years of the educational program. Fourth year students may choose to enhance their education by earning clinical elective credits at approved government agencies, research laboratories, veterinary practices and other university hospitals. Outstanding research programs in infectious diseases, food safety, neuroscience, immunoparasitology, evidence-based medicine, and many other areas provide opportunities for qualified students to participate in research.

Concurrent DVM/MS, DVM/PhD, DVM/MPH and DVM/MBA programs are available for qualified students who wish to obtain both veterinary and graduate degrees. Students must have a bachelor's degree or a minimum of 128 semester credits in undergraduate and professional curricula in order to participate in the concurrent DVM/graduate degree program. Admission to the concurrent degree program is subject to the approval of the deans of the College of Veterinary Medicine and the Graduate College.

The college is an important recruiting center for employers seeking veterinarians for private practice; industry; educational institutions; international agencies; federal, state and local governments; the armed forces; departments of public health; zoological gardens; and other related fields of professional activity. Graduates are highly sought after and typically have multiple employment offers upon graduation. Career services and an online job board are available for students.

Pre-Veterinary Medicine Preparation Admission Requirements

The College of Veterinary Medicine seeks students with diverse backgrounds and encourages students to enroll in baccalaureate programs in the college of their choice. A Bachelor's degree is not required for admission to the College of Veterinary Medicine. However, students must have a strong science foundation found in the required pre-veterinary coursework (<https://vetmed.iastate.edu/future-dvm-students/apply-to-the-college/pre-veterinary-requirements/course/>).

Veterinarians have varied career options. When deciding on an undergraduate major, the student should consider the area of veterinary medicine which interests them. For example, those who desire a career in clinical practice may wish to pursue a degree in biological science, animal science, agricultural economics, business, social science or humanities. Students with an interest in zoo or wildlife veterinary medicine may want to look at animal ecology, environmental studies or zoology. Future researchers may wish to consider genetics, molecular biology, microbiology, or biochemistry. Students who desire a career in public health (USDA, FDA, etc) or government (legislative/policy) may

find benefit in any of the biological sciences or in political science. A degree in education may be valuable to those who envision themselves as educators in a College of Veterinary Medicine. These examples are only suggestions and are but a few of the many possibilities.

For the most current information regarding application and admission to the College of Veterinary Medicine, please refer to the College web site at www.vetmed.iastate.edu/ (<http://www.vetmed.iastate.edu/>).

Applicants for admission to the College of Veterinary Medicine must have attended an accredited college or university and have completed 55 semester credits prior to the end of the spring term of the year in which they seek to be admitted to the College of Veterinary Medicine.

All science requirements should be fulfilled by the time of application or scheduled for completion by the end of the fall term in which the applicant applies. However, if necessary, the applicant may complete up to two required science courses after the fall term providing a transcript with the courses and grades listed is postmarked by July 1 of the year the applicant would enter. There is no maximum number of non-science required courses that may be completed but the deadline of having a transcript with these course grades posted by July 1 also applies. The July 1 deadline for transcripts and grades is firm.

Required courses must be completed with a grade of C (2.00) or better. A grade of C- (1.67) does not fulfill the requirement.

Credits earned must include the following Iowa State semester course offerings or their equivalents:

English Composition 6 cr.

One year of composition or writing emphasis courses. May include business or technical writing. Two of the following courses would fulfill the requirement.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
ENGL 3020	Business Communication	3
ENGL 3090	Proposal and Report Writing	3
ENGL 3140	Technical Communication	3

Oral Communications 3 cr.

May include public speaking, interpersonal communication, group or organizational communication or speaking emphasis courses. One of the courses below will fulfill the requirement.

SPCM 2120	Fundamentals of Public Speaking	3
AGEDS 3110	Presentation and Sales Strategies for Agricultural Audiences	3
SPCM 3120	Business and Professional Speaking	3
COMST 2140	Professional Communication	3

General Chemistry with Laboratory* 7 cr.

One year series for science majors with one semester lab.

CHEM 1770 & 1770L	General Chemistry I and Laboratory in General Chemistry I	5
CHEM 1780	General Chemistry II	3
Total Credits		8

Organic Chemistry with Laboratory* 4 cr.

The first in a two-semester series of Organic Chemistry with lab. The second semester of organic chemistry will not fulfill this requirement.

CHEM 3310	Organic Chemistry I	3
CHEM 3310L	Laboratory in Organic Chemistry I	1
Total Credits		4

Biochemistry* 3 cr.

One semester (no lab required). One of the courses below will fulfill the requirement. Must be metabolic biochemistry and cannot be biochemistry of proteins and enzymes alone.

BBMB 3010	Survey of Biochemistry	3
BBMB 3160	Principles of Biochemistry	3
BBMB 4040	Biochemistry I	3
BBMB 4200	Mammalian Biochemistry	3

General Physics with Laboratory* 4 cr.

First semester of a two-semester series with lab. Must include mechanics, fluids, heat and thermodynamics, vibrations, waves and sound. The second semester of Physics will not fulfill this requirement.

PHYS 1310	General Physics I	4
PHYS 1310L	General Physics I Laboratory	1
PHYS 1150	Physics for the Life Sciences	4
PHYS 1150L	Laboratory in Physics for the Life Sciences	1
PHYS 2310	Introduction to Classical Physics I	4
PHYS 2310L	Introduction to Classical Physics I Laboratory	1

General Biology with Laboratory* 8 cr.

Two semester series with lab each semester. If a series is not available a course in organismal biology with lab and a course in cellular biology and lab will fulfill this requirement. In addition, a bachelor's degree in biology fulfills this requirement.

BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
BIOL 2120	Principles of Biology II	3
BIOL 2120L	Principles of Biology Laboratory II	1
Total Credits		8

Genetics * 3 cr.

Must include Mendelian and molecular genetics. A general genetics course is preferred, but animal breeding/livestock improvement courses will be accepted. One of the courses below will fulfill the requirement.

BIOL 3130	Principles of Genetics	3
GEN 3200	Genetics, Agriculture and Biotechnology	3
ANS 3520	Genetic Improvement of Domestic Animals	3

Mammalian Anatomy or Physiology* 3 cr.

Human anatomy or physiology will also fulfill this requirement (no lab required). Must be an overview of all organ systems. If you take an Anatomy and/or Physiology I course, you must also take the second course, Anatomy and/or Physiology II, in order to fulfill the requirement. One of the courses below will fulfill the requirement.

BMS 3290	Anatomy and Physiology of Domestic Animals	3
BMS 4470	Introduction to Human Gross Anatomy	4
BMS 5380	Principles of Physiology	4
ANS 2140	Domestic Animal Physiology	3
BIOL 1550	Human Biology	3
BIOL 2550	Fundamentals of Human Anatomy	3
BIOL 3350	Principles of Human and Other Animal Physiology	3
BIOL 3510	Comparative Chordate Anatomy	5

Humanities or Social Sciences 6 cr.**Electives 8 cr.****Total Credits Required 60 cr.**

Courses above marked with an asterisk (*) are the required science courses. The required science course GPA is calculated from these courses.

Credits in the previously specified courses will normally be earned on the traditional four-letter grading system with A as the highest grade and D as the lowest passing grade. All required courses must be completed with a grade of C (2.0) or better. It is generally expected that required courses have been completed within the past eight (8) years. AP or CLEP credits must be documented by original scores submitted to the College of Veterinary Medicine. CLEP credits may be accepted only for arts, humanities and social sciences. Credits in the preceding specified courses will not be accepted if earned under the pass-not pass grading system or similar options. Please see COVID-19 exceptions (<https://vetmed.iastate.edu/sites/default/files/COVID-19-ImpactStatementRevised-10-23-2020.pdf>).

Application and Admission

Applicants must apply using the Veterinary Medical College Application Service (VMCAS). The VMCAS application may be found online at the

VMCAS website (<https://www.aavmc.org/becoming-a-veterinarian/how-to-apply/>).

Those applying through VMCAS also need to complete the ISU Supplemental Application (<https://vetmed.iastate.edu/future-dvm-students/apply-to-the-college/application-requirements/supplemental-application/>) found at the College of Veterinary Medicine website. The deadline for filing the VMCAS and Supplemental Application is typically mid-September.

A list of courses in progress at the time of submission and/or scheduled for completion by the end of spring term should be entered in the VMCAS application. Undergraduate college credits must average at least 2.50 on a 4.00 marking system for the application to be eligible for review. The preceding scholastic requirements are minimum and do not assure admission even though these requirements have been fulfilled.

Admission to the College of Veterinary Medicine is on a competitive and selective basis. GPA, animal, veterinary, research and other employment experiences, essays, recommendations and personal development (leadership, citizenship, volunteerism, etc.) are given consideration in the selection of candidates.

Positions are available to applicants in several applicant pools, including Iowa residents, participants in the Professional Program in Veterinary Medicine with the University of Nebraska-Lincoln, participants in the contract with the State of North Dakota, participants in other institution-specific contracts, and all other applicants including non-Iowan US citizens and international applicants. Consideration for admission is given equally without regard to race, color, national origin, gender, religion, disability, or age, political beliefs, or marital or familial status.

For further information, please visit the College of Veterinary Medicine at <https://vetmed.iastate.edu/future-dvm-students> (<https://vetmed.iastate.edu/future-dvm-students/>).

**Curriculum in Veterinary Medicine
Graduation Requirements**

To be awarded the degree Doctor of Veterinary Medicine, candidates must have passed all required courses in the curriculum in veterinary medicine, earned a minimum 2.0 grade-point average in the veterinary medicine curriculum, and earned at least 4 elective credits during the VM1-3 years. Candidates must also have given a grand rounds presentation (VCS 7495 Grand Rounds Presentations).

Required Courses in the Professional Program

BMS 7330	Principles Of Morphology I	6
BMS 7331	Principles of Morphology II	4
BMS 7333	Biomedical Sciences I	6
BMS 7334	Biomedical Sciences II	6

BMS 7335	Molecular and Cellular Basis of Disease	1
BMS 7336	Veterinary Nutrition	2
BMS 7337	Neuroanatomy	3
BMS 7339	Clinical Foundations I	1
BMS 7345	Case Study I	1
BMS 7346	Case Study II	1
BMS 7354	General Pharmacology	3
BMS 7443	Pharmacology and Therapeutics	3
VCS 7311	Careers in Veterinary Medicine	arr †
VCS 7313	Veterinary Medical Ethics	1
VCS 7314	Communication and Leadership in Veterinary Medicine	1
VCS 7315	Veterinary Law	1
VCS 7339	Clinical Foundations I	1
VCS 7385	Grand Rounds	arr †
VCS 7391	Clinical Imaging	1
VCS 7393	Principles of Surgery	3
VCS 7394	Principles of Surgery Laboratory	1
VCS 7395	Small Animal Surgery	2
VCS 7398	Anesthesiology	2
VCS 7399	Ophthalmology	1
VCS 7436	Small Animal Internal Medicine	3
VCS 7440	Introduction to Clinics	arr †
VCS 7444	Small Animal Medicine	4

VCS 7448	Diagnostic Imaging and Radiobiology	3
VCS 7449B	Junior Surgery Laboratory: Traditional Curriculum	3
VDPAM 7312	Introduction to Animal Welfare	1
VDPAM 4260	Veterinary Toxicology	3
VDPAM 7445	Production Animal Clinical Medicine	3
VDPAM 7450	Disturbances of Reproduction	4
VMPM 7378	Case Study IV	2
VMPM 7380	Veterinary Immunology	2
VMPM 7386	Veterinary Microbiology	5
VMPM 7387	Veterinary Virology	3
VMPM 7388	Public Health and the Role of the Veterinary Profession	3
VMPM 7437	Infectious Diseases and Preventive Medicine	3
VPTH 7342	Anatomic Pathology I	3
VPTH 7372	Anatomic Pathology II	4

VPTH 7376	Veterinary Parasitology	4
VPTH 7377	Case Study III	2
VPTH 7409	Introduction to Veterinary Cytology and Laboratory Techniques	1
VPTH 7425	Clinical Pathology	4

† Arranged with instructor.

Fourth Year

The fourth year of the veterinary medical curriculum is designed to be flexible yet provide a broad-based clinical education involving all domestic species of animals. All students participate in rotations that are considered fundamental to any species orientation that the student might choose. In addition, students choose one of four options for additional study, including the Small Animal, Equine, Mixed Animal, or Food Animal Options. Students may obtain clinical elective credits by repeating on-campus rotations or participating in approved off-campus preceptorships at government, private or public agencies; other universities; or private veterinary practices.

The following rotations are required of all fourth-year students in addition to the requirements of the track they choose. A complete listing of track-specific requirements can be found at: <http://vetmed.iastate.edu/>:

VCS 7453	Small Animal Medicine I	2
VCS 7455	Small Animal Soft Tissue Surgery	2
or VCS 7456	Small Animal Orthopedic Surgery	
Must have one equine course as assigned by the schedule optimizer.		2
VCS 7457	Equine Medicine	
or VCS 7464	Equine Field Services	
or VCS 7458	Equine Surgery	
VCS 7460	Radiology	2
VCS 7463	Primary Care	2
VCS 7466	Anesthesiology	2
VCS 7468	Intensive Care	4
VCS 7495	Grand Rounds Presentations	arr †
VDPAM 7477	Food Animal and Camelid Medicine and Surgery	2
VPTH 7456	Necropsy Laboratory Practicum	2
& VPTH 7457	and Clinical Pathology Laboratory Practicum	
(Taken together as one 2-week block)		

† Arranged with instructor.

Reinstatement

Any student who voluntarily withdraws from the College of Veterinary Medicine or who is dismissed from the College of Veterinary Medicine, after having successfully completed one or more semesters forfeits his/

her standing and must make written application for reinstatement to this college a minimum of 60 days prior to the opening of the semester for which they seek to re-enter. Any student who voluntarily withdraws from the College of Veterinary Medicine prior to completion of one semester must re-apply for admission to the college in the general applicant pool.

Biomedical Sciences Professional Program of Study

For professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine

Biomedical Sciences

The Department of Biomedical Sciences provides a hands on educational experience in human and animal health sciences. Our courses include cadaver-based human and veterinary anatomy, histology, physiology, pharmacology and cell biology, emphasizing a One Health approach that recognizes the interconnection between human and animal health.

A solid foundation in anatomy, physiology, and pharmacology is necessary to understand both the mechanisms of disease processes in humans and animals as well as their treatment. Specimen-based study of anatomy and physiology prepares students with a background in the structural and functional activities of cells, tissues, organs, and body systems relevant to human and veterinary medicine.

An understanding of drug action is essential for rational drug therapy. Our general pharmacology courses provide students with a background in basic pharmacology to include pharmacodynamics, toxicology, and the clinical application of drugs. Special emphasis is placed on chemical agents and therapeutic practices specific to both human and veterinary medicine.

Graduate Programs

The department offers Master of Science and Doctor of Philosophy degrees with a major in Biomedical Sciences and specializations in Anatomy, Physiology, Pharmacology, and Cell Biology. Up to 10 credits of dual-listed veterinary courses may be applied for major graduate credit.

The objective of the department is to prepare graduate students for successful careers in biomedical research and professional service. The department is part of interdepartmental programs in neuroscience, toxicology, and molecular, cellular, and developmental biology. The combined Ph.D./DVM program is an option offered by the department.

Departmental research facilities allow for training in experimental anatomy, pharmacology, and physiology. Graduate studies are supervised by faculty members recognized in their areas of expertise. Current areas of research include: Alzheimer's disease, aquatic animal health, calcium and mineral homeostasis, diabetes mellitus, glia-neuron signaling, neurophysiology of pain, neurotoxicology, physiology and pharmacology

of nematode ion-channels, Parkinson's disease, pharmacology of schistosomiasis, pharmacology of salmonellosis, physiology and pharmacology of thalamic neurons, physiology of the retina, Spinal Muscular Atrophy, and study of neural stem cells.

Pharmacology and Toxicology Minor Pharmacology and Toxicology - Undergraduate Minor

The interdisciplinary pharmacology and toxicology minor is intended to significantly increase the number of ISU graduates who can:

- Understand, use and define key terms and concepts related to pharmacology and toxicology;
- Apply concepts and standard practices in pharmacology and toxicology to solving practical problems relevant to these fields;
- Analyze scientific data in pharmacology and toxicology;
- Synthesize detailed and accurate descriptions of current knowledge on key topics in pharmacology and toxicology;
- Make informed decisions about current controversies in pharmacology and toxicology, using appropriate scientific methods and ethical reasoning.

The minor in Pharmacology and Toxicology may be earned by completing the following courses. All minors require at least 15 credits; 9 credits of the courses listed in the minor must not be used to meet any other department, college, or university requirement except the credit requirement for graduation. There are three required courses for all Pharmacology and Toxicology undergraduate minors: TOX 4010, BMS 4390, and one physiology course selected from BMS 3290, BMS 4380 or BIOL 3350. The remaining credits are fulfilled by any of the electives listed below.

Required Core Courses:

TOX 4010	Principles of Toxicology	3
BMS 4390	Principles of Pharmacology	4
Select one of the following:		3-4
BMS 3290	Anatomy and Physiology of Domestic Animals	
BMS 4380	Principles of Physiology	
BIOL 3350	Principles of Human and Other Animal Physiology	
Total Credits		10-11

Electives:

ENSCI 4240A	Air Pollution: Air Quality and Effects of Pollutants	1
ABE 4510	Food and Bioprocess Engineering	3
BBMB 3160	Principles of Biochemistry	3
BBMB 4040	Biochemistry I	3
BBMB 4050	Biochemistry II	3

BIOL 3190	Analysis of Environmental Systems	3
BIOL 4230	Developmental Biology	3
BIOL 4340	Endocrinology	3
BIOL 4360	Neurobiology	3
BME 4400	Biomedical Applications of Chemical Engineering	3
BMS 7443	Pharmacology and Therapeutics	3
BMS 4480	Principles of Human Gross Anatomy	4
CHEM 2110 & 2110L	Quantitative and Environmental Analysis and Quantitative and Environmental Analysis Laboratory	4
CHEM 2310	Elementary Organic Chemistry	3
CHEM 3310	Organic Chemistry I	3
ENSCI 4860	Aquatic Ecology	3
ENT 4500	Pesticides in the Environment	3
FSHN 2640	Fundamentals of Nutritional Biochemistry	3
FSHN 4420	Issues in Food and Society	2
FSHN 4610	Medical Nutrition and Disease I	4
FSHN 4640	Medical Nutrition and Disease II	4
FSHN 4670	Molecular Basis of Nutrition in Disease Etiology and Health Promotion	3
FSHN 4890	Issues in Food Safety	1
TOX 7354	General Pharmacology	3
TOX 4190	Foodborne Hazards	3
TOX 4200	Food Microbiology	3
TOX 4260	Veterinary Toxicology	3
TOX 4900	Independent Study	1-2
TOX 4990	Undergraduate Research	1-3

Veterinary Clinical Sciences Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The curriculum of veterinary clinical sciences explores the preventive health care, and diagnosis and treatment of diseases of companion and competitive athletic animals. Veterinary specialists lead didactic and laboratory based learning in the clinical sciences. Experiential based courses conducted through the Veterinary Medical Center during the fourth year provide the student an opportunity to participate in the application of clinical skills and knowledge.

Graduate Study

The department offers work for the degree master of science with major in veterinary clinical science, and minor work for students majoring in

other departments. Within the veterinary clinical sciences major, the student may specialize in veterinary medicine, surgery, or theriogenology. The D.V.M. degree or equivalent is prerequisite to a major graduate work.

Both thesis and nonthesis options are available and require the completion of a minimum of 30 graduate credits and a final examination.

World languages and cultures requirements may be established by the student's program of study committee.

Courses primarily for graduate students, open to qualified undergraduates:

VCS 5900A: Special Topics: Medicine

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

VCS 5900B: Special Topics: Surgery

Credits: 1-3. Repeatable.

VCS 5900C: Special Topics: Theriogenology

Credits: 1-3. Repeatable.

VCS 5900D: Special Topics: Radiology

Credits: 1-3. Repeatable.

VCS 5900E: Special Topics: Anesthesiology

Credits: 1-3. Repeatable.

VCS 5900F: Special Topics - Ophthalmology

Credits: 1-3. Repeatable, maximum of 3 credits.

Special topics in Ophthalmology. (Typically Offered: Fall, Spring)

VCS 5960: International Preceptorship

Credits: 1-12. Repeatable.

International Preceptorships and Study Abroad Group programs.

Provides opportunities for students to be involved in applied clinical, production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities. (Typically Offered: Fall, Spring, Summer)

VCS 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Courses for graduate students:

VCS 6040: Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

(Typically Offered: Fall, Spring)

VCS 6400: Advanced Radiology

Credits: 2. Contact Hours: Lecture 2.

Detailed principles of clinical radiology with particular reference to radiographic interpretation.

VCS 6760: Advanced Medicine

Credits: 2. Contact Hours: Lecture 2.

Principles of general medicine. A study in depth of factors that contribute to the development of clinical signs as related to the pathogenesis of disease.

VCS 6770: Advanced Medicine

Credits: 2. Contact Hours: Lecture 2.

An advanced study of metabolic diseases.

VCS 6990A: Research: Medicine

Credits: 1-30. Repeatable.

VCS 6990B: Research: Surgery

Credits: 1-30. Repeatable.

VCS 6990C: Research: Theriogenology

Credits: 1-30. Repeatable.

VCS 6990E: Research: Anesthesiology

Credits: 1-30. Repeatable.

VCS 6990F: Research: Ophthalmology

Credits: 1-30. Repeatable.

Graduate Level Research.

VCS 6990G: Research: Cardiology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Graduate Level Research.

Courses primarily for professional curriculum students:**VCS 7305: Shelter Medicine**

Credits: 1. Contact Hours: Lecture 1.

An elective course designed to educate the veterinary student about issues of relevance to companion animal population and shelter medicine and welfare. (Typically Offered: Spring)

VCS 7311: Careers in Veterinary Medicine

Credits: Required. Contact Hours: Lecture 1.

Introduction to the veterinary profession and the various career opportunities available. (Typically Offered: Fall)

VCS 7313: Veterinary Medical Ethics

Credits: 1. Contact Hours: Lecture 1.

A continuation of the Veterinarian in Society series. The course covers selected topics on moral and ethical issues affecting the practice of veterinary medicine. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

VCS 7314: Communication and Leadership in Veterinary Medicine

Credits: 1. Contact Hours: Lecture 1.

A continuation of the Veterinarian in Society series. This course will focus on helping students develop their communication, leadership, team building and conflict resolution skills. (Typically Offered: Fall)

VCS 7315: Veterinary Law

Credits: 1. Contact Hours: Lecture 1.

A continuation of the Veterinarian in Society series. This course will emphasize veterinary law. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

VCS 7318: Advanced Small Animal Oncology

Credits: 1.

Provide advanced instruction in medical oncology, radiation oncology, and surgical oncology. General learning objectives include demonstrating the ability to utilize information from the physical exam and historical findings to direct appropriate diagnostics and staging based on a specific cancer diagnosis. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

VCS 7319X: Veterinary Military Practicum

Credits: 1-6. Repeatable, maximum of 6 credits.

Allows students to gain veterinary experience through military service. (Typically Offered: Fall, Spring, Summer)

VCS 7339: Clinical Foundations I

(Cross-listed with BMS 7339).

Credits: 1. Contact Hours: Lecture 1, Laboratory 2.

Canine physical examination; basic behavior, animal handling and restraint; medical record keeping. (Typically Offered: Fall)

VCS 7385: Grand Rounds

Credits: Required. Contact Hours: Lecture 1.

Repeatable.

Seminars and case presentations on selected clinical subjects by fourth-year students of the College of Veterinary Medicine. Attendance is required for a passing grade. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

VCS 7391: Clinical Imaging

Credits: 1. Contact Hours: Lecture 1.

Evaluation of morphologic anatomy of the dog and cat utilizing clinical imaging methods - radiography, ultrasonography, computed tomography, magnetic resonance imaging and nuclear imaging. Emphasis will be placed on normal radiographic anatomy. (Typically Offered: Fall)

VCS 7393: Principles of Surgery

Credits: 3. Contact Hours: Lecture 2.5, Laboratory 1.

General principles of surgery of companion animals. (Typically Offered: Fall)

VCS 7394: Principles of Surgery Laboratory

Credits: 1. Contact Hours: Laboratory 3.

General principles of surgery of companion animals. (Typically Offered: Spring)

VCS 7395: Small Animal Surgery

Credits: 2. Contact Hours: Lecture 2.

Small animal surgery. (Typically Offered: Spring)

VCS 7396: Fundamentals in Equine Practice

Credits: 2. Contact Hours: Lecture 2.

This elective course is an introduction and overview of the clinical aspects of common conditions in horses and related conditions, including pathogenesis, clinical manifestations, diagnosis, treatment and prognosis. It is not designed to teach the student how to perform specific procedures, but rather to improve knowledge base of students interested in equine or mixed animal practice. Class will include lecture, photos, video presentations, and other formats. (Typically Offered: Spring)

VCS 7398: Anesthesiology

Credits: 2. Contact Hours: Lecture 2.

Anesthetic equipment, agents and procedures, including pain management for core species. (Typically Offered: Spring)

VCS 7399: Ophthalmology

Credits: 1. Contact Hours: Lecture 1.

Principles and techniques of medical and surgical ophthalmology. (Typically Offered: Spring)

VCS 7402: Clinical Cardiology I

Credits: 1. Contact Hours: Lecture 1.

Elective course in diagnosis and management of cardiac diseases. Emphasis on interpretation of electrocardiography. (Typically Offered: Fall)

VCS 7403: Clinical Cardiology II

Credits: 1. Contact Hours: Lecture 0.5, Discussion 0.5.

Elective course in clinical cardiology. Emphasis on common congenital and acquired cardiac diseases of companion animals. Builds on foundation of basic clinical cardiac knowledge obtained in VCS 7444; expands to cover additional diseases in greater depth (e.g. infective endocarditis, systemic and pulmonary hypertension, heartworm disease, feline arterial thromboembolism, bradyarrhythmias and cardiac pacing, congenital heart diseases and interventional correction). Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

VCS 7404: Topics in Emergency and Critical Care

Credits: 2. Contact Hours: Lecture 2.

Introduction of common topics in emergency and critical care in companion animals. General learning goals for students in this course include developing the ability to utilize physical exam skills and historical findings to triage patients and assess stability. (Typically Offered: Spring)

VCS 7405: Pet Bird and Exotic Species Medicine

Credits: 2. Contact Hours: Lecture 1, Laboratory 3.

Elective course in management and diseases of pet birds and exotic species. (Typically Offered: Spring)

VCS 7406: Introduction to Captive Wild Animal Medicine

Credits: 1. Contact Hours: Lecture 1.

Topics covering the health and welfare of non-domestic animals in captivity. Regulations specific to exotic animal ownership and exhibition will be covered. Students will discuss diseases which affect multiple taxon groups, and learn about interface diseases. Specific topics regarding the veterinary care of exotic canids, felids, ungulates, primates, Old-World Camelids, exotic equids and avian species will be discussed. Laboratories will introduce remote-delivery and restraint devices, dangerous animal handling techniques (including venomous snake handling techniques), contraception for non-domestic animals, and extra-label use of medications and vaccines in non-domestic species. (Typically Offered: Spring)

VCS 7407: Feline Internal Medicine

Credits: 1. Contact Hours: Lecture 1.

Elective course in feline internal medicine. (Typically Offered: Fall)

VCS 7409: Oncology

Credits: 2. Repeatable, maximum of 4 credits.

Elective clinical assignment in oncology.

VCS 7414: Companion Animal Nutrition

Credits: 1. Contact Hours: Lecture 1.

Elective course in small animal and equine nutrition. (Typically Offered: Spring)

VCS 7415: Advanced Small Animal Dermatology

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Elective course in dermatology. Offered on a satisfactory-fail basis only.
(Typically Offered: Fall, Spring)

VCS 7419: Preceptorship in Companion Animal/Equine Veterinary Medical Practice

Credits: 2-6. Contact Hours: Laboratory 6.

Repeatable, maximum of 6 credits.

Elective course in veterinary practice under the guidance of veterinarians in approved practice settings. Maximum of 6 credits in 2 credit increments. Instructor Permission needed if not a VM4 classification.
(Typically Offered: Fall, Spring, Summer)

VCS 7420: Practicum

Credits: Required. Repeatable.

External practical experiences in the fourth year curriculum for additional professional development of the veterinary student. Instructor Permission needed if not a WM4 classification. Offered on a satisfactory-fail basis only.

VCS 7423: Zoo Preceptorship

Credits: 2-12. Repeatable, maximum of 12 credits.

Elective course in veterinary practice under the guidance of trained zoo veterinarians in approved practice settings. Maximum of 12 credits.
(Typically Offered: Fall, Spring, Summer)

VCS 7425X: Rotation in Exotic Pet & Wildlife Medicine Clinical and Surgical Skills

Credits: 2.

Opportunity for 4th year veterinary students to learn appropriate restraint techniques, radiographic positioning and interpretation, emergency triage, physical examination, and surgical skills for exotic companion animals (birds, rodents, rabbits, ferrets and pet reptiles) and wildlife. The course will also include rabbit dentistry techniques. The purpose of this course is to give students the tools to be more comfortable in the handling, diagnostics, and treatment of exotic animals and native wildlife species.
(Typically Offered: Summer)

VCS 7436: Small Animal Internal Medicine

Credits: 3. Contact Hours: Lecture 3.

Clinical diagnosis and treatment of diseases of small animals. (Typically Offered: Fall)

VCS 7437: Small Animal Shelter Medicine

Credits: 2. Contact Hours: Lecture 2.

Repeatable.

A 2-week elective rotation at an animal shelter/humane society that works with the public to place pets in homes. This rotation will encompass population medicine (medicine, surgery, intake, adoption, behavior and temperament, neglect and cruelty) that animal shelters deal with on a daily basis. The selected animal shelter/humane society must have a veterinarian(s) on staff and be approved by the course coordinator. More than one VCS 7437 may be taken upon approval of the course coordinator.

VCS 7440: Introduction to Clinics

Credits: Required. Contact Hours: Laboratory 4.

Rotating assignments through multiple sections within the Veterinary Medical Center. (Typically Offered: Spring)

VCS 7441: Canine Rehabilitation

Credits: 2.

Elective clinical assignment in rehabilitation.

VCS 7443: Equine Lameness

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Orthopedic diseases of the equine. (Typically Offered: Spring)

VCS 7444: Small Animal Medicine

Credits: 4. Contact Hours: Lecture 4.

Clinical diagnosis and treatment of diseases of small animals. (Typically Offered: Fall, Spring)

VCS 7445: Equine Medicine

Credits: 2. Contact Hours: Lecture 2.

Clinical diagnosis and treatment of diseases of equine. (Typically Offered: Fall)

VCS 7446: Clinical Neurology

Credits: 2. Repeatable.

Clinical rotation in neurology with an emphasis on neurolocalization, disease processes, use of diagnostics in medical and surgical neurology and treatment options. Exposure to neurosurgical techniques.

VCS 7447: Equine Veterinary Diagnostic Skills

Credits: 2. Repeatable.

Hands on experience with equine veterinary diagnostic skills related to theriogenology, medicine, surgery, radiology, and ophthalmology. Preference to equine track student. (Typically Offered: Spring)

VCS 7448: Diagnostic Imaging and Radiobiology

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Essentials of diagnostic image interpretation. Essentials of radiobiology, radiation therapy and protection from radiation. (Typically Offered: Fall, Spring)

VCS 7449B: Junior Surgery Laboratory: Traditional Curriculum

Credits: 3. Contact Hours: Lecture 1, Laboratory 6.

Repeatable.

This laboratory introduces the student to anesthetic and surgical principles and techniques that can be applied to all animal species. Provides a broader range of surgical experiences throughout the laboratory. (Typically Offered: Fall)

VCS 7451B: Advanced Junior Surgery Laboratory: Traditional Curriculum

Credits: 2. Contact Hours: Lecture 1, Laboratory 6.

Repeatable.

8 weeks. Continuation of surgical laboratory experience. Techniques and advanced principles learned are applicable to all animal species. Exposure to more advanced surgical techniques with most surgical principles. (Typically Offered: Spring)

VCS 7451C: Advanced Junior Surgery Laboratory: Traditional Curriculum

Credits: 2. Contact Hours: Lecture 1, Laboratory 6.

Repeatable.

8 weeks. Continuation of surgical laboratory experience. Techniques and advanced principles learned are applicable to all animal species. A second repeat for students with a special interest in small animal surgery. (Typically Offered: Spring)

VCS 7452: Clinical Dermatology

Credits: 2. Repeatable.

Study of clinical dermatological problems via computer-aided instruction, case simulations, and/or lectures. Clinical management of cases presented to Veterinary Medical Center. Instructor Permission needed if not a VM4 classification.

VCS 7453: Small Animal Medicine I

Credits: 2. Contact Hours: Laboratory 6.

Repeatable, maximum of 2 credits.

Clinical assignment in small animal medicine.

VCS 7455: Small Animal Soft Tissue Surgery

Credits: 2. Contact Hours: Laboratory 6.

Repeatable.

Clinical assignment in soft tissue surgery.

VCS 7456: Small Animal Orthopedic Surgery

Credits: 2. Contact Hours: Laboratory 6.

Repeatable.

Clinical assignment in orthopedic surgery.

VCS 7457: Equine Medicine

Credits: 2. Contact Hours: Laboratory 4.

Repeatable.

Clinical assignment in equine medicine.

VCS 7458: Equine Surgery

Credits: 2. Contact Hours: Laboratory 4.

Repeatable.

Clinical assignment in equine surgery.

VCS 7459A: Small Animal Overpopulation Medicine and Surgery :Nebraska Humane Society, Omaha NE

Credits: 2. Contact Hours: Laboratory 4.

A 2-week surgical emphasis, elective rotation at a humane society that addresses the issues facing veterinarians and non-veterinary humane society personnel who deal with small animal overpopulation issues. Each section can be taken for credit once.

VCS 7459C: Small Animal Overpopulation Medicine and Surgery: WaySide Waifs, Kansas City MO

Credits: 2. Contact Hours: Laboratory 4.

A 2-week surgical emphasis, elective rotation at a humane society that addresses the issues facing veterinarians and non-veterinary humane society personnel who deal with small animal overpopulation issues. Each section can be taken for credit once.

VCS 7459D: Small Animal Overpopulation Medicine and Surgery: Boulder Humane Society, Boulder, CO

Credits: 2. Contact Hours: Laboratory 4.

A 2-week surgical emphasis, elective rotation at a humane society that addresses the issues facing veterinarians and non-veterinary humane society personnel who deal with small animal overpopulation issues. Each section can be taken for credit once.

VCS 7459E: Small Animal Overpopulation Medicine and Surgery: ASPCA Spay/Neuter Alliance, Ashville, NC

Credits: 2. Contact Hours: Laboratory 4.

A 2-week surgical emphasis, elective rotation at a humane society that addresses the issues facing veterinarians and non-veterinary humane society personnel who deal with small animal overpopulation issues. Each section can be taken for credit once.

VCS 7460: Radiology

Credits: 2. Contact Hours: Laboratory 6.

Repeatable.

Clinical assignment in veterinary radiology.

VCS 7463: Primary Care

Credits: 2. Contact Hours: Laboratory 6.

Repeatable, maximum of 4 credits.

Clinical experience in hospital based general practice.

VCS 7464: Equine Field Services

Credits: 2. Contact Hours: Laboratory 4.

Repeatable.

Clinical assignment in equine ambulatory practice.

VCS 7465: Farrier

Credits: 2. Contact Hours: Laboratory 4.

Elective clinical assignment on the principles and practices of normal and therapeutic horseshoeing and equine foot care.

VCS 7466: Anesthesiology

Credits: 2. Contact Hours: Laboratory 6.

Repeatable.

Clinical assignment in small animal and large animal anesthesiology.

VCS 7468: Intensive Care

Credits: 4. Contact Hours: Laboratory 12.

Repeatable.

Clinical assignment to provide supervision of hospital cases requiring intensive care and including emergency cases.

VCS 7469: Ophthalmology

Credits: 2. Contact Hours: Laboratory 6.

Repeatable.

Clinical assignment in ophthalmology.

VCS 7475: Cardiology Rotation

Credits: 2. Contact Hours: Laboratory 4.

Repeatable.

Elective clinical assignment in cardiology.

VCS 7476E: Equine Anesthesiology

Credits: 2. Contact Hours: Laboratory 4.

Repeatable.

Assignments in equine, small animal, and large animal anesthesiology.

Experience includes case work-up, management and recovery.

Understanding of the unique physiology and potential complications of anesthetized patients. Pharmacology of commonly used drugs. Specific protocols and management for both field and general anesthesia.

VCS 7476S: Small Animal Anesthesiology

Credits: 2. Contact Hours: Laboratory 4.

Repeatable.

Assignments in equine, small animal, and large animal anesthesiology.

Experience includes case work-up, management and recovery.

Understanding of the unique physiology and potential complications of anesthetized patients. Pharmacology of commonly used drugs. Specific protocols and management for both field and general anesthesia.

VCS 7478: Intensive and Critical Care

Credits: 2. Contact Hours: Lecture 2.

Repeatable, maximum of 4 credits.

Elective clinical assignment in intensive care. (Typically Offered: Fall, Spring, Summer)

VCS 7480: Veterinary Dentistry

Credits: 1. Contact Hours: Lecture 1.

All aspects of veterinary dentistry, prophylaxis, endodontics, and orthodontics. This course is an on-line course. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

VCS 7481: Advanced Equine Dentistry

Credits: 2. Contact Hours: Laboratory 4.

Clinical rotation in equine dentistry with an emphasis on routine equine dental examinations, specialized equipment, and corrective procedures.

Offered only offered for one 2-week rotation. Enrollment is limited.

(Typically Offered: Spring)

VCS 7484X: Clinical Practice in Diverse Communities

Credits: 2.

Two week rotation for fourth year veterinary students working with equine patients both in the hospital and field settings. This rotation includes a community service component, which will include lecture time on relevant topics and a veterinary service trip to the Crow Creek Tribal Reservation in Fort Thompson, SD. Five-day trip, providing experience in preparing, setting up, and running an equine and small animal veterinary clinic to serve the tribal community.

VCS 7490: Independent Study

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Independent Study in veterinary medicine focusing on basic / translational research or learning issues. Enrollment in this course is not appropriate for clinical experiences in the Veterinary Medical Center or extramural experiences in clinical veterinary practice (i.e., preceptorships).

VCS 7492: Orientation for International Experience

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

8 weeks. Predeparture orientation for group study abroad. Cultural considerations for the study abroad experience and a conversational language introduction. Out of class work may be assigned. (Typically Offered: Spring)

VCS 7495: Grand Rounds Presentations

Credits: Required. Contact Hours: Lecture 1.
Seminars and case presentations on selected subjects by fourth year students of the College of Veterinary Medicine. Completion of a seminar presentation is required for graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

VCS 7496: International Experience

Credits: 1-12. Repeatable, maximum of 12 credits.
International Preceptorships and Study Abroad Group programs. Opportunities for students to be involved in applied clinical, production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities. Offered on a satisfactory-fail basis only.

Veterinary Diagnostic and Production Animal Medicine Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

Courses in veterinary diagnostic and production animal medicine provide students with basic and advanced skills in diagnostics, reproduction, medicine, surgery, production, welfare, and health management of the major livestock species. Students in the fourth year of the curriculum in veterinary medicine may elect to take advanced courses in beef, dairy, swine, poultry or small ruminant production medicine. Elective courses may include preceptorships in private practices, at other veterinary schools, in research and disease control laboratories, or in related agribusinesses.

Production animal medicine emphasizes the integration of veterinary medicine with nutrition, genetics, economics, food safety, and other disciplines, enabling graduates to acquire and use a broad knowledge base to support the health and improve the production and efficiency of the food supply chain.

Graduate Study in Veterinary Preventive Medicine

Veterinary Preventive Medicine is a multidisciplinary program focused on the study of health and disease in populations. The various disciplines represented in the program are unified by a common approach based on the application of epidemiological methods to problem solving in populations. Through their research and course work, students will learn to understand and apply a variety of disciplines, principles, and techniques to population health issues involving environmental, ecological, nutritional, genetic, infectious, or non-infectious diseases.

Graduate study in Veterinary Preventive Medicine will provide valuable skills and experience to persons interested in public health, food safety, emerging infectious diseases, zoo or wildlife health, and livestock health. A degree in Veterinary Preventive Medicine may be valuable for individuals considering a future in the biological or pharmaceutical industries, government regulatory agencies, public veterinary practice, international service agencies responsible for population health or progressive private practice.

Veterinary Preventive Medicine is an interdepartmental major administered by the Department of Veterinary Diagnostic and Production Animal Medicine (VDPAM) with participating faculty from colleges and departments across the University and collaborators from the National Animal Disease Center (USDA:ARS) and the National Veterinary Services Laboratories (USDA:APHIS) located in Ames, Iowa.

Both thesis and non-thesis options are available and require the completion of a minimum of 30 graduate credits for thesis and 36 graduate credits for non-thesis and a final examination.

Program of Study: Master of Science in Veterinary Preventive Medicine (Thesis Option) 30 credits		
STAT 5870	Statistical Methods for Research Workers	4
VDPAM 5270	Applied Statistical Methods in Population Studies	3
VDPAM 5280	Principles of Epidemiology and Population Health	3
VDPAM 5290	Epidemiological Methods in Population Research	3
VDPAM 6990	Research	1-30
Research or Electives to total at least 17 additional credits		

Program of Study: Master of Science in Veterinary Preventive Medicine (Non-Thesis Option) 36 Credits		
STAT 5870	Statistical Methods for Research Workers	4
VDPAM 5270	Applied Statistical Methods in Population Studies	3
VDPAM 5280	Principles of Epidemiology and Population Health	3
VDPAM 5290	Epidemiological Methods in Population Research	3
VDPAM 5900	Special Topics	1-3
One Additional STAT course from the following		3
STAT 5710	Introduction to Experimental Design	
STAT 5730	Introduction to Survey Sampling	
STAT 5750	Introduction to Multivariate Data Analysis	
VDPAM 5990	Creative Component	
Creative Component and Electives to total 18 additional credits		

Graduate Certificate in Veterinary Preventive Medicine

Veterinary Diagnostic and Production Animal Medicine offers a graduate certificate for DVMs, concurrent DVM students and non-DVMs in allied animal industries in Veterinary Preventive Medicine.

Students in this program are able to select courses that focus in areas of animal welfare, diagnostics, food safety, evidence-based medicine, surgery, pathology, microbiology, epidemiology, public health, statistics and production medicine.

The purpose of the graduate certificate in Veterinary Preventive Medicine for industry professionals is to address the continued and advanced needs of animal health professionals. The certificate enables professionals to gain recognition for a skill set that includes epidemiology, risk assessment, production medicine and animal welfare. A graduate certificate may be used to increase knowledge in a new or emerging area of interest to the candidate. As such, it may be used to formally gain recognition for retraining to meet the needs of today's food production systems.

The graduate certificate for concurrent DVM students is designed to give additional skills to students planning on working with populations of animals. Using a combination of on-line and dual listed graduate level courses, the program is designed to enable DVM students to complete the certificate while studying for their DVM degree. Students enrolled in any US-based DVM program are able to complete a graduate certificate at ISU using a combination of on-line and transfer graduate level courses.

The graduate certificate is an additional qualification awarded by Iowa State University after successful completion of 15 graduate level credits. A graduate certificate is different from continuing education as the certificate includes an academic transcript from Iowa State University. Students complete the same courses graduate students do with the the same expectations for all assignments and exams.

The program is available as a strictly on-line (off campus) delivery method or as a combination of classroom-based and on-line course offerings providing maximum flexibility in scheduling.

Program of Study: Graduate Certificate in Veterinary Preventive Medicine (15 credits)

Certificate required core courses

STAT 5870	Statistical Methods for Research Workers

VDPAM 5280	Principles of Epidemiology and Population Health

Remaining 3 core credits can be selected from

VDPAM 5270	Applied Statistical Methods in Population Studies

VDPAM 5290	Epidemiological Methods in Population Research

VDPAM 5700	Risk Assessment for Food, Agriculture and Veterinary Medicine

5 elective credits from any approved ISU graduate course	5

Total Credits

15

Courses primarily for professional curriculum students:

VDPAM 4260: Veterinary Toxicology

(Dual-listed with VDPAM 5260/ TOX 5260). (Cross-listed with TOX 4260).

Credits: 3. Contact Hours: Lecture 3.

Study of toxicological diseases of animals emphasizing clinical recognition, circumstances of poisoning, differential diagnosis with clinical and laboratory data, therapeutic procedures, preventive management and public health implications. Supplemented with case-based materials. (Typically Offered: Spring)

VDPAM 4280: Principles of Epidemiology and Population Health

(Cross-listed with MICRO 4280/ VMPM 4280).

Credits: 3. Contact Hours: Lecture 3.

Epidemiology of disease in populations. Disease causality, observational study design and approaches to epidemiologic investigations. This course is available on campus and by distance. (Typically Offered: Spring)

VDPAM 4870: Livestock Disease Prevention

Credits: 3. Contact Hours: Lecture 3.

The course is designed for both the pre-veterinary and animal science majors who have an interest in production animal health, disease prevention methods, epidemiology of economically important agents, and the ecology of currently important pathogens found in North American livestock industries. It will focus on disease prevention principles for individuals and large production population systems. (Typically Offered: Fall)

VDPAM 4890: Issues in Food Safety

(Cross-listed with ANS 4890/ HSPM 4890/ FSHN 4890).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (Credit or concurrent enrollment in FSHN 1010 or FSHN 2720 or HSPM 2330); (FSHN 4190 or FSHN 4200); FSHN 4030

Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective. (Typically Offered: Spring)

Courses primarily for graduate students, open to qualified undergraduates:

7

VDPAM 5070: Evidence Based Clinical Decision Making

Credits: 1. Contact Hours: Lecture 1.

Discussion, lectures and laboratories to assess the quality and significance of medical evidence in making informed decisions about the treatment of individual animals and animal populations. (Typically Offered: Spring)

VDPAM 5080: Poultry Diseases

Credits: 2. Contact Hours: Lecture 2.

Discussion, lectures and laboratories to assess the quality and significance of medical evidence in making informed decisions about the treatment of individual animals and animal populations. Offered even-numbered years. (Typically Offered: Spring)

VDPAM 5140: Veterinary Practice Entrepreneurship

Credits: 2-3. Contact Hours: Lecture 3.

Formal exposure to the entrepreneurial and business skills necessary to own and operate a successful veterinary practice or other small business opportunity. Personal finance, marketing, human resource management, general accounting, site assessment, location demographics, practice valuation, and a host of other issues which must be considered when purchasing or starting a new business are covered. Class instruction will be delivered by successful practice and business owners with examples from real world experience. (Typically Offered: Spring)

VDPAM 5260: Veterinary Toxicology

(Dual-listed with VDPAM 4260/ TOX 4260). (Cross-listed with TOX 5260).

Credits: 3. Contact Hours: Lecture 3.

Study of toxicological diseases of animals emphasizing clinical recognition, circumstances of poisoning, differential diagnosis with clinical and laboratory data, therapeutic procedures, preventive management and public health implications. Supplemented with case-based materials. (Typically Offered: Spring)

VDPAM 5270: Applied Statistical Methods in Population Studies

Credits: 3. Contact Hours: Lecture 3.

ANOVA, Linear Regression, Model Selection, Mixed Models, ANCOVA, Repeated Measurement Analysis, MANOVA, Nonparametric Methods, Diagnostic Test Evaluation, ROC Curve Analysis, Generalized Linear Models, Logistic Regression, Survival Analysis, Cox Proportional Hazards Regression, Count Data Analyses. This course is available on campus and by distance. Offered odd-numbered years. (Typically Offered: Fall)

VDPAM 5280: Principles of Epidemiology and Population Health

(Cross-listed with VMPPM 5280).

Credits: 3. Contact Hours: Lecture 3.

Epidemiology of disease in populations. Disease causality, observational study design and approaches to epidemiologic investigations. This course is available on campus and by distance. (Typically Offered: Spring)

VDPAM 5290: Epidemiological Methods in Population Research

Credits: 3. Contact Hours: Lecture 3.

Train students on selecting the proper statistical model to conduct statistical analysis in the context of epidemiological studies. Train students to report and interpret data collected from experimental (clinical trials), observational (cross-sectional, case-control, cohort) or field-based studies incorporating the information covered in previous epidemiology/biostatistics courses and this course, and how to communicate the findings with the end-users. Introduce other methods that can be used when analyzing epidemiological studies. This course is available on campus and by distance. Offered even-numbered years. (Typically Offered: Fall)

VDPAM 5420A: Introduction to Molecular Biology Techniques: DNA Techniques

(Cross-listed with BMS 5420A/ EEOB 5420A/ FSHN 5420A/ GDCB 5420A/ HORT 5420A/ NREM 5420A/ NUTRS 5420A/ BBMB 5420A/ VMPPM 5420A).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

VDPAM 5420B: Introduction to Molecular Biology Techniques: Protein

(Cross-listed with BMS 5420B/ EEOB 5420B/ FSHN 5420B/ GDCB 5420B/ HORT 5420B/ NREM 5420B/ NUTRS 5420B/ BBMB 5420B).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only. (Typically Offered: Spring, Summer)

VDPAM 5420C: Introduction to Molecular Biology Techniques: Cell Techniques

(Cross-listed with BMS 5420C/ EEOB 5420C/ FSHN 5420C/ GDCB 5420C/ HORT 5420C/ NREM 5420C/ NUTRS 5420C/ VMPPM 5420C/ BBMB 5420C).

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Includes cell biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

VDPAM 5420D: Introduction to Molecular Biology Techniques: Plant Transformation

(Cross-listed with BMS 5420D/ EEOB 5420D/ FSHN 5420D/ GDCB 5420D/ HORT 5420D/ NREM 5420D/ NUTRS 5420D/ VMPPM 5420D/ BBMB 5420D).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

VDPAM 5420E: Introduction to Molecular Biology Techniques: Proteomics

(Cross-listed with BMS 5420E/ EEOB 5420E/ FSHN 5420E/ GDCB 5420E/ HORT 5420E/ NREM 5420E/ NUTRS 5420E/ VMPPM 5420E/ BBMB 5420E).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

VDPAM 5420F: Introduction to Molecular Biology Techniques: Metabolomics

(Cross-listed with BMS 5420F/ EEOB 5420F/ FSHN 5420F/ GDCB 5420F/ HORT 5420F/ NREM 5420F/ NUTRS 5420F/ VMPPM 5420F/ BBMB 5420F).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

VDPAM 5420G: Introduction to Molecular Biology Techniques: Genomic

(Cross-listed with BMS 5420G/ EEOB 5420G/ FSHN 5420G/ GDCB 5420G/ HORT 5420G/ NREM 5420G/ NUTRS 5420G/ VMPPM 5420G/ BBMB 5420G).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

VDPAM 5460: Clinical and Diagnostic Toxicology

(Cross-listed with TOX 5460).

Credits: 1-3. Contact Hours: Laboratory 3.

Repeatable.

Advanced study of current problems and issues in veterinary toxicology. Emphasis on problem solving and interpreting clinical cases while utilizing clinical, epidemiological, and laboratory resources. Course consists highly of clinical case based material. (Typically Offered: Fall, Spring, Summer)

VDPAM 5510: Advanced Veterinary Diagnostic Pathology

Credits: 1-3. Contact Hours: Laboratory 3.

Repeatable.

Laboratory diagnosis of animal diseases with emphasis on gross and microscopic lesion description. Caseload is focused heavily on infectious diseases of food animals. (Typically Offered: Fall, Spring, Summer)

VDPAM 5600: Ecology of Infectious Diseases

Credits: 3. Contact Hours: Lecture 3.

Topics of applied ecology of infectious diseases. Specific objectives include: a) understanding dynamics of pathogen transmission within and between population; b) how to reduce risk of pathogen introduction in populations; c) how to early detect pathogens and classify herds according to disease status; d) how to quantify pathogen transmission and impact in animal populations; e) applying and measure the effect of interventions to manipulate disease transmission dynamics within and between populations. Develop skills to prevent, detect and/or significantly control/eliminate animal health issues from animal populations. Learn how to quantify health issues and estimate the value of interventions to influence and mitigate health problems. Offered odd-numbered years. (Typically Offered: Spring)

VDPAM 5620X: Applied Diagnostic Technologies and Medicine for Infectious Disease

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Veterinary diagnostics and diagnostic medicine for infectious diseases in animal populations, mostly livestock, and clinical applications. Specific objectives include: understanding diagnostic process; mechanics of laboratory diagnostic methods; test development and validation; optimizing diagnostic outcomes; and applying diagnostic data to disease investigation and/or intervention. Additionally, students are expected to present a diagnostic relevant subject and participate in case review and discussion. On-line and can be asynchronous from time to time. Offered even-numbered years. (Typically Offered: Fall)

VDPAM 5640: Animal Welfare Science and Research

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Animal welfare is increasingly a key component of societal decisions about animal use, sustainable development and human-animal relationships. Understanding animal welfare as a scientific discipline, with primary focus on veterinary, biomedical and animal science disciplines. Explore fundamental and applied approaches to animal welfare science, including experimental design, data analysis and interpretation of results. Topics selected will reflect student interests, and may include animal welfare assessment and assurance, animal cognition, pain assessment and mitigation, and animal models used in biomedical research. Offered even-numbered years. (Typically Offered: Spring)

VDPAM 5670X: Design, Implementation and Analysis of Field Studies in Food Animals

Credits: 3. Contact Hours: Lecture 3.

Design of field trials to test hypotheses related to biological outcomes in food animal production. Topics include field trial designs and how-to implement these trials under field/commercial conditions; and how to calculate sample size given different type of outcomes and covers the proper statistical analyses, interpretation, and communication of the results. Invited speakers will share how they use field trials in their daily practice. Case studies. (Typically Offered: Fall)

VDPAM 5700: Risk Assessment for Food, Agriculture and Veterinary Medicine

(Cross-listed with TOX 5700/ AGRON 5700).

Credits: 3. Contact Hours: Lecture 3.

Risk assessment principles as applied to biological systems. Exposure and effects characterization in human and animal health and ecological risk assessment. Risk analysis frameworks and regulatory decision-making. Introduction to quantitative methods for risk assessment using epidemiological and distributional analysis. Uncertainty analysis. Offered odd-numbered years. (Typically Offered: Fall)

VDPAM 5810: Advanced Cow/Calf Production Medicine

Credits: 2. Contact Hours: Lecture 1.5, Laboratory 1.5.

Two-week senior elective that will focus on the economics of animal disease in cow/calf operations. Evidence based medicine and epidemiological principles will be used in investigation of disease outbreaks. Extensive partial budgeting used. Students will complete at least two disease investigations involving outbreaks in commercial cow/calf operations and communicate their findings to the class, the herd owner, and local practitioner. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Spring)

VDPAM 5900: Special Topics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Topics in medicine, surgery, theriogenology; beef, swine, dairy, or sheep production medicine. (Typically Offered: Fall, Spring, Summer)

VDPAM 5960: International Experience

Credits: 1-12. Repeatable.

International Preceptorship. (Typically Offered: Fall, Spring, Summer)

VDPAM 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**VDPAM 6500: Swine Diagnostic Medicine**

Credits: 4. Contact Hours: Lecture 4.

A detailed study of swine diseases emphasizing the pathogenesis and diagnosis of swine respiratory, enteric, reproduction, metabolic, and septicemic diseases. Course activities include interpretation of diagnostic case reports and development of diagnostic plans for specific disease objectives. (Typically Offered: Fall)

VDPAM 6540: Comparative Antimicrobial Clinical Pharmacology

Credits: 2. Contact Hours: Lecture 2.

Initial antimicrobial selection for infectious diseases of domestic animals. The antimicrobial drug groups will be examined, stressing pharmacokinetics, minimal inhibitory concentrations, and the use of these parameters to select appropriate compounds and dosages for maximum efficacy. Offered odd-numbered years. (Typically Offered: Fall)

VDPAM 6550: Advanced Swine Production Medicine

Credits: 4. Contact Hours: Lecture 4.

Detailed overview of applied techniques used in swine production medicine; production modeling and record analysis, facility design and management, analysis of competing intervention options, design and evaluation of therapeutic and vaccination strategies, quality control procedures and food safety. Course activities include interpretation of diagnostic case reports and development of diagnostic plans for specific disease objectives. Offered odd-numbered years. (Typically Offered: Spring)

VDPAM 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Courses primarily for professional curriculum students:

VDPAM 7308: Spanish for Veterinarians

Credits: 2. Contact Hours: Lecture 2.

This course is designed to meet the needs of veterinary students who will practice in an environment in which the use of Spanish for accurate client communication is essential which includes much of our food animal industry in the state of Iowa. This is not a traditional Spanish language course. To be successful, students taking the course should have a basic knowledge of Spanish pronunciation, grammar and syntax. (Typically Offered: Spring)

VDPAM 7309: Introduction to Production Animal Informatics

Credits: 1. Contact Hours: Lecture 1.

The fundamentals of how clinical, diagnostic, production and financial information is obtained and used by production animal operations will be presented. Students will acquire skills to create and use spreadsheets for manipulating and summarizing data. They will also acquire knowledge of where to find inexpensive and readily available resources with information on how to use spreadsheets and other software. Students will also have the opportunity to work with record keeping programs used by food animal operations. (Typically Offered: Spring)

VDPAM 7310: Introduction to Production Medicine

Credits: 2. Contact Hours: Lecture 2.

The role of the veterinarian in the management of animal health and production in populations including evaluation tools in dairy and beef cattle herds, beef feedlots and swine herds will be described. Provides veterinary students with a starting point to understand the principles and techniques that are the basis of food-animal population health diagnosis management programs. Course available on-line, attendance is not required. (Typically Offered: Spring)

VDPAM 7312: Introduction to Animal Welfare

Credits: 1. Contact Hours: Lecture 1.

A continuation of the Veterinarian in Society series. The objective of this course is to develop knowledge of the fundamental principles of animal welfare, in terms of science, ethics and cultural components. (Typically Offered: Spring)

VDPAM 7340: Clinical Foundations

Credits: 1. Contact Hours: Laboratory 2.

One week, hands-on course at Iowa State University; introduction to food supply veterinary medicine covering overviews of major animal agriculture species (beef, dairy, swine, small ruminants, and camelid), production systems, behavior, welfare, handling and restraint, examination techniques, biosecurity, epidemiology and food safety. Students will visit farms owned by Iowa State University and private clients of Food Animal and Camelid Field Services to perform hands-on clinical skills. Attendance is mandatory. Biosecurity: All students must follow current college policies regarding animal contact following foreign travel. Additionally, no swine contact is allowed within 48 hours of the swine farm visit. Required equipment includes coveralls, rubber boots, thermometer and stethoscope. (Typically Offered: Spring)

VDPAM 7351: Bovine Embryo Transfer and Related Technology

Credits: 2. Contact Hours: Lecture 2.

This course will meet for two hours once each week of the Spring Semester. The first hour will be traditional lecture and the second hour will be a combination of student projects, labs and demonstrations of applied clinical procedures. Bovine embryo transfer and closely related topics such as: female reproductive physiology, estrus synchronization, semen sexing and reproductive disease will be emphasized. In addition, several class periods will be devoted to the use of ultrasound for diagnosis of reproductive and non-reproductive conditions. (Typically Offered: Spring)

VDPAM 7365: Animal Welfare Judging and Assessment

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Preparation for competition in the Intercollegiate Animal Welfare Judging Contest. Development of critical appraisal and oral communication skills in regard to animal welfare. Animal behavior, physiology, health and performance parameters, basic husbandry, housing and preventive care will be explored for select farmed, companion and exotic species. Optional field trips. Course is open to Vet Med, Undergraduate and Graduate students. (Typically Offered: Fall)

VDPAM 7402A: Advanced Dairy Production Informatics: Lecture Series

Credits: 2. Contact Hours: Lecture 2.

Advanced coverage of concepts related to collection, manipulation, analysis and reporting of information used by dairy farms and their consultants. Hands on experience with Dairy Comp 3050 and PC Dart as well as other dairy management and information software. (Typically Offered: Spring)

VDPAM 7402B: Advanced Dairy Production Informatics: Experience I

Credits: 2. Contact Hours: Lecture 2.

Independent records analysis and reporting of information used by dairy farms and their consultants. Hands on experience with Dairy Comp 3050 and PC Dart. (Typically Offered: Fall, Spring)

VDPAM 7402C: Advanced Dairy Production Informatics: Experience II

Credits: 2. Contact Hours: Lecture 2.

Independent records analysis and reporting of information used by dairy farms and their consultants. Hands on experience with Dairy Comp 3050 and PC Dart. (Typically Offered: Fall, Spring)

VDPAM 7402D: Advanced Dairy Production Informatics: Experience III

Credits: 2. Contact Hours: Lecture 2.

Independent records analysis and reporting of information used by dairy farms and their consultants. Hands on experience with Dairy Comp 3050 and PC Dart. (Typically Offered: Fall, Spring)

VDPAM 7407: Evidence Based Clinical Decision Making

Credits: 1. Contact Hours: Lecture 1.

Discussion, lectures and laboratories to assess the quality and significance of medical evidence in making informed decisions about the treatment of individual animals and animal populations. (Typically Offered: Spring)

VDPAM 7408: Poultry Diseases

Credits: 2. Contact Hours: Lecture 2.

Bacterial, viral, parasitic, and nutritional diseases of domestic poultry and gamebirds; biosecurity, immunization, and management procedures to prevent poultry diseases. This course includes wet labs. Additional assignments required for graduate level credit. (Typically Offered: Spring)

VDPAM 7409: Veterinary Practice Management and Organization

Credits: 2. Contact Hours: Lecture 2.

An A to Z introduction to proven veterinary practice management methods and strategies. The student will follow a detailed hands-on workbook describing most of the processes and procedures of day to day veterinary practice. Class content will be delivered via online modules. (Typically Offered: Fall)

VDPAM 7414: Veterinary Practice Entrepreneurship

Credits: 2-3. Contact Hours: Lecture 3.

Formal exposure to the entrepreneurial and business skills necessary to own and operate a successful veterinary practice or other small business opportunity. Personal finance, marketing, human resource management, general accounting, site assessment, location demographics, practice valuation, and a host of other issues which must be considered when purchasing or starting a new business are covered. Class instruction will be delivered by successful practice and business owners with examples from real world experience. (Typically Offered: Spring)

VDPAM 7416: Bovine Reproduction Evaluation Laboratory

Credits: 1. Contact Hours: Laboratory 4.

Repeatable.

Bovine rectal palpation techniques will be repetitively taught in 7 four-hour sessions. Students will also learn techniques of epidural anesthesia, artificial insemination, pregnancy staging and ultrasonic imaging. University-owned cattle will be used. Spring semester only offered one section. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Fall, Spring)

VDPAM 7419: Advanced Swine Production Informatics

Credits: 1. Contact Hours: Lecture 1.

Advanced coverage of concepts related to the collection, manipulation, analysis, and reporting of information used by swine production companies. A quick review of modern swine production and measures of productivity ensures students have a firm base for applying the informatics. This course introduces students to one of the most commonly used swine record-keeping systems in the industry and gives them access to actual production data with which to work. Students then learn how to generate and interpret regularly used reports and will use pivot tables and budgeting models in Excel. The importance of data entry and validation and how to transform data into useful knowledge are then addressed. Fundamentals of financial information, cost-benefit analysis and using budgeting models to assess the economics of animal health interventions are then applied. (Typically Offered: Fall)

VDPAM 7420A: Applied Production Animal Medicine Preceptorship: Food Animal Emphasis

Credits: 1-6. Repeatable.

Advanced course in mixed animal production medicine with a food animal emphasis in veterinary practice settings. Requires 40 hours of clinical experience per week. Assignments will be preceptorships with a practicing veterinarian, governmental agency and/or production unit. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Fall, Spring, Summer)

VDPAM 7420B: Applied Production Animal Medicine Preceptorship: General Mixed Animal Practice

Credits: 1-6. Repeatable.

Advanced course in production animal medicine in general mixed animal veterinary practice settings. Requires forty hours clinical experience per week. Assignments will be preceptorships with a practicing veterinarian, governmental agency and/or production unit. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Fall, Spring, Summer)

VDPAM 7420C: Applied Production Animal Medicine Preceptorship: Government Agency or Food Processing Company

Credits: 1-6. Repeatable.

Advanced course in production animal medicine with emphasis on government agency or food processing company in veterinary practice settings. Forty hours clinical experience per week. Assignments will be preceptorships with a governmental agency and/or production unit. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Fall, Spring, Summer)

VDPAM 7420P: Applied Poultry Production Medicine Preceptorship

Credits: 1-6. Repeatable, maximum of 6 credits.

Unique, highly relevant, hands-on veterinary experience for participating students. Development of poultry-specific practice skill sets. Documented experience that is highly valued by future poultry employers. Enhanced cultural and professional awareness for participating students through interaction with active poultry practitioners. Exposure to diverse poultry practice and production environments. (Typically Offered: Fall, Spring, Summer)

VDPAM 7421A: Great Plains Veterinary Educational Center: Calving

Credits: 1.

The Calving Elective provides an opportunity to expand knowledge and experience in all phases of calving management. The program is structured around normal calving operations at USMARC including emergency duties. Activities that take place during the Calving Elective including the diagnosis, treatment, and management of many commonly encountered conditions in the dam and calf, necropsies, and daily discussions. Participation in a caesarian section is not guaranteed. Student must be able to provide own transportation to each site. (Typically Offered: Spring)

VDPAM 7421B: Great Plains Veterinary Educational Center: Bull Breeding Soundness

Credits: 1.

The Bull Breeding Soundness Examination Elective involves training in all phases of the bull fertility examination as recommended by the Society for Theriogenology. Chuteside, hand-on experience is the primary training technique for this elective with informal discussions held during the performance of breeding soundness examinations on 350 or more bulls. Student must be able to provide own transportation to each site. (Typically Offered: Spring)

VDPAM 7421D: Great Plains Veterinary Educational Center: Feedlot Management

Credits: 1.

Evaluation of production techniques and production efficiency including ration and feeding management, health management program development and evaluation, environmental management, quality assurance and field necropsy techniques. Exposure to marketing and economic considerations in feed yard decision making. A strong emphasis on population medicine, trouble shooting and problem-solving skills in the beef industry, with exposure to harvest/food safety considerations. Discussions on pharmaceutical and feed additive usage and legal implications in food supply veterinary medicine. Student must be able to provide own transportation to each site. (Typically Offered: Fall, Summer)

VDPAM 7421E: Great Plains Veterinary Educational Center: Calf Weaning Management

Credits: 1.

This is a hands-on elective in which students participate in the weaning management at the USMARC. Students will be involved with processing, feeding, finding, and treating sick calves. Additionally, students will be introduced to developing weaning rations and managing feed delivery. Students will also learn how to develop vaccination and treatment protocols and each student will have as an objective the development of their own vaccination and treatment protocol template. As time allows, students will visit commercial feed yards and cover production management topics. Student must be able to provide own transportation to each site. (Typically Offered: Fall)

VDPAM 7421F: Great Plains Veterinary Educational Center: Pregnancy Examination

Credits: 1.

The Pregnancy Examination Elective involves rectal examinations for pregnancy, chuteside data collection and data entry into a computer software program to evaluate the reproductive performance of the herd. This elective is designed for students who have some palpation experience and are interested in honing their skills. Pregnancy Examination occurs during yearly fall herd work at the USMARC, therefore, speed and accuracy will be stressed, rather than basic technique. Student must be able to provide own transportation to each site. (Typically Offered: Fall)

VDPAM 7421J: Great Plains Veterinary Educational Center: Lambing

Credits: 1.

The Lambing Elective involves students working with the USMARC lambing crew and GPVEC faculty in observations, assistance with delivery when necessary, and routine lambing duties. Students will work with veterinary personnel in sheep necropsy and health surveillance. Self-study material will be provided covering topics such as pre-breeding and breeding, pregnancy diagnosis, pregnant ewe management, pre-lambing ewe/lambing management, feeder lamb health and nutrition management, and replacement ewe and ram management. Student must be able to provide own transportation to each site. (Typically Offered: Spring)

VDPAM 7421K: Great Plains Veterinary Educational Center: Equine Dentistry

Credits: 1.

The Equine Dentistry Elective provides the opportunity for students to expand their knowledge and experience related to equine dentistry. The rotation consists of lectures on topics relevant to equine dental care and hands-on laboratories during which students practice routine dental care procedures on USMARC horses. Equine Dentistry will involve both lecture and lab time at about equal shares. Student must be able to provide own transportation to each site. (Typically Offered: Spring)

VDPAM 7421P: Great Plains Veterinary Educational Center: Bovine Surgery

Credits: 1.

The Bovine Surgery Elective is designed to give students interested in food animal surgery an opportunity to practice their surgical skills by performing penile translocations and epididymectomies on USMARC teaser bull candidates. Lectures specific to gomer bull surgery as well as other topics related to food animal surgery will be presented during this elective. Student must be able to provide own transportation to each site. (Typically Offered: Fall)

VDPAM 7421Q: Great Plains Veterinary Educational Center: Swine Husbandry

Credits: 1.

This elective provides students the opportunity to gain hands-on experience related to the daily activities of an intensively managed confinement swine unit. Rotation participants will work closely with USMARC Swine Unit personnel as they complete their daily routines in the farrowing and breeding areas of the USMARC Swine Unit and will participate in piglet delivery, neonatal pig processing, artificial and natural breeding, necropsies, and other activities as they arise. Student must be able to provide own transportation to each site. (Typically Offered: Fall, Spring)

VDPAM 7421R: Great Plains Veterinary Educational Center: Lamb Weaning Management

Credits: 1.

This elective provides the opportunity for students to develop their skills in the area of health and nutritional management of sheep immediately before and after weaning. The rotation consists of lectures on pre- and post-weaning nutrition, clinical parasitology, and prevention and control of common ovine infectious diseases. Hands-on experience during the week will take place at the USMARC Sheep Unit and will consist of walk-through and hand-on examinations of recently weaned lambs, treatment of sick lambs, inspection of weaning pen environment, investigation of herd outbreaks, and post mortem examination of all sheep mortalities. Student must be able to provide own transportation to each site. (Typically Offered: Summer)

VDPAM 7421S: Great Plains Veterinary Educational Center: Ultrasound Pregnancy Examination

Credits: 1.

The Ultrasound Pregnancy Examination Elective involves transrectal ultrasonographic examinations for pregnancy, chuteside data collection and data entry into a computer software program to evaluate the reproductive performance of the herd. This elective is designed for students who have some ultrasound experience and are interested in honing their skills. This elective occurs during yearly fall herd work at the USMARC, therefore, speed and accuracy will be stressed, rather than basic technique. Didactic instruction may include several topics in cow herd health, nutrition, management and reproductive decision making. Student must be able to provide own transportation to each site. (Typically Offered: Summer)

VDPAM 7421T: Great Plains Veterinary Educational Center: Food Animal Clinical Care and Treatment (FACCT)

Credits: 1.

This course is designed to achieve hands-on and critical thinking skills necessary to provide clinical care to cattle and sheep. Student needs will be met through structured discussions and accompanying the veterinarians in daily care of the animals at USMARC. Student must be able to provide own transportation to each site. (Typically Offered: Fall, Spring)

VDPAM 7421U: Great Plains Veterinary Educational Center: Necropsy and Diagnostic Investigations

Credits: 1.

This course is designed to develop diagnostic and critical thinking skills necessary to investigate disease outbreaks in a herd health setting. Student needs will be met through daily necropsy procedures, in depth discussions of case examples, and thorough exposure to diagnostic tests and sampling procedures. Student must be able to provide own transportation to each site. (Typically Offered: Fall, Spring)

VDPAM 7422: Beef Cattle Calving

Credits: 2. Repeatable.

This elective provides students opportunity to assist cow-calf operations with calving in Nebraska, South Dakota or other locations. These operations typically calve 300-1,000 head each spring. Calving experience is not required, but a good understanding of working around cattle is necessary. Students will be actively participating in the day to day, normal calving routine including detecting and sorting off 'springers', calf 'watch', detecting when intervention is needed and assisting delivery, caring for and monitoring newborns and dams for good health and early disease detection, tagging/processing new calves, treating calves needing intervention and performing other routine calving chores. Students need to provide their own transportation to the site and overnight stays at or near the production sites are required. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Fall, Spring, Summer)

VDPAM 7424: Preceptorship in Diagnostic Pathology.

Credits: 1-6. Repeatable.

Advanced course in production animal medicine with emphasis on gross and diagnostic pathology. Forty hours clinical experience per week. Assignments will be preceptorships with a diagnostic laboratory, veterinary pathologist, governmental agency and/or production unit. Biosecurity policies require documentation of student's presence in the USA 5 days immediately prior to the start of class. (Typically Offered: Fall, Spring)

VDPAM 7436A: Beef Records Analysis: Introduction

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Lectures will emphasize current production and evaluation techniques for beef cow/calf operations and students will learn to conduct and critically assess production and financial data using a standardized approach. Lab activities will allow students an opportunity to become Beef Quality Assurance (BQA) certified through the Iowa Beef Center. (Typically Offered: Fall)

VDPAM 7436B: Beef Records Analysis: Herd Management

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Lectures will emphasize current production and evaluation techniques for beef cow/calf operations and students will learn to conduct and critically assess production and financial data using a standardized approach. Lab activities will allow students an opportunity to work with individual beef cattle producers to identify areas for improving profitability, health, and sustainability. (Typically Offered: Spring)

VDPAM 7436C: Beef Records Analysis: Cow/Calf Preventive Medicine

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Lectures will emphasize current production and evaluation techniques for beef cow/calf operations and students will learn to conduct and critically assess production and financial data using a standardized approach. Emphasis will be on obtaining a better understanding of nutritional and reproductive management of cow herds. Lab activities will allow students an opportunity to work with individual beef cattle producers to identify areas for improving profitability, health, and sustainability. (Typically Offered: Fall)

VDPAM 7436D: Beef Records Analysis: Feedlot Production Medicine

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Lectures will emphasize current production and evaluation techniques for feedlot production and students will develop a standard treatment protocol book. Topics include respiratory disease, receiving programs, nutrition, cattle handling and environmental issues. (Typically Offered: Spring)

VDPAM 7445: Production Animal Clinical Medicine

Credits: 3. Contact Hours: Lecture 3.

Clinical diagnosis and treatment of diseases of swine, beef and dairy cattle, and small ruminants. (Typically Offered: Spring)

VDPAM 7450: Disturbances of Reproduction

Credits: 4. Contact Hours: Lecture 4.

Repeatable.

General principles of normal reproductive functions in addition to environment, management and diseases causing disturbances in reproduction. Cattle, Swine, Equine, Small Ruminant, and Small Animal species will be covered. (Typically Offered: Fall)

VDPAM 7451: Clinical Embryo Transfer

Credits: 2. Contact Hours: Laboratory 4.

Repeatable.

Elective clinical assignment in techniques of embryo transfer. Primary species studied will be bovine but equine and small ruminant embryo transfer will be covered during discussions. Enrollment is limited to four students per two week session. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Fall, Spring, Summer)

VDPAM 7455: Diagnostic Laboratory Practicum

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Practical experience and training in necropsy, recognition of gross lesions, diagnostic sample collection and test selection for the diagnosis of infectious, toxic, nutritional and metabolic diseases through exposure to diagnostic cases submitted to the ISU Veterinary Diagnostic Laboratory. The VDL accepts cases from all species; however, this course predominantly consists of porcine and bovine cases. (Typically Offered: Fall, Spring)

VDPAM 7456: Veterinary Diagnostic Lab Methods & Applications

Credits: 1. Contact Hours: Lecture 1.

An introduction to diagnostic medicine including strengths and weaknesses of various testing technologies, how to choose appropriate tests and technologies, sampling strategies in diseased and non-diseased populations and interpretation and integration of results of tests to achieve an accurate diagnosis are discussed. (Typically Offered: Fall)

VDPAM 7463: Feedlot Production Medicine

Credits: 1.

One-week VM4 elective focusing on Midwestern feedlot production. Addresses feedlot production practices common to Iowa and surrounding states, including feeding cattle on concrete or under roofs. Activities include participation and visitation to representative feedlots in Iowa. (Typically Offered: Spring)

VDPAM 7465: Animal Welfare Clinical Rotation

Credits: 2.

Two-week course for senior veterinary students to gain skills for collecting and interpreting animal welfare data, aid clients with identifying and achieving welfare goals, and assisting law enforcement with animal cruelty response. Field trips to food animal and companion animal facilities are mandatory. (Typically Offered: Fall, Summer)

VDPAM 7466X: Preceptorship in Animal Welfare

Credits: 1-6. Repeatable.

Preceptorship in animal behavior and welfare with emphasis on animal behavior and/or welfare assessment, problem solving, interventions to treat and prevent animal behavior and/or welfare cases. Mentors include practicing veterinarians, professionals consulting on animal behavior and welfare, and/or animal welfare organizations. Biosecurity: all students must follow current College of Veterinary Medicine policies regarding animal contact following foreign travel. (Typically Offered: Fall, Spring, Summer)

VDPAM 7471C: Animal Reproduction: Comparative

Credits: 2. Repeatable, maximum of 4 credits.

Elective comparative clinical assignment in Theriogenology with caseload management in Food Animal, Equine, Small Animal and Small Ruminants sections. Rotation through these different sections will depend on the caseload (by species) and include routine breeding management, semen collection and cryopreservation in different species, advanced laparoscopic and non-surgical procedures for insemination and embryo flushing/transfer, pregnancy diagnosis as well as management of reproductive emergencies. (Typically Offered: Fall, Summer)

VDPAM 7471E: Animal Reproduction: Equine Reproduction

Credits: 2. Repeatable, maximum of 4 credits.

Elective clinical assignment in Equine Theriogenology involving both mare and stallion breeding management, cool-shipped semen preparation and semen cryopreservation, embryo transfer, foaling of high-risk pregnant mares as well as normal mares, breeding soundness exams of the mare and stallion, treatment of retained fetal membranes and neonatal care. (Typically Offered: Spring, Summer)

VDPAM 7471F: Animal Reproduction: Food Animal Reproduction

Credits: 2. Repeatable, maximum of 4 credits.

Elective clinical assignment in Food Animal Theriogenology involving male and female breeding soundness exams, dystocia management, advanced diagnostic and surgical procedures, surgical and non-surgical insemination programs in small ruminants, and semen cryopreservation. Medical and surgical correction of reproductive disorders in cattle, swine and small ruminants. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Spring, Summer)

VDPAM 7471S: Animal Reproduction: Small Animal Reproduction

Credits: 2. Repeatable, maximum of 4 credits.

Primary reproductive management in the canine and feline involving breeding management of the bitch and stud dog, advanced surgical and non-surgical insemination using fresh, cooled or frozen semen, and infertility case management for the male and female. High risk pregnancy management, parturition and neonatal care of both canine and felines, as required. (Typically Offered: Fall, Spring, Summer)

VDPAM 7476: Food Animal and Camelid Field Service

Credits: 1-2. Contact Hours: Laboratory 2.

Repeatable.

Students will assist university veterinarians in delivering individual animal health care and herd-based production management services to the ISU livestock farms and other livestock farms in the local area. Focus on the establishment of best practices for herd management of production systems at the university and in the region. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Fall, Spring, Summer)

VDPAM 7477: Food Animal and Camelid Medicine and Surgery

Credits: 2. Contact Hours: Laboratory 4.

Repeatable.

Clinical assignment focused on the management of food animal and camelid medicine and surgery cases. Specific instruction in clinical evaluation of cases coupled with appropriate diagnostic testing and therapeutic intervention will be emphasized. Additional instruction will be provided in disease prevention, intensive care and management of food animal and camelid species. Particular emphasis will be placed on appropriate on-label and extra-label drug usage in food animal species. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Fall, Spring, Summer)

VDPAM 7478A: Swine Medicine Education Center: Swine Production Management and Consultation

Credits: 2. Repeatable.

Swine production management and consulting skills within a progressive swine production and management system. Time will be split approximately with half in-class discussion topics of finance and business of the swine industry and half on-farm learning opportunities where students will visit a breeding farm, nursery facility, finishing facility, wean-to-finish facility, gilt developer unit, and a truck wash facility. (Typically Offered: Fall, Spring)

VDPAM 7478B: Drug, Vaccination, and Treatment Management for Swine

Credits: 2. Repeatable.

Basic and applied information on swine treatment options, strategies to maximize efficacy, and skills to pursue judicious use of antimicrobials, reproductive interventions, and the entire spectrum of drug therapies. The course emphasizes case based application and decisions and is approximately 30% web-based and 70% on-site including farms of a variety of structures and functions. During the course, students prepare a thorough evaluation of the pharmacologic interventions that may occur on farms and then implement this evaluation in active production facilities to maximize efficacy, compliance and animal welfare as part of a comprehensive judicious use objective. (Typically Offered: Spring, Summer)

VDPAM 7478C: Swine Medicine Education Center: Swine Emerging Diseases and Emergency Response Management

Credits: 2. Repeatable.

Diagnostic tests, methods, approaches, analysis, and evaluation of emerging swine diseases and provide general knowledge of disease elimination and methods to manage herd losses and economic losses due to disease. Two-week, on-site module that combines structured site visits and classroom activities. (Typically Offered: Fall, Spring)

VDPAM 7479: Applied Swine Production Medicine Preceptorship

Credits: 1-6. Contact Hours: Laboratory 6.

Repeatable.

Preceptorship course in swine production medicine with emphasis on herd management, production analysis, and problem solving. Forty hours clinical experience per week. Assignments will be preceptorships with a practicing veterinarian and/or a production unit. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Fall, Spring, Summer)

VDPAM 7480: Swine Medicine

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Repeatable.

Two week clinical rotation in swine production medicine. Students will be assigned to take the lead in investigating field based client cases with supervision of the instructors. Development of critical thinking skills that will allow students to apply concepts of herd management, production analysis, economic analysis, and disease prevention in addressing client cases. Variable amounts of travel to farm sites will be required with the potential for rare overnight stays. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Fall, Spring, Summer)

VDPAM 7481: Advanced Cow/Calf Production Medicine

Credits: 2. Contact Hours: Lecture 1.5, Laboratory 1.5.

Two-week senior elective that will focus on the economics of animal disease in cow/calf operations. Evidence based medicine and epidemiological principles will be used in investigation of disease outbreaks. Extensive partial budgeting used. Students will complete at least two disease investigations involving outbreaks in commercial cow/calf operations and communicate their findings to the class, the herd owner, and local practitioner. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Spring)

VDPAM 7482: Applied Beef Production Medicine Preceptorship

Credits: 1-6. Repeatable.

Advanced course in beef production medicine with emphasis on herd management, production analysis, and problem solving. Forty hours clinical experience per week. Assignments will include preceptorships with a practicing veterinarian and/or a production unit. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Fall, Spring, Summer)

VDPAM 7483: Beef Production Medicine

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Two week advanced clinical rotation in beef production medicine. Fifteen hours recitation/discussion and 20 hours clinical experience per week.

This course is designed to expose students to cow-calf and feedlot production concepts. The activities scheduled for the rotation depend greatly on the time of year. Whenever possible, the class incorporates field trips to better understand how commercial cow/calf and feedlots operate and the veterinarian's role in their management. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Fall)

VDPAM 7484: Dairy Production Medicine

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Two week course in dairy production medicine combining class time with multiple on-farm visits to learn various management aspects (DHIA, DC305 & PC Dart record analysis, calf rearing through lactating cows, reproduction programs, udder health and milk quality, biosecurity, welfare, nutrition and cow comfort) for a wide variety of dairy operations. Students will learn the latest in dairy management by reviewing current topic articles and gain experience in farm evaluation through a group project. Fifteen hours recitation/discussion and 20 hours clinical experience per week. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Fall, Summer)

VDPAM 7485: Applied Dairy Production Medicine Preceptorship

Credits: 1-6. Contact Hours: Laboratory 6.

Repeatable.

Advanced course in dairy production medicine with emphasis on herd management, production analysis, and problem solving. Forty hours clinical experience per week. Assignments will include preceptorships with a practicing veterinarian and/or a production unit. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Fall, Spring, Summer)

VDPAM 7486: Introduction to Small Ruminant Production Medicine

Credits: 1. Contact Hours: Lecture 1.

Survey of small ruminant production systems, common management practices, and disease processes of small ruminants and camelids. This course is intended to give the student a background in small ruminant medicine. Herd health, disease monitoring and prevention, nutrition, and typical management systems will be emphasized in lecture. (Typically Offered: Spring)

VDPAM 7488: Laboratory in Clinical Microbiology

Credits: 1. Contact Hours: Laboratory 3.

Repeatable.

Application of microbiological procedures to the diagnosis of infectious diseases. (Typically Offered: Fall, Spring)

VDPAM 7490: Independent Study

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

VDPAM 7491: Advanced Ruminant Nutrition

Credits: 2. Contact Hours: Lecture 2.6, Laboratory 0.8.

Focus on dairy nutrition and balancing rations from the calf to the adult, lactating cow. Introduction to different feedstuffs and forage varieties to determine those that are best suited to bovine diets. This course starts the week immediately prior to the start of the fall semester and continues throughout the fall semester. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Fall)

VDPAM 7494: Advanced Dairy Production Medicine

Credits: 2. Contact Hours: Lecture 1.3, Laboratory 1.3.

Advanced course in investigating dairy herd problems relating to milk quality or nutrition. Milk quality and nutrition troubleshooting will be taught through the combination of lecture and on-farm investigations. Students will combine lecture knowledge, data acquired from on-farm investigations and record analysis to generate management plans. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Spring)

VDPAM 7495: Advanced Small Ruminant Production Medicine

Credits: 2. Contact Hours: Laboratory 4.

Two week clinical rotation in small ruminant production medicine. Field trips (including overnight stays) will be incorporated when possible.

Topics to be covered include small ruminant industries (milk, meat, and fiber), milk quality, nutrition, reproduction, and disease management of small ruminants. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel. (Typically Offered: Fall, Spring)

VDPAM 7496: International Experience

Credits: 1-12. Repeatable.

International Preceptorships and Study Abroad Group programs.

Opportunities for students to be involved in applied clinical, production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

(Typically Offered: Fall, Spring, Summer)

VDPAM 7498: Poultry Medicine

Credits: 2.

Two-week senior elective to introduce students into poultry production medicine in the Midwest. Students will participate in routine flock monitoring, biosecurity reviews, disease investigations involving outbreaks in commercial and backyard poultry operations, and have a basic understanding of the poultry industry and poultry diseases. Involves didactic lectures in the classroom, field trips to poultry farms, and necropsies. (Typically Offered: Summer)

Veterinary Microbiology and Preventive Medicine

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The Department of Veterinary Microbiology and Preventive Medicine provides instruction on pathogenic bacteria, fungi, and viruses and their interaction with host animal species. Principles and applications of infectious diseases, immunity to disease, diagnostic methods for infectious diseases, and vaccinology are covered. Principles and applications of epidemiology, public health, preventive veterinary medicine, regulatory veterinary medicine and food safety are also emphasized.

Graduate Study

The department offers opportunities for the degree doctor of philosophy with a major in veterinary microbiology. A specialization in preventive medicine is an option for this degree. Graduates in the Veterinary Microbiology and Preventive Medicine programs have a broad understanding of the fundamental processes involved in infectious diseases, pathogenesis and immunology. They are able to effectively establish research programs, which involve complex biological systems and disease syndromes. They are also prepared to address microbial-based social, ethical and environmental problems. Graduates acquire effective written and oral communication skills which lead to successful research and teaching careers in the medical and veterinary sciences. The department also offers work towards the master of science with majors in veterinary microbiology or veterinary preventive medicine. A non-thesis master's option is available for majors in preventive medicine. Courses are open for students majoring in other graduate programs.

Prerequisite to graduate study is completion of coursework in general microbiology, biology, biochemistry, mathematical sciences, and physics. Candidates for the majors in veterinary microbiology should possess an undergraduate degree in biomedical science with emphasis in medical

microbiology or the D.V.M. degree. Candidates for the major in preventive medicine should possess the D.V.M. degree.

The department also participates in the interdepartmental majors and programs in genetics, immunobiology, and MCDB (molecular, cellular, and developmental biology; see Index).

Each graduate student must demonstrate proficiency in English composition within two semesters in residence.

Courses primarily for undergraduates:

VMPM 3300: Global Health Disparities

(Cross-listed with GLOBE 3300).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Historical and contemporary factors contributing to disparities in health outcomes for persons disadvantaged by income, location, ethnicity, sexual orientation, and abilities. Analysis and evaluation of health promotional materials, such as campaigns, and community-based interventions focused on reducing global health disparities. Meets U.S. Diversity Requirement. (Typically Offered: Spring)

VMPM 3600: Global Health

(Cross-listed with GLOBE 3600/ MICRO 3600).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110

Explores human health across the world with particular emphasis on low- and lower-middle-income countries. Attention is given to the interconnectedness of health determinants, problems, and solutions found in global health, including the role of animals and the environment. Broad in scope, highlighting different cultures and the historical foundations of global health. Topics include colonialism, poverty, emerging diseases, climate change, biodiversity, one health, maternal and child health, HIV, malaria, urbanization, noncommunicable diseases and more. Current events will be a feature of all class meetings. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

VMPM 4280: Principles of Epidemiology and Population Health

(Cross-listed with MICRO 4280/ VDPAM 4280).

Credits: 3. Contact Hours: Lecture 3.

Epidemiology of disease in populations. Disease causality, observational study design and approaches to epidemiologic investigations. This course is available on campus and by distance. (Typically Offered: Spring)

VMPM 4500X: Introduction to a Research Career in Industry

(Cross-listed with BMS 4500X).

Credits: 1. Contact Hours: Lecture 2.

Explores research career paths in industry. Course will discuss ways students can prepare competitive applications and skill sets necessary for success. Concepts of regulatory constraints, quality management systems and intellectual property will also be introduced. Material will be presented by industry associates and leaders. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

Courses primarily for graduate students, open to qualified undergraduates:

VMPM 5010: Basic Principles of Microbiology

Credits: 3. Contact Hours: Lecture 3.

Prereq: Instructor Permission for Course

The general principles of bacteriology, immunology and virology will be discussed. The structure and function of bacteria and viruses, the mechanisms of pathogenesis, and the host response to infectious agents will be reviewed. Vaccines, their failures, and new developments in vaccine development will be explored. (Typically Offered: Fall)

VMPM 5020: Microbial Genetics and Genomics

(Cross-listed with MICRO 5020).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (BIOL 3130 and MICRO 3020) or Graduate Classification

The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of vertical and horizontal genetic information transfer and gene regulation are covered, along with genetic and genomic-based approaches to study these and other cellular processes of microorganisms. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics and genomics. Offered even-numbered years. (Typically Offered: Fall)

VMPM 5170: Gut Microbiome: Implications for Health and Diseases

(Cross-listed with ANS 5170/ MICRO 5170/ FSHN 5170).

Credits: 3. Contact Hours: Lecture 3.

Explore current research on gut microbiome including modern tools used to study the gut microbiome. Examine the linkages between gut microbiome and health status, diseases, and manipulation of gut microbiome to improve health. (Typically Offered: Fall)

VMPM 5200: Principles of Immunology

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 3100 or Permission of Instructor

Nature of the immune system and its role in health and disease.

Graduation Restriction: Credit for either VMPM 5200 or 5750, but not both may be applied toward graduation. (Typically Offered: Fall)

VMPM 5250: Intestinal Microbiology

(Cross-listed with MICRO 5250).

Credits: 3. Contact Hours: Lecture 3.

Overview of commensal microbiota in the health and well-being of vertebrates. Topics include diversity of intestinal structure, microbial diversity/function, innate immune development, community interactions and metabolic diseases associated with alterations of the intestinal microbiome. Offered even-numbered years. (Typically Offered: Spring)

VMPM 5280: Principles of Epidemiology and Population Health

(Cross-listed with VDPAM 5280).

Credits: 3. Contact Hours: Lecture 3.

Epidemiology of disease in populations. Disease causality, observational study design and approaches to epidemiologic investigations. This course is available on campus and by distance. (Typically Offered: Spring)

VMPM 5360: Zoonoses and Environmental Health

Credits: 3. Contact Hours: Lecture 3.

Pathogenesis and control of zoonotic diseases. Factors influencing transmission and survival of pathogenic microorganisms in the environment. Offered odd-numbered years. (Typically Offered: Spring)

VMPM 5400: Livestock Immunogenetics

(Cross-listed with MICRO 5400/ ANS 5400).

Credits: 2. Contact Hours: Lecture 2.

Prereq: ANS 5610 or MICRO 5750 or VMPM 5200 or Graduate Classification

Basic concepts and contemporary topics in genetic regulation of livestock immune response and disease resistance. Offered odd-numbered years. (Typically Offered: Spring)

VMPM 5420A: Introduction to Molecular Biology Techniques: DNA Techniques

(Cross-listed with BMS 5420A/ EEOB 5420A/ FSHN 5420A/ GDCB 5420A/ HORT 5420A/ NREM 5420A/ NUTRS 5420A/ VDPAM 5420A/ BBMB 5420A).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

VMPM 5420C: Introduction to Molecular Biology Techniques: Cell Techniques

(Cross-listed with BMS 5420C/ EEOB 5420C/ FSHN 5420C/ GDCB 5420C/ HORT 5420C/ NREM 5420C/ NUTRS 5420C/ BBMB 5420C/ VDPAM 5420C).

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. ular biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

VMPM 5420D: Introduction to Molecular Biology Techniques: Plant Transformation

(Cross-listed with BMS 5420D/ EEOB 5420D/ FSHN 5420D/ GDCB 5420D/ HORT 5420D/ NREM 5420D/ NUTRS 5420D/ BBMB 5420D/ VDPAM 5420D).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of tranformants. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

VMPM 5420E: Introduction to Molecular Biology Techniques: Proteomics

(Cross-listed with BMS 5420E/ EEOB 5420E/ FSHN 5420E/ GDCB 5420E/ HORT 5420E/ NREM 5420E/ NUTRS 5420E/ BBMB 5420E/ VDPAM 5420E).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

VMPM 5420F: Introduction to Molecular Biology Techniques: Metabolomics

(Cross-listed with BMS 5420F/ EEOB 5420F/ FSHN 5420F/ GDCB 5420F/ HORT 5420F/ NREM 5420F/ NUTRS 5420F/ BBMB 5420F/ VDPAM 5420F).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

VMPM 5420G: Introduction to Molecular Biology Techniques: Genomic

(Cross-listed with BMS 5420G/ EEOB 5420G/ FSHN 5420G/ GDCB 5420G/ HORT 5420G/ NREM 5420G/ NUTRS 5420G/ BBMB 5420G/ VDPAM 5420G).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Sessions in basic molecular biology techniques and related procedures.

Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

VMPM 5500X: Introduction to a Research Career in Industry

(Cross-listed with BMS 5500X).

Credits: 1. Contact Hours: Lecture 2.

Explores research career paths in industry. Course will discuss ways students can prepare competitive applications and skill sets necessary for success. Concepts of regulatory constraints, quality management systems and intellectual property will also be introduced. Material will be presented by industry associates and leaders. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

VMPM 5750: Immunology

(Cross-listed with MICRO 5750).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 3100 or Graduate Classification

An examination of humoral and cellular immune function as well as the interaction of the cells and factors of the immune system that result in health and disease. MICRO 4750L optional. Graduation Restriction: Credit for either MICRO 4750 or VMPM 5200, but not both, may be applied to graduation. (Typically Offered: Spring)

VMPM 5860: Medical Bacteriology

(Cross-listed with MICRO 5860).

Credits: 4. Contact Hours: Lecture 4.

Prereq: MICRO 3100 or Graduate Classification

Bacteria associated with diseases of vertebrates, including virulence factors and interaction of host responses. Concurrent students need to register for 5860L. (Typically Offered: Fall)

VMPM 5860L: Medical Bacteriology Laboratory

Credits: 2. Contact Hours: Laboratory 6.

Laboratory in clinical bacteriology and mycology. Credit or enrollment in VMPM 5860 or VMPM 6250. (Typically Offered: Fall)

VMPM 5870: Animal Virology

Credits: 4. Contact Hours: Lecture 4.

Prereq: Instructor Permission for Course

Principles of animal virology. Biology of viruses associated with diseases of veterinary importance, including mechanisms of pathogenesis. (Typically Offered: Spring)

VMPM 5900: Special Topics

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

VMPM 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

A written report based on laboratory research, library reading, or topics related to the student's area of specialization and approved by the student's advisory committee. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:

VMPM 6040: Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

VMPM 6080: Molecular Virology

(Cross-listed with MICRO 6080/ PLP 6080).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BBMB 4050 or GDCB 5110

Advanced study of virus host-cell interactions. Molecular mechanisms of viral replication and pathogenesis. Offered even-numbered years. (Typically Offered: Fall)

VMPM 6150: Molecular Immunology

(Cross-listed with MICRO 6150/ BBMB 6150).

Credits: 3. Contact Hours: Lecture 3.

Current topics in molecular aspects of immunology: T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control and activate immune function. Offered odd-numbered years. (Typically Offered: Fall)

VMPM 6250: Mechanisms of Bacterial Pathogenesis

(Cross-listed with MICRO 6250).

Credits: 3. Contact Hours: Lecture 3.

Review of current concepts in specific areas of microbial pathogenesis including the genetic basis for bacterial disease, genetic regulation and control of virulence factors and their mechanisms of action, and host-pathogen interactions at the cellular and molecular levels. The application of microbial genetics to understanding pathogenesis will be included. Offered odd-numbered years. (Typically Offered: Spring)

VMPM 6290: Advanced Topics in Cellular Immunology

Credits: 2. Contact Hours: Lecture 2.

Prereq: VMPM 5200 or VMPM 5750

Current topics and literature in cellular immunology. Topics include thymocyte development and selection, T cell interactions with antigen presenting cells, and lymphocyte effector functions. Offered even-numbered years. (Typically Offered: Spring)

VMPM 6600: Pathogenesis of Persistent Infections

(Cross-listed with VPTH 6600).

Credits: 2. Contact Hours: Lecture 2.

Study of current knowledge related to host pathogen interactions during persistent and chronic infections by bacteria, viruses and parasites. Offered odd-numbered years. (Typically Offered: Spring)

VMPM 6900A: Current Topics: Immunology

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Prereq: Instructor Permission for Course

Colloquia or advanced study of specific topics in a specialized field. (Typically Offered: Fall, Spring, Summer)

VMPM 6900B: Current Topics: Infectious Diseases

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Prereq: Instructor Permission for Course

Colloquia or advanced study of specific topics in a specialized field. (Typically Offered: Fall, Spring, Summer)

VMPM 6980: Seminar in Molecular, Cellular, and Developmental Biology

(Cross-listed with BBMB 6980/ GDCB 6980/ MICRO 6980/ MCDB 6980).

Credits: 1-2. Contact Hours: Lecture 2.

Repeatable.

Student and faculty presentations. (Typically Offered: Spring)

VMPM 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses primarily for professional curriculum students:

VMPM 7378: Case Study IV

Credits: 2. Contact Hours: Lecture 2.

Case-based applied learning that relates to the basic science courses. Emphasis on early integration of basic and clinical science concepts. (Typically Offered: Spring)

VMPM 7380: Veterinary Immunology

Credits: 2. Contact Hours: Lecture 2.

Structure and function of the immune system in animals. (Typically Offered: Spring)

VMPM 7386: Veterinary Microbiology

Credits: 5. Contact Hours: Lecture 3, Laboratory 5.

Bacteria and fungi of veterinary importance with emphasis on mechanisms of disease production and laboratory diagnostic procedures. (Typically Offered: Fall)

VMPM 7387: Veterinary Virology

Credits: 3. Contact Hours: Lecture 3.

Basic principles of animal virology. Pathogenesis of viral infections. The nature and ecology of viruses of veterinary and zoonotic importance. (Typically Offered: Spring)

VMPM 7388: Public Health and the Role of the Veterinary Profession

Credits: 3. Contact Hours: Lecture 3.

Fundamental epidemiology, zoonotic diseases, occupational health, food safety, other public health topics. (Typically Offered: Spring)

VMPM 7390: Topics in Veterinary History

Credits: 1. Contact Hours: Lecture 1.

An overview of the history of veterinary medicine focused primarily on disease-specific events. A review of the historical aspects of the veterinary profession's accomplishments in the discovery of the etiological origins of disease and their subsequent control will provide students with insights that are applicable to understanding and solving today's animal and human health challenges. (Typically Offered: Fall, Spring)

VMPM 7437: Infectious Diseases and Preventive Medicine

Credits: 3. Contact Hours: Lecture 3.

Etiology, epidemiology, laboratory diagnosis, regulatory control and preventive medicine aspects of the infectious diseases of swine, sheep, goats, cattle, horses, poultry, and honeybees. (Typically Offered: Spring)

VMPM 7486: Laboratory in Public Health

Credits: 2. Contact Hours: Laboratory 5.

Repeatable.

Discussions, lectures, exercises and field trips related to veterinary public health. (Typically Offered: Fall, Spring, Summer)

VMPM 7490: Independent Study

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

VMPM 7491: CDC Epidemiology Elective Preceptorship

Credits: 6.

Introduction to preventive medicine, public health and the principles of applied epidemiology within the working atmosphere of the Centers for Disease Control and Prevention. (Typically Offered: Fall, Spring, Summer)

VMPM 7496: International Experience

Credits: 1-12. Repeatable.

International Preceptorships and Study Abroad group programs.

Opportunities for students to be involved in applied clinical, production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

(Typically Offered: Fall, Spring, Summer)

Veterinary Pathology

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The Department of Veterinary Pathology offers a systematic study of basic disease mechanisms with emphasis on the changes in gene expression, cells, tissues, organs, and body fluids associated with disease. The theory and practice of veterinary pathology, veterinary clinical pathology, veterinary parasitology, veterinary toxicology, and related disciplines provide the basis for accurate diagnosis and a rational approach to the treatment and prevention of animal diseases.

Graduate Study

The department offers work for the degree master of science and doctor of philosophy with a major in veterinary pathology. The majority of students choose an area of specialization in veterinary anatomic pathology, veterinary clinical pathology, or veterinary parasitology (<http://vetmed.iastate.edu/vpath/academics/graduate-program> (<http://vetmed.iastate.edu/vpath/academics/graduate-program/>)). The master of science degree is available on a thesis or nonthesis basis in the veterinary pathology major with or without an area of specialization.

For the ACVP training track (residency) of the anatomic or clinical pathology graduate program designed to train veterinary pathologists, the student must have a funded position within the Department of Veterinary Pathology. If the student does not have a funded position or is not enrolled in the departmental degree program, enrollment in courses pertaining to the residency program and activities that support the residency program must have the approval of the Department Chair of Veterinary Pathology and the head of the departmental residency training program.

Graduates have a broad understanding of the mechanistic basis of disease pathogenesis. They are able to communicate with clinicians, other scientists, and other colleagues on scientific matters, and with the general public on related science policy matters. Graduates are able to address complex problems facing the agricultural and biomedical sciences, and comparative medicine, and are able to make appropriate diagnoses and investigations of animal diseases. They consider ethical, social, legal and environmental issues, and are skilled at carrying out research, communicating research results, and writing concise and competitive grant proposals.

Collaborative work is recommended in other departments in the College of Veterinary Medicine or departments or programs in other colleges. The department participates in the interdepartmental programs in Immunobiology (www.immunobiology.iastate.edu/ (<http://www.immunobiology.iastate.edu/>)), Toxicology (www.toxicology.iastate.edu/ (<http://www.toxicology.iastate.edu/>)), Genetics (www.genetics.iastate.edu/ (<http://www.genetics.iastate.edu/>)), and Molecular, Cellular, and Developmental Biology (www.mcdb.iastate.edu/ (<http://www.mcdb.iastate.edu/>)).

A veterinary degree (doctor of veterinary medicine or equivalent) is required for training in Veterinary Anatomic Pathology and Veterinary Clinical Pathology. Other specializations do not require the veterinary degree. A minimum score of 550 paper-based (213 computer-based; 79 internet based) is required on the TOEFL examination for students whose native language is not English. A foreign language requirement will be determined by the student's program of study committee with the approval of the departmental chair. The Graduate English Examination is a graduate college requirement for native English speakers.

The M.S. thesis degree in veterinary pathology, with or without an area of specialization, requires a minimum of 30 graduate credits. Following completion of all other requirements, a comprehensive final examination is administered covering all graduate work including the thesis. The examination is typically oral, but a written component may be specified by the program of study committee. The degree candidate must submit a thesis, including at least one manuscript suitable for publication, to the committee members and departmental chair at least two weeks prior to the final examination. The departmental requirement for graduate courses includes:

3 credits of basic biological sciences (biochemistry, genetics, cell biology)		3
VPTH 5510	Postmortem Pathology Laboratory	1-3
VPTH 5700	Systemic Pathology I	4
STAT 5870	Statistical Methods for Research Workers	4
VPTH 6050	Current Topics Seminar	1
VPTH 6990A	Research: Veterinary Pathology	1-30

or VPTH 6990B Research: Veterinary Parasitology
or VPTH 6990C Research: Veterinary Toxicology
or VPTH 6990D Research: Veterinary Clinical Pathology

The M.S. nonthesis degree in veterinary pathology, with or without an area of specialization, requires a minimum of 40 graduate credits including at least 10 graduate credits earned outside the department. Every nonthesis master's degree program requires evidence of individual accomplishment demonstrated by completion of a creative component, special report, or scientific study. A minimum of 3 credits of such independent work (VPTH 5990) and a practical diagnostic examination (VPTH 6060) corresponding to the area of specialization are required on every program of study. The final examination is comprehensive and consists of written and oral questions. The departmental requirement for graduate courses includes those for the M.S. thesis degree plus additional courses corresponding to the area of degree emphasis of specialization. Contact the department for a more complete list of requirements and information on areas of specialization.

The Ph.D. degree in veterinary pathology, with or without an area of specialization, requires a minimum of 72 graduate credits including at least 12 graduate credits earned outside the department. The preliminary examination, consisting of written and oral components, is comprehensive and not restricted to the content of graduate courses. The degree candidate must submit a dissertation, including at least two manuscripts suitable for publication, to the committee members and departmental chair at least two weeks prior to the final examination. The final examination is primarily a defense of the dissertation, but it may include questions on other areas of specialized knowledge. The department also offers a combined DVM/Ph.D. program designed for completion of courses for the Ph.D. degree in Veterinary Pathology simultaneously with study in the professional curriculum in the College of Veterinary Medicine. Contact the department for a more complete list of requirements for the Ph.D. degree and information on areas of specialization.

Courses primarily for undergraduates:

VPTH 3530: Introductory Parasitology

(Cross-listed with BIOL 3530/ MICRO 3530).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120

Biology and host-parasite relationships of major groups of animal parasites, and techniques of diagnosing and studying parasites. (Typically Offered: Spring)

VPTH 4010: Basics of Medical Terminology

Credits: 1. Contact Hours: Lecture 1.

Discussion of prefixes, suffixes, and roots (mostly from Latin and Greek) that comprise medical terms. (Typically Offered: Fall)

VPTH 4020: Introduction to Pathology

(Cross-listed with BIOL 4020).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110, BIOL 2110L, BIOL 2120, and BIOL 2120L

Introductory exploration of pathology as a medical discipline. This includes study of disease mechanisms via an introduction to general pathology topics (cell degeneration, necrosis, disturbances of growth, disturbances of blood flow, inflammation, neoplasia) and organ system-specific response to injury. (Typically Offered: Fall)

VPTH 4030: Introduction to Pathology II

(Cross-listed with BIOL 4030).

Credits: 3. Contact Hours: Lecture 3.

Prereq: VPTH 4020 and BIOL 4020

Continuation of pathology topics begun in VPTH/BIOL 4020. How specific organ systems respond to injury using principles and information covered in VPTH 4020/ BIOL 4020. Study of a set of prototypical diseases that affect humans and animals. (Typically Offered: Spring)

Courses primarily for graduate students, open to qualified undergraduates:

VPTH 5030: Principles of Pathology

Credits: 3. Contact Hours: Lecture 3.

Introductory exploration of pathology as a medical discipline. This includes study of disease mechanisms via an introduction to general pathology topics (cell degeneration, necrosis, disturbances of growth, disturbances of blood flow, inflammation, neoplasia) and organ system-specific response to injury. (Typically Offered: Spring)

VPTH 5300: Teaching and Learning in Veterinary Medical Education

Credits: 3. Contact Hours: Lecture 3.

Study of principles of teaching and learning as they relate to veterinary medical education. These include: theories of learning, analyzing content/learners/context, identifying goals, identifying appropriate instructional strategies (specific to medical education), matching assessment processes to goals and strategies, common curricular approaches and decision-making processes in medical education, and the scholarship of teaching and learning for veterinary medical educators. Offered even-numbered years. (Typically Offered: Fall)

VPTH 5420: Anatomic Pathology I

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Basic pathology with emphasis on disease in animals and introduction to disease by system. (Typically Offered: Spring)

VPTH 5480: Diagnostic Parasitology Laboratory

Credits: 1-3. Contact Hours: Laboratory 3.

Repeatable.

Contact hours are (0-3 to 0-9). A laboratory experience in the technical and applied aspects of veterinary parasitology. (Typically Offered: Fall, Spring, Summer)

VPTH 5490: Clinical Pathology Laboratory

Credits: 1. Contact Hours: Laboratory 3.

Repeatable, maximum of 1 credits.

Laboratory procedures and clinical interpretations with emphasis on hematology, cytology, and clinical chemistry. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

VPTH 5500: Surgical Pathology Laboratory

Credits: 1-3. Contact Hours: Laboratory 3.

Repeatable.

Contact hours are (0-3 to 0-9). Diagnosis of lesions in biopsy specimens; classification of neoplasms. Course includes rotation through departmental biopsy service and review of selected cases from departmental archives. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

VPTH 5510: Postmortem Pathology Laboratory

Credits: 1-3. Contact Hours: Laboratory 3.

Repeatable.

Contact hours are (0-3 to 0-9). Necropsy techniques of animals with emphasis on gross and microscopic lesions and diagnosis. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

VPTH 5540: Ethics in Scientific Research and Writing

Credits: 1. Contact Hours: Lecture 1.

Ethical conduct in biomedical research, criticism, writing, and adherence to regulations. Offered even-numbered years. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

VPTH 5700: Systemic Pathology I

Credits: 4. Contact Hours: Lecture 4.

Pathology of the respiratory, reproductive, endocrine, musculoskeletal, and cardiovascular systems. Emphasis on pathogenesis and histopathology correlated with interpretive clinical pathology where appropriate. DVM degree required. Offered even-numbered years. (Typically Offered: Fall)

VPTH 5710: Systemic Pathology II

Credits: 4. Contact Hours: Lecture 4.

Pathology of the integumentary, urinary, digestive, lymphoid, and nervous systems and special senses. Emphasis on pathogenesis and histopathology correlated with interpretive clinical pathology where appropriate. DVM degree required. Offered odd-numbered years. (Typically Offered: Fall)

VPTH 5720: Anatomic Pathology II

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Response to injury by each body system. (Typically Offered: Fall)

VPTH 5760: Veterinary Parasitology

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Parasitic diseases of domestic animals and their control. (Typically Offered: Fall)

VPTH 5900A: Special Topics: Veterinary Pathology

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

VPTH 5900B: Special Topics: Veterinary Parasitology

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

VPTH 5900C: Special Topics: Veterinary Toxicology

Credits: 1-4. Repeatable.

(Typically Offered: Fall, Spring, Summer)

VPTH 5900D: Special Topics: Veterinary Clinical Pathology

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

VPTH 5900E: Special Topics: Other

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

VPTH 5960: International Preceptorship

Credits: 1-12. Repeatable, maximum of 12 credits.

International Preceptorships and Study Abroad Group programs.

This course will provide opportunities for students to be involved in applied clinical, production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

VPTH 5990A: Creative Component Research: Veterinary Pathology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Course for departmental graduate research. (Typically Offered: Fall, Spring, Summer)

VPTH 5990B: Creative Component Research: Veterinary Parasitology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Course for departmental graduate research. (Typically Offered: Fall, Spring, Summer)

VPTH 5990C: Creative Component Research: Veterinary Toxicology

Credits: 1-30. Repeatable.

Course for departmental graduate research. (Typically Offered: Fall, Spring, Summer)

VPTH 5990D: Creative Component Research: Veterinary Clinical Pathology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Course for departmental graduate research. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:

VPTH 6040: Pathology Case Seminar

Credits: 1-2. Contact Hours: Lecture 2.

Repeatable.

Description and interpretation of microscopic lesions and clinical pathology data collected from cases of natural and experimental disease. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

VPTH 6050: Current Topics Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Prereq: Instructor Permission for Course

A seminar of graduate research at the time of thesis or dissertation defense. (Typically Offered: Fall, Spring, Summer)

VPTH 6060A: Diagnostic Interpretation: Veterinary Pathology

Credits: Required. Contact Hours: Lecture 1.

A comprehensive examination in the diagnostic description and interpretation of case materials relevant to veterinary pathology and areas of specialization for the graduate degree preliminary examination. (Typically Offered: Fall, Spring, Summer)

VPTH 6060B: Diagnostic Interpretation: Veterinary Parasitology

Credits: Required. Contact Hours: Lecture 1.

A comprehensive examination in the diagnostic description and interpretation of case materials relevant to veterinary pathology and areas of specialization for the graduate degree preliminary examination. (Typically Offered: Fall, Spring, Summer)

VPTH 6060C: Diagnostic Interpretation: Veterinary Toxicology

Credits: Required. Contact Hours: Lecture 1.

A comprehensive examination in the diagnostic description and interpretation of case materials relevant to veterinary pathology and areas of specialization for the graduate degree preliminary examination. (Typically Offered: Fall, Spring, Summer)

VPTH 6060D: Diagnostic Interpretation: Veterinary Clinical Pathology

Credits: Required. Contact Hours: Lecture 1.

A comprehensive examination in the diagnostic description and interpretation of case materials relevant to veterinary pathology and areas of specialization for the graduate degree preliminary examination. (Typically Offered: Fall, Spring, Summer)

VPTH 6550: Cellular and Molecular Pathology I

Credits: 3. Contact Hours: Lecture 3.

Cellular and molecular mechanisms of cell injury, cellular responses to injury, and inflammation. Graduate course in biochemistry, genetics, or cell biology recommended. Offered odd-numbered years. (Typically Offered: Spring)

VPTH 6560: Cellular and Molecular Pathology II

(Cross-listed with TOX 6560).

Credits: 3. Contact Hours: Lecture 3.

Cellular and molecular mechanisms of carcinogenesis. Offered even-numbered years. (Typically Offered: Spring)

VPTH 6600: Pathogenesis of Persistent Infections

(Cross-listed with VMPM 6600).

Credits: 2. Contact Hours: Lecture 2.

Study of current knowledge related to host pathogen interactions during persistent and chronic infections by bacteria, viruses and parasites. Offered odd-numbered years. (Typically Offered: Spring)

VPTH 6610: Comparative Immunology and Infectious Disease

(Cross-listed with IMBIO 6610).

Credits: 2. Contact Hours: Lecture 2.

Discuss and define similarities and differences of varied host responses to infectious challenge. Learning will focus on comparative aspects of the host response and the unique aspects of immunity from different organisms, while highlighting molecular and mechanistic similarities of pathogen recognition, response and resolution. Offered odd-numbered years. (Typically Offered: Spring)

VPTH 6790: Histopathology of Laboratory Animals

Credits: 2.

Prereq: VPTH 5700 or VPTH 5710; Permission of Instructor

Study of microscopic lesions in laboratory animals with emphasis on description, etiology, pathogenesis, and diagnosis.

VPTH 6990A: Research: Veterinary Pathology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Course restricted to graduate program within the department. (Typically Offered: Fall, Spring, Summer)

VPTH 6990B: Research: Veterinary Parasitology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Course restricted to graduate program within the department. (Typically Offered: Fall, Spring, Summer)

VPTH 6990C: Research: Veterinary Toxicology

Credits: 1-30. Repeatable.

Course restricted to graduate program within the department. (Typically Offered: Fall, Spring, Summer)

VPTH 6990D: Research: Veterinary Clinical Pathology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Course restricted to graduate program within the department. (Typically Offered: Fall, Spring, Summer)

Courses primarily for professional curriculum students:**VPTH 7342: Anatomic Pathology I**

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Basic pathology with emphasis on disease in animals and introduction to disease by system. (Typically Offered: Spring)

VPTH 7372: Anatomic Pathology II

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Response to injury by each body system. (Typically Offered: Fall)

VPTH 7376: Veterinary Parasitology

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Parasitic diseases of domestic animals and their control. (Typically Offered: Fall)

VPTH 7377: Case Study III

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Clinical applications of the basic sciences taught concurrently in the fall semester of the second year curriculum in veterinary medicine. (Typically Offered: Fall)

VPTH 7409: Introduction to Veterinary Cytology and Laboratory

Techniques

Credits: 1. Contact Hours: Laboratory 2.

Description, interpretation, and techniques for cellular preparations from tissues and body fluids. (Typically Offered: Spring)

VPTH 7425: Clinical Pathology

Credits: 4. Contact Hours: Lecture 2, Laboratory 4.

Principles of clinical hematology, clinical chemistry, and urinalysis in domestic animals. (Typically Offered: Spring)

VPTH 7456: Necropsy Laboratory Practicum

Credits: 1. Contact Hours: Laboratory 2.5.

Repeatable.

Practicum in postmortem examination and diagnosis.

VPTH 7457: Clinical Pathology Laboratory Practicum

Credits: 1. Contact Hours: Laboratory 1.

Repeatable.

Methodology in clinical chemistry, hematology and cytology; practice in interpretation of laboratory data.

VPTH 7476X: Clinical Veterinary Parasitology

Credits: 1-2. Repeatable.

Two week clinical rotation in clinical veterinary parasitology. Students will investigate parasitic disease with supervision of the instructors. Variable amount of travel to farm or sites will be required. Biosecurity: All students must follow current College policies regarding animal contact following foreign travel.

VPTH 7490: Independent Study

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

VPTH 7492: Orientation for International Experience

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 1 credits.

8 weeks. Predeparture orientation for group study abroad. Cultural considerations for the study abroad experience and a conversational language introduction. Out of class work will be assigned. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

VPTH 7495: Clinical Competency Skills Checklist/Remediation

Credits: Required. Contact Hours: Lecture 1.

In order to graduate, all 4th year veterinary students are required to complete a checklist of clinical procedures and complete any assigned remediation (based on evaluation in core clinical rotations). These requirements are tied to the college's AVMA COE accreditation, and this course is used to document completion of those requirements. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

VPTH 7496: International Experience

Credits: 1-12. Repeatable.

International Preceptorships and Study Abroad Group programs.

Opportunities for students to be involved in applied clinical, production, and/or research experience in international locations. The course consists of 40 hour per week experiential learning opportunities. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Accounting (ACCT)

Courses primarily for undergraduates:

ACCT 2150: Legal Environment of Business

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

General history, structure, and principles of the US legal system. The legal system, as an agency of social control and tool for resolving disputes. The court systems, Constitution, torts, crimes, intellectual property, contracts, property rights, employment law, basic business entity law, bankruptcy, administrative agencies, environmental law and agency law. (Typically Offered: Fall, Spring, Summer)

ACCT 2840: Financial Accounting

Credits: 3. Contact Hours: Lecture 3.

Introduction to the basic concepts and procedures of financial accounting from a user perspective. The course examines the accounting cycle, business terminology, basic control procedures, and the preparation and evaluation of financial reports, with an emphasis on financial statement analysis. (Typically Offered: Fall, Spring, Summer)

ACCT 2850: Managerial Accounting

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 2840

Understanding of fixed and variable costs and their role in planning, control and performance evaluation. Examination of alternative costing methods. Making decisions by identifying and developing relevant information. Development of spreadsheet skills. (Typically Offered: Fall, Spring, Summer)

ACCT 3010: The Accounting Cycle

Credits: 1. Contact Hours: Lecture 1.

Prereq: ACCT 2840

Interactive computer-based analysis of the accounting cycle including transactions and financial statements. Preparation of journal entries and adjusting entries and completion of the closing process. (Typically Offered: Fall, Spring, Summer)

ACCT 3150: Business Data Streams and Issues

(Cross-listed with MIS 3150).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 2840 and MIS 3010

Identification of open data sources and other private data sources. Develop methods of data access, collection, and sharing; develop methods to validate and standardize data sources; develop methods to assess data worthiness (risk). Typically Offered: Fall (even-numbered years), Spring (odd-numbered years), Summer (annually).

ACCT 3830: Intermediate Managerial Accounting

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 2850 and credit or enrollment in ACCT 3010

Generation, communication and use of information to assist management with planning, control, and decision making in manufacturing and service organizations. Includes cost concepts and relevance to decision situations, operational and capital budgeting, and performance evaluation. Emphasis on developing effective teamwork skills as well as spreadsheet capabilities. (Typically Offered: Fall, Spring)

ACCT 3840: Accounting Information Systems and Analytics

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment in ACCT 3010 and MIS 3010

Concepts and procedures underlying creating, sharing, reporting, storing, and analyzing accounting data. Information technology internal controls and audit techniques. Trends in accounting information systems.

ACCT 3860: Intermediate Financial Accounting I

Credits: 3. Contact Hours: Lecture 3.

Prereq: (ACCT 2840 or ACCT 2840H) and ACCT 3010

The conceptual framework of financial accounting. Communication of financial information on the income and retained earnings statements, statement of cash flows, and the balance sheet. Accounting concepts relating to current and operational assets of the firm. (Typically Offered: Fall, Spring)

ACCT 3870: Intermediate Financial Accounting II

Credits: 3. Contact Hours: Lecture 3.

Prereq: Minimum of C- in ACCT 3860

Financial accounting and reporting practices for business entities. Generally accepted accounting principles (GAAP) relative to firm liabilities, equity, income, taxes, employee benefits, leases, accounting changes and cash flows. Discussion of current issues in financial accounting. (Typically Offered: Fall, Spring)

ACCT 4010: Financial Management for Healthcare Organizations

(Cross-listed with HCM 4010).

Credits: 3. Contact Hours: Lecture 3.

Prereq: FIN 3010 and credit or enrollment in HCM 3010

Examination of the current accounting system for, and the financing of, health care and the factors affecting the industry. Exploration and analysis of budgetary concepts, financial management, cost accounting, and management under rate control and competition, as well as the differences between the goods and service industries. Additional areas of discussion include the practical application of health care finance theory as it applies to the current healthcare environment. The revenue and expense applications will be explored in-depth, particularly in relation to the delivery of health care services. Specific emphasis will be placed on understanding the components of the income statement and balance sheet, developing a budget, and using these financial statements for analyzing operational changes. (Typically Offered: Fall, Spring)

ACCT 4160: Business Law

(Dual-listed with ACCT 5160).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 2150

Continuation of 2150. The Uniform Commercial Code as applied to sales contracts and negotiable instruments. Property law, wills and estates, insurance, secured transactions, corporation law, partnership law and antitrust law. (Typically Offered: Fall, Spring)

ACCT 4610: Entrepreneurship and Accounting Information

(Cross-listed with ENTSP 4610).

Credits: 3. Contact Hours: Lecture 3.

Accounting information recording, dissemination, and use by entrepreneurs. Introduces pro forma financials, venture capital, private equity, and state and federal regulations for business creation and formation. Other topics include intrapreneurship, intellectual property, information privacy, cybersecurity, and internal controls, including managing the risk of embezzlement.

ACCT 4830: Application and Communication in Managerial Accounting

(Dual-listed with ACCT 5830).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 3830 or ACCT 5810

Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, data visualization, and oral presentation skills.

ACCT 4840: Advanced Accounting Information Systems

(Dual-listed with ACCT 5840).

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Prereq: ACCT 3840

Advanced accounting information systems concepts; database design and information retrieval, internal controls within computerized accounting information systems, financial reporting in an electronic environment.

ACCT 4850: Principles of Federal Income Tax

Credits: 3. Contact Hours: Lecture 3.

Prereq: Minimum of C- in ACCT 3860

Introduction to the fundamentals of federal income taxation and concepts applicable to all tax entities. Addresses issues related to the measurement and recognition of income, deductions, gains, and losses, taxation of property transactions, and basis / cost recovery concepts. Includes coverage of tax law policy objectives, tax implications of business and investment decisions, tax versus financial reporting treatment of common business transactions, and ethical issues related to tax compliance and planning. (Typically Offered: Fall, Spring)

ACCT 4870: Volunteer Income Tax Assistance

(Dual-listed with ACCT 5870).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Repeatable, maximum of 6 credits.

Prereq: ACCT 2850 or ACCT 5010

Introduction to and field work in the preparation of individual income tax returns (state and federal). Basic coverage of filing and residency status, taxable income, exemptions, deductions, and credits. Tax software usage and online filing. (Typically Offered: Spring)

ACCT 4880: Governmental and Non-profit Institution Accounting

(Dual-listed with ACCT 5880).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 3860

Accounting and financial reporting principles of local and state governments, including universities, schools, and hospitals. In addition, accounting and financial reporting of non-profit organizations will be addressed. Financial statements of local governmental units and the university are explored.

ACCT 4890: Corporate Social Responsibility Reporting

(Dual-listed with ACCT 5890).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior, senior, or graduate standing

Theory and practice of social and environmental reporting, the role of the corporation in society, and the mechanisms by which society might hold corporations accountable for their actions. (Typically Offered: Spring)

ACCT 4900: Independent Study

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

ACCT 4930: Corporate Taxation

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 3860

Introduction to the fundamentals of corporate taxation issues.

Discussion of concepts related to the formation and capital structure of corporations. Identification and effect of tax codes and regulations related to corporations. Discussion of operating rules, earnings and profits, distributions, as well as redemptions and liquidations of corporations. (Typically Offered: Fall, Spring)

ACCT 4950: Advanced Financial Accounting Problems

(Dual-listed with ACCT 5950).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 3870

Accounting for business combinations and affiliated companies, intercompany transactions, and consolidated financial statements; Partnership accounting; Segment and Interim Reporting; Multinational accounting.

ACCT 4960: Accounting in the Global Economy

(Dual-listed with ACCT 5960).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 3860 or ACCT 5010

Financial reporting issues in a global environment, including introduction to International Financial Reporting Standards (IFRS) and the potential for the use of IFRS in the U.S. Accounting and managerial issues faced by multinational corporations. Technical issues such as transfer pricing, inflation accounting and taxation will be discussed.

ACCT 4970: Introduction to Auditing

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 3840 and ACCT 3870 and STAT 3260

The conceptual framework of auditing. Professional ethics. External reporting concepts. Audit methodology including risk analysis, internal control, procedures for gathering evidence and the role of statistical sampling in auditing. (Typically Offered: Fall, Spring)

ACCT 4980: Accounting Communication and Analysis

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 3870

Integrative studies in accounting. Development of critical thinking, ethical reasoning, professional research and teamwork skills. Written, visual, and oral communication with corporate stakeholders. (Typically Offered: Fall)

Courses primarily for graduate students, open to qualified undergraduates:

ACCT 5010: Financial Accounting

Credits: 3. Contact Hours: Lecture 3.

A general introduction to financial accounting information. Topics covered include the use and analysis of financial information, the regulatory environment, the role of International Financial Reporting Standards (IFRS), and the use of the internet and electronic spreadsheets as a means of accessing and analyzing financial data.

ACCT 5150: Accounting Analytics

Credits: 3. Contact Hours: Lecture 3.

Applications and skills for performing data analytics in accounting contexts. Explores conceptual framework for providing data-driven insights and recommendations. Includes hands-on experiences working with different types of data and the latest analysis tools. (Typically Offered: Fall)

ACCT 5160: Business Law

(Dual-listed with ACCT 4160).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 2150 or Graduate Classification

Continuation of 2150. The Uniform Commercial Code as applied to sales contracts and negotiable instruments. Property law, wills and estates, insurance, secured transactions, corporation law, partnership law and antitrust law. (Typically Offered: Fall, Spring)

ACCT 5610: Entrepreneurship and Accounting Information

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 2840 or Graduate Classification

Accounting information recording, dissemination, and use by entrepreneurs. Introduces pro forma financials, venture capital, private equity, and state and federal regulations for business creation and formation. Other topics include intrapreneurship, intellectual property, information privacy, cybersecurity, and internal controls, including managing the risk of embezzlement.

ACCT 5710: Real Estate Law

Credits: 3. Contact Hours: Lecture 3.

Fundamentals of real estate finance and development from a legal perspective and in a transactional setting. Topics include land acquisition and finance, choice of entity, tax aspects, management, disposition of real property, and recent legal developments. Legal responsibilities of owners, designers, and contractors are also examined by highlighting typical contractual relationships in place throughout the design and construction process.

ACCT 5800A: CPA Exam Preparation - AUD

Credits: 3.

Preparation for the Auditing and Attestation (AUD) section of the Certified Public Accountant (CPA) examination. Graduation Restriction: Only two of ACCT 5800A, 5800B, 5800C, 5800D, 5800E, and 5800F may count toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ACCT 5800B: CPA Exam Preparation - BEC

Credits: 3.

Preparation for the Business Environment and Concepts (BEC) section of the Certified Public Accountant (CPA) examination. Graduation Restriction: Only two of ACCT 5800A, 5800B, 5800C, 5800D, 5800E, and 5800F may count toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ACCT 5800C: CPA Exam Preparation - FAR

Credits: 3.

Preparation for the Financial Accounting and Reporting (FAR) section of the Certified Public Accountant (CPA) examination. Graduation Restriction: Only two of ACCT 5800A, 5800B, 5800C, 5800D, 5800E, and 5800F may count toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ACCT 5800D: CPA Exam Preparation - REG

Credits: 3.

Preparation for the Regulation (REG) section of the Certified Public Accountant (CPA) examination. Graduation Restriction: Only two of ACCT 5800A, 5800B, 5800C, 5800D, 5800E, and 5800F may count toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ACCT 5800E: CMA Exam Preparation - Part 1

Credits: 3.

Preparation for Part 1 (Financial Planning, Performance, and Analytics) of the Certified Management Accountant (CMA) examination. Graduation Restriction: Only two of ACCT 5800A, 5800B, 5800C, 5800D, 5800E, and 5800F may count toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ACCT 5800F: CMA Exam Preparation - Part 2

Credits: 3.

Preparation for Part 2 (Strategic Financial Management) of the Certified Management Accountant (CMA) examination. Graduation Restriction: Only two of ACCT 5800A, 5800B, 5800C, 5800D, 5800E, and 5800F may count toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ACCT 5810: Accounting for Decision Making

Credits: 3. Contact Hours: Lecture 3.

Decision analysis applied to managerial accounting issues. Generation of information for management decision making and control. Responsibility accounting and non-recurring decisions.

ACCT 5820: Corporate Governance and Top Management

(Cross-listed with MGMT 5820).

Credits: 3. Contact Hours: Lecture 3.

Duties, structure, and functioning of top management teams and corporate boards of directors. CEO/board tenure and succession planning, top management compensation, board committee composition, assessment of CEO and board performance, theories of corporate governance, management of the corporate strategic agenda, governance codes, international governance, and chairman/CEO duality. Case studies and contemporary issues discussed.

ACCT 5830: Application and Communication in Managerial Accounting

(Dual-listed with ACCT 4830).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (ACCT 3830 or ACCT 5810) or Graduate Classification

Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, data visualization, and oral presentation skills.

ACCT 5840: Advanced Accounting Information Systems

(Dual-listed with ACCT 4840).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 3840 or Graduate Classification

Advanced accounting information systems concepts; database design and information retrieval, internal controls within computerized accounting information systems, financial reporting in an electronic environment.

ACCT 5850: Taxes and Business Strategy

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 4850 or Graduate Classification

Integration of concepts from accounting, finance, and economics to determine how taxes affect business decisions. Provides students with a conceptual framework for thinking about business tax planning and applies it to various common business decisions.

ACCT 5860: Advanced Federal Taxation

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 4850 or Graduate Classification

Advanced coverage of federal taxation including issues related to the taxation of corporations, partnerships, estates and trusts, and their owners. Includes coverage of rules, concepts, background, and planning opportunities related to a number of common transactions involving these entities.

ACCT 5870: Volunteer Income Tax Assistance

(Dual-listed with ACCT 4870).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Repeatable, maximum of 6 credits.

Prereq: (ACCT 2850 or ACCT 5010) or Graduate Classification

Introduction to and field work in the preparation of individual income tax returns (state and federal). Basic coverage of filing and residency status, taxable income, exemptions, deductions, and credits. Tax software usage and online filing. (Typically Offered: Spring)

ACCT 5880: Governmental and Non-profit Institution Accounting

(Dual-listed with ACCT 4880).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 3860 or Graduate Classification

Accounting and financial reporting principles of local and state governments, including universities, schools, and hospitals. In addition, accounting and financial reporting of non-profit organizations will be addressed. Financial statements of local governmental units and the university are explored.

ACCT 5890: Corporate Social Responsibility Reporting

(Dual-listed with ACCT 4890).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (ACCT 3860 or ACCT 5010) or Graduate Classification

Theory and practice of social and environmental reporting, the role of the corporation in society, and the mechanisms by which society might hold corporations accountable for their actions. (Typically Offered: Spring)

ACCT 5900: Special Topics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

For students wishing to do individual research in a particular area of accounting. (Typically Offered: Fall, Spring, Summer)

ACCT 5910: Fraud Examination and Prevention

Credits: 3. Contact Hours: Lecture 3.

Prereq: (ACCT 4970 or ACCT 5010) or Graduate Classification

Principles and methodology of fraud detection and deterrence. Addresses the causes and elements of fraud, asset theft, corruption, financial statement misrepresentation, internal controls for fraud prevention, investigative evidence gathering, and legal aspects of fraud.

ACCT 5920: Financial Statement Analysis

Credits: 3. Contact Hours: Lecture 3.

Prereq: (ACCT 3860 or ACCT 5010) or Graduate Classification

Presentation and analysis of financial statement information from the point of view of the primary users of such data: owners and creditors. Topics include the financial reporting system, the primary financial statements, effects of accounting method choice on reported financial data, and firm valuation.

ACCT 5930: Corporate Taxation

Credits: 3. Contact Hours: Lecture 3.

Introduction to the fundamentals of corporate taxation issues. Discussion of concepts related to the formation and capital structure of corporations. Identification and effect of tax codes and regulations related to corporations. Discussion of operating rules, earnings and profits, distributions, as well as redemptions and liquidations of corporations. (Typically Offered: Fall, Spring)

ACCT 5950: Advanced Financial Accounting Problems

(Dual-listed with ACCT 4950).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 3870 or Graduate Classification

Accounting for business combinations and affiliated companies, intercompany transactions, and consolidated financial statements; Partnership accounting; Segment and Interim Reporting; Multinational accounting.

ACCT 5960: Accounting in the Global Economy

(Dual-listed with ACCT 4960).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (ACCT 3860 or ACCT 5010) or Graduate Classification

Financial reporting issues in a global environment, including introduction to International Financial Reporting Standards (IFRS) and the potential for the use of IFRS in the U.S. Accounting and managerial issues faced by multinational corporations. Technical issues such as transfer pricing, inflation accounting and taxation will be discussed.

ACCT 5970: Advanced Auditing and Assurance Services

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 4970 or Graduate Classification

A study of advanced auditing and assurance issues. Topics include auditor independence, audit risk analysis, internal control evaluation and reporting, fraud detection, data analytic applications in auditing, audit reporting, auditors' legal liability, and non-financial information assurance.

ACCT 5980: Financial Accounting: Theory and Contemporary Issues

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 3860 or ACCT 5010

Theoretical discussion of the financial accounting and reporting environment. The usefulness of financial accounting information for decision making. Current financial accounting issues, the financial accounting standard setting process, FASB Standards Codification, and the role of the SEC in financial reporting. (Typically Offered: Fall)

ACCT 5990: Creative Component

Credits: 2. Contact Hours: Lecture 2.

Prereq: Instructor Permission for Course

This course prepares students to complete their creative component project option in the Master of Accounting degree.

Actuarial Science (ACSCI)

Courses primarily for undergraduates:**ACSCI 3910: Actuarial Exam P Lab**

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Prereq: STAT 3260 or STAT 3410

Material review for actuarial exam P. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ACSCI 3920: Actuarial Exam FM Lab

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Prereq: MATH 2400

Material review for actuarial exam FM. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ACSCI 4010: Loss Models I

Credits: 3. Contact Hours: Lecture 3.

Prereq: STAT 3410

Probability distributions used to model uncertain events in actuarial practice. Aggregate models, evaluating the effect of various coverage modifications such as deductibles and limits. Construction of empirical models, calculations of common risk measures, and calculations of commonly used severity and frequency models. Various methods for estimating distributional parameters and their properties. (Typically Offered: Fall)

ACSCI 4020: Credibility Theory

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACSCI 4010

Method of moments and percentile matching. The method of maximum likelihood estimation for complete individual data, grouped data, censored and truncated data, and variance estimation. Bayesian estimation, including conjugate priors, posterior distributions, and the Poisson-gamma model. Credibility theory, including limited fluctuation credibility, applying Bayesian analysis for both discrete and continuous models, Buhlmann and Buhlmann-Straub models, and their relationship to Bayesian models. Simulating discrete and continuous random variables and the bootstrap method for estimating mean squared error. (Typically Offered: Spring)

Advertising (ADVRT)

Courses primarily for undergraduates:

ADVRT 2300: Advertising Principles

Credits: 3. Contact Hours: Lecture 3.

Historical, social, economic and legal aspects of advertising. Evaluations of advertising research, media, strategy and appeals. Study of the creation of advertising.

ADVRT 3010: Research and Strategic Planning for Advertising and Public Relations

(Cross-listed with PR 3010).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ADVRT 2300 or PR 2200

The use of primary and secondary research for situations, organizations and the public. Formation and development of strategic plans for public relations and advertising students.

ADVRT 3340: Advertising Creativity

Credits: 3.

Prereq: JLMC 1100; Minimum of C+ in JLMC 2010; ADVRT 3010/PR 3010

Development and execution of creative advertising materials.

Copywriting, art direction and computer applications. Creative strategy development, execution and evaluation.

ADVRT 3350: Advertising Media Planning

Credits: 3. Contact Hours: Lecture 3.

Prereq: ADVRT 3010 and PR 3010

Concepts of media planning and selection in the development, execution and evaluation of advertising campaigns. Characteristics and capabilities of the advertising media. Utilization of market segmentation, consumer buying and media audience databases.

ADVRT 3360: Advertising Account Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: JLMC 1100; Minimum of C+ in JLMC 2010; ADVRT 3010/PR 3010

Fundamentals of account management with emphasis on leadership, sales techniques, relationship building, presentation skills, and strategic thinking. Includes aspects of agency communications, team building, client management, evaluating creative concepts and media plans, and developing strategic proposals and campaign recommendations.

ADVRT 3900: Professional Skills Development

(Cross-listed with JLMC 3900/ PR 3900).

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: (Minimum of C+ in JLMC 2010; JLMC major or ADVRT major or PR major) or Permission of Instructor

Check with Greenlee School for course availability. (Typically Offered: Fall, Spring)

ADVRT 3910: Short Course Intensive

(Cross-listed with JLMC 3910/ PR 3910).

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 6 credits.

Focused short courses on timely concepts. Check with Greenlee School for course availability. Offered on a satisfactory-fail basis only.

ADVRT 4340: Advertising Campaigns

Credits: 3. Contact Hours: Lecture 3.

Prereq: Minimum of C+ in ADVRT 3340 or ADVRT 3360; ADVRT major

Development of advertising campaigns including primary and secondary research, target audience analysis, campaign strategy, media planning, budgeting and creative execution. (Typically Offered: Fall, Spring)

ADVRT 4350: Advertising Competition

Credits: 1-3. Repeatable, maximum of 3 credits.

Prereq: Instructor Permission for Course

Concepts of media planning and selection in the development, execution and evaluation of advertising campaigns. Characteristics and capabilities of the advertising media. Utilization of market segmentation, consumer buying and media audience databases. Offered irregularly. (Typically Offered: Spring)

ADVRT 4360: Advertising Creative Portfolio

Credits: 3. Contact Hours: Lecture 3.

Prereq: Minimum of C+ in ADVRT 3340, non-majors with instructor permission

Advanced advertising writing and design. May include campaign development for competitions. Other projects include creative development in a variety of media for an online portfolio. (Typically Offered: Spring)

ADVRT 4730: Social Media Strategy

(Cross-listed with JLMC 4730/ PR 4730).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

The strategic use of social media, from both an advertising and public relationship standpoint, to the advantage of a client or organization. Examination and analysis of the social media space from a business perspective. Best practices in the areas of strategic planning, tactical execution, and measurement of social media platforms. (Typically Offered: Fall, Spring)

ADVRT 4900: Independent Study in Communication

Credits: 1-30.

Prereq: Junior standing or permission of instructor.

Projects during which students may study problems associated with a medium, a professional specialization, a philosophical or practical concern, a reportorial method or writing technique, or a special topic in their field. Credit is not given for working on student or professional media without an accompanying research component. Graduation Restriction: No more than 3 credits of ADVRT/JLMC/PR 4900 may be used toward a degree in the Greenlee School.

ADVRT 4970: Special Topics in Communication

(Cross-listed with JLMC 4970/ PR 4970).

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Junior classification

Seminars or one-time classes on topics of relevance to students in communication. See Schedule of Classes for topics.

ADVRT 4990A: Professional Media Internship: Required

Credits: 3.

Prereq: ([JLMC major; JLMC 1100; minimum of C+ in JLMC 3020 or JLMC 3030] or [ADVRT major; JLMC 1100; ADVRT 3010 or PR 3010; minimum of C+ in JLMC 2010] or [PR major; JLMC 1100; ADVRT 3010 or PR 3010; minimum of C+ in PR 3210]); Advisor Approval

Initial, required internship. A 400-hour (for 3 credits) internship in the student's specialization. Assessment based on employer evaluations, student reports and faculty reviews. Available only to Greenlee School majors. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ADVRT 4990B: Professional Media Internship: Optional

Credits: 1-3.

Prereq: ([JLMC major; JLMC 1100; minimum of C+ in JLMC 3020 or JLMC 3030] or [ADVRT major; JLMC 1100; ADVRT 3010 or PR 3010; minimum of C+ in JLMC 2010] or [PR major; JLMC 1100; ADVRT 3010 or PR 3010; minimum of C+ in PR 3210]); Advisor Approval

Optional internship in the student's specialization. Assessment based on employer evaluations, student reports and faculty reviews. Available only to Greenlee School majors. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Aerospace Engineering (AERE)

Courses primarily for undergraduates:**AERE 1600: Aerospace Engineering Problems With Computer Applications Laboratory**

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: MATH 1430 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 1650

Introduction to aerospace engineering and systems thinking through engineering design team projects such as flight control of Lighter Than Air (LTA) vehicles. Introduction to programming using python. Solving aerospace engineering problems while learning about significant figures, estimation, units of measure, graphing, curve fitting, and presenting solutions through technical reports. Brief history of aerospace engineering. Satisfactory placement scores can be found at: <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, BME 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count towards graduation. (Typically Offered: Fall, Spring)

AERE 1600H: Aerospace Engineering Problems With Computer Applications Laboratory: Honors

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: MATH 1430 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 1650

Solving aerospace engineering problems and presenting solutions through technical reports. Significant figures and estimation. SI units. Graphing and curve fitting. Introduction to aerospace engineering and engineering design. Spreadsheet programs. History of aerospace. Systems thinking. Team projects. Satisfactory placement scores can be found at: <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count towards graduation. (Typically Offered: Fall, Spring)

AERE 1610: Numerical, Graphical and Laboratory Techniques for Aerospace Engineering

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: Credit or enrollment in ABE 1600, AERE 1600, BME 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, ENGR 1600, IE 1480, ME 1600, or SE 1850

Computer-based problem solving using Matlab(R), with emphasis on numerical methods. Introduction to solid modeling and aerospace design using SolidWorks. (Typically Offered: Fall, Spring)

AERE 1610H: Numerical, Graphical and Laboratory Techniques for Aerospace Engineering: Honors

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: ABE 1600, AERE 1600, BME 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, ENGR 1600, IE 1480, ME 1600, or SE 1850

Computer-based problem solving using Matlab(R), with emphasis on numerical methods. Introduction to solid modeling and aerospace design using SolidWorks. (Typically Offered: Fall, Spring)

AERE 1920: Aerospace Seminar

Credits: Required. Contact Hours: Lecture 1.

Vectors, differentiation, integration, matrices, and systems of linear equations. (Typically Offered: Spring)

AERE 1920H: Aerospace Seminar: Honors

Credits: Required. Contact Hours: Lecture 1.

Vectors, differentiation, integration, matrices, and systems of linear equations. (Typically Offered: Spring)

AERE 2610: Introduction to Performance and Design

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 1660 or MATH 1660H; PHYS 2310 or PHYS 2310H; PHYS 2310L; Credit or enrollment in AERE 1610

Aerodynamics of the airplane, lift and drag, drag polar, propulsion characteristics of turbojets and piston props, level flight, range, endurance, climbing flight, turning flight, take-off and landing, design examples. (Typically Offered: Fall, Spring)

AERE 2650: Scientific Balloon Engineering and Operations

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Engineering aspects of scientific balloon flights. Integration of science mission objectives with engineering requirements. Operations team certification. FAA and FCC regulations, communications, and command systems. Flight path prediction and control. (Typically Offered: Fall)

AERE 2900A: Aerospace Engineering Independent Study: Flight Ground Instruction

Credits: 1-2. Repeatable.

Prereq: Sophomore classification, approval of the department

AERE 2900B: Aerospace Engineering Independent Study: In-flight Training

Credits: 1-2. Repeatable.

Prereq: Instructor Permission for Course

AERE 2900C: Aerospace Engineering Independent Study: Other

Credits: 1-2. Repeatable.

Prereq: Instructor Permission for Course

AERE 2940: Make to Innovate I

Credits: 1. Repeatable, maximum of 3 credits.

Prereq: Freshman or Sophomore classification, permission of instructor

Multidisciplinary projects to engage students in the fundamentals of engineering, project management, systems engineering, teamwork, and oral and visual communication. Students will define and attain their team objectives and milestones that are approved by the instructor. Graduation Restriction: Can only be used toward graduation in these cases. To make credit deficiencies in 1000 or 2000 level courses. No more than 2 credits of AERE 2940 can be used to make-up credit deficiencies in 1000 or 2000 level courses. Cannot be used in any category or technical electives in the AERE curriculum. (Typically Offered: Fall, Spring)

AERE 3010: Flight Experience

Credits: Required.

Prereq: Credit or enrollment in AERE 3550

Two hours of in-flight training and necessary ground instruction. Course content prescribed by the Aerospace Engineering Department. Ten hours of flight training certified in a pilot log book can be considered by the course instructor as evidence of satisfactory performance in the course. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

AERE 3100: Aerodynamics I: Incompressible Flow

Credits: 3. Contact Hours: Lecture 3.

Prereq: Grade of C- or better in AERE 2610 and MATH 2650

Introduction to fluid mechanics and aerodynamics. Fluid properties and kinematics. Conservation equations in differential and integral form. Bernoulli's equation. Basic potential flow concepts and solutions. Boundary layer concept. Incompressible flow over airfoils and wings. Examples of numerical methods. Applications of multi-variable calculus to fluid mechanics and aerodynamics. (Typically Offered: Fall, Spring)

AERE 3110: Aerodynamics II: Compressible Flow

Credits: 3. Contact Hours: Lecture 3.

Prereq: AERE 3100 and ME 2310

Review of thermodynamics, energy equation, compressible flow, and isentropic flow. Normal and oblique shocks. Mach waves and expansion fans. Applications to ducts and nozzles. Compressible airfoil and wing theory. Introduction to advanced compressible flow topics. (Typically Offered: Fall, Spring)

AERE 3210: Flight Structures Analysis

Credits: 3. Contact Hours: Lecture 3.

Prereq: EM 3240 and Credit or concurrent enrollment in MATH 2660 or MATH 2670

Introduction to elasticity, airworthiness, and flight loads. Introduction to fatigue. Materials selection for flight applications. Thin walled cross-sections under bending, torsion, and shear loads using classical methods. Shear center. Column buckling. Matrix methods of structural analysis. (Typically Offered: Fall, Spring)

AERE 3220: Aerospace Structures Laboratory

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Prereq: Credit or enrollment in AERE 3210

Design of experiments. Data analysis. Strain gage installation. Measurement of stiffness/strength of aluminum. Analysis/fabrication/testing of riveted joints. Shear/bending measurements in beam sections. Analysis/measurement of strains in frames. Buckling of columns. Stress concentration. Vibration testing of beams and plates. Fabrication/testing of composites. (Typically Offered: Fall, Spring)

AERE 3310: Flight Control Systems I

Credits: 3. Contact Hours: Lecture 3.

Prereq: AERE 3550

Linear system analysis. Control system designs using root-locus and frequency response methods. Applications in flight control systems. (Typically Offered: Fall, Spring)

AERE 3440: Aerodynamics and Propulsion Laboratory

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: AERE 3100; concurrent enrollment in AERE 3110

Similitude and dimensional analysis. Measurement uncertainty analysis. Pressure and velocity measurement methods and instruments. Pressure distribution around a circular cylinder. Aerodynamic performance of low-speed airfoils. Airfoil wake flow; Boundary layer flow. Flow visualization techniques for supersonic flows and de Laval nozzles. (Typically Offered: Fall, Spring)

AERE 3510: Astrodynamics I

Credits: 3. Contact Hours: Lecture 3.

Prereq: ME 3450

Introduction to astrodynamics. Two-body Keplerian satellite and planetary motion. Geocentric and extraterrestrial trajectories and applications. Ballistic missiles. (Typically Offered: Fall, Spring)

AERE 3550: Aircraft Flight Dynamics and Control

Credits: 3. Contact Hours: Lecture 3.

Prereq: AERE 2610, MATH 2670, and ME 3450

Aircraft rigid body equations of motion, linearization, and modal analysis. Longitudinal and lateral-directional static and dynamic stability analysis. Flight handling characteristics analysis. Longitudinal and lateral-directional open loop response to aircraft control inputs. Aircraft flight handling qualities. (Typically Offered: Fall, Spring)

AERE 3610: Computational Techniques for Aerospace Design

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

AERE 3100; EM 3240; (ENGL 3090 or ENGL 3140); ME 3450; MATH 2670

Advanced programming, workstation environment, and development of computational tools for aerospace analysis and design. Technical report writing. (Typically Offered: Fall, Spring)

AERE 3620: Aerospace Systems Integration

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500, Junior classification in Aerospace Engineering or permission of instructor for AERE 3620

Emphasis on impact of component interfaces in aerospace systems. Understand how changes in variables associated with individual components impact the performance of the aerospace system. Solving aerospace engineering problems and presenting solutions through reports. Specific integration challenges include: capturing implicit disciplinary interactions (e.g. structures/aerodynamics, propulsion/aerodynamics, etc.), propagating tolerances through the system (i.e. uncertainty modeling), balancing component attributes in the system objective. (Typically Offered: Fall, Spring)

AERE 3640X: Cyber-Physical Systems Application

(Cross-listed with CPS 3640X).

Credits: 3. Contact Hours: Laboratory 2, Lecture 2.

Repeatable.

Prereq: ENGR 1600 or equivalent; credit or enrollment in MATH 2670

Fundamental principles of cyber-physical systems and their system-level applications at an introductory level; introduction to radio control systems and control of actuators; computer programming of physical systems; data processing and communication; control loops; X-by-wire control systems; simulation; testing of control loops. (Typically Offered: Spring)

AERE 3810: Introduction to Wind Energy

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 1660 or MATH 1660H; PHYS 2310 or PHYS 2310H; PHYS 2310L

Basic introduction to the fundamentals of Wind Energy and Wind Energy conversion systems. Topics include but not limited to various types of wind energy conversion systems and the aerodynamics, blade and tower structural loads, kinematics of the blades and meteorology. (Typically Offered: Spring)

AERE 4070: Applied Formal Methods

(Cross-listed with COMS 4070).

Credits: 3. Contact Hours: Lecture 3.

Prereq: AERE 3610 for AERE majors. COMS 3110 for COMS majors.

AERE 3610 or COMS 3110, or an equivalent course, plus instructor permission for other majors.

Introduction to the fundamentals of formal methods, a set of mathematically rigorous techniques for the formal specification, validation, and verification of safety- and security-critical systems. Tools, techniques, and applications of formal methods with an emphasis on real-world use-cases such as enabling autonomous operation. Build experience in writing mathematically analyzable specifications from English operational concepts for real cyberphysical systems, such as aircraft and spacecraft. Review capabilities and limitations of formal methods in the design, verification, and system health management of today's complex systems. (Typically Offered: Spring)

AERE 4110: Aerospace Vehicle Propulsion

Credits: 3. Contact Hours: Lecture 3.

Prereq: AERE 3110 and AERE 3440

Atmospheric propulsion system performance and cycle analysis. Momentum theorem, thrust and propulsive efficiency. Thermodynamics of compressible flow with heat and work addition. Components and principles of turbojet, ramjet, and turbofan aircraft engines. Introduction to rocket engines. (Typically Offered: Fall, Spring)

AERE 4120: Spacecraft Electric Propulsion

Credits: 3. Contact Hours: Lecture 3.

Prereq: AERE 3110

Electricity and magnetism. Plasma physics. Ion engine performance. Introduction to advanced electromagnetic propulsion systems. Energy sources and nuclear propulsion. Space mission requirements. (Typically Offered: Spring)

AERE 4150: Rocket Propulsion

Credits: 3. Contact Hours: Lecture 3.

Prereq: AERE 3110 and AERE 3440

Components and principles of liquid rocket engines, solid rocket motors, and hybrid rocket motors. Rocket flight performance and rocket staging. Combustion and thermochemistry. Rocket cooling and nozzle heat transfer. Introduction to nuclear thermal propulsion and electric propulsion systems. Applications to spacecraft. (Typically Offered: Fall, Spring)

AERE 4170: Experimental Mechanics

(Cross-listed with EM 4170).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: EM 3240, and MATE 2730

Introduction to fundamental concepts for force, displacement, stress and strain measurements for structures and materials applications. Strain gage theory and application. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro- and nano-scale regimes. Selected laboratory experiments. Offered even-numbered years. (Typically Offered: Fall)

AERE 4210: Advanced Flight Structures

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: AERE 3210, MATH 2660 or MATH 2670

Analysis of indeterminate flight structures including finite element laboratory. Static analysis of complex structural components subject to thermal and aerodynamic loads. Analytical and finite element solutions for stresses and displacements of membrane, plane stress, plate structures. Buckling of beams, frames, and plate structures. Introduction to vibration of flight structures. Steady state and transient structural response using normal modal analysis. (Typically Offered: Fall, Spring)

AERE 4220: Vibrations and Aeroelasticity

Credits: 3. Contact Hours: Lecture 3.

Prereq: EM 3240 or AERE 3210

Vibration theory. Steady and unsteady flows. Mathematical foundations of aeroelasticity, static and dynamic aeroelasticity. Linear unsteady aerodynamics, non-steady aerodynamics of lifting surfaces. Stall flutter. Aeroelastic problems in civil engineering structures. Aeroelastic problems of rotorcraft. Experimental aeroelasticity. Selected wind tunnel laboratory experiments. Offered even-numbered years. (Typically Offered: Spring)

AERE 4230: Composite Flight Structures

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: EM 3240, and MATE 2730

Fabrication, testing and analysis of composite materials used in flight structures. Basic laminate theory of beams, plates and shells. Manufacturing and machining considerations of various types of composites. Testing of composites for material properties, strength and defects. Student projects required. (Typically Offered: Spring)

AERE 4260: Design of Aerospace Structures

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: EM 3240

Detailed design and analysis of aerospace vehicle structures. Material selection, strength, durability and damage tolerance, and validation analysis. Design for manufacturability. (Typically Offered: Fall)

AERE 4320: Flight Control Systems II

Credits: 3. Contact Hours: Lecture 3.

Prereq: AERE 3310

Aircraft lateral directional stability augmentation. Launch vehicle pitch control system design. Control of flexible vehicles. Satellite attitude control. Flight control designs based on state-space methods. Introduction to sample-data systems. (Typically Offered: Fall)

AERE 4330: Spacecraft Dynamics and Control

Credits: 3. Contact Hours: Lecture 3.

Prereq: ME 3450

Three-dimensional rotational kinematics and attitude dynamics of a rigid body in space. Classical stability analysis of spinning spacecraft with or without energy dissipation. Attitude dynamics, stability, and control of spacecraft in a circular orbit in the presence of gravity-gradient torques. Introduction to spacecraft attitude determination and control systems (ADCS) with emphasis on modern attitude determination algorithms. Simulation of spacecraft attitude dynamics and control problems of practical interest using programming and analysis software. (Typically Offered: Fall)

AERE 4420: V/STOL Aerodynamics and Performance

Credits: 3. Contact Hours: Lecture 3.

Prereq: AERE 2610

Introduction to the aerodynamics, performance, stability, control and critical maneuvering characteristics of V/STOL vehicles. Topics include hovercrafts, jet flaps, ducted fans and thrust vectored engines. (Typically Offered: Fall)

AERE 4450: Experimental Flow Mechanics and Heat Transfer

Credits: 3. Contact Hours: Lecture 3.

Prereq: ABE 3780 or AERE 3100 or ME 3350

Similitude and dimensional analysis. Measurement uncertainty analysis; Fluid mechanical apparatus: wind tunnel and water tunnels. Various experimental techniques widely used for fluid mechanics, aerodynamics, heat transfer, and combustion studies: Pressure gauge and transducers; Pitot tube; hot wire anemometry; Shadowgraph and Schlieren Photography; laser Doppler velocimetry; particle image velocimetry (PIV); advanced PIV techniques (stereo PIV, 3-D PIV, Tomographic PIV, Holograph PIV and microscopic PIV); laser induced fluorescence; pressure sensitive painting, temperature sensitive painting; molecular tagging velocimetry; molecular tagging thermometry. Extensive applications and laboratory experiments will be included. (Typically Offered: Fall)

AERE 4460: Computational Fluid Dynamics

Credits: 3. Contact Hours: Lecture 3.

Prereq: AERE 3110 and AERE 3610

Introduction to computational fluid dynamics. Discretization, consistency, and stability. Explicit and implicit methods for ordinary and partial differential equations. Linearization techniques. Iterative and direct solution algorithms. Numerical methods for parabolic, elliptic and hyperbolic equations. Curvilinear coordinates and numerical grid generation. Applications to Euler, boundary-layer and Navier-Stokes equations. Proficiency in at least one programming language recommended. (Typically Offered: Fall)

AERE 4480: Fluid Dynamics of Turbomachinery

(Cross-listed with ME 4480).

Credits: 3. Contact Hours: Lecture 3.

Prereq: AERE 3110 or ME 3350

Applications of principles of fluid mechanics and thermodynamics in performance analysis and design of turbomachines. Conceptual and preliminary design of axial and radial flow compressors and turbines using velocity triangles and through-flow approaches. (Typically Offered: Spring)

AERE 4510: Astrodynamics II

Credits: 3. Contact Hours: Lecture 3.

Prereq: AERE 3510

Orbit determination and prediction using Gibb's and Gauss' methods. Advanced orbit maneuvers, triple-, and fixed-impulse; universal variables; Kepler's problem. Earth gravity field models and gravity harmonics, orbit perturbations, advanced dynamics, variational methods, relative orbital mechanics, and Clohessy-Wiltshire equations. (Typically Offered: Fall, Spring)

AERE 4520: Introduction To Systems Engineering And Analysis

(Cross-listed with IE 4520).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior Classification in an Engineering Major

Principles of systems engineering to include problem statement formulation, stakeholder analysis, requirements definition, system architecture and concept generation, system integration and interface management, verification and validation, and system commissioning and decommissioning operations. Introduction to discrete event simulation processes. Students will work in groups to propose, research, and present findings for a systems engineering topic of current relevance. (Typically Offered: Summer)

AERE 4610: Modern Design Methodology with Aerospace Applications

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: AERE 3610, AERE 3110, AERE 3210, AERE 3220, AERE 3440, AERE 3510, and AERE 3550

Introduction to modern engineering design methodology. Computational constrained optimal design approach including selection of objective function, characterization of constraint system, materials and strength considerations, and sensitivity analyses. The class contains two focus sections. One section assigns design projects in Aeronautics, and the other assigns design projects in Astronautics. (Typically Offered: Fall, Spring)

AERE 4620: Design of Aerospace Systems

Credits: 3. Contact Hours: Lecture 1, Laboratory 4.

Prereq: AERE 4610

Fundamental principles used in engineering design of aircraft, rockets, and space systems. Preliminary design of aerospace vehicles. Engineering Ethics. The class contains two focus sections. One section assigns design projects in Aeronautics, and the other section assigns design projects in Astronautics. (Typically Offered: Fall, Spring)

AERE 4630: Introduction to Multidisciplinary Design Optimization (MDO)

Credits: 3. Contact Hours: Lecture 3.

Prereq: Senior classification in an Engineering major or Permission of Instructor

Introduction to the theory and methods of Multidisciplinary Design Optimization (MDO), including system coupling, system sensitivity methods, decomposition methods, MDO formulations (such as multiple-discipline feasible (MDF), individual discipline feasible (IDF) and all-at-once (AAO) approaches, and MDO search methods. (Typically Offered: Fall)

AERE 4640: Spacecraft Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: AERE 3510

An examination of spacecraft systems including attitude determination and control, power, thermal control, communications, propulsion, guidance, navigation, command and data handling, and mechanisms. Explanation of space and operational environments as they impact spacecraft design. Includes discussion of safety, reliability, quality, maintainability, testing, cost, legal, and logistics issues. (Typically Offered: Spring)

AERE 4680: Large-Scale Complex Engineered Systems (LSCES)

(Cross-listed with IE 4680).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Senior classification in an Engineering major or Permission of Instructor

Introduction to the theoretical foundation and methods associated with the design for large-scale complex engineered systems, including objective function formation, design reliability, value-driven design, product robustness, utility theory, economic factors for the formation of a value function and complexity science as a means of detecting unintended consequences in the product behavior. (Typically Offered: Spring)

AERE 4800: Ultrasonic Nondestructive Evaluation

(Cross-listed with EM 4800).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EM 3240, MATH 2660 or MATH 2670, PHYS 2320

Introduction to stress/strain, Hooke's law, and elastic wave propagation in two dimensions in isotropic media. Ultrasonic plane-wave reflection and transmission; and simple straight-crested guided waves. Transducer construction, behavior, and performance. Simple signal analysis and discrete signal processing. The last few weeks of the course are devoted to case studies. (Typically Offered: Spring)

AERE 4830: Aeroacoustics

Credits: 3. Contact Hours: Lecture 3.

Prereq: AERE 3110 or ME 3350 and MATH 2660 or MATH 2670

Noise metrics, Linear wave equation and its solution in 1-, 2-, and 3-D using Green's functions. Propagation of sound in free and confined spaces. Aerodynamic noise sources in engineering machines: aircraft engine noise, airframe noise, wind turbine noise, etc.

AERE 4900A: Aerospace Engineering Independent Study: Aero and/or Gas Dynamics

Credits: 1-6. Repeatable.

Prereq: Junior or Senior classification; Instructor Permission

AERE 4900B: Aerospace Engineering Independent Study: Propulsion

Credits: 1-6. Repeatable.

Prereq: Junior or Senior classification; Instructor Permission

AERE 4900C: Aerospace Engineering Independent Study: Aerospace Structures

Credits: 1-6. Repeatable.

Prereq: Junior or Senior classification; Instructor Permission

AERE 4900D: Aerospace Engineering Independent Study: Flight Dynamics

Credits: 1-6. Repeatable.

Prereq: Junior or Senior classification; Instructor Permission

AERE 4900E: Aerospace Engineering Independent Study: Spacecraft Systems

Credits: 1-6. Repeatable.

Prereq: Junior or Senior classification; Instructor Permission

AERE 4900F: Aerospace Engineering Independent Study: Flight Control Systems

Credits: 1-6. Repeatable.

Prereq: Junior or Senior classification; Instructor Permission

AERE 4900G: Aerospace Engineering Independent Study: Aeroelasticity

Credits: 1-6. Repeatable.

Prereq: Junior or Senior classification; Instructor Permission

AERE 4900H: Aerospace Engineering Independent Study: Independent Study, Honors

Credits: 1-6. Repeatable.

Prereq: Junior or Senior classification; Instructor Permission

AERE 4900I: Aerospace Engineering Independent Study: Design

Credits: 1-6. Repeatable.

Prereq: Junior or Senior classification; Instructor Permission

AERE 4900J: Aerospace Engineering Independent Study: Non-destructive Evaluation

Credits: 1-6. Repeatable.

Prereq: Junior or Senior classification; Instructor Permission

AERE 4900K: Aerospace Engineering Independent Study: Wind Engineering

Credits: 1-6. Repeatable.

Prereq: Junior or Senior classification; Instructor Permission

AERE 4900L: Aerospace Engineering Independent Study: Multi-functional Ultra-light Structures

Credits: 1-6. Repeatable.

Prereq: Junior or Senior classification; Instructor Permission

AERE 4900M: Aerospace Engineering Independent Study: Intelligent Systems and Autonomy

Credits: 1-6. Repeatable.

Prereq: Junior or Senior classification; Instructor Permission

(Typically Offered: Fall, Spring, Summer)

AERE 4900O: Aerospace Engineering Independent Study: Other

Credits: 1-6. Repeatable.

Prereq: Junior or Senior classification; Instructor Permission

AERE 4940: Make to Innovate II

Credits: 2-3. Repeatable, maximum of 3 times.

Prereq: Junior or Senior classification; Instructor Permission

Multidisciplinary projects to engage students in the fundamentals of engineering, project management, systems engineering, teamwork, and oral and visual communication. Students will define and attain their team objectives and milestones that are approved by their instructors.

Graduation Restriction: Maximum of 6 credits may count toward graduation as Technical Elective. (Typically Offered: Fall, Spring)

AERE 4990: Senior Project

Credits: 1-2. Repeatable.

Prereq: Senior classification, credit or enrollment in AERE 4910

Development of aerospace principles and concepts through individual research and projects. Written report. (Typically Offered: Fall, Spring)

Courses primarily for graduate students, open to qualified undergraduates:

AERE 5010: Advanced Engineering Analysis

Credits: 3. Contact Hours: Lecture 3.

Linear ordinary differential equations with variable coefficients; hyperbolic, parabolic, and elliptic equations; tensors. (Typically Offered: Fall)

AERE 5070: Applied Formal Methods

(Cross-listed with COMS 5070).

Credits: 3. Contact Hours: Lecture 3.

Introduction to the fundamentals of formal methods, a set of mathematically rigorous techniques for the formal specification, validation, and verification of safety- and security-critical systems. Tools, techniques, and applications of formal methods with an emphasis on real-world use-cases such as enabling autonomous operation. Build experience in writing mathematically analyzable specifications from English operational concepts for real cyberphysical systems, such as aircraft and spacecraft. Review capabilities and limitations of formal methods in the design, verification, and system health management of today's complex systems. (Typically Offered: Spring)

AERE 5110: Wind Energy System Design

(Cross-listed with WESEP 5110).

Credits: 3. Contact Hours: Lecture 3.

Advanced design, control, and operation of wind plants. Topics include electromechanical energy conversion systems, aerodynamic and aeroelastic loads, optimal control of wind farms, life cycle management strategies, tall tower design, and prediction of component residual life.

AERE 5140: Advanced Mechanics of Materials

(Cross-listed with EM 5140).

Credits: 3. Contact Hours: Lecture 3.

Theory of stress and strain, stress-strain relationships. Unsymmetrical bending, curved beams, shear center. Torsion of thin-walled noncircular sections. Equilibrium, compatibility equations. Airy stress functions. Membrane stresses in shells, thick-walled cylinders. (Typically Offered: Fall)

AERE 5150: Atomistic and Multiscale Mechanics of Materials

Credits: 3. Contact Hours: Lecture 3.

Introduction to atomistic and multiscale computational methodology for the graduate-level study of mechanics of materials. At the end of this course, students will have an awareness and understanding of the application of atomistic and multiscale materials modeling techniques to fracture, plasticity, phase transformation, corrosion, thermal and mass transport in a variety of engineering materials. Offered odd-numbered years. (Typically Offered: Fall)

AERE 5170: Experimental Mechanics

(Cross-listed with EM 5170).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Introduction to fundamental concepts for force, displacement, stress and strain measurements for structures and materials applications. Strain gage theory and application. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro- and nano-scale regimes. Selected laboratory experiments. Offered even-numbered years. (Typically Offered: Fall)

AERE 5210: Airframe Analysis

Credits: 3. Contact Hours: Lecture 3.

Analysis of static stresses and deformation in continuous aircraft structures. Various analytical and approximate methods of analysis of isotropic and anisotropic plates and shells. (Typically Offered: Fall)

AERE 5220: Design and Analysis of Composite Materials

Credits: 3. Contact Hours: Lecture 3.

Composite constituent materials, micro-mechanics, laminate analysis, hygro-thermal analysis, composite failure, joining of composites, design of composite beams and plates, honeycomb core, manufacturing of composites, short fiber composites, and demonstration laboratory. (Typically Offered: Fall)

AERE 5240: Numerical Mesh Generation

Credits: 3. Contact Hours: Lecture 3.

Introduction to modern mesh generation techniques. Structured and unstructured mesh methods, algebraic and PDE methods, elliptic and hyperbolic methods, variational methods, error analysis, Delaunay triangulation, data structures, geometric modeling with B-spline and NURBS surfaces, surface meshing. (Typically Offered: Fall)

AERE 5250: Finite Element Analysis

(Cross-listed with EM 5250).

Credits: 3. Contact Hours: Lecture 3.

Variational and weighted residual approach to finite element equations. Emphasis on two- and three-dimensional problems in solid mechanics. Isoparametric element formulation, higher order elements, numerical integration, imposition of constraints and penalty, convergence, and other more advanced topics. Use of two- and three-dimensional computer programs. Dynamic and vibrational problems, eigenvalues, and time integration. Introduction to geometric and material nonlinearities. (Typically Offered: Spring)

AERE 5260: Design of Aerospace Structures

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Detailed design and analysis of aerospace vehicle structures. Material selection, strength, durability and damage tolerance, and validation analysis. Design for manufacturability. (Typically Offered: Fall)

AERE 5310: Automatic Control of Flight Vehicles

Credits: 3. Contact Hours: Lecture 3.

Applications of classical and modern linear control theory to automatic control of flight vehicles. Spacecraft attitude control. Control of flexible vehicles. Linear-quadratic regulator design applications. (Typically Offered: Spring)

AERE 5320: Compressible Fluid Flow

(Cross-listed with ME 5320).

Credits: 3. Contact Hours: Lecture 3.

Thermodynamics of compressible flow. Viscous and inviscid compressible flow equations. One dimensional steady flow; isentropic flow, shocks, expansions. Multidimensional compressible flow aspects. Linear and nonlinear wave analysis and method of characteristics. Subsonic, transonic, supersonic and hypersonic flows. (Typically Offered: Spring)

AERE 5380: Foundations of Engineering Education

(Cross-listed with ENGR 5380/ HGED 5380).

Credits: 3. Contact Hours: Lecture 3.

Introduction to the field of engineering education, with an emphasis on engineering education history, existing challenges, teaching and learning pedagogies and theories, research opportunities, and research methodologies. The course goal is to develop students as scholars and to have students think critically about engineering and education. Students will apply the knowledge gained from this course to propose a research project related to their own discipline. The proposal is intended to help students learn and apply the key elements of engineering education research. This course is intended for students with a variety of interests and career goals, including those interested in learning to conduct engineering education research, exploring research discoveries about teaching and learning, and engaging with the engineering education community. (Typically Offered: Fall)

AERE 5410: Incompressible Flow Aerodynamics

Credits: 3. Contact Hours: Lecture 3.

Kinematics and dynamics of fluid flow. Derivation of the Navier-Stokes, Euler and potential flow equations. Introduction to generalized curvilinear coordinates. Ideal fluids. Two-dimensional and three-dimensional potential flow. Complex variable methods. (Typically Offered: Fall)

AERE 5440: Viscous Flow

Credits: 3. Contact Hours: Lecture 3.

Prereq: AERE 3110 or ME 3350

Kinematics and dynamics of compressible viscous fluid flow in aerodynamics. Derivation of the Navier-Stokes and compressible Prandtl boundary layer equations. Asymptotic analysis and solution methods for low/high Reynolds number compressible boundary layer flows. (Typically Offered: Spring)

AERE 5450: Experimental Flow Mechanics and Heat Transfer

Credits: 3. Contact Hours: Lecture 3.

Similitude and dimensional analysis. Measurement uncertainty analysis; Fluid mechanical apparatus: wind tunnel and water tunnels. Various experimental techniques widely used for fluid mechanics, aerodynamics, heat transfer, and combustion studies: Pressure gauge and transducers; Pitot tube; hot wire anemometry; Shadowgraph and Schlieren Photography; laser Doppler velocimetry; particle image velocimetry (PIV); advanced PIV techniques (stereo PIV, 3-D PIV, Tomographic PIV, Holograph PIV and microscopic PIV); laser induced fluorescence; pressure sensitive painting, temperature sensitive painting; molecular tagging velocimetry; molecular tagging thermometry. Extensive applications and laboratory experiments will be included. (Typically Offered: Fall)

AERE 5460: Computational Fluid Mechanics and Heat Transfer I

(Cross-listed with ME 5460).

Credits: 3. Contact Hours: Lecture 3.

Basic concepts of discretization, consistency, and stability. Explicit and implicit methods for ordinary differential equations. Methods for each type of partial differential equation. Iterative solution methods; curvilinear grids. Students will program basic algorithms. (Typically Offered: Fall)

AERE 5470: Computational Fluid Mechanics and Heat Transfer II

(Cross-listed with ME 5470).

Credits: 3. Contact Hours: Lecture 3.

Application of computational methods to current problems in fluid mechanics and heat transfer. Methods for solving the Navier-Stokes and reduced equation sets such as the Euler, boundary layer, and parabolized forms of the conservation equations. Introduction to relevant aspects of grid generation and turbulence modeling. (Typically Offered: Spring)

AERE 5510: Orbital Mechanics

Credits: 3. Contact Hours: Lecture 3.

Review of 2-body problem. Orbital maneuvers. Relative motion in orbit. Orbit perturbation analysis. Gravity field expansions and effects on orbiters. 3-body problem with applications. (Typically Offered: Fall)

AERE 5560: Guidance and Navigation of Aerospace Vehicles

Credits: 3. Contact Hours: Lecture 3.

Principles of guidance systems for spacecraft, launch vehicles, homing and ballistic missiles. Optimal guidance. Interplanetary transfer guidance with low thrust. Principles of inertial navigation. Theory and applications of the Global Positioning System. Celestial navigation procedures. Application of Kalman filtering to recursive navigation theory. (Typically Offered: Fall)

AERE 5630: Introduction to Multidisciplinary Design Optimization

Credits: 3. Contact Hours: Lecture 3.

Introduction to the theory and methods of Multidisciplinary Design Optimization (MDO), including system coupling, system sensitivity methods, decomposition methods, MDO formulations (such as multi-discipline feasible (MDF), individual discipline feasible (IDF) and all-at-once (AAO) approaches, and MDO search methods. (Typically Offered: Fall)

AERE 5640: Fracture and Fatigue

(Cross-listed with EM 5640/ ME 5640/ MSE 5640).

Credits: 3. Contact Hours: Lecture 3.

Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue. Offered even-numbered years. (Typically Offered: Fall)

AERE 5650: Systems Engineering and Analysis

(Cross-listed with IE 5650/ EE 5650).

Credits: 3. Contact Hours: Lecture 3.

Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test and evaluation, and systems engineering planning and organization. Graduation Restrictions: Not available for degrees in industrial engineering.

AERE 5660: Avionics Systems Engineering

(Cross-listed with EE 5660).

Credits: 3. Contact Hours: Lecture 3.

Avionics functions. Applications of systems engineering principles to avionics. Top down design of avionics systems. Automated design tools. (Typically Offered: Spring)

AERE 5680: Large-Scale Complex Engineered Systems (LSCES)

(Cross-listed with IE 5680).

Credits: 3. Contact Hours: Lecture 3.

Introduction to the theoretical foundation and methods associated with the design for large-scale complex engineered systems, including objective function formation, design reliability, value-driven design, product robustness, utility theory, economic factors for the formation of a value function and complexity science as a means of detecting unintended consequences in the product behavior. (Typically Offered: Spring)

AERE 5690: Mechanics of Composite and Combined Materials

(Cross-listed with EM 5690/ MSE 5690).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EM 3240

Mechanics of fiber-reinforced materials. Micromechanics of lamina. Macromechanical behavior of lamina and laminates. Strength and interlaminar stresses of laminates. Failure criteria. Stress analysis of laminates. Thermal moisture and residual stresses. Joints in composites. Offered even-numbered years. (Typically Offered: Spring)

AERE 5700: Wind Engineering

(Cross-listed with EM 5700).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ABE 3780 and ME 3450

Atmospheric circulations, atmospheric boundary layer wind, bluff-body aerodynamics, aeroelastic phenomena, wind-tunnel and full-scale testing, wind-load code and standards, effect of tornado and thunderstorm winds, design applications. Offered odd-numbered years. (Typically Offered: Spring)

AERE 5720: Turbulence

(Cross-listed with CHE 5720).

Credits: 3. Contact Hours: Lecture 3.

Qualitative features of turbulence. Statistical representation of turbulent velocity fields: averages, moments, correlations, length and time scales and the energy cascade. Averaged equations of motion, closure requirements, Reynolds averaged models. Homogeneous shear flows, free shear flows, boundary layers. Numerical simulation of turbulence: DNS, LES, DES.

AERE 5730: Random Signal Analysis and Kalman Filtering

(Cross-listed with EE 5730/ ME 5730).

Credits: 3. Contact Hours: Lecture 3.

Elementary notions of probability. Random processes. Autocorrelation and spectral functions. Estimation of spectrum from finite data. Response of linear systems to random inputs. Discrete and continuous Kalman filter theory and applications. Smoothing and prediction. Linearization of nonlinear dynamics. (Typically Offered: Fall)

AERE 5740: Optimal Control

(Cross-listed with EE 5740/ ME 5740).

Credits: 3. Contact Hours: Lecture 3.

The optimal control problem. Variational approach. Pontryagin's principle, Hamilton-Jacobi equation. Dynamic programming. Time-optimal, minimum fuel, minimum energy control systems. The regulator problem. Structures and properties of optimal controls. (Typically Offered: Spring)

AERE 5750: Introduction to Robust Control

(Cross-listed with EE 5750/ ME 5750).

Credits: 3. Contact Hours: Lecture 3.

Introduction to modern robust control. Model and signal uncertainty in control systems. Uncertainty description. Stability and performance robustness to uncertainty. Solutions to the H₂, H_∞, and L₁ control problems. Tools for robustness analysis and synthesis.

AERE 5760: Digital Feedback Control Systems

(Cross-listed with EE 5760/ ME 5760).

Credits: 3. Contact Hours: Lecture 3.

Sampled data, discrete data, and the z-transform. Design of digital control systems using transform methods: root locus, frequency response and direct design methods. Design using state-space methods. Controllability, observability, pole placement, state estimators. Digital filters in control systems. Microcomputer implementation of digital filters. Finite wordlength effects. Linear quadratic optimal control in digital control systems. Simulation of digital control systems. (Typically Offered: Fall)

AERE 5770: Linear Systems

(Cross-listed with EE 5770/ ME 5770/ MATH 5770).

Credits: 3. Contact Hours: Lecture 3.

Linear algebra review. Least square method and singular value decomposition. State space modeling of linear continuous-time systems. Solution of linear systems. Controllability and observability. Canonical description of linear equations. Stability of linear systems. State feedback and pole placements. Observer design for linear systems. (Typically Offered: Fall)

AERE 5780: Nonlinear Systems

(Cross-listed with EE 5780/ ME 5780/ MATH 5780).

Credits: 3. Contact Hours: Lecture 3.

Linear vs nonlinear systems. Phase plane analysis. Bifurcation and center manifold theory. Lyapunov stability. Absolute stability of feedback systems. Input-output stability. Passivity theory and feedback linearization. Nonlinear control design techniques. (Typically Offered: Spring)

AERE 5810: Perturbation Methods

Credits: 3. Contact Hours: Lecture 3.

Mathematical perturbation methods with applications to ordinary and partial differential equations. Perturbation expansions. Order of magnitude and gauge functions. Matched asymptotic expansions. Boundary layer problems. Multiple scales. Resonance and mode coupling. Solvability conditions for differential equations. Physical and engineering applications. (Typically Offered: Fall)

AERE 5830: Aeroacoustics

Credits: 3. Contact Hours: Lecture 3.

Noise metrics, Linear wave equation and its solution in 1-, 2-, and 3-D using Green's functions. Propagation of sound in free and confined spaces. Aerodynamic noise sources in engineering machines: aircraft engine noise, airfram noise, wind turbine noise, etc.

AERE 5900A: Aerospace Engineering Independent Study: Aero and/or Gas Dynamics

Credits: 1-5. Repeatable, maximum of 3 times.

Prereq: Instructor Permission for Course

AERE 5900B: Aerospace Engineering Independent Study: Propulsion

Credits: 1-5. Repeatable, maximum of 3 times.

Prereq: Instructor Permission for Course

AERE 5900C: Aerospace Engineering Independent Study: Aerospace Structures

Credits: 1-5. Repeatable, maximum of 3 times.

Prereq: Instructor Permission for Course

AERE 5900D: Aerospace Engineering Independent Study: Flight Dynamics

Credits: 1-5. Repeatable, maximum of 3 times.

Prereq: Instructor Permission for Course

AERE 5900E: Aerospace Engineering Independent Study: Spacecraft Systems

Credits: 1-5. Repeatable, maximum of 3 times.

Prereq: Instructor Permission for Course

AERE 5900F: Aerospace Engineering Independent Study: Flight Control Systems

Credits: 1-5. Repeatable, maximum of 3 times.

Prereq: Instructor Permission for Course

AERE 5900G: Aerospace Engineering Independent Study: Aeroelasticity

Credits: 1-5. Repeatable, maximum of 3 times.

AERE 5900H: Aerospace Engineering Independent Study: Viscous Aerodynamics

Credits: 1-5. Repeatable, maximum of 3 times.

Prereq: Instructor Permission for Course

AERE 5900I: Aerospace Engineering Independent Study: Design

Credits: 1-5. Repeatable, maximum of 3 times.

Prereq: Instructor Permission for Course

AERE 5900J: Aerospace Engineering Independent Study: Hypersonics

Credits: 1-5. Repeatable, maximum of 3 times.

Prereq: Instructor Permission for Course

AERE 5900K: Aerospace Engineering Independent Study: Computational Aerodynamics

Credits: 1-5. Repeatable, maximum of 3 times.

Prereq: Instructor Permission for Course

AERE 5900L: Aerospace Engineering Independent Study: Optimization

Credits: 1-5. Repeatable, maximum of 3 times.

Prereq: Instructor Permission for Course

AERE 5900M: Aerospace Engineering Independent Study: Non Destructive Evaluation

Credits: 1-5. Repeatable, maximum of 3 times.

Prereq: Instructor Permission for Course

AERE 5900N: Aerospace Engineering Independent Study: Wind Engineering

Credits: 1-5. Repeatable, maximum of 3 times.

Prereq: Instructor Permission for Course

AERE 5900Q: Aerospace Engineering Independent Study: Astrodynamics

Credits: 1-5. Repeatable, maximum of 3 times.

Prereq: Instructor Permission for Course

Independent Study for Astrodynamics. (Typically Offered: Fall, Spring, Summer)

AERE 5900R: Aerospace Engineering Independent Study: Ocean Wave Energy Conversion

Credits: 1-5. Repeatable, maximum of 3 times.

Prereq: Instructor Permission for Course

Independent Study for Ocean Wave Energy Conversion. (Typically Offered: Fall, Spring, Summer)

AERE 5910: Graduate Student Seminar Series

Credits: Required. Contact Hours: Lecture 1.

Repeatable.

Presentation of professional topics by department graduate students. Development of presentation skills used in a professional conference setting involving question and answer format.

AERE 5990: Creative Component

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

Courses for graduate students:**AERE 6400: Stability of Fluid Flow**

Credits: 3. Contact Hours: Lecture 3.

Theoretical methods of stability analysis; linear analysis of exchange of stability and over stability; bifurcation of equilibria; most dangerous modes and pattern formation; shear flow stability theorems. Physical mechanisms. Tollmein-Schlichting waves, disintegration of capillary jets, Benard convection, Taylor-Couette flow, centrifugal instability, double diffusion.

AERE 6470: Advanced Computational Fluid Dynamics

(Cross-listed with ME 6470).

Credits: 3. Contact Hours: Lecture 3.

An examination of current methods in computational fluid dynamics. Differencing strategies. Advanced solution algorithms for unstructured meshes. Grid generation. Construction of higher-order CFD algorithms. Parallel computing. Current applications. Use of state of the art CFD codes. (Typically Offered: Spring)

AERE 6510: Space Trajectory Optimization

Credits: 3. Contact Hours: Lecture 3.

Classical methods and recent advances in space trajectory optimization. Primer vector theory, introduction to direct and indirect methods for trajectory optimization, the problem of multi gravity assist with deep space maneuvers (MGADSM), optimization of the MGADSM using evolutionary algorithms, hidden genes genetic algorithms for trajectory optimization, and shape-based methods for trajectory design. Offered odd-numbered years. (Typically Offered: Spring)

AERE 6900A: Aerospace Engineering Independent Study: Aero and/or Gas Dynamics

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

AERE 6900B: Aerospace Engineering Independent Study: Propulsion

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

AERE 6900C: Aerospace Engineering Independent Study: Aerospace Structures

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

AERE 6900D: Aerospace Engineering Independent Study: Flight Dynamics

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

AERE 6900E: Aerospace Engineering Independent Study: Spacecraft Systems

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

AERE 6900F: Aerospace Engineering Independent Study: Flight Control Systems

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

AERE 6900G: Aerospace Engineering Independent Study: Aeroelasticity

Credits: 1-5. Repeatable.

AERE 6900H: Aerospace Engineering Independent Study: Viscous Aerodynamics

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

AERE 6900I: Aerospace Engineering Independent Study: Design

Credits: 1-5. Repeatable.

AERE 6900J: Aerospace Engineering Independent Study: Hypersonics

Credits: 1-5. Repeatable.

AERE 6900K: Aerospace Engineering Independent Study: Computational Aerodynamics

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

AERE 6900L: Aerospace Engineering Independent Study: Non Destructive Evaluation

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

AERE 6900M: Aerospace Engineering Independent Study: Wind Engineering

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

AERE 6970: Engineering Internship

Credits: Required. Repeatable.

One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

AERE 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

African and African American Studies (AFAM)

Courses primarily for undergraduates:

AFAM 2010: Introduction to African American Studies

Credits: 3. Contact Hours: Lecture 3.

An interdisciplinary introduction to the study of African American culture. Includes history, the social sciences, literature, religion, and the arts, as well as conceptual frameworks for investigation and analysis of the African American experience. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

AFAM 3100: Africa to 1880

(Cross-listed with HIST 3100).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Survey of the history of African societies, cultures and civilizations from earliest times to 1880. Evolution of states across the continent; social, economic, political, and cultural developments; nature and consequences of African interactions and relationship with Europeans. Meets International Perspectives Requirement.

AFAM 3110: Africa under Colonial Rule

(Cross-listed with HIST 3110).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Development of Africa from imposition of colonial rule to independence, including processes of European domination, African reaction and resistance, emergence of nationalism, and dismantling of colonialism. Meets International Perspectives Requirement.

AFAM 3270: Strategies of Resistance: From Slavery to Hip-Hop & Black Lives Matter

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Analysis of strategies of resistance and protest against inequality within African American communities; emphasis on the historical, socio-political and economic contexts in which resistance emerges; includes examination of contemporary forms of protests.

AFAM 3300: Ethnic and Race Relations

(Cross-listed with SOC 3300).

Credits: 3. Contact Hours: Lecture 3.

Prereq: SOC 1340

Analysis of ethnic and race relations, particularly in America; emphasis on the sociology and psychology of race and ethnic relations. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring, Summer)

AFAM 3340: Africana Religions

(Cross-listed with RELIG 3340).

Credits: 3. Contact Hours: Lecture 3.

A focused study of the religious histories and cultures of West Africans and their descendants in the Americas. Topics include West African traditions, Christianity, Islam, and indigenous Afro-Caribbean religions, with attention to their gendered, theological, and cultural dimensions. Prior course work in Religious Studies or African American Studies recommended. Meets U.S. Diversity Requirement. (Typically Offered: Fall)

AFAM 3350: Race, Ethnicity, and the US Criminal Justice System

(Cross-listed with CJ 3350).

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Prereq: AFAM 2010 or CJ 2400

Empirical and theoretical readings on the intersection of race, ethnicity, crime, and the criminal justice system in contemporary society. Topics include, but are not limited to racial and ethnic relations in society, media, violence, policing, and disparity and discrimination in crime and punishment. Criminological theories of racial and ethnic antagonism. Meets U.S. Diversity Requirement.

AFAM 3470: African American Literature

(Cross-listed with ENGL 3470).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Focused study of literature by African American writers. May include focus on a particular genre (fiction, non-fiction, poetry, film, drama, media), author, event, movement, or theme.

AFAM 3500: Women of Color in the U.S

(Cross-listed with WGS 3500).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits in WGS or AFAM

Economic, social, political and cultural roles of Women of Color in the U.S. Includes literary, philosophical, and artistic expressions. Myths and realities explored.

AFAM 3530: History of African Americans I

(Cross-listed with HIST 3530).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Examines African roots of black culture and the African American experience in the United States from the colonial period through the Civil War. Topics include Atlantic Slave Trade, slavery and American identity, abolition, the emergence of Black Nationalism, and black participation in the Civil War. Meets U.S. Diversity Requirement.

AFAM 3540: History of African Americans II

(Cross-listed with HIST 3540).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Explores African American political thought and political action from Reconstruction to the present. Topics include rise of Jim Crow segregation, urban migration, Garvey movement, Harlem Renaissance, Depression and world wars, Pan-Africanism, civil rights, Black Power, and black feminism. Meets U.S. Diversity Requirement.

AFAM 3550: Understanding Sub-Saharan Africa

(Cross-listed with ANTHR 3550).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Survey of economic, social, political and historical processes that have shaped representations of Africa and Africans. Topics include colonialism, globalization, gender and LGBTQ rights, conflict and representations in Western media. Offered even-numbered years. Meets International Perspectives Requirement. (Typically Offered: Spring)

AFAM 4600: Seminar in African American Culture

Credits: 3. Contact Hours: Lecture 3.

Intensive study of a selected topic in African-American Studies in one or more disciplines. Selected readings of various authors, movements, eras, or genres. Primary and secondary source materials. (Typically Offered: Spring)

AFAM 4730: Civil Rights and Ethnic Power

(Cross-listed with HIST 4730/ USLS 4730).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Comparative history of the civil rights and ethnic power movements (African American, Chicano, American Indian, Puerto Rican, among others) in the U.S. from World War II to the present. Topics include institutional foundations, leadership, gender and racial dynamics, and the convergences and divergences of these differing ethnic struggles for rights. Meets U.S. Diversity Requirement.

AFAM 4900: Independent Study

Credits: 1-3. Repeatable, maximum of 3 credits.

Prereq: Instructor Permission for Course

Agricultural and Biosystems Engineering (ABE)

Courses primarily for undergraduates:

ABE 1020: Learning Communities

Credits: 0.5. Contact Hours: Laboratory 1.

8 week learning communities course focusing on student success, engineering, and department curriculum. Building community within the ABE Department. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

ABE 1100: Experiencing Agricultural and Biosystems Engineering

Credits: 1. Contact Hours: Laboratory 2.

Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of agricultural and biosystems engineering. Report writing, co-ops, internships, careers, registration planning. (Typically Offered: Spring)

ABE 1600: Systematic Problem Solving and Computer Programming

Credits: 3.

Prereq: Credit or enrollment in MATH 1430 or MATH 1650

Systematic problem-solving using principles of dynamics, statics, mass/energy conservation, and algorithmic thinking. Use of spreadsheet programs and computer programming language(s) to solve engineering problems. Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count towards graduation. (Typically Offered: Fall, Spring)

ABE 1700: Engineering Graphics and Introductory Design

Credits: 3.

Applications of multi-view drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports.

ABE 2010: Preparing for Workplace Seminar

(Cross-listed with TSM 2010).

Credits: 1. Contact Hours: Lecture 1.

Prereq: Major in AE, AST, BSE, or ITEC; Sophomore classification

8 week course. Professionalism in the context of the engineering/technical workplace. Development of intrapersonal and interpersonal qualities including talent assessment; key workplace competency demonstration; leadership practice assessment; preparation of resume; cover letter preparation and behavioral-based interviewing; readiness for internship attainment. (Typically Offered: Fall, Spring)

ABE 2160: Fundamentals of Agricultural and Biosystems Engineering

Credits: 3. Contact Hours: Lecture 3.

Prereq: ABE 1600 or Permission of Department

Application of mathematics and engineering sciences in agricultural and biosystems engineering. Emphasis is on solving engineering problems. (Typically Offered: Fall)

ABE 2180: Project Management & Design in Agricultural and Biosystems Engineering

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Prereq: ABE 2160

Engineering design process with emphasis on criteria and constraints, ideation, and analysis. Fundamental principles of project management including project management software. Open-ended project(s) to apply core principles using concepts from prerequisite courses. (Typically Offered: Spring)

ABE 2710: Engineering Applications of Parametric Solid Modeling

Credits: 1. Contact Hours: Lecture 0.7, Laboratory 0.6.

Prereq: ABE 1700 or TSM 1160

8 week-course. Creating, editing, and documenting part and assembly models using Solidworks. Emphasis on developing engineering drawings to communicate designs. Portfolio creation to document learning and understanding of parametric modeling. (Typically Offered: Fall, Spring)

ABE 2720: Parametric Solid Models, Drawings, and Assemblies Using Creo Parametric

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Prereq: ABE 1700 or TSM 1160

8 week-course. Applications of Creo Parametric software. Create solid models of parts and assemblies. Utilize the solid models to create design documentation (standard drawing views, dimensions, and notes) and for the geometric analysis of parts and assemblies. (Typically Offered: Fall, Spring)

ABE 2730: CAD for Process Facilities and Land Use Planning

Credits: 1.

Prereq: ENGR 1700 or TSM 1160 or equivalent

8-week course. Application of 2-D AutoCAD software to create and interpret 2-D drawings of factories, facilities, and landscape structures. Topics include geometric construction, and design documentation using views, dimension, notes, and title blocks, and AutoCAD specific features such as Layers, Blocks, Standards, Styles. (Typically Offered: Fall, Spring)

ABE 3160: Applied Numerical Methods for Agricultural and Biosystems Engineering

Credits: 3.

Prereq: ABE 1600 and MATH 2660 or MATH 2670

Computer aided solution of engineering problems by use of numerical techniques and mathematical models. Systems analysis and optimization applicable to agricultural and biological systems. (Typically Offered: Fall, Spring)

ABE 3250: Biorenewable Systems

(Cross-listed with TSM 3250).

Credits: 3. Contact Hours: Lecture 3.

Prereq: CHEM 1630 or higher; MATH 1400 or higher

Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics. (Typically Offered: Fall)

ABE 3270L: Animal Production Systems Design Lab

Credits: 1. Contact Hours: Laboratory 2.

Prereq: Credit or enrollment in TSM 3270

Engineering analysis of Livestock and Poultry production systems as related to applications of Precision Livestock Farming Technology (PLFT), economic and environmental management, and manure and nutrient management. Focus on the design of animal production systems based on ASABE/NRCS Standards and Local Codes. Concrete and earthen manure storages and open-lot runoff management structures; utilization of RUSLE-2 and P-index in the development of comprehensive nutrient management plans; making economic and environmental management decisions related to improving production, gaseous emissions reporting, and odor mitigation. (Typically Offered: Fall)

ABE 3340X: Principles of Ecological Engineering

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Introduction to principles of ecological engineering including ecosystems ecology, nutrient cycling, material and energy balances; emphasize the interaction of soil, water, plants, and microbes in ecosystems, the role of humans in ecosystems, and the application of ecological principles to design.

ABE 3400: Functional Analysis of Soil, Crop, and Machine Systems

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ABE 2160

Principles of machine systems operation (tillage, cropestablishment, harvesting and crop protection). Principles of soil and crop interactions with machine systems. Experimental and simulation techniques for testing and evaluation of agricultural field machinery for equipment performance, functional analysis and crop production management. (Typically Offered: Fall)

ABE 3420: Agricultural Tractor Power

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: CHE 3810 or ME 2310

Thermodynamic principles and construction of tractor engines. Fuels, combustion, and lubrication. Kinematics and dynamics of tractor power applications; drawbar, power take-off and traction mechanisms. (Typically Offered: Spring)

ABE 3630: Agri-Industrial Applications of Electric Power and Electronics

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: ABE 2160

Single phase and three phase circuit design. Electrical safety. Electric motors and controls. Programmable logic controllers. Digital logic, instrumentation and sensors. (Typically Offered: Fall, Spring)

ABE 3780: Mechanics of Fluids

Credits: 3. Contact Hours: Lecture 3.

Prereq: CE 2740

Properties of fluids. Fluid statics. Kinematics and kinetics of fluid flow. Mass, momentum, and energy conservation laws; dimensional analysis; flow in pipes and channels. (Typically Offered: Fall, Spring, Summer)

ABE 3780L: Mechanics of Fluids Laboratory

Credits: 1. Contact Hours: Laboratory 2.

Prereq: Credit or enrollment in EM 3780

Exploration of properties of fluids through selected laboratory experiments. Fluid statics. Kinematics and kinetics of fluid flow. Mass, momentum, and energy conservation laws. Dimensional analysis. Flow in pipes and channels. (Typically Offered: Fall, Spring)

ABE 3800: Principles of Biological Systems Engineering

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: ABE 3160

Engineering analysis of biological systems, through the study of mass, energy, and information transport. Quantification and modeling of biological interactions, biological activities and bioreactor operations. Includes laboratory experiences on biological materials characterization, unit operation for bioprocesses and fermentation for producing bioproducts. (Typically Offered: Spring)

ABE 3880: Sustainable Engineering and International Development

(Cross-listed with CE 3880/ EE 3880).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Junior Classification in an Engineering Major

Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report. Meets International Perspectives Requirement. (Typically Offered: Fall)

ABE 4030: Physical Modeling and Control of Dynamic Systems

(Dual-listed with ABE 5030).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ABE 3160, and ABE 3630, and MATH 2660 or MATH 2670

Modeling and simulation of dynamic systems with physical modeling tools such as Simscape or Modelica. System concepts and engineering system analogies. Time and frequency response of systems. Introduction to control theory. Open-ended term project required for graduate credit. Offered even-numbered years. (Typically Offered: Spring)

ABE 4040: Instrumentation for Agricultural and Biosystems Engineering
(Dual-listed with ABE 5040).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ABE 3160 and ABE 3630

Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering and process control. Sensors and theory of operation applied to practical monitoring and control problems. Data collection, analysis, and calibration of sensors and data acquisition systems. Individual project required for graduate credit. (Typically Offered: Fall)

ABE 4100: Electronic Systems Integration for Agricultural Machinery
(Dual-listed with ABE 5100).

Credits: 3.

System architecture and design of electronics used in agricultural machinery and production systems. Emphasis on information technology and systems integration for automated agriculture processes. Design of Controller Area Network (CAN BUS) communication systems and discussion of relevant standards (ISO 11783 and SAE J1939). Application of technologies for sensing, distributed control, and automation of agricultural machinery will be emphasized. (Typically Offered: Spring)

ABE 4130: Fluid Power Engineering

(Cross-listed with ME 4130).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ABE 2160 or ME 2700 and Credit or concurrent enrollment in EM 3780 or ME 3350

Fundamental fluid power principles, symbols and schematics. Hydraulic fluid properties. Function and performance of components such as connections and fittings, filtration, pumps, valves, actuators, hydrostatic transmissions. Hydraulic system dynamics. Modeling and simulation of circuits. Analysis and design of hydraulic systems. Hydrostatic transmission design. Hands-on construction of circuits, measurement of system variables, and electrohydraulic control. (Typically Offered: Fall)

ABE 4150: Agricultural & Biosystems Engineering Design I

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Prereq: ABE 3160 (majors only)

Engineering design process with emphasis on team delivery of: clearly defined deliverables; criteria and constraints; wide-field ideation; discipline-appropriate analysis methods; identification and application of relevant standards. (Typically Offered: Fall, Spring)

ABE 4160: Agricultural & Biosystems Engineering Design II

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Prereq: ABE 4150

Final execution of the engineering design process with emphasis on team delivery of: oral and written communication in completion of the client-agreed deliverables. (Typically Offered: Fall, Spring)

ABE 4180: Fundamentals of Engineering Review

Credits: 1. Contact Hours: Lecture 1.

Prereq: Senior classification or above

8 week course. Review of core concepts covered in the Fundamentals of Engineering examination with emphasis on statics, dynamics, fluid mechanics, heat transfer, electric circuits, and engineering economics. Open to all College of Engineering seniors, however focus is on the general exam, not discipline specific exams.

ABE 4240A: Air Pollution: Air Quality and Effects of Pollutants

(Cross-listed with CE 4240A/ ENSCI 4240A).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (CHEM 1780 or [PHYS 2310; PHYS 2310L]); (MATH 1660 or 3 credits in STAT); Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ABE 4240B: Air Pollution: Climate Change and Causes

(Cross-listed with CE 4240B/ ENSCI 4240B).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (CHEM 1780 or [PHYS 2310; PHYS 2310L]); (MATH 1660 or 3 credits in STAT); Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ABE 4240C: Air Pollution: Transportation Air Quality

(Cross-listed with CE 4240C/ ENSCI 4240C).

Credits: 1. Contact Hours: Lecture 1.

*Prereq: (CHEM 1780 or [PHYS 2310; PHYS 2310L]); (MATH 1660 or 3 credits in STAT); Senior classification or above***ABE 4240D: Air Pollution: Off-Gas Treatment Technology**

(Cross-listed with CE 4240D/ ENSCI 4240D).

Credits: 1. Contact Hours: Lecture 1.

*Prereq: (CHEM 1780 or [PHYS 2310; PHYS 2310L]); (MATH 1660 or 3 credits in STAT); Senior classification or above***ABE 4240E: Air Pollution: Agricultural Sources of Pollution**

(Cross-listed with CE 4240E/ ENSCI 4240E).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (CHEM 1780 or [PHYS 2310; PHYS 2310L]); (MATH 1660 or 3 credits in STAT); Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ABE 4310: Design and Evaluation of Soil and Water Conservation Systems

(Dual-listed with ABE 5310/ ENSCI 5310).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: EM 3780 or CHE 3560

Hydrology and hydraulics in agricultural and urbanizing watersheds. Design and evaluation of systems for the conservation and quality preservation of soil and water resources. Use and analysis of hydrologic data in engineering design; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices, and agricultural water quality. (Typically Offered: Fall)

ABE 4320: Nonpoint Source Pollution and Control

(Dual-listed with ABE 5320/ ENSCI 5320).

Credits: 3.

Prereq: ABE 4310 or CE 3720

Characteristics and mechanisms of non-point source (NPS) pollution in agricultural and urban watersheds, modeling of NPS pollution for terrestrial and aquatic systems, statistical tools to assess environmental datasets, strategies to control and manage NPS pollution of water bodies, and integrated watershed management. Graduate students are required to develop/deliver lecture models on assigned topics and/or complete additional assignments. Offered irregularly. (Typically Offered: Spring)

ABE 4340: Ecosystem Restoration Engineering

(Dual-listed with ABE 5340).

Credits: 3. Contact Hours: Laboratory 3, Lecture 2.

Repeatable.

Prereq: (BIOL 2110, BIOL 2120 or BIOL 2510); (CHEM 1670, CHEM 1770, or CHEM 1780); (ABE 4310 or CE 3720)

Apply governing principles of ecological engineering, including biological, chemical, and physical conditions, to restoration design. Ecological concepts, such as water and elemental cycling, energy flow through systems, ecological disturbance, and natural and anthropogenic stresses. Design approaches focus on nature-based solutions, stakeholder engagement, and adaptive management. Restoration applications include streams, floodplains and riparian zones, wetlands, and prairies. (Typically Offered: Spring)

ABE 4370: Watershed Modeling and Policy

(Dual-listed with ABE 5370/ ENSCI 5370).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: CE 3720

A project-based course on watershed-scale models for improving water quality. Legislative and judicial basis of the Total Maximum Daily Load (TMDL) program; approaches to TMDL development; principles and techniques for implementation; stakeholder engagement strategies. Hands-on experiences with GIS-interfaced models, data sources, calibration/validation, statistical assessment of model results, and simulation using multiple tools. In addition to other assignments, graduate students will present case studies of TMDLs using different modeling tools. Offered irregularly. (Typically Offered: Fall)

ABE 4500: Emerging Technologies in Biomanufacturing

(Dual-listed with ABE 5500).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: ABE 3800

Overview, theory, unit operations, modeling, and engineering design of new technologies used in food and biomanufacturing, including bioreactors, culture- and cell-based products, pumping, heat transfer, separations systems, emerging technologies and processes. (Typically Offered: Fall)

ABE 4510: Food and Bioprocess Engineering

(Dual-listed with ABE 5510).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ABE 2160 and Credit or concurrent enrollment in ME 4360 or CHE 3570 or FSHN 3510 and MATH 2660 or MATH 2670

Application of engineering principles and mathematical modeling to the quantitative analysis of transport phenomena in food and bioprocesses. Physical/chemical characteristics of foods and biological materials and systems, flow processes, thermal processes, cooling/freezing processes, dehydration processes and separation processes. (Typically Offered: Spring)

ABE 4690: Engineering for Grain Storage, Preservation, Handling, and Processing Systems

(Dual-listed with ABE 5690).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: ABE 2160

Cereal grain and oilseed production, properties, and quality assessment. Design of storage systems, drying systems, material handling, and size reduction systems. Design of cereal grain processing systems, including dry milling, wet milling, flour milling, feed milling, and fermentation facilities. Students enrolled in ABE 5690 will be required to conduct additional learning activities. (Typically Offered: Spring)

ABE 4720: Controlled Environments for Animals and Plants

(Dual-listed with ABE 5720).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ABE 2160 and ME 2310

Principles and design of environmental control systems for animal and plant facilities. Insulation, heat and mass transfer, fans, ventilation, air distribution, heating and cooling equipment, and controls. Individual projects required for graduate credit. Offered even-numbered years. (Typically Offered: Spring)

ABE 4780: Wood Frame and Agri-Industrial Structures

(Dual-listed with ABE 5780).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EM 3240

Design of light-framed wood structures using LRFD and ASD design procedures. Includes analysis of wind, snow, dead, and live loads. Applications include animal housing, greenhouses, and storage structures. Fasteners, laminated posts, truss design and use of National Design Specifications. Offered odd-numbered years. (Typically Offered: Spring)

ABE 4800: Engineering Analysis of Biological Systems

(Cross-listed with ENSCI 4800/ GLOBE 4800).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ABE 3800 or Permission of Department

Systems-level quantitative analysis of various biological systems, including applications in foods, feeds, biofuels, bioenergy, and other bio-based systems. Introduction to techno-economic analysis and life-cycle assessment of these systems at multiple production scales. Applying these tools to evaluate and improve cost and sustainability performance. Students enrolled in ABE 5800 will be required to conduct additional learning activities. (Typically Offered: Fall)

ABE 4900A: ABE Independent Study: Animal Production Systems Engineering

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

Independent Study.

ABE 4900B: ABE Independent Study: Biorenewable Resources

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

Independent study. (Typically Offered: Fall, Spring, Summer)

ABE 4900E: ABE Independent Study: Environmental Bioprocessing Engineering

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

Independent study in environmental bioprocessing engineering.

(Typically Offered: Fall, Spring, Summer)

ABE 4900F: ABE Independent Study: Food Engineering

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

Independent study in food engineering. (Typically Offered: Fall, Spring, Summer)

ABE 4900G: ABE Independent Study: General Topics in ABE

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

Independent study in general ABE topics. (Typically Offered: Fall, Spring, Summer)

ABE 4900L: ABE Independent Study: Land & Water Resources Engineering

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

Guided instruction in land and water resources engineering. (Typically Offered: Fall, Spring, Summer)

ABE 4900M: ABE Independent Study: Advanced Machinery Systems Engineering

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

Guided instruction in advance machinery systems engineering. (Typically Offered: Fall, Spring, Summer)

ABE 4950: Agricultural and Biosystems Engineering Department Study Abroad Preparation or Follow-up

(Cross-listed with TSM 4950).

Credits: 1-2. Repeatable.

Prereq: Academic Advisor Permission for Course

Preparation for, or follow-up of, study abroad experience (4960). For preparation, course focuses on understanding the tour destination through readings, discussions, and research on topics such as the regional industries, climate, crops, culture, economics, food, geography, government, history, natural resources, and public policies. For follow-up, course focuses on presentations by students, report writing, and reflection. Students enrolled in this course intend to register for 4960 the following term or have had taken 4960 the previous term. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

ABE 4960: Agricultural and Biosystems Engineering Department Study Abroad

(Cross-listed with TSM 4960).

Credits: 1-4. Repeatable.

Prereq: Academic Advisor Permission for Course

Tour and study at international sites relevant to disciplines of industrial technology, biological systems engineering, agricultural systems technology, and agricultural engineering. Location and duration of tours will vary. Trip expenses paid by students. Pre-trip preparation and/or post-trip reflection and reports arranged through 4950. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

ABE 5030: Physical Modeling and Control of Dynamic Systems

(Dual-listed with ABE 4030).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Modeling and simulation of dynamic systems with physical modeling tools such as Simscape or Modelica. System concepts and engineering system analogies. Time and frequency response of systems. Introduction to control theory. Open-ended term project required for graduate credit. Offered even-numbered years. (Typically Offered: Spring)

ABE 5040: Instrumentation for Agricultural and Biosystems Engineering

(Dual-listed with ABE 4040).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering and process control. Sensors and theory of operation applied to practical monitoring and control problems. Data collection, analysis, and calibration of sensors and data acquisition systems. Individual project required for graduate credit. (Typically Offered: Fall, Spring, Summer)

ABE 5060: Applied Computational Intelligence

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Applications of biologically inspired computational intelligence tools for data mining, system modeling, and optimization for agricultural, biological and other engineered systems. Introduction to Artificial Neural Networks, Support Vector Machines, Fuzzy Logic, Genetic Algorithms, Bayesian and Decision Tree learning. Fundamental Machine Vision techniques will be introduced in the first part of course and be integrated into the lab exercises for learning different computational intelligence techniques. MATLAB will be used throughout the course for algorithm implementation. Offered even-numbered years. (Typically Offered: Fall)

ABE 5100: Electronic Systems Integration for Agricultural Machinery

(Dual-listed with ABE 4100).

Credits: 3.

Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms. Offered odd-numbered years. (Typically Offered: Fall)

ABE 5110: Bioprocessing and Bioproducts

Credits: 3. Contact Hours: Lecture 3.

Unit operations for production of bio-based, fermented fuels, beverages, chemicals, pharmaceuticals, and coproducts. Taxonomy, metabolism, kinetics, and modeling of aerobic and anaerobic fermentation systems. Mass/energy balances, pretreatments, liquefaction, saccharification, separations, and process integration. (Typically Offered: Spring)

ABE 5150: Integrated Crop and Livestock Production Systems

(Cross-listed with SUSAG 5150/ AGRON 5150/ ANS 5150).

Credits: 3. Contact Hours: Lecture 3.

Prereq: SUSAG 5090 or Graduate Classification

Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms. Offered odd-numbered years. (Typically Offered: Fall)

ABE 5160: Data Science and Analytics for Agricultural and Biosystem Engineers

Credits: 3. Contact Hours: Lecture 4.

Repeatable.

Prereq: ABE 1600

Introduction to research methods associated with data science concepts and their applications. Analyses and research related to agricultural and biosystems engineering and technology; methods to develop and maintain reproducible data analysis pipelines; best practices of data visualization and communication of data-driven results to broad audiences; concepts of data integrity and ethics. (Typically Offered: Fall)

ABE 5240A: Air Pollution: Air Quality and Effects of Pollutants

(Cross-listed with CE 5240A/ ENSCI 5240A).

Credits: 1. Contact Hours: Lecture 1.

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ABE 5240B: Air Pollution: Climate Change and Causes

(Cross-listed with CE 5240B/ ENSCI 5240B).

Credits: 1. Contact Hours: Lecture 1.

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ABE 5240C: Air Pollution: Transportation Air Quality

(Cross-listed with CE 5240C/ ENSCI 5240C).

Credits: 1. Contact Hours: Lecture 1.

ABE 5240D: Air Pollution: Off-Gas Treatment Technology

(Cross-listed with CE 5240D/ ENSCI 5240D).

Credits: 1. Contact Hours: Lecture 1.

ABE 5240E: Air Pollution: Agricultural Sources of pollution

(Cross-listed with CE 5240E/ ENSCI 5240E).

Credits: 1. Contact Hours: Lecture 1.

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ABE 5310: Design and Evaluation of Soil and Water Conservation Systems

(Dual-listed with ABE 4310). (Cross-listed with ENSCI 5310).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Hydrology and hydraulics in agricultural and urbanizing watersheds. Design and evaluation of systems for the conservation and quality preservation of soil and water resources. Use and analysis of hydrologic data in engineering design; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices, and agricultural water quality. (Typically Offered: Fall)

ABE 5320: Nonpoint Source Pollution and Control

(Dual-listed with ABE 4320). (Cross-listed with ENSCI 5320).

Credits: 3.

Characteristics and mechanisms of non-point source (NPS) pollution in agricultural and urban watersheds, modeling of NPS pollution for terrestrial and aquatic systems, statistical tools to assess environmental datasets, strategies to control and manage NPS pollution of water bodies, and integrated watershed management. Graduate students are required to develop/deliver lecture models on assigned topics and/or complete additional assignments. Offered irregularly. (Typically Offered: Spring)

ABE 5330: Erosion and Sediment Transport

(Cross-listed with NREM 5330/ ENSCI 5330).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Soil erosion processes, soil loss equations and their application to conservation planning, sediment properties, initiation of sediment motion and over land flow, flow in alluvial channels and theory of sediment transport, channel stability, reservoir sedimentation, wind erosion, BMPs for controlling erosion. Offered even-numbered years. (Typically Offered: Fall)

ABE 5370: Watershed Modeling and Policy

(Dual-listed with ABE 4370). (Cross-listed with ENSCI 5370).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

A project-based course on watershed-scale models for improving water quality. Legislative and judicial basis of the Total Maximum Daily Load (TMDL) program; approaches to TMDL development; principles and techniques for implementation; stakeholder engagement strategies. Hands-on experiences with GIS-interfaced models, data sources, calibration/validation, statistical assessment of model results, and simulation using multiple tools. In addition to other assignments, graduate students will present case studies of TMDLs using different modeling tools. Offered irregularly. (Typically Offered: Fall)

ABE 5500: Emerging Technologies in Biomanufacturing

(Dual-listed with ABE 4500).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Overview, theory, unit operations, modeling, and engineering design of new technologies used in food and biomanufacturing, including bioreactors, culture- and cell-based products, pumping, heat transfer, separations systems, emerging technologies and processes. (Typically Offered: Fall)

ABE 5510: Food and Bioprocess Engineering

(Dual-listed with ABE 4510).

Credits: 3. Contact Hours: Lecture 3.

Application of engineering principles and mathematical modeling to the quantitative analysis of transport phenomena in food and bioprocesses. Physical/chemical characteristics of foods and biological materials and systems, flow processes, thermal processes, cooling/freezing processes, dehydration processes and separation processes. (Typically Offered: Fall, Spring, Summer)

ABE 5560: GIS Programming and Automation

(Cross-listed with CRP 5560).

Credits: 3. Contact Hours: Lecture 3.

Introduction to automated geoprocessing in Geographic Information Systems using Python. Focus on learning scripting language and object-oriented programming, automation of custom-designed geoprocessing scripts, and application toward student research and/or interests. (Typically Offered: Fall)

ABE 5690: Engineering for Grain Storage, Preservation, Handling, and Processing Systems

(Dual-listed with ABE 4690).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Cereal grain and oilseed production, properties, and quality assessment. Design of storage systems, drying systems, material handling, and size reduction systems. Design of cereal grain processing systems, including dry milling, wet milling, flour milling, feed milling, and fermentation facilities. Students enrolled in ABE 5690 will be required to conduct additional learning activities. (Typically Offered: Spring)

ABE 5720: Controlled Environments for Animals and Plants

(Dual-listed with ABE 4720).

Credits: 3. Contact Hours: Lecture 3.

Principles and design of environmental control systems for animal and plant facilities. Insulation, heat and mass transfer, fans, ventilation, air distribution, heating and cooling equipment, and controls. Individual projects required for graduate credit. Offered even-numbered years. (Typically Offered: Spring)

ABE 5780: Wood Frame and Agri-Industrial Structures

(Dual-listed with ABE 4780).

Credits: 3. Contact Hours: Lecture 3.

Design of light-framed wood structures using LRFD and ASD design procedures. Includes analysis of wind, snow, dead, and live loads. Applications include animal housing, greenhouses, and storage structures. Fasteners, laminated posts, truss design and use of National Design Specifications. Offered odd-numbered years. (Typically Offered: Spring)

ABE 5800: Engineering Analysis of Biological Systems

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Systems-level quantitative analysis of various biological systems, including applications in foods, feeds, biofuels, bioenergy, and other bio-based systems. Introduction to techno-economic analysis and life-cycle assessment of these systems at multiple production scales. Applying these tools to evaluate and improve cost and sustainability performance. Students enrolled in ABE 5800 will be required to conduct additional learning activities. (Typically Offered: Fall)

ABE 5850: Biosystems for Sustainable Development

Credits: 2. Contact Hours: Lecture 2.

Repeatable.

Understanding and appreciation of sustainable development issues related to food, water, energy, and climate change nexus and its implications for environmental sustainability, nutrition security, one health, and economic development of communities in the US and other countries. Application of basic agricultural, biological, math, and engineering/applied sciences to solve society's problems for water, food, energy, and environment systems. Emphasis placed on learning from case studies and developing sustainable solutions for communities. Students will learn to lead by example, improve their leadership and communication skills to understand local conditions and motivate themselves and others to improve the world around us. Meets International Perspectives Requirement. (Typically Offered: Spring)

ABE 5900: Special Topics in Agricultural & Biosystems Engineering

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Guided instruction and self-study on special topics relevant to agricultural and biosystems engineering. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**ABE 6010: Graduate Seminar**

(Cross-listed with TSM 6010).

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Keys to starting a successful graduate research project. Effective literature review, formulating research questions, and setting goals. Practicing effectively communicating research and science. Effective strategies for scholarly writing, professional development, responding to feedback, peer-reviewing, successful publishing in journals, and curating scholarly output. (Typically Offered: Fall)

ABE 6100: Foundations of Sustainable Agriculture

(Cross-listed with SUSAG 6100/ AGRON 6100/ ANTHR 6100/ SOC 6100).

Credits: 3. Contact Hours: Lecture 3.

Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts. (Typically Offered: Fall)

ABE 6900: Advanced Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Advanced topics. (Typically Offered: Fall, Spring, Summer)

ABE 6940: Teaching Practicum

(Cross-listed with TSM 6940).

Credits: 1-3.

Graduate student experience in the agricultural and biosystems engineering departmental teaching programs. (Typically Offered: Fall, Spring)

ABE 6970: Engineering Internship

Credits: Required. Repeatable.

One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ABE 6990B: Research: Biosystems Engineering

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Guided graduate research in biosystems engineering. (Typically Offered: Fall, Spring, Summer)

ABE 6990C: Research: Computer Aided Design

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Guided graduate research in biosystems engineering. (Typically Offered: Fall, Spring, Summer)

ABE 6990E: Research: Environmental Systems

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Guided graduate research in environmental systems. (Typically Offered: Fall, Spring, Summer)

ABE 6990F: Research: Food Engineering

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Guided graduate research in food engineering. (Typically Offered: Fall, Spring, Summer)

ABE 6990O: Research: Occupational Safety

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Guided graduate research in occupational safety. (Typically Offered: Fall, Spring, Summer)

ABE 6990P: Research: Power and Machinery Engineering

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Guided graduate research in power and machinery engineering. (Typically Offered: Fall, Spring, Summer)

ABE 6990Q: Research: Structures

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Guided graduate research in structures. (Typically Offered: Fall, Spring, Summer)

ABE 6990R: Research: Process Engineering

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Guided graduate research in process engineering. (Typically Offered: Fall, Spring, Summer)

ABE 6990S: Research: Environment and Natural Resources

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Guided graduate research in environment and natural resources. (Typically Offered: Fall, Spring, Summer)

ABE 6990U: Research: Waste Management

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Guided graduate research in waste management. (Typically Offered: Fall, Spring, Summer)

Agricultural Education and Studies (AGEDS)

Courses primarily for undergraduates:

AGEDS 1100: Professional Development in Agricultural Education and Studies: New Student Seminar

Credits: 1. Contact Hours: Discussion 1, Lecture 0.5.

Introduction to professional and educational development within university, college, department and major. Development of Resumes and Cover Letters. Career planning and assessment of professional goals. (Typically Offered: Fall, Spring)

AGEDS 1110: Dean's Leadership Seminar

Credits: 1. Contact Hours: Lecture 1.

Prereq: College Director Permission for Course

Introduction to leadership in agriculture and the life sciences, problem solving applied to current case studies, global perspective required by leaders, and designing programs to respond to societal needs in the agricultural and life sciences. (Typically Offered: Fall)

AGEDS 1120: Agriculture Biotechnology Colloquium

Credits: 1. Contact Hours: Lecture 1.

Prereq: Department Permission for Course

The scientific basis of biological and social sciences in agriculture. (Typically Offered: Spring)

AGEDS 1130: Access to Success Seminar I

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Career skills, learning strategies, and social and academic integration techniques to student members of Step Forward Learning Community. Utilization of campus resources, encouragement of self-exploration, and development of academic skills. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

AGEDS 1150X: Professional Development in Agricultural Education and Studies: Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 3 credits.

Topics vary according to student interest. Materials related to current issues in Agricultural Education and Studies.

AGEDS 1160: Initial Field Experience in Agricultural Education

Credits: 1. Contact Hours: Lecture 0.5.

Prereq: AGLSE major

Field experience in a formal education setting designed to explore teaching as a career through guided observation and interviews, reflection, and on-campus dialogue. (Typically Offered: Fall)

AGEDS 2110A: High School Agriculture Programs

Credits: 1. Repeatable, maximum of 3 credits.

Prereq: AGEDS 1100 and credit or enrollment in AGEDS 3100

Forty hours on-site in an agricultural setting. Students will have an opportunity outside the classroom for career guidance, role modeling, and reflection on their observations that they can apply to their courses and other educational experiences. (Typically Offered: Fall, Spring, Summer)

AGEDS 2110C: Agricultural Industries and Agencies

Credits: 1. Repeatable, maximum of 3 credits.

Prereq: AGEDS 1100

Forty hours on-site in an agricultural setting. Students will have an opportunity outside the classroom for career guidance, role modeling, and reflection on their observations that they can apply to their courses and other educational experiences. (Typically Offered: Fall, Spring, Summer)

AGEDS 2150: Professional Development in Agricultural Education and Studies: Career Seminar

Credits: 1. Contact Hours: Lecture 1.

Prereq: Credit or concurrent enrollment in AGEDS 1100; Sophomore classification

Career preparation including assessments, networking, interviewing skills and related life skill development. Survey of current issues in agriculture that impact career goals. (Typically Offered: Fall, Spring)

AGEDS 2270X: Fundamentals of Visual Communication for Agriculture and Life Sciences

Credits: 3. Contact Hours: Lecture 3.

Introduction to the fundamentals of visual communication as used in agricultural and life sciences contexts. Overviews of photography and videography and how they are both used to communicate agricultural and life sciences topics to strategic audiences. (Typically Offered: Fall, Spring)

AGEDS 2400X: Introduction to Intercultural Competency in Agriculture

Credits: 3. Contact Hours: Lecture 3.

Overview of the theory of cultural competency through the lens of social justice and multicultural education. Role of cultural competency in agriculture and food system professions. Guided learning experiences, reflections, dialogues and conversations. (Typically Offered: Fall)

AGEDS 2630X: Communicate with Impact in Agriculture, Natural Resources, and Life Science

Credits: 3. Contact Hours: Lecture 3.

This course covers communication concepts and practices in the context of agriculture, natural resources, and life sciences. Topics examined in this course include the foundation of communication, persuasion, message strategies on different communication channels with diverse audiences for various purposes, and ethical implications of persuasion in a number of agricultural communication contexts. (Typically Offered: Fall, Spring)

AGEDS 3100: Foundations of Agricultural Education Programs

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification AND credit or enrollment in AGEDS 2110A

Historical development of agricultural education programs. Philosophic premises, program goals and objectives. Educational and social issues impacting the implementation of agricultural education programs. (Typically Offered: Fall, Spring)

AGEDS 3110: Presentation and Sales Strategies for Agricultural Audiences

Credits: 3. Contact Hours: Lecture 3.

Utilizing instructional methods, techniques, and problem solving, presentation and sales strategies with agricultural audiences. (Typically Offered: Fall, Spring)

AGEDS 3120: Science With Practice

Credits: 3. Contact Hours: Lecture 1.

Repeatable.

Prereq: College of Agriculture and Life Sciences major

A planned learning experience wherein each student and faculty mentor develops a learning agreement that encompasses specific activities and expectations. Students are engaged in reflective activities that include journals, micro-reflections, formal presentations, and a comprehensive portfolio. (Typically Offered: Fall, Spring)

AGEDS 3150: Personal, Professional, and Entrepreneurial Leadership in Agriculture

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Leadership principles and strategies to influence and motivate team members to achieve personal, professional, and entrepreneurial goals in production agriculture, agricultural education, and agricultural organizations. (Typically Offered: Fall, Spring)

AGEDS 3270: Survey of Agriculture and Life Sciences Communication

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Development of written, oral, visual and electronic communications relevant to agriculture and life sciences. Students develop a set of communication skills applicable to agriculture and life science contexts and for various audiences. (Typically Offered: Fall, Spring)

AGEDS 3880: Agricultural Mechanics Applications

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Introduction to SMAW (Arc), GMAW (Mig), GTAW (Tig), Oxy-Fuel welding, Oxy-Fuel cutting, and Plasma cutting theories and applications. Emphasis will be on theoretical foundation of welding, safety, welding skill development, and management of equipment, and materials. Introduction to small engines and applications. Emphasis will be on theory of operating systems, maintenance, troubleshooting, failure analysis, and safety. (Typically Offered: Fall, Spring, Summer)

AGEDS 3980: Cooperative Education

Credits: Required.

Prereq: Junior or senior classification; permission of department

Required of all cooperative education students. Students must register for this course prior to commencing each work period. (Typically Offered: Fall, Spring, Summer)

AGEDS 4010: Planning Agriculture and Life Sciences Education Programs
(Dual-listed with AGEDS 5010).

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGEDS 3100

Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality. (Typically Offered: Fall)

AGEDS 4020: Methods of Teaching in Agriculture and Life Sciences
(Dual-listed with AGEDS 5020).

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGEDS 4010; concurrent enrollment in AGEDS 3110

Topics include: principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation. (Typically Offered: Fall)

AGEDS 4120: Internship in Agricultural Education and Studies

Credits: 2-6. Repeatable, maximum of 6 credits.

Prereq: Junior or Senior Classification AND Major in Agricultural Studies, Agriculture and Life Sciences Education, Agricultural Communication, or Agricultural Education

A supervised two to twelve week learning experience in an approved learning setting with application to educational, agricultural, communications and/or environmental practices and principles. (Typically Offered: Fall, Spring, Summer)

AGEDS 4140: Developing Agricultural Education Programs in Non-Formal Settings

Credits: 2. Contact Hours: Lecture 2.

Basic concepts in planning, conducting, and evaluating educational programs in non-formal settings. Includes programming for youth and adults in Extension, agricultural industry, and related agencies. (Typically Offered: Spring)

AGEDS 4160: Pre-Student Teaching Experience in Agricultural Education

Credits: 1.

Prereq: AGEDS 2110, AGEDS 4020 and admission to teacher education program

A forty hour field-based experience in an approved secondary agricultural education program. Concurrent enrollment in 4170 is required. (Typically Offered: Fall, Spring)

AGEDS 4170: Supervised Teaching in Agriculture and Life Sciences

Credits: 1-16. Repeatable.

Prereq: AGEDS 2110, AGEDS 4020 and admission to teacher education program

Supervised teaching in public schools. (Typically Offered: Fall, Spring)

AGEDS 4250: Curriculum for Agricultural Science Education
(Dual-listed with AGEDS 5250).

Credits: 1-6. Repeatable, maximum of 18 credits.

Inquiry-based techniques for education related to science, technology, engineering, and mathematics (STEM) in agriculture in secondary classrooms. Analyze, demonstrate, and design activities, labs, and projects using inquiry-based frameworks for teaching and learning. (Typically Offered: Summer)

AGEDS 4500: Farm Management and Operation

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Repeatable, maximum of 9 credits.

Prereq: ECON 2350, ECON 2300 and Junior classification

Participation in the management and operation of a diversified Iowa farm. The class is responsible for the plans, records, and decisions for buying and selling the farm's livestock, crops, and equipment. Special speakers on current topics. May be taken for credit 3 times at different times of the year with permission of the instructor. (Typically Offered: Fall, Spring, Summer)

AGEDS 4510: Agricultural Law

Credits: 3. Contact Hours: Lecture 3.

Prereq: Senior classification

The legal framework impinging upon decision-making by firms, families, and individuals, real and personal property, contracts, secured transactions, negotiable instruments, debtor-creditor relations, bankruptcy, farm income tax organization of firms, intergenerational property transfers, trusts and farm estate planning, civil and criminal liabilities, environmental law, federal and state regulatory powers. (Typically Offered: Spring)

AGEDS 4600X: Capstone in Agricultural Studies - Multidisciplinary Option

Credits: 3. Contact Hours: Lecture 3.

Capstone course focusing on connecting the education, skills, and experiences gained during students' experience in the Agricultural Studies Multidisciplinary option program to aide in preparing for life after college. This course challenges students to uncover the wild and wicked challenges 21st century agriculture is facing, while employing their skills and expertise to develop solutions for these issues. (Typically Offered: Fall, Spring)

AGEDS 4610: Innovation Diffusion and the Role of Agricultural and Extension Education

(Dual-listed with AGEDS 5610).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Examine the processes by which innovations in agriculture, food, and natural resources are diffused across global societies based on their performance characteristics that influence rate of adoption. Diffusion of Innovations Theory and alternative models will be applied to analyze and solve issues facing communities, industries, and organizations in domestic and international settings. Meets International Perspectives Requirement. (Typically Offered: Fall)

AGEDS 4630: Communicating Contemporary Issues in Agriculture

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior or Senior Classification and AGEDS 2630X

Focuses on improving students' awareness, comprehension, and communication of current and emerging issues facing agriculture and natural resources in Iowa, the United States, and worldwide. Students will be exposed to these issues by reading articles, engaging in dialogue with various players, and identifying ways to address them. Course will enhance students' written and oral communication skills on contemporary agriculture and natural resources issues. (Typically Offered: Fall, Spring)

AGEDS 4750: Agri-Marketing and Communications Competition

Credits: 1-2. Contact Hours: Lecture 2.

Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Specialized training in communication and agricultural marketing knowledge and skills in preparation for intercollegiate competition. Graduation Description: Maximum of 6 credits can be applied toward graduation. (Typically Offered: Fall, Spring)

AGEDS 4880: Methods of Teaching Agricultural Mechanics

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AGEDS 3880; credit or concurrent enrollment in AGEDS 3100

Methods and management techniques in agricultural mechanics laboratories. Emphasis will be on safety, mechanical skills development and management of students, facilities, equipment, and materials. (Typically Offered: Fall, Spring)

AGEDS 4900A: Philosophy, Curriculum, and Methods

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 4900B: Leadership, Evaluation, and Administration

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 4900C: Business, Industry, and Production Agriculture

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 4900D: Extension and International Agriculture

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 4900E: Instructional Technology

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 4900F: Environmental Issues

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 4900G: Entrepreneurship

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 4900H: Independent Study in Agricultural Education and Studies: Honors

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 4900I: Communications

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 4960A: International

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Limited enrollment. Extended field trips to study agriculture and education related topics. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

AGEDS 4960B: Domestic

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Prereq: Instructor Permission for Course

Limited enrollment. Extended field trips to study agriculture and education related topics. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students. (Typically Offered: Fall, Spring, Summer)

AGEDS 4990: Undergraduate Research

Credits: 1-30. Repeatable.

Prereq: Department Permission for Course

Research experience in agricultural education and studies with application to selected problems. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

AGEDS 5010: Planning Agriculture and Life Sciences Education Programs
(Dual-listed with AGEDS 4010).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Classification as AGEDS grad student

Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality. (Typically Offered: Fall)

AGEDS 5020: Methods of Teaching in Agriculture and Life Sciences
(Dual-listed with AGEDS 4020).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Concurrent enrollment in AGEDS 5110, classification as AGEDS grad student

Topics include: principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation. (Typically Offered: Fall)

AGEDS 5100: Introduction to Research in Agricultural Education

Credits: 3. Contact Hours: Lecture 3.

Determining your research focus; developing research problems and objectives; reviewing the literature and establishing a theoretical framework; establishing procedures for data collection and analysis; ethical issues. (Typically Offered: Spring)

AGEDS 5110: Professional Agricultural Presentation Practices

Credits: 3. Contact Hours: Lecture 3.

The identification and use of key planning, delivery and evaluation of presentations using audience engagement techniques focused on research-based principles and field-based practices of professional presenters in agriculture and the life sciences. (Typically Offered: Fall, Summer)

AGEDS 5170: Student Teacher Education Practicum

Credits: 2-6.

Prereq: Classification as AGEDS grad student

Supervised 5th-12th grade public and private schools teaching practicum for graduate students in Masters degree teacher certification program. (Typically Offered: Fall, Spring)

AGEDS 5200: Instructional Methods for Adult and Higher Education in Agriculture and Natural Resources

Credits: 3. Contact Hours: Lecture 3.

Theory and practice of adult education. Teaching and learning in formal and non-formal instructional programs for adult learners. (Typically Offered: Spring)

AGEDS 5240: Program Development and Evaluation in Agricultural and Extension Education

Credits: 3. Contact Hours: Lecture 3.

Theories and practice of program planning for nonformal education. Addresses use of program logic modeling and considers critical theories of planning to address power and interests in program development, needs assessment, and evaluation. (Typically Offered: Fall)

AGEDS 5250: Curriculum for Agricultural Science Education

(Dual-listed with AGEDS 4250).

Credits: 1-6. Repeatable, maximum of 3 times.

Inquiry-based techniques for education related to science, technology, engineering, and mathematics (STEM) in agriculture in secondary classrooms. Analyze, demonstrate, and design activities, labs, and projects using inquiry-based frameworks for teaching and learning. (Typically Offered: Summer)

AGEDS 5330: Introduction to Learning Theory in Agricultural Education

Credits: 3. Contact Hours: Lecture 3.

Introduction to a variety of theoretical perspectives of learning and how they may be used within the context of agricultural education. Emphasis will be on the major domains of learning, developmental considerations, basic assumptions, concepts, and principles of various learning theories; understanding how each theoretical perspective may be used in both formal and non-formal educational settings. (Typically Offered: Spring)

AGEDS 5500: Foundations of Agricultural Education

Credits: 3. Contact Hours: Lecture 3.

Philosophical premises, ethical principles, historical development, contextual applications, and knowledge bases for agricultural education. (Typically Offered: Fall)

AGEDS 5610: Innovation Diffusion and the Role of Agricultural and Extension Education

(Dual-listed with AGEDS 4610).

Credits: 3. Contact Hours: Lecture 3.

Examine the processes by which innovations in agriculture, food, and natural resources are diffused across global societies based on their performance characteristics that influence rate of adoption. Diffusion of Innovations Theory and alternative models will be applied to analyze and solve issues facing communities, industries, and organizations in domestic and international settings. Meets International Perspectives Requirement. (Typically Offered: Fall)

AGEDS 5680: Qualitative Interviews and Focus Groups

Credits: 3. Contact Hours: Lecture 3.

Understanding the role of interviews in agricultural education research, basis for theory of meaning, and variations of interview technique among qualitative traditions. Development of facilitation technique for individual interviews; and focus groups. Transcription and basic qualitative analysis. Use of interview findings to prepare manuscripts. (Typically Offered: Spring)

AGEDS 5800X: A Survey of Leadership Theories

Credits: 3. Contact Hours: Lecture 3.

Examine postulates, applications and limitations of various leadership theories such as Transformational Leadership, Authentic Leadership, Servant Leadership, and Adaptive Leadership. Valuable to individuals interested in pursuing leadership opportunities in academia and business; and specifically Agricultural Education, Communication and Extension Education. (Typically Offered: Fall)

AGEDS 5900A: Curriculum

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 5900B: Methods

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 5900C: Philosophy

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 5900D: Evaluation

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 5900E: Administration

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 5900F: Leadership

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 5900G: Guidance

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 5900I: Instructional Technology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 5900J: Extension

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 5900K: International Agriculture

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 5900L: Program Planning

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AGEDS 5930A: Curriculum

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring, Summer)

AGEDS 5930B: Methods

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring, Summer)

AGEDS 5930C: Evaluation

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring, Summer)

AGEDS 5930D: Administration

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring, Summer)

AGEDS 5930E: Leadership

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring, Summer)

AGEDS 5930F: Extension

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring, Summer)

AGEDS 5930G: Program Planning

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring, Summer)

AGEDS 5930H: Instructional Technology

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring, Summer)

AGEDS 5930M: Biotechnology Workshop

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

(Typically Offered: Fall, Spring, Summer)

AGEDS 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

For nonthesis masters degree programs. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:

AGEDS 6150A: Writing for Publication

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AGEDS 6150B: Ethics

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AGEDS 6150C: Grant Writing

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AGEDS 6150D: Career Planning

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AGEDS 6150E: Contemporary Issues

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AGEDS 6170: Professional Internship for Agricultural Educators

Credits: 1-6. Contact Hours: Lecture 6.

Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Analysis of the roles and activities of professionals in agricultural education. Supervised professional field-based experience in public and private settings. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AGEDS 6250: Leadership, Administration, Supervision and Management of Agricultural Education Programs

Credits: 3. Contact Hours: Lecture 3.

Principles and best practices for leading, administering, supervising, and managing agricultural education programs. Analyzing selected case studies that apply theory to practice in agricultural situations.

AGEDS 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Agronomy (AGRON)

Courses primarily for undergraduates:

AGRON 1050: Leadership Experience

Credits: Required.

A participatory experience in activities or completion of a course that enhances the development of leadership and group-dynamic skills. See advisor for departmental requirements.

AGRON 1100: Professional Development in Agronomy: Orientation

Credits: 1. Contact Hours: Lecture 1.

Orientation to college life, the profession of agronomy, and the agronomy curriculum. (Typically Offered: Fall)

AGRON 1200: Introduction to Renewable Resources

(Cross-listed with NREM 1200/ ENVS 1200).

Credits: 3. Contact Hours: Lecture 3.

Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management. (Typically Offered: Fall, Spring)

AGRON 1400: Climate and Society

(Cross-listed with MTEOR 1400/ ENVS 1400/ GEOL 1400).

Credits: 3. Contact Hours: Lecture 3.

The climate system of our planet. How nature and our actions alter the existing energy balance leading to climate change. Past climates on our planet. The influence of climate on society and resource availability during the Holocene (~ 11,000 years ago to present) with focus on changes post industrial revolution. Significant climate events that have altered our way of life in the past. Projected changes in future climate and potential impacts on society, environment and resources. Adaption to and mitigation of climate change. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

AGRON 1600: Water Resources of the World

(Cross-listed with MTEOR 1600/ ENVS 1600/ GEOL 1600).

Credits: 3. Contact Hours: Lecture 3.

Study of the occurrence, history, development, and management of world water resources. Basic hydrologic principles including climate, surface water, groundwater, and water quality. Historical and current perspectives on water policy, use, and the role of water in society and the environment. Meets International Perspectives Requirement. (Typically Offered: Spring)

AGRON 1800: Global Agriculture in a Changing World

Credits: 3. Contact Hours: Lecture 3.

A scientific investigation of the global distribution of climate, soils and agricultural production and consumption. Physical processes that connect natural resources to agriculture and the environment. How global change drives increasing demand for agricultural production. Meets International Perspectives Requirement. (Typically Offered: Fall)

AGRON 1810: Introduction to Crop Science

Credits: 3. Contact Hours: Lecture 3.

Basic structure and function of plants, origin and classification, growth and development. Fundamentals of photosynthesis, plant water use, plant nutrition and genetics that regulate plant growth, development and responses to the environment. (Typically Offered: Fall, Spring)

AGRON 1820: Introduction to Soil Science

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or concurrent enrollment in CHEM 1630 or CHEM 1670 or CHEM 1770

Introduction to physical, chemical, and biological properties of soils; soil formation, classification and global distribution; soil health, soils and humanity and sustainable land management. (Typically Offered: Fall, Spring)

AGRON 1830: Basic Skills for Agronomists

Credits: 1. Contact Hours: Laboratory 3.

Developing the skills that agronomists employ in their work with crops, soil, and the environment through activities involving tools and methodologies used by agronomists. Enrollment is restricted to first-year students majoring in agronomy. (Typically Offered: Fall)

AGRON 2060: Introduction to Weather and Climate

(Cross-listed with MTEOR 2060).

Credits: 3. Contact Hours: Lecture 3.

Basic concepts in weather and climate, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety. (Typically Offered: Fall, Spring)

AGRON 2100: Professional Development in Agronomy: Career Planning

Credits: Required. Contact Hours: Lecture 1.

Career planning, resume and cover letter preparation. (Typically Offered: Fall, Spring)

AGRON 2170: Weed Identification

Credits: 1.

Prereq: 3 credits in Biological Sciences

Half-semester course. Identification of important weeds of agricultural, horticultural and native habitats. Principles of plant taxonomy and classification. Field trips. (Typically Offered: Fall, Spring)

AGRON 2500: Environmental Geography

(Cross-listed with ENSCI 2500/ ENVS 2500/ NREM 2500).

Credits: 3. Contact Hours: Lecture 3.

The distribution, origins and functions of the earth's physical systems and the spatial relationship between human activity and the natural world. (Typically Offered: Fall)

AGRON 2590: Organic Compounds in Plants and Soils

Credits: 3. Contact Hours: Lecture 3.

Prereq: (AGRON 1820 or GEOL 2100 or ENSCI 2500); BIOL 2120; (CHEM 1630 or CHEM 1770); MATH 1400 or higher

Structure, function, and transformations of organic compounds significant in plant and soil environments. (Typically Offered: Spring)

AGRON 2700: Geospatial Technologies

(Cross-listed with ENSCI 2700).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Concepts and tools for acquiring, managing, analyzing, and displaying geographic information, including GIS, remote sensing, spatial analysis, and cartography. Focus on applications in biological, ecological, environmental, and agricultural sciences. (Typically Offered: Spring)

AGRON 2790: Field Exploration of Agronomy

Credits: 3.

Prereq: AGRON 1810 and AGRON 1820

Field-based investigation of Iowa's agronomic systems. Application of principles learned in introductory soils, crops and agronomy courses. For students majoring in agronomy. (Typically Offered: Fall)

AGRON 2800: Crop Development, Production and Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 1810 and AGRON 1820

Overview of crops and cropping systems in the context of global and US agriculture. Focus on agronomic principles, constraints and opportunities as they apply to various locations in Iowa, the USA and the world. (Typically Offered: Fall, Spring)

AGRON 2810: Crop Physiology

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 1810

Science governing plant growth and development in the context of cropping and genetic improvements. (Typically Offered: Spring)

AGRON 2820: Soil Conservation and Land Use

Credits: 3. Contact Hours: Lecture 3.

Principles of soil conservation and land use with emphasis on best management practices and use of soil maps and databases such as Web Soil Survey. AGRON 1820 recommended. (Typically Offered: Fall, Spring)

AGRON 2830: Pesticide Application Certification

(Cross-listed with ENT 2830/ FOR 2830/ HORT 2830).

Credits: 2. Contact Hours: Lecture 2.

Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized. (Typically Offered: Spring)

AGRON 2980: Cooperative Education

Credits: Required.

Prereq: Instructor Permission for Course

Students register for this course in order to retain full-time status while on a professional work experience. Students must register for this course prior to commencing each work period. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AGRON 3100: Professional Development in Agronomy: Work Experience

Credits: Required.

Professional work experience in agronomy. See advisor for departmental requirements.

AGRON 3110: Professional Internship in Agronomy

Credits: 1. Contact Hours: Lecture 1.

Prereq: Academic Advisor Permission for Course

A supervised learning experience in a professional setting related to crop production, plant breeding, soil science or environmental science. For students majoring in Agronomy or Seed Science. (Typically Offered: Fall)

AGRON 3160: Crop Structure-Function Relationships

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 1810; 3 credits of BIOL

Basic principles concerning the growth, development, and production of crop communities in relation to their environment. (Typically Offered: Fall, Spring)

AGRON 3170: Principles of Weed Science

Credits: 3. Contact Hours: Lecture 3.

Biology and ecology of weeds. Interactions between weeds and crops. Principles and practices of integrated weed management systems. Herbicide mechanisms, classification, and fate in plants and soils. (Typically Offered: Fall)

AGRON 3180: Introduction to Ecosystems

(Cross-listed with ENSCI 3180/ BIOL 3180/ NREM 3180).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 12 credits in AECL, AGRON, BIOL, CHEM, FOR, GEOL, NREM

Biological and physical processes affecting material and energy flows in natural and managed ecosystems. Understanding and predicting climate and management impacts on ecosystem services and sustainability. (Typically Offered: Spring)

AGRON 3200: Genetics, Agriculture and Biotechnology

(Cross-listed with GEN 3200).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120

Transmission and molecular genetics with an emphasis on applications in agriculture, the structure and expression of the gene, how genes behave in populations and how recombinant DNA technology can be used to improve agriculture. Graduation Restriction: Credit for graduation will not be allowed for more than one of the following: GEN 2600, 3130, 3200 and BIOL 3130 and 3130L. (Typically Offered: Fall, Spring)

AGRON 3310: Crops Practicum

Credits: 2. Repeatable.

Prereq: Instructor Permission for Course

Identification of crops, weeds and diseases of agronomic importance. Diagnostic skills related to seed purity, grain grading, herbicide injury, nutrient deficiency, insect injury, disease symptoms, and/or abiotic environmental stress. Students may participate in intercollegiate judging contests. (Typically Offered: Fall, Spring)

AGRON 3340: Forage Crop Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 1810

Production and management of forage crops; concepts applied to yield, quality, and stand persistence; systems of forage utilization including grazing, hay, and silage. (Typically Offered: Spring)

AGRON 3380: Seed Science and Technology

(Cross-listed with HORT 3380).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: (AGRON 1810 or HORT 2210); 3 credits of BIOL

Seed production, maturation, dormancy, vigor, deterioration, and related aspects of enhancement, conditioning, storage, and quality evaluation. Aspects of the seed industry and regulation of seed marketing. (Typically Offered: Fall)

AGRON 3420: World Food Issues: Past and Present

(Cross-listed with ENVS 3420/ FSHN 3420).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Issues associated with global agricultural and food systems including ethical, social, economic, environmental, and policy contexts. Investigation of various causes and consequences of overnutrition/ undernutrition, global health, poverty, hunger, access, and distribution. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

AGRON 3510: Turfgrass Establishment and Management

(Cross-listed with HORT 3510).

Credits: 3. Contact Hours: Lecture 3.

Prereq: HORT 2210 or AGRON 1810 or BIOL 2110

Principles and practices of turfgrass propagation, establishment, and management. Specialized practices relative to professional lawn care, golf courses, athletic fields, highway roadsides, and seed and sod production. The biology and control of turfgrass pests. (Typically Offered: Fall)

AGRON 3510L: Turfgrass Establishment and Management Laboratory

(Cross-listed with HORT 3510L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment in HORT 3510

Those enrolled in the horticulture curriculum are required to take 3510L in conjunction with 3510 except by permission of the instructor. (Typically Offered: Fall)

AGRON 3540: Soils and Plant Growth

(Cross-listed with HORT 3540).

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 1820; 3 credits of BIOL

Effects of chemical, physical, and biological properties of soils on plant growth, with emphasis on nutritive elements, pH, organic matter maintenance, and rooting development. (Typically Offered: Fall, Spring)

AGRON 3540L: Soils and Plant Growth Laboratory

(Cross-listed with HORT 3540L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: AGRON or HORT major with Credit or concurrent enrollment in AGRON 3540

Laboratory exercises in soil testing that assess a soil's ability to support nutritive requirements for plant growth. (Typically Offered: Fall, Spring)

AGRON 3600: Environmental Soil Science

(Cross-listed with ENSCI 3600).

Credits: 3. Contact Hours: Lecture 3.

Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities. AGRON 1820 or ENSCI 2500 or GEOL 1010 recommended. (Typically Offered: Spring)

AGRON 3700: Field Experience in Soil Description and Interpretation

Credits: 1. Repeatable, maximum of 4 times.

Prereq: Credit or concurrent enrollment in AGRON 1820

Description and interpretation of soils in the field and laboratory, emphasizing hands-on experience. Evaluation of soil information for land use. Students may participate in intercollegiate judging contests. (Typically Offered: Fall, Spring)

AGRON 3920: Systems Analysis in Crop and Soil Management

Credits: 3. Contact Hours: Lecture 2, Studio 3.

Prereq: AGRON 3160 and AGRON 3540

Management strategies at the level of the farm field. Emphasis will be on participatory learning activities. (Typically Offered: Fall, Spring)

AGRON 3980: Cooperative Education

Credits: Required.

Prereq: Permission of Instructor; Junior classification

Student register for this course in order to retain full-time status while on a professional work experience. The student must register for this course prior to commencing each work period. (Typically Offered: Fall, Spring, Summer)

AGRON 4040: Global Change

(Cross-listed with MTEOR 4040/ ENSCI 4040/ ENVS 4040).

Credits: 3. Contact Hours: Lecture 3.

Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. (Typically Offered: Fall, Spring)

AGRON 4050: Soil-Plant-Animal-Atmosphere Physics

(Dual-listed with AGRON 5050/ ENSCI 5050/ MTEOR 5050). (Cross-listed with ENSCI 4050/ MTEOR 4050).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 1600 or MATH 1650

The movement of energy and mass among the soil, vegetation, and atmosphere. The heat and water budget of humans, other animals, plants, and plant communities. Relevance to weather and climate, the effect of climate change on organisms, and remote sensing. Some exposure to computer programming (any language) recommended. Offered odd-numbered years. (Typically Offered: Spring)

AGRON 4060: World Climates

(Cross-listed with ENSCI 4060/ MTEOR 4060).

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 2060 or MTEOR 2060

Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of a changing climate. Semester project and in-class presentation required. Meets International Perspectives Requirement. (Typically Offered: Spring)

AGRON 4070: Mesoscale Meteorology

(Dual-listed with MTEOR 5070/ AGRON 5070). (Cross-listed with MTEOR 4070).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 1660; MTEOR 4430

Physical nature and practical consequences of mesoscale atmospheric phenomena. Mesoscale convective systems, fronts, terrain-forced circulations. Observation, analysis, and prediction of mesoscale atmospheric structure. Offered even-numbered years. (Typically Offered: Spring)

AGRON 4100: Professional Development in Agronomy: Senior Forum

Credits: 1. Contact Hours: Lecture 1.

Prereq: AGRON 2100 and Senior classification

Development of an appropriate content for professionalism. Topics include professional certification, ethics, and maintaining an active network of information sources and professional contacts in support of lifelong learning. Student interpretation, writings, presentations, and discussions. (Typically Offered: Fall, Spring)

AGRON 4210: Introduction to Plant Breeding

(Cross-listed with HORT 4210).

Credits: 3. Contact Hours: Lecture 3.

Prereq: GEN 3200 or BIOL 3130

Fundamental principles of plant breeding and cultivar development, breeding methods for self-pollinated, cross-pollinated and clonal crops.

(Typically Offered: Fall)

AGRON 4250: Crop and Soil Modeling

(Dual-listed with AGRON 5250).

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 3160 or AGRON 3540; MATH 1650

Understanding basic crop physiology and soil processes through the use of mathematical and statistical approaches. Structure of crop models, dynamics and relationship among components such as leaf-level photosynthesis, canopy architecture, root dynamics and soil carbon and nitrogen pools. (Typically Offered: Fall)

AGRON 4500: Issues in Sustainable Agriculture

(Cross-listed with ENVS 4500).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

Agricultural science as a human activity; contemporary agricultural issues from agroecological perspective. Comparative analysis of intended and actual consequences of agricultural practices from the perspective of ethics and sustainable agriculture. (Typically Offered: Spring)

AGRON 4520: Intro GIS for Geoscientists

(Dual-listed with GEOL 5520/ AGRON 5520/ ENSCI 5520). (Cross-listed with GEOL 4520/ ENSCI 4520).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Introduction to geographic information systems (GIS) using ArcGIS Pro with particular emphasis on geoscientific data. Teaches typical GIS operations and analyses in the geosciences to prepare students for practical use of GIS in industry and academia. Includes a class project for GEOL 5520. Sophomore classification or above recommended. (Typically Offered: Fall, Spring)

AGRON 4590: Environmental Soil and Water Chemistry

(Dual-listed with AGRON 5590/ ENSCI 5590). (Cross-listed with ENSCI 4590).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: 6 credit of CHEM; (AGRON 1820 or AGRON 3600); MATH 1400 or higher

An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues.

AGRON 3540; GEOL 1000 recommended. (Typically Offered: Fall)

AGRON 4630: Soil Formation and Landscape Relationships

(Dual-listed with AGRON 5630/ ENSCI 5630). (Cross-listed with ENSCI 4630).

Credits: 3. Contact Hours: Lecture 3.

Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. AGRON 1820 or ENSCI 2500 recommended. Graduation Restriction: Credit for one of AGRON 4630 or AGRON 4630L may be applied for graduation. (Typically Offered: Fall)

AGRON 4770: Soil Physics

(Dual-listed with AGRON 5770/ ENSCI 5770). (Cross-listed with ENSCI 4770).

Credits: 3. Contact Hours: Lecture 3.

The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat. AGRON 1820 recommended. (Typically Offered: Spring)

AGRON 4820: Soils of the Tropics

(Cross-listed with GLOBE 4820).

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: AGRON 3540 and 9 credits in AGRON, GLOBE, ENSCI, or related discipline

Properties, classification, and geographic distribution of tropical and near-tropical soils and landscapes with emphasis on their suitability for cropping. (Typically Offered: Spring)

AGRON 4840: Organic Agricultural Theory and Practice

(Dual-listed with AGRON 5840/ HORT 5840/ SUSAG 5840). (Cross-listed with HORT 4840).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 9 credits in biological or physical sciences

Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives. Offered odd-numbered years. (Typically Offered: Spring)

AGRON 4850: Soil and Environmental Microbiology

(Dual-listed with AGRON 5850/ ENSCI 5850/ MICRO 5850). (Cross-listed with ENSCI 4850/ MICRO 4850).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AGRON 1820

The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues. MICRO 2010; MICRO 2010L recommended. (Typically Offered: Fall)

AGRON 4880: Raster GIS for Geoscientists

(Dual-listed with GEOL 5880/ AGRON 5880/ ENSCI 5880). (Cross-listed with GEOL 4880/ ENSCI 4880).

Credits: 3.

GIS course with focus on the spatial analysis and modeling of raster and triangulated irregular network (TIN) data using ArcGIS Pro. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 5880) a class project. Basic knowledge of ArcGIS Pro is a plus but not required. Course can be taken concurrently to any other Intro GIS course. Sophomore classification or above recommended. Offered odd-numbered years. (Typically Offered: Spring)

AGRON 4900E: Independent Study: Entrepreneurship

Credits: 1-3. Repeatable, maximum of 4 credits.

Prereq: Instructor Permission for Course

Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student. (Typically Offered: Fall, Spring, Summer)

AGRON 4900G: Independent Study: General

Credits: 1-3. Repeatable, maximum of 4 credits.

Prereq: Instructor Permission for Course

Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student. (Typically Offered: Fall, Spring, Summer)

AGRON 4900H: Independent Study: Honors

Credits: 1-3. Repeatable, maximum of 4 credits.

Prereq: Instructor Permission for Course

Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student. (Typically Offered: Fall, Spring, Summer)

AGRON 4900Z: Independent Study: Service Learning

Credits: 1-3. Repeatable, maximum of 4 credits.

Prereq: Instructor Permission for Course

Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student. (Typically Offered: Fall, Spring, Summer)

AGRON 4910: Seed Science Internship Experience

(Cross-listed with HORT 4910).

Credits: 1-2. Repeatable, maximum of 2 credits.

Prereq: AGRON 3380; Permission of Instructor

A professional work experience and creative project for seed science secondary majors. The project requires the prior approval and participation of the employer and instructor. The student must submit a written report. Advanced approval and participation of employer and instructor required. (Typically Offered: Fall, Spring, Summer)

AGRON 4930: Workshop in Agronomy

Credits: 1-30. Repeatable, maximum of 4 times.

Prereq: Instructor Permission for Course

Workshop experience in crops, soils, or agricultural meteorology.

AGRON 4960A: International Tour

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Prereq: Instructor Permission for Course

Limited enrollment. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on crop and livestock production. Location and duration of tours will vary. Tour expenses paid by students. Check with department for current offerings. Meets International Perspectives Requirement.

AGRON 4960B: Domestic Tour

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Limited enrollment. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on crop and livestock production. Location and duration of tours will vary. Tour expenses paid by students. Check with department for current offerings.

AGRON 4970: Agroecology Field Course

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior or Senior classification; 8 credits in AGRON

A one-week intensive class, offered off-campus. Student will visit farms within the Midwest and analyze the sustainability of each farm. (Typically Offered: Fall)

AGRON 4980: Cooperative Education

Credits: Required. Repeatable.

Prereq: Senior classification; Permission of Instructor

Students register for this course in order to retain full-time status while on a professional work experience. Students must register for this course prior to commencing each work period. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

AGRON 5000: Orientation Seminar

Credits: 1. Contact Hours: Lecture 2.

Prereq: Agronomy students only

An introduction to Iowa and U.S. agriculture for scholars in agronomic majors. Field trips when possible. Departmental role in the functioning of research, teaching, and extension in fulfilling the charge given the land-grant university. (Typically Offered: Fall)

AGRON 5010: Crop Growth and Development

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 1810 or equivalent, BIOL 1010, CHEM 1630, MATH 1400

Physiological processes in crop growth, development and yield: photosynthesis, respiration, water relations, mineral nutrition, assimilate partitioning, seedling vigor, light interception and canopy growth, root growth, reproduction and yield. (Typically Offered: Fall, Spring, Summer)

AGRON 5020: Chemistry, Physics, and Biology of Soils

Credits: 3. Contact Hours: Lecture 3.

Soil chemical, physical, and biological properties that control processes within the soil, their influence on plant/soil interactions, and soil classification. Basic concepts in soil science and their applications. Offered odd-numbered years. (Typically Offered: Spring)

AGRON 5030: Climate and Crop Growth

Credits: 3. Contact Hours: Lecture 3.

Prereq: Qualified Undergrads need AGRON 1810, MATH 1400

Applied concepts in climate and agricultural meteorology with emphasis on the climate-agriculture relationship and the microclimate-agriculture interaction and crop risk management. Basic meteorological principles are also presented to support these applied concepts. (Typically Offered: Summer)

AGRON 5040: Global Change

(Cross-listed with MTEOR 5040/ ENSCI 5040).

Credits: 3. Contact Hours: Lecture 3.

Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. (Typically Offered: Fall, Spring)

AGRON 5050: Soil-Plant-Animal-Atmosphere Physics

(Dual-listed with AGRON 4050/ ENSCI 4050/ MTEOR 4050). (Cross-listed with ENSCI 5050/ MTEOR 5050).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 1600 or MATH 1650

The movement of energy and mass among the soil, vegetation, and atmosphere. The heat and water budget of humans, other animals, plants, and plant communities. Relevance to weather and climate, the effect of climate change on organisms, and remote sensing. Some exposure to computer programming (any language) recommended. Offered odd-numbered years. (Typically Offered: Spring)

AGRON 5060: Crop Genetics

(Cross-listed with HORT 5060).

Credits: 3. Contact Hours: Lecture 3.

Introduction to plant reproductive systems, gene segregation and linkage analysis, molecular nature of genes and how genes confer phenotypes, mutation and biotechnology, quantitative inheritance and population genetics to prepare students for subsequent courses in crop improvement. Enrollment is restricted to off-campus MS in Plant Breeding students. (Typically Offered: Fall)

AGRON 5070: Mesoscale Meteorology

(Dual-listed with MTEOR 4070/ AGRON 4070). (Cross-listed with MTEOR 5070).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 1660; MTEOR 4540 OR Graduate Classification

Physical nature and practical consequences of mesoscale atmospheric phenomena. Mesoscale convective systems, fronts, terrain-forced circulations. Observation, analysis, and prediction of mesoscale atmospheric structure. Offered even-numbered years. (Typically Offered: Spring)

AGRON 5080: Biophysical Crop Ecology

Credits: 3. Contact Hours: Lecture 3.

The physics behind how humans use plant photosynthesis to convert energy from the sun into useful products. Techniques for quantifying and predicting ecological interactions in the soil-plant-atmosphere continuum. Offered even-numbered years. (Typically Offered: Spring)

AGRON 5090: Agroecosystems Analysis

(Cross-listed with SUSAG 5090/ SOC 5090).

Credits: 4. Contact Hours: Lecture 3, Laboratory 4.

Experiential, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing both field visits and classroom activities.

Focus on understanding multiple elements, perspectives (agronomic, economic, ecological, social, etc.), and scales of operation. (Typically Offered: Fall)

AGRON 5100: Crop Improvement

(Cross-listed with STB 5100).

Credits: 3. Contact Hours: Lecture 3.

A study of agriculture from its origins with the domestication of crop plants through basic genetics, demonstrating the challenges and elements of breeding strategies intended to manage gene x environmental interactions. Elements of biotechnology including use of molecular markers, development of genetically modified cultivars, gene mapping, cloning, and gene editing will be covered. Methods to measure the effectiveness of plant breeding (genetic gain) and the impact of improved agronomic practices contributing to increased agricultural productivity will be covered. Use of intellectual property protection, and the conservation and utilization of exotic genetic resources.

AGRON 5110: Crop Improvement

Credits: 3. Contact Hours: Lecture 3.

Basic principles in the genetic improvement of crop plants. Methods of cultivar development in self-pollinated and cross-pollinated crop species. (Typically Offered: Fall, Spring)

AGRON 5120: Soil-Plant Environment

Credits: 3. Contact Hours: Lecture 3.

Qualified Undergrad Prereq: AGRON 5020. Recommended AGRON 5010 or graduate standing

Soil properties and their impact on soil/plant relationships. Soil structure, aeration, moisture, and nutrients will be discussed in the context of soil fertility and environmental quality management. (Typically Offered: Spring)

AGRON 5130: Data Science for Agricultural Professionals

(Cross-listed with STB 5130).

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 1810 or equivalent, MATH 1400, STAT 1040

Quantitative methods for analyzing and interpreting agronomic information. Principles of experimental design, hypothesis testing, analysis of variance, regression, correlation, and graphical representation of data. Use of SAS and Excel for organization, analyzing, and presenting data. (Typically Offered: Fall, Spring)

AGRON 5140: Integrated Pest Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 1810 or equivalent, AGRON 5010,

BIOL 1010, CHEM 1630, MATH 1400; AGRON 5020 and AGRON 5030 recommended

Principles and practices of weed science, entomology, and plant pathology applied to crop production systems. Biology, ecology and principles of integrated crop pest management.

AGRON 5150: Integrated Crop and Livestock Production Systems

(Cross-listed with ABE 5150/ SUSAG 5150/ ANS 5150).

Credits: 3. Contact Hours: Lecture 3.

Prereq: SUSAG 5090 or Graduate Classification

Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms. Offered odd-numbered years. (Typically Offered: Fall)

AGRON 5160: Crop Physiology

Credits: 3. Contact Hours: Lecture 3.

Investigation of Molecular, whole plant, and plant community processes essential to biomass production and seed formation, and analysis of molecular approaches to overcome the limitations imposed on these processes by the environment. (Typically Offered: Spring)

AGRON 5180: Microwave Remote Sensing

(Cross-listed with EE 5180/ MTEOR 5180).

Credits: 3. Contact Hours: Lecture 3.

Microwave remote sensing of Earth's surface and atmosphere using satellite-based or ground-based instruments. Specific examples include remote sensing of atmospheric temperature and water vapor, precipitation, ocean salinity, and soil moisture. Offered even-numbered years. (Typically Offered: Spring)

AGRON 5190: Herbicide Physiology and Biochemistry

Credits: 2. Contact Hours: Lecture 2.

Prereq: Qualified Undergrads need AGRON 3160 and AGRON 3170

Herbicide mechanisms of action, selectivity, uptake, and translocation. Specific sites of herbicide action as they affect plant physiology. Herbicide resistance in weeds and crops. Implications of herbicides on weed management. Offered even-numbered years. (Typically Offered: Spring)

AGRON 5200: Plant Breeding Methods

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 5060

Breeding methods used in the genetic improvement of self-pollinated, cross-pollinated and clonal crops. (Typically Offered: Fall)

AGRON 5210: Principles of Cultivar Development

Credits: 3. Contact Hours: Lecture 3.

Theoretical and practical exploration of breeding methods to develop clonal, pureline, inbred and hybrid cultivars. Principles and strategies to set breeding objectives, parental selection and germplasm management, population development, generation advancements, multiple trait selection, experimental designs in breeding programs; seed production and certification. Introduce tools available to a breeder. (Typically Offered: Spring)

AGRON 5220: Field Methods in Plant Breeding

Credits: 1-2.

Prereq: AGRON 5210

Field experience in planning and conducting plant breeding research for germplasm and cultivar development. Offered odd-numbered years. (Typically Offered: Summer)

AGRON 5230: Molecular Plant Breeding

Credits: 3.

Prereq: AGRON 4210 or AGRON 5210; GDCB 5420A

Plant breeding in the era of sequenced genomes and transformation. High throughput genomic technologies will be presented in relation to various applications in plant breeding. (Typically Offered: Spring)

AGRON 5240: Applied Plant Molecular Genetics & Biotechnology

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 5060

Basic principles and applied techniques used in the genetic improvement of crop plants. Discussion of structure and function of genes that control traits of value. Types of molecular markers, analysis of quantitatively inherited traits, genome mapping, analyses of databases. (Typically Offered: Fall)

AGRON 5250: Crop and Soil Modeling

Credits: 3. Contact Hours: Lecture 3.

Prereq: (MATH 1650; AGRON 3160 or AGRON 3540) or graduate classification

Understanding basic crop physiology and soil processes through the use of mathematical and statistical approaches. Structure of crop models, dynamics and relationship among components such as leaf-level photosynthesis, canopy architecture, root dynamics and soil carbon and nitrogen pools. (Typically Offered: Fall)

AGRON 5260: Field Plot Technique

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: STAT 4010

Planning experiments for agricultural research, analysis of data, and concepts in data interpretation. (Typically Offered: Spring)

AGRON 5280: Quantitative Genetics for Plant Breeding

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 5060; AGRON 5370

An introduction to the application of quantitative genetics to plant breeding programs. (Typically Offered: Spring)

AGRON 5300: Ecologically Based Pest Management Strategies

(Cross-listed with SUSAG 5300/ ENT 5300/ PLP 5300).

Credits: 3. Contact Hours: Lecture 3.

Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes. Offered even-numbered years. (Typically Offered: Fall)

AGRON 5310: Crop Ecology and Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 5010 or AGRON 5020 or AGRON 5030 or graduate standing

Ecological principles underlying crop production systems. Crop production in the context of management approaches, system resources and constraints, and interactions. Emphasis on the ecology of row and forage crops common to the Midwest. Required course for the Master of Science in Agronomy degree program. (Typically Offered: Fall)

AGRON 5320: Soil Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 5010; AGRON 5030; AGRON 5120 or graduate standing

Evaluates the impact of various soil management practices on soil and water resources. Combines and applies basic information gained in AGRON 5020 and AGRON 5120. Emphasizes the agronomic, economic, and environmental effects of soil management strategies. Required course for the Master of Science in Agronomy degree program. (Typically Offered: Fall)

AGRON 5330: Crop Protection

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 5140

Integrated management systems for important crop pests. Cultural, biological and chemical management strategies applicable to major crops grown in the Midwest. Required course for the Master of Science in Agronomy degree program.

AGRON 5340: Seed and Variety, Testing and Technology

(Cross-listed with STB 5340).

Credits: 2. Contact Hours: Lecture 2.

The components of seed quality and how they are assessed in the laboratory, including traits derived from modern biotechnology. The impact of new technologies on seed quality testing. Variety maintenance procedures and breeder seed. Variety identification: phenotype and grow-out trials, isozyme testing, and DNA marker testing. Procedures for evaluating varieties. The variance tests appropriate for fixed effects analysis of variance. Statistical inference and stratification for yield trials. Use of strip plot testing.

AGRON 5360: Quantitative Methods for Seed

(Cross-listed with STB 5360).

Credits: 2. Contact Hours: Lecture 2.

Quantitative Methods for analyzing and interpreting agronomic and business information for the seed industry. Principles of experimental design and hypothesis testing, regression, correlation, analysis of variance, and graphical representation of data. Use of spreadsheets and statistical software for manipulating, analyzing and presenting data. (Typically Offered: Fall)

AGRON 5370: Quantitative Analytics for Plant Breeding

Credits: 3. Contact Hours: Lecture 3.

Qualified Undergrad Prereq: AGRON 1810; MATH 1400 or graduate standing

Methods to quantify consequences of decisions based on analytical methods used in crop genetic improvement and cultivar development. (Typically Offered: Fall, Spring)

AGRON 5380: Seed Physiology and the Environment

(Cross-listed with HORT 5380).

Credits: 2. Contact Hours: Lecture 2.

Prereq: AGRON 3160; CHEM 2310 or CHEM 3310 or graduate standing

Physiological aspects of seed development, maturation, longevity, dormancy, and germination of agronomic and horticultural crops and their interactions with field and storage environments. Emphasis on current literature and advanced methodology. Offered even-numbered years. (Typically Offered: Fall)

AGRON 5390: Seed Conditioning and Storage

(Cross-listed with STB 5390).

Credits: 2. Contact Hours: Lecture 2.

The technical operations which may be carried out on a seed lot from harvest until it is ready for marketing and use. The opportunities for quality improvement and the risks of deterioration which are present during that time. Analysis of the costs of and benefits of operations. Evaluation of equipment based on benefits to the customer and producer. Interpretation of the role of the conditioning plant and store as a focal points within the overall operations of a seed company.

AGRON 5440: Host-Pest Interactions

Credits: 3. Contact Hours: Lecture 3.

Incorporation of the principles of integrated pest management and crop protection. Management systems (biological, cultural, chemical) and strategies which practice principles of weed science, plant pathology, and entomology. (Typically Offered: Spring)

AGRON 5460: Strategies for Diversified Food and Farming Systems

(Cross-listed with SUSAG 5460/ HORT 5460).

Credits: 3. Contact Hours: Lecture 3.

Project-focused engagement in food and farming systems using tools and perspectives drawn from multiple disciplines. Includes a field component. Offered odd-numbered years. (Typically Offered: Spring)

AGRON 5470: Seed Production

(Cross-listed with STB 5470).

Credits: 2. Contact Hours: Lecture 2.

Survey of crop production; including management of soil fertility, planting dates, populations, weed control, and insect control. Analysis of the principles of seed multiplication and the key practices which are used to ensure high quality in the products. Field inspection procedures and production aspects that differ from other crop production. Foundation seed production. Analysis of the typical organization of field production tasks. Survey of the differences in seed production strategies between crops and the impact of these differences on seed production.

AGRON 5510: Growth and Development of Perennial Grasses

(Cross-listed with HORT 5510).

Credits: 2. Contact Hours: Lecture 2.

Selected topics on anatomy, morphology, and physiology relative to growth and development of perennial grasses. Emphasis on growth and development characteristics peculiar to grasses and variations of such characteristics under natural and managed conditions. Offered even-numbered years. (Typically Offered: Spring)

AGRON 5520: Intro GIS for Geoscientists

(Dual-listed with GEOL 4520/ AGRON 4520/ ENSCI 4520). (Cross-listed with GEOL 5520/ ENSCI 5520).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Introduction to geographic information systems (GIS) using ArcGIS Pro with particular emphasis on geoscientific data. Teaches typical GIS operations and analyses in the geosciences to prepare students for practical use of GIS in industry and academia. Includes a class project for GEOL 5520. Sophomore classification or above recommended. (Typically Offered: Fall, Spring)

AGRON 5530: Soil-Plant Relationships

(Cross-listed with ENSCI 5530).

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 3540 or graduate standing

Composition and properties of soils in relation to the nutrition and growth of plants. (Typically Offered: Spring)

AGRON 5540: Advanced Soil Management

Credits: 2. Contact Hours: Lecture 2.

Prereq: AGRON 3540; MATH 1650 or graduate standing

Implications of soil management on the soil environment and root activity. Effect of soil physical properties on soil erosion. Offered odd-numbered years. (Typically Offered: Fall)

AGRON 5550: Environmental Soil Mineralogy

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 4730; CHEM 1780 or graduate standing

Structure and behavior of clay minerals, humic substances and biochar in soil environments, with emphasis on reactions and environmental implications. Offered odd-numbered years. (Typically Offered: Spring)

AGRON 5560: Agroecosystem Ecology

Credits: 3. Contact Hours: Lecture 3.

Prereq: Undergraduate coursework in Biology, Physics, and Chemistry

Understanding controls on the transport, transformation, and storage of carbon, nutrients and water. Effects of agricultural production and management on cycling within systems and transfer among systems at local, regional and global scales will be emphasized. Offered odd-numbered years. (Typically Offered: Fall)

AGRON 5590: Environmental Soil and Water Chemistry

(Dual-listed with AGRON 4590/ ENSCI 4590). (Cross-listed with ENSCI 5590).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues.

AGRON 3540; GEOL 1000 recommended. (Typically Offered: Fall)

AGRON 5610: Population and Quantitative Genetics for Breeding

(Cross-listed with ANS 5610).

Credits: 4. Contact Hours: Lecture 4.

Prereq: STAT 5870 or Graduate Classification

Population and quantitative genetics for plant and animal genetics.

Study of the genetic basis and analysis of variation in quantitative traits in domestic or experimental populations using phenotypic and molecular marker data, including estimation of heritability and other genetic parameters, linkage analysis and mapping of quantitative trait loci, and the impact of inbreeding, heterosis, and genotype-by-environment interaction. (Typically Offered: Fall)

AGRON 5630: Soil Formation and Landscape Relationships

(Dual-listed with AGRON 4630/ ENSCI 4630). (Cross-listed with ENSCI 5630).

Credits: 3. Contact Hours: Lecture 3.

Relationships between soil formation, geomorphology, and environment.

Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. AGRON 1820 or ENSCI 2500

recommended. Graduation Restriction: Credit for one of AGRON 4630 or AGRON 4630L may be applied for graduation. (Typically Offered: Fall)

AGRON 5700: Risk Assessment for Food, Agriculture and Veterinary Medicine

(Cross-listed with TOX 5700/ VDPAM 5700).

Credits: 3. Contact Hours: Lecture 3.

Risk assessment principles as applied to biological systems. Exposure and effects characterization in human and animal health and ecological risk assessment. Risk analysis frameworks and regulatory decision-making. Introduction to quantitative methods for risk assessment using epidemiological and distributional analysis. Uncertainty analysis. Offered odd-numbered years. (Typically Offered: Fall)

AGRON 5750: Soil Formation and Transformation

(Cross-listed with ENSCI 5750).

Credits: 1. Contact Hours: Lecture 1.

A one-week intensive field class examining the pedology of Iowa under natural and transformed con. (Typically Offered: Fall)

AGRON 5770: Soil Physics

(Dual-listed with AGRON 4770/ ENSCI 4770). (Cross-listed with ENSCI 5770).

Credits: 3. Contact Hours: Lecture 3.

The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

AGRON 1820 recommended. (Typically Offered: Spring)

AGRON 5780: Laboratory Methods in Soil Physics

(Cross-listed with ENSCI 5780).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: concurrent enrollment in AGRON 4770 or AGRON 5770

Methods of measuring soil physical properties such as texture, density, and water content, and transport of heat, water, and gases. (Typically Offered: Spring)

AGRON 5810: Experience in Plant Science Extension and Outreach

(Cross-listed with PLP 5810/ ENT 5810/ HORT 5810).

Credits: 1.

A supervised learning experience in several extension delivery methods used in the plant sciences. Participation in Iowa State University-based extension programs that may include field crops horticulture, or Master Gardener programming. Offered odd-numbered years. (Typically Offered: Summer)

AGRON 5840: Organic Agricultural Theory and Practice

(Dual-listed with AGRON 4840/ HORT 4840/ SUSAG 4840). (Cross-listed with HORT 5840/ SUSAG 5840).

Credits: 3. Contact Hours: Lecture 3.

Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives. Offered odd-numbered years. (Typically Offered: Spring)

AGRON 5850: Soil and Environmental Microbiology

(Dual-listed with AGRON 4850/ ENSCI 4850/ MICRO 4850). (Cross-listed with ENSCI 5850/ MICRO 5850).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Qualified Undergrad Prereq: AGRON 1820 or graduate standing

The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues. MICRO 2010; MICRO 2010L recommended. (Typically Offered: Fall)

AGRON 5880: Raster GIS for Geoscientists

(Dual-listed with GEOL 4880/ AGRON 4880/ ENSCI 4880). (Cross-listed with GEOL 5880/ ENSCI 5880).

Credits: 3.

Qualified Undergrad Prereq: GEOL 4520; CRP 4510; CRP 4520; NREM 3450; NREM 4460; AE 4080 or graduate standing

GIS course with focus on the spatial analysis and modeling of raster and triangulated irregular network (TIN) data using ArcGIS Pro. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 5880) a class project. Basic knowledge of ArcGIS Pro is a plus but not required. Course can be taken concurrently to any other Intro GIS course. Sophomore classification or above recommended. Offered odd-numbered years. (Typically Offered: Spring)

AGRON 5900: Special Topics

Credits: 1-30. Repeatable.

Prereq: 15 credits in AGRON or graduate standing; Permission of Instructor for Course

Literature reviews and conferences on selected topics in crops, soils, or agricultural meteorology according to needs and interest of student.

AGRON 5910: Agronomic Systems Analysis

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 5110, AGRON 5130, AGRON 5310, AGRON 5320, AGRON 5330

Analysis of cropping systems from a problem-solving perspective. Case studies will be used to develop the students' ability to solve agronomic problems. (Typically Offered: Spring)

AGRON 5920: Current Issues in Agronomy

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 5010, AGRON 5030, AGRON 5110, AGRON 5120, AGRON 5130, AGRON 51

Critical analysis and discussion of agricultural practices, programs, and policies of current interest to the field of agronomy. Leadership skill development through consideration of technical, social, and ethical components underlying controversial topics. Enhancement of communication proficiency through debate and writing in order to define problems, articulate possible solutions, and propose appropriate courses of action. Required course for the Master of Science in agronomy degree program. (Typically Offered: Fall, Spring)

AGRON 5930: Workshop in Agronomy

Credits: 1-30. Repeatable.

AGRON 5940: Agronomy MS Practicum

Credits: 1.

Practical field and laboratory experiences integrating coursework in climatology, crops, and soils. Includes lectures, labs and field tours. (Typically Offered: Summer)

AGRON 5950: Seed Quality, Production, and Research Management

(Cross-listed with STB 5950).

Credits: 2. Contact Hours: Lecture 2.

Advanced survey of the organization, staff capabilities and management characteristics typical in seed production and crop improvement in seed enterprises. Analysis of the use of quality information in the management of seed operations and sales. Process management applications for seed. Production planning for existing capacity. Analysis of the manager's tasks in the annual cycle and how the tasks of these managers relate to the general categories of business management roles. Difference in management strategies used with different situations and groups of employees.

AGRON 5990A: Agricultural Meteorology

Credits: 1-30. Repeatable.

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee. (Typically Offered: Fall, Spring, Summer)

AGRON 5990B: Crop Production and Physiology

Credits: 1-30. Repeatable.

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 5990C: Plant Breeding

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 5990D: Soil Chemistry

Credits: 1-30. Repeatable.

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 5990E: Soil Fertility

Credits: 1-30. Repeatable.

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 5990F: Soil Management

Credits: 1-30. Repeatable.

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 5990G: Soil Microbiology and Biochemistry

Credits: 1-30. Repeatable.

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 5990H: Soil Morphology and Genesis

Credits: 1-30. Repeatable.

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 5990I: Soil Physics

Credits: 1-30. Repeatable.

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 5990K: Seed Science

Credits: 1-30. Repeatable.

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 5990L: Weed Science

Credits: 1-30. Repeatable.

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 5990M: Agronomy

Credits: 1-30. Repeatable.

Prereq: Department Permission for Course

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee. Offered on a satisfactory-fail basis only.

Courses for graduate students:**AGRON 6000A: Seminar: Plant Breeding**

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 6 times.

Instruction and practice in giving scientific presentations related to the fields of plant breeding, genetics, or genomics, with an emphasis on effective communication and presentation techniques. (Typically Offered: Spring)

AGRON 6000B: Seminar: Soils

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 6 times.

Reports and discussion of recent literature and research. (Typically Offered: Spring)

AGRON 6000C: Seminar: Crop Production and Physiology

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 6 times.

Reports and discussion of recent literature and research. (Typically Offered: Fall, Spring)

AGRON 6010: Agronomic Science Presentations

Credits: 2. Contact Hours: Lecture 2.

Prereq: AGRON students only

Experience in critical communications in exchange of ideas through oral and poster presentations and scientific questioning/evaluation. (Typically Offered: Spring)

AGRON 6050: Boundary-Layer Meteorology

(Cross-listed with MTEOR 6050).

Credits: 3. Contact Hours: Lecture 3.

Atmospheric boundary-layer structure and dynamics. Diurnal and seasonal variations, turbulent fluxes and turbulence kinetic energy. Measurements and empirical relations for wind and temperature near the ground. Numerical simulation and applications to wind energy. Offered odd-numbered years. (Typically Offered: Fall)

AGRON 6100: Foundations of Sustainable Agriculture

(Cross-listed with ABE 6100/ SUSAG 6100/ ANTHR 6100/ SOC 6100).

Credits: 3. Contact Hours: Lecture 3.

Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts. (Typically Offered: Fall)

AGRON 6210: Advanced Plant Breeding

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 5210; AGRON 5260; AGRON 5610; or Graduate Classification

Genetics of breeding populations, means of genotypes and breeding populations, mapping quantitative trait loci, variation in breeding populations, genetic design, genotype by environment interaction, selection in breeding populations, recurrent selection, marker-assisted selection, best linear unbiased prediction, genome-wide association studies, genomic selection, heterosis and hybrid prediction, and multiple traits. (Typically Offered: Spring)

AGRON 6250: Genetic Strategies in Plant Breeding

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 5210; GDCB 5100; or Graduate Classification

Evaluation of genetic, molecular, and cellular approaches to crop improvement; gene transfer methods. Application and role of basic plant biology in breeding programs and processes; genome structure and function, gene isolation, expression, regulation, and modification. Integration of molecular and cellular methods in breeding strategies; analysis of alternative breeding methods, regulatory and ethical issues. Offered odd-numbered years. (Typically Offered: Spring)

AGRON 6770: Advanced Soil Physics

Credits: 3. Contact Hours: Lecture 3.

Prereq: AGRON 5770 or Graduate Classification

The flow and distribution of water, chemicals, and heat in soils. Physical principles and applications. Offered even-numbered years. (Typically Offered: Fall)

AGRON 6930: Entrepreneurship for Graduate Students in Science and Engineering

(Cross-listed with EE 6930/ BCB 6930/ ENGR 6930/ GENET 6930/ ME 6930).

Credits: 1. Contact Hours: Lecture 3.

Repeatable, maximum of 2 credits.

Understanding key topics of starting a technology based company, from development of technology-led idea to early-stage entrepreneurial business. Concepts discussed include: entrepreneurship basics, starting a business, funding your business, protecting your technology/ business IP. Subject matter experts and successful, technology-based entrepreneurs will provide real world examples from their experience with entrepreneurship. Learn about the world class entrepreneurship ecosystem at ISU and Central Iowa. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

AGRON 6960: Research Seminar

(Cross-listed with PLBIO 6960/ BBMB 6960/ FOR 6960/ GDCB 6960/ HORT 6960).

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

AGRON 6980: Agronomy Teaching Practicum

Credits: 1-2. Repeatable.

Prereq: Graduate classification; M.S. or Graduate Certificate in Agronomy; Permission of Instructor

Graduate student experience in the agronomy teaching program. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AGRON 6990A: Agricultural Meteorology

Credits: 1-30. Repeatable.

*Prereq: Instructor Permission for Course***AGRON 6990B: Crop Production and Physiology**

Credits: 1-30. Repeatable.

*Prereq: Instructor Permission for Course***AGRON 6990C: Plant Breeding**

Credits: 1-30. Repeatable.

*Prereq: Instructor Permission for Course***AGRON 6990D: Soil Chemistry**

Credits: 1-30. Repeatable.

*Prereq: Instructor Permission for Course***AGRON 6990E: Soil Fertility**

Credits: 1-30. Repeatable.

*Prereq: Instructor Permission for Course***AGRON 6990F: Soil Management**

Credits: 1-30. Repeatable.

*Prereq: Instructor Permission for Course***AGRON 6990G: Soil Microbiology and Biochemistry**

Credits: 1-30. Repeatable.

*Prereq: Instructor Permission for Course***AGRON 6990H: Soil Morphology and Genesis**

Credits: 1-30. Repeatable.

*Prereq: Instructor Permission for Course***AGRON 6990I: Soil Physics**

Credits: 1-30. Repeatable.

*Prereq: Instructor Permission for Course***AGRON 6990J: Plant Physiology**

Credits: 1-30. Repeatable.

*Prereq: Instructor Permission for Course***AGRON 6990K: Seed Science**

Credits: 1-30. Repeatable.

*Prereq: Instructor Permission for Course***AGRON 6990L: Weed Science**

Credits: 1-30. Repeatable.

*Prereq: Instructor Permission for Course***AFAS 1030: Introductory Leadership Laboratory with Physical Training**

Credits: 2. Contact Hours: Laboratory 4.

Repeatable, maximum of 4 credits.

Instruction for new cadets on Air Force customs and courtesies; drill and ceremonies, issuing military commands, studying the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers while also using basic military training skills and instruction to develop confidence, leadership, and communication skills through physical fitness. Full participation in all events will be determined based on student's physical and medical eligibility. Membership as a cadet in AFROTC recommended. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

AFAS 1410: Foundations of the United States Air Force

Credits: 1. Contact Hours: Lecture 1.

No-commitment exploratory course introducing the United States Air Force and the Air Force Reserve Officer Training Corps program. Topics include Air Force heritage and culture, professional military officership values and expectations, and future career opportunities with an emphasis on cultivating leadership and communication skills. (Typically Offered: Fall)

AFAS 1420: Foundations of the United States Air Force

Credits: 1. Contact Hours: Lecture 1.

A continuation of 1410. Topics expand Air Force history and heritage by examining the various functions of airpower and the organizational/command structures used to employ them. Introduces leading theories of warfare and conflict, basic principles and tenets of Air Force doctrine to guide future war planners. The course places emphasis on leadership and team building, further study of interpersonal communication, and above all, ethical decision making in the context of a military environment. (Typically Offered: Spring)

AFAS 2030: Basic Leadership Laboratory with Physical Training

Credits: 2. Contact Hours: Laboratory 4.

Repeatable, maximum of 4 credits.

Instruction and critique of cadets on Air Force customs and courtesies, drill and ceremonies, and issuing military commands in preparation for AFROTC summer Field Training while also using basic military training skills and instruction to develop confidence, leadership, and communication skills through physical fitness. Full participation in all events will be determined based on student's physical and medical eligibility. Membership as a cadet in AFROTC recommended. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

Air Force Aerospace Studies (AFAS)

Courses primarily for undergraduates:

AFAS 2410: The Evolution of USAF Air & Space Power I

Credits: 1. Contact Hours: Lecture 1.

Examines the general aspects of air and space power through a historical perspective. Utilizing this perspective, the course covers a time period from the first balloons and dirigibles to the Korean War. Historical examples are provided to illustrate the development of airpower capabilities and missions to demonstrate the evolution of what has become today's USAF air and space power. (Typically Offered: Fall)

AFAS 2510: Team and Leadership Fundamentals

Credits: 1. Contact Hours: Lecture 1.

Measuring character through self-assessment and its importance for leadership and team building. The importance of listening and communication for mission accomplishment. Leadership, team building, and problem solving skills in the context of Air Force core values. (Typically Offered: Fall)

AFAS 2520: Team and Leadership Fundamentals II

Credits: 1. Contact Hours: Lecture 1.

Defining leadership through the lens of human relations, conflict and stress management, and ethical decision making. The importance of leveraging diversity and collaborative relationships with negotiating and resiliency techniques in the context of Air Force core values. (Typically Offered: Spring)

AFAS 3030: Intermediate Leadership Laboratory with Physical Training

Credits: 2. Contact Hours: Laboratory 4.

Repeatable, maximum of 4 credits.

Mid-level management of leadership experience involving planning and controlling of most AFROTC military activities. Students will help senior leadership to prepare and present briefings and other oral and written communications; provide interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets; and use advanced military training skills and instruction to develop confidence, leadership, and communication skills through physical fitness. Full participation in all events will be determined based on student's physical and medical eligibility. Membership as a cadet in AFROTC recommended. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

AFAS 3410: Air Force Leadership Studies I

Credits: 3. Contact Hours: Lecture 3.

Presents the complex issues of leadership and management in the U.S. Air Force; a large and diverse organization. The theoretical aspects of leadership, management, communications, motivation and problem-solving are examined and studied against the backdrop of the U.S. Air Force. (Typically Offered: Fall)

AFAS 3420: Air Force Leadership Studies II

Credits: 3. Contact Hours: Lecture 3.

Prereq: AFAS 3410

A continuation of AFAS 3410. Examines the theoretical aspects of leadership, management, communications, and supervisory skills while studying them against the backdrop of the U.S. Air Force. (Typically Offered: Spring)

AFAS 4030: Advanced Leadership Laboratory with Physical Training

Credits: 2. Contact Hours: Laboratory 4.

Repeatable, maximum of 6 credits.

Advanced leadership experience involving the planning and controlling of all upper-level AFROTC military activities. Students will prepare and present briefings and other oral and written communications; provide interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets; and use advanced military training skills and instruction to develop confidence, leadership, and communication skills through physical fitness. Full participation in all events will be determined based on student's physical and medical eligibility. Membership as a cadet in AFROTC recommended. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

AFAS 4410: National Security Studies

Credits: 3. Contact Hours: Lecture 3.

Traces constitutional roots of authority and responsibilities to the Air Force officer, to include development of national security and strategy that defines US military policy and priorities. Applies legislation, joint doctrine, and relationships of operational and administrative authority concepts in the US military in the context of regional studies. (Typically Offered: Fall)

AFAS 4420: Preparation for Active Duty

Credits: 3. Contact Hours: Lecture 3.

Explores the range of professional, personal and social support structures available to US Air Force officers on active duty. Examines practical supervision tools to manage expectations, career development, and disciplinary action leading to the oath of office and acceptance of a commission in the US Air Force. Meets International Perspectives Requirement. (Typically Offered: Spring)

AFAS 4830: Situational Leadership Laboratory with Physical Training

Credits: 2. Contact Hours: Laboratory 4.

Repeatable, maximum of 4 times.

Situational leadership laboratory is for extended cadets that have completed the AFROTC curriculum but have not finished their degree. This provides an opportunity to continue growing as a leader in supervisory and mentorship positions while assisting the cadre with planning and controlling of all upper-level AFROTC military activities. Extended cadets will have the opportunity to work directly with cadre on special projects and duties that further prepare them for life as an active duty officer. Full participation in all events will be determined based on student's physical and medical eligibility. Membership as a cadet in AFROTC recommended. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

American Indian Studies (AMIN)

Courses primarily for undergraduates:

AMIN 2010: Native People in American Culture

Credits: 3. Contact Hours: Lecture 3.

Perceptions and realities of Native people living in and responding to American society and culture. Topics include representations, contemporary Native identity, literature, the arts, history, film, and issues of diversity. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring, Summer)

AMIN 2050: American Indians in the Movies

Credits: 3. Contact Hours: Lecture 3.

Examines the role of American Indians in the movie industry. Explores the development of American Indian characters and filmmaking, and the relevance for Native communities, through feature films and academic analysis. One focus is a comparison of non-Native and Native films in form, content, and message, and the changing character of Native representation in both. Offered irregularly. Meets U.S. Diversity Requirement. (Typically Offered: Summer)

AMIN 2100: Introduction to American Indian Studies

Credits: 3. Contact Hours: Lecture 3.

Introduction to the multidisciplinary aspects of American Indian Studies. Topics include the relevant events and ideas defining the contemporary American Indian experience, on and off reservation, in the United States. Sovereignty, identity, jurisdiction, taxes, economic development, education, and other issues are addressed. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring, Summer)

AMIN 2250: American Indians of Iowa

(Cross-listed with ANTHR 2250).

Credits: 3. Contact Hours: Lecture 3.

Cultures and histories of Native people who have called the present state of Iowa home; primary focus on the period between 1700 CE and the present; Native interactions with Spanish, French, British, and American people. Meets U.S. Diversity Requirement. (Typically Offered: Fall)

AMIN 2400: Introduction to American Indian Literature

(Cross-listed with ENGL 2400).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit in or enrollment in ENGL 1500

Survey of American Indian Literature of varying genres, including fiction, non-fiction, poetry, film, drama, and media. Focuses on interdisciplinary approaches to American Indian cultural, social, and environmental issues. Meets U.S. Diversity Requirement. (Typically Offered: Fall)

AMIN 3100: Contemporary Topics in American Indian Studies

Credits: 3. Contact Hours: Lecture 3.

Examines contemporary issues and important topics affecting Native communities overall. AMIN 2100 recommended. Offered irregularly. (Typically Offered: Fall, Spring)

AMIN 3110: Federal Indian Law and Policy

Credits: 3. Contact Hours: Lecture 3.

Examines the impact of federal American Indian policies on Native communities, especially contemporary Indian Country and communities. Topics include sovereignty, recognition, the role of the Supreme Court, specific policies like allotment, and other relevant issues. AMIN 2100 recommended. Meets U.S. Diversity Requirement.

AMIN 3120: American Indian Education

Credits: 3. Contact Hours: Lecture 3.

Examines current and historical issues in American Indian education. Topics include traditional education, changes to formal education, tribal colleges and universities, current school systems, and other relevant topics. AMIN 2100 recommended. Offered odd-numbered years. Meets U.S. Diversity Requirement. (Typically Offered: Fall)

AMIN 3130: Native Land, Water, and Resources

(Cross-listed with NREM 3130).

Credits: 3. Contact Hours: Lecture 3.

Examines Native land rights, water rights, and natural resources. Topics may include Native relations to landscapes, cultural resources and infrastructure projects, land rights, water usage agreements, and resource policies as they apply to on- and off-reservation Native communities. AMIN 2100 recommended. Offered even-numbered years. Meets U.S. Diversity Requirement. (Typically Offered: Spring)

AMIN 3150: Archaeology of North America

(Dual-listed with ANTHR 5150). (Cross-listed with ANTHR 3150).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2020

Prehistory and early history of North America as reconstructed from archaeological evidence; peopling of the New World; culture- historical sequences of major culture areas; linkages of archaeological traditions with selected ethnohistorically known Native American groups. (Typically Offered: Spring)

AMIN 3200: Great Plains Archaeology

(Dual-listed with ANTHR 5200). (Cross-listed with ANTHR 3200).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2020

Prehistoric societies of the Great Plains region of North America, from initial occupation to European contact; emphasis on sociocultural changes, continuities, and adaptations to changing environments using archaeological, ecological, ethnographic information. (Typically Offered: Fall)

AMIN 3220: Peoples and Cultures of Native North America

(Dual-listed with ANTHR 5220). (Cross-listed with ANTHR 3220).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2010 or AMIN 2100

Origin, distribution, and pre-contact life of the indigenous peoples of North America. Survey of culture areas; language families, social and political systems, ecological and economic adaptations, religion and spirituality; impact of European contact; cultural resilience and revitalization in contemporary American Indian life. Meets U.S. Diversity Requirement.

AMIN 3240: Health and Native American Communities

(Cross-listed with ANTHR 3240).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Overview of historic and contemporary health and health care in Native Communities. Indian Health Service and specific regulations. Consideration of both cultural and scientific approaches to medicine. Specific health issues (e.g., diabetes, alcoholism, depression, etc.) in American Indian communities. Meets U.S. Diversity Requirement.

AMIN 3270X: Native American Agriculture

Credits: 3. Contact Hours: Lecture 3.

Indigenous agriculture in North America. Topics include pre-contact agriculture in North America, cultural perspectives on agriculture, the changes caused by contact with Europeans, and the state of contemporary Native agriculture in a global market. Themes may include Native solutions to challenges of hunger and inadequate nutrition, food sovereignty, seed saving, and food deserts. Meets U.S. Diversity Requirement.

AMIN 3320A: Current Issues in Native North America: Gender and Family

(Dual-listed with AMIN 5320A/ ANTHR 5320A). (Cross-listed with

ANTHR 3320A).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2010 or ANTHR 3060

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. ANTHR 3220 or AMIN 2100 recommended. Graduation Restriction: Only 9 credits of ANTHR/AMIN 3320A, 3320B, 3320C, 3320D may count toward graduation.

AMIN 3320B: Current Issues in Native North America: Indigenous Ecologies and Geographies

(Dual-listed with AMIN 5320B/ ANTHR 5320B). (Cross-listed with ANTHR 3320B).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2010 or ANTHR 3060

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. ANTHR 3220 or AMIN 2100 recommended. Graduation Restriction: Only 9 credits of ANTHR/AMIN 3320A, 3320B, 3320C, 3320D may count toward graduation.

AMIN 3320C: Current Issues in Native North America: Cultural and Political Movements

(Dual-listed with AMIN 5320C/ ANTHR 5320C). (Cross-listed with ANTHR 3320C).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2010 or ANTHR 3060

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. ANTHR 3220 or AMIN 2100 recommended. Graduation Restriction: Only 9 credits of ANTHR/AMIN 3320A, 3320B, 3320C, 3320D may count toward graduation.

AMIN 3320D: Current Issues in Native North America: Regional Focus

(Dual-listed with AMIN 5320D/ ANTHR 5320D). (Cross-listed with ANTHR 3320D).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2010 or ANTHR 3060

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. ANTHR 3220 or AMIN 2100 recommended. Graduation Restriction: Only 9 credits of ANTHR/AMIN 3320A, 3320B, 3320C, 3320D may count toward graduation.

AMIN 3460: American Indian Literature

(Cross-listed with ENGL 3460).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Focused study of American Indian literature of varying genres, including fiction, non-fiction, poetry, film, drama, and media. Examines interdisciplinary approaches to American Indian cultural, social, and environmental issues. Meets U.S. Diversity Requirement.

AMIN 4260: Topics in Native American Architecture

(Cross-listed with ARCH 4260).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Junior classification

History, theory, and principles of Native American/American Indian architecture, landscape architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment History, Theory, Culture. Graduation Restriction: A maximum of 6 credits of ARCH 4260 may be applied to degree program.

AMIN 4900: Independent Study

Credits: 1-30. Repeatable, maximum of 9 credits.

Prereq: 6 credits AMIN; Permission of Program Director

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. Graduation Restriction: No more than 6 credits in AMIN 4900 may be counted toward graduation. If more than 3 credits in AMIN 4900 are taken, they must be from different instructors.

Courses primarily for graduate students, open to qualified undergraduates:

AMIN 5320A: Current Issues in Native North America: Gender and Family

(Dual-listed with AMIN 3320A/ ANTHR 3320A). (Cross-listed with ANTHR 5320A).

Credits: 3. Contact Hours: Lecture 3.

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. ANTHR 3220 or AMIN 2100 recommended. Graduation Restriction: Only 9 credits of ANTHR/AMIN 3320A, 3320B, 3320C, 3320D may count toward graduation.

AMIN 5320B: Current Issues in Native North America: Indigenous Ecologies and Geographies

(Dual-listed with AMIN 3320B/ ANTHR 3320B). (Cross-listed with ANTHR 5320B).

Credits: 3. Contact Hours: Lecture 3.

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. ANTHR 3220 or AMIN 2100 recommended. Graduation Restriction: Only 9 credits of ANTHR/AMIN 3320A, 3320B, 3320C, 3320D may count toward graduation.

AMIN 5320C: Current Issues in Native North America: Cultural and Political Movements

(Dual-listed with AMIN 3320C/ ANTHR 3320C). (Cross-listed with ANTHR 5320C).

Credits: 3. Contact Hours: Lecture 3.

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. ANTHR 3220 or AMIN 2100 recommended. Graduation Restriction: Only 9 credits of ANTHR/AMIN 3320A, 3320B, 3320C, 3320D may count toward graduation.

AMIN 5320D: Current Issues in Native North America: Regional Focus

(Dual-listed with AMIN 3320D/ ANTHR 3320D). (Cross-listed with ANTHR 5320D).

Credits: 3. Contact Hours: Lecture 3.

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. ANTHR 3220 or AMIN 2100 recommended. Graduation Restriction: Only 9 credits of ANTHR/AMIN 3320A, 3320B, 3320C, 3320D may count toward graduation.

American Sign Language (ASL)

Courses primarily for undergraduates:

ASL 1010: American Sign Language I

Credits: 4. Contact Hours: Lecture 4.

Introduction to American Sign Language (ASL). Development of expressive and receptive skills including vocabulary, grammar, usage, and cultural information. Note: Distinct from 'Signed English'. ASL is a natural language with its own rules of grammar and usage. (Typically Offered: Fall, Spring)

ASL 1020: American Sign Language II

Credits: 4. Contact Hours: Lecture 4.

Prereq: ASL 1010

Introduction to American Sign Language (ASL) II continues development of expressive and receptive skills introduced in American Sign Language I, including vocabulary, grammar, usage, and cultural information. Distinct from 'Signed English'. ASL is a natural language with its own rules of grammar and usage. (Typically Offered: Spring)

ASL 1070: Introduction to the Deaf-World

Credits: 1. Contact Hours: Lecture 1.

Nature and significance of the Deaf-World as a cultural and linguistic minority.

ASL 2010: Intermediate American Sign Language I

Credits: 4. Contact Hours: Lecture 4.

Prereq: ASL 1020

Development of fluency for intermediate conversational skills. Review of grammar and varying grammatical forms for both structured and unstructured social situations such as sharing opinions, discussing weekend activities, and exchanging views on current topics. (Typically Offered: Fall)

ASL 2020: Intermediate American Sign Language II

Credits: 4. Contact Hours: Lecture 4.

Prereq: ASL 2010

A continuation and further application of language principles learned in ASL 2010, to deepen ability to actively engage in dialogue both in structured and unstructured social situations. Further fluency in intermediate conversational skills will be developed, particularly in the areas of semantic equivalence and dialogic/monologic register. (Typically Offered: Spring)

ASL 2750: Topics in Deaf Culture

Credits: 3. Contact Hours: Lecture 3.

Focus on contemporary topics in Deaf Culture, Communities, and History. Readings and discussion from a wide range of sources. Topics vary according to faculty interest.

ASL 3050: ASL Classifiers and Depiction

Credits: 3. Contact Hours: Lecture 3.

Prereq: ASL 2010

Focused analysis, documentation, discussion, and increased development of classifiers and depiction in ASL. Investigation in how these grammatical features are deliberately incorporated into conversational, presentational, scientific, and artistic language production.

ASL 3250: Deaf Peoples: Pre-World War II

Credits: 3. Contact Hours: Lecture 3.

Prereq: ASL 2020 or Permission of Instructor

Perspectives on and treatment of deaf people as individuals and groups prior to World War II. Taught in American Sign Language. (Typically Offered: Fall)

ASL 4900: Independent Study

Credits: 1-6. Repeatable, maximum of 6 credits.

Designed to meet the needs of students in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. Graduation Restriction: No more than 6 credits of ASL 4900 may be counted towards graduation. (Typically Offered: Fall, Spring, Summer)

Animal Ecology (AECL)

Courses primarily for undergraduates:

AECL 2310: Principles of Wildlife & Fisheries Conservation

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110, BIOL 2120, and NREM 1200

Introduction to the principles of wildlife and fisheries management. Case studies will be explored along with assessment methods used to understand management including conservation of populations, species and communities, as well as habitat preservation and restoration. (Typically Offered: Spring)

AECL 3120: Ecology

(Cross-listed with BIOL 3120/ ENSCI 3120).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: BIOL 2110; (BIOL 2120 or BIOL 2510)

Fundamental concepts and principles of ecology dealing with organisms, populations, communities, and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats. (Typically Offered: Fall, Summer)

AECL 3210: Fish Biology

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 3650

Biology, ecology, and evolution of fishes. Emphasis on structure, physiology, and behavior, including a focus on the conservation and management of fishes and their habitats. Laboratory focus on fish morphology, survey methods, identification, distribution, habits, and habitats of fishes. (Typically Offered: Spring)

AECL 3330: Fisheries Techniques

Credits: 2. Contact Hours: Lecture 1, Laboratory 3.

Prereq: BIOL 2120

Introduction to techniques used in the collection and interpretation of fish population data in the field and in the lab. Course objectives include an understanding of population survey methodology and improving student critical thinking and teamwork skills. Laboratory focuses on field trips and hands-on sampling experience. (Typically Offered: Fall)

AECL 3650: Vertebrate Biology

(Cross-listed with BIOL 3650).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: BIOL 2110 and BIOL 2110L

Evolution, biology, and classification of fish, amphibians, reptiles, birds, and mammals. Emphasis on a comparative analysis of the structure and function of organ systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates. (Typically Offered: Fall)

AECL 3660: Natural History of Iowa Vertebrates

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: BIOL 2110 and BIOL 2110L

Vertebrate fauna of Iowa, including fishes, amphibians, reptiles, birds, and mammals. Species identification, habitat requirements, community structure and assessment, conservation issues that include historical population changes and value of wild animals to the region's ecological and economic health. (Typically Offered: Spring)

AECL 3710: Ecological Methods

(Cross-listed with BIOL 3710).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 3120; STAT 1010 or STAT 1040

Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations. (Typically Offered: Fall)

AECL 3720: Wildlife Population Methods

Credits: 4. Contact Hours: Lecture 1, Laboratory 8.

Prereq: BIOL 3120 or NREM 3110

Field-intensive study of population ecology. Emphasis on hands-on learning of study design and techniques to assess population trends in plants, invertebrates, and vertebrates inhabiting terrestrial and aquatic ecosystems. (Typically Offered: Summer)

AECL 3750: Marine Ecology and Ecosystems Dynamics

(Cross-listed with BIOL 3750/ ENSCI 3750).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110

Overview of the ecological processes, ecosystems, and biodiversity in marine environments. Ever-changing dynamics caused by environmental disturbances, internal forces, or by human impacts on species and ecosystems. (Typically Offered: Spring)

AECL 4060: Wildlife Camp

Credits: 3. Contact Hours: Lecture 1, Laboratory 6.

Prereq: BIOL 2110 and Permission of Instructor; restricted to Animal Ecology majors

Introduction to methods and career options in wildlife research and management through field work. Two-week field work experience followed by on-campus reflection, analysis and presentation of field data. (Typically Offered: Fall)

AECL 4150: Ecology of Freshwater Invertebrates, Plants, and Algae

Credits: 2. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 3120

Identification, biology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphases on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment. (Typically Offered: Fall)

AECL 4180: Stream Ecology

(Cross-listed with ENSCI 4180).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 4860

Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries. Offered odd-numbered years. (Typically Offered: Fall)

AECL 4250: Aquatic Insects

(Cross-listed with ENT 4250).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: BIOL 3120

Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes. Offered odd-numbered years. (Typically Offered: Spring)

AECL 4350: Entomology Field Trip

(Cross-listed with ENT 4350).

Credits: 2. Repeatable, maximum of 2 credits.

Prereq: BIOL 3120; Permission of Instructor

Field trip to study insects of major terrestrial and aquatic ecosystems.

Location and duration vary. ENT 3700 or ENT 4250 recommended.

Offered irregularly. (Typically Offered: Spring, Summer)

AECL 4400: Fishery Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 3120, AECL 3210, AECL 3330; STAT 1010 or STAT 1040; Credit or Enrollment in AECL 4860

Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries. (Typically Offered: Fall)

AECL 4420: Aquaculture

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110 and BIOL 2120

Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, diseases, and marketing. (Typically Offered: Spring)

AECL 4510: Wildlife Ecology and Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 3710

Ecological theory and practice of wildlife management, including, population ecology, habitat management, and current issues in the field. Course involves a series of case studies addressing actual wildlife issues using field and quantitative methods. (Typically Offered: Spring)

AECL 4540: Principles of Wildlife Disease

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior standing and at least 10 credits in biological sciences at the 3000+ level

Ecological and epidemiological aspects of diseases as they relate to wildlife populations. Topics to be covered include: major classes of disease; detection, description, monitoring, and management of disease; characteristics and interactions between disease agents and wildlife hosts; relationships among wildlife, domestic animal, and human health. (Typically Offered: Spring)

AECL 4550: International Wildlife Issues

Credits: 3. Contact Hours: Lecture 3.

Prereq: AECL 3650, AECL 3120 or Graduate classification and NREM 1200

Biological, political, social, and economic factors affecting the management of international wildlife resources. Meets International Perspectives Requirement. (Typically Offered: Fall)

AECL 4570: Herpetology

(Cross-listed with BIOL 4570).

Credits: 2. Contact Hours: Lecture 2.

Prereq: BIOL 3510 or BIOL 3650

Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles. (Typically Offered: Fall)

AECL 4570L: Herpetology Laboratory

(Cross-listed with BIOL 4570L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: BIOL 3510 or BIOL 365 or AECL 3650; enrollment in BIOL 4570 or AECL 4570

Laboratory to accompany Biology/Animal Ecology 4570. Focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles. (Typically Offered: Fall)

AECL 4580: Ornithology

(Cross-listed with BIOL 4580).

Credits: 2. Contact Hours: Lecture 2.

Prereq: BIOL 3510 or AECL 3650

Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation. (Typically Offered: Spring)

AECL 4580L: Ornithology Laboratory

(Cross-listed with BIOL 4580L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: BIOL 3510 or AECL 3650/BIOL 3650 and Credit or concurrent enrollment in AECL 4580/BIOL 4580

Laboratory complements lecture topics with emphasis on external anatomy, identification and distribution of Midwest birds, and field trips. (Typically Offered: Spring)

AECL 4590: Mammalogy

(Dual-listed with EEOB 5590). (Cross-listed with BIOL 4590).

Credits: 2. Contact Hours: Lecture 2.

Prereq: AECL 3650 or BIOL 3510

Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation. (Typically Offered: Spring)

AECL 4590L: Mammalogy Laboratory

(Cross-listed with BIOL 4590L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: BIOL 3510 or BIOL/AECL 3650; concurrent enrollment in BIOL 4590 or AECL 4590 required

Laboratory focus on identification, survey methods, distribution, habits, and habitats of mammals. Several field trips. (Typically Offered: Spring)

AECL 4710: Introductory Conservation Biology

(Cross-listed with BIOL 4710).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3120

Examination of conservation issues from a population and community perspective. The role of genetics, demography, and environment in determining population viability, habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology. (Typically Offered: Spring)

AECL 4800: Studies in Marine Biology

Credits: 1-8. Contact Hours: Lecture 8.

Repeatable.

Courses taken at Gulf Coast Research Laboratory and other marine biological stations are transferred to Iowa State University under this number. (Typically Offered: Summer)

AECL 4860: Aquatic Ecology

(Cross-listed with BIOL 4860/ ENSCI 4860).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3120 or ENSCI 3190 or ENSCI 4020 or NREM 3010

Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology. (Typically Offered: Fall)

AECL 4860L: Aquatic Ecology Laboratory

(Cross-listed with BIOL 4860L/ ENSCI 4860L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Concurrent enrollment in BIOL 4860

Field trips and laboratory exercises to accompany 4860. Hands-on experience with aquatic research and monitoring techniques and concepts. (Typically Offered: Fall)

AECL 4890: Population Ecology

(Dual-listed with AECL 5890/ EEOB 5890). (Cross-listed with BIOL 4890).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: BIOL 3120; (STAT 1010 or STAT 1040); (MATH 1510, 1600, 1650 or Graduate standing)

Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation. Offered even-numbered years. (Typically Offered: Fall)

Courses primarily for graduate students, open to qualified undergraduates:**AECL 5150: Ecology of Freshwater Invertebrates, Plants, and Algae**

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 3120 or graduate standing

Identification, biology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphases on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment. (Typically Offered: Fall)

AECL 5160: Avian Ecology

Credits: 3. Contact Hours: Lecture 3.

Prereq: AECL 3650; AECL 3120; or graduate standing

Current topics and theories including avian breeding and foraging ecology, population biology, community structure, habitat selection, field methodologies, and data interpretation. Offered even-numbered years. (Typically Offered: Spring)

AECL 5180: Stream Ecology

(Cross-listed with ENSCI 5180).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 4860; or graduate standing

Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries. Offered odd-numbered years. (Typically Offered: Fall)

AECL 5200: Fisheries Science

Credits: 3. Contact Hours: Lecture 3.

Prereq: AECL 3120; AECL 3210; or graduate standing

Concepts, approaches, and techniques for assessment of recreational and commercial fisheries. Scope will range from individual fish to entire ecosystems, both freshwater and marine. Offered odd-numbered years. (Typically Offered: Spring)

AECL 5250: Aquatic Insects

(Cross-listed with ENT 5250).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: BIOL 3120 or graduate standing

Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes. Offered odd-numbered years. (Typically Offered: Spring)

AECL 5310: Conservation Biology

(Cross-listed with EEOB 5310).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3120, BIOL 3130; or graduate standing

Examination of conservation issues from a population and a community perspective. Population-level analysis will focus on the role of genetics, demography, and environment in determining population viability. Community perspectives will focus on topics such as habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology. Offered even-numbered years. (Typically Offered: Spring)

AECL 5400: Fishery Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 3120; AECL 3210; AECL 3330; (STAT 1010 or STAT 1040); credit or enrollment in AECL 4860 or graduate standing

Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries. (Typically Offered: Fall)

AECL 5420: Aquaculture

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110; BIOL 2120 or graduate standing

Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, diseases, and marketing. (Typically Offered: Spring)

AECL 5510: Behavioral Ecology

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: (BIOL 3120 or NREM 3110 or BIOL 3540 or ANS 3360 or ANTHR 3170) or graduate classification

The study of how an animal's behavior affects its ability to survive and reproduce in its environment. Course topics, such as foraging behavior, sexual selection, parental care, etc., represent the interface of ecology, evolution, and behavior. Offered odd-numbered years. (Typically Offered: Fall)

AECL 5540: Principles of Wildlife Disease

Credits: 3. Contact Hours: Lecture 3.

Ecological and epidemiological aspects of diseases as they relate to wildlife populations. Topics to be covered include: major classes of disease; detection, description, monitoring, and management of disease; characteristics and interactions between disease agents and wildlife hosts; relationships among wildlife, domestic animal, and human health. (Typically Offered: Spring)

AECL 5860: Aquatic Ecology

(Cross-listed with EEOB 5860/ ENSCI 5860).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3120 or ENSCI 3810 or ENSCI 4020 or NREM 3010 or graduate classification

Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology. (Typically Offered: Fall)

AECL 5860L: Aquatic Ecology Laboratory

(Cross-listed with EEOB 5860L/ ENSCI 5860L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Concurrent enrollment in BIOL 4860

Field trips and laboratory exercises to accompany 4860. Hands-on experience with aquatic research and monitoring techniques and concepts. (Typically Offered: Fall)

AECL 5890: Population Ecology

(Dual-listed with EEOB 4890/ AECL 4890). (Cross-listed with EEOB 5890).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (BIOL 3120, STAT 1010 OR STAT 1040, MATH 1510 OR 1600 OR 1650) or graduate classification

Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation. Offered even-numbered years. (Typically Offered: Fall)

AECL 5990: Creative Component

Credits: 1-30.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses for graduate students:

AECL 6110: Analysis of Populations

Credits: 3. Contact Hours: Lecture 2, Laboratory 1.

Prereq: (BIOL 3120; STAT 5870; MATH 1510 or 1600 or 1650) or graduate classification

Quantitative techniques for analyzing vertebrate population data to estimate parameters such as density and survival. Emphasis on statistical inference and computing. Offered even-numbered years. (Typically Offered: Fall)

AECL 6980: Animal Ecology Teaching Practicum

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Graduate student experience in the animal ecology teaching program. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AECL 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses primarily for professional curriculum students:

AECL 7401: Intro to Aquatic Animal Medicine

(Dual-listed with AECL 4010). (Cross-listed with BMS 7401).

Credits: 1.

8-week course. Introductory course with focus on fin fish production, health and medicine. Course content will help define future roles for veterinarians, producers, and service providers. Emphasis will be placed on water-evaluation, anatomy, pathology, infectious diseases, nutrition, regulatory constraints in production, food safety, biosecurity and current research. Field trip to aquaculture facility. (Typically Offered: Spring)

Animal Science (ANS)

Courses primarily for undergraduates:

ANS 1010: Working with Animals

Credits: 2. Contact Hours: Lecture 1, Discussion 1.

An introductory course in skills for proper care, handling, and management of domestic animals. Terminology and skills in working with animals, identification, life-cycle management practices, and animal health management are introduced and examined. (Typically Offered: Fall, Spring)

ANS 1100: Orientation in Animal Science and ISU

Credits: 1. Contact Hours: Discussion 1, Lecture 1.

Orientation to the university and Department of Animal Science. Challenges and opportunities available to the professional animal agriculturalist. Professional goal setting, portfolio development, and development of interpersonal skills in the context of pursuing a career in animal science. (Typically Offered: Fall)

ANS 1140: Survey of the Animal Industry

Credits: 2. Contact Hours: Lecture 2.

Principles of management and care of domestic animals, including genetics, nutrition, and reproduction. Service of domestic animals to society in terms of food, shelter, protection, fuel and emotional well-being. Basic biology, industry structure, management practices and production systems. (Typically Offered: Fall, Spring)

ANS 1160: Practicum in Safe Equine Handling and Welfare

Credits: 1. Contact Hours: Laboratory 3.

Development of best practices for safe horse handling and practical equine health care tasks. Course will focus on equine welfare and human safety as well as provide training in necessary every day skills needed to own a horse or to work at a horse farm. Certificate of Safe Equine Handling and Welfare available upon course completion. (Typically Offered: Fall)

ANS 1900: Livestock Handling, Safety and Welfare

Credits: 2. Contact Hours: Lecture 1.5, Laboratory 1.

Prereq: ANS 1010

Understanding of animal perception to develop best care practices involved in handling of livestock species (beef, sheep, swine, dairy, equine, poultry). Intensive development of skills associated with handling and moving healthy and compromised livestock in respect to human and animal welfare. Integration of scientific and theoretical knowledge of biosecurity and animal-human interactions as it related to livestock handling and movement. (Typically Offered: Fall, Spring)

ANS 1990A: Marketing and Management of Livestock Events: Beef

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Prereq: Credit or enrollment in ANS 1010 or ANS 1140

Management and coordination of livestock shows, sales and events, including program planning, staff and volunteer management, time management, publicity and promotion for fairs, shows, clinics, expos, and other events. Graduation Restriction: A maximum of two credits of ANS 1990 may be applied toward the total credits required for graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ANS 1990E: Marketing and Management of Livestock Events: Horses

Credits: 1. Repeatable.

Prereq: Credit or enrollment in ANS 1010 or ANS 1140

Management and coordination of livestock shows, sales and events, including program planning, staff and volunteer management, time management, publicity and promotion for fairs, shows, clinics, expos, and other events. Graduation Restriction: A maximum of two credits of ANS 1990 may be applied toward the total credits required for graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ANS 2070: The Art and Heritage of Livestock

Credits: 3. Contact Hours: Lecture 3.

Using art as a venue to understand the legacy and heritage of livestock production and livestock's contribution to civilization and society; livestock's contributions to warfare, social class, industry, economies, etc.; history of the impact of livestock on painting, poetry, music, sculpture, advertising, pop culture, movies, religion and sports in society. (Typically Offered: Fall)

ANS 2100: Career Preparation in Animal Science

Credits: 1.

Prereq: Sophomore classification; ANS major

Life skill development emphasized in the context of career preparation.

Assist students with career goal clarification, interview skills, resume and cover letter preparation. Internship development, job shadowing, and exploration of career option. (Typically Offered: Fall, Spring)

ANS 2110: Issues Facing Animal Science

Credits: 1. Contact Hours: Laboratory 2.

Prereq: ANS 1140 and Sophomore classification

Overview of the factors that define contemporary ethical and scientifically based issues facing animal agriculture. Life skill development (including interactive skills, communication ability, organization, information gathering, and leadership skills) emphasized in the context of issues study. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ANS 2140: Domestic Animal Physiology

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120; (CHEM 1630 or CHEM 1670 or CHEM 1770)

Introduction to anatomy and physiology of the muscular, renal, skeletal, neural, mammary, cardiovascular, respiratory, immune, endocrine, reproductive, and digestive systems of domestic animals. (Typically Offered: Fall, Spring)

ANS 2140L: Domestic Animal Anatomy and Physiology Lab

Credits: 1. Contact Hours: Laboratory 2.

Basic anatomy of domestic animals. (Typically Offered: Fall, Spring)

ANS 2160: Equine Science

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: (ANS 1010 or ANS 1140); (BIOL 1010 or BIOL 2110 or BIOL 2120)

Introduction to contemporary concepts, and basic practices and decisions necessary when managing horses through stages of their lives. (Typically Offered: Fall, Spring)

ANS 2170: Equine Farm Practicum

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Prereq: Credit or concurrent enrollment in ANS 2160 or Permission of Instructor

Intensified management of the equine farm. Provide students with experiential learning in all phases of horse production and management. Students assist with general farm management, horse health care, weekly farm management, and related topics. (Typically Offered: Fall, Spring)

ANS 2190X: Survey of Animal Nutrition

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 1010 or BIOL 2120 and CHEM 1630, CHEM 1670, CHEM 1770 or CHEM 2010

Nutrients, simple digestion and absorption, feed management strategies, nutrient requirements, ration formulation for livestock and companion animals. Non-major credit only. Graduation Restriction: Students may not receive graduation credit for both ANS 2190 and ANS 3190 or for both ANS 2190 and ANS 3200. (Typically Offered: Fall)

ANS 2230: Poultry Science

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANS 1010 and ANS 1140

Introduction to modern production trends with a focus on broiler, layer, and turkey industries. Topics covered include breeds, handling, management, physiology, nutrition, genetics, health & disease, and products. Weekly labs meet off campus. (Typically Offered: Fall)

ANS 2240: Companion Animal Science

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: BIOL 1010 or BIOL 2110 or BIOL 2120

Introduction to the science of managing companion animals through life stages. Topics covered will include human-animal bond, common and uncommon species kept as pets, breeds, behavior, basic training, nutrition, genetics, and breeding. (Typically Offered: Fall, Spring)

ANS 2250: Swine Science

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANS 1010 and ANS 1140

Introduction to principles, practices and decisions necessary when raising swine through the vertically integrated production cycle. Graduation Restriction: Only ANS 2800 and ANS 2800L or ANS 2250 may count toward graduation. (Typically Offered: Fall, Spring)

ANS 2260: Beef Cattle Science

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANS 1010 and ANS 1140

Introduction to principles, practices and decisions necessary when raising beef cattle through the vertically integrated production cycle. (Typically Offered: Fall, Spring)

ANS 2280: Laboratory Animal Science

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANS 1010 and ANS 1140

Introduction to the species, uses, biology, facilities, care, and diseases of animals used in research. ANS 2140 recommended. (Typically Offered: Spring)

ANS 2290: Sheep Science

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANS 1010 and ANS 1140

Introduction to principles, practices and decisions necessary when raising sheep through their production cycle. (Typically Offered: Spring)

ANS 2350: Dairy Cattle Science

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANS 1010 and ANS 1140

Introduction to principles, practices and decisions necessary when raising dairy cattle through the vertically integrated production cycle. (Typically Offered: Fall)

ANS 2700: Foods of Animal Origin

Credits: 2. Contact Hours: Lecture 2.

Prereq: BIOL 2120; (CHEM 1630 or CHEM 1670 or CHEM 1770)

Principles, practices and issues impacting the production, processing and preservation of safe, wholesome, nutritious, and palatable meat, dairy, and egg products. Product evaluation, classification, value, and utilization. (Typically Offered: Fall, Spring)

ANS 2700L: Foods of Animal Origin Laboratory

Credits: 1. Contact Hours: Laboratory 2.

Prereq: Credit or current enrollment in ANS 2700

Determination of composition and quality of meat, eggs and milk based on industry and USDA standards. Fundamentals of processing foods of animal origin to add value, maintain quality and ensure safety. (Typically Offered: Fall, Spring)

ANS 2800: Basic Swine Science

Credits: 2. Contact Hours: Lecture 2.

Prereq: ANS 1010 and ANS 1140

Basic disciplines and concepts involved in swine production including industry structure, trends and statistics; production phases and buildings; genetic improvement; reproduction; nutrition; health and biosecurity; nutrient management; marketing and meat quality and career opportunities in the swine industry. Graduation Restriction: Only ANS 2800 and ANS 2800L or ANS 2250 may count toward graduation.

ANS 3050: Livestock Evaluation

Credits: 3. Contact Hours: Laboratory 6.

Prereq: Junior classification

Fall semester leads to 4750A or D. Breeding animal and market animal evaluation of beef, swine and sheep using contemporary techniques and tools. Communication and decision-making skills are practiced in the context of making selection decisions. ANS 2700L recommended. (Typically Offered: Fall)

ANS 3060: Equine Evaluation

Credits: 3. Contact Hours: Laboratory 6.

Prereq: Sophomore classification

Detailed visual evaluation of conformation and performance of the equine athlete. Decision-making skills are practiced in the context of making selection choices. Development of written and oral communication skills as students defend their judgments. Industry trends will be addressed. (Typically Offered: Spring)

ANS 3130: Exercise Physiology of Animals

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANS 2140; BIOL 2110; (CHEM 1630 or CHEM 1670 or CHEM 1770)

Physiological adaptations to athletic training in canine and equine athletes. Topics of emphasis include exercise-related adaptations in metabolism, locomotion, the cardiovascular system, musculoskeletal system, and endocrine system. The roles of nutrition and conditioning programs are assessed. (Typically Offered: Fall, Spring)

ANS 3160: Equine Reproduction Lab

Credits: 3. Contact Hours: Lecture 1.

Prereq: (ANS 1160; credit or concurrent enrollment in ANS 3310) or

Permission of Instructor

Reproductive anatomy with emphasis on the physiology of normal reproductive function; breeding season management; ways to control and improve reproduction; semen collection, evaluation, and processing; artificial insemination; pregnancy testing; parturition in the mare, foal care. Participation outside of class time is expected. (Typically Offered: Spring)

ANS 3170A: Fundamentals of Equine Behavior and Training: Young Horses at Halter

Credits: 1-3. Contact Hours: Lecture 3.

Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. Graduation Restriction: A maximum of 4 credits of ANS 3170 may be applied toward graduation. (Typically Offered: Fall)

ANS 3170B: Fundamentals of Equine Behavior and Training: Yearlings

Credits: 3. Contact Hours: Laboratory 6.

Prereq: Instructor Permission for Course

Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. Graduation Restriction: A maximum of 4 credits of ANS 3170 may be applied toward graduation.

ANS 3170C: Fundamentals of Equine Behavior and Training: Two-year olds and older

Credits: 3. Contact Hours: Laboratory 6.

Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. Graduation Restriction: A maximum of 4 credits of ANS 3170 may be applied toward graduation.

ANS 3190: Animal Nutrition

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANS 2140; (BBMB 2210 or CHEM 3310)

Structure and function of organic and inorganic nutrients. Digestion, absorption, metabolism and utilization of nutrients for maintenance and productive functions. Essential nutritive requirements of domestic livestock, poultry, and companion animals. Sources of nutrients, application of energy systems and concepts, and regulation of feed intake in animals. Graduation Restriction: Students may not receive graduation credit for both ANS 2190 and ANS 3190. (Typically Offered: Fall, Spring)

ANS 3200: Animal Feeds and Feeding

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANS 3190

Principles and practices of animal feed evaluation including nutrient composition and physical properties of common feedstuffs. Utilization of nutrient requirements at various physiological stages to formulate diets using manual and software-based computer methodologies. Graduation Restriction: Students may not receive graduation credit for both ANS 2190 and ANS 3190. (Typically Offered: Fall, Spring)

ANS 3240: Food Processing for Companion Animals

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANS 3190, Junior Classification

Food processing and nutrition for carnivorous companion animals. Topics covered include meat processing and meat preservation for companion animal diets, regulatory standards, cutting edge technologies for processing meat for companion animals, dietary needs of carnivorous companion animals, effect of different processing methods on safety and nutrient bioavailability. (Typically Offered: Fall)

ANS 3310: Domestic Animal Reproduction

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANS 2140 or (BIOL 2550 and BIOL 2560) or BIOL 3350 or BMS 3290

Comparative anatomy, physiology, and endocrinology of domestic mammalian animal reproduction. Techniques for the control and manipulation of reproductive processes. (Typically Offered: Fall, Spring)

ANS 3320A: Laboratory Methods in Animal Reproduction: Livestock, Companion, and Laboratory Animals

Credits: 1. Contact Hours: Laboratory 2.

Prereq: Credit or enrollment in ANS 3310

Comparative reproductive anatomy with emphasis on the physiology of normal reproductive function; ways to control and improve reproduction; principles of semen collection and artificial insemination; pregnancy testing. (Typically Offered: Fall, Spring)

ANS 3320E: Laboratory Methods in Animal Reproduction: Equine

Credits: 1. Contact Hours: Laboratory 2.

Prereq: Credit or enrollment in ANS 3310

Reproductive anatomy with emphasis on the physiology of normal reproductive function; breeding season management; ways to control and improve reproduction; semen collection, evaluation, and processing; artificial insemination; pregnancy testing; parturition in the mare, foal care. (Typically Offered: Spring)

ANS 3330: Embryo Transfer and Related Technologies

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANS 3310 or ANS 3320

Application of embryo transfer and related technologies to genetic improvement of mammalian livestock. Techniques for control of female reproduction, embryo collection and transfer, embryo cryopreservation, and embryo manipulation. Gender selection. Economic and genetic aspects of embryo transfer. (Typically Offered: Fall)

ANS 3340: Embryo Transfer Laboratory

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment in ANS 3330 or ANS 3320; Instructor Permission

Selected laboratory exercises related to embryo transfer such as synchronization of estrus, superovulation, detection of estrus, artificial insemination, embryo collection, embryo evaluation, microscopy, embryo cryopreservation, in vitro fertilization, embryo sexing, rectal palpation, and ultrasonography will be demonstrated and/or performed. (Typically Offered: Fall)

ANS 3350: Dairy Cattle Evaluation

Credits: 3. Contact Hours: Lecture 2, Laboratory 4.

Prereq: Sophomore classification

Evaluation of dairy heifers and lactating dairy cows. Emphasis placed on familiarity with anatomical terms/structures, the use of comparative terminology, decision-making skills, and presentation of oral reasons. (Introduction and skills development course for ANS 4750B.). (Typically Offered: Spring)

ANS 3360: Domestic Animal Behavior and Well-Being

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANS 2140

Understand how managed animals cope and perceive the environment. Principles of behavior and well-being relative to animal care, management and housing. Methods to objectively assess animal well-being. Awareness of animal protection through education/assessments, audits and law. (Typically Offered: Fall)

ANS 3370: Lactation

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANS 2140

The structure, development and evolution of the mammary gland. Mammary metabolism, milk synthesis; neural and endocrine regulation of mammary function. Immune function and health of the mammary gland. Current events related to lactation. (Typically Offered: Spring)

ANS 3450: Growth and Development of Domestic Animals

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANS 2140

Basic principles of animal growth and development covered at the tissue, cellular and molecular level. Emphasis placed on skeletal muscle, adipose, bone, and immune system growth and development. The effects of genetics, nutrition, and pharmaceuticals on growth. Course(s) in nutrition, genetics, meat science and/or biochemistry recommended. (Typically Offered: Spring)

ANS 3510: Principles of Domestic Animal Genetics

(Cross-listed with GEN 3510).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110, BIOL 2120 and STAT 1010 or STAT 1040

Foundation of genetics, genomics, and statistical concepts in domestic animal populations. Graduation Restriction: Only one of ANS 3510, GEN 3130, and GEN 3200 may count toward graduation. (Typically Offered: Fall)

ANS 3520: Genetic Improvement of Domestic Animals

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: (STAT 1010 or STAT 1040); BIOL 2110; (BIOL 3130 or GEN 3200 or ANS 3510X)

Principles of qualitative and quantitative genetics applied to improve domestic animal populations. Impact of selection and mating schemes in achieving breeding program goals. Applications and impacts of biotechnological advancements in genetics and genomics. Offered odd-numbered years. (Typically Offered: Summer)

ANS 3600: Fresh Meat Science and Applied Muscle Biology

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANS 2700; (BBMB 2210 or CHEM 3310)

Impact of muscle structure, composition, rigor mortis, inspection, fabrication, handling, packaging and cooking on the palatability, nutritional value, yields, market value, and safety of fresh meat. (Typically Offered: Fall)

ANS 3730A: Poultry Products Technology

Credits: 3.

Prereq: ((CHEM 1630 or CHEM 1670 or CHEM 1770); (BIOL 2110 or 2120)) or

Permission of Instructor

Basic principles of meat-producing and egg-laying poultry management, meat science, product functionality, egg quality, and food safety, product quality, product functionality, and food safety. 2-week course. Enrollment restricted to participants in the Midwest Poultry Consortium Center of Excellence Scholarship/Internship program. (Typically Offered: Summer)

ANS 3730B: Applied Avian Physiology

Credits: 3.

Prereq: ((CHEM 1630 or CHEM 1670 or CHEM 1770); (BIOL 2110 or 2120)) or

Permission of Instructor

Introduction of industry-relevant aspects of avian physiology with emphasis on behavior, neurology, muscle, cardiovascular, immunology, digestive, endocrinology, and reproductive systems for egg and meat producing birds. Focus on avian physiology and relevance to production management and outcomes. 2-week course. Enrollment restricted to participants in the Midwest Poultry Consortium Center of Excellence Scholarship/Internship program. (Typically Offered: Summer)

ANS 3730C: Avian Health

Credits: 3.

Prereq: ((CHEM 1630 or CHEM 1670 or CHEM 1770); (BIOL 2110 or 2120)) or

Permission of Instructor

Identification, diagnosis, management, and prevention of diseases in commercial poultry. 2-week course. Enrollment restricted to participants in the Midwest Poultry Consortium Center of Excellence Scholarship/Internship program. (Typically Offered: Summer)

ANS 3730D: Poultry Nutrition

Credits: 3.

Prereq: ((CHEM 1630 or CHEM 1670 or CHEM 1770); (BIOL 2110 or 2120)) or

Permission of Instructor

Commercial poultry-specific nutrition with an emphasis on species and age-specific diet formulation, ingredient selection, feed production, and production system. Use of feed additives and production outcomes. 2-week course. Enrollment restricted to participants in the Midwest Poultry Consortium Center of Excellence Scholarship/Internship program. (Typically Offered: Summer)

ANS 3800A: Swine Breeding and Gestation Management

Credits: 1. Contact Hours: Lecture 1.

Prereq: ANS 2250, or ANS 2800 and ANS 2800L

Concepts related to: reproductive physiology and endocrinology of boars and sows; genetic selection programs; development programs for future replacement gilts and boars; semen collection, evaluation, and preparation; detection of estrus and artificial insemination; pregnancy diagnosis; feeding and housing programs for gestating sows; environmental management; records; diseases, and development of quality assurance programs for identifying and solving reproductive problems. (Typically Offered: Spring)

ANS 3800B: Contemporary Issues in the Swine Industry

Credits: 1. Contact Hours: Lecture 1.

Prereq: ANS 2250, or ANS 2800 and ANS 2800L

Evaluation of issues facing today's swine industry including: welfare, nutrient management, and food safety and security. Development of skills needed for effective community relations such as media interviews and message points. (Typically Offered: Spring)

ANS 3800C: Employee Management for the Swine Industry

Credits: 1. Contact Hours: Lecture 1.

Prereq: ANS 2250, or ANS 2800 and ANS 2800L

Effective employee management in swine production units. Principles, policies, and practices related to procurement, development, maintenance, and utilization of employees. (Typically Offered: Fall)

ANS 3800D: Farrowing Management

Credits: 1. Contact Hours: Lecture 1.

Prereq: ANS 2250, or ANS 2800 and ANS 2800L

Advanced integration and application of reproductive management concepts during farrowing and lactation. Identification of production trends; formulation of strategies to improve productivity, and parturition and neonatal management. (Typically Offered: Spring, Summer)

ANS 3800E: Swine Feed Mill Management

Credits: 1. Contact Hours: Lecture 1.

Prereq: ANS 2250, or ANS 2800 and ANS 2800L

Principles of feed manufacturing, equipment operation, feed and ingredient quality assurance and regulatory compliance in a modern feed milling operation. Overview of feed mill regulations and safety. (Typically Offered: Fall)

ANS 3800F: Marketing and Risk Management in the Swine Industry

Credits: 1. Contact Hours: Lecture 1.

Prereq: ANS 2250, or ANS 2800 and ANS 2800L

A comprehensive view of industry structure and trends and marketing options available in the swine industry. Management of risk between markets and/or contracts. (Typically Offered: Spring)

ANS 3800G: Swine Nursery and Finishing Management

Credits: 1. Contact Hours: Lecture 1.

Prereq: ANS 2250, or ANS 2800 and ANS 2800L

Overview of the critical management, housing, and financial considerations relevant to the successful operation of a swine nursery, grow-finish, or wean to finish enterprise, including nutrient requirements; building and facility management; and marketing. (Typically Offered: Summer)

ANS 3800I: Pork Export Markets

Credits: 1. Contact Hours: Lecture 1.

Prereq: ANS 2250, or ANS 2800 and ANS 2800L

Introduction to global markets; cultural preferences and customs associated with the global swine industry. International trade regulations potential impact of foreign animal diseases and bioterrorism affecting the U.S. swine industry. (Typically Offered: Summer)

ANS 3800J: Pork Product Quality and Safety

Credits: 1. Contact Hours: Lecture 1.

Prereq: ANS 2250, or ANS 2800 and ANS 2800L

Pre- and post-harvest affecting pork product quality and safety. Overview of pork harvesting process and traits and characteristics of quality pork products. (Typically Offered: Spring)

ANS 3800K: Swine Nutrition

Credits: 1. Contact Hours: Lecture 1.

Prereq: ANS 2250, or ANS 2800 and ANS 2800L; ANS 3190

Principles of developing and implementing a swine feeding program. Fundamentals of feeding pigs including nutrients; factors affecting nutrient recommendations; feeding systems and management; feed ingredients, and formulation of swine diets. (Typically Offered: Fall)

ANS 3820: Swine Environment Management

Credits: 1. Contact Hours: Lecture 1.

Prereq: ANS 2250, or ANS 2800 and ANS 2800L

Response of swine to thermal environment, ventilation system design and analysis, heating and cooling systems, and examples of various designs for all phases of production. Troubleshooting ventilation systems and energy analysis of production units. TSM 2100 recommended.

ANS 3830: Swine Manure and Nutrient Management

Credits: 1. Contact Hours: Lecture 1.

Prereq: ANS 2250, or ANS 2800 and ANS 2800L

Function, application, and advantages and disadvantages of nutrient management systems. Manure production rates, manure handling systems, storage and manure management planning for land application and odor mitigation strategies.

ANS 3840: Swine Health and Biosecurity

Credits: 1. Contact Hours: Lecture 1.

Prereq: ANS 2250, or ANS 2800 and ANS 2800L

Overview of standard biosecurity protocols and identification of behavior and clinical signs of illness in pigs. Treatment administration and prevention methods. Introduction to immune system function and basic swine disease transmission. Recommended a course in microbiology.

ANS 3990A: Animal Science Internship: Graded Internship Experience

Credits: 2-6. Repeatable.

Prereq: Instructor Permission for Course

Learning experience focused on professional development for a career related to animal science. Journal, presentation, and scientific component. (Typically Offered: Fall, Spring, Summer)

ANS 3990B: Animal Science Internship: Supervised Internship Experience

Credits: Required. Repeatable, maximum of 0 credits.

Prereq: Instructor Permission for Course

Learning experience focused on professional development for a career related to animal science. Journal, presentation, and scientific component. This course is designed for those students who are completing a semester long internship located off campus. (Typically Offered: Fall, Spring, Summer)

ANS 4110: Addressing Issues in Animal Science

Credits: 1. Contact Hours: Laboratory 2.

Prereq: Senior classification; ANS major

Life skill development emphasized in the context of exploring one's perspective of the most pressing moral and scientific issues facing animal agriculture. Clarification and communication of personal conclusions in small and large group settings expected. (Typically Offered: Fall, Spring)

ANS 4150: Equine Systems Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANS 2160, ANS 3190, ANS 3200, ANS 3310

Identification and development of financial and production goals in a horse business. Scientific approach to make decisions in management of enterprises in the horse industry. (Typically Offered: Fall, Spring)

ANS 4190: Advanced Animal Nutrition

Credits: 2. Contact Hours: Lecture 2.

Prereq: ANS 3190

Detailed consideration of digestion, metabolism, and assimilation of nutrients. Recent advances and developments in basic nutrition. (Typically Offered: Fall)

ANS 4240: Companion Animal Systems Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANS 2240, ANS 3190, ANS 3200, ANS 3310, ANS 3520

Factors that affect managers of a companion animal enterprise. Financial and business goal identification, problem clarification, behavior modification, animal training, humane education, and resource allocation to manage a companion animal system. (Typically Offered: Fall, Spring)

ANS 4250: Swine Systems Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: (ANS 2250; ANS 2700; ANS 2700L; ANS 3190; ANS 3200; ANS 3310; ANS 3520) or Permission of Instructor

Decisions facing the administrator of a swine enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the swine enterprise. ECON 2300 or equivalent recommended. (Typically Offered: Fall)

ANS 4260: Beef Cattle Systems Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: (ANS 2260; ANS 2700; ANS 2700L; ANS 3200) or Permission of Instructor

Decisions facing the administrator of a beef cow-calf or feedlot enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the beef enterprise. Computer aided study. ECON 2300 or equivalent recommended. (Typically Offered: Fall, Spring)

ANS 4290: Sheep Systems Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: (ANS 2290; ANS 3190; ANS 3200; ANS 3310; ANS 3520) or Permission of Instructor

Decisions facing the administrator of a sheep enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the sheep enterprise. ECON 2300 and AGRON 3340 or equivalents recommended. (Typically Offered: Spring)

ANS 4340: Dairy Systems Management

Credits: 3. Contact Hours: Laboratory 2, Lecture 2.

Prereq: ANS 2350, ANS 3200, ANS 3310, ANS 3370, ANS 3520

The scientific foundation of dairy cattle management. The impact of dairy farm management practices on the biological processes of the cow. Integrates concepts from the disciplines of lactation, reproduction, nutrition, genetics, and animal health. (Typically Offered: Fall)

ANS 4350: Applied Dairy Farm Evaluation

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANS 4340

Evaluate nutrition, reproduction, milk quality, breeding, and related management practices of commercial dairy herds in a case study format. Students will apply knowledge gained in the classroom to commercial dairy farm situations and develop skills in information gathering, decision making, problem solving, and interpersonal communications. ECON 2300 or equivalent recommended. (Typically Offered: Spring)

ANS 4410: International Animal Agriculture

(Cross-listed with GLOBE 4410).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANS 2230 or ANS 2250 or ANS 2260 or ANS 2290 or ANS 2350

An overview of animal agriculture with emphasis in developing countries. Historical, economic, environmental, and political considerations will be assessed and evaluated. Issues related to gender, resilience and sustainability for different production systems including alternative livestock species, will be investigated. The role of animal source foods in attainment of global food security will be discussed. Meets International Perspectives Requirement. (Typically Offered: Spring)

ANS 4600: Science and Technology of Value Added Meat Products

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANS 2700

Physical, chemical and biological properties of meat important to achieving value-added meat product characteristics. Ingredients, technology and equipment used for processing, preservation and safety of cured meats, loaf products and fresh, cooked, dry and semi-dry sausage products. (Typically Offered: Spring)

ANS 4730A: Poultry Enterprise Management

Credits: 3.

Prereq: (CHEM 1630 or CHEM 1670 or CHEM 1770); (BIOL 2110 or BIOL 2120)

Business and management aspects of the poultry industry. Emphasis on personal interactions, effective communication, interview skills, poultry management, writing a business plan, and business decisions. 2-week course. Enrollment restricted to participants in the Midwest Poultry Consortium Center of Excellence Scholarship/Internship program. (Typically Offered: Summer)

ANS 4730B: Breeder Flock and Hatchery Management

Credits: 3.

Prereq: (CHEM 1630 or CHEM 1670 or CHEM 1770); (BIOL 2110 or BIOL 2120)

Topics associated with the management of poultry breeder flocks and hatcheries: nutrition, lighting management, reproductive physiology, and husbandry for breeder flocks. Embryology, incubation techniques, biosecurity, and hatchery management. 2-week course. Enrollment restricted to participants in the Midwest Poultry Consortium Center of Excellence Scholarship/Internship program. (Typically Offered: Summer)

ANS 4750A: Intercollegiate Judging Training and Competition: Meat Animals

Credits: 1-2. Contact Hours: Laboratory 4.

Repeatable.

Prereq: Instructor Permission for Course

Specialized training in evaluation and grading of livestock. Development and advancement of decision-making skills, comparative techniques and terminology, familiarity with anatomical terms/structures, and presentation of oral reasons. Graduation Restriction: Maximum of 6 credits may be applied toward graduation. (Typically Offered: Fall, Spring)

ANS 4750B: Intercollegiate Judging Training and Competition: Dairy Cattle

Credits: 1-2. Contact Hours: Laboratory 4.

Repeatable.

Prereq: Instructor Permission for Course

Specialized training in evaluation of dairy cattle, in particular heifers and lactating dairy cows. Development and advancement of decision-making skills, comparative techniques and terminology, familiarity with anatomical terms/structures, and presentation of oral reasons. Graduation Restriction: Maximum of 6 credits may be applied toward graduation. (Typically Offered: Fall, Spring)

ANS 4750C: Intercollegiate Judging Training and Competition: Meats

Credits: 1-2. Contact Hours: Laboratory 4.

Repeatable.

Prereq: Instructor Permission for Course

Specialized training in evaluation and grading of livestock/meat products. Development and advancement of decision-making skills, comparative techniques and terminology, familiarity with anatomical terms/structures, and presentation of written reasons. Graduation Restriction: Maximum of 6 credits may be applied toward graduation. (Typically Offered: Fall, Spring)

ANS 4750D: Intercollegiate Judging Training and Competition: Meat Animal Evaluation

Credits: 1-2. Contact Hours: Laboratory 4.

Repeatable.

Prereq: Instructor Permission for Course

Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Emphasis placed on the impact of management decisions on marketability and profitability. Development and advancement of decision-making skills, and communication and comparative techniques. Graduation Restriction: Maximum of 6 credits may be applied toward graduation. (Typically Offered: Fall, Spring)

ANS 4750E: Intercollegiate Judging Training and Competition: Horses

Credits: 1-2. Repeatable.

Prereq: Instructor Permission for Course

Specialized training in evaluation of horses and horse events. Emphasis placed on familiarity with anatomical terms/structures, form to function, application of breed association rules and current maneuver scoring, and the use of comparative terminology. Development and advancement of decision-making skills, comparative techniques, and presentation of oral reasons. Graduation Restriction: Maximum of 6 credits may be applied toward graduation. (Typically Offered: Fall, Spring)

ANS 4750F: Intercollegiate Judging Training and Competition: Management Systems

Credits: 1-2. Contact Hours: Laboratory 2. Repeatable.

Prereq: Instructor Permission for Course

Specialized training in evaluation of livestock/domesticated animal production management plans. Development and advancement of decision-making skills, comparative techniques, and presentation of analyses. Emphasis placed on the impact of management decisions on marketability and profitability. Graduation Restriction: Maximum of 6 credits may be applied toward graduation. (Typically Offered: Fall, Spring)

ANS 4800A: Animal Industry Leadership Fellows: Beef

Credits: 1. Repeatable.

Prereq: ANS 2260; Instructor Permission

Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ANS 4800C: Animal Industry Leadership Fellows: Pork

Credits: 1. Repeatable.

Prereq: ANS 2250; Instructor Permission

Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ANS 4800G: Animal Industry Leadership Fellows: Poultry

Credits: 1. Repeatable.

Prereq: ANS 2230; Instructor Permission

Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. Central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ANS 4890: Issues in Food Safety

(Cross-listed with FSHN 4890/ HSPM 4890/ VDPAM 4890).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (Credit or concurrent enrollment in FSHN 1010 or FSHN 2720 or HSPM 2330); (FSHN 4190 or FSHN 4200); FSHN 4030

Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective. (Typically Offered: Spring)

ANS 4900A: Independent Study: Animal Science

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Open to undergraduate students in animal science, dairy science and general pre-veterinary medicine showing satisfactory preparation for project chosen. Individual projects involving faculty supervision, including mentoring and preparation of report. Graduation Restriction: A maximum of 6 credits of ANS 4900 may be applied toward the total credits required for graduation. (Typically Offered: Fall, Spring, Summer)

ANS 4900B: Independent Study: Dairy Science

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Open to undergraduate students in animal science, dairy science and general pre-veterinary medicine showing satisfactory preparation for project chosen. Individual projects involving faculty supervision, including mentoring and preparation of report. Graduation Restriction: A maximum of 6 credits of ANS 4900 may be applied toward the total credits required for graduation. (Typically Offered: Fall, Spring, Summer)

ANS 4900C: Independent Study: Meat Science

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Open to undergraduate students in animal science, dairy science and general pre-veterinary medicine showing satisfactory preparation for project chosen. Individual projects involving faculty supervision, including mentoring and preparation of report. Graduation Restriction: A maximum of 6 credits of ANS 4900 may be applied toward the total credits required for graduation. (Typically Offered: Fall, Spring, Summer)

ANS 4900D: Independent Study: Companion Animal Science

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Open to undergraduate students in animal science, dairy science and general pre-veterinary medicine showing satisfactory preparation for project chosen. Individual projects involving faculty supervision, including mentoring and preparation of report. Graduation Restriction: A maximum of 6 credits of ANS 4900 may be applied toward the total credits required for graduation. (Typically Offered: Fall, Spring, Summer)

ANS 4900E: Independent Study: Equine Science

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Open to undergraduate students in animal science, dairy science and general pre-veterinary medicine showing satisfactory preparation for project chosen. Individual projects involving faculty supervision, including mentoring and preparation of report. Graduation Restriction: A maximum of 6 credits of ANS 4900 may be applied toward the total credits required for graduation. (Typically Offered: Fall, Spring, Summer)

ANS 4900G: Independent Study: Poultry Science

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Open to undergraduate students in animal science, dairy science and general pre-veterinary medicine showing satisfactory preparation for project chosen. Individual projects involving faculty supervision, including mentoring and preparation of report. Graduation Restriction: A maximum of 6 credits of ANS 4900 may be applied toward the total credits required for graduation. (Typically Offered: Fall, Spring, Summer)

ANS 4900H: Independent Study: Honors

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Open to undergraduate students in animal science, dairy science and general pre-veterinary medicine showing satisfactory preparation for project chosen. Individual projects involving faculty supervision, including mentoring and preparation of report. Graduation Restriction: A maximum of 6 credits of ANS 4900 may be applied toward the total credits required for graduation. (Typically Offered: Fall, Spring, Summer)

ANS 4900I: Independent Study: Entrepreneurship

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Open to undergraduate students in animal science, dairy science and general pre-veterinary medicine showing satisfactory preparation for project chosen. Individual projects involving faculty supervision, including mentoring and preparation of report. Graduation Restriction: A maximum of 6 credits of ANS 4900 may be applied toward the total credits required for graduation. (Typically Offered: Fall, Spring, Summer)

ANS 4930: Workshop in Animal Science

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Workshop in livestock production. Includes current concepts in breeding, nutrition, reproduction, meats, and technologies that impact the animal industry.

ANS 4950: Agricultural Travel Course Preparation

Credits: Required. Repeatable.

Prereq: Instructor Permission for Course

Limited enrollment. Students enrolled in this course will also register for AGRON 4950 and intend to register in AGRON 4960 and ANS 4960 the following term. Topics will include the agricultural industries, climate, crops, culture, history, livestock, marketing, soils, and preparation for travel to locations to be visited. Information normally available 9 months before departure. (Typically Offered: Fall, Spring)

ANS 4960A: Agricultural Travel Course: International Tour

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Limited enrollment. International tour and study of livestock production systems and impacts of animals on society and the ecosystem. Influence of climate, economics, geography, landscapes, markets, and other factors on both livestock and other domesticated animals. Locations and duration of tours will vary. Information usually available 9 months before departure. Tour expenses paid by students. Meets International Perspectives Requirement. Meets International Perspectives Requirement.

ANS 4960B: Agricultural Travel Course: Domestic tour

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Limited enrollment. Domestic tour and study of livestock production systems and impacts of animals on society and the ecosystem. Influence of climate, economics, geography, landscapes, markets, and other factors on both livestock and other domesticated animals. Locations and duration of tours will vary. Information usually available 9 months before departure. Tour expenses paid by students.

ANS 4970: Undergraduate Teaching Experiences in Animal Science

Credits: 1-2. Repeatable, maximum of 4 credits.

Prereq: Instructor Permission for Course

Development of oral and written communication skills of technical concepts in animal science. Emphasis on organizational skills, conducting activities and interpersonal communication skills. Responsibilities in a class under direct supervision of a faculty member. Graduation Restriction: A maximum of 4 credits of ANS 4970 may be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

ANS 5000A: Applied Data Science and Statistics using Statistical Software in Animal Sciences: SAS

Credits: 1. Contact Hours: Lecture 2.

Prereq: Credit or enrollment in STAT 5870 or Graduate Classification

First half semester course. Introduction to using SAS for solving research problems, including organization of data files, transfer of files between different formats, data editing, identifying confounded data, developing statistical models, and techniques for analysis of designed experiments. (Typically Offered: Fall)

ANS 5000B: Applied Data Science and Statistics using Statistical Software in Animal Sciences: R

Credits: 1. Contact Hours: Lecture 2.

Prereq: Credit or enrollment in STAT 5870 or Graduate Classification

Second half semester course. Introduction to using R for data science and statistics to solve research problems, including data entry, data management, merging files, outputting new datasets and reports, data visualization, developing statistical models, and techniques for analysis of designed experiments. (Typically Offered: Fall)

ANS 5010: Survey of Animal Disciplines

Credits: 1. Contact Hours: Lecture 1.

Required for Animal Science graduate students. Orientation to departmental and graduate school policies and procedures. Discussion of programs of research and outreach in Animal Science. Issues impacting the animal industry. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

ANS 5150: Integrated Crop and Livestock Production Systems

(Cross-listed with ABE 5150/ AGRON 5150/ SUSAG 5150).

Credits: 3. Contact Hours: Lecture 3.

Prereq: SUSAG 5090 or Graduate Classification

Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms. Offered odd-numbered years. (Typically Offered: Fall)

ANS 5170: Gut Microbiome: Implications for Health and Diseases

(Cross-listed with FSHN 5170/ MICRO 5170/ VMPPM 5170).

Credits: 3. Contact Hours: Lecture 3.

Explore current research on gut microbiome including modern tools used to study the gut microbiome. Examine the linkages between gut microbiome and health status, diseases, and manipulation of gut microbiome to improve health. (Typically Offered: Fall)

ANS 5180: Digestive Physiology and Metabolism of Non Ruminants

(Cross-listed with NUTRS 5180).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANS 4190 or NUTRS 5010 or Graduate Classification

Digestion and metabolism of nutrients. Nutritional requirements and current research and feeding programs for poultry and swine. Offered odd-numbered years. (Typically Offered: Spring)

ANS 5200: Digestive Physiology and Metabolism of Ruminants

(Cross-listed with NUTRS 5200).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANS 4190 or NUTRS 5010 or Graduate Classification

Digestive physiology and nutrient metabolism in ruminant and preruminant animals. Offered even-numbered years. (Typically Offered: Spring)

ANS 5330: Physiology and Endocrinology of Animal Reproduction

Credits: 2. Contact Hours: Lecture 2.

Development of structure and function of the reproductive system. Physiologic and endocrine aspects including puberty, gametogenesis, estrous cycle, pregnancy, maternal recognition, fertilization and early embryonic development. Offered odd-numbered years. (Typically Offered: Spring)

ANS 5360: Perinatology

Credits: 2. Contact Hours: Lecture 2.

Regulation of metabolism and development in the mammalian fetus and neonate is explored in a comparative manner. Emphasis will be on the dynamic changes in these relationships occurring at birth. (Typically Offered: Spring)

ANS 5370A: Topics in Animal Behavior, Welfare: Animal Behavior

Credits: 3. Contact Hours: Lecture 3.

Prereq: Enrollment in M.S. or Ph.D.; Permission of Instructor

Each semester, the students' focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit. Offered odd-numbered years. (Typically Offered: Spring)

ANS 5370B: Topics in Animal Behavior, Welfare: Contemporary Issues.

Credits: 3. Contact Hours: Lecture 3.

Prereq: Enrollment in M.S. or Ph.D.; Permission of Instructor

Each semester, the students' focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit. Offered odd-numbered years. (Typically Offered: Spring)

ANS 5370C: Topics in Animal Behavior, Welfare: Animal Welfare

Credits: 3. Contact Hours: Lecture 3.

Prereq: Enrollment in M.S. or Ph.D.; Permission of Instructor

Each semester, the students' focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit. Offered odd-numbered years. (Typically Offered: Spring)

ANS 5370D: Topics in Animal Behavior, Welfare: Immune and Stress

Credits: 3. Contact Hours: Lecture 3.

Prereq: Enrollment in M.S. or Ph.D.; Permission of Instructor

Each semester, the students' focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit. Offered odd-numbered years. (Typically Offered: Spring)

ANS 5400: Livestock Immunogenetics

(Cross-listed with MICRO 5400/ VMPPM 5400).

Credits: 2. Contact Hours: Lecture 2.

Prereq: ANS 5610 or MICRO 5750 or VMPPM 5200 or Graduate Classification

Basic concepts and contemporary topics in genetic regulation of livestock immune response and disease resistance. Offered odd-numbered years. (Typically Offered: Spring)

ANS 5490: Advanced Vertebrate Physiology I

(Cross-listed with KIN 5490/ NUTRS 5490).

Credits: 4. Contact Hours: Lecture 4.

Overview of mammalian physiology. Cell biology, endocrinology, cardiovascular, respiratory, immune, digestive, skeletal muscle and reproductive systems. (Typically Offered: Fall)

ANS 5560: Current Topics in Genome Analysis

Credits: 3. Contact Hours: Lecture 3.

Prereq: BBMB 4050 or GDCB 5100 or Graduate Classification

Introduction to principles and methodology of molecular genetics useful in analyzing and modifying large genomes. Offered even-numbered years. (Typically Offered: Fall)

ANS 5600: Science and Technology of Value Added Meat Products

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANS 2700 or Graduate standing

Physical, chemical and biological properties of meat important to achieving value-added meat product characteristics. Ingredients, technology and equipment used for processing, preservation and safety of cured meats, loaf products and fresh, cooked, dry and semi-dry sausage products. (Typically Offered: Spring)

ANS 5610: Population and Quantitative Genetics for Breeding

(Cross-listed with AGRON 5610).

Credits: 4. Contact Hours: Lecture 4.

Prereq: STAT 5870 or Graduate Classification

Population and quantitative genetics for plant and animal genetics. Study of the genetic basis and analysis of variation in quantitative traits in domestic or experimental populations using phenotypic and molecular marker data, including estimation of heritability and other genetic parameters, linkage analysis and mapping of quantitative trait loci, and the impact of inbreeding, heterosis, and genotype-by-environment interaction. (Typically Offered: Fall)

ANS 5620A: Methodologies for Population/Quantitative Genetics: Linear Models and Genetic Prediction

Credits: 2. Contact Hours: Lecture 2.

Prereq: ANS 5610 or Graduate Classification

Basic theory for genetic analysis of animal breeding data. Course A (1st half semester) covers linear models, selection index methods, and basic theory for best linear unbiased prediction. Course B (2nd half semester) best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters. (Typically Offered: Spring)

ANS 5620B: Methodologies for Population/Quantitative Genetics: Advanced Genetic Prediction&Parameter Estimation

Credits: 2. Contact Hours: Lecture 2.

Prereq: ANS 5610 or Graduate Classification

Basic theory for genetic analysis of animal breeding data. Course A (1st half semester) covers linear models, selection index methods, and basic theory for best linear unbiased prediction. Course B (2nd half semester) best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters. (Typically Offered: Spring)

ANS 5630: Advanced Processed Meats Technology

Credits: 3. Contact Hours: Lecture 3.

Physical, chemical and biological properties of meat important to processed meat product characteristics. Ingredients, technology and equipment used for fresh and cured meat products. Packaging, preservation and food safety issues critical to processed meat products are emphasized. (Typically Offered: Spring)

ANS 5690: Reproductive and Developmental Toxicology

(Cross-listed with TOX 5690).

Credits: 2. Contact Hours: Lecture 2.

Chemical agents that target developmental and reproductive systems in animals and humans, both male and female. The influence that timeline of developmental in utero and what part of reproductive organ have on outcome of environmental exposures will be developed. The physiological changes due to exposure, and mechanistic pathways activated by xenobiotics will be defined and the consequences of these changes will be explored. Offered even-numbered years. (Typically Offered: Fall)

ANS 5700: Advanced Meat Science and Applied Muscle Biology

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Ante and postmortem factors impacting composition, structure, and chemistry of red meat and poultry muscle/meat, the conversion of muscle to meat, and the sensory and nutritional attributes of fresh meats.

Oral reports and a written project. Graduation Restriction: Students cannot receive credit for both ANS 5700 and ANS 5730. Offered even-numbered years. (Typically Offered: Spring)

ANS 5710: Advanced Meat Processing Principles and Technology

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANS 4600 or ANS 5700 or Graduate Classification

Physical/chemical relationships during processing. Effects of modern technology, non-meat additives and preservation techniques on quality and safety of processed meat. Laboratory demonstration of principles and technology. Offered even-numbered years. (Typically Offered: Fall)

ANS 5730: Fresh Meat Science and Technology

Credits: 3. Contact Hours: Lecture 3.

Quality, and sensory attributes of fresh meats and how they develop and how they are evaluated. The study of ante and postmortem factors impacting quantity, composition, structure, and chemistry of red meat and poultry muscle/meat. Graduation Restriction: Students cannot receive credit for both ANS 5700 and ANS 5730. (Typically Offered: Fall)

ANS 5900A: Special Topics: Animal Breeding

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special topics in the animal sciences, offered on demand and may be conducted by guest professors. (Typically Offered: Fall, Spring, Summer)

ANS 5900B: Special Topics: Animal Nutrition

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special topics in the animal sciences, offered on demand and may be conducted by guest professors. (Typically Offered: Fall, Spring, Summer)

ANS 5900C: Special Topics: Meat Animal Production

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special topics in the animal sciences, offered on demand and may be conducted by guest professors. (Typically Offered: Fall, Spring, Summer)

ANS 5900D: Special Topics: Dairy Production

Credits: 1-3. Repeatable.

Special topics in the animal sciences, offered on demand and may be conducted by guest professors. (Typically Offered: Fall, Spring, Summer)

ANS 5900E: Special Topics: Meat Science

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special topics in the animal sciences, offered on demand and may be conducted by guest professors. (Typically Offered: Fall, Spring, Summer)

ANS 5900F: Special Topics: Physiology of Reproduction

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special topics in the animal sciences, offered on demand and may be conducted by guest professors. (Typically Offered: Fall, Spring, Summer)

ANS 5900G: Special Topics: Muscle Biology

Credits: 1-3. Repeatable.

Special topics in the animal sciences, offered on demand and may be conducted by guest professors. (Typically Offered: Fall, Spring, Summer)

ANS 5900H: Special Topics: Poultry Nutrition

Credits: 1-3. Repeatable.

Special topics in the animal sciences, offered on demand and may be conducted by guest professors. (Typically Offered: Fall, Spring, Summer)

ANS 5900I: Special Topics: Poultry Products

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special topics in the animal sciences, offered on demand and may be conducted by guest professors. (Typically Offered: Fall, Spring, Summer)

ANS 5900J: Special Topics: Experimental Surgery

Credits: 1-3. Repeatable.

Special topics in the animal sciences, offered on demand and may be conducted by guest professors. (Typically Offered: Fall, Spring, Summer)

ANS 5900K: Special Topics: Professional Topics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special topics in the animal sciences, offered on demand and may be conducted by guest professors. (Typically Offered: Fall, Spring, Summer)

ANS 5900L: Special Topics: Teaching

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special topics in the animal sciences, offered on demand and may be conducted by guest professors. (Typically Offered: Fall, Spring, Summer)

ANS 5900M: Special Topics: Molecular Biology

Credits: 1-3. Repeatable.

Special topics in the animal sciences, offered on demand and may be conducted by guest professors. (Typically Offered: Fall, Spring, Summer)

ANS 5900N: Special Topics: Ethology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special topics in the animal sciences, offered on demand and may be conducted by guest professors. (Typically Offered: Fall, Spring, Summer)

ANS 5990A: Creative Component: Animal Breeding and Genetics

Credits: 1-8. Repeatable.

Prereq: Instructor Permission for Course

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee. (Typically Offered: Fall, Spring, Summer)

ANS 5990B: Creative Component: Animal Nutrition

Credits: 1-8. Repeatable.

Prereq: Instructor Permission for Course

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee. (Typically Offered: Fall, Spring, Summer)

ANS 5990C: Creative Component: Animal Physiology

Credits: 1-8. Repeatable.

Prereq: Instructor Permission for Course

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee. (Typically Offered: Fall, Spring, Summer)

ANS 5990D: Creative Component: Animal Science

Credits: 1-8. Repeatable.

Prereq: Instructor Permission for Course

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee. (Typically Offered: Fall, Spring, Summer)

ANS 5990E: Creative Component: Meat Science

Credits: 1-8. Repeatable.

Prereq: Instructor Permission for Course

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:

ANS 6030: Seminar in Animal Nutrition

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Discussion of current literature; preparation and submission of abstracts. (Typically Offered: Fall, Spring)

ANS 6180: Vitamins and Minerals

(Cross-listed with NUTRS 6180).

Credits: 2. Contact Hours: Lecture 2.

Understanding molecular aspects of vitamin and mineral metabolism and homeostasis in humans and animals. An in-depth examination of the chemistry of vitamins and minerals, including genetic mutations, proteins involved in absorption and excretion, and their necessity in biological processes. Offered even-numbered years. (Typically Offered: Spring)

ANS 6190: Advanced Nutrition and Metabolism - Protein

(Cross-listed with NUTRS 6190).

Credits: 2. Contact Hours: Lecture 2.

Prereq: BBMB 4050

Digestion, absorption, and intermediary metabolism of amino acids and protein. Regulation of protein synthesis and degradation. Integration of cellular biochemistry and physiology of mammalian protein metabolism. Offered odd-numbered years. (Typically Offered: Fall)

ANS 6200: Advanced Nutrition and Metabolism - Energy

(Cross-listed with NUTRS 6200).

Credits: 2. Contact Hours: Lecture 2.

Energy constituents of feedstuffs and energy needs of animals as related to cellular biochemistry and physiology. Interpretations of classical and current research. Offered odd-numbered years. (Typically Offered: Fall)

ANS 6330: Seminar in Animal Reproduction

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Discussion of current literature and preparation of reports and seminars on selected topics concerning animal physiology. (Typically Offered: Fall)

ANS 6520A: Animal Breeding Strategies: Breeding Goals and Response to Selection

Credits: 2. Contact Hours: Lecture 2.

Prereq: ANS 5610 or Graduate Classification

Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester)

Prediction of response to selection, selection index theory, multiple trait selection, inbreeding, crossbreeding, and marker-assisted selection.

Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Graduation Restriction: Each topic may be taken only one time for academic credit.

ANS 6520B: Animal Breeding Strategies: Design and Evaluation of Animal Breeding Programs

Credits: 2. Contact Hours: Lecture 2.

Prereq: ANS 5610 or Graduate Classification

Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester)

Prediction of response to selection, selection index theory, multiple trait selection, inbreeding, crossbreeding, and marker-assisted selection.

Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Graduation Restriction: Each topic may be taken only one time for academic credit.

ANS 6530: Applied Animal Breeding Strategies

Credits: 3. Contact Hours: Lecture 3.

Industrial applications of breeding systems, selection methods, and new genetic technologies. One or more field trips to an industry breeding company. (Typically Offered: Fall)

ANS 6550A: Computational Strategies for Predicting Breeding Values

Credits: 2. Contact Hours: Lecture 3, Laboratory 1.

Prereq: ANS 5000; ANS 5620; or Graduate Classification

Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications.

Strategies for handling large sets and for prediction using best linear unbiased prediction using a formal language and utility programs. Offered odd-numbered years. (Typically Offered: Fall)

ANS 6550B: Computational Strategies for Genetic Parameter Estimation

Credits: 2. Contact Hours: Lecture 3, Laboratory 1.

Prereq: ANS 5000; ANS 5620; or Graduate Classification

Computational methods and strategies for analysis of large data sets

with animal breeding data for use in research and industry applications.

Strategies for estimation of genetic parameters and for use of non-linear models for genetic analysis of categorical and survival type data. Offered odd-numbered years. (Typically Offered: Fall)

ANS 6560: Statistical Methods for Mapping Quantitative Trait Loci

Credits: 2. Contact Hours: Lecture 2.

Prereq: ANS 5620 or Graduate Classification

Statistical methods for mapping quantitative trait loci in out-bred

populations. Methods based on modeling covariances between relatives.

Likelihood based methods using half-sib and full-sib families and

extended pedigrees. Bayesian methods applied. Offered even-numbered years. (Typically Offered: Spring)

ANS 6580: Seminar in Animal Breeding and Genetics

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Presentation of current research related to animal breeding and genetics. (Typically Offered: Fall, Spring)

ANS 6700: Molecular Biology of Muscle

(Cross-listed with KIN 6700).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BBMB 4050, BBMB 4200

Ultrastructure of muscle; chemistry, structure, function, and molecular biology of muscle proteins. Molecular aspects of muscle contraction,

development and turnover. Cytoskeletal proteins and dynamics. Offered odd-numbered years. (Typically Offered: Spring)

ANS 6840: Seminar in Meat Science

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Discussion and evaluation of current topics in research publications in meat science. (Typically Offered: Spring)

ANS 6850: Seminar in Muscle Biology

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Reports and discussion of recent literature and current investigations. (Typically Offered: Spring)

ANS 6950: Seminar in Animal Science

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Reports and discussion of current issues and research in animal science.

One credit is required for all M.S. degree candidates with graduate majors in the Department of Animal Science, and two credits are required for all Ph.D. candidates with graduate majors in the Department of Animal Science. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

ANS 6990A: Research: Animal Breeding

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

ANS 6990B: Research: Animal Nutrition

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

ANS 6990C: Research: Meat Animal Production

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

ANS 6990D: Research: Dairy Production

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

ANS 6990E: Research: Meat Science

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

ANS 6990F: Research: Physiology of Reproduction

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

ANS 6990G: Research: Muscle Biology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

ANS 6990H: Research: Poultry Nutrition

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

ANS 6990I: Research: Poultry Products

Credits: 1-30. Repeatable.

ANS 6990J: Research: Animal Ethology

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

ANTHR 2010: Introduction to Cultural Anthropology

Credits: 3. Contact Hours: Discussion 1, Lecture 2.

Introduction to the core concepts, theories, and methods of cultural anthropology with an emphasis on understanding human cultural diversity in global society from an anthropological perspective. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

ANTHR 2020: Human Origins

Credits: 3. Contact Hours: Discussion 1, Lecture 2.

Human biological and cultural evolution; survey of the evidence from fossil primates, the human fossil record and the archaeological record, as well as living primates; introduction to research methods in archaeology and biological anthropology. (Typically Offered: Fall, Spring)

ANTHR 2100: Introduction to Asian American Studies

(Cross-listed with WLC 2100).

Credits: 3. Contact Hours: Lecture 3.

An interdisciplinary and chronological examination of Asian American immigration experiences from the early 19th century to the 21st century. Focus on how these immigration histories are accompanied by changing racial constructions. Discussion of racial stereotyping, the model minority myth, identity development, and efforts for social justice. Meets U.S. Diversity Requirement.

ANTHR 2200: Globalization and Sustainability

(Cross-listed with SOC 2200/ ENVS 2200/ GLOBE 2200/ ME 2200/ MATE 2200).

Credits: 3. Contact Hours: Lecture 3.

An introduction to understanding the key global issues in sustainability. Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Graduation Restriction: Cannot be used for technical elective credit in any engineering department. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

ANTHR 2250: American Indians of Iowa

(Cross-listed with AMIN 2250).

Credits: 3. Contact Hours: Lecture 3.

Cultures and histories of Native people who have called the present state of Iowa home; primary focus on the period between 1700 CE and the present; Native interactions with Spanish, French, British, and American people. Meets U.S. Diversity Requirement. (Typically Offered: Fall)

Anthropology (ANTHR)

Courses primarily for undergraduates:

ANTHR 2300: Globalization and the Human Condition

Credits: 3. Contact Hours: Lecture 3.

An introduction to understanding key global issues in the contemporary world. Focuses on social relations, cultural practices and political-economic linkages among Africa, the Americas, Asia, Europe and the Pacific. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

ANTHR 3060: Culture and Interpretation

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2010

Disciplinary and interdisciplinary approaches to the interpretation of contemporary and historical cultures, their contexts, and meanings. Meets International Perspectives Requirement. (Typically Offered: Spring)

ANTHR 3070: Biological Anthropology

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANTHR 2020

Human evolution as known from fossil evidence, comparative primate studies, and genetic variations in living populations. Laboratory-tutorial sessions include study and discussion of human osteology, fossil hominids, simple Mendelian traits, and bio-ethics in applied biological anthropology. (Typically Offered: Spring)

ANTHR 3080: Archaeology

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANTHR 2020

Methods and techniques for the recovery and interpretation of archaeological evidence, its role in reconstructing human behavior and past environments. Laboratory sessions include experience in the interpretation of archaeological evidence, the use of classification systems, and prehistoric technologies such as ceramics and stone tools. (Typically Offered: Fall)

ANTHR 3090: Introduction to Culture and Language

(Cross-listed with LING 3090).

Credits: 3. Contact Hours: Lecture 3.

Introduction to study of language, culture and society from an anthropological perspective. Focus on language and thought, ethnography of speaking, discourse and narrative, writing and literacy, and media communication. Discussion of key theories and methods of linguistic anthropology. ANTHR 2010 recommended. Meets International Perspectives Requirement.

ANTHR 3100: Environmental Anthropology

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2010

Exploration of contemporary theories and methods in environmental anthropology with a focus on anthropological approaches to the global climate crisis. Meets International Perspectives Requirement.

ANTHR 3130: Kinship and Marriage in a Global Perspective

(Dual-listed with ANTHR 5130).

Credits: 3. Contact Hours: Lecture 3.

Comparative and historical overview of the family, marriage and kinship. Examination of cross-cultural differences in the construction and functioning of family and kin relations; role of kinship in structuring individual and collective activities; current critical and theoretical issues in kinship studies, especially integrating work on gender and sexuality. ANTHR 2010 recommended. Meets International Perspectives Requirement. (Typically Offered: Spring)

ANTHR 3150: Archaeology of North America

(Dual-listed with ANTHR 5150). (Cross-listed with AMIN 3150).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2020

Prehistory and early history of North America as reconstructed from archaeological evidence; peopling of the New World; culture- historical sequences of major culture areas; linkages of archaeological traditions with selected ethnohistorically known Native American groups. (Typically Offered: Spring)

ANTHR 3170: Primate Behavior, Ecology, and Evolution

Credits: 3. Contact Hours: Lecture 3.

An overview of the primates (prosimians, monkeys, and apes) with a focus on their behavior from an ecological and evolutionary perspective. Topics include: methods in primatological research; survey of the living primates; biological and social adaptations of primates; interactions between primates and their environment; and primate conservation. ANTHR 2020 and/or basic biology course recommended. (Typically Offered: Fall, Spring, Summer)

ANTHR 3190: Skeletal Biology

(Dual-listed with ANTHR 5190).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANTHR 3070 or 3 credits BIOL

Comprehensive study of the skeletal anatomy, physiology, genetics, growth, development and population variation of the human skeleton. Applications to forensic anthropology, paleopathology and bioarchaeology are introduced. (Typically Offered: Spring)

ANTHR 3200: Great Plains Archaeology

(Dual-listed with ANTHR 5200). (Cross-listed with AMIN 3200).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2020

Prehistoric societies of the Great Plains region of North America, from initial occupation to European contact; emphasis on sociocultural changes, continuities, and adaptations to changing environments using archaeological, ecological, ethnographic information. (Typically Offered: Fall)

ANTHR 3210: World Prehistory

(Dual-listed with ANTHR 5210).

Credits: 3. Contact Hours: Lecture 3.

An introduction to archaeological sites from around the world including the Near East, Africa, Europe, Mesoamerica, and North and South America. Emphasis is on the interpretation of material cultural remains in reconstructing past societies. ANTHR 2020 recommended. (Typically Offered: Spring)

ANTHR 3220: Peoples and Cultures of Native North America

(Dual-listed with ANTHR 5220). (Cross-listed with AMIN 3220).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2010 or AMIN 2100

Origin, distribution, and pre-contact life of the indigenous peoples of North America. Survey of culture areas; language families, social and political systems, ecological and economic adaptations, religion and spirituality; impact of European contact; cultural resilience and revitalization in contemporary American Indian life. Meets U.S. Diversity Requirement.

ANTHR 3230A: Latin American Anthropology: Violence and Memory

(Dual-listed with ANTHR 5230A). (Cross-listed with USLS 3230A).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered. ANTHR 2010 or ANTHR 3060 recommended. Meets International Perspectives Requirement. (Typically Offered: Spring)

ANTHR 3230B: Latin American Anthropology: Social movements and Democracy

(Cross-listed with USLS 3230B).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered. ANTHR 2010 or ANTHR 3060 recommended. Meets International Perspectives Requirement. (Typically Offered: Spring)

ANTHR 3230C: Latin American Anthropology: Race, Class and Gender

(Cross-listed with USLS 3230C).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered. ANTHR 2010 or ANTHR 3060 recommended. Meets International Perspectives Requirement. (Typically Offered: Spring)

ANTHR 3230D: Latin American Anthropology: Regional Focus

(Cross-listed with USLS 3230D).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered. ANTHR 2010 or ANTHR 3060 recommended. Meets International Perspectives Requirement. (Typically Offered: Spring)

ANTHR 3230E: Latin American Anthropology: Culture and Sport

(Dual-listed with ANTHR 5230E). (Cross-listed with USLS 3230E).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered. ANTHR 2010 or ANTHR 3060 recommended. Meets International Perspectives Requirement.

ANTHR 3240: Health and Native American Communities

(Cross-listed with AMIN 3240).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Overview of historic and contemporary health and health care in Native Communities. Indian Health Service and specific regulations. Consideration of both cultural and scientific approaches to medicine. Specific health issues (e.g., diabetes, alcoholism, depression, etc.) in American Indian communities. Meets U.S. Diversity Requirement.

ANTHR 3280: Archaeological Discovery and Analysis

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Repeatable, maximum of 9 credits.

Prereq: ANTHR 3080

Identification, analysis, and interpretation of animal bones recovered from archaeological sites, emphasizing taphonomy, paleoecology, and faunal exploitation. (Typically Offered: Spring)

ANTHR 3320A: Current Issues in Native North America: Gender and Family

(Dual-listed with AMIN 5320A/ ANTHR 5320A). (Cross-listed with AMIN 3320A).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2010 or ANTHR 3060

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. ANTHR 3220 or AMIN 2100 recommended. Graduation Restriction: Only 9 credits of ANTHR/AMIN 3320A, 3320B, 3320C, 3320D may count toward graduation.

ANTHR 3320B: Current Issues in Native North America: Indigenous Ecologies and Geographies

(Dual-listed with AMIN 5320B/ ANTHR 5320B). (Cross-listed with AMIN 3320B).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2010 or ANTHR 3060

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. ANTHR 3220 or AMIN 2100 recommended. Graduation Restriction: Only 9 credits of ANTHR/AMIN 3320A, 3320B, 3320C, 3320D may count toward graduation.

ANTHR 3320C: Current Issues in Native North America: Cultural and Political Movements

(Dual-listed with AMIN 5320C/ ANTHR 5320C). (Cross-listed with AMIN 3320C).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2010 or ANTHR 3060

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. ANTHR 3220 or AMIN 2100 recommended. Graduation Restriction: Only 9 credits of ANTHR/AMIN 3320A, 3320B, 3320C, 3320D may count toward graduation.

ANTHR 3320D: Current Issues in Native North America: Regional Focus

(Dual-listed with AMIN 5320D/ ANTHR 5320D). (Cross-listed with AMIN 3320D).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2010 or ANTHR 3060

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. ANTHR 3220 or AMIN 2100 recommended. Graduation Restriction: Only 9 credits of ANTHR/AMIN 3320A, 3320B, 3320C, 3320D may count toward graduation.

ANTHR 3350: Anthropology of the Middle East

Credits: 3. Contact Hours: Lecture 3.

Introduction to ethnographic studies of the Middle East by drawing primarily on the lens of anthropologists who use anthropological methods to investigate issues of social, historical, and political relevance in the Middle East. The course will enable students to develop critical tools for studying diverse aspects of Middle Eastern experiences. Potential topics include: gender, religion and sectarianism, state and infrastructure, health, humanitarianism and displacement, popular culture. ANTHR 2010 or ANTHR 3060 recommended. Meets International Perspectives Requirement.

ANTHR 3360: Culture and Capitalism

(Dual-listed with ANTHR 5360).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2010 or ANTHR 3060

Cross-cultural analysis of current development practices from an anthropological perspective; focus on international aid, development institutions, agrarian reform, indigenous knowledge, humanitarianism and human rights; introduction to main theories of political and economic anthropology. Offered odd-numbered years. Meets International Perspectives Requirement. (Typically Offered: Fall)

ANTHR 3400: Magic, Witchcraft, and Religion

(Dual-listed with ANTHR 5400/ RELIG 5400). (Cross-listed with RELIG 3400).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2010 or ANTHR 3060

Survey of global religious belief and practice from an anthropological perspective. Emphasis on myth and ritual, shamanism, magic, witchcraft, beliefs in spirits, conceptions of the soul, mind and body relationships, and healing and therapeutic practices. Discussion of religious response to dramatic political and social change; effects of globalization on religious practice. Meets International Perspectives Requirement. (Typically Offered: Spring)

ANTHR 3420: Culture, Sex, and Gender

(Cross-listed with WGS 3420).

Credits: 3. Contact Hours: Lecture 3.

Cross-cultural examination of gender and sexuality. Emphasis on global and transnational perspectives. Topics will include varied gender and sexual expressions, status and roles, intersectionality in global or transnational contexts, and the examination of systems of oppression cross-culturally. ANTHR 2010 or WGS 2010 recommended. Meets International Perspectives Requirement. (Typically Offered: Spring)

ANTHR 3540: War and the Politics of Humanitarianism

(Cross-listed with POLS 3540).

Credits: 3. Contact Hours: Lecture 3.

Humanitarianism as a system of thought and a system of intervention in conflict and post-conflict situations. Role of humanitarian organizations and actors in addressing human suffering caused by conflict or war. Military action as a form of humanitarian intervention. Meets International Perspectives Requirement.

ANTHR 3550: Understanding Sub-Saharan Africa

(Cross-listed with AFAM 3550).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Survey of economic, social, political and historical processes that have shaped representations of Africa and Africans. Topics include colonialism, globalization, gender and LGBTQ rights, conflict and representations in Western media. Offered even-numbered years. Meets International Perspectives Requirement. (Typically Offered: Spring)

ANTHR 3690: Ancient Egypt

(Cross-listed with CLST 3690).

Credits: 3. Contact Hours: Lecture 3.

Archaeology and culture of Ancient Egypt from prehistory to Late Antiquity. Exploration of literature, religion, social history, government, and architecture. Discussion of major archaeological sites and methods; examination of interaction with other ancient near eastern and Mediterranean civilizations. Meets International Perspectives Requirement.

ANTHR 3760A: Classical Archeology: Bronze Age and Early Iron Age Greece

(Cross-listed with CLST 3760A).

Credits: 3. Contact Hours: Lecture 3.

An examination of the material culture of Bronze Age and Early Iron Age Greece (ca 3000-700 BCE) and the role of archaeological context in understanding the varied aspects of the cultures that flourished in the region. Primary focus on the urbanized palatial centers that emerged on the island of Crete (Minoan) and in mainland Greece (Mycenaean). Topics include the emergence of social complexity, cultural and technological changes, religious systems, and methods of interpretation. Meets International Perspectives Requirement.

ANTHR 3760B: Classical Archeology: Archaic through Hellenistic Greece (ca 700-30 BCE)

(Cross-listed with CLST 3760B).

Credits: 3. Contact Hours: Lecture 3.

An examination of the material culture of ancient Greece from ca. 700-30 BCE and the role of archaeological context in understanding the varied aspects of Greek culture found in cities, rural areas, and sanctuaries during the Archaic, Classical, and Hellenistic periods. Topics include urbanization and the rise of the polis, sanctuaries and their offerings, engagement with the wider Mediterranean, and developments in the ways that the Greeks conceptualized and represented their world. Meets International Perspectives Requirement.

ANTHR 3760C: Classical Archaeology: Roman Archaeology (ca 1000 BCE-400 CE)

(Cross-listed with CLST 3760C).

Credits: 3. Contact Hours: Lecture 3.

An examination of major developments in architecture, sculpture, painting, and other arts of the ancient Roman world and the role of archaeological context in understanding various aspects of Roman culture. Topics include art in the service of social ideology and political propaganda; interactions between the Etruscans, Greeks, and Romans; and the relationship between Rome and its provinces. Meets International Perspectives Requirement.

ANTHR 3890: Exhibiting Religion

(Cross-listed with RELIG 3890).

Credits: 3. Contact Hours: Lecture 3.

Display of religion in museums, fairs, and exhibitions. History and ethics of museum collecting, storage, display, public engagement, and repatriation. Visit local museums and explore digital galleries.

ANTHR 4110: Anthropology in Professional Applications

(Dual-listed with ANTHR 5110).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 2010 or ANTHR 3060

An introduction to the diverse professional applications of Anthropology beyond academic careers. Explores professional opportunities for anthropologists. Introduces special skills needed for these applications. Prepares students for diverse opportunities after graduation. Meets International Perspectives Requirement. (Typically Offered: Fall)

ANTHR 4190A: Topics in Cultural Anthropology: Theory

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 3060

In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. Graduation Restriction: No more than 9 credits of ANTHR 4190 courses may be applied towards graduation.

ANTHR 4190B: Topics in Cultural Anthropology: Methods

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 3060

In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. Graduation Restriction: No more than 9 credits of ANTHR 4190 courses may be applied towards graduation.

ANTHR 4190C: Topics in Cultural Anthropology: Regional Focus

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 3060

In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. Graduation Restriction: No more than 9 credits of ANTHR 4190 courses may be applied towards graduation.

ANTHR 4190D: Topics in Cultural Anthropology: Others

Credits: 3. Contact Hours: Lecture 3.

Prereq: ANTHR 3060

In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. Graduation Restriction: No more than 9 credits of ANTHR 4190 courses may be applied towards graduation.

ANTHR 4240: Forensic Anthropology

(Dual-listed with ANTHR 5240).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: ANTHR 2020 or ANTHR 3070

Comprehensive study of forensic anthropology, a specialized subfield of biological anthropology. Emphasis is placed on personal identifications from extremely fragmentary, comingled, burnt, cremated and incomplete skeletal remains. All parameters of forensic study are included as they pertain to anthropology, including human variation, taphonomy, entomology, archaeology, pathology, epidemiology; genetics and the non-biological forensic disciplines. An appreciation for the wide range of medicolegal and bioethical issues will also be gained. ANTHR 3190 recommended. Offered irregularly. (Typically Offered: Spring)

ANTHR 4250: Professional Preparation in Anthropology

Credits: 1. Contact Hours: Lecture 1.

Instruction and guidance in the development of professional skills needed for success in academic and non-academic anthropological careers. Topics will include strategies for internship and job searches, creating resumes and CVs, composing personal statements and cover letters, and developing contacts and sources. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

ANTHR 4290: Topics in Archaeological Laboratory Methods and Techniques: Archaeological Field School

(Dual-listed with ANTHR 5290).

Credits: 4-6.

Prereq: ANTHR 2020 or ANTHR 3080

Summer field school for training in archaeological reconnaissance and excavation techniques; documentation and interpretation of archaeological evidence. (Typically Offered: Summer)

ANTHR 4310: Ethnographic Methods

(Dual-listed with ANTHR 5310).

Credits: 3. Contact Hours: Lecture 3.

Hands-on training in ethnographic field methods; students will carry out research projects in socio-cultural anthropology, learning a variety of investigative research techniques commonly used in social sciences.

ANTHR 4340A: Internship: Archaeology

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Junior or Senior classification; Department Permission

Supervised practice in government agencies, museums, and business organizations. Graduation Restriction: Not more than 6 credits of internship experience may count towards the major. No credits in ANTHR 4340 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ANTHR 4340B: Internship: Cultural Anthropology

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Junior or Senior classification; Department Permission

Supervised practice in government agencies, museums, and business organizations. Graduation Restriction: Not more than 6 credits of internship experience may count towards the major. No credits in ANTHR 4340 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ANTHR 4340C: Internship: Biological Anthropology

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Junior or Senior classification; Department Permission

Supervised practice in government agencies, museums, and business organizations. Graduation Restriction: Not more than 6 credits of internship experience may count towards the major. No credits in ANTHR 4340 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ANTHR 4340D: Internship: Linguistic Anthropology

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Junior or Senior classification; Department Permission

Supervised practice in government agencies, museums, and business organizations. Graduation Restriction: Not more than 6 credits of internship experience may count towards the major. No credits in ANTHR 4340 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

ANTHR 4450: Biological Field School

(Dual-listed with ANTHR 5450).

Credits: 4-6.

Summer field school for training in behavioral and ecological methods for primatologists. Proposal, data collection and analyses, and presentation of research topic in primatology. (Typically Offered: Summer)

ANTHR 4500: Approaches in Anthropology

Credits: 3. Contact Hours: Lecture 3.

Examination of key approaches to anthropology and its interrelated sub-fields with a focus on major theoretical and analytical contributions. (Typically Offered: Fall)

ANTHR 4510A: Practicum in Anthropology: Archaeology

Credits: 1-3. Repeatable, maximum of 9 credits.

Prereq: ANTHR 2010 or ANTHR 2020 or ANTHR 3080; Permission of Instructor

Application of methods under actual laboratory and field conditions, including basic data management, synthesis, and analysis. (Typically Offered: Fall, Spring, Summer)

ANTHR 4510B: Practicum in Anthropology: Cultural Anthropology

Credits: 1-3. Repeatable, maximum of 9 credits.

Prereq: ANTHR 2010 or ANTHR 2020 or ANTHR 3080; Permission of Instructor

Application of methods under actual laboratory and field conditions, including basic data management, synthesis, and analysis. (Typically Offered: Fall, Spring, Summer)

ANTHR 4510C: Practicum in Anthropology: Biological Anthropology

Credits: 1-3. Repeatable, maximum of 9 credits.

Prereq: ANTHR 2010 or ANTHR 2020 or ANTHR 3080; Permission of Instructor

Application of methods under actual laboratory and field conditions, including basic data management, synthesis, and analysis. (Typically Offered: Fall, Spring, Summer)

ANTHR 4510D: Practicum in Anthropology: Linguistic Anthropology

Credits: 1-3. Repeatable, maximum of 9 credits.

Prereq: ANTHR 2010 or ANTHR 2020 or ANTHR 3080; Permission of Instructor

Application of methods under actual laboratory and field conditions, including basic data management, synthesis, and analysis. (Typically Offered: Fall, Spring, Summer)

ANTHR 4820A: Topics in Biological Anthropology: Paleoanthropology

(Dual-listed with ANTHR 5820A).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Prereq: ANTHR 3070

In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates. (Typically Offered: Fall)

ANTHR 4820B: Topics in Biological Anthropology: Primate Cognition

(Dual-listed with ANTHR 5820B).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Prereq: ANTHR 3070

In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates. (Typically Offered: Fall)

ANTHR 4820C: Topics in Biological Anthropology: Primate Conservation

(Dual-listed with ANTHR 5820C).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Prereq: ANTHR 3070

In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates. (Typically Offered: Fall)

ANTHR 4820D: Topics in Biological Anthropology: Population Genetics and Human Evolution

(Dual-listed with ANTHR 5820D).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Prereq: ANTHR 3070

In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates. (Typically Offered: Fall)

ANTHR 4900A: Independent Study: Archaeology

Credits: 1-5. Repeatable, maximum of 9 credits.

Prereq: 9 credits in ANTHR; Permission of Instructor

Graduation Restriction: No more than 9 credits of ANTHR 4900 may be counted toward graduation.

ANTHR 4900B: Independent Study: Cultural Anthropology

Credits: 1-5. Repeatable, maximum of 9 credits.

Prereq: 9 credits in ANTHR; Permission of Instructor

Graduation Restriction: No more than 9 credits of ANTHR 4900 may be counted toward graduation.

ANTHR 4900C: Independent Study: Biological Anthropology

Credits: 1-5. Repeatable, maximum of 9 credits.

Prereq: 9 credits in ANTHR; Permission of Instructor

Graduation Restriction: No more than 9 credits of ANTHR 4900 may be counted toward graduation.

ANTHR 4900D: Independent Study: Linguistic Anthropology

(Cross-listed with LING 4900D).

Credits: 1-5. Repeatable, maximum of 9 credits.

Prereq: 9 credits in ANTHR; Permission of Instructor

Graduation Restriction: No more than 9 credits of ANTHR 4900 may be counted toward graduation.

ANTHR 4900H: Independent Study: Honors

Credits: 1-5. Repeatable, maximum of 9 credits.

Prereq: 9 credits in ANTHR; Permission of Instructor

Graduation Restriction: No more than 9 credits of ANTHR 4900 may be counted toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

ANTHR 5030: Biological Anthropology and Archaeology

Credits: 3. Contact Hours: Lecture 3.

History of biological anthropology and archaeology, current developments and theoretical issues related to major events in human biocultural evolution and world prehistory.

ANTHR 5100: Theoretical Dimensions of Cultural Anthropology

Credits: 3. Contact Hours: Lecture 3.

Survey of historical and current developments in topical and theoretical approaches to sociocultural anthropology. Examination and assessment of controversies; new research directions and theoretical approaches. (Typically Offered: Fall)

ANTHR 5110: Anthropology in Professional Applications

(Dual-listed with ANTHR 4110).

Credits: 3. Contact Hours: Lecture 3.

An introduction to the diverse professional applications of Anthropology beyond academic careers. Explores professional opportunities for anthropologists. Introduces special skills needed for these applications.

Prepares students for diverse opportunities after graduation. Meets International Perspectives Requirement. (Typically Offered: Fall)

ANTHR 5130: Kinship and Marriage in a Global Perspective

(Dual-listed with ANTHR 3130).

Credits: 3. Contact Hours: Lecture 3.

Comparative and historical overview of the family, marriage and kinship. Examination of cross-cultural differences in the construction and functioning of family and kin relations; role of kinship in structuring individual and collective activities; current critical and theoretical issues in kinship studies, especially integrating work on gender and sexuality. ANTHR 2010 recommended. Meets International Perspectives Requirement. (Typically Offered: Spring)

ANTHR 5150: Archaeology of North America

(Dual-listed with AMIN 3150/ ANTHR 3150).

Credits: 3. Contact Hours: Lecture 3.

Prehistory and early history of North America as reconstructed from archaeological evidence; peopling of the New World; culture- historical sequences of major culture areas; linkages of archaeological traditions with selected ethnohistorically known Native American groups. (Typically Offered: Spring)

ANTHR 5190: Skeletal Biology

(Dual-listed with ANTHR 3190).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Comprehensive study of the skeletal anatomy, physiology, genetics, growth, development and population variation of the human skeleton. Applications to forensic anthropology, paleopathology and bioarchaeology are introduced. (Typically Offered: Spring)

ANTHR 5200: Great Plains Archaeology

(Dual-listed with AMIN 3200/ ANTHR 3200).

Credits: 3. Contact Hours: Lecture 3.

Prehistoric societies of the Great Plains region of North America, from initial occupation to European contact; emphasis on sociocultural changes, continuities, and adaptations to changing environments using archaeological, ecological, ethnographic information. (Typically Offered: Fall)

ANTHR 5210: World Prehistory

(Dual-listed with ANTHR 3210).

Credits: 3. Contact Hours: Lecture 3.

An introduction to archaeological sites from around the world including the Near East, Africa, Europe, Mesoamerica, and North and South America. Emphasis is on the interpretation of material cultural remains in reconstructing past societies. ANTHR 2020 recommended. (Typically Offered: Spring)

ANTHR 5220: Peoples and Cultures of Native North America

(Dual-listed with AMIN 3220/ ANTHR 3220).

Credits: 3. Contact Hours: Lecture 3.

Origin, distribution, and pre-contact life of the indigenous peoples of North America. Survey of culture areas; language families, social and political systems, ecological and economic adaptations, religion and spirituality; impact of European contact; cultural resilience and revitalization in contemporary American Indian life. Meets U.S. Diversity Requirement.

ANTHR 5230A: Latin American Anthropology: Violence and Memory

(Dual-listed with ANTHR 3230A/ USLS 3230A).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered. ANTHR 2010 or ANTHR 3060 recommended. Meets International Perspectives Requirement. (Typically Offered: Spring)

ANTHR 5230B: Latin American Anthropology: Social movements and Democracy

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered. ANTHR 2010 or ANTHR 3060 recommended. Meets International Perspectives Requirement. (Typically Offered: Spring)

ANTHR 5230C: Latin American Anthropology: Race, Class and Gender

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered. ANTHR 2010 or ANTHR 3060 recommended. Meets International Perspectives Requirement. (Typically Offered: Spring)

ANTHR 5230D: Latin American Anthropology: Regional Focus

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered. ANTHR 2010 or ANTHR 3060 recommended. Meets International Perspectives Requirement. (Typically Offered: Spring)

ANTHR 5230E: Latin American Anthropology: Culture and Sport

(Dual-listed with ANTHR 3230E/ USLS 3230E).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered. ANTHR 2010 or ANTHR 3060 recommended. Meets International Perspectives Requirement.

ANTHR 5240: Forensic Anthropology

(Dual-listed with ANTHR 4240).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Comprehensive study of forensic anthropology, a specialized subfield of biological anthropology. Emphasis is placed on personal identifications from extremely fragmentary, comingled, burnt, cremated and incomplete skeletal remains. All parameters of forensic study are included as they pertain to anthropology, including human variation, taphonomy, entomology, archaeology, pathology, epidemiology; genetics and the non-biological forensic disciplines. An appreciation for the wide range of medicolegal and bioethical issues will also be gained. ANTHR 3190 recommend Offered irregularly. (Typically Offered: Spring)

ANTHR 5290: Archaeological Field School

(Dual-listed with ANTHR 4290).

Credits: 4-6.

Summer field school for training in archaeological reconnaissance and excavation techniques; documentation and interpretation of archaeological evidence. (Typically Offered: Summer)

ANTHR 5310: Ethnographic Methods

(Dual-listed with ANTHR 4310).

Credits: 3. Contact Hours: Lecture 3.

Hands-on training in ethnographic field methods; students will carry out research projects in socio-cultural anthropology, learning a variety of investigative research techniques commonly used in social sciences.

ANTHR 5320A: Current Issues in Native North America: Gender and Family

(Dual-listed with AMIN 3320A/ ANTHR 3320A). (Cross-listed with AMIN 5320A).

Credits: 3. Contact Hours: Lecture 3.

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. ANTHR 3220 or AMIN 2100 recommended. Graduation Restriction: Only 9 credits of ANTHR/AMIN 3320A, 3320B, 3320C, 3320D may count toward graduation.

ANTHR 5320B: Current Issues in Native North America: Indigenous Ecologies and Geographies

(Dual-listed with AMIN 3320B/ ANTHR 3320B). (Cross-listed with AMIN 5320B).

Credits: 3. Contact Hours: Lecture 3.

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. ANTHR 3220 or AMIN 2100 recommended. Graduation Restriction: Only 9 credits of ANTHR/AMIN 3320A, 3320B, 3320C, 3320D may count toward graduation.

ANTHR 5320C: Current Issues in Native North America: Cultural and Political Movements

(Dual-listed with AMIN 3320C/ ANTHR 3320C). (Cross-listed with AMIN 5320C).

Credits: 3. Contact Hours: Lecture 3.

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. ANTHR 3220 or AMIN 2100 recommended. Graduation Restriction: Only 9 credits of ANTHR/AMIN 3320A, 3320B, 3320C, 3320D may count toward graduation.

ANTHR 5320D: Current Issues in Native North America: Regional Focus

(Dual-listed with AMIN 3320D/ ANTHR 3320D). (Cross-listed with AMIN 5320D).

Credits: 3. Contact Hours: Lecture 3.

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. ANTHR 3220 or AMIN 2100 recommended. Graduation Restriction: Only 9 credits of ANTHR/AMIN 3320A, 3320B, 3320C, 3320D may count toward graduation.

ANTHR 5360: Culture and Capitalism

(Dual-listed with ANTHR 3360).

Credits: 3. Contact Hours: Lecture 3.

Cross-cultural analysis of current development practices from an anthropological perspective; focus on international aid, development institutions, agrarian reform, indigenous knowledge, humanitarianism and human rights; introduction to main theories of political and economic anthropology. Offered odd-numbered years. (Typically Offered: Fall)

ANTHR 5400: Magic, Witchcraft, and Religion

(Dual-listed with ANTHR 3400/ RELIG 3400). (Cross-listed with RELIG 5400).

Credits: 3. Contact Hours: Lecture 3.

Survey of global religious belief and practice from an anthropological perspective. Emphasis on myth and ritual, shamanism, magic, witchcraft, beliefs in spirits, conceptions of the soul, mind and body relationships, and healing and therapeutic practices. Discussion of religious response to dramatic political and social change; effects of globalization on religious practice. Meets International Perspectives Requirement. (Typically Offered: Spring)

ANTHR 5410: Seminar in Forensic Sciences

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Seminars by professional criminalists, research scientists, Certificate students, and educators. Emphasis on opportunities for research and development, citizen involvement, and educational outreach related to forensic science. Weekly report required. (Typically Offered: Spring)

ANTHR 5420: Independent Research and Presentation in Forensic Science

Credits: 1.

Research topic approved by course instructor. Written and oral reports required. Oral report given in forensics seminar, CHEM 5400. (Typically Offered: Spring)

ANTHR 5450: Biological Field School

(Dual-listed with ANTHR 4450).

Credits: 4-6.

Summer field school for training in behavioral and ecological methods for primatologists. Proposal, data collection and analyses, and presentation of research topic in primatology. (Typically Offered: Summer)

ANTHR 5820A: Topics in Biological Anthropology: Paleoanthropology

(Dual-listed with ANTHR 4820A).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates. (Typically Offered: Fall)

ANTHR 5820B: Topics in Biological Anthropology: Primate Cognition
(Dual-listed with ANTHR 4820B).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates. (Typically Offered: Fall)

ANTHR 5820C: Topics in Biological Anthropology: Primate Conservation
(Dual-listed with ANTHR 4820C).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates. (Typically Offered: Fall)

ANTHR 5820D: Topics in Biological Anthropology: Population Genetics and Human Evolution
(Dual-listed with ANTHR 4820D).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates. (Typically Offered: Fall)

ANTHR 5910: Orientation to Anthropology

Credits: 1. Contact Hours: Lecture 1.

Introduction to the Anthropology program, including the requirements for successful degree completion, department administrative procedures, ethics in anthropology and current trends in the four subfields of anthropology. Required of graduate students. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

ANTHR 5990: Creative Component

Credits: 1-5. Repeatable, maximum of 5 credits.

Prereq: Instructor Permission for Course

Individually directed study applying anthropological methods and theory to a practical research problem; for students electing the nonthesis degree option. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:

ANTHR 6100: Foundations of Sustainable Agriculture

(Cross-listed with ABE 6100/ AGRON 6100/ SUSAG 6100/ SOC 6100).

Credits: 3. Contact Hours: Lecture 3.

Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts. (Typically Offered: Fall)

ANTHR 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Apparel, Events, and Hospitality Management (AESHM)

Courses primarily for undergraduates:

AESHM 1110: Professional Development for AESHM

Credits: 1. Contact Hours: Lecture 1.

Introduction to professional experiences within AESHM and CHS Career Services including CyHire. Coursework includes resume development, daily habits for success including stress management, intrapersonal skills with a wellness focus, interpersonal skills and leadership, business etiquette, and professional ethics. (Typically Offered: Fall, Spring)

AESHM 1110L: AESHM Program Orientation and Learning Community

Credits: 1. Contact Hours: Laboratory 2.

Orientation to policies and procedures of department and program.

Overview of major and minor options, including entrepreneurship.

Exploration of undergraduate research, independent studies, study abroad, and field studies. Coverage of goal setting, curriculum planning, degree audits, and registration. Peer mentor interaction in academic, extracurricular, and service learning arranged component. (Typically Offered: Fall, Spring)

AESHM 1700D: Supervised Work Experience I: Hospitality

Credits: 1. Repeatable, maximum of 2 times.

Prereq: Academic Advisor Permission for Course

Supervised work experience with a cooperating firm or organization.

Employer/experience for AESHM 4700 or HSPM 4700 should be different from employer/experience used for AESHM 1700 and AESHM 2700.

Graduation Restriction: No more than 12 credits total from AESHM

1700, 2700, and 4700 may be applied toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AESHM 1700F: Supervised Work Experience I: Event Management

Credits: 1. Repeatable, maximum of 2 times.

Prereq: Academic Advisor Permission for Course

Supervised work experience with a cooperating firm or organization. Employer/experience for AESHM 4700 or HSPM 4700 should be different from employer/experience used for AESHM 1700 and AESHM 2700. Graduation Restriction: No more than 12 credits total from AESHM 1700, 2700, and 4700 may be applied toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AESHM 1700N: Supervised Work Experience I: Apparel

Credits: 1. Repeatable, maximum of 2 times.

Prereq: Advisor permission required; freshman classification

Supervised work experience with a cooperating firm or organization. Employer/experience for AESHM 4700 or HSPM 4700 should be different from employer/experience used for AESHM 1700 and AESHM 2700. Graduation Restriction: No more than 12 credits total from AESHM 1700, 2700, and 4700 may be applied toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AESHM 1750D: Financial Applications for Retail and Hospitality**Industries: Hospitality Management**

Credits: 2. Contact Hours: Lecture 2.

Using an online delivery method, students will learn basic mathematical concepts, calculations and formulas commonly used in the apparel and hospitality industries. Emphasis on problem solving, critical/creative thinking, and mathematical interpretation of calculations and formulas used within the hospitality industries. (Typically Offered: Spring)

AESHM 1750N: Financial Applications for Retail and Hospitality**Industries: Retail Merchandising**

Credits: 2. Repeatable.

Using an online delivery method, students will learn basic mathematical concepts, calculations and formulas commonly used in the apparel and hospitality industries. Emphasis on problem solving, critical/creative thinking, and mathematical interpretation of calculations and formulas used within the apparel industries. (Typically Offered: Fall, Spring, Summer)

AESHM 1800E: First Year Student Field Study: Hospitality and Event Management

Credits: 1-2. Contact Hours: Lecture 2.5, Laboratory 0.

Repeatable, maximum of 2 times.

Prereq: Instructor Permission for Course

Study of and tours of regional areas of interest to majors in the HSPM and EVENT majors. Trip to regional location under supervision of faculty member. Locations vary. Journal entries and final report/analysis are required. Cost associated with trip. (Typically Offered: Fall, Spring)

AESHM 1800N: First Year Student Field Study: Apparel, Merchandising, and Design

Credits: 1-2. Contact Hours: Lecture 2.

Repeatable, maximum of 2 times.

Prereq: Instructor Permission for Course

Study of and tours of regional areas of interest to AMD majors. Trip to regional location under supervision of faculty member. Locations vary. Journal entries and final report/analysis are required. Cost associated with trip. (Typically Offered: Fall, Spring)

AESHM 2110: Leadership Experiences and Development (LEAD)

Credits: 3. Contact Hours: Lecture 3.

Introduction to leadership behaviors. Development and utilization of leadership behaviors to positively impact school life, community life, and work life. (Typically Offered: Fall, Spring)

AESHM 2220: Creativity on Demand

Credits: 3. Contact Hours: Lecture 3.

Learn to use creativity strategies to solve everyday problems related to personal and professional lives. Application of creative thinking techniques to view things from different perspectives; identify unique opportunities; and generate and evaluate original ideas. Offered even-numbered years. (Typically Offered: Spring)

AESHM 2380: Human Resource Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 2750 or AESHM 2700, or AESHM 2870 or concurrent enrollment; sophomore classification

Principles and practices of human resource management relevant to human science-related organizations. Emphasis on the entry-level manager's role. (Typically Offered: Fall, Spring)

AESHM 2700D: Supervised Work Experience II: Hospitality

Credits: 1-2. Repeatable, maximum of 2 times.

Supervised work experience with a cooperating firm or organization.

Employer/experience for AESHM 4700 or HSPM 4700 should be different from employer/experience used for AESHM 1700 and AESHM 2700.

Graduation Restriction: No more than 12 credits total from AESHM 1700, 2700, and 4700 may be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

AESHM 2700F: Supervised Work Experience II: Event Management

Credits: 1-2. Repeatable, maximum of 2 times.

Supervised work experience with a cooperating firm or organization.

Employer/experience for AESHM 4700 or HSPM 4700 should be different from employer/experience used for AESHM 1700 and AESHM 2700.

Graduation Restriction: No more than 12 credits total from AESHM 1700, 2700, and 4700 may be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

AESHM 2700N: Supervised Work Experience II: Apparel

Credits: 1-2. Repeatable, maximum of 2 times.

Supervised work experience with a cooperating firm or organization.

Employer/experience for AESHM 4700 or HSPM 4700 should be different from employer/experience used for AESHM 1700 and AESHM 2700.

Graduation Restriction: No more than 12 credits total from AESHM 1700, 2700, and 4700 may be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

AESHM 2720: Fashion Show Production and Promotion

Credits: 2-3. Contact Hours: Lecture 3, Laboratory 2.

Repeatable, maximum of 5 credits.

Prereq: Instructor Permission for Course

Planning and production of fashion show including developing budgets, public relations, advertising, fund-raising, choreography, staging, lighting, and food. Promotion of fashion show and similar events. Permission by application. Graduation Restriction: Maximum of 5 credits can be applied to graduation. (Typically Offered: Fall, Spring)

AESHM 2800: Orientation to U.S. Field Study

Credits: Required. Contact Hours: Lecture 1.

Repeatable, maximum of 2 times.

Orientation to the field study location during the semester preceding the trip. (Typically Offered: Fall, Spring)

AESHM 2810: Orientation to International Field Study

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 2 times.

Orientation to the field study location during the semester preceding the trip. (Typically Offered: Fall, Spring, Summer)

AESHM 2870: Principles of Management in Human Sciences

Credits: 3. Contact Hours: Lecture 3.

Introduction to management concepts and principles with application to human sciences-related businesses and organizations. Includes service quality management, professionalism, and social responsibility. (Typically Offered: Fall, Spring)

AESHM 3110E: Seminar on Careers and Internships: Event Management and Hospitality Management

Credits: 1. Contact Hours: Lecture 1.

Prereq: AESHM 1110; Sophomore classification

Internship and career planning, professional expectations and responsibilities. Resume development, business letters/professional correspondence, interviewing techniques, and business etiquette. (Typically Offered: Fall, Spring)

AESHM 3110N: Seminar on Careers and Internships: Apparel, Merchandising, and Design

Credits: 1. Contact Hours: Lecture 1.

Prereq: AESHM 1110; Sophomore classification

Internship and career planning, professional expectations and responsibilities. Resume development, cover letters, interviewing techniques, and business etiquette. (Typically Offered: Fall, Spring)

AESHM 3400: Hospitality and Apparel Marketing Strategies

Credits: 3. Contact Hours: Lecture 3.

Application of marketing principles to the hospitality-, events-, and apparel-related industries. Emphasis on the role of marketing in an organization's overall strategic planning. Development and evaluation techniques available to hospitality, events, apparel, and related businesses, including advertising, sales promotion, packaging, and public relations. (Typically Offered: Fall, Spring)

AESHM 3420: Aesthetics of Consumer Experience

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Design principles, aesthetic concepts, and research applied to consumer experiences, with an emphasis on hospitality and retail environments and events. Influence of individual differences and cultural patterns on aesthetic preferences. (Typically Offered: Fall, Spring)

AESHM 3450X: Retail/Hospitality Experiences & Events

Credits: 1-3. Contact Hours: Lecture 3.

Survey course of retail and hospitality events. Production and execution of retail and hospitality events in the Student Innovation Center.

AESHM 3650: Event, Hospitality, and Retail Risk Management

Credits: 3. Contact Hours: Lecture 3.

Overview and management of hazards and risks in the planning, design, operation, and evaluation stages of events, hospitality organizations, and apparel/retail environments. (Typically Offered: Summer)

AESHM 3800D: U.S. Field Study: Hospitality Management

Credits: 1-3. Repeatable, maximum of 3 credits.

Study and tours of areas of interest to majors in the Hospitality Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2800. Permission by application. (Typically Offered: Fall, Spring, Summer)

AESHM 3800F: U.S. Field Study: Event Management

Credits: 1-3. Repeatable, maximum of 3 credits.

Study and tours of areas of interest to majors in the Event Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2800. Permission by application. (Typically Offered: Fall, Spring, Summer)

AESHM 3800N: U.S. Field Study: Apparel, Merchandising, and Design

Credits: 1-3. Repeatable, maximum of 3 credits.

Prereq: AESHM 2800 or concurrent enrollment; permission of instructor

Study and tours of areas of interest to majors in the Apparel, Merchandising, and Design program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2800. Permission by application. (Typically Offered: Fall, Spring, Summer)

AESHM 3810D: International Field Study: Hospitality Management

Credits: 1-3. Repeatable.

Prereq: AESHM 2810 or concurrent enrollment; Instructor permission

Study and tours of areas of interest to majors in the Hospitality Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2810. Permission by application. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

AESHM 3810F: International Field Study: Event Management

Credits: 1-3. Repeatable.

Prereq: AESHM 2810 or concurrent enrollment; Instructor permission

Study and tours of areas of interest to majors in the Event Management major. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2810. Permission by application. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

AESHM 3810N: International Field Study: Apparel, Merchandising, and Design

Credits: 1-3. Repeatable, maximum of 3 times.

Prereq: AESHM 2810 or concurrent enrollment; Instructor permission

Study and tours of areas of interest to majors in the Apparel, Merchandising, and Design major. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2810. Permission by application. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

AESHM 3980: Cooperative Education

Credits: Required. Repeatable.

Prereq: Permission of Advisor; Junior classification

Required of all cooperative education students seeking full-time status. Students register for this course prior to commencing each work period. (Typically Offered: Fall, Spring, Summer)

AESHM 4210: Developing Global Leadership: Maximizing Human Potential

Credits: 3. Contact Hours: Lecture 3.

Development of leadership in a global environment. Focus on global concerns that impact on the well-being of individuals, families, and communities. Strategies for working with individuals, families and communities in other countries and cultures. Taking local action on global issues. Participation in a service activity. Meets International Perspectives Requirement. (Typically Offered: Spring)

AESHM 4620X: Black Lives Matter: Fashion, Politics, and Resistance Movements

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 1650 or Permission of Instructor

Use historical and cultural methods to examine the history of the Black Lives Matter movement its relationship to past resistance/activist movements and fashion and appearance. Summarize and evaluate literature on Black activism and Black identity. Plan and develop a public exhibition and opening event. Offered even-numbered years. Meets U.S. Diversity Requirement. (Typically Offered: Spring)

AESHM 4700F: Supervised Professional Internship: Event Management

Credits: 3-6. Repeatable.

Prereq: Permission by application; Junior classification

Supervised and structured practical industry work experience with a cooperating firm or organization. Employer/experience for AESHM 4700 or HSPM 4700 should be different from employer/experience used for AESHM 1700 and AESHM 2700. This course is offered for a grade. Graduation Restriction: Maximum number of credits given in a semester is 6. No more than 12 credits from AESHM 1700, 2700, and 4700 may be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

AESHM 4700MX: Supervised Professional Internship: Apparel (Out-of-state)

Credits: 3-6. Repeatable, maximum of 12 credits.

Prereq: AESHM 3110, 9 credits in AMD, minimum 2.0 GPA, permission by application; junior or senior classification; employer/experience should be different than employer/experience for AESHM 1700 and 2700.

Supervised work experience with a cooperating firm or organization. Graduation Restrictions: No more than 12 credits from AESHM 1700, 2700, and 4700 may be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

AESHM 4700N: Supervised Professional Internship: Apparel

Credits: 3-6. Repeatable.

Prereq: Instructor Permission for Course

Supervised work experience with a cooperating firm or organization. Employer/experience for AESHM 4700 or HSPM 4700 should be different from employer/experience used for AESHM 1700 and AESHM 2700. Graduation Restriction: No more than 12 credits total from AESHM 1700, 2700, and 4700 may be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

AESHM 4720: Fashion Show Management

Credits: 2-3. Contact Hours: Lecture 2, Laboratory 2.

Repeatable, maximum of 5 credits.

Prereq: Instructor Permission for Course

Provide leadership and communicate direction for planning and production of fashion show, including developing budgets, publicity, advertising, fundraising, choreography, staging, lighting, and food. Graduation Restriction: Maximum of 5 credits can be applied to graduation. (Typically Offered: Fall, Spring)

AESHM 4740: Entrepreneurship in Human Sciences

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 2750 or AESHM 2870 or ACCT 2840 or 3 cr in MKT or permission of instructor

Comprehensive approach to entrepreneurship including concepts of innovation, creativity, opportunity assessment, and business planning. Focus on human sciences-related businesses: retail, service, hospitality, event, food-related, family-owned, rural, and community businesses. Interaction with entrepreneurs, market research, feasibility analysis, business proposals, and business/community outreach and consulting. (Typically Offered: Fall, Spring)

AESHM 4790X: Data Analytics for Apparel, Events, and Hospitality Management

Credits: 3. Contact Hours: Lecture 3.

Introduction to business analytics concepts and techniques in retail business including fashion, hospitality, and event. Offers opportunities to learn basic hands-on data analytics methods for data summarization, analysis, visualization, and interpretation. (Typically Offered: Fall)

AESHM 4900H: Independent Study: Honors

Credits: 2-4.

Prereq: Instructor Permission for Course

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AESHM 4970: Cooperative Education

Credits: Required. Contact Hours: Lecture 1.

Repeatable.

Prereq: Permission of advisor; Senior or Graduate classification

Required of cooperative education students. Students must register for this course prior to commencing each work period. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

AESHM 5010: Introduction to Scholarly Research for Graduate Students

Credits: Required.

Focus on the basics of developing scholarly research, including definition and purpose of research and the components of research reporting. Emphasis on standards for each section of research reports. Tips for research reporting and processes of research development. An introduction to ethical standards. Required of all new AESHM graduate students. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AESHM 5020: Research Methods in Apparel, Events, and Hospitality

Credits: 3. Contact Hours: Lecture 3.

Overview of research methods for qualitative, quantitative, and mixed methods. Topics include philosophical worldviews, the use of theory, and different research approach, design, methodologies, and procedures. (Typically Offered: Summer)

AESHM 5100: Quantitative Research Methods in Apparel, Events, and Hospitality

Credits: 3. Contact Hours: Lecture 3.

Overview of quantitative research methods in apparel and hospitality fields. Topics include types of quantitative research design, sampling design, measurement, validity issues, power and precision analysis, methods of data gathering and analysis techniques, and interpretation of statistical results. Use of statistical packages. Development of research plan. Offered odd-numbered years. (Typically Offered: Spring, Summer)

AESHM 5110: Seminar

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 times.

Discussion of scholarship and current issues. Topics vary.

AESHM 5120: Qualitative Research Methods in Apparel, Events, and Hospitality

Credits: 3. Contact Hours: Lecture 3.5.

Introduction to and hands-on experiences with a variety of qualitative research methods specific to apparel, events and hospitality research. Students will develop skills at research design, data, collection, analysis, and write-up for qualitative inquiry. Offered even-numbered years. (Typically Offered: Summer)

AESHM 5700A: Apparel Merchandising and Design

Credits: 1-3. Repeatable, maximum of 2 times.

Supervised experience related to career objective. Proposal must be approved semester before placement. (Typically Offered: Fall, Spring, Summer)

AESHM 5700B: Hospitality Management

Credits: 1-3. Repeatable, maximum of 2 times.

Supervised experience related to career objective. Proposal must be approved semester before placement. (Typically Offered: Fall, Spring, Summer)

AESHM 5740: Entrepreneurship in Human Sciences

Credits: 3. Contact Hours: Lecture 3.

Comprehensive approach to entrepreneurship including concepts of innovation, creativity, opportunity assessment, and business planning. Focus on human sciences-related businesses: retail, service, hospitality, event, food-related, family-owned, rural, and community businesses. Interaction with entrepreneurs, market research, feasibility analysis, business proposals, and business/community outreach and consulting. (Typically Offered: Fall, Spring)

AESHM 5790: Data Analytics for Apparel, Event, and Hospitality Management

Credits: 3. Contact Hours: Lecture 3.

Business analytics is a process of transforming data into meaningful insights and actionable results in the context of decision making and problem solving. Review of the data-related challenges apparel, event, and hospitality organizations confront and the importance of data analytics in making critical management decisions. Basic analytic techniques including data management, analysis, interpretation, and visualization and analyze case studies that successfully deployed these techniques. Typically Offered: Fall (even-numbered years), Summer (odd-numbered years).

AESHM 5800D: U.S. Field Study: Hospitality Management

Credits: 1-3. Repeatable, maximum of 3 times.

Study and tours of areas of interest to majors in the Hospitality Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2800. Permission by application. (Typically Offered: Fall, Spring, Summer)

AESHM 5800F: U.S. Field Study: Event Management

Credits: 1-3. Repeatable, maximum of 3 times.

Study and tours of areas of interest to majors in the majors in the Event Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2800. Permission by application. (Typically Offered: Fall, Spring, Summer)

AESHM 5800N: U.S. Field Study: Apparel, Merchandising, and Design

Credits: 1-3. Repeatable, maximum of 3 times.

Study and tours of areas of interest to majors in the Apparel, Merchandising, and Design program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2800. Permission by application. (Typically Offered: Fall, Spring, Summer)

AESHM 5810D: International Field Study: Hospitality Management

Credits: 1-3. Repeatable.

Study and tours of areas of interest to majors in the Hospitality Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2810. Permission by application. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

AESHM 5810F: International Field Study: Event Management

Credits: 1-3. Repeatable.

Study and tours of areas of interest to majors in the Event Management major. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2810. Permission by application. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

AESHM 5810N: International Field Study: Apparel, Merchandising, and Design

Credits: 1-3. Repeatable, maximum of 3 times.

Study and tours of areas of interest to majors in the Apparel, Merchandising, and Design major. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2810. Permission by application. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:

AESHM 6110: Seminar

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Scholarship and current issues. Topics vary.

AESHM 6700A: Teaching Practicum: Apparel Merchandising and Design

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Supervised experience in the university classroom. Proposal must be approved semester before placement. (Typically Offered: Fall, Spring, Summer)

AESHM 6700B: Teaching Practicum: Hospitality Management

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Supervised experience in the university classroom. Proposal must be approved semester before placement. (Typically Offered: Fall, Spring, Summer)

AESHM 6700C: Teaching Practicum: Event Management

Credits: 1-3. Repeatable.

This practicum is designed to provide event management graduate students (the graduate instructor) with experience in instructional planning, management, and systematic delivery of designed instruction for event undergraduate courses. Proposal must be approved semester before placement. (Typically Offered: Fall, Spring, Summer)

Apparel, Merchandising and Design (AMD)

Courses primarily for undergraduates:

AMD 1210: Apparel Assembly Processes

Credits: 4. Contact Hours: Lecture 1, Laboratory 6.

Principles of garment and soft good product assembly taught using industrial machines and production equipment. Intermediate construction techniques that build with complexity. Understanding how to manipulate different types of fabrics. Garment analysis and learning to understand technical packages in terms of sewing. (Typically Offered: Fall, Spring)

AMD 1310: Fashion Products and Markets

Credits: 3. Contact Hours: Lecture 3.

Fashion industry from concept to consumer. Focus on fashion-driven consumer goods. Development and prototyping of fashion products for a target market. (Typically Offered: Fall)

AMD 1650: Dress, Appearance, and Diversity in U.S. Society

Credits: 3. Contact Hours: Lecture 3.

Analyze foundational concepts and theories related to dress, identity, fashion, and culture and how they intersect with sex, gender, sexuality, beauty, attractiveness, disability, religion, race, and ethnicity with heightened attention to marginalized communities in the United States. Analyze the experiences and the role of fashion, clothing, dress, and/or accessories for identity development. Critique the social justice issues within the fashion system and identify the driving forces of transformative social justice change in the fashion system. Deconstruct one's personal values and positionalities in relation to fashion, clothing, dress, and/or accessories. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

AMD 1780: Introduction to Apparel Design Studio

Credits: 3. Contact Hours: Studio 6.

Introduction to the elements and principles of design in fashion and apparel including skill development in fashion illustration, technical drawing, and fabric rendering using traditional media. Application of written and verbal presentations to communicate fashion and apparel design concepts and terminology. Fashion presentation and introduction to portfolio development. (Typically Offered: Fall, Spring)

AMD 2040: Textile Science

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: AMD 1310

Textile fibers, yarns, fabrication, coloration, and finishes. Quality and performance application to textile products. Lab work included. (Typically Offered: Fall, Spring)

AMD 2060: Design Selective Advancement

Credits: Required. Contact Hours: Lecture 1.

Repeatable, maximum of 2 times.

Prereq: Credit or concurrent enrollment in (AMD 1210, AMD 1310, AMD 1650, AMD 1780, and AMD 2040)

Project review and skill assessment related to 2-dimensional and 3-dimensional visualization, apparel assembly, basic product knowledge, design problem solving, illustration, textiles. Grade point averages are part of scoring process. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

AMD 2100: Computer Applications in Digital Design

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Credit or concurrent enrollment in AMD 2450

Applications of skills in Photoshop, Illustrator, InDesign, Google Sketch-up, Excel, and website development. Introduction to digital product design and line development. Focus on elements and principles of design. Introduction to digital portfolio development for design and merchandising. In-class demonstrations and online lectures. (Typically Offered: Fall, Spring)

AMD 2250: Patternmaking I: Drafting and Flat Pattern

Credits: 3.

Prereq: AMD 1210; AMD 2040

Application of patternmaking tools and their functions, measurement techniques, pattern labeling, and patternmaking communication documents. Sloper drafting and flat pattern manipulation methods for women's apparel. Design and construction of original garments using drafted slopers and flat pattern manipulation methods to enable the analysis of fit. (Typically Offered: Fall, Spring)

AMD 2310: Product Development and Manufacturing

Credits: 4. Contact Hours: Laboratory 2, Lecture 3.

Introduction to the product development cycle, career paths, and manufacturing process. Analysis of garment manufacturing, materials, and specifications relative to quality, performance, cost, and price. Introduction to PLM skills via product development simulation. Credit or concurrent enrollment in AMD 2040 and AMD 2100 recommended. (Typically Offered: Fall, Spring)

AMD 2450: Aesthetics and Brand Image

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 1310; credit or concurrent enrollment in AMD 2040

Elements and principles of design. Analysis of sensory, expressive, and symbolic aspects that build brand image, with a focus on fashion products and promotional settings. (Typically Offered: Fall, Spring)

AMD 2570: Museum Studies

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Overview of museums including history, functions, and philosophy. Collection and curatorial practices. Funding and governance issues. Hands-on object research and exhibit development. Required field trip. (Typically Offered: Fall)

AMD 2750: Retail Merchandising

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits in Math

Principles of merchandising as applied to retail-, service-, events-, and hospitality-related businesses. Study of the planning, development, and presentation of apparel- and hospitality-related products, services, and experiences. Industry and market research, planning of new offerings, and development of promotional and competitive strategies for various retail formats. (Typically Offered: Fall, Spring)

AMD 2780: Fashion Illustration

Credits: 3. Contact Hours: Studio 6.

Prereq: AMD 1780, AMD 2100 or concurrent enrollment, AMD 2450 or concurrent enrollment

Development of fashion plates and focused apparel lines/collections. Proficiency in drawing the fashion figure, technical drawings/flats, and apparel using a variety of media. Continuation of fashion presentation and portfolio development. (Typically Offered: Fall, Spring)

AMD 2880: Styling

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 1310; AMD 2750

Focus on the many facets of the styling profession, including commercial styling, editorial (magazine) styling, personal style consultation, and red-carpet styling. Study of the practical requirements of the profession and the importance of an appropriate digital presence. Course will utilize a hands-on approach with lectures and projects. (Typically Offered: Fall, Spring)

AMD 2900: Independent Study

Credits: 1-2. Repeatable, maximum of 4 credits.

Prereq: Permission of instructor and advisor

Independent study on topics of special interest to the student, facilitated by approved faculty member. Permission of instructor and advisor. (Typically Offered: Fall, Spring, Summer)

AMD 2900R: Independent Study: Professional Practice

Credits: 1-2. Repeatable, maximum of 4 credits.

Prereq: Permission of instructor and advisor

Experiences in teaching assistantship for first year and second-year students. Permission of instructor and advisor. Graduation Restriction: Total number of AMD 2900 and AMD 4900 credits applied to graduation cannot exceed 9 credits. (Typically Offered: Fall, Spring, Summer)

AMD 3050: Quality Assurance of Textiles and Apparel

Credits: 3.

Prereq: AMD 2040, AMD 2310, one course in natural science; STAT 1010, or STAT 2260, or STAT 5870

Undergrad: Principles of product and materials evaluation and quality assurance. Developing specifications and using standard practices for evaluating materials, product characteristics, performance, and quality. Grad: Principles of product and materials evaluation and quality assurance. Developing specifications and using standard practices for evaluating materials, product characteristics, performance, and quality. Previous coursework in natural science and statistics recommended. (Typically Offered: Fall)

AMD 3100: Computer Aided Apparel Patternmaking

Credits: 3. Contact Hours: Laboratory 6.

Prereq: AMD 2100, AMD 2250

Introduction to the computer-aided patternmaking software related to pattern modification, pattern drafting, grading, marker making, and 3-D virtual fitting. (Typically Offered: Fall, Spring)

AMD 3210: Computer Integrated Textile and Fashion Design

Credits: 3. Contact Hours: Laboratory 6.

Prereq: AMD 2100

Analysis and advanced use of computer-aided design software for soft-good fabrication design for various target markets. Development of digital presentation for portfolio integration. (Typically Offered: Fall, Spring)

AMD 3250: Patternmaking II: Draping

Credits: 3. Contact Hours: Laboratory 6.

Prereq: AMD 2250

Principles of patternmaking through basic draping techniques. Application of draping techniques to sportswear and formal wear garments. Analysis of fit and design; problem solving and interaction of fabric characteristics with style features. (Typically Offered: Fall, Spring)

AMD 3280T: Apparel, Merchandising, and Design Seminar: Fashion Trend Forecasting

Credits: 1-3. Contact Hours: Studio 3.

Focus on artisanal textile, apparel, or surface and structural design techniques. Design processes for specialty fabrics and markets. Topics vary by term. Graduation Restriction: Maximum of 6 credits can be applied toward graduation. (Typically Offered: Fall, Spring)

AMD 3280Y: Apparel, Merchandising, and Design Seminar: Styling

Credits: 1-3. Contact Hours: Studio 3.

Focus on artisanal textile, apparel, or surface and structural design techniques. Design processes for specialty fabrics and markets. Topics vary by term. Graduation Restriction: Maximum of 6 credits can be applied toward graduation.

AMD 3290: Digital Textile Printing for Apparel Design

Credits: 3.

Prereq: AMD 3250; Permission of instructor

Overview of the use of digital printing in the textile and apparel industry, color matching, repeat print patterns, engineered prints, and creation of apparel prototypes. (Typically Offered: Spring)

AMD 3540: Euro-American Dress History: Prehistoric to Mid-19th Century

Credits: 3. Contact Hours: Lecture 3.

Survey of fashion history from ancient times up to the mid-19th century; focus on European and North American dress. Emphasis on influence from social, cultural, environmental, political, economic, and technological contexts of the Western world. Social justice perspectives embedded within all topics. Meets International Perspectives Requirement. (Typically Offered: Fall)

AMD 3560: Euro-American Dress History: Mid-19th Century to the Present

Credits: 3. Contact Hours: Lecture 3.

Survey of fashion history from the 1870s through the present. Emphasis on influence from social, cultural, environmental, political, economic, and technological contexts of the Western world. Social justice perspectives embedded within all topics. (Typically Offered: Spring)

AMD 3620: Global Dress in the Fashion System and Society

Credits: 3. Contact Hours: Lecture 3.

Analyze concepts and theories related to dress, identify, fashion, and culture and how they intersect with sex, gender, sexuality, beauty, attractiveness, disability, religion, race, ethnicity, space/place, land, and/or nation with heightened attention to marginalized communities across the globe. Critique the social justice issues within the global fashion system and identify the driving forces of transformative social justice change from a global perspective. Emphasis on decolonizing philosophies. Deconstruct one's personal values and positionalities in relation to the course topics. Meets International Perspectives Requirement. (Typically Offered: Spring)

AMD 3720: Sourcing and Global Issues

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 2310; AMD 2750

Evaluation of key issues facing textile and apparel industries in global markets considering ethical, economic, political, social, and professional implications. Sourcing strategies in a global environment. Corporate and consumer social responsibility and sustainability. ECON 1010 or ECON 1020 recommended. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

AMD 3750: Omni-Channel Retailing

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 2750 or AESHM 2870 or AESHM 3400 or MKT 3400

A customer-centric view of marketing with a focus on the retailer-customer relationship and omni-channel strategies. Analysis and evaluation of integrated retail applications and strategies using digital media, including store formats, e-commerce, catalog, mobile, crowdsourcing, and social media. (Typically Offered: Spring)

AMD 3760: Merchandise Planning and Buying

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: AMD 2750; COMS 1130; 3 credits from MATH

Calculations and computer application in the planning and control of merchandise. Emphasis on retail math as it pertains to assortment planning, the six-month buying plan process, and other buying concepts and strategies. Online modules. (Typically Offered: Fall, Spring)

AMD 3770: Visual Presentation and Promotions

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 2450 or AESHM 3420 and AMD 2100 and AESHM 3400 or MKT 3400

Principles of visual aspects of brand development and management; emphasis on branding, visual merchandising, design/layout of retail spaces. Includes applications such as visual communication and documentation using Adobe Creative Suite(R), hands-on display projects, and brand case studies. (Typically Offered: Fall, Spring)

AMD 3880: Trend Forecasting

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 2040; AMD 2450; AMD 2750; (3 credits from ACCT 2840 or MATH)

Explore many facets of fashion forecasting, including trend research, managing inspiration sources and trend ideas, product adoption, degrees of difference, and turning a fashion forecast into a buying plan. Applications of fashion forecasting will be examined, who does it and how it fits into various careers. The course will utilize a hands-on approach with lecture, discussion, and projects. (Typically Offered: Fall, Spring)

AMD 4040: Innovative Textiles

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: AMD 2040; CHEM with lab

Undergrad: Theories and principles of textile science. Textile product serviceability. Effect of fiber structure on properties and performance. New developments in textiles. Grad: Theories and principles of textile science. Textile product serviceability. Effect of fiber structure on properties and performance. New developments in textiles. Previous coursework in textile science and chemistry recommended. (Typically Offered: Spring)

AMD 4150: Technical Design Processes

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: AMD 2250 and AMD 2310

Garment development and analysis of fit, performance, quality, cost. Exploration of alternative materials, construction methods, grading, and specifications. Applications of software for PLM. (Typically Offered: Fall)

AMD 4260: Creative Design Processes

Credits: 3. Contact Hours: Laboratory 6.

Prereq: AMD 1780; AMD 2100; AMD 2250

Exploration of the apparel and soft goods design process. Analysis of inspiration sources for different markets. Development of a professional portfolio. (Typically Offered: Spring)

AMD 4310: Apparel Production Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: AMD 2310; AMD 3720; AMD 4150

Procedures and experiences related to application and use of process controls: method analysis, work measurement, costing, pricing, and production planning. Resource management, technology applications, and quality assurance. Applications of software for PLM. (Typically Offered: Spring)

AMD 4580: Queer Fashions: History, Culture, and the Industry

(Cross-listed with WGS 4580).

Credits: 3. Contact Hours: Lecture 3.

Focus on analyzing the dressed and undressed body of individuals in the queer and trans communities in various cultural contexts with a focus on material culture. Examine concepts related to gender and sexuality and the changing definitions and representations of individuals who identify in the queer and trans communities focusing on appearance, fashion, and the body. Historic and current representations of fashion, styles, and appearances will be analyzed and discussed. Attention to how sexuality and gender intersect with and shape other identities including race, ability, body size, and class. Examine the complex structures, systems, and ideologies that uphold discrimination and inequitable distribution of power and resources as related to the course material. Attention will mostly be given to North American perspectives. We will use material culture to explore how objects related to fashioning the body reveal lived experiences about the owners and consumers. Offered even-numbered years. Meets U.S. Diversity Requirement. (Typically Offered: Spring)

AMD 4670: Consumer Studies in Apparel and Fashion Products

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 1650 and AESHM 3400 or MKT 3400 and STAT 1010 or STAT 1040 or STAT 2260

Application of concepts and theories from the social sciences to the study of consumer behavior related to dress, textile and apparel products, and retail experiences. Experience in conducting consumer research. (Typically Offered: Fall)

AMD 4750: Retail Analytics

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: AMD 3760

Evaluation of information needed to make effective retail decisions. Use of technology in analyzing and interpreting retail systems data. Application of concepts related to forecasting, consumer demand, assortment planning, market research, data mining, database interface, pattern recognition, supply-chain/logistics management, retail technology applications. (Typically Offered: Fall, Spring)

AMD 4900A: Independent Study: Textile Science

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4900B: Independent Study: Historical, Cultural, and Museum Studies of Dress and Textiles

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4900C: Independent Study: Textile and Apparel Design

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4900E: Independent Study: Merchandising, Aesthetics, and Entrepreneurship

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4900F: Independent Study: Sociological, Psychological, and Consumer Behavioral Aspects of Dress

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4900H: Independent Study: Honors

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4900J: Independent Study: Product Development, Innovation, and Sourcing

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4900R: Independent Study: Professional Practice

Credits: 1-30. Repeatable, maximum of 30 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4900S: Independent Study: Production and Quality Assurance

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4900W: Independent Study: Fashion Show, Fashion Public Relations and Marketing

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4950: Senior Design Studio

Credits: 3. Contact Hours: Studio 6.

Prereq: AMD 3100, AMD 3250 and AMD 3290

Undergrad: Creation of an apparel line from target market research to prototypes through the use of manual techniques and CAD technologies. The line is to be included in a professional portfolio and pieces submitted to a juried exhibition. Grad: Creation of an apparel line from target market research to prototypes through the use of manual techniques and CAD technologies. The line is to be included in a professional portfolio and pieces submitted to a juried exhibition. Previous coursework in apparel construction and design recommended. (Typically Offered: Fall)

AMD 4960: Soft-Goods Product Development and Prototyping

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 2310; AMD 2450; AMD 2750

Capstone soft-good innovative product development course focusing on product development through design thinking and practice. Applying consumer, aesthetic, and quantitative trend information to develop value-added soft-good products and product lines for diverse target markets. Integrated course with industry partner(s) with development of a prototype and presentation for portfolio integration. (Typically Offered: Spring)

AMD 4990: Undergraduate Research

Credits: 1-3. Repeatable.

Prereq: Senior classification, 15 credits in AMD. Permission of instructor, advisor, and department chair

Research experience in textiles and clothing with application to a selected problem. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

AMD 5040: Innovative Textiles

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Instructor Permission for Course

Theories and principles of textile science. Textile product serviceability. Effect of fiber structure on properties and performance. New developments in textiles. Previous coursework in textile science and chemistry recommended.

AMD 5050: Quality Assurance of Textiles and Apparel

Credits: 3.

Prereq: Instructor Permission for Course

Principles of product and materials evaluation and quality assurance. Developing specifications and using standard practices for evaluating materials, product characteristics, performance, and quality. Previous coursework in natural science and statistics recommended. (Typically Offered: Fall)

AMD 5090X: Clothing Comfort: Theory and Practice

Credits: 3. Contact Hours: Lecture 3.

Provide background knowledge and relevant theories on clothing comfort issues, specifically the functional garment and protective clothing. Introduce the heat stress/heat strain associated with wearing personal protective equipment (PPE) including several cases on sportswear, firefighter gear, military personnel, mining workers, medical practitioners and law enforcement. Research project. (Typically Offered: Fall)

AMD 5100: Foundation of Scholarship in Apparel, Merchandising, and Design

Credits: 3. Contact Hours: Lecture 3.

Overview of scholarship in apparel, merchandising, and design with emphasis on current and future directions. Fundamentals of writing literature reviews. Examination of ethical issues in scholarship and academic life. Introduction to creativity, sustainability, and entrepreneurship. (Typically Offered: Fall)

AMD 5210: Digital Technologies in Textile and Apparel

Credits: 3. Contact Hours: Lecture 3.

Digital technologies in textile and apparel design. Theories and practices connected to technology in apparel fields. Technologies explored in this class may include digital textile design and printing, 3D body scanning, avatar development for digital fitting or other advanced technologies used in the textile and apparel industries. Previous coursework in research methods recommended. Offered odd-numbered years. (Typically Offered: Fall)

AMD 5250: Experimental Patternmaking

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment in AMD 5100

Research, analyze, and apply experimental patternmaking techniques to original garments suitable for entry into a juried competition/exhibitions. Compare, contrast, and organize a framework of research patternmaking principles through content analysis or other appropriate research techniques. Documentation of learning and design process. Previous coursework in apparel construction and patternmaking recommended. Offered odd-numbered years. (Typically Offered: Spring)

AMD 5390: Digital Textile Design and Theory

Credits: 3. Contact Hours: Studio 3.

Repeatable.

Focus on artisanal textile, apparel, or surface and structural design techniques. Design processes for specialty fabrics and markets. Topics vary by term. Offered even-numbered years. (Typically Offered: Spring)

AMD 5450: Consumer Experience and Retail Branding

Credits: 3. Contact Hours: Lecture 3.

Examination of hedonic nature of consumer experience and its application to experiential design and branding of retail/hospitality establishments. Emphasis on consumer behavior, environmental psychology, and marketing literature. Previous coursework in psychology, consumer behavior, or marketing recommended. Offered even-numbered years. (Typically Offered: Spring)

AMD 5540: Dress History Research Methods

Credits: 3. Contact Hours: Lecture 3.

Using a variety of sources and methods of analysis, students will develop their ability to read and interpret primary and secondary sources and to understand the methodology underpinnings and process of constructing dress history. Anticipated Semesters Offered: Spring - Alternate offered odd-numbered years. (Typically Offered: Spring)

AMD 5580: Queer Fashions: History, Culture, and the Industry

(Cross-listed with WGS 5580).

Credits: 3. Contact Hours: Lecture 3.

Focus on analyzing the dressed and undressed body of individuals in the queer and trans communities in various cultural contexts with a focus on material culture. Examine concepts related to gender and sexuality and the changing definitions and representations of individuals who identify in the queer and trans communities focusing on appearance, fashion, and the body. Historic and current representations of fashion, styles, and appearances will be analyzed and discussed. Attention to how sexuality and gender intersect with and shape other identities including race, ability, body size, and class. Examine the complex structures, systems, and ideologies that uphold discrimination and inequitable distribution of power and resources as related to the course material. Attention will mostly be given to North American perspectives. We will use material culture to explore how objects related to fashioning the body reveal lived experiences about the owners and consumers. Offered even-numbered years. Meets U.S. Diversity Requirement. (Typically Offered: Spring)

AMD 5620X: Fashion Studies, Culture, Industry, and Social Justice

Credits: 3. Contact Hours: Lecture 3.

Analysis of fashion and cultural practices of historically marginalized communities with a focus on power, privilege, and social justice. Heightened attention towards the 20th and 21st centuries. Examination of the way the global fashion industry intersects with and is related to the communities and their dress practices under study. Emphasis on ethnographic research methods. Offered even-numbered years. (Typically Offered: Fall)

AMD 5650: Sustainability: Theory and Practical Application

Credits: 3. Contact Hours: Lecture 3.

Overview of current sustainability theory, research, and methodology. Emphasis on the evaluation and discussion of current sustainability literature and sustainable practice of apparel, textiles, and related products and services through people, processes, and the environment. Development and presentation of original scholarly and creative design work under various sustainability frameworks. Previous knowledge in apparel industry and product development recommended. Offered even-numbered years. (Typically Offered: Fall)

AMD 5670: Consumer Behavior and Apparel

Credits: 3. Contact Hours: Lecture 3.

Application of concepts and theories from the social sciences to the study of consumer behavior. Experience in conducting research; manuscript writing. Previous coursework in consumer behavior and statistics recommended. Offered odd-numbered years. (Typically Offered: Fall)

AMD 5720: Sourcing and Global Issues

Credits: 3. Contact Hours: Lecture 3.

Evaluation of textile and apparel industries in global markets considering ethical, economic, political, social, and professional implications. Sourcing strategies in a global environment. Corporate and consumer social responsibility and sustainability. Experience in conducting research using secondary data. Previous coursework in merchandising, marketing, or economics recommended. Offered odd-numbered years. Meets International Perspectives Requirement. (Typically Offered: Spring)

AMD 5760: Industry Applications in Merchandising and Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: Instructor Permission for Course

Using the case study method, students apply merchandising theory, principles, and practices to industry scenarios. Emphasis on problem solving, creative thinking, data analysis, and data interpretation involved in business operations. Focus on the development of leadership skills while functioning in small and large groups. (Typically Offered: Spring)

AMD 5770: E-Commerce for Apparel and Hospitality Companies

Credits: 3. Contact Hours: Lecture 3.

Prereq: Instructor Permission for Course

Analysis of technology and consumer trends, industry practices, and marketing strategies for e-commerce including big data, data mining, and social media. Evaluation and development of apparel or hospitality company websites. Theory application to the development of multi-channel business strategies. Previous coursework in marketing recommended. Offered even-numbered years. (Typically Offered: Fall)

AMD 5780: Social Network Analysis

Credits: 3. Contact Hours: Lecture 3.

Introduction to social network related theories, practices and analyses. Visualize and analyze social structures, formed from social relationships, interactions, communications, and social media activities. Explore methods for social network data collection and data management, including application on big data. Practical guidelines on conducting S research in social science contexts, including applying S with big data. Previous coursework in statistics recommended. Offered odd-numbered years. (Typically Offered: Spring)

AMD 5900A: Special Topics: Textile Science

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Individually designed AMD-related projects that reflect the special interests of the student.

AMD 5900B: Special Topics: Historical, Cultural, and Museum Studies of Dress and Textiles

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Individually designed AMD-related projects that reflect the special interests of the student.

AMD 5900C: Special Topics: Textile and Apparel Design

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Individually designed AMD-related projects that reflect the special interests of the student.

AMD 5900E: Special Topics: Merchandising, Aesthetics, and Entrepreneurship

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Individually designed AMD-related projects that reflect the special interests of the student.

AMD 5900F: Special Topics: Sociological, Psychological, and Consumer Behavioral Aspects of Dress

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Individually designed AMD-related projects that reflect the special interests of the student.

AMD 5900J: Special Topics: Product Development, Innovation, and Sourcing

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Individually designed AMD-related projects that reflect the special interests of the student. (Typically Offered: Fall, Spring, Summer)

AMD 5900S: Special Topics: Production and Quality Assurance

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Individually designed AMD-related projects that reflect the special interests of the student. (Typically Offered: Fall, Spring, Summer)

AMD 5900W: Special Topics: Fashion Show, Fashion Public Relations and Marketing

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Individually designed AMD-related projects that reflect the special interests of the student. (Typically Offered: Fall, Spring, Summer)

AMD 5950: Senior Design Studio

Credits: 3. Contact Hours: Studio 6.

Creation of an apparel line from target market research to prototypes through the use of manual techniques and CAD technologies. The line is to be included in a professional portfolio and pieces submitted to a juried exhibition. Previous coursework in apparel construction and design recommended. (Typically Offered: Fall)

AMD 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Creative Component.

Courses for graduate students:**AMD 6110: Seminar**

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Discussion of scholarship and current issues. Topics vary.

AMD 6250: Design Theory and Process

Credits: 4. Contact Hours: Lecture 2, Laboratory 4.

Analysis and application of design theory and creative processes, including strategies for solving aesthetic, functional, and/or technology-focused design problems. Creation and dissemination of design scholarship. Offered even-numbered years. (Typically Offered: Spring, Summer)

AMD 6650: Critical Social Science Theories in Fashion Studies

Credits: 3. Contact Hours: Lecture 3.

Analysis of cultural and social science theories, concepts, frameworks, and epistemologies applicable to how fashion products, management, and media are produced, distributed, consumed, regulated, and represented. Emphasis on qualitative research, theoretical interpretation, and theory development while centering justice and decolonizing theories. Example theories examined include Black feminist thought, critical race theory, feminist queer crip, tribalcrit, symbolic interaction, and semiotics. Collection, analysis, and interpretation of qualitative data. Offered odd-numbered years. (Typically Offered: Spring)

AMD 6760: Merchandising Theory and Research Applications

Credits: 3. Contact Hours: Lecture 3.

Prereq: Instructor Permission for Course

Review of current merchandising theory, research, and methodology. Emphasis on the evaluation and discussion of current and seminal merchandising literature, understanding research processes, interpretation of findings, assessing implications of research for future directions in merchandising, and the development and presentation of original scholarly work. Previous coursework in statistics recommended. Offered even-numbered years. (Typically Offered: Fall)

AMD 6900: Advanced Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Advanced Topics.

AMD 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Arabic (ARABC)

Courses primarily for undergraduates:**ARABC 1010: Elementary Arabic I**

Credits: 4. Contact Hours: Lecture 5.

Beginning level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture. Attention to the use of the Arabic alphabet. (Typically Offered: Fall)

ARABC 1020: Elementary Arabic II

Credits: 4. Contact Hours: Lecture 5.

Prereq: ARABC 1010 or placement by department exam

Continuation of ARABC 1010. Beginning level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture. Meets International Perspectives Requirement. (Typically Offered: Spring)

ARABC 1950: Study Abroad

Credits: 1-30.

Supervised instruction in Arabic language and culture, formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Arabic. (Typically Offered: Summer)

ARABC 2010: Intermediate Arabic I

Credits: 4. Contact Hours: Lecture 4.

Prereq: ARABC 1020 or placement by department exam

Intermediate level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture. Meets International Perspectives Requirement. (Typically Offered: Fall)

ARABC 2020: Intermediate Arabic II

Credits: 4. Contact Hours: Lecture 4.

Prereq: ARABC 2010 or placement by department exam

Continuation of ARABC 2010. Intermediate level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture. Meets International Perspectives Requirement.

ARABC 2950: Study Abroad

Credits: 1-30.

Prereq: ARABC 1020

Supervised instruction in Arabic language and culture, formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Arabic. (Typically Offered: Summer)

ARABC 3710X: The Arabian Nights

(Cross-listed with WLC 3710X).

Credits: 3. Contact Hours: Lecture 3.

Focus on the tales of the famous '1001 Arabian Nights' book. Discussions of the narrative tools, supernatural elements, and the culture of the Medieval Middle East. Readings, discussions, and papers in English. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

ARABC 3750: Arab Culture

Credits: 3. Contact Hours: Lecture 3.

Survey of contemporary Arab culture in the Middle East and North Africa as reflected in history, language, the arts, and social institutions with attention to the Arab Diaspora. Taught in English. Meets International Perspectives Requirement. (Typically Offered: Spring)

ARABC 4900: Independent Study

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

Independent study with focus on areas other than those in which courses are offered. Graduation Restriction: No more than 6 credits in ARABC 4900 may be counted toward graduation.

Architecture (ARCH)

Courses primarily for undergraduates:

ARCH 2010: Architectural Design I

Credits: 6. Contact Hours: Lecture 1, Studio 15.

Prereq: Admission into the Professional program in Architecture

Introduction to architectural design including design process, drawing conventions, methods of design analysis, and model making using both analog and digital tools. Studio projects focus on formal and volumetric principles of pattern and composition, investigations of site conditions, and understanding of scale. Field trips to relevant architectural sites.

(Typically Offered: Fall)

ARCH 2010H: Architectural Design I: Honors

Credits: 6-7. Contact Hours: Studio 13.5, Lecture 1.5.

Prereq: Admission into the Professional program in Architecture

Introduction to architectural design including design process, drawing conventions, methods of design analysis, and model making using both analog and digital tools. Studio projects focus on formal and volumetric principles of pattern and composition, investigations of site conditions, and understanding of scale. Field trips to relevant architectural sites.

(Typically Offered: Fall)

ARCH 2020: Architectural Design II

Credits: 6. Contact Hours: Lecture 1.5, Studio 13.5.

Prereq: ARCH 2010; MATH 1450; PHYS 1310; PHYS 2310L

Continuation of fundamental architectural design exploration. Studio projects focus on the generation of ideas based on experience and systematic analysis of tectonics. Emphasis on design development through detail, materiality, and spatial relationships. Students work in groups and individually. Representational methods expand on architectural conventions through experimentation. Field trips to relevant architectural sites. (Typically Offered: Spring)

ARCH 2020H: Architectural Design II, Honors

Credits: 6-7.

Prereq: ARCH 2010; MATH 1450; PHYS 1310; PHYS 2310L

Continuation of fundamental architectural design exploration. Studio projects focus on the generation of ideas based on experience and systematic analysis of tectonics. Emphasis on design development through detail, materiality, and spatial relationships. Students work in groups and individually. Representational methods expand on architectural conventions through experimentation. Field trips to relevant architectural sites. (Typically Offered: Spring)

ARCH 2200: Contemporary Architecture

Credits: 3. Contact Hours: Lecture 3.

Survey of global architectural ideas and practices from 1990 to the present. Emphasis will be given to recent movements and architectural manifestations, as well as close examinations of socio-cultural conditions for contemporary practice. (Typically Offered: Fall)

ARCH 2210: Histories and Theories of Architecture to 1750

Credits: 3. Contact Hours: Lecture 3.

Survey of architectural ideas, theories, and practices before 1750.

Emphasis on the mutually formative relationship between architecture and the social, cultural, economic, and political forces, nationally and globally, in which it is produced. Meets International Perspectives Requirement. (Typically Offered: Fall)

ARCH 2300: Design Communications I

Credits: 3. Contact Hours: Lecture 2, Studio 2.

Prereq: Admission into the Professional program in Architecture

Investigations of various design media and their applications to design. Exercises to develop representational skills and perceptual sensitivity. (Typically Offered: Fall)

ARCH 2310: Advanced Design Representation

Credits: 3. Contact Hours: Lecture 3.

Prereq: ARCH 2300; Junior, Senior or graduate standing

Advanced investigations of various design media and their applications to design. Emphasis on careful consideration of media, mixed-media strategies and development of craft. Offered irregularly. (Typically Offered: Fall)

ARCH 3010: Architectural Design III

Credits: 6. Contact Hours: Lecture 1, Studio 15.

Prereq: ARCH 2020

Consideration of landscape as a constructed, cultural artifact. Projects address the perceptual aspects and strategies of situation and location; examination of environmental phenomena and patterns of use and settlement as revealed and affected by the architectural artifact. Development of a critical design process is stressed. (Typically Offered: Fall)

ARCH 3010H: Architectural Design III: Honors

Credits: 6-7. Contact Hours: Studio 15, Lecture 1.

Prereq: ARCH 2020

Consideration of landscape as a constructed, cultural artifact. Projects address the perceptual aspects and strategies of situation and location; examination of environmental phenomena and patterns of use and settlement as revealed and affected by the architectural artifact. Development of a critical design process is stressed. (Typically Offered: Fall)

ARCH 3020: Architectural Design IV

Credits: 6. Contact Hours: Lecture 1.5, Studio 13.5.

Prereq: Minimum grade of C in ARCH 3010

Design for housing in an urban context that demonstrates a synthetic understanding of diverse scales of use and occupation as shaped by user requirements, site conditions, and principles for inclusive design. Consideration of regulatory requirements and measurable environmental impacts of the proposal on its site. (Typically Offered: Spring)

ARCH 3020H: Architectural Design IV: Honors

Credits: 6-7.

Prereq: Minimum grade of C in ARCH 3010

Design for housing in an urban context that demonstrates a synthetic understanding of diverse scales of use and occupation as shaped by user requirements, site conditions, and principles for inclusive design. Consideration of regulatory requirements and measurable environmental impacts of the proposal on its site. (Typically Offered: Spring)

ARCH 3210: History of the American City

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Study of the development of the built environment and urban condition in the United States from the colonial period to today. Primary attention is given to urban spatial organization, built form, technological change, regulatory and funding patterns, and social categories such as class, race, and gender. Credit counts toward fulfillment of History, Theory, Culture requirements. Meets U.S. Diversity Requirement.

ARCH 3220: Histories and Theories of Architecture after 1750

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Survey of architectural ideas, theories and practices from 1750 to 1990. Emphasis on the mutually formative relationship between architecture and the social, cultural, economic, and political forces, nationally and globally, in which it is produced. Meets International Perspectives Requirement. (Typically Offered: Spring)

ARCH 3340: Computer-aided Architectural Design

Credits: 3. Contact Hours: Lecture 2, Studio 2.

Exploration of current and potential applications of computing in architectural design. Projects engage digital design methods, data and media workflows.

ARCH 3350: Three-Dimensional Studio

Credits: 3. Repeatable, maximum of 6 credits.

This course deals with three dimensional problems in visual invention, organization, and expression emphasizing creative manipulation of tools, materials, and techniques as means for three-dimensional thinking. Projects cover the additive (modeling), subtractive (carving), substitutional (casting) as well as constructive techniques.

ARCH 3450: Building Science and Technology I

Credits: 2. Contact Hours: Lecture 2.

Prereq: Undergraduate: Admission to the professional program in architecture; concurrent enrollment in ARCH 3450L; graduate: Admission to the M. Arch. program and concurrent enrollment in ARCH 5050 and ARCH 5950; concurrent enrollment in ARCH 5450L

First course in a sequence focused on architectural building technologies. Lectures and labs cover: environmental forces and systems (solar orientation, climate, daylighting, natural ventilation, human comfort and occupancy patterns), materials and assemblies (drawing conventions, building codes, and physical properties of materials) and fundamental structural principles (forces/loads, equilibrium, and stability) to understand impact of the built environment on human health, safety, and welfare at building scales. (Typically Offered: Fall)

ARCH 3450L: Building Science and Technology I Lab

Credits: 1. Contact Hours: Laboratory 2.

Prereq: Admission to the professional program in architecture; concurrent enrollment in ARCH 3450.

Laboratory to accompany ARCH 3450 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format. (Typically Offered: Fall)

ARCH 3460: Building Science and Technology II

Credits: 3. Contact Hours: Lecture 3.

Prereq: ARCH 3450, ARCH 3450L, MATH 1450, and PHYS 1310 and PHYS 1310L; concurrent enrollment in ARCH 3460L

Second course in a sequence focused on architectural building technologies. Lectures and labs cover: environmental systems (heat transfer in the building envelope, passive heating and cooling, daylighting, thermal comfort, analytical guidelines and building energy calculation methods), materials & assemblies (building envelope systems, accessibility, egress, and material properties), and structural systems (structural system selection/comparison, and design and analysis of 'form-active' compression and tension structures) to understand impact of the built environment on human health, safety, and welfare at building scales. (Typically Offered: Spring)

ARCH 3460L: Building Science and Technology II Lab

Credits: 2. Contact Hours: Laboratory 4.

Prereq: ARCH 3450, ARCH 3450L, MATH 1450, and PHYS 1310 and PHYS 1310L; concurrent enrollment in ARCH 3460L

Laboratory to accompany ARCH 3460 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format. (Typically Offered: Spring)

ARCH 3470: Building Science and Technology III

Credits: 3. Contact Hours: Lecture 3.

Prereq: ARCH 3460, ARCH 3460L; concurrent enrollment in ARCH 3470L

Third course in a sequence focused on architectural building technologies. Lectures and labs cover: multistory building framing, assembly, and enclosure systems, sizing and selecting structural framing components (foundations, columns, beams, etc.), and an environmental design process that demonstrates the ability to integrate climate into the control of thermal, luminous, ventilative and acoustic environments. Introduction to plumbing and rain water collection systems to understand the impact of the built environment on human health, safety, and welfare at building scales and to assess those technologies against performance objectives of projects. (Typically Offered: Fall)

ARCH 3470L: Building Science and Technology III Lab

Credits: 2. Contact Hours: Laboratory 4.

Prereq: ARCH 3460, ARCH 3460L; concurrent enrollment in ARCH 3470

Laboratory to accompany ARCH 3470 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 3480: Building Science and Technology IV

Credits: 3. Contact Hours: Lecture 3.

Prereq: ARCH 3470, ARCH 3470L; concurrent enrollment in ARCH 3480L

Fourth course in a sequence focused on architectural building technologies. Lectures and labs cover: ability to demonstrate active environmental HVAC control systems design, use and design of mechanical, electrical, plumbing, fire safety, transportation, and conveying systems and subsystems, constructed building assemblies and details (building envelope details for waterproofing and enclosure, advanced material properties, costs, and serviceability), and structural design for multi-story structures (design and documenting various framing patterns, integration with other building systems, and lateral stability strategies for wind and seismic) to understand the impact of the built environment on human health, safety, and welfare at building scales and to assess those technologies against performance objectives of projects. (Typically Offered: Spring)

ARCH 3480L: Building Science and Technology IV Lab

Credits: 2. Contact Hours: Laboratory 4.

Prereq: ARCH 3470, ARCH 3470L; concurrent enrollment in ARCH 3480

Laboratory to accompany ARCH 3480 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format. (Typically Offered: Spring)

ARCH 3710: Human Behavior and Environmental Theory

Credits: 3. Contact Hours: Lecture 3.

Prereq: Admission into the Professional program in Architecture

Exploration of theories that describe social structure and order and the manner in which individuals and societies organize themselves and structure their environment.

ARCH 4010: Architectural Design V

Credits: 6.

Prereq: Minimum grade of C in ARCH 3020

Projects showing students' ability to integrate knowledge of sound building design into a comprehensive architectural proposal that reflects sustainable design principles. Consideration of site, structure, building envelope, environmental controls, life safety, and methods to measure building performance. Projects typically are closely connected to the physical, environmental, and social context of their sites. (Typically Offered: Fall)

ARCH 4010H: Architectural Design V: Honors

Credits: 6-7.

Prereq: Minimum grade of C in ARCH 3020

Projects showing students' ability to integrate knowledge of sound building design into a comprehensive architectural proposal that reflects sustainable design principles. Consideration of site, structure, building envelope, environmental controls, life safety, and methods to measure building performance. Projects typically are closely connected to the physical, environmental, and social context of their sites. (Typically Offered: Fall)

ARCH 4020: Architectural Design VI

Credits: 6. Contact Hours: Lecture 1, Studio 15.

Prereq: Minimum grade of C in ARCH 4010

An examination of the relationship between architecture and the city. Studio projects stress analysis and interpretation of the diverse forces and conditions that impact and inform architecture in the urban environment. Urban design project. Study abroad option. (Typically Offered: Spring)

ARCH 4020H: Architectural Design VI: Honors

Credits: 6-7.

Prereq: Minimum grade of C in ARCH 4010

An examination of the relationship between architecture and the city. Studio projects stress analysis and interpretation of the diverse forces and conditions that impact and inform architecture in the urban environment. Urban design project. Study abroad option. (Typically Offered: Spring)

ARCH 4030: Architectural Design VII

Credits: 6.

Prereq: ARCH 4020

Advanced studio as incubator for examining progressive agendas within or beyond the discipline of architecture. Innovative research that is academically rigorous, critically informed, speculative, and design-led is encouraged. Projects and creative outputs vary per studio instructor. (Typically Offered: Fall)

ARCH 4030H: Architectural Design VII: Honors

Credits: 6-7.

Prereq: ARCH 4020

Advanced studio as incubator for examining progressive agendas within or beyond the discipline of architecture. Innovative research that is academically rigorous, critically informed, speculative, and design-led is encouraged. Projects and creative outputs vary per studio instructor. (Typically Offered: Fall)

ARCH 4040: Architectural Design VIII

Credits: 6. Contact Hours: Lecture 1.5, Studio 13.5.

Prereq: ARCH 4030

Advanced forum for architectural research and/or design. Choice of thematic studios or student initiated research and design. Experimentation and innovation are encouraged. DSNS 4460 or DSNS 5460, for 6 cr. each time taken, can be substituted for this class and be taken up to a maximum of 12 credits. (Typically Offered: Spring)

ARCH 4040H: Architectural Design VIII: Honors

Credits: 6-7.

Prereq: ARCH 4030

Advanced forum for architectural research and/or design. Choice of thematic studios or student initiated research and design. Experimentation and innovation are encouraged. DSNS 4460 or DSNS 5460, for 6 cr. each time taken, can be substituted for this class and be taken up to a maximum of 12 credits. (Typically Offered: Spring)

ARCH 4170: Big and Tall: A History of Construction

(Dual-listed with ARCH 5170).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Junior or Senior Classification

History, theory, and principles of construction from ancient times through today. Analytic project or term paper and weekly readings with discussion questions. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 4200: Topics in American Architecture

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Junior classification

History, theory, and principles of American architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements. Graduation Restriction: A maximum of 6 credits of ARCH 4200 may be applied to degree program.

ARCH 4220: Topics in Medieval Architecture

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Junior classification

History, theory, and principles of American architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements. Graduation Restriction: A maximum of 6 credits of ARCH 4200 may be applied to degree program. Meets International Perspectives Requirement.

ARCH 4230: Topics in Renaissance to Mid-Eighteenth Century Architecture

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Junior classification

History, theory, and principles of renaissance to mid-eighteenth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements. Meets International Perspectives Requirement.

ARCH 4240: Topics in Nineteenth Century Architecture

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Junior classification

History, theory, and principles of nineteenth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment History, Theory, Culture requirements. Graduation Restriction: A maximum of 6 credits of ARCH 4240 may be applied to degree program.

ARCH 4250: Topics in Twentieth Century and Contemporary Architecture

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Junior classification

History, theory, and principles of twentieth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment History, Theory, Culture requirements. Graduation Restriction: A maximum of 6 credits of ARCH 4250 may be applied to degree program.

ARCH 4260: Topics in Native American Architecture

(Cross-listed with AMIN 4260).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: Junior classification

History, theory, and principles of Native American/American Indian architecture, landscape architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment History, Theory, Culture. Graduation Restriction: A maximum of 6 credits of ARCH 4260 may be applied to degree program.

ARCH 4270: History, Theory, and Criticism of Chinese Architecture

(Dual-listed with ARCH 5270).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Senior classification

The history and theoretical concept of Chinese built environment with emphasis on the morphology of built form and its relationship to art, landscape design, and urban structure. Credit counts toward fulfillment History, Theory, Culture. Meets International Perspectives Requirement. (Typically Offered: Fall)

ARCH 4290: Topics in Italian Architecture

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification

History, theory and principles of Italian architecture considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements. (Typically Offered: Spring)

ARCH 4310: Analytical Drawing

Credits: 3. Contact Hours: Lecture 1, Studio 6.

Repeatable, maximum of 12 credits.

Exploration of 2- and 3-dimensional representations. Emphasis on on-site freehand sketching, perspective and orthographic drawing, rendering of shadows and textures, and use of diverse media. (Typically Offered: Fall, Spring)

ARCH 4320: Advanced Computer Lighting and Rendering

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Exploration of the computer as a design and communication tool.

Emphasis on lighting and rendering techniques.

ARCH 4330: Digital Fabrication

(Dual-listed with ARCH 5330).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: ARCH 2310 and ARCH 3010

Exploration of the computer as a design and manufacturing tool.

Emphasis on developing digital fabrication technologies and workflows.

(Typically Offered: Fall, Spring)

ARCH 4340: Advanced Computer-aided Architectural Design

Credits: 3. Contact Hours: Lecture 1, Studio 4.

Specialized investigations of the computer as a design tool. Development of computer software and workflows for architectural and environmental problem solving.

ARCH 4360: Advanced Design Media

(Dual-listed with ARCH 5360).

Credits: 3. Repeatable, maximum of 6 credits.

Special topics in design media applications. (Typically Offered: Fall, Spring)

ARCH 4370: Architectural Photography

Credits: 3. Contact Hours: Lecture 3.

Emphasis on use of the camera and lighting in photographing drawings and interior and exterior building environments.

ARCH 4380: Architectural Robotics

(Dual-listed with ARCH 5380).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Prereq: ARCH 2310; ARCH 3010; or instructor permission. Junior, senior, or graduate standing

Exploration of robots as design and manufacturing tools for architects.

Emphasis on developing robotic technologies and workflows with relevance to architectural design.

ARCH 4390: Computational Design Theory

(Dual-listed with ARCH 5390).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ARCH 2200, ARCH 2210, and ARCH 3220 or senior classification or graduate standing.

Seminar discussion of critical readings and theories surrounding computational design; This course surveys the history and development of digital computing and its use in design from early thought experiments, to computer-aided design systems, to present day artificial intelligences and robotics. The potentials and consequences of emerging computational design systems are discussed.

ARCH 4450: Building Science and Technology V

Credits: 2. Contact Hours: Lecture 2.

Prereq: ARCH 3480, ARCH 3480L; concurrent enrollment in ARCH 4450L

Final course in a sequence of architectural building technology courses comprising environmental systems, materials/assembly, and building structures topics. Using both lectures and labs, the three interrelated modules each emphasize a particular building technology subject with an overall focus on synthesizing and integrating building technologies together in sustainable design strategies. Topics include: integration of active environmental control and service systems into the design of larger scale buildings, the development of construction details for building shell and interiors, and the design and analysis of various long-span structural systems. Environmental modeling and simulation to develop the ability to integrate measurable outcomes of building performance. (Typically Offered: Fall)

ARCH 4450L: Building Science and Technology V Lab

Credits: 1. Contact Hours: Laboratory 2.

Prereq: Concurrent enrollment in ARCH 4450

Laboratory to accompany ARCH 4450 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format. (Typically Offered: Fall)

ARCH 4510: Whole Building Energy Performance Modeling

(Dual-listed with ARCH 5510).

Credits: 3. Contact Hours: Lecture 2, Studio 2.

Prereq: ARCH 2020; ARCH 3460; ARCH 3460L; or permission of instructor

Architectural design, design evaluation and technical analysis using energy, daylighting, and natural ventilation performance modeling tools. Emphasis will be given to whole building energy efficiency including passive and active systems integration. (Typically Offered: Spring)

ARCH 4820: Professional Practice

(Dual-listed with ARCH 5820).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior classification and ARCH 3710

Emphasis on the circumstances and opportunities of the professional practice of architecture: practice as profession, process, organization, business, and evolving models of practice. (Typically Offered: Fall)

ARCH 4860: Urban Design Explorations

Credits: 3. Contact Hours: Lecture 3.

An investigation of urban design realities in its contemporary form as part of International study abroad program in Rome. Credit counts toward fulfillment of History, Theory, Culture requirements. (Typically Offered: Spring)

ARCH 4900A: Independent Study: Design Communications.

Credits: 1-9. Repeatable.

Prereq: Instructor Permission for Course

Independent investigation.

ARCH 4900B: Independent Study: Design

Credits: 1-9. Repeatable.

Prereq: Instructor Permission for Course

Independent investigation.

ARCH 4900C: Independent Study: Building Science and Technology

Credits: 1-9. Repeatable.

Prereq: Instructor Permission for Course

Independent investigation.

ARCH 4900D: Independent Study: Architectural History

Credits: 1-9. Repeatable.

Prereq: Instructor Permission for Course

Independent investigation.

ARCH 4900E: Independent Study: Behavioral Studies

Credits: 1-9. Repeatable.

Prereq: Instructor Permission for Course

Independent investigation.

ARCH 4900F: Independent Study: Practice

Credits: 1-9. Repeatable.

Prereq: Instructor Permission for Course

Independent investigation.

ARCH 4900H: Independent Study: Honors

Credits: 1-9. Repeatable, maximum of 9 times.

Prereq: Instructor Permission for Course

Independent investigation.

Courses primarily for graduate students, open to qualified undergraduates:

ARCH 5050: Architectural Design and Media I: Mapping, Programming, Building

Credits: 6. Contact Hours: Studio 12.

An introduction to comprehensive architectural design projects that focuses on three interrelated design skills: mapping, programming and building. Projects establish a framework for designing buildings that considers multiple factors such as environmental forces, construction methods, building codes, urban regulations, social relationships, and cultural values. (Typically Offered: Fall)

ARCH 5060: Architectural Design and Media II: Materiality and Representation

Credits: 6. Contact Hours: Studio 12.

Small-scale architectural design projects that investigate design representation through analogue and digital means. The projects explore different representation strategies to help students develop an understanding of the particular modes of architectural representation that advance the designer's knowledge of space as a complex interaction between materials with inherent physical characteristics, mobile socializing bodies, and changing environmental cycles. (Typically Offered: Spring)

ARCH 5070: Architectural Design and Media III: Design in Detail

Credits: 5. Contact Hours: Studio 10.

Design projects that emphasize the multi-faceted role of the architectural detail in the design process through first, understanding the historical specificity of building construction and detailing; second, utilizing working drawing as a mode of communication; and third, designing with details. (Typically Offered: Summer)

ARCH 5160: Exhibiting Architecture

Credits: 3. Contact Hours: Lecture 3.

History and theory of architectural exhibitions from the 19th century until today. Weekly readings with in-class discussions and a small curatorial project. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 5170: Big and Tall: A History of Construction

(Dual-listed with ARCH 4170).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

History, theory, and principles of construction from ancient times through today. Analytic project or term paper and weekly readings with discussion questions. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 5180: Balkans to Baltics: Architecture and Innovation in Europe's Middle

Credits: 3. Contact Hours: Lecture 3.

History and theory of 20th century architecture in East- Central Europe. Analytic project or term paper and weekly readings with in-class discussion. Credit counts toward fulfillment of History, Theory, Culture requirements. Meets International Perspectives Requirement.

ARCH 5210: Celluloid Cities, Urbanism in Film

Credits: 3. Contact Hours: Lecture 3.

Urban theory and history as manifested in popular films and videos, both fiction and documentary. Term projects require students to make short videos. (Experience with video-making not necessary.) Credits counts towards fulfillment of History, Theory, Culture requirement.

ARCH 5220: Complex Adaptive Systems Theory for the Design of Built Environments

Credits: 3. Contact Hours: Lecture 3.

The principles of complex adaptive systems theory are studied and then applied towards the design of resilient and responsive built environments. Topics cover a broad spectrum, including urban informalities, tactical approaches, the capacity of digital infrastructures to coordinate distributed human practices, and emergent phenomena. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 5250: Meaning and Form in Architecture

Credits: 3. Contact Hours: Lecture 3.

Seminar on critical analysis of meaning and form in architecture and human-made environment in various cultural contexts examined from historical and theoretical perspectives. Analytic term paper and weekly readings with discussion questions. Credit counts toward fulfillment of History, Theory, Culture requirements. Meets International Perspectives Requirement.

ARCH 5270: History, Theory, and Criticism of Chinese Architecture

(Dual-listed with ARCH 4270).

Credits: 3. Contact Hours: Lecture 3.

The history and theoretical concept of Chinese built environment with emphasis on the morphology of built form and its relationship to art, landscape design, and urban structure. Credit counts toward fulfillment History, Theory, Culture. Meets International Perspectives Requirement. (Typically Offered: Fall)

ARCH 5280A: Studies in Architecture: Culture

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 times.

Prereq: ARCH 2200, ARCH 2210, and ARCH 3220 or senior classification or graduate standing.

Topical offerings change by semester. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 5280B: Studies in Architecture: Technology

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 times.

Studies in Architecture: Technology.

ARCH 5280C: Studies in Architecture: Communications

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 times.

Studies in Architecture: Communications.

ARCH 5280E: Studies in Architecture: Practice

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 times.

Studies in Architecture: Practice.

ARCH 5300: Formworks

Credits: 3. Contact Hours: Lecture 3.

Studies and activities showing fabrication as a means of speculation and discourse about materiality. Focus is given to the concepts and values embedded in materials and how we build at various scales. (Typically Offered: Fall, Spring)

ARCH 5310: Drawing Culture

Credits: 3. Contact Hours: Lecture 3.

Exploration of theories and practices that center on drawing as a fundamental means of knowing.

ARCH 5330: Digital Fabrication

(Dual-listed with ARCH 4330).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Exploration of the computer as a design and manufacturing tool.

Emphasis on developing digital fabrication technologies and workflows. (Typically Offered: Fall, Spring)

ARCH 5340: Topics in Computer-aided Architectural Design

Credits: 3. Repeatable, maximum of 6 credits.

Emphasis on advanced, exploratory approaches to design computing.

Projects highlight experimentation and integration of multiple media types. (Typically Offered: Fall)

ARCH 5350: Advanced Three-Dimensional Studio

Credits: 3. Repeatable, maximum of 6 credits.

Advanced investigation of sculptural expression with emphasis on individual projects.

ARCH 5360: Advanced Design Media

(Dual-listed with ARCH 4360).

Credits: 3. Repeatable, maximum of 6 credits.

Special topics in design media applications. (Typically Offered: Fall, Spring)

ARCH 5380: Architectural Robotics

(Dual-listed with ARCH 4380).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 credits.

Exploration of robots as design and manufacturing tools for architects.

Emphasis on developing robotic technologies and workflows with relevance to architectural design.

ARCH 5390: Computational Design Theory

Credits: 0-99. Contact Hours: Lecture 3.

What is the role of the human designer when automation, simulation, and other computationally-driven processes enter into the picture?

This seminar approaches such questions from the perspective of architecture and design, supplemented with multidisciplinary readings from mathematics, cognitive science, computer science, evolutionary biology, and philosophy. Students will cultivate a sense of what is possible with new technologies, and to begin to articulate a position -- a theory or theories -- of how humans and computers will design together in the future. Participation required in class discussions and constructive debates. Final project is a research paper.

ARCH 5400: Regimes of Perception

Credits: 3. Contact Hours: Lecture 3.

Exploration of theories, methodologies, and apparatuses of projection as a spatial and material practice. Readings and discussions accompany assignments for projection through drawing, fabrication, and performance. (Typically Offered: Fall, Spring)

ARCH 5430: Building Science and Technology I

Credits: 6.

Introduction to analytical, experimental, and computational methods to understand the impacts of building physics and mechanics of the built environment on human health, safety, and welfare at building scales.

Lectures and labs cover environmental forces and systems, materials & assemblies, fundamental structural principles, and digital modeling.

ARCH 5440: Building Science and Technology II

Credits: 3. Contact Hours: Lecture 2, Studio 2.

Extension to the understanding of fundamental building technologies and their impacts. Lectures and labs cover building assemblies, enclosure systems, structural framing components, water management, and measurable indoor environment, to further understand the impact of the built environment on human health, safety, and welfare.

ARCH 5510: Whole Building Energy Performance Modeling

(Dual-listed with ARCH 4510).

Credits: 3. Contact Hours: Lecture 2, Studio 2.

Architectural design, design evaluation and technical analysis using energy, daylighting, and natural ventilation performance modeling tools. Emphasis will be given to whole building energy efficiency including passive and active systems integration. (Typically Offered: Spring)

ARCH 5580: Sustainability and Green Architecture

Credits: 3. Contact Hours: Lecture 3.

Issues of sustainability as related to living patterns and city design, population, pollution and use and availability of natural resources for the built environment. Issues of green and sustainable architecture as related to critical thinking about methods of building material selection and systems, the environment of the United States and the world, and examples of green or sustainable building designs.

ARCH 5670: Preservation, Restoration, Rehabilitation, Cultural Heritage, and Technology

Credits: 3. Contact Hours: Lecture 3.

Standards and procedures-including the use of current digital technologies-for preserving, restoring, reconstructing, and rehabilitating existing buildings following the guidelines of the National Park Service and the National Trust for Historic Preservation. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 5680: Historic Preservation

Credits: 3. Contact Hours: Lecture 3.

The history and theory of the Historic Preservation movement including an overview of the National Trust for Historic Preservation; the National Register of the Historic Places; the National Park Service; federal programs, funding sources, preservation law, national landmarks, and historic districts. Credit counts toward fulfillment of History, Theory, Culture requirements. (Typically Offered: Fall)

ARCH 5710: Design for All People

(Cross-listed with GERON 5710).

Credits: 3. Contact Hours: Lecture 3.

Principles and procedures of inclusive design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of History, Theory, Culture requirements. (Typically Offered: Spring)

ARCH 5750: Contemporary Urban Design Theory

Credits: 3. Contact Hours: Lecture 3.

Current urban design theory and its application to urban problems. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 5760: Study Abroad Options

Credits: 1-12. Contact Hours: Lecture 12.

Repeatable, maximum of 12 credits.

Special topics in environmental design, architectural history and contemporary practice. Travel to relevant countries. General cultural and historical studies, topical projects and individual inquiry. Courses may be taught by departmental faculty or faculty from approved Iowa State Study Abroad programs. See current offerings for detailed syllabus. Meets International Perspectives Requirement. (Typically Offered: Summer)

ARCH 5790X: Methods for Interdisciplinary Research

(Cross-listed with HCI 5790X).

Credits: 3. Contact Hours: Lecture 3.

Introduction to qualitative, quantitative, and experimental methods for interdisciplinary research. Themes drawn from architectural history, design fields, human computer interaction, and applied social sciences; guest speakers attend to present their research methodologies. Students develop a research paper on a topic of their choice.

ARCH 5810: Making and Material Practice

Credits: 5. Contact Hours: Lecture 1, Studio 12.

Planning and execution of a project serving a community need. Learning occurs through both theory and active involvement in on-site work. Projects connect previous coursework to practical applications and community involvement. (Typically Offered: Summer)

ARCH 5820: Professional Practice

(Dual-listed with ARCH 4820).

Credits: 3. Contact Hours: Lecture 3.

Emphasis on the circumstances and opportunities of the professional practice of architecture: practice as profession, process, organization, business, and evolving models of practice. (Typically Offered: Fall)

ARCH 5900: Special Topics

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

Investigation of architectural issues having a specialized nature.

ARCH 5950: Seminar on the Built Environment I: History

Credits: 3. Contact Hours: Lecture 3.

Introduction to historical canons and traditions of architecture and urbanism. Discussion of the relationship between historical inquiry and contemporary practice. Students learn skills in critical thinking, visual analysis, and research methods. Course sessions develop thematically with interdisciplinary readings, group discussions, student presentations, and research projects. (Typically Offered: Fall)

ARCH 5960: Seminar on the Built Environment II: Landscape and Society

Credits: 3. Contact Hours: Lecture 3.

Introduction to landscape as artifact and multi-disciplinary knowledge-base for design thinking. Literatures and methods of environmental psychology, cultural geography, landscape and architectural history and theory, site and circulation design as intersection of built infrastructural, natural, and social systems. Emphasis on sensory perception, and human movement; investigations of climate, environmental conditions, and values toward consumption and sustainability in everyday experience of the built environment. (Typically Offered: Spring)

ARCH 5970: Seminar on the Built Environment III: Theory

Credits: 3. Contact Hours: Lecture 3.

Multidisciplinary overview of contemporary theories concerned with the production of the built environment. Particular attention to urbanism as a discourse that relates social interactions and power structures to material space. Credit counts toward fulfillment of History, Theory, Culture requirements. Meets International Perspectives Requirement. (Typically Offered: Fall)

ARCH 5980: Seminar on the Built Environment IV: Topical Study

Credits: 3. Contact Hours: Lecture 3.

A research seminar which considers a topic within contemporary discourses on the built environment outside of Europe and North America. The topic will be studied from multiple perspectives highlighting the historical and theoretical relationships between architecture, global cultures, geography, landscape, and urban planning. Credit counts toward fulfillment History, Theory, Culture requirements. (Typically Offered: Spring)

Courses for graduate students:**ARCH 6010: Sustainable Building Design**

Credits: 6. Contact Hours: Studio 12.

Design projects that are developed through integrative design strategies that explore the relationship between buildings and environmental forces to maximize non-wasteful, efficient use of resources such as energy, water and building materials. Projects will include investigations of the impact of solar energy, airflow, building materials, passive and active systems and wall sections on spatial quality and form making while demonstrating synthesis of user requirements, regulatory requirements, site conditions, and accessible design. Design decisions will be quantitatively validated through energy modeling and performance simulation. (Typically Offered: Fall)

ARCH 6020: Communities, Architecture and the Environment

Credits: 6. Contact Hours: Studio 12.

Design projects that explore the relationships between architectural, cultural, and environmental landscapes. Emphasis on regional sites, socio-economic conditions, and sustainable design and planning practices at multiple scales. Projects stress engagement with local circumstances and stakeholders; systemic interconnections and strategies; and the application of interdisciplinary research. (Typically Offered: Spring)

ARCH 6030: Integrative Design

Credits: 6. Contact Hours: Studio 12.

Repeatable.

Rigorous examination of architecture's relationship with culture and technology. Studio projects stress the interpretation of contextual and historical considerations while demonstrating broad integration and consideration of environmental stewardship, technical documentation, accessibility, site conditions, life safety, environmental systems, structural systems, and building envelope systems and assemblies. This course fulfills the Graduate College Creative Component Requirement. (Typically Offered: Fall)

ARCH 6040: Design Studio Options

Credits: 6. Contact Hours: Studio 12.

Repeatable, maximum of 12 credits.

Design studio selected by the students, which may include but is not limited to: independent design study, interdisciplinary design studio, study abroad, and design build. DSNS 5460 for 6 cr. may be substituted for this course. (Typically Offered: Spring)

ARCH 6410: Building Science and Technology III

Credits: 3.

Synthesis of building technologies and design process to understand the impacts of building technologies on occupants and the natural/urban environment. Lectures and labs cover active environmental control systems, fire safety, transportation, constructed building assemblies and details, multi-story structural design, and the utilization of computational simulations.

ARCH 6420: Building Science and Technology IV

Credits: 3. Contact Hours: Lecture 2, Studio 2.

Explorations of emerging building technologies and their impacts on the environment and society. A view into emerging technologies in architecture with an emphasis on adaptability through experimentation and inquiries. Topics include novel materials, assembly techniques, long-span structural systems, renewable energy production, and smart systems.

ARCH 6900: Independent Design Study

Credits: 6. Repeatable.

Prereq: Instructor Permission for Course

Independent architectural design projects commensurate with student interests requiring approval of Architecture Graduate Committee.

ARCH 6980: Graduate Seminar

Credits: Required. Contact Hours: Lecture 1.

Repeatable.

Special topics and guest speakers. (Typically Offered: Fall, Spring)

ARCH 6990: Research

Credits: 1-9. Repeatable.

Prereq: Instructor Permission for Course

Research.

Art Education (ARTED)

Courses primarily for undergraduates:

ARTED 2090: Methods of Teaching in and Through Art

Credits: 2. Contact Hours: Studio 4.

Prereq: Sophomore classification

Methods of teaching in and through visual art are experienced and applied in this course. Art-centered and interdisciplinary art education methods for K-8 teaching are designed to develop creativity, authentic expression, collaboration, aesthetic sensitivity and pluralistic, global perspectives. (Typically Offered: Fall, Spring)

ARTED 2110: Introduction to Art Education

Credits: 3. Contact Hours: Studio 6.

Prereq: Sophomore classification

Teaching methods for K-12 art education. Hands-on discipline-specific and integrated art activities are experienced and designed; emphasis is on creativity, artistic and human diversity, community building, and development of thinking skills in holistic, pluralistic art education. (Typically Offered: Fall, Spring)

ARTED 4900: Independent Study

Credits: 1-30.

Prereq: Instructor Permission for Course

(Typically Offered: Fall)

Art History (ARTH)

Courses primarily for undergraduates:

ARTH 2800: History of Art I

Credits: 3. Contact Hours: Lecture 3.

Development of the visual arts including painting, sculpture, architecture, and crafts, from the prehistoric through Gothic periods. Meets International Perspectives Requirement. (Typically Offered: Fall)

ARTH 2810: History of Art II

Credits: 3. Contact Hours: Lecture 3.

Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century. Meets International Perspectives Requirement. (Typically Offered: Spring)

ARTH 2810H: History of Art II: Honors

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century. Meets International Perspectives Requirement. (Typically Offered: Spring)

ARTH 2920: Introduction to Visual Culture Studies

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

An introduction to various topics in visual culture studies, including significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture.

ARTH 2930: Origins and Evolution of Modern Design

Credits: 3. Contact Hours: Lecture 3.

History of designed artifacts, their creators, and their cultural environments in Europe and America from the beginning of the Industrial Revolution to the present.

ARTH 3820: Art and Architecture of Asia

Credits: 3. Contact Hours: Lecture 3.

Introduction to histories of art and architecture in Asia before the modern era. Cultures may include China, Korea, Japan, and India. Art traditions of Asia are explored in relation to their cultural, historical, and religious contexts. Meets International Perspectives Requirement.

ARTH 3830: Greek and Roman Art

(Cross-listed with CLST 3830).

Credits: 3. Contact Hours: Lecture 3.

Greek art from Neolithic to Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

ARTH 3830H: Greek and Roman Art: Honors

(Cross-listed with CLST 3830H).

Credits: 3-4. Contact Hours: Lecture 3.

Greek art from Neolithic to Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

ARTH 3840: Art of Islam

Credits: 3. Contact Hours: Lecture 3.

Historical survey of the painting, sculpture, crafts, and architecture of the various civilizations of the Islamic world. Meets International Perspectives Requirement.

ARTH 3840H: Art of Islam: Honors

Credits: 3-4. Contact Hours: Lecture 3.

Historical survey of the painting, sculpture, crafts, and architecture of the various civilizations of the Islamic world. Meets International Perspectives Requirement.

ARTH 3850: Renaissance Art

Credits: 3. Contact Hours: Lecture 3.

European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

ARTH 3850H: Renaissance Art: Honors

Credits: 3-4. Contact Hours: Lecture 3.

European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

ARTH 3860: American Art to 1945

Credits: 3. Contact Hours: Lecture 3.

Survey of American art from the early colonial period to 1945, with emphasis on historical and cultural issues that underlie art production in the United States. Meets U.S. Diversity Requirement.

ARTH 3880: Modern Art and Theory

Credits: 3. Contact Hours: Lecture 3.

Visual arts and critical theory of the late 19th and early 20th centuries, including Expressionism, Cubism, Futurism, Suprematism, Dada, and Surrealism.

ARTH 3950: Art and Theory Since 1945

Credits: 3. Contact Hours: Lecture 3.

Visual arts and critical theory after 1945, including Abstract Expressionism, Pop Art, and Performance Art. Meets U.S. Diversity Requirement.

ARTH 3960: History of Photography

Credits: 3. Contact Hours: Lecture 3.

Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an art historical perspective, emphasizing causative factors, cultural influences, and major masters and schools.

ARTH 4600: The World on Display

Credits: 3. Contact Hours: Lecture 3.

Survey of world's fairs and other international exhibitions, focusing on their displays of art, manufacturing, luxury goods and industrial products, and relating to overarching discourses of nationalism, colonialism, and political supremacy as they were articulated within the exhibitions.

ARTH 4860: Art History Field Study

Credits: Required. Repeatable.

Prereq: Concurrent Enrollment in an ARTH course; Permission of Instructor
Study and tours of museums, galleries, artist and/or designer studios and other areas of interest within art history. Offered on a satisfactory-fail basis only.

ARTH 4870: Nineteenth-Century Art

Credits: 3. Contact Hours: Lecture 3.

European and American art and architecture from 1780 to 1900 focusing on the major movements of western Europe, including Neoclassicism, Romanticism, Realism, Impressionism, and Post-Impressionism.

ARTH 4890: History of Comics

(Dual-listed with ARTH 5890).

Credits: 3. Contact Hours: Lecture 3.

An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to present.

ARTH 4890H: History of Comics: Honors

Credits: 3-4. Contact Hours: Lecture 3.

An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to present.

ARTH 4900: Independent Study

Credits: 1-6. Repeatable.

Prereq: Permission of Instructor; Permission of Department Chair

Student must have completed art history coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTH 4900H: Independent Study: Honors

Credits: 1-6. Repeatable.

Prereq: Permission of Instructor; Permission of Department Chair

Student must have completed art history coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTH 4910: Art History in Europe Seminar

Credits: 1. Contact Hours: Lecture 1.

Prereq: Permission of instructor; credit or enrollment in ARTH 4920

Cultural and historical aspects of art and design in Western Europe in preparation for study abroad. Area of study varies each time offered. Offered on a satisfactory-fail basis only. Meets International Perspectives Requirement.

ARTH 4920: Art History In Europe

(Dual-listed with ARTH 5920).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ARTH 4910

International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Meets International Perspectives Requirement.

ARTH 4940: Women/Gender in Art

(Cross-listed with WGS 4940).

Credits: 3. Contact Hours: Lecture 3.

Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.

ARTH 4970: Museum/Gallery Internship

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Permission of Instructor; Permission of Department Chair

Supervised experience with a cooperating museum or gallery or art center. Offered on a satisfactory-fail basis only.

ARTH 4980: Selected Topics in Art History

(Dual-listed with ARTH 5980).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Specialized study in the history or criticism of art and/or design.

ARTH 4990: Visual Culture Studies Writing and Methods Seminar

Credits: 3. Contact Hours: Lecture 3.

Sustained exploration of topics related to Visual Culture Studies. Course incorporates introduction to methods central to the field of visual culture studies, writing exercises, and guided instruction in the process of conducting research and reporting results of the research process. Course will result in an original paper.

Courses primarily for graduate students, open to qualified undergraduates:

ARTH 5010: Issues in Visual and Material Culture Seminar

Credits: 3. Contact Hours: Lecture 3.

Issues and debates that pertain to the study of visual objects and material artifacts in their cultural context. Examination of the role of visual and material culture studies as both relate to allied disciplines including, but not limited to: anthropology, art history, design history, design studies, and new media studies. (Typically Offered: Fall, Spring, Summer)

ARTH 5860: Museum/Gallery Internship

Credits: 1-6. Repeatable, maximum of 6 credits.

Prereq: Instructor Permission for Course

Supervised experience with a cooperating museum or gallery or art center. Offered on a satisfactory-fail basis only.

ARTH 5870: Nineteenth Century Art

Credits: 3. Contact Hours: Lecture 3.

European and American art and architecture from 1780 to 1900, focusing on the major movements of western Europe, including Neoclassicism, Romanticism, Realism, Impressionism, and Post-Impressionism.

ARTH 5880: Modern Art and Theory

Credits: 3. Contact Hours: Lecture 3.

Visual arts and critical theory of the late 19th and early 20th centuries, including Expressionism, Cubism, Futurism, Suprematism, Dada and Surrealism.

ARTH 5890: History of Comics

(Dual-listed with ARTH 4890).

Credits: 3. Contact Hours: Lecture 3.

An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to present.

ARTH 5900: Special Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Independent Study in Art History.

ARTH 5920: Art History in Europe

(Dual-listed with ARTH 4920).

Credits: 3. Contact Hours: Lecture 3.

International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Meets International Perspectives Requirement.

ARTH 5940: Women/Gender in Art

(Cross-listed with WGS 5940).

Credits: 3. Contact Hours: Lecture 3.

Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.

ARTH 5950: Art and Theory Since 1945

Credits: 3. Contact Hours: Lecture 3.

Visual arts and critical theory after 1945, including Abstract Expressionism, Pop Art, and Performance Art.

ARTH 5960: History of Photography

Credits: 3. Contact Hours: Lecture 3.

Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an art historical perspective, emphasizing causative factors, cultural influences, and major masters and schools.

ARTH 5970: Green Art: Earthworks and Beyond

Credits: 3. Contact Hours: Lecture 3.

Seminar covering aspects of art and design based on ecological principles, including earthworks, land-based art, recycled/reused objects, ecofeminism, ephemerality, and green design. .

ARTH 5980: Selected Topics in Art History

(Dual-listed with ARTH 4980).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Specialized study in the history or criticism of art and/or design.

Astronomy and Astrophysics (ASTRO)

Courses primarily for undergraduates:

ASTRO 1020: North Star Astronomy

Credits: 1. Contact Hours: Lecture 1.

An entirely web-based course covering topics in observing the sky and navigation by the stars for students with little or no previous experience. The course combines material on common naked-eye phenomena, such as daily and seasonal variations in the sky, with information on how these helped navigators determine where they are on Earth. The course "lectures" are on-line, interactive units with built-in exercises, hands-on (offline) activities and layers of help. Graded homework and quizzes are administered via Canvas. Graduation Restriction: Students who take ASTRO 1200 may count credit in only one of ASTRO 1020 or 1030 toward graduation. (Typically Offered: Fall, Spring, Summer)

ASTRO 1030: Evening Star

Credits: 1. Contact Hours: Lecture 1.

An entirely web-based course covering topics in celestial mechanics ("Rocket science!") for students with little or no previous experience. It combines the geography of the solar system with discussion of methods of traveling to the other planets. The course "lectures" are on-line, interactive units with built-in exercises, hands-on (offline) activities, and layers of help. Graded homework and quizzes are administered via Canvas. Graduation Restriction: Students who take ASTRO 1200 may count credit in only one of ASTRO 1020 or 1030 toward graduation. (Typically Offered: Fall, Spring, Summer)

ASTRO 1200: The Sky and the Solar System

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

For the nonscientist. A survey of our view of the universe, and the exploration of the solar system and beyond. The sky: constellations; motions of the Sun, Moon, and planets; seasons and the calendar; eclipses. The solar system: origin and evolution; characteristics of the Sun, planets, satellites, comets, meteorites, and asteroids. The detection and characterization of other solar systems, and the search for life in the universe. Extensive use of the planetarium is included. (Typically Offered: Fall, Spring, Summer)

ASTRO 1500: Stars, Galaxies, and Cosmology

Credits: 3.

For the nonscientist. A survey of astronomy with a focus on the universe beyond our solar system. Basic observational astronomy and the history of astronomy. Stellar astronomy: motions, distances, sizes, spectra; types of stars; variability; binary systems. Stellar evolution: the birth, life, and death of stars, including supernovae, neutron stars, and black holes. The structure and evolution of the Milky Way Galaxy. Other galaxies, clusters of galaxies, quasars. Theories of the origin of the universe. (Typically Offered: Fall, Spring)

ASTRO 2500: Astronomy Bizarre

Credits: 3. Contact Hours: Lecture 3.

Prereq: ASTRO 1200 or ASTRO 1500

For the nonscientist. A small enrollment course examining new and exciting topics in modern astronomy. Galaxy and star formation. Black holes and pulsars. Colliding galaxies. Quasars. Dark Matter. Dark energy. Quasars. Cosmology, the Big Bang and the future of the universe. Prospects and searches for extraterrestrial life. (Typically Offered: Spring)

ASTRO 2900: Independent Study

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

ASTRO 3420: Introduction to Solar System Astronomy

Credits: 3. Contact Hours: Lecture 3.

Prereq: (PHYS 2320 and PHYS 2320L) or PHYS 2420

An introduction to the physics of the Solar System and the planetary systems discovered around other stars. General characteristics of planetary systems: dynamics, thermodynamics, internal and surface structure of planets and minor bodies, physics of their atmosphere. Discovery techniques and characterization of extrasolar planets, and planetary systems formation models. 'Grand tour' of the Solar System, using data and imagery from probes and telescopes that have visited these worlds. The origin and evolution of life on Earth, and the ongoing search for life in the Solar System and elsewhere in the universe. (Typically Offered: Fall)

ASTRO 3440L: Astronomy Laboratory

Credits: 3. Contact Hours: Lecture 1, Laboratory 6.

Prereq: (PHYS 2320 and PHYS 2320L) or PHYS 2420

Experiments in optical astronomy. Observational techniques, ranging from stellar photometry to CCD imaging. Data processing and analysis techniques. Astronomical software packages and online databases and resources. Available instruments include a variety of small telescopes and astronomical CCD cameras. (Typically Offered: Fall)

ASTRO 3460: Introduction to Astrophysics

Credits: 3. Contact Hours: Lecture 3.

Prereq: (PHYS 2320 and PHYS 2320L) or PHYS 2420

An exploration of the universe beyond our Solar System, with emphasis on the astrophysics of stars and galaxies. Observable properties of stars, physics of stellar atmospheres and interiors. Birth, evolution and death of stars, to understand the past and future of our Sun, the Milky Way galaxy and the other galaxies in the universe. Basic concepts of cosmology, dark matter and dark energy. Use of computer models to calculate the structure and evolution of stars and protostars, and to analyze actual astronomical data obtained by professional astronomers. (Typically Offered: Spring)

ASTRO 4050: Astrophysical Cosmology

(Dual-listed with ASTRO 5050).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ASTRO 3460 or permission of instructor

Introduction to modern cosmology and large-scale structure; mathematical and observational fundamentals associated with the origin, structure, and evolution of the Universe. Scale of the Universe, Hubble's Law, the cosmic microwave background, Big Bang nucleosynthesis, the origin of elements, dark energy and the accelerating universe, and dark matter. For senior undergraduates and graduate students in all areas of physics. (Typically Offered: Spring)

ASTRO 4500: Undergraduate Research

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

Research under supervision of astronomy faculty. (Typically Offered: Fall, Spring, Summer)

ASTRO 4500L: Undergraduate Research

Credits: 1-6. Repeatable.

Prereq: ASTRO 3440L and permission of instructor

Laboratory or observational project under supervision of astronomy faculty. (Typically Offered: Fall, Spring, Summer)

ASTRO 4900: Independent Study

Credits: 1-4. Repeatable, maximum of 9 credits.

Prereq: 6 credits ASTRO; permission of instructor

Graduation Restriction: No more than 9 credits of ASTRO 4900 may be counted toward graduation.

ASTRO 4900H: Independent Study: Honors

Credits: 1-4. Repeatable, maximum of 9 credits.

Prereq: 6 credits ASTRO; permission of instructor

Graduation Restriction: No more than 9 credits of ASTRO 4900 may be counted toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

ASTRO 5050: Astrophysical Cosmology

(Dual-listed with ASTRO 4050).

Credits: 3. Contact Hours: Lecture 3.

Introduction to modern cosmology and large-scale structure; mathematical and observational fundamentals associated with the origin, structure, and evolution of the Universe. Scale of the Universe, Hubble's Law, the cosmic microwave background, Big Bang nucleosynthesis, the origin of elements, dark energy and the accelerating universe, and dark matter. For senior undergraduates and graduate students in all areas of physics. (Typically Offered: Spring)

ASTRO 5100: Observational Astrophysics

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Techniques in optical and near-IR astronomy, including spectroscopy and CCD photometry. Emphasis on projects involving proficiency in the use of research telescopes and modern instrumentation. Project topics range from photometric studies of pulsating and binary star systems to deep CCD imaging of faint nebulae and galaxies. Offered irregularly. (Typically Offered: Fall, Spring)

ASTRO 5800: Stellar Astrophysics

Credits: 3. Contact Hours: Lecture 3.

The interior structure and atmospheric properties of stars: Stellar structure equations and constitutive relations: energy generation, energy transport by radiation and convection; equation of state, nuclear energy generation and nucleosynthesis. Numerical and analytic solutions to the equations of structure and evolution. Observational connections through the theory of radiative transfer. Line and continuum processes and sources of opacity. Non-LTE and statistical equilibrium. Line profiles. Interpretation of stellar spectra: temperature, pressure, and abundance determinations. Stellar evolution from formation to final phases. Offered irregularly. (Typically Offered: Fall, Spring)

ASTRO 5820: High Energy Astrophysics

Credits: 3. Contact Hours: Lecture 3.

Prereq: ASTRO 4050 or ASTRO 5050 or Permission of Instructor

Interactions of high-energy particles, non-thermal radiation processes, spectral evolution of non-thermal systems, cosmic rays, active galactic nuclei, pulsars, neutrinos, measurement techniques for relativistic charged particles, high energy photons, and neutrinos. Offered irregularly. (Typically Offered: Fall, Spring)

ASTRO 5840: Galactic Astronomy

Credits: 3. Contact Hours: Lecture 3.

Overall structure of our Galaxy and the interstellar medium. Physical processes in the interstellar medium (e.g., heating and cooling mechanisms, turbulence). Observational techniques for studying the interstellar medium. Kinematics and chemical evolution of the Galaxy. Offered irregularly. (Typically Offered: Fall, Spring)

ASTRO 5860: Extragalactic Astronomy

Credits: 3. Contact Hours: Lecture 3.

Galaxy evolution, dynamics of external galaxies, evolution and classification of galaxies, groups and clusters of galaxies, extragalactic radio sources, quasars, structure formation, cosmological models and their observational consequences. Offered irregularly. (Typically Offered: Fall, Spring)

ASTRO 5900: Special topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

ASTRO 5990: Creative Component

Credits: 1-30.

Prereq: Instructor Permission for Course

Individually directed study of research-level problems for students electing the nonthesis M.S. option in astronomy.

Courses for graduate students:**ASTRO 6500: Advanced Seminar**

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Topics of current interest in astronomy and astrophysics. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ASTRO 6750: Advanced Stellar Astrophysics

Credits: 3. Contact Hours: Lecture 3.

Prereq: ASTRO 5800 or Permission of Instructor

Advanced topics in stellar astrophysics. Dynamic and extended atmospheres, chromospheres, coronae, and stellar winds. MHD, stellar activity, and dynamo theory. Radiative transfer and the transition from extended atmospheres to the interstellar medium. Diffusive processes in stellar atmospheres and interiors. Techniques for quantitative analysis of planetary and stellar spectra including detailed modeling and spectrum synthesis. Evolution in interacting binaries. Nucleosynthesis II. Variable stars. Supernovae. Neutron stars and black holes. Offered irregularly. (Typically Offered: Fall, Spring)

ASTRO 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Athletic Training (ATR)

Courses primarily for undergraduates:**ATR 2170: Clinical Practicum in Athletic Training I**

Credits: 1.

Prereq: ATR 2210; Permission of Athletic Training Program Director

Athletic training clinical experiences for pre-athletic training students. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

ATR 2180: Orientation to Athletic Training Clinical Experience

Credits: 0.5. Contact Hours: Laboratory 2.

Repeatable, maximum of 1 credits.

Pre-athletic training clinical experience designed to orientate students to the athletic training profession prior to enrolling in athletic training course sequence. Students will observe athletic trainers in various athletic training clinical sites. Open to pre-athletic training students only. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATR 2190: Anatomy Clinical Practicum

Credits: 1. Contact Hours: Laboratory 2.

Athletic training clinical experiences designed to review human anatomical structures including origin, insertion, action, innervations of muscles. Students will gain experience with palpation of these structures to help identify location of anatomical landmarks. Students will also gain experience identifying bones, ligaments, and tendons. Open to athletic training students only. (Typically Offered: Spring)

ATR 2200: Basic Athletic Training

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Prereq: BIOL 1550 or BIOL 2550 and BIOL 2560

Introduction to methods of prevention and immediate care of athletic injuries. Basic information concerning health supervision of athletes, and some basic wrapping and strapping techniques for common injuries.

ATR 2210: Pre-Athletic Training Clinical Practicum

Credits: 1. Contact Hours: Laboratory 3.

Athletic training clinical observation experiences to accompany ATR 2200. Utilize knowledge to evaluate, analyze and demonstrate appropriate taping, wrapping and basic skill techniques. Open to students interested in the athletic training option. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

ATR 2230: Preseason Clinical Experience Practicum

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Permission of Clinical Coordinator

Athletic training clinical experiences for athletic training students during pre-season intercollegiate football. Clinical experiences include: Emergency care, splinting and spinal immobilization, medical record keeping and HIPPA regulations, environmental conditions, prevention of injury screening strategies, athletic training room and education program policies and procedures, review of athletic taping techniques, acute injury management, and anatomy review. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

ATR 2280: Basic Orthopedic Assessment and Evaluation Principles

Credits: 2.

Prereq: ATR 2190
