

Iowa State University

Courses and Programs Catalog 2024 - 2025

The Iowa State University Catalog

The Iowa State University Catalog is a one-year publication which lists all academic policies, and procedures.

The catalog also includes the following: information for fees; curriculum requirements; first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.

Iowa State University does not discriminate on the basis of race, color, age, ethnicity, religion, national origin, pregnancy, sexual orientation, gender identity, genetic information, sex, marital status, disability, or status as a U.S. veteran. Inquiries regarding non-discrimination policies may be directed to the Director, Office of Equal Opportunity, Title IX/ADA Coordinator, and Affirmative Action Officer, 3350 Beardshear Hall, Ames, Iowa 50011, Tel. 515 294-7612, email eooffice@iastate.edu.

TABLE OF CONTENTS

About the Catalog	7	Dairy Science	153
Accreditation and Administration	8	Diet and Exercise (AGLS)	157
Admissions	9	Dietetics (AGLS)	160
Student Housing and Dining	16	Entomology	163
Tuition, Fees, and Expenses	17	Environmental Science	168
Student Financial Aid	21	Food Science (AGLS)	171
Student Services	22	Food Science and Human Nutrition	174
Student Life	26	Forestry	178
Exchange Programs & Study Abroad	28	Genetics	183
Student Records	29	Global Resource Systems	187
Academics	33	Horticulture	189
Academic Conduct	42	Industrial Technology	197
Grading	45	International Agriculture	203
Academic Standing	50	Learning and Leadership Sciences Minor	204
Registration	53	Microbiology	205
Information About Courses	59	Natural Resource Ecology and Management	208
Entry Level Courses	61	Nursing	223
Plan of Study - Soar in 4	86	Nutritional Science (AGLS)	225
Undergraduate Majors, Certificates, Minors, Pre-Professional Study	89	Occupational Safety Certificate	230
Pre-professional Study	93	Plant Pathology and Microbiology	231
College of Agriculture and Life Sciences	96	Sustainable Agriculture	241
Agricultural and Life Sciences Education	100	Ivy College of Business	244
Agricultural and Rural Policy Studies	103	Accounting	252
Agricultural Business	105	Actuarial Science	257
Agricultural Communication	107	Business Administration	260
Agricultural Studies	109	Business Analytics	266
Agricultural Systems Technology	112	Business Economics	269
Agronomy	115	Entrepreneurship	271
Animal Ecology	122	Finance	275
Animal Science	129	Healthcare Management	279
Biochemistry (AGLS)	137	Human Resource Management	280
Biology	143	International Business	282
Culinary Food Science (AGLS)	151	Management	286
		Management Information Systems	288
		Marketing	292

Supply Chain Management	298	Non-destructive Evaluation Minor	415
College of Design	302	Software Engineering	416
Architecture	308	Systems Engineering	420
Art and Design	312	College of Human Sciences	422
Community and Regional Planning	315	Apparel, Events, and Hospitality Management Department	428
Design Studies	319	Apparel, Merchandising, and Design	450
Graphic Design	321	Athletic Training	460
Industrial Design	324	Athletics	463

ABOUT THE CATALOG

The Iowa State University Catalog is a one-year publication, which lists all academic policies, and procedures. Versions prior to 2011 were two-year publications and available in hard copy as well as online.

The catalog also includes information for fees; curriculum requirements; first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

New programs may be offered in the term (semester or summer session) following final approval by the Board of Regents, State of Iowa and any required accrediting bodies. New courses developed and offered since catalog publication are called experimental courses. A list can be found on the Web at www.registrar.iastate.edu/faculty-staff/courses/explistsings. (<http://www.registrar.iastate.edu/faculty-staff/courses/explistsings/>)

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.

Updates to the Catalog

The curriculum process is governed by the Faculty Senate. The ad hoc committee, Faculty Senate Curriculum Committee (<http://www.facsen.iastate.edu/councils/academicaffairs/curriculum/>) considers new curricula proposals, changes and discontinuations to the catalog. Additional information may be in the college governance documents.

The curriculum approval process generally consists of a proposal from the department/program level, approved by the department/program curriculum committee (if applicable), college curriculum committee, and the dean. Additional approvals are needed from the Graduate College if the program proposal is a graduate program.

The program proposal is submitted to the Faculty Senate Curriculum committee for review. The Academic Affairs Committee reviews the proposal before passing it onto the Faculty Senate. The Board of Regents, State of Iowa approves all new programs and majors. For additional information about the approval process, see the link to Faculty Senate/ Faculty Handbook Curriculum Approvals – Section 10.8. See the Office of the Provost (<http://www.provost.iastate.edu/>) web site for more information.

Catalog updates are generally processed with approvals from department, college, and Faculty Senate Curriculum Committee (<http://www.facsen.iastate.edu/councils/academicaffairs/curriculum/>) representatives. Editing begins in late February with course changes

due to the Office of the Registrar by June 1. Curriculum and other general information are due to the Office of the Registrar by December 1. Publication is the following February.

See the catalog editing website (<http://www.registrar.iastate.edu/catalog-editing/>) for more details on how to make changes to the catalog.

ACCREDITATION AND ADMINISTRATION

Accreditation

Iowa State University is accredited by the Higher Learning Commission.

Higher Learning Commission

230 South LaSalle St., Suite 7-500

Chicago, IL 60604-1411

(800) 621-7440; (312) 263-0456

Fax: (312) 263-7462

info@hlcommission.org

www.hlcommission.org (<https://www.hlcommission.org>)

Board of Regents, State of Iowa

www.regents.iowa.gov/ (<http://www.regents.iowa.gov/>)

The laws of the United States and of the State of Iowa provide for resident academic instruction, research, and extension education, and for the management of Iowa State University of Science and Technology. The university and two other state educational institutions of higher learning are governed by the Board of Regents, State of Iowa, which is composed of nine members nominated by the Governor of Iowa and confirmed by the Senate of Iowa. The immediate regulation and direction of the academic, research, and extension activities of the university are delegated by the Board of Regents, State of Iowa, to the president and faculty of the university. The board appoints an executive director with overall responsibility for the administration of the central office of the board located in Urbandale, Iowa.

Officers of Administration

Wendy Wintersteen, Ph.D.

President of the University

Jonathan A. Wickert, Ph.D.

Senior Vice President and Provost

Heather Paris

Interim Senior Vice President for Operations and Finance

Toyia K. Younger, Ph.D.

Senior Vice President for Student Affairs

Kristen Constant, Ph.D.

Vice President and Chief Information Officer

Kristi Darr, M.B.A.

Vice President of University Human Resources

Jason Henderson, Ph.D.

Vice President for Extension and Outreach

Peter K. Dorhout, Ph.D.

Vice President for Research

Dawn Bratsch-Prince, Ph.D.

Interim Vice President for Diversity, Equity and Inclusion

Daniel Robison, Ph.D.

Dean of the College of Agriculture and Life Sciences

David P. Spalding, M.B.A.

Dean of the Ivy College of Business

Vice President for Economic Development and Industry Relations

Luis Rico-Gutierrez, M.S.

Dean of the College of Design

W. Samuel Easterling, Ph.D.

Dean of the College of Engineering

Laura D. Jolly, Ph.D.

Dean of the College of Human Sciences

Beate Schmittmann, Ph.D.

Dean of the College of Liberal Arts and Sciences

Dan Grooms, D.V.M., Ph.D.

Dean of the College of Veterinary Medicine

William R. Graves, Ph.D.

Dean of the Graduate College

Hilary T. Seo, M.S.

Dean of the Library

Dawn Bratsch-Prince, Ph.D.

Associate Provost for Faculty

Ann Marie VanDerZanden, Ph.D.

Associate Provost for Academic Programs

Sharron Evans, J.D.

Associate Vice President for Student Affairs and Dean of Students

ADMISSIONS

Office of Admissions

Executive Director of Admissions and New Student Programs

Katharine Johnson Suski

Admission

When to Apply

Applicants for the fall semester are encouraged to apply during the fall of the year preceding their entry to Iowa State University. Applications for other terms should be submitted well in advance of the desired entry date.

Application deadlines are available at www.admissions.iastate.edu. (<http://www.admissions.iastate.edu/>)

Completed applications for admission to the professional curriculum in the College of Veterinary Medicine, together with the required supporting transcripts, must be received by an established deadline. See College of Veterinary Medicine, Application and Admission.

How to Apply

Applications for admission are available online at www.admissions.iastate.edu. (<http://www.admissions.iastate.edu/>)

Iowa State University operates on a rolling admissions basis. Admission of applicants for fall semester begins in July of the preceding year. Admission for other terms begins approximately 12 months prior to the beginning of the term. Admission offers are issued for a specific term and are valid only for the term specified.

Undergraduate Admission Directly from High School

Admission decisions are made by admissions officers in accordance with the entrance requirements as set forth in the Iowa Administrative Code as well as the admission policies established by the Faculty Senate.

Students who seek admission must meet the following requirements and also any special requirements for the college or curriculum of their choice.

Applicants must submit an application for admission and the appropriate application fee (see www.admissions.iastate.edu (<http://www.admissions.iastate.edu/>) for current application fee information). In addition applicants must have their secondary school provide an official final transcript of their academic record, including cumulative grade point average and certification of graduation.

Applicants must also arrange to have their ACT or SAT scores reported to Iowa State directly from the testing agency. U.S. citizen and immigrant applicants who will not graduate from an approved U.S. high school and whose primary language is not English must meet university

communication proficiency requirements. This can be accomplished by achieving satisfactory scores on the TOEFL, IELTS, PTE, ACT, or SAT. In addition to these tests, the Duolingo English Test (DET) may be used for undergraduates only. Detailed information concerning test score requirements can be found at <http://www.admissions.iastate.edu/intl> (<http://www.admissions.iastate.edu/intl/>).

Applicants may be required to submit additional information or data to support their applications.

A. Iowa State is test-optional for first-year applicants. Students may choose whether they wish to self-report their ACT/SAT scores when they apply for admission.

REGENT ADMISSION INDEX FORMULA:

Applicants will be considered for admission based upon their Regent Admission Index (RAI) score. Below is the mathematical formula for calculating an RAI score:

$$\begin{aligned}
 & \text{ACT composite (or converted SAT (<https://www.iowaregents.edu/institutions/higher-education-links/regent-admission-index/rai-info/>)) score} \times 3 \\
 & + \text{Cumulative GPA} \times 30 \\
 & + \text{Number of years of core courses in high school} \times 5 \\
 & = \text{RAI (Regent Admission Index)}
 \end{aligned}$$

Note: For purposes of calculating the RAI, SAT scores will be converted to ACT composite equivalents; high school GPA is expressed on a 4-point scale; and number of high school courses completed in the core subject areas is expressed in terms of years or fractions of years of study.

Applicants who achieve at least a 245 RAI score and who meet the minimum high school course requirements will automatically be offered admission.

Applicants who achieve less than a 245 RAI score and who meet the minimum high school course requirements may also be offered admission, based on individual academic review of their application materials.

For applicants who choose not to report an ACT or SAT score, admission will be based on high school grade point average and high school core course requirements.

Calculate your Regent Admission Index (<https://www.iowaregents.edu/institutions/higher-education-links/regent-admission-index/>)

A. Nonresidents of Iowa, including international students, may be held to higher academic standards, but must meet at least the same requirements as resident applicants.

B. Applicants who are graduates of nonapproved high schools will be considered for admission in a manner similar to applicants from approved high schools, but additional emphasis will be given to scores earned on standardized examinations.

C. Applications may be considered from students who did not graduate with their high school classes. They will be required to submit all academic data to the extent that it exists and achieve scores on standardized examinations which will demonstrate that they are adequately prepared for academic study.

D. Students with satisfactory academic records may be admitted, on an individual basis, for part-time university study while enrolled in high school or during the summers prior to high school graduation.

E. Exceptional students may be admitted as full-time students before completing high school. Early admission is provided to serve persons whose academic achievement and personal and intellectual maturity clearly suggest readiness for college-level study.

US freshman applicants are not required to submit ACT or SAT scores to be considered for admission. Applicants who do not provide their test scores will be considered for admission based on an individual review of their academic records with emphasis given to the high school cumulative GPA and core courses.

High School Preparation

Graduation from an approved high school shall ordinarily precede entrance into Iowa State University.

Students who wish to enter Iowa State University directly from high school (or transfer from another college or university with less than 24 semester hours of graded transferable college credit) must meet the level of academic performance described above and show evidence of the following high school preparation:

English/Language Arts

Four years, emphasizing writing, speaking, and reading, as well as an understanding and appreciation of literature

Mathematics

Three years, including one year each of algebra, geometry, and advanced algebra

Science

Three years, including at least two years of courses which emphasize elements of biology, chemistry, or physics

Social Studies

Two years

Additional Requirements for the College of Liberal Arts and Sciences and the College of Engineering

In addition to the high school preparation requirements described above, students applying to the College of Liberal Arts and Sciences must have

completed an additional year of social studies, for a total of three years, and two years of a single foreign language. Students applying to the College of Engineering must have completed two years of a single foreign language.

Students who do not meet the high school course preparation requirements listed here, but who are otherwise well qualified, may be admitted after individual review of their applications.

Undergraduate Admission - Nondegree Undergraduate

Students who wish to attend Iowa State University to take undergraduate courses but who do not plan to seek an undergraduate degree from Iowa State University should apply as nondegree undergraduate students. Credit taken under the nondegree undergraduate classification is applicable for undergraduate degree purposes for those who are later admitted as degree-seeking undergraduate students. Nondegree undergraduates who have already earned an undergraduate degree may not enroll in graduate credits. To take courses listed as available for graduate credit, a student must enroll as a nondegree graduate and pay graduate fees. Credit obtained under the nondegree undergraduate classification may not be applied toward a graduate degree.

Nondegree applicants are held to the same standards of admission as degree-seeking applicants, including English language proficiency.

Reentering Students - Undergraduate and Graduate

Reentering undergraduate students are those who have previously attended Iowa State University and are returning after an absence of at least one full year. See Index, Reentry Students.

International students need to reapply after an absence of one full semester, exclusive of summer session. International reentries must also contact the International Students and Scholars office to request the necessary visa application forms.

Reentering graduate students do not need to complete a reentry form but should notify their program and the Office of the Registrar of their intent to reenter Iowa State University. Graduate students returning after 24 months will need to complete the reinstatement process. See Index, Reentry Students.

Undergraduate Admission by Transfer from Other Educational Institutions

Students who seek admission must meet the following requirements and also any special requirements for the college and curriculum of their choice.

Applicants must submit an application for admission, and the appropriate application fee (see www.admissions.iastate.edu (<http://www.admissions.iastate.edu/>) for current application fee information). Applicants must also request that each institution they have attended send an official transcript of record to the Office of Admissions. Failure to

provide transcripts from all colleges or universities attended may result in denial of the application or dismissal from the university. If less than 24 semester hours of graded transferable college credit is completed prior to entry at Iowa State University, applicants must also request that their official high school transcript be sent to the Office of Admissions. Students may elect to also have their ACT or SAT scores sent to the Office of Admissions.

U.S. citizen and immigrant applicants who have not graduated from an approved U.S. high school and whose primary language is not English must meet the university's English communication requirement. This can be accomplished by achieving satisfactory scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), Duolingo English Test (DET), ACT or SAT. Refer to <https://www.admissions.iastate.edu/intl/transfer> (<https://www.admissions.iastate.edu/intl/transfer/>) for minimum score requirements for each examination.

A. Transfer applicants with a minimum of 24 semester hours of graded transferable credit from regionally accredited colleges or universities will be admitted provided they have achieved a minimum 2.25 transfer grade point average (on a 4.00 grading scale) for all college work previously attempted. Applicants who have earned an associate's degree will be required to have earned a minimum 2.00 transfer grade point average.

Some programs may require a transfer grade point average higher than this minimum. Higher academic standards may be required of students who are not residents of Iowa, including international students.

Applicants who have not maintained the grade point average required by Iowa State University for specific programs or who are under academic suspension from the last college attended generally will be denied admission.

B. In addition to meeting the minimum transfer grade point average requirement described above, applicants who have completed fewer than 24 semester hours of graded transferable college credit prior to their enrollment at Iowa State must also meet the admission requirements for students entering directly from high school.

C. Transfer applicants under disciplinary suspension will not be considered for admission until information concerning the reason for the suspension has been received from the college assigning the suspension. Applicants granted admission under these circumstances will be admitted on probation.

D. Transfer applicants from colleges and universities not regionally accredited will be considered for admission on an individual basis, taking into account all available academic information.

Transfer Credit Practices

Iowa State University endorses the Joint Statement on Transfer and Award of Academic Credit approved by the American Council on Education (ACE) and the American Association of Collegiate Registrars and Admissions Officers (AACRAO).

The acceptance and use of transfer credit are subject to limitations in accordance with the educational policies of Iowa State University.

A. Students from regionally accredited colleges and universities.

Credit earned at regionally accredited colleges and universities is acceptable for transfer, except for the following, which may not be accepted, or may be accepted to a limited extent:

- credit in courses determined by Iowa State University to be of a developmental, vocational, or technical nature
- credit in courses or programs in which the institution granting the credit is not directly involved.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor's degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits must be completed at Iowa State University.

B. Students from colleges and universities which have candidate status.

Credit earned at colleges and universities which have become candidates for accreditation by a regional association is acceptable for transfer in a manner similar to that from regionally accredited colleges and universities if the credit is applicable to the bachelor's degree at Iowa State University.

Credit earned at the junior and senior classification from an accredited two-year college which has received approval by a regional accrediting association for change to a four-year college may be accepted by Iowa State University.

C. Students from colleges and universities not regionally accredited.

Courses completed at colleges and universities that are not regionally accredited will be evaluated according to the recommendations made by the American Association of Collegiate Registrars and Admissions Offices or the American Council on Education.

In determining the acceptability of transfer credit from colleges which are not regionally accredited, acceptance practices indicated in the current issue of Transfer Credit Practices of Designated Educational Institutions will be used as a guide. For institutions not listed in the publication, guidance is requested from the designated reporting institution of the appropriate state.

D. Students from foreign colleges and universities.

Transfer credit from foreign educational institutions may be granted after a determination of the type of institution involved, its recognition by the

educational authorities of the foreign country, and an evaluation of the content, level, and comparability of the study to courses and programs at Iowa State University. Credit may be granted in specific courses or assigned to general areas of study. Extensive use is made of professional journals and references which describe the educational systems and programs of individual countries.

Additional Transfer Credit Policies

A. Students with credit obtained during military service.

Credit will be awarded for successful completion of technical or specialized schools attended while on active duty with the armed forces to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication *The ACE National Guide*.

B. Students with credit obtained through non-college sponsored instruction.

Credit will be awarded for successful completion of learning acquired from participation in formal courses sponsored by associations, business, government, industry, and unions to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication: *The ACE National Guide*.

C. Students with credit obtained through correspondence courses.

Although Iowa State does not offer correspondence courses, college level courses taken by correspondence from accredited colleges or universities are acceptable for transfer at the undergraduate level if the courses taken are those that do not require laboratory study.

D. College Level Examination Program (CLEP).

Iowa State University will award credit for each of the following 15 examinations: Financial Accounting, Principles of Accounting, American Government, Biology, Calculus, French Language, German Language, Humanities, Principles of Macroeconomics, Principles of Microeconomics, Natural Sciences, Introductory Psychology, Social Sciences and History, Introductory Sociology, Spanish Language.

Application of CLEP credit to a degree program varies with the department, so students should consult with their department before they register for CLEP examinations. Additional information is available at www.admissions.iastate.edu/cbe/ (http://www.admissions.iastate.edu/cbe/cbe_clep.php).

E. Students with "test-out" credit.

Students who have earned credit at other colleges or universities through Advanced Placement (AP), College Level Examination Program (CLEP), or International Baccalaureate (IB) examinations may qualify for credit at Iowa State University. Scores from these examinations should be sent

directly to the Office of Admissions; credit will be awarded provided the scores satisfy Iowa State's requirements.

Credit earned at another college through locally designed test-out examinations may transfer to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at that institution.

F. Credit for prior learning.

Credit for prior learning applies to learning acquired from, but not limited to, credit by examination (e.g., Advanced Placement Exam (AP), College Level Exam (CLEP), International Baccalaureate (IB), Departmental Exams, etc.), credit that has been recommended by non-degree granting institutions, and ACE-recommend military coursework and/or experience. Credit awarded for prior learning is documented, evaluated, and appropriate for the level of degree awarded. Iowa State University does not award credit for work or life experience nor does it award credit for a service member's military occupational experience.

Iowa State University will allow a maximum of 60 credits of prior learning to satisfy a student's undergraduate degree requirements, of which no more than 32 credits may come from the credit by examination.

Articulation/Transfer Agreements

A. Iowa Regent Universities General Education Articulation Agreement.

Iowa State University participates in an articulation agreement with the other two Iowa Regent universities concerning the acceptance of their general education programs into the Iowa State University College of Liberal Arts and Sciences. Under the terms of this agreement, students who have satisfied general education requirements at the University of Northern Iowa or in the College of Liberal Arts at the University of Iowa may transfer to Iowa State's College of Liberal Arts and Sciences with their general education requirements met (with the possible exception of the foreign language, diversity, and library requirements).

B. Associate of Arts (A.A.) Articulation Agreement with Iowa public community colleges.

Students who plan to enter the College of Liberal Arts and Sciences or the Ivy College of Business at Iowa State University with an associate of arts degree from an Iowa public community college, and who have at least a 2.00 cumulative grade point average, will be considered to have met the general education requirements of that college. Ivy College of Business students will still be required to take an ethics and a global course to satisfy general education requirements unless they are taken as part of the associate of arts degree.

C. Associate of Science (A.S.) Articulation Agreement with Iowa public community colleges.

Students who plan to enter the College of Liberal Arts and Sciences at Iowa State University with an associate of science degree from an Iowa public community college, and who have at least 60 prescribed semester credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be enrolled at junior level status upon entry to Iowa State

University, College of Liberal Arts and Sciences. Transfer students with AS degrees will have their transfer credits evaluated course-by-course to determine how the courses will be applied to their intended Iowa State major/degree program requirements.

D. Career-technical credit from Iowa public community colleges.

Iowa State University will accept up to 16 semester (24 quarter) credits earned in career-technical courses where the sending Iowa public community college will accept such courses toward its associate of arts or associate in science degree. Certain career-technical courses at Iowa community colleges may be articulated to Iowa State University as academic credit. The credit hours earned in these articulated courses would transfer in addition to the 16 semester hour career-technical maximum. Please refer to the course equivalency guides on the Web (www.admissions.iastate.edu/equiv (<https://www.admissions.iastate.edu/equiv/>)) or contact the Office of Admissions for more information.

E. AP and CLEP credit from Iowa public colleges and universities.

Iowa State University has an agreement with the Iowa public colleges and universities which allows credit earned through AP and CLEP examinations to transfer directly to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at the sending institution.

On-line Transfer Articulation System (TRANSIT)

TRANSIT is Iowa State's online system, which displays how credits from a community college or another university may transfer to a degree program at Iowa State. In TRANSIT, prospective or current students can generate a transfer credit evaluation showing how their courses and degrees from a community college or university transfer to Iowa State University. In addition, students can request an unofficial degree audit, which will display how their transfer courses are applied within a particular Iowa State major/degree program. TRANSIT is easy to use and can be accessed by going to <http://transit.iastate.edu>.

Transfer of Credits

Credits presented from another institution are evaluated initially by the Office of Admissions to determine whether the courses are acceptable for transfer credit. In addition, credits applied toward a particular degree will be determined by the student's college, based on relevance to the students' program requirements as well as the level of performance deemed necessary for successful progress in that program. For example, courses that are deemed important to a program but were earned with less than a C grade may or may not be approved for a program. This policy also applies to students already enrolled at Iowa State University and to new transfer students. Grades earned in courses transferred to Iowa State University will not be used in calculating a transfer student's Iowa State cumulative grade point average.

Students should consult with their academic advisors and the Office of Admissions before taking coursework at other colleges and universities to be certain the credits will transfer and will be applicable to their program of study. Students who believe that any transfer credits have not been correctly evaluated should consult with their academic advisor and with the Office of Admissions. Questions concerning how transfer credits are applied toward a degree program should be referred to the academic advisor and college office.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor's degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits before receiving a degree from Iowa State University must be completed at Iowa State University. Credits earned while students participated in an ISU Study Abroad or National Student Exchange program are exempt from this requirement.

Iowa State University students who attend one of the other Iowa Regent universities under the Regent Universities Student Exchange Program will have the credits earned at the other university counted as resident credit and grades received included in their Iowa State University cumulative grade point average, even if the credits are included in the last 32 semester credits. For information on applying to the program see Index, Regent Universities Student Exchange Program (<http://catalog.iastate.edu/azindex/>).

Credit by Examination (CBE)

It is Iowa State University policy to grant academic credit by examination in many of the undergraduate courses listed in the university bulletin. Credit is awarded primarily in the introductory level classes in mathematics, natural, physical, and social sciences, and the liberal arts. Students with superior high school backgrounds or those with college-level proficiency in certain subject areas are strongly encouraged to investigate and attempt testing in the CBE programs available.

Types of Credit By Examination Programs (CBE)

Students may earn academic credit in any of six ways and have that credit recorded on their academic record when they enroll. Programs accepted at Iowa State include the Advanced Placement (AP) Program, the International Baccalaureate (IB) Examinations, the Global Assessment Certificate (GAC), Cambridge International AS and A Level Subject examinations, departmental examinations, and the College Level Examination Program (CLEP). Iowa State's policies for awarding credit for each of these programs may be found at www.admissions.iastate.edu/cbe (<http://www.admissions.iastate.edu/cbe/>).

Advanced Placement (AP) Program of the College Board

This program allows students, while still in high school, to take examinations for credit at the college level. Iowa State University awards credit or advanced placement through the Advanced Placement

Program in art, biology, chemistry, computer science, economics, English, environmental science, foreign languages, geography, government and politics, history, mathematics, music, physics, psychology and statistics. High school counselors and teachers will assist with testing arrangements.

Generally, students scoring 3 or better on the exams will be considered for course credit based on departmental review of the exams. In some departments, only scores of 4 or better will be considered for credit.

Detailed information concerning the Advanced Placement Program can be found at <https://apstudent.collegeboard.org/home> (<https://apstudent.collegeboard.org/home/>).

International Baccalaureate Examinations

The International Baccalaureate (IB) Program, offered at many high schools in the United States and abroad, allows students the opportunity to take examinations for credit at the college level. These examinations are offered at standard and higher levels.

Iowa State University awards credit for most higher level examinations and some standard level examinations. Students must receive a minimum score of 4 to qualify for academic credit in most subject areas. Some departments require higher scores. Official IB examination results must be sent directly to the Office of Admissions from the International Baccalaureate Americas Office. Results listed on high school transcripts are not considered official.

Detailed information concerning the IB Program can be found at <http://ibo.org/iba/>. Course equivalencies and minimum scores required by Iowa State can be at <https://www.admissions.iastate.edu/cbe/ib.php>

Global Assessment Certificate

The Global Assessment Certificate (GAC) is a university preparation program that provides students with the academic knowledge, skills, and confidence to thrive in an English-language bachelor's degree program as well as preparation for the ACT university admissions test. Students who complete all three levels of the GAC and provide official confirmation of their completion/graduation by submitting a GAC Academic Transcript can earn university credit for GAC coursework. Details regarding transfer credit for the GAC can be reviewed at <https://www.admissions.iastate.edu/cbe>.

Cambridge international AS and A level subjects

Cambridge Advanced offers college preparatory courses worldwide. At the conclusion of course studies and examinations, an official GCE Certificate must be received in order to award transfer credits. Official AS- and A-Level examination certificates must be sent directly to the Office of Admissions. Results listed on school transcripts are not considered official. Course equivalencies can be found at <https://www.admissions.iastate.edu/cbe>.

Departmental Examinations

Students may take locally constructed departmental examinations for undergraduate credit in specified subject areas for which they and the department feel they have the necessary preparation. These exams are generally administered by the department which offers the course (for exceptions, see CLEP offerings below). Students interested in taking departmental (or CLEP) examinations should contact the appropriate department for specific information on the course covered by the exam and the exam itself. A nonrefundable fee is charged for each departmental examination requested.

If an acceptable exam score is achieved, a grade of T will be reported to the Office of the Registrar. The T grade represents performance equivalent to a C or better in the course. T grades are not used in computing students' grade point averages; however, the credit does become part of their official academic record and may be applied toward their graduation requirements.

Most examinations for credit are prepared by the departments offering the courses. In some cases, the examination used is part of the College Level Examination Program (CLEP), where the content of the CLEP test has been judged to be an equivalent to the content of the course.

College Level Examination Program

CLEP is available on computer only and Iowa State University only accepts the CLEP tests listed in this section. Up to six semester credit hours in each of these three CLEP general tests is awarded: Social Sciences and History, Humanities, and Natural Sciences. In addition, the College of Engineering does not allow credit earned from CLEP Social Sciences and History, Humanities, and Natural Sciences tests to be used in their students' degree programs.

CLEP tests accepted at Iowa State University include American Government, Financial Accounting (engineering majors should consult with their academic advisor before registering for this examination), Biology (not for biology or engineering majors), Calculus, Introductory Psychology, Introductory Sociology, Principles of Macroeconomics, and Principles of Microeconomics.

In addition, Iowa State University will award up to 9 semester credit hours for CLEP French Language, up to 9 semester credit hours for CLEP German Language, and up to 9 semester credit hours for CLEP Spanish Language.

For more information on required scores and credit that will be awarded, please refer to the Credit by Exam website www.admissions.iastate.edu/cbe (<https://www.admissions.iastate.edu/cbe/>).

Information about testing centers and registration can be found at <https://clep.collegeboard.org/search/test-centers> (<https://clep.collegeboard.org/search/test-centers/>). For information on whether to take any of the CLEP tests, contact your academic advisor.

Additional information on the CLEP exam is available at <https://clep.collegeboard.org/>.

Policies and Procedures Governing CBE Tests

1. Departmental and CLEP tests are offered to newly admitted or currently enrolled students at Iowa State University. Former and future students will receive credit only if they enroll sometime during the twelve months immediately following the test(s).

2. Permission to take a departmental examination is obtained from the department. Students may be denied permission because (a) the nature of the course is such that proficiency cannot be measured by such a test, (b) the student does not appear to have adequate background to pass the examination for the course, or (c) the student would not otherwise be allowed to enroll in the course. Students may appeal such a denial to the dean of the college in which the department is administered and subsequently to the provost.

3. Students may ordinarily attempt a CBE test only once in any course or area. Under special circumstances a retest may be taken upon approval of the department in which the course is offered.

4. Credit by examination will not be granted if it duplicates courses previously passed or failed.

5. Departmental examinations and CLEP subject tests cover only a single course and students may not test out of independent study or special topic courses.

6. There is a nonrefundable fee for all departmental tests. The fee is set by the Board of Regents, State of Iowa, and is subject to change.

7. Departmental examinations are usually given just prior to, or within two weeks of, the beginning of fall and spring semesters. For more information, students should contact the department that offers the class. CLEP tests are given throughout the year.

8. Credit for the CLEP examinations Social Sciences and History, Humanities, and Natural Sciences is not evaluated as equivalent to any specific course and cannot be used in place of specific course requirements for the major. All colleges (except Engineering, which does not accept these tests) allow these CLEP credits to be used for either general requirements (not in Liberal Arts and Sciences) or elective credit. Students are responsible for checking with their academic advisors to determine whether such credit is to their benefit.

9. Listed below are policies for transferring CBE from another college or university to Iowa State University:

a. AP or CLEP credit which is earned at an Iowa public college or university may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution. AP or CLEP credit which is

earned at any other college or university may not be transferred directly to Iowa State. However, the scores from these examinations may be sent to Iowa State University from the testing agency, and credit will be awarded based on Iowa State's AP and CLEP policies.

b. IB credit earned at another college or university may not be transferred directly to Iowa State University. However, the scores from IB examinations may be sent to Iowa State from the testing agency, and credit will be awarded based on Iowa State's IB policies.

c. Credit earned at another college or university through local test-out examinations may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution.

d. Credit earned at another college or university for GAC or Cambridge Advanced exams may not be transferred directly to Iowa State University. However, the official GAC Academic Transcript or officially certified copies of GCE AS or A Level examination certificates may be submitted directly to Iowa State University from the respective testing authority, and credit will be awarded based on Iowa State's policies.

10. Credit earned from CBE will be posted to the student's academic record at the end of the term. CBE credits will be counted toward the projected year in school classification used to establish registration start dates.

11. Some professional programs do not accept T (test-out) credit in preprofessional courses. Students who anticipate applying to such programs should inquire about the acceptability of such credit before registering for such CBE tests.

12. Credit established at Iowa State University will usually transfer to other colleges and universities; however, the final decision rests with the institution reviewing the transcript.

Below is detailed information concerning Iowa State University admission policies and procedures. Prospective students are also encouraged to visit the following websites for additional information:

Student Housing and Dining Department of Residence (DOR)

Welcome to your Cyclone Home! The university provides housing for almost 9,000 students in university owned on-campus residence halls and apartments.

- Single (non-family) student housing is available in all residence halls and the Frederiksen Court and University Village apartment communities.
- Family housing is available to students and their partners, children, and other relatives in the Schilleter Village apartments.

While newly-admitted freshmen 18 and under are assigned to the halls, all halls and apartments have a diverse mix of freshmen, sophomores, juniors, seniors, and graduate students making on-campus housing a great place to live and learn. Visit <http://housing.iastate.edu/> for details.

ISU Dining

With 26 locations, a fresh meal or snack is right around the corner! We offer flexible meal plans for students living both on and off-campus. Our dining centers serve a wide variety of fresh-made items and are a great place for a sit-down meal. Locations like our cafes, restaurants and markets are perfect for coffee breaks, meals and snacks when you're on the go. Our culinary team is ready to serve you!

If you're living in Birch-Welch-Roberts, Barton-Lyon-Freeman, Maple, Willow, Larch, Geoffroy, Buchanan, Eaton, Martin, Helser or Friley Halls, you can choose any of the following plans! A quick explanation of each

plan is below and you can learn even more on our website. (<https://www.dining.iastate.edu/meal-plans/residence-halls/>)

- **Cardinal and Cyclone Plans:** These are anytime plans, you never have to worry about counting meals! Just pop into a dining center whenever you'd like. The convenience and flexibility of these plans are perfect for a busy student's lifestyle. We even added more dining dollars to our Cardinal plan for a total of \$100 dining dollars per semester for all your snacks!
- **Gold Plan:** This is a declining meal balance plan. You have 200 meals of dining center meals each semester you need to keep track of.
- **CyFlex:** This is our hybrid plan and combines the functionality of the other two types of plans above.

Each plan also gives you a set number of Dining Dollars (<https://www.dining.iastate.edu/meal-plans/flex-meals-dining-dollars-explained-2/>) and Flex Meals (<https://www.dining.iastate.edu/meal-plans/flex-meals-dining-dollars-explained-2/>). Plus, you have access to GET & Go (<https://www.dining.iastate.edu/meal-plans/flex-meals-dining-dollars-explained-2/>) meals.

- **Dining Dollars:** These spend dollar-for-dollar and are intended for things like snacks and convenience items.
- **Flex Meals:** Use these at any campus location when you want a full meal - they're perfect for restaurants and you can even use them to get a friend into a dining center.
- **GET & Go:** These locations are on the east and west sides of campus (UDCC and Conversations). You'll get a hot entree, two sides and a drink. This service uses one of your dining center swipes and you can use these locations up to 10 times per week. It doesn't use a Flex Meal or Dining Dollars.

Are you a Frederiksen Court or SUV resident? You can choose from the plans above or from the apartment plans that are located here (<https://www.dining.iastate.edu/meal-plans/apartmentsoff-campus/>)

Questions about choosing a plan? Email us at dining@iastate.edu

TUITION, FEES, AND EXPENSES

Tuition And Fees

Tuition and fees are based on the number of credits in which a student is enrolled as of 5:00 p.m. on the 10th day of class. Maximum charges start at 12 credits for undergraduate and veterinary medicine students. Maximum charges start at 9 credits for graduate students.

Students who are not residents of Iowa pay a higher tuition rate each semester. Nondegree undergraduate students and noncollegiate students pay the same fees as undergraduates. Tuition and fees are assessed in accordance with regulations of the Board of Regents, State of Iowa. Information about these regulations is found in this catalog under Admissions and Registrar.

All tuition, fees, expenses, and policies are subject to change without notice by Iowa State University and the Board of Regents, State of Iowa. For the most current and complete information see <http://www.registrar.iastate.edu/fees/>

Residency Classification for Admission and Tuition Purposes

These criteria are contained in the Policy Manual, Board of Regents, State of Iowa and or the Iowa Administrative Code: Board of Regents, State of Iowa. For additional information regarding the administrative code addressing residency classification: Section 681–1.4 "Classification of residents and nonresidents for admission, tuition, and fee purposes" <https://www.legis.iowa.gov/docs/aco/chapter/681.1.pdf> (Chapter 1, pg. 4).

GENERAL INFORMATION

A. A person enrolling at one of the three state universities shall be classified as a resident or nonresident for admission, tuition, and fee purposes by the registrar or someone designated by the registrar. The decision shall be based upon information furnished by the student and other relevant information.

B. In determining resident or nonresident classification, the issue is essentially one of why the person is in the state of Iowa. If the person is in the state primarily for educational purposes, that person will be considered a nonresident. For example, it may be possible that an individual could qualify as a resident of Iowa for such purposes as voting, or holding an Iowa driver's license, and not meet the residency requirements as established by the Board of Regents, State of Iowa, for admission, tuition, and fee purposes.

C. The registrar, or designated person, is authorized to require written documents, affidavits, verifications, or other evidence deemed necessary

to determine why a student is in Iowa. The burden of establishing that a student is in Iowa for other than educational purposes is upon the student. A student may be required to file any or all of the following:

1. A statement from the student describing employment and expected source of support
2. A statement from the student's employer
3. A statement from the student's parents verifying nonsupport and the fact that the student was not listed as a dependent on tax returns for the past year and will not be so listed in future years
4. A statement from the student's spouse related to sources of family support, length of residence in Iowa, and reasons for being in the state of Iowa
5. Supporting statements from persons who might be familiar with the family situation
6. Iowa state income tax return.

D. Applications for resident classification for a given semester or session are due no later than the fifteenth-class day of that semester or session. Applications received after the fifteenth-class day of that semester or session will be considered for the next semester or session. Appeals of any nonresident classification decision resulting from applications for resident classifications are due no later than midterm of that semester or session. Change of classification from nonresident to resident will not be made retroactive beyond the term in which application for resident classification is made.

E. A student who gives incorrect or misleading information to evade payment of nonresident fees shall be subject to serious disciplinary action and must also pay the nonresident fees for each term previously attended.

F. Review committee. These regulations shall be administered by the registrar, or someone designated by the registrar. The decision of the registrar or designated person may be appealed to a university review committee. The finding of the review committee may be appealed to the Board of Regents, State of Iowa.

GRADUATE ASSISTANTS

Graduate students appointed to a graduate assistantship appointment of 1/4-time or more for at least 3 months in fall and spring terms and for 4 weeks in summer term, are assessed tuition at the full-time resident (in-state) rate for the fall and spring term. Nonresident students with graduate assistantships of 1/4-time or more retain their non-residency classification but are assessed resident tuition and fees as long as the graduate assistantship is continued.

The spouse of a 1/4-time or more graduate assistant who is a nonresident is eligible for resident tuition and fees during the period of the assistantship appointment. Iowa residency is not granted, but a waiver of nonresident tuition and fees is in effect. When the graduate assistantship ends, the tuition and fee waiver for the spouse is terminated. (Board of Regents, State of Iowa, Minutes March 15, 1995, p. 801).

The graduate student must request the resident tuition assessment by midterm of the term in question. The benefit will not be granted retroactively.

GUIDELINES

The following guidelines are used in determining the resident classification of a student for admission, tuition, and fee purposes:

1. A financially dependent student whose parents move from Iowa after the student is enrolled remains a resident provided the student maintains continuous enrollment. A financially dependent student whose parents move from Iowa during the senior year of high school will be considered a resident provided the student has not established domicile in another state.

2. In deciding why a person is in the state of Iowa, the person's domicile will be considered. A person who comes to Iowa from another state and enrolls in any institution of postsecondary education for a full program or substantially a full program shall be presumed to have come to Iowa primarily for educational reasons rather than to establish a domicile in Iowa.

3. A student who was a former resident of Iowa may continue to be considered a resident provided absence from the state was for a period of less than 12 months and provided domicile is reestablished. If the absence from the state is for a period exceeding 12 months, a student may be considered a resident if evidence can be presented showing that the student has long-term ties to Iowa and reestablishes an Iowa domicile. A person or the dependent of a person whose domicile is permanently established in Iowa, who has been classified as a resident for admission, tuition, and fee purposes, may continue to be classified as a resident so long as domicile is maintained, even though circumstances may require extended absence of the person from the state. It is required that a person who claims Iowa domicile while living in another state or country will provide proof of the continual domicile as evidence that the person:

- (1). Has not acquired domicile in another state;
- (2). Has maintained a continuous voting record in Iowa; and
- (3). Has filed regular Iowa resident income tax returns during absence from the state.

4. A student who moves to Iowa may be eligible for resident classification at the next registration following 12 consecutive months in the state provided the student is not enrolled as more than a half-time student (6 credits for an undergraduate or professional student, 5 credits for a graduate student) in any academic year term, is not enrolled for more than 4 credits in a summer term for any classification, and provides sufficient evidence of the establishment of an Iowa domicile.

5. A student who has been a continuous student and whose parents move to Iowa may become a resident at the beginning of the next term provided the student is dependent upon the parents for a majority of financial assistance.

6. A person who has been certified as a refugee or granted asylum by the appropriate agency of the United States, who enrolls as a student at a university governed by the Board of Regents, State of Iowa, may be accorded immediate resident status for admission, tuition, and fee purposes where the person:

- (1). Comes directly to the state of Iowa from a refugee facility or port of debarkation, or
- (2). Comes to the state of Iowa within a reasonable time and has not established domicile in another state.

Any refugee or individual granted asylum not meeting these standards will be presumed to be a nonresident for admission, tuition, and fee purposes and thus subject to the usual method of proof of establishment of Iowa residency.

7. An alien who has immigrant status establishes Iowa residency in the same manner as a United States citizen.

8. At the Regent institutions, American Indians who have origins in any of the original people of North America and who maintain a cultural identification through tribal affiliation or community recognition with one or more of the tribes or nations connected historically with the present state of Iowa, including the Iowa, Kickapoo, Menominee, Miami, Missouri, Ojibwa (Chippewa), Omaha, Otoe (Otto), Ottawa (Odawa), Potawatomi, Sac and Fox (Sauk, Meskwaki), Sioux, and Winnebago (HoCak/Ho-Chunk), will be assessed Iowa resident tuition and fees. (Board of Regents, State of Iowa, Minutes October 15-16, 1997, p. 299)

**Section B below is under revision. For current information, go to <https://www.registrar.iastate.edu/students/in-state-tuition-benefit> (<https://www.registrar.iastate.edu/students/in-state-tuition-benefit/>).

B. Additional guidelines are used in determining the resident classification of a veteran, qualified military person, and dependent children and spouses of a veteran or qualified military person for purposes of admission and undergraduate tuition and mandatory fees:

1. A person who is stationed on active duty at the Rock Island arsenal as a result of military orders, or the dependent child or spouse of such person, is entitled to resident status for purposes of undergraduate tuition and mandatory fees. However, if the arrival of the person under orders is subsequent to the beginning of the term in which the dependent child or spouse is first enrolled, nonresident fees will be charged in all cases for the dependent child or spouse until the beginning of the next term in which the dependent child or spouse is enrolled. If the qualified military person is transferred, deployed, or restationed while the person's spouse or dependent child is enrolled in an institution of higher education under the control of the board of regents, the spouse or dependent child shall continue to be classified as a resident under this subparagraph until the close of the fiscal year in which the spouse or dependent child is enrolled.

2. A veteran who is domiciled or moves to the state of Iowa and who is eligible for benefits or has exhausted benefits under the federal post-9/11 Veterans Educational Assistance Act of 2008, is entitled to resident status for purposes of undergraduate tuition and mandatory fees. The dependent child or spouse of a veteran who meets these requirements is entitled to resident status for undergraduate tuition. However, if the arrival of the veteran in Iowa is subsequent to the beginning of the term in which the dependent child or spouse is first enrolled, nonresident fees will be charged in all cases for the dependent child or spouse until the beginning of the next term in which the dependent child or spouse is enrolled.

3. A person who is moved into the state as the result of military or civil orders from the government for other than educational purposes, or the dependent child or spouse of such a person, is entitled to resident status. However, if the arrival of the person under orders is subsequent to the beginning of the term in which the dependent child or spouse is first enrolled, nonresident fees will be charged in all cases until the beginning of the next term in which the dependent child or spouse is enrolled. Legislation, effective July 1, 1977, requires that military personnel who claim residency in Iowa (home of record) will be required to file Iowa resident income tax returns.

FACTS

A. The following circumstances, although not necessarily conclusive, have probative value in support of a claim for resident classification:

1. Reside in Iowa for 12 consecutive months and be primarily engaged in activities other than those of a full-time student, immediately prior to the beginning of the term for which resident classification is sought.
2. Reliance upon Iowa resources for financial support.
3. Domicile in Iowa of persons legally responsible for the student.

4. Former domicile in the state and maintenance of significant connections therein while absent.
5. Acceptance of an offer of permanent employment in Iowa.
6. Military orders, if for other than educational purposes.
7. Other facts indicating the student's domicile will be considered by the universities in classifying the student.

B. The following circumstances, standing alone, do not constitute sufficient evidence of domicile to affect classification of a student as a resident under these regulations:

1. Voting or registration for voting.
2. Employment in any position normally filled by a student.
3. The lease of living quarters.
4. Admission to a licensed practicing profession in Iowa.
5. Automobile registration.
6. Public records; for example, birth and marriage records, Iowa driver's license.
7. Continuous presence in Iowa during periods when not enrolled in school.
8. Ownership of property in Iowa, or the payment of Iowa taxes.

Fee Payment

The Accounts Receivable Office bills students for tuition, room, meal plan, and various other university charges. A statement of charges, adjustments, payments, and refunds is available on the first of each month in the Workday Financials Hub. Students will receive a monthly email notifying them that their U-Bill is available. It is the student's responsibility to ensure that the university has the correct email address and to regularly check their Iowa State email account. Students who do not receive a billing statement before the term begins or are unable to use Workday to view their U-Bill should contact the Accounts Receivable Office to learn the amount of their account balance and due date. Failure to receive a billing statement or view the U-Bill in Workday will not exempt students from late penalties or from having a hold placed on their registration.

Payments for the fall semester are due August 20.

Payments for the spring semester are due January 20.

Payments for the summer semester are due May 20.

Payment Options:

1. Students may pay their U-Bill online through the Workday Financials Hub.
2. Students may also mail in their payment by sending a check or money order (along with the remittance portion of the billing statement printed from Workday) to:

Iowa State University Treasurer's Office
1220 Beardshear Hall
515 Morrill Road
Ames, IA 50011-2103

3. Payment can be made in person by taking a personal check or certified funds to the drop box located on the ground floor of Beardshear Hall.

Deferred Billing Plan (payment over three months): Students can select to pay their U-Bill over three installments each semester. There is a \$20 deferred billing fee assessed each semester (fall, spring, and summer) to pay over three installments. Students can sign up for this option in Workday.

Employer Reimbursement Deferment: Iowa State University offers a deferment option for students whose employer is providing tuition reimbursement to cover their tuition and fees. To enroll in the Employer Reimbursement Deferment Plan, please complete the online request form found in Workday using the Employer Reimbursement Deferment Plan Agreement request.

With successful enrollment in the deferment plan prior to each semester, all applicable charges will be due 30 days after grades are presented.

A non-deferrable \$35 enrollment fee will be assessed to the student U-Bill after enrollment into the deferment plan. Students will be responsible for payment of any non-deferred charges on their U-Bill in accordance with statement due dates.

For more information about the Employer Reimbursement Deferment Plan, contact the Accounts Receivable Office at (515) 294-7388 or ubill@iastate.edu.

Iowa State University employees will need to submit a tuition reimbursement request prior to the posted deadline using the Tuition Reimbursement Form request in Workday and obtain approval through University Human Resources. For additional information about eligibility requirements and semester application periods for the Tuition Reimbursement Program, please visit the University Human Resources website (<https://www.hr.iastate.edu/benefits/addlbenefits/>).

Past Due Accounts: If students have past due accounts receivable charges they will have a hold placed on their account for future registration. If a student with a past-due account gets registered they may be dropped from enrollment if these past-due charges are not paid

by the Friday before the first day of class. Students who are subject to being dropped will be notified via their Iowa State email.

Refunds: Refunds are available for students who drop or withdraw a class within the appropriate period of time. To cancel their registration, students must drop all coursework before the first day of the semester to avoid tuition assessment. Beginning on the first day of the semester, it will be necessary for students to complete a separation process (leave of absence or institutional withdraw) to separate from the semester. More information can be found at <http://www.registrar.iastate.edu/registration/responsibilities.shtml>. (<http://www.registrar.iastate.edu/registration/responsibilities.shtml/>)

Tuition adjustments for all students are made for course drop and withdraws of registration according to the following schedule:

Course Drop/Withdraw Date/Student Pays

Before first day of classes: 0%
During class days 1-5: 10%
During class days 6-10: 25%
During class days 11-15: 50%
During class days 16-20: 75%
After the twentieth day of classes: 100%

Students who wish to appeal tuition and fee assessment for a leave of absence should contact the Tuition & Fees area of the Office of the Registrar (tuition@iastate.edu). Decisions of the Office of the Registrar will be based on the existence of extenuating circumstances beyond the control of the student.

Students who wish to appeal the decision of the Office of the Registrar must do so in writing within 10 calendar days after receiving the decision. Such appeals will then be reviewed by the Tuition Appeals Review Committee. Students who wish to appeal the decision of the Tuition Appeals Review Committee may make a request to do so in writing to the Office of the Provost.

Fee refund for students with a reduction in credits below full-time: 100 percent if change is made through the 10th day of classes. No adjustment is made after the 10th day of classes. Prorated adjustments in the tuition adjustment schedule are made for summer session courses, or any courses which are less than one semester in length (79 days).

Workshop and Short Courses Refunds: Students who drop workshops or short courses of one or two weeks on or before the first-class meeting receive a 100% tuition adjustment for the course. No tuition adjustment will be made after the first day of classes. Students who drop three-week courses receive a 100% adjustment if they drop on or before the first day of classes, a 90% adjustment if they drop on the second day of classes, and no adjustment after the second day of classes.

Veterans and Eligible Dependents Receiving Educational Assistance:

In accordance with the requirements of the Servicemembers Improved Transition through Reforms for Ensuring Progress Act (SIT-REP Act, December 31, 2018), the University will not impose any late fee, deny access to classes or facilities, or assess any other penalty to a Veteran or eligible dependent due to a late payment from the Veterans Administration (VA).

This policy is only applicable to Veterans or eligible dependents who are receiving educational assistance under Chapters 31 (VR&E) or 33 (Post 9/11 and Fry Scholarship) of title 38, United States Code (U.S.C.). In accordance with the SIT-REP Act, students receiving VA educational benefits from Chapter 31 or 33 must provide a certification of eligibility for entitlement of educational assistance to the Office of the Registrar. Nothing in this policy precludes the University from assessing a late fee, denial of access, or any other penalty in relation to payments due to the University that are not covered under the SIT-REP Act.

For purposes of this policy, the following terms will be defined as:

- **Late Fee:** A financial penalty, equal to approximately 1% of the outstanding balance, charged to discourage late payment of the U-Bill.
- **Denial of Access:** To prohibit entry, participation, or attendance to an event or facility otherwise afforded to all registered students.
- **Any Other Penalty:** Any other fee/cost, prohibition, or assessment levied upon a student for failure to pay required tuition, fees, and any other billed charges.

Student Financial Aid

The Office of Student Financial Aid helps families afford Iowa State University. Scholarships, grants, loans, and part-time employment opportunities are available to assist students and families in meeting college expenses. For more information see:

<http://www.financialaid.iastate.edu>

1010 Student Services Building

(515) 294-1020

The Dean of Students Office (DSO) at Iowa State University uses an integrated approach to support student-centered learning through personal, community and academic development culminating in a transformative experience. Reporting through the Division of Student Affairs, the DSO provides numerous opportunities for students to engage in learning beyond the classroom. The thirteen departments and two programs that comprise the DSO collaborate to create and support a common community experience for Iowa State University students. Our common goal across all areas within the DSO is to support student success.

Student Counseling Service

Director of Student Counseling Services: Dr. Kristen Sievert

The Student Counseling Service (SCS) assists students in enhancing their academic success and personal well-being with a staff of professional psychologists and counselors. Services are available to help students sort through their feelings, strengths, and options to develop new perspectives and coping skills.

Services include:

- One-on-one counseling for any issue of personal concern, such as depression, anxiety, stress management, relationship issues, identity issues, and other forms of personal challenge. Students may also receive therapeutic services to deal with more severe mental health issues.
- Couples counseling for ISU students and their partners during times of relationship difficulty.
- Eating disorders assessment and treatment for students concerned with eating or body image issues. Students receiving treatment for eating disorders might also work with physicians, nutritionists, and personal trainers as their needs require.
- Substance abuse assessments to help students determine the nature and extent of their alcohol or other drug use and the impact of this use on their well being. Counselors offer recommendations and referrals for any concerns identified through the assessment.
- Career counseling to assist students having difficulty choosing a major or making decisions about their future after college.
- Group counseling is offered to facilitate personal growth and social skills learning. A list of the current semester's groups is available on the SCS web site.
- A variety of outreach programs are also available.

Counseling services are offered at no cost to ISU students. However, a nominal fee for testing may be required. Nominal fees are also charged for uncanceled missed appointments. Counseling is strictly confidential. SCS staff will not release any information to anyone outside of the

Student Counseling Service without the written permission of the client unless an imminent harm condition exists.

In addition to providing counseling and outreach services to students, SCS provides training and consultation to faculty and staff to assist them in addressing the psychological needs of students.

SCS hours are Monday through Friday 8 a.m. - 5 p.m. The Student Counseling Service phone number is 515-294-5056.

Thielen Student Health Center

Thielen Student Health Center is a full-service medical clinic in Ames, Iowa, that specializes in students. The clinic is staffed with physicians, advanced registered nurse practitioners and nurses. The medical team is available to care for your primary health care needs.

The clinic offers a full range of medical services including illness and injury care, women's health, allergy and travel care, immunizations, mental health care, laboratory and x-ray services, physical therapy and a full-service pharmacy. After hour service is available for urgent or emergency problems at McFarland Urgent Care Clinic or Mary Greeley Medical Center Emergency Room.

The Prevention Services department provides campus-wide leadership for a comprehensive approach to reduce health risks for students. In collaboration with our campus and community partners, they strive to foster a healthy campus environment and support the academic success of our students. Areas of focus include high-risk drinking and sexual and interpersonal violence.

The mission of the Thielen Student Health Center is to promote the optimal health of our university community by providing high quality, accessible, affordable and accountable health care that encompasses prevention, wellness and education and to support the academic success of the Iowa State University students while building healthy habits for a lifetime.

We provide an inclusive, non-judgmental environment for our diverse student body and are conveniently located on the corner of Sheldon Avenue and Union Drive, right across from State Gym.

Student Health receives no funding from the state of Iowa and relies on the health fee for approximately 50% of its operating budget. Please note that the health fee is not health insurance. All students are encouraged to maintain adequate health insurance coverage while enrolled at Iowa State University. Those taking 4 or fewer credits may still access services by paying the health fee. Spouses/domestic partners of students who opt to pay the health fee also have access to services.

Clinic hours:

Monday, 8 a.m.-6 p.m.; Tuesday, Thursday and Friday, 8 a.m.-5 p.m.; Wednesday, 9 a.m.-5 p.m.; Saturday, 9 a.m.-12 noon. Hours vary during breaks and summer session. Patients are seen by appointment. Please call 515-294-5801.

The University Library

<http://www.lib.iastate.edu/>

Dean of the Library Services: Hilary Seo

General Information (515) 294-3642

The University Library provides extensive research collections, services and information literacy instruction/information for all students. Facilities consist of the main Parks Library, the Veterinary Medical Library, Design Reading Room, and a remote library storage building.

The library's extensive collections include electronic and print resources that support research and study for all undergraduate and graduate programs. Nationally recognized collections support the basic and applied fields of biological and physical sciences. Library holdings include more than 2,858,448 volumes and approximately 121,125 current serial titles. The library has access to 447,689 electronic books.

The library's instruction program includes an undergraduate information literacy course as well as a wide variety of subject-based seminars on effective use of library resources for undergraduate and graduate students.

The library website provides access to local and web-based resources including electronic journals and books, local collections, online indexes, electronic course reserves and guides, and a broad range of subject research guides. Assistance in using this vast body of electronic resources is available at the Help Desk on the first floor, on the library website through the Ask Us! link, and through individually arranged appointments with librarian liaisons. The Digital Repository @ Iowa State provides free, public access to the research and scholarship of Iowa State's faculty, students and staff.

A limited number of semiprivate study rooms available for graduate students, intended for research and other scholarly activities that require extensive use of library material, are available. Parks Library has group study rooms, multi-media production studios, a presentation room and collaborative multi-media study areas. The library has over 232 public computers and a laptop checkout program with over 100 Apple and Windows laptops, iPads, Apple Pencils, and iPad chargers that may be checked out from the Tech Lending room (Rm 117 Parks Library). Also located in Parks Library - ITS Solution Center, Online Learning Hub, and The Bookends Café.

Career Services Offices

Agriculture and Life Sciences: 15 Curtiss Hall

Business: 1320 Gerdin Business Building

Design: 297 College of Design

Engineering: 3200 Marston Hall

Graduate Business: 1420 Gerdin Business Building

Human Sciences: 131 MacKay Hall

Liberal Arts and Sciences: 150 Carver Hall

Veterinary Medicine: 2270A Veterinary Medicine Complex

Career Services is a coordinated network of career services offices offering a broad range of programs and services for undergraduate, professional, and graduate students, faculty, staff, alumni, and employers. These services include career exploration, career development, experiential learning, and professional career search assistance programs. The goal is to provide constituents with life-long skills to assist with career development and exploration.

Programs and services are offered including online registration, position listing and interview scheduling; résumé referral; coordination of co-op and internship programs; workshops and seminars on career exploration, résumé preparation, letter writing, job search techniques, interview skills, applying to graduate and professional schools, and adjusting to the first job.

Each year career services sponsors multiple career fairs, which bring to the ISU campus hundreds of employers. The career services offices also coordinate on-campus interview opportunities. Each college career services office serves as a point of entry for students, alumni, and employers to the entire ISU network of coordinated, decentralized career services.

In addition to the college-based career services offices, the Career Exploration Service provides a variety of services to students who are unsure about their major or future career path. Students can work one-on-one with a trained career counselor, use the many books and electronic resources in the Career Exploration Center, or enroll in UST 104, Personal Career Development.

Additional information on career services is available at <http://www.career.iastate.edu/>.

Child Care

Child Care Administration, a unit of Human Resource Services, supports Iowa State University families by linking them with programs and services that can help meet their child care needs. The university child care coordinator is available to assist families in accessing services available both on the campus and in the community.

Child care programs located on campus include:

- Center for Child Care Resources: Assistance in locating campus and community child care services, 100 University Village, Suite 1010, 515-294-8833 or 1-800-437-8599

- University Community Childcare, Family Resource Center, 100 University Village, 515-294-9838
- The Comfort Zone: Childcare for kids who don't feel so good, 100 University Village, 515-294-3333.
- Flex-Care: Part time care for children of ISU students, 100 University Village, 515-294-9838.
- University Child Care Center at Veterinary Medicine, 1700 Christensen Drive, 515-294-2273.
- ISU Child Development Laboratory School, Palmer HDFS Building, 515-294-3040.

For more information about child care options, contact the university child care coordinator at 515-294-8827.

STUDENT LIFE

Memorial Union

The Memorial Union completes the college experience by developing leadership, community, and career readiness. As the living room of campus, the "MU" serves students and the campus community through a variety of programs and activities.

515-296-6848; www.mu.iastate.edu (<http://www.mu.iastate.edu>)

Arts, Entertainment, Recreation:

- CyBowl & Billiards: bowling, billiards, video arcade, table tennis
- Maintenance Shop: live music, comedy, open mic nights
- Student Union Board: weekly films, comedy, music, diverse programs, special events, much more
- Art exhibits, art gallery, and art-for-rent
- Workspace: art and crafts classes for fun, studios for work in wood, jewelry, pottery; button maker
- TVs, lounges, study spaces

Student Organizations

- Student organization offices and meeting space; recognition process.
- Leadership skills development, training, and events.
- Community-service opportunities and trips

Dining & Shopping

- Food Court & MU Market & Café
- Panda Express

Memorial Union Student Engagement is committed to helping students learn inside and outside the classroom by offering countless ways to get involved at Iowa State through leadership, service, arts, entertainment and recreation activities.

Student Engagement includes: the Workspace (arts studio), the Maintenance Shop (entertainment venue), CyBowl & Billiards (recreation

center/ bowling alley), Cyclone Cinema, leadership and service programs, art galleries in the MU, and management of the recognition of over 800 campus and student organizations. For a complete list of recognized organizations, visit <http://www.stuorg.iastate.edu>.

The staff provides assistance to student and campus organization leaders, members and advisors on an individual or group basis. Available on the Student Engagement website are resources for student and campus organizations including the event authorization process, publicity and promotion ideas, constitution writing guidelines, and officer transition information. MU Student Engagement is home to the Student Consultants that provide hands on support for students interested in leadership and service opportunities and student organization officers looking to better their clubs. In addition, Student Engagement offers a 3-credit course called Leadership ISU, where students learn leadership capacity through a series of activities and seminars, as well as many other leadership conferences and retreats. Reservations for the Lynn Fuhrer Lodge are managed by this office as well.

MU Student Engagement coordinates the Co-Curricular Transcript (CCT), an online system to help students manage their experiences, achievements and involvement while as an Iowa State student. Faculty and staff can add verified entries while students can add their own self-managed entries as well. Entries are added to one of the following categories: Campus Involvement, Community Service, Honors and Awards, Internships and Study Abroad, Leadership Experience, On Campus Employment, Publications, Recreational Activities, Research, and Seminars and Workshops. From there students can create customized and comprehensive transcripts to use when applying for jobs, internships, scholarships, graduate school or leadership opportunities.

Annual events include: Fall ClubFest & Spring ClubFest (organization involvement fairs), WelcomeFest (Ames and ISU opportunity fairs), ISU AfterDark (substance-free alternative program- six times per year), Iowa Student Leadership Experience (one-day leadership conference), and Winterfest (celebration of all things winter).

More information is available at the Memorial Union Student Engagement, located in the East Student Office Space in the MU (across from Panda Express); online at www.studentengagement.iastate.edu (<https://studentengagement.iastate.edu/>) or by calling (515) 294-8081.

Lectures

www.lectures.iastate.edu/ (<http://www.lectures.iastate.edu/>)

The Committee on Lectures, funded by Student Government, brings to campus dozens of distinguished speakers in national and international affairs, the sciences, and the arts. In addition to giving formal lectures, many speakers meet with students for small-group discussions.

Through the Lectures Program, students have access to a broad range of presentations, including popular culture, educational and economic

topics, social issues, music and comedy, and technological and scientific development. Past speakers include writer Ta-Nehisi Coates, physicist Michio Kaku, activist Edward Snowden, attorney Gloria Allred, U.S. Rep. Katie Porter, and U.S. Senator Ben Sasse. The Committee on Lectures also co-sponsors events hosted by student organizations and academic units.

Students are encouraged to contact the Lectures Program office and become involved in the planning of these events.

Honor Societies

Honor societies at Iowa State University provide opportunities for students who excel in the classroom and want to network with others in their major. Members of these honor societies are eligible for transcript recognition through the Office of the Registrar. The complete list of honor societies (<https://www.stuorg.iastate.edu/organizations/12/type/>) can be found on the student organization website.

EXCHANGE PROGRAMS & STUDY ABROAD

Regent Universities Student Exchange Program

Iowa State University students may take courses at either of the other two Regent universities for Iowa State resident credit. Regular, degree-bound students in good standing at any of the three Regent universities may attend another Regent university for a maximum of two semesters, and the credits earned at the other university will be counted as resident credit at the home institution. Approval for participation and credit in the exchange program must be obtained well in advance of registration since the department head must approve the acceptance of such credits if these are to apply to the major, and to ensure complete processing of the application between the cooperating universities within specified dates for enrollment. Detailed information and application forms for the exchange program are available from the Office of the Registrar.

National Student Exchange (NSE)

Iowa State University is a member of National Student Exchange. The NSE Consortium has 200 colleges and universities throughout North America providing academic and experiential exchange opportunities. Iowa State students with a cumulative GPA of at least 2.50 are eligible to apply. Credits earned as an NSE participant will be recorded on the students Iowa State transcript. Approval for credit in the NSE program should be sought from a student's academic advisor in advance of application. Detailed information and applications forms are available from:

National Student Exchange
1080 Hixson-Lied Student Success Center
(515) 294-6479
nse@iastate.edu

www.dso.iastate.edu/nse (<http://www.dso.iastate.edu/nse/>)

Study Abroad

Studying abroad helps prepare students to meet the challenges of an increasingly interdependent global community. It's an adventure that challenges the student academically and provides real opportunities to interact with other cultures, languages, and lifestyles. The skills students gain while studying abroad will make them top candidates for internship placements and full-time positions post-graduation.

As a leading international university, Iowa State has a major commitment to study abroad, and the Study Abroad Center (SAC) is the central administrative office responsible for providing these opportunities.

We offer advising on study abroad, international internships, volunteer opportunities, and scholarships.

With over 50 study abroad programs available, from one week to an academic year in length and in nearly every major, students are able to find a program that meets their needs and interests so they can discover for themselves why study abroad is the most exciting academic adventure.

Exchange Programs offer students the opportunity to study abroad at a partner university while paying Iowa State tuition.

Semester in Australia, Germany, Ireland, Italy, New Zealand, Scotland and Wales offers unlimited placement opportunities for students to study at some of our most popular destinations for the fall, spring, or summer.

Programs led by our faculty offer Iowa State courses around the world. Short-term options can take you from the Antarctica to Uganda and to more than 40 other destinations.

For additional information, contact or stop by the Study Abroad Center. No appointment necessary!

STUDENT RECORDS

Student Records

Iowa State University maintains various records concerning students, to document their academic progress as well as to record their interactions with university staff and officials. In order that their right to privacy be preserved and to conform with federal law, the university has established certain policies to govern the handling of student records. All policies conform with FERPA, the Family Educational Rights and Privacy Act (also known as the Buckley Amendment).

Student Addresses

Students have the responsibility to notify the Office of the Registrar each time their information changes. Information changes can be made from the student's Profile via the Personal Information application in Workday (<https://workday.iastate.edu/>).

Graduate Assistants and student employees must also report an address change to the office of University Human Resource Services (<http://www.hrs.iastate.edu/hrs/>). Information changes can be made through the Personal Information application in Workday (<https://workday.iastate.edu/>).

When Records May Be Withheld

An appropriate university official may request that records be withheld in instances when disciplinary action has been taken against a student, or in instances where students have not completed all requirements placed upon them by the institution. Authorization for these actions is supported by The Iowa Code and The Iowa Administrative Code.

In order for such an action to be rescinded, the Office of the Registrar must receive written authorization from the official who originally requested the action, indicating that the student has met the obligation.

Review and Challenge of Records

A student may challenge the accuracy of handling of records maintained by the university on grounds that the records are inaccurate, misleading, or otherwise violate the privacy or other rights of the student. The university has established the following procedures to provide an opportunity for the student to correct or delete inaccurate records, or to insert into the record a written explanation of the content. Students who question their records should discuss the issue first with the individual staff person who established or maintains the records. Presumably most issues can be resolved at this level. If a satisfactory resolution cannot be reached, the student should submit the question to the head of the department in which the record is maintained.

The department head will discuss the issue with the staff person and the student challenging the record. If resolution cannot be reached after

meeting with the department head, the student may submit the question to the dean or director to whom the department head is responsible. The dean or director will investigate, and will respond in writing.

If the record has not been reconciled through these measures, the student may direct a written request to the president of the university. The president will convene an Ad Hoc Hearing Panel of Access and Confidentiality of Educational Records, composed of two faculty members, two students, and one administrator, appointed by the president for a period of one year, with the president or a designee serving as nonvoting chairperson. The student shall be given an opportunity to present to the panel evidence relevant to the issues raised, and the panel will issue a written response.

Posting Grades and Test Scores

Instructors who wish to inform students of their performance may post grades and test scores on a secure course website as long as individual students may only access their own grades. The test scores or course grades of students may not be posted in any public location unless the instructor posts the information using a code for each student that is known only by the instructor and the student.

Release of Grades

Students who choose to release their grades to parents or other trusted third parties may do so using the Workday (<https://workday.iastate.edu/>) Friends and Family Third Party Proxy option. Reports of a student's grades are not routinely sent to the student's parents.

ISUCard and Identification Number

Each student is assigned a random university identification number on entry to the university. This number appears on the ISUCard that is provided to each student at the time of first registration. The ISUCard, may be required for some services and/or activities.

Loss of an ISUCard should be reported immediately to the ISUCard Office, where the lost card will be invalidated and replaced for a charge. Disciplinary sanctions may be imposed for improper use of the ID card or attempts to obtain, by fraudulent means, any form of identification.

Social Security Number

Social security numbers are collected from prospective and current students, for administrative coordination and record identification purposes only. Although procedures have been established by the registrar for assignment of an alternative number upon request, students who wish to be employed on campus, desire to claim federal educational tax benefits, or are applying to receive financial aid, are required by law to provide their social security numbers for administrative use. The social security number is a confidential record and is maintained as such by the

university in accordance with the Family Educational Rights and Privacy Act.

Student Names

Iowa Regent universities have a common policy regarding student names and name changes. The name on the student record should be the student's complete and legal name; however, we understand and respect that not all students identify with their legal name. If a student does not have the official legal documentation required in the standard Name Change Policy to support their legal name change, the Office of the Registrar will work with the student to still process the name change. A student may indicate a preferred name in Workday, which will be the name that is primarily visible across the student information system. In evaluating and processing all name change requests, the university reserves the right to require adequate and appropriate documentation, as warranted. After a name change, a current student must obtain a new ISUCard; a replacement fee may apply.

Consumer Information

The Higher Education Opportunity Act of 2008 (HEOA) requires that postsecondary institutions participating in federal student aid programs make certain disclosures to enrolled and prospective students, parents, employees, and the public. The consumer information policy is available at <https://web.iastate.edu/about/consumer> (<https://web.iastate.edu/about/consumer/>). Students without electronic access can obtain the information from the Office of the Registrar, 214 Enrollment Services Center, 515-294-1840 or from the Office of Admissions, 100 Enrollment Services Center, 515-294-5836. A paper copy of the information will be provided upon request.

Iowa State University Online Directory Information

The ISU Online Directory (<https://www.info.iastate.edu/>) differentiates between verified and guest users:

Verified Users - those accessing the directory from an on-campus server or via Iowa State University's virtual private network (VPN) or other authenticated means.

Information available for display to **verified users** include:

- Name
- Program of Study
- Class Standing
- ISU Email Address

Guest Users - those who are external, unauthenticated individuals.

Information available for display to **guest users** include:

- Name
- Program of Study
- Class Standing

Guest users do not have access to view Iowa State University email address, but they do have the ability to send an email to the student via a webform.

Students can set their Online Directory Privacy Settings via the Personal Information application, Additional Data tab in Workday (<https://workday.iastate.edu/>). It is important to note that students can determine what information from the above items is displayed in the Online Public Directory. Students who have safety or harassment concerns should contact the Department of Public Safety.

Public Information at Iowa State University

Online directory information and public information may be released to the public upon request, except in cases where the student has suppressed the release of their information. Iowa State reserves the right to review and respond to the requests for release of public information on a case-by-case basis. While FERPA may authorize the release of student information, it does not obligate a school official to do so. See list below for specific types of public data.

Online Directory Information

- Name
- Major
- Classification
- ISU Email Address (for verified users)

Other Public Information

- Hometown
- Dates of Attendance at ISU
- Expected date of graduation
- College
- Awards and academic honors
- Iowa State degree(s) and date(s) awarded
- Previous educational institutions attended, degrees received, dates of attendance
- Full-time or part-time status
- Participation in officially recognized activities and sports
- Weight and height of members of athletic teams

Confidential Information

With the exception of the online public directory and public information, all student records are considered to be confidential and are open only to university officials. A university official is a person employed by the university in administrative, supervisory, academic, research, or

support staff position (including law enforcement unit personnel and health staff); graduate assistants; a person or company with whom the university has contracted; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another university official in performing their tasks. A university official has a legitimate educational interest if the official needs to review an education record in order to fulfill their professional responsibility. Iowa State University's notification of rights under FERPA can be found at <http://www.registrar.iastate.edu/policies> (<http://www.registrar.iastate.edu/policies/>).

The following policies govern access to student records:

1. Each type of student record is the responsibility of a designated university official, and only that person or the dean or director to whom that person reports has authority to release the record. The following is a list of the responsible officials:

- a. Academic records: University Registrar
- b. Admissions records: Director of Admissions
- c. Financial aid records: Director of Student Financial Aid
- d. Student financials: Director of Accounts Receivable
- e. Traffic and security records: Director, ISU Department of Public Safety
- f. Medical records: Director, Thielen Student Health Center
- g. Counseling records and test scores: Director, Student Counseling Service
- h. Actions of Academic Standards Committees: College Deans
- i. Disciplinary records: Dean of Students, Office of Student Conduct
- j. Residence hall records: Director of Residence
- k. Evaluations for admission to ISU graduate or professional programs: College Deans or Department Chairs
- l. Special academic programs: Faculty member in charge of the program and the Dean of the college
- m. Student employment: Director of University Human Resources

2. The designated official may release records to other university officials who have a legitimate need for the information.

3. The retention period for student records is reviewed periodically and updated when appropriate.

4. Students have the right to review upon request any records that pertain directly to them. This provision does not apply to records to which the student has waived their right to review (e.g. letters of recommendation), nor does it apply to medical and counseling records.

5. A student may waive the right to review a specific record by submitting in writing a statement to this effect to the official responsible for that record.

6. A file containing copies of records pertinent to advising is maintained on each student for use by the student's advisor. This file may be maintained in hard copy or electronic format. Ordinarily this file is kept in the possession of the advisor, but for convenience it may be stored elsewhere such as in the dean's office or department office. When the student changes programs of study, or changes advisors within the same program of study, the file is transferred to the new advisor. Under the university's student records policy, the student is considered to have the right of access to this file.

7. Medical and counseling records shall be released at the written request of the student to medical or psychological professionals outside the university or to university officials.

8. University personnel who have access to student records in the course of carrying out their university responsibilities shall not be permitted to release the record to persons outside the university, unless authorized in writing by the student or unless one of the exceptions stated earlier is involved.

9. Confidential information may be released by students to their parents or other trusted third parties through the Workday (<https://workday.iastate.edu/>) Friends and Family Third Party Proxy option. Confidential information may also be released by obtaining the student's written consent via a Authorization to Release Information to a Third Party form, which is available on the Student Forms (<http://catalog.iastate.edu/registrar/Students> can set their Online Directory Privacy Settings via the Personal Information application, Additional Data tab in Workday.html) page of Office of the Registrar website, or by having the parent establish the student's dependency as defined by the Internal Revenue Code of 1954, section 152, by furnishing a certified copy of the parent's most recent federal income tax return.

10. The officials responsible for custody of student records will maintain records of requests and disclosures of personally identifiable nonpublic information. The records of requests will include the person or agency requesting the information and the purpose of the release. These records of requests and disclosures will be available to the student on request. Records of requests and disclosures are not necessary for requests made by the student, by university officials in carrying out their official responsibilities, by persons employed by agencies and offices conducting audits and accreditation of university programs, or any of the other exceptions listed previously.

For the purposes of FERPA, Iowa State University defines Directory Information to include both Online Directory and Other Public Information as defined on Public Information (<https://catalog.iastate.edu/registrar/#publicinformationtext>) of the University Catalog.

It is the policy of the university to respect the privacy of students; therefore, only lists containing Directory Information may be made

available to members of the public when deemed appropriate and necessary, and in accordance with all applicable Iowa State policies and procedures. While FERPA allows for the release of such information, it does not obligate the university to do so; Iowa State University reserves the right to review and respond to requests for release of information on a case-by-case basis.

A sub-set of Directory Information is available via the Online Directory (<https://www.info.iastate.edu/>); please note that the Online Directory differentiates between verified and guest users and displays information accordingly. More information on this can be found in the Public Information section of the University Catalog.

Disclosures Permitted by FERPA

Iowa State University retains the discretion to disclose Directory and Confidential Information as indicated in Section 4 (<http://www.registrar.iastate.edu/policies/>) of Iowa State University's Notification of Rights Under FERPA. Specifically, the university may disclose to the public or to specific individuals, Directory and Confidential Information for reasons of safety if the disclosure meets the criteria under Section 4 (<http://www.registrar.iastate.edu/policies/>).

ACADEMICS

Classification/Class Standing

Undergraduate class standing (i.e., year in school) is determined by the number of credits completed, and it is based on credit hours earned, not merely credit hours attempted. The grades F and NP and the marks I and W do not contribute toward credit hours earned and thus are not considered in determining class standing. See Grades for information about the grading system at Iowa State University.

Class standing in all academic colleges, except Veterinary Medicine, is as follows:

Sophomore: 30 credit hours earned

Junior: 60 credit hours earned

Senior: 90 credit hours earned

Students who have a bachelor's degree and are working toward another undergraduate degree, licensure, or admission to a specific graduate or professional program, typically have a class standing of senior.

Transfer students without a degree will have a class standing on the basis of credits accepted by Iowa State University.

Veterinary medicine students are promoted from the first- to the second-, third-, and fourth-year classes based upon satisfactory completion of the required courses for each year. To be promoted to the second-year class, students must have a cumulative grade-point average of at least 1.67 for all courses in the first year of the veterinary medicine curriculum. To be promoted to the third- and fourth-year classes, students must have a cumulative grade point average of at least 2.00 for all courses in the professional curriculum.

A student, who is attending Iowa State and decides not to work toward an undergraduate degree, will be classified as a special (non-degree) student. Admission requirements and academic standards regulations are the same as regular students. Credits taken as a special (non-degree) student are applicable for undergraduate degree purposes if the student is admitted later as a regular undergraduate. Credits obtained as an undergraduate special student may not, however, be applied toward a graduate degree.

Degree Planning/Academic Progress Report

ISU Degree Audit / Academic Progress Report

In addition to being properly registered, students are responsible for knowing the requirements for their degree and planning their schedule to

meet those requirements. One way to monitor progress toward a degree is with the academic progress report (APR).

Students may access their academic progress report in Workday. The academic progress report displays academic requirements the student must complete in order to complete their program of study. The APR shows courses that have been completed and how they are being applied to fulfill academic requirements as well as the students currently enrolled courses.

Students should use this information to help them review progress towards their degrees(s), plan their course of study to complete academic requirements, and plan for courses for the next term. Graduation evaluators in the Office of the Registrar use the academic progress report during the term a student will graduate to determine if the student will meet all academic requirements upon successful completion of the courses on the student's schedule that term.

Students may use the evaluate academic requirements task in Workday to determine their completion of academic requirements for any program of study available at Iowa State. This "what if" report will show how the the student's completed and in-progress coursework applies toward other programs of study offered at the University.

For further information about how completed courses fulfill academic requirements or how other courses will apply toward their academic requirements, students should see their advisor.

Catalog in Effect (Academic Requirement Effective Date)

A student may choose to graduate under the catalog in effect at the time of graduation or a catalog for the previous six years, provided it covers a period of the student's enrollment at an accredited college or university. Full requirements of the chosen catalog must be met except that adjustments will be made in instances where courses are no longer available or where programs have been changed.

Bachelor's Degree

To receive a degree, a student must meet the requirements of the program of study in which the degree is to be awarded. Verification that the student has met those requirements is made by the dean of the college, who also has the authority to waive a requirement under exceptional circumstances.

A minimum of 120-semester credits and a cumulative grade point average of at least 2.00 in all work taken at Iowa State University is required for graduation.

A student admitted as a transfer student from another college or university is required to have a 2.25 cumulative grade point average at the time of entrance. A transfer student who has earned an associate degree

is required to have a 2.00 cumulative grade point average at the time of entrance.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor's degree from Iowa State University. There is no limit to the number of credits that may be transferred from a four-year institution.

To qualify for a bachelor's degree, a student must take a minimum of 32 credits in residence at Iowa State University. Also required is that the last 32 credits must be completed at Iowa State University, although under special circumstances, with prior written approval of the student's major department, six of the last 32 credits may be transferred and applied toward a degree at Iowa State University. Credits earned while students participated in an ISU Study Abroad or National Student Exchange program are exempt from this requirement.

A student who takes work at another college or university after having been enrolled at Iowa State must submit transcripts of all work attempted to the Office of Admissions at Iowa State. Failure to submit such transcripts will be grounds for dismissal.

In unusual circumstances, the Academic Standards Committees of the respective colleges may review and give further consideration to the records of students who, except for grade-point average, have satisfactorily completed all graduation requirements. If the appropriate college Academic Standards Committee considers that the educational and professional needs of such a student have been satisfactorily met, or can be satisfactorily met by imposing further conditions, the committee may recommend to the dean of the college that the student be graduated or that a supplemental program be accepted in place of the fully unqualified grade point average. The college Academic Standards Committee chairperson reports such exceptional actions to the Faculty Senate Committee on Academic Standards and Admissions.

Two Bachelor's Degrees

Students may receive two bachelor's degrees if the degree requirements for each major are met, including those for general education requirements, and the total number of semester credits earned is at least 30 more than the requirements of the major requiring the greater number of credits. This rule applies whether or not the degrees are awarded at the same time. Students should have an academic advisor in each major, with one advisor being designated as the registration advisor. Students should request approval to pursue two degrees by working with an advisor. Each advisor will have access to the student's information after the change has been processed. The appropriate department and college must approve each degree program.

Students who have earned advanced degrees and wish to earn a second bachelor's degree may be eligible for a college waiver of certain basic and

general education requirements. Students should contact the department offering the major for advice and appropriate planning.

Double Major

A double major is a program for a single degree in which all requirements for two or more majors have been met. The majors may be in different colleges or within the same college or department. The diploma and permanent record will designate all majors that are completed at the same time.

To declare a double major, students should work with an academic advisor. This should be completed at least one term prior to graduation. One major should be designated as primary and the other secondary for purposes of record keeping, but the student's rights and responsibilities are the same in both majors. The advisor of the primary major will serve as the student's registration advisor, but both advisors will have access to the student's information. Degree programs must be approved for each major by the appropriate department and college. One of the majors may subsequently be canceled by working with an advisor.

Students in the College of Engineering are able to earn a degree with a second major as long as the second major is within another college, meets all requirements of the additional programs and contains a minimum of 15 additional credits beyond the requirements for a B.S. degree in engineering for each additional area of study. A student with multiple program of studies within the College of Engineering is permitted to earn only multiple degrees. All requirements for each program of study must be met plus an additional 30 credits for each program of study being pursued beyond the program of study which requires the most credits.

Students with a primary major in another college who wish to take a second major in the College of Liberal Arts and Sciences are not required to meet the Liberal Arts and Sciences General Education requirements. They must, however, meet all requirements for the major, including complementary courses. Students in the B.L.S. program of study in the College of Liberal Arts and Sciences are not eligible to add additional majors.

Second Major Completed after the Bachelor's Degree

After receiving a bachelor's degree, a person may wish to complete all requirements for another major. Approval of the department of the second major is needed before study for the program is begun. At the completion of the program a notation will be made on the permanent record (transcript), but no change will be made on the diploma received at the time of graduation. A degree program must be approved for the second major by the department and by the dean's office.

Changing Major

A student's freedom to change their major, and the procedure that should be followed, depend on the student's academic standing and on policies of individual colleges as approved by the provost.

If students have never been dismissed and reinstated, they may change their major by consulting first with their advisor. Procedures for changing their major are as follows:

1. If the change involves majors within the same college, they should check with the college office to obtain instructions as to how to make the change.
2. If the change involves majors in different colleges, they should obtain a Curriculum Change Form (<https://www.registrar.iastate.edu/sites/default/files/uploads/forms/Curriculum%20Change%20Form%201%2021.pdf>) and their file from their advisor, present these materials to the student services office of their present college, then to the student services office of the college to which they are transferring, and finally to the office of their new major.
3. Students on academic probation (P) may be restricted by rules outlined in the section on Additional Academic Standards Regulations.
4. Students who have been reinstated may not transfer to another college within the university during the first term following reinstatement, and they may not at any time transfer back to the college that originally dismissed them without the permission of the academic standards committee of that college.

Undergraduate Minor

To declare a minor, students should work with an academic advisor at least one term before graduation. The minor may be from the requirements effective date under which the student is graduating or a later requirements effective date.

Requirements for an undergraduate minor are specified by many departments and programs in the university; a record of completion of such requirements appears on a student's transcript. Specific requirements and/or restrictions are available from the department or program offering the minor.

An undergraduate minor has the following requirements and understandings:

1. All minors require at least 15 credits, including at least 6 credits taken at Iowa State University in courses numbered 3000 or above.
2. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.
3. Credits used to meet the minor requirements may also be used to satisfy the credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.

4. Some students may have to exceed the graduation credit requirement set by their college in order to meet the requirements of both the minor and the program of study/major.
5. Courses taken for a minor may not be taken on a pass-not pass basis.

Undergraduate Certificate

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for an undergraduate major. The requirements of the certificate program will determine if an associate or baccalaureate degree is required for the award of the certificate.

An undergraduate certificate has the following requirements and understandings:

1. A student has received either an associate of arts (AA) or associate of science (AS) degree or a baccalaureate degree from any accredited institution or will earn an ISU baccalaureate degree at the same time or before the requirements for the certificate are completed.
2. Admissions Criteria
 - a. Students earning a certificate with a baccalaureate degree must meet all ISU admission requirements for either freshman (<https://www.admissions.iastate.edu/freshman>) or transfer students (<https://www.admissions.iastate.edu/transfer>)
 - b. Students earning a certificate without an ISU baccalaureate degree apply as a non-degree seeking student and will be asked by Admissions if their intent is to declare a certificate. Students must have earned an associate of arts, an associate of science, or baccalaureate degree prior to being admitted to the certificate program. Students should refer to the admissions website (https://www.admissions.iastate.edu/nondegree/undergraduate_requirements) for admission requirements for nondegree undergraduate students. Students must meet any additional admission requirements for the certificate.
3. Requirements for Certificates
 - a. A minimum of 20 credits, with at least 12 credits taken at ISU which are applied towards the undergraduate certificate requirements. All prerequisite requirements for the certificate must be met as part of fulfilling the requirements for the certificate.
 - b. At least 9 of the credits taken at Iowa State University must be in courses numbered 3000 or above.
 - c. The certificate must include at least 9 credits that are not used to meet any other department, college, or university requirement. Credits used to meet the certificate requirements may be used to

satisfy the credit requirement for graduation and to meet credit requirements in courses numbered 3000 or above.

- d. Courses taken for a certificate may not be taken on a pass-not pass basis.
 - e. A cumulative grade point average of at least 2.00 is required in all courses taken at ISU towards the certificate.
 - f. A student may not receive both an undergraduate major and a certificate of the same name.
4. Awarding of Certificates
- a. The following criteria must be met prior to the award of a certificate:
 - i. For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree.
 - ii. For students that have received a baccalaureate, associate of arts, or an associate of science degree from any accredited institution, a certificate is awarded upon completion of the certificate requirements.
 - b. A notation of a completed certificate will be made on a student's transcript and a printed certificate will be awarded.

Communication Proficiency Policy

Basic Principles: The faculty of Iowa State University believe that all educated people should be able to communicate effectively in a variety of settings and media, including electronic. Consequently, Iowa State University graduates are expected to develop competence in three interrelated areas of communication: written, oral, and visual.

This communication competence can best be achieved through the following five principles:

- Communication instruction and practice are distributed over the student's entire undergraduate experience, both in and out of the classroom, from the first year through the senior year.
- Communication instruction and practice are distributed across the curriculum, both in communication courses and in courses in the student's major.
- Active learning and higher-order thinking are fostered through communication.
- Faculty across the university share responsibility for the student's progress in communication practices.
- Both faculty and students engage in ongoing assessment for continuous improvement of the student's communication practices.

Iowa State University's communication curriculum, based on these five principles, seeks to enrich the student's understanding of the various subjects studied as well as prepare the student to communicate successfully in professional, civic, and private life.

Foundation Courses

To ensure that broad communication competence is addressed and developed at the beginning of a university career, all students will earn six credits in the two-course introductory sequence (ENGL 1500 Critical Thinking and Communication and ENGL 2500 Written, Oral, Visual, and Electronic Composition), normally taken in the first and second years. Students will focus on writing and critical reading, with complementary instruction in visual, oral, and electronic communication; they will concentrate on civic and cultural themes; and they will enter work in a communication portfolio to document their current level of proficiency.

Communication Proficiency Grade Requirement: At a minimum, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 2500; some majors/degree programs may set higher requirements for communication proficiency.

Upper-Level Curricula

Continuing development of communication skills will be directed by the student's major department. Using the university's basic principles as a guide, each department will specify a set of intended learning outcomes and design communication experiences by which students in the major can achieve the desired level of communication proficiency.

Departments may select from or combine a variety of communication options that best match their faculty, students, and curriculum:

- designated communication-intensive courses that integrate written, oral, and visual communication into a course in the major;
- a sequence of courses within the major that incorporates communication tasks of increasing complexity;
- linked courses—one in communication, one in the major—that integrate readings and assignments;
- advanced composition course(s) appropriate to the student's major and offering instruction in written, oral, and visual communication;
- communication-intensive activities within or beyond course work, such as communication portfolios, discipline- or course- specific student tutoring, community service projects, internships, electronic presentations, informational fairs, juried competitions, entrepreneurial projects, newsletters, Web sites.

Departments will retain the authority for regularly assessing the degree to which their students achieve the specified learning outcomes and for making curricular improvements based on departmental assessment data.

Non-Native Speakers of English: Students admitted to the university who are graduates from non-U.S. high schools and whose first language is not English are required to take the English Placement Test before the beginning of their first semester of enrollment as students at Iowa State. This requirement includes freshmen as well as those who have

transferred credit from other institutions. The test is administered by the English Department and is offered before the beginning of each semester. Students whose performance on this placement examination is satisfactory will follow the regular university communication proficiency requirements. Students who have deficiencies will enroll in special English classes, as determined by the test results.

U.S. Diversity and International Perspective Requirements

One of Iowa State University's goals is to prepare its students to meet the challenges of responsible civic engagement and effective professional roles in a culturally diverse global community and workplace. To help achieve this goal, all undergraduate students must fulfill graduation requirements in two areas: U.S. Diversity and International Perspectives. At a minimum, students can fulfill this requirement with three credits of course work (or the equivalent in some alternative academic experience) for each area. In most cases, courses used to meet the U.S. Diversity and International Perspectives requirements can also be used to fulfill general education requirements of the student's college or requirements of the student's major. Students should consult with advisors for details of the requirements in particular majors.

The focus of the U.S. Diversity requirement is understanding the social complexity of human beings based on analytical categories such as race, ethnicity, or gender, and the ways those categories have excluded historically marginalized groups. Intersectional understandings of diversity consider other categories of identity (e.g. sexuality, culture, and religion) related to race and ethnicity. A diverse and robust education means exploring these social complexities in a structured learning environment to familiarize students with the historical, societal, and political contributions of diverse populations.

List of approved U.S. Diversity Courses (<https://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses/>) - please refer to this list for the most up-to-date courses approved as U.S. Diversity (this list will continue to be updated following the publication of this document).

Through completion of the U.S. Diversity requirement, students will achieve at least three learning outcomes such as those listed below.

Students will be able to:

- Identify the experiences and contributions of underrepresented or marginalized groups and how they have shaped the history and culture of the United States.
- Understand the analytical concepts of culture, ethnicity, race, gender, sexuality and/or religion and be able to apply these concepts to an analysis of the United States.

- Analyze systemic oppression and personal prejudice and their impact on marginalized communities and the broader U.S. society.
- Evaluate important aspects of diversity, equity, and inclusion so they can live, work, and collaborate with others in the 21st century United States.

The focus of the International Perspectives requirement is the global community. Its objective is to promote students' understanding of cultural diversity and interdependence on a global scale. A period of immersion in a foreign culture is often a particularly effective way of meeting these objectives, so Iowa State University encourages the use of study-abroad experiences as a means of fulfilling the International Perspectives requirement. International students, because they are "studying abroad" from their home country's perspective, are normally deemed to have met the International Perspectives requirement. The International Perspective requirement shall be waived for U.S. military veterans who have completed at least three months of service stationed outside of the United States.

List of approved International Perspectives Courses (<https://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/>)

Through completion of the International Perspectives requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:

- Analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview.
- Describe and analyze how cultures and societies around the world are formed, are sustained, and evolve.
- Analyze and evaluate the influence of global issues in their own lives.
- Describe the values and perspectives of cultures other than their own and discuss how they influence individuals' perceptions of global issues and/or events.
- Communicate competently in a second language.

Academic Grievances and Appeals

Students who believe a faculty member (in his or her academic capacity) has behaved unfairly or unprofessionally may have their grievance reviewed through the procedure described below. A student may not initiate an academic grievance more than one year following completion of the course, and may not initiate the grievance of a course grade beyond midterm of the semester following completion of the course.

Prior to initiating a formal grievance, a student may wish to discuss the situation informally with the Dean of Students or designee, who can offer advice as to the most effective way to deal with it.

Grievances arising out of classroom or other academic situations should be resolved, if at all possible, with the student and the instructor involved. If resolution cannot be reached, or if the grievance involves sexual or racial harassment and the student prefers not to deal directly with the instructor, the student should discuss the grievance with the instructor's department chair and submit it in writing to him or her. The department chair will investigate the grievance, including discussing it with the instructor involved and/or referring it to a departmental grievance committee. The department chair should respond in writing within five class days of receipt of the written notice of the grievance.

If the student is not satisfied with the resolution of the grievance proposed by the department chair, the student may appeal within 45 calendar days in writing to the dean of the instructor's college. (In the case of a grievance involving a Graduate College policy or procedure, an appeal of the chair's decision should be directed to the Dean of the Graduate College rather than to the dean of the instructor's college.)

The dean will hear the explanations of the department chair and instructor, and should respond to the student in writing within ten class days of receipt of the written notice of the appeal. If the grievance cannot be resolved with the dean, the student may forward within 45 calendar days a written appeal to the provost, who will convene a Committee to Review Student Grievances (see below) to consider the appeal within fifteen calendar class days of receipt of the written notice of the appeal.

Within ten calendar days following the convening of the committee, the provost will make a decision with regard to the grievance and will transmit this decision in writing to the grievant, the dean, the department chair, and the instructor. An appeal of the provost's decision may be made within 45 calendar days to the president of the university. The time limit specified at each level may be extended by mutual agreement of all parties concerned.

The Committee to Review Student Grievances is composed of faculty members named by the president of the Faculty Senate and students named by the president of the Student Government. The provost may serve as a chairperson for the committee, or may designate another chairperson for a specific grievance hearing. A minimum of two faculty members, two students, and the chairperson shall constitute a quorum for the convening committee.

Attendance and Absences

Class Attendance

In order to attend a given class, a student must be registered for that class for credit or audit. Exceptions to this policy are at the discretion

of the instructor of the course. See Index, Validating Enrollment for regulations concerning attendance to validate students' enrollment in a class.

Students are expected to attend class meetings as scheduled. Each instructor sets his or her policy with respect to class attendance, and excuses for absence from class are handled between the student and instructor. The instructor is expected to announce his or her policy at the beginning of the course.

Additional information regarding discretionary accommodation for disability and religion are available at <http://www.hrs.iastate.edu/AAO/eod/reasonaccom.shtml> (<http://www.hrs.iastate.edu/AAO/eod/reasonaccom.shtml/>)

Veteran Attendance

In accordance with the requirements of the Servicemembers Improved Transition through Reforms for Ensuring Progress Act (SIT-REP Act, December 31, 2018), the University will not deny access to classes or facilities to a Veteran or eligible dependent due to a late payment from the Veterans Administration. This is only applicable to Veterans or eligible dependents who are receiving educational assistance under Chapter 31 (VR&E) or 33 (Post 9/11 and Fry Scholarship) of title 38, United States Code (U.S.C.). For the purposes of this policy, "Denial of Access" shall be defined as "to prohibit the entry, participation, or attendance to an event or facility otherwise afforded to all registered students." More information about this policy is available at <https://catalog.iastate.edu/tuitionfees/#feepaymenttext>.

Students who receive benefits from the Veterans Administration required by the V.A. to attend class regularly to maintain their V.A. eligibility. If the instructor knows that a student receiving V.A. benefits is not attending class, the instructor is obligated to notify the Office of the Registrar and a notification will be forwarded to the Veterans Administration. More information about veteran benefits is available at <http://www.veterans.iastate.edu>. (<http://www.registrar.iastate.edu/veterans/>)

Field Trips/Curricular-Related Activities

Trips away from campus as part of a course are often appropriate educational experiences. They may not, however, take place during the first or last week of the semester, nor may they extend over more than two consecutive class days (Monday-Friday); these regulations may be waived only by special permission of the dean of the college in which the course is offered. Students should consult with instructors whose classes will be missed. If a mutually satisfactory agreement between the instructors and the student cannot be reached, the student cannot be required to attend the curricular-related activity or be penalized by the instructor for missing the curricular-related activity.

Special fees are often charged to cover the costs of field trips. Field trip fees are noted in the course section information in Workday (<https://workday.iastate.edu/>) and in the Schedule of Classes (<http://classes.iastate.edu/>).

Excusable Absences for Non-Curricular Reasons

Students who miss class for non-curricular reasons are responsible for completing all assigned course requirements in a timely manner. Instructors should provide timely opportunities for students to make-up or replace missed scheduled examinations and/or assignments resulting from an excusable absence. While instructors are free to change the format of make-up examinations or assignments, students will be evaluated by the same standards as other members of the class.

In all cases, the person responsible for the event or activity should provide participants with a letter explaining the proposed absence and its duration including travel times for off-campus events and activities. Students must provide this documentation to instructors at least 10 days in advance of the activity or event, except when such notice is not possible.

Course instructors retain final authority regarding student absences and how they impact course grades and the acceptability of a student's work toward passing their course. If a student must miss, for any reason, a portion of a course that, in the considered opinion of the course instructor, is critical to the student's ability to meet the course objectives, the instructor must recommend alternative actions to the student, which may include dropping the class.

Extra-Curricular Activities as a Representative of the University

Students may seek to or be asked to participate as an Iowa State University representative in non-credit events (competitions, conferences, presentations, programs, and performances) scheduled by academic or athletic units of the university at times that conflict with scheduled classes.

Instructors shall excuse students who miss class while representing Iowa State University in official department-or university-sponsored activities, including:

- Academic or professional conferences and workshops
- Intercollegiate athletic, academic, and judging competitions
- Musical, theatrical, dance and other artistic performances
- Presentations or programs given to external audiences.

Other Extra-Curricular Activities

Instructors will determine whether other absences not officially sponsored by a unit of the University (e.g., conference attendance, job interviews), will be treated as excused.

Military Service

Instructors shall excuse absences due to Veteran or military service obligations (including service-related medical appointments, military orders dictating appointments, and National Guard Service obligations). When a student's military or veteran obligations are for more than two weeks, the student should meet with their advisor to discuss the situation and academic options and work with their instructors to discuss potential accommodations. University procedures are in place for such situations and should be followed. In all instances, students have a responsibility to communicate with their instructors to ensure they are continuing to meet course expectations and requirements. Faculty, staff, and students are encouraged to utilize the Military-Affiliated Student Center and review information at [veterans.iastate.edu](https://www.veterans.iastate.edu/) (<https://www.veterans.iastate.edu/>).

Court Appearances

Instructors shall excuse absences due to officially mandated court appearances including jury duty.

Examinations and Evaluation Evaluation Procedures

It is university policy that the instructor shall inform the students at the beginning of each course of the evaluation procedures planned for use in the course.

Retention of Records

Records of all graded work must be retained by the instructors until midterm of the semester following completion of a course or until all pending appeals and incompletes are resolved, whichever is later. Instructors leaving the university must file records of all graded work with their department office before departure.

Examinations

Examinations are one of the most common ways instructors assess student performance. In order that examinations can be a useful part of the educational process, the following policies have been instituted:

1. One purpose of examinations is to help students' learning. Therefore, examinations should be evaluated as soon as possible after they are given and the results should be made available to the students in a timely way to enhance learning.
2. All tests and examinations administered between the beginning of the term and final examination week shall be held during a regularly scheduled lecture or laboratory class period for that course.

A department may obtain approval to administer a separately scheduled examination if all of the following criteria are met:

- a. The course is multi-sectioned.
- b. A common departmentally developed examination will be administered to all students in all sections at the same time.
- c. The test scores will be used as a basis for a uniform grading procedure for all sections of the course. To allow students to plan in advance, requests to hold separately scheduled examinations must be made to the Registrar and approved by the Provost prior to the start of course registration for that term. Only under unusual circumstances will a course be approved for separately scheduled examinations once student course registration has begun. Whenever a separately scheduled examination is administered, a regular class meeting during that week shall be omitted.

Students who are unable to take a separately scheduled examination at the designated time, due to a course conflict or other legitimate reason, must notify the instructor in advance and must be given the opportunity to be examined at another time mutually convenient for the student and the instructor. The instructor shall decide to administer the same examination, an alternate examination, or use an alternate assessment procedure.

3. At the end of the semester, a week is set aside for final examinations or other term evaluations, with a two-hour period normally scheduled for each course. The following policies govern the responsibilities of students and faculty members during this week:

- a. Final exams may not be given at a time other than that for which the exam is scheduled by the Registrar. An instructor may not give a final exam prior to final exam week nor change the time of offering of the final examination as it appears in the final exam schedule. Permission to change the time for which an exam is scheduled may be given only by the dean of the college. If the instructor elects not to give a final exam in a course of two or more credits, the class is required to meet at the scheduled final exam period for other educational activity such as a review of the course or feedback on previous exams.
- b. Final exam periods are determined according to the regularly scheduled meeting time of the class. However, certain courses are assigned special group exam times so that several sections of the same course may be tested together. The criteria for establishing special group exams are similar to those listed for separately scheduled exams listed in number 2 above. If this results in conflicting group examination periods, students should inform the instructor in charge of the first of the two conflicting courses as listed on the final exam schedule within the special

groups in question; that instructor is responsible for arranging a special examination or making some other adjustment.

- c. Evening courses with lectures scheduled at 6:00 p.m. or later should give their examinations during finals week from 7:00-9:00 p.m. on the day the class normally meets. If this exam conflicts with an evening group exam, the instructor responsible for the latter must arrange a special examination for any students who have a conflict.
- d. If unusual circumstances involve the need for students to change the time of their final examination, they must obtain the approval of the instructor of the course.
- e. If a student has three examinations scheduled on the same calendar day and wishes to change one to another day, the instructor of the course having the smallest number of students is responsible for arranging an alternate examination time for the student unless make-up exam times are available in one of the other courses.
- f. All faculty members and teaching assistants with instructional or grading responsibilities are considered to be on duty throughout the entire final examination week and are expected to be available to students during that week for discussion of any matters pertaining to the final examination and final grade or to other aspects of the course.

Prep Week

For each Fall and Spring semester, the last full week of classes before final examinations is designated as Prep Week. The intent of this policy is to establish a one-week period of substantial and predictable study time for undergraduate students. During the Prep Week period, regular lectures are expected to continue, including the introduction of new content, as deemed appropriate by the instructor. The restrictions established by this Prep Week policy are:

- Due dates for mandatory graded submissions of any kind that fall within Prep Week must be listed on the syllabus provided at the start of the course.
- Mandatory final examinations may not be given during the Prep Week period except for laboratory courses or courses that meet weekly and for which there is no contact during the normal final examination week.
- No in-class quizzes or exams may be given on the Thursday and Friday of Prep Week. Quizzes/exams that are administered outside of class such as take-home exams, online exams, or exams given in the testing centers must: 1) open no later than Wednesday at noon

of Prep Week, and 2) only cover material presented on or before the Tuesday of Prep Week.

Exceptions to this policy include the following:

- Classes that only meet on Thursdays or Fridays
- Lab components of courses
- Half-semester courses
- Make-up exams due to excused absences
- Regularly used formative assessments intended to enhance student engagement and guide course delivery

All other exceptions require approval by the Office of the Senior Vice President and Provost.

- Registered ISU Student Organizations may not hold any meetings, functions, or sponsored events during the Prep Week period. Any exception to these restrictions must be authorized in advance by the Office of the Senior Vice President for Student Affairs.

Instructors are reminded that most students are enrolled in several courses each semester, and the widespread violation of this policy can cause student workloads to be excessive as students begin their preparation for final examinations.

Students are reminded that their academic curriculum is their principal reason for being in college and they have a responsibility to study in a timely fashion throughout the entire semester.

Policy approved by Faculty Senate, Senior Vice President and Provost, and President, 2013; Amended and approved by Faculty Senate, Senior Vice President and Provost, and President, 2017.

Scholastic Recognition

The university recognizes those students who are doing exceptionally well in several ways, including the following.

1. Dean's List. Each semester the university issues a dean's list made up of those students who have carried at least 12 credit hours of graded or S-F courses with a 3.50 grade-point average or above for the semester. Courses taken on a P-NP basis do not count as part of the 12-credit hour requirement. No Dean's List is issued for summer session. The list can be viewed from the Office of the Registrar website (<http://www.registrar.iastate.edu>).

2. President's List. Each semester the university issues a President's List made up of those students who have carried at least 24 credit hours of graded or S-F courses with a 4.00 grade-point average for their two most recent semesters of enrollment at Iowa State University (summer not considered). Courses taken on a P-NP basis do not count as part of the 24-credit hour requirement. No President's List is issued for summer

session. The list can be viewed from the Office of the Registrar website (<http://www.registrar.iastate.edu>).

3. Graduation with Distinction. Undergraduates who have a cumulative grade point average of 3.50 or higher (based on a 4.0 scale) are eligible to graduate "with distinction" provided they have completed the following criteria for their degree. The student's distinction will be based upon their cumulative grade point average after all degree requirements have been satisfied.

These students are recognized as follows:

- Summa Cum Laude: cumulative grade point average of 3.90 or higher.
- Magna Cum Laude: cumulative grade point average of 3.70 to 3.89.
- Cum Laude: cumulative grade point average of 3.50 to 3.69.

The recognition appears on the student's official transcript and diploma.

Candidates for a bachelor's degree may graduate "with distinction" provided they have completed 60 semester credits of coursework at Iowa State University at the time of graduation, including a minimum of 50 graded or Satisfactory-Fail course credits.

Candidates for the bachelor of liberal studies degree may graduate "with distinction" provided that they have (a) completed 45 semester credits of coursework at the three Iowa Regent universities at the time of graduation, and (b) earned at least a 3.50 cumulative grade point average at ISU. The graduation with distinction recognition will be based on their combined grade point average for coursework taken at the three Iowa Regent universities.

Candidates for the bachelor of science in nursing degree may graduate "with distinction" provided that they have completed 32 semester credits of coursework at ISU at the time of graduation.

Honors Program. Students who are full members of the University Honors Program need a cumulative grade point average of 3.50 at the beginning of their final term. In addition to meeting the appropriate grade point requirement, students will have completed an approved honors program of study and an honors project prior to graduation. This recognition appears on the student's permanent record, diploma, and in the commencement program.

Graduation

Seniors must file a graduation application with the Graduation Office, 214 Enrollment Services Center. Students will be notified of their graduation status approximately mid-semester of their graduation term. For graduation application instructions and deadlines, see the Graduation and Commencement website (<http://www.graduation.iastate.edu/>).

Iowa State University commencement ceremonies are held at the end of fall and spring semesters. Undergraduate students expected to graduate at the end of summer semester are invited to participate in the spring ceremony preceding their graduation term or the fall ceremony following their graduation term. In addition to the formal University commencement ceremony, the undergraduate colleges host graduation activities take place at the end of fall and spring semesters. For more information, see the Graduation and Commencement website (<http://www.graduation.iastate.edu/>).

Verification of satisfactory final grades will be completed approximately two weeks after the end of the semester and diplomas will be mailed to all successful degree candidates. Students must ensure the following before they can graduate:

1. The date of graduation is correct on the student's academic record.
2. Sufficient credits, acceptable toward graduation, have been earned to meet the minimum requirements for their program of study. (Some examples of credit not acceptable toward graduation are: elective credits beyond those allowed in a program of study, credits earned in passing the same course more than once, more than four credits of Athletics 1010, and credit in two courses for which the catalog states that only one may count toward graduation.)
3. They have achieved a set of communication competencies established by the department as appropriate for the major.
4. A cumulative grade point average of at least 2.00 was earned in all work taken at Iowa State; and student has met all special grade point average requirements established by their college, department, or program in specified courses.
5. Students who have taken work at another college or university prior to or after having been a student at Iowa State, must have submitted a transcript of all such college study attempted to the Office of Admissions. Failure to submit such a transcript is grounds for dismissal.
6. Incompletes in courses required for graduation have been removed by midterm of the term of graduation.
7. At least 32 credits have been earned in residence at Iowa State University, and the final 32 credits were taken at Iowa State. (Six of the last 32 credits may be transferred to Iowa State, with prior permission of their major department.) Iowa State University must receive an official transcript of all transfer work by midterm of the term of graduation.
8. Outstanding financial obligations owed the university have been paid in full. Students who owe an outstanding obligation to the university will have a hold placed on their records and they will not receive their transcripts. If students have questions about this policy, they should contact the transcripts area of the Office of the Registrar.

Posthumous Degrees

To provide survivors of deceased students with a meaningful acknowledgement of the student's accomplishments and legacy at Iowa State University, the University may grant degrees posthumously.

Consideration for a posthumous degree may be initiated by student's department/graduate program, by the Office of Student Assistance and Outreach, or by family members or other survivors. The student's death should be reasonably proximate to their enrollment at Iowa State; special consideration should be granted for circumstances such as departure due to military deployment or critical illness or injury.

For undergraduate and professional students, the student's College may recommend conferral of the posthumous degree, which will be forwarded to the Provost for consideration and a final decision.

For graduate students, their department or interdepartmental graduate program may recommend conferral of the posthumous degree to the Graduate College. The Graduate College will review the request with the disciplinary college of the student and forward the request to the Provost for consideration and a final decision.

After a request is approved, the University can issue the diploma to the survivors of the deceased student. The student's permanent record, and the commencement program, will indicate the degree was conferred posthumously, but no notation that the degree was awarded posthumously will be made on the diploma.

Academic Conduct

Class Attendance

In order to attend a given class, a student must be registered for that class for credit or audit. Exceptions to this policy are at the discretion of the instructor of the course. See Validating Enrollment for regulations concerning attendance to validate students' enrollment in a class.

Students are expected to attend class meetings as scheduled. Each instructor sets their policy with respect to class attendance, and excuses for absence from class are handled between the student and instructor. The instructor is expected to announce their policy at the beginning of the course.

Additional information regarding discretionary accommodation for disability and religion are available at <http://www.hrs.iastate.edu/AAO/eod/reasonaccom.shtml> (<http://www.hrs.iastate.edu/AAO/eod/reasonaccom.shtml/>)

Veteran Attendance

In accordance with the requirements of the Servicemembers Improved Transition through Reforms for Ensuring Progress Act (SIT-REP Act, December 31, 2018), the University will not deny access to classes or facilities to a Veteran or eligible dependent due to a late payment from

the Veterans Administration. This is only applicable to Veterans or eligible dependents who are receiving educational assistance under Chapter 31 (VR&E) or 33 (Post 9/11 and Fry Scholarship) of title 38, United States Code (U.S.C.). For the purposes of this policy, "Denial of Access" shall be defined as "to prohibit the entry, participation, or attendance to an event or facility otherwise afforded to all registered students." More information about this policy is available at <https://catalog.iastate.edu/tuitionfees/#feepaymenttext>.

Students who receive benefits from the Veterans Administration are required by the V.A. to attend class regularly to maintain their V.A. eligibility. If the instructor knows that a student receiving V.A. benefits is not attending class, the instructor is obligated to notify the Office of the Registrar and a notification will be forwarded to the Veterans Administration. More information about veteran benefits is available at <http://www.veterans.iastate.edu/>.

Field Trips/Curricular-Related Activities

Trips away from campus as part of a course are often appropriate educational experiences. They may not, however, take place during the first or last week of the semester, nor may they extend over more than two consecutive class days (Monday -Friday); these regulations may be waived only by special permission of the dean of the college in which the course is offered. Students should consult with instructors whose classes will be missed. If a mutually satisfactory agreement between the instructors and the student cannot be reached, the student cannot be required to attend the curricular-related activity or be penalized by the instructor for missing the curricular-related activity.

Special fees are often charged to cover the costs of field trips. Field trip fees are noted in the course section information in Workday (<https://workday.iastate.edu/>) and in the Schedule of Classes (<http://classes.iastate.edu/>).

Excusable Absences for Non-Curricular Reasons

Students who miss class for non-curricular reasons are responsible for completing all assigned course requirements in a timely manner. Instructors should provide timely opportunities for students to make-up or replace missed scheduled examinations and/or assignments resulting from an excusable absence. While instructors are free to change the format of make-up examinations or assignments, students will be evaluated by the same standards as other members of the class.

In all cases, the person responsible for the event or activity should provide participants with a letter explaining the proposed absence and its duration including travel times for off-campus events and activities. Students must provide this documentation to instructors at least 10 days in advance of the activity or event, except when such notice is not possible.

Course instructors retain final authority regarding student absences and how they impact course grades and the acceptability of a student's work toward passing their course. If a student must miss, for any reason, a portion of a course that, in the considered opinion of the course instructor, is critical to the student's ability to meet the course objectives, the instructor must recommend alternative actions to the student, which may include dropping the class.

Extra-Curricular Activities as a Representative of the University

Students may seek to or be asked to participate as an Iowa State University representative in non-credit events (competitions, conferences, presentations, programs, and performances) scheduled by academic or athletic units of the university at times that conflict with scheduled classes.

Instructors shall excuse students who miss class while representing Iowa State University in official department-or university-sponsored activities, including:

- Academic or professional conferences and workshops
- Intercollegiate athletic, academic, and judging competitions
- Musical, theatrical, dance and other artistic performances
- Presentations or programs given to external audiences.

Other Extra-Curricular Activities

Instructors will determine whether other absences not officially sponsored by a unit of the University (e.g., conference attendance, job interviews), will be treated as excused.

Military Service

Instructors shall excuse absences due to Veteran or military service obligations (including service-related medical appointments, military orders dictating appointments, and National Guard Service obligations). When a student's military or veteran obligations are for more than two weeks, the student should meet with their advisor to discuss the situation and academic options and work with their instructors to discuss potential accommodations. University procedures are in place for such situations and should be followed. In all instances, students have a responsibility to communicate with their instructors to ensure they are continuing to meet course expectations and requirements. Faculty, staff, and students are encouraged to utilize the Military-Affiliated Student Center and review information at [veterans.iastate.edu](https://www.veterans.iastate.edu) (<https://www.veterans.iastate.edu/>).

Court Appearances

Instructors shall excuse absences due to officially mandated court appearances including jury duty.

Academic MISCONDUCT

Academic misconduct is any action or attempted action that may result in creating an unfair academic advantage for oneself or an unfair academic advantage or disadvantage for any other member or members of the academic community. Such behavior is disparaging to the university and students found responsible for academic misconduct can face a number of disciplinary sanctions such as a disciplinary reprimand, conduct probation, deferred suspension, suspension, or expulsion.

Instances of academic misconduct ultimately affect all students and the entire university community by degrading the value of degrees when some are obtained dishonestly, and by impacting the grades of students working honestly.

Examples of academic misconduct include, but are not limited to the following:

1. **Obtaining or use of unauthorized information:** It is a violation to obtain or use unauthorized assistance or prohibited materials and texts, tools, or study aids, unapproved use of cell phones, internet, or other electronic devices, unauthorized collaboration or copying on a test or assignment. Other examples may include working with another student on a take-home test or homework when not specifically permitted to do so by the instructor, looking at your notes or other work during an examination when not specifically permitted to do so, unauthorized sharing of questions or answers with another student or students whether in the classroom, via group chat or messages or another internet platform, or where posted by another student at an online academic warehouse (Course Hero, Chegg, Study Blue, etc.).
2. **Misrepresentation, falsification or fabrication of information.** It is a violation for students to misrepresent or falsify coursework. Examples of this may include purchasing or downloading for use a paper from a term paper service or online academic warehouse, working jointly on a project and then submitting it as one's own, requesting, hiring, or otherwise encouraging someone to take a course, exam, test, or complete assignments on your behalf or for another student.

Students may not engage in or submit falsified or fabricated course work such as falsifying research, inventing or falsely altering data, citing fictitious references, falsely recording or reporting attendance, hours, or engagement in activities such as internships, externships, field experiences, clinical activities.

It is additionally a violation for students to tamper with or attempt to alter grades, academic records, or an instructor's evaluation of work by altering materials or documents, tampering with evaluation tools, or other means of interfering.

3. **Plagiarism:** Plagiarism is a form of misrepresentation. Students may not present the work, words, theories, data, expressed ideas, or artistry of another person or persons as their own, neither word-for-word nor paraphrasing of another person's work. It is a violation for students to reproduce another person's paper, work or artistry, even with modifications, and submit it as their own. Students may not use another person's work or words (including unpublished material) without appropriate source documentation or citation.

It is a violation for students to submit substantially the same work to satisfy requirements for one course or academic requirement that has been submitted in satisfaction of requirements for another course or academic requirement without permission of the instructor of the course for which the work is being submitted.

4. **Other academic misconduct:** Students are prohibited from any action that helps another student engage in academic misconduct. Examples may include providing or selling coursework or materials to another person where this is not permitted or where they plan to use it in an unauthorized manner or otherwise submit it as their own work; unauthorized provision or discussion of exam questions or answers with students that will be taking the same or similar exam; posting coursework created by an instructor without their permission at an online academic warehouse (Course Hero, Chegg, Quizlet, etc.); taking an exam/completing an assignment for someone else; or otherwise seeking to acquire, selling, bribing, paying or accepting payment for unauthorized academic work or assistance that contributes to academic misconduct.

Students are prohibited from the recording and/or sale or dissemination (including posting) of instructional content without the express permission of the instructor(s) or through an approved accommodation coordinated via Student Accessibility Services.

Students, faculty, and staff who would like more information are encouraged to visit the Student Conduct (<https://www.studentconduct.dso.iastate.edu/>) website for resources pertaining to academic integrity.

Reporting Academic Misconduct and Academic Outcomes

Academic misconduct is a violation of the behavior expected of a student in an academic setting as well as a student conduct violation. A student found responsible for academic misconduct is subject to appropriate academic penalty, to be determined by the instructor of the course, as well as sanctions under the university Student Code of Conduct (<https://www.policy.iastate.edu/policy/SDR/>). If an instructor believes that a student has behaved dishonestly in a course, the following steps **are recommended**:

1. Contact the student to indicate there are concerns with the coursework; this can be done via email or another appropriate student learning platform.
2. Provide the student an opportunity to respond and indicate whether they admit or deny responsibility.
 - a. Where students request to meet, instructors can facilitate this as plausible (in-person or virtual), involving the relevant and appropriate instructors for the referral (e.g., teaching assistant for the course and/or supervising faculty.)
 - b. In cases involving multiple students, it recommended that meetings are with individuals.
3. If they **deny** responsibility, do not assign a grade for the assignment or course (leave grade as **N for grade processing**) until the Office of Student Conduct has shared the student disciplinary conclusions.
4. If they **admit** the misconduct, you may **assign a grade** according to your discretion and what you may have outlined in your syllabus.
5. Refer the case and information to the Office of Student Conduct via their website reporting form, including related materials such as exams, coursework, reports, websites, external resources, syllabi, summary of the interaction with student(s), and other relevant information, as requested.

In cases involving denial of responsibility, when an outcome is determined by the Office of Student Conduct, both the student and the instructor will be notified of the disciplinary process conclusions.

For questions regarding the process, contact the Office of Student Conduct.

The complete Student Code of Conduct policy and process pertaining to academic misconduct can be found at <https://www.policy.iastate.edu/policy/SDR> (<https://www.policy.iastate.edu/policy/SDR/>).

Response to Classroom Disruption

Should any student officially enrolled for credit or audit in a class disrupt the instructor's ability to ensure a safe learning environment, control the class agenda, and/or deliver the approved curriculum, the instructor has the right to ask that the disruptive action cease immediately. The instructor may find it useful to include general guidelines about disruptive behavior on the course syllabus; and in the event of a classroom or learning environment disruption, the instructor may, if they find it necessary, explain to the student and the class why the particular action is deemed disruptive. The responsible student should cease the disruption and utilize non-disruptive means for expressing disagreement or concern. If the disruption continues, the instructor can pursue various forms of intervention as discussed in more detail in the Faculty Handbook. (<http://www.provost.iastate.edu/>)

Additional guidance and resources for managing classroom disruption are available from CELT (<https://www.celt.iastate.edu/teaching/effective-teaching-practices/classroom-behavior/>).

Course Ownership

Ownership of Course-related Presentations

The presenter owns course-related presentations, including lectures. Individuals may take written notes or make other recordings of the presentations for educational purposes, but specific written permission to sell or post the notes or recordings for sale or subscription must be obtained from the presenter. Selling notes by students without the required permission is a violation of the Student Conduct Code (<https://www.policy.iastate.edu/policy/SDR/#4225>).

Recording and Transmission of Classes

Recordings and transmission of classes may take place for a variety of legitimate reasons, including providing educational opportunities for those who cannot attend classes on campus, assisting students with disabilities that impair classroom note taking, and giving the instructor feedback on their classroom performance.

Because the lectures of faculty represent their intellectual labors, individuals are expected to obtain permission to make recordings of lectures and other classroom interactions. Recordings may be used for the purposes of the particular class, although in some cases, and with permission of faculty, the recordings may be preserved and used for other classes as well.

Grading

GRADING SYSTEM

Grades represent the permanent official record of a student's academic performance. The grading system at Iowa State University operates according to regulations outlined on the Grade Policies tab. The following provides quality points assigned for each letter grades:

Grade	Quality Points
A	4.00
A-	3.67
B+	3.33
B	3.00
B-	2.67
C+	2.33
C	2.00
C-	1.67
D+	1.33
D	1.00

D-	0.67
F	0.00
Grade	Description
P	Passing mark obtained under the Pass-Not Pass system.*
NP	Non-passing mark obtained under the Pass-Not Pass system.*
S	Satisfactory completion of a course offered on a Satisfactory-Fail grading basis. May also be reported to indicate satisfactory performance in R (required-credit) courses, and in courses numbered 290, 490, 590, and 690.
T	Satisfactory performance (equivalent to a grade of C or better in courses numbered 100-499, and a grade of B or better in courses numbered 500-699) in a special examination for academic credit.
W	The course was officially dropped by the student after the first week of the term.
N	No report was submitted by the instructor. An N is not a recognized grade or mark, it merely indicates the instructor has not submitted a grade and that a grade report has been requested. A nonreport (N) will automatically change to a grade of 'F' after one calendar year whether or not the undergraduate student enrolled during that period. If the N is outstanding at the time of graduation, it will be converted to a grade of 'F'. Undergraduate students will not graduate with N on their permanent record. Repeating a course will not resolve the N.

I Incomplete. An incomplete mark may be assigned when the student is passing at the time of the request, but special circumstances beyond the student's control prevent completion of the course. In general, failing the final exam or project or not submitting course work as a result of inadequate preparation or learning are not valid excuses.***

*See Pass Not Pass Grading.

***See Incomplete Marks in the Grade Policies tab.

POLICY INFORMATION

Grades represent the permanent official record of a student's academic performance. The grading system at Iowa State operates according to the following regulations:

1. Student performance or status is recorded by the grades and marks described in the Grading System tab. A student's grade point average is calculated on the basis of credits earned at Iowa State with the grades and quality points shown below. Credits earned with S, P, NP, or T are not used in calculating the grade point average but may be applied toward meeting degree requirements. A cumulative grade point average of 2.00 is required for a bachelor's degree.

2. Students who want to protest a grade submitted by an instructor should follow the procedures described in the section, Academic Grievances and Appeals.

3. Incomplete Marks - An incomplete may be assigned when special circumstances beyond the student's control prevent completion of the course and the student could pass the course if all coursework, agreed upon by the instructor and student, is completed. In general, failing the final exam or project or not submitting course work as a result of inadequate preparation or learning are not valid justification for an Incomplete.

If the instructor and student agree that an Incomplete is appropriate, they should complete an Incomplete (I) Contract (downloadable from the Office of the Registrar Faculty & Staff Forms (<https://www.registrar.iastate.edu/resources/forms/faculty--staff-forms/>) website) to document the reason for the I, the requirements for resolving it, the grade if no further work is completed (score of 0 for assessments not completed), and the date by which it must be resolved, not to exceed one calendar year or the student's graduation term (whichever is earlier). If the student is not available to sign the Incomplete (I) Contract, the instructor must document the conditions for the Incomplete

by communicating directly with the student by e-mail. A copy of this communication must be retained by the instructor and the chair (or designated representative) of the department until after the I is resolved in case there are any questions in the future regarding the terms of the Incomplete. The instructor also needs to enter the Incomplete (I) electronically as part of the end of term final grade submission.

Resolving an Incomplete: When a student completes the requirements specified on the Incomplete Contract, the instructor submits the appropriate grade. The resolved grade is recorded for the term the student enrolled for the course with a notation that the grade resolved an Incomplete. The resolved grade becomes part of the student's term and cumulative grade point average. The student's academic standing for the term the Incomplete was assigned will not be affected when the I is resolved.

A final course grade, once submitted to the registrar, **may not** be changed to an Incomplete except to correct an error at the request of the instructor, and with the approval of the instructor's department head and the dean of the instructor's college. The Incomplete (I) Contract should be used by the instructor to document the conditions for the Incomplete as specified above. The Assign Student Grades for Student Course Section task should be used to initiate the request to change the grade to an Incomplete with appropriate alternate letter grade, and will route for approval by the department head and dean of the instructor's college, then to the Office of the Registrar.

Incomplete grades in all courses must be resolved by the middle of the student's term of graduation. Repeating a course will not resolve an I mark. A mark of I will automatically change to the grade indicated in the contract (based on completed and incomplete assessments) after one calendar year (whether or not the student was enrolled during the period).

4. To change a grade or mark already reported to the registrar, the instructor submits the Assign Student Grades for Student Course Section task in Workday (<https://workday.iastate.edu/>). This task is used for resolving an I with a grade, for correcting an instructor error, or for the late report of a grade.

5. Interim Grades. The registrar will collect C-, D+, D, D- and F interim grades and nonattendance notifications from the instructor and report this information to students and their advisors in the student information system. In addition to submitting the interim grades, the instructor is responsible for informing the class of the basis on which they were calculated.

The purpose of interim grades is to provide the student and advisor with a timely warning that the student's academic performance to that point in the course may be lower than desirable. Students who

receive interim grades C- and below are encouraged to discuss their academic performance with the course instructor and their advisor.

6. Grades in all courses attempted remain on each student's record. If a course is repeated, the record will show the grade obtained on the initial attempt as well as grades received on subsequent attempts.

7. The cumulative grade point average is calculated by dividing the total number of quality points earned by the total number of credits in all courses attempted. Grades of S, P, NP, and T are not counted in calculating the grade point average.

8. Repeating Courses.

- The most recent grade for a course a student initially takes and repeats at Iowa State will be used to compute the student's cumulative grade point average rather than the previous grade(s), up to a limit of 18 credits. This could result in a lower cumulative grade point average if the most recent grade is lower than the previous grade or even loss of credit if the most recent grade earned is an F. All grades will remain on the student's record.
- Students may repeat any course for which an F grade, an NP grade, or any passing grade was received. A course initially taken for a grade must be repeated as a graded course. A course initially taken as Pass/Not Pass may be repeated as a graded or Pass/Not Pass course.
- Beyond the 18 credit limit of repeats, all grades will be included in computing the cumulative grade point average. Please refer to items #1 and #7 above regarding how to calculate the grade point average.
- Courses should be repeated as soon as possible, preferably within three semesters in residence, because of changes that occur with course updating, change in course number, or revision in the number of credits.
- Approval to repeat a course in which the course number or number of credits has changed must be noted on a Designation of Repeated Course form, which can be obtained from departmental offices. This form must be signed by the head of the department offering the course and by the student's advisor, and then submitted to the Office of the Registrar. Deadlines for filing repeated course forms for full-semester and half-semester courses are published in the university calendar.
- Courses taken at institutions other than Iowa State University do not impact the 18 credit Designated Repeat limit.
- A student who has taken a course at Iowa State University may repeat the course at another institution. The credits earned at another institution may be applied toward graduation requirements at Iowa State. However, the grade earned at another institution will not replace the grade earned at Iowa State University or be used in computing a cumulative grade point average.

- Repeated courses may affect Federal or other financial aid. See the Financial Aid website (<https://financialaid.iastate.edu/>) for further information.

PASS-NOT PASS GRADING

Students may choose to attempt a maximum of 9 semester credit hours on a Pass-Not Pass basis, meaning that only a P or NP will be recorded as their final grade in the course. The purpose of P-NP grading is to encourage students to broaden their education by taking courses outside the usual program of study for their major and minor disciplines. The following policies apply:

1. Undergraduate students who are not on academic probation at the beginning of the semester are eligible. A special (nondegree) student must obtain approval from their academic advisor and college dean.
2. Only elective courses may be taken on a P-NP basis. In specific majors, some restrictions may apply, so students should consult with their academic advisor.
3. Except for restrictions on its own undergraduate majors, a department may not deny the availability of any of its course offerings on a P-NP basis.
4. Courses offered on a satisfactory-fail basis may not be taken P-NP.
5. Students should register for a P-NP course in the same manner and at the same time that they register for their other courses. From their Current Classes tab in Workday, students should then edit their registration for the course to change the grading basis to P-NP in the student information system.
6. Students who elect to change back to a graded basis should process the change from their Current Classes tab in Workday to edit their registration for the course to change the the grading basis back to Graded.
7. Changes to or from a P-NP basis may not be done after the last day to drop (usually the Friday of week 10 of the term) without college approval. Changes from a P-NP basis to a Graded basis that occur after the last day to drop will still count against a student's 9 maximum allowable P-NP credits.
8. Registration on a P-NP basis is not indicated on the instructor's class list. Students will receive a P if their grade is D minus or better and an NP if their grade was F.
9. Neither P (earned grade of D minus or better) nor NP (earned grade of F) is counted in calculating a student's grade point average (GPA).
10. When students change their curriculum, any P credits that they have accumulated will be accepted by the new department if such credits are in courses normally accepted by the department.
11. Credits taken on a P-NP basis at another institution and transferred to Iowa State may be applied as electives in a student's degree program if the credits are otherwise acceptable in that program. The number

of P-NP transfer credits that can be accepted depends on the number permitted by the institution from which the student is transferring. If a student transfers more than nine semester P-NP credits, no additional Iowa State P-NP credits can be applied to the student's degree program.

EXAMINATIONS

Examinations are one of the most common ways instructors assess student performance. In order that examinations can be a useful part of the educational process, the following policies have been instituted:

1. One purpose of examinations is to help students' learning. Therefore, examinations should be evaluated as soon as possible after they are given and the results should be made available to the students in a timely way to enhance learning.
2. All tests and examinations administered between the beginning of the term and final examination week shall be held during a regularly scheduled lecture or laboratory class period for that course. A department may obtain approval to administer a separately scheduled examination if all of the following criteria are met:
 - a. The course is multi-sectioned.
 - b. A common departmentally developed examination will be administered to all students in all sections at the same time.
 - c. The test scores will be used as a basis for a uniform grading procedure for all sections of the course. To allow students to plan in advance, requests to hold separately scheduled examinations must be made to the Registrar and approved by the Provost prior to the start of course registration for that term. Only under unusual circumstances will a course be approved for separately scheduled examinations once student course registration has begun. Whenever a separately scheduled examination is administered, a regular class meeting during that week shall be omitted.
Students who are unable to take a separately scheduled examination at the designated time, due to a course conflict or other legitimate reason, must notify the instructor in advance and must be given the opportunity to be examined at another time mutually convenient for the student and the instructor. The instructor shall decide to administer the same examination, an alternate examination, or use an alternate assessment procedure.
3. At the end of the semester, a week is set aside for final examinations or other term evaluations, with a two-hour period normally scheduled for each course. The following policies govern the responsibilities of students and faculty members during this week:
 - a. Final exams may not be given at a time other than that for which the exam is scheduled by the Registrar. An instructor may not give a final exam prior to final exam week nor change the time of offering of the final examination as it appears in the final exam

schedule. Permission to change the time for which an exam is scheduled may be given only by the dean of the college. If the instructor elects not to give a final exam in a course of two or more credits, the class is required to meet at the scheduled final exam period for other educational activity such as a review of the course or feedback on previous exams.

- b. Final exam periods are determined according to the regularly scheduled meeting time of the class. However, certain courses are assigned special group exam times so that several sections of the same course may be tested together. The criteria for establishing special group exams are similar to those listed for separately scheduled exams listed in number 2 above. If this results in conflicting group examination periods, students should inform the instructor in charge of the first of the two conflicting courses as listed on the final exam schedule within the special groups in question; that instructor is responsible for arranging a special examination or making some other adjustment.
- c. Evening courses with lectures scheduled at 6:00 p.m. or later should give their examinations during finals week from 7:00-9:00 p.m. on the day the class normally meets. If this exam conflicts with an evening group exam, the instructor responsible for the latter must arrange a special examination for any students who have a conflict.
- d. If unusual circumstances involve the need for students to change the time of their final examination, they must obtain the approval of the instructor of the course.
- e. If a student has three examinations scheduled on the same calendar day and wishes to change one to another day, the instructor of the course having the smallest number of students is responsible for arranging an alternate examination time for the student unless make-up exam times are available in one of the other courses.
- f. All faculty members and teaching assistants with instructional or grading responsibilities are considered to be on duty throughout the entire final examination week and are expected to be available to students during that week for discussion of any matters pertaining to the final examination and final grade or to other aspects of the course.

Prep Week

For each Fall and Spring semester, the last full week of classes before final examinations is designated as Prep Week. The intent of this policy is to establish a one-week period of substantial and predictable study time for undergraduate students. During the Prep Week period, regular lectures are expected to continue, including the introduction of new content, as deemed appropriate by the instructor. The restrictions established by this Prep Week policy are:

- Due dates for mandatory graded submissions of any kind that fall within Prep Week must be listed on the syllabus provided at the start of the course.
- Mandatory final examinations may not be given during the Prep Week period except for laboratory courses or courses that meet weekly and for which there is no contact during the normal final examination week.
- No in-class quizzes or exams may be given on the Thursday and Friday of Prep Week. Quizzes/exams that are administered outside of class such as take-home exams, online exams, or exams given in the testing centers must: 1) open no later than Wednesday at noon of Prep Week, and 2) only cover material presented on or before the Tuesday of Prep Week.

Exceptions to this policy include the following:

- Classes that only meet on Thursdays or Fridays
- Lab components of courses
- Half-semester courses
- Make-up exams due to excused absences
- Regularly used formative assessments intended to enhance student engagement and guide course delivery

All other exceptions require approval by the Office of the Senior Vice President and Provost.

- Registered ISU Student Organizations may not hold any meetings, functions, or sponsored events during the Prep Week period. Any exception to these restrictions must be authorized in advance by the Office of the Senior Vice President for Student Affairs.

Instructors are reminded that most students are enrolled in several courses each semester, and the widespread violation of this policy can cause student workloads to be excessive as students begin their preparation for final examinations.

Students are reminded that their academic curriculum is their principal reason for being in college and they have a responsibility to study in a timely fashion throughout the entire semester.

Policy approved by Faculty Senate, Senior Vice President and Provost, and President, 2013; Amended and approved by Faculty Senate, Senior Vice President and Provost, and President, 2017.

SCHOLASTIC RECOGNITION

The university recognizes those students who are doing exceptionally well in several ways, including the following.

1. **Dean's List.** Each semester the university issues a dean's list made up of those students who have carried at least 12 credit hours of graded or S-F courses with a 3.50 grade-point average or above for the semester.

Courses taken on a P-NP basis do not count as part of the 12-credit hour requirement. No dean's list is issued for summer school. The list can be viewed from the Office of the Registrar website (<http://www.registrar.iastate.edu>).

2. President's List. Each semester the university issues a President's List made up of those students who have carried at least 24 credit hours of graded or S-F courses with a 4.00 grade-point average for their two most recent semesters of enrollment at Iowa State University (summer not considered). Courses taken on a P-NP basis do not count as part of the 24-credit hour requirement. No President's List is issued for summer session. the list can be viewed from the Office of the Registrar website (<http://www.registrar.iastate.edu>).

3. Graduation with Distinction. Undergraduates who have a cumulative grade point average of 3.50 or higher (based on a 4.0 scale) are eligible to graduate "with distinction" provided they have completed the following criteria for their degree. The student's distinction will be based upon their cumulative grade point average after all degree requirements have been satisfied.

These students are recognized as follows:

- Summa Cum Laude: cumulative grade point average of 3.90 or higher.
- Magna Cum Laude: cumulative grade point average of 3.70 to 3.89.
- Cum Laude: cumulative grade point average of 3.50 to 3.69.

The recognition appears on the student's official transcript and diploma.

Candidates for a bachelor's degree may graduate "with distinction" provided they have completed 60 semester credits of coursework at Iowa State University at the time of graduation, including a minimum of 50 graded or Satisfactory-Fail course credits.

Candidates for the bachelor of liberal studies degree may graduate "with distinction" provided that they have (a) completed 45 semester credits of coursework at the three Iowa Regent universities at the time of graduation, and (b) earned at least a 3.50 cumulative grade point average at ISU. The graduation with distinction recognition will be based on their combined grade point average for coursework taken at the three Iowa Regent universities.

Candidates for the bachelor of science in nursing degree may graduate "with distinction" provided that they have completed 32 semester credits of coursework at ISU at the time of graduation.

Honors Program. Students who are full members of the University Honors Program need a cumulative grade point average of 3.50 at the beginning of their final term. In addition to meeting the appropriate grade point requirement, students will have completed an approved honors program of study and an honors project prior to graduation. This

recognition appears on the student's permanent record, diploma, and in the commencement program.

EVALUATION PROCEDURES

It is university policy that the instructor shall inform the students at the beginning of each course of the evaluation procedures planned for use in the course.

RETENTION OF RECORDS

Records of all graded work must be retained by the instructors until midterm of the semester following completion of a course or until all pending appeals and incompletes are resolved, whichever is later. Instructors leaving the university must file records of all graded work with their department office before departure.

Academic Standing

Academic Standards Regulations

Each college has an academic standards committee that is responsible for monitoring the academic progress of all undergraduate students in that college, based on policies and minimum requirements set by the Faculty Senate Committee on Academic Standards and Admissions and ratified by the Faculty Senate. Individual college faculties may, with the approval of the Faculty Senate Committee on Academic Standards and Admissions, set additional program admission and curriculum requirements that are more stringent than those established for the university. These additional requirements must be reviewed at least every third catalog by the college academic standards committee to determine if the requirements should be continued. Requirements approved by the college academic standards committees will then be forwarded to the Faculty Senate Committee on Academic Standards and Admissions for final approval. The college committees are responsible for actions involving individual students with respect to placing students on Academic Probation, dismissing students from the university for unsatisfactory academic progress, and reinstating student who have been Academically Dismissed.

Changing colleges: A student on Academic Probation may transfer to another program in the university before period 3 begins (before the last day to drop a course.) For students on Academic Probation, transfer during period 3 (after the last day to drop a course) can only occur under exceptional circumstances and with the approval of the chair of the new program and the dean of the new college.

Withdrawal: A student on Academic Probation who withdraws during period 3 will be Academically Dismissed at the end of the term the student withdraws, except under extenuating circumstances as judged by the college academic standards committee.

Reinstated students: Reinstated students should also see the section on Reinstatement.

Veterinary Medicine: Additional rules for minimum satisfactory progress are in effect.

Special (nondegree) students: Students matriculated in this classification category are governed by the regular academic progress regulations. Furthermore, by special action of their college academic standards committee, additional standards may be required.

Academic Progress

For questions concerning interpretation and application of the rules governing academic progress, students should contact the chair or secretary of their college academic standards committee in their college office.

The university's academic standards rules are presented below. In addition to taking action based on these rules, a college academic standards committee may also place a student on academic probation or dismiss a student from enrollment in the university when, in the college committee's judgment, the student's academic performance or progress toward a degree is exceptionally deficient. Likewise, a college committee may, under exceptional circumstances, exempt individual students from the application of these rules. Students who participate in the Regent Universities Student Exchange Program, or in a similar program where the credit taken at the other school will be considered as resident credit and the grades included in the student's ISU cumulative grade point average, are subject to Iowa State University's academic standards.

Maintaining Satisfactory Progress

Continued enrollment at Iowa State University depends upon an undergraduate student maintaining satisfactory academic progress toward attaining a degree. To assist students in maintaining satisfactory progress, Iowa State University has adopted academic standards designed to provide early identification of students who are experiencing academic difficulty, and to provide timely intervention through academic advising and academic support programs.

Academic standing at Iowa State University is dependent upon the total number of credits a student has attempted or earned, the student's semester grade point average (GPA), and the student's cumulative ISU GPA.

Academic Warning

While Academic Warning is the least severe of the negative academic standings, it serves as a reminder that future academic performance below 2.00 could result in more serious consequences. In fact, a student on Academic Warning whose subsequent term GPA is below a 2.00 will be placed on Academic Probation the following term.

Students who receive an Academic Warning are required to develop a plan for academic improvement in consultation with their academic advisor or the Academic Success Center. A student who is subject to both Academic Warning and Academic Probation will be placed on Academic Probation. The Academic Warning is not a part of the student's permanent academic record.

Students will receive an Academic Warning at the end of any fall or spring semester when they earn a GPA of 1.00 – 1.99 for that semester. At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on Academic Warning:

- Students will be placed on Academic Probation if they earn less than a 2.00 GPA for the next fall or spring semester, or
- They will be removed from Academic Warning if they earn at least a 2.00 semester GPA for the next fall or spring semester, and they are not subject to Academic Probation based on cumulative GPA (over 75 credits).

See Summer Academic Standards Regulations section for how summer grades affect Academic Warning, Academic Probation, and Academic Dismissal.

Academic Probation

Students are placed on Academic Probation as a warning that their academic progress is not satisfactory and that they should take steps to improve their academic performance to avoid Academic Dismissal from the university. Academic Probation is an indication of very serious academic difficulty. Students may be placed on Academic Probation as a result of either semester GPA, cumulative GPA, or both. Academic Probation status is not a part of the student's permanent academic record.

Students on Academic Probation and Academic Warning are required to meet with their advisor and to complete the Academic Intervention Self-Assessment form, which can be accessed here: <https://www.provost.iastate.edu/academic-programs/policies/academic-standing> (<https://www.provost.iastate.edu/academic-programs/policies/academic-standing/>). (<http://www.dso.iastate.edu/asc/ai/students/>)

Students will be placed on Academic Probation at the end of a semester/term for either of the following two reasons:

1. Semester GPA: Students who earn less than a 1.00 at the end of any fall or spring semester, or less than 2.00 two consecutive semesters, will be placed on Academic Probation. Students will not be placed on Academic Probation at the end of the summer term due to summer term GPA only.
2. Cumulative GPA: Students with 75 or more credits attempted or earned, whichever is greater, will be placed on Academic Probation

at the end of any fall or spring semester or summer term when their cumulative GPA is less than 2.00.

At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on Academic Probation:

- Students will be academically dismissed if they fail to earn at least a 2.00 semester GPA.
- Students will continue on Academic Probation if they earn at least a 2.00 semester GPA but are subject to continued Academic Probation based on their cumulative GPA (over 75 credits).
- Students will be removed from Academic Probation if they earn at least a 2.00 semester GPA and are not subject to continued Academic Probation based on their cumulative GPA (over 75 credits).

See Academic Dismissal for dismissal policy.

See Summer Academic Standards Regulations section for how summer grades affect warning, probation, or dismissal status.

Academic Dismissal

Students who do not meet the requirements of their Academic Probation are Academically Dismissed from the university. Each College Academic Standards Committee is responsible for final decisions regarding the academic status of students in that college, and any appeals to Academic Dismissal are considered by the college committee. Once a student has been Academically Dismissed, they are not allowed to re-enroll at Iowa State University until they have been Academically Reinstated. (See section on Reinstatement.) Academic Dismissal is placed on the student's academic record as a permanent notation. The official transcript of a student who has been Academically Dismissed includes a "Not Permitted to Register" notation.

Summer Academic Standards Regulations

Students who are newly placed or continued on Academic Probation at the end of the previous semester may enroll for the summer term without being in jeopardy of Academic Dismissal from the university at the end of that summer term.

Summer Combined Term GPA:

All students who attend summer session will have their academic status reassessed at the end of the summer based on the combined (not averaged) grade summaries of their previous graded term of attendance and summer term. Academic status (warning or probation) after summer session will be based on the resulting combined term GPA. The academic status resulting from the summer combined term GPA supersedes the academic status at the end of the previous term.

For students who have remaining designated repeat credits, courses taken in the previous semester and repeated in summer will be calculated as designated repeats in the combined term GPA.

The combined term GPA (summer plus preceding term) will not appear on the student's grade report or permanent record.

Summer term GPA alone cannot determine academic status. Students who initiate enrollment at Iowa State during the summer will not be placed on Academic Warning or Academic Probation regardless of their academic performance.

Summer Cumulative GPA:

A student who was on Academic Probation at the beginning of summer term based only on cumulative GPA, who raises his or her cumulative GPA to over a 2.0 at the end of the summer term shall be removed from Academic Probation status at the end of the summer term.

A student with 75 or more credits attempted or earned, whichever is greater, will be placed on Academic Probation at the end of the summer term if his or her cumulative GPA is less than 2.00.

A student with 75 or more credits attempted or earned who has a transfer GPA less than 2.00 will be placed on Academic Probation at the end of any summer term if his or her combined transfer/ISU cumulative GPA is less than 2.00.

REGISTRATION

Registration/Enrollment

In order to register for classes students must first accept their offer of admission by the university. Registration and the payment of assessed fees are required of all who attend classes. Enrollment is not complete until fees are paid, including room and board fees for those living in residence halls.

Registration is a process by which students become officially enrolled in classes for a given term. The process involves consultation between the student and the student's academic advisor. All undergraduate students are assigned an academic advisor based on their program of study. A new advisor assignment is made when a student changes their program of study.

Students with disabilities who need assistance with any phase of registration should contact Student Accessibility Services.

Validating Enrollment

To validate their enrollment in each course at the beginning of the semester, students must attend the first or second meeting (first meeting if the class meets only once a week). Students who add a course after the term begins must attend the next class meeting. The instructor has the option to offer a registered place in the course to another student when a registered student fails to attend and has not obtained prior approval of the instructor. Students who do not validate their enrollment must drop or withdraw from the course or they will receive an F grade.

Enrollment Status

Enrollment status is defined for certification purposes as either full-time, three-quarter, half-time, or less than half-time.

Full-time status, fall or spring semester

Undergraduates: 12 credits

Graduates: 9 credits

Professional: 12 credits

Three-quarter status, fall or spring semester

Undergraduates: 9 credits

Graduates: 7 credits

Professional: 9 credits

Half-time status, fall or spring semester

Undergraduates: 6 credits

Graduates: 5 credits

Professional: 6 credits

Full-time status, summer semester

Undergraduates: Summer status depends on the number of weeks a student is enrolled.

Graduates: Summer status depends on the number of weeks a student is enrolled.

Professional: 8 credits

Always contact the Office of the Registrar to verify a student's status for a summer session. Additional enrollment status information is available on the Office of the Registrar webpage (<https://www.registrar.iastate.edu/students/verification-proof-of-enrollment/fulltimestatus/>).

Registration Responsibilities

The registration process includes advising, enrollment in courses, and schedule changes. In addition to the student, this process may involve the student's advisor; the student services staff of the student's college; and the dean of the college. Each is responsible for knowing and following the academic policies and procedures.

Student

- Knowing and adhering to university policies and procedures that apply to registration and schedule changes.
- Checking the accuracy of his/her current classes in Workday, including schedule adjustments (i.e., adds, drops, withdrawals, section changes).
- Knowing the degree requirements of his or her program of study.
- Planning course schedules to meet those requirements; and monitoring the accuracy of the academic progress report.

Advisor

- Consulting with advisees during the advising/registration period
- Providing information about student's program of study requirements
- Providing guidance in the student's course selection
- Assisting in monitoring the academic progress report for accuracy
- Notifying the college student services office with corrections to the academic progress report.

College Student Services Staff

- Assisting new and reentering students with the registration process
- Resolving unusual scheduling problems
- Updating the academic progress report or solving problems concerning the academic progress report.

Dean

- Making decisions with respect to requests for deviations from university policies, deadlines, etc.

Students and staff should check with the college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

Using AccessPlus Registration (Summer semester only)

Students enter the system via AccessPlus by using university ID and password. A registration access number (RAN) is also needed, if required by their college.

The registration system provides messages after each entry indicating whether each request has been processed. Students may review their current schedules at any time during registration. Students are held accountable for all changes made to their schedules.

Using Workday Student (beginning Fall 2024 semester)

Students enter the registration system via Workday. All eligible students will be assigned a registration appointment, which is the first date and time a student may register for the applicable term.

Students may review their current schedules at any time during registration. Students are held accountable for all changes made to their schedules.

Course Waitlist

A course waitlist is an electronic list of students who are waiting to register for class/section that is at capacity. Students may add themselves to a course/section waitlist while registering for courses for the upcoming academic period.

- Students are added to a course/section waitlist on a first come, first served basis provided they are eligible to take the course.
- If a seat becomes available in the course/section, the first student on the waitlist will be notified. The open seat will be available to that student for a 24-hour period, which includes weekends and holidays, should the student wish to register. An additional notification will be sent to the student six hours prior to the end of the 24-hour period if the student has not already taken action. After the 24-hour period, if the seat remains open, the next student on the waitlist will be notified. The previous student will be moved to the bottom of the waitlist, provided they have not removed themselves from the waitlist.
- A student can accept or decline the seat within the student information system. For official enrollment to take place via the waitlist, the notified student must first accept the seat, review their adjusted schedule, and then accept the offer. It is at the point of accepting the offer, the student is officially enrolled in the course.
- Students can place themselves on the waitlist for one or more desired sections of a course while being enrolled in a different section of the course. If they accept a seat in their desired section, they will automatically be withdrawn from their initially enrolled section.
- Students no longer interested in being added to the course after being placed on the waitlist should remove themselves from the waitlist to optimize the effectiveness of the waitlist system.

Nearly all courses/sections will have a course waitlist, with the exception of those courses that require approval at all times (e.g., 5990, 6990, etc.).

The opportunity for a student to join a waitlist, and accept or decline a seat, is available through Period 1 for the course. For full semester courses, Period 1 ends on the fifth business day of fall and spring semester.

Registration System Abuse

Using the registration system is a privilege, which may be revoked if abuse is detected. Abuse includes, but is not limited to, creating and using an automated program to search for course openings and/or enrolling in a section with the intent of reserving space in that particular section for another student. The Office of the Registrar, college office, and/or advisors have the right to determine abuse and revoke privileges for any type of registration system abuse.

Registration Process

To register for classes, students need the following:

- A registration appointment.
- Course section information.
- Other departmental information applicable to their curriculum, available from their advisor.

Students are expected to do the following in the advising and registration process:

1. Meet with their advisor in advance of their registration start date, who will provide the following:

- a. Academic Progress Report
- b. Guidance in course selection

2. Choose specific sections of each course. Students are responsible for choosing their course sections. In most cases advisors will not be involved in selecting meeting times.

3. Review their registration start date/time information and any registration holds.

4. Register for courses.

Schedule Changes

Summer 2024 semester: Students may make most schedule changes through the first five days of class using the AccessPlus (<https://accessplus.iastate.edu/frontdoor/login.jsp>) registration system. For courses with permission requirements and/or after the first week of classes, a Schedule Change form will be needed. The Schedule Change form can be found in AccessPlus, under the Student tab, within Registrar Forms located in the menu on the left column.

Beginning Fall 2024: Students will register and make schedule changes using Workday. Course adds will be completed using the task 'Find or Register for ISU Course Sections'. Up through the fifth day of the semester, students may drop or swap courses/sections directly from their Current Classes. Students may also modify credits or request grading basis changes utilizing Edit Registration options. For courses with restrictions, prerequisites, permission requirements and/or after the first week of classes, students may request registration approvals through available Workday tasks.

Procedures for schedule changes vary by the time period of the semester. The effective date of a schedule change is the date when the change is entered into the registration system.

Schedule change periods for full term courses are as follows:

Period 1 ends on the fifth day of classes in the fall and spring semesters.

Schedule changes during period 1 do not require advisor approval. Instructor or departmental approval may be required for adds or section changes for some courses during period 1. Course drops during this period will not appear on a student's permanent academic record.

Period 2 ends the Friday of week 10 in the fall and spring semesters. It is important for students to make well-informed decisions when adjusting their course schedules, particularly because such decisions often have financial and/or academic implications. To best support students' decision-making process, period 2 schedule changes should be made in collaboration with their advisor and instructor as appropriate and necessary.

For students who wish to add or change sections of a course, or adjust course credit hours, the approvals grant permission for a student to make the requested change.

The decision to drop a course rests with the student; as such, the advisor's signature is not one of permission, but rather to indicate a conversation about the implications of dropping has occurred. Course drops after period 1 appear on the permanent academic record. A section change does not require a drop.

Drops and other schedule changes that are judged to be beyond the student's control may be processed as administrative actions if approved by the college dean. Administrative drops do not appear on the permanent academic record. The effective date of an administrative action is the date it is approved by the college dean or authorized representative.

Period 3 is any time after period 2. Schedule changes during this period are permitted only for extenuating circumstances, may require a written statement of support from the instructor and the advisor, and

must be approved by the dean of the student's college or authorized representative.

Half-Semester and Partial Term Courses

Specific deadlines for adding and dropping half-semester courses are published in the university calendar. Prorated adjustments to add and drop deadlines are made for other partial term courses. To find out specific deadlines for partial term courses, contact the Registrar's Registration Office at isuregistration@iastate.edu or 515-294-2331.

R-Credit Courses (required courses)

Processing a scheduling change for a required course is usually considered administrative. Administrative drops do not appear on the permanent academic record. To make a Period 3 R-credit drop administrative requires approval of the college dean.

Dates and Deadlines

Dates for registration are published in the university calendar (<http://www.event.iastate.edu/>) (choose the Academic calendar link), and at www.registrar.iastate.edu/calendar/ (<http://www.registrar.iastate.edu/calendar/>).

Students are assigned a registration appointment, which is the first date and time they can use the registration system. Registration start dates are assigned based on projected year in school classification (computed by combining total credits, current term credits, and current term test out credits). Then specific start dates within projected year in school are established by using the sum of total credits and current term test out credits.

Students may choose to delay their registration until a later date; however, courses will begin to fill on the first day of registration. Any delay in registration may reduce course selection options. A list of start dates by classification is available at <http://www.registrar.iastate.edu/calendar/registration-start-dates> (<http://www.registrar.iastate.edu/calendar/registration-start-dates/>).

Continuing students register for the following term during the middle of the current term. For example, registration for spring term begins the middle of fall term; registration for summer session is completed during the previous spring at the same time as registration for fall semester.

A late registration fee is assessed for registration initiated on or after the first day of classes for fall and spring terms. This fee is not charged for the summer term. If registration is not initiated by the end of the fifth day of classes, students must obtain permission from the instructors for the courses they plan to take, their advisor, and in some cases, approval from the dean of the college in which they are registered.

Students may not enroll in courses with time conflicts without the approval of the instructors concerned.

Students who participate in off-campus experiences for which they receive Iowa State University credit must register for that credit during the term when the experience is taking place, whether or not they are taking courses on campus during that time.

Withdrawal of Admission to the University

New undergraduate students who wish to withdraw their admission to the university prior to the first day of classes must initiate their withdrawal by completing the Admissions Office's Application Change Form: https://www.admissions.iastate.edu/forms/change_application.php.

Cancellation/Withdrawal - Currently Enrolled Students

Students who decide not to attend classes before the date class work begins must cancel their registration (<http://www.registrar.iastate.edu/students/cancel-withdraw/>) to avoid tuition and fees assessment. Students who decide not to attend classes beginning the first day of class or later must institutionally withdraw or take a Leave of Absence from the university (<http://www.registrar.iastate.edu/students/withdrawal/>).

Course Information

Prerequisite. A prerequisite indicates the specific academic background or general academic maturity considered necessary by the faculty for the student to be ready for maximum success in the course. For more information, see Information About Courses (<http://catalog.iastate.edu/informationaboutcourses/>), Course Prerequisite.

Permission Required courses/sections. To register for these sections, students must obtain authorization.

Restricted courses/sections. Some courses or sections are restricted to students who meet specified criteria including curriculum/major, college, and/or year in school. In addition, some sections may be restricted to new students to ensure that sufficient spaces are available when new students register during summer orientation. A department may waive a restriction for a student who has extenuating circumstances. To request an override of the eligibility requirement, the student must obtain authorization from the department.

Classrooms are listed for each course in Workday, beginning approximately 3 weeks prior to the start of the term.

Cancelled courses/sections. In some cases, courses or sections may be cancelled due to low enrollment or departmental staffing considerations. Students who are registered for a cancelled course or section will be notified by the Office of the Registrar, the department, and/or on their schedule.

Textbook information. A link to textbook information, including the ISBN and retail price for assigned textbooks, is available from the ISU Bookstore. Textbook information for Iowa State University courses is posted as close to the start of registration as possible. Students may purchase textbooks from any source they choose.

Credit Limits

For fall and spring semesters, the credit limit is 18 credits for undergraduates and 15 credits for graduate students. For summer session, the limits are 12 credits for undergraduates and 10 credits for graduate students. A student may be required to drop credits before adding another course. In some cases, the college dean may approve a higher or lower credit limit for individual students. Students may request a Credit Limit Increase through their advisor. Advisors should notify the student's college student services office if the credit limit needs to be changed.

Registration Holds

Students with holds on their registration will not have access to register until the initiating offices have released the holds. Those who attempt to register before the holds have been released will be restricted from doing so. Students may check for holds within their Student profile.

Drop Limit

Undergraduate students are not limited in the number of courses they may drop during their academic career. Drops (course withdrawals) processed after the fifth day of classes of each semester will appear on the permanent record.

Auditing

To audit a course means to enroll in the course without receiving credit for the course. The instructor of the course approves the audit request.

Students are assessed tuition and fees as though they are taking the course for credit, but the audited course does not count in determining full-time student status. However, an audited course does count towards the maximum allowable credits per semester. Audited courses do not apply toward V.A. benefits.

Graduate students: See Graduate College, Registration for audit policies.

Changing status to audit: Changing a course from credit to audit requires a request to Edit Registration, Grading Basis. See Making Schedule Changes.

Rights and privileges: Once enrolled in an audited course, auditors have the same rights and privileges as any student taking the course for credit. Their names appear on the class list with a notation that they are auditing the course. Audited courses do not appear on the student's permanent record except by special request from the student. A request form can be downloaded from the Office of the Registrar website at

www.registrar.iastate.edu/forms (<http://www.registrar.iastate.edu/forms/>).

Audit Deadlines and Required Signatures

In addition to the deadlines provided below, note that instructors must approve all audits.

Full semester courses:

Adding an audit—day 10 deadline:

- Through day 5 of classes: instructor approval required.
- Day 6-10: instructor, advisor approval required.
- After day 10: only with extenuating circumstances, instructor, advisor, college approval required.

Changing status, from credit to audit—day 10 deadline:

- Through day 5 of classes: instructor approval required.
- Day 6-10: instructor, advisor, college approval required.
- After day 10: only with extenuating circumstances, instructor, advisor, college approval required.

Changing status from audit to credit—day 5 deadline:

- Through day 5 of classes: instructor approval required.
- After day 5: instructor, advisor, college approval required.

Partial semester or summer courses:

Deadlines are determined based on the length of the course. For deadlines concerning partial term or summer courses, contact the Registration Office, isregistration@iastate.edu or 515-294-2331.

Reinstatement

The procedures delineated in this section apply to students who were dismissed from Iowa State for academic reasons. Students who left Iowa State in good academic standing and who are seeking reentry should see Index, Reentry for more information.

1. Reinstatement is not automatic. Students who have been dismissed for academic reasons should contact the dean's office in the college they wish to enter for instructions specific to that college. The college Academic Standards Committee reviews each petition and other relevant information, and reinstatement is based upon that review. As part of the petition process, students must submit a plan for academic success that identifies the causes of their poor academic performance and demonstrates that they have taken actions to avoid or eliminate these causes.
2. Students can only be reinstated after at least one academic semester (fall or spring) has elapsed since they were academically dismissed. Winter session and summer session are not considered semesters.
3. Students who have been dismissed from enrollment two or more times are not eligible for reinstatement until at least two academic semesters (fall and spring) have elapsed since their last academic

dismissal. Winter session and summer session are not considered semesters.

4. Students who were dismissed by one college and subsequently reinstated by another college cannot transfer back to the original college unless permission is granted by the Academic Standards Committee of the original college. This procedure applies regardless of the student's academic standing when the transfer is requested.
5. To be considered for reinstatement to the university, students must submit a petition to the Academic Standards Committee of the college in which they desire to enroll at least 45 days before the beginning of the semester. Students who have not been enrolled for a period of 2 years or more must also apply for reentry. For more information see the Reentry web site at <http://www.registrar.iastate.edu/info/reentry.html> (<http://www.registrar.iastate.edu/students/reentry/>). (Students dismissed for the second time and requesting reinstatement in the College of Liberal Arts and Sciences must submit their petition 70 days before the beginning of the semester.)
6. Juniors and seniors with extenuating circumstances may request a waiver of their required semesters of absence as identified in number 2 and 3 above. The petition requesting early reinstatement must be submitted through procedures specified by their college's Academic Standards Committee.
7. As a condition of reinstatement, students will reenter on academic probation and must accept whatever additional requirements are stipulated by the college Academic Standards Committee. Examples include full- or part-time status, specified credit hours, specific courses, specific GPAs, restriction on choice of major, and required counseling.

Student Appeal

Students may appeal a decision regarding their academic status if they believe that new information can be provided, or extenuating circumstances exist that would alter the application of any rule in this section. The appeal should be made in writing to the Academic Standards Committee of the college in which the student is enrolled. The written appeal must include the reasons for the appeal and the evidence to substantiate these reasons.

The student should initiate the appeal process by contacting the secretary of the college Academic Standards Committee in the administrative office of her or his college immediately upon receipt of notification of the committee's action, and at least ten calendar days before the beginning of the semester. The secretary will then inform the student of the deadline for submission of the written appeal.

If the student is dissatisfied with the committee's action, he or she may submit an appeal in writing to the dean of her or his college within seven calendar days after they are notified of the committee's action. The dean

must respond in writing within seven calendar days of receipt of the appeal.

If the issue is not resolved within the college, further appeals may be made in writing to the provost and subsequently to the president of the university. Appeals beyond the college level will, however, be considered only if based on one or both of the following contentions: (a) appropriate procedures were not followed at the college level; (b) academic rules were not applied correctly at the college level.

Academic Renewal

Students who are returning to Iowa State University to pursue an undergraduate degree after an extended absence may request permission to remove one or more of their complete academic terms from future degree and GPA considerations.

1. Eligibility. To be eligible for academic renewal consideration, students must meet these requirements:
 - a. Students must not have enrolled at Iowa State University for four or more consecutive calendar years.
 - b. Students must not have graduated from Iowa State University.
 - c. Students must have demonstrated satisfactory academic performance as evidenced by earning a GPA of at least 2.00 over a minimum of 12.00 credit hours taken after returning to the university. If more than one semester is taken to reach 12.00 credit hours, the combined GPA of all semesters/terms of enrollment after returning to the university must be 2.00 or greater.
2. Conditions. Academic renewal is based on the following conditions:
 - a. All courses and credits that were taken during the chosen terms will be removed from consideration for GPA and degree requirements. Students may not combine courses from multiple terms to comprise the semester(s) or quarter(s) dropped. Degree requirements met during the dropped terms will ordinarily have to be repeated.
 - b. Renewal may be applied only to academic terms completed prior to the students' extended absence.
 - c. All courses and grades for the chosen terms will remain on the students' academic record.
 - d. Designated repeats and P/NP options will be reinstated for the terms dropped.
 - e. Students may be granted only one academic renewal.
3. Procedures.
 - a. Students should discuss their desire to pursue academic renewal with an advisor in the college they wish to enter.
 - b. The student must submit a request for Academic Renewal in Workday.

- c. After the request is initiated by the student it will route for approval to the academic advisor and college student services offices and then to the Records area in the Office of the Registrar, 010 Enrollment Services Center.

RETURN / REENTRY TO THE UNIVERSITY

Returning Students

Students planning to return to Iowa State University after an absence of less than 24 months do not complete reentry, and should be assigned registration appointments along with continuing students, unless previous programs of study have been completed or discontinued.

Students who were dropped from enrollment at Iowa State University must obtain reinstatement by the Academic Standards Committee of the college that they wish to reenter. (See Reinstatement/Renewal for policies that apply to requests for reinstatement).

Undergraduate and Graduate students may contact the Office of the Registrar at isuregistration@iastate.edu (%20isuregistration@iastate.edu) or 515-294-2331 with any questions about updating their status and generating registration access. Students should contact their advisor/major professor to select courses and begin the registration process.

International undergraduate and international non-degree undergraduate students planning to return to Iowa State University after an absence of a semester or more must also complete the Returning to ISU electronic form for the International Students and Scholars Office in order to receive their new I-20 or DS-2019. The form can be found under the F-1 or J-1 Student Services tab in Cystart at <https://cystart.its.iastate.edu> (<https://cystart.its.iastate.edu/>). If you have questions or concerns in regard to your documents, please contact the International Students and Scholars Office at 515-294-1120 or isso@iastate.edu.

Reentry Students

Students who have been absent from Iowa State University for more than 24 months since last enrolled must apply for reentry to the university through the Admissions Office.

Students with a bachelor's degree who plan to take supporting graduate level coursework prior to applying for graduate degree admission should request a nondegree graduate admission application.

Students who have previously attended Iowa State University only as nondegree (special) students and who now seek to earn an undergraduate degree should request an undergraduate admission application.

International Students must also complete the Returning to ISU electronic form for the International Students and Scholars Office in order

to receive their new I-20 or DS-2019. The form can be found under the F-1 or J-1 Student Services tab in Cystart at <https://cystart.its.iastate.edu> (<https://cystart.its.iastate.edu/>). If you have questions or concerns in regard to your documents, please contact the International Students and Scholars Office at 515-294-1120 or isso@iastate.edu.

The reentry application should be completed well in advance of the term of reentry. Students who have attended another college or university since enrollment at Iowa State University must have an official transcript(s) of all course work attempted sent to the Office of Admissions, 100 Enrollment Services Center.

Iowa State University requests the information on the reentry application for the purpose of making a reentry decision. The university reserves the right not to approve reentry if the student fails to provide the required information.

Reentering Graduate students that have not been enrolled in the last 24 months or are looking to come back in a different program than previously enrolled, please go to the Returning Graduate Students (<https://www.grad-college.iastate.edu/common/forms/inactive-to-active/>) website and follow the instructions for your specific situation. Please contact the Graduate College at 515-294-4531 if you have questions on returning to the Graduate College.

Reentry Approval Process

The reentry application will be referred to the college for review and decision if the student: (a) desires to change curriculum; (b) has a previous Iowa State University cumulative grade point average below 2.00; (c) was dropped from the university for unsatisfactory academic progress or was not otherwise in good standing; or (d) since leaving Iowa State University, has completed additional college study with less than a 2.00 grade point average.

Reentering students must also contact their departmental office/advisor to prepare a class schedule. Reentry must be approved prior to registration.

Information About Courses

Find the full listing of courses at A-Z Courses

Course Numbers

The courses in each department are numbered from 0001-7999, according to the following groups:

- 0001-0999 Courses not carrying credit toward a degree (zero credit).
- 1000-2999 Courses primarily for freshman and sophomore students.
- 3000-4999 Courses primarily for junior and senior students.
- 5000-5999 Courses primarily for graduate students, but open to qualified undergraduates.

- 6000-6999 Courses for graduate students.
- 7000-7999 Professional courses

Off-campus courses-Residential Credit

Iowa State University faculty teach distance learning courses online by video conferencing and streaming media. Courses are the same as those offered on campus, carry residential credit, and are taught by Iowa State faculty. Credit earned becomes a part of the academic record at Iowa State University and may be used to meet degree requirements the same as credit earned on campus.

Priority Enrollment

High demand for courses in certain areas has necessitated enrollment management for some courses. When enrollment priority is established for a course, first consideration is given to students whose curriculum/major explicitly requires the course.

Course Fees

Courses for which course fees are assessed are designated in the Schedule of Classes. Course fees may be assessed for such extraordinary costs as materials fees (which may include consumable materials or equipment replacement), field trip expenses, developmental course fees, and camp fees. In some cases, course fee amounts vary from term to term. Additional information on camp fees and developmental course fees may be found in the fees webpage at <https://www.registrar.iastate.edu/fees/othfee> (<https://www.registrar.iastate.edu/fees/othfee/>).

Independent Study

Most departments offer opportunities for independent study through a 4900 course listing. Usually a minimum of 6 to 10 credits of coursework in the department is required before independent study is permitted. Students who are interested in this kind of experience in a particular department should check the catalog to determine the department's prerequisites to register for 4900. 4900H sections are reserved for students in the University Honors Program.

Students should check with the department about procedures, in addition to meeting the prerequisites, for registering for 4900. A written plan of study is prepared in advance with a faculty member who has agreed to supervise the student's work, to evaluate progress and the final product, and to assign a grade. Initiation of the plan of study should occur prior to the semester in which enrollment is desired. Both the student and the instructor should agree on the number of credits for which the student will enroll, the amount and kind of work the student do for that credit, and the system by which the student will be graded (A-F or S/F). Students should not expect to register for or add 4900 credit without an instructor's permission. Some colleges and/or departments have limits on the number of credits of 4900 that may be applied toward graduation.

Credits and Contact Hours

The academic value of each course is stated in semester credits. Each credit is normally earned by attending one (50-minute) hour of lecture per week for the entire 16-week semester, or by attending a laboratory or studio period of two or three hours per week. As a guideline, undergraduate students typically will be expected to spend two hours in preparation outside of class for each lecture hour; additional outside work may be required for laboratory or studio classes. The Office of the Registrar will maintain a table of faculty-approved credit-contact hour equivalencies for the types of instruction (e.g. lecture, studio, internships, research courses) offered by the institution: <https://www.registrar.iastate.edu/faculty-staff/offeringinfo/define> (<https://www.registrar.iastate.edu/faculty-staff/offeringinfo/define/>).

Courses offered for less than a full semester (e.g. summer terms or compressed formats) will fulfill the same contact hour requirements as full-semester courses having the same credit hours. For example, a student enrolled in a one-credit course offered in an 8-week (half-semester) format should expect two hours of lecture and four hours of out of class preparation per week. Similarly, a course offered in hybrid or online format is expected to meet the same contact hour requirement, and offer equivalent student-faculty/student-student interaction and class preparation time, as the same course taught in a traditional format.

Each course states the number of semester credits assigned to the course, preceded in parentheses by the number of hours in class (contact hours) expected of the student. The first of the two contact-hour numbers indicates the number of lecture class hours per week for the semester.

The second is the number of laboratory or studio hours required per week. Laboratory and studio hours may include some time devoted to lectures. For example, COMS 2270 Object-oriented Programming is listed as (3-2) Cr. 4. In that case, the course is 4 semester credits, 3 hours of lecture and two hours of laboratory each week.

The term “Cr. arr.” means that the amount of credit is arranged in advance between the student and the instructor. The credit to be earned depends on the amount of work expected of the student, in accordance with the policy that some combination of teacher-student contact and outside work by the student involving at least three hours per week for the semester is required for each credit.

The term “Cr. R.” means that the course is required in a certain curriculum or as cognate to one or more other courses. It is also used for cooperative education courses and for some optional inspection trips, study tours, and professional development courses for which numerical credit is not granted. An R credit course does not carry numerical credit toward a student’s degree, but it does apply toward the degree. The R credit course is generally listed on the degree program as a requirement for a specific curriculum/major that must be completed prior to graduation. R credit courses may be graded using the A-F grading

scale or the satisfactory/fail grading scale. All R credit courses are assigned a numerical value for purposes of enrollment certification. Requests by students to drop an R credit course will be processed as an administrative drop during period 2 and will not appear on the student’s transcript. (See Schedule Changes.)

Credit Involving a Paid Activity

Students may obtain credit for an activity, either on- or off-campus, for which they are also paid, provided the activity is academically relevant. This policy does not apply to registrations for R credit.

In order for an activity to be defined as academically relevant, prior arrangements for receiving credit must be made with a faculty member in an appropriate department.

The arrangements must include agreement on (1) the academic objectives which the activity is expected to achieve, and (2) the procedure by which the student’s learning will be assessed.

Semester of Offering

Within each course description may be found one or more of the following letters: F. S. SS., indicating which term—fall, spring, summer session—of the academic year the course is offered. “Alt.” is the abbreviation for alternate. If there is sufficient demand, courses may be offered more frequently than announced. Insufficient demand or unforeseen staffing problems may result in the cancellation of announced offerings. Students are advised to refer to the Schedule of Classes or consult with departments for up-to-date course schedule information.

Course Prerequisite

A prerequisite indicates the specific academic background or general academic preparedness considered necessary for the student to be ready to undertake the course. Prerequisites are usually stated in terms of specific courses, but equivalent preparation is usually acceptable. An instructor may, however, direct a student whose background does not meet the stated prerequisite, or its equivalent, to drop the course. Conversely, an instructor may waive the prerequisite (or approval may be given following the appropriate departmental process) for a course for which they are responsible. Thus, permission of the instructor (or departmental process) is understood to be an alternate to the stated prerequisites.

It is university policy that the department or instructor informs enrolled students who have not met the prerequisite requirements that they must drop the course. Instructors have the right to neither accept, nor grade the work of a student who does not meet the stated prerequisite, or its equivalent (as determined by the process established in the department offering the course). Notification should be done as soon as possible and

prior to the first day of class whenever possible. For students enrolled after the first day of class, notification must be given as soon as possible.

Some courses have been approved by their colleges to use administrative drops to enforce prerequisites. In such cases, the department shall inform the enrolled students who have not met the prerequisite requirements that they must drop the course or provide evidence of equivalent preparation to be reviewed by the department. Notification should be done prior to the first day of class for students enrolled prior to the first day of class. For students enrolled after the first day of class, notification must be given as soon as possible. After such notification (via email or Canvas announcement), the student must drop the course within 3 business days, or initiate a review of their equivalent preparation. This timeframe should be indicated to the student during the notification process. If a student does not drop the course or have a successful review of an equivalent, the department or instructor may contact their college student services office to initiate an administrative drop to remove the student from the course. Additionally, students whose request to waive the prerequisite is denied, will be administratively dropped from the course. Administrative drops will be completed by the 10th day of the semester in most cases. Course prerequisites are listed in the Schedule of Classes as well as in the Courses and Programs section of this publication.

Cross-listed Courses

A course, including its complete description, may be listed in two or more departments. The participating department or departments are noted in parentheses. Credit for the course may be obtained through any of the cross-listed departments.

Dual-listed Courses

Dual-listed courses permit undergraduate and graduate students to be in the same class while receiving credit for either undergraduate or graduate level work.

Credit in the graduate course is not available to students who have received credit in the corresponding undergraduate course. Both graduates and undergraduates receive the same amount of credit for the course, but additional work is required of all graduate students taking the course under the graduate-level course number. This extra work may take the form of additional reading, projects, examinations, or other assignments as determined by the instructor. The instructor must be a member of the Graduate Faculty or a Graduate Lecturer. Each dual-listed course is designated in the catalog with the phrase "Dual-listed with," although the student's official transcript of credits, both graduate and undergraduate, does not identify dual-listed courses as such. There is a limit to the number of dual-listed course credits that may be used to meet the requirement for an advanced degree. (For information about

procedures for requesting permission to offer dual-listed courses, faculty should consult the Graduate Faculty Handbook.)

Entry Level Courses

Resources for Course Information

<http://catalog.iastate.edu/azcourses/>

<http://classes.iastate.edu>

Experimental course listings: courses not published in the catalog. (<https://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

The following courses are suitable for first year students. Course numbers that begin with 0 (e.g., CHEM 050) may incur an additional "developmental course" fee. See the Tuition and Fees web site for more information about other fees (<http://www.registrar.iastate.edu/fees/othfee/>).

ABE 1600: Systematic Problem Solving and Computer Programming

Credits: 3.

Prereq: Credit or enrollment in MATH 1430 or MATH 1650

Systematic problem-solving using principles of dynamics, statics, mass/energy conservation, and algorithmic thinking. Use of spreadsheet programs and computer programming language(s) to solve engineering problems. Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count towards graduation. (Typically Offered: Fall, Spring)

ABE 1700: Engineering Graphics and Introductory Design

Credits: 3.

Applications of multi-view drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports.

AMD 1310: Fashion Products and Markets

Credits: 3. Contact Hours: Lecture 3.

Fashion industry from concept to consumer. Focus on fashion-driven consumer goods. Development and prototyping of fashion products for a target market. (Typically Offered: Fall)

AMD 1650: Dress, Appearance, and Diversity in U.S. Society

Credits: 3. Contact Hours: Lecture 3.

Analyze foundational concepts and theories related to dress, identity, fashion, and culture and how they intersect with sex, gender, sexuality, beauty, attractiveness, disability, religion, race, and ethnicity with heightened attention to marginalized communities in the United States. Analyze the experiences and the role of fashion, clothing, dress, and/or accessories for identity development. Critique the social justice issues within the fashion system and identify the driving forces of transformative social justice change in the fashion system. Deconstruct one's personal values and positionalities in relation to fashion, clothing, dress, and/or accessories. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

ADVRT 2300: Advertising Principles

Credits: 3. Contact Hours: Lecture 3.

Historical, social, economic and legal aspects of advertising. Evaluations of advertising research, media, strategy and appeals. Study of the creation of advertising.

AERE 1600: Aerospace Engineering Problems With Computer Applications Laboratory

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: MATH 1430 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 1650

Introduction to aerospace engineering and systems thinking through engineering design team projects such as flight control of Lighter Than Air (LTA) vehicles. Introduction to programming using python. Solving aerospace engineering problems while learning about significant figures, estimation, units of measure, graphing, curve fitting, and presenting solutions through technical reports. Brief history of aerospace engineering. Satisfactory placement scores can be found at: <https://math.iastate.edu/academics/undergraduate/aleks/placement/>.

Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, BME 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count towards graduation. (Typically Offered: Fall, Spring)

AFAM 2010: Introduction to African American Studies

Credits: 3. Contact Hours: Lecture 3.

An interdisciplinary introduction to the study of African American culture. Includes history, the social sciences, literature, religion, and the arts, as well as conceptual frameworks for investigation and analysis of the African American experience. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

AFAS 1410: Foundations of the United States Air Force

Credits: 1. Contact Hours: Lecture 1.

No-commitment exploratory course introducing the United States Air Force and the Air Force Reserve Officer Training Corps program. Topics include Air Force heritage and culture, professional military officership values and expectations, and future career opportunities with an emphasis on cultivating leadership and communication skills. (Typically Offered: Fall)

AGRON 1200: Introduction to Renewable Resources

(Cross-listed with NREM 1200/ ENVS 1200).

Credits: 3. Contact Hours: Lecture 3.

Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management. (Typically Offered: Fall, Spring)

AGRON 1800: Global Agriculture in a Changing World

Credits: 3. Contact Hours: Lecture 3.

A scientific investigation of the global distribution of climate, soils and agricultural production and consumption. Physical processes that connect natural resources to agriculture and the environment. How global change drives increasing demand for agricultural production. Meets International Perspectives Requirement. (Typically Offered: Fall)

AGRON 2060: Introduction to Weather and Climate

(Cross-listed with MTEOR 2060).

Credits: 3. Contact Hours: Lecture 3.

Basic concepts in weather and climate, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety. (Typically Offered: Fall, Spring)

AMIN 2010: Native People in American Culture

Credits: 3. Contact Hours: Lecture 3.

Perceptions and realities of Native people living in and responding to American society and culture. Topics include representations, contemporary Native identity, literature, the arts, history, film, and issues of diversity. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring, Summer)

AMIN 2100: Introduction to American Indian Studies

Credits: 3. Contact Hours: Lecture 3.

Introduction to the multidisciplinary aspects of American Indian Studies. Topics include the relevant events and ideas defining the contemporary American Indian experience, on and off reservation, in the United States. Sovereignty, identity, jurisdiction, taxes, economic development, education, and other issues are addressed. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring, Summer)

ANS 1010: Working with Animals

Credits: 2. Contact Hours: Lecture 1, Discussion 1.

An introductory course in skills for proper care, handling, and management of domestic animals. Terminology and skills in working with animals, identification, life-cycle management practices, and animal health management are introduced and examined. (Typically Offered: Fall, Spring)

ANS 1140: Survey of the Animal Industry

Credits: 2. Contact Hours: Lecture 2.

Principles of management and care of domestic animals, including genetics, nutrition, and reproduction. Service of domestic animals to society in terms of food, shelter, protection, fuel and emotional well-being. Basic biology, industry structure, management practices and production systems. (Typically Offered: Fall, Spring)

ANTHR 2010: Introduction to Cultural Anthropology

Credits: 3. Contact Hours: Discussion 1, Lecture 2.

Introduction to the core concepts, theories, and methods of cultural anthropology with an emphasis on understanding human cultural diversity in global society from an anthropological perspective. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

ANTHR 2020: Human Origins

Credits: 3. Contact Hours: Discussion 1, Lecture 2.

Human biological and cultural evolution; survey of the evidence from fossil primates, the human fossil record and the archaeological record, as well as living primates; introduction to research methods in archaeology and biological anthropology. (Typically Offered: Fall, Spring)

ANTHR 2300: Globalization and the Human Condition

Credits: 3. Contact Hours: Lecture 3.

An introduction to understanding key global issues in the contemporary world. Focuses on social relations, cultural practices and political-economic linkages among Africa, the Americas, Asia, Europe and the Pacific. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

ARCH 2210: Histories and Theories of Architecture to 1750

Credits: 3. Contact Hours: Lecture 3.

Survey of architectural ideas, theories, and practices before 1750. Emphasis on the mutually formative relationship between architecture and the social, cultural, economic, and political forces, nationally and globally, in which it is produced. Meets International Perspectives Requirement. (Typically Offered: Fall)

ARTH 2800: History of Art I

Credits: 3. Contact Hours: Lecture 3.

Development of the visual arts including painting, sculpture, architecture, and crafts, from the prehistoric through Gothic periods. Meets International Perspectives Requirement. (Typically Offered: Fall)

ARTH 2920: Introduction to Visual Culture Studies

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

An introduction to various topics in visual culture studies, including significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture.

ASTRO 1030: Evening Star

Credits: 1. Contact Hours: Lecture 1.

An entirely web-based course covering topics in celestial mechanics ("Rocket science!") for students with little or no previous experience. It combines the geography of the solar system with discussion of methods of traveling to the other planets. The course "lectures" are on-line, interactive units with built-in exercises, hands-on (offline) activities, and layers of help. Graded homework and quizzes are administered via Canvas. Graduation Restriction: Students who take ASTRO 1200 may count credit in only one of ASTRO 1020 or 1030 toward graduation. (Typically Offered: Fall, Spring, Summer)

ASTRO 1200: The Sky and the Solar System

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

For the nonscientist. A survey of our view of the universe, and the exploration of the solar system and beyond. The sky: constellations; motions of the Sun, Moon, and planets; seasons and the calendar; eclipses. The solar system: origin and evolution; characteristics of the Sun, planets, satellites, comets, meteorites, and asteroids. The detection and characterization of other solar systems, and the search for life in the universe. Extensive use of the planetarium is included. (Typically Offered: Fall, Spring, Summer)

ASTRO 1500: Stars, Galaxies, and Cosmology

Credits: 3.

For the nonscientist. A survey of astronomy with a focus on the universe beyond our solar system. Basic observational astronomy and the history of astronomy. Stellar astronomy: motions, distances, sizes, spectra; types of stars; variability; binary systems. Stellar evolution: the birth, life, and death of stars, including supernovae, neutron stars, and black holes. The structure and evolution of the Milky Way Galaxy. Other galaxies, clusters of galaxies, quasars. Theories of the origin of the universe. (Typically Offered: Fall, Spring)

BBMB 1010: Introduction to Biochemistry

Credits: 1. Contact Hours: Lecture 1.

Foundational principles of the molecules and chemistry of life, including structure and function of biological molecules: protein, lipids, nucleic acids, and carbohydrates. Survey of modern biotechnology frontiers. (Typically Offered: Fall)

BIOL 1010: Introductory Biology

Credits: 3. Contact Hours: Lecture 3.

Life considered at cellular, organism, and population levels. Function and diversity of the living world. Presentation of basic biological principles as well as topics and issues of current human interest. Does not satisfy biology major requirements. (Typically Offered: Fall, Spring, Summer)

BIOL 1550: Human Biology

Credits: 3. Contact Hours: Lecture 3.

A survey course of human biology, including principal structures and functions of the body systems and the diseases and disorders associated with them. Designed to meet general education requirements in natural science. Not recommended for those seeking a career in the allied health professions or for students majoring in life science. Does not satisfy biology major requirements. (Typically Offered: Fall, Spring)

BIOL 1730: Environmental Biology

(Cross-listed with ENVS 1730).

Credits: 3. Contact Hours: Lecture 3.

An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Does not satisfy biology major requirements. (Typically Offered: Fall, Spring)

BIOL 2110: Principles of Biology I

Credits: 3. Contact Hours: Lecture 3.

Introduction to the nature of life, including the diversity of microbial, plant, and animal life; the nature of heredity; evolution; and principles of ecology. Intended for life science majors. (Typically Offered: Fall, Spring)

BIOL 2110L: Principles of Biology Laboratory I

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment in BIOL 2110

Laboratory to accompany 2110. (Typically Offered: Fall, Spring)

BIOL 2120: Principles of Biology II

Credits: 3. Contact Hours: Lecture 3.

Introduction to the chemical, molecular, and cellular basis of life; form and function of microbial, plant, and animal life. Intended for life science majors. HS courses in biology and chemistry necessary. Credit or enrollment in CHEM 1630 or CHEM 1770 recommended. (Typically Offered: Fall, Spring)

BIOL 2120L: Principles of Biology Laboratory II

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment in BIOL 2120

Laboratory to accompany 2120. (Typically Offered: Fall, Spring)

BIOL 2550: Fundamentals of Human Anatomy

Credits: 3. Contact Hours: Lecture 3.

An introduction to human anatomy, beginning with cells and tissues, surveying all body systems, relating form to function. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider BIOL 3510 for their anatomy background. Does not satisfy biology major requirements. HS courses in biology and chemistry necessary. Credit or enrollment in BIOL 1010 recommended. (Typically Offered: Fall)

BIOL 2550L: Fundamentals of Human Anatomy Laboratory

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment in BIOL 2550

Investigation of human anatomy using models and dissections of preserved organs and model mammals. Pre-Medical students should consider 3510 for their anatomy background. Does not satisfy biology major requirements. (Typically Offered: Fall)

BUSAD 1020: Business Learning Team Orientation

Credits: 1. Contact Hours: Lecture 1.

A required orientation for all College of Business Students involved with a Business Learning Team. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines and registration procedures. Includes a consideration of various business majors and careers, tools for success in college including writing skills and presentations from employers, alumni and current students. (Typically Offered: Fall, Spring)

BUSAD 1030: Orientation

Credits: 1. Contact Hours: Lecture 1.

A required orientation for all College of Business students. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines, and registration procedures. Includes group advising for course selection and registration. (Typically Offered: Fall, Spring)

CE 1600: Engineering Problems with Computational Laboratory

Credits: 3. Contact Hours: Laboratory 2, Lecture 2.

Prereq: Credit or Enrollment in MATH 1650

Engineering approach to solving problems and presenting results with applications to examples in civil, construction, and environmental engineering, such as problems in statics. Dimensions and units. Data processing, graphing, and curve fitting. Formulating and solving fundamental and practical engineering problems with spreadsheets and a structured programming language. Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count towards graduation. (Typically Offered: Fall, Spring)

CE 1700: Graphics for Civil Engineering

Credits: 2. Contact Hours: Laboratory 4.

Prereq: Credit or concurrent enrollment in MATH 1430 or MATH 1450 (or satisfactory scores on mathematics placement assessments)

Integration of fundamental graphics, computer modeling, and engineering design. Applications of multiview drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process. Freehand and computer methods. Satisfactory placement scores can be found at: <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. (Typically Offered: Fall, Spring)

CRP 2010: The North American Metropolis

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Examination of the evolution of American urban centers from the colonial era to the present. Considers the demographic changes and social movements underway in urban America and explores how an understanding of the history of cities provides us with knowledge that we can use to improve our cities today. (Typically Offered: Fall, Spring)

CRP 2510: Fundamentals of Geographic Information Systems

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Fundamentals of the concepts, models, functions and operations of Geographic Information Systems (GIS). Principles of spatial problems, spatial questions and hypotheses and their solutions based on spatial data, GIS tools and techniques. Integration of concepts and applications through lectures and facilitated labs. Applications from a variety of areas including design; physical, social, and human science; engineering; agriculture; business and medicine, landscape architecture, architecture, urban planning, geology, forestry, biology, and ecology. (Typically Offered: Fall)

CHE 1600: Chemical Engineering Problems with Computer Applications Laboratory

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: MATH 1430 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 1650

Formulation and solution of engineering problems. Significant figures. Use of SI units. Graphing and curve-fitting. Flowcharting. Introduction to material balances, engineering economics, and design. Use of spreadsheet programs to solve and present engineering problems. Solution of engineering problems using computer programming languages. Chemical Engineering examples. Satisfactory placement scores can be found at: <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, CHE 1600, CE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count towards graduation. (Typically Offered: Fall, Spring)

CHEM 1600: Chemistry in Modern Society

Credits: 3. Contact Hours: Lecture 3.

Aspects of chemistry visible to a non-scientist in our society. A survey of selected areas of chemistry with emphasis on the interface between chemistry and other fields of human activity. (Typically Offered: Fall, Spring)

CHEM 1630: College Chemistry

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Prereq: Credit or concurrent enrollment in CHEM 1630L

A general survey of chemistry with an emphasis on conceptual problems for those who are not physical and biological science or engineering majors. Nomenclature, chemical reactions, stoichiometry, atomic structure, periodic properties, chemical bonding, states of matter, solutions, thermochemistry, acid-base theory, oxidation-reduction reactions, basic chemical kinetics, and chemical equilibrium. 1 year of high school algebra and geometry and CHEM 0500 or 1 year of high school chemistry necessary. Graduation Restriction: Only one of CHEM 1630, 1670, 1770, or 2010 may count toward graduation. (Typically Offered: Fall, Spring, Summer)

CHEM 1630L: Laboratory in College Chemistry

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment for credit in CHEM 1630

Laboratory to accompany CHEM 1630. Must be taken with CHEM 1630. Graduation Restriction: Only one of CHEM 1630L, 1670L, and 1770L may count toward graduation. (Typically Offered: Fall, Spring, Summer)

CHEM 1670: General Chemistry for Engineering Students

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. MATH 1400 or 2 years of high school algebra and 1 year of high school geometry and CHEM 0500 or 1 year of high school chemistry necessary. Graduation Restriction: Only one of CHEM 1630, 1670, 1770, or 2010 may count toward graduation. (Typically Offered: Fall, Spring)

CHEM 1770: General Chemistry I

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Prereq: Credit or concurrent enrollment in CHEM 1770L

The first semester of a two-semester sequence which explores chemistry at a greater depth and with more emphasis on concepts, problems, and calculations than 1630. Recommended for physical and biological science majors, chemical engineering majors, and all others intending to take 3000-level chemistry courses. Principles and quantitative relationships, stoichiometry, chemical equilibrium, acid-base chemistry, thermochemistry, rates and mechanism of reactions, changes of state, solution behavior, atomic structure, periodic relationships, chemical bonding. Chemistry and Biochemistry majors may consider taking CHEM 2010. MATH 1400 or 2 years of high school algebra and 1 year of high school geometry and CHEM 0500 or 1 year of high school chemistry necessary. Graduation Restriction: Only one of CHEM 1630, 1670, 1770, or 2010 may count toward graduation. (Typically Offered: Fall, Spring, Summer)

CHEM 1770L: Laboratory in General Chemistry I

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment for credit in CHEM 1770

Laboratory to accompany 1770. 1770L must be taken with 1770. Graduation Restriction: Only one of CHEM 1630L, 1670L, and 1770L may count toward graduation. (Typically Offered: Fall, Spring, Summer)

CHEM 1770N: Laboratory in General Chemistry I

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment for credit in CHEM 1770

Laboratory to accompany CHEM 1770. CHEM 1770N must be taken with CHEM 1770. For Chemistry and Biochemistry majors. Laboratory to accompany CHEM 1770. CHEM 1770N must be taken with CHEM 1770. Graduation Restriction: Only one of CHEM 1630, 1670, 1770, or 2010 may count toward graduation. (Typically Offered: Fall)

CHEM 1780: General Chemistry II

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Prereq: CHEM 1630 or CHEM 1670 or (CHEM 1770; CHEM 1770L)

Continuation of 1770. Recommended for physical or biological science majors, chemical engineering majors, and all others intending to take 3000-level chemistry courses. (Typically Offered: Fall, Spring, Summer)

CHEM 1780L: Laboratory in College Chemistry II

Credits: 1. Contact Hours: Laboratory 3.

Prereq: CHEM 1770L and Credit or concurrent enrollment in CHEM 1780

Laboratory to accompany 1780. 1780L is not a necessary co-requisite with 1780. (Typically Offered: Fall, Spring, Summer)

CHEM 2010: Advanced General Chemistry

Credits: 5. Contact Hours: Lecture 4, Discussion 1.

Prereq: Credit or concurrent enrollment in MATH 1650 or MATH 1660 or MATH 2650; concurrent enrollment in CHEM 2010L

A one-semester course in general chemistry designed to give students an in-depth, broad-based view of modern chemistry, and, in part, to facilitate participation in independent undergraduate research. Topics include stoichiometry, atomic and molecular structure, chemical bonding, kinetics, chemical equilibria, and thermodynamics. Discussion of current trends in various chemical disciplines, which may be given by guest experts in chemistry, biochemistry, and chemical engineering, will help the student appreciate the scope of the chemical sciences and how research is carried out. One year HS chemistry and one year HS physics, or advanced chemistry necessary. Graduation Restriction: Only one of CHEM 1630L, 1670L, and 1770L may count toward graduation. (Typically Offered: Fall)

CHIN 1010: Elementary Mandarin Chinese I

Credits: 4. Contact Hours: Lecture 4.

Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters. For students whose native language is not Chinese. (Typically Offered: Fall)

CHIN 2010: Intermediate Mandarin Chinese I

Credits: 4. Contact Hours: Lecture 4.

Prereq: CHIN 1020

Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, intensification of character acquisition. For students whose native language is not Chinese. Meets International Perspectives Requirement. (Typically Offered: Fall)

CJ 2400: Introduction to the U.S. Criminal Justice System

Credits: 3. Contact Hours: Lecture 3.

Provides systematic overview of law, police organization and behavior, prosecution and defense, sentencing, the judiciary, community corrections, penology, and capital punishment. The course demonstrates the role of discretion in all of these agencies as well as the sociological influences of age, race, gender, and social class on criminal justice system processes. (Typically Offered: Fall)

CLST 2730: Greek and Roman Mythology

Credits: 3. Contact Hours: Lecture 3.

Survey of the legends, myths of the classical world with emphasis on the principal gods, and heroes, and their relation to ancient social, psychological, and religious practices; some attention may be given to important modern theories. Meets International Perspectives Requirement.

COMS 1010: Orientation

Credits: Required. Contact Hours: Discussion 1, Lecture 1.

Required orientation class for all incoming students in the Computer Science major. Topics include academic planning and policies, campus resources, and supports. Opportunity to connect with other computer science peers, faculty, alumni, and employers. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

COMS 1030: Computer Literacy and Applications

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Introduction to computer literacy and applications. Literacy: Impact of computer technology in today's societies, hardware, software, software programming, database and information systems, communication and networks, digital media technology, computer security and safety, ethics and privacy. Applications: In-depth hands-on experience with the operating systems, Microsoft word processing, spreadsheets, database management and presentation software. No prior computer experience necessary. Offered online only. (Typically Offered: Fall, Spring, Summer)

COMS 1040: Brief Introduction to Computer Programming for Non-Majors

Credits: 2. Contact Hours: Lecture 1.5, Discussion 0.5.

Offered first 8 weeks and last 8 weeks. Use of personal computer and workstation and beginning programming. Project-oriented approach to computer operation and programming, including use of tools to aid in programming. Topics from computer history, using basic Windows and MacOS tools, program structure, expression, variables, decision and logic, and iteration. No prior computer experience necessary. (Typically Offered: Fall, Spring)

COMS 1070: Windows Application Programming

Credits: 3. Contact Hours: Lecture 3.

Introduction to computer programming for non-majors using a language such as the Visual Basic language. Basics of good programming and algorithm development. Graphical user interfaces. (Typically Offered: Fall, Spring)

COMS 1130: Introduction to Spreadsheets and Databases

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Using Microsoft Excel spreadsheets and Microsoft Access databases to input, store, process, manipulate, query, and analyze data for business and industrial applications. Graduation Restriction: Credit in COMS 1130 may not be applied toward graduation in the SE and CPRE majors. (Typically Offered: Fall, Spring, Summer)

COMS 2070: Fundamentals of Computer Programming

Credits: 3. Contact Hours: Lecture 3, Discussion 1.

Prereq: MATH 1500 or credit or enrollment in MATH 1400 or higher

An introduction to computer programming using an object-oriented programming language. Emphasis on the basics of good programming techniques and style. Extensive practice in designing, implementing, and debugging small programs. Use of variable, if-statement, looping, method, and class. Interactive and file I/O. This course is not designed for computer science, software engineering, and computer engineering majors. Graduation Restriction: Credit may not be applied toward graduation for both COMS 2070 and COMS 2270. (Typically Offered: Fall, Spring, Summer)

COMS 2270: Object-oriented Programming

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: Credit or concurrent enrollment in MATH 1430 or higher; (COMS 1270 or CPRE 1850 or SE 1850 or EE 2850)

Computer programming using objects as the mechanism for modularity, abstraction, and code reuse. Instance variables, methods, and encapsulation. Review of control structures for conditionals and iteration. Developing algorithms on strings, arrays, and lists. Recursion, searching, and sorting. Text parsing and file I/O. Interfaces, inheritance, polymorphism, and abstract classes. Exception handling. Tools for unit testing and debugging. Emphasis on a disciplined approach to specification, code development, and testing. Course intended for majors in computer science and related fields. Graduation Restriction: Credit may not be applied toward graduation for both COMS 2070 and 2270. (Typically Offered: Fall, Spring, Summer)

COMS 2280: Introduction to Data Structures

Credits: 3. Contact Hours: Lecture 3, Discussion 1.

Prereq: Minimum of C- in COMS 2270; credit or concurrent enrollment in MATH 1650

An object-oriented approach to data structures and algorithms. Object-oriented analysis, design, and programming, with emphasis on data abstraction, inheritance and subtype polymorphism, and generics. Abstract data type specification and correctness. Collections including lists, stacks, queues, trees, heaps, maps, hash tables, and graphs. Big-O notation and algorithm analysis. Searching and sorting. Graph search and shortest path algorithms. Emphasis on object-oriented design, writing and documenting medium-sized programs. This course is designed for majors. (Typically Offered: Fall, Spring, Summer)

COMST 1010: Introduction to Communication Studies

Credits: 3. Contact Hours: Lecture 3.

An introduction to communication theory, the development and functions of communication, and a survey of verbal, nonverbal, interpersonal, small group, organizational, and intercultural communication.

COMST 2110: Interpersonal Communication

Credits: 3. Contact Hours: Lecture 3.

Application of major principles related to interpersonal communication theories, concepts, and research. Emphasis on using interpersonal communication skills effectively.

CPRE 1850: Introduction to Computer Engineering and Problem Solving I

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: MATH 1430 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 1650

Introduction to Computer Engineering. Project based examples from computer engineering. Individual interactive skills for small and large groups. Computer-based projects. Solving engineering problems and presenting solutions through technical reports. Solution of engineering problems using a programming language. Satisfactory placement scores can be found at: <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, BME 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count towards graduation.

DANCE 2700: Dance Appreciation

Credits: 3. Contact Hours: Lecture 3.

Introduction to the many forms and functions of dance in world cultures. Develop abilities to distinguish and analyze various dance styles. No dance experience required. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

DES 2300: Design Thinking

Credits: 3. Contact Hours: Lecture 3.

Introduction to design thinking processes, toolkits, and mindsets, and its interaction with art, design, and technology. Emphasis on interdisciplinary practices.

DS 2010: Introduction to Data Science

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Satisfactory math placement test score (ALEKS, 51+)

Data Science concepts and their applications; domain case studies with applications in various fields; overview of data analysis; major components of data analysis pipelines; computing concepts for data science; descriptive data analysis; hands-on data analysis experience; communicating findings to stakeholders, and ethical issues in data science. Placement scores can be found at: <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Typically Offered: Fall (annually), Spring (annually), Summer (irregularly).

DSNS 1020: Design Studio I

Credits: 4. Contact Hours: Lecture 1, Studio 6.

A foundation design studio exploring two and three-dimensional design. Emphasis on fundamental skills and ideas shared across design disciplines. Creative processes, visual order, materials, and critical thinking are investigated through studio projects. Lectures and discussions cover the topics introduced in studios.

DSNS 1150: Design Collaborative Seminar

Credits: 1. Contact Hours: Lecture 1.

Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy.

DSNS 1310: Drawing I

Credits: 4. Contact Hours: Lecture 1, Studio 6.

An introduction to methods of visual thinking and drawing through studio experiences and lectures. All design fields utilize visual communication and drawing. Focus on the use of drawing as a method for creative problem solving, design development and visual communication. Explore, from observation and imagination, the use of fast sketching and in-depth drawing, using various scales, mediums and processes.

DSNS 1830: Design in Context

Credits: 3. Contact Hours: Discussion 1, Lecture 2.

Explores designed media, objects, places, spaces, structures, and systems as products of varied and often intersecting contexts. Using historical and contemporary case studies, investigates how cultural, economic, environmental, spatial, social, and temporal contexts, among others, affect design. Explores in particular how design addresses complex and multifaceted problems.

DSNS 2320: Digital Design Communications

Credits: 3. Contact Hours: Lecture 3.

Introductory investigations of various digital design media to develop multi-dimensional problem solving, digital communication skills and perceptual sensitivity. Open to all university majors.

EE 1850: Introduction to Electrical Engineering and Problem-Solving I

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: MATH 1430 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 1650

Project based examples from electrical engineering. Systematic thinking process for engineering problem solving. Group problem solving. Mathematical, conceptual and computer-based projects. Solving engineering problems and presenting solutions through technical reports and oral presentations. Solutions of engineering problems using computation tools and basic programming. Satisfactory placement scores can be found at: <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, BME 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count towards graduation. (Typically Offered: Fall, Spring)

ECON 1010: Principles of Microeconomics

Credits: 3. Contact Hours: Lecture 3.

Resource allocation, opportunity cost, comparative and absolute advantage. Supply and demand. Marginal analysis. Theories of production and consumption, pricing, and the market system. Perfect and imperfect competition and strategic behavior. Factor markets. Present discounted value. (Typically Offered: Fall, Spring, Summer)

ECON 1010L: Laboratory in Principles of Microeconomics

Credits: 1. Contact Hours: Laboratory 2.

Discussion of material typically covered in ECON 1010. Application of economic principles to real world problems. Economic principles and basic business management concepts applied to decision-making in agribusiness operations. (Typically Offered: Fall)

ECON 1020: Principles of Macroeconomics

Credits: 3. Contact Hours: Lecture 3.

Measurement of macro variables and general macro identities. Classical models of full employment. Production and growth. Savings and investment. Employment and unemployment. Money, inflation, and price levels. Operation of the U.S. banking system. Fiscal and monetary policy. Elements of international finance. ECON 1010 recommended. (Typically Offered: Fall, Spring, Summer)

ECON 2350: Introduction to Agricultural Markets

Credits: 3. Contact Hours: Lecture 3.

Prereq: ECON 1010

Basic concepts and economics principles related to markets for agricultural inputs and products. Overview of current marketing problems faced by farms and agribusinesses, farm and retail price behavior, structure of markets, food marketing channels, food quality and food safety, and the role of agriculture in the general economy. The implications of consumer preferences at the farm level. Introduction to hedging, futures, and other risk management tools. (Typically Offered: Fall, Spring)

EDUC 2040: Social Foundations of Education in the United States:**Secondary**

Credits: 3. Contact Hours: Lecture 3.

Introduction to the historical and contemporary landscape of schooling in the United States. Emphasis is placed on topics and tensions in the relationship between school and society (e.g. equity of access to education and competing purposes of education) and the implications of these topics and tensions for teaching and learning at the secondary level in public schools. For prospective teachers in an ISU Secondary Educator Preparation program; open to students who are considering teaching and/or work in education as a career path. (Typically Offered: Fall, Spring, Summer)

EDUC 2050: Social Foundations of Education in the United States: Early Childhood and Elementary Education

Credits: 3. Contact Hours: Lecture 3.

Introduction to the historical and contemporary landscape of schooling in the United States. Emphasis on topics and tensions in the relationship between school and society (e.g., equity of access to education and competing purposes of education) and the implications of these topics and tensions for teaching and learning in public schools. Student in K-12 education, or a non-education major should take EDUC 2040. (Typically Offered: Fall, Spring)

EDUC 2190: Orientation to Teacher Education: English, FCS, History, Math, Science and World Language Majors

Credits: Required. Contact Hours: Lecture 1.

Overview of English, mathematics, science, family and consumer sciences and history, and world language and cultures secondary education (grades 5-12), teacher licensure requirements in Iowa and other states. Program and career planning. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ENGL 1010B: English for Native Speakers of Other Languages: Academic English

Credits: 3. Contact Hours: Lecture 3.

For undergraduates: Completion of ENGL 1010 requirement prepares students for ENGL 1500. For graduates: Completion of ENGL 1010 satisfies the English requirement of the Graduate College. ENGL 1010 courses are limited to students who are nonnative speakers of English. See English Requirement for International Students in Index for additional information about placement exam. Graduation Restriction: Credit from ENGL 1010 does not count toward graduation. (Typically Offered: Fall, Spring)

ENGL 1010C: English for Native Speakers of Other Languages: Academic English II--Undergraduates

Credits: 3. Contact Hours: Lecture 3.

For undergraduates: Completion of ENGL 1010 requirement prepares students for ENGL 1500. For graduates: Completion of ENGL 1010 satisfies the English requirement of the Graduate College. ENGL 1010 courses are limited to students who are nonnative speakers of English. See English Requirement for International Students in Index for additional information about placement exam. Graduation Restriction: Credit from ENGL 1010 does not count toward graduation. (Typically Offered: Fall, Spring)

ENGL 1500: Critical Thinking and Communication

Credits: 3. Contact Hours: Lecture 3.

Application of critical reading and thinking abilities to topics of civic and cultural importance. Introduction of basic oral, visual, and electronic communication principles to support writing development. Initiation of communication portfolio. Concurrent enrollment in LIB 1600 is recommended. (Typically Offered: Fall, Spring, Summer)

ENGL 2010: Introduction to Literature

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or concurrent enrollment in ENGL 1500

Introduction to the diversity of literary texts. Students will explore work across different genres (drama, poetry, short fiction, the novel) and traditions (Indigenous, postcolonial, global, British, American). Recommended for nonmajors.

ENGL 2140: Introduction to Technical Communication

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 1500.

A broad introduction to the culture of professional work as a technical communicator, with particular emphasis on principles and best practices for developing and managing technical information and digital media. Examination of user-centered design, the history of the discipline, cross-cultural communication, and the ethics of communicating complex information to lay audiences. Study and practice of team-based collaboration, project management, and technical editing. (Typically Offered: Fall)

ENGL 2250: Survey of British Literature to 1800

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Survey of British Literature from its beginnings to 1800. Representative works studied in their historical, cultural, and literary contexts that span nearly 900 years of shifts in religious, political, ethnic, and philosophical cultures.

ENGL 2260: Survey of British Literature since 1800

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENGL 2500

Representative works studied in their historical, cultural, and literary contexts, including attention to the impact and legacy of the British empire on its former colonies, i.e., postcolonial literature.

ENGL 2370: Survey of Film History

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit in or enrollment in ENGL 1500

Survey of U.S. and international film history from its beginnings in the late nineteenth century to the present. (Typically Offered: Fall)

ENGL 2400: Introduction to American Indian Literature

(Cross-listed with AMIN 2400).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit in or enrollment in ENGL 1500

Survey of American Indian Literature of varying genres, including fiction, non-fiction, poetry, film, drama, and media. Focuses on interdisciplinary approaches to American Indian cultural, social, and environmental issues. Meets U.S. Diversity Requirement. (Typically Offered: Fall)

ENGL 2500: Written, Oral, Visual, and Electronic Composition

Credits: 3. Contact Hours: Lecture 3.

Prereq: (Credit for or exemption from ENGL 1500) AND (credit or concurrent enrollment in LIB 1600)

Analyzing, composing, and reflecting on written, oral, visual, and electronic (WOVE) discourse within academic, civic, and cultural contexts. Emphasis on supporting a claim and using primary and secondary sources. Continued development of communication portfolio. Graduation Restriction: The University requires a minimum grade of C in ENGL 2500 to meet the Communication Proficiency graduation requirement; some majors/degree programs may set higher standards. (Typically Offered: Fall, Spring, Summer)

ENGL 2750: Analysis of Popular Culture Texts

(Cross-listed with SPCM 2750).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or concurrent enrollment in ENGL 2500

Analysis of how information and entertainment forms persuade and manipulate audiences. Study of several forms that may include newspapers, speeches, television, film, advertising, fiction, and magazines. Special attention to verbal and visual devices. (Typically Offered: Fall, Spring)

ENGR 1600: Engineering Problems with Computer Applications Laboratory

Credits: 3.

Prereq: MATH 1430 or satisfactory score of 76 on mathematics placement exam

Solving engineering problems and presenting solutions through technical reports. Significant figures. Use of SI units. Graphing and curve-fitting. Flowcharting. Introduction to mechanics, statistics and engineering economics. Use of spreadsheet programs to solve and present engineering problems. Solution of engineering problems using computer programming languages. (The honors section includes application of programming to mobile robotics). Satisfactory placement scores can be found at: <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count towards graduation. (Typically Offered: Fall, Spring, Summer)

ENT 2010: Introduction to Insects

Credits: 1. Contact Hours: Lecture 2.7.

Biological and ecological aspects of insects. Offered online only. 5 weeks. (Typically Offered: Fall, Spring)

ENT 2110: Insects and Society

Credits: 2. Contact Hours: Lecture 2.7.

Prereq: ENT 2010

The importance of insects in human well-being. Insect-human interactions. Primarily for non-science and non-agriculture majors. Offered online only. 11 weeks. (Typically Offered: Fall, Spring)

ENT 2140: Insects in Forensic Science

Credits: 3. Contact Hours: Lecture 3.

Introduction to the use of insects as evidence in court and how they can assist in solving crimes. Topics covered include basic insect biology, systematics, behavior, with emphasis on applications of forensic entomology. Offered even-numbered years. (Typically Offered: Fall)

ENVS 1010: Environmental Geology: Earth in Crisis

(Cross-listed with GEOL 1010).

Credits: 3. Contact Hours: Lecture 3.

Exploration of the interactions between humans and the geologic environment, and the consequences of those interactions, on local to global scales. Discussion of water, soil, mineral, and energy resources, pollution, climate change, and natural hazards such as earthquakes, volcanism, mass wasting, and flooding. (Typically Offered: Fall, Spring, Summer)

ENVS 1200: Introduction to Renewable Resources

(Cross-listed with AGRON 1200/ NREM 1200).

Credits: 3. Contact Hours: Lecture 3.

Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management. (Typically Offered: Fall, Spring)

ENVS 1730: Environmental Biology

(Cross-listed with BIOL 1730).

Credits: 3. Contact Hours: Lecture 3.

An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Does not satisfy biology major requirements. (Typically Offered: Fall, Spring)

ENVS 2010: Introduction to Environmental Issues

(Cross-listed with BIOL 2010/ ENSCI 2010).

Credits: 2. Contact Hours: Lecture 2.

Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change. (Typically Offered: Fall)

EVENT 1710: Introduction to Event Management

Credits: 3. Contact Hours: Lecture 3.

Overview of the event management industries. Techniques and procedures required for designing and implementing successful events. (Typically Offered: Fall, Spring)

FRNCH 1010: Elementary French I

Credits: 4. Contact Hours: Lecture 4.

Beginning level development of reading, writing, listening comprehension, and speaking in French, within the context of French culture. (Typically Offered: Fall, Summer)

FRNCH 2010: Intermediate French I

Credits: 4. Contact Hours: Lecture 4.

Prereq: FRNCH 1020

Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture. Meets International Perspectives Requirement. (Typically Offered: Fall)

FSHN 1010: Food and the Consumer

Credits: 3. Contact Hours: Lecture 3.

The food system from point of harvest to the consumption of the food by the consumer. Properties of food constituents. Protection of food against deterioration and microbial contamination. Introduction of foods into the marketplace. Processes for making various foods. Government regulations. Use of food additives. Current and controversial topics. High school biology and chemistry or 3 credits of college level biology and chemistry recommended. (Typically Offered: Fall, Spring, Summer)

FSHN 1670: Introductory Human Nutrition and Health

Credits: 3. Contact Hours: Lecture 3.

Understanding and implementing present day knowledge of nutrition. The role of nutrition in the health and well being of the individual and family. High school biology or 3 credits of biology recommended. (Typically Offered: Fall, Spring, Summer)

FSHN 2200: American Food and Culture

Credits: 3. Contact Hours: Lecture 3.

American cuisine reflects the history of the U.S. It is the unique blend of diverse groups of people from around the world, including indigenous Native American Indians, Africans, Asians, Europeans, Pacific Islanders, and South Americans. Explore factors that impact the American Cuisine of today including diverse ethnic and cultural group influences, historical events related to food diversity in the U.S., and agriculture and industrial impacts on food production. Practical knowledge and basic food preparation techniques related to the U.S. food system and trends. Class sessions will include lectures, class discussions and Tasting Immersion activities. (Typically Offered: Fall, Spring)

GEOL 1000: How the Earth Works

Credits: 3. Contact Hours: Lecture 3.

How does the earth work, what is it made of, and how does it change through time? Plate tectonics, Earth materials, landforms, structures, climate, and natural resources. Emphasis on the observations and hypotheses used to interpret earth system processes. Students may also enroll in GEOL 1000L. (Typically Offered: Fall, Spring, Summer)

GEOL 1000L: How the Earth Works: Laboratory

Credits: 1. Contact Hours: Laboratory 2.

Students will gain understanding of how Earth processes affect their lives and how they affect the Earth, and of the complex nature of the Earth and its processes. They will gain a deep knowledge of the methods used to understand the time scales and rates of Earth processes also through an applied research experience on groundwater and surface water. (Typically Offered: Fall, Spring)

GEOL 1010: Environmental Geology: Earth in Crisis

(Cross-listed with ENVS 1010).

Credits: 3. Contact Hours: Lecture 3.

Exploration of the interactions between humans and the geologic environment, and the consequences of those interactions, on local to global scales. Discussion of water, soil, mineral, and energy resources, pollution, climate change, and natural hazards such as earthquakes, volcanism, mass wasting, and flooding. (Typically Offered: Fall, Spring, Summer)

GEOL 1050: Gems and Gemstones

Credits: 1. Contact Hours: Lecture 1.

Offered in second half of the semester. Introduction to gems and gemstones, physical and optical properties of gems and gemstones, explanation of where gems come from and how they are found, how to distinguish between synthetic and naturally occurring gems, how the value of gems are determined, and the history of famous gems. (Typically Offered: Fall)

GEOL 1110: Geological Disasters

(Cross-listed with ENVS 1110).

Credits: 1. Contact Hours: Lecture 1.

Introduction to the catastrophic geologic processes with the potential to devastate human populations that continue to expand into regions at greatest risk from geologic hazards. Selected case studies and discussion of plate tectonics, climate, and earth processes explain the driving forces behind natural hazards such as earthquakes, tsunamis, volcanic eruptions, landslides, and floods. (Typically Offered: Fall, Spring, Summer)

GEOL 2010: Geology for Engineers and Environmental Scientists

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Introduction to Earth materials and processes with emphasis on engineering and environmental applications. (Typically Offered: Fall)

GER 1010: Elementary German I

Credits: 4. Contact Hours: Lecture 4.

Beginning level development of reading, writing, listening comprehension, and speaking in German within the context of German culture. For beginning-level learners who have little or no prior exposure to German. (Typically Offered: Fall, Summer)

GER 2010: Intermediate German I

Credits: 4. Contact Hours: Lecture 4.

Prereq: GER 1020

Intermediate level development of reading, writing, listening comprehension, and speaking in German within the context of German culture. Intensive review of basic grammar covered in the first-year German class (or equivalent high school courses) while exploring cultural topics and themes. Meets International Perspectives Requirement. (Typically Offered: Fall)

GLOBE 2010: Introduction to Global Resource Systems

Credits: 3. Contact Hours: Lecture 3.

A systematic analysis of natural, physical, and socio-economic resources. Examine ways communities prioritize, save, use, and invest in community resources to address their needs and wants in a sustainable way, and the global implications of resource systems decisions. Assessed service-learning component. (Typically Offered: Fall, Spring)

HS 1050: First Aid and Emergency Care

Credits: 2.

Discussion and application of the basic techniques of utilizing bloodborne pathogen safety measures, administering first aid and cardiopulmonary resuscitation. ARC layperson certification available. (Typically Offered: Fall, Spring, Summer)

HS 1100: Personal and Consumer Health

Credits: 3. Contact Hours: Lecture 3.

Physical, mental, emotional and social aspects of health as a basis for understanding and promoting health, and preventing poor health conditions. Study of personal responsibility on the long-term benefits of maintaining a high level of wellness and health. Identification and mitigation of negative lifestyle habits. (Typically Offered: Fall, Spring)

HSCI 1100: Orientation and Human Sciences Career Exploration

Credits: 2. Contact Hours: Lecture 2.

Orientation and adjustment to the university and college; review of policies and procedures; academic resources; and course selection and planning. Comprehensive approach to career development; intensive self-analysis; and in-depth examination of majors in Human Sciences. Required for all students declared as an Undecided major in the College of Human Sciences. (Typically Offered: Fall, Spring)

HSCI 1500: Dialogues on Diversity

Credits: 1. Contact Hours: Lecture 1.

An exploration of diversity within the context of the Iowa State University community through understanding human relations issues. (Typically Offered: Fall, Spring)

HDFS 1020: Human Development

Credits: 3. Contact Hours: Lecture 3.

Overview of life-span developmental tasks (physical, cognitive, language, social, emotional) examined from various theoretical perspectives. Discussion of topics related to family diversity, individual/family health and well-being and reciprocal relationships as affected by external factors. (Typically Offered: Fall, Spring, Summer)

HDFS 1830: Personal Finance in Early Adulthood

Credits: 1. Contact Hours: Lecture 1.

Introduction to basic concepts and budgeting practices for management of resources and prevention of financial problems commonly associated with college, including credit and student loans. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

HDFS 2230: Child Development and Health

Credits: 3. Contact Hours: Lecture 3.

Typical and atypical development of children prenatal through middle childhood. Examination of healthy development and potential impact of health issues in children. Discussion of influence of the family and society on development. Graduation Restriction: Either HDFS 2230 or HDFS 2240, but not both, may be applied toward graduation. (Typically Offered: Spring)

HDFS 2390: Consumer Issues

Credits: 3. Contact Hours: Lecture 3.

Introduction to factors affecting consumer decisions of individuals and families, including housing, healthcare, and personal finances. Emphasis on accessibility and affordability, community contexts for families; and consumer protection, legislation and regulation, and consumer fraud. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

HDFS 2400: Literature for Children

Credits: 3. Contact Hours: Lecture 3.

Evaluation of literature for children, including an emphasis on diversity and inclusion; cultural competence. Roles of literature in the overall development of children. Literature selection and use in the home and educational settings. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

HDFS 2760: Human Sexuality

Credits: 3. Contact Hours: Lecture 3.

Behavioral, biological, and psychological aspects of human sexuality within the social context of family, culture, and society. Role of sexuality in human development. Critical analysis of media and research. Communication and decision-making skills relating to sexuality issues and relationships. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring, Summer)

HIST 2010: Introduction to Western Civilization I

Credits: 3. Contact Hours: Lecture 3.

Western civilization from ancient Mediterranean world to 1500. Social and cultural developments; economic and political ideas and institutions; problems of historical change and continuity. Meets International Perspectives Requirement. (Typically Offered: Fall)

HIST 2070: Chinese Civilization

Credits: 3. Contact Hours: Lecture 3.

Origins, development, decline and transformation of China from earliest times to 1911. Meets International Perspectives Requirement.

HIST 2110: Ancient Empires: From Sargon to Caesar

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Development of empires in the Near East and Mediterranean from the Akkadians to the fall of Rome. Discussion of the Hittites, Assyrians, Persians, Athenians, Macedonians (including the conquests of Alexander the Great), Carthaginians, and Romans; examination of imperialism as well as the social, cultural, and economic consequences of empire. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

HIST 2210: Survey of United States History I

Credits: 3. Contact Hours: Lecture 3.

Colonial foundations: revolution, confederation, and constitution; nationalism and democracy; sectional disunity, Civil War, and reunion. (Typically Offered: Fall)

HIST 2800: Introduction to History of Science I

Credits: 3. Contact Hours: Lecture 3.

Ideas of nature from ancient Greece to the seventeenth-century scientific revolution. Meets International Perspectives Requirement.

HORT 1210: Home Horticulture

Credits: 3. Contact Hours: Discussion 1, Lecture 2.

Growing plants in and around the home including requirements for growing indoor plants, plant propagation, landscape design, and maintaining trees, lawns, flower, fruit, and vegetable gardens. Recitation includes demonstrations and hands-on activities that illustrate principles of designing, growing and maintaining plants for both indoor and outdoor gardens. (Typically Offered: Fall, Spring)

HSPM 1010: Introduction to the Hospitality Industry

Credits: 3. Contact Hours: Lecture 3.

Introduction to the foodservice, lodging, and tourism components of the hospitality industry. Background information, current issues, and future challenges in various segments of the industry. (Typically Offered: Fall, Spring)

IE 1480: Information Engineering

Credits: 3.

Prereq: Credit or concurrent enrollment in MATH 1430

Solving engineering problems with information-driven solutions. Effective communication via technical writing and presentations. Elements of computer science including the software development process, algorithm structure, computational thinking, and the human-computer interface. Database structure. Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, BME 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count towards graduation. (Typically Offered: Fall, Spring)

INTST 2350: Introduction to International Studies

Credits: 3. Contact Hours: Lecture 3.

Overview of international studies, emphasizing cultural, geographic, economic, and political characteristics of major world areas and nations. Meets International Perspectives Requirement. (Typically Offered: Fall, Summer)

ITAL 1070: Intensive Beginning Italian

Credits: 4. Contact Hours: Lecture 4.

A communicative approach to grammar and vocabulary within the context of Italian culture for students whose native language is not Italian. Taught in Italian. (Typically Offered: Fall, Spring)

JLMC 1010: Mass Media and Society

Credits: 3. Contact Hours: Lecture 3.

Communication theory models and their application to the mass media; the mass communication process; organization, characteristics and responsibilities of the mass media; media literacy process. (Typically Offered: Fall, Spring, Summer)

JLMC 1100: Orientation to Journalism and Communication

Credits: Required. Contact Hours: Lecture 1.

Orientation to professional and pre-professional opportunities, writing for the mass media and curriculum requirements in the Greenlee School. Basic media writing preparation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

JLMC 2400: Principles of Journalism

Credits: 3. Contact Hours: Lecture 3.

Analysis of journalism industry and specific audiences served by print, electronic, visual and digital media. Introduction to core values of journalism and guiding principles that encompass literacy, ethics, law, history, the economy and cultural and societal implications. (Typically Offered: Fall, Spring)

JLMC 2420: Visual Principles for Mass Communicators

Credits: 3. Contact Hours: Lecture 3.

Understanding and analysis of the visual message. Visual perception, visual communication theory, design syntax, design elements and how they are applied in mass communication. (Typically Offered: Fall, Spring)

KIN 2520: Introduction to the Discipline of Kinesiology

Credits: 1. Contact Hours: Lecture 1.

Relevant societal issues and research within the discipline of Kinesiology (the study of movement) are addressed. (Typically Offered: Fall, Spring)

KIN 2530: Orientation and Learning Community in Kinesiology and Health

Credits: 1. Contact Hours: Lecture 1.

Overview of ISU policies and procedures, academic advising operations, degree requirements, program of study planning, and campus resources. Students will have out-of-class activities and work with faculty, staff and mentors to explore careers in Kinesiology and complete assignments related to identification & development of their skills and interests. Department of Kinesiology students only. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

LLS 1120: Foundations of Learning and Productive Team Membership

Credits: 2. Contact Hours: Lecture 2.

Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world. (Typically Offered: Fall)

LAS 1010: Orientation for Open Option and Preprofessional Students

Credits: 1. Contact Hours: Discussion 0.5, Lecture 0.5.

Introduction to all undergraduate colleges. Provides information about university resources and services, assists with a successful academic transition to the university, and helps initiate the process of identifying academic major(s) and eventual career paths. Required of all first-year students in Open Option and Preprofessional Programs. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

LATIN 1010: Elementary Latin I

Credits: 3. Contact Hours: Lecture 3.

Grammar and vocabulary of classical Latin, within the context of Roman culture; reading knowledge through texts adapted from classical authors. (Typically Offered: Fall)

LDST 1220: Leading with Purpose

Credits: 1. Contact Hours: Lecture 1.

Designed for emerging student leaders. Basic leadership skills covering personal skills development, goal achievement, values-based behaviors and mission statement development. (Typically Offered: Fall, Spring)

LDST 2700: Campus Leadership Development

Credits: 3. Contact Hours: Lecture 3.

Introduce effective leadership practices for emerging leaders. Engage in experiential campus leadership opportunities. (Typically Offered: Fall, Spring, Summer)

LIB 1600: Introduction to College Level Research

Credits: 1. Contact Hours: Lecture 1.

Eight-week course required for undergraduate degree. Provides a foundation for college level research. Students will develop the critical thinking skills necessary to successfully navigate the research process: developing a research question, searching strategically, evaluating sources, and using information ethically. To be taken as early as possible in the student's undergraduate career. See course descriptions of ENGL 1500 and ENGL 2500 for requirements related to LIB 1600. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

LING 1190: Introduction to World Languages

(Cross-listed with WLC 1190).

Credits: 3. Contact Hours: Lecture 3.

Study of language diversity and the personal, social and political effects of diversity. Language families, attitudes toward language and language use, language and culture, multilingualism, foreign language learning, written codes, official languages, and language policy. Meets International Perspectives Requirement.

LING 1200: Computers and Language

(Cross-listed with ENGL 1200).

Credits: 3. Contact Hours: Lecture 3.

Introduction to the use of linguistic knowledge in computer applications today and the basic computational techniques used in such applications. The development of these techniques throughout the history of computational linguistics. How the study of language has contributed to the advancement of technology and how certain computational problems have influenced the way linguists study language.

ME 1600: Mechanical Engineering Problem Solving with Computer Applications

Credits: 3.

Prereq: ME majors only. MATH 1430 or MATH 1450; credit or enrollment in MATH 1650.

Introduction to the field of Mechanical Engineering through problem-solving in a range of topics including statics, mechanics of materials and thermo-fluids. Techniques to professionally present and communicate solutions. Use of MATLAB computer programming to aid problem solving, including curve fitting and graphing. Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count toward graduation. (Typically Offered: Fall, Spring)

ME 1700: Engineering Graphics and Introductory Design

Credits: 3.

Prereq: Credit or concurrent enrollment in MATH 1430 or MATH 1450 (or satisfactory scores on mathematics placement assessments)

Integration of fundamental graphics, computer modeling, and engineering design. Applications of multiview drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports. Freehand and computer methods. Satisfactory placement scores can be found at: <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. (Typically Offered: Fall, Spring)

MS 1010: Introduction to Military Science

Credits: 1. Contact Hours: Lecture 1.

Prereq: Concurrent enrollment in MS 1010L required

Examines the role of a Cadet in the Army Reserve Officer Training Corps and a Lieutenant in the United States Army. The course explores a military culture whose ultimate success is determined by the character and proficiency of its' leaders. Instruction introduces students to the cultural heritage and history of the U.S. Army. Students will begin to understand the structure of the U.S. Army and how it functions as an organization and institution. The curriculum promotes the development of students' communication skills to enhance their ability to transmit ideas. The class examines how the Army's cultural values drive the development of leadership in the Officer Corps. Hands-on activities enable students to gain insight on the skills and abilities required of cadets and officers interacting with civilians and soldiers. (Typically Offered: Fall)

MS 1010L: Basic Leadership Laboratory I

Credits: 1. Contact Hours: Laboratory 2.

Prereq: Concurrent enrollment in MS 1010 required

Uses basic military training, missions and scenarios to provide a hands-on method of developing confidence and leadership skills. Students observe and participate in the rotation through various levels of leadership positions at the platoon and squad level within the Army command structure. This concept provides a constant learning environment as they learn to communicate effectively and work as a team while assigned to positions at various levels within the organization. Marching, rifle firing, and tactical patrolling; students gain confidence through rappelling and construction/use of rope bridges; and increase professional knowledge in areas such as first aid, water survival, personal physical fitness, and land navigation. Teaching locations include the ISU Armory, Camp Dodge (National Guard Facility), Pammel Woods (ISU campus), and ISU fitness centers. Full participation in all events will be determined based on students' physical and medical eligibility. (Typically Offered: Fall)

MS 1500: Army Physical Readiness

Credits: 1. Contact Hours: Laboratory 3.

Repeatable.

This lab is designed to use basic military skills and instruction to develop confidence, leadership, and physical fitness. The team approach is utilized in the instruction and application of Army physical fitness requirements. Students will learn various Army physical fitness techniques as well as how to conduct physical fitness sessions. Teaching locations include Lied Recreation Center, Beyer Hall, State Gym as well as around campus. Full participation in all events will be determined based on students' physical and medical eligibility. (Typically Offered: Fall, Spring)

MATH 1010: Orientation in Mathematics

Credits: 1. Contact Hours: Lecture 1.

A required orientation for all first-year and transfer students in mathematics. Provides information about campus resources and opportunities available to students, assists with transition to the University, and academic planning. Offered on a satisfactory/fail basis only. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

MATH 1040: Introduction to Probability

Credits: 3. Contact Hours: Lecture 3.

Prereq: Satisfactory math placement test score (ALEKS 15+)

Permutations, combinations, probability, expected value, and applications. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Either MATH 1040 or MATH 1500 may be counted toward graduation, but not both. (Typically Offered: Fall, Spring, Summer)

MATH 1050: Introduction to Mathematical Ideas

Credits: 3. Contact Hours: Lecture 3.

Prereq: Satisfactory math placement test score (ALEKS 15+)

Introduction to the use of basic mathematics to solve real-world problems in the areas of voting issues, measuring power in situations where people have different numbers of votes, apportionment, fair division, and elementary game theory. No prior background in politics or history is necessary for this course. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. (Typically Offered: Fall, Spring, Summer)

MATH 1400: College Algebra

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Prereq: Satisfactory math placement test score (ALEKS, 39+) or concurrent enrollment in MATH 139

Coordinate geometry, quadratic and polynomial equations, functions, graphing, rational functions, exponential and logarithmic functions, inverse functions, quadratic inequalities, systems of linear equations. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. (Typically Offered: Fall, Spring, Summer)

MATH 1430: Preparation for Calculus

Credits: 4. Contact Hours: Lecture 2, Discussion 2.

Prereq: Satisfactory performance on placement assessment or MATH 1400

Preparation for MATH 1600 or MATH 1650. Functions, graphing, basic trigonometry, logarithms, exponentials. Emphasis on co-variational reasoning. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of MATH 1430 and MATH 1450 may count toward graduation. (Typically Offered: Fall, Spring)

MATH 1450: Applied Trigonometry

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Prereq: Satisfactory performance on placement assessment or MATH 1400

Mathematical ideas regarding the conception of space. General trigonometry, with an emphasis on the calculation of lengths, areas, and angles. The Law of Sines and the Law of Cosines. Polar, cylindrical, and spherical coordinate systems. Conic sections and quadric surfaces. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of MATH 1430 and MATH 1450 may count toward graduation. (Typically Offered: Fall, Spring)

MATH 1500: Discrete Mathematics for Business and Social Sciences

Credits: 3. Contact Hours: Lecture 3.

Prereq: Satisfactory math placement test score (ALEKS, 39+)

Linear equations and inequalities, matrix algebra, linear programming, discrete probability. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Either MATH 1040 or MATH 1500 may be counted toward graduation, but not both. (Typically Offered: Fall, Spring, Summer)

MATH 1600: Survey of Calculus

Credits: 4. Contact Hours: Lecture 4.

Prereq: Satisfactory performance on placement assessment or minimum of C- in (MATH 1400 or MATH 1430)

Analytic geometry, derivatives and integrals of elementary functions, simple differential equations, and applications. Will not serve as a prerequisite for MATH 2650 or MATH 2660. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of MATH 1510, MATH 1600, or the sequence MATH 1650-MATH 1660 may be counted towards graduation. (Typically Offered: Fall, Spring)

MATH 1650: Calculus I

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Prereq: Minimum C- in MATH 1430 or satisfactory score on placement exam

Differential calculus, applications of the derivative, introduction to integral calculus. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of MATH 1510, MATH 1600, or the sequence MATH 1650-MATH 1660 may be counted towards graduation. (Typically Offered: Fall, Spring, Summer)

MATH 1660: Calculus II

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Prereq: MATH 1650 or satisfactory placement on Calculus II placement exam (by department permission)

Integral calculus, applications of the integral, parametric curves and polar coordinates, power series and Taylor series. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of MATH 1510, MATH 1600, or the sequence MATH 1650-MATH 1660 may be counted towards graduation. (Typically Offered: Fall, Spring, Summer)

MATH 1950: Mathematics for Elementary Education I

Credits: 3.

Prereq: Satisfactory performance on placement assessment; Early or Elementary Education major

Whole number operations through analysis of properties, theoretical and hands-on models, mathematical analysis of elementary students' thinking; standard and non-standard algorithms; structure of the decimal system; linear measurement; two- and three-dimensional measurement, shapes and spatial sense; number theory; algebra as it relates to elementary curricula/teaching profession. Satisfactory placement scores can be found at <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Students in the College of Liberal Arts and Sciences may not count MATH 1950 toward General Education Requirements. (Typically Offered: Fall, Spring)

MATH 2650: Calculus III

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Prereq: Minimum of C- in MATH 1660 or MATH 1660H

Geometry of space and vectors, multivariable differential calculus, multivariable integral calculus, vector calculus. (Typically Offered: Fall, Spring, Summer)

MATH 2670: Elementary Differential Equations and Laplace Transforms

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Prereq: Minimum of C- in MATH 1660 or MATH 1660H

Same as MATH 2660 but also including Laplace transforms and power series solutions to ordinary differential equations. Graduation Restriction: Credit for either MATH 2670 or the MATH 2660, 2680 pair of courses, but not both, may be applied toward graduation. Credit for only one of the following courses may be applied toward graduation: MATH 2670, MATH 2660, MATH 2690. (Typically Offered: Fall, Spring, Summer)

MICRO 1010: Microbial World

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits in Biology

Introduction to the importance of viruses, bacteria, fungi, archaea and parasites both to humans and to the biosphere. Topics include past and present microbial impact on humans and society, ecology and diversity of microbes, biotechnology and microbial impact on the biosphere. Recommended: High School Biology. (Typically Offered: Fall)

MICRO 2010: Introduction to Microbiology

Credits: 2. Contact Hours: Lecture 2.

Prereq: One BIOL course except BIOL 1100, BIOL 1110, BIOL 1120, BIOL 1730, BIOL 2010, BIOL 3070

Selected topics in microbiology with emphasis on the relationship of microorganisms to human and animal health, agricultural technology, and the environment. With written petition to the chair of the supervisory committee, students who obtain a grade of B or better may substitute 2010 for MICRO 3020 in advanced courses. (Typically Offered: Fall, Spring)

MICRO 2010L: Introductory Microbiology Laboratory

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credits or concurrent enrollment in MICRO 2010 or MICRO 3020

Basic microbiology laboratory techniques for non-microbiology majors. Graduation Restriction: Credit for either MICRO 2010L or 3020L, but not both, may be applied toward graduation. (Typically Offered: Fall, Spring)

MTEOR 1070: Severe and Hazardous Weather

Credits: 1. Contact Hours: Lecture 1.

Understanding of atmospheric processes that play a role in creating severe and hazardous weather. Focus on thunderstorms, tornadoes, hurricanes, floods, blizzards, ice storms, and temperature extremes. Impacts on lives and property. (Typically Offered: Fall)

MTEOR 1400: Climate and Society

(Cross-listed with AGRON 1400/ ENVS 1400/ GEOL 1400).

Credits: 3. Contact Hours: Lecture 3.

The climate system of our planet. How nature and our actions alter the existing energy balance leading to climate change. Past climates on our planet. The influence of climate on society and resource availability during the Holocene (~ 11,000 years ago to present) with focus on changes post industrial revolution. Significant climate events that have altered our way of life in the past. Projected changes in future climate and potential impacts on society, environment and resources. Adaption to and mitigation of climate change. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

MTEOR 2060: Introduction to Weather and Climate

(Cross-listed with AGRON 2060).

Credits: 3. Contact Hours: Lecture 3.

Basic concepts in weather and climate, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety. (Typically Offered: Fall, Spring)

MUSIC 1010: Fundamentals of Music

Credits: 2.

Notation, recognition, execution and analysis of scales, intervals, triads, and rhythm; key signatures; time signatures; transposition. Open to non-majors only. Ability to read elementary musical notation required. (Typically Offered: Fall, Spring)

MUSIC 1020: Introduction to Music Listening

Credits: 3. Contact Hours: Lecture 3.

Expansion of the music listening experiences for the general student through greater awareness of differences in techniques of listening, performance media, and materials of the art. The course focuses on the elements of music: rhythm, melody, harmony, form, and style, and how these elements are used in musics of different cultures and time periods. Ability to read or perform music not required. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

MUSIC 1110: Wind Ensemble

Credits: 1. Contact Hours: Laboratory 3.

Repeatable.

Emphasis on significant extended compositions for wind and percussion instruments. Performances include formal concerts on campus and the annual tour. Open to all students by audition. (Typically Offered: Fall, Spring)

MUSIC 1120: Concert Band

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Repertoire includes the broad spectrum of band music. Two concerts are presented each semester. Open to students who have performed on a wind or percussion instrument in high school band or orchestra. (Typically Offered: Fall, Spring)

MUSIC 1130: Jazz Ensemble

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Designed to explore various styles and trends in contemporary jazz. Open to all students by audition. (Typically Offered: Fall, Spring)

MUSIC 1140A: Marching and Pep Bands: Marching Band

Credits: 1. Contact Hours: Laboratory 5.

Repeatable.

Membership determined by audition and band application. Auditions held for woodwind, brass, percussion, flag, and twirler positions. Presentation of pre-game and half time shows at each home football game; additional performances are also scheduled on and off campus. Audition information is listed on the band website (www.music.iastate.edu/org/marching). Students may not be concurrently enrolled in MUSIC 1140A and 1140C. (Typically Offered: Fall)

MUSIC 1150: Symphonic Band

Credits: 1. Contact Hours: Laboratory 3.

Repeatable.

Stresses high quality wind literature. Performances include formal concerts on campus. Open to all students by audition. (Typically Offered: Fall, Spring)

MUSIC 1410: Lyrica Ensemble

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Large chorus; emphasis on wide variety of literature and singing sounds from around the world. Includes fundamental voice and choral skills. Campus concerts each semester. Open to all treble voice students by audition. (Typically Offered: Fall, Spring)

MUSIC 1510A: University Chorus: Cantamus Women's Choir

Credits: 1. Contact Hours: Laboratory 3.

Repeatable.

Large chorus; emphasis on adventurous, contemporary programming. Advanced skills required. Campus concerts each semester, some in conjunction with orchestra. Open to all treble voice students by audition. (Typically Offered: Fall, Spring)

MUSIC 1510B: University Chorus: Statesmen Men's Choir

Credits: 1. Contact Hours: Laboratory 3.

Repeatable.

Advanced skills required, high quality literature. Campus concerts each semester, some concerts in conjunction with orchestras. Men's and women's choirs separately and in combination. Open to all students by audition. (Typically Offered: Fall, Spring)

MUSIC 1610: Iowa State Singers

Credits: 1. Contact Hours: Laboratory 5.

Repeatable.

Concert choir specializing in performance of advanced music literature, Renaissance through contemporary. Campus concerts, annual spring tour. Open to all students by audition. (Typically Offered: Fall, Spring)

MUSIC 1810: Symphony Orchestra

Credits: 1. Contact Hours: Laboratory 4.

Repeatable.

Reading, preparation, and performance of standard repertoire. Five or six concerts annually plus occasional off-campus appearances. Open to all students by audition. (Typically Offered: Fall, Spring)

NS 1110: Introduction to Naval Science

Credits: 3. Contact Hours: Lecture 3, Laboratory 3.

Introduction to the organization, regulations, and capabilities of the US Navy, with emphasis on mission and principal warfare components.

(Typically Offered: Fall)

NREM 1200: Introduction to Renewable Resources

(Cross-listed with AGRON 1200/ ENVS 1200).

Credits: 3. Contact Hours: Lecture 3.

Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management. (Typically Offered: Fall, Spring)

PR 2200: Principles of Public Relations

Credits: 3. Contact Hours: Lecture 3.

Introduction to public relations in business, government and non-profit organizations; functions, processes, and management; ethics, public opinion and theory.

PHIL 2010: Introduction to Philosophy

Credits: 3. Contact Hours: Lecture 3.

It has been rumored that the unexamined life is not worth living.

Philosophy is an attempt to begin examining life by considering such questions as: What makes us human? What is the world ultimately like? How should we relate to other people? Is there a god? How can we know anything about these questions? Understanding questions of this kind and proposed answers to them is what this course is all about. (Typically Offered: Fall, Spring, Summer)

PHIL 2060: Introduction to Logic and Scientific Reasoning

Credits: 3. Contact Hours: Lecture 3.

Basic principles of critical reasoning and argument evaluation. A consideration of basic forms of argumentation in science and everyday life. Application to contemporary issues and controversies. (Typically Offered: Fall)

PHIL 2070: Introduction to Symbolic Logic

(Cross-listed with LING 2070).

Credits: 3. Contact Hours: Lecture 3.

Introduction to fundamental logical concepts and logical symbolism. Development of natural deduction through first order predicate logic with identity. Applications to arguments in ordinary English and to philosophical issues. Linguistics majors should take LING/PHIL 2070 as early as possible. (Typically Offered: Fall, Spring)

PHIL 2300: Moral Theory and Practice

Credits: 3. Contact Hours: Lecture 3.

Investigation of moral issues in the context of major ethical theories of value and obligation; e.g., punishment, abortion, economic justice, job discrimination, world hunger, and sexual morality. Emphasis on critical reasoning and argument analysis. (Typically Offered: Fall, Spring, Summer)

PHIL 2350: Ethical Issues in a Diverse Society

Credits: 3. Contact Hours: Lecture 3.

This course will examine a range of arguments on diversity issues. Topics will include: the social status of women, the moral status of sexuality and homosexuality, the nature and role of racism in contemporary society, the relationship between biology, gender roles and social status, and various proposals for change from a variety of political perspectives. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

PHYS 1010: Physics for the Nonscientist

Credits: 3. Contact Hours: Lecture 3.

Survey of the principal areas of both classical and modern physics. Emphasis on the nature of the physical universe and the application of physical principles to life in the modern world. (Typically Offered: Fall, Spring, Summer)

PHYS 1150: Physics for the Life Sciences

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Emphasis on basic physics principles applied to biological problems. Topics include mechanics, fluids, thermodynamics, heat, light, sound, electricity and magnetism. A coordinated laboratory, PHYS 1150 laboratory is available. 1.5 yr. HS algebra, 1 yr. HS geometry, 1 semester HS trigonometry recommended. (Typically Offered: Fall, Spring)

PHYS 1310: General Physics I

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

General background in physical concepts, principles, and methods for those who do not plan advanced study in physics or engineering. Mechanics, fluids, heat and thermodynamics, vibrations, waves, sound. 1.5 yr. HS algebra, 1 yr. HS geometry, 1 semester HS trigonometry recommended. (Typically Offered: Fall, Spring, Summer)

PHYS 1310L: General Physics I Laboratory

Credits: 1. Contact Hours: Laboratory 2.

Laboratory experiments in elementary kinematics, work and energy, conservation laws, rotational motion, waves and fluids. 1.5 yr. HS algebra, 1 yr. HS geometry, 1 semester HS trigonometry recommended. (Typically Offered: Fall, Spring, Summer)

PHYS 1320: General Physics II

Credits: 4. Contact Hours: Lecture 3, Discussion 1.

Prereq: PHYS 1310 or PHYS 2310

General background in physical concepts, principles, and methods for those who do not plan advanced study in physics or engineering. Electricity and magnetism, ray and wave optics, topics in modern physics. (Typically Offered: Fall, Spring, Summer)

PHYS 1320L: General Physics II Laboratory

Credits: 1. Contact Hours: Laboratory 2.

Prereq: PHYS 1320

Laboratory experiments in Electricity and Magnetism, Wave and Optics. (Typically Offered: Fall, Spring, Summer)

PHYS 2310: Introduction to Classical Physics I

Credits: 4. Contact Hours: Discussion 1, Lecture 3.

Prereq: MATH 1650; credit or concurrent enrollment in MATH 1660

For engineering and science majors. 3 hours of lecture each week plus 3 recitations every two weeks. Elementary mechanics including kinematics and dynamics of particles, work and energy, linear and angular momentum, conservation laws, rotational motion, oscillations, gravitation. Heat, thermodynamics, kinetic theory of gases; waves and sound. Proficiency in algebra, trigonometry, vector manipulation required. (Typically Offered: Fall, Spring)

PHYS 2310L: Introduction to Classical Physics I Laboratory

Credits: 1. Contact Hours: Laboratory 2.

Prereq: MATH 1650 AND (credit or enrollment in MATH 1660) AND (credit or concurrent enrollment in PHYS 2310 or PHYS 2410)

Laboratory experiments in elementary kinematics, work and energy, conservation laws, and rotational motion. Proficiency in algebra, trigonometry, vector manipulation required. (Typically Offered: Fall, Spring, Summer)

PHYS 2320: Introduction to Classical Physics II

Credits: 4. Contact Hours: Discussion 1, Lecture 3.

Prereq: MATH 1660; PHYS 2310 or PHYS 2410

3 hours of lecture each week plus 1 recitation each week. Fluid dynamics. Electric forces and fields. Electrical currents; DC circuits. Magnetic forces and fields; LR, LC, LCR circuits; Maxwell's equations; wave optics. (Typically Offered: Fall, Spring, Summer)

PHYS 2320L: Introduction to Classical Physics II Laboratory

Credits: 1. Contact Hours: Laboratory 2.

Prereq: MATH 1660 AND (Credit or concurrent enrollment in PHYS 2320 or PHYS 2420)

Laboratory experiments in fluid dynamics, electric forces and fields, electrical currents, DC circuits, magnetic forces and fields, and wave optics. (Typically Offered: Fall, Spring, Summer)

PHYS 2410: Principles and Symmetries in Classical Physics I

Credits: 5. Contact Hours: Lecture 3, Discussion 1.5, Laboratory 1.

Prereq: MATH 1650; credit or concurrent enrollment in MATH 1660

Covers all of mechanics; kinematics and dynamics of particles, work and energy, linear and angular momentum, conservation laws, rotational motion, oscillations, gravitation, and extremum principles. Topics in kinetic theory, thermodynamics, waves and sound. Proficiency in algebra, trigonometry, vector manipulation required. (Typically Offered: Fall)

POLS 1110: Introduction to American Government

Credits: 3. Contact Hours: Lecture 3.

Fundamentals of American democracy; constitutionalism; federalism; rights and duties of citizens; executive, legislative, and judicial branches of government; elections, public opinion, interest groups, and political parties. (Typically Offered: Fall, Spring)

POLS 1210: Introduction to International Politics

Credits: 3. Contact Hours: Lecture 3.

Dynamics of interstate relations pertaining to nationalism, the nation state; peace and war; foreign policy making; the national interest; military capability and strategy; case studies of transnational issues, such as population, food, energy, and terrorism. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

POLS 1250: Democracy and Dictatorship: Introduction to Comparative Politics

Credits: 3. Contact Hours: Lecture 3.

Interactions between governments and citizens in countries outside the US. Causes of democracy, dictatorship, and economic and social development. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

PSYCH 1010: Introduction to Psychology

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Fundamental psychological concepts derived from the application of the scientific method to the study of behavior and mental processes. Applications of psychology. (Typically Offered: Fall, Spring, Summer)

PSYCH 1020: Laboratory in Introductory Psychology

Credits: 1. Contact Hours: Laboratory 2.

Prereq: Credit or concurrent enrollment in PSYCH 1010

Laboratory to accompany 1010. (Typically Offered: Fall, Spring)

PSYCH 1110: Orientation to Psychology

Credits: 1. Contact Hours: Lecture 1.

Program requirements and degree/career options. Required of psychology majors. (Typically Offered: Fall, Spring)

PSYCH 1310: Academic Learning Skills

Credits: 1. Contact Hours: Lecture 1.

Evidence-based approach to learning and applying academic skills such as time management, note-taking, reading, test preparation, goal setting and motivation, and well-being. Hybrid course structured in a team-based learning format. (Typically Offered: Fall, Spring)

PSYCH 2300: Developmental Psychology

Credits: 3. Contact Hours: Lecture 3.

Life-span development of physical traits, cognition, intelligence, language, social and emotional behavior, personality, and adjustment. (Typically Offered: Fall, Spring, Summer)

PSYCH 2500: Psychology of the Workplace

Credits: 3. Contact Hours: Lecture 3.

Survey of theories and research methods of psychology applied to the workplace. Consideration of employee selection, training, performance evaluation, leadership, work groups, employee motivation, job attitudes and behaviors, organizational culture, organizational development, human factors, and job design from the scientist-practitioner approach.

PSYCH 2800: Social Psychology

Credits: 3. Contact Hours: Lecture 3.

Individual human behavior in social contexts. Emphasis on social judgments and decisions, attitudes, perceptions of others, social influence, aggression, stereotypes, and helping. (Typically Offered: Fall, Spring, Summer)

RELIG 2050: World Religions

(Cross-listed with WLC 2050).

Credits: 3. Contact Hours: Lecture 3.

An introduction to religious studies - the academic study of religion.

Religions from around the world will be discussed, including their myths, rituals, beliefs, values, and social forms. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

RELIG 2100: Religion in America

Credits: 3. Contact Hours: Lecture 3.

Introductory study of the major beliefs, practices, and institutions of American Judaism, Catholicism, Protestantism, and Islam with emphasis on the diversity of religion in America, and attention to issues of gender, race, and class. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring, Summer)

RELIG 3320: Catholicism

Credits: 3. Contact Hours: Lecture 3.

An explanation of the beliefs, spirit, and practices of Roman Catholicism, including its understanding of God, sacramentality, the human person, and community, and its relationship to other forms of Christianity and other world religions. (Typically Offered: Fall)

RUS 1010: Introduction to Russian Language and Culture I

Credits: 4. Contact Hours: Lecture 4.

Introduction to the Russian language (focusing on the development of speaking, listening, reading and writing skills) and Russian culture. (Typically Offered: Fall)

RUS 2010: Intermediate Russian I

Credits: 4. Contact Hours: Lecture 4.

Prereq: RUS 1020

Thorough review of grammar and growth of vocabulary. Selected readings. Continued use of the four basic skills. Meets International Perspectives Requirement. (Typically Offered: Fall)

SE 1010: Software Engineering Orientation

Credits: Required. Contact Hours: Lecture 1.

Introduction to the procedures, policies, and resources of Iowa State University and the Software Engineering Program. Offered on a satisfactory-fail basis only.

SE 1850: Problem Solving in Software Engineering

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Credit or concurrent enrollment in MATH 1430 (or satisfactory scores on mathematics placement examinations)

Introduction to software engineering and computer programming. Systematic thinking process for problem solving in the context of software engineering. Group problem solving. Solving software engineering problems and presenting solutions through computer programs, written documents and oral presentations. Introduction to principles of programming, software design, and extensive practice in design, writing, running, debugging, and reasoning about programs. Satisfactory placement scores can be found at: <https://math.iastate.edu/academics/undergraduate/aleks/placement/>. Graduation Restriction: Only one of ENGR 1600, ABE 1600, AERE 1600, BME 1600, CE 1600, CHE 1600, CPRE 1850, EE 1850, IE 1480, ME 1600, and SE 1850 may count towards graduation.

SOC 1150: Orientation to Sociology

Credits: Required. Contact Hours: Lecture 1.

Orientation to sociology. A familiarization with University and LAS College requirements and procedures. Occupational tracks and career options open to sociology; introduction to career planning. Recommended during first semester of freshman year, or as soon as possible after transfer into the department. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

SOC 1340: Introduction to Sociology

Credits: 3. Contact Hours: Lecture 3.

Social interaction and group behavior with emphasis on the scientific study of contemporary U.S. society, including issues relating to socialization, inequality, and changing rural and urban communities. Analysis of relationships among the institutions of family, religion, political participation, work, and leisure. (Typically Offered: Fall, Spring, Summer)

SOC 2190: Families and Intimate Relationships

Credits: 3. Contact Hours: Lecture 3.

Prereq: SOC 1340

Exploration of families and intimate relationships using a sociological perspective, with the goal to help students make informed and intentional choices in their relationships across the life course. Topics covered include family definitions and theories, sexuality, singlehood, dating, cohabitation, marriage, parenting, divorce, stepfamilies, and aging. Relationship quality, communication, conflict, and work-life balance will also be examined, as well as differences in family dynamics by gender, race and ethnicity, and class. (Typically Offered: Fall, Spring)

SOC 2350: Social Problems and American Values

Credits: 3. Contact Hours: Lecture 3.

Prereq: SOC 1340

Sociological concepts, theories and methods to analyze the causes and consequences of social problems. Social problems discussed may include crime, substance abuse, income inequalities, discrimination, poverty, race relations, health care, family issues, and the environment. How American culture and values shape societal conditions, public discourse and policy. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

SPCM 1100: Listening

Credits: 3. Contact Hours: Lecture 3.

Theory, principles, and competency development in comprehensive, therapeutic, critical, consumer, and appreciative listening. The impact of listening in relationships and partnerships. (Typically Offered: Fall, Spring)

SPCM 2120: Fundamentals of Public Speaking

Credits: 3. Contact Hours: Lecture 3.

Theory and practice of basic speech communication principles applied to public speaking. Practice in the preparation and delivery of extemporaneous speeches. (Typically Offered: Fall, Spring, Summer)

SPCM 2160: America Speaks: Great Speakers and Speeches in US History

Credits: 3. Contact Hours: Lecture 3.

Survey of great speeches examined within their political and cultural contexts. Analysis of the rhetorical strategies of diverse speakers with an emphasis on texts from social movements in the United States. Meets U.S. Diversity Requirement.

SPCM 2750: Analysis of Popular Culture Texts

(Cross-listed with ENGL 2750).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or concurrent enrollment in ENGL 2500

Analysis of how information and entertainment forms persuade and manipulate audiences. Study of several forms that may include newspapers, speeches, television, film, advertising, fiction, and magazines. Special attention to verbal and visual devices. (Typically Offered: Fall, Spring)

SPED 2500: Education of the Exceptional Learner

Credits: 3. Contact Hours: Lecture 3.

An overview of students with diverse learning needs, including students with disabilities, English Learners, students who are at risk, and gifted learners. Emphasis is on early identification; educational programming and implications; and legal foundations. Includes Individual Education Programs, Least Restrictive Environment, Functional Behavioral Assessment, and Behavior Intervention Plans. (Typically Offered: Fall, Spring)

SPAN 0970: Accelerated Spanish Review

Credits: 0. Contact Hours: Lecture 3.

For students who require additional review at the first year (1010-1020) level. Course components include a compact review of 1010 and the essential elements of 1020. Course completed with a passing grade fulfills the LAS foreign language requirement. Not recommended for students who wish to continue language at the second year (2010-2020) level without completing 1020. Two years but less than three years of high-school Spanish recommended. (Typically Offered: Fall, Spring, Summer)

SPAN 1010: Elementary Spanish I

Credits: 4. Contact Hours: Lecture 4.

A communicative approach to grammar and vocabulary within the context of Hispanic culture. For students whose native language is not Spanish. (Typically Offered: Fall, Summer)

SPAN 1020: Elementary Spanish II

Credits: 4. Contact Hours: Lecture 4.

Prereq: SPAN 1010 or SPAN 0970 or placement by departmental exam

Continuation of Spanish 1010. A communicative approach to grammar and vocabulary within the context of Hispanic culture. For students whose native language is not Spanish. Meets International Perspectives Requirement. (Typically Offered: Spring, Summer)

SPAN 2010: Intermediate Spanish I

Credits: 4. Contact Hours: Lecture 4.

Prereq: SPAN 1020 or placement by departmental exam

Intensive review of basic grammar and conversation. For students whose native language is not Spanish. Practice in oral and written communication. Development of fluency with idiomatic expressions. Selected readings on culture and literature. Meets International Perspectives Requirement. (Typically Offered: Fall)

SPAN 2970: Intensive Intermediate Spanish

Credits: 4. Contact Hours: Lecture 4.

Prereq: SPAN 2010 or placement by departmental exam

Bridge course between 2000- and 3000-level Spanish courses that focuses on application of advanced grammatical concepts within the context of Hispanic culture. Accelerated review of SPAN 2010 and SPAN 2020 designed for students who want to continue at the 3000 level. Taught in Spanish for students whose native language is not Spanish. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

STAT 1010: Principles of Statistics

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Statistical concepts in modern society; descriptive statistics and graphical displays of data; the normal distribution; data collection (sampling and designing experiments); elementary probability; elements of statistical inference; estimation and hypothesis testing; linear regression and correlation; contingency tables. 1 1/2 years of high school algebra required. Graduation Restriction: Credit for only one of the following courses may be applied toward graduation: STAT 1010, STAT 1040, STAT 1050, STAT 2010, or STAT 2260. (Typically Offered: Fall, Spring, Summer)

STAT 1040: Introduction to Statistics

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Statistical concepts and their use in science; collecting, organizing and drawing conclusions from data; elementary probability; binomial and normal distributions; regression; estimation and hypothesis testing. For students in the agricultural and biological sciences. 1 1/2 years of high school algebra required. Graduation Restriction: Credit for only one of the following courses may be applied toward graduation: STAT 1010, STAT 1040, STAT 1050, STAT 2010, or STAT 2260. (Typically Offered: Fall, Spring, Summer)

THTRE 1060: Introduction to the Performing Arts

Credits: 3. Contact Hours: Lecture 3.

An audience oriented, broad-based, survey of the performing arts which emphasizes theatre and includes segments on television, radio and podcasts, film, dance, music, and video games. (Typically Offered: Fall, Spring)

THTRE 1100: Theatre and Society

Credits: 3. Contact Hours: Lecture 3.

An introduction to Theatre focusing on its relationship with society throughout history. (Typically Offered: Fall, Spring)

THTRE 2510: Acting Foundations

Credits: 3. Contact Hours: Lecture 3.

Theory and practice in fundamentals of acting. (Typically Offered: Fall, Spring)

TSM 1150: Solving Technology Problems

Credits: 3.

Prereq: Credit or enrollment for credit in MATH 1400 or higher

Solving technology problems using modern hardware and software tools for data-driven solutions. Problem solving cycle, unit conversion, unit factor method, SI and engineering units, significant figures, data collecting and cleaning, error analysis, data visualization, curve fitting, and computer coding fundamentals (data types, flow control, I/O handling, visualization, debugging). Strong emphasis on critical thinking, systematic problem solving, and effective communication. (Typically Offered: Fall, Spring)

TSM 1160: Introduction to Design in Technology

Credits: 3.

Use of parametric solid modeling software to create three dimensional solid models and document parts and assemblies. Includes national and international standards for documentation, design projects, and teamwork. Rapid prototyping design creation, 3D printing, assemblies, rendering, and detailing technical drawings. (Typically Offered: Fall, Spring)

USLS 2110: Introduction to U.S. Latino/a Studies

Credits: 3. Contact Hours: Lecture 3.

History and current lives of the Latino/a peoples in the United States, including Mexican, Cuban, Puerto Rican, Dominican, and South and Central Americans, as well as information specific to Iowa Latino/as, will be covered. Through readings, class discussions, writing assignments, and guest speakers, students will acquire accurate information and a solid understanding of the US Latino/a population and cultural perspectives. Elements of Latino/a culture to be covered include historical, sociological, educational, psychological, economic, and political facets. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

WGS 1600: Gender Justice

Credits: 1. Contact Hours: Lecture 0.5, Discussion 0.5.

Half semester course. Examines the socialization process in the United States and how our perspectives are formed. An introduction to patriarchy, sexism, and ally development are explored. Skills to enhance communication and understanding among women and men will be developed. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

WGS 2010: Introduction to Women's and Gender Studies

Credits: 3. Contact Hours: Lecture 3.

Introduction to the interdisciplinary field of Women's and Gender Studies. Contemporary status of women in the U.S. and worldwide from social, economic, historical, political, philosophical and literary perspectives. Analysis of intersection of gender, race, class, and sexuality. Subject matter includes work, health, sexuality, and violence. Foundation for the other courses in the program. Meets U.S. Diversity Requirement.

WFS 2780: Introduction to Global Film

Credits: 3. Contact Hours: Lecture 3.

Introduction to the cinema of non-English speaking regions and cultures of the world through representative subtitled films, lectures, and readings. Topics vary according to faculty interest. Emphasis on selected national cinemas and film as a mode of cultural expression as well as on diverse cultural contexts of cinema. Meets International Perspectives Requirement. (Typically Offered: Fall)

Credits

The academic value of each course is stated in semester credits.

Each credit is normally earned by attending one (50-minute) hour of lecture or recitation per week for the entire semester, or by attending a laboratory or studio period of two or three hours per week. As a guideline, undergraduate students typically will be expected to spend two hours in preparation outside of class for each lecture or recitation hour; additional outside work may be required for laboratory or studio classes.

Contact Hours

Each course states the number of semester credits assigned to the course, preceded in parentheses by the number of hours in class (contact hours) expected of the student. The first of the two contact-hour numbers indicates the number of lecture or recitation class hours per week for the semester. The second is the number of laboratory or studio hours required per week. Laboratory and studio hours may include some time devoted to lectures and recitations. For example, COMS 2270 Introduction to Object-oriented Programming is listed as (3-2) Cr. 4. In that case, the course is 4 semester credits, 3 hours of lecture and two hours of laboratory each week.

Semester Offering

The expected term a course is to be offered is indicated by the abbreviations F (Fall) S (Spring) SS (Summer). The notations are for planning purposes and *do not* guarantee a course will be offered in a particular term. Always check the Schedule of Classes (<http://classes.iastate.edu>) for availability and specific offering times.

PLAN OF STUDY - SOAR IN 4

Four Year Graduation Guarantee

Iowa State University's Soar in 4: Four-Year Graduation Guarantee provides the opportunity for students to take a proactive approach towards completing their undergraduate degree in four years (or eight semesters). Through careful planning with their academic advisors, students can complement their undergraduate degree with experiences such as study abroad, internship, and service learning. By graduating in four years, students can reduce their tuition costs and accelerate their entry into the job market or advanced education compared to students who take more than eight semesters to graduate. The program encourages students to work collaboratively with their academic advisor to make strategic academic decisions about which courses to take each semester.

Students wanting to graduate in four years under the Soar in 4: Four-Year Graduation Guarantee are expected to:

- Keep in close contact with their Iowa State academic advisor, who will guide students' academic decisions and keep students up-to-date with university policies and procedures.
- Take required courses at the times they are available.
- Maintain student registration at ISU during off-campus experiences.
- Register for classes promptly and monitor academic progress on a regular basis by reviewing the degree audit with their advisor.

Iowa State University will provide the academic advising services and degree-audit mechanisms to assist students in accurately monitoring progress toward graduation. ISU is also responsible for providing class space in the courses required for the student's respective major in order to complete a bachelor's degree within eight consecutive semesters.

Additional information about the Four-Year Graduation Guarantee can be found at:

<http://www.provost.iastate.edu/academic-programs/soarin4> (<http://www.provost.iastate.edu/academic-programs/soarin4/>)

Four-year (eight-semester) templates for ISU programs of study

Iowa State University offers over 100 majors in six undergraduate colleges. All but two programs, architecture and landscape architecture, may be completed in four years. ISU's bachelor degree programs require from 120 to 144 credits; therefore, students must average between 15 and 18 credits per semester. To assist students in creating their own personal four-year academic plans, eight-semester templates are provided for all programs of studies covered by the Soar in 4 program.

- Agricultural and Life Sciences Education, B.S. - communications option
- Agricultural and Life Sciences Education, B.S. - teacher certification option
- Agricultural and Rural Policy Studies, B.S.
- Agricultural Business, B.S.
- Agricultural Studies, B.S.
- Agricultural Systems Technology, B.S. - Agricultural and Biosystems Management option
- Agricultural Systems Technology, B.S. - Machine Systems option
- Agronomy, B.S.
- Animal Ecology, B.S. - fisheries and aquatic sciences
- Animal Ecology, B.S. - interpretation of natural resources option
- Animal Ecology, B.S. - Pre-vet & wildlife care option
- Animal Ecology, B.S. - wildlife option
- Animal Science, B.S.
- Animal Science, B.S. - pre-veterinary medicine
- Biochemistry, B.S. - option 1
- Biochemistry, B.S. - option 2
- Biology, B.S.
- Culinary Food Science, B.S.

UNDERGRADUATE MAJORS, CERTIFICATES, MINORS, PRE-PROFESSIONAL STUDY

ACADEMIC PROGRAM DEFINITIONS

- **Program** - Administrative infrastructure supporting the curriculum.
- **Curriculum** - The requirements for a major, certificate, or minor.
- **Major** - Subject area of study that results in a named baccalaureate, masters, or doctoral degree upon completion of a set of requirements. A major appears on the academic transcript.
- **Secondary major** - A major that can only be earned concurrent with a primary major. A secondary major appears on the academic transcript.
- **Option** - Credits within an undergraduate major in which students choose coursework focused on a subset of the subject area of study. The remainder of the degree requirements are common to all students in the major. Options have also been called specializations, tracks, emphasis areas, focus areas, etc. An option does not appear on the academic transcript.
- **Certificate** - An academic credential in a focused area of study. A certificate appears on the academic transcript and may be earned concurrent with a degree or on its own.
- **Minor** - An academic area of emphasis that is in addition to a major. A minor appears on the academic transcript and must be earned concurrent with a degree.

UNIVERSITY REQUIREMENTS

Undergraduate Degree Requirements

Iowa State University offers a wide variety of undergraduate majors housed in six colleges. The requirements for all majors include the following university-wide requirements for graduation:

- Communication Proficiency
- U.S. Diversity
- International Perspectives
- LIB 1600 Introduction to College Level Research
- Minimum of 120-semester credits
- Cumulative grade point average of at least 2.00 in all coursework taken at ISU

See Degree Planning for university-wide requirements for the bachelor's degree.

COLLEGES

- College of Agriculture and Life Sciences
- Ivy College of Business

- College of Design
- College of Engineering
- College of Human Sciences
- College of Liberal Arts and Sciences

The College of Veterinary Medicine offers the Doctor of Veterinary Medicine degree.

For a listing of the majors offered by the Graduate College, see the Graduate Programs list in this catalog.

UNDERGRADUATE MAJORS

See Degree Planning for university-wide requirements for the bachelor's degree.

Major - Subject area of study that results in a named baccalaureate, masters, or doctoral degree upon completion of a set of requirements. A major appears on the academic transcript.

Secondary major - A major that can only be earned in conjunction with a primary major. A secondary major appears on the academic transcript.

Option - Credits within an undergraduate major in which students choose coursework focused on a subset of the subject area of study. The remainder of the degree requirements are common to all students in the major. Options have also been called specializations, tracks, emphasis areas, focus areas, etc. An option does not appear on the academic transcript.

Undergraduate Secondary Majors

See Degree Planning for university-wide requirements for the bachelor's degree.

Secondary major - A major that can only be earned in conjunction with a primary major. A secondary major appears on the academic transcript.

- Education Secondary
- Environmental Studies

- Interdisciplinary Design
- International Agriculture
- International Business
- International Studies
- Seed Science

UNDERGRADUATE CERTIFICATES

See Degree Planning for university-wide requirements for an undergraduate certificate.

Certificate - An academic credential in a focused area of study. A certificate appears on the academic transcript and may be earned concurrently with a degree or on its own.

- Actuarial Science
- Beef Cattle Production Management
- Computing Applications
- Dairy Cattle Production Management
- Data Science
- Equine Science and Management
- Health Coach
- Integrated Studio Arts
- Latin American Studies
- Leadership Studies
- Merchandising (^)
- Occupational Safety
- Poultry Production Management
- Professional Sales
- Science Communication
- Soil Science (^)
- Swine Production Management

Certificates may be earned at the same time as an ISU baccalaureate degree or after the completion of a baccalaureate degree from any accredited institution. Those marked with a (^) may also be earned after the completion of an associate of arts (AA) or associate of science (AS) degree from any accredited institution.

Iowa State University also offers certificates from the Graduate College.

UNDERGRADUATE MINORS

See Degree Planning for university-wide requirements for an undergraduate minor.

Minor - An academic area of emphasis that is in addition to a major. A minor appears on the academic transcript and must be earned in conjunction with a degree.

- Accounting
- Advertising

PRE-PROFESSIONAL STUDY

Requirements for admission to most professional academic programs can be met by study at Iowa State University. Pre-professional programs such as pre-law or pre-med are not degree-granting majors, but rather

tracks for students who plan to attend professional school (e.g., dental, medical, optometry, physical therapy, law, or veterinary medicine) after their undergraduate studies. Students can major in any field, and they will work with an advisor who helps with course sequencing and academic preparation for application to professional schools.

For more details, explore the pre-professional section of the catalog and explore the links below.

Tracks

- Pre-Health & Pre-Medicine (<https://pre-health.las.iastate.edu/>)
 - Dentistry (<https://pre-health.las.iastate.edu/health-professions/dentistry/>)
 - Human Medicine (<https://pre-health.las.iastate.edu/health-professions/human-medicine/>)
 - Optometry (<https://pre-health.las.iastate.edu/health-professions/optometry/>)
 - Pharmacy (<https://pre-health.las.iastate.edu/health-professions/pharmacy/>)
 - Physical Therapy (<https://pre-health.las.iastate.edu/health-professions/physical-therapy/>)
 - Physician Assistant (<https://pre-health.las.iastate.edu/health-professions/physicians-assistant/>)
- Pre-Law
- Pre-Veterinary Medicine

Pre-professional Study

Pre-professional Study

Iowa State University is a great place to prepare for careers that require professional school training, such as medical school, law school or veterinary school. Requirements for admission to most professional academic programs can be met during your studies at Iowa State University. The specific courses taken in a pre-professional program will depend primarily upon the admission requirements of the professional schools to which a student wants to apply.

In some programs where professional schools require only three years of pre-professional work, a student may, by careful planning, complete requirements for the bachelor's degree upon transferring to Iowa State up to 32 semester credits of professional coursework. Generally, these reverse transfer credits will be counted as electives, but a maximum of 24 may be used to apply to a major in Interdisciplinary Studies and a smaller number may be used to meet requirements in other majors as approved by the faculty.

All students, whether they have selected a major or not, are encouraged to identify their interest in a professional career by designating it on their application to the university. Students who have not decided on a

major can enter Iowa State as pre-professional students, selecting pre-medical, pre-law, pre-professional health (PHP), Open Option, or General Undergraduate Studies Pre-Veterinary Medicine (GENPV), until they choose a major or transfer to a professional school.

Information about pre-professional program admissions requirements and career opportunities in human health or law is available in the Liberal Arts and Sciences Advising Center. Information about veterinary medicine admissions requirements and career opportunities is available from the coordinator of the pre-veterinary program in the Office of the Dean of the College of Veterinary Medicine.

Pre-Health & pre-medical Advising

[Iowa State University is a great place to prepare for careers in health and medicine. As a major research university with an exceptional student experience, we're excited to help you create a competitive application for medical or professional school.](#) Whether you are aiming for a career in human medicine, dentistry, occupational health, physical therapy, pharmacy, optometry, health information management, dietetics, hospital and health administration, medical technology, clinical lab sciences, or many others, you can find the classes and experiences you need to be prepared for the next steps in your professional training. Learn more on the Pre-health and Pre-medical Professions Advising (<https://pre-health.las.iastate.edu/>) website.

PRE-Law Preparation

A student planning to enter law school may pursue an undergraduate degree in any discipline. The choice of the bachelor's degree should reflect a student's passion and personal interests rather than be limited by a belief that law schools require a specific major. Students should

complete courses that will enhance their strengths in critical thinking, analytical writing, research and oral communication. Courses from a broad range of disciplines will provide students with the knowledge base and skills to support their preparation for law school. Courses might include accounting, criminal justice, economics, English literature, history, management, mathematics, political science, psychology, philosophy and statistics. Advanced writing courses and speech communication courses will also serve students well. The American Bar Association (https://www.americanbar.org/groups/legal_education/resources/pre_law/) advises students that "taking a broad range of difficult courses from demanding instructors is excellent preparation for legal education." The College of Liberal Arts and Sciences participates in a 3+3 program with the Law Schools at Drake University and at the University of Iowa. Visit the Liberal Arts and Sciences Student Academic Services office for details about the 3+3 program and pre-law club, and to explore your pathway to law school.

Learn more on the Pre-Law Advising (<https://pre-law.las.iastate.edu/>) website.

Pre-Veterinary Medicine

Deanna Gerber (futuredvm@iastate.edu)

About 75% of all veterinarians are engaged in private practice. In a mixed practice, they diagnose and treat health problems among a variety of animals. Others specialize in one species (e.g., feline, pet bird) and still others specialize in a specific discipline within veterinary medicine (e.g., cardiology, ophthalmology). Veterinarians may also choose public and corporate practice (e.g., public health, education, research, food safety, industry, laboratory animal medicine, aquatic animal medicine, poultry medicine, and military veterinary medicine).

The professional program requires four years at a college of veterinary medicine and leads to the doctor of veterinary medicine degree (D.V.M.). Admission to a veterinary college involves at least two years of preprofessional college education. Candidates must take courses in biology, chemistry, genetics, physics, English, humanities, social sciences, speech, anatomy and physiology, and biochemistry. (For Iowa State University see Pre-Veterinary Medicine Preparation in the Veterinary Medicine section of the catalog; for the most current information regarding applications and admission to the College of Veterinary Medicine, please refer to the College website at www.vetmed.iastate.edu/ (<http://www.vetmed.iastate.edu/>).)

Students may pursue their pre-veterinary preparation in any college at Iowa State University. A major (pre-veterinary medicine is not a major) should be selected that is allied to each student's vocational interests in veterinary medicine or that otherwise offers vocational satisfaction in the event that plans for entry into the College of Veterinary Medicine change. Students are encouraged to pursue a bachelor's degree; the most

effective progress toward a bachelor's degree is made when a major is selected upon entry and no change occurs before graduation. However, students who have not even considered a career other than veterinary medicine may need some time to explore possibilities before selection of a major.

To assist students who have indicated interest in the pre-veterinary program for the College of Veterinary Medicine and are undecided about a major, an advising category is available known as GENPV (General Undergraduate Studies Pre Vet). Orientation and advising services for these students are designed to help students fulfill pre-veterinary course requirements, to introduce available majors and careers allied to veterinary medicine, and to introduce career options in veterinary medicine. GENPV students must select a major by the end of their second semester. Some Iowa State University majors allow, by careful planning, the opportunity for a student to earn the bachelor's degree by combining credits from three years of preprofessional study and one year of professional study in the College of Veterinary Medicine.

COLLEGE OF AGRICULTURE AND LIFE SCIENCES

Daniel Robison, Endowed Dean
David Acker, Associate Dean, Global Engagements
Carmen Bain, Associate Dean, Academic Innovation
Theressa Cooper, Assistant Dean, Diversity
Jay Harmon, Associate Dean, Extension Programs and Outreach
Carolyn Lawrence-Dill, Associate Dean, Research and Discovery
Ruth MacDonald, Associate Dean, Personnel and Finance
Howard Tyler, Assistant Dean, Undergraduate and Graduate Student Services and Success

www.cals.iastate.edu (<http://www.cals.iastate.edu>)

Students enrolled in the College of Agriculture and Life Sciences receive a broad-based education that includes: communications, biological, physical, and social sciences, humanities, and technical subject matter.

Graduates of the College are prepared for diverse career opportunities because of the well-balanced education they have received. Opportunities for graduates of the College of Agriculture and Life Sciences includes: agribusiness and industry, production agriculture, biological and environmental sciences, value-added processing, natural resource management, rural development, public agencies, education, animal and human health professions, graduate studies and professional schools.

Advising

Each student in the College of Agriculture and Life Sciences works closely with an academic advisor who is associated with the major in which the student is enrolled.

The advisors assist students in making personal adjustments to university life, offer suggestions on academic and co-curricular choices, and provide information on career choices. Advisors make a special effort to adjust course schedules in accordance with students’ interests and capabilities.

All entering students are strongly encouraged to participate in the summer orientation program in which they will have the opportunity to meet and work with academic advisors in planning their first semester schedule of classes.

A student may wish to prepare for admission to a professional program such as law, medicine, or veterinary medicine while pursuing a Bachelor of Science degree in the College of Agriculture and Life Sciences. This may be accomplished through several majors; however, it is recommended that the student work closely with an academic advisor.

Degree Requirements for all CALS Majors

All undergraduate majors in the College of Agriculture and Life Sciences (CALS) lead to a Bachelor of Science degree.

High School Preparation

Requirements for students entering from high school or transferring with less than 24 college credits into the College of Agriculture and Life Sciences include four years of English; three years of mathematics which must include one year each of algebra, geometry, and advanced algebra; three years of science which must include one year each of Biology and chemistry, or Biology and physics, or chemistry and physics; and two years of social studies. No foreign language is required for admission to the College of Agriculture and Life Sciences.

College Requirements

To graduate with a degree from the College of Agriculture and Life Sciences a student must complete, while at Iowa State University, a minimum of 18 credits from the College’s departmental offerings, program offerings, and cross-listed program offerings. Twelve or more of those 18 credits must be 3000-level or above. Some majors within the College may have more restrictive requirements.

Each major has specific degree requirements for graduation based on the major and college student learning outcomes. College of Agriculture and Life Sciences course requirements for the four areas listed below provide the foundation for successful achievement of both major and college student learning outcomes.

The College of Agriculture and Life Sciences course requirements for all majors are:

Interpersonal and public communication skills 10 credits

- 6 credits of English composition with grades of C or better
- 3 credits of speech fundamentals with grades of C or better
- 1 credit of LIB 1600 Introduction to College Level Research

Mathematical, physical, and life sciences from college-approved lists 17 credits

- 3 credits of mathematics
- 3 credits of statistics
- 5 credits of physical science (e.g., chemistry, geological and atmospheric sciences, physics)
- 6 credits of life sciences including BIOL 1010 Introductory Biology, or BIOL 2110 Principles of Biology I, or BIOL 2120 Principles of Biology II, or BIOL 2510 Biological Processes in the Environment and 3 additional credits of life sciences

Personal development from approved lists 15 credits

3 credits of ethics (college list)

3 credits of humanities (college list)

3 credits of social sciences (college list)

3 credits of U.S. diversity (university list)

3 credits of international perspectives (university list)

Students pursuing a primary major in another college and taking a second major in the College of Agriculture and Life Sciences must fulfill the core course requirements of the College of Agriculture and Life Sciences, and all the requirements of the second major.

Student Learning Outcomes

All students graduating with majors within the College of Agriculture and Life Sciences are expected to be able to do the following (college-level outcomes) at the time of graduation:

Communications

- Speak and write clearly and persuasively.
- Prepare effective visual and electronic forms of communication.

Problem-Solving/Critical Thinking

- Apply a holistic approach to identify and solve complex problems.
- Distinguish verifiable facts from value claims.
- Identify assumptions and detect bias.
- Distinguish relevant from irrelevant information.
- Establish priorities and courses of action.
- Summarize, analyze, and interpret research data and/or policy issues.

Leadership and Teamwork

- Organize, facilitate, and participate effectively in a group or team.
- Define a problem or opportunity and implement an action planning process.
- Work towards a goal and justify actions taken.

Creativity, Innovation and Entrepreneurship

- Demonstrate innovativeness and creativity.
- Identify and pursue opportunities that produce value.
- Identify resources to manage risk to facilitate change.

Ethics

- Define and assess their ethical perspective, moral responsibility, and values.
- Identify and critically evaluate contemporary ethical and moral issues in professional and private life.

Environmental Awareness

- Explain physical interactions within ecosystems.
- Explain biological interactions within ecosystems.

- Explain how human activities impact the environment.
- Explain how societies are affected by environmental change.

Diversity and Global Citizenship (University Outcomes)

- Through completion of the U.S. Diversity requirement, should achieve at least three of the following learning outcomes:
 - Identify the experiences and contributions of underrepresented or marginalized groups and how they have shaped the history and culture of the United States.
 - Understand the analytical concepts of culture, ethnicity, race, gender, sexuality and/or religion and be able to apply these concepts to an analysis of the United States.
 - Analyze systemic oppression and personal prejudice and their impact on marginalized communities and the broad U.S. society; and
 - Evaluate important aspects of diversity, equity and inclusion so they can live, work and collaborate with others in the 21st century United States.
- Through completion of the International Perspectives requirements, students should achieve two of the following learning outcomes:
 - Analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview.
 - Describe and analyze how cultures and societies around the world are formed, are sustained, and evolve.
 - Analyze and evaluate the influence of global issues in their own lives.
 - Describe the values and perspectives of cultures other than their own and discuss how they influence individuals' perceptions of global issues and/or events; and
 - Communicate competently in a second language.

Information Literacy

- Demonstrate proficient acquisition and use of information relevant to their fields of study.

In addition to the College level learning outcomes, each major within the college has additional discipline-specific outcomes that apply to graduates of that major.

Electives

Students use electives in addition to degree requirements to broaden their education or to strengthen an area of specialization. Electives may be used to meet the requirements for multiple majors (see statement on multiple majors in this catalog).

Other Requirements

- Those who wish to change their major, or who decide to graduate with multiple majors, must be enrolled for the last two semesters in the major in which they expect to graduate.
- Students in ROTC may apply ROTC credits toward elective requirements. No more than 9 credits of 4900 coursework from any Iowa State University major may be applied toward graduation, although some individual majors may establish a more restrictive use of 4900 credits toward fulfillment of graduation requirements.

Graduate Study

Graduate study in agriculture and life sciences is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Various departments in the College of Agriculture and Life Sciences also participate in the following graduate-level interdepartmental offerings:

- Ecology and Evolutionary Biology
- Environmental Science
- Genetics and Genomics
- Immunobiology
- Microbiology
- Molecular, Cellular, and Developmental Biology
- Neuroscience
- Nutritional Sciences
- Plant Biology
- Seed Technology and Business
- Sustainable Agriculture
- Technology and Social Change (interdepartmental minor)
- Toxicology

Departments in the College

Departments are the administrative units that offer undergraduate and graduate majors, minors and certificates in addition to their efforts in research, outreach and service. These are the departments in the College of Agriculture and Life Sciences:

- Agricultural and Biosystems Engineering (joint with the College of Engineering)
- Agricultural Education and Studies
- Agronomy
- Animal Science
- Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology (joint with the College of Liberal Arts and Sciences)
- Ecology, Evolution, and Organismal Biology (joint with the College of Liberal Arts and Sciences)

- Economics (joint with the College of Liberal Arts and Sciences)
- Food Science and Human Nutrition (joint with the College of Human Sciences)
- Genetics, Development and Cell Biology (joint with the College of Liberal Arts and Sciences)
- Horticulture
- Natural Resource Ecology and Management
- Plant Pathology, Entomology and Microbiology
- Sociology and Criminal Justice (joint with the College of Liberal Arts and Sciences)
- Statistics (joint with the College of Liberal Arts and Sciences)

Undergraduate Majors, Minors and Certificates

An undergraduate major is a subject area of study that results in a named baccalaureate degree upon completion of a set of requirements. All majors in the College of Agriculture and Life Sciences result in a Bachelor of Science degree.

A student has many majors from which to choose. Each major is unique although some courses are common across majors in the first two years. This is helpful to students in that they may transfer from one major to another before the second year with little loss of credits.

Options within a major further define some majors and specify certain required coursework. All majors are designed to help students achieve the learning outcomes and succeed in their chosen professions.

Primary Majors

Agricultural Business
 Agricultural Communication
 Agricultural and Life Sciences Education
 Agricultural and Rural Policy Studies
 Agricultural Studies
 Agricultural Systems Technology
 Agronomy
 Animal Ecology
 Animal Science
 Biochemistry
 Biology
 Culinary Food Science
 Dairy Science
 Diet and Exercise
 Dietetics
 Environmental Science
 Food Science
 Forestry
 Genetics

Global Resource Systems
Horticulture
Industrial Technology
Microbiology
Nursing
Nutritional Science

Secondary Majors*

Environmental Studies
International Agriculture
Seed Science

*A secondary major must be taken in conjunction with a primary major.

Minors

An undergraduate minor is an academic area of emphasis in addition to a major consisting of at least 15 credits. It must be earned concurrent with a major.

Agricultural Business
Agricultural and Life Sciences Education
Agricultural Systems Technology
Agronomy
Animal Ecology
Animal Science
Biochemistry
Biology
Culinary Food Science
Entrepreneurial Studies*
Environmental Studies
Feed Technology*
Food and Society
Food Safety*
Food Science
Forestry
Genetics
Global Health*
Horticulture
Industrial Technology
Insect Science
International Agriculture
Landscape Management
Learning and Leadership Sciences*
Meat Science
Microbiology
Nutrition
Sustainability*

*The College of Agriculture and Life Sciences participates in these interdepartmental minors.

Certificates

An undergraduate certificate is an academic credential in a focused area of study consisting of at least 20 credits. It may be earned concurrent with a major or on its own.

Beef Cattle Production Management
Dairy Cattle Production Management
Equine Science and Management
Poultry Production Management
Swine Production Management
Occupational Safety

Special Programs

Agriculture Exploration

Agriculture Exploration is a starting place for students who wish to pursue careers in the life sciences, food science, natural resources, production agriculture, business, or communications but who are unsure of which majors to choose. Students entering this program will be advised in the College of Agriculture and Life Sciences Student Services Office until they select their majors.

Pre-Veterinary Medicine

Students in the College of Agriculture and Life Sciences may complete the requirements for admission to the College of Veterinary Medicine by enrolling in any major within the college. Because a solid foundation in the sciences is basic to the program in veterinary medicine, those majors that emphasize the sciences are usually more compatible with veterinary medicine.

New students direct from high school who are undecided about choice of major may enroll as a general pre-veterinary studies (Gen PV) student. These students will also enroll in an orientation course, which describes the various college majors. By the end of their first semester, a Gen PV student must select a major. Transfer students, however, must select a major prior to enrolling in their first semester classes.

Enrollment as a Gen PV student does not guarantee admission into the College of Veterinary Medicine (veterinary school). See the College of Veterinary Medicine section of this catalog for specific admissions requirements.

Students accepted into the College of Veterinary Medicine without a Bachelor of Science degree have an opportunity, with careful planning, to complete the requirements for a Bachelor of Science degree in an individual curriculum within the College of Agriculture and Life Sciences after admission into the College of Veterinary Medicine. This may be done by completing the prescribed course of study established by an

individual major. Students also may meet degree requirements of an individual major through the College of Agriculture and Life Sciences Honors Program. Further details are available from an academic advisor or from members of the College of Agriculture and Life Sciences Honors Committee.

Honors Program

The College of Agriculture and Life Sciences Honors Program provides an opportunity for students of high ability to maximize their educational experience by individualizing their program of study. (See statement on Honors Program in the Colleges and Curricula section of this catalog). For more information, contact the chair of the College of Agriculture and Life Sciences Honors Committee, or a department Honors contact person.

Off-Campus Programs

Online courses, certificates, and graduate programs (<https://www.agonline.iastate.edu>) from the College of Agriculture and Life Sciences are designed for working professionals and recent graduates alike giving students anywhere in the world the opportunity to enhance their careers and advancing in their profession. Students learn from the same faculty and in the same classes as our resident students. Start your adventure with one of our online certificates or programs to advance your career.

Master's Programs: Agricultural Education, Agronomy, Plant Breeding, Seed Technology and Business

Graduate Certificates: Agronomy, Biochemistry, Food Safety and Defense, Meat Science, Seed Science and Technology, Seed Business Management

Undergraduate B.S.: Agricultural Studies Hybrid Online/Campus

Undergraduate Certificates: Swine Science, Occupational Safety

Study Abroad and International Travel Opportunities

Agriculture and life sciences are part of a highly interconnected global system; decisions made in one sector have profound impacts worldwide. It is important for students to develop an understanding and appreciation for the global system and the role that U.S. agriculture plays in providing a safe and predictable food supply for a growing world population. The College of Agriculture and Life Sciences provides study abroad and international internship opportunities on all seven continents. Students can enroll in CALS travel courses, spend a semester or more at a partner university abroad or develop an independent academic opportunity like research, service learning or working abroad. Travel ranges from two weeks to a year and students travel to over 30 countries annually. For additional information, contact the Office of Global Programs in the College of Agriculture and Life Sciences (<https://www.agstudyabroad.iastate.edu>).

Internships and Cooperative Education Programs

Practical work experience can provide a unique learning opportunity that complements academic coursework. This experience is provided through internships or cooperative education programs. For additional information, contact a departmental advisor or internship coordinator.

Agricultural and Life Sciences Education OVERVIEW

Administered by the Department of Agricultural Education and Studies

For undergraduate curricula in agricultural and life sciences education, agricultural communications, and agricultural studies, leading to the degree of Bachelor of Science, see College of Agriculture and Life Sciences, Curricula.

The department offers three curricula for students desiring to enter careers in agriculture and related fields. These curricula are agricultural communication, agricultural and life sciences education and agricultural studies. The agricultural communication curriculum prepares graduates to communicate about agricultural science with diverse audiences within and outside the agricultural sector locally, nationally, and globally, using various communication channels and tools. The agricultural and life sciences education curriculum prepares persons for careers as agricultural education instructors, and educational specialists for industry, nonprofit organizations, and governmental agencies. The agricultural studies curriculum has two options, production and management and multidisciplinary. Graduates are prepared for careers in production agriculture and agricultural industry. Graduates of all three curricula accept positions in agricultural business, industry, agencies, and production agriculture.

Student Learning Outcomes

Graduates will have a broad base of agricultural knowledge, and will be skilled in decision-making, planning, organizing, presenting, and evaluating information. Through the successful completion of the required coursework, active participation in clubs and organizations, and the acquisition of technical skills and experiences associated with work experiences, internships, and international travel, graduates of our baccalaureate programs meet the university, college, and departmental outcomes in the following nine areas:

1. Professional, interpersonal, and cross-cultural communications
2. Problem solving and critical thinking
3. Leadership
4. Entrepreneurship
5. Life-long learning
6. Ethics

7. Environmental awareness
8. U.S. diversity
9. International perspectives.

More information regarding the departmental learning outcomes can be found at www.ageds.iastate.edu/. (<http://www.ageds.iastate.edu/>)

Curriculum in Agricultural and Life Sciences Education

Administered by the Department of Agricultural Education and Studies. Students majoring in Agricultural and Life Sciences Education may lead to teacher licensure.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA. Teacher certification requires 2.5 GPA at particular points in the program of study, and a minimum grade of C- in selected courses.

University Requirements:

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
International Perspectives		3
LIB 1600	Introduction to College Level Research	1
US Diversity		3
Total Credits		13

CALS Requirements: Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

AGEDS 3110	Presentation and Sales Strategies for Agricultural Audiences	3
American History Elective		3
BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
BIOL 2120	Principles of Biology II	3
BIOL 2120L	Principles of Biology Laboratory II	1
CHEM 1630	College Chemistry	4
CHEM 1630L	Laboratory in College Chemistry	1
ECON 1010	Principles of Microeconomics	3
Ethics Elective from Approved List		3
MATH 1400	College Algebra	3
STAT 1040	Introduction to Statistics	3

Major Specific Requirements - Agricultural Sciences and Economics (C- or higher required)

ACCT 2840	Financial Accounting	3
Ag Elective From Approved List		3
AGEDS 3150	Personal, Professional, and Entrepreneurial Leadership in Agriculture	3
AGEDS 4880	Methods of Teaching Agricultural Mechanics	3
AGRON 1810	Introduction to Crop Science	3
AGRON 1820	Introduction to Soil Science	3
ANS 1010	Working with Animals	2
ANS 1140	Survey of the Animal Industry	2
HORT 2210	Principles of Horticulture Science	3
ECON 2300	Farm Business Management	3
NREM 1200	Introduction to Renewable Resources	3
AGEDS 3880	Agricultural Mechanics Applications	3
Total Credits		34

Major Specific Requirements - Professional Credits (C or higher required):

AGEDS 1100	Professional Development in Agricultural Education and Studies: New Student Seminar	1
AGEDS 2110A	High School Agriculture Programs	1
AGEDS 3100	Foundations of Agricultural Education Programs	3
AGEDS 4010	Planning Agriculture and Life Sciences Education Programs	3
AGEDS 4020	Methods of Teaching in Agriculture and Life Sciences	3
AGEDS 4160	Pre-Student Teaching Experience in Agricultural Education	1
AGEDS 4170	Supervised Teaching in Agriculture and Life Sciences	1-16
PSYCH 3330	Educational Psychology	3
PSYCH 2300	Developmental Psychology	3
SPED 4010	Teaching Secondary Students with Exceptionalities in General Education	3
Total Credits		22-37

Electives: Select courses to get to 128 credits.

Minor - Agricultural and Life Sciences Education

The department offers a minor in agricultural and life sciences education which may be earned by completion of a minimum of 15 credits in agricultural education and studies courses, with a minimum of two courses at the 4000 level. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. A minor will not meet state licensure requirements for teaching high school agriculture. Courses that can be taken for a minor are:

AGEDS 2110		
AGEDS 3100	Foundations of Agricultural Education Programs	3
AGEDS 3110	Presentation and Sales Strategies for Agricultural Audiences	3

Graduate Study

The department offers the degrees of Master of Science and Doctor of Philosophy, with a major in agricultural education; a specialization in agricultural extension education; opportunities for emphasis in international agricultural education; and a minor for students majoring in other curricula. Graduate students who have earned a bachelor's degree in an agricultural discipline may plan a course of study that leads to teacher certification. Candidates pursuing the Master of Science degree may do so by completing either a thesis or nonthesis program of study.

Students have an opportunity to develop competence in disciplinary foundations and ethics, program planning, learning theory, instructional methods, program leadership and administration, program evaluation, research methodologies, data analysis and interpretation, writing for publication, and grant proposal writing.

The department also cooperates in the international development studies option of the General Graduate Studies Program. Courses and workshops

are offered, both on and off campus, for extension educators, teachers, and industry and government personnel.

Agricultural and Rural Policy Studies

AGRICULTURAL & RURAL POLICY STUDIES

College of Agriculture and Life Sciences

Agriculture is more than just farming; it is about food, energy, and conservation. Rural is more than just small towns; it is the linkages between cities, urban consumers, and the global economy. Our major prepares students to guide policy decisions impacting agriculture, the environment, and the well-being of rural communities. In short, our major is the people and policy side of agriculture. Students will learn about the social and policy dimensions of agriculture and about strategies to promote rural resiliency and community vitality. The major will train students to engage with diverse audiences to discuss controversial issues, to promote public-private partnerships, and to lead and manage policy programs. Our goal is to give students the tools to help rural people and places thrive in the 21st century.

Our curriculum is flexible to meet the interests and needs of each student. A specialization area outside the major is required. Internships, experiential learning, and study abroad are important parts of the major. Graduates work as policy and legislative advisors, agriculture and farmer relations specialists, government affairs specialists, public information and communications officers, extension educators, community and economic developers, and in agriculture.

Student Learning Outcomes

Students will develop the necessary skills to become effective leaders in agriculture-related companies, non-profit associations and organization, and state and local government agencies working on agriculture and rural issues. Specific learning outcomes include:

1. Making connections between agriculture, the environment, and rural communities.
2. Making linkages between local, national, and global agricultural systems.
3. Investigating how social, economic, and cultural systems affect decisions.
4. Analyzing information and recommending solutions to guide decisions.
5. Evaluating program and policy outcomes.
6. Communicating information and ideas to others to guide decisions.
7. Leading and managing policy programs.
8. Promoting civic engagement among diverse groups.

CURRICULUM IN AGRICULTURAL & RURAL POLICY STUDIES

Administered by the Department of Sociology

Total Degree Requirement: 120 cr.

The major in Agricultural and Rural Policy Studies requires a minimum of 120 credits and a 2.00 minimum GPA. Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits. Up to 9 P-NP credits of free electives can be applied toward the degree.

University Requirements:

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
ENGL 3020	Business Communication	3
	or ENGL 3090 Proposal and Report Writing	
LIB 1600	Introduction to College Level Research	1
	U.S. Diversity from approved list	3
	International Perspectives from approved list (Met by SOC 3480)	3
CALS Communication Proficiency Requirement: A grade of C or better in 6 cr. of composition (ENGL 1500, ENGL 2500, ENGL 3020, or ENGL 3090); and a C or better in speech fundamentals (COMST 2140 or AGEDS 3110)		
Total Credits		10-16

CALS Requirements:

Mathematics from approved list (MATH 1400, MATH 1430, MATH 1450, MATH 1500, MATH 1510, MATH 1600, or MATH 1650) ¹		3
STAT 1010	Principles of Statistics	3-4
	or STAT 1040 Introduction to Statistics	
Physical Sciences from approved list (MTEOR 2060, [CHEM 1630 & CHEM 1630L], GEOL 1010, [GEOL 1020 & GEOL 1020L]) ²		5
BIOL 1010	Introductory Biology	3
	or BIOL 2110 Principles of Biology I	
Life Sciences from approved list (Met by AGRON 1810)		3
Ethics from approved list (Met by SOC 3250)		3
Humanities from approved list ³		3
Social Sciences from approved list (Met by SOC 2300)		3
AGEDS 3110	Presentation and Sales Strategies for Agricultural Audiences	3
	or COMST 2140 Professional Communication	
Total Credits		20-30

GRADUATE STUDY

The department offers work for the degrees Master of Science and Doctor of Philosophy with majors in sociology and rural sociology and minor work for students majoring in other departments. For M.S. and Ph.D. departmental requirements, see Program of Graduate Study for Degrees in Sociology and Rural Sociology, available from the department office. The department offers concentrations in a number of areas, e.g., community studies and development; sociology of families, inequality, food systems, agriculture and environment; methodology; social change and development; criminology; the economy, organizations and work; and social psychology. The Department of Sociology does not offer a nonthesis master's program.

Graduates have a broad understanding of sociology, address complex societal problems, and communicate effectively with scientific colleagues and the general public in both formal and informal settings. They understand sociological theory, conduct research, and are prepared to educate college students and contribute to public policy. Although the department stipulates no language requirement for either the degree Master of Science or the degree Doctor of Philosophy, specifying competence in one or more languages may be desirable in some instances.

The department also participates in the interdepartmental program in interdepartmental majors in sustainable agriculture, transportation and water resources, and interdepartmental minors in gerontology (see Index).

Agricultural Business

The Department of Economics offers coursework for a Bachelor of Science degree in Agricultural Business. The major in Agricultural Business prepares students for advanced studies (e.g., Masters or Ph.D. in Agricultural Economics, Law School, MBA, etc.) and for careers in agricultural finance, management in agricultural supply and marketing industries, commodity merchandising and research, business research and management, farm and ranch operations, commercial farm management and appraisal, agricultural sales and marketing, agricultural reporting and public relations, agricultural extension, international activities, and government service. A minor in Agricultural Business is also possible.

Students majoring in Agricultural Business often choose elective coursework leading to minors in the College of Agriculture and Life Sciences or the Ivy College of Business, or that emphasize specific areas within agricultural business such as finance, management, commodity

analysis, research, agricultural sales and marketing, environmental economics, farm and ranch operations, international economics, agricultural extension, or government service. A major in Agricultural Business with a minor in Economics is not permitted; however, a double major in Agricultural Business and Economics is permitted.

Customization of the Agricultural Business major is possible. Students may request to pursue one of three Business Options in Finance, Marketing, or Supply Chain Management. Electing a Business Option does not change the overall requirements of the Agricultural Business major. Eligibility and coursework requirements for Business Options are maintained and approved by the Department of Economics and details are available on the department website.

Student Learning Outcomes

Graduates from the Department of Economics at Iowa State University are expected to be able to:

1. Understand and apply concept of scarcity, marginal analysis, opportunity cost and comparative advantage.
2. Critically analyze the efficiency and equity implications of market and non-market processes of allocation.
3. Evaluate policies, regulations, and business strategies using economic models and theories.
4. Use quantitative and qualitative information to evaluate economic question.
5. Understand the determinants of differences in economic performance over time and across space.

Curriculum in Agricultural Business

The major in Agricultural Business requires a minimum of 120 credits and a 2.00 minimum GPA. Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits. In addition, at most 9 P-NP credits of free electives can be applied toward the degree, and a minimum of 18 credits must be earned from courses taught by the Department of Economics at ISU.

a. Select six credits from ACCT 2850 or any 3000-4890 ACCT, FIN, MKT, MGMT, MIS, or SCM courses.

b. Students majoring in Economics or adding the Finance Business Option must take STAT 3260. Students must take at least 1 STAT course from Iowa State for graduation.

Agricultural Business Minor

The Department of Economics offers a minor in Agricultural Business. The minor requires at least 15 credits, including 6 credits in courses numbered 3000 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other Department, College, or University requirement. Courses to be included in the minimum of 15 credits include the following:

ECON 1010	Principles of Microeconomics	3
ECON 2300	Farm Business Management	3
ECON 2350	Introduction to Agricultural Markets	3
ECON 3010	Intermediate Microeconomics	3-4
Three credits of ECON courses from: 3000-3890, 4000-4890 courses.		3

The Department of Economics has concurrent Bachelor of Science / Master of Science (B.S./M.S.) programs designed especially for seniors who wish to pursue advanced studies. Concurrent B.S./M.S. programs are agricultural business (B.S.) with agricultural economics (M.S.) or with

economics (M.S.). The concurrent B.S./M.S. program allows seniors to complete an M.S. degree within 12 months of B.S. graduation.

For more information about our concurrent undergraduate and graduate programs in Agricultural Economics, visit: <https://www.econ.iastate.edu/iowa-state-ms-econ-programs> (<https://www.econ.iastate.edu/iowa-state-ms-econ-programs/>).

See Master of Science or Ph.D. in Agricultural Economics.

Agricultural Communication OVERVIEW

Administered by the Department of Agricultural Education & Studies

The agricultural communication major provides students with critical knowledge and skills to be effective agricultural communicators. Graduates will communicate about agricultural science with diverse audiences within and outside the agricultural sector locally, nationally, and globally, using various communication channels and tools.

Students build a foundational knowledge of agricultural sciences such as animal science, horticulture, agronomy, agricultural and rural policy studies, global resource systems, food science and human nutrition, and agricultural business. They become proficient in communicating diverse agricultural topics with stakeholders, using various communication channels, tools, and strategies. Among others, students will develop knowledge and skills in areas such as audience and media analysis, strategic communication, message development for both online and offline communication channels, critical and analytical thinking, technical and research writing, public speaking, facilitation, persuasive and informative communication, public relations, agricultural issue analysis, development of agricultural promotional materials, and embracing diversity and differences in agriculture.

Agricultural communication students will obtain skills that enable them to be versatile in their career choices, pursuing work in public policy, agricultural extension, agri-business, non-profit sectors, commodity groups, agricultural cooperatives, education, research, publishing, sales, media, and agency work.

Student Learning Outcomes

Graduates will be successful in drawing from agricultural and communication coursework as well as experiential learning opportunities through clubs and internships to meet the three overall program outcomes:

1. Demonstrate awareness of emerging issues in agriculture by engaging in conversations with the public and peers using various communication channels.

- Identify target audiences and craft and deliver messages using appropriate communication channels.
- Critically analyze the advancement of agricultural communication and its implications in regional, national, and international settings.

Curriculum in Agricultural Communication

Only 65 cr. from a two-year institution may apply, which may include up to 16 technical cr.; 9 P-NP cr. of general electives; 2.00 minimum GPA

*To meet Ag Elective Requirements, students meet requirements in the following areas:

Select one technical agricultural area in which you will complete at least 12 credits (6 of these must be 3000-4000 level courses).

Select two other technical agricultural areas in which you will complete at least 6 credits (2 courses) in each area.

Select 9 additional credits from CALS coursework.

A 2.0 grade point average is required. This plan is a sample. Student plans may vary based on transfer credits, course availability and other factors.

Agricultural Studies

OVERVIEW

Administered by the Department of Agricultural Education and Studies

For undergraduate curricula in agriculture and life sciences education, and agricultural studies, leading to the degree of Bachelor of Science, see College of Agriculture and Life Sciences, Curricula.

The department offers three curricula for students desiring to enter careers in agriculture and related fields. These curricula are agricultural communication, agricultural and life sciences education and agricultural studies. The agricultural communication curriculum prepares graduates to communicate about agricultural science with diverse audiences within and outside the agricultural sector locally, nationally, and globally, using various communication channels and tools. The agricultural and life sciences education curriculum prepares persons for careers as agricultural education instructors, and educational specialists for industry, nonprofit organizations, and governmental agencies. The agricultural studies curriculum has two options, production and management and multidisciplinary. Graduates are prepared for careers in production agriculture and agricultural industry. Graduates of all three curricula accept positions in agricultural business, industry, agencies, and production agriculture.

Student Learning Outcomes

Graduates will have a broad base of agricultural knowledge, and will be skilled in decision making, planning, organizing, presenting, and evaluating information. Through the successful completion of the required coursework, active participation in clubs and organizations, and the acquisition of technical skills and experiences associated with work experiences, internships, and international travel, graduates of our baccalaureate programs meet the university, college, and departmental outcomes in the following nine areas:

1. Professional, interpersonal, and cross-cultural communications
2. Problem solving and critical thinking
3. Leadership
4. Entrepreneurship
5. Life-long learning
6. Ethics
7. Environmental awareness
8. U.S. diversity
9. International perspectives.

More information regarding the departmental learning outcomes can be found at www.ageds.iastate.edu/. (<http://www.ageds.iastate.edu/>)

Curriculum in Agricultural Studies

Administered by the Department of Agricultural Education and Studies. Students are encouraged to develop one or more areas of concentration in agricultural sciences and economics.

Production and Management Option

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Agricultural Systems Technology

The Department of Agricultural and Biosystems Engineering offers a Bachelor of Science degree in Agricultural Systems Technology (AST). Students majoring in AST choose between two options: Agricultural and Biosystems Management or Machine Systems. The department also offers a minor in Agricultural Systems Technology.

Successful AST graduates gain knowledge, skills, and abilities in solving technical problems, understanding the design process, excelling in authentic leadership, being aware of safety issues, having a quality orientation, effectively managing projects, and having a systems-thinking perspective. This translates to a holistic approach where AST graduates apply science, technology and engineering principles to manage complex agricultural and other production systems, including how the constituent sub-systems are interrelated and the broader impact of these systems.

Graduates find careers within a variety of agricultural industries, businesses, and organizations in the fields of agricultural machinery; off-road equipment; food, feed and grain processing; water quality; biorenewable resources; precision agriculture; or livestock production systems.

Common job duties of AST Agricultural and Biosystems Management graduates include:

- Technical support
- Operations management
- Production supervision
- Grain elevator management

Common job duties of AST Machine Systems graduates include:

- Precision agriculture support
- Testing or sales management

- Technical support
- Maintenance supervision

Student Learning Outcomes

Upon graduation, all AST students should be able to:

1. Apply knowledge of mathematics, science, and applied engineering to identify and solve applied science and technology problems.
2. Develop and conduct experiments and analyze and interpret resulting data.
3. Evaluate and adapt systems, components, processes to meet specified needs.
4. Function effectively on multi-disciplinary teams.
5. Communicate effectively, ethically, and professionally in written, oral, and other formats to technical and non-technical audiences.
6. Understand the potential impacts and limitations of solutions in global and societal contexts.
7. Recognize the need for, and demonstrate an ability to, engage in life-long learning.
8. Effectively apply modern scientific and technical tools necessary for professional practice to address contemporary issues in applied engineering and technology.

Upon graduation, AST students in the agricultural and biosystems management (ABM) option should be able to:

1. Design, implement, and evaluate best practices for the management of global and natural resource systems.
2. Integrate and utilize agricultural and biosystems applied engineering and technology to address contemporary issues in bio-based industries.
3. Evaluate the factors impacting the complex systems that sustain water, air, soils, food, and feed.

Upon graduation, AST students in the machine systems (M.S.) option should be able to:

1. Specify, manage, and test machine systems in the context of a complete agricultural, biological production or processing system.
2. Use and apply the technology of machine systems including power and information flows, function and interaction with biological materials.
3. Perform an energy and cost analyses of complete machine systems to ensure the success and sustainability of an enterprise.

For more information about the AST degree: <http://www.abe.iastate.edu/undergraduate-students/agricultural-systems-technology> (<http://www.abe.iastate.edu/undergraduate-students/agricultural-systems-technology/>)

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

TSM 3930E	Topics in Technology: Chemical Application Systems	
TSM 3930F	Topics in Technology: Agricultural Safety and Health	
TSM 4330	Precision Agriculture	
TSM 4550	Feed Processing and Technology	
TSM 4570	Feed Safety, Ingredient Quality and Analytics	

• At least six (6) credits of 3000-level or higher TSM classes (from the classes listed above)

• At least nine (9) credits that are not used to meet any other department, college, or university requirement.

Agronomy

Undergraduate Study

Agronomy is the science and technology of producing plants that serve humans, using practices essential for maintaining and improving life. The Department of Agronomy offers a major leading to a degree of Bachelor of Science (B.S.) in agronomy. Graduates have the theoretical and practical knowledge needed for efficient and sustainable crop production. They are skilled in critical thinking, problem solving, communicating, and working effectively with others. They understand the ethical, cultural, and environmental dimensions of issues facing agronomists globally.

An agronomy major prepares students for employment in crop production and soil management, yield forecasting, precision farming, plant

breeding, agricultural business and industry, agricultural service organizations, environmental and natural resource management, and farm management. Graduates pursue careers in the seed, fertilizer, and agricultural chemical industries as field agronomists, crop and soil management specialists, research technicians, sales and marketing specialists, and production managers. State and federal agencies employ agronomists as extension specialists, county extension directors, environmental and natural resource specialists, research associates, soil surveyors, soil conservationists, grain inspectors, integrated pest managers, land appraisers, agricultural lenders, and other science-based professionals.

An agronomy major also prepares students for graduate school. We offer a concurrent B.S./MBA degree. About a quarter of our students immediately continue into research-based M.S. and Ph.D. programs. As an undergraduate, there are many opportunities to be involved in research.

Department of Agronomy website - <http://www.agron.iastate.edu/>. (<http://www.agron.iastate.edu/>)

Student Learning Outcomes

Upon graduation, students should be able to:

KNOWLEDGE: Graduates of our bachelor's degree program will demonstrate knowledge of the scientific principles and practices needed for success as an agronomist.

INTEGRATION AND PROBLEM-SOLVING: Graduates of our bachelor's degree program will integrate knowledge and skills to systematically assess, critically analyze, and sustainably manage agronomic systems.

PROFESSIONALISM AND CAREER READINESS: Graduates of our bachelor's degree program will demonstrate professional skills and career readiness.

COMMUNICATION: Graduates of our bachelor's degree program will communicate and engage effectively with diverse audiences.

DIVERSE WORLDVIEWS: Graduates of our bachelor's degree program will demonstrate knowledge of diverse worldviews that affect agronomic practices.

ETHICAL, ENVIRONMENTAL, AND ECOLOGICAL ASPECTS: Graduates of our bachelor's degree program will demonstrate knowledge of the ethical, environmental, and ecological aspects of agronomic practices.

Curriculum in Agronomy

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA. A

minimum of 15 credits of agronomy courses must be earned at Iowa State and not transferred from other institutions.

International Perspective: 3 cr.

3 cr. from approved International Perspective list: <http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current> (<http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/>)

U.S. Diversity: 3 cr.

3 cr. from approved U.S. Diversity list: <http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses> (<https://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses/>)

Communication/Library: 13 cr.

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
SPCM 2120	Fundamentals of Public Speaking	3
	or AGEDS 3110 Presentation and Sales Strategies for Agricultural Audiences	
LIB 1600	Introduction to College Level Research	1
One of the following:		
ENGL 3020	Business Communication	3
ENGL 3090	Proposal and Report Writing	3
ENGL 3120	Communicating Science and Public Engagement	3
ENGL 3140	Technical Communication	3

Humanities: 3 cr.

3 cr. from approved humanities list: <http://www.cals.iastate.edu/student-services/humanities> (<http://www.cals.iastate.edu/student-services/humanities/>)

Social Sciences: 3 cr.

3 cr. from approved social sciences list: <http://www.cals.iastate.edu/student-services/social-sciences> (<http://www.cals.iastate.edu/student-services/social-sciences/>)

Ethics: 3 cr.

3 cr. from approved ethics list: <http://www.cals.iastate.edu/student-services/ethics> (<http://www.cals.iastate.edu/student-services/ethics/>)

Mathematical Sciences: 6 cr.

MATH 1400	College Algebra	3
STAT 1040	Introduction to Statistics	3

Physical Sciences: 8 cr.

CHEM 1630	College Chemistry	5
& 1630L	and Laboratory in College Chemistry	

One of the following:

AGRON 2590	Organic Compounds in Plants and Soils	3
BBMB 2210	Structure and Reactions in Biochemical Processes	3
CHEM 2310 & 2310L	Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry	4

Life and Biological Sciences: 7 cr.

BIOL 2120 & 2120L	Principles of Biology II and Principles of Biology Laboratory II	4
AGRON 3200 or BIOL 3130	Genetics, Agriculture and Biotechnology or Principles of Genetics	3

Supporting Sciences: 15 cr.

Courses cannot be used to fulfill any other university, college, or Agronomy requirements. At least 9 cr. must be in courses numbered 3000 or above.

This requirement can be met in one of three ways:

- Complete at least 3 credits in basic or mathematics-intensive discipline (ACCT, BBMB, BIOL, CHEM, COMS, ECON, All Engineering, GEOL, GEN, MATH, MTEOR, PHYS, STAT) as well as at least 6 additional credits in ANS, BIOL, BBMB, ENSCI, ENT, GEOL, HORT, GEN, MICRO, NREM, PLP, TSM. The other 6 credits can be a combination of the above department's courses and/or AGRON.
- Complete the courses needed to fulfill a certificate or second major that complements the student's academic and professional goals.
- By the end of the third semester before graduation, petition the Agronomy Curriculum Committee with a specific set of courses designed around "keeper of the land," "builder of genetic diversity," "explorer of plant life," "developer of bioenergy," "confronter of world hunger," or "designer of sustainable systems."

Agronomy Core: 44 cr.

AGRON 1050	Leadership Experience	
AGRON 1100	Professional Development in Agronomy: Orientation	1

Minor - Agronomy

A minor in agronomy is earned by taking 18 credits consisting of the following:

- 6 credits of required courses;
- 3-6 credits of foundation courses;
- 6-9 credits of supporting courses.

At least 9 credits must be taken at Iowa State University with at least 6 credits numbered 3000 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

A student may use up to:

- 3 credits of AGRON 4960A or AGRON 4960B;
- **Or** up to 2 credits from AGRON 3310 or AGRON 3700;
- **Or** up to 1 credit of AGRON 4900E or AGRON 4900G or AGRON 4900H or AGRON 4900Z

Required Courses (6 credits):

AGRON 1810	Introduction to Crop Science	3
AGRON 1820	Introduction to Soil Science	3
Foundation Courses - One or two courses from the list below (3-6 credits):		
AGRON 1800	Global Agriculture in a Changing World	3
AGRON 2060	Introduction to Weather and Climate	3
AGRON 2800	Crop Development, Production and Management	3
AGRON 2820	Soil Conservation and Land Use	3

Supporting Courses (6-9 credits, 6 credits of which must be 3000+ level):

AGRON 2170	Weed Identification	1
AGRON 2590	Organic Compounds in Plants and Soils	3
AGRON 2700	Geospatial Technologies	3
AGRON 3160	Crop Structure-Function Relationships	3
AGRON 3170	Principles of Weed Science	3
AGRON 3200	Genetics, Agriculture and Biotechnology	3
AGRON 3340	Forage Crop Management	3
AGRON 3380	Seed Science and Technology	3
AGRON 3540	Soils and Plant Growth	3
AGRON 3600	Environmental Soil Science	3
AGRON 3920	Systems Analysis in Crop and Soil Management	3
AGRON 4050	Soil-Plant-Animal-Atmosphere Physics	3
AGRON 4210	Introduction to Plant Breeding	3
AGRON 4500	Issues in Sustainable Agriculture	3
AGRON 4590	Environmental Soil and Water Chemistry	4
AGRON 4630	Soil Formation and Landscape Relationships	3
AGRON 4770	Soil Physics	3
AGRON 4840	Organic Agricultural Theory and Practice	3
AGRON 4850	Soil and Environmental Microbiology	3
AGRON 4970	Agroecology Field Course	3

SOIL SCIENCE CERTIFICATE

Purpose

The certificate in soil science will prepare students with the skills needed for successful careers in the field of soil science. Soil science has key roles in achieving goals of sustainability as demonstrated by the functions of soil and their ecosystem services. Namely, soil is an important factor in addressing issues of food scarcity, water management, climate change, biodiversity loss, and human health. Students who complete the Iowa State University soil science certificate program will qualify for federal employment as a soil scientist. In addition, students completing the certificate will have met the educational component of the Soil Science Society of America's requirements for certification as a professional soil scientist and all U.S. states' educational criteria for licensure as a professional soil scientist.

Requirements

The certificate in soil science requires the completion of 31 credit hours, including a foundation course in soil science, 15 credits in supporting biological, physical, or Earth sciences, as well as 13 credits from approved categories of soil science courses.

At least 9 credits must be taken in soil science courses numbered at the 3000-level or above.

At least 9 credits used for the certificate cannot be used to meet any other department, college, or university requirement for the baccalaureate

degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 3000 or above.

Courses for the certificate cannot be taken on a pass/not-pass basis.

Course Requirements for Soil Science Certificate

Foundation: 3 credits of required core course.

AGRON 1820	Introduction to Soil Science	3

Supporting Biological, Physical, or Earth Sciences: Choose 15 credits from approved list consisting of courses from the following designators: ABE, AGRON, AECL, BIOL, CHEM, CE, CRP, ENSCI, ENT, FOR, GEOL, HORT, LA, MTEOR, MICRO, NREM, PHYS.

Soil Science: Choose 13 credits with at least 2 credits from each of the following categories.

Soil Physical Properties or Soil Water Relationships (2 credits)

AGRON 2820	Soil Conservation and Land Use	3
AGRON 3600	Environmental Soil Science	3
AGRON 4050	Soil-Plant-Animal-Atmosphere Physics	3
AGRON 4770	Soil Physics	3
ABE 4310	Design and Evaluation of Soil and Water Conservation Systems	3
TSM 3240	Soil and Water Conservation Management	3

Soil Chemistry (2 credits)

AGRON 2590	Organic Compounds in Plants and Soils	3
AGRON 4590	Environmental Soil and Water Chemistry	4

Soil Biology (2 credits)

AGRON 3540	Soils and Plant Growth	3
AGRON 3540L	Soils and Plant Growth Laboratory	1
AGRON 4850	Soil and Environmental Microbiology	3

Soil Morphology and Geography (2 credits)

AGRON 2700	Geospatial Technologies	3
AGRON 3700	Field Experience in Soil Description and Interpretation	1
AGRON 4630	Soil Formation and Landscape Relationships	3

The Soil Science Certificate may be earned at the same time as an ISU baccalaureate degree or after the completion of an associate of arts (AA) or associate of science (AS) degree or a baccalaureate degree from any accredited institution.

Information on the concurrent Agronomy bachelor's degree and MBA can be located here (<https://www.ivybusiness.iastate.edu/full-time-concurrent-mba/>).

Graduate Study

Introduction

Agronomy is the science and technology of producing plants that serve humans, using practices essential for maintaining and improving life. The Department of Agronomy administers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degree programs in four different graduate majors that emphasize different disciplines of agronomy. These majors are: Agricultural Meteorology; Crop Production and Physiology; Plant Breeding; and Soil Science. A fifth graduate major, Agronomy, offers both an M.S. and a Graduate Certificate through distance education suitable for professionals working in industry or government, as well as a graduate minor for on-campus students.

Admission

To be fully admitted, prospective graduate students must have an undergraduate GPA of at least a 3.00 GPA (4.00 scale) or rank in the upper one-half of their undergraduate class. Non-native English speakers must take the Test of English as a Foreign Language (TOEFL). Students applying to the Agricultural Meteorology and Plant Breeding graduate majors must take the Graduate Record Examination (GRE). For all of the majors except Agronomy, a faculty member of the graduate major must agree to be the major professor before the student is admitted.

Program of Study

The academic courses used to satisfy requirements for a graduate degree compose a student's Program of Study (POS). The POS must be approved by the student's POS Committee. For the M.S. in Agronomy, the POS Committee must be composed of at least two faculty who are both members of the Graduate Major in Agronomy. For the other four majors at the M.S. degree level, at least three faculty must serve on a POS Committee. Two of the three must be members of the major, and at least one must be a member of a different graduate major. At the Ph.D. level the POS Committee must have at least five members, of which at least three must be faculty in the major, and at least one a member of a different graduate major. If the student is pursuing a graduate minor, either as part of an M.S. or Ph.D., a graduate faculty member representing the minor must serve on the POS Committee.

Agronomy

The POS for the M.S. in Agronomy is fixed and consists of the following:

AGRON 5010	Crop Growth and Development	3
AGRON 5020	Chemistry, Physics, and Biology of Soils	3
AGRON 5030	Climate and Crop Growth	3
AGRON 5110	Crop Improvement	3
AGRON 5120	Soil-Plant Environment	3
AGRON 5130	Data Science for Agricultural Professionals	3

AGRON 5140	Integrated Pest Management	3
AGRON 5310	Crop Ecology and Management	3
AGRON 5320	Soil Management	3
AGRON 5330	Crop Protection	3
AGRON 5910	Agronomic Systems Analysis	3
AGRON 5920	Current Issues in Agronomy	3
AGRON 5940	Agronomy MS Practicum	1
AGRON 5990M	Agronomy (3 credits total over 2 semesters: 1 credit for proposal. 2 credits for final oral exam.)	1-30

All Other Degrees

The courses in each student's POS will vary depending on the major and the student's interests. Only a maximum of three 4000-level courses or one 3000-level and two 4000-level courses may be included on the POS. If a 3000-level course is listed on the POS, it cannot be an AGRON course.

Agricultural Meteorology

Students with a major in Agricultural Meteorology must include AGRON 6980 in their POS. Students are encouraged to include the following courses: AGRON 5050; MTEOR 6050; a modeling course such as AGRON 5180, AGRON 5250, GEOL 5160, or MTEOR 5520; and a course in statistics.

Crop Production and Physiology

The Graduate Major in Crop Production and Physiology has defined five Core Areas.

Core Area 1 (molecular biology / biochemistry): BBMB 4040, BBMB 4050, BBMB 5420A, BBMB 5420B, BBMB 5420C, BBMB 5420D, BBMB 5420E, BBMB 5420F, BBMB 5420G, and PLBIO 5450.

Core Area 2 (growth and development): AGRON 5250, AGRON 5510, BIOL 4540, BIOL 4280, and GDCB 5280.

Core Area 3 (plant physiology and metabolism): AGRON 5080, AGRON 5160, AGRON 5190, AGRON 5380, AGRON 5530, AGRON 5560, and PLBIO 5130.

Core Area 4 (crop ecology and management): AGRON 5090, AGRON 5150, AGRON 5300, AGRON 5530, AGRON 5560, AGRON 5840, BIOL 4850, BIOL 4740, EEOB 5840, EEOB 5890, HORT 5240, PLP 5770, and PLP 5940.

Core Area 5 (statistics / quantitative methods): AGRON 5250, AGRON 5260, STAT 5870, STAT 5050, STAT 5120, STAT 5880, CRP 5510, and NREM 5460.

To major in Crop Production and Physiology, at least one course from three of the Core Areas must be included in the POS for the M.S. For the Ph.D., at least one course from each of the Core Areas must be included. A single course cannot be used for more than one Core Area. Students are also encouraged to consider AGRON 6980.

Plant Breeding

The Graduate Major in Plant Breeding has both a resident and distance-education MS program. The following courses are recommended for students with a major in Plant Breeding: AGRON 5210, AGRON 5220, AGRON 5230, AGRON 5240, AGRON 5280, AGRON 5610, AGRON 6000A, AGRON 6980, STAT 5870, and STAT 4710. For the distance program, the following courses are recommended: AGRON 5010, AGRON 5060, AGRON 5130, AGRON 5200, AGRON 5210, AGRON 5230, AGRON 5240, AGRON 5280, AGRON 5440, and AGRON 5990. Resident students pursuing the Ph.D. also often include AGRON 6210 and AGRON 6250 in their POS.

Soil Science

Students pursuing a major in Soil Science may specialize in one of six areas: soil chemistry; soil fertility; soil management; soil microbiology and biochemistry; soil morphology and genesis; or soil physics. If a specialization is chosen, the major professor must be in the designated specialty area. For the Ph.D., the POS must include one credit of AGRON 6000B. Students are also encouraged to consider including AGRON 6980 in their POS.

Master of Science

The general requirements for an M.S. degree include:

- A minimum of 30 credits from academic courses and research activities;
- At least 22 credits earned at ISU;
- Two-thirds or more of earned credits related to the major; and
- Completion of a final oral examination.

Both non-thesis and thesis options for an M.S. degree in Agricultural Meteorology, Crop Production and Physiology, Plant Breeding, and Soil Science are available. Students in the Agronomy major must choose the non-thesis option.

Students in Agricultural Meteorology working towards the M.S. must meet with their POS Committee at least twice. Besides the final oral examination, an additional meeting must be held near the beginning of the graduate program. At this meeting the student will introduce the area of research to be pursued, potential research questions and methods, and a proposed POS. The student must also present a short written report on how the proposed research will help them master established Enduring Understandings in Agricultural Meteorology.

Creative Component

If the non-thesis MS degree is chosen, then the student must:

1. Register for at least two credits of AGRON 5990 that will be used to complete a creative component; and
2. Pass a comprehensive final oral examination.

The creative component is work that presents substantial evidence of individual accomplishment. The POS Committee and the student

will specify the creative component, how it will be documented, and how it will be evaluated. The POS Committee also has flexibility in determining the format of the final oral examination. For Agricultural Meteorology, the final oral exam must include an evaluation of the student's mastery of the Enduring Understandings in Agricultural Meteorology.

Thesis

In the thesis option the student must:

1. Pursue a research project culminating in a written thesis; and
2. Pass a comprehensive final oral examination.

A minimum of three research credits of AGRON 6990 must be listed on the POS to account for work on an M.S. thesis. The thesis is submitted to the POS Committee prior to the final oral examination. During the final oral examination, the student will present and defend the thesis in the presence of the POS Committee. Students in Agricultural Meteorology must also demonstrate mastery of the Enduring Understandings in Agricultural Meteorology. The presentation (also called the "exit seminar") is open to the general public. Only POS Committee members may attend the examination that follows the presentation.

Doctor of Philosophy

The general requirements for a Ph.D. degree include:

- A minimum of 72 credits from academic courses and research activities.
- At least 36 of these credits earned at ISU
- Completion of a preliminary oral examination;
- A written Ph.D. dissertation; and
- Completion of a comprehensive final oral examination.

The 72 credits can include the credits earned in pursuit of an M.S. degree. If an M.S. was earned at another institution, those courses earned at the other institution can be listed along with the ISU courses, but only if the POS Committee determines that the courses are appropriate. Students in Agricultural Meteorology working towards the Ph.D. must meet with their POS Committee at least three times. Besides the final oral examination and another for the preliminary exam, an additional meeting must be held near the beginning of the graduate program. At this meeting the student will introduce the area of research to be pursued, potential research questions and methods, and a proposed POS. If a student will pursue a Ph.D. without first completing an M.S., then during the first meeting of the POS Committee the student must also present a short-written report that illustrates connections between the Enduring Understandings in Agricultural Meteorology and their planned research.

Qualification Exam

Agricultural Meteorology

Students in Agricultural Meteorology must take and pass a qualification exam once they have decided to pursue a Ph.D. The qualification

exam must be passed before taking the preliminary exam. The format of the qualification exam is as follows. The student will produce a written report that demonstrates their knowledge of the Enduring Understandings in Agricultural Meteorology. If the student has come from another university the report must present research completed at ISU and not at the previous institution (such as a thesis). This report will be submitted to all of the faculty in the major. The student will then make an oral presentation to faculty and other students in the major that summarizes and defends the written report. After the oral presentation, the faculty will meet to determine whether or not the student passed the exam, and whether the student can re-take the exam if the student failed. The faculty will provide written feedback to the student, suggesting areas where improvement is needed and a course of action. The qualification exam can be taken only two times during a student's graduate career at ISU. If a student who had entered the Ph.D. program without an M.S. degree takes the qualification exam and fails the exam, the student can: take the qualification exam again, if so, allowed by the faculty; or continue their graduate career in pursuit of an M.S. degree. In the latter case, the student could take the qualification exam one more time after an M.S. degree has been completed.

All Other Majors

A qualification exam is not required for students in the Crop Production and Physiology, Plant Breeding, or Soil Science majors.

Preliminary Exam

All students pursuing a Ph.D. must take and pass a preliminary oral examination.

Agricultural Meteorology

For students in Agricultural Meteorology the preliminary exam consists of a defense of the student's proposed dissertation research to the POS Committee. Besides an oral defense, the student must also submit a written report on their proposed research. If the student fails the preliminary exam, the POS Committee must also decide if the student can re-take the exam. The preliminary exam can only be taken twice.

Crop Production and Physiology

Students in Crop Production and Physiology may be asked to take a written preliminary examination. If a student fails the written preliminary examination, the POS Committee may require the student to retake the exam, to answer additional written questions, or proceed with the oral examination. The nature of the preliminary oral exam is determined by the student's POS Committee.

Plant Breeding

Students in Plant Breeding must pass a uniform written preliminary examination that consists of five questions, each from one of five topical areas. Faculty members in Plant Breeding evaluate each answer. Evaluators assign a pass or fail grade to the answer. If an evaluator assigns a failing grade to a question, the evaluator shall clearly indicate

the strengths and weaknesses of the answer and provide written information (e.g., references, rationale) to the student which clearly outlines an acceptable response to the question. Failure to provide such written information may invalidate that grade and be considered sufficient cause to exclude the grade in the overall evaluation of the student’s answer. Students who receive two pass grades for a question will have successfully completed that topic, and students must pass each topic to pass the exam. If two valid grades are not in agreement (e.g., one passing grade and one failing grade), additional faculty members will evaluate the answer until there are two valid assessments that are in agreement. Students who do not pass a topic have the opportunity to repeat that topic on the next regularly scheduled exam date. The number of attempts for each topic has not been specified. The examination is offered the last Thursday and Friday of each January and September when one or more students have signed up to take the exam. Students may choose to attempt questions for all five topics, or for subsets of the topics. If a student decides to attempt questions for only certain topics, the student must specify which topics in writing at least one month prior to the scheduled exam date. The nature of the preliminary oral exam is determined by the student’s POS Committee.

Soil Science

Students in Soil Science must pass a written preliminary examination. Exam questions are authored by members of the POS Committee. The format of each question is left open and they may be formulated as open– or closed–book problems. A reasonable period for completion may be set by the author of the question. The student’s responses are formally scored or ranked only by the POS Committee member who authored the question. A copy of the student’s responses to all questions is submitted to all POS Committee members at least one week before the student’s preliminary oral examination. When the student submits a request to schedule the preliminary oral examination, the student’s major professor certifies by signing the form that the student has satisfactorily completed a written preliminary exam. The nature of the preliminary oral exam is determined by the student’s POS Committee.

Doctoral Dissertation and Final Oral Examination

All students must include at least three AGRON 6990 credits in their POS for work on their Ph.D. dissertation. During the required final oral examination, a student presents and defends the dissertation. This presentation (also called the “exit seminar”) is open to the general public. Only POS Committee members may attend the examination that follows the presentation.

GRADUATE CERTIFICATE IN AGRONOMY FOR DISTANCE STUDENTS

The Graduate Certificate in Agronomy is for distance students and is comprised of the first six courses in the MS in Agronomy curriculum. All six courses are required for certificate completion.

AGRON 5010	Crop Growth and Development	3
AGRON 5020	Chemistry, Physics, and Biology of Soils	3
AGRON 5030	Climate and Crop Growth	3
AGRON 5110	Crop Improvement	3
AGRON 5120	Soil-Plant Environment	3
AGRON 5140	Integrated Pest Management	3
Total Credits		18

GRADUATE MINOR

On-campus students who wish to minor in Agronomy must include a core course from each of the other four graduate majors in their POS. These courses are:

AGRON 5050	Soil-Plant-Animal-Atmosphere Physics	3
AGRON 5160	Crop Physiology	3
AGRON 5210	Principles of Cultivar Development	3
AGRON 5530	Soil-Plant Relationships	3

However, one substitution is allowed with the approval of the faculty member serving as the minor representative on the POS Committee.

Animal Ecology

Administered by the Department of Natural Resource Ecology and Management

The Animal Ecology curriculum provides its majors with an understanding of ecological principles and processes and their applications to natural resource management. This major is oriented toward students desiring a general and flexible program in environmental biology and for those planning graduate study. Graduates find employment as aquaculturists, aquatic ecologists, wildlife biologists, fisheries biologists, resource managers, and ecologists for industry, environmental consulting firms, natural resource and environmental agencies and organizations, zoos, and as educators. Graduates are able to communicate and work effectively in the multidisciplinary arena of ecology and natural resource management. Additionally, they recognize the importance of ethics in their field of study and are sensitive to cultural diversity and broad environmental concerns.

Students majoring in Animal Ecology may select from one or more of four options: Fisheries and Aquatic Sciences, Interpretation of Natural Resources, Pre-veterinary and Wildlife Care, or Wildlife. Each option

has specific outcomes expectations that include (1) the scope of the specialization and its relationships to broader aspects of animal ecology, biotic resource management, and other allied scientific disciplines and professions, (2) career opportunities and requirements, and (3) knowledge and skills appropriate for employment at technical and practitioner levels in each discipline.

All options require three months (400 hours) of relevant work experience or study at a biological station prior to graduation. The latter may be accomplished at the university's affiliate field stations: Rod and Connie French Conservation Camp in Montana, Iowa Lakeside Laboratory at West Lake Okoboji, and Gulf Coast Research Laboratory at Ocean Springs, Mississippi. Information on these laboratories is available from the Department of Natural Resource Ecology and Management Student Services Center.

Pre-veterinary medicine preparation may be achieved while satisfying degree requirements in animal ecology.

Additional education and training can lead to other opportunities in such areas as research and management, natural resources planning and administration, teaching, and environmental consulting, among others. Graduate training is necessary for many specialized positions within the fields of animal ecology. Students preparing for graduate study should consult with their academic advisor concerning appropriate coursework.

Students wishing to be certified by the American Fisheries Society or The Wildlife Society need to consult with their advisors in selecting required courses in their respective programs. The formal application then needs to be completed and submitted for review by their professional societies. Certification in either society has many professional benefits and may be required or recommended for employment by federal and state agencies and private industry.

Students seeking certification to teach biology in secondary schools must meet requirements of the College of Human Sciences as well as those of the Animal Ecology curriculum. In addition, they must apply formally for admission to the teacher education program (see Teacher Education Program). Students with an interest in careers in outdoor writing are encouraged to obtain a minor or a second major in journalism (see Journalism and Communication, Courses and Programs). Students who wish to pursue a job as a conservation officer may wish to minor in criminal justice (see Criminal Justice).

Student Learning Outcomes

Upon graduation, students should be able to:

1. Identify, explain and critically evaluate their own beliefs, values and actions in relation to professional and societal standards of ethics.

For any given situation, graduates identify, critically evaluate, and state their own beliefs and values as they relate to professional and societal

ethical standards, for any given situation. They elaborate on how those values and beliefs impact their actions, and they explain which specific canons or principles of a professional code of ethics are applicable to a particular situation.

2. Anticipate, analyze and evaluate natural resource issues and opportunities, explaining the ecological, economic, and social consequences of natural resource actions at various scales and over time.

In the case of existing natural resource issues, graduates explain the ecological, economic, and social consequences that reasonably could be expected to occur as the result of actions taken to address the issue. The explanation includes considerations of the geographic area influenced by the issue as well as the time frame over which the consequences can be expected to occur. In the case of evolving circumstances, graduates predict natural resource issues that may arise as a result of the circumstances and explain the ecological, economic and social consequences of those issues.

3. Actively seek the input and perspectives of diverse stakeholders regarding natural resource problems and issues.

Graduates identify the comprehensive list of individuals or groups who may be impacted by particular natural resource problems and issues. They are well versed in techniques for seeking and incorporating input and perspectives from those people, and they incorporate those inputs and perspectives into the decision-making process.

4. Assess, analyze, synthesize, and evaluate information fairly and objectively.

Not all information is equally sound or applicable in a particular situation. Graduates evaluate the validity and importance of information obtained from any source. Once evaluated, they use the information appropriately in the solution of natural resource problems.

5. Work effectively, both individually and with others, on complex, value-laden natural resource problems that require holistic problem-solving approaches.

Effective solution of natural resource problems often involves input from diverse constituencies with diverse value scales. When working individually, graduates incorporate those values into the solution of problems. Graduates work effectively with diverse individuals and groups to reach consensus on problem solutions.

6. Formulate and evaluate alternative solutions to complex problems and recommend and defend best alternatives.

The natural resource base with which we deal is capable of providing numerous goods and services to numerous publics. Graduates formulate multiple alternatives, as well as action plans, to achieve stakeholder

objectives. They evaluate each of the feasible alternatives in terms of biological possibility, economic feasibility and social acceptability. They recommend best alternatives based on the stakeholders' objectives, and they justify their recommendations on the basis of sound science.

7. Communicate clearly and effectively with all audiences using appropriate oral, visual, electronic, and written techniques.

Graduates utilize the best form, or forms, of communication for effectively conveying information to, or seeking input from, a particular audience. They are proficient in all forms of communication and adjust their style or technique of communication to suit different audiences.

8. Recognize and interpret resource problems and opportunities across spatial scales from local to global.

Graduates recognize where resource problems and opportunities can or could exist, and they evaluate and interpret these for others. They evaluate and interpret for individual landowners at a very local scale as well as for problems that span multiple ownerships, regions and ecosystems.

9. Appreciate cultural diversity and understand the impact of the global distribution of people and wealth on natural resource use and valuation.

Different cultures, population densities, and income classes value and use natural resources in very different ways. Because natural resources often are used simultaneously by different groups, it is important for graduates to be able to account for those differing uses and valuations when making management decisions about natural resources.

10. Exercise leadership skills as professionals and engaged citizens.

Graduates organize, facilitate, and participate effectively in groups, teams, or organizations. They define problems or opportunities, implement action planning processes, work toward goals and justify actions taken.

11. Demonstrate creativity and innovation in identifying and pursuing opportunities that produce environmental, social, or economic value.

Graduates display creativity in a variety of situations and identify opportunities to promote understanding of natural resource issues. They demonstrate persistence when working with individuals who have diverse interests in order to build consensus and facilitate accomplishing stated objectives.

12. Exercise life-long learning skills developed before graduation.

Graduates articulate why life-long learning is important. Graduates find answers to their questions as they arise throughout life. They are capable of determining what they need to know to effectively deal with an issue

or situation, and they know how to obtain the necessary knowledge. They have learned how to learn in the absence of teachers.

CURRICULUM IN ANIMAL ECOLOGY

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency (with grade of C or better):

6 cr. of English composition

3 cr. of speech fundamentals

Communication/Library 16 cr.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
SPCM 2120	Fundamentals of Public Speaking	3
LIB 1600	Introduction to College Level Research	1
Plus 6 credits from the following:		6
ENGL 2070	Introduction to Creative Writing	
ENGL 2750	Analysis of Popular Culture Texts	
ENGL 3020	Business Communication	
ENGL 3030	Free-Lance Writing for Popular Magazines	
ENGL 3040	Creative Writing: Fiction	
ENGL 3050	Creative Writing: Nonfiction	
ENGL 3060	Creative Writing: Poetry	
ENGL 3090	Proposal and Report Writing	
ENGL 3100	Rhetorical Analysis	
ENGL 3120	Communicating Science and Public Engagement	
ENGL 3140	Technical Communication	
AGEDS 3110	Presentation and Sales Strategies for Agricultural Audiences	
PR 3050	Publicity Methods	
NREM 3300	Principles of Interpretation	
SPCM 3120	Business and Professional Speaking	

Humanities and Social Sciences: 6 cr.

Humanities course list: <https://www.cals.iastate.edu/student-services/humanities/>
 Humanities (https://www.cals.iastate.edu/student-services/humanities/)
 Social Science course list: <https://www.cals.iastate.edu/student-services/social-sciences/>
 Social Science (https://www.cals.iastate.edu/student-services/social-sciences/)

Approved humanities course	3
Approved social science course	3

Total Credits **6**

Ethics: 3 cr.

3 cr. from approved ethics list: <https://www.cals.iastate.edu/student-services/ethics> (<https://www.cals.iastate.edu/student-services/ethics/>)

Mathematical Sciences: 6 cr.

MATH 1400	College Algebra	3
STAT 1010	Principles of Statistics	3-4
or STAT 1040	Introduction to Statistics	

Total Credits 6-7

Physical Sciences: 14 cr.

CHEM 1630	College Chemistry	5
& 1630L	and Laboratory in College Chemistry	
or CHEM 1770	General Chemistry I	
& 1770L	and Laboratory in General Chemistry I	
CHEM 2310	Elementary Organic Chemistry	4
& 2310L	and Laboratory in Elementary Organic Chemistry	
or CHEM 3310	Organic Chemistry I	
& 3310L	and Laboratory in Organic Chemistry I	
PHYS 1150	Physics for the Life Sciences	5
& 1150L	and Laboratory in Physics for the Life Sciences	
or PHYS 1310	General Physics I	
& 1310L	and General Physics I Laboratory	

Total Credits 14

Biological Sciences: 24 cr.

NREM 1100	Orientation in Natural Resource Ecology and Management	1
NREM 1200	Introduction to Renewable Resources	3
NREM 2110	Careers in Natural Resources	1
AECL 2310	Principles of Wildlife & Fisheries Conservation	3
AECL 3120	Ecology	4
AECL 3650	Vertebrate Biology	4
BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
BIOL 2120	Principles of Biology II	3
BIOL 2120L	Principles of Biology Laboratory II	1

Total Credits 24

Practical Experience:**FISHERIES AND AQUATIC SCIENCES OPTION**

AECL 3210	Fish Biology	3
AECL 4860	Aquatic Ecology	3
AECL 4860L	Aquatic Ecology Laboratory	1
Choose one of two Mathematics sequences:		7-8
Sequence 1 (Calculus)		
MATH 1430	Preparation for Calculus	

One of the following:

MATH 1600	Survey of Calculus	
MATH 1650	Calculus I	
Sequence 2 (Statistics)

* To complete degree program in four years students must maintain an average of 16 credits per semester.

**Initial math course is determined on the basis of high school math and placement test scores. A non-credit course (Math 10) maybe be required at additional costs.

***In scheduling coursework, students should pay attention to courses with limited offerings, (e.g., offered only on alternate years) and to course sequences (i.e., where a course serves as a prerequisite for another course). It is critical that students take AECL 3710 fall semester of the junior year and AECL 4510 fall semester of the senior year.

Minor - Animal Ecology

The department offers a minor in animal ecology that may be earned by taking 15 credits in the department including:

AECL 3120	Ecology	4
AECL 3650	Vertebrate Biology	4
NREM 1200	Introduction to Renewable Resources	3

Plus, four additional credits of Animal Ecology or NREM courses at the 3000 level or above.

The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Animal Science

The Department of Animal Science Undergraduate Program intends for its graduates to be able to explain the symbiotic relationship of animals

and humans, to contribute to the solution of complex problems of animal enterprise management, and to apply their knowledge and skills in a technically demanding global community. Graduates of our program will be knowledgeable about sustainable animal production practices that also ensure animal health and well-being and stewardship of natural resources.

To enable learners to pursue a wide array of career interests, the department offers learning experiences ranging from the basic to the applied sciences. Learner outcomes for these goals, for each of our courses, and other information defining the program can be found at our web site: <https://www.ans.iastate.edu/undergraduate-students> (<https://www.ans.iastate.edu/undergraduate-students/>). Our program is designed to provide career skills appropriate to job market needs. Our faculty goals include providing superior academic advising to enable students to fulfill their objectives.

Student Learning Outcomes

Learning outcomes for the Animal and Dairy Science majors dictate that, upon completion of the program, graduates will be able to:

- Apply scientifically based practices for the care, management, and study of managed animals and animal products.
- Communicate in oral and written formats.
- Describe the contemporary domestic and global issues impacting animal science.
- Contribute or lead team efforts to achieve group goals.
- Utilize effective life-long learning skills.
- Evaluate the impacts of animal management practices on economic, sociological, and environmental sustainability.

The department offers the degrees Bachelor of Science in animal science and Bachelor of Science in dairy science. A double major in animal and dairy science is not permitted. However, combining either the animal science or dairy science majors with other curricula is permitted. A limit of 6 credits each in Intercollegiate Judging (Animal Science 4750), or any independent study course (4900 courses) can be applied toward a degree. A limit of 4 credits of Undergraduate Teaching Experience (Animal Science 4970) can be applied toward a degree.

The department offers a minor in Animal Science and a minor in Meat Science. Certificates in Beef Cattle Production Management, Dairy Cattle Management, Swine Production Management, Poultry Production Management, and Equine Science and Management are also offered. Both the animal science curricula and dairy science curricula allow complementary work toward admission to veterinary medical school and other professional schools, which may be done while satisfying requirements for the Bachelor of Science degree. A program that combines Bachelor of Science and Master of Science in animal science is offered. In addition, a program that combines a Bachelor

of Science and Master of Business Administration is offered. The Department facilitates student participation in the Midwest Poultry Consortium and the Swine Science Online program to offer additional training in poultry and swine production, respectively.

Curriculum in Animal Science

Students majoring in animal science will complete the degree requirements listed below. If desired, a student may also choose a specialized option. To earn a degree in Animal Science from Iowa State University a minimum of 15 credits in Animal Science must be earned from courses taught in the Animal Science department at ISU. A minimum of 15 credits of animal science coursework must be earned at Iowa State University.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspectives

Approved International Perspectives course
3

U.S. Diversity

Approved U. S. Diversity course
3

Communications Proficiency (with a C or better)

English composition
6

This is only one of many equally-sound schedule sequences.

Free electives and specified group electives are often chosen to complement the student's career focus. The student's academic advisor assists with developing scheduling schemes that prepare students individually for careers in the animal industry. They are explained fully in ANS 1100 and through appointments with the student's advisor.

* Credits currently required for application to Veterinary Medicine program at ISU (55 credits)
 General Chemistry with lab (7)
 Organic Chemistry with lab (4)
 Biochemistry (3)
 General Physics with lab (4)
 General Biology with lab (8)
 Genetics/Animal Breeding (3)
 Mammalian Anatomy and/or Physiology (3)
 English Composition (6)
 Oral Communication (3)
 Humanities and/or Social Sciences (6)
 Other Electives (8)

Minors: Animal Science and Meat Science

All minors require at least 15 credits, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

The department offers a minor in Animal Science. The minor requires:

ANS 1010	Working with Animals	2
ANS 1140	Survey of the Animal Industry	2
ANS 2140	Domestic Animal Physiology	3
ANS 2140L	Domestic Animal Anatomy and Physiology Lab	1
One course from the following:		3
ANS 2160	Equine Science	
ANS 2230	Poultry Science	
ANS 2240	Companion Animal Science	
ANS 2250	Swine Science	
ANS 2260	Beef Cattle Science	
ANS 2290	Sheep Science	
ANS 2350	Dairy Cattle Science	
ANS 2700 & 2700L	Foods of Animal Origin and Foods of Animal Origin Laboratory	
One course from the following:		3
ANS 3130	Exercise Physiology of Animals	
ANS 3190	Animal Nutrition	
ANS 3310	Domestic Animal Reproduction	
ANS 3450	Growth and Development of Domestic Animals	
ANS 3520	Genetic Improvement of Domestic Animals	
One course from the following:		2-3
ANS 3190	Animal Nutrition	
ANS 3200	Animal Feeds and Feeding	
ANS 3310	Domestic Animal Reproduction	
ANS 3240	Food Processing for Companion Animals	
ANS 3360	Domestic Animal Behavior and Well-Being	
ANS 3370	Lactation	
ANS 3450	Growth and Development of Domestic Animals	
ANS 3520	Genetic Improvement of Domestic Animals	
ANS 3600	Fresh Meat Science and Applied Muscle Biology	
ANS 4190	Advanced Animal Nutrition	
Total Credits		16-17

A total of 9 credits must be earned at Iowa State University in animal science coursework that meets a degree requirement for the B.S. degree

in animal science. Students interested in the Animal Science minor should contact an Animal Science advisor.

Minor - Meat Science

The department offers a minor in Meat Science. The minor requires:

ANS 2700	Foods of Animal Origin	2
ANS 2700L	Foods of Animal Origin Laboratory	1
ANS 3600	Fresh Meat Science and Applied Muscle Biology	3
ANS 4600	Science and Technology of Value Added Meat Products	3
One course from the following:		1
ANS 4890	Issues in Food Safety	
ANS 4900C	Independent Study: Meat Science	
5-6 Credits from the following		5-6
ANS 3240	Food Processing for Companion Animals	
FSHN 3050	Food Quality Management and Control	
FSHN 3110	Food Chemistry	
FSHN 4030	Food Laws and Regulations	
FSHN 4060	Sensory Evaluation of Food	
FSHN 4100	Food Analysis	
FSHN 4120	Food Product Development	
FSHN 4200	Food Microbiology	
FSHN 4710	Food Processing	
MICRO 4070	Microbiological Safety of Foods of Animal Origins	
Total Credits		15-16

Students majoring in Animal Science will not be allowed to count the 9 required credits (2700, 2700L, 3600, 4600) toward their Animal Science degree. Students interested in the Meat Science minor should contact an Animal Science advisor.

The Department of Animal Science offers certificates in:

- Beef Cattle Production Management
- Dairy Cattle Production Management
- Equine Science and Management
- Poultry Production Management
- Swine Production Management

All certificates require at least 24 credits, including at least 18 credits at the 3000 or 4000 level. At least 9 credits must be unique to the certificate and will not be applied to a major, minor, or another certificate. All courses applied to the certificate must be taken for a grade. A cumulative GPA of 2.0 is required to complete the program and receive the certificate.

Beef Cattle Production Management Foundation Course (3 credits)

ANS 2260	Beef Cattle Science	3

Fundamental Disciplines in Animal Science (9 credits)

ANS 3200	Animal Feeds and Feeding	3
ANS 3310	Domestic Animal Reproduction	3
ANS 3520	Genetic Improvement of Domestic Animals	3

Expertise Expansion (3 credits)

AGRON 2800	Crop Development, Production and Management	3
AGRON 3340	Forage Crop Management	3
ANS 3330	Embryo Transfer and Related Technologies	3
ANS 3360	Domestic Animal Behavior and Well-Being *	3
ANS 3450	Growth and Development of Domestic Animals *	3
ANS 3600	Fresh Meat Science and Applied Muscle Biology *	3
TSM 3270	Livestock and Poultry Production: Facilities, Technology, and Management *	3
TSM 4550	Feed Processing and Technology	3
TSM 4570	Feed Safety, Ingredient Quality and Analytics	3
VDPAM 4870	Livestock Disease Prevention	3

* Course fulfills the Animal Science degree discipline expansion requirement unless designated as a unique course in the certificate

Enterprise Management (3 credits)

AGEDS 4510	Agricultural Law	3
ECON 2300	Farm Business Management ^	3
ECON 2350	Introduction to Agricultural Markets	3
ECON 3320	Cooperatives	3
ECON 3340	Entrepreneurship in Agriculture	3

^ Course is a prerequisite for ANS 4260

Beef Cattle Production Emphasis (6 credits)

ANS 4260	Beef Cattle Systems Management	3
ANS 3990A	Animal Science Internship: Graded Internship Experience	3

Fundamental Disciplines in Animal Science (9 credits)

ANS 3200	Animal Feeds and Feeding	3
ANS 3310	Domestic Animal Reproduction	3
ANS 3370	Lactation	3

Expertise Expansion (3 credits)

AGRON 2800	Crop Development, Production and Management	3
AGRON 3340	Forage Crop Management	3
ANS 3330	Embryo Transfer and Related Technologies	3
ANS 3350	Dairy Cattle Evaluation	3
ANS 3450	Growth and Development of Domestic Animals *	3
ANS 3520	Genetic Improvement of Domestic Animals	3
ANS 4190	Advanced Animal Nutrition	2
FSHN 4070	Microbiological Safety of Foods of Animal Origins	3
MICRO 3020	Biology of Microorganisms	3
TSM 3270	Livestock and Poultry Production: Facilities, Technology, and Management *	3
TSM 4550	Feed Processing and Technology *	3
TSM 4570	Feed Safety, Ingredient Quality and Analytics *	3

* Courses fulfill the Animal Science degree discipline expansion requirement unless designated as a unique course in the certificate

Enterprise Management (3 credits)

AGEDS 4510	Agricultural Law	3
ECON 2300	Farm Business Management ^	3
ECON 2350	Introduction to Agricultural Markets	3
ECON 3320	Cooperatives	3
ECON 3340	Entrepreneurship in Agriculture	3
ECON 3370	Agricultural Marketing	3

^ Course is a prerequisite for ANS 4340

Dairy Cattle Production Emphasis (6 credits)

ANS 4340	Dairy Systems Management	3
or ANS 4350	Applied Dairy Farm Evaluation	
ANS 3990A	Animal Science Internship: Graded Internship Experience	3

Dairy Cattle Production Management Certificate Foundation Course (3 credits)

ANS 2350	Dairy Cattle Science	3

Equine Science and Management Certificate Foundation Course (3 credits)

ANS 2160	Equine Science	3

Fundamental Disciplines in Animal Science (6 credits)

ANS 3200	Animal Feeds and Feeding	3
ANS 3310	Domestic Animal Reproduction	3

Equine Expertise Expansion (6 credits)

ANS 2170	Equine Farm Practicum	2
ANS 3060	Equine Evaluation	3
ANS 3130	Exercise Physiology of Animals *	3
ANS 3160	Equine Reproduction Lab	3
ANS 3170A	Fundamentals of Equine Behavior and Training: Young Horses at Halter	1
ANS 3170B	Fundamentals of Equine Behavior and Training: Yearlings	3

* Courses fulfill the Animal Science degree discipline expansion requirement unless designated as a unique course in the certificate

Expertise Expansion (3 credits)

ACCT 2150	Legal Environment of Business	3
AGEDS 4510	Agricultural Law	3
AGRON 3340	Forage Crop Management	3
ANS 3330	Embryo Transfer and Related Technologies	3
ANS 3360	Domestic Animal Behavior and Well-Being *	3
ANS 3370	Lactation	3
ANS 3450	Growth and Development of Domestic Animals *	3
ECON 3200	Labor Economics	3
ECON 3340	Entrepreneurship in Agriculture	3

* Courses fulfill the Animal Science degree discipline expansion requirement unless designated as a unique course in the certificate

Equine Management Emphasis (6 credits)

ANS 4150	Equine Systems Management	3
ANS 3990A	Animal Science Internship: Graded Internship Experience	3

Expertise Expansion (3 credits)

ANS 3360	Domestic Animal Behavior and Well-Being *	3
ANS 3450	Growth and Development of Domestic Animals *	3
ANS 3600	Fresh Meat Science and Applied Muscle Biology *	3
TSM 3270	Livestock and Poultry Production: Facilities, Technology, and Management *	3
TSM 4550	Feed Processing and Technology	3
TSM 4570	Feed Safety, Ingredient Quality and Analytics	3
VDPAM 4870	Livestock Disease Prevention	3
ANS 3730A	Poultry Products Technology #	3
ANS 3730B	Applied Avian Physiology #	3
ANS 3730C	Avian Health #	3
ANS 3730D	Poultry Nutrition #	3

* Courses fulfill the Animal Science degree discipline expansion requirement unless designated as a unique course in the certificate

Courses are held as part of the Midwest Poultry Consortium COE courses during the summer

Enterprise Management (3 credits)

AGEDS 4510	Agricultural Law	3
ECON 2300	Farm Business Management	3
ECON 2350	Introduction to Agricultural Markets	3
ECON 3320	Cooperatives	3
ECON 3340	Entrepreneurship in Agriculture	3

Poultry Production Emphasis (6 credits, to include ANS 3990 and choice of one 4000-level management)

ANS 3990A	Animal Science Internship: Graded Internship Experience	3
ANS 4730A	Poultry Enterprise Management #	3
ANS 4730B	Breeder Flock and Hatchery Management #	3

Courses are held as part of the Midwest Poultry Consortium COE courses during the summer

**Poultry Production Management Certificate
Foundation Course (3 credits)**

ANS 2230	Poultry Science	3

Fundamental Disciplines in Animal Science (9 credits)

ANS 3200	Animal Feeds and Feeding	3
ANS 3310	Domestic Animal Reproduction	3
ANS 3520	Genetic Improvement of Domestic Animals	3

**Swine Production Management Certificate
Foundation Course (3 credits)**

ANS 2250	Swine Science	3

Fundamental Disciplines in Animal Science (9 credits)

ANS 3200	Animal Feeds and Feeding	3
ANS 3310	Domestic Animal Reproduction	3
ANS 3520	Genetic Improvement of Domestic Animals	3

Expertise Expansion (3 credits)

ANS 4250	Swine Systems Management	3
ANS 3990A	Animal Science Internship: Graded Internship Experience	3

Graduate Study

The department offers work for the degrees Master of Science and Doctor of Philosophy with majors in animal breeding and genetics; meat science; animal physiology; animal science; and an interdepartmental program in nutritional sciences which has an option in animal nutrition. Minor work is offered in these areas to students taking major work in other departments.

A strong undergraduate program is required for students interested in graduate study. Fundamental training in biology, chemistry, mathematics, and statistics is requisite to a satisfactory graduate program. Graduate

programs in animal science include supporting work in areas such as agricultural engineering, agronomy; anatomy; biochemistry; chemistry; economics; environmental science; food science and human nutrition; genetics; microbiology; physics; physiology; and statistics. Students may choose graduate programs involving a co-major with one of these areas. Graduate work in meat science is offered as a co-major in animal science and food science and human nutrition.

The department also cooperates in the interdepartmental program in professional agriculture and interdepartmental majors in genetics, immunobiology, microbiology, MCDB (molecular, cellular, and developmental biology), neuroscience, nutritional sciences, and toxicology (see Index (<http://catalog.iastate.edu/azindex/>)).

The foreign language requirement, if any, is established on an individual basis by the program-of-study committee appointed to guide the work of the student.

Biochemistry (AGLS)

The Roy J. Carver Department of Biochemistry, Biophysics and Molecular Biology (<https://www.bbmb.iastate.edu>) offers majors in biochemistry in the College of Liberal Arts and Sciences and in the College of Agriculture and Life Sciences. Biochemists seek to understand life processes in terms of chemical and physical principles. Students in the biochemistry majors develop foundational analytical skills while exploring frontiers in biotechnology and medicine. Graduates in biochemistry will have a rigorous background in chemistry, biology, and physics. Biochemistry coursework focuses on the development of problem-solving skills, critical thinking, communication, and research design. The Biochemistry degree includes focused specializations towards professional goals, including three prescribed options: **Research & Biotechnology**, **Pre-Medicine**, and **Biophysics**.

Graduates with a Biochemistry B.S. degree will be prepared for postgraduate studies in the chemical or biological sciences, medical and health professional training, or immediate laboratory research in biochemistry, biotechnology, or pharmacy. Graduates are also equipped to pursue careers in teaching, technical writing, science communication and policy, intellectual property law, and biotechnology entrepreneurship. The biochemistry major is accredited by the American Society for Biochemistry and Molecular Biology (ASBMB). As such our learning objectives align with ASBMB core concepts.

Student Learning Outcomes

Upon graduation, students should be able to:

- Explain and provide examples to illustrate the biochemical principles underlying the following:

- a. How energy is required and transformed in biological systems.
- b. How macromolecular structure determines function and regulation.
- c. How information storage and flow are dynamic and interactive.
- d. How biochemistry and biology are driven by evolution and homeostasis
- Apply and justify appropriate techniques to characterize and quantify biomolecules in biological systems.
- Execute effective multimodal communication of the research process and results.
- Implement and justify best practices for laboratory safety and research ethics.

College of Agriculture and Life Sciences Learning Outcomes

Graduates with a Biochemistry B.S. degree from the College of Agriculture and Life Sciences should be able to:

- Explain the role of biochemistry in biotechnology entrepreneurship, pharmaceuticals, agriculture, and allied fields.
- Demonstrate collaboration and leadership in research teams.
- Explain biochemical cycles that impact global ecosystems.

Biochemistry Major in the College of Agriculture and Life Sciences

The Bachelor of Science (B.S.) degree in Biochemistry requires the Biochemistry Core and one of the following three prescribed options. The options represent focused specializations for professional goals, including **Research & Biotechnology**, **Pre-Medicine**, and **Biophysics**. As majors in the College of Agriculture and Life Sciences, Biochemistry students must meet College of Agriculture and Life Sciences and University-wide requirements for graduation in addition to those stated below. Focus option-approved science electives can be found on the Biochemistry website (<https://www.bbmb.iastate.edu/approved-course-lists/>).

Total Degree Requirement: 120 cr.

CALS majors require a minimum of 120 credits, including a minimum of 45 credits at the 3000/4000 level. Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

3 cr. from approved International Perspective list: <http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current> (<http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/>)

U.S. Diversity: 3 cr.

3 cr. from approved U.S. Diversity list: <http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses> (<https://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses/>)

College of Agriculture and Life Sciences General Education Electives: 9 cr.

Humanities

3 cr. from approved humanities list: <http://www.cals.iastate.edu/student-services/humanities> (<http://www.cals.iastate.edu/student-services/humanities/>)

Social Sciences

3 cr. from approved social sciences list: <http://www.cals.iastate.edu/student-services/social-sciences> (<http://www.cals.iastate.edu/student-services/social-sciences/>)

Ethics

3 cr. from approved ethics list: <http://www.cals.iastate.edu/student-services/ethics> (<http://www.cals.iastate.edu/student-services/ethics/>)

Communications Proficiency: 11 cr.

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
	or ENGL 2500H Written, Oral, Visual, and Electronic Composition: Honors	
SPCM 2120	Fundamentals of Public Speaking	3
LIB 1600	Introduction to College Level Research	1
BBMB 3110	Writing Scientific Reports in Biochemistry *	1
*BBMB 3110 fulfills the upper-level Communications Proficiency Requirement		
Total Credits		11

Biochemistry Core

The major in biochemistry requires completion of the Biochemistry Core and one of three focus options. Each defined option includes specific supporting coursework in Biology; Chemistry; Mathematics and/or Statistics.

BBMB 1010	Introduction to Biochemistry	1
BBMB 1020	Introduction to Biochemistry Laboratory	1
BBMB 2010	Chemical Principles in Biological Systems	2
BBMB 3110	Writing Scientific Reports in Biochemistry ¹	1
BBMB 3120	Experimental Research Skills in Biochemistry	2
BBMB 4040	Biochemistry I	3-4

or BBMB 5040	Amino Acids and Proteins	
& BBMB 5050	and Bioenergetics and Metabolism	
BBMB 4050	Biochemistry II	3-4
or BBMB 5060	Membrane Biochemistry	
& BBMB 5070	and Biochemistry of Nucleic Acids	
BBMB 4100	Analysis of Scientific Literature	2
BBMB 4110	Techniques in Biochemical Research	4
BBMB 4610	Molecular Biophysics	2
BBMB 5610L	Laboratory in Molecular Biophysics	2-3
or CHEM 3220L	Laboratory in Physical Chemistry	
PHYS 2310	Introduction to Classical Physics I	5
& 2310L	and Introduction to Classical Physics I Laboratory	
PHYS 2320	Introduction to Classical Physics II	5
& 2320L	and Introduction to Classical Physics II Laboratory	
BBMB 4990	Undergraduate Research (highly encouraged elective)	arr †
Total Credits		33-36 †

† Arranged with instructor.

¹ BBMB 3110 fulfills the ISU upper-level Communication Proficiency requirement.

Biochemistry Program of Study: Research & Biotechnology

Students interested in careers in biotechnology research and/or graduate studies in biochemistry, chemistry, or bioscience fields may opt for the Research & Biotechnology Option. The College of Agriculture and Life Sciences (CALS) electives allow specialization in agricultural biochemistry or plant biochemistry.

In addition to the Biochemistry Core (above):

CHEM 2010	Advanced General Chemistry	5-7
or CHEM 1770	General Chemistry I	
& CHEM 1780	and General Chemistry II	
CHEM 2010L	Laboratory in Advanced General Chemistry	1
or CHEM 1770L	Laboratory in General Chemistry I	
or CHEM 1770LL	Laboratory in General Chemistry I	
CHEM 3250	Chemical Thermodynamics	3
CHEM 3310	Organic Chemistry I	3
CHEM 3320	Organic Chemistry II	3
CHEM 3330L	Laboratory in Organic Chemistry I (for Chemistry and Biochemistry Majors)	1-2
or CHEM 3310LL	Laboratory in Organic Chemistry I	

CHEM 3340L	Laboratory in Organic Chemistry II (for Chemistry and Biochemistry Majors)	1-2
or CHEM 3320L	Laboratory in Organic Chemistry II	
MATH 1650	Calculus I	8
& MATH 1660	and Calculus II	
STAT 2010	Introduction to Statistical Concepts and Methods	4
or STAT 3050	Engineering Statistics	
BIOL 2110	Principles of Biology I	3
BIOL 2120	Principles of Biology II	3
BIOL 3130	Principles of Genetics	4
& 3130L	and Genetics Laboratory	
BIOL 3140	Principles of Molecular Cell Biology	3
Agricultural & Molecular Sciences from approved list		9
Total Credits		51-55

Biochemistry Program of Study: Pre-Medicine

Students interested in qualifying for medical school training for careers as a Doctor of Medicine (MD) or Doctor of Osteopathic Medicine (DO) may opt for the Pre-Medicine Option. Allied health professions (e.g., Physician Assistant, Dentistry, and Ophthalmology) may also consider the Pre-Medicine Option. The CALS option is especially suited to careers in Veterinary Medicine.

In addition to the Biochemistry Core (above):

CHEM 1770	General Chemistry I	6-9
& 1770L	and Laboratory in General Chemistry I	
& CHEM 1780	and General Chemistry II	
& CHEM 1780L	and Laboratory in College Chemistry II	
or CHEM 2010	Advanced General Chemistry	
& 2010L	and Laboratory in Advanced General Chemistry	
CHEM 3250	Chemical Thermodynamics	3
CHEM 3310	Organic Chemistry I	4
& 3310L	and Laboratory in Organic Chemistry I	
CHEM 3320	Organic Chemistry II	4
& 3320L	and Laboratory in Organic Chemistry II	
MATH 1650	Calculus I	8
& MATH 1660	and Calculus II	
STAT 2010	Introduction to Statistical Concepts and Methods	3-4
or STAT 3050	Engineering Statistics	
PSYCH 1010	Introduction to Psychology	3
or PSYCH 2300	Developmental Psychology	
SOC 1340	Introduction to Sociology	3
BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1

BIOL 2120	Principles of Biology II	3
BIOL 2120L	Principles of Biology Laboratory II	1
BIOL 3130	Principles of Genetics	3
BIOL 3140	Principles of Molecular Cell Biology	3
Physiology & Bioscience Electives from approved list		6
Total Credits		54-58

Biochemistry Program of Study: Biophysics

Students interested in research careers focused on the biophysical basis of life processes may opt for the Biophysics Option. The CALS electives offer specialization in agricultural biophysics or plant biophysics.

In addition to the Biochemistry Core (above):

CHEM 2010	Advanced General Chemistry	5-7
or CHEM 1770 General Chemistry I & CHEM 1780 and General Chemistry II		
CHEM 2010L	Laboratory in Advanced General Chemistry	1
or CHEM 1770L Laboratory in General Chemistry I or CHEM 1770LLaboratory in General Chemistry I		
CHEM 3240	Introductory Quantum Mechanics	3
CHEM 3250	Chemical Thermodynamics	3
CHEM 3310	Organic Chemistry I	3
CHEM 3320	Organic Chemistry II	3
MATH 1650	Calculus I	8
& MATH 1660 and Calculus II		
MATH 2650	Calculus III	4
MATH 2660	Elementary Differential Equations	3
MATH 3170	Theory of Linear Algebra	4
STAT 2010	Introduction to Statistical Concepts and Methods	4
or STAT 3050 Engineering Statistics or STAT 2310 Probability and Statistical Inference for Engineers		
COMS 2070	Fundamentals of Computer Programming	3
BIOL 2110	Principles of Biology I	3
BIOL 2120	Principles of Biology II	3
Agricultural & Physical Sciences from approved list		6
Total Credits		56-58

The Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology offers a minor in Biochemistry.

BBMB 4040	Biochemistry I	3
BBMB 4050	Biochemistry II	3
BBMB 3120	Experimental Research Skills in Biochemistry	2
One course from the following:		2-3
BBMB 4610	Molecular Biophysics (2 cr)	
BBMB 5610	Molecular Biophysics (2 cr)	
CHEM 3250	Chemical Thermodynamics (3 cr)	
3000+ level courses in BBMB or CHEM to 15 cr total		5-6

Total Credits **15-17**

All minors require at least 15 credits, including at least 6 credits in course numbered 3000 or above taken at Iowa State University. The minor must

include at least 9 credits that are not used to meet any other department, college, or university requirement.

Concurrent Bachelor of Science (B.S.)/ Master of Science (M.S.) Degrees

The department offers a concurrent enrollment degree program in either Biochemistry or Biophysics that allows ISU undergraduate students to obtain both the B.S. and M.S. degrees in about five years. The program is open to undergraduate students in the College of Liberal Arts and Sciences and in the College of Agriculture and Life Sciences. The concurrent degrees can be useful to students entering various career tracks. For those considering careers as research specialists, entry positions with higher-level responsibilities, and a higher-level salary, are made possible with the M.S. degree. For those considering careers as research directors, which require advanced study, the M.S. degree provides an advantage for admission into Ph.D. programs at the most competitive and prestigious graduate schools. Similarly, the M.S. degree can be a competitive advantage for admission in to medical, dental, law, veterinary medicine, or other professional schools.

Application to the program is made near the end of the junior undergraduate (third) year. Concurrent B.S./M.S. degree students begin research for the M.S. thesis during the summer semester after their junior year and are eligible for research assistantships, which are renewable based on academic standing and satisfactory research performance. The M.S. thesis requires intensive experience in original, independent laboratory research under the close supervision of a faculty mentor. To apply, see the concurrent B.S./M.S. application instructions found on the department's Graduate Study web page (<https://www.bbmb.iastate.edu/graduate-study/>).

Concurrent Bachelor of Science/Graduate Certificate

The Bachelor of Science /Graduate Certificate program is intended for exceptional undergraduate students majoring in Biochemistry. In this program, the student completes all of the requirements for the B.S. degree and the graduate certificate in a four-year period by combining the requirements of the two programs. The student enters the Graduate College after he/she achieves junior status and develops a plan of coursework (graduate and undergraduate) subject to the approval of the Director of Certificate (DOC). Required graduate courses are BBMB 5040, BBMB 5050, BBMB 5060, BBMB 5070, BBMB 5610 and BBMB 5610L. The student must satisfy the requirements of the B.S. in Biochemistry (121 credits) and the Graduate Certificate in Biochemistry (12 credits). Six credits of graduate coursework can satisfy some requirements of the B.S. degree. To apply for the B.S./Graduate Certificate, submit the application form found on the Graduate College Forms web page.

Biochemistry and Biophysics are the science and technology used to understand the mechanisms underlying biological processes at the molecular level, with an emphasis on the fundamental relationships

among the chemical, physical, and biological sciences. The Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology (BBMB) administers Doctor of Philosophy (Ph.D.), Master's (M.S.), and Graduate Certificate programs (<https://www.bbmb.iastate.edu/graduate-study/>) that lead to an advanced degree or certificate in these disciplines. The prerequisite to graduate study is a sound undergraduate background in biology, chemistry, mathematics, and physics.

BBMB offers Doctor of Philosophy and master's degrees in Biochemistry and in Biophysics that are designed to train students to independently conceive and carry out original research. BBMB also offers two graduate certificate programs in Biochemistry that provide a mechanism for formal recognition of focused graduate study in a specialized area that is less comprehensive than that required for a master's degree. BBMB participates in the Interdepartmental majors of Bioinformatics and Computational Biology; Genetics and Genomics; Immunobiology; Molecular, Cellular, and Developmental Biology; Neuroscience; Plant Biology; and Toxicology. All graduate degree students in BBMB are required to teach as part of their training.

Master's (M.S.) Degree

The M.S. degree programs in Biochemistry and in Biophysics are useful for students who prefer to undertake research training without the longer-term commitment required for the Ph.D. degree. It is also useful for students interested more in the technical aspects of research rather than in careers as research directors. The program requires about 3 years on average to complete and the successful defense of an independent research dissertation is required. About half the time required to earn the degree is spent on advanced coursework and professional seminars, and the other half is devoted to research undertaken in the laboratory under the close supervision of a faculty mentor. Financial support is available. To apply, applicants first submit the free BBMB online application found on the department website, which is used as a screening tool.

NOTE: Students interested in a research career are encouraged to consider the Ph.D. track. Students may enter the Biochemistry or Biophysics M.S. degree program as a direct admit to a faculty research group at any time during the year.

Doctor of Philosophy (Ph.D.) Degree

The Ph.D. programs in Biochemistry and in Biophysics are designed to train students in the ability to independently conceive and carry out original research in the general area of the chemistry or physics of the processes of life. The programs require about 5-6 years on average to complete and the successful defense of an independent research dissertation. The majority of the time required to earn the degree is spent doing research on the dissertation project in the laboratory under the close supervision of a faculty mentor. Considerable time also is devoted to advanced coursework and professional seminars. Financial support is available. To apply, applicants first submit the free BBMB

online application found on the department website, which is used as a screening tool. Students may enter the Biochemistry or Biophysics Ph.D. degree programs either as a rotation student in the fall semester or as a direct admit to a faculty research group at any time during the year.

Minor in Biochemistry

Graduate students in other M.S. and/or Ph.D. programs at ISU can earn a graduate minor in Biochemistry by completing 12 credits of the following courses with a grade point average of 3.0 or above: at least 6 credits from BBMB 5040, BBMB 5050, BBMB 5060 and BBMB 5070 and at least 6 credits of other BBMB 5000- and 6000-level courses. A student wishing to declare a minor in Biochemistry should arrange for a member of the graduate faculty in Biochemistry to serve on the POS Committee and submit the required form found on the Graduate College Forms page.

Graduate Certificate in Biochemistry

The graduate certificate in Biochemistry is designed for students who have a B.S. degree in Biochemistry or a related field and wish to advance their knowledge by taking additional coursework at the graduate level. The graduate certificate courses may be taken either on-line or on campus. Candidates for a graduate certificate in Biochemistry are admitted in the Graduate College. A total of 12 credits is required that includes BBMB 5040, BBMB 5050, BBMB 5060 and BBMB 5070, plus four additional credits of BBMB coursework at the 5000-level. The 12 credits earned in the graduate certificate program may be applied to meet the course requirements of a M.S. or Ph.D. program in Biochemistry at Iowa State University (ISU) if the student is accepted into one of these programs. To apply for the graduate certificate in Biochemistry, submit the ISU online application.

Biology

Interdepartmental Undergraduate Program

Iowa State University is a major center for research and education in the biological sciences. With over 200 faculty in the life sciences, students have the opportunity to learn from some of the nation's leaders in biological research and teaching and to participate in innovative, meaningful research projects that explore frontiers of biology. Few other universities have such a wealth of faculty expertise available to undergraduate students, making Iowa State's Biology Program the logical choice for those who want to participate in a thriving academic community.

The faculties of the Department of Ecology, Evolution, and Organismal Biology and the Department of Genetics, Development, and Cell Biology jointly offer the undergraduate biology major. This high-quality academic program has the flexibility to accommodate a range of career goals while taking advantage of the university's strengths in science and technology. A bachelor's degree in biology provides excellent preparation

for graduate study in biological disciplines ranging from the molecular to the ecological levels, and for entrance into various professional schools, such as human medicine, physical therapy, or veterinary medicine. The major is well suited for those who plan to teach biology, who wish to enter government or industrial employment in health or environmental professions, or who prefer educational breadth as an end in itself. By working with our professional advisors, it is possible to design a unique program of study that will meet student needs and objectives.

Students with special interests and aptitudes should consider combining biology with a minor or a second major in another subject, such as chemistry, environmental studies, journalism, mathematics, music, statistics, or many other subjects offered by the university.

Customizing a Degree

Biology encompasses an amazing diversity of disciplines and scales of study ranging from molecules to the biosphere. The biology major offers a rich variety of coursework addressing most of the areas of biology. The major's curriculum requirements offer tremendous flexibility in creating an individualized program of study to facilitate achievement of a student's career goals, while simultaneously assuring some exposure to all areas of biology and providing complementary knowledge from supporting courses in chemistry, physics, and math/statistics.

While flexibility is the hallmark of the biology major, the breadth of the field can also be challenging. Thus, in an effort to provide more guidance to students who desire such, the major also provides six advising tracks, or areas of specialization, for students who wish to focus on subfields of biology or who have specific career goals in mind. Course plans for each area of specialization are listed on the biology web site. The areas are:

Pre-medical and Human Health Professions—This area emphasizes preparation for further study in medical school or allied human health professions such as dentistry, optometry, genetic counseling, physical therapy, occupational therapy, physician assistant, nursing, chiropractic, and others. It also will prepare students for a broad range of careers in the biological sciences. Students are urged to determine the specific entrance requirements for the professional schools where they might study and to plan a program of study accordingly, in addition to following the basic plan.

Pre-veterinary—An eventual degree in Veterinary Medicine can lead to a wide variety of careers, including private clinical practice in small animal medicine or agricultural animal production. But pre-veterinary students can also prepare themselves for careers in animal research, public health, laboratory animal medicine, food safety, regulatory medicine, and education. Specific requirements for entrance to the Iowa State Veterinary College or other schools should be consulted as programs of study are planned, in addition to following the basic plan.

Molecular and Cellular Biology—Students specializing in this field will explore the structure, function, and interactions of the molecules and sub-cellular features that make up living cells. This area is particularly designed for those who plan to pursue a career in research in molecular or cell biology or in related areas such as biochemistry, genetics, microbiology, developmental biology, human medicine, or veterinary medicine. Many students in this area will choose to go on to graduate school.

Ecology and Conservation Biology—Ecologists examine the interactions and relationships that living organisms have with each other and their environment. Conservation biologists study the nature and status of Earth's biodiversity with the aim of protecting species, their habitats, and ecosystems from excessive rates of extinction and loss. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Evolution and Biodiversity—This area provides students with a sound understanding of evolutionary principles and the biological patterns that result from evolutionary change. Students have the opportunity to explore, in depth, the biodiversity found within a wide range of groups of organisms. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Teacher licensure—Biology majors seeking recommendation for licensure to teach biology in secondary schools must meet requirements of the Teacher Education Program as well as those of the Biology Program. In addition, they must apply formally for admission to the teacher education program. See the section on Teacher Education for a list of licensure areas, degree requirements, and other information about this program.

Other Opportunities

Undergraduate research—Students who have interests in biological research are encouraged to become involved in the research projects of faculty members on campus. Those doing so may receive credit for the experience in BIOL 4990 Undergraduate Research Experience. Making the effort to find a suitable research mentor and engaging in research work can be one of the most valuable experiences of an undergraduate education. Internship experiences are often available at other universities, zoos, museums, governmental and non-governmental entities focused on environmental issues, and industrial or government laboratories. Students participating in such projects may receive internship credit in BIOL 4940 Biology Internship.

Field trip courses – The Biology Program offers two field trip courses: BIOL 3930 (North American Field Trips in Biology) and BIOL

3940 (International Field Trips in Biology). In recent years field trip opportunities to Honduras and Spain have been available. These courses involve a pre-trip seminar followed by one-week to one-month long field trip at a time when academic year classes are not in session. The classes are low enrollment and allow extensive interaction between instructors and students in locations of biological interest.

International experience—Because major discoveries in science often result from global efforts, biology majors are encouraged to include an international or study abroad component in their degree programs. This can be done by participating in international field trips originating from the ISU campus in BIOL 3940 International Field Trips in Biology. In addition, many students choose to study abroad, attending a university in another country for up to a year as an exchange student. Minors in a foreign language can also add an international emphasis to a degree in biology.

Courses Offered at Other Locations

In addition to biological science courses taught on campus, students may take courses at various remote locations and arrange to have the credits count toward the advanced courses required in the biology major. Attending a summer field station adds an important component to an undergraduate program of study.

Gulf Coast Research Laboratory—The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for marine biology courses and transfer credit to their degree programs under the number BIOL 4800 Studies in Marine Biology. Written permission of the Biology Program Director is required for this arrangement.

Summer Biological Field Stations—Courses taken at summer field stations may be transferred to Iowa State University as credit in BIOL 4810 Summer Field Studies. Such stations are found throughout the country and often offer courses that emphasize the adaptation of plants and animals to unique environments. See www.biology.iastate.edu (<http://www.biology.iastate.edu>) for links to Iowa Lakeside Laboratory and other field stations in different biomes, e.g., marine/coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mts., etc.

Organization for Tropical Studies—Iowa State students may register for courses in tropical biology taught in Costa Rica by the Organization for Tropical Studies. Credit is transferred to Iowa State as BIOL 4820 Tropical Biology. For further information, contact the Biology Student Services Office in 103 Bessey Hall.

Student Learning Outcomes

Upon graduation, students should be able to:

- Explain and apply the core biological concepts of:
 - Evolution
 - Structure and function
 - Information flow, exchange, and storage
 - Pathways and transformations of energy and matter
 - How systems are interconnected and interact:
- Apply the process of science.
- Use quantitative reasoning.
- Use modeling and simulation.
- Utilize, communicate with, and collaborate with other disciplines.
- Understand the relationship between science and society.

Undergraduate Study

Biology majors start their studies in the biological sciences by taking a two-semester long Principles of Biology course sequence:

BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
BIOL 2120	Principles of Biology II	3
BIOL 2120L	Principles of Biology Laboratory II	1

During the first year, students also take BIOL 1100 Introduction to Biology and BIOL 1110 Opportunities in Biology, which are half-semester courses designed to introduce the student to the discipline of biology and opportunities for careers in biology. Students transferring into the biology major take BIOL 1120 in place of BIOL 1100 and BIOL 1110.

Students then explore, in any order depending on their interests, four upper-level core courses including: concepts of ecology in BIOL 3120; the principles of genetics in BIOL 3130 and BIOL 3130L; cell and molecular biology in BIOL 3140; and evolutionary biology in BIOL 3150. Biology majors must take an additional 21 credits of advanced biological science courses at the 3000 level, or above, from an approved list of courses. Many of these courses have as prerequisites BIOL 2110/L and BIOL 2120/L, so students do not need to complete the four upper-level core courses before taking advanced courses. Of these advanced courses, at least 9 credits must be taken as BIOL courses, and a minimum of two laboratory or field courses must also be included from an approved list.

Biology majors should carefully consider their selection of upper-level courses to allow them to emphasize one, or more, of the sub-disciplines of Biology relevant to their post-baccalaureate objectives. Most biology courses numbered 3000 or above can be used to satisfy the additional credit requirement. Some courses taught in other departments can also be applied to the biology major. Advanced students should consider including 5000 level courses in their programs. The Biology Program's web site has a complete listing of acceptable upper-level life science courses.

Biology majors must demonstrate competency in their understanding of the biological sciences. A 2.0 cumulative average is required in biology and advanced biology coursework. In order to graduate, a student must have a cumulative average in the major of at least 2.00.

General requirements

Students may earn the B.S. degree in Biology from either the College of Liberal Arts and Sciences or from the College of Agriculture and Life Sciences. Students in the College of Liberal Arts and Sciences must fulfill the College of Liberal Arts and Sciences and University-wide requirements for graduation in addition to those stated for the major. Students in the College of Agriculture and Life Sciences must meet University-wide requirements for graduation and requirements for that college. Contact the Student Services Office for details regarding differences in general education and course requirements that are specific to these colleges.

Supporting course requirements – Understanding biology requires a basic understanding of the physical sciences and mathematics. Consequently, a minimum number of credits in general chemistry, organic chemistry, biochemistry, and physics is required. See the Biology Program Web Site for specific supporting science requirements.

The Math requirement is competency based. After demonstrating competency in algebra and trigonometry, biology majors must take two semesters of calculus; or two semesters of Statistics; or one semester of calculus and one semester of Statistics chosen from a list of approved courses available on the Biology Program Web Site and in the Biology Program Office.

Given the important role of communications in the modern sciences, biology majors must demonstrate communication competency by earning a minimum of C in ENGL 2500 Written, Oral, Visual, and Electronic Composition or equivalent composition courses and in one advanced writing course numbered ENGL 3020 through ENGL 3160, or JLMC 3470, or SPCM 2120. (Students in the College of Agriculture and Life Sciences are required to earn a C or better in ENGL 1500, as well.)

Curriculum in Biology

Administered by the Departments of Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology. Students should consult the Biology Student Services Office, 103 Bessey (or biology@iastate.edu) for the appropriate course selections for professional or graduate school preparation.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Biology: 23.5 cr.

2.00 GPA average required.

BIOL 1100	Biology Major Orientation	1
BIOL 1110	Opportunities in Biology	0.5
BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
BIOL 2120	Principles of Biology II	3
BIOL 2120L	Principles of Biology Laboratory II	1
BIOL 3120	Ecology	4
BIOL 3130	Principles of Genetics	3
BIOL 3130L	Genetics Laboratory	1
BIOL 3140	Principles of Molecular Cell Biology	3
BIOL 3150	Biological Evolution	3
Total Credits		23.5

Advanced Biology: 21 cr.

2.00 GPA average required. Must include two approved Advanced Biology labs. See the Biology Program website for list of approved Advanced Biology courses, or consult an advisor in the Biology Student Services office, 103 Bessey Hall.

Biology advanced courses (from approved list)	9
Additional approved biology advanced courses	12
Total Credits	21

Mathematical Sciences 7 cr.

Students in College of Agriculture and Life Sciences must have a Math and Statistics.

MATH 1600 or MATH 1650 and STAT 1010 or STAT 1040

Or		
MATH 1650	Calculus I	8
& MATH 1660	and Calculus II	
Or		
STAT 1010 or STAT 1040 and STAT 3010		4-7

Physical Sciences

General Chemistry: 5 cr. minimum

Total Credits: 120.5-121.5**Minor**

A minor in Biology is offered by the Biology Program. The minor requires 15 credits in Biology and includes the completion of the specific courses listed below and 7 credits in biology courses numbered 3000 or above. Nine (9) credits of the required courses must apply only to the minor. For more information, see the Biology Program web site or contact the Student Services Office in 103 Bessey Hall.

BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
BIOL 2120	Principles of Biology II	3
BIOL 2120L	Principles of Biology Laboratory II	1
Total Credits		8

Graduate Programs

Biology is an undergraduate major only. Persons interested in graduate study in the biological sciences should apply directly to one of the life science graduate programs at Iowa State University.

Programs

- Bioinformatics and Computational Biology
- Ecology and Evolutionary Biology
- Genetics
- Molecular Cellular and Developmental Biology
- Neuroscience
- Plant Biology
- Toxicology
- Immunobiology
- Environmental Science

Interdisciplinary Graduate Studies

A non-thesis master's degree in Interdisciplinary Graduate Studies (biological sciences) has been established particularly for those who wish to have a more diversified program of advanced study than that generally permitted by specific departments and programs.

Culinary Food Science (AGLS)

The Culinary Food Science degree program is a food science-based degree in which students develop basic culinary skills along with knowledge of the accompanying sciences. As a graduate, you'll combine food product development skills and entrepreneurial talents with scientific and technological knowledge.

The department also offers a culinary food science minor.

Student Learning Outcomes

Upon graduation, students should be able to:

- Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
- Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
- Participate effectively in a group or team.
- Integrate creativity, innovation, or entrepreneurship in ways that produce value.
- Describe sociocultural competence relative to diversity, equity and/or inclusion.
- Explain how human activities impact the natural environment and how societies are affected.
- Meet program specific learning outcomes for the Culinary Food Science major.

Degree Requirements

Administered by the Department of Food Science and Human Nutrition

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 10 cr.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
LIB 1600	Introduction to College Level Research	1

SPCM 2120	Fundamentals of Public Speaking	3
Total Credits		10

Humanities and Social Sciences: 9-15 cr.

FSHN 2200	American Food and Culture	3
ECON 1010	Principles of Microeconomics	3

If a Culinary Food Science student in the College of Human Sciences, select:

Additional Humanities course		
Additional Humanities or Social Science course		

Ethics: 3 cr. (Included as part of the Humanities and Social sciences requirement)

FSHN 3420	World Food Issues: Past and Present	3

Mathematical Sciences: 6-8 cr.

Select at least 3 credits from: 3-4

MATH 1400	College Algebra	
MATH 1430	Preparation for Calculus	
MATH 1600	Survey of Calculus	
MATH 1650	Calculus I	

Select at least 3 credits from: 3-4

STAT 1010	Principles of Statistics	
STAT 1040	Introduction to Statistics	

Total Credits **6-8**

Physical Sciences: 9 cr.

CHEM 1630	College Chemistry	4
or CHEM 1770 General Chemistry I		
CHEM 1630L	Laboratory in College Chemistry	1
or CHEM 1770L Laboratory in General Chemistry I		
CHEM 2310	Elementary Organic Chemistry	3
CHEM 2310L	Laboratory in Elementary Organic Chemistry	1

Total Credits **9**

Biological Sciences: 10-11 cr.

BBMB 3010	Survey of Biochemistry	3
BIOL 2120	Principles of Biology II	3
BIOL 2120L	Principles of Biology Laboratory II	1
MICRO 2010	Introduction to Microbiology	2-3
or MICRO 3020 Biology of Microorganisms		
MICRO 2010L	Introductory Microbiology Laboratory	1
or MICRO 3020L Microbiology Laboratory		

Total Credits **10-11**

Animal Science Coursework: 6 cr.

ANS 2700	Foods of Animal Origin	2
ANS 2700L	Foods of Animal Origin Laboratory	1
ANS 4600	Science and Technology of Value Added Meat Products	3

Total Credits **6**

Food Science and Human Nutrition: 42 cr.

FSHN 1010	Food and the Consumer	3
FSHN 1040	Introduction to Professional Skills in Culinary Science	1
FSHN 1100	Professional and Educational Preparation	1
FSHN 1670	Introductory Human Nutrition and Health	3
FSHN 2030	Contemporary Issues in Food Science and Human Nutrition	1
FSHN 2140	Scientific Study of Food	3
FSHN 2150	Advanced Food Preparation Laboratory	2
FSHN 2650	Nutrition for Active and Healthy Lifestyles	3
FSHN 3050	Food Quality Management and Control	2
FSHN 3110	Food Chemistry	3
FSHN 3110L	Food Chemistry Laboratory	1
FSHN 3140	Professional Development for Culinary Food Science and Food Science Majors	1
FSHN 4030	Food Laws and Regulations	2
FSHN 4060	Sensory Evaluation of Food	3
FSHN 4070	Microbiological Safety of Foods of Animal Origins	3
FSHN 4110	Food Ingredient Interactions and Formulations	2
FSHN 4120	Food Product Development	3
FSHN 4200	Food Microbiology	3

Take one of the following courses for 2 credits: 2

FSHN 4910B	Supervised Work Experience: Food Science	
or FSHN 491 Supervised Work Experience: Culinary Science		

Total Credits **42**

Hospitality Management: 12 cr.

HSPM 1330	Food Safety Certification	1
HSPM 3800	Food Production Management	3
HSPM 3800L	Food Production Management Experience	3
HSPM 3830	Wine and Spirits in Hospitality Management	2
or FSHN 5090 Sensory Evaluation of Wines		
HSPM 4870	Fine Dining Management	3

Total Credits **12**

Electives 1-13 cr. Select from any university coursework to earn at least 120 total credits.

Go to FSHN courses.

Culinary Food Science, B.S.

16		15	

* Choose elective courses to total equal to or greater than 120 credits.

Planned course offerings may change and students need to check the online Schedule of Classes each term to confirm course offerings: <https://classes.iastate.edu> (<https://classes.iastate.edu/>). This sequence is only an example. The number of credits taken each semester should be based on the individual student's situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

More information on the Culinary Food Science minor can be found here: www.catalog.iastate.edu/collegeofagricultureandlifesciences/foodscienceandhumannutrition/#undergraduateminortext.

Dairy Science

Students majoring in Dairy Science will complete the degree requirements listed here. If desired, a student may also include the specialized option in pre-veterinary medicine. A minimum of 15 credits of animal science coursework must be earned at Iowa State University.

Student Learning Outcomes

Upon graduation, students should be able to:

- Demonstrate a comprehensive knowledge of dairy science, dairy management, and agribusiness.
- Exhibit effective communication skills.

- Integrate information to solve problems.
- Effectively employ skills as a self-learner.
- Participate as team leaders and team builders.
- Demonstrate awareness of contemporary issues that drive change in animal industries.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Important Note: This is only one of many equally-sound schedule sequences.

Free electives and specified group electives are often chosen to complement the student's career focus. The student's academic advisor assists with developing scheduling schemes that prepare students individually for careers in the animal industry. They are explained fully in ANS 1100 and through appointments with the student's advisor in Dairy Science. Typical career areas include Advanced Degree in Dairy Science, Business and Finance, Agriculture Promotion and Information, Dairy Food Industry, Agricultural Sales and Marketing, International Agriculture, Animal Production and General Agribusiness and Pre-Veterinary Medicine.

Diet and Exercise (AGLS) OVERVIEW

Diet and Exercise, B.S./M.S.

Administered by the Department of Food Science and Human Nutrition and Department of Kinesiology.

This is an accelerated program with concurrent enrollment in the undergraduate and graduate degree programs. Courses included have been approved as meeting the academic requirements of the Didactic Program in Dietetics (DPD) in preparation for admission to accredited dietetics internship programs; the DPD is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. There is a \$30 fee for the verification statement of completion of the accredited dietetics program. Additionally, courses are included to meet the American College of Sports Medicine (ACSM) requirements for certification at the level of Certified Exercise Physiologist.

Student Learning Outcomes

Upon graduation, students should be able to:

- Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
- Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
- Participate effectively in a group or team.
- Integrate creativity, innovation, or entrepreneurship in ways that produce value.
- Describe sociocultural competence relative to diversity, equity and/or inclusion.
- Explain how human activities impact the natural environment and how societies are affected.
- Meet program specific learning outcomes for the Diet & Exercise major.

* Credits currently required for application to Veterinary Medicine program at ISU (55 credits)
 General Chemistry with lab (7)

Degree Requirements

Total Degree Requirements: 120 cr. for bachelor's degree and 36-40 cr. for master's degree

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements.

Communications and Library: 10 cr.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
LIB 1600	Introduction to College Level Research	1
SPCM 2120	Fundamentals of Public Speaking	3
Total Credits		10

Social Sciences: 6 cr.

PSYCH 1010	Introduction to Psychology	3
KIN 3660	Exercise Psychology	3
Total Credits		6

Mathematical Sciences: 6-8 cr.

Select at least 3 credits from: 3-4

MATH 1400	College Algebra	
MATH 1430	Preparation for Calculus	
MATH 1600	Survey of Calculus	
MATH 1650	Calculus I	

Select at least 3 credits from: 3-4

STAT 1010	Principles of Statistics	
STAT 1040	Introduction to Statistics	
STAT 2260	Introduction to Business Statistics I	

Total Credits 6-8

Physical Sciences: 13 cr.

Select from: 5

CHEM 1630 & 1630L	College Chemistry and Laboratory in College Chemistry	
or CHEM 1770 & 1770L	General Chemistry I and Laboratory in General Chemistry I	
CHEM 2310	Elementary Organic Chemistry	3
CHEM 2310L	Laboratory in Elementary Organic Chemistry	1
PHYS 1150	Physics for the Life Sciences	4
or PHYS 1310	General Physics I	

Total Credits 13

Biological Sciences: 13 cr.

BBMB 3010	Survey of Biochemistry	3
BIOL 2550	Fundamentals of Human Anatomy	3
BIOL 2550L	Fundamentals of Human Anatomy Laboratory	1
BIOL 2560	Fundamentals of Human Physiology	3
BIOL 2560L	Fundamentals of Human Physiology Laboratory	1
MICRO 2010	Introduction to Microbiology	2

Total Credits 13

Diet and Exercise undergraduate courses to be completed or in progress when applying for admission to the program: 21-23 cr.

Select from: 1-2

FSHN 1100	Professional and Educational Preparation	
or KIN 2520	Introduction to the Discipline of Kinesiology and Orientation and Learning Community in	
& KIN 2530	Kinesiology and Health	
FSHN 1670	Introductory Human Nutrition and Health	3
FSHN 2140	Scientific Study of Food	3
FSHN 2150	Advanced Food Preparation Laboratory	1-2
or FSHN 1150	Food Preparation Laboratory	
FSHN 2650	Nutrition for Active and Healthy Lifestyles	3
FSHN 3400	Foundations of Dietetic Practice	2
FSHN 3600	Advanced Nutrition and the Regulation of Metabolism in Health and Disease	3
HS 1100	Personal and Consumer Health	3
KIN 2580	Principles of Physical Fitness and Conditioning	2

Total Credits 21-23

Acceptance into the B.S./M.S. PROGRAM is required BEFORE spring semester of the THIRD year.

Humanities and Ethics: 6-9 cr.

Select 6 credits from approved Humanities list 6

Select 3 credits from approved Ethics list 3

Note: If ethics course is on the humanities list, it can meet both requirements.

Diet and Exercise remaining undergraduate courses to complete the bachelor's degree requirements: 42 cr.

HS 3800	Worksite Health Promotion	3
ATR 2200	Basic Athletic Training	2
or HS 3050	Instructor's First Aid and Cardiopulmonary Resuscitation	
KIN 2590	Leadership Techniques for Fitness Programs	3

Planned course offerings may change, and students need to check the online Schedule of Classes each term to confirm course offerings: <http://classes.iastate.edu/>. This sequence is only an example.

Dietetics (AGLS)

Dietitians are nutrition experts who strive for optimal health and nutrition of individuals and the population. The curriculum for the dietetics program as well as the diet and exercise program meet the academic requirements of the Didactic Program in Dietetics and prepares students for a career in the field of dietetics. The program is accredited by the

Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency for the Academy of Nutrition and Dietetics.

Student Learning Outcomes

Upon graduation, students should be able to:

- Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
- Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
- Participate effectively in a group or team.
- Integrate creativity, innovation, or entrepreneurship in ways that produce value.
- Describe sociocultural competence relative to diversity, equity and/or inclusion.
- Explain how human activities impact the natural environment and how societies are affected.
- Meet program specific learning outcomes for the Dietetics major.

Administered by the Department of Food Science and Human Nutrition

The dietetics undergraduate curriculum meets the academic requirements as the Didactic Program in Dietetics and is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. Graduates of the program are eligible to apply for admission to accredited supervised practice programs/dietetics internships. There is a \$30 fee for the verification statement of completion of the accredited dietetics program.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Footnotes

* Choose elective courses to total equal to or greater than 120 credits.

This sequence is only an example, and the number of credits taken each semester should be based on the individual student's situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

More information on minors offered through Food Science and Human Nutrition can be found here: <http://catalog.iastate.edu/collegeofagricultureandlifesciences/foodscienceandhumannutrition/#undergraduateminortext>.

The Department of Food Science and Human Nutrition offers a Master of Professional Practice in Dietetics (M.P.P.). More information

on the program can be found here: <http://catalog.iastate.edu/collegeofhumansciences/professionalpracticeindietetics/>.

Entomology

Undergraduate Minors

All minors require at least 15 credits, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Minor - Insect Science

The department offers a minor in Insect Science that may be earned by completing ENT 3700 Insect Biology and 12 credits in courses selected from an approved list supplied by the department.

Minor - Global Health

The Global Health minor is a transdisciplinary program designed for students who seek a broad and flexible set of skills for understanding contemporary health challenges and broad-based thinking in finding solutions. Humans are at the core of Global Health, which is viewed and addressed through an understanding of disease, disease transmission, health and well-being. Global health incorporates all cultures and places and integrates knowledge of health's social, anthropological, historical, biological, and ecological dimensions. The program cultivates capacities to deal with complex problems across disciplines and social constructs: how to identify the critical issues, ask the right questions, and create solutions that are meaningful, lasting and effective.

Requirements of the Global Health minor

The Global Health minor will consist of selecting courses that have at their core a focus on health, disease transmission, and social aspects that pertain to health. The minor will require a minimum of 15 credit hours with all students required to take Global Health (V MPM/MICRO/GLOBE 3600) and Insects and Our Health (ENT/MICRO 3740). The remaining credits to fulfill the minor will come from courses listed in two tracks:

- 1. Biological sciences of health
- 2. Social sciences aspects of health

Students must select a minimum of three credits from each of the two tracks, and an additional three credits from either track. Students may petition to take courses not on the approved list, providing these courses can be shown to include substantial study related to global health.

Required for Global Health minor:

VMPM 3600	Global Health (F)	3
ENT 3740	Insects and Our Health (S)	3

Biological Science track:

BIOL 3280	Molecular and Cellular Biology of Human Diseases (F)	3
ENT 3740L	Insects and Our Health Laboratory (Alt. S)	1
FSHN 4600	Global Nutrition, Health and Sustainability	3
HS 3500	Human Diseases (F, S, SS)	3
MICRO 3100	Medical Microbiology (F)	3
MICRO 4080	Virology	3
MICRO 3530	Introductory Parasitology (S)	3
VDPAM 4280	Principles of Epidemiology and Population Health (S)	3

Social Science track:

AGRON 3420	World Food Issues: Past and Present	3
ECON 3850	Economic Development	3
FSHN 4420	Issues in Food and Society	2
GLOBE 3300	Global Health Disparities	3
HS 3100	Community and Public Health	3
SOC 3450	Population and Society	3
SOC 3480	Global Poverty, Resources and Sustainable Development	3
SOC 4110	Social Change in Developing Countries (S)	3

Graduate Study

The department offers work for the master of science and doctor of philosophy degrees with a major in entomology. Studies at the Ecosystem, Organismal, and Subcellular levels occur in the following areas: aquatic entomology, biological control, chemical ecology, ecology, host plant resistance, insecticide toxicology, medical/veterinary entomology, pathology, pest management, physiology, population genetics, or systematics.

Graduates have a broad understanding of entomology and related disciplines, and an in-depth command of their area of concentration. They are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex problems facing entomology or toxicology professionals, taking into account related ethical, social, legal, economic, and environmental issues. They are skilled in research methods, data analyses, and interpretation of results. They also are skilled in working effectively with their colleagues, and writing concise and persuasive grant proposals. They have an understanding of and can critically evaluate current entomological literature.

Prerequisite to the entomology major and to minor graduate work in the department is completion of at least two years of zoological courses, for part of which credit in other closely allied biological sciences may be substituted. Specific course requirements for advanced degrees

depend partly upon previous training and experience in the major field of specialization.

Any student receiving the M.S. in entomology shall have at least one course in insect physiology, one course in insect systematics, two courses of ENT 5900 (selected from topics A through D, F through I, M and N, inclusive), and at least 1 credit of ENT 6000 Seminar.

Any student receiving the Ph.D. in entomology shall have at least one course in insect physiology, one course in insect systematics, four additional courses of ENT 5900 (selected from topics A through D and F through I, M through N inclusive), and at least 1 credit of ENT 6000 Seminar. At least one 5900 must be taken from each of these subgroups: Population (C, D, N); Organismal (A, B, F, M); and Suborganismal (G, I).

In addition, Ph.D. students majoring either in Entomology or Toxicology shall have two semesters of teaching experience, taken as ENT 5900K Special Topics: Teaching Experience both semesters or ENT 5900K Special Topics: Teaching Experience one semester and ENT 5900L Special Topics: Extension Internship the other semester.

A student can receive a Ph.D. minor in Entomology by taking 3 Entomology courses (5000 level and above) for a total of 9 credits to be determined by the student's POS committee and approved by the Entomology Director of Graduate Education.

An option for an emphasis in molecular Entomology is available. Any student receiving the M.S. in entomology with an emphasis in molecular entomology is required to take:

ENT 5550	Insect Physiology	4
ENT 5900G	Special Topics: Molecular Entomology	1-3
Plus one other course of 5900 selected from topics A-D, F, H, I, M, N		
Plus one additional course in molecular entomology		
ENT 6000	Seminar	1
BBMB 4040	Biochemistry I	3
BBMB 5420A	Introduction to Molecular Biology Techniques: DNA Techniques	1
And one course from the following:		
ENT 5760	Systematic Entomology	
ENT 5250	Aquatic Insects	
ENT 5680	Advanced Systematics	

Any student receiving the Ph.D. in entomology with an emphasis in molecular entomology is required to take:

ENT 5550	Insect Physiology	4
ENT 5900G	Special Topics: Molecular Entomology	1-3
Plus three other courses of 5900 selected from topics A-D, F, H, I, M, N		9
One additional course in molecular entomology		3

ENT 6000	Seminar	1
BBMB 5420A	Introduction to Molecular Biology Techniques: DNA Techniques	1
Plus two other workshops selected from:		6
BBMB 5420C	Introduction to Molecular Biology Techniques: Cell Techniques	1
BBMB 5420D	Introduction to Molecular Biology Techniques: Plant Transformation	1
BBMB 5420E	Introduction to Molecular Biology Techniques: Proteomics	1
An additional course with a molecular component		3
Plus one from each of the following:		
Systematics		3
ENT 5760	Systematic Entomology	
ENT 5250	Aquatic Insects	
ENT 5680	Advanced Systematics	
Biochemistry		3
BBMB 4040	Biochemistry I	
BBMB 4050	Biochemistry II	
BBMB 5040	Amino Acids and Proteins	
BBMB 5050	Bioenergetics and Metabolism	

Entomology faculty participate in the interdepartmental majors in ecology and evolutionary biology; genetics; microbiology; molecular, cellular and developmental biology; sustainable agriculture; and in the interdepartmental major and minor in toxicology (see Index).

The Federal Corn Insects and Crop Genetics Research Unit is available for advanced study in certain phases of entomological research.

More information about the department, such as current research, faculty resumes, physical facilities, and graduate students can be viewed on the department's website at www.ppem.iastate.edu (<http://www.ent.iastate.edu>).

Courses primarily for undergraduates:

ENT 2010: Introduction to Insects

Credits: 1. Contact Hours: Lecture 2.7.

Biological and ecological aspects of insects. Offered online only. 5 weeks. (Typically Offered: Fall, Spring)

ENT 2110: Insects and Society

Credits: 2. Contact Hours: Lecture 2.7.

Prereq: ENT 2010

The importance of insects in human well-being. Insect-human interactions. Primarily for non-science and non-agriculture majors. Offered online only. 11 weeks. (Typically Offered: Fall, Spring)

ENT 2140: Insects in Forensic Science

Credits: 3. Contact Hours: Lecture 3.

Introduction to the use of insects as evidence in court and how they can assist in solving crimes. Topics covered include basic insect biology, systematics, behavior, with emphasis on applications of forensic entomology. Offered even-numbered years. (Typically Offered: Fall)

ENT 2200: Introduction to Forensic Science

(Cross-listed with CJ 2200).

Credits: 3. Contact Hours: Lecture 3.

Study of fundamental forensic science techniques and procedures covering types of physical, chemical, and biological evidence and how this information is used in the legal system. Assessment of crime scenes and various forensic specialties will be introduced. (Typically Offered: Spring)

ENT 2830: Pesticide Application Certification

(Cross-listed with AGRON 2830/ FOR 2830/ HORT 2830).

Credits: 2. Contact Hours: Lecture 2.

Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized. (Typically Offered: Spring)

ENT 3580: Bee Biology, Management, and Beekeeping

(Cross-listed with BIOL 3580).

Credits: 3. Contact Hours: Lecture 3.

Prereq: Introductory (2000-level) biology coursework or permission of an instructor

Bee diversity and evolution, ecology, role as pollinators, behavior, anatomy, and development. Management of bees as agricultural pollinators and honey producers, focusing on honey bees. Working with live bee hives and demonstration of practical beekeeping skills will occur during several field trips to local hives. (Typically Offered: Fall)

ENT 3700: Insect Biology

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: BIOL 1010 or BIOL 2110

Structure, physiology, evolution, behavior, life histories, and recognition of insects. Collection required. (Typically Offered: Fall)

ENT 3720: Livestock Entomology

Credits: 2. Contact Hours: Lecture 2.

Classroom and off-campus videotape sections. 12 weeks. Recognition, biology, behavior, economic importance, and management of insects and other arthropods affecting livestock and poultry production. Offered odd-numbered years. (Typically Offered: Spring)

ENT 3740: Insects and Our Health

(Cross-listed with MICRO 3740).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits in Biological Sciences

Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease. Meets International Perspectives Requirement. (Typically Offered: Spring)

ENT 3740L: Insects and Our Health Laboratory

(Cross-listed with MICRO 3740L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or concurrent enrollment in ENT 3740 or MICRO 3740

Laboratory and field techniques for studying medical or public health entomology, including: collection, identification and maintenance of medically significant arthropods and experimental design and execution related to the biology of arthropods or arthropod-pathogen interactions. Offered even-numbered years. (Typically Offered: Spring)

ENT 3750: Plant Protection Using Natural Enemies

(Dual-listed with ENT 5750).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENT 3700 or ENT 3760

Overview of the biology, ecology, and classification of insect pathogens, predators, and parasitoids. Discussion of the use of these organisms in plant protection, including an emphasis on genetic alteration of natural enemies. Offered even-numbered years. (Typically Offered: Spring)

ENT 3760: Fundamentals of Entomology and Pest Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: BIOL 1010 or BIOL 2110

Introduction to entomology and insect-pest management, including life processes, ecology, economics, tactics of population suppression, and ecological backlash. (Typically Offered: Spring)

ENT 4250: Aquatic Insects

(Cross-listed with AECL 4250).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: BIOL 3120

Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes. Offered odd-numbered years. (Typically Offered: Spring)

ENT 4350: Entomology Field Trip

(Cross-listed with AECL 4350).

Credits: 2. Repeatable, maximum of 2 credits.

Prereq: BIOL 3120; Permission of Instructor

Field trip to study insects of major terrestrial and aquatic ecosystems.

Location and duration vary. ENT 3700 or ENT 4250 recommended.

Offered irregularly. (Typically Offered: Spring, Summer)

ENT 4500: Pesticides in the Environment

(Dual-listed with ENT 5500/ TOX 5500). (Cross-listed with TOX 4500).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 credits of BIOL or Permission of Instructor

Fate and significance of pesticides in soil, water, plants, animals, and the atmosphere. (Typically Offered: Spring)

ENT 4520: Integrated Management of Diseases and Insect Pests of Turfgrasses

(Cross-listed with PLP 4520/ HORT 4520).

Credits: 3. Contact Hours: Lecture 3.

Prereq: HORT 3510

Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments. Offered even-numbered years. (Typically Offered: Spring)

ENT 4710: Insect Ecology

(Dual-listed with ENT 5710).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: 9 credits of BIOL

The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture. Offered even-numbered years. (Typically Offered: Fall)

ENT 4900E: Independent Study: Research or Work Experience

Credits: 1-3. Repeatable, maximum of 9 credits.

Prereq: 15 credits in biological sciences, Junior or Senior classification; Permission of Instructor

Graduation Restriction: A maximum of 9 credits of all (university-wide) 4900 courses may be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

ENT 4900U: Independent Study: Laboratory teaching experience

Credits: 1-3. Repeatable, maximum of 9 credits.

Prereq: Instructor Permission for Course

For students registering to be undergraduate laboratory assistants. Graduation Restriction: A maximum of 9 credits of all (university-wide) 4900 courses may be applied toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

ENT 5110: Integrated Management of Tropical Crops

(Cross-listed with HORT 5110/ PLP 5110).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (ENT 3700 or ENT 3760 or HORT 2210 or PLP 4080 or PLP 4160) or Graduate Classification

Applications of Integrated Crop management principles (including plant pathology, entomology, and horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by a 10-day tour of Costa Rican agriculture during spring break, then writeup of individual projects. Offered odd-numbered years. Meets International Perspectives Requirement. (Typically Offered: Spring)

ENT 5250: Aquatic Insects

(Cross-listed with AECL 5250).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: BIOL 3120 or graduate standing

Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes. Offered odd-numbered years. (Typically Offered: Spring)

ENT 5300: Ecologically Based Pest Management Strategies

(Cross-listed with AGRON 5300/ SUSAG 5300/ PLP 5300).

Credits: 3. Contact Hours: Lecture 3.

Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes. Offered even-numbered years. (Typically Offered: Fall)

ENT 5500: Pesticides in the Environment

(Dual-listed with ENT 4500/ TOX 4500). (Cross-listed with TOX 5500).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 9 credits in BIOL or Graduate Classification

Fate and significance of pesticides in soil, water, plants, animals, and the atmosphere. (Typically Offered: Spring)

ENT 5520: Integrated Management of Diseases and Insect Pests of Turfgrasses

(Cross-listed with PLP 5520/ HORT 5520).

Credits: 3. Contact Hours: Lecture 3.

Prereq: HORT 3510 or Graduate Classification

Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments. Offered even-numbered years. (Typically Offered: Spring)

ENT 5550: Insect Physiology

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: ENT 3700 or Graduate Classification

Life processes of the insects, including reviews of current problems in insect physiology. Offered even-numbered years. (Typically Offered: Spring)

ENT 5680: Advanced Systematics

(Cross-listed with EEOB 5680).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Principles and practice of systematic biology; taxonomy, nomenclature and classification of plants and animals; sources and interpretation of systematic data; speciation; fundamentals of phylogenetic systematics. (Typically Offered: Spring)

ENT 5700: Plant-Insect Interaction

Credits: 2. Contact Hours: Lecture 2.

Prereq: 9 credits in BIOL or Graduate Classification

Physiological, behavioral, ecological, and evolutionary factors that govern interactions between insects and plants, applications of this knowledge to agriculture, and important results from the study of natural systems. Additional topics covered during the semester include: tritropic interactions, biological control of plants by insects, and pollination biology. Student-led discussions and draws on both the primary and secondary literature. Offered odd-numbered years. (Typically Offered: Fall)

ENT 5710: Insect Ecology

(Dual-listed with ENT 4710).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: 9 credits in BIOL or Graduate Classification

The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role of insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture. Offered even-numbered years. (Typically Offered: Fall)

ENT 5740: Medical Entomology

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: 9 credits in BIOL or Graduate Classification

Identification, biology, and significance of insects and other arthropods that attack people and animals, particularly those that are vectors of disease. Offered even-numbered years. (Typically Offered: Spring)

ENT 5750: Plant Protection Using Natural Enemies

(Dual-listed with ENT 3750).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ENT 3700 or ENT 3760 or Graduate Classification

Overview of the biology, ecology, and classification of insect pathogens, predators, and parasitoids. Discussion of the use of these organisms in plant protection, including an emphasis on genetic alteration of natural enemies. Offered even-numbered years. (Typically Offered: Spring)

ENT 5760: Systematic Entomology

Credits: 5. Contact Hours: Lecture 3, Laboratory 6.

Prereq: ENT 3700 or Graduate Classification

Classification, distribution, and natural history of insects, including fundamentals of phylogenetic systematics, biogeography, taxonomic procedures, and insect collection and curation. Offered even-numbered years. (Typically Offered: Fall)

ENT 5810: Experience in Plant Science Extension and Outreach

(Cross-listed with AGRON 5810/ PLP 5810/ HORT 5810).

Credits: 1.

A supervised learning experience in several extension delivery methods used in the plant sciences. Participation in Iowa State University-based extension programs that may include field crops horticulture, or Master Gardener programming. Offered odd-numbered years. (Typically Offered: Summer)

ENT 5900A: Special Topics: Biological Control and Pathology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Biological Control and Pathology. (Typically Offered: Fall, Spring, Summer)

ENT 5900B: Special Topics: Chemical Ecology and Behavior

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Chemical Ecology and Behavior. (Typically Offered: Fall, Spring, Summer)

ENT 5900C: Special Topics: Ecology and Pest Management

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Ecology and Pest Management. (Typically Offered: Fall, Spring, Summer)

ENT 5900D: Special Topics: Evolution and Systematics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Evolution and Systematics. (Typically Offered: Fall, Spring, Summer)

ENT 5900E: Special Topics: Special Research Topics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Special Research Topics. (Typically Offered: Fall, Spring, Summer)

ENT 5900F: Special Topics: Medical and Veterinary Entomology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Medical and Veterinary Entomology. (Typically Offered: Fall, Spring, Summer)

ENT 5900G: Special Topics: Molecular Entomology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Molecular Entomology. (Typically Offered: Fall, Spring, Summer)

ENT 5900I: Special Topics: Toxicology

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Toxicology. (Typically Offered: Fall, Spring, Summer)

ENT 5900K: Special Topics: Teaching Experience

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Teaching Experience. (Typically Offered: Fall, Spring, Summer)

ENT 5900L: Special Topics: Extension Internship

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Independent Study. (Typically Offered: Fall, Spring, Summer)

ENT 5900M: Special Topics: Immature Insects

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Immature Insects. (Typically Offered: Fall, Spring, Summer)

ENT 5900N: Special Topics: Population Genetics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Special Topics: Population Genetics. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**ENT 6000: Seminar**

Credits: 1. Contact Hours: Lecture 1.

Presentation of research results. (Typically Offered: Fall, Spring, Summer)

ENT 6750: Insecticide Toxicology

(Cross-listed with TOX 6750).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: ENT 5550 or TOX 5010 or Graduate Classification

Principles of insecticide toxicology; classification, mode of action, metabolism, and environmental effects of insecticides. Offered even-numbered years. (Typically Offered: Fall)

ENT 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Research. (Typically Offered: Fall, Spring, Summer)

Environmental Science

Interdepartmental Undergraduate Programs

Environmental Science provides an integrated, quantitative, and interdisciplinary approach to the study of environmental systems. The magnitude and complexity of environmental problems are creating a growing need for scientists with rigorous, interdisciplinary training in environmental science. The Environmental Science program is designed to prepare students for positions of leadership in this rapidly changing discipline. Environmental Science graduates have a solid foundation in biological and physical natural sciences and the specialized training necessary for integrated analysis of environmental systems.

Undergraduate Study

The Environmental Science undergraduate major is offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Sciences. Environmental Science majors complete foundation courses in natural sciences and mathematics, plus a major consisting of an integrated core of Environmental Science courses and additional advanced course work in Environmental Science. Scientific rigor is stressed throughout the program, beginning with the foundation courses in the first two years of the curriculum. The upper level core courses emphasize a dynamic systems approach that provides a framework for integrating physical, chemical, and biological aspects of environmental systems. Beyond the required core, students select from a broad array of advanced courses to either develop greater breadth, or specialization in areas including, but not limited to, water resources, climate impacts and adaptation, environmental restoration and management, and geographic information systems (see <https://www.ensci.iastate.edu/> for additional information on areas of specialization).

Student Learning Outcomes

Upon graduation, students should be able to:

Demonstrate a broad understanding of environmental systems and issues utilizing an interdisciplinary framework to integrate ideas and concepts from biological and physical natural sciences

Demonstrate proficiency in data analysis and problem-solving of relevant environmental systems/problems

Use a systems approach to conduct integrated, quantitative, and interdisciplinary analyses and modeling of environmental systems and problems

College of Agriculture and Life Sciences

Students seeking an Environmental Science major complete the following:

1. A foundation of approved supporting courses in science and mathematics including biology, chemistry, earth science, physics, mathematics, and statistics.
2. 33 credits of course work in the major, including a required core of 20 credits.

A combined average grade of C or higher is required in courses applied in the major.

1. Environmental Science: 33 credits

ENSCI 1100	Orientation to Environmental Science	1
ENGL 2010	Introduction to Literature	3
ENSCI 2020	Exploration of Environmental and Sustainability Issues	1
ENSCI 2030	Exploration of Environmental Science	1
ENSCI 2500	Environmental Geography	3
ENSCI 2510	Biological Processes in the Environment	3
ENSCI 3120	Ecology	4
ENSCI 3180	Introduction to Ecosystems	3
ENSCI 3190	Analysis of Environmental Systems	3
Additional ENSCI choice courses		12
Total Credits		34

2. Mathematics & Statistics: 6-8 credits

Choose one of the following: 3-4

MATH 1040	Introduction to Probability	
MATH 1500	Discrete Mathematics for Business and Social Sciences	
MATH 1510	Calculus for Business and Social Sciences	
MATH 1600	Survey of Calculus	
MATH 1650	Calculus I	
COMS 1060	Introduction to Web Programming	
COMS 1070	Windows Application Programming	

DS 2010 Introduction to Data Science

DS 2020 Data Acquisition and Exploratory Data Analysis

Choose one of the following: 3-4

STAT 1010 Principles of Statistics

STAT 1040 Introduction to Statistics

Total Credits 6-8

3. Physical & Life Sciences: 21-24 credits

BIOL 2110 Principles of Biology I 3

Choose from one of the following: 5

CHEM 1630 College Chemistry
& 1630L and Laboratory in College Chemistry

CHEM 1670 General Chemistry for Engineering Students
& 1670L and Laboratory in General Chemistry for Engineering

CHEM 1770 General Chemistry I
& 1770L and Laboratory in General Chemistry I

CHEM 2010 Advanced General Chemistry
& 2010L and Laboratory in Advanced General Chemistry

Choose from one of the following: 3-4

CHEM 2310 Elementary Organic Chemistry
& 2310L and Laboratory in Elementary Organic Chemistry

CHEM 3310 Organic Chemistry I
& 3310L and Laboratory in Organic Chemistry I

BBMB 2210 Structure and Reactions in Biochemical Processes

AGRON 2590 Organic Compounds in Plants and Soils

Choose 3 of the following: 9

AGRON 1820 Introduction to Soil Science

AGRON 2820 Soil Conservation and Land Use

GEOL 1000 How the Earth Works
or GEOL 201 Geology for Engineers and Environmental Scientists

MTEOR 2060 Introduction to Weather and Climate

BIOL 2120 Principles of Biology II

CHEM 1780 General Chemistry II
& 1780L and Laboratory in College Chemistry II

PHYS 1150 Physics for the Life Sciences
or PHYS 131 General Physics I
or PHYS 231 Introduction to Classical Physics I

Total Credits 20-21

4. Communications: 7-10 credits

ENGL 1500 Critical Thinking and Communication 3

ENGL 2500 Written, Oral, Visual, and Electronic Composition 3

LIB 1600	Introduction to College Level Research (Embedded communication coursework in ENSCI 2030 and ENSCI 3120)	1

Embedded communication coursework in ENSCI 2030 and ENSCI 3120

Total Credits 7

Additional communication courses required of majors in the College of Agriculture and Life Sciences

Choose one of the following: 3

SPCM 2120	Fundamentals of Public Speaking	
AGEDS 3110	Presentation and Sales Strategies for Agricultural Audiences	
COMST 2140	Professional Communication	

Total Credits 3

5. General Education: 15-21 credits

General Education requirements in the College of Agriculture and Life Sciences

Humanities	3
Social Science	3
Ethics	3
International Perspectives course from university approved list	3
US Diversity course from university approved list	3
Total Credits	15

General Education requirements in the College of Liberal Arts and Sciences

Arts and Humanities courses from college approved list	12
Social Science courses from college approved list	9

(Select courses to include 3 cr. of International Perspectives and 3 cr. of US Diversity)

Students must have completed 3 years of a single world language in high school or take 4-8 credits of World Languages at the university level

Total Credits 21

Electives (28-35 credits)

LAS students must earn a minimum of 45 credits at the 3000-/4000-level.

A minimum of 120.0 Total Credits are needed for graduation

Environmental Science, B.S. (AGLS)

¹ Students complete at least 32 credits in Environmental Science including ENSCI 1100, ENGL 2010, ENSCI 2020, ENSCI 2030, ENSCI 2500, ENSCI 2510, ENSCI 3120, ENSCI 3180, ENSCI 3190 and 15 additional credits of approved ENSCI coursework.

² Students complete at least 15 credits in humanities and social science including at least 3 credits each in ethics, humanities, social science, U.S. Diversity, and International Perspectives from approved lists.

³ Students choose one course from the following Physical and Life Science related courses: AGRON 1820, AGRON 2820, BIOL 2120,

CHEM 1780, GEOL 1000, GEOL 2010, MTEOR 2060, PHYS 1150, PHYS 1310, PHYS 2310. Students choose from one of the following Organic Chemistry options: CHEM 2310 & CHEM 2310L, CHEM 3310 & CHEM 3310L, BBMB 2210, or AGRON 2590.

Graduate Study

Contact information for the graduate program:

Lynette Edsall

camelot@iastate.edu (mstolt@iastate.edu)

515-294-1191

<https://enscigrad.iastate.edu/>

The Environmental Science graduate program offers an interdepartmental curriculum leading to M.S. and Ph.D. degrees with a major in Environmental Science. Faculty from the colleges of Agriculture and Life Sciences, Engineering, and Liberal Arts and Sciences cooperate to offer courses and research opportunities covering a broad array of environmental topics. Cooperating departments include Agricultural and Biosystems Engineering; Agronomy; Animal Science; Civil, Construction and Environmental Engineering; Ecology, Evolution and Organismal Biology; and Geological and Atmospheric Sciences.

Applicants should have completed an undergraduate or master's degree in one of the biological, chemical, physical, or engineering sciences or should have equivalent preparation.

The Environmental Science Graduate Program emphasizes fundamental concepts and research, which at the same time address major environmental issues. The curriculum is designed to provide the interdisciplinary approach needed in environmental science education and research. In addition to work in their chosen area of specialization, students are afforded a broad exposure to the biological, chemical and physical aspects of environmental systems and the specialized training necessary for integrated analysis of these systems.

Information on application procedures, curriculum requirements, and faculty research areas is available on the Environmental Science Graduate Program website (<https://enscigrad.iastate.edu/>).

Food Science (AGLS)

Food science is a degree program focused on food issues from the time crops leave the field until consumers buy the food products. Food scientists apply basic science (chemistry, biology, physics) to improve processing, preservation, and safety of food and to develop new food products. The food science major is approved by the Institute of Food Technologists.

Student Learning Outcomes

Upon graduation, students should be able to:

- Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
- Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
- Participate effectively in a group or team.
- Integrate creativity, innovation, or entrepreneurship in ways that produce value.
- Describe sociocultural competence relative to diversity, equity and/or inclusion.
- Explain how human activities impact the natural environment and how societies are affected.
- Meet program specific learning outcomes for the Food Science major.

The department also offers a food science minor.

Administered by the Department of Food Science and Human Nutrition

Courses listed below are required.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 10 cr.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
LIB 1600	Introduction to College Level Research	1
SPCM 2120	Fundamentals of Public Speaking	3
Total Credits		10

Humanities and Social Sciences: 6-12 cr.

Select Humanities course from approved list	3
ECON 1010 Principles of Microeconomics	3
If HSCI student, select:	6
Additional Humanities course	
Additional Humanities or Social Science course	

Ethics: 3 cr.

FSHN 3420	World Food Issues: Past and Present	3

Mathematical Sciences: 7-8 cr.

Select 4 credits from:

MATH 1600	Survey of Calculus	4
or MATH 1650	Calculus I	

Select at least 3 credits from:

STAT 1010	Principles of Statistics	3-4

or STAT 1040	Introduction to Statistics	

Total Credits 7-8

Physical Sciences: 17-19 cr.

CHEM 1770 & 1770L	General Chemistry I and Laboratory in General Chemistry I	5

CHEM 1780	General Chemistry II	3

CHEM 2310 & 2310L	Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry	4-6

or CHEM 3310 & CHEM 3320	Organic Chemistry I and Organic Chemistry II	

PHYS 1150 & 1150L	Physics for the Life Sciences and Laboratory in Physics for the Life Sciences	5

or PHYS 1310 & 1310L	General Physics I and General Physics I Laboratory	

Total Credits 17-19

Biological Sciences: 10-11 cr.

BBMB 3010	Survey of Biochemistry	3

or BBMB 3030 or BBMB 3160	General Biochemistry Principles of Biochemistry	

BIOL 2120	Principles of Biology II	3

BIOL 2120L	Principles of Biology Laboratory II	1

MICRO 2010 or MICRO 3020	Introduction to Microbiology Biology of Microorganisms	2-3

MICRO 2010L or MICRO 3020L	Introductory Microbiology Laboratory Microbiology Laboratory	1

Total Credits 10-11

Food Science and Human Nutrition: 49 cr.

FSHN 1010	Food and the Consumer	3

FSHN 1100	Professional and Educational Preparation	1

FSHN 1670	Introductory Human Nutrition and Health	3

FSHN 2030	Contemporary Issues in Food Science and Human Nutrition	1

FSHN 2070	Processing of Foods: Basic Principles and Applications	3

FSHN 3050	Food Quality Management and Control	2

FSHN 3110	Food Chemistry	3

FSHN 3110L	Food Chemistry Laboratory	1

FSHN 3140	Professional Development for Culinary Food Science and Food Science Majors	1

FSHN 3150	Professional Skills for Culinary Food Science and Food Science Majors	1

FSHN 3510	Introduction to Food Engineering Concepts	3

FSHN 4030	Food Laws and Regulations	2

FSHN 4060	Sensory Evaluation of Food	3

FSHN 4070	Microbiological Safety of Foods of Animal Origins	3

FSHN 4100	Food Analysis	3

FSHN 4110	Food Ingredient Interactions and Formulations	2

FSHN 4120	Food Product Development	3

FSHN 4200	Food Microbiology	3

FSHN 4210	Food Microbiology Laboratory	3

FSHN 4710	Food Processing	3

FSHN 4720	Food Processing Laboratory	2

Total Credits 49

Select 5-6 credits from the following Professional Electives: 5-6

ABE 3250	Biorenewable Systems	

ACCT 2150	Legal Environment of Business	

ACCT 2840	Financial Accounting	

ACCT 2850	Managerial Accounting	

AESHM 4740	Entrepreneurship in Human Sciences	

AGRON 4500	Issues in Sustainable Agriculture	

ANS 2700	Foods of Animal Origin	

ANS 2700L	Foods of Animal Origin Laboratory	

ANS 3600	Fresh Meat Science and Applied Muscle Biology	

ANS 4600	Science and Technology of Value Added Meat Products	

CHEM 2110	Quantitative and Environmental Analysis	

CHEM 2110L	Quantitative and Environmental Analysis Laboratory	

CHEM 3160	Instrumental Methods of Chemical Analysis	

CHEM 3160L	Instrumental Analysis Laboratory	

ECON 2350	Introduction to Agricultural Markets	

ECON 3010	Intermediate Microeconomics	

ECON 3200	Labor Economics	

ECON 3350	The Economics of Global Agricultural Food and Bio-energy	

ECON 3370	Agricultural Marketing	

ECON 3620	Applied Ethics in Agricultural Business	

ECON 4600	Agricultural, Food, and Trade Policy	

ENTSP 3100	Entrepreneurship and Innovation	

FSHN 2410	Introduction to Manufacturing Processes for Plastics	

FSHN 2420	The US Food System	

FSHN 2640	Fundamentals of Nutritional Biochemistry	

FSHN 2650	Nutrition for Active and Healthy Lifestyles	

FSHN 2760	Understanding Grape and Wine Science	

FSHN 4080	Dairy Products Evaluation
FSHN 4350	Analysis of Food Markets
FSHN 4420	Issues in Food and Society
FSHN 4600	Global Nutrition, Health and Sustainability
FSHN 4900B	Independent Study: Food Science
FSHN 4910B	Supervised Work Experience: Food Science
FSHN 4960A	Food Science and Human Nutrition Travel Course: International travel
or FSHN 4960B	Food Science and Human Nutrition Travel Course: Domestic travel
FSHN 4990	Undergraduate Research
FSHN 5090	Sensory Evaluation of Wines
GLOBE 2010	Introduction to Global Resource Systems
GLOBE 2200	Globalization and Sustainability
GLOBE 3030	Agricultural, Food and Natural Global Resource Systems
HORT 2210	Principles of Horticulture Science
HORT 4610	Fruit Crop Production and Management
HORT 4710	Vegetable Production and Management
HORT 4710L	Vegetable Production and Management Lab
MGMT 3710	Organizational Behavior
MGMT 4140	International Management
MGMT 4720	Diversity, Equity, and Inclusion in Organizations
MIS 3010	Management Information Systems
MKT 3400	Principles of Marketing
MKT 4470	Consumer Behavior
MKT 4480	Global Marketing

Total Credits 5-6

Electives: 2-13 cr. Select from any university coursework to earn at least 120 total credits. Food science internship experience is strongly recommended during the summers, and students can earn elective credits for the internship experience by enrolling in FSHN 4910B.

Go to FSHN courses.

Food Science, B.S.

First Year

Fall	Credits	Spring	Credits
FSHN 1010	3	FSHN 1670	3

FSHN 4070	3	U.S. Diversity (if not already taken) or elective	3
Elective *	3	2 Humanities/social science (HSCI) or elective (AGLS)	3
14	14		

* Choose elective courses to total equal to or greater than 120 credits.

This sequence is only an example. The number of credits taken each semester should be based on the individual student's situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point considerations.

More information on the Food Science, Food Safety, and Food and Society minors can be found here: <http://catalog.iastate.edu/collegeofagricultureandlifesciences/foodscienceandhumannutrition/#undergraduateminortext>.

The Department of Food Science and Human Nutrition offers a Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) in Food Science and Technology. More information can be found here: <https://www.grad-college.iastate.edu/academics/programs/apresults.php?id=50>.

Food Science and Human Nutrition

The Department of Food Science and Human Nutrition is jointly administered by the College of Agriculture and Life Sciences and the College of Human Sciences. All curricula offered by the department are available to students in either college. These majors include:

- Culinary food science
- Dietetics
- Diet and exercise
- Food science
- Nutritional science
- Nursing

Visit the department web site at: www.fshn.hs.iastate.edu (<http://www.fshn.hs.iastate.edu>).

Undergraduate Study

Culinary Food Science

Culinary food science is an interdisciplinary degree combining a strong food science foundation with acquisition of culinary skills. The program includes chemistry, organic chemistry, biology, microbiology, and biochemistry as well as quantity food production, fine dining management, and food safety and sanitation. Internship experience in the food industry or culinary business is required. Culinary food science graduates are qualified to work as managers and specialists in food research, product development, culinary applications, and food marketing and sales. For more information: <https://fshn.hs.iastate.edu/find-your-major/culinary-food-science/>

Dietetics

The Didactic Program in Dietetics (DPD) is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. The dietetics undergraduate curriculum meets the academic requirements as the DPD. Additionally, the curriculum for concurrent bachelor's and master's degrees in diet and exercise meets the academic requirements of the DPD. Graduates of the program are eligible to apply for admission to accredited dietetics internships/supervised practice programs. Upon successful completion of the experience program and a master's degree, graduates are eligible to take the national examination administered by the Commission on Dietetic Registration to become a Registered Dietitian Nutritionist (RDN) and to practice in the field of dietetics. There is a \$30 fee for a statement of verification of completion of the DPD.

For information about verification statements policies, see the dietetics program website: <https://fshn.hs.iastate.edu/find-your-major/dietetics/>.

The dietetics program includes study in basic sciences, nutrition, and food science with applications to medical dietetics, nutrition counseling and education, and community nutrition. Foodservice management is also an important aspect of the program. Graduates work in clinical settings, consulting, food companies, food services, sports or athletic programs, corporate wellness programs, care facilities for patients from neonatal to geriatric, and community or school health programs.

Diet and Exercise

A program for concurrent Bachelor of Science and Master of Science (B.S./M.S.) degrees in diet and exercise (<https://fshn.hs.iastate.edu/find-your-major/diet-and-exercise/>) is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FSHN), within the College of Agriculture and Life Sciences and College of Human Sciences, and the Department of Kinesiology within the College of Human Sciences. Students interested in this program enroll as pre-diet and exercise students. In the fall of the third year, students apply for admission to the BS/MS program. Students not accepted into the program can continue toward completion of the BS degree in dietetics or kinesiology and health. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of B.S./M.S. degrees in diet and exercise.

Food Science

Food science is a discipline in which the principles of biological and physical sciences are used to study the nature of foods, the causes of their deterioration, and the principles underlying the processing and preparation of food. It is the application of science and technology to the provision of a safe, wholesome, and nutritious food supply. Biotechnology and toxicology interrelate with food science in the area of food safety. In the food industry, food scientists work in research and development of products or processes, production supervision, quality control, marketing and sales, test kitchens and recipe development, product promotion and communication. Food scientists also work in government regulatory agencies and academic institutions.

The food science major is approved by the Institute of Food Technologists, the national professional organization of food science. Career options include quality control/assurance; production supervision; management and sales; research careers in the food industry, government, or academia; business; journalism; food product formulation and recipe development; food promotion and communication; and consumer services in government and industry. For more information: <https://fshn.hs.iastate.edu/find-your-major/food-science/>

Students in food science have the opportunity to pursue a Master of Business Administration (<http://www.fshn.hs.iastate.edu/undergraduate-programs/food-science/>) (MBA) concurrently with the Bachelor of Science (B.S.) degree in food science. The program is designed so students can earn both the B.S. in food science and MBA in five years, to meet the needs of students who are interested in management careers in the food industry. Students apply for admission to the MBA program in the spring of the third year. The program for concurrent B.S. in food science/MBA degrees is a rigorous 5-year program, and admission is very selective.

Nutritional Science

Nutritional science looks at the connection between diet and health. Students learn how diet can play a crucial role in the cause, treatment, and prevention of many diseases. There are degree program focuses within nutritional science. The pre-health and research coursework prepares students for work in research laboratories, graduate study in nutrition or biological sciences, or entrance into health professional programs, such as medical, dental, physician assistant, and pharmacy schools. Students gain a strong science education along with human nutrition expertise. The health coach and nutrition and wellness coursework prepare students for work positions in program planning and evaluation for community, public health, non-profit, and corporate wellness programs addressing the growing public interest in nutrition, wellness, and preventative health. Students learn about the role of nutrition and healthy eating for disease prevention and wellness. For more information: <https://fshn.hs.iastate.edu/find-your-major/nutritional-science/>

Nursing

The Bachelor of Science in Nursing (BSN) program at Iowa State University is a RN-to-BSN program, designed for those who are already a Registered Nurse (RN), and desire to further their nursing career and education to the next level. Iowa State's RN-to-BSN program provides interactive learning opportunities where students can apply their real-world experiences and education to inspire innovation in their places of care. RN-to-BSN students will be challenged to enhance health promotion and disease prevention, apply nursing science and evidenced-based patient-centered care, focus on the culture of health for nurses, individuals, and communities, and demonstrate the continuum of care, from a nurse's self-care to patient care to community and population health.

The baccalaureate nursing program at Iowa State University of Science and Technology located in Ames, Iowa is approved by the:

Iowa Board of Nursing (IBON)

Riverpoint Business Park
400 SW 8th St., Suite B
Des Moines, IA 50309

(515) 281-3255

The baccalaureate nursing program at Iowa State University of Science and Technology located in Ames, Iowa is accredited by the:

Accreditation Commission for Education in Nursing (ACEN)

3390 Peachtree Road NE, Suite 1400
Atlanta, GA 30326
(404) 975-5000

The most recent accreditation decision made by the ACEN Board of Commissioners for the baccalaureate nursing program is initial accreditation.

View the public information disclosed by the ACEN regarding this program at <http://www.acenursing.com/accreditedprograms/programSearch.htm>. (<http://www.acenursing.com/accreditedprograms/programSearch.htm>)

For more information and RN-to-BSN learning outcomes: <https://fshn.hs.iastate.edu/find-your-major/nursing/>

FSHN Departmental Learning Outcomes

Upon graduation, students should be able to:

- Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
- Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
- Participate effectively in a group or team.
- Integrate creativity, innovation, or entrepreneurship in ways that produce value.
- Describe sociocultural competence relative to diversity, equity and/or inclusion.
- Explain how human activities impact the natural environment and how societies are affected.
- Meet program specific learning outcomes.

For more information: <https://fshn.hs.iastate.edu/staff-and-faculty/resources/outcomes-assessment/learning-outcomes/>.

Communication Proficiency is certified by a grade of C or better in 6 credits of coursework in composition (ENGL 1500 Critical Thinking and Communication and ENGL 2500 Written, Oral, Visual, and Electronic Composition or other communication-intensive courses) and a grade of C or better in 3 credits of coursework in oral communication.

Minors - Undergraduate

The department offers minors in:

- culinary food science
- food and society

- food safety (interdepartmental minor)
- food science
- nutrition

All minors require at least 15 credits, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Prerequisites: Students must complete prerequisite requirements for courses included in the minor.

Minor in Culinary Food Science

FSHN 1010	Food and the Consumer	3
FSHN 1150	Food Preparation Laboratory	1-2
or FSHN 2150	Advanced Food Preparation Laboratory	
FSHN 2140	Scientific Study of Food	3
Select additional credits from the following list for a minimum of 15 credits for the minor:		
FSHN 2200	American Food and Culture	3
FSHN 3050	Food Quality Management and Control	2
FSHN 3110 & 3110L	Food Chemistry and Food Chemistry Laboratory	4
FSHN 4030	Food Laws and Regulations	2
FSHN 4110	Food Ingredient Interactions and Formulations	2
FSHN 4910D	Supervised Work Experience: Culinary Science	1-4
ANS 2700 & 2700L	Foods of Animal Origin and Foods of Animal Origin Laboratory	3
ANS 4600	Science and Technology of Value Added Meat Products	3
HSPM 1330	Food Safety Certification	1
HSPM 3800 & 3800L	Food Production Management and Food Production Management Experience	6
HSPM 3830 or FSHN 5090	Wine and Spirits in Hospitality Management and Sensory Evaluation of Wines	2
HSPM 4870	Fine Dining Management	3

Minor in Food and Society (16-17 credits required)

FSHN 1010	Food and the Consumer	3
FSHN 1670	Introductory Human Nutrition and Health	3
FSHN 2420	The US Food System	3
FSHN 3420	World Food Issues: Past and Present	3
FSHN 4420	Issues in Food and Society	2
Select 2-3 additional credits from:		2-3
AGRON 4500	Issues in Sustainable Agriculture	

FSHN 2200	American Food and Culture	
FSHN 3640	Nutrition and Prevention of Chronic Disease	
FSHN 3650	Obesity and Health	
FSHN 4030	Food Laws and Regulations	
FSHN 4600	Global Nutrition, Health and Sustainability	
FSHN 4630	Community Nutrition and Health	
FSHN 4960A	Food Science and Human Nutrition Travel Course: International travel	
MATE 2200	Globalization and Sustainability	
SOC 3450	Population and Society	
SOC 3480	Global Poverty, Resources and Sustainable Development	
SOC 4440	Sociology of Food and Agricultural Systems	

Interdepartmental Minor in Food Safety

FSHN 1010	Food and the Consumer	3
or HSPM 2330	Hospitality Sanitation and Safety	
FSHN 4030	Food Laws and Regulations	2
FSHN 4200	Food Microbiology	3
FSHN 4890	Issues in Food Safety	1

Select 3 credits from the Food Microbiology area

FSHN/MICRO 4070	Microbiological Safety of Foods of Animal Origins	
FSHN/MICRO 4210	Food Microbiology Laboratory	
MICRO 3100	Medical Microbiology	

Select 3 credits from the Food Processing area:

FSHN 2070	Processing of Foods: Basic Principles and Applications	
FSHN 3050	Food Quality Management and Control	
ANS 2700 & 2700L	Foods of Animal Origin and Foods of Animal Origin Laboratory	
ANS 3600	Fresh Meat Science and Applied Muscle Biology	
FSHN 4710	Food Processing	
FSHN 4720	Food Processing Laboratory	

Minor in Food Science:

FSHN 1010	Food and the Consumer	3
FSHN 2070	Processing of Foods: Basic Principles and Applications	3
Select 9 additional credits:		
Food chemistry:		
FSHN 3110	Food Chemistry (lab optional: FSHN 3110L)	3

FSHN 4100	Food Analysis	3
FSHN 4110	Food Ingredient Interactions and Formulations	2
Food microbiology:		
FSHN 4070	Microbiological Safety of Foods of Animal Origins	3
FSHN 4190	Foodborne Hazards	3
FSHN 4200	Food Microbiology	3
FSHN 4210	Food Microbiology Laboratory	3
Food processing/engineering:		
FSHN 3510	Introduction to Food Engineering Concepts	3
FSHN 4710	Food Processing	3
FSHN 4720	Food Processing Laboratory	2
General food science:		
FSHN 3050	Food Quality Management and Control	2
FSHN 4030	Food Laws and Regulations	2
FSHN 4060	Sensory Evaluation of Food	3

Select additional credits from the following list to meet a minimum of 15 credits for the minor:

FSHN 3140	Professional Development for Culinary Food Science and Food Science Majors	1
FSHN 3150	Professional Skills for Culinary Food Science and Food Science Majors	1

Minor in Nutrition: For students from outside the FSHN department

FSHN 1670	Introductory Human Nutrition and Health	3
FSHN 2650	Nutrition for Active and Healthy Lifestyles	3
FSHN 3600	Advanced Nutrition and the Regulation of Metabolism in Health and Disease	3

Select at least 6 credits from:

FSHN 3610	Nutrition and Health Assessment	2
FSHN 3620	Nutrition and Health Throughout the Lifecycle	3
FSHN 3640	Nutrition and Prevention of Chronic Disease	3
FSHN 3650	Obesity and Health	3
FSHN 4630	Community Nutrition and Health	3
FSHN 4670	Molecular Basis of Nutrition in Disease Etiology and Health Promotion	3
FSHN 4920	Research Concepts in Human Nutrition	2
NUTRS 5010	Biochemical and Physiological Basis of Nutrition: Macronutrients and Micronutrients	4

Minor in Nutrition: For students majoring in culinary food science or food science

FSHN 2650	Nutrition for Active and Healthy Lifestyles	3
FSHN 3600	Advanced Nutrition and the Regulation of Metabolism in Health and Disease	3

Select at least 9 credits from:

FSHN 3610	Nutrition and Health Assessment	2
FSHN 3620	Nutrition and Health Throughout the Lifecycle	3
FSHN 3640	Nutrition and Prevention of Chronic Disease	3
FSHN 3650	Obesity and Health	3
FSHN 4630	Community Nutrition and Health	3
FSHN 4670	Molecular Basis of Nutrition in Disease Etiology and Health Promotion	3
FSHN 4920	Research Concepts in Human Nutrition	2
NUTRS 5010	Biochemical and Physiological Basis of Nutrition: Macronutrients and Micronutrients	4

Graduate Study

The Food Science and Human Nutrition (FSHN) Department offers coursework for the degrees Master of Science and Doctor of Philosophy. Degree options include:

- food science and technology (<https://fshn.hs.iastate.edu/graduate-students/graduate-programs/food-science-and-technology/>) (M.S. and Ph.D.)
- meat science (<https://www.meatscience.ag.iastate.edu/>) (M.S. and Ph.D.; co-major in animal science)
- nutritional sciences (<https://fshn.hs.iastate.edu/graduate-students/graduate-programs/interdepartmental-graduate-program-in-nutritional-sciences/>) (M.S. and Ph.D.; interdepartmental graduate program)
- family and consumer sciences/dietetics (<https://online.hs.iastate.edu/graduate-degrees/dietetics/>) (M.S. only)
- diet and exercise (<https://fshn.hs.iastate.edu/graduate-students/graduate-programs/diet-and-exercise/>) (B.S./M.S.)
- nutritional sciences (B.S./M.S.)

Prerequisite to major work is a baccalaureate degree in food science, nutrition, other physical/biological sciences or engineering that is substantially equivalent to those at Iowa State University.

Students taking major work for the degree Doctor of Philosophy either in food science and technology or in nutritional sciences may choose minors from other fields including anthropology, biorenewable resources and technology, chemistry, biochemistry, economics, education, journalism, microbiology, psychology, physiology, statistics, toxicology, or other related fields.

The interdepartmental graduate program in nutritional sciences, administered through the Graduate College, under the auspices of the Chairs of FSHN and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. Graduate students will be able to select from

three specializations: animal nutrition, human nutrition, or molecular/biochemical nutrition. The two main departments are FSHN and Animal Science, whereas other departments (such as Kinesiology; Biochemistry, Biophysics, and Molecular Biology; Agronomy; and Statistics) may also be involved.

The department offers work for concurrent B.S. and M.S. degree programs that allow students to obtain both the B.S. and M.S. degrees in 5 years. The programs are available to students majoring in nutritional science or pre-diet and exercise, and students' progress toward M.S. degrees in nutritional sciences or diet and exercise, respectively. Students interested in these programs should contact the department for details. Application for admission to the Graduate College should be made during the junior year. Students begin research for the M.S. thesis or creative component during the summer after their junior year and are eligible for research assistantships.

Students graduating with advanced degrees in nutritional sciences and in food science and technology will demonstrate competency in their chosen discipline. Measurable outcomes will include the ability to: 1) design, conduct, and interpret research; 2) apply theoretical information to solve practical problems; 3) prepare and communicate discipline-specific information in written and oral forms to scientific and lay audiences; 4) facilitate learning in the classroom; 5) submit a paper for publication in a peer-reviewed journal; and 6) secure professional-level positions in academia, industry, government, or health care.

Minors - Graduate

The department offers coursework for graduate minors in:

- food science/technology (<https://fshn.hs.iastate.edu/graduate-students/graduate-programs/food-science-and-technology/>)
- nutritional sciences (<https://fshn.hs.iastate.edu/graduate-students/graduate-programs/interdepartmental-graduate-program-in-nutritional-sciences/>)

Food Science and Technology Graduate Minor students must complete the following:

- 9 to 12 credits. Students without a background in food chemistry, food engineering/processing, and/or food microbiology are required to take FSHN 5110 and two 6000-level courses in two different competency areas.
- 9 credits of graduate level food science coursework as approved by the POS committee.
- Maximum of 3 credits at the 4000 level.

Nutritional Sciences Graduate Minor students must complete the following:

- 9 to 12 credits are required. Students who have not taken FSHN 3600 or its equivalent (advanced nutrition with a biochemistry prerequisite) will need to take FSHN 3600, in which case the Nutrition Graduate minor will constitute 12 credits.
- 9 credits of graduate level nutrition courses as approved by the POS Committee.
- NUTRS 5010

Certificate - Undergraduate

Health Coach (<https://kin.hs.iastate.edu/current-students/academics/health-coach-certificate/>)

The undergraduate health coach certificate provides a rigorous academic and theoretical background in three components of health (nutrition, exercise and motivational coaching) required to prepare workers for the challenges of being a health coach.

Certificates - Graduate

Food Safety and Defense (<http://www.fshn.hs.iastate.edu/graduate-program/food-safety-defense/>)

The department offers an online 12-13 credit Graduate Certificate in Food Safety and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas State University and the University of Missouri through the Great Plains Interactive Distance Education Alliance. Students may be admitted if qualified for admission to the food science master's degree program.

Forestry

Administered by the Department of Natural Resource Ecology and Management.

The forestry curriculum offers courses dealing with the management of forest ecosystems for multiple benefits including biodiversity, recreation, water, wilderness, wildlife, and wood and fiber. Conservation and preservation of natural resources are emphasized. The department offers work for the Bachelor of Science degree with a major in forestry and options in forest ecosystem management, interpretation of natural resources, urban and community forestry, or natural resource conservation and restoration. Students select at least one of these options, all of which lead to a professional degree in forestry (Bachelor of Science). The forestry major has been accredited by the Society of American Foresters (SAF) since 1935. The Council for Higher Education Accreditation recognizes SAF as the specialized accrediting body for forestry education in the United States. The primary goal of the undergraduate curriculum in forestry is to educate foresters to be capable of scientifically managing the nation's forest lands and related ecosystems - private and public.

Graduates understand and can apply scientific principles associated with forests, forest ecosystem management, and wood and non-wood products. Graduates are able to communicate effectively and work well in teams. They are capable of preparing and delivering effective oral and written communication of scientific and technical decisions to professional and lay audiences. They are proficient in technical skills such as measurements, computer usage, inventory, economic analysis, data and situation analysis, and ecosystem assessment. They recognize the importance of ethics in forestry and are sensitive to cultural diversity and broad environmental concerns.

Graduates of the forest ecosystem management option are skilled at understanding how forests function and how forests can be managed to produce desired goods (wood, fiber, recreation, wildlife habitat) and services (clean water, carbon sequestration, wilderness) in the long run. They are skilled at interpretation of interactions and effects of abiotic and biotic factors in forests and quantification of bio-physical, social, and economic outputs from forest ecosystems. They are skilled at complex decision-making involving private and public forest resources where ethical, legal, social, economic, and ecological dimensions are explicitly considered.

Graduates of the interpretation of natural resources option are skilled at communicating with the public about the values associated with forest ecosystems and providing educational programs for all ages.

Graduates of the urban and community forestry option are able to combine biological, social, legal, and economic expertise to effectively manage trees or forests in an urban setting. They are skilled at decision-making related to site assessment, and long-term management of urban trees and forests to achieve multiple goals.

Graduates of the natural resource conservation and restoration option are skilled at assessing the natural functions of the environment and human impacts. They are skilled at interpretation of forest and other natural environments and making decisions relating to their conservation and preservation.

In consultation with their advisor, students can select elective courses related to the forest ecosystem management option to emphasize forest ecology; wildlife, wilderness, and recreation management; water quality and erosion protection; quantitative-analytical techniques; business and marketing; and other areas related to natural resource management. Elective courses in the urban and community forestry option can be selected to emphasize plant health, policy and planning, ecology, hydrology, sociology, business administration, or horticulture/design. Elective courses related to the natural resource conservation and restoration option can be selected to emphasize, ecology, wildlife, recreation, nature interpretation, landscape design, sociology and ethics of conservation and preservation. Elective courses in the interpretation

of natural resources option can be selected to emphasize natural history, animal ecology, and environmental education.

Many private firms as well as national, regional, state, and local agencies seek forestry graduates to fill positions in management of natural resources for commodity and non-commodity multiple benefits. Graduates in forestry are prepared to be involved with evolving forestry systems, such as agroforestry and urban forestry. Wood processing industries, such as composite products, plywood, particle board, lumber, and pulp and paper offer professional opportunities in fiber procurement and marketing.

With advanced graduate study, the range of professional job opportunities for a person with a B.S. in forestry is expanded. Opportunities include research and education as well as more specialized managerial and administrative positions with private firms and public agencies.

During fall semester of the second year of study (sophomore year, typically), forestry students are required to enroll in the department's integrated forestry modules consisting of:

FOR 2010	Forest Biology	2
FOR 2020	Sustainable Materials: Wood Utilization	2
FOR 2030	Resource Measurements/Evaluation	2
FOR 2040	Forest Ecosystem Decision-Making	2
FOR 2050	Integrated Forestry Laboratory	3
FOR 2060	Fall Forestry Camp	4

That semester, consisting entirely of forestry coursework, is designed to give students an early understanding of the many aspects of forestry and how they are interrelated. In addition to work in the classroom, students will spend time in laboratory and field work each week. A 3-week off-campus fall camp during the semester will reinforce concepts learned both in the classroom and during laboratory/field sessions. Transfer students should check with the department for counsel on timing their completion of the integrated forestry modules.

Student Learning Outcomes

Upon graduation, students should be able to:

1. Identify, explain and critically evaluate their own beliefs, values and actions in relation to professional and societal standards of ethics.

For any given situation, graduates identify, critically evaluate, and state their own beliefs and values as they relate to professional and societal ethical standards, for any given situation. They elaborate on how those values and beliefs impact their actions, and they explain which specific canons or principles of a professional code of ethics are applicable to a particular situation.

2. Anticipate, analyze and evaluate natural resource issues and opportunities, explaining the ecological, economic, and social consequences of natural resource actions at various scales and over time.

In the case of existing natural resource issues, graduates explain the ecological, economic, and social consequences that reasonably could be expected to occur as the result of actions taken to address the issue. The explanation includes considerations of the geographic area influenced by the issue as well as the time frame over which the consequences can be expected to occur. In the case of evolving circumstances, graduates predict natural resource issues that may arise as a result of the circumstances and explain the ecological, economic and social consequences of those issues.

3. Actively seek the input and perspectives of diverse stakeholders regarding natural resource problems and issues.

Graduates identify the comprehensive list of individuals or groups who may be impacted by particular natural resource problems and issues. They are well versed in techniques for seeking and incorporating input and perspectives from those people, and they incorporate those inputs and perspectives into the decision-making process.

4. Assess, analyze, synthesize, and evaluate information fairly and objectively.

Not all information is equally sound or applicable in a particular situation. Graduates evaluate the validity and importance of information obtained from any source. Once evaluated, they use the information appropriately in the solution of natural resource problems.

5. Work effectively, both individually and with others, on complex, value-laden natural resource problems that require holistic problem-solving approaches.

Effective solution of natural resource problems often involves input from diverse constituencies with diverse value scales. When working individually, graduates incorporate those values into the solution of problems. Graduates work effectively with diverse individuals and groups to reach consensus on problem solutions.

6. Formulate and evaluate alternative solutions to complex problems and recommend and defend best alternatives.

The natural resource base with which we deal is capable of providing numerous goods and services to numerous publics. Graduates formulate multiple alternatives, as well as action plans, to achieve stakeholder objectives. They evaluate each of the feasible alternatives in terms of biological possibility, economic feasibility and social acceptability. They recommend best alternatives based on the stakeholders' objectives, and they justify their recommendations on the basis of sound science.

7. Communicate clearly and effectively with all audiences using appropriate oral, visual, electronic, and written techniques.

Graduates utilize the best form, or forms, of communication for effectively conveying information to, or seeking input from, a particular audience. They are proficient in all forms of communication and adjust their style or technique of communication to suit different audiences.

8. Recognize and interpret resource problems and opportunities across spatial scales from local to global.

Graduates recognize where resource problems and opportunities can or could exist, and they evaluate and interpret these for others. They, evaluate and interpret for individual landowners at a very local scale as well as for problems that span multiple ownerships, regions and ecosystems.

9. Appreciate cultural diversity and understand the impact of the global distribution of people and wealth on natural resource use and valuation.

Different cultures, population densities, and income classes value and use natural resources in very different ways. Because natural resources often are used simultaneously by different groups, it is important for graduates to be able to account for those differing uses and valuations when making management decisions about natural resources.

10. Exercise leadership skills as professionals and engaged citizens

Graduates organize, facilitate, and participate effectively in groups, teams, or organizations. They define problems or opportunities, implement action planning processes, work toward goals and justify actions taken.

11. Demonstrate creativity and innovation in identifying and pursuing opportunities that produce environmental, social, or economic value.

Graduates display creativity in a variety of situations and identify opportunities to promote understanding of natural resource issues. They demonstrate persistence when working with individuals who have diverse interests in order to build consensus and facilitate accomplishing stated objectives.

12. Exercise life-long learning skills developed before graduation.

Graduates articulate why life-long learning is important. Graduates find answers to their questions as they arise throughout life. They are capable of determining what they need to know to effectively deal with an issue or situation, and they know how to obtain the necessary knowledge. They have learned how to learn in the absence of teachers.

Curriculum in Forestry

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency (with a C or better):

English composition	6
Speech fundamentals	3
Total Credits	9

Communication/Library: 13 cr.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
LIB 1600	Introduction to College Level Research	1
SPCM 2120	Fundamentals of Public Speaking	3
One course from:		3
ENGL 3020	Business Communication	
ENGL 3090	Proposal and Report Writing	
ENGL 3120	Communicating Science and Public Engagement	
ENGL 3140	Technical Communication	
Total Credits		13

Humanities and Social Sciences: 6 cr.

6 cr. from approved list.

Ethics: 3 cr.

3 cr. from approved list.

Mathematics, Physical and Life Sciences: 21-23 cr.

MATH 1400	College Algebra	3
CHEM 1630	College Chemistry	4
CHEM 1630L	Laboratory in College Chemistry	1
AGRON 1820	Introduction to Soil Science	3
BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
One course from:		3-4
STAT 1010	Principles of Statistics	
STAT 1040	Introduction to Statistics	
One course from:		3-4
MATH 1510	Calculus for Business and Social Sciences	
MATH 1600	Survey of Calculus	
MATH 1650	Calculus I	
NREM 2400	Quantitative Problem Solving in Natural Resources	
STAT 3010	Intermediate Statistical Concepts and Methods	
Total Credits		21-23

Forestry: 31 cr.

NREM 1040	Practical Work Experience	
NREM 1100	Orientation in Natural Resource Ecology and Management	1
NREM 1200	Introduction to Renewable Resources	3
NREM 2110	Careers in Natural Resources	1
FOR 2010	Forest Biology	2
FOR 2020	Sustainable Materials: Wood Utilization	2
FOR 2030	Resource Measurements/Evaluation	2
FOR 2040	Forest Ecosystem Decision-Making	2
FOR 2050	Integrated Forestry Laboratory	3
FOR 2060	Fall Forestry Camp	4
FOR 3020	Silviculture	4
FOR 4510	Forest Resource Economics and Quantitative Methods	4
FOR 4540	Forestry Practicum	3
Total Credits		31

Electives: Students majoring in forestry are required to choose one of the following options at the end of their sophomore year: forest ecosystem management; sustainable material science and technology; urban and community forestry; natural resource conservation and restoration; or interpretation of natural resources.

Forest Ecosystem Management

FOR 2800	Wood Properties and Identification	4
FOR 3560	Dendrology	3
PLP 4160	Forest Insects and Diseases	3
FOR 4420	Dynamics of Forest Stands	3
FOR 4520	Ecosystem Management: Integrating Ecology, Society, and Policy	3
NREM 3010	Natural Resource Ecology and Soils	4
NREM 3450	Natural Resource Photogrammetry and Geographic Information Systems	3
One course from:		3-4
AECL 3660	Natural History of Iowa Vertebrates	
AECL 4180	Stream Ecology	
ECON 3800	Energy, Environmental and Resource Economics	
NREM 3900	Fire Ecology and Management	
NREM 4070	Watershed Management	
NREM 4460	Integrating GPS and GIS for Natural Resource Management	
NREM 4550	Stream restoration	
NREM 4550L	Stream Restoration Lab	
NREM 4710	Agroforestry Systems	

One course from:	3
NREM 3850 Natural Resource Policy	
or NREM 4600 Controversies in Natural Resource Management	

Total Credits 29-30

Interpretation of Natural Resources

AECL 3650	Vertebrate Biology	4
AECL 3660	Natural History of Iowa Vertebrates	3
BIOL 3660	Plant Systematics	4
ENT 3700	Insect Biology	3
FOR 4520	Ecosystem Management: Integrating Ecology, Society, and Policy	3
NREM 3030	Internship	1-3
NREM 3300	Principles of Interpretation	3

One course from:	3
BIOL 4740 Plant Ecology	
FOR 3560 Dendrology	

One course from:	3-4
AGRON 2060 Introduction to Weather and Climate	
ASTRO 1200 The Sky and the Solar System	
GEOL 1000 How the Earth Works	
GEOL 1010 Environmental Geology: Earth in Crisis	
GEOL 1080 Introduction to Oceanography	3

One course from:	3
NREM 3850 Natural Resource Policy	
NREM 4600 Controversies in Natural Resource Management	

Total Credits 33-36

Natural Resource Conservation and Restoration

AECL 3660	Natural History of Iowa Vertebrates	3
FOR 3560	Dendrology	3
FOR 4520	Ecosystem Management: Integrating Ecology, Society, and Policy	3
NREM 3010	Natural Resource Ecology and Soils	4
NREM 3900	Fire Ecology and Management	3
NREM 4070	Watershed Management	4
PLP 4160	Forest Insects and Diseases	3

One course from:	3
NREM 3450 Natural Resource Photogrammetry and Geographic Information Systems	
NREM 4460 Integrating GPS and GIS for Natural Resource Management	

One course from:	3
NREM 3850 Natural Resource Policy	

NREM 4600 Controversies in Natural Resource Management	
Three credit hours from approved list of electives	3
Total Credits	32

Urban and Community Forestry

CRP 2010	The North American Metropolis	3-4
or CRP 3010	Urban Analytical Methods	
FOR 2800	Wood Properties and Identification	4
FOR 3560	Dendrology	3
FOR 4520	Ecosystem Management: Integrating Ecology, Society, and Policy	3
FOR 4750	Urban Forestry	3
HORT 3420	Landscape Plant Installation, Establishment, and Management	3
PLP 4160	Forest Insects and Diseases	3
SOC 3100	Community	3
or SOC 3820	Environmental Sociology	

NREM 3850 Natural Resource Policy	
NREM 4600 Controversies in Natural Resource Management	
Total Credits	28-29

* To complete degree program in 4 years students must maintain an average of 16 credits per semester.

** Initial math course is determined on the basis of high school math and placement test scores. A non-credit math course may be required at additional course.

***In scheduling coursework, students should pay particular attention to courses with limited offerings (e.g., offered only on alternate years) and to course sequences (i.e., where a course serves as a prerequisite for another course).

Note: In addition to coursework listed above, students must complete departmental requirements for Practical Work Experience requirement (NREM 1040). See <https://www.nrem.iastate.edu/workexperience> (<https://www.nrem.iastate.edu/workexperience/>)

Forestry Minor

The department offers a minor in forestry which can be earned by completion of a minimum of 15 credits in forestry courses. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students wishing to emphasize management and environmental aspects of forestry must select at least 15 credits from the following courses:

FOR 3020	Silviculture	4
FOR 3560	Dendrology	3
FOR 4160	Forest Insects and Diseases	3
FOR 4420	Dynamics of Forest Stands	3

Genetics

Genetics is the scientific study of heredity. Understanding the basis of heredity is fundamental to all aspects of the life sciences, from the most basic molecular study to applied studies of agricultural species. At Iowa State University the study of the life sciences is interdepartmental, involving faculty in the basic, agricultural, and veterinary sciences. Faculty in 20 different departments are involved in genetics research. This large group of faculty presents a broad range of possibilities for students to learn from faculty who are at the forefront of research in many areas of genetics.

UNDERGRADUATE STUDY

Undergraduate study in genetics is jointly administered by three departments: the Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology; the Department of Genetics, Development, and Cell Biology; and the Department of Ecology, Evolution, and Organismal Biology. Undergraduate degrees are offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Science. Programs of study for genetics majors leading to a B.S. degree are available.

Training in genetics may lead to employment in teaching, research, or a variety of health-related professions. Although some students find employment directly after their baccalaureate training, many students continue their education in graduate or professional programs. Students with the B.S. degree may find employment in the biotechnology, health, or food industries. Recent graduates have also developed careers in conservation biology, technical writing, science journalism, technical sales, and business.

The required course work and associated electives provide students with the foundation in basic life sciences, mathematics, chemistry, and physics that is essential for professions involving modern biological/ biomedical sciences. As part of these courses, students develop skills in

problem solving, critical thinking, writing, and research-related activities in the biological sciences.

Specific entrance requirements for medical and health-related professions are established by the professional schools. Students interested in fulfilling pre-professional requirements for such professions as dentistry, human medicine, genetic counseling, optometry, pharmacy, physical therapy, physician assistant, and veterinary medicine can major in genetics while fulfilling the pre-professional requirements.

Student Learning Outcomes:

Upon graduation, students earning the B.S. degree in Genetics are expected to have achieved the following skills and capabilities:

- Comprehensive, detailed understanding of the chemical basis of heredity.
- Comprehensive and detailed understanding of genetic methodology and how quantification of heritable traits in families and populations provides insight into cellular and molecular mechanisms.
- Understanding of how genetic concepts affect broad societal issues including health and disease, food and natural resources, environmental sustainability, etc.
- Understanding the role of genetic mechanisms in evolution.
- The knowledge required to design, execute, and analyze the results of genetic experimentation in animal and plant model systems.
- The ability to recognize the experimental rationale of genetic studies as they are described in peer-reviewed research articles and grant proposals to federal and other funding agencies.
- The ability to evaluate conclusions that are based on genetic data.
- Insight into the mathematical, statistical, and computational basis of genetic analyses that use genome-scale data sets in systems biology settings.
- Understanding the role of genetic technologies in industries related to biotechnology, pharmaceuticals, energy, and other fields.
- Communication skills required in the discipline including oral presentations of research data, published research articles, grant proposals, and poster presentations at conferences.
- Teamwork and leadership skills including group analysis of data, working together in the research laboratory, joint compositions of written reports, substantive participation in research group meetings, etc.

CURRICULUM IN GENETICS - REQUIREMENTS

Total Degree Requirement: 120 cr.

A maximum of 65 cr. from a two-year institution can be applied that may include up to 16 technical cr.; up to 9 Pass-Not Pass cr. of free electives can be applied; a cumulative GPA of at least 2.0 is required

for graduation. Program-approved lists can be found on the Genetics website.

1. Genetics and Life Sciences

A grade of C– or better is required in all Genetics and Life Science courses.

A. Courses required of all Genetics majors

GEN 1100	Genetics Orientation	1
BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
BIOL 2120	Principles of Biology II	3
BIOL 2120L	Principles of Biology Laboratory II	1
GEN 3130	Principles of Genetics	3
GEN 3130L	Genetics Laboratory	1
BIOL 3140	Principles of Molecular Cell Biology	3
BIOL 3150	Biological Evolution	3
One of the following:		3-4
GEN 3220	Introduction to Bioinformatics and Computational Biology	
GEN 3490	The Genome Perspective in Biology	
BCBIO 4060	Bioinformatics of OMICS	
GEN 4090	Molecular Genetics	3
GEN 4100	Analytical Genetics	3
One of the following:		3
GEN 4620	Evolutionary Genetics	
EEOB 5610	Evolutionary and Ecological Genomics	
EEOB 5630	Molecular Phylogenetics	
GEN 4910	Undergraduate Seminar, Professional Practice in Genetics Disciplines	1
MICRO 3020	Biology of Microorganisms	3
Total Credits		35-36

B. Course required of majors in the College of Agriculture and Life Sciences only

A minimum of 3 cr. of coursework in the area of environmental science from program approved list	3

Total Credits	3

2. Advanced Sciences Electives: 6 cr. from program approved list

A grade of C- or better is required in each course. No more than 3 cr. of GEN 4900, 4900R, 4900H, 4920, 4960, 4990, or 4990H may be used to meet this requirement.

3. Mathematical Sciences

Complete at least one calculus course from MATH, minimum of 4 credits. 4

MATH 1600	Survey of Calculus	
MATH 1650	Calculus I	

Complete at least one course from STAT, minimum of 3 credits. 3-4

STAT 1010	Principles of Statistics	
STAT 1040	Introduction to Statistics	

Complete at least one additional course from MATH or STAT, minimum of 4 credits. 4

MATH 1660	Calculus II	
STAT 3010	Intermediate Statistical Concepts and Methods	

Total Credits 11-12

4. Supporting Sciences

CHEM 1770	General Chemistry I	4
CHEM 1770L	Laboratory in General Chemistry I	1
CHEM 1780	General Chemistry II	3
CHEM 1780L	Laboratory in College Chemistry II	1
CHEM 3310	Organic Chemistry I	3
CHEM 3310L	Laboratory in Organic Chemistry I	1
CHEM 3320	Organic Chemistry II	3
CHEM 3320L	Laboratory in Organic Chemistry II	1
PHYS 1310	General Physics I	4
PHYS 1310L	General Physics I Laboratory	1
PHYS 1320	General Physics II	4
PHYS 1320L	General Physics II Laboratory	1

Choose one of the following options 6-7

Option 1

BBMB 4040	Biochemistry I	
And one of the following:		
BBMB 4050	Biochemistry II	
BBMB 4110	Techniques in Biochemical Research	
CHEM 2110 & 2110L	Quantitative and Environmental Analysis and Quantitative and Environmental Analysis Laboratory	
CHEM 3250	Chemical Thermodynamics	

Option 2

BBMB 4200	Mammalian Biochemistry	
And one of the following:		
BBMB 4110	Techniques in Biochemical Research	
CHEM 2110 & 2110L	Quantitative and Environmental Analysis and Quantitative and Environmental Analysis Laboratory	

CHEM 3250	Chemical Thermodynamics	
Total Credits		33-34

5. International Perspectives: 3 cr. from university approved list

This course can satisfy **both** the university requirement for International Perspectives and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

6. U.S. Diversity: 3 cr. from university approved list

This course can satisfy **both** the university requirement for U.S. Diversity and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

7. Communications/Information Literacy

A. Courses required of all Genetics majors

Grades of C or better are required in ENGL 2500 and advanced writing. (The College of Agriculture and Life Sciences requires a C or better in ENGL 1500, as well.)

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
or ENGL 2500H Written, Oral, Visual, and Electronic Composition: Honors		
LIB 1600	Introduction to College Level Research	1
One advanced English writing course from program approved list		3
Total Credits		10

B. Course required of majors in the College of Agriculture and Life Sciences only.

A grade of C or better is required by the college.

SPCM 2120	Fundamentals of Public Speaking	3
or AGEDS 3110 Presentation and Sales Strategies for Agricultural Audiences		
Total Credits		3

8. General Education electives

Courses from college approved lists that also appear on university approved lists of U.S. Diversity or International Perspectives courses can be used to satisfy both requirements.

A. College of Agriculture and Life Sciences

Humanities course from college approved list		3
Social Science course from college approved list		3
Ethics course from college approved list		3
Total Credits		9

B. College of Liberal Arts and Sciences

Humanities courses from college approved list; one of these should be a Science/Humanities bridge course from program approved list 12

Social Science courses from college approved list 9

Students must have completed 3 years of a single world language in high school or take 4-8 credits of World Languages at the university level.

Total Credits 21

Undergraduate Minor

The minor in Genetics may be earned by completing the following courses. At least 9 cr. must be used **only** to fulfill the requirements of the minor and not be applied to any other major, college, or university requirement.

GEN 3130	Principles of Genetics	3
GEN 3130L	Genetics Laboratory	1
BIOL 3140	Principles of Molecular Cell Biology	3
GEN 4100	Analytical Genetics	3
GEN 4090	Molecular Genetics	3
Two or more additional credits in Genetics at the 3000 level or above.		2
Total Credits		15

Global Resource Systems

The Global Resource Systems undergraduate major employs a truly interdisciplinary and systemic approach to understanding complex global resource issues. Students develop a core set of technical competencies in a resource area selected from the majors, minors and certificates offered by the College of Agriculture and Life Sciences. Students choose a world region in which to specialize, develop competency in a relevant world language, and participate in a significant cross-cultural internship experience. They carry out a senior project related to their resource specialization within the context of the world region. The undergraduate experience culminates with a senior capstone course, where students work with real-world clients to address global resource challenges.

Multidisciplinary themes are developed in the context of the physical, biological and socio-economic factors affecting global resource systems. In this context, resource systems include natural, food and agricultural, environmental, cultural and human, political and institutional, financial and built, public health and social resources. Graduates of this program have transnational leadership skills and are successful integrators of various specializations on a team. They are skilled in applying a systemic perspective and developing solutions to complex global resource systems problems using innovativeness and creativity. Future professionals communicate effectively and demonstrate environmental awareness, exhibit an ethical perspective, and display clear analysis of how cultural diversity impacts work both here and abroad. They also recognize opportunities for learning after graduation.

A degree in Global Resource Systems opens the door to employment opportunities in the many businesses and organizations that require globally competent employees.

Student Learning Outcomes

Upon graduation, students should be able to:

Understand sustainable global resource systems by summarizing factors of biological, physical, and social resources in global systems and predicting the consequences of the utilization and distribution of global resources and their systems; develop an attitude of curiosity to continue lifelong learning.

Apply global competency skills by recognizing diverse cultures, reflecting on the value of cultures on global resource systems, and employing skills needed to work in different cultures.

Design ethical and innovative solutions to global challenges by using information literacy skills to define global challenges and creating sustainable solutions to global challenges.

Use communication and leadership skills by communicating effectively with diverse audiences using written, oral, visual, and electronic skills and participating effectively as leaders in teams and organizations.

Curriculum in Global Resource Systems

Administered by a supervisory committee in the College of Agriculture and Life Sciences. Students choose a region of the world to develop an expertise; they choose a language to learn and develop proficiency through the intermediate level; they choose and possess an area of technical expertise by completing an additional major, minor or certificate program offered through the College of Agriculture and Life Sciences; they complete a required internship in an international setting; and they select and complete a senior research project with faculty mentoring.

Total Degree Requirement: 129 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

3 cr. from approved list 3

U.S. Diversity: 3 cr.

3 cr. from approved list 3

Communications Proficiency:

English composition (6 credits with a grade of C or higher; see courses below.)

Speech fundamentals (3 credits with a grade of C or higher; see courses below.)

Communication/Library: 13 cr.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
SPCM 2120	Fundamentals of Public Speaking	3
or AGEDS 3110 Presentation and Sales Strategies for Agricultural Audiences		
ENGL 3020	Business Communication	3
or ENGL 3090 Proposal and Report Writing		
or ENGL 3140 Technical Communication		
LIB 1600	Introduction to College Level Research	1
Total Credits		13

Humanities and Social Sciences: 6 cr.

ECON 1010	Principles of Microeconomics	3
or ECON 1020 Principles of Macroeconomics		
Plus three credit hours from approved humanities list		3
Total Credits		6

Ethics: 3 cr.

3 cr. from approved list	3

Life Sciences: 7 cr.

BIOL 2110	Principles of Biology I	4
& 2110L and Principles of Biology Laboratory I		
or BIOL 2120 Principles of Biology II		
& 2120L and Principles of Biology Laboratory II		
Plus 3 cr. from approved life sciences list at 3000-level or higher		3

Mathematical Sciences: 6 cr.

MATH 1400	College Algebra (or higher; except MATH 1950, 1960)	3
STAT 1010	Principles of Statistics	3-4
or STAT 1040 Introduction to Statistics		
Total Credits		6-7

Global Competency: 15-31 cr.

16 cr. of 1000 and 2000 level of a single WLC language; 15 cr. in global competency courses from an approved list with up to 3 cr. may be earned from a travel course.

Physical Sciences: 8 cr.

One of the following:		5
CHEM 1630	College Chemistry	
& 1630L and Laboratory in College Chemistry		
or CHEM 1770 General Chemistry I		
and Laboratory in General Chemistry I		
& 1770L		
One course from the following:		3

AGRON 1820	Introduction to Soil Science	
AGRON 2060	Introduction to Weather and Climate	
AGRON 2820	Soil Conservation and Land Use	
GEOL 1010	Environmental Geology: Earth in Crisis	
GEOL 1600	Water Resources of the World	
Total Credits		8

Global Resource Systems: 23 cr.

GLOBE 1100	Orientation	1
GLOBE 2010	Introduction to Global Resource Systems	3
3 credits of GLOBE 2110		3
GLOBE 2110	Issues in Global Resource Systems (Each offering is 1 cr., must be repeated for 3 cr.)	
GLOBE 3030	Agricultural, Food and Natural Global Resource Systems	3
GLOBE 3040	Socio-Economic Global Resource Systems	3
GLOBE 3200	Global Resource Systems Internship Preparation	1
One of the following:		3-6
GLOBE 3210	Internship - Global	
GLOBE 3220	Internship - United States	
GLOBE 4010	Senior Project	3
GLOBE 4020	Responses to Global Resource System Challenges	3
Total Credits		23-26

Technical Concentration: 15-18 cr.

Satisfied by any of the majors, minors or certificates offered through the College of Agriculture and Life Sciences.

Electives:

Sufficient coursework to ensure a total of not less than 129 credits
Global Resource Systems, B.S.

Horticulture

To meet the educational needs of a student population with interests ranging from plant physiology to landscape design/installation to fruit and vegetable production to golf course/athletic field construction and management, considerable flexibility is built into the horticulture curriculum. The diversity of interests and need for flexibility are reflected in the impressive array of horticulture courses offered.

The Department of Horticulture offers six options within the horticulture major:

1. Greenhouse Plant Production
2. Horticultural Food Crop Production and Management
3. Landscape Design, Installation, and Management
4. Public Horticulture

5. Horticulture Research
6. Turfgrass Management

Graduates possess the technical knowledge and skills to become professional horticulturists. They understand principles of life science, plant growth and development, and are familiar with cultural and management practices for a wide assortment of horticultural crops. They are able to work and communicate effectively with fellow horticultural professionals and other citizens who share an interest in horticulture. Graduates also understand the ethical and environmental dimensions of problems and issues facing horticultural professionals.

A degree in horticulture opens the door to employment opportunities with production nurseries, seed companies, interior landscaping firms, greenhouses, garden centers, conservatories, landscape design/installation firms, public gardens and arboreta, orchards and vineyards, food processing companies, vegetable farms, fertilizer cooperatives, agricultural chemical companies, golf courses, sports fields, sod production companies, and lawn care businesses. Several allied plant-science industries also provide employment opportunities in the areas of sales, management, and communication. Opportunities exist for careers in research, teaching, extension, and business after obtaining advanced training in graduate school.

Student Learning Outcomes

Upon graduation, students should be able to:

1. Acquire, integrate, and apply knowledge of plant science to manage systems.
2. Demonstrate interdisciplinary knowledge and competency in managing horticulture systems.
3. Synthesize knowledge and use insight and creativity to better understand and improve plant systems.
4. Appreciate and communicate the diverse impacts of horticulture on people.
5. Demonstrate professionalism and proficiency in skills that relate to horticulture.

Degree Requirements

Students majoring in horticulture will select an option in which to specialize before reaching junior standing and will fulfill the requirements described below under Options.

Total Degree Requirement: 129 credits

Only 65 credits from a two-year institution may apply which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

Biological Sciences: 18 cr.

BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
And complete fourteen credit hours from the following:		14
AGRON 2170	Weed Identification	
AGRON 2820	Soil Conservation and Land Use	
AGRON 3160	Crop Structure-Function Relationships	
AGRON 3170	Principles of Weed Science	
AGRON 3540 & 3540L	Soils and Plant Growth and Soils and Plant Growth Laboratory	
BIOL 2120 & 2120L	Principles of Biology II and Principles of Biology Laboratory II	
BIOL 3120	Ecology	
BIOL 3130 & 3130L	Principles of Genetics and Genetics Laboratory	
or GEN 3200 Genetics, Agriculture and Biotechnology		
BIOL 3140	Principles of Molecular Cell Biology	
BIOL 3550	Plants and People	
BIOL 3660	Plant Systematics	
BIOL 4300	Principles of Plant Physiology	
BIOL 4540	Plant Anatomy	
BIOL 4740	Plant Ecology	
ENT 2010	Introduction to Insects	
ENT 2110	Insects and Society	
ENT 3700	Insect Biology	
ENT 3750	Plant Protection Using Natural Enemies	
ENT 3760	Fundamentals of Entomology and Pest Management	
FOR 4160	Forest Insects and Diseases	
PLP 4080	Principles of Plant Path	

Total Credits **18**

Communications Proficiency (with a grade of C or better)

6 credits of English composition (see approved courses below)

3 credits of speech fundamentals (see approved courses below)

Communication/Library: 13 cr.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
LIB 1600	Introduction to College Level Research	1
ENGL 3020	Business Communication	3
or ENGL 3090	Proposal and Report Writing	
or ENGL 3140	Technical Communication	

One of the following: **3**

SPCM 2120	Fundamentals of Public Speaking	

AGEDS 3110	Presentation and Sales Strategies for Agricultural Audiences	

COMST 2140	Professional Communication	

Total Credits **13**

Ethics: 3 cr.

3 cr. from approved list **3**

Humanities and Social Sciences: 6 cr.

Approved Humanities course **3**

Approved Social Science course **3**

Total Credits **6**

International Perspective: 3 cr.

3 cr. from approved list **3**

Total Credits **3**

U.S. Diversity: 3 cr.

3 cr. from approved list **3**

Total Credits **3**

Life Sciences: 6 cr.

BIOL 2110 Principles of Biology I **3**

Approved Life Sciences course **3**

Total Credits **6**

Mathematical Sciences: 6 cr.

Select one course from the following: **3**

MATH 1400	College Algebra	

MATH 1500	Discrete Mathematics for Business and Social Sciences	

MATH 1650	Calculus I	

AND select one of the following: **3**

STAT 1010	Principles of Statistics	

STAT 1040	Introduction to Statistics	

STAT 2260	Introduction to Business Statistics I	

STAT 3010	Intermediate Statistical Concepts and Methods	

Total Credits **6**

Physical Sciences: 11 cr.

Complete one of the following: **5**

CHEM 1630 & 1630L	College Chemistry and Laboratory in College Chemistry	
or CHEM 1770 & 1770L	General Chemistry I and Laboratory in General Chemistry I	

AND complete one course from the following: **3-4**

AGRON 2590	Organic Compounds in Plants and Soils	

CHEM 1780 & 1780L	General Chemistry II and Laboratory in College Chemistry II	
CHEM 3310 & 3310L	Organic Chemistry I and Laboratory in Organic Chemistry I	
PHYS 1010	Physics for the Nonscientist	
PHYS 1150	Physics for the Life Sciences	
PHYS 1310 & 1310L	General Physics I and General Physics I Laboratory	
AND complete one course from the following:		3-5
BBMB 2210	Structure and Reactions in Biochemical Processes	
CHEM 2310 & 2310L	Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry	
CHEM 3310 & 3310L	Organic Chemistry I and Laboratory in Organic Chemistry I	
Total Credits		11-14

Horticultural Sciences: Minimum of 30 cr.

HORT 1100	Professional and Educational Development in Horticulture	1
HORT 2210	Principles of Horticulture Science	3
HORT 3210	Horticulture Physiology	3
Select 23 cr. hours from courses within selected option.		23
Total Credits		Minimum of 30

Soil Sciences: 3 cr.

AGRON 1820	Introduction to Soil Science	3
Total Credits		3

Electives

No more than 4 cr. of Hort 4900 may count toward graduation.

Options

Greenhouse Plant Production

The following courses are required to meet the Horticulture requirement:

HORT 2400	Trees, Shrubs, and Woody Vines for Landscaping	3
HORT 3220	Plant Propagation	3
HORT 3300	Herbaceous Ornamental Plants	3
HORT 3310	Hydroponic Crop Production	2
HORT 3320	Greenhouse and Nursery Operations and Management	4
HORT 4340	Floriculture Crop Production	3
HORT 4350	Landscape Plant Production	3

Other recommended courses are:

HORT 3910	Horticultural Management Experience	
HORT 4240	Sustainable and Environmental Horticulture Systems	
HORT 4760	Horticultural Postharvest Technology	
HORT 2330	House Plants and Interiorscaping	
Required for option:		
ACCT 2840	Financial Accounting	3
And select 9 cr. hours from the following:		
9		
ACCT 2150	Legal Environment of Business	
ACCT 2850	Managerial Accounting	
ACCT 4160	Business Law	
AGRON 2060	Introduction to Weather and Climate	
COMS 1030	Computer Literacy and Applications	
ECON 1010	Principles of Microeconomics	
ECON 1020	Principles of Macroeconomics	
ECON 2300	Farm Business Management	
ECON 2340	Small Business Management	
ECON 3340	Entrepreneurship in Agriculture	
ENTSP 3100	Entrepreneurship and Innovation	
ENTSP 3130	Feasibility Analysis for New Ventures	
MGMT 3700	Managing Organizations	
MGMT 3710	Organizational Behavior	
MKT 3400	Principles of Marketing	
MKT 4420	Sales Management	
MKT 4470	Consumer Behavior	
TSM 2700	Principles of Injury Prevention and Safety	

Horticultural Food Crop Production and Management

The following courses are required to meet the Horticulture requirement:

HORT 2760	Understanding Grape and Wine Science	3
HORT 3760	Fundamentals of Field Production of Horticultural Food Crops	3
HORT 4610	Fruit Crop Production and Management	3
HORT 4710	Vegetable Production and Management	2
HORT 4710L	Vegetable Production and Management Lab	1
HORT 4760	Horticultural Postharvest Technology	3
Other recommended courses:		
HORT 3220	Plant Propagation	
HORT 3310	Hydroponic Crop Production	
HORT 3320	Greenhouse and Nursery Operations and Management	
HORT 3380	Seed Science and Technology	

HORT 3910	Horticultural Management Experience	
HORT 4840	Organic Agricultural Theory and Practice	
Required for option:		
ACCT 2840	Financial Accounting	3
And select 9 cr. hours from the following:		9
ACCT 2150	Legal Environment of Business	
ACCT 2850	Managerial Accounting	
ACCT 4160	Business Law	
COMS 1030	Computer Literacy and Applications	
ECON 1010	Principles of Microeconomics	
ECON 1020	Principles of Macroeconomics	
ECON 2300	Farm Business Management	
ECON 2340	Small Business Management	
ECON 3340	Entrepreneurship in Agriculture	
ENVS 2930	Environmental Planning	
ENVS 3240	Energy and the Environment	
ENVS 3820	Environmental Sociology	
ENVS 4910	Environmental Law and Planning	
FSHN 4030	Food Laws and Regulations	
FSHN 4710	Food Processing	
FSHN 4720	Food Processing Laboratory	
ENTSP 3100	Entrepreneurship and Innovation	
ENTSP 3130	Feasibility Analysis for New Ventures	
MGMT 3700	Managing Organizations	
MGMT 3710	Organizational Behavior	
MKT 3400	Principles of Marketing	
MKT 4420	Sales Management	
MKT 4470	Consumer Behavior	
TSM 2700	Principles of Injury Prevention and Safety	
TSM 3240	Soil and Water Conservation Management	

Horticulture Research

The following courses are required for this option:

AGEDS 3120	Science With Practice	3
HORT 3220	Plant Propagation	3
Biological Sciences:		
BIOL 4300	Principles of Plant Physiology	3
Other recommended courses:		
HORT 2400	Trees, Shrubs, and Woody Vines for Landscaping	
HORT 3300	Herbaceous Ornamental Plants	
HORT 3310	Hydroponic Crop Production	
HORT 3320	Greenhouse and Nursery Operations and Management	

HORT 3420	Landscape Plant Installation, Establishment, and Management	
HORT 3760	Fundamentals of Field Production of Horticultural Food Crops	
HORT 3910	Horticultural Management Experience	
Mathematical Sciences Requirement:		8
MATH 1650	Calculus I	
MATH 1660	Calculus II	
Physical Sciences Requirement:		
BBMB 3010	Survey of Biochemistry or BBMB 404 Biochemistry I or BBMB 316 Principles of Biochemistry	
CHEM 1770	General Chemistry I	
CHEM 1770L	Laboratory in General Chemistry I	
CHEM 1780	General Chemistry II	
CHEM 1780L	Laboratory in College Chemistry II	
CHEM 3310	Organic Chemistry I	
CHEM 3310L	Laboratory in Organic Chemistry I	
CHEM 3320	Organic Chemistry II	
CHEM 3320L	Laboratory in Organic Chemistry II	
PHYS 1310	General Physics I	
& 1310L	and General Physics I Laboratory	
PHYS 1320	General Physics II	
& 1320L	and General Physics II Laboratory	
And select 5 cr. hours from the following:		
BBMB 4050	Biochemistry II	
BBMB 4040	Biochemistry I or BBMB 316 Principles of Biochemistry	
BBMB 4110	Techniques in Biochemical Research	
BIOL 3130	Principles of Genetics	
BIOL 3130L	Genetics Laboratory	
BIOL 3140	Principles of Molecular Cell Biology	
BIOL 3150	Biological Evolution	
CHEM 2110	Quantitative and Environmental Analysis	
CHEM 2110L	Quantitative and Environmental Analysis Laboratory	
CHEM 3160	Instrumental Methods of Chemical Analysis	
CHEM 3160L	Instrumental Analysis Laboratory	
CHEM 3210L	Laboratory in Physical Chemistry	
CHEM 3220L	Laboratory in Physical Chemistry	
CHEM 3240	Introductory Quantum Mechanics	
COMS 1070	Windows Application Programming or COMS 207 Fundamentals of Computer Programming	

GEN 4090 Molecular Genetics

GEN 4100 Analytical Genetics

Landscape Design, Installation and Management

The following courses are required to meet the Horticulture requirement:

HORT 2400	Trees, Shrubs, and Woody Vines for Landscaping	3
HORT 2810	Landscape Graphics	2
HORT 3300	Herbaceous Ornamental Plants	3
HORT 3410	Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs	2
HORT 3420	Landscape Plant Installation, Establishment, and Management	3
HORT 3510	Turfgrass Establishment and Management	3
HORT 3800	Principles of Garden Composition	2
HORT 3810	Beginning Garden Composition Studio	2
HORT 4440	Landscape Construction Management	3
HORT 4810	Advanced Garden Composition	2

Other recommended courses are:

HORT 3220 Plant Propagation

HORT 3320 Greenhouse and Nursery Operations and Management

HORT 3910 Horticultural Management Experience

Required for option:

ACCT 2840 Financial Accounting 3

And select 9 cr. hours from the following: 9

ACCT 2150 Legal Environment of Business

ACCT 2850 Managerial Accounting

ACCT 4160 Business Law

COMS 1030 Computer Literacy and Applications

ECON 2340 Small Business Management

ECON 3340 Entrepreneurship in Agriculture

ENTSP 3100 Entrepreneurship and Innovation

ENTSP 3130 Feasibility Analysis for New Ventures

Minors

The Department of Horticulture offers two minors: 1) Horticulture and 2) Landscape Management. Both minors are earned by taking HORT 2210 Principles of Horticulture Science plus 12 additional credits with a maximum of 3 credits at the 2000-level and a minimum of 9 credits at the 3000-level or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Horticulture minor

The Horticulture minor is a broad-based minor that does not focus within a specific area of horticulture. The 12 additional credits for this minor can be selected from the full list of Horticulture courses.

Landscape Management minor

The Landscape Management minor focuses on landscape management including plant selection, landscape installation and management, and turfgrass management. The 12 additional credits for this minor can be selected from the following courses: HORT 2400 Trees, Shrubs, and Woody Vines for Landscaping, HORT 2810 Landscape Graphics, HORT 3300 Herbaceous Ornamental Plants, HORT 3410 Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs, HORT 3420 Landscape Plant Installation, Establishment, and Management, HORT 3510 Turfgrass Establishment and Management or HORT 4440 Landscape Construction Management.

Graduate Study

The graduate major in horticulture leads to the M.S. (thesis and non-thesis option) and Ph.D. Some faculty members of the department serve as major professors for students in interdepartmental graduate majors in plant biology; genetics and genomics; molecular, cellular, and developmental biology; ecology and evolutionary biology; sustainable agriculture; and environmental science.

Graduates possess a broad understanding of horticulture and the allied plant sciences. They are able to communicate effectively with members of the scientific community, industry groups, and other interested citizens. They are experienced in conducting research and communicating the results from that research. They are capable of addressing and solving complex problems that confront the many horticultural, agricultural, and plant science professions. They also understand the ethical, legal, social, and environmental issues associated with modern agricultural/horticultural practices.

Industrial Technology

The Department of Agricultural and Biosystems Engineering offers a Bachelor of Science degree in Industrial Technology (ITEC), as well as

an undergraduate certificate in Occupational Safety. Students majoring in ITEC choose between three options: Biological and Biomanufacturing Systems Technology, Manufacturing or Occupational Safety. The department also offers a minor in Industrial Technology.

Successful ITEC graduates gain knowledge, skills, and abilities in solving technical problems, understanding the design process, excelling in authentic leadership, being aware of safety issues, having a quality orientation, effectively managing projects, and having a systems-thinking perspective. This translates to a holistic approach that uses science and engineering principles to focus on the way the constituent parts of a manufacturing system interrelate, how they work over time, and how they fit the context of larger systems. Graduates find careers within a variety of industries, businesses, and organizations in the fields of advanced manufacturing and biomanufacturing; robotics; analytical and processing laboratories; automation and controls; biofuel and beverage fermentation systems electronics; lean manufacturing; quality and operations management; safety management, loss prevention; or industrial hygiene.

Common job duties of ITEC Biological and Biomanufacturing Systems Technology graduates include:

- Implementation, management, and documentation of analytical protocols
- Technical project management
- Implement, manage, and maintain instrumentation and equipment
- Manage bioprocessing and biotechnology systems

Common job duties of ITEC Manufacturing graduates include:

- Quality management
- Production supervision
- Product process design
- Facility planning and management

Common job duties of ITEC Occupational Safety graduates include:

- Development, management, and evaluation of safety programs and systems
- Hazard identification and mitigation
- Loss prevention

The certificate in occupational safety is designed to meet the needs of the students who will find themselves in management roles with responsibilities that include safety. The certificate program prepares technically oriented managers to meet their professional safety responsibilities.

For more information about the Industrial Technology degree: <http://www.abe.iastate.edu/undergraduate-students/industrial-technology/>

For more information about the occupational safety certificate: <http://www.abe.iastate.edu/home/certificate-in-occupational-safety/>

Student Learning Outcomes

Upon graduation, all ITEC students should be able to:

1. Apply knowledge of mathematics, science, computation, and applied engineering to identify and solve applied science and technology problems.
2. Develop and conduct experiments and analyze and interpret resulting data.
3. Evaluate and adapt systems, processes and programs to meet desired needs.
4. Function effectively on multi-disciplinary teams
5. Communicate effectively, ethically, and professionally in written, oral, and other formats to technical and non-technical audiences.
6. Understand the potential impacts and limitations of solutions in global and societal contexts.
7. Recognize the need for, and demonstrate an ability to, engage in life-long learning.
8. Effectively apply modern scientific and technical tools necessary for professional practice to address contemporary issues in applied engineering and technology.

Upon graduation, ITEC students in the biological and biomanufacturing systems technology (BBST) option should be able to:

1. Develop, implement, troubleshoot, and evaluate bio-based manufacturing processes, facilities, and products.
2. Calculate and interpret mass and energy balances of biological processes involving microbial growth and conversion, plants, animals, and humans to optimize processing and production systems.
3. Calculate and interpret rates of biological processes involving reaction kinetics, growth, death, heat production, and transpiration to optimize processing and production systems.

Upon graduation, ITEC students in the manufacturing (M) option should be able to:

1. Create, implement, and evaluate manufacturing processes and facility plans.
2. Integrate and apply tools in computer aided design, manufacturing, controls, robotics, and automation systems to applied engineering and technology management settings.
3. Evaluate technologies to enhance production, quality, sustainability, and profitability of manufacturing systems and facility management.

Upon graduation, ITEC students in the occupational safety (OS) option should be able to:

1. Design, implement, and evaluate occupational safety and health programs for work environments.
2. Identify, assess, and analyze hazards and loss-producing conditions in work environments.
3. Eliminate or control occupational hazards using appropriate technologies, training, and administrative interventions.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Communication/Library: 13 cr.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
LIB 1600	Introduction to College Level Research	1
One of the following:		3
ENGL 3020	Business Communication	
ENGL 3090	Proposal and Report Writing	
ENGL 3140	Technical Communication	
AGEDS 3270	Survey of Agriculture and Life Sciences Communication	
One of the following:		3
SPCM 2120	Fundamentals of Public Speaking	
COMST 2140	Professional Communication	
AGEDS 3110	Presentation and Sales Strategies for Agricultural Audiences	
Total Credits		13

Mathematical, Physical, and Life Sciences: 25 cr.

STAT 1040	Introduction to Statistics	3
MATH 1450	Applied Trigonometry	3
MATH 1510	Calculus for Business and Social Sciences	3
PHYS 1310	General Physics I	4
PHYS 1310L	General Physics I Laboratory	1
CHEM 1630	College Chemistry	4
CHEM 1630L	Laboratory in College Chemistry	1
One of the following:		3
BIOL 1010	Introductory Biology	
BIOL 2110	Principles of Biology I	
BIOL 2120	Principles of Biology II	
BIOL 2510	Biological Processes in the Environment	

Second Biology course requirement by Option: 3

Manufacturing option	
Life Sciences Elective from approved College of Agriculture and Life Sciences list	
Occupational Safety option	
BIOL 2550	Fundamentals of Human Anatomy
Total Credits	
25	

Business, Humanities, Ethics, and Social Sciences: 18 cr.

Occupational safety option must take ACCT 2150

ACCT 2840	Financial Accounting	3
or ACCT 2150	Legal Environment of Business	
ECON 1010	Principles of Microeconomics	3
TSM 3700	Occupational Safety (Ethics)	3
Humanities course from College of Agriculture and Life Sciences list		3
International Perspectives course from University list		3
U.S. Diversity course from University list		3
Total Credits		18

Technical Core: 28 cr.

TSM 1100	Introduction to Technology	1
TSM 1110	Experiencing Technology	1
TSM 1150	Solving Technology Problems	3
TSM 1160	Introduction to Design in Technology	3
TSM 2010	Preparing for Workplace Seminar	1
TSM 2100	Fundamentals of Technology	3
TSM 2140	Managing Technology Projects	1
TSM 2700	Principles of Injury Prevention and Safety	3
TSM 3100	Total Quality Improvement	3
TSM 3630	Electrical Power and Control Systems for Agriculture and Industry	4
TSM 3970	Summer Internship in Technology	
or TSM 3990	Internship in Technology	
TSM 4150	Applied Project Management in Technology	2
TSM 4160	Technology Capstone	3
Total Credits		28

TSM 3970 or TSM 3990 may count toward graduation.

Manufacturing Option: 36 cr.

One of the following:		1
ABE 2710	Engineering Applications of Parametric Solid Modeling	
ABE 2720	Parametric Solid Models, Drawings, and Assemblies Using Creo Parametric	
ABE 2730	CAD for Process Facilities and Land Use Planning	

TSM 2160	Advanced Technical Graphics, Interpretation, and CAD	2
TSM 2400	Introduction to Advanced Manufacturing and Metals Processing	3
TSM 2410	Introduction to Manufacturing Processes for Plastics	2
TSM 3370	Fluid Power Systems Technology	3
TSM 3400	Advanced Automated Manufacturing Processes	3
TSM 4400	Cellular Lean Manufacturing Systems	3
TSM 4430	Statics and Strength of Materials for Technology	3
TSM 4440	Facility Planning	3
TSM 4490	Applied Nondestructive Testing and Evaluation.	3
TSM 4650	Automation Systems	3
7 credits of free electives		7
Total Credits		36

Occupational Safety Option: 36 cr.

TSM 2400	Introduction to Advanced Manufacturing and Metals Processing	3
TSM 3710	Occupational Safety Management	2
TSM 3720	Legal Aspects of Occupational Safety and Health	2
TSM 3760	Fire Protection and Prevention	3
TSM 4700	Industrial Hygiene: Physical, Chemical, and Biological Hazards	3

Minor - Industrial Technology

The Department of Agricultural and Biosystems Engineering offers a minor in industrial technology which may be earned by completing a minimum of 15 credits of technology systems management (TSM) courses, which includes:

TSM 1150	Solving Technology Problems	3
TSM 2100	Fundamentals of Technology	3
9 credits from:		9
TSM 2160	Advanced Technical Graphics, Interpretation, and CAD	
TSM 2400	Introduction to Advanced Manufacturing and Metals Processing	
TSM 2410	Introduction to Manufacturing Processes for Plastics	
TSM 2700	Principles of Injury Prevention and Safety	
TSM 3100	Total Quality Improvement	
TSM 3370	Fluid Power Systems Technology	
TSM 3400	Advanced Automated Manufacturing Processes	
TSM 3630	Electrical Power and Control Systems for Agriculture and Industry	
TSM 3700	Occupational Safety	
TSM 3710	Occupational Safety Management	
TSM 3720	Legal Aspects of Occupational Safety and Health	
TSM 3760	Fire Protection and Prevention	
TSM 4400	Cellular Lean Manufacturing Systems	
TSM 4430	Statics and Strength of Materials for Technology	
TSM 4440	Facility Planning	
TSM 4490	Applied Nondestructive Testing and Evaluation.	
TSM 4650	Automation Systems	
TSM 4700	Industrial Hygiene: Physical, Chemical, and Biological Hazards	
TSM 4710	Safety Laboratory	
TSM 4770	Risk Analysis and Management	

- At least six (6) credits of 3000-level or higher TSM classes (from the courses listed above)
- At least nine (9) credits that are not used to meet any other department, college, or university requirement.

Total Credits**15**

For the undergraduate curriculum in agricultural systems technology leading to the degree of Bachelor of Science or for the undergraduate curriculum in industrial technology leading to the degree of Bachelor of Science.

The department also offers an undergraduate curricula and courses in agricultural engineering, biological systems engineering.

Certificate in Occupational Safety

The Department of Agricultural and Biosystems Engineering offers an undergraduate certificate in occupational safety (<http://www.abe.iastate.edu/undergraduate-students/industrial-technology/certificate-in-occupational-safety/>) which may be earned by completing a minimum of 20 credits of technology systems management courses, which includes:

TSM 2700	Principles of Injury Prevention and Safety	3
TSM 3700	Occupational Safety	3
TSM 3710	Occupational Safety Management	2
TSM 3720	Legal Aspects of Occupational Safety and Health	2
TSM 4700	Industrial Hygiene: Physical, Chemical, and Biological Hazards	3
6 credits from a departmentally approved list		6
TSM 4930D	Workshop in Technology: Occupational Safety (Note: This course needs to be the last course taken toward completion of the Occupational Safety Certificate)	1-4

International Agriculture Interdepartmental Undergraduate Program

The international agriculture program provides opportunities to develop knowledge and skills related to the factors that interact to impact agricultural and environmental issues, production, processes, distribution and utilization worldwide. The program puts emphasis on international experience through structured internships and study abroad. The international agriculture program is appropriate for students seeking positions that require knowledge and experience related to global agricultural issues and their impact on local, regional, national and international policies and practices. Students preparing for careers in the following areas will benefit from the international agriculture

program; governmental and non-governmental development agencies, agribusinesses, educational institutions, and non-profit assistance agencies. Outcomes from participation in this program include developing an awareness for the role of international agriculture in the career development process, analyzing international agricultural issues and policies, acquiring skills for solving problems in international development and agribusiness and experiencing real situations and gaining perspectives about agriculture in a global setting.

International Agriculture as Secondary Major

International agriculture is an undergraduate secondary major that may be taken only in conjunction with a primary major in an agriculture and life sciences curriculum. Students choosing international agriculture will strengthen their career placement with a business or agency involved in international activities. Technical knowledge of a primary major discipline will be strengthened by a global awareness of agriculture and life sciences. A secondary major in international agriculture will give students practical insight into the role of agriculture in a world of increasing food and fiber needs. It is ideal for those who wish to broaden their international perspective or prepare for international work in agriculture. The secondary major includes an emphasis on international internship or study abroad and/or foreign languages, and selection of appropriate courses (from an approved list) to meet the needs and interests of the student.

Courses for the secondary major include AGRON 3420 World Food Issues: Past and Present; six credits of study abroad, travel, or language courses or any combination thereof; and six credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Fifteen credits of the secondary major cannot be used to meet requirements of the major or any other college or university requirement.

Students interested in earning a secondary major in international agriculture must contact a program advisor. The early indication of an interest in international agriculture allows for effective integration of the secondary major course requirements with those of the primary major.

Student Learning Outcomes

Students pursuing International Agriculture Secondary Major will be able to:

1. Develop an awareness for the role of international agriculture in their career development process.
2. Improve knowledge of international agriculture within the context of College of Agriculture and Life Sciences degree programs.
3. Analyze international agricultural issues and policies and acquire skills for solving problems in international development and agribusiness.
4. Experience real life situations and gain perspectives about agriculture in a global setting.

- 5. Enhance understanding and analysis of global agricultural issues at home and abroad.

Curriculum in International Agriculture

Administered by an Interdepartmental Committee. International agriculture can be taken only as a secondary major in conjunction with a primary major in the College of Agriculture and Life Sciences. A minor is available to interested students regardless of their major.

15 cr. of this major cannot be used to meet requirements of the primary major or any other college or university requirements.

6 cr. from Internship in International Agriculture or Study Abroad or World Languages and Cultures; AGRON 3420 World Food Issues: Past and Present; credits from approved International Agriculture Courses to total 15 cr.

Minor

A minor in international agriculture is available to interested students regardless of their major. Students selecting the minor should have at least minimal familiarity with agriculture and life sciences and agricultural systems.

Courses for the minor include AGRON 3420 World Food Issues: Past and Present; 3 to 6 credits of study abroad and/or foreign language and 3 to 6 credits in selected international agriculture courses in the College of Agriculture and Life Sciences. The minor requires 15 credits and must include at least 9 credits that are not used to meet any other department, college, or university requirement.

For more information about a secondary major or minor in international agriculture, see descriptions in the designated departments or the supervisory committee.

For more information about courses for either a secondary major or a minor in international agriculture, see descriptions in the designated departments.

Learning and Leadership Sciences Minor

Learning and Leadership Sciences Minor

The Learning and Leadership Sciences minor provides an opportunity for students to engage in productive thinking, enabling them to lead in their professions and contribute to society and their communities.

The coursework builds on the curriculum of a student's primary discipline to enhance student leadership abilities throughout their academic career and beyond. Students will enhance their abilities to engage in productive thinking, such as critical, analytical, and creative thinking in problem-solving; discern the types of thinking required when presented

with new situations; and use different types of thinking to address issues and situations as professionals and citizens. Core courses in the minor address eight competency areas that are critical for leaders: 1) understanding self and personal responsibility for learning, 2) understanding worthy team membership, 3) developing productive thinking and creative problem solving abilities, 4) developing resiliency, 5) negotiating and resolving conflict, 6) action planning for providing service, 7) communicating, and 8) recognizing and acting on the obligation to "do" leadership every day.

Students in the Learning and Leadership Sciences Minor will ultimately achieve these learning outcomes by uncovering and practicing:

- Habits of deep self-reflection about learning and application of these habits to their professional and community lives.
- Effective interaction with others in professional and community settings, including abilities to listen actively, communicate clearly, resolve conflicts, and negotiate desired outcomes.
- Habits of professional thinking, including accountability, initiative, innovation, resilience, tolerance, and profound respect for others.

LLS 1120	Foundations of Learning and Productive Team Membership	2
LLS 1140	Developing Responsible Learners and Effective Leaders	2
LLS 2120	Habits of Mind and Decision-Making in Leadership	2
LLS 3120	Problem Solving and Action Planning in Leadership	3
LLS 4120	Learning and Leadership in Practice	3
At least three additional credits from the following courses (or others) as per personal plan of study:		
AESHM 2110	Leadership Experiences and Development (LEAD)	3
AGEDS 3150	Personal, Professional, and Entrepreneurial Leadership in Agriculture	3
FSHN 3420	World Food Issues: Past and Present	3
HDFS 2700	Family Communications and Relationships	3
MGMT 3710	Organizational Behavior	3

PSYCH 2800	Social Psychology	3
PSYCH 3100	Brain and Behavior	3
PSYCH 3130	Learning and Memory	3
SOC 3050	Social Psychology: A Sociological Perspective	3
SOC 3300	Ethnic and Race Relations	3
SOC 4640	Strategies for Community Engagement	3

Microbiology

Undergraduate Microbiology Major

Interested in the study of small things that have a big impact? Then Microbiology may be the place for you.

Our mission in the Microbiology Program is to instill a comprehensive understanding of microbiology and its relevance to human society and global health, and to cultivate the concepts and skills necessary to succeed in microbiology-related careers.

Iowa State University's Microbiology Undergraduate Program offers:

- Extensive hands-on laboratory experiences that develop problem solving & technical skills used in a variety of professional careers.
- Application of science to issues in the modern world.
- Excellent preparation for human medicine and veterinary medicine.
- Preparation for employment in a variety of professional settings.
- Research opportunities and interaction with professors from across Iowa State University Departments of Animal Science, Plant Pathology and Microbiology, Biochemistry & Molecular Biology, Biology, Veterinary Microbiology, Veterinary Pathology, Food Science, Entomology, and Geology.
- Degrees in microbiology at both the undergraduate (B.S.) level and graduate (M.S., Ph.D., see Graduate Major) level.

Career opportunities:

Opportunities after graduation include the following:

- Biomedical research scientist
- Biotechnology firms
- Biorenewables industry
- Forensic scientist
- Pharmaceutical and vaccine development companies
- Immunologist
- Agricultural microbiology and plant pathology
- International agricultural research centers
- Government laboratories (CDC, NADC, USDA)
- Infectious disease
- Food safety and food technology
- Water quality
- Ecology and environmental microbiology
- Botanical gardens & nurseries
- Technical brewer
- Science writer
- Public health agencies
- Public policy organizations

Interested in Human medicine or Veterinary medicine? A microbiology degree prepares students for advanced study in Dentistry, Medical Laboratory Science, Optometry, Pharmacy, Physician Assistant Programs, and Physician or Veterinary education. Go to [micro.iastate.edu](https://www.micro.iastate.edu) (<https://www.micro.iastate.edu/>) to find more information about the Microbiology Program.

Student Learning Outcomes

Upon graduation, students should be able to:

1. Research and critically evaluate topics in microbiology; understand and communicate results from primary and secondary literature to a variety of audiences.
2. Utilize appropriate quantitative and qualitative microbiological laboratory techniques and equipment, including microscopy, biochemical tests, serological assays, and genetic manipulation.
3. Explain how evolution unifies and explains the diversity of microbes in terms of microbial structure, function, metabolism, and genetics.
4. Describe common adaptations that enable organisms to survive in an ecological niche, such as how microbiota can impact plants, animals/humans, food, and soil health in beneficial, neutral, or negative ways.
5. Develop and follow lab protocols, interpret data, maintain an accurate lab notebook, and create illustrative graphs and tables.
6. Communicate and collaborate across disciplines about fundamental concepts in microbiology and discuss the relationship of science, society, and ethical issues in microbiology.

Curriculum in Microbiology

www.micro.iastate.edu (<http://www.micro.iastate.edu>)

Administered by an interdepartmental committee.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

International Perspectives Courses (<https://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/>)

U.S. Diversity: 3 cr.

U.S. Diversity Courses (<https://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses/>)

Electives: 7-12**Communications Proficiency:**

English composition - with a C or better	6
Speech fundamentals - with a C or better	3

Communication/Library:

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
SPCM 2120	Fundamentals of Public Speaking	3
One course from the following:		3
ENGL 3020	Business Communication	
ENGL 3090	Proposal and Report Writing	
ENGL 3120	Communicating Science and Public Engagement	
ENGL 3140	Technical Communication	
LIB 1600	Introduction to College Level Research	1

Total Credits 13

Humanities and Social Sciences:

Approved Humanities list ¹	3
Approved Social Science list ²	3

¹ Humanities Course list (<https://www.cals.iastate.edu/student-services/humanities/>)

² Social Sciences Course list (<https://www.cals.iastate.edu/student-services/social-sciences/>)

Ethics: 3 cr.

3 cr. from approved Ethics Course list (<https://www.cals.iastate.edu/student-services/ethics/>)

Mathematical Sciences:

One of the following:	7-8
MATH 1430 Preparation for Calculus & MATH 1600 and Survey of Calculus	
MATH 1650 Calculus I & MATH 1660 and Calculus II	
MATH 1600 Survey of Calculus & STAT 3010 and Intermediate Statistical Concepts and Methods	
One of the following:	3-4
STAT 1010 Principles of Statistics	
STAT 1040 Introduction to Statistics	
Total Credits	10-12

Physical Sciences:

CHEM 1770	General Chemistry I	4
CHEM 1770L	Laboratory in General Chemistry I	1
CHEM 1780	General Chemistry II	3

One of the following: 5-10

PHYS 1150	Physics for the Life Sciences & 1150L and Laboratory in Physics for the Life Sciences	
PHYS 1310	General Physics I & 1310L and General Physics I Laboratory & PHYS 1320 and General Physics II & PHYS 1320L and General Physics II Laboratory	
CHEM 3310	Organic Chemistry I	3
CHEM 3310L	Laboratory in Organic Chemistry I	1
CHEM 3320	Organic Chemistry II	3

One of the following: 3-6

BBMB 4040	Biochemistry I & BBMB 4050 and Biochemistry II or BBMB 3010 Survey of Biochemistry or BBMB 3160 Principles of Biochemistry	

Total Credits 23-31

Biological Sciences:

BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
BIOL 2120	Principles of Biology II	3
BIOL 2120L	Principles of Biology Laboratory II	1
BIOL 3130	Principles of Genetics	3
BIOL 3130L	Genetics Laboratory	1
BIOL 3140	Principles of Molecular Cell Biology	3

Total Credits 15

Microbiology:

Core courses:

MICRO 1100	Professional and Educational Preparation in Microbiology	1
MICRO 3020	Biology of Microorganisms	3
MICRO 3020L	Microbiology Laboratory	1
MICRO 3100	Medical Microbiology	3

One of the following: 1

MICRO 3100L	Medical Microbiology Laboratory	
MICRO 4750L	Immunology Laboratory	
MICRO 3200	Molecular and Cellular Bacteriology	4
MICRO 4400	Laboratory in Microbial Physiology, Diversity, and Genetics	4
MICRO 4500	Undergraduate Capstone Colloquium	2
MICRO 4510	Survey in Microbiology	

One of the following: 3

MICRO 4300	Prokaryotic Diversity and Ecology	
MICRO 4560	Principles of Mycology	

MICRO 4770	Bacterial-Plant Interactions	
Additional nine credit hours from the following:		9
MICRO 3530	Introductory Parasitology	
MICRO 3740	Insects and Our Health	
MICRO 3740L	Insects and Our Health Laboratory	
MICRO 4020	Microbial Genetics and Genomics	
MICRO 4070	Microbiological Safety of Foods of Animal Origins	
MICRO 4080	Virology	
MICRO 4200	Food Microbiology	
MICRO 4210	Food Microbiology Laboratory

Minor

The program offers a minor in microbiology which may be earned by accumulating a minimum of 15 credits of microbiology courses.

Students requesting a minor in Microbiology must take the following:

1) MICRO 2010 Introduction to Microbiology and MICRO 2010L Introductory Microbiology Laboratory or MICRO 3020 Biology of Microorganisms and MICRO 3020L Microbiology Laboratory

2) Additional lecture credits and no more than 3 additional lab credits to reach 15 credits. For a list of acceptable courses see https://www.micro.iastate.edu/files/inline-files/minor_in_microbiology_21-22_1.pdf

3) At least 6 credits at the 3000+ level and must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Graduate Study

The program offers work for the degrees Master of Science and Doctor of Philosophy in microbiology and for a minor for students majoring in other programs. The interdepartmental microbiology major is offered

through faculty housed in twelve departments, including Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Civil, Construction and Environmental Engineering; Entomology; Food Science and Human Nutrition; Genetics, Developmental and Cell Biology; Geological and Atmospheric Sciences; Plant Pathology and Microbiology; Veterinary Diagnostic and Production Animal Medicine; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology. Faculty coordinate graduate education and research in a wide range of topics fundamental to the discipline of microbiology. Specific information about individual faculty and their research areas is available at www.micrograd.iastate.edu. (<http://www.micrograd.iastate.edu/>)

Prerequisites to graduate study include a sound undergraduate background in chemistry, mathematics and biology, including microbiology and genetics.

Graduates in the Microbiology Graduate program have a broad-based knowledge in the fundamentals of microbiology as well as advanced knowledge in specific areas as determined by their areas of research focus. Students completing the thesis have the technical, research, critical-thinking, problem-solving, and computer skills to design, implement, and conduct research using a variety of current techniques and equipment. They are also able to communicate research results effectively with scientific peer groups in both oral and written formats.

Natural Resource Ecology and Management

The department addresses a broad spectrum of natural resource and environmental issues in a holistic approach to learning, discovery and engagement. Our vision of natural resources is that informed protection and management of natural resources involves an integration of biological, economic, and social considerations. Such an integrated and comprehensive approach to the education of future generations of natural resource managers and scientists is needed in order to sustain viable landscapes, facilitate strong communities, and produce desired goods, services, and functions from our natural resources.

Our educational mission for the undergraduate and graduate programs is to provide those learning experiences and opportunities that will ensure students can learn to function effectively in their chosen fields.

Central to that effective functioning are the abilities to:

- Identify, explain and critically evaluate their own beliefs, values and actions in relation to professional and societal standards of ethics.
- Anticipate, analyze and evaluate natural resource issues and opportunities, explaining the ecological, economic, and social consequences of natural resource actions at various scales and over time.

- Actively seek the input and perspectives of diverse stakeholders regarding natural resource problems and issues.
- Assess, analyze, synthesize, and evaluate information fairly and objectively.
- Work effectively, both individually and with others, on complex, value-laden natural resource problems that require holistic problem solving approaches.
- Formulate and evaluate alternative solutions to complex problems and recommend and defend best alternatives.
- Communicate clearly and effectively with all audiences using appropriate oral, visual, electronic, and written techniques.
- Recognize and interpret resource problems and opportunities across spatial scales from local to global.
- Appreciate cultural diversity and understand the impact of the global distribution of people and wealth on natural resource use and valuation.
- Exercise leadership skills as professionals and engaged citizens.
- Demonstrate creativity and innovation in identifying and pursuing opportunities that produce environmental, social, or economic value.
- Exercise life-long learning skills developed before graduation.

Undergraduate Study

The Department of Natural Resource Ecology and Management offers work for the Bachelor of Science degree with majors in animal ecology or forestry. The department participates in interdisciplinary programs in biology, environmental studies, international studies, and pest management. By proper selection of free and restricted elective courses, students can obtain a minor or a second major in these programs or other disciplines.

Contact the department for information about minors from the Department of Natural Resource Ecology and Management.

The Department provides numerous scholarships; application information is available in the departmental Student Services Center.

Graduate Study

The Department of Natural Resource Ecology and Management offers work for the degrees Master of Science and Doctor of Philosophy with majors in fisheries biology, forestry, and wildlife ecology. A non-thesis masters degree is available for students desiring a general degree program without thesis research. Students may also major in interdepartmental graduate majors in ecology and evolutionary biology, environmental science, genetics, plant physiology, sustainable agriculture, or toxicology (see Index (<http://catalog.iastate.edu/azindex/>)). All students are required to teach and conduct research as part of their training for the Ph.D. degree.

Fisheries Biology and Wildlife Ecology

Graduates have a broad understanding of the basic principles of animal biology, ecology and management, and relevant aspects of basic mathematics and natural sciences, computing applications, and personal and professional development. They are able to execute rigorous independent research, have developed problem-solving and critical-thinking skills, and can communicate effectively with scientific colleagues and the general public in both formal and informal settings.

Personnel of the U.S. Geological Survey's Iowa Cooperative Fish and Wildlife Research Unit contribute significantly to the graduate program of the department through teaching and research. Governmental agencies such as the U.S. Fish and Wildlife Service, Natural Resources Conservation Service and the Iowa Department of Natural Resources, and non-governmental agencies such as The Nature Conservancy and the Iowa Natural Heritage Foundation also contribute to the graduate program by funding research, providing in-kind support, and providing numerous formal and informal mentoring relationships.

No more than two dual-listed animal ecology courses may be applied for major graduate credit. Additional work is expected of students taking a dual-listed course for credit at the 500 level.

Forestry

The department offers programs leading to the degrees of Master of Science and Doctor of Philosophy with a major in forestry and minor work to students taking major work in other departments.

Graduates are skilled at defining a research problem in forestry, applying scientific principles and appropriate methods, and analyzing the results. They are capable of understanding the many facets of forest and wood science and are very knowledgeable in specific areas in forestry. They are able to deal with complex forestry problems, and where appropriate, they are capable of blending ecological, social, ethical, legal, and economic factors in the research process. They are very skilled at communicating, both in written and oral form, research results to professional and lay audiences. They are sensitive to cultural diversity and work effectively with peers, natural resource professionals, and the public.

The graduate program is open to, and suitable for, students who have majored in forestry or related natural resource fields. A non-thesis master's option is available.

The department participates in the Masters in Business Administration (M.B.A.), with specialization in the agriculture program administered by the College of Business, providing an opportunity to obtain an M.B.A. degree while taking advanced courses in forestry and maintaining contact with the profession of forestry.

Courses primarily for undergraduates:

AECL 2310: Principles of Wildlife & Fisheries Conservation

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110, BIOL 2120, and NREM 1200

Introduction to the principles of wildlife and fisheries management. Case studies will be explored along with assessment methods used to understand management including conservation of populations, species and communities, as well as habitat preservation and restoration. (Typically Offered: Spring)

AECL 3120: Ecology

(Cross-listed with BIOL 3120/ ENSCI 3120).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: BIOL 2110; (BIOL 2120 or BIOL 2510)

Fundamental concepts and principles of ecology dealing with organisms, populations, communities, and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats. (Typically Offered: Fall, Summer)

AECL 3210: Fish Biology

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 3650

Biology, ecology, and evolution of fishes. Emphasis on structure, physiology, and behavior, including a focus on the conservation and management of fishes and their habitats. Laboratory focus on fish morphology, survey methods, identification, distribution, habits, and habitats of fishes. (Typically Offered: Spring)

AECL 3330: Fisheries Techniques

Credits: 2. Contact Hours: Lecture 1, Laboratory 3.

Prereq: BIOL 2120

Introduction to techniques used in the collection and interpretation of fish population data in the field and in the lab. Course objectives include an understanding of population survey methodology and improving student critical thinking and teamwork skills. Laboratory focuses on field trips and hands-on sampling experience. (Typically Offered: Fall)

AECL 3650: Vertebrate Biology

(Cross-listed with BIOL 3650).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: BIOL 2110 and BIOL 2110L

Evolution, biology, and classification of fish, amphibians, reptiles, birds, and mammals. Emphasis on a comparative analysis of the structure and function of organ systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates. (Typically Offered: Fall)

AECL 3660: Natural History of Iowa Vertebrates

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: BIOL 2110 and BIOL 2110L

Vertebrate fauna of Iowa, including fishes, amphibians, reptiles, birds, and mammals. Species identification, habitat requirements, community structure and assessment, conservation issues that include historical population changes and value of wild animals to the region's ecological and economic health. (Typically Offered: Spring)

AECL 3710: Ecological Methods

(Cross-listed with BIOL 3710).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 3120; STAT 1010 or STAT 1040

Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations. (Typically Offered: Fall)

AECL 3720: Wildlife Population Methods

Credits: 4. Contact Hours: Lecture 1, Laboratory 8.

Prereq: BIOL 3120 or NREM 3110

Field-intensive study of population ecology. Emphasis on hands-on learning of study design and techniques to assess population trends in plants, invertebrates, and vertebrates inhabiting terrestrial and aquatic ecosystems. (Typically Offered: Summer)

AECL 3750: Marine Ecology and Ecosystems Dynamics

(Cross-listed with BIOL 3750/ ENSCI 3750).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110

Overview of the ecological processes, ecosystems, and biodiversity in marine environments. Ever-changing dynamics caused by environmental disturbances, internal forces, or by human impacts on species and ecosystems. (Typically Offered: Spring)

AECL 4060: Wildlife Camp

Credits: 3. Contact Hours: Lecture 1, Laboratory 6.

Prereq: BIOL 2110 and Permission of Instructor; restricted to Animal Ecology majors

Introduction to methods and career options in wildlife research and management through field work. Two-week field work experience followed by on-campus reflection, analysis and presentation of field data. (Typically Offered: Fall)

AECL 4150: Ecology of Freshwater Invertebrates, Plants, and Algae

Credits: 2. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 3120

Identification, biology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphases on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment. (Typically Offered: Fall)

AECL 4180: Stream Ecology

(Cross-listed with ENSCI 4180).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 4860

Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries. Offered odd-numbered years. (Typically Offered: Fall)

AECL 4250: Aquatic Insects

(Cross-listed with ENT 4250).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: BIOL 3120

Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes. Offered odd-numbered years. (Typically Offered: Spring)

AECL 4350: Entomology Field Trip

(Cross-listed with ENT 4350).

Credits: 2. Repeatable, maximum of 2 credits.

Prereq: BIOL 3120; Permission of Instructor

Field trip to study insects of major terrestrial and aquatic ecosystems. Location and duration vary. ENT 3700 or ENT 4250 recommended. Offered irregularly. (Typically Offered: Spring, Summer)

AECL 4400: Fishery Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 3120, AECL 3210, AECL 3330; STAT 1010 or STAT 1040; Credit or Enrollment in AECL 4860

Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries. (Typically Offered: Fall)

AECL 4420: Aquaculture

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110 and BIOL 2120

Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, diseases, and marketing. (Typically Offered: Spring)

AECL 4510: Wildlife Ecology and Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 3710

Ecological theory and practice of wildlife management, including, population ecology, habitat management, and current issues in the field. Course involves a series of case studies addressing actual wildlife issues using field and quantitative methods. (Typically Offered: Spring)

AECL 4540: Principles of Wildlife Disease

Credits: 3. Contact Hours: Lecture 3.

Prereq: Junior standing and at least 10 credits in biological sciences at the 3000+ level

Ecological and epidemiological aspects of diseases as they relate to wildlife populations. Topics to be covered include: major classes of disease; detection, description, monitoring, and management of disease; characteristics and interactions between disease agents and wildlife hosts; relationships among wildlife, domestic animal, and human health. (Typically Offered: Spring)

AECL 4550: International Wildlife Issues

Credits: 3. Contact Hours: Lecture 3.

Prereq: AECL 3650, AECL 3120 or Graduate classification and NREM 1200

Biological, political, social, and economic factors affecting the management of international wildlife resources. Meets International Perspectives Requirement. (Typically Offered: Fall)

AECL 4570: Herpetology

(Cross-listed with BIOL 4570).

Credits: 2. Contact Hours: Lecture 2.

Prereq: BIOL 3510 or BIOL 3650

Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles. (Typically Offered: Fall)

AECL 4570L: Herpetology Laboratory

(Cross-listed with BIOL 4570L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: BIOL 3510 or BIOL 365 or AECL 3650; enrollment in BIOL 4570 or AECL 4570

Laboratory to accompany Biology/Animal Ecology 4570. Focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles. (Typically Offered: Fall)

AECL 4580: Ornithology

(Cross-listed with BIOL 4580).

Credits: 2. Contact Hours: Lecture 2.

Prereq: BIOL 3510 or AECL 3650

Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation. (Typically Offered: Spring)

AECL 4580L: Ornithology Laboratory

(Cross-listed with BIOL 4580L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: BIOL 3510 or AECL 3650/BIOL 3650 and Credit or concurrent enrollment in AECL 4580/BIOL 4580

Laboratory complements lecture topics with emphasis on external anatomy, identification and distribution of Midwest birds, and field trips. (Typically Offered: Spring)

AECL 4590: Mammalogy

(Dual-listed with EEOB 5590). (Cross-listed with BIOL 4590).

Credits: 2. Contact Hours: Lecture 2.

Prereq: AECL 3650 or BIOL 3510

Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation. (Typically Offered: Spring)

AECL 4590L: Mammalogy Laboratory

(Cross-listed with BIOL 4590L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: BIOL 3510 or BIOL/AECL 3650; concurrent enrollment in BIOL 4590 or AECL 4590 required

Laboratory focus on identification, survey methods, distribution, habits, and habitats of mammals. Several field trips. (Typically Offered: Spring)

AECL 4710: Introductory Conservation Biology

(Cross-listed with BIOL 4710).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3120

Examination of conservation issues from a population and community perspective. The role of genetics, demography, and environment in determining population viability, habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology. (Typically Offered: Spring)

AECL 4800: Studies in Marine Biology

Credits: 1-8. Contact Hours: Lecture 8.

Repeatable.

Courses taken at Gulf Coast Research Laboratory and other marine biological stations are transferred to Iowa State University under this number. (Typically Offered: Summer)

AECL 4860: Aquatic Ecology

(Cross-listed with BIOL 4860/ ENSCI 4860).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3120 or ENSCI 3190 or ENSCI 4020 or NREM 3010

Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology. (Typically Offered: Fall)

AECL 4860L: Aquatic Ecology Laboratory

(Cross-listed with BIOL 4860L/ ENSCI 4860L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Concurrent enrollment in BIOL 4860

Field trips and laboratory exercises to accompany 4860. Hands-on experience with aquatic research and monitoring techniques and concepts. (Typically Offered: Fall)

AECL 4890: Population Ecology

(Dual-listed with AECL 5890/ EEOB 5890). (Cross-listed with BIOL 4890).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: BIOL 3120; (STAT 1010 or STAT 1040); (MATH 1510, 1600, 1650 or Graduate standing)

Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation. Offered even-numbered years. (Typically Offered: Fall)

Courses primarily for graduate students, open to qualified undergraduates:

AECL 5150: Ecology of Freshwater Invertebrates, Plants, and Algae

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 3120 or graduate standing

Identification, biology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphases on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment. (Typically Offered: Fall)

AECL 5160: Avian Ecology

Credits: 3. Contact Hours: Lecture 3.

Prereq: AECL 3650; AECL 3120; or graduate standing

Current topics and theories including avian breeding and foraging ecology, population biology, community structure, habitat selection, field methodologies, and data interpretation. Offered even-numbered years. (Typically Offered: Spring)

AECL 5180: Stream Ecology

(Cross-listed with ENSCI 5180).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 4860; or graduate standing

Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries. Offered odd-numbered years. (Typically Offered: Fall)

AECL 5200: Fisheries Science

Credits: 3. Contact Hours: Lecture 3.

Prereq: AECL 3120; AECL 3210; or graduate standing

Concepts, approaches, and techniques for assessment of recreational and commercial fisheries. Scope will range from individual fish to entire ecosystems, both freshwater and marine. Offered odd-numbered years. (Typically Offered: Spring)

AECL 5250: Aquatic Insects

(Cross-listed with ENT 5250).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: BIOL 3120 or graduate standing

Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes. Offered odd-numbered years. (Typically Offered: Spring)

AECL 5310: Conservation Biology

(Cross-listed with EEOB 5310).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3120, BIOL 3130; or graduate standing

Examination of conservation issues from a population and a community perspective. Population-level analysis will focus on the role of genetics, demography, and environment in determining population viability. Community perspectives will focus on topics such as habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology. Offered even-numbered years. (Typically Offered: Spring)

AECL 5400: Fishery Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AECL 3120; AECL 3210; AECL 3330; (STAT 1010 or STAT 1040); credit or enrollment in AECL 4860 or graduate standing

Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries. (Typically Offered: Fall)

AECL 5420: Aquaculture

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110; BIOL 2120 or graduate standing

Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, diseases, and marketing. (Typically Offered: Spring)

AECL 5510: Behavioral Ecology

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: (BIOL 3120 or NREM 3110 or BIOL 3540 or ANS 3360 or ANTHR 3170) or graduate classification

The study of how an animal's behavior affects its ability to survive and reproduce in its environment. Course topics, such as foraging behavior, sexual selection, parental care, etc., represent the interface of ecology, evolution, and behavior. Offered odd-numbered years. (Typically Offered: Fall)

AECL 5540: Principles of Wildlife Disease

Credits: 3. Contact Hours: Lecture 3.

Ecological and epidemiological aspects of diseases as they relate to wildlife populations. Topics to be covered include: major classes of disease; detection, description, monitoring, and management of disease; characteristics and interactions between disease agents and wildlife hosts; relationships among wildlife, domestic animal, and human health. (Typically Offered: Spring)

AECL 5860: Aquatic Ecology

(Cross-listed with EEOB 5860/ ENSCI 5860).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3120 or ENSCI 3810 or ENSCI 4020 or NREM 3010 or graduate classification

Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology. (Typically Offered: Fall)

AECL 5860L: Aquatic Ecology Laboratory

(Cross-listed with EEOB 5860L/ ENSCI 5860L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Concurrent enrollment in BIOL 4860

Field trips and laboratory exercises to accompany 4860. Hands-on experience with aquatic research and monitoring techniques and concepts. (Typically Offered: Fall)

AECL 5890: Population Ecology

(Dual-listed with EEOB 4890/ AECL 4890). (Cross-listed with EEOB 5890).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (BIOL 3120, STAT 1010 OR STAT 1040, MATH 1510 OR 1600 OR 1650) or graduate classification

Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation. Offered even-numbered years. (Typically Offered: Fall)

AECL 5990: Creative Component

Credits: 1-30.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**AECL 6110: Analysis of Populations**

Credits: 3. Contact Hours: Lecture 2, Laboratory 1.

Prereq: (BIOL 3120; STAT 5870; MATH 1510 or 1600 or 1650) or graduate classification

Quantitative techniques for analyzing vertebrate population data to estimate parameters such as density and survival. Emphasis on statistical inference and computing. Offered even-numbered years. (Typically Offered: Fall)

AECL 6980: Animal Ecology Teaching Practicum

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Graduate student experience in the animal ecology teaching program. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AECL 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses primarily for professional curriculum students:**AECL 7401: Intro to Aquatic Animal Medicine**

(Dual-listed with AECL 4010). (Cross-listed with BMS 7401).

Credits: 1.

8-week course. Introductory course with focus on fin fish production, health and medicine. Course content will help define future roles for veterinarians, producers, and service providers. Emphasis will be placed on water-evaluation, anatomy, pathology, infectious diseases, nutrition, regulatory constraints in production, food safety, biosecurity and current research. Field trip to aquaculture facility. (Typically Offered: Spring)

Courses primarily for undergraduates:**FOR 2010: Forest Biology**

Credits: 2. Contact Hours: Lecture 2.

Prereq: Concurrent enrollment in FOR 2020, FOR 2030, FOR 2040, FOR 2050, and FOR 2060

Discussion of ecological concepts, individual tree structure and growth, variation and diversity in tree populations. Physical environment of trees and forests, ecological processes in forest communities, and introduction to different regional forest communities. (Typically Offered: Fall)

FOR 2020: Sustainable Materials: Wood Utilization

Credits: 2. Contact Hours: Lecture 2.

Prereq: Concurrent enrollment in FOR 2010, FOR 2030, FOR 2040, FOR 2050, and FOR 2060

Basis for use of wood as an industrial raw material for lumber, composites, pulp and paper, energy and chemicals. Implications of use of alternative renewable and non-renewable materials for societal infrastructure and consumer goods. (Typically Offered: Fall)

FOR 2030: Resource Measurements/Evaluation

Credits: 2. Contact Hours: Lecture 2.

Prereq: Concurrent enrollment in FOR 2010, FOR 2020, FOR 2040, FOR 2050, and FOR 2060; MATH 1400

Survey techniques involved in quantification, valuation, and evaluation of tree and stand growth and other variables in the forest environment (e.g., recreational use, wildlife habitat value, biomass, and solid wood). (Typically Offered: Fall)

FOR 2040: Forest Ecosystem Decision-Making

Credits: 2. Contact Hours: Lecture 2.

Prereq: Concurrent enrollment in FOR 2010, FOR 2020, FOR 2030, FOR 2050, and FOR 2060

Methods of decision-making related to forest ecosystems including communications, teams and conflict resolution. Current issues relating to public, private, and urban forests; quantification of processes, services, and goods produced by the forest and expected by the public such as wildlife, water, range, recreation, wilderness, biodiversity, as well as wood and fiber products. (Typically Offered: Fall)

FOR 2050: Integrated Forestry Laboratory

Credits: 3. Contact Hours: Laboratory 8.

Prereq: Concurrent enrollment in FOR 2010, FOR 2020, FOR 2030, FOR 2040, and FOR 2060

Field and laboratory exercises integrating the evaluation and management of forest goods, services, and the processing of wood products. (Typically Offered: Fall)

FOR 2060: Fall Forestry Camp

Credits: 4.

Prereq: Concurrent enrollment in FOR 2010, FOR 2020, FOR 2030, FOR 2040, and FOR 2050

Three-week field camp to address topics and issues covered in 2010, 2020, 2030, 2040, and 2050. (Typically Offered: Fall)

FOR 2800: Wood Properties and Identification

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Properties of wood and how they relate to its successful use. Comparative anatomical characteristics, scientific nomenclature, and hand lens identification of commercially important North American woods. (Typically Offered: Spring)

FOR 2830: Pesticide Application Certification

(Cross-listed with AGRON 2830/ ENT 2830/ HORT 2830).

Credits: 2. Contact Hours: Lecture 2.

Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized. (Typically Offered: Spring)

FOR 2900A: Special Problems: Leadership in Forestry Teams (LIFT) Learning Community

Credits: 1-4. Repeatable.

Prereq: Freshman or Sophomore classification, permission of instructor

FOR 2900B: Special Problems: Forest Ecosystem Management

Credits: 1-4. Repeatable.

Prereq: Freshman or Sophomore classification, permission of instructor

FOR 2900C: Special Problems: Natural Resource Conservation

Credits: 1-4. Repeatable.

Prereq: Freshman or Sophomore classification, permission of instructor

FOR 2900D: Special Problems: Urban and Community Forestry

Credits: 1-4. Repeatable.

Prereq: Freshman or Sophomore classification, permission of instructor

FOR 2900E: Special Problems: Wood Science and Technology

Credits: 1-4. Repeatable.

Prereq: Freshman or Sophomore classification, permission of instructor

FOR 3020: Silviculture

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: FOR 2010 or NREM 3010 or AECL 3120

Manipulation of forest vegetation based on ecological principles for the production of goods and services. (Typically Offered: Spring)

FOR 3560: Dendrology

(Cross-listed with BIOL 3560).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: BIOL 2110

Identification and ecology of North American woody plant species. Importance of woody plants in timber production and wildlife habitat. Historical conditions of North American forest regions will also be addressed. (Typically Offered: Fall)

FOR 3580: Forest Herbaceous Layer: Ecology and Identification.

Credits: 1.

Survey of the major plant families, general, and representative species of the forest herbaceous layer. Functional ecology and restoration. (Typically Offered: Spring)

FOR 4160: Forest Insects and Diseases

(Cross-listed with PLP 4160).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Nature of insects and pathogens of forest and shade trees; their role in the dynamics of natural and managed forest ecosystems; and the management of indigenous and exotic pests. Laboratory experience working with insect and fungal pests of trees. (Typically Offered: Fall)

FOR 4420: Dynamics of Forest Stands

(Dual-listed with FOR 5420).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: FOR 3020; NREM 3010; (STAT 1010 or STAT 1040)

Change in forest species composition and structure at the stand and landscape scales resulting from site quality, tree growth, competition, succession, and disturbance. Methods for assessing tree growth and reconstructing past stand development. Applications to forest and savanna management. Offered even-numbered years. (Typically Offered: Fall)

FOR 4510: Forest Resource Economics and Quantitative Methods

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: FOR 2030

Application of economic principles to forest resource management considering both market and non-market goods and services. Methods of identifying and specifying problems in the management and use of forest resources. Application of mathematical and statistical models to the solution of managerial problems. (Typically Offered: Spring)

FOR 4520: Ecosystem Management: Integrating Ecology, Society, and Policy

(Dual-listed with FOR 5520/ NREM 5520). (Cross-listed with NREM 4520).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: Junior or Senior classification; (NREM 1200 or BIOL 1730)

Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints. (Typically Offered: Spring)

FOR 4540: Forestry Practicum

Credits: 3. Contact Hours: Lecture 1, Laboratory 4.

Prereq: Senior classification

Integrated decision-making related to the conservation, management, and preservation of private and public forests, wildlands, urban/ community forests, and/or the production and utilization of wood products. Student teams work with a client and develop management plans that incorporate ecological, social, economic, ethical, and institutional/political factors. Effective teamwork, written/oral/visual communication, and problem-solving stressed. Multiple trips to project site and client. (Typically Offered: Spring)

FOR 4750: Urban Forestry

(Cross-listed with HORT 4750).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: Junior or senior classification, 3 credits in BIOL

Discussion of establishment and management of woody perennials in community-owned urban greenspaces, consideration of urban site and soil characteristics, plant physiology, plant culture, urban forest valuation, inventory methods, species selection, and urban forest maintenance (health care and pest management). (Typically Offered: Fall)

Courses primarily for graduate students, open to qualified undergraduates:

FOR 5420: Dynamics of Forest Stands

(Dual-listed with FOR 4420).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: Graduate Standing or Permission of Instructor

Change in forest species composition and structure at the stand and landscape scales resulting from site quality, tree growth, competition, succession, and disturbance. Methods for assessing tree growth and reconstructing past stand development. Applications to forest and savanna management. Offered even-numbered years. (Typically Offered: Fall)

FOR 5520: Ecosystem Management

(Dual-listed with FOR 4520/ NREM 4520). (Cross-listed with NREM 5520).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints. (Typically Offered: Spring)

FOR 5990A: Creative Component: Forest Biology

Credits: 1-12. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

FOR 5990B: Creative Component: Forest Biometry

Credits: 1-12. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

FOR 5990C: Creative Component: Forest and Recreation Economics

Credits: 1-12. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

FOR 5990D: Creative Component: Forest Management and Administration

Credits: 1-12. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

FOR 5990E: Creative Component: Wood Science

Credits: 1-12. Repeatable, maximum of 12 credits.

Courses for graduate students:**FOR 6960: Research Seminar**

(Cross-listed with AGRON 6960/ BBMB 6960/ PLBIO 6960/ GDCB 6960/ HORT 6960).

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

FOR 6990A: Research: Forest Biology - Wood Science

Credits: 1-12. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

FOR 6990B: Research: Forest Biometry

Credits: 1-12. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

FOR 6990C: Research: Forest Economics

Credits: 1-12. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

FOR 6990D: Research: Forest Management and Administration

Credits: 1-12. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

FOR 6990E: Research: Wood Science

Credits: 1-12. Repeatable, maximum of 12 credits.

FOR 6990F: Research: Plant Physiology

Credits: 1-12. Repeatable, maximum of 12 credits.

Prereq: Instructor Permission for Course

Courses primarily for undergraduates:**NREM 1040: Practical Work Experience**

Credits: Required.

Three months of relevant work experience in natural resources, animal ecology, or forestry. Study at a summer biological station may be applicable. See advisor for specific requirements and approval process.

NREM 1100: Orientation in Natural Resource Ecology and Management

Credits: 1. Contact Hours: Lecture 1.

Orientation to the University and to the Department of Natural Resource Ecology and Management. Discussion of departmental learning outcomes, strategies for academic success and academic planning. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

NREM 1110: NREM Transitions Learning Community Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Enrollment limited to members of the NREM Transitions Learning Community. Designed to assist new transfer students and continuing sophomore students with their transition to the academic expectations and professional development aspects of the natural resource program. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

NREM 1150: Explorations in Natural Resource Ecology & Management

Credits: 1. Contact Hours: Lecture 1.

Prereq: (Animal Ecology or Forestry major); Permission of Instructor

Interact with faculty in the Department of Natural Resource Ecology and Management through lectures, discussions, and field experiences. Offered during the second half of Spring semester. (Typically Offered: Spring)

NREM 1200: Introduction to Renewable Resources

(Cross-listed with AGRON 1200/ ENVS 1200).

Credits: 3. Contact Hours: Lecture 3.

Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management. (Typically Offered: Fall, Spring)

NREM 1300: Natural Resources and Agriculture

(Cross-listed with ENVS 1300).

Credits: 3. Contact Hours: Lecture 3.

Survey of the ecology and management of fish, forest, and wildlife resources in areas of intensive agriculture, with emphasis on Iowa. Conservation and management practices for private agricultural lands. Designed for nonmajors. (Typically Offered: Spring)

NREM 2070: Natural Resource Management under the North American Model of Conservation

Credits: 1. Contact Hours: Lecture 1.

Introduction to North American model of conservation, current funding for natural resource management, role of hunting and angling in the North American model, critique and refinement of the model for the 21st century, and introduction to natural resource leadership, and outdoor skills and recreation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

NREM 2110: Careers in Natural Resources

Credits: 1. Contact Hours: Lecture 1.

Prereq: Sophomore classification

Career planning exploration in natural resources. Discussion of the job application process, including techniques for successful interviewing and development of an effective resume. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

NREM 2400: Quantitative Problem Solving in Natural Resources

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: (STAT 1010 or STAT 1040) or Permission of Instructor

Applied quantitative problem-solving skills for natural resource management. Focus on group and individual exercises, with practical problems in geography, hydrology, forestry and ecology. Laboratory includes field data collection and computer data processing and modeling. (Typically Offered: Spring)

NREM 2500: Environmental Geography

(Cross-listed with AGRON 2500/ ENVS 2500/ ENSCI 2500).

Credits: 3. Contact Hours: Lecture 3.

The distribution, origins and functions of the earth's physical systems and the spatial relationship between human activity and the natural world. (Typically Offered: Fall)

NREM 2700: Foundations in Natural Resource Policy and History

(Cross-listed with ENVS 2700/ LA 2700).

Credits: 3. Contact Hours: Lecture 3.

The development of natural resource conservation philosophy and policy from the Colonial Era to the present. North American wildlife, forestry, and environmental policy; national parks and other protected lands; federal and state agencies. Relationship to cultural contexts, including urban reform and American planning movement. Discussion of common pool resources, public and private lands. (Typically Offered: Fall)

NREM 3010: Natural Resource Ecology and Soils

(Cross-listed with ENSCI 3010).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: BIOL 2110, BIOL 2110L; FOR 2010 or a second course in biology

Effects of environmental factors on ecosystem structure and function using forest, prairie and agricultural ecosystems as models. Special emphasis is given to soil-forming factors and the role of soil in nutrient and water cycling and ecosystem dynamics. Additional emphasis is given to human influences on natural ecosystems and the role of perennial plant communities in agricultural landscapes. (Typically Offered: Fall)

NREM 3030: Internship

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: Permission of Instructor; Sophomore classification

Placement with county conservation boards, camps, zoos, parks, etc., for experience as interpreters, rangers, and technicians. (Typically Offered: Fall, Spring, Summer)

NREM 3050: Seminar

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Current topics in natural resources or related issues. (Typically Offered: Fall, Spring)

NREM 3110: Field Ecology in Montana

Credits: 4. Contact Hours: Lecture 2, Laboratory 6.

Prereq: (BIOL 2110; BIOL 2110L; BIOL 2120; BIOL 2120L); Permission of Instructor

Fundamental concepts and principles of ecology dealing with organisms, populations, communities, and ecosystems. Taught at NREM's Rod and Connie French Conservation Education Camp in western Montana. Emphasizes hands-on learning of principles and methods in the field. (Typically Offered: Summer)

NREM 3130: Native Land, Water, and Resources

(Cross-listed with AMIN 3130).

Credits: 3. Contact Hours: Lecture 3.

Examines Native land rights, water rights, and natural resources. Topics may include Native relations to landscapes, cultural resources and infrastructure projects, land rights, water usage agreements, and resource policies as they apply to on- and off-reservation Native communities. AMIN 2100 recommended. Offered even-numbered years. Meets U.S. Diversity Requirement. (Typically Offered: Spring)

NREM 3150: Genetics for Natural Resource Managers

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110 and BIOL 2120

Introduction into how genetic techniques and technologies can aid the management of the earth's biotic resources. Topics include an overview of DNA structure, function and inheritance; tools and techniques for measuring genetic diversity; genetic management of wild and captive populations: DNA forensics as management tool. The goal of this course is to prepare managers/biologists to interpret genetic data as they relate to natural resource conservation. (Typically Offered: Fall)

NREM 3180: Introduction to Ecosystems

(Cross-listed with AGRON 3180/ BIOL 3180/ ENSCI 3180).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 12 credits in AECL, AGRON, BIOL, CHEM, FOR, GEOL, NREM

Biological and physical processes affecting material and energy flows in natural and managed ecosystems. Understanding and predicting climate and management impacts on ecosystem services and sustainability. (Typically Offered: Spring)

NREM 3300: Principles of Interpretation

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: 6 credits in BIOL

History, objectives, forms, and techniques of interpretation in the settings of county, state, national parks, and zoos. Principles of effective communication as they apply to natural resource fields including wildlife management, forestry, and wildlife rehabilitation. Planning and use of effective communications and outreach campaigns to manage and conserve natural resources. (Typically Offered: Spring)

NREM 3450: Natural Resource Photogrammetry and Geographic Information Systems

(Cross-listed with ENSCI 3450).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: Junior classification

Measurement and interpretation of aerial photos in resource management. Introduction to Geographic Information Systems (GIS) using ArcGIS including digitizing, development and query of attribute tables, georeferencing, and use of multiple GIS layers in simple spatial analyses. (Typically Offered: Spring)

NREM 3570: Midwestern Prairie Plants

Credits: 1.

Offered 1st half semester only. Survey of the major plant families, genera, and representative species of Midwestern prairies with emphasis on plant identification. Prairie management for multiple species of plants and wildlife. (Typically Offered: Fall)

NREM 3750X: Environmentalism in Music

Credits: 1. Contact Hours: Lecture 1.

Environmentalism (environmental or ecological activism) is a common topic in popular music. In this seminar, students choose recorded music with an environmental or ecological theme, present their piece to the class, and lead a discussion focused on interpreting lyrics and sound. Through analysis of music from diverse eras, genres, and cultures, students learn about historical events, evaluate attitudes and actions regarding natural resource stewardship and biodiversity preservation, and explore concepts of environmental justice and human dependence on healthy ecosystems for physical and emotional well-being. (Typically Offered: Spring)

NREM 3800: Field Ecology Research and Teaching

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: BIOL 2110 or Department Permission

Students work in teams to conduct ecological research projects at a local field site, and develop related teaching modules/lesson plans. Research and teaching activity objectives, methods, and results are shared with diverse audiences as presentations, written reports, and web-based documents, and used to engage K-12 students and community members via field days and visits to schools and other institutions. (Typically Offered: Fall)

NREM 3850: Natural Resource Policy

(Dual-listed with NREM 5850).

Credits: 3. Contact Hours: Lecture 3.

Development, theory and practice of natural resource policy. Integrative approach with topical policy studies in North American wildlife, forestry, and water. Policy formation, the role of science, introduction to federal law compliance. (Typically Offered: Spring)

NREM 3900: Fire Ecology and Management

Credits: 3. Contact Hours: Lecture 3.

Characteristics and role of fire in forest ecosystems. Major topics covered include fuels, fire weather, fire behavior, fire danger rating systems, fire control, prescribed burning, and fire dynamics in major ecosystem types. (Typically Offered: Fall)

NREM 4020: Watershed Hydrology

(Dual-listed with GEOL 5020/ ENSCI 5020/ MTEOR 5020/ NREM 5020).

(Cross-listed with ENSCI 4020/ MTEOR 4020/ GEOL 4020).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. (Typically Offered: Fall)

NREM 4070: Watershed Management

(Cross-listed with ENSCI 4070/ ENVS 4070).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Prereq: 1 course in BIOL

Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers. (Typically Offered: Spring)

NREM 4460: Integrating GPS and GIS for Natural Resource Management

(Dual-listed with NREM 5460/ ENSCI 5460). (Cross-listed with ENSCI 4460).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: 12 credits in student's major (AECL/FOR) at 3000 level or above

Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation. (Typically Offered: Fall)

NREM 4520: Ecosystem Management: Integrating Ecology, Society, and Policy

(Dual-listed with FOR 5520/ NREM 5520). (Cross-listed with FOR 4520).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: Junior or Senior classification; (NREM 1200 or BIOL 1730)

Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints. (Typically Offered: Spring)

NREM 4550: Stream restoration

(Dual-listed with NREM 5550).

Credits: 2. Contact Hours: Lecture 2.

Prereq: CE 3720 or GEOL 4020 or NREM 4070 or AECL 4180 or ABE 4310
interdisciplinary introduction to the science and practice of stream restoration, with emphasis on restoring physical and biological integrity and ecosystem services to streams and riparian corridors. Lecture highlights philosophical, scientific, and engineering principles. Offered odd-numbered years. (Typically Offered: Fall)

NREM 4550L: Stream Restoration Lab

(Dual-listed with NREM 5550L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: CE 3720 or GEOL 4020 or NREM 4070 or AECL 4180 or ABE 4310
Introduction to measurement and analysis of stream form and function for restoration and rehabilitation. Includes field data collection, map and image analysis, and computation for assessment of channel stability, biotic integrity, and recovery potential. Offered odd-numbered years. (Typically Offered: Fall)

NREM 4600: Controversies in Natural Resource Management

(Cross-listed with ENVS 4600).

Credits: 3. Contact Hours: Lecture 3.

Prereq: AECL 3120 or NREM 3010, NREM 1200, and Junior classification
Analysis of controversial natural resource issues using a case approach that considers uncertainty and adequacy of information and scientific understanding. Ecological, social, political, economic, and ethical implications of issues will be analyzed. (Typically Offered: Fall, Spring)

NREM 4660: Ecosystem Services

(Dual-listed with ENSCI 5660/ NREM 5660). (Cross-listed with ENSCI 4660).

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Prereq: 15 credits in AECL, AGRON, BIOL, CHEM, FOR, GEOL, NREM
Ecosystem services are the societal benefits provided by natural and managed ecosystems. Benefits such as provision of food, purification of air and water, and regulation of climate are essential to human survival and prosperity, but rely upon maintenance of healthy ecosystems. This course will cover the science, policy, and practice of ecosystem services assessment and management, with a special focus on biodiversity, water quality, food production, and climate. Offered odd-numbered years. (Typically Offered: Spring)

NREM 4710: Agroforestry Systems

(Dual-listed with NREM 5710/ SUSAG 5710).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 credits in biological science at 3000 level or above
Concepts of sustainable land use, agroecological dynamics, and component interactions of agroforestry systems. Agroforestry systems in temperate and tropical regions. Design and evaluation techniques for agroforestry systems. Ecological, socioeconomic and political aspects of agroforestry. Offered even-numbered years. Meets International Perspectives Requirement. (Typically Offered: Spring)

NREM 4830: Science + Design: Interpretation of Natural Resources in Montana

(Cross-listed with ARTGR 4830).

Credits: 3. Contact Hours: Lecture 1, Studio 4.

Prereq: Enrollment in ARTGR major; ARTGR 2710 or BIOL 2110; Permission of Instructor.
Interdisciplinary service-learning. Design and production of natural resource related interpretive signs for Montana natural areas. Field-work experience followed by on-campus studio. (Typically Offered: Fall)

NREM 4850: Undergraduate Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 2 times.

Prereq: Major in Animal Ecology or Forestry; Junior or Senior classification; Permission of Instructor
Weekly seminars on current research topics in natural resource ecology and management. Style and best practice in oral research communication. Skills and principles for evaluating research merit and quality of technical communication. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

NREM 4890: Survey of Remote Sensing Technologies

(Cross-listed with EE 4890/ ENSCI 4890/ GEOL 4890/ MTEOR 4890).

Credits: 3. Contact Hours: Lecture 3.

Electromagnetic-radiation principles, active and passive sensors, multispectral and hyperspectral sensors, imaging radar, SAR, thermal imaging, lidar. Examples of applications. Also offered online S. (Typically Offered: Fall)

NREM 4890L: Satellite Remote Sensing Laboratory

(Cross-listed with EE 4890L/ GEOL 4890L/ MTEOR 4890L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Completion or concurrent enrollment in MTEOR/GEOL/NREM/ EE 4890/5890
Processing and analysis of satellite sensor data (optical and radar). Provides practical applications in an environmental context. (Typically Offered: Fall)

NREM 4900A: Independent Study: Animal Ecology

Credits: 1-4. Repeatable, maximum of 4 credits.

Prereq: Restricted to Junior or Senior classifications, Instructor permission required

NREM 4900B: Independent Study: Forestry

Credits: 1-4. Repeatable, maximum of 4 credits.

Prereq: Restricted to Junior or Senior classifications, Instructor permission required

NREM 4900E: Independent Study: Entrepreneurship

Credits: 1-4. Repeatable, maximum of 4 credits.

Prereq: Restricted to Junior or Senior classifications, Instructor permission required

NREM 4900H: Independent Study: Honors Program

Credits: 1-4. Repeatable, maximum of 4 credits.

Prereq: Restricted to Junior or Senior classifications, Instructor permission required

NREM 4960A: Travel Course: International

(Dual-listed with NREM 5960A).

Credits: 1-5. Repeatable, maximum of 3 times.

Prereq: Instructor Permission for Course

Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students. Meets International Perspectives Requirement.

NREM 4960B: Travel Course: Domestic

(Dual-listed with NREM 5960B).

Credits: 1-5. Repeatable, maximum of 3 times.

Prereq: Instructor Permission for Course

Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

NREM 4980: Cooperative Education

Credits: 1-3. Repeatable.

Prereq: Department Chair Permission for Course

Required of all cooperative education students. Students must register prior to commencing each work period. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

NREM 5020: Watershed Hydrology

(Dual-listed with GEOL 4020/ ENSCI 4020/ MTEOR 4020/ NREM 4020).

(Cross-listed with ENSCI 5020/ MTEOR 5020/ GEOL 5020).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. (Typically Offered: Fall)

NREM 5040: Forest Landscapes, Wildlife, and Silviculture

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Desired forest habitat conditions for fish and wildlife. Silvicultural approaches to protecting/improving such habitats. Focus on key forest elements related to animal species, groups and overall diversity. The lab focuses on team observations and discussions of diverse habitats including one weekend field trip. Offered odd-numbered years. (Typically Offered: Fall)

NREM 5050: Seminar

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 times.

Current topics in natural resources research and management. (Typically Offered: Fall, Spring)

NREM 5070: Watershed Management

(Cross-listed with ENSCI 5070).

Credits: 4. Contact Hours: Lecture 3, Laboratory 3.

Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers. (Typically Offered: Spring)

NREM 5330: Erosion and Sediment Transport

(Cross-listed with ABE 5330/ ENSCI 5330).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Soil erosion processes, soil loss equations and their application to conservation planning, sediment properties, initiation of sediment motion and over land flow, flow in alluvial channels and theory of sediment transport, channel stability, reservoir sedimentation, wind erosion, BMPs for controlling erosion. Offered even-numbered years. (Typically Offered: Fall)

NREM 5350: Restoration Ecology

(Cross-listed with EEOB 5350/ ENSCI 5350).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Theory and practice of restoring animal and plant diversity, structure and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies. Offered even-numbered years. (Typically Offered: Fall)

NREM 5420A: Introduction to Molecular Biology Techniques: DNA Techniques

(Cross-listed with BMS 5420A/ EEOB 5420A/ FSHN 5420A/ GDCB 5420A/ HORT 5420A/ BBMB 5420A/ NUTRS 5420A/ VDPAM 5420A/ VMPM 5420A).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

NREM 5420B: Introduction to Molecular Biology Techniques: Protein

(Cross-listed with BMS 5420B/ EEOB 5420B/ FSHN 5420B/ GDCB 5420B/ HORT 5420B/ BBMB 5420B/ NUTRS 5420B/ VDPAM 5420B).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only. (Typically Offered: Spring, Summer)

NREM 5420C: Introduction to Molecular Biology Techniques: Cell Techniques

(Cross-listed with BMS 5420C/ EEOB 5420C/ FSHN 5420C/ GDCB 5420C/ HORT 5420C/ BBMB 5420C/ NUTRS 5420C/ VMPM 5420C/ VDPAM 5420C).

Credits: 1. Contact Hours: Laboratory 2.

Repeatable.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. ular biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

NREM 5420D: Introduction to Molecular Biology Techniques: Plant Transformation

(Cross-listed with BMS 5420D/ EEOB 5420D/ FSHN 5420D/ GDCB 5420D/ HORT 5420D/ BBMB 5420D/ NUTRS 5420D/ VMPM 5420D/ VDPAM 5420D).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of tranformants. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

NREM 5420E: Introduction to Molecular Biology Techniques: Proteomics

(Cross-listed with BMS 5420E/ EEOB 5420E/ FSHN 5420E/ GDCB 5420E/ HORT 5420E/ BBMB 5420E/ NUTRS 5420E/ VMPM 5420E/ VDPAM 5420E).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

NREM 5420F: Introduction to Molecular Biology Techniques: Metabolomics

(Cross-listed with BMS 5420F/ EEOB 5420F/ FSHN 5420F/ GDCB 5420F/ HORT 5420F/ BBMB 5420F/ NUTRS 5420F/ VMPM 5420F/ VDPAM 5420F).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

NREM 5420G: Introduction to Molecular Biology Techniques: Genomic

(Cross-listed with BMS 5420G/ EEOB 5420G/ FSHN 5420G/ GDCB 5420G/ HORT 5420G/ BBMB 5420G/ NUTRS 5420G/ VMPM 5420G/ VDPAM 5420G).

Credits: 1. Contact Hours: Lecture 0.5, Laboratory 1.

Repeatable.

Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only. (Typically Offered: Spring)

NREM 5460: Integrating GPS and GIS for Natural Resource Management
(Dual-listed with NREM 4460/ ENSCI 4460). (Cross-listed with ENSCI 5460).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation. (Typically Offered: Fall)

NREM 5520: Ecosystem Management

(Dual-listed with FOR 4520/ NREM 4520). (Cross-listed with FOR 5520).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints. (Typically Offered: Spring)

NREM 5550: Stream Restoration

(Dual-listed with NREM 4550).

Credits: 2. Contact Hours: Lecture 2.

interdisciplinary introduction to the science and practice of stream restoration, with emphasis on restoring physical and biological integrity and ecosystem services to streams and riparian corridors. Lecture highlights philosophical, scientific, and engineering principles. Offered odd-numbered years. (Typically Offered: Fall)

NREM 5550L: Stream Restoration Lab

(Dual-listed with NREM 4550L).

Credits: 1. Contact Hours: Laboratory 3.

Introduction to measurement and analysis of stream form and function for restoration and rehabilitation. Includes field data collection, map and image analysis, and computation for assessment of channel stability, biotic integrity, and recovery potential. Offered odd-numbered years. (Typically Offered: Fall)

NREM 5660: Ecosystem Services

(Dual-listed with ENSCI 4660/ NREM 4660). (Cross-listed with ENSCI 5660).

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Ecosystem services are the societal benefits provided by natural and managed ecosystems. Benefits such as provision of food, purification of air and water, and regulation of climate are essential to human survival and prosperity, but rely upon maintenance of healthy ecosystems. This course will cover the science, policy, and practice of ecosystem services assessment and management, with a special focus on biodiversity, water quality, food production, and climate. Offered odd-numbered years. (Typically Offered: Spring)

NREM 5700: Advanced Decision-making in Natural Resource Allocation

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Analytical approach to economic aspects of forest resource management problems. Theory and application of economic decision-making criteria to traditional and modern forest resource management issues. Current problems in the allocation of forest resources. Offered even-numbered years. (Typically Offered: Spring)

NREM 5710: Agroforestry Systems

(Dual-listed with NREM 4710/ SUSAG 4710). (Cross-listed with SUSAG 5710).

Credits: 3. Contact Hours: Lecture 3.

Concepts of sustainable land use, agroecological dynamics, and component interactions of agroforestry systems. Agroforestry systems in temperate and tropical regions. Design and evaluation techniques for agroforestry systems. Ecological, socioeconomic and political aspects of agroforestry. Offered even-numbered years. Meets International Perspectives Requirement. (Typically Offered: Spring)

NREM 5830: Science + Design: Interpretation of Natural Resources in Montana

(Cross-listed with ARTGR 5830).

Credits: 3. Contact Hours: Lecture 1, Studio 4.

Interdisciplinary service-learning. Design and production of natural resource related interpretive signs for Montana natural areas. Field-work experience followed by on-campus studio. (Typically Offered: Fall)

NREM 5850: Natural Resource Policy

(Dual-listed with NREM 3850).

Credits: 3. Contact Hours: Lecture 3.

Development, theory and practice of natural resource policy. Integrative approach with topical policy studies in North American wildlife, forestry, and water. Policy formation, the role of science, introduction to federal law compliance. (Typically Offered: Spring)

NREM 5890: Survey of Remote Sensing Technologies

(Cross-listed with EE 5890/ ENSCI 5890/ GEOL 5890/ MTEOR 5890).

Credits: 3. Contact Hours: Lecture 3.

Electromagnetic-radiation principles, active and passive sensors, multispectral and hyperspectral sensors, imaging radar, SAR, thermal imaging, lidar. Examples of applications. Also offered online S. (Typically Offered: Fall)

NREM 5890L: Satellite Remote Sensing Laboratory

(Cross-listed with EE 5890L/ GEOL 5890L/ MTEOR 5890L).

Credits: Required. Contact Hours: Laboratory 3.

Processing and analysis of satellite sensor data (optical and radar). Provides practical applications in an environmental context. (Typically Offered: Fall)

NREM 5900A: Special Topics: Animal Ecology

Credits: 1-4. Repeatable, maximum of 4 credits.

*Prereq: Instructor Permission for Course***NREM 5900B: Special Topics: Forestry**

Credits: 1-4. Repeatable, maximum of 4 credits.

*Prereq: Instructor Permission for Course***NREM 5930: Workshop**

Credits: 1-3. Repeatable.

NREM 5960A: Travel Course: International

(Dual-listed with NREM 4960A).

Credits: 1-5. Repeatable, maximum of 3 times.

Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

NREM 5960B: Travel Course: Domestic

(Dual-listed with NREM 4960B).

Credits: 1-5. Repeatable, maximum of 3 times.

Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

NREM 5980: Natural Resource Ecology and Management Teaching**Practicum**

Credits: 1.

Prereq: Graduate classification and Permission of Instructor

Graduate student experience in teaching. Student must plan and present at least one unit of subject matter in a course or extension workshop.

Teaching practicum must be documented by the student and approved by the student's POS committee. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

NREM 5990: Creative Component

Credits: 1-30. Repeatable.

Courses for graduate students:**NREM 6000: Seminar**

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Current topics in natural resources research and management. (Typically Offered: Fall, Spring)

NREM 6980: Natural Resource Ecology and Management Teaching**Practicum**

Credits: 1.

Prereq: Graduate classification and Permission of Instructor

Graduate student experience in teaching. Student must plan and present substantive subject matter for a minimum of three weeks in lecture and/or laboratory formats, or a series of extension seminars/workshops.

Teaching practicum must be documented by the student and approved by the student's POS committee. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

NREM 6990: Research

Credits: 1-12. Repeatable, maximum of 12 credits.

Nursing

OVERVIEW

The Bachelor of Science in Nursing (BSN) program at Iowa State University is a RN-to-BSN program, designed for those who are already a Registered Nurse (RN), and desire to further their nursing career and education to the next level. Iowa State's RN-to-BSN program provides interactive learning opportunities where students can apply their real-world experiences and education to inspire innovation in their places of care. RN-to-BSN students will be challenged to enhance health promotion and disease prevention, apply nursing science and evidenced-based patient-centered care, focus on the culture of health for nurses, individuals, and communities, and demonstrate the continuum of care, from a nurse's self-care to patient care to community and population health.

Students in the Bachelor of Science in Nursing program who wish to add an additional major, must pursue multiple degrees. Likewise, students in other programs who wish to add a Bachelor of Science in Nursing must pursue multiple degrees.

The baccalaureate nursing program at Iowa State University of Science and Technology located in Ames, Iowa is approved by the:

Iowa Board of Nursing (IBON)

Riverpoint Business Park

400 SW 8th St., Suite B

Des Moines, IA 50309

(515) 281-3255

The baccalaureate nursing program at Iowa State University of Science and Technology located in Ames, Iowa is accredited by the:

Accreditation Commission for Education in Nursing (ACEN)

3390 Peachtree Road NE, Suite 1400

Atlanta, GA 30326

(404) 975-5000

The most recent accreditation decision made by the ACEN Board of Commissioners for the baccalaureate nursing program is initial accreditation.

View the public information disclosed by the ACEN regarding this program at <http://www.acenursing.com/accreditedprograms/programSearch.htm>

Student Learning Outcomes

Upon graduation, students should be able to:

1. Synthesize theory and concepts from the arts and humanities, natural and social sciences, and nursing in the holistic practice of professional nursing.
2. Integrate knowledge of historical and contemporary nursing with leadership skills and principles to facilitate optimal patient and systems outcomes.
3. Translate research findings to support evidence-based, competent, safe, and effective nursing care to individuals, families, and communities in diverse settings across the lifespan.
4. Utilize current technology effectively and efficiently to communicate, manage knowledge, mitigate error, support decision making and accomplish goals related to the delivery of safe, quality care for diverse individuals, families, and the community.
5. Examine how healthcare policies, including financial and regulatory, influence healthcare systems, nursing practices and population health.
6. Incorporate principles of effective communication and collaboration when working with members of the health team, recipients of care and interested groups to improve health outcomes for individuals, groups and communities.
7. Integrate concepts of health promotion and disease management, health literacy and patient-centered care to improve population health.
8. Engage in professional, culturally competent, and ethically congruent care that reflects dignity and uniqueness of individuals and groups in diverse populations and locations.
9. Demonstrate a commitment to professionalism and model the values of advocacy, compassion, integrity, human dignity, cultural competence and social justice while embracing the concept of continuous learning.

RN-to-BSN Admissions Criteria

Applications for the RN-to-BSN program are individually reviewed.

Minimum requirements for admission to the BSN program include:

- Licensure as a Registered Nurse
- Meet all Iowa State University admission criteria for transfer students
- Official college transcripts from all colleges and universities attended

- Minimum of 2.5 cumulative GPA for all college coursework
- Achievement of minimum "C" (not C-) for all prerequisite courses listed below

English Composition I and II (ENGL 1500 and ENGL 2500 equivalent)

Introduction to Chemistry (CHEM 1630 or CHEM 1T equivalent)

Statistics (STAT 1010 or STAT 1040 equivalent)

Introduction to Human Nutrition (FSHN 1670 equivalent)

Introduction to Sociology (SOC 1340 equivalent)

Admissions requirements are congruent with the Iowa Action Coalition, RN-to-BSN Task Force Recommendations.

RN-to-BSN Progression Criteria

- Must earn a "C" grade or better in all NRS courses and meet the university's academic standards for progress toward a degree

RN-to-BSN Graduation Requirements

- At least 32 credits earned in residence at Iowa State University, and the final 32 credits taken through Iowa State University prior to graduation.
- All general education requirements at Iowa State University must be met.
- The BSN curriculum consists of 21 credits of NRS courses, 8 credits of FSHN courses, and 3 elective credits for a total of 32 credits in addition to prerequisite coursework.
- Electives are selected by students to meet identified career interests, and total elective credits needed will vary based on individual transfer credits.
- Minimum credits for graduation is 120 credits.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 10 cr.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
LIB 1600	Introduction to College Level Research	1
Oral Communication course, select from:		3
COMST 2140 Professional Communication		
SPCM 2120 Fundamentals of Public Speaking		

Humanities and Social Sciences: 3 cr.

SOC 1340	Introduction to Sociology	3

College of Human Sciences Students Only:

Additional Humanities and Social Sciences: 9 cr.

Humanities courses from approve list ¹		6
Humanities or social science course		3

**College of Agriculture & Life Science Students Only:
Additional Humanities and Social Sciences: 6 cr.**

Humanities course from approved list ¹	3
Ethics course from approved list ²	3

¹ Approved Humanities course list (<https://www.cals.iastate.edu/student-services/humanities/>)

² Approved Ethics course list (<https://www.cals.iastate.edu/student-services/ethics/>)

Math, Physical, & Biological Sciences: 7-8 cr.

Statistics course, select from:	3-4
STAT 1010 Principles of Statistics	
STAT 1040 Introduction to Statistics	
CHEM 1630 College Chemistry	4
Total Credits	7-8

**College of Agriculture & Life Sciences students only:
Additional Math, Physical & Biological Sciences: 7-8 crs.**

Select math course: MATH 1040, MATH 1050, MATH 1400, MATH 1430, MATH 1450, MATH 1500, MATH 1510, MATH 1600, or MATH 1650	3-4
Select biology course: BIOL 1010, BIOL 2110, or BIOL 2120	3
CHEM 1630L Laboratory in College Chemistry	1
Total Credits	7-8

Nursing Courses: 21 cr.

NRS 2500 Orientation to RN - to - BSN Nursing	1
NRS 3200 Essential Concepts for Professional Nursing Practice	3
NRS 3400 Nursing Research and Evidence-Based Practice	4
NRS 4200 Promoting a Culture of Health and Wellness	3
NRS 4400 Population and Community Health Nursing [†]	3
NRS 4420 Population and Community Health Nursing Practicum	1
NRS 4600 Nursing Leadership and Management	3
NRS 4800 Advanced Concepts of Professional Nursing	3
Total Credits	21

[†] May fulfill the U.S. Diversity Requirement - check current list

* Denotes Practicum Courses.

** Denotes courses that may be taken before starting the nursing program.

Plan of study does not include any unmet ISU general education requirements.

Nutritional Science (AGLS)

Nutritional science looks at the connection between diet and health.

Students learn how diet can play a crucial role in the cause, treatment, and prevention of many diseases. There are degree program focuses within nutritional science:

- Pre-health and research coursework prepares students for work in research laboratories, graduate study in nutrition or biological

sciences, or entrance into health professional programs, such as medical, dental, physician assistant, and pharmacy schools. Students gain a strong science education along with human nutrition expertise.

- Health coach and nutrition and wellness coursework prepares students for work positions in program planning and evaluation for community, public health, non-profit, and corporate wellness programs addressing the growing public interest in nutrition, wellness, and preventative health. Students learn about the role of nutrition and healthy eating for disease prevention and wellness.

The department also offers a nutrition minor.

Student Learning Outcomes

Upon graduation, students should be able to:

- Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
- Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
- Participate effectively in a group or team.
- Integrate creativity, innovation, or entrepreneurship in ways that produce value.
- Describe sociocultural competence relative to diversity, equity and/or inclusion.
- Explain how human activities impact the natural environment and how societies are affected.
- Meet program specific learning outcomes for the Nutritional Science major.

Degree Requirements

Administered by the Department of Food Science and Human Nutrition

- Pre-Health and Research Program Focus
- Health Coach Program Focus
- Nutrition and Wellness Program Focus

PRE-HEALTH AND RESEARCH PROGRAM FOCUS

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 13 cr.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3

Select from: 3

ENGL 3020	Business Communication	
ENGL 3090	Proposal and Report Writing	
ENGL 3140	Technical Communication	
LIB 1600	Introduction to College Level Research	1
SPCM 2120	Fundamentals of Public Speaking	3
Total Credits		13

Humanities and Social Sciences: 6-12 cr.

Select Humanities courses from approved list 3

Select Social Science course from approved list 3

If HSCI student, select: 6

Additional Humanities course	
Additional Humanities or Social Science course	

Ethics: 3 cr.

FSHN 3420 World Food Issues: Past and Present 3

Mathematical Sciences: 6-12 cr.

Select at least 3 credits from: 3-8

MATH 1400	College Algebra	
MATH 1430	Preparation for Calculus	
MATH 1600	Survey of Calculus	
MATH 1650	Calculus I	
MATH 1650 & MATH 1660	Calculus I and Calculus II	

Select at least 3 credits from: 3-4

STAT 1010	Principles of Statistics	
STAT 1040	Introduction to Statistics	

Total Credits 6-12

Physical Sciences: 13 cr.

CHEM 1770	General Chemistry I	4
CHEM 1770L	Laboratory in General Chemistry I	1
CHEM 1780	General Chemistry II	3
CHEM 1780L	Laboratory in College Chemistry II	1
CHEM 2310	Elementary Organic Chemistry	3
	or CHEM 3310 Organic Chemistry I	
CHEM 2310L	Laboratory in Elementary Organic Chemistry	1
	or CHEM 3310L Laboratory in Organic Chemistry I	

Total Credits 13

Biological Sciences: 24-29 cr.

BIOL 2110	Principles of Biology I	3
BIOL 2110L	Principles of Biology Laboratory I	1
BIOL 2120	Principles of Biology II	3

BIOL 2120L	Principles of Biology Laboratory II	1
BIOL 2550	Fundamentals of Human Anatomy	3
BIOL 2550L	Fundamentals of Human Anatomy Laboratory	1
Select at least 3 credits from:		3-4
BIOL 2560 & 2560L	Fundamentals of Human Physiology and Fundamentals of Human Physiology Laboratory	
	or BIOL 335C Principles of Human and Other Animal Physiology	
BIOL 3130	Principles of Genetics	3
Select at least 3 credits from:		3-6
BBMB 3010	Survey of Biochemistry	
BBMB 3160	Principles of Biochemistry	
BBMB 4040 & BBMB 4050	Biochemistry I and Biochemistry II	
MICRO 2010	Introduction to Microbiology	2-3
	or MICRO 3020 Biology of Microorganisms	
MICRO 2010L	Introductory Microbiology Laboratory	1
	or MICRO 3020L Microbiology Laboratory

or BIOL 3350 Principles of Human and Other Animal Physiology		
MICRO 2010	Introduction to Microbiology	2
MICRO 2010L	Introductory Microbiology Laboratory	1
Total Credits		18-19

Food Systems: 8 cr.

FSHN 2420	The US Food System	3
FSHN 3420	World Food Issues: Past and Present (course shown above)	3
FSHN 4420	Issues in Food and Society	2
Total Credits		8

Food Science and Human Nutrition: 34 cr.

FSHN 1010	Food and the Consumer	3
FSHN 1100	Professional and Educational Preparation	1
FSHN 1110	Fundamentals of Food Preparation	2
FSHN 1150	Food Preparation Laboratory	1
FSHN 1670	Introductory Human Nutrition and Health	3
FSHN 2030	Contemporary Issues in Food Science and Human Nutrition	1
FSHN 2640	Fundamentals of Nutritional Biochemistry	3
or BBMB 3010 Survey of Biochemistry		
FSHN 2650	Nutrition for Active and Healthy Lifestyles	3
FSHN 3610	Nutrition and Health Assessment	2
FSHN 3640	Nutrition and Prevention of Chronic Disease	3
FSHN 3650	Obesity and Health	3
FSHN 4300	U.S. Health Systems and Policy	2
FSHN 4450	Strategies for Personal Food Waste Reduction	1
FSHN 4630	Community Nutrition and Health	3
COMST 4500B	Special Topics in Communication Studies: Health Communication	3
Total Credits		34

Additional courses for Health Coach Program Focus: 18 credits

KIN 2580	Principles of Physical Fitness and Conditioning	2
KIN 3580	Exercise Physiology	3
KIN 4580	Principles of Fitness Assessment and Exercise Prescription	4
PSYCH 1010	Introduction to Psychology	3
or PSYCH 2300 Developmental Psychology		
PSYCH 4220	Counseling Theories and Techniques	3

PSYCH 4850	Health Psychology	3
Total Credits		18

Select additional electives to reach 120 total semester credits.

Additional courses for Nutrition & Wellness Program Focus: 18-30 credits of electives

At least 9 credits of electives must be 3000-4000 level courses. Select from any university coursework to earn at least 120 total credits.

NOTE:

Students are encouraged to pursue a minor, such as:

- Communication studies
- Culinary food science
- Entrepreneurship
- Environmental studies
- Event management
- Exercise science
- Global health
- Health promotion
- Hospitality management
- Human development and family studies
- Leadership studies
- Sustainability

More information on the Nutrition minor can be found here: <http://catalog.iastate.edu/collegeofagricultureandlifesciences/foodscienceandhumannutrition/#undergraduateminiortext>.

The Department of Food Science and Human Nutrition offers a Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) in Nutritional Sciences. More information can be found here: <https://www.grad-college.iastate.edu/academics/programs/apresults.php?id=84>.

Occupational Safety Certificate

Undergraduate Certificate in Occupational Safety

The undergraduate certificate in Occupational Safety is designed to meet the needs of undergraduate students who are planning a career with management responsibilities (including safety), but are not planning on careers as safety professionals. This Certificate provides them with desired professional development and recognition of their increased professional knowledge and skills in the field of Occupational Safety.

Working professionals who have discovered that their career path has resulted in an increased focus on occupational safety, but do not have formal educational training in safety will also benefit from this structured safety curriculum. This certificate program prepares professionals,

regardless of discipline, to effectively meet expected occupational safety responsibilities.

A professional with an Iowa State University Occupational Safety certificate will strengthen a company's ability to protect their workers from injuries and illnesses. This undergraduate certificate provides a way to give formal recognition of focused study in occupational safety that is less comprehensive than what is required for an undergraduate major.

The Department of Agricultural and Biosystems Engineering, with its nationally ranked education programs, is pleased to offer this Occupational Safety Certificate program to undergraduate students, graduate students, and working professionals. This certificate program is available on campus or entirely online via web-based interactions and streaming media.

20 Credits required.

Students complete the following 14 credits of core courses:

TSM 2700	Principles of Injury Prevention and Safety	3
TSM 3700	Occupational Safety	3
TSM 3710	Occupational Safety Management	2
TSM 3720	Legal Aspects of Occupational Safety and Health	2
TSM 4700	Industrial Hygiene: Physical, Chemical, and Biological Hazards	3
TSM 4930D	Workshop in Technology: Occupational Safety	1-4

The remaining six credits will be selected from the following:

TSM 3760	Fire Protection and Prevention	3
TSM 4710	Safety Laboratory	1
TSM 4770	Risk Analysis and Management	3
TSM 3930F	Topics in Technology: Agricultural Safety and Health	1-4
HS 1050	First Aid and Emergency Care	2
HS 1100	Personal and Consumer Health	3
HS 3050	Instructor's First Aid and Cardiopulmonary Resuscitation	2
IE 2710	Applied Ergonomics and Work Design	3

A minimum of 9 credits applied towards the certificate cannot be used to meet any other departmental, college, or university requirement.

Courses taken for the certificate cannot be taken pass not pass.

A grade of a 2.0 or better is required in each individual course applied towards the certificate.

Plant Pathology and Microbiology

Undergraduate Study

The department participates in the interdepartmental undergraduate Microbiology major. See www.catalog.iastate.edu/collegeofagricultureandlifesciences/microbiology/ for more information.

Graduate Study

The department offers studies for the degrees master of science and doctor of philosophy with a major in plant pathology, and minor work for students majoring in other departments or programs. A master of science nonthesis option is available. The department also participates in the interdepartmental majors in microbiology; toxicology; genetics; plant biology; molecular, cellular, and developmental biology; ecology and evolutionary biology; and sustainable agriculture.

Students entering graduate programs in the department need a sound background in the physical, biological, and mathematical sciences as well as adequate preparation in English.

Graduates have a broad understanding of the biology and management of plant pathogenic microorganisms and the interactions of pathogens with their host plants. They understand the relationship between plant pathology and allied disciplines and are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex plant disease problems facing agricultural and bioscience professionals, taking into account the related ethical, social, legal, and environmental issues. They are skilled in research procedures, communicating research results, and writing concise and persuasive grant proposals.

Courses primarily for undergraduates:

MICRO 1010: Microbial World

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits in Biology

Introduction to the importance of viruses, bacteria, fungi, archaea and parasites both to humans and to the biosphere. Topics include past and present microbial impact on humans and society, ecology and diversity of microbes, biotechnology and microbial impact on the biosphere. Recommended: High School Biology. (Typically Offered: Fall)

MICRO 1100: Professional and Educational Preparation in Microbiology

Credits: 1. Contact Hours: Lecture 1.

An introduction to curriculum and research opportunities in microbiology at Iowa State. Topics include: easing the transition to life as a university student, development of specific goals, strengthening interpersonal communication, professional portfolio creation and resume building. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

MICRO 1150: Phage Discovery Lab

Credits: 2.

An exploratory laboratory where students will purify phage from soil, visualize phage using electron microscopy and isolate genomic material for nucleic acid sequencing. (Typically Offered: Fall)

MICRO 1160: Phage Genome Annotation Lab

Credits: 2.

An experiential microbiology laboratory where students learn to annotate and submit a complete phage genome. MICRO 1150 recommended. (Typically Offered: Spring)

MICRO 2010: Introduction to Microbiology

Credits: 2. Contact Hours: Lecture 2.

Prereq: One BIOL course except BIOL 1100, BIOL 1110, BIOL 1120, BIOL 1730, BIOL 2010, BIOL 3070

Selected topics in microbiology with emphasis on the relationship of microorganisms to human and animal health, agricultural technology, and the environment. With written petition to the chair of the supervisory committee, students who obtain a grade of B or better may substitute 2010 for MICRO 3020 in advanced courses. (Typically Offered: Fall, Spring)

MICRO 2010L: Introductory Microbiology Laboratory

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credits or concurrent enrollment in MICRO 2010 or MICRO 3020

Basic microbiology laboratory techniques for non-microbiology majors. Graduation Restriction: Credit for either MICRO 2010L or 3020L, but not both, may be applied toward graduation. (Typically Offered: Fall, Spring)

MICRO 2650: Predicting the Next Epidemic: Living in a One Health World

Credits: 2. Contact Hours: Lecture 2, Discussion 2.

8 week course. "One Health" concept as a relatively new approach to disease control, sustainability, and the consequences of environmental disruption. Interconnectedness of human, animal, and environmental health. Importance of scientists communicating with the general public about One Health topics, such as habitat loss, agricultural practices, and the spread of antibiotic resistant organisms. Recommended: High School Biology or Environmental Science. (Typically Offered: Fall, Spring)

MICRO 3020: Biology of Microorganisms

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110; BIOL 2120; 3 credits of CHEM

Basic cell biology, physiology, metabolism, genetics and ecology of microorganisms, with an emphasis on prokaryotes and viruses, as well as the roles of microorganisms in the environment, disease, agriculture, and industry. (Typically Offered: Fall, Spring, Summer)

MICRO 3020L: Microbiology Laboratory

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credits or concurrent enrollment in MICRO 2010 or MICRO 3020

Basic microbiology laboratory techniques for majors in microbiology, biological sciences and related fields. Graduation Restriction: Credit for either MICRO 2010L or 3020L, but not both, may be applied toward graduation. (Typically Offered: Fall, Spring)

MICRO 3100: Medical Microbiology

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 3020 (or MICRO 2010 if a B or better was obtained)

Study of infection by bacterial and viral pathogenic agents of humans with an overview of immune responses in controlling disease. (Typically Offered: Fall)

MICRO 3100L: Medical Microbiology Laboratory

Credits: 1. Contact Hours: Laboratory 3.

Prereq: (MICRO 2010 or MICRO 3020); (MICRO 2010L or MICRO 3020L); credits or concurrent enrollment in MICRO 3100

Microbiological tools and techniques to isolate, identify, and characterize medically significant microorganisms in relation to human diseases. Emphasis on the virulence factors of pathogenic organisms as compared to the normal flora. (Typically Offered: Fall)

MICRO 3200: Molecular and Cellular Bacteriology

Credits: 4. Contact Hours: Lecture 4.

Prereq: BIOL 3130; MICRO 3020; CHEM 3320

A systems perspective of bacterial growth, survival, and cellular differentiation by integrating physiological and genetic principles. Emphasis is on prokaryotes although unicellular eukaryotes are also discussed. Topics include the structure, function, and assembly of cell components, molecular and genomic techniques, bioenergetics and metabolism, regulation of gene expression, genetic adaptation, stress tolerance, biofilms, and cell-cell interactions and communications. (Typically Offered: Spring)

MICRO 3530: Introductory Parasitology

(Cross-listed with BIOL 3530/ VPTH 3530).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2120

Biology and host-parasite relationships of major groups of animal parasites, and techniques of diagnosing and studying parasites. (Typically Offered: Spring)

MICRO 3600: Global Health

(Cross-listed with GLOBE 3600/ VMPM 3600).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 2110

Explores human health across the world with particular emphasis on low- and lower-middle-income countries. Attention is given to the interconnectedness of health determinants, problems, and solutions found in global health, including the role of animals and the environment. Broad in scope, highlighting different cultures and the historical foundations of global health. Topics include colonialism, poverty, emerging diseases, climate change, biodiversity, one health, maternal and child health, HIV, malaria, urbanization, noncommunicable diseases and more. Current events will be a feature of all class meetings. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

MICRO 3740: Insects and Our Health

(Cross-listed with ENT 3740).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits in Biological Sciences

Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease. Meets International Perspectives Requirement. (Typically Offered: Spring)

MICRO 3740L: Insects and Our Health Laboratory

(Cross-listed with ENT 3740L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or concurrent enrollment in ENT 3740 or MICRO 3740

Laboratory and field techniques for studying medical or public health entomology, including: collection, identification and maintenance of medically significant arthropods and experimental design and execution related to the biology of arthropods or arthropod-pathogen interactions. Offered even-numbered years. (Typically Offered: Spring)

MICRO 4020: Microbial Genetics and Genomics

(Cross-listed with GEN 4020).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BIOL 3130; MICRO 3020

The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of vertical and horizontal genetic information transfer and gene regulation are covered, along with genetic and genomic-based approaches to study these and other cellular processes of microorganisms. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics and genomics. Offered even-numbered years. (Typically Offered: Fall)

MICRO 4070: Microbiological Safety of Foods of Animal Origins

(Dual-listed with FSHN 5070/ MICRO 5070). (Cross-listed with FSHN 4070).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 2010 or MICRO 3020

Examination of the various factors in the production of foods, from production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. Upon successful completion of this class, the student will receive both the Preventive Controls for Human Foods certificate (FDA program) and the International HACCP Alliance certificate (USDA-FSIS program). Recommended: FSHN 4200 or MICRO 4200 and one semester of Microbiology Laboratory. (Typically Offered: Fall, Spring)

MICRO 4080: Virology

Credits: 3. Contact Hours: Lecture 3.

Prereq: BBMB 3010 or BIOL 3130

The molecular virology and epidemiology of human, animal, plant and insect viruses. BIOL 3140 recommended. (Typically Offered: Fall)

MICRO 4190: Foodborne Hazards

(Cross-listed with FSHN 4190/ TOX 4190).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 2010 or MICRO 3020; 3 credits in BBMB

Pathogenesis of human microbiological foodborne infections and intoxications, principles of toxicology, major classes of toxicants in the food supply, governmental regulation of foodborne hazards. Assessed service-learning component. Offered even-numbered years. Graduation Restriction: Only one of FSHN 4190 and FSHN 5190 may count toward graduation. (Typically Offered: Spring)

MICRO 4200: Food Microbiology

(Cross-listed with FSHN 4200/ TOX 4200).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 2010 or MICRO 3020

Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications. (Typically Offered: Fall)

MICRO 4210: Food Microbiology Laboratory

(Cross-listed with FSHN 4210).

Credits: 3. Contact Hours: Lecture 1, Laboratory 5.

Prereq: MICRO 2010 or MICRO 3020; MICRO 2010L or MICRO 3020L. Credit or enrollment in FSHN/MICRO 4200

Standard techniques used for the microbiological examination of foods. Independent and group projects on student-generated questions in food microbiology. Emphasis on oral and written communication and group interaction. (Typically Offered: Spring)

MICRO 4280: Principles of Epidemiology and Population Health

(Cross-listed with VDPAM 4280/ VMPM 4280).

Credits: 3. Contact Hours: Lecture 3.

Epidemiology of disease in populations. Disease causality, observational study design and approaches to epidemiologic investigations. This course is available on campus and by distance. (Typically Offered: Spring)

MICRO 4300: Prokaryotic Diversity and Ecology

(Cross-listed with BBMB 4300).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 3020; MICRO 3020L

Survey of the diverse groups of prokaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups. Offered odd-numbered years. (Typically Offered: Spring)

MICRO 4400: Laboratory in Microbial Physiology, Diversity, and Genetics

Credits: 4.

Prereq: MICRO 3020, MICRO 3020L, CHEM 3320, and BIOL 3130L

Fundamental techniques and theory for studying the cellular mechanisms, genetic processes and diversity of microbial life. Experimental techniques will include isolation and physiological characterization of bacteria that inhabit different environments as well as an emphasis on genetic and molecular techniques to understand antibiotic resistance processes and mechanisms. Also included are techniques for phylogenetic characterization, measuring gene expression, and genetic manipulation of bacteria. Essential components for the effective communication of scientific results are also emphasized. (Typically Offered: Fall, Spring)

MICRO 4500: Undergraduate Capstone Colloquium

Credits: 2. Contact Hours: Lecture 2.

Prereq: SPCM 2120; 20 credits in MICRO

Required of all undergraduate majors in microbiology. Students demonstrate mastery of core courses in microbiology through discussion of current literature in microbiology and immunology, issues in scientific conduct, and bioethics in microbiology. Students present current papers in a journal club format and gain experience in writing and reviewing grant proposals. This course is a capstone course and should be taken within the last two semesters. (Typically Offered: Spring)

MICRO 4510: Survey in Microbiology

Credits: Required. Contact Hours: Lecture 1.

Prereq: 12 credits in MICRO

Preparations for graduation. Topics include job search strategies, career information, mock interviews, graduate and professional school application processes and guidelines as well as outcomes assessment activities. (Typically Offered: Fall)

MICRO 4560: Principles of Mycology

(Cross-listed with BIOL 4560).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: 10 credits BIOL or MICRO

Morphology, diversity, and ecology of fungi; their relation to agriculture, industry, and human health. (Typically Offered: Fall)

MICRO 4750: Immunology

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 3100

An examination of humoral and cellular immune function as well as the interaction of the cells and factors of the immune system that result in health and disease. MICRO 4750L optional. Graduation Restriction: Credit for either MICRO 4750 or VMPM 5200, but not both, may be applied to graduation. (Typically Offered: Spring)

MICRO 4750L: Immunology Laboratory

Credits: 2. Contact Hours: Lecture 2, Laboratory 4.

Prereq: Credits or concurrent enrollment in MICRO 3100 or MICRO 4750 or MICRO 5750

Techniques in primary culture and tumor cell growth, measures of lymphocyte function, serological techniques and flow cytometry. Half semester course. (Typically Offered: Spring)

MICRO 4770: Bacterial-Plant Interactions

(Dual-listed with MICRO 5770/ PLP 5770). (Cross-listed with PLP 4770).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits in MICRO or PLP

Overview of plant-associated bacteria including their ecology, diversity, and the physiological and molecular mechanisms involved with their interactions with plants. The course covers bacterial plant pathogens and pathogenesis, nitrogen fixation and plant symbioses, biological control and plant growth promotion, bacterial disease diagnosis and management, and approaches to the study of microbial communities in the rhizosphere and on leaves. Offered even-numbered years. (Typically Offered: Spring)

MICRO 4850: Soil and Environmental Microbiology

(Dual-listed with AGRON 5850/ ENSCI 5850/ MICRO 5850). (Cross-listed with ENSCI 4850/ AGRON 4850).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: AGRON 1820

The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues. MICRO 2010; MICRO 2010L recommended. (Typically Offered: Fall)

MICRO 4870: Microbial Ecology

(Cross-listed with ENSCI 4870/ GEOL 4870/ BIOL 4870).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 6 credits in Biology and 6 credits in Chemistry

Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems.

Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized. (Typically Offered: Fall)

MICRO 4900A: Independent Study: Laboratory Research

Credits: 1-30. Repeatable.

Prereq: 6 credits of 3000-level credit MICRO; Permission of Instructor

Graduation Restriction: A maximum of 6 credits of MICRO 4900 may be used toward the total of 128 credits required for graduation. (Typically Offered: Fall, Summer)

MICRO 4900B: Independent Study: Literature Review

Credits: 1-30. Repeatable.

Prereq: 6 credits of 3000-level credit MICRO; Permission of Instructor

Graduation Restriction: A maximum of 6 credits of MICRO 4900 may be used toward the total of 128 credits required for graduation. (Typically Offered: Fall, Summer)

MICRO 4900C: Independent Study: Instructional Assistant

Credits: 1-30. Repeatable.

Prereq: 6 credits of 3000-level credit MICRO; Permission of Instructor

Graduation Restriction: A maximum of 6 credits of MICRO 4900 may be used toward the total of 128 credits required for graduation. (Typically Offered: Fall, Summer)

MICRO 4900G: Independent Study: General

Credits: 1-30. Repeatable.

Prereq: 6 credits of 3000-level credit MICRO; Permission of Instructor

Graduation Restriction: A maximum of 6 credits of MICRO 4900 may be used toward the total of 128 credits required for graduation. (Typically Offered: Fall, Summer)

MICRO 4900H: Independent Study: Honors

Credits: 1-5. Repeatable, maximum of 6 credits.

Prereq: 6 credits of 3000-level credit MICRO; Permission of Instructor

Graduation Restriction: A maximum of 6 credits of MICRO 4900 may be used toward the total of 128 credits required for graduation. (Typically Offered: Fall, Spring, Summer)

MICRO 4950: Internship

Credits: 1-2. Repeatable.

Prereq: 6 credits of 3000-level credit MICRO; Permission of Instructor

Participation in the Cooperative Extension Intern Program or an equivalent work experience. Written report of activities required. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

Courses primarily for graduate students, open to qualified undergraduates:

MICRO 5020: Microbial Genetics and Genomics

(Cross-listed with VMPM 5020).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (BIOL 3130 and MICRO 3020) or Graduate Classification

The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of vertical and horizontal genetic information transfer and gene regulation are covered, along with genetic and genomic-based approaches to study these and other cellular processes of microorganisms. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics and genomics. Offered even-numbered years. (Typically Offered: Fall)

MICRO 5070: Microbiological Safety of Foods of Animal Origins

(Dual-listed with FSHN 4070/ MICRO 4070). (Cross-listed with FSHN 5070).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 4200 or Graduate Classification

Examination of the various factors in the production of foods, from production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. Upon successful completion of this class, the student will receive both the Preventive Controls for Human Foods certificate (FDA program) and the International HACCP Alliance certificate (USDA-FSIS program). Recommended: FSHN 4200 or MICRO 4200 and one semester of Microbiology Laboratory. (Typically Offered: Fall, Spring)

MICRO 5090: Plant Virology

(Cross-listed with PLP 5090).

Credits: 2. Contact Hours: Lecture 1, Discussion 1.

Prereq: (BBMB 3010 or BIOL 3130) or Graduate Classification

Taxonomy, molecular mechanisms, host-interactions, vector transmission, epidemiology, detection, control and exploitation of plant viruses. Course will consist of a mixture of lectures, and student-led presentations using primary literature. Offered odd-numbered years. (Typically Offered: Spring)

MICRO 5170: Gut Microbiome: Implications for Health and Diseases

(Cross-listed with ANS 5170/ FSHN 5170/ VMPM 5170).

Credits: 3. Contact Hours: Lecture 3.

Explore current research on gut microbiome including modern tools used to study the gut microbiome. Examine the linkages between gut microbiome and health status, diseases, and manipulation of gut microbiome to improve health. (Typically Offered: Fall)

MICRO 5250: Intestinal Microbiology

(Cross-listed with VMPM 5250).

Credits: 3. Contact Hours: Lecture 3.

Overview of commensal microbiota in the health and well-being of vertebrates. Topics include diversity of intestinal structure, microbial diversity/function, innate immune development, community interactions and metabolic diseases associated with alterations of the intestinal microbiome. Offered even-numbered years. (Typically Offered: Spring)

MICRO 5300: Prokaryotic Diversity and Ecology

(Dual-listed with MICRO 4300). (Cross-listed with BBMB 5300).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (MICRO 3020 and MICRO 3020L) or Graduate Classification

In-depth exploration of plant biochemistry with a focus on the unique aspects of plants versus heterotrophic organisms. Analysis of unique pathways, metabolic trafficking between unique organelles and tissues, and techniques for their characterization. Offered even-numbered years. (Typically Offered: Fall)

MICRO 5400: Livestock Immunogenetics

(Cross-listed with ANS 5400/ VMPM 5400).

Credits: 2. Contact Hours: Lecture 2.

Prereq: ANS 5610 or MICRO 5750 or VMPM 5200 or Graduate Classification

Basic concepts and contemporary topics in genetic regulation of livestock immune response and disease resistance. Offered odd-numbered years. (Typically Offered: Spring)

MICRO 5510: Microbial Diversity and Phylogeny

Credits: 1. Contact Hours: Lecture 1.

Prereq: (BIOL 3130 and MICRO 3020) or Graduate Classification

Comparisons among the three kingdoms of life (Bacteria, Archaea, and Eukarya). Topics will include metabolism, adaptation, methods of phylogenetic analysis, and comparative genomics. (Typically Offered: Fall)

MICRO 5520: Bacterial Molecular Genetics and Physiology

Credits: 1. Contact Hours: Lecture 1.

Prereq: (BIOL 3130 and MICRO 3020) or Graduate Classification

Review of genetics and selected physiological topics of model bacteria. (Typically Offered: Fall)

MICRO 5530: Pathogenic Microorganisms

Credits: 1. Contact Hours: Lecture 1.

Prereq: (BIOL 3130 and MICRO 3020) or Graduate Classification

Review and contrast/comparison of common bacterial pathogens of plants and animals and their mechanisms of virulence, including toxins, protein secretion, host invasion and iron acquisition strategies. An overview of eukaryotic cell biology that is relevant to pathogenesis will also be included. (Typically Offered: Fall)

MICRO 5540: Virology

Credits: 1. Contact Hours: Lecture 1.

Prereq: (BIOL 3130 and MICRO 3020) or Graduate Classification

Introduction to virus life cycles including entry, gene expression strategies, replication, and mechanisms to modify and overcome host defenses. The roles of specific viruses and sub-viral agents in animal and plant disease will also be included. (Typically Offered: Spring)

MICRO 5550: Fungal Biology

Credits: 1. Contact Hours: Lecture 1.

Prereq: (GEN 3130 or GEN 3200) or Graduate Classification

Ecology, genetics, physiology and diversity of fungi, from yeasts to mushrooms, and their importance in human affairs. (Typically Offered: Spring)

MICRO 5560: Ecology of Microorganisms

Credits: 1. Contact Hours: Lecture 1.

Prereq: (BIOL 3130 and MICRO 3020) or Graduate Classification

The study of microorganisms in their natural environments, with a focus on terrestrial and aquatic ecosystems, including eukaryotic hosts; interactions within biofilms and communities, including intercellular communication and symbioses; microbial adaptations to extreme environments; and metagenomic, genomic, molecular and microscopy techniques for the study of microbes in natural systems. (Typically Offered: Spring)

MICRO 5750: Immunology

(Cross-listed with VMPM 5750).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MICRO 3100 or Graduate Classification

An examination of humoral and cellular immune function as well as the interaction of the cells and factors of the immune system that result in health and disease. MICRO 4750L optional. Graduation Restriction: Credit for either MICRO 4750 or VMPM 5200, but not both, may be applied to graduation. (Typically Offered: Spring)

MICRO 5770: Bacterial-Plant Interactions

(Dual-listed with MICRO 4770/ PLP 4770). (Cross-listed with PLP 5770).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (3 credits in MICRO or PLP) or Graduate Classification

Overview of plant-associated bacteria including their ecology, diversity, and the physiological and molecular mechanisms involved with their interactions with plants. The course covers bacterial plant pathogens and pathogenesis, nitrogen fixation and plant symbioses, biological control and plant growth promotion, bacterial disease diagnosis and management, and approaches to the study of microbial communities in the rhizosphere and on leaves. Offered even-numbered years. (Typically Offered: Spring)

MICRO 5850: Soil and Environmental Microbiology

(Dual-listed with AGRON 4850/ ENSCI 4850/ MICRO 4850). (Cross-listed with ENSCI 5850/ AGRON 5850).

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Qualified Undergrad Prereq: AGRON 1820 or graduate standing

The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues. MICRO 2010; MICRO 2010L recommended. (Typically Offered: Fall)

MICRO 5860: Medical Bacteriology

(Cross-listed with VMPPM 5860).

Credits: 4. Contact Hours: Lecture 4.

Prereq: MICRO 3100 or Graduate Classification

Bacteria associated with diseases of vertebrates, including virulence factors and interaction of host responses. Concurrent students need to register for 5860L. (Typically Offered: Fall)

MICRO 5870: Microbial Ecology

(Cross-listed with ENSCI 5870/ GEOL 5870/ EEOB 5870).

Credits: 3. Contact Hours: Lecture 3.

Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized. (Typically Offered: Fall)

MICRO 5900: Special Topics

Credits: 1-5. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**MICRO 6040: Seminar**

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Course will expose students to the breadth of subdisciplines within microbiology, offer opportunities for direct interaction between the students and the faculty members within the Interdepartmental Microbiology Graduate Program, and promote interactions among the students within the program. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

MICRO 6080: Molecular Virology

(Cross-listed with VMPPM 6080/ PLP 6080).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BBMB 4050 or GDCB 5110

Advanced study of virus host-cell interactions. Molecular mechanisms of viral replication and pathogenesis. Offered even-numbered years. (Typically Offered: Fall)

MICRO 6150: Molecular Immunology

(Cross-listed with BBMB 6150/ VMPPM 6150).

Credits: 3. Contact Hours: Lecture 3.

Current topics in molecular aspects of immunology: T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control and activate immune function. Offered odd-numbered years. (Typically Offered: Fall)

MICRO 6250: Mechanisms of Bacterial Pathogenesis

(Cross-listed with VMPPM 6250).

Credits: 3. Contact Hours: Lecture 3.

Review of current concepts in specific areas of microbial pathogenesis including the genetic basis for bacterial disease, genetic regulation and control of virulence factors and their mechanisms of action, and host-pathogen interactions at the cellular and molecular levels. The application of microbial genetics to understanding pathogenesis will be included. Offered odd-numbered years. (Typically Offered: Spring)

MICRO 6260: Advanced Food Microbiology

(Cross-listed with FSHN 6260/ TOX 6260).

Credits: 3. Contact Hours: Lecture 3.

Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and mode of action of antimicrobials. Offered odd-numbered years. (Typically Offered: Spring)

MICRO 6270: Rapid Methods in Food Microbiology

(Cross-listed with FSHN 6270/ TOX 6270).

Credits: 2. Contact Hours: Lecture 2.

Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.), existing commercial test formats and kits, automation in testing, sample preparation and 'next generation' testing formats now in development. (Typically Offered: Fall, Spring, Summer)

MICRO 6900A: Current Topics: Microbiology

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Prereq: Instructor Permission for Course

Colloquia or advanced study of specific topics in a specialized field. (Typically Offered: Fall, Spring, Summer)

MICRO 6900B: Current Topics: Immunology

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Colloquia or advanced study of specific topics in a specialized field. (Typically Offered: Fall, Spring, Summer)

MICRO 6900C: Current Topics: Infectious Diseases

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Colloquia or advanced study of specific topics in a specialized field. (Typically Offered: Fall, Spring, Summer)

MICRO 6920: Molecular Biology of Plant-Pathogen Interactions

(Cross-listed with PLP 6920).

Credits: 3. Contact Hours: Lecture 3.

Seminar and current research in molecular and physiological aspects of plant interactions with pathogens, including mechanisms of pathogenesis, host-pathogen recognition and host defense, with an emphasis on critical evaluation of primary literature. Students also complete a research proposal writing and peer review exercise. Offered odd-numbered years. (Typically Offered: Spring)

MICRO 6970: Graduate Research Rotation

Credits: 0. Contact Hours: Laboratory 30.

Repeatable.

Graduate research projects performed under the supervision of selected faculty members in the Interdepartmental Microbiology major. (Typically Offered: Fall, Spring)

MICRO 6980: Seminar in Molecular, Cellular, and Developmental Biology

(Cross-listed with BBMB 6980/ GDCB 6980/ MCDB 6980/ VMPM 6980).

Credits: 1-2. Contact Hours: Lecture 2.

Repeatable.

Student and faculty presentations. (Typically Offered: Spring)

MICRO 6990: Research

Credits: 1-30. Repeatable.

*Prereq: Instructor Permission for Course***Courses primarily for undergraduates:****PLP 4080: Principles of Plant Path**

(Dual-listed with PLP 5080).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Principles underlying the nature, diagnosis, and management of plant diseases. Laboratory complements lecture topics and provides experience in plant disease diagnosis. (Typically Offered: Fall, Spring)

PLP 4160: Forest Insects and Diseases

(Cross-listed with FOR 4160).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Nature of insects and pathogens of forest and shade trees; their role in the dynamics of natural and managed forest ecosystems; and the management of indigenous and exotic pests. Laboratory experience working with insect and fungal pests of trees. (Typically Offered: Fall)

PLP 4520: Integrated Management of Diseases and Insect Pests of Turfgrasses

(Cross-listed with ENT 4520/ HORT 4520).

Credits: 3. Contact Hours: Lecture 3.

Prereq: HORT 3510

Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments. Offered even-numbered years. (Typically Offered: Spring)

PLP 4770: Bacterial-Plant Interactions

(Dual-listed with MICRO 5770/ PLP 5770). (Cross-listed with MICRO 4770).

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits in MICRO or PLP

Overview of plant-associated bacteria including their ecology, diversity, and the physiological and molecular mechanisms involved with their interactions with plants. The course covers bacterial plant pathogens and pathogenesis, nitrogen fixation and plant symbioses, biological control and plant growth promotion, bacterial disease diagnosis and management, and approaches to the study of microbial communities in the rhizosphere and on leaves. Offered even-numbered years. (Typically Offered: Spring)

PLP 4900A: Independent Study: Plant Pathology

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: 7 credits in BIOL; Junior or Senior classification; Permission of Instructor

Graduation Restriction: A maximum of 6 credits of PLP 4900 may be used toward the total of 128 credits required for graduation. (Typically Offered: Fall, Spring, Summer)

PLP 4900H: Independent Study: Honors

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: 7 credits in BIOL; Junior or Senior classification; Permission of Instructor

Graduation Restriction: A maximum of 6 credits of PLP 4900 may be used toward the total of 128 credits required for graduation. (Typically Offered: Fall, Spring, Summer)

PLP 4940: Seed Pathology

(Dual-listed with PLP 5940).

Credits: 2. Contact Hours: Lecture 2.

Prereq: PLP 4080

Significance of biotic and abiotic diseases that affect the production and utilization of seeds, during each phase of the seed life cycle: growing, harvesting, conditioning, storing, and planting seed. Mechanisms of seed infection and seed-to-seedling transmission are considered for fungi, bacteria, viruses/viroids, and nematodes. Aspects of epidemiology, management, and host-pathogen relationships are discussed. Emphases include the role of seed health testing in the global seed industry for quality control and phytosanitary certification, as well as the use of seed treatments to manage seedborne and soilborne pathogens and pests. Concurrent enrollment in PLP 4940L/5940L (Seed Pathology Laboratory) is strongly encouraged (on-campus students only). Graduation Restriction: Credit may not be obtained for both PLP/STB 5920 and PLP 5940. Offered odd-numbered years. (Typically Offered: Fall)

PLP 4940L: Seed Pathology Laboratory

(Dual-listed with PLP 5940L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: PLP 4080

Laboratory in seed pathology. Seed health testing methods; effects of seed treatments and seed conditioning on seedborne pathogens. Offered odd-numbered years. (Typically Offered: Fall)

Courses primarily for graduate students, open to qualified undergraduates:

PLP 5060: Plant-Pathogen Interactions

Credits: 2. Contact Hours: Lecture 2.

Prereq: (BIOL 3130 and PLP 4080 or PLP 4160) or Graduate Classification

Introduction to mechanisms of plant-parasite interaction. Genetics and molecular genetics of plant disease resistance and pathogenicity. Offered odd-numbered years. (Typically Offered: Spring)

PLP 5080: Principles of Plant Pathology

(Dual-listed with PLP 4080).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Principles underlying the nature, diagnosis, and management of plant diseases. Laboratory complements lecture topics and provides experience in plant disease diagnosis. (Typically Offered: Fall, Spring)

PLP 5090: Plant Virology

(Cross-listed with MICRO 5090).

Credits: 2. Contact Hours: Lecture 1, Discussion 1.

Prereq: (BBMB 3010 or BIOL 3130) or Graduate Classification

Taxonomy, molecular mechanisms, host-interactions, vector transmission, epidemiology, detection, control and exploitation of plant viruses. Course will consist of a mixture of lectures, and student-led presentations using primary literature. Offered odd-numbered years. (Typically Offered: Spring)

PLP 5110: Integrated Management of Tropical Crops

(Cross-listed with ENT 5110/ HORT 5110).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (ENT 3700 or ENT 3760 or HORT 2210 or PLP 4080 or PLP 4160) or Graduate Classification

Applications of Integrated Crop management principles (including plant pathology, entomology, and horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by a 10-day tour of Costa Rican agriculture during spring break, then writeup of individual projects. Offered odd-numbered years. Meets International Perspectives Requirement. (Typically Offered: Spring)

PLP 5120: Lifestyles of plant pathogenic fungi and oomycetes.

Credits: 2. Contact Hours: Lecture 2.

Exploration of the major groups of plant pathogenic fungi and oomycetes, focusing on the diseases they cause as well as pathogen ecology, diagnosis, crop resistance, and fungicide resistance. Offered odd-numbered years. (Typically Offered: Spring)

PLP 5300: Ecologically Based Pest Management Strategies

(Cross-listed with AGRON 5300/ ENT 5300/ SUSAG 5300).

Credits: 3. Contact Hours: Lecture 3.

Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes. Offered even-numbered years. (Typically Offered: Fall)

PLP 5430: Ecology and Epidemiology of Plant Diseases

Credits: 3. Contact Hours: Lecture 3.

Prereq: (PLP 4080 or PLP 4160) or graduate classification

Nutter. Theory and practice related to the ecology and epidemiology of plant disease epidemics. Interactions among host and pathogen populations as affected by the environment are quantified with respect to time and space. Analysis of ecological and host and pathogen genetic factors that alter the course of plant disease epidemics. Risk assessment theory, disease forecasting, and modeling the impact of biotic plant stresses on yield and quality are also emphasized. Offered odd-numbered years. (Typically Offered: Fall)

PLP 5520: Integrated Management of Diseases and Insect Pests of Turfgrasses

(Cross-listed with ENT 5520/ HORT 5520).

Credits: 3. Contact Hours: Lecture 3.

Prereq: HORT 3510 or Graduate Classification

Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments. Offered even-numbered years. (Typically Offered: Spring)

PLP 5740: Plant Nematology

Credits: 2. Contact Hours: Lecture 2.

Morphology, anatomy, identification, management, and life cycles of common plant-parasitic nematodes; host-parasite interactions; recent advances in plant nematology. Offered odd-numbered years. (Typically Offered: Fall)

PLP 5740L: Laboratory Techniques in Plant Nematology

Credits: 1. Contact Hours: Laboratory 3.

Practical skills of sample collection, processing, extraction, and identification of plant-parasitic nematodes from soil and roots; other techniques will be discussed. Offered odd-numbered years. (Typically Offered: Fall)

PLP 5770: Bacterial-Plant Interactions

(Dual-listed with MICRO 4770/ PLP 4770). (Cross-listed with MICRO 5770).

Credits: 3. Contact Hours: Lecture 3.

Prereq: (3 credits in MICRO or PLP) or Graduate Classification

Overview of plant-associated bacteria including their ecology, diversity, and the physiological and molecular mechanisms involved with their interactions with plants. The course covers bacterial plant pathogens and pathogenesis, nitrogen fixation and plant symbioses, biological control and plant growth promotion, bacterial disease diagnosis and management, and approaches to the study of microbial communities in the rhizosphere and on leaves. Offered even-numbered years. (Typically Offered: Spring)

PLP 5810: Experience in Plant Science Extension and Outreach

(Cross-listed with AGRON 5810/ ENT 5810/ HORT 5810).

Credits: 1.

A supervised learning experience in several extension delivery methods used in the plant sciences. Participation in Iowa State University-based extension programs that may include field crops horticulture, or Master Gardener programming. Offered odd-numbered years. (Typically Offered: Summer)

PLP 5900: Special Topics

Credits: 1-3. Repeatable.

Prereq: 10 credits in biological sciences, Permission of Instructor

(Typically Offered: Fall, Spring, Summer)

PLP 5920: Seed Health Management

(Cross-listed with STB 5920).

Credits: 2. Contact Hours: Lecture 2.

Occurrence and management of diseases during seed production, harvest, conditioning, storage, and planting. Emphasis on epidemiology, disease management in the field, seed treatment, effects of conditioning on seed health, and seed health testing. Graduation Restriction: Credit may not be obtained for both PLP/STB 5920 and PLP 5940. Offered even-numbered years. (Typically Offered: Spring)

PLP 5940: Seed Pathology

(Dual-listed with PLP 4940).

Credits: 2. Contact Hours: Lecture 2.

Prereq: PLP 4080 or Graduate Classification

Significance of biotic and abiotic diseases that affect the production and utilization of seeds, during each phase of the seed life cycle: growing, harvesting, conditioning, storing, and planting seed. Mechanisms of seed infection and seed-to-seedling transmission are considered for fungi, bacteria, viruses/viroids, and nematodes. Aspects of epidemiology, management, and host-pathogen relationships are discussed. Emphases include the role of seed health testing in the global seed industry for quality control and phytosanitary certification, as well as the use of seed treatments to manage seedborne and soilborne pathogens and pests. Concurrent enrollment in PLP 4940L/5940L (Seed Pathology Laboratory) is strongly encouraged (on-campus students only). Graduation Restriction: Credit may not be obtained for both PLP/STB 5920 and PLP 5940. Offered odd-numbered years. (Typically Offered: Fall)

PLP 5940L: Seed Pathology Laboratory

(Dual-listed with PLP 4940L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: PLP 4080 or Graduate Classification

Laboratory in seed pathology. Seed health testing methods; effects of seed treatments and seed conditioning on seedborne pathogens. Offered odd-numbered years. (Typically Offered: Fall)

PLP 5990: Creative Component

Credits: 1-30. Repeatable.

Independent study related to the student's area of specialization and approved by the student's major professor. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**PLP 6080: Molecular Virology**

(Cross-listed with MICRO 6080/ VMPM 6080).

Credits: 3. Contact Hours: Lecture 3.

Prereq: BBMB 4050 or GDCB 5110

Advanced study of virus host-cell interactions. Molecular mechanisms of viral replication and pathogenesis. Offered even-numbered years. (Typically Offered: Fall)

PLP 6280: Improving Professional Presentation Skills

Credits: 2. Contact Hours: Lecture 2.

Skill building to improve oral presentation fundamentals for graduate students in biological sciences. Principles and guidance in both personal speaking style and maximizing impact of presentation software. In-depth lectures and class discussions on all aspects of presentation skills. Video and anonymous peer review of individual speeches. (Typically Offered: Spring)

PLP 6910: Field Plant Pathology

Credits: 2. Contact Hours: Laboratory 6.

Repeatable.

Prereq: (PLP 4080 or PLP 4160) or graduate classification

Diagnosis of plant diseases, plant disease assessment methods, and the integration of disease management into commercial crop production practices. Objectives are to familiarize students with common diseases of Midwest crops and landscape plants, and to provide experience in disease diagnosis. Field trips include commercial operations, agricultural research facilities, and ornamental plantings. Offered even-numbered years. (Typically Offered: Summer)

PLP 6920: Molecular Biology of Plant-Pathogen Interactions

(Cross-listed with MICRO 6920).

Credits: 3. Contact Hours: Lecture 3.

Seminar and current research in molecular and physiological aspects of plant interactions with pathogens, including mechanisms of pathogenesis, host-pathogen recognition and host defense, with an emphasis on critical evaluation of primary literature. Students also complete a research proposal writing and peer review exercise. Offered odd-numbered years. (Typically Offered: Spring)

PLP 6940: Colloquium in Plant Pathology

Credits: 2. Contact Hours: Lecture 2.

Repeatable.

Advanced topics in plant pathology, including biological control, cultural control, resistance gene deployment, genetic engineering for disease resistance, chemical control, integrated pest management, emerging diseases, fungal genetics, insect vector biology, professional communications, etc. (Typically Offered: Spring)

PLP 6980: Seminar

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

PLP 6990: Thesis and Dissertation Research

Credits: 1-30. Repeatable.

Thesis and dissertation research. (Typically Offered: Fall, Spring, Summer)

Sustainable Agriculture Interdepartmental Graduate Major

The Sustainable Agriculture interdepartmental major is offered through faculty in 21 departments – Agricultural and Biosystems Engineering; Agricultural Education and Studies; Agronomy; Animal Science; Civil, Construction and Environmental Engineering; Community and Regional Planning; Ecology, Evolution and Organismal Biology; Economics; Entomology; Food Science and Human Nutrition; Horticulture; Industrial and Manufacturing Systems Engineering; Journalism and Mass Communication; Landscape Architecture; Mechanical Engineering; Natural Resource Ecology and Management; Plant Pathology; Political Science; Sociology; World Languages and Cultures and Veterinary Diagnostic and Production Animal Medicine. Faculty in these departments cooperate to offer courses and direct research leading to M.S. and Ph.D. degrees with a major in Sustainable Agriculture.

The Sustainable Agriculture major is designed to balance depth in disciplinary knowledge and perspectives with broader, systems-level thinking. It integrates technical and social sciences through a sequence of team-taught interdisciplinary core courses emphasizing higher-order critical thinking skills and active, collaborative approaches to learning. Students learn agroecological principles, study social relations underlying sustainable farming and food systems, and gain experience with practical techniques of sustainable agriculture.

Applicants applying to the M.S. program must have a bachelor's degree in one of the life, social, or engineering sciences, or a bachelor's degree plus equivalent experience in these areas. Applicants applying to the Ph.D. program must have a master's degree and either an undergraduate or

master's degree in one of the majors in the College of Agriculture and Life Sciences or its equivalent.

Graduates of the program will be able to design and manage agricultural systems that increase food security, enhance human communities, and protect environmental quality. Graduates of the program are qualified to work in a variety of settings, including university research, education, extension, agribusiness, governmental and non-governmental organizations, and farming.

Information on application procedures (<https://susag.iastate.edu/admissions/>), curriculum requirements (<https://susag.iastate.edu/academics/>), and faculty research areas (<https://www.susag.iastate.edu/people/faculty/>) is available on the Sustainable Agriculture website (<https://susag.iastate.edu/>).

Courses primarily for graduate students, open to qualified undergraduates:

SUSAG 5090: Agroecosystems Analysis

(Cross-listed with AGRON 5090/ SOC 5090).

Credits: 4. Contact Hours: Lecture 3, Laboratory 4.

Experiential, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing both field visits and classroom activities. Focus on understanding multiple elements, perspectives (agronomic, economic, ecological, social, etc.), and scales of operation. (Typically Offered: Fall)

SUSAG 5150: Integrated Crop and Livestock Production Systems

(Cross-listed with ABE 5150/ AGRON 5150/ ANS 5150).

Credits: 3. Contact Hours: Lecture 3.

Prereq: SUSAG 5090 or Graduate Classification

Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms. Offered odd-numbered years. (Typically Offered: Fall)

SUSAG 5300: Ecologically Based Pest Management Strategies

(Cross-listed with AGRON 5300/ ENT 5300/ PLP 5300).

Credits: 3. Contact Hours: Lecture 3.

Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes. Offered even-numbered years. (Typically Offered: Fall)

SUSAG 5440: Sociology of Food and Agricultural Systems

(Dual-listed with SOC 4440). (Cross-listed with SOC 5440).

Credits: 3. Contact Hours: Lecture 3.

Social organization of food and fiber production, processing, and distribution systems. Sociological comparison of conventional and alternative production systems; gender roles in agriculture and food systems; local, national and global food systems; perspectives on food and agricultural research and policy.

SUSAG 5460: Strategies for Diversified Food and Farming Systems

(Cross-listed with AGRON 5460/ HORT 5460).

Credits: 3. Contact Hours: Lecture 3.

Project-focused engagement in food and farming systems using tools and perspectives drawn from multiple disciplines. Includes a field component. Offered odd-numbered years. (Typically Offered: Spring)

SUSAG 5490: Sociology of the Environment

(Cross-listed with SOC 5490).

Credits: 3. Contact Hours: Lecture 3.

Social causes and social consequences of environmental problems. Interrelationship between social inequality and environmental inequality. Social construction and social experience of the environment. Contemporary developments in the social theory of the environment. International and domestic implications.

SUSAG 5710: Agroforestry Systems

(Dual-listed with NREM 4710/ SUSAG 4710). (Cross-listed with NREM 5710).

Credits: 3. Contact Hours: Lecture 3.

Concepts of sustainable land use, agroecological dynamics, and component interactions of agroforestry systems. Agroforestry systems in temperate and tropical regions. Design and evaluation techniques for agroforestry systems. Ecological, socioeconomic and political aspects of agroforestry. Offered even-numbered years. Meets International Perspectives Requirement. (Typically Offered: Spring)

SUSAG 5840: Organic Agricultural Theory and Practice

(Dual-listed with AGRON 4840/ HORT 4840/ SUSAG 4840). (Cross-listed with HORT 5840/ AGRON 5840).

Credits: 3. Contact Hours: Lecture 3.

Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socioeconomic processes and policies in organic agriculture from researcher and producer perspectives. Offered odd-numbered years. (Typically Offered: Spring)

SUSAG 5900: Special Topics

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

For students wishing to conduct in-depth study of a particular topic in sustainable agriculture. (Typically Offered: Fall, Spring, Summer)

SUSAG 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Pre-enrollment contract required. For MS students pursuing the non-thesis degree option. Final product is a creative component. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**SUSAG 6000: Sustainable Agriculture Colloquium**

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Weekly seminar for graduate students in the Sustainable Agriculture program. (Typically Offered: Fall, Spring)

SUSAG 6100: Foundations of Sustainable Agriculture

(Cross-listed with ABE 6100/ AGRON 6100/ ANTHR 6100/ SOC 6100).

Credits: 3. Contact Hours: Lecture 3.

Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts. (Typically Offered: Fall)

SUSAG 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

MS and PhD thesis and dissertation research. (Typically Offered: Fall, Spring, Summer)

IVY COLLEGE OF BUSINESS

David Spalding, Dean

Scott Johnson, Associate Dean for Research and Academic Personnel

Valentina Salotti, Associate Dean for Academic Affairs and Diversity

<https://www.ivybusiness.iastate.edu/>

Curriculum in Business

The Ivy College of Business strives to provide a high-quality professional education in business. Such an education should provide the student with: (1) an appreciation of the evolution of the profession and an awareness of the ethical, global, technological, economic, political and social forces shaping its future; (2) an understanding of the major functional areas of business with the opportunity for specialization for a career in business; (3) an ability to recognize and appreciate the effect of diversity in the work place; (4) an opportunity for advanced study.

A comprehensive education in business includes a broad foundation in the liberal arts, courses in the major functional areas of business activity, proficiency in analytical methods, and the ability to identify problems and arrive at logical solutions. In addition, a professional education is designed to inspire students to assume business and community leadership.

The curriculum in business is accredited by AACSB International, the Association to Advance Collegiate Schools of Business.

Organization of Curriculum

The undergraduate curriculum in business is divided into three areas: general education, foundational courses, and a core major. The general education program provides a broad spectrum of liberal arts coursework. The foundational business requirements provide a framework for business coursework. The last area includes two parts: (1) the business core which provides a common body of knowledge in all the functional areas in business, and (2) a major area of study. The twelve majors offered for the degree Bachelor of Science (B.S.) are accounting, actuarial science, business analytics, business economics, entrepreneurship, finance, healthcare management, human resource management, management, management information systems, marketing, and supply chain management. The college also offers a secondary major in international business. Elective courses are part of the curriculum. Additionally, the college offers the Bachelor of Business Administration (BBA) online degree completion program.

Curriculum Changes

Iowa State University students who want to change their curriculum to the Ivy College of Business should contact the Undergraduate Programs Office for assistance. For more details on changing curriculum or majors, please visit: <https://catalog.iastate.edu/academics/#degreeplanningtext>.

Students on Academic Probation will not be allowed to change curriculum to the Ivy College of Business during enrollment period three. See Making Schedule Changes at: <http://catalog.iastate.edu/registration/#schedulechangestext>. (<http://catalog.iastate.edu/registration/#schedulechangestext>)

Academic Standards and Graduation Requirements

Policies for students enrolled in the Ivy College of Business may be obtained at <https://www.ivybusiness.iastate.edu/advising/> or from the Undergraduate Programs Office in the Ivy College of Business.

Students are responsible for knowing and adhering to these Ivy College of Business policies as well as the university regulations found in this catalog. The following policies are in effect for students graduating from a professional curriculum in business with a B.S. degree under the 2023 catalog:

1. A minimum of 122 semester credits are required for Bachelor's of Science degrees.
2. At least 50 percent of the required business credits must be earned at Iowa State. All 3000 level and higher business credits must be earned at a four-year institution.
3. Cumulative ISU grade point average of at least 2.0 with no quality point deficiencies.
4. The major departments reserve the right to determine the appropriate section of the degree program to which transfer credits will be assigned.
5. No more than two transfer classes can be applied to the major.
6. Students must achieve communication proficiency by earning a grade of C or better in ENGL 2500, and one additional C or better from either ENGL 1500 or ENGL 3020.
7. A student must earn a grade of C or higher in a minimum of 30 credits applied to the business core and the major.
8. A student must earn at least 42 credits of 3000 level and higher coursework from a four-year institution.
9. Business majors may not take business courses Pass-Not Pass (P/NP).
10. General education and supporting courses may not be taken P/NP.
11. No more than 9 elective credits may be taken P/NP.
12. The last 32 credits applied for graduation must be taken at ISU. A waiver for Study Abroad and Internship/Co-ops may be granted.

Advising System

Each student in the Ivy College of Business has an assigned academic advisor who helps facilitate student progress toward graduation while supporting the academic standards of the College.

Advisors, as part of the Undergraduate Programs Office staff, provide academic services to Business students including development of academic plans, study abroad planning, accessing pertinent University services and resources, and meeting their overall educational objectives.

The College encourages students to attend an orientation program prior to their entry, where information is shared and evaluated to help set the student out on the academic path appropriate to their goals, preparation, interests, and capabilities.

Honors

Entering freshmen who meet the criteria will be invited to apply for membership in the Freshman Honors Program by the University Honors Program. For more information on the University Honors Program, please visit: <https://www.honors.iastate.edu/program/prospective-members/first-year-admissions>. (<https://www.honors.iastate.edu/program/prospective-members/first-year-admissions/>)

Currently enrolled students who have completed 12 graded credits at Iowa State University, earned a cumulative GPA of 3.50 or above, and have more than 48 credit hours remaining until graduation, are eligible to apply for membership to the University Honors Program (UHP). UHP students in the Ivy College of Business will work with designated advisors to incorporate elements of breadth, depth, and leadership into their business education through completion of academic, co-curricular, and personal/professional development experiences. In addition, to graduate with Honors in the Ivy College of Business, students must complete a minimum of two honors-designated courses, two 3000-level honors seminars, an honors project, 50 credits of 3000-level or higher coursework, and maintain a cumulative GPA of 3.50 or above. Additional details of requirements can be found on the Ivy College of Business Honors website at: <https://www.ivybusiness.iastate.edu/advising/honors/>. (<https://www.ivybusiness.iastate.edu/advising/honors/>)

Internships

Credit and non-credit internships in business may be approved for Ivy College of Business students in all majors. Credit hours and requirements vary, although internship credits only count as general electives. Arrangements must be made in the college prior to the beginning of the internship. A career coordinator from the Business Career Services Office will assist students in making these arrangements.

Multiple Majors

Undergraduates pursuing a degree in the Ivy College of Business may complete additional majors in the Ivy College of Business. * Those desiring additional majors outside the college should refer to the catalog section of the appropriate college and department for the additional major requirements. A multiple major in business economics and

agricultural business or economics is not permitted. A major in business economics with a minor in economics is not permitted.

Undergraduates with a primary major outside the Ivy College of Business who want a second major in business must complete the following requirements: Foundation, Supporting Courses, Business Core, and major requirements. (Refer to the current Curriculum Guide).

All students pursuing multiple majors or multiple degrees within the Ivy College of Business are required to have a minimum of 15 credits of coursework in each major that is not used in the other majors.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

** BBA students cannot double major or earn a double degree in a business area. However, they may work towards a double degree in another college at Iowa State. Online minors outside of the Ivy College of Business could be added to the BBA if desired. Consult with an advisor in the Undergraduate Student Services Office for assistance in identifying online minor options.*

Second Majors, Minors and certificates

International Business Secondary Major

A student in the Ivy College of Business may earn a secondary major in International Business. The requirements for this major include 6 credits of international overview courses, 6 credits of business focus courses, and the completion of one of the three options for global engagement, awareness, and regional perspective. Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major may not be used for the primary major.

Minor in International Business

Students with a major in the Ivy College of Business may earn a minor in International Business by completing 15 credits of approved coursework. The minor requires one course from the approved International Overview courses, two courses from the approved Business Focus courses, and by completing the Faculty-Led Global Awareness track, or the Foreign Language Global Awareness track, or through a plan of study approved by the Ivy International Programs Office. The minor must include at least six credits in courses numbered 3000 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Minor in Business and Technology Consulting

The Department of Marketing offers a specialty minor open to any undergraduate student at Iowa State University. The Business and

Technology Consulting minor prepares you for a career as a business consultant. Every year consulting companies attract talented graduates across the world. As a consultant, you gain broad exposure to business issues, solve different business problems, make an impact on major businesses, and become an expert in a specific business functional area. The minor provides a systematic process for students to strengthen problem-solving skills and prepare them to become better communicators and future leaders.

The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Non-business students may not take more than 9 credits of 3000- or 4000-level business courses.

Minors for Business Students

Students with a major in the Ivy College of Business (excluding BBA students[^]) may qualify for a minor specialization in one of the college's departments. Minor specializations are available in: Accounting, Business Analytics, Entrepreneurship (see Entrepreneurship Cross-Disciplinary Minor below), Finance, International Business (see Minor in International Business above), Management, Management Information Systems, Marketing, and Supply Chain Management. These minors require at least 15 credit hours in the minor specialization (16 credit hours are required for a minor in accounting), nine hours of which may not be used to satisfy any other department, college, or university requirement. The minor must include at least 6 credits in courses numbered 3000 or above taken at Iowa State University with a grade of C or higher. Students with declared majors have priority over students with declared minors in courses with space constraints.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

[^] BBA students can add online minors offered outside the Ivy College of Business. Consult with an advisor in the Undergraduate Student Services Office for assistance in identifying online minor options.

Minor in General Business for Non-Business Students

The Ivy College of Business offers a structured minor in general business to students outside the College. The minor requires a minimum of 15 credits, not including pre-requisite courses. Requirements for the minor are:

Required Courses (6 credits):

ACCT 2840	Financial Accounting	3
ACCT 2850	Managerial Accounting	3
or ACCT 2150	Legal Environment of Business	

Elective Courses (9 credits):

Select three courses from the following list:

ENTSP 3100	Entrepreneurship and Innovation	3
FIN 3010	Principles of Finance	3
MIS 3010	Management Information Systems	3
MKT 3400	Principles of Marketing	3
MGMT 3700	Managing Organizations	3
SCM 3010	Supply Chain Management	3

The minor must include at least 6 credits in courses numbered 3000 or above taken at Iowa State University. A "C" average or better is required in courses used to satisfy the minor requirements. All requirements for the minor must be taken for a grade. Students with a major outside the Ivy College of Business are eligible for a general business minor or a minor in business and technology consulting only. They may not receive any other specific minor from a business department.

Non-Business students may not take more than 9 cr. of 3000 or 4000 level Business courses.

General Business minor students needing more courses to meet the "nine credit stand alone" rule will need to apply to the Ivy College of Business for an exception or should consider taking one additional course of ACCT 2850 or ACCT 2150.

For more information on the General Business minor, please visit: <https://ivybusiness.iastate.edu/degree/zminors-and-certificates/>. (<https://ivybusiness.iastate.edu/degree/zminors-and-certificates/>)

Undergraduate Certificates

Professional Sales Certificate

The certificate in professional sales is a course of study administered by the Department of Marketing in the Ivy College of Business. It is designed for all undergraduate majors who wish to enhance their degree and employment possibilities by adding expertise in professional selling. The certificate program will equip students with knowledge and skills related to developing and managing mutually beneficial relationships with customers. The certificate program is built on a strong theoretical background but emphasizes applications and practice. The certificate provides students with an opportunity to learn about the ethical, technological, analytical, and global aspects of professional sales.

Students need to fulfill the course prerequisites set by the Ivy College of Business. The certificate requires 21 credits from a designated list of courses, of which, a minimum of 9 credits may not be used to meet any

other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 3000 or above.

Business courses listed as electives are available only to business majors. Non-business majors are limited to the 12 credits of required business courses for the certificate.

For more information about the Professional Sales Certificate, please visit: <https://catalog.iastate.edu/collegeofbusiness/marketing/#undergraduatecertificatetext>. (<https://catalog.iastate.edu/collegeofbusiness/marketing/#undergraduatecertificatetext>)

Actuarial Science Certificate

The certificate in actuarial science is available from the *College of Liberal Arts and Sciences* for non-actuarial science majors at Iowa State. The certificate requires 23 credits from a designated list of courses, of which 9 credits must stand-alone. There are 9 prerequisite courses required for the certificate's required courses.

For more information about the Actuarial Science Certificate, please visit: <https://catalog.iastate.edu/collegeofbusiness/actuarialscience/#certificatetext>. (<https://catalog.iastate.edu/collegeofbusiness/actuarialscience/#certificatetext>)

Entrepreneurship Cross-Disciplinary Minor

The Ivy College of Business participates in a university-wide minor in Entrepreneurship. This minor is available to any undergraduate student. Requirements for the minor include, ENTSP 3100 Entrepreneurship and Innovation (3 credits), either ENTSP 3130 Feasibility Analysis for New Ventures or ENTSP 3200 Corporate Entrepreneurship or ENTSP 4100 Social Entrepreneurship (3 credits), two business-oriented electives from an approved list (6 credits), and an experiential learning component (3 credits). The approved list of courses is available at: <https://ivybusiness.iastate.edu/entrepreneurship-minor/>. The minor requires at least 15 credits, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Non-degree Seeking Students

Students who wish to take courses in the Ivy College of Business, but are not seeking an undergraduate degree, should apply to the college as non-degree seeking students. Non-degree seeking students are eligible to take up to 9 credits in 3000-level and above business courses without meeting the college's admission requirements.

Upper Division Courses for Students Outside the College

Students from outside the Ivy College of Business are eligible to take up to 9 credits of 3000-level and above business courses, as long as they meet course prerequisites.

Departments of the College

- Accounting
- Finance
- Information Systems and Business Analytics
- Management and Entrepreneurship
- Marketing
- Supply Chain Management

Curriculum in Business

The college offers programs of study leading to the degree Bachelor of Science with a major in accounting, actuarial science, business analytics, business economics, entrepreneurship, finance, healthcare management, human resource management, management, management information systems, marketing, or supply chain management.

The college also offers a secondary major in international business. Total credits required: 122.

The college also offers a degree completer program leading to a Bachelor of Business Administration (BBA). Total credits required: 120.

See also: A 4-year (8 semester) plan of study for each business degree.

Business Curriculum

For Actuarial Science curriculum, please go to: <https://ivybusiness.iastate.edu/degree/actuarial-science/>. (<https://ivybusiness.iastate.edu/degree/actuarial-science/>)

For BBA curriculum, please go to: <https://ivybusiness.iastate.edu/degree/bba/>. (<https://ivybusiness.iastate.edu/degree/bba/>)

For all Business majors, students may apply 9 P-NP credits of free electives; must earn an overall 2.00 minimum GPA; and apply only 65 credits from a 2-year institution, which may include up to 16 technical credits.

International Perspective: 3 cr. (see footnote 3 below)

U.S. Diversity: 3 cr. (see footnote 4 below)

Communication: 13 cr.

Proficiency met with grade of C or better in ENGL 2500, and one additional C or better from either ENGL 1500 or ENGL 3020.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
ENGL 3020	Business Communication	3
SPCM 3120	Business and Professional Speaking	3
LIB 1600	Introduction to College Level Research	1

Humanities/Social Science: 9 cr.

9 cr. from approved humanities/social science list.

Global Perspectives: 6 cr. (SEE Footnote 3 BELOW)

6 cr. from approved global perspectives list.

Natural Science: 3 cr.

3 cr. from approved natural sciences list.

An approved list of the general education courses above are available at: <https://ivybusiness.iastate.edu/general-education-requirements/> or from the Undergraduate Student Services Office in the Ivy College of Business.

Foundation: 20 cr.

BUSAD 1020	Business Learning Team Orientation or BUSAD 1030 Orientation	1
BUSAD 2030	Professional Development in Business	1
MATH 1500	Discrete Mathematics for Business and Social Sciences ^{1, 2}	3
COMS 1130	Introduction to Spreadsheets and Databases	3
ECON 1010	Principles of Microeconomics	3
ECON 1020	Principles of Macroeconomics	3
STAT 2260	Introduction to Business Statistics I	3
ACCT 2840	Financial Accounting	3
Total Credits		20

Supporting Courses: 9-13 cr.

NOTE: Additional supporting courses are required for Actuarial Science. See <https://ivybusiness.iastate.edu/degree/actuarial-science/> for specific requirements for Actuarial Science.

MATH 1510	Calculus for Business and Social Sciences ¹	3
ACCT 2150	Legal Environment of Business	3
ACCT 3010	The Accounting Cycle (For ACCT majors only) ¹	1
MIS 2070	Fundamentals of Programming for Business and Analytics ¹	3
STAT 3260	Introduction to Business Statistics II (For ACCT, BUSAN, BUSEC, and FIN majors only) ¹	3
PHIL 2300	Moral Theory and Practice	3

Business Core: 27 cr.

ACCT 2850	Managerial Accounting	3
ENTSP 3100	Entrepreneurship and Innovation	3

FIN 3010	Principles of Finance	3
MIS 3010	Management Information Systems	3
MGMT 3710	Organizational Behavior	3
MGMT 3720	Ethical and Responsible Management	3
MKT 3400	Principles of Marketing	3
SCM 3010	Supply Chain Management	3
MGMT 4780	Strategic Management [*]	3
Total Credits		27

^{*}Must have credit or enrollment in all core courses listed above, except for MGMT 3720, plus senior standing, in order to enroll in MGMT 4780.

BUSINESS MAJOR: 18-29 cr. (depending on major)

ELECTIVES: 0-17 cr. (depending on major)

FootNotes:

- ¹ Accounting, Business Analytics, Business Economics, and Finance majors will also take STAT 3260 Introduction to Business Statistics II as part of the supporting courses. Business Economics majors will take MATH 1600 Survey of Calculus and ECON 2070 Applied Economic Optimization instead of MATH 1500 Discrete Mathematics for Business and Social Sciences and MATH 1510 Calculus for Business and Social Sciences. Accounting majors will take ACCT 3010 The Accounting Cycle concurrently with ACCT 2850 Managerial Accounting as part of the Supporting Courses. Management Information Systems majors will take MIS 2070 Fundamentals of Programming for Business and Analytics as part of the Supporting Courses.
- ² Students not adequately prepared in mathematics may have to take a supplemental course in addition to courses listed above.
- ³ Students may satisfy the Global/International Perspectives requirement by taking six credit hours from the University International Perspectives list.
- ⁴ Courses used for the U.S. Diversity requirements may also be used to fulfill Humanities/Social Sciences.

Bachelor of Science

The Bachelor of Science (B.S.) degree offers a high-quality professional education in business. It prepares students for professional careers in specialized functions of business and government. Candidates for this degree must satisfy the requirements established by the Ivy College of Business and also the requirements for individual majors specified by the departments of the College. All candidates for the B.S. degree are required to complete one of the following majors: accounting, actuarial science, business analytics, business economics, entrepreneurship, finance, healthcare management, human resource management, management, management information systems, marketing, or supply chain management.

Majors

Accounting
Actuarial Science

Professional Sales Certificate

GRADUATE STUDY

Master's Programs

Nine programs are offered at the master's level: a Master of Business Administration (MBA), a professional Master of Business Administration (PMBA), a Master of Accounting (MAcc), a Master of Business analytics (MBAN), a master of entrepreneurship (MEP), a Master of Finance (MFIN), a master's in healthcare analytics and operations (MHAO), a Master of Real Estate Development (MRED), and a Master of Science in information systems (MSIS). These programs are intended to meet distinct sets of educational objectives.

Master of Business Administration (MBA)

The Master of Business Administration (MBA) is the professional management education program for those pursuing careers in business. The goal of the MBA program is to educate future business leaders preparing them for the challenges of tomorrow by giving them the

vision, knowledge, skills, and confidence to make the best decisions for all involved stakeholders. The MBA program consists of a 48-credit curriculum leading to a non-thesis, non-creative component Master of Business Administration. Students may pursue a specialization in accounting, accounting analytics, business analytics, entrepreneurship, finance, healthcare analytics and operations, information systems, leadership, marketing, real estate, or supply chain management.

The Ivy College of Business also offers a business administration minor to students with majors outside the college. For more information on the graduate minor in business administration, please visit: <https://ivybusiness.iastate.edu/degree/zgraduate-minors/>. (<https://ivybusiness.iastate.edu/degree/zgraduate-minors/>)

A concurrent BS/MBA is available to eligible engineering undergraduate students majoring in aerospace, agricultural, biological systems, chemical, civil, computer, construction, cybersecurity, electrical, industrial, materials science, mechanical, or software engineering. A concurrent BS/MBA is available to eligible undergraduate students majoring in agricultural systems technology, agronomy, animal science, chemistry, computer science, food science, geology, industrial design, industrial technology, and meteorology.

Double master's degree programs are offered with accounting (MBA/MAcc), architecture (MBA/MArch), business analytics (MBA/MBAN), community and regional planning (MBA/MCRP), entrepreneurship (MBA/MEP), finance (MBA/MFIN), healthcare analytics and operations (MBA/MHAO), information systems (MBA/MSIS), and real estate development (MBA/MRED). A double degree program (DVM/MBA) is also available to eligible Veterinary Medicine students.

Professional Master of Business Administration (PMBA)

The professional Master of Business Administration (PMBA) is the professional management education program for those pursuing careers in business. The goal of the PMBA program is to educate future business leaders preparing them for the challenges of tomorrow by giving them the vision, knowledge, skills, and confidence to make the best decisions for all involved stakeholders. The PMBA program consists of a 42-credit curriculum leading to a non-thesis, non-creative component professional Master of Business Administration. Students may pursue a specialization in accounting, accounting analytics, business analytics, entrepreneurship, finance, healthcare analytics and operations, information systems, leadership, marketing, real estate, or supply chain management.

Double master's degree programs are offered with accounting (PMBA/MAcc), business analytics (PMBA/MBAN), entrepreneurship (PMBA/MEP), healthcare analytics and operations (PMBA/MHAO), and real estate development (PMBA/MRED).

Multiple concurrent degree programs are offered between the Ivy College of Business and other Colleges at ISU. The concurrent degree programs

allow qualified students to be admitted to a master's program while completing their undergraduate degree. Students can double count up to 6 credits of coursework between the degrees, allowing them to complete both a Bachelor of Science and a master's degree in as little as five years. The concurrent degree programs offered include:

- B.S. Business Analytics (BUSAN) and Master of Business Analytics (MBAN)
- B.S. Business Analytics (BUSAN) and Master of Science in Information Systems (MSIS)
- B.S. Finance (FIN) and Master of Finance (MFIN)
- B.S. Management Information Systems (MIS) and Master of Science in Information Systems (MSIS)
- B.S. Management Information Systems (MIS) and Master of Business Analytics (MBAN)
- B.S. Software Engineering (SE) and Master of Science in Information Systems (MSIS)

For more information on the concurrent Bachelors and master's programs offered through the Ivy College, please visit: <https://www.ivybusiness.iastate.edu/master-programs/>. (<https://www.ivybusiness.iastate.edu/master-programs/>)

Master of Accounting (MAcc)

The Master of Accounting (MAcc) is designed to meet the needs of accountants in public or private accounting, focusing on interpreting and analyzing accounting information for decision-making and preparing students for certification as a Certified Public Accountant (CPA) or Certified Management Accountant (CMA). The 30-hour program requires 15 hours of graduate accounting courses, including courses in data analytics and communications. Students may pursue a specialization in Financial Reporting and Assurance, Information Systems and Analytics, Tax, or Managerial Decision Making.

Master of Business Analytics (MBAN)

The Master of Business analytics (MBAN) is an interdisciplinary program that addresses the challenges of dealing with data analytics and business intelligence in the "Big Data" environment. The goal is to develop managers who will master analytics in ways that lead to increased profits for their company. The program, offered both online or in-person, offers a comprehensive approach that draws from Business, Computer Science, Electrical and Computer Engineering, Statistics, and Industrial and Manufacturing Systems Engineering. It provides a foundation in data analytics project management, statistical and predictive modeling, consumer sentiment analysis, knowledge discovery, analytical reporting, segmentation analysis and data visualization. The program requires 30 credits of graduate level courses over a 21-month period.

A certificate in business analytics is also available for working professionals. The certificate requires a minimum of 12 graduate level approved credits, which may be taken either on-line or face-to-face. For more information on the graduate certificate in business analytics, please visit: <http://catalog.iastate.edu/collegeofbusiness/businessanalytics/#graduatecertificatetext>. (<http://catalog.iastate.edu/collegeofbusiness/businessanalytics/#graduatecertificatetext>)

Master of Finance (MFIN)

The Master of Finance (MFIN) is designed to provide students with in-depth coverage of financial topics and a strong quantitative skill set. Students will learn financial analysis, valuation, modeling, and risk management techniques. The 30-credit program requires 24 finance credits, of which 6 are finance electives. The remaining 6 credits are electives selected from any related area.

A certificate in finance is also available. The certificate requires a minimum of 12 graduate level approved credits, which may only be taken face-to-face. For more information on the graduate certificate in finance, please visit: <http://catalog.iastate.edu/collegeofbusiness/finance/#graduatecertificatetext>.

Masters in Healthcare Analytics and Operations (MHAO)

Students graduating from the Master's in Healthcare Analytics and Operations (MHAO) program will apply data and appropriate models to analyze operations and supply chains to develop and present actionable insights leading to better outcomes in the healthcare industry. Healthcare analytics uses historical and current data to predict trends and optimize operations, bringing benefits to patients, medical professionals, and healthcare supply chain partners.

Master of Real Estate Development (MRED)

The Master of Real Estate Development (MRED) is a 30-credit non-thesis, non-creative component program. The MRED program offers academic training, networking opportunities and collaboration with leading academics and practitioners to solve real world problems. Areas of study include real estate market analysis, finance, investments, leadership and negotiation, fundamentals of the build environment, construction science and urban planning. The curriculum is offered in a convenient format of distance learning and brief campus residencies, making it ideal for the full-time working professional.

Master of Science in Information Systems (MSIS)

The Master of Science in information systems (MSIS) is designed to provide students with strong technical skills and a broad background in business needed to effectively develop and manage information systems projects. Using the latest software, students will apply information systems theory and concepts to modern information systems development. The 30-credit program includes business foundation courses, information systems core courses and electives, and a research requirement (creative component).

A certificate in supply chain management is also available. The certificate requires a minimum of 12 graduate level approved credits, which may only be taken on-line. For more information on the graduate certificate in supply chain management, please visit: <http://catalog.iastate.edu/collegeofbusiness/supplychainmanagement/#graduatecertificatetext>.

A certificate in enterprise cybersecurity management is also available. The certificate requires a minimum of 12 graduate level approved credits, which may be taken either on-line or face-to-face. For more information on the graduate certificate in enterprise cybersecurity management, please visit: <http://catalog.iastate.edu/collegeofbusiness/managementinformationsystems/#graduatecertificatetext>.

Master of Entrepreneurship (MEP)

The Master of Entrepreneurship (MEP) is designed to provide students with the knowledge, skills, and practical experience to prepare student to start and manage new business ventures independently — or within an established organization. Students will develop and practice the primary entrepreneurial skills needed to identify and evaluate market opportunities and think creatively to formulate and implement successful strategies for moving a business idea forward. The 30-credit program requires both core and elective credit in addition to experiential components.

A certificate in entrepreneurship and innovation is also available. The certificate requires a minimum of 12 graduate level approved credits, which may be taken either on-line or face-to-face. For more information on the graduate certificate in entrepreneurship and innovation, please visit: <http://catalog.iastate.edu/collegeofbusiness/entrepreneurship/#graduatecertificatetext>.

A certificate in Digital Marketplace Analytics is offered by the Ivy College of Business and the College of Human Sciences. The 15-credit certificate, which incorporates coursework from both colleges, provides an innovative program for individuals who want to build their data analytics skills and to apply analytics tools to problem-solving in the fashion, events, and hospitality industries. For more information on the graduate certificate in digital marketplace analytics, please visit: <http://catalog.iastate.edu/collegeofbusiness/businessanalytics/#graduatecertificatetext>. (<http://catalog.iastate.edu/collegeofbusiness/businessanalytics/#graduatecertificatetext>)

The Ivy College of Business participates in the following graduate level interdepartmental programs: Cyber Security, Engineering Management, Human Computer Interaction, Seed Technology and Business, and Transportation.

Ph.D. in Business and Technology

The Ivy College of Business offers graduate work leading to the Doctor of Philosophy degree in business and technology, with one of six specializations—entrepreneurship (ENTSP), finance, (FIN), management

information systems (MIS), management (MGMT), marketing (MKT), or supply chain management (SCM). Departments in the college (Finance, Management and Entrepreneurship, Marketing, Supply Chain Management, and Information Systems and Business Analytics), along with select other departments from across campus cooperate in providing coursework toward this degree. The program prepares individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The program consists of seminars in content areas, statistics, and research methodology in the first two years. After passing comprehensive exams, students will focus on their dissertation.

This 74-credit program requires a minimum of four years to complete. All work, including the dissertation, must be done in residence (on campus).

For more details or application information contact the Graduate Programs office in the Ivy College of Business or visit: <https://ivybusiness.iastate.edu/phd/>. (<https://ivybusiness.iastate.edu/phd/>)

Accounting

Accountants are the business leaders in corporations and governments who manage, analyze, and explain complex information. Accountants are at the forefront of data analytics and lead the planning, evaluating, controlling, and reporting of activities in an entity.

The major in accounting is designed to give students a conceptual foundation, developing their financial acumen and analytical skills for use in every facet of business. Students who complete the accounting major are well prepared for careers in industry, government, and the public accounting profession.

Accountants both provide and explain useful financial information to internal users (such as managers in a company) and external users (such as investors, creditors, government officials, and the general public). Accounting is an integral part of the management of business and government organizations. Accounting information is needed by external users to make investment decisions, to grant or withhold credit, and in the case of government, to collect revenue and gather statistical information. To provide useful information, accountants collect, analyze, synthesize, and communicate data in an understandable manner.

The curriculum in accounting is accredited by AACSB International, the Association to Advance Collegiate Schools of Business.

Undergraduate Major in Accounting

For undergraduate curriculum in business, major in accounting.

The Department of Accounting offers a major in accounting. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business

core requirements for the Bachelor of Science (B.S.) degree, and 24 additional credits in the major.

The instructional objective of the Accounting Program is to provide a well-rounded professional education in accounting. Such an education should provide the student with:

- 1. A mastery of basic accounting concepts.
- 2. An ability to solve accounting problems and analyze accounting issues utilizing critical thinking.
- 3. An ability to communicate effectively and work with others as a member of a team.
- 4. An awareness and sensitivity for dealing with ethical concerns.

For more information on the undergraduate major in accounting, please visit: <https://ivybusiness.iastate.edu/degree/accounting/>. (<https://ivybusiness.iastate.edu/degree/accounting/>)

Student Learning Outcomes

Upon graduation, undergraduate students majoring in accounting will:

- 1. Learners will possess fundamental accounting knowledge.
- 2. Learners will be effective communicators.
- 3. Learners will be critical thinkers.
- 4. Learners will be skilled in the use of information technology.
- 5. Learners will be effective team members.
- 6. Learners will be ethical decision makers.

Curriculum:

In addition to the basic business degree requirements (<https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusinesstext>), the requirements for the accounting major are met by successful completion of the following courses:

Required Courses (18 credits):

ACCT 3830	Intermediate Managerial Accounting	3
ACCT 3840	Accounting Information Systems and Analytics	3
ACCT 3860	Intermediate Financial Accounting I	3
ACCT 3870	Intermediate Financial Accounting II	3
ACCT 4850	Principles of Federal Income Tax	3
ACCT 4970	Introduction to Auditing	3

Elective Courses (6 credits):

Select six credit hours from the following list:		
ACCT 3150	Business Data Streams and Issues	3
ACCT 4610	Entrepreneurship and Accounting Information	3
ACCT 4830	Application and Communication in Managerial Accounting	3

ACCT 4840	Advanced Accounting Information Systems	3
ACCT 4870	Volunteer Income Tax Assistance	3
ACCT 4880	Governmental and Non-profit Institution Accounting	3
ACCT 4890	Corporate Social Responsibility Reporting	3
ACCT 4930	Corporate Taxation	3
ACCT 4950	Advanced Financial Accounting Problems	3
ACCT 4960	Accounting in the Global Economy	3
ACCT 4980	Accounting Communication and Analysis	3

NOTE: Accounting majors must take ACCT 3010 The Accounting Cycle and STAT 3260 Introduction to Business Statistics II as part of the supporting courses.

See the CPA Licensure Note below for the 150-hour education requirement for CPA certification in Iowa.

In addition, it is highly recommended that an accounting major include ACCT 4160 Business Law. The Department of Accounting should be consulted for information on alternative plans of study.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

CPA Licensure Note: The CPA licensure designation is a symbol of competence in the accounting profession, which employers value both immediately upon graduation and throughout career advancement. While students may sit for the CPA exam in Iowa after completing the required accounting coursework and earning a bachelor's degree, CPA candidates must complete a total of 150 credits in order to be certified or licensed to practice in Iowa. Qualified students should consider earning the Master of Accounting (MAcc) to satisfy the 150-credit requirement. Juniors and seniors in accounting who are interested in graduate study should contact the coordinator of the MAcc program as early as possible to complete their graduate degree in an efficient manner. *Students planning certification outside Iowa must check local rules, as each state determines its own CPA exam qualification and licensing requirements.*

^{*} Must have credit or enrollment in all core courses listed above, except for MGMT 3720, plus senior standing, in order to enroll in MGMT 4780.

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 3000-level courses from a four-year institution.
3. 50% of required Business courses must be earned at ISU.

4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).

5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.

6. A grade of C or better in ENGL 2500 required, and also in one other required ENGL course.

7. All 3000-level and higher business credits must be earned at a four-year college.

8. Multiple business **majors** must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your advisor regarding multiple business **degree requirements**.

Undergraduate Minor in Accounting

The Department of Accounting also offers a minor for non-accounting majors in the Ivy College of Business. The minor requires 16 credits from an approved list of courses, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Required Courses (7 credits):

ACCT 2840	Financial Accounting	3
ACCT 2850	Managerial Accounting	3
ACCT 3010	The Accounting Cycle	1

Elective Courses (9 credits):

Select nine credit hours from 3000 or 4000 level Accounting courses, except ACCT 4160.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in accounting, please visit: <https://ivybusiness.iastate.edu/degree/zminors-and-certificates/>. (<https://ivybusiness.iastate.edu/degree/zminors-and-certificates/>)

Master of Accounting (MAcc) 4+1 Program

The Master of Accounting (MAcc) is a 30-credit hour, non-thesis graduate program with six credits dedicated to CPA exam preparation. This path allows students the time necessary to adequately study for and complete all four sections of the CPA exam before starting a full-time job. In

addition, the program provides a solution to satisfying the 150 total credit hour CPA requirement while earning a higher degree!

Each MAcc student customizes their curriculum to fit their interests and intended career path. Both a CPA certification track and CMA certification track are available. Within their selected track, students earn a specialization in one of the following areas of their choice: financial reporting and assurance, information systems and analytics, tax, or managerial decision-making. A three-week, six-credit study abroad option in London is available.

Students considering the MAcc should meet with Kayla Sander, MAcc coordinator and advisor, during the first semester of their junior year. Students are required to apply for the program the semester before beginning graduate coursework. For more information and a more detailed program outline, visit: <http://www.ivybusiness.iastate.edu/degree/macc> (<http://www.ivybusiness.iastate.edu/degree/macc/>).

MAcc 4+1 Program Highlights

Freshman Spring

ACCT 2840: Financial Accounting

Credits: 3. Contact Hours: Lecture 3.

Introduction to the basic concepts and procedures of financial accounting from a user perspective. The course examines the accounting cycle, business terminology, basic control procedures, and the preparation and evaluation of financial reports, with an emphasis on financial statement analysis. (Typically Offered: Fall, Spring, Summer)

Sophomore Fall

ACCT 3010: The Accounting Cycle

Credits: 1. Contact Hours: Lecture 1.

Prereq: ACCT 2840

Interactive computer-based analysis of the accounting cycle including transactions and financial statements. Preparation of journal entries and adjusting entries and completion of the closing process. (Typically Offered: Fall, Spring, Summer)

ACCT 2850: Managerial Accounting

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 2840

Understanding of fixed and variable costs and their role in planning, control and performance evaluation. Examination of alternative costing methods. Making decisions by identifying and developing relevant information. Development of spreadsheet skills. (Typically Offered: Fall, Spring, Summer)

MIS 3010: Management Information Systems

Credits: 3. Contact Hours: Lecture 3.

Prereq: COMS 1130

The role of information technology in organizations. Overview of methodologies for design and development of systems including decision support systems, expert systems, data bases, end-user computing, etc. Computer applications relate concepts to practice. Lecture and laboratory work emphasizes the enabling role of IT in contemporary organizations. (Typically Offered: Fall, Spring, Summer)

Sophomore Spring**ACCT 3860: Intermediate Financial Accounting I**

Credits: 3. Contact Hours: Lecture 3.

Prereq: (ACCT 2840 or ACCT 2840H) and ACCT 3010

The conceptual framework of financial accounting. Communication of financial information on the income and retained earnings statements, statement of cash flows, and the balance sheet. Accounting concepts relating to current and operational assets of the firm. (Typically Offered: Fall, Spring)

STAT 2260: Introduction to Business Statistics I

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 1500 or MATH 1650

Obtaining, organizing, and presenting statistical data; measures of location and dispersion; the Normal distribution; sampling and sampling distribution of the sample mean; elements of statistical inference; confidence intervals and hypothesis testing for the mean; describing bivariate relationships and inference for simple linear regression analysis; use of computers to visualize and analyze data. Graduation Restriction: Credit for only one of the following courses may be applied toward graduation: STAT 1010, STAT 1040, STAT 1050, STAT 2010, or STAT 2260. (Typically Offered: Fall, Spring, Summer)

Junior Fall**ACCT 3870: Intermediate Financial Accounting II**

Credits: 3. Contact Hours: Lecture 3.

Prereq: Minimum of C- in ACCT 3860

Financial accounting and reporting practices for business entities. Generally accepted accounting principles (GAAP) relative to firm liabilities, equity, income, taxes, employee benefits, leases, accounting changes and cash flows. Discussion of current issues in financial accounting. (Typically Offered: Fall, Spring)

Plan MAcc Program

Junior Spring**ACCT 3830: Intermediate Managerial Accounting**

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 2850 and credit or enrollment in ACCT 3010

Generation, communication and use of information to assist management with planning, control, and decision making in manufacturing and service organizations. Includes cost concepts and relevance to decision situations, operational and capital budgeting, and performance evaluation. Emphasis on developing effective teamwork skills as well as spreadsheet capabilities. (Typically Offered: Fall, Spring)

ACCT 3840: Accounting Information Systems and Analytics

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment in ACCT 3010 and MIS 3010

Concepts and procedures underlying creating, sharing, reporting, storing, and analyzing accounting data. Information technology internal controls and audit techniques. Trends in accounting information systems.

Senior Fall**ACCT 4850: Principles of Federal Income Tax**

Credits: 3. Contact Hours: Lecture 3.

Prereq: Minimum of C- in ACCT 3860

Introduction to the fundamentals of federal income taxation and concepts applicable to all tax entities. Addresses issues related to the measurement and recognition of income, deductions, gains, and losses, taxation of property transactions, and basis / cost recovery concepts. Includes coverage of tax law policy objectives, tax implications of business and investment decisions, tax versus financial reporting treatment of common business transactions, and ethical issues related to tax compliance and planning. (Typically Offered: Fall, Spring)

ACCT 4970: Introduction to Auditing

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 3840 and ACCT 3870 and STAT 3260

The conceptual framework of auditing. Professional ethics. External reporting concepts. Audit methodology including risk analysis, internal control, procedures for gathering evidence and the role of statistical sampling in auditing. (Typically Offered: Fall, Spring)

Apply to MAcc Program

Senior Spring**Two (2) ACCT Electives**

Optional Concurrent Status to Get Started on MAcc Requirements Early!

Senior Summer

Optional Study Abroad in London

Graduate Fall

ACCT 5150: Accounting Analytics

Credits: 3. Contact Hours: Lecture 3.

Applications and skills for performing data analytics in accounting contexts. Explores conceptual framework for providing data-driven insights and recommendations. Includes hands-on experiences working with different types of data and the latest analysis tools. (Typically Offered: Fall)

ACCT 5980: Financial Accounting: Theory and Contemporary Issues

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 3860 or ACCT 5010

Theoretical discussion of the financial accounting and reporting environment. The usefulness of financial accounting information for decision making. Current financial accounting issues, the financial accounting standard setting process, FASB Standards Codification, and the role of the SEC in financial reporting. (Typically Offered: Fall)

ENGL 5920C: Core Studies: Professional Communication

(Cross-listed with SPCM 5920C).

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 9 credits.

Seminar on topics central to the fields of rhetoric and professional communication or composition. (Typically Offered: Fall, Spring, Summer)

CPA or CMA Exam Prep Specialization Coursework

Please address MAcc questions to Kayla Sander, MAcc coordinator and advisor, at kayla@iastate.edu. An *Accounting Student Resources* folder, available to all Ivy accounting majors, is found in Canvas. This folder provides useful, detailed information on both the CPA exam and the Iowa State University Master of Accounting 4+1 program.

Graduate Programs

Master of Accounting (MAcc)

The department offers a graduate degree, the Master of Accounting (MAcc). This is a 30-credit hour degree which offers paths to certification as a Certified Public Accountant (CPA) or Certified Management Accountant (CMA). Areas of specialization are also available within those 30 hours. Students pursuing the CPA certification may specialize in Financial Reporting and Assurance, Information Systems and Analytics, or Tax. Students pursuing the CMA certification may specialize in Managerial Decision Making or Information Systems and Analytics. The program requires 15 hours of core courses which includes: ENGL 5920C Core Studies: Professional Communication, ACCT 5150 Accounting Analytics, ACCT 5980 Financial Accounting: Theory and Contemporary

Issues, and two Certification Preparation courses. The remaining 15 hours of the degree are determined by the selection of an area of specialization.

The MAcc is appropriate for accounting undergraduate students wanting to pursue a variety of accounting careers. The MAcc program is an efficient way for candidates to meet the 150-hour education requirement for CPA certification in Iowa. Students without an accounting degree will be required to complete a substantial amount of accounting coursework prior to being considered for admission to the MAcc. Contact the coordinator of the MAcc program for details.

Student Learning Outcomes

Upon graduation, Master of Accounting (MAcc) students will:

1. Be critical thinkers.
2. Be effective communicators.
3. Be effective team members.
4. Be ethical decision makers.
5. Be adequately prepared for professional certification or licensure.

For more information about the MAcc program, please visit: <https://ivybusiness.iastate.edu/degree/macc/>. (<https://ivybusiness.iastate.edu/degree/macc/>)

Double Graduate Degrees

The Accounting Department participates in one double degree program at the graduate level. Students can simultaneously pursue a double degree in Master of Business Administration (MBA) and Master of Accounting (MAcc). The double degree plan allows students to share credits between the degrees. See the Director of Graduate Education for more details on sharing credits.

For more information on the double degree in Master of Business Administration (MBA) and Master of Accounting (MAcc), please visit: <https://www.ivybusiness.iastate.edu/master-programs/>. (<https://www.ivybusiness.iastate.edu/master-programs/>)

Master of Accounting Analytics

If you want to be on the cutting edge of accounting and business analytics, the online Master of Accounting Analytics (MAA) is for you. Designed to meet the demand for accounting professionals with advanced business analytics expertise, the MAA program curriculum provides a deep dive into a comprehensive selection of accounting and business analytics topics focusing on interpreting and analyzing accounting information for decision-making.

All courses will be delivered in an online asynchronous format, allowing students to complete their coursework from anywhere and work at their own pace. The MAA program is ideal for working professionals seeking to further their education while remaining on the job and for those looking to

further their education and enter the workforce with an in-demand special set of skills.

The MAA faculty are respected nationally and have been making a difference as editors and co-editors of the top journals in their area of expertise. The accounting faculty hosts annual training conferences for continuing education credits and provide external consulting. These external experiences provide a link for our students from the classroom to real-world practice. We are absolutely committed to providing you with a rewarding and valuable educational experience.

Student Learning Outcomes

Upon graduation, Master of Accounting analytics (MAA) students will:

1. Think critically about accounting problems.
2. Apply advanced quantitative modeling techniques to accounting data.
3. Interpret and analyze accounting information for decision-making.
4. Visualize and disseminate accounting information effectively.

For more information about the MAA program, please visit:
<https://ivybusiness.iastate.edu/master-programs/>. (<https://ivybusiness.iastate.edu/master-programs/>)

Master of Business Administration (MBA)

The Department of Accounting participates in the full-time, part-time, and executive Master of Business Administration (MBA) programs. The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students may develop an area of specialization in accounting or accounting analytics.

The specialization in accounting is designed to help meet the education requirement for CPA certification in Iowa.

The specialization in accounting analytics will place students a step ahead in today's business environment. The specialization curriculum provides a deep dive into a well-rounded selection of accounting topics while placing an emphasis on expanding students' analytical skills - skills critical to the accounting profession.

Student Learning Outcomes

Upon graduation, MBA students will:

1. Demonstrate effective communication skills.
2. Effectively lead and work in diverse teams.
3. Critically solve business problems.
4. Integrate ethical and global perspectives in decision making.

For more information about the MBA program with a specialization in Accounting or Accounting Analytics, please visit: <https://ivybusiness.iastate.edu/degree/mba/>

Actuarial Science

Actuaries have a deep understanding of finance, business, mathematics, and statistics. With this knowledge, they help businesses measure and manage risk, develop new products, and make strategic value-enhancing decisions. In high demand, actuaries work for and with businesses engaged in many different types of activities, including life-, health-, and property-casualty insurance, banking, investments, financial services, government, energy, e-commerce, marketing, and consulting.

Students studying actuarial science will acquire the knowledge base and skills in finance, mathematics, and statistics needed to pass the preliminary actuarial exams offered by the Society of Actuaries and Casualty Society of America, while acquiring essential business skills to be successful in the field.

Undergraduate Major

The Department of Finance in the Ivy College of Business offers a major in actuarial science. Students will complete the business general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the Bachelor of Science (B.S.) degree, and 23 additional credits in the major.

The actuarial science major, intended for students with strong quantitative backgrounds and interest in business, has the goal of educating students in business and risk management, while providing the background and training needed for certification as an actuary (via the 5 preliminary exams of the profession). The major is an excellent opportunity for individuals who want to use advanced technical and analytical skills to solve important business problems.

Certificate

The certificate in actuarial science is available from the *College of Liberal Arts and Sciences* for non-actuarial science majors at Iowa State (or students who hold a baccalaureate degree from an accredited institution). The certificate requires 23 credits from a designated list of courses, of which 9 credits must stand-alone. There are 9 prerequisite courses required for the certificate's required courses.

The certificate is intended for students who wish to prepare for a career in the field while obtaining the advanced technical and analytical skills in their chosen major. Students studying mathematics, statistics, or other quantitative STEM disciplines will find their primary coursework matches well with the prerequisites and courses required for the certificate. Students completing the certificate will have sufficient background to pass the first 4 preliminary exams of the profession, along with applying

actuarial mathematics to problems in finance, investments, and risk analysis for a broad range of businesses and consumers.

For undergraduate curriculum in business, major in actuarial science.

The Department of Finance offers a major in actuarial science. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the Bachelor of Science (B.S.) degree, and 23 additional credits in the major.

Actuaries measure and manage risk and work for and with businesses with a financial focus, such as finance and insurance. The actuarial science program provides a background in probability, statistics, finance, and actuarial mathematics to enable students to pass the 5 preliminary exams offered by the Society of Actuaries and Casualty Society of America. After completion of this program, students will acquire the business-related skills needed to be a successful actuary. These include the ability to: understand how a business is organized and functions; communicate effectively in written, oral, visual, and electronic modes; work in teams; make ethical choices; use quantitative and analytical methods to address unstructured business problems; think critically; understand financial statements; and understand markets and investments.

Areas of study in the field of actuarial science include interest theory, theory of probability, financial futures and options, loss models, credibility theory, and mathematics of life contingencies.

The instructional objective of the Actuarial Science program is to provide a well-rounded professional business education in actuarial science. Such a program will provide the student with:

- 1. A mastery of actuarial concepts and methods of analysis.
- 2. A basic understanding of insurance operations in a global setting and of the role of financial institutions in the economy.
- 3. An ability to effectively communicate and work with others as an actuary.
- 4. An ability to demonstrate leadership capabilities in actuarial, financial analysis, and portfolio management.

For more information on the undergraduate major in Actuarial Science, please visit: <https://ivybusiness.iastate.edu/degree/actuarial-science/>. (<https://ivybusiness.iastate.edu/degree/actuarial-science/>)

Student Learning Outcomes

Upon graduation, undergraduate students majoring in Actuarial Science will:

- 1. Be effective communicators.
- 2. Be effective collaborators.

- 3. Be problem solvers.
- 4. Understand business concepts.
- 5. Recognize ethical and legal responsibilities to organizations.

Curriculum:

While the General Education Requirements for Actuarial Science majors remains the same as all other Business majors, there are specific changes in the following areas that must be completed in order to receive a Bachelor’s degree in Actuarial Science:

Foundation: (21)

BUSAD 1020	Business Learning Team Orientation	1
or BUSAD 1030 Orientation		
BUSAD 2030	Professional Development in Business	1
COMS 1130	Introduction to Spreadsheets and Databases	3
MATH 1650	Calculus I	4
ECON 1010	Principles of Microeconomics	3
ECON 1020	Principles of Macroeconomics	3
STAT 2260	Introduction to Business Statistics I	3
ACCT 2840	Financial Accounting	3

Supporting Courses: (17)

ACCT 2150	Legal Environment of Business	3
MATH 1660	Calculus II	4
MATH 2070	Matrices and Linear Algebra	3
MATH 2650	Calculus III	4
PHIL 2300	Moral Theory and Practice	3

Business Core: (27)

ACCT 2850	Managerial Accounting	3
ENTSP 3100	Entrepreneurship and Innovation	3
FIN 3010	Principles of Finance	3
MGMT 3710	Organizational Behavior	3
MGMT 3720	Ethical and Responsible Management	3
MIS 3010	Management Information Systems	3
MKT 3400	Principles of Marketing	3
SCM 3010	Supply Chain Management	3

Above courses are prerequisites and must be taken prior to:

MGMT 4780	Strategic Management	3

Major – Actuarial Science: (23)

Required Courses:

MATH 2400	Mathematics of Investment and Credit	3
STAT 3410	Introduction to the Theory of Probability and Statistics I	4

STAT 3420	Introduction to the Theory of Probability and Statistics II	4
FIN 4550	Risk Modeling	3
ACSCI 4010	Loss Models I	3
ACSCI 4020	Credibility Theory	3
MATH 4410	Life Contingencies I	3

Elective Courses:

The following electives are highly recommended for Actuarial Science majors:

ACSCI 3910	Actuarial Exam P Lab	1
ACSCI 3920	Actuarial Exam FM Lab	1
FIN 3100	Corporate Finance	3
FIN 4240	Financial Futures and Options	3
MATH 4420	Life Contingencies II	3

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Actuarial Science, B.S.

	14	12

Total Credits: 122

@ Courses in these requirements may also be used as Global Perspective.

US Diversity courses may be used to satisfy HUM/SOC SCI.

* Validation of Educational Experience courses

** Must have credit or enrollment in all core courses listed above, except for MGMT 3720, plus senior standing, in order to enroll in MGMT 4780.

FM Financial Mathematics exam

P = Probability exam

IFM Investments & Financial Markets exam

STAM Short-Term Actuarial Mathematics exam

LTAM Long-Term Actuarial Mathematics exam

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.

- 2. 42 credits of 3000+ level courses from a four-year institution.
- 3. 50% of required Business courses must be earned at ISU.
- 4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).
- 5. 131 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.
- 6. A grade of C or better in ENGL 2500 required, and also in one other required ENGL course.
- 7. A grade of C- or better in MATH 1660 and MATH 2650 required.
- 8. All 3000-level and higher business credits must be earned at a four-year college.
- 9. Multiple business **majors** must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your advisor regarding multiple business **degree requirements**.

Undergraduate Certificate

For the undergraduate certificate in actuarial science.

Purpose

The College of Liberal Arts and Sciences offers a certificate in Actuarial Science. It is available to any non-Actuarial Science major (or student who holds a baccalaureate degree from an accredited institution). Students studying mathematics, statistics, or other quantitative STEM disciplines will find their primary coursework matches well with the prerequisites and courses required for the certificate. The certificate provides students with the necessary background in mathematics, statistics, and the basic principles of finance for a career in actuarial science while obtaining advanced technical and analytical skills in their chosen major. Students completing the certificate will have the background to pass 4 of the preliminary exams in the profession, will have obtained the specialized knowledge required for success in the field, and will be prepared to work for and with businesses with a financial focus, such as insurance, banking, and investments.

Learning Outcomes

After completing the certificate in actuarial science, students will:

- Master the quantitative and analytical skills required to obtain an entry-level position in the profession,
- Have sufficient background to pass the first 3 or 4 professional exams offered by the professional actuarial organizations,
- Apply actuarial mathematics to problems in finance, investment, and risk analysis, and

- Demonstrate the ability to communicate the results of quantitative analysis, both in writing and orally.

Requirements

The certificate in actuarial science requires the completion of 7 courses, totaling 23 credit hours.

These courses are:

FIN 3200	Investments	3
FIN 4240	Financial Futures and Options	3
MATH 2400	Mathematics of Investment and Credit	3
MATH 4410	Life Contingencies I	3
MATH 4420	Life Contingencies II	3
STAT 3410	Introduction to the Theory of Probability and Statistics I	4
STAT 3420	Introduction to the Theory of Probability and Statistics II	4

The seven courses in the list above require 9 prerequisite courses. These courses are: ACCT 2840, ECON 1010, FIN 3010, MATH 1650, MATH 1660, MATH 2650, MATH 2070 or 3170, STAT 2260 (or another introductory statistics course: STAT 1010, 1040, 1050, 2010, 2310, 3050, 3220 or 3300), and STAT 3260 (or STAT 3010).

In order to be admitted to the certificate program, students must complete ACCT 2840, ECON 1010, MATH 1650, MATH 1660, and STAT 2260 (or another introductory statistics course) with a cumulative GPA of at least 2.5.

At least 9 credits used for the certificate cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 3000 or above.

Courses for the certificate cannot be taken on a pass/not-pass basis.

A cumulative GPA of at least 2.0 is required in the seven courses for the certificate.

Business Administration

The Business Administration unit supports graduate and undergraduate programs in the departments of Accounting, Finance, Management and Entrepreneurship, Marketing, Supply Chain Management, and Information Systems and Business Analytics, by providing specialized coursework in orientation to business, professional development, and cooperative education opportunities.

Undergraduate Bachelor of Business Administration (BBA) Degree

For undergraduate curriculum in business, Bachelor of Business Administration.

The Department of Management and Entrepreneurship offers an undergraduate Bachelor of Business Administration (BBA) degree. This degree-completer program is a general business degree that is offered online. The BBA is accessible if you have some prior college experience and is aimed at working professionals with at least 45 college credits.

Students will complete the general education requirements (including business foundation courses), business core requirements for the Bachelor of Business Administration (BBA) degree, and 21 additional credits in the major.

The instructional objective of the BBA degree is to learn the foundation in all areas of business, and then through the required and elective upper-level coursework, build out specialized knowledge in specific areas of business to align with your personal and professional interests and include an emphasis on critical management and leadership skills. By enrolling in the BBA program, you will be able to balance full time employment, or other personal commitments, and the completion of a four-year degree in business.

The major-specific coursework targets the following skills:

- Managing projects
- Negotiating and resolving conflicts
- Managing human resources
- Managing the supply chain
- Managing finances
- Managing a global and diverse workforce
- Managing sales and understanding consumer behavior

For more information on the undergraduate Bachelor of Business Administration, please visit: <https://www.ivybusiness.iastate.edu/degree/bba/>. (<https://www.ivybusiness.iastate.edu/degree/bba/>)

Student Learning Outcomes

Upon graduation, undergraduate students receiving a bachelor's in business administration will:

1. Be effective communicators.
2. Be effective collaborators.
3. Be problem solvers.
4. Understand business concepts.
5. Recognize ethical and legal responsibilities to organizations.

Curriculum:

The department of Management and Entrepreneurship offers a fully online degree-completer program leading to a general business degree. This degree-completer program consists of 21 credits of coursework in the business administration major, including 9 credit hours of required courses, and 12 credit hours of major electives.

The General Education Requirements for the Bachelor of Business Administration degree is different from all other Business majors. There are specific changes in the following areas (including global & international perspectives, humanities, social sciences, and natural sciences) that must be completed in order to receive a bachelor's degree in business administration.

Foundation: (17)

BUSAD 1030	Orientation	1
BUSAD 2030	Professional Development in Business	1
COMS 1130	Introduction to Spreadsheets and Databases	3
MATH 1500	Discrete Mathematics for Business and Social Sciences	3
ECON 1010	Principles of Microeconomics	3
	or ECON 1020 Principles of Macroeconomics	
STAT 2260	Introduction to Business Statistics I *	3
ACCT 2840	Financial Accounting	3

Supporting Courses: (3)

ACCT 2150	Legal Environment of Business	3

Electives: (24-30)

Take additional "free" electives to fulfill the minimum graduation requirement of 120 credits.

Business Core: (27)

ACCT 2850	Managerial Accounting	3
ENTSP 3100	Entrepreneurship and Innovation	3
FIN 3010	Principles of Finance	3
MGMT 3710	Organizational Behavior	3
MGMT 3720	Ethical and Responsible Management	3
MIS 3010	Management Information Systems	3
MKT 3400	Principles of Marketing	3
SCM 3010	Supply Chain Management	3

Must have credit or enrollment in all core courses listed above, except for MGMT 3720, plus senior standing, in order to enroll in:

MGMT 4780	Strategic Management ^	3

BBA Major Courses: (21)

Required Courses (9 credits):

MIS 3400	Project Management	3
MGMT 4220	Negotiation and Conflict Resolution	3
MGMT 4710	Introduction to Human Resource Management	3

Elective Courses (12 credits):

Choose ONE from each pairing		
SCM 4240	Process Management, Analysis, and Improvement	3
or SCM 4610	Principles of Transportation	

ACCT 3830	Intermediate Managerial Accounting	3
or FIN 3300	Financial Markets and Institutions	
or FIN 3710	Real Estate Principles	

MGMT 4140	International Management	3
or MGMT 4720	Diversity, Equity, and Inclusion in Organizations	

MKT 3420	Foundation Of Personal Selling	3
or MKT 4470	Consumer Behavior	

- * Transfer coursework may be a substitute for STAT 2260 Introduction to Business Statistics I, if approved.
- ^ Must have credit or enrollment in all core courses listed above, except for MGMT 3720, plus senior standing, in order to enroll in MGMT 4780.

BBA students cannot double major or earn a double degree in a business area. However, they may work towards a double degree in another college at Iowa State. Online minors outside the Ivy College of Business could be added to the BBA if desired. Consult with an advisor in the Undergraduate Programs Office for assistance in identifying online minor options.

Graduate Programs

The Ivy College of Business offers two professional graduate degree programs in business administration, the Master of Business Administration (MBA) and the professional Master of Business Administration (PMBA), which are described below. The college also has seven specialized master’s degree programs: the Master of Accounting (MAcc), the Master of Business analytics (MBAN), the master of entrepreneurship (MEP), the Master of Finance (MFIN), the master’s in healthcare analytics and operations (MHAO), the Master of Real Estate Development (MRED), and the Master of Science in information systems (MSIS). The college also offers a Ph.D. in business and technology, with specializations in entrepreneurship, finance, information systems, management, marketing, and supply chain management. Finally, the Ivy College of Business is a participating member of the following

interdepartmental programs: Master of Science in cybersecurity, Master of Engineering Management, Master of Science and Ph.D. in human computer interaction, Master of Science in seed technology and business, and Master of Science in transportation.

Master of Business Administration (MBA)

The Ivy College of Business offers a 48-credit program leading to a non-thesis Master of Business Administration degree with a specialization in accounting, accounting analytics, business analytics, entrepreneurship, finance, healthcare analytics and operations, information systems, leadership, marketing, real estate, or supply chain management. The coursework is designed to provide the knowledge, skills, and abilities for managerial success and leadership in organizations. The MBA is the professional management education program for those pursuing careers in business.

Students working toward the MBA are required to complete a series of core courses in the basic functional areas of business (accounting, economics, quantitative analysis, finance, supply chain management, organizational behavior, management information systems, marketing, professional responsibilities, and strategic management), as well as advanced elective coursework. Two courses on professional skills development are also required for full-time MBA students.

Courses for the MBA are provided by the departments of Accounting, Economics, Finance, Management and Entrepreneurship, Marketing, Supply Chain Management, and Information Systems and Business Analytics. Courses from other departments may also be chosen to meet specific student interests.

A concurrent B.S./MBA is available to eligible engineering undergraduate students majoring in aerospace, agricultural, biological systems, chemical, civil, computer, construction, cybersecurity, electrical, industrial, materials science, mechanical, or software engineering. A concurrent B.S./MBA is available to eligible undergraduate students majoring in agricultural systems technology, agronomy, animal science, chemistry, computer science, food science, geology, industrial design, industrial technology, and meteorology.

MBA Graduate Certificates

The Ivy College of Business currently has six graduate certificate programs, including:

- Business Analytics
- Digital Marketplace Analytics
- Enterprise Cybersecurity Management
- Entrepreneurship and Innovation
- Finance
- Supply Chain Management

Most certificates require 12 credits (digital marketplace analytics requires 15 credits) –with approval of the director of graduate education (DOGE), all 12-15 credits may apply towards a future Ivy graduate program.

Certificates may be earned before, after, or concurrently with a master's or doctoral degree. Credit from a previously earned master's or doctoral degree from Iowa State University cannot be applied toward a future Ivy certificate.

For more information on any of the graduate certificates offered, please visit: <https://www.ivybusiness.iastate.edu/degree/zgraduate-certificates/>. (<https://www.ivybusiness.iastate.edu/degree/zgraduate-certificates/>)

Double master's degree programs are offered with accounting (MBA/MAcc), architecture (MBA/MArch), business analytics (MBA/MBAN), community and regional planning (MBA/MCRP), entrepreneurship (MBA/MEP), finance (MBA/MFIN), healthcare analytics and operations (MBA/MHAO), information systems (MBA/MSIS), and real estate development (MBA/MRED). A double degree program (DVM/MBA) is also available to eligible Veterinary Medicine students.

The MBA program is open to all individuals with a baccalaureate degree. Undergraduates from arts and humanities, science, and technical programs are especially encouraged to apply. Academic potential and promise for a productive career in business and for managerial success and leadership in organizations are important criteria for admission. Applicants must submit official transcripts of previous academic work, Graduate Management Admission Test (GMAT) scores or Graduate Record Exam (GRE) scores, personal essays, a resume, and two letters of reference. Students whose native language is not English and who did not graduate from a U.S. college or university are required to submit the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores.

Applicants are considered for fall semester entry only into the full-time MBA. Although applications will be considered after this date, candidates are encouraged to submit their application materials by June 15. Part-time MBA applications are considered for fall, spring, or summer entry.

Student Learning Outcomes

Upon graduation, MBA students will:

1. Demonstrate effective communication skills.
2. Effectively lead and work in diverse teams.
3. Critically solve business problems.
4. Integrate ethical and global perspectives in decision making.

For more information about the MBA program in any of the areas of specialization listed above, please visit: <https://ivybusiness.iastate.edu/degree/mba/>. (<https://ivybusiness.iastate.edu/degree/mba/>)

Professional Master of Business Administration (PMBA)

The Ivy College of Business offers a 42-credit program leading to a non-thesis professional Master of Business Administration degree with a specialization in accounting, accounting analytics, business analytics, entrepreneurship, finance, healthcare analytics and operations, information systems, leadership, marketing, real estate, or supply chain management. PMBA students should note that courses required for the specializations may be delivered online, hybrid or in-person in Ames or Des Moines. The coursework is designed to provide the knowledge, skills, and abilities for managerial success and leadership in organizations. The PMBA is the professional management education program for those pursuing careers in business.

The part-time MBA is designed for employed professionals. Part-time MBA core classes are hybrid or fully-online, offering a combination of online and face-to-face instruction held in the evenings in downtown Des Moines. MBA electives may be delivered online, hybrid or in-person in Ames or Des Moines.

Students working toward the PMBA are required to complete a series of core courses in the basic functional areas of business (accounting, economics, quantitative analysis, finance, supply chain management, organizational behavior, management information systems, marketing, professional responsibilities, and strategic management), as well as advanced elective coursework.

Courses for the PMBA are provided by the departments of Accounting, Economics, Finance, Management and Entrepreneurship, Marketing, Supply Chain Management, and Information Systems and Business Analytics. Courses from other departments may also be chosen to meet specific student interests.

PMBA Graduate Certificates

The Ivy College of Business currently has six graduate certificate programs, including:

- Business Analytics
- Digital Marketplace Analytics
- Enterprise Cybersecurity Management
- Entrepreneurship and Innovation
- Finance
- Supply Chain Management

Most certificates require 12 credits (digital marketplace analytics requires 15 credits) –with approval of the director of graduate education (DOGE), all 12-15 credits may apply towards a future Ivy graduate program.

Certificates may be earned before, after, or concurrently with a master's or doctoral degree. Credit from a previously earned master's or doctoral degree from Iowa State University cannot be applied toward a future Ivy certificate.

For more information on any of the graduate certificates offered, please visit: <https://www.ivybusiness.iastate.edu/degree/zgraduate-certificates/>. (<https://www.ivybusiness.iastate.edu/degree/zgraduate-certificates/>)

Double master's degree programs are offered with accounting (PMBA/MAcc), business analytics (PMBA/MBAN), entrepreneurship (PMBA/MEP), healthcare analytics and operations (PMBA/MHAO), and real estate development (PMBA/MRED). PMBA students should note that courses required in the double degree programs may be delivered online, hybrid or in-person in Ames or Des Moines.

The PMBA program is open to all individuals with a baccalaureate degree. Undergraduates from arts and humanities, science, and technical programs are especially encouraged to apply. Academic potential and promise for a productive career in business and for managerial success and leadership in organizations are important criteria for admission. Applicants must submit official transcripts of previous academic work, personal essays, a resume, and two letters of reference. Students whose native language is not English and who did not graduate from a U.S. college or university are required to submit the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores.

Professional MBA applications are considered for fall, spring, or summer entry.

Student Learning Outcomes

Upon graduation, PMBA students will:

1. Demonstrate effective communication skills.
2. Effectively lead and work in diverse teams.
3. Critically solve business problems.
4. Integrate ethical and global perspectives in decision making.

For more information about the PMBA program in any of the areas of specialization listed above, please visit: <https://www.ivybusiness.iastate.edu/master-programs/>. (<https://www.ivybusiness.iastate.edu/master-programs/>)

Executive Master's in Business Administration (EMBA)

The EMBA program is for professionals in the food, agriculture, and biosystems industry. The curriculum is a 48-credit program leading to a non-thesis Master of Business Administration degree. The customized content is delivered 80% in-person, and 20% online.

Student Learning Outcomes

Upon graduation, executive MBA (EMBA) students will:

1. Be effective leaders.
2. Be effective collaborators.

3. Be critical thinkers in food, agriculture, and biosystems.
4. Recognize ethical and global responsibilities around food, agriculture, and biosystems.

For more information on the EMBA program, please visit:

<http://www.ivybusiness.iastate.edu/degree/emba/>. (<http://www.ivybusiness.iastate.edu/degree/emba/>)

Ph.D. in Business and Technology

The doctoral program at the Ivy College of Business is a full-time, residential program that prepares individuals to conduct and publish scholarly research in top journals. Graduates compete for academic positions at leading research universities in the United States and abroad. There are six specializations: entrepreneurship, finance, management information systems, management, marketing, and supply chain management.

Admission to the program is highly selective, with up to 12 students admitted annually. Applications are evaluated based on academic merit, compatibility of interests, and research ability. A master's degree is not required, but students without a sufficient business background and basic knowledge of statistics will take extra courses.

This 74-credit program requires a minimum of four years to complete. Coursework in the first two years includes seminars in content areas, statistics and research methodology. After passing comprehensive exams, students focus on their dissertation. All work, including the dissertation, must be done in residence (on campus). In addition to coursework, students participate in research seminars, work on research projects with faculty, and attend academic conferences.

The doctoral specialization in entrepreneurship (ENTSP) prepares students to conduct and publish scholarly research in entrepreneurship, including focus on new business ventures, entrepreneurs, innovation, and technology. In addition to curriculum in these core areas, students will also take courses in research methods and the closely related areas of management, including strategy, organizational behavior, and human resources.

The goal of this program is to prepare students to compete for tenure-track positions at leading research universities in the United States and abroad. As a doctoral candidate, students will learn how to conduct impactful research, and they are expected to develop a research pipeline and publish their work in top academic journals before entering the job market.

The finance (FIN) specialization trains students to teach at the university level, to do research that is publishable in top academic journals, and to analyze questions that are important to government agencies and the private sector. Successful students develop close working relationships with the ISU finance faculty, both in the classroom and on co-authored

research. We strive for our students to publish their first research study before finishing the program, and to obtain jobs at universities rated "high" or "very high" in research activity by the Carnegie Foundation. We emphasize rigorous training and hands-on experience. Five semesters of coursework include a firm grounding in economic theory, thorough training in statistics and econometrics, and an immersion in the most important research studies in corporate finance, investments, and financial institutions.

The management information systems (MIS) specialization examines issues related to the development, building, management, and use of information and knowledge-based technologies. Such technologies enable users to collect organizational data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. Students in the IS specialization will study areas such as information technology analysis and development, database and knowledge management systems, decision support and data mining, human computer interaction, system security and integrity, and project management and collaborative teamwork.

The management (MGMT) specialization applies a broad range of theoretical perspectives from the social sciences and diverse research methods to the study of organizational behavior, human resources, strategy, and entrepreneurship. The curriculum takes a multidisciplinary approach to analyze individuals and teams, the formulation and implementation of strategy, the effective use of human resources, social responsibility and ethics, entrepreneurship, innovation and technology, and the challenges of the global business environment. The program emphasizes personalized attention and the development of scholars who can contribute with high-quality theoretical and empirical research in these and related areas.

The marketing (MKT) area focuses on identification and delivery of solutions that help improve the ways in which businesses attract, capture, service and maintain customers. To do these activities well, organizations will need to integrate process goals and activities across different functional areas and across multiple organizational partners. This area of study will examine issues relating to inter-functional and inter-organizational relationships and their management in pursuit of maximizing the lifetime value of a businesses' customer base.

The supply chain management (SCM) specialization focuses on the design, development, and control of business processes for conversion of inputs into outputs and distribution of those outputs. The traditional focus of SCM was on integration of processes across multiple functions within the firm—operations management, logistics, and purchasing primarily, with elements of marketing and information systems included as well. However, in today's world, where competition occurs across

supply chain networks, SCM also involves integrating business processes across firms.

Programs of study for the doctoral study are designed for each student in consultation with the major professor and the student's Ph.D. committee. Each student must complete advanced courses in his/her area of specialization, a minor area that supports the major area, and research methods courses. Students must demonstrate competence in theory and research methods by passing qualifying examinations.

The final application deadline for the Ph.D. program is January 15 for fall admission. Applicants must submit official transcripts of previous coursework and degrees, Graduate Management Admission Test (GMAT) scores or Graduate Record Exam (GRE) scores, personal essays, a resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit TOEFL (Test of English as a Foreign Language) scores.

Student Learning Outcomes

Upon graduation, PhD students will be able to:

1. Understand and advance knowledge.
2. Create knowledge through original research.
3. Teach effectively in an institution of higher education.

For more information about the PhD program in any of the areas of specialization listed above, please visit: <https://ivybusiness.iastate.edu/phd/>.

Graduate Minor in Business Administration

The Ivy College of Business also offers a business administration minor to students with majors outside the college. In order to obtain a graduate minor in business administration at Iowa State University, a student must complete eighteen credit hours of the required core courses for the major in business administration. A student who wishes to minor in business administration must have full admission status in his/her respective graduate program and must be in good academic standing (graduate transcript required).

Required Courses (9 credits):

ACCT 5010	Financial Accounting	3
MGMT 5020	Organizational Behavior	3
MGMT 5030	Professional Responsibility in Business and Society	3

Choose THREE additional courses from the list below (9 credits):

FIN 5010	Financial Valuation and Corporate Financial Decisions	3
MKT 5010	Marketing	3

SCM 5010	Supply Chain Management	3
MIS 5010	Management Information Systems	3

Applications for the graduate minor in business administration are accepted for fall semester entry only.

For more information on the graduate minor in business administration, please visit: <https://ivybusiness.iastate.edu/degree/zgraduate-minors/>.

Business Analytics

We live in a day where we are overwhelmed with data. Today's companies are data-rich and information-poor (DRIP). Business analytics is the transformation of data into insights for better decision making. This transformation is iterative and multi-disciplinary. Business analytics falls at the intersection of technology, statistics, and business.

Students studying business analytics will gain the knowledge and skills necessary to understand and apply quantitative modeling techniques, design cross-functional solutions using standard and advanced business analytics technologies and software, evaluate data mining methods, communicate solutions using data visualizations, develop team and project management skills in a big data context, and effectively communicate analytical findings both orally and in writing.

Undergraduate Major in Business Analytics

For undergraduate curriculum in business, major in Business Analytics.

The Department of Information Systems and Business Analytics offers a major in Business Analytics. Students will complete the general education requirements (including business foundation courses), business core requirements for the Bachelor of Science (B.S.) degree, and 21 additional credits in the major.

The instructional objective of the business analytics major is to prepare students to realize the opportunities presented by data. This includes bringing structure to data, finding compelling patterns in data, communicating the stories buried in data, and advising decision-makers at all levels on the implications for processes and decisions through a data-driven approach.

For more information on the undergraduate major in Business Analytics, please visit: <https://ivybusiness.iastate.edu/degree/business-a/>. (<https://ivybusiness.iastate.edu/degree/business-a/>)

Student Learning Outcomes

Upon graduation, undergraduate students majoring in Business Analytics will:

1. Be effective communicators.
2. Be effective collaborators.
3. Be problem solvers.

4. Understand business concepts.

5. Recognize ethical and legal responsibilities to organizations.

Degree Requirements

In addition to the basic business degree requirements (<https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusinesstext>), Business Analytics majors must also complete:

Required Courses (12 credits):

DS 2010	Introduction to Data Science	3
MIS 3200	Database Management Systems *	3
	or ACCT 3840 Accounting Information Systems and Analytics	
MIS 4360	Introduction to Business Analytics #	3
MIS 4460	Advanced Business Analytics #	3

Elective Courses (9 credits):

Select three courses from the following list:		
ACCT 4840	Advanced Accounting Information Systems	3
FIN 4260X	Quantitative Investment Analysis	3
FIN 4500	Analytical Methods in Finance	3
MGMT 4730	Evidence-Based Decision Making in Human Resource Management	3
MIS 3070	Intermediate Business Programming	3
MIS 3150	Business Data Streams and Issues	3
MIS 3680	Marketing Analytics	3
MIS 4100X	Blockchain and Cryptocurrency	3
MKT 3610	Social Media Marketing Strategy	3
MKT 3670	Consultative Problem Solving	3
MKT 4450	Customer Relationship Management	3
SCM 4300	Supply Chain Analytics	3
SCM 4600	Decision Tools for Logistics and Operations Management	3

* If both MIS 3200 and ACCT 3840 are taken, one will count for 3 elective credits in the major.

STAT 3260 is a prerequisite for these courses.

NOTE: Business Analytics majors must take STAT 3260 Introduction to Business Statistics II as part of the supporting courses.

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Business Analytics, B.S.

Total Credits: 122

@ Courses in these requirements may also be used as Global Perspective.

US Diversity courses may be used to satisfy HUM/SOC SCI.

* Must have credit or enrollment in all core courses listed above, except for MGMT 3720, plus senior standing, in order to enroll in MGMT 4780.

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 3000+ level courses from a four-year institution.
3. 50% of required Business courses must be earned at ISU.
4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).
5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.
6. A grade of C or better in ENGL 2500 required, and also in one other required ENGL course.
7. All 3000-level and higher business credits must be earned at a four-year college.
8. Multiple business **majors** must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your advisor regarding multiple business **degree requirements**.

Undergraduate Minor in Business Analytics

The Department of Information Systems and Business Analytics also offers a minor for non-Business Analytics majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University with a grade of C or higher. The minor must include at least nine credits that are not used to satisfy any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Required Courses (9 credits):

DS 2010	Introduction to Data Science	3
MIS 3200	Database Management Systems [*]	3
	or ACCT 3840 Accounting Information Systems and Analytics	
MIS 4360	Introduction to Business Analytics [#]	3

Elective Courses (6 credits):

Choose at least two 3-credit courses from the list below

ACCT 4840	Advanced Accounting Information Systems	3
FIN 4260X	Quantitative Investment Analysis	3
FIN 4500	Analytical Methods in Finance	3
MGMT 4730	Evidence-Based Decision Making in Human Resource Management	3
MIS 3070	Intermediate Business Programming	3
MIS 3150	Business Data Streams and Issues	3
FIN 4100X	Corporate Financial Planning and Analysis	3
MIS 4460	Advanced Business Analytics #	3
MIS 3680	Marketing Analytics	3
MKT 3610	Social Media Marketing Strategy	3
MKT 3670	Consultative Problem Solving	3
MKT 4450	Customer Relationship Management	3
SCM 4300	Supply Chain Analytics	3
SCM 4600	Decision Tools for Logistics and Operations Management	3

* If both MIS 3200 and ACCT 3840 are taken, one will count for 3 elective credits in the minor.

STAT 3260 is a prerequisite for these courses.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.

For more information on the undergraduate minor in Business Analytics, please visit: <https://ivybusiness.iastate.edu/degree/zminors-and-certificates/>. (<https://ivybusiness.iastate.edu/degree/zminors-and-certificates/>)

Concurrent Degrees

The Department of Information Systems and Business Analytics offers three concurrent degree programs that allow qualified students to be admitted to the following master's programs while completing their undergraduate degree. Students can double count up to 6 credits of coursework between the degrees, allowing them to complete both a bachelor's and a master's degree in as little as five years. The concurrent degree programs offered include:

- B.S. Business Analytics (BUSAN) and Master of Business Analytics (MBAN)
- B.S. Business Analytics (BUSAN) and Master of Science in Information Systems (MSIS)
- B.S. Management Information Systems (MIS) and Master of Business Analytics (MBAN)

For more information on any of the concurrent programs listed above, please visit: <https://www.ivybusiness.iastate.edu/master-programs/>. (<https://www.ivybusiness.iastate.edu/master-programs/>)

Graduate Programs

Master of Business Analytics (MBAN)

The Master of Business analytics (MBAN) is an interdisciplinary program that addresses the challenges of dealing with data analytics and business intelligence in the "Big Data" environment. The goal is to develop managers who will master analytics in ways that lead to increased profits for their company. This blended program offers both online and face-to-face education in a comprehensive approach that draws from Business, Computer Science, Electrical and Computer Engineering, Statistics, and Industrial and Manufacturing Systems Engineering. It provides a foundation in data analytics project management, statistical and predictive modeling, consumer sentiment analysis, knowledge discovery, analytical reporting, segmentation analysis and data visualization. The program requires 30 credits of graduate level courses over a 21-month period. Students start the program with a one-week on-campus initiation class. Students then revisit campus once during the middle and once at the end of the program, while taking online classes during the rest of the time.

Student Learning Outcomes

Upon graduation, Master of Business analytics (MBAN) students will:

1. Be analytics modelers.
2. Be problem solvers in analytics.
3. Be evaluators of analytics.
4. Be critical thinkers in analytics.
5. Be collaborators in big data and analytics.
6. Be effective communicators.

For more information about the Master of Business Analytics program, please visit: <https://ivybusiness.iastate.edu/degree/mban/>. (<https://ivybusiness.iastate.edu/degree/mban/>)

Master's in healthcare Analytics and Operations (MHAO)

Students graduating from the master's in healthcare Analytics and Operations program will apply data and appropriate models to analyze operations and supply chains to develop and present actionable insights leading to better outcomes in the healthcare industry. Healthcare

analytics uses historical and current data to predict trends and optimize operations, bringing benefits to patients, medical professionals, and healthcare supply chain partners.

For more information about the Master of Healthcare Analytics and Operations program, please visit: <https://www.ivybusiness.iastate.edu/degree/master-of-healthcare-analytics-and-operations/>. (<https://www.ivybusiness.iastate.edu/degree/master-of-healthcare-analytics-and-operations/>)

Double Graduate Degrees

The Department of Information Systems and Business Analytics participates in two double degree programs at the graduate level. Students can simultaneously pursue a double degree in Master of Business Administration (MBA) and Master of Business Analytics (MBAN) or the Master of Business Administration (MBA) and Master of Healthcare Analytics and Operations (MHAO). The Double Degree plan allows students to share credits between the degrees. See the Director of Graduate Education for more details on sharing credits.

For more information on either double degree offered, please visit: <https://www.ivybusiness.iastate.edu/master-programs/>. (<https://www.ivybusiness.iastate.edu/master-programs/>)

Master of Business Administration (MBA)

The Department of Information Systems and Business Analytics participates in the full-time and part-time Master of Business Administration (MBA) program. The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students may develop an area of specialization in Business Analytics or Healthcare Analytics and Operations.

Student Learning Outcomes

Upon graduation, MBA students will:

1. Demonstrate effective communication skills.
2. Effectively lead and work in diverse teams.
3. Critically solve business problems.
4. Integrate ethical and global perspectives in decision making.

For more information about the MBA program with a specialization in Business Analytics or Healthcare Analytics and Operations, please visit: <https://ivybusiness.iastate.edu/degree/mba/>. (<https://ivybusiness.iastate.edu/degree/mba/>)

Graduate Certificates

Business Analytics

The graduate certificate in business analytics will address the challenges of dealing with issues of "big data" and its analysis to extract actionable insights, equips business professionals with the basic analytic concepts

and techniques necessary in various areas of business such as marketing, supply chain, operations, forensics, and risk management. Students will have a foundation in data management, business analytics, modeling, and communicating through data visualization.

The certificate is for working professionals as well as students enrolled in graduate programs who are employed or seeking a career as business analysts, analytic systems designers, and data scientists to help improve business performance. The certificate is available online, on campus in Ames and at Capital Square in Des Moines.

For more information about the graduate certificate in business analytics, please visit: <https://ivybusiness.iastate.edu/ba-certificate/>. (<https://ivybusiness.iastate.edu/ba-certificate/>)

Digital Marketplace Analytics

A graduate certificate in digital marketplace analytics is jointly offered by the Ivy College of Business and the College of Human Sciences. The 15-credit certificate, which incorporates coursework from both colleges, provides an innovative program for individuals who want to build their data analytics skills and to apply analytics tools to problem-solving in the fashion, events, and hospitality industries.

For more information about the graduate certificate in digital marketplace analytics, please visit: <https://ivybusiness.iastate.edu/dma-graduate-certificate/>. (<https://www.ivybusiness.iastate.edu/dma-graduate-certificate/>)

Business Economics

The Ivy College of Business has partnered with the Department of Economics to offer a Business Economics major.

Where business studies the organizations and functions that deliver goods and services to customers, economics studies those good and services with respect to production, distribution, and consumption, and the choices we make about how to best utilize the resources we have.

Undergraduate Major in Business Economics

For undergraduate curriculum in business, major in business economics.

Through a partnership between the Ivy College of Business and the Department of Economics, a major in Business Economics is offered. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the Bachelor of Science (B.S.) degree, and 19 additional credits in the major.

The objective of the Business Economics major is to provide a high-quality education with a balanced emphasis in both business and economics. Such an education should equip graduates with a unique set of skills distinguishing them from other graduates. In particular, they will have the ability to use both business and economic reasoning to

think critically and address complex issues using tools and decision-making models of economics, business, mathematics, statistics, as well as concepts from the biological, physical, and social sciences; to make decisions and to communicate effectively.

For more information on the undergraduate major in Business Economics, please visit: <https://www.ivybusiness.iastate.edu/degree/business-economics/>. (<https://www.ivybusiness.iastate.edu/degree/business-economics/>)

Student Learning Outcomes

Upon graduation, undergraduate students majoring in Business Economics will:

1. Be effective communicators.
2. Be effective collaborators.
3. Be problem solvers.
4. Understand business concepts.
5. Recognize ethical and legal responsibilities to organizations.

Curriculum:

In addition to the basic business degree requirements (<https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusinesstext>), business economics majors must also complete:

Required Courses (10 credits):

ECON 3010	Intermediate Microeconomics	4
ECON 3530	Money, Banking, and Financial Institutions	3
ECON 4310	Managerial Economics	3
ECON 4920	Graduating Senior Survey	

Elective Courses (9 credits):

Select one course of ECON 2300-2890, 3000-3890, or 4000-4890	3
Select two additional 4000-4890 level ECON courses	6

NOTES:

Business Economic majors must take STAT 3260 Introduction to Business Statistics II as part of the supporting courses.

Business Economic majors take MATH 1600 and ECON 2070 instead of MATH 1500 and MATH 1510.

Students majoring in business economics are not permitted to take agricultural business or economics as a double major, or economics as a minor.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors

only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

7. All 3000-level and higher business credits must be earned at a four-year college.
8. Multiple business **majors** must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your advisor regarding multiple business **degree requirements**.

Entrepreneurship

Success in entrepreneurship requires a broad base of conceptual knowledge, personal skills, and competencies. By majoring in entrepreneurship, you will sharpen your creative thinking and problem-solving skills, develop your entrepreneurial mindset to start your own business, develop a new product, or become an innovator in an established company. The required courses in the major provide a variety of rich developmental experiences that include applied learning, case analysis, research projects, team-based learning, and guest speakers, in addition to traditional classroom lectures and discussions. The Entrepreneurship major places a strong emphasis on written and oral communication skills, teamwork, creativity, leadership, and personal initiative.

Undergraduate Major in Entrepreneurship

For undergraduate curriculum in business, major in entrepreneurship.

The Department of Management and Entrepreneurship offers a major in Entrepreneurship. Students will complete the general education requirements (including business foundation courses), business core requirements for the Bachelor of Science (B.S.) degree, and 18 additional credits in the major.

The Entrepreneurship major is designed to prepare students for the field of entrepreneurship. Upon graduation, students will be prepared to identify and exploit business opportunities, start their own business, or lead venture-creation and innovative initiatives at established for-profit and non-profit organizations.

The Entrepreneurship Major rests on three pillars:

- **Business Startup and Small Business Management.** The major focuses on starting and managing new and small businesses, including family businesses, which present different challenges that require knowledge of various models of leadership, market research, fundraising, risk management, and other activities with increasingly digital components.
- **Corporate Entrepreneurship, Innovation, and Technology Management.** Today's highly sought-after employees are those with entrepreneurial mind and skill sets that allow them to create, lead, and contribute to innovative projects and initiatives within their organizations. Thus, this major prepares students for leadership positions at established innovative firms.
- **Social Entrepreneurship.** A major emphasis is given to managing non-profit ventures to initiate and support positive social and environmental changes. Entrepreneurship principles and tools have proven their relevance and value for both small and large non-profit ventures and organizations. Thus, this major prepares students who are interested in making a difference by supporting positive social and environmental causes.

The Entrepreneurship Major includes a wide range of opportunities for experiential learning through elective courses and offers a variety of robust extracurricular activities through collaboration with the Pappajohn Center for Entrepreneurship. Entrepreneurship is also an attractive second major for students with interests in any other business field.

Students majoring in Entrepreneurship are not permitted to take Entrepreneurship as a minor.

For more information on the undergraduate major in Entrepreneurship, please visit: <https://ivybusiness.iastate.edu/degree/entrepreneurship/>. (<https://ivybusiness.iastate.edu/degree/entrepreneurship/>)

Student Learning Outcomes

Upon graduation, undergraduate students majoring in Entrepreneurship will:

1. Be effective communicators.
2. Be effective collaborators.
3. Be problem solvers.
4. Understand business concepts.
5. Recognize ethical and legal responsibilities to organizations.

Curriculum:

In addition to the basic business degree requirements (<https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusinesstext>), Entrepreneurship majors are required to complete 18 credit hours of entrepreneurship or management department-approved courses. Included in these 18 credits are four required courses:

Required Courses (12 credits):

ENTSP 3130	Feasibility Analysis for New Ventures	3
ENTSP 3200	Corporate Entrepreneurship	3
ENTSP 4100	Social Entrepreneurship	3
ENTSP 4800	Applied Entrepreneurship: Executing New Ventures	3

Elective Courses (6 credits):

Select two courses from the following list:

ENTSP 3670	International Entrepreneurship	3
ENTSP 3810	Managing Family Businesses	3
ENTSP 4610	Entrepreneurship and Accounting Information	3
ENTSP 4310	New Venture Financing	3
ENTSP 4540	Entrepreneurial Marketing	3
MGMT 4710	Introduction to Human Resource Management	3
MGMT 4720	Diversity, Equity, and Inclusion in Organizations	3
ACCT 3830	Intermediate Managerial Accounting	3
ACCT 4160	Business Law	3
FIN 3100	Corporate Finance	3
FIN 4350	Venture Capital, Private Equity, and Mergers and Acquisitions	3
MIS 3400	Project Management	3
MKT 3420	Foundation Of Personal Selling	3
MKT 3610	Social Media Marketing Strategy	3
MKT 3620	Digital Marketing	3
MKT 3630X	Creative Tools for Digital Marketing	3
MKT 4470	Consumer Behavior	3
SCM 4240	Process Management, Analysis, and Improvement	3
SCM 4660	Global Trade Management	3
SCM 4950	Executive Analysis and Presentations [#]	3
AESHM 4740	Entrepreneurship in Human Sciences	3
AESHM 4760CX	Entrepreneurship Studio: Creating an Online Business	3
DES 2300	Design Thinking [^]	3
DSNS 3400	Design Entrepreneurship	3
ECON 2340	Small Business Management [^]	3
ECON 3340	Entrepreneurship in Agriculture	3

ENGR 4300	Entrepreneurial Product Engineering	3
LDST 3700	Special Topics [*]	3

[^] 42 credits of 3000-level or higher coursework from a four-year institution is required to graduate. Students choosing 2000-level courses toward their major may be required to compensate for this requirement elsewhere in their curriculum.

^{*} Only sections of LDST 3700 with a topic of "Leadership, Entrepreneurship, and Innovation" may count as an elective for the major. Additionally, only 3 credits of LDST 3700 may count towards the entrepreneurship major electives.

[#] Only 3 credits of SCM 4950 may count as an Entrepreneurship major choice elective.

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Entrepreneurship, B.S.

Total Credits: 122[@] Courses in these requirements may also be used as Global Perspective.[^] Students are encouraged to register for sections of ENGL 2500 that have topics focused on entrepreneurship and innovation.

US Diversity courses may be used to satisfy HUM/SOC SCI.

^{*} Must have credit or enrollment in all core courses listed above, except for MGMT 3720, plus senior standing, in order to enroll in MGMT 4780.**Graduation Requirements:**

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 3000+ level courses from a four-year institution.
3. 50% of required Business courses must be earned at ISU.
4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).
5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.
6. A grade of C or better in ENGL 2500 required, and also in one other required ENGL course.
7. All 3000-level and higher business credits must be earned at a four-year college.
8. Multiple business **majors** must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be

shared between business majors; see your advisor regarding multiple business **degree requirements**.

Undergraduate Minor in Entrepreneurship

An Entrepreneurship minor for non-Entrepreneurship majors is also available. This university-wide undergraduate minor in Entrepreneurship is available to all undergraduate students at Iowa State University. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University with a grade of C or higher. The minor must include 9 credits that are not used to meet any other department, college, or university requirement. Students must follow college-specific rules in selecting courses for the minor. The college representatives to the supervisory committee for the minor will be responsible for advising students in their college and will inform students about the details of the college rules. Students with declared majors have priority over students with declared minors in courses with space constraints.

Non-business students with an Entrepreneurship minor are not permitted to major in Entrepreneurship. Business students interested in Entrepreneurship may choose to major in Entrepreneurship (<https://catalog.iastate.edu/collegeofbusiness/entrepreneurship/#undergraduatemajortext>) or pursue the Entrepreneurship minor.

A student seeking a minor in entrepreneurship must successfully complete a minimum of 15 credits in courses approved for use in the entrepreneurship program, including the following:

Required Courses (6 credits):

ENTSP 3100	Entrepreneurship and Innovation	3
ENTSP 3130	Feasibility Analysis for New Ventures	3
	or ENTSP 3200 Corporate Entrepreneurship	
	or ENTSP 4100 Social Entrepreneurship	

ENTSP 3100 Entrepreneurship and Innovation is the introductory course and provides an overview of the entire field.

ENTSP 3130 Feasibility Analysis for New Ventures emphasizes developing an idea for a new venture, conducting a feasibility study, researching the potential market, analyzing the competition, and preparing a formal business plan.

ENTSP 3200 Corporate Entrepreneurship introduces and examines state-of-the-art approaches to product innovation and technology development in today's large and established organizations.

ENTSP 4100 Social Entrepreneurship discusses issues related to the role of social entrepreneurship in helping to solve social problems, including innovation, opportunity recognition, planning and the launch of new non-profit organizations.

Elective Courses (6 credits):

Select TWO entrepreneurship-oriented electives from an approved course list (see below). Students are encouraged to take electives within their major college.

Experiential Learning (3 credits):

Students will engage in the process(es) of entrepreneurship to earn experiential learning credits. Students will either take a course that has been designated as an experiential learning course, or use some other experiential learning activity as the basis to receive credits through an independent study.

Detailed information about the Entrepreneurship minor, the list of approved electives, as well as information about the experiential learning options are available online at: <https://ivybusiness.iastate.edu/entrepreneurship-minor/>. (<https://ivybusiness.iastate.edu/entrepreneurship-minor/>)

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in Entrepreneurship, please visit: <https://catalog.iastate.edu/interdisciplinaryprograms/minor/entrepreneurship/#undergraduateminortext>. (<https://catalog.iastate.edu/interdisciplinaryprograms/minor/entrepreneurship/#undergraduateminortext>)

Graduate Programs

Master of Entrepreneurship (MEP)

The Department of Management and Entrepreneurship offers a Master of Entrepreneurship (MEP) degree intended to convey entrepreneurial expertise that prepares graduates to launch successful startups and international ventures. The MEP is a non-thesis degree offering students the opportunity to develop strong conceptual and practical entrepreneurial skills. With a flexible curriculum covering a broad range of entrepreneurial topics and immersion in practically oriented experiential activities, the 30-credit hour program is built with aspirant entrepreneurs in mind. With both online and in-person course offerings and extensive list of elective and experiential credits to choose from, this program is designed to provide an educational experience tailored to your needs. With a focus on imparting advanced skills related to developing business ideas to start a new venture, taking an existing startup to the next level, and advancing innovation strategies in existing organizations, graduates will be prepared to be successful entrepreneurs in a variety of contexts.

Student Learning Outcomes

Upon graduation, MEP students will be able to:

1. Identify and explore entrepreneurial opportunities.
2. Develop and test business ideas.
3. Identify and secure key stakeholder relationships.
4. Strategically position and launch new ventures.
5. Design and implement strategic plans, processes and systems for innovation.
6. Identify and access resources for launching a startup.

For more information about the MEP program, please visit: <https://www.ivybusiness.iastate.edu/degree/master-of-entrepreneurship/>.

Double Graduate Degree

The Department of Management and Entrepreneurship participates in one double degree program at the graduate level. Students can simultaneously pursue a double degree in Master of Business Administration (MBA) and Master of Entrepreneurship (MEP). The double degree plan allows students to share credits between the degrees. See the Director of Graduate Education for more details on sharing credits.

For more information on the double degree in Master of Business Administration (MBA) and Master of Entrepreneurship (MEP), please visit: <https://www.ivybusiness.iastate.edu/master-programs/>. (<https://www.ivybusiness.iastate.edu/master-programs/>)

The Department of Management and Entrepreneurship participates in the full-time and part-time Master of Business Administration (MBA) and in the Ph.D. in Business and Technology programs.

Master of Business Administration (MBA)

The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 and graduate electives. Within the MBA program, students can obtain a specialization in entrepreneurship.

Student Learning Outcomes

Upon graduation, MBA students will:

1. Demonstrate effective communication skills.
2. Effectively lead and work in diverse teams.
3. Critically solve business problems.
4. Integrate ethical and global perspectives in decision making.

For more information about the MBA program with a specialization in entrepreneurship, please visit: <https://www.ivybusiness.iastate.edu/mba-full-time-details/>. (<https://www.ivybusiness.iastate.edu/mba-full-time-details/>)

Ph.D. in Business and Technology

The doctoral specialization in entrepreneurship (ENTSP) prepares students to conduct and publish scholarly research in entrepreneurship, including focus on new business ventures, entrepreneurs, innovation,

and technology. In addition to curriculum in these core areas, students will also take courses in research methods and the closely related areas of management, including strategy, organizational behavior, and human resources.

The goal of this program is to prepare students to compete for tenure-track positions at leading research universities in the United States and abroad. As a doctoral candidate, students will learn how to conduct impactful research, and they are expected to develop a research pipeline and publish their work in top academic journals before entering the job market.

Student Learning Outcomes

Upon graduation, PhD students will be able to:

1. Understand and advance knowledge.
2. Create knowledge through original research.
3. Teach effectively in an institution of higher education.

For more information about the PhD program with a specialization in Entrepreneurship, please visit: <https://ivybusiness.iastate.edu/degree/phd/phd-entrepreneurship-and-management/>. (<https://ivybusiness.iastate.edu/degree/phd/phd-entrepreneurship-and-management/>)

Graduate Certificate

A graduate certificate in Entrepreneurship and Innovation offers post-undergraduate students the opportunity to learn the basics of starting a business. The certificate requires 4 courses (12 credits). The two required core courses are offered online by the Ivy College of Business. Elective courses are available across campus.

The graduate certificate in Entrepreneurship and Innovation focuses on strategies and resources for launching new ventures and helps students understand the role of innovation in entrepreneurship.

This interdisciplinary certificate provides a solid foundation in entrepreneurship and innovation through required core courses ENTSP 5660 Entrepreneurship and New Venture Startup and ENTSP 5830 Formulating and Implementing Innovation Strategies. At the same time, the program enables students to follow their own interests through electives offered by partners across campus.

For more information about the graduate certificate in Entrepreneurship and Innovation, please visit: <https://ivybusiness.iastate.edu/ei-certificate/>. (<https://ivybusiness.iastate.edu/ei-certificate/>)

Finance

Finance is a broad program of study designed to prepare students to make reasoned and empirically motivated financial decisions. Finance is also an excellent area for those who wish to become more knowledgeable

consumers, particularly in the fields of investments, insurance, and real estate.

The study of finance encompasses corporate financial management, investment management, financial analytics, banking, insurance, and real estate. Upper-level courses include case studies, a student-managed investment portfolio, and opportunities to apply foundational skills from earlier courses into specific real-world investment and corporate settings.

Undergraduate Major in Finance

For undergraduate curriculum in business, major in finance.

The Department of Finance offers a major in finance. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the Bachelor of Science (B.S.) degree, and 21 additional credits in the major.

The instructional objective of the Finance program is to provide a well-rounded professional education in finance. Such an education should provide the student with:

1. A mastery of basic financial concepts and methods of analysis.
2. An understanding of financial operations in a global setting and of the role of financial institutions in the economy.
3. An ability to effectively communicate and work with others as the finance member of a team.
4. An ability to demonstrate leadership capabilities in financial analysis and portfolio management.

For more information on the undergraduate major in Finance, please visit: <https://ivybusiness.iastate.edu/degree/finance/>. (<https://ivybusiness.iastate.edu/degree/finance/>)

Student Learning Outcomes

Upon graduation, undergraduate students majoring in Finance will:

1. Be effective communicators.
2. Be effective collaborators.
3. Be problem solvers.
4. Understand business concepts.
5. Recognize ethical and legal responsibilities to organizations.

Curriculum:

In addition to the basic business degree requirements (<https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusinesstext>), finance majors must also complete:

Required Courses (6 credits):

FIN 3100	Corporate Finance	3
FIN 3200	Investments	3

Elective Courses (15 credits):

Select five courses from the following (at least three must be 4000-level or above): *

FIN 3300	Financial Markets and Institutions	3
FIN 3340X	Introduction to Financial Technologies and Cryptocurrencies	3
FIN 3610	Personal Risk Management and Insurance	3
FIN 3710	Real Estate Principles	3
FIN 4100X	Corporate Financial Planning and Analysis	3
FIN 4150	Business Financing Decisions	3
FIN 4240	Financial Futures and Options	3
FIN 4250	Security Analysis and Portfolio Management	3
FIN 4260X	Quantitative Investment Analysis	3
FIN 4270	Fixed Income Securities	3
FIN 4280	Advanced Fixed Income Analysis and Portfolio Management	3
FIN 4310	New Venture Financing	3
FIN 4350	Venture Capital, Private Equity, and Mergers and Acquisitions	3
FIN 4450	Bank Management Decisions	3
FIN 4500	Analytical Methods in Finance	3
FIN 4550	Risk Modeling	3
FIN 4560	Financial Modeling	3
FIN 4620	Corporate Risk Management and Insurance	3
FIN 4720	Real Estate Finance	3
FIN 4740	Real Estate Investment	3
FIN 4800	International Finance	3
FIN 4910	International Study Course in Global Capital Markets	3
FIN 4920X	Case Studies in Strategic Financial Decision-Making	1

Total Credits: 21

* You may use one of the following accounting courses to count as a 3000-level Finance course elective:

ACCT 3830 Intermediate Managerial Accounting

ACCT 3860 Intermediate Financial Accounting I

OR...

You may use ACSCI 4010 Loss Models I to count as one of the Finance course electives.

NOTE: Finance majors must take STAT 3260 Introduction to Business Statistics II as part of the supporting courses.

NOTE: Students who are completing a double major in Actuarial Science and Finance can take STAT 3410 Introduction to the Theory of Probability and Statistics I in place of STAT 3260 Introduction to Business Statistics II.

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Undergraduate Minor in Finance

The Department of Finance also offers a finance minor for non-finance majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students

with declared majors have priority over students with declared minors in courses with space constraints.

Required Course (3 credits):

FIN 3010	Principles of Finance	3

Elective Courses (12 credits):

Select twelve credit hours from 3000 or 4000 level Finance courses

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in Finance, please visit: <https://ivybusiness.iastate.edu/degree/zminors-and-certificates/>. (<https://ivybusiness.iastate.edu/degree/zminors-and-certificates/>)

Concurrent Programs

The Department of Finance offers one concurrent degree program that allows qualified students to be admitted to the Master of Finance (MFIN) program while completing their undergraduate degree in finance. Students can double count up to 6 credits of coursework between the degrees, allowing them to complete both a B.S. in Finance and a master's degree in as little as five years.

For more information about the concurrent B.S. in Finance and Master of Finance (MFIN) program, please visit: <https://www.ivybusiness.iastate.edu/master-programs/>. (<https://www.ivybusiness.iastate.edu/master-programs/>)

Graduate Programs

Master of Finance (MFIN)

The Finance Department offers a Master of Finance (MFIN) degree. The MFIN is a non-thesis, non-creative component curriculum designed to provide students with in-depth coverage of finance topics and a strong quantitative skill set. Students will learn financial analysis and valuation, advanced regression techniques and programming approaches for data analysis, time series analysis and forecasting, optimization techniques, modelling of financial and risk variables, simulation techniques, and tools for effective risk management. The 30-credit program requires 18 core credits. Another 12 credits of electives are required, six of which must be in finance courses.

Student Learning Outcomes

Upon graduation, Master of Finance (MFIN) students will:

1. Be critical thinkers in finance.
2. Have a broad understanding of financial concepts.

3. Have strong problem solving and decision-making skills.
4. Have a strong background in ethical development.

For more information about the MFIN program, please visit: <https://ivybusiness.iastate.edu/degree/mfin/>. (<https://ivybusiness.iastate.edu/degree/mfin/>)

Master of Real Estate Development (MRED)

The Finance Department also offers a Master of Real Estate Development (MRED) degree. Jointly created with the College of Design, and with significant input and engagement from industry leaders, the MRED is a 30-credit non-thesis, non-creative component program. The MRED program offers academic training, networking opportunities and collaboration with leading academics and practitioners to solve real world problems. Areas of study include real estate market analysis, finance, investments, leadership and negotiation, fundamentals of the build environment, construction science and urban planning. The curriculum is offered in a convenient format of distance learning and brief campus residencies, making it ideal for the full-time working professional.

Student Learning Outcomes

Upon graduation, Master of Real Estate Development (MRED) students will:

1. Be knowledgeable in various aspects of real estate.
2. Be critical thinkers in real estate.
3. Be innovators in real estate.
4. Be leaders in real estate.

For more information about the MRED program, please visit: <https://ivybusiness.iastate.edu/degree/masters-mred/>. (<https://ivybusiness.iastate.edu/degree/masters-mred/>)

Double Graduate Degrees

The Finance Department participates in two double degree programs at the graduate level. Students can simultaneously pursue a double degree in Master of Finance (MFIN) and Master of Real Estate Development (MRED), or in Master of Business Administration (MBA) and Master of Real Estate Development (MRED). The double degree plan allows students to share credits between the degrees. See the Director of Graduate Education for more details on sharing credits.

For more information on the double degree in Master of Finance (MFIN) and Master of Real Estate Development (MRED), please visit: <https://www.ivybusiness.iastate.edu/master-programs/>. (<https://www.ivybusiness.iastate.edu/master-programs/>)

For more information on the double degree in Master of Business Administration (MBA) and Master of Real Estate Development (MRED),

please visit: <https://www.ivybusiness.iastate.edu/master-programs/>. (<https://www.ivybusiness.iastate.edu/master-programs/>)

Master of Business Administration (MBA)

The Department of Finance also participates in the full-time and part-time Master of Business Administration (MBA) program as well as the Ph.D. in Business and Technology program. The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students may develop an area of specialization in Finance or Real Estate.

Student Learning Outcomes

Upon graduation, MBA students will:

1. Demonstrate effective communication skills.
2. Effectively lead and work in diverse teams.
3. Critically solve business problems.
4. Integrate ethical and global perspectives in decision making.

For more information about the MBA program with a specialization in Finance or Real Estate, please visit: <https://ivybusiness.iastate.edu/mba-full-time-details/>. (<https://ivybusiness.iastate.edu/mba-full-time-details/>)

Ph.D. in Business and Technology

The Ph.D. in Business and Technology with a Finance (FIN) specialization is a 56-credit (minimum) curriculum designed to train students to teach at the university level, to do research that is publishable in top academic journals, and to analyze questions that are important to government agencies and the private sector. Successful students develop close working relationships with the ISU finance faculty, both in the classroom and on co-authored research. We strive for our students to publish their first research study before finishing the program, and to obtain jobs at research-oriented universities in the U.S. and abroad. We emphasize rigorous training and hands-on experience. Five semesters of coursework include a firm grounding in economic theory, thorough training in statistics and econometrics, and an immersion in the most important research studies in corporate finance, investments, and financial institutions.

Student Learning Outcomes

Upon graduation, Ph.D. students will be able to:

1. Understand and advance knowledge.
2. Create knowledge through original research.
3. Teach effectively in an institution of higher education.

For more information about the Ph.D. program with a specialization in Finance, please visit: <https://ivybusiness.iastate.edu/phd/phdfinance/>. (<https://ivybusiness.iastate.edu/phd/phdfinance/>)

Graduate Certificate

The graduate certificate in finance provides training in investment valuation and the skills necessary to value an entire company through analysis of expected cash flows based on financial statements, growth characteristics, and risk.

The certificate is for graduate students and recent graduates seeking job opportunities as investors or professional money managers, who deal with efficient asset allocation in a portfolio setting, investment performance measurement, and performance evaluation. The certificate is available on campus in Ames.

For more information about the graduate certificate in Finance, please visit: <https://ivybusiness.iastate.edu/finance-graduate-certificate/>. (<https://ivybusiness.iastate.edu/finance-graduate-certificate/>)

Healthcare Management

Healthcare management is a great fit for students who want to combine their interests in both healthcare and business. The major includes instruction in planning, business management, financial management, healthcare quality management, organizational behavior and leadership, health policy, health law and regulations, and management of health information systems. As a part of the curriculum, students are required to complete an experiential learning component (internship, co-op, or an independent study).

Undergraduate Major in Healthcare Management

For undergraduate curriculum in business, major in healthcare management.

The department of Management and Entrepreneurship offers a major in healthcare management. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the Bachelor of Science (B.S.) degree, and 24 additional credits in the major.

The instructional objective of the Healthcare Management program is to provide a well-rounded professional education in healthcare management. Such an education should provide the student with:

- 1. Foundational knowledge of the healthcare management field:** insurance, current healthcare policy, policy development, economics of health and healthcare, patient safety, quality management, financing, payor mixture, healthcare-specific laws and regulations, and information systems as they relate to healthcare data.
- 2. Comprehensive business skills:** decision-making skills, relationship management skills, data interpretation and analytic skills, managerial professionalism, teamwork and collaboration skills related to various

actors in healthcare (including practitioners), leadership skills, and strategy skills.

- 3. Experiential learning:** hands-on learning in a healthcare setting, application of HCM curriculum to real world experiences.

For more information on the undergraduate major in Healthcare Management, please visit: <https://ivybusiness.iastate.edu/degree/healthcare-management/>. (<https://ivybusiness.iastate.edu/degree/healthcare-management/>)

Student Learning Outcomes

Upon graduation, undergraduate students majoring in Healthcare Management will:

1. Be effective communicators.
2. Be effective collaborators.
3. Be problem solvers.
4. Understand business concepts.
5. Recognize ethical and legal responsibilities to organizations.

Curriculum:

In addition to the basic business degree requirements (<https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusiness>), healthcare management majors must also complete:

Required Courses:

HCM 3010	Introduction to the US Healthcare Industry	3
HCM 3020	Economics for Healthcare Managers	3
HCM 3030	Healthcare Quality Management	3
HCM 4010	Financial Management for Healthcare Organizations	3
HCM 4020	Law and Regulatory Environment in Healthcare	3
HCM 4030	Healthcare Information Systems	3
Experiential Learning (choose one):		
HCM 3910	Internship in Healthcare Management	3
HCM 3980	Cooperative Education *	
HCM 4900	Independent Study in Healthcare Management	3

Elective Courses (choose one or two): *

HCM 4040	Cost-Effectiveness Analysis in Healthcare	3
MGMT 4220	Negotiation and Conflict Resolution	3
MGMT 4710	Introduction to Human Resource Management	3
MGMT 4720	Diversity, Equity, and Inclusion in Organizations	3
ENTSP 4100	Social Entrepreneurship	3
MKT 3510	Services Marketing	3
COMST 4500B	Special Topics in Communication Studies: Health Communication	3

GERON 5630	Environments for the Aging	3
GLOBE 3300	Global Health Disparities	3
HS 3100	Community and Public Health	3
PSYCH 4850	Health Psychology	3

* If HCM 3980 is taken for your experiential learning component, you must choose TWO elective courses from the list to fulfill the requirements for the major.

Total Credits: 24

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

* Must have credit or enrollment in all core courses listed above, except for MGMT 3720, plus senior standing, in order to enroll in MGMT 4780.

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 3000+ level courses from a four-year institution.
3. 50% of required Business courses must be earned at ISU.
4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).
5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.
6. A grade of C or better in ENGL 2500 required, and also in one other required ENGL course.
7. All 3000-level and higher business credits must be earned at a four-year college.
8. Multiple business **majors** must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your advisor regarding multiple business **degree requirements**.

Human Resource Management

The field of human resource management (HRM) is a core contributor to an efficient and effective organization. HRM is focused on ensuring that organizations have employees with the right knowledge, skills, and abilities to achieve their objectives. HR professionals deliver the effective and necessary recruitment, training, development, and performance management processes that are crucial to sustained organizational success. Our HRM major prepares graduates for success

by integrating relevant HR content knowledge and professional skills with a contemporary data-driven perspective that organizations value.

Undergraduate Major in Human Resource Management

For undergraduate curriculum in business, major in human resource management.

The Department of Management and Entrepreneurship offers a major in human resource management. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the Bachelor of Science (B.S.) degree, and 21 additional credits in the major.

The instructional objective of the Human Resource Management program is to provide a well-rounded professional education in human resource management. Such an education should provide the student with:

1. Knowledge and technical expertise in the functional areas of human resource management, including recruiting, selection, training and development, performance management, compensation and benefits, and employment law.
2. Relationship management skills, professionalism and business partnering skills, teamwork and collaboration skills, listening skills, and leadership skills.
3. Critical and analytical thinking, analytical skills, data interpretation and communication skills.

For more information on the undergraduate major in Human Resource Management, please visit: <https://ivybusiness.iastate.edu/degree/human-resource-management/>. (<https://ivybusiness.iastate.edu/degree/human-resource-management/>)

Student Learning Outcomes

Upon graduation, undergraduate students majoring in Human Resource Management will:

1. Be effective communicators.
2. Be effective collaborators.
3. Be problem solvers.
4. Understand business concepts.
5. Recognize ethical and legal responsibilities to organizations.

Curriculum:

In addition to the basic business degree requirements (<https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusiness>), human resource management majors must also complete:

Required Courses (18 credits):

MGMT 4710	Introduction to Human Resource Management	3

MGMT 4720	Diversity, Equity, and Inclusion in Organizations	3
MGMT 4730	Evidence-Based Decision Making in Human Resource Management	3
MGMT 4750	Employment Law for Human Resource Management	3
MGMT 4740	Compensation and Benefits	3
MGMT 4760	Applied Projects in Human Resource Management	3

Elective Courses (3 credits):

MGMT 3200	Corporate Entrepreneurship	3
MGMT 4700	Leadership and Change Management	3
MGMT 4220	Negotiation and Conflict Resolution	3
MIS 4360	Introduction to Business Analytics	3

Total Credits: 21

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Graduate Programs

The Department of Management and Entrepreneurship participates in the Ph.D. in Business and Technology program.

Ph.D. in Business and Technology

The doctoral specialization in management (MGMT) will prepare students to conduct and publish scholarly research in management, including the sub-fields of strategy, organizational behavior, and human resource management. In addition to curriculum in these core areas, students will also take courses in research methods and the closely related area of entrepreneurship.

The goal of this program is to prepare students to compete for tenure-track positions at leading research universities in the United States and abroad. As a doctoral candidate, students will learn how to conduct impactful research, and they are expected to develop a research pipeline and publish their work in top academic journals before entering the job market.

Student Learning Outcomes

Upon graduation, Ph.D. students will be able to:

1. Understand and advance knowledge.
2. Create knowledge through original research.
3. Teach effectively in an institution of higher education.

For more information about the Ph.D. program with a specialization in Management, please visit: <https://www.ivybusiness.iastate.edu/phd/phd-entrepreneurship-and-management/>. (<https://www.ivybusiness.iastate.edu/phd/phd-entrepreneurship-and-management/>)

International Business

International business is a multidisciplinary field dedicated to understanding how to successfully formulate and execute commercial activity that spans national borders. Contemporary issues related to environmental concerns, political instability, and human rights have made international business decisions more complicated for organizations, leading to a global re-evaluation of how business should be conducted internationally. Whether you desire a career working internationally or simply want to understand how the broader business environment affects fundamental organizational decisions for domestic firms, our International Business program provides a broad global perspective to inform your world view and help you develop business acumen through an exploration of how business intersects with politics, economic considerations, and culture.

Undergraduate Secondary Major in International Business

For undergraduate curriculum in business, secondary major in International Business.

Administered by the Department of Management and Entrepreneurship.

The major is designed to provide a strong common foundation in international business with two required international overview courses. In addition, students are encouraged to take additional coursework with relevance to their business and career interests, with business-specific courses spanning numerous functional areas and general cultural classes covering numerous regions of the world. Students also have the opportunity to shape their international exposure via multiple study abroad options or via additional coursework at Iowa State.

For information on the secondary major in International Business, make an appointment (<https://cyclones.campus.eab.com/pal/AG7HsCRKhM/>) through Navigate to see the Ivy College of Business International Programs Coordinator, located in 2139 Gerdin Business Building or email ivyintl@iastate.edu.

For more information on the undergraduate secondary major in International Business, please visit: <https://ivybusiness.iastate.edu/degree/international-business/>. (<https://ivybusiness.iastate.edu/degree/international-business/>)

Student Learning Outcomes

Upon graduation, undergraduate students with a secondary major in international business will:

1. Understand the global business environment and how it connects to their primary major.
2. Be effective communicators in intercultural and international settings.
3. Understand how culture, history, politics, and economics connect to business practices and operations both domestically and internationally.
4. Develop intercultural skills required for success in business.

Secondary Major in International Business

In addition to the basic business degree requirements (<https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusinesstext>), the requirements for the secondary major in International Business are met by successful completion of the following:

International Overview (6 credits)

BUSAD 3010 Introduction to International Business. This course focuses on the principles and practice of international business across functional areas, with an emphasis on comparing the legal, political, economic, and cultural dimensions of domestic and international business.

MGMT 4140 International Management . The nature and economic role of the multinational firm and entrepreneurial ventures, including the impact of legal, political, and cultural variables upon firm performance and managerial activity; case studies illustrate interdependent nature of functional areas of business projected across national boundaries.

Business Focus (6 credits)*

Select two courses from the list below:

ACCT 4960	Accounting in the Global Economy	3
ENTSP 3670	International Entrepreneurship	3
ECON 3550	International Trade and Finance	3
ECON 3850	Economic Development	3
ECON 4550	International Trade	3
ECON 4570	International Finance	3
FIN 4800	International Finance	3
FIN 4910	International Study Course in Global Capital Markets	3
MGMT 4720	Diversity, Equity, and Inclusion in Organizations	3

MKT 4480	Global Marketing	3
MKT 4920	Comparative Marketing	3
SCM 4660	Global Trade Management	3
SCM 4910	International Live Case and Study Tour	3
SCM 4730	War and Peace and Supply Chains	3

* Additional business-focused courses incorporating an international travel component may be able to be applied towards fulfilling this requirement with approval of the Ivy International Programs Coordinator.

Global Engagement, Awareness, and Regional Perspective Requirement

Students can fulfill this portion of the IBUS major by completing **one** of the three options outlined below:

- Option 1:
 - One semester abroad, earning at least 12 credits AND
 - BUSAD 3920X: Contextualizing Your International Experience (3 cr.), taken the semester after returning from abroad[^] AND
 - One course from the approved Global Awareness courses below[§]
- Option 2:
 - One faculty-led study abroad program (may use a course from the Business Focus to meet this) AND
 - One Regional Focus course from the list below with relevance to the chosen study-abroad program AND
 - One course from the approved Global Awareness courses below[§]
- Option 3:
 - Plan of study approved by the Ivy International Programs Coordinator

- Please note, in some instances international travel may not be required to fulfill the IBUS major—see the Ivy International Programs Coordinator for more information.

^ In the event that students complete their semester abroad during their final semester, this class may be taken concurrently.

§ Course(s) may be taken while studying abroad.

Global Awareness (3 credits)

Select 3 credits from the list below:

* Relevant university-level foreign language courses can be used to satisfy a Regional Focus requirement. Please note that sign language courses are not considered an approved foreign language.

Fifteen of the 18 credits required for the International Business secondary major must not be used for the primary major.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Undergraduate Minor in International Business

Students with a major in the Ivy College of Business may earn a minor in International Business by completing 15 credits of approved coursework. The minor requires one course from the approved International Overview courses, two courses from the approved Business Focus courses, and by completing the Faculty-Led Global Awareness track, or the Foreign Language Global Awareness track, or through a plan of study approved by the Ivy International Programs Office. The minor must include at least six credits in courses numbered 3000 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university

requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

International Overview (3 credits)Choose one course from the list below:

BUSAD 3010 Introduction to International Business. This course focuses on the principles and practice of international business across functional areas, with an emphasis on comparing the legal, political, economic, and cultural dimensions of domestic and international business.

MGMT 4140 International Management. The nature and economic role of the multinational firm and entrepreneurial ventures, including the impact of legal, political, and cultural variables upon firm performance and managerial activity; case studies illustrate interdependent nature of functional areas of business projected across national boundaries.

Management

Management is a broadly defined discipline encompassing a diverse set of activities that span all business functions. By ensuring the effective utilization of resources, sound management is critical to organizational success.

Designed around learning critical conceptual, technical, and human skills, the management major is structured to prepare students to be successful organizational leaders. Whether taken as a stand-alone major or as a complement to another technical skill set, this skills-based approach ensures management majors have both the theoretical and practical background to excel in a wide range of organizational settings.

Undergraduate Major in Management

For undergraduate curriculum in business, major in management.

The Department of Management and Entrepreneurship offers a major in management. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the Bachelor of Science (B.S.) degree, and 18 additional credits in the major.

The required courses at the core of the management major build foundational managerial skills with broad applicability (e.g. leadership, conflict mitigation, and strategic-thinking skills). Elective courses provide additional contextual knowledge (e.g. managing in a family or international business) as well as complementary managerial skills (e.g. motivational, analytic, project management and sales skills), allowing students to accentuate their skill set in areas best aligned with their career objectives.

Students will demonstrate awareness for the role of evidence, diversity, ethics and technology in business decision-making and the impact of external forces and global issues on organizations. Students will display the ability to think critically, to communicate effectively and to contribute constructively to effective team performance. Required courses in the major provide a variety of rich developmental experiences that include applied learning, case analysis, research projects, team-based active learning projects, and interaction with guest speakers, in addition to traditional classroom lectures and discussions.

For more information on the undergraduate major in Management, please visit: <https://ivybusiness.iastate.edu/degree/management/>. (<https://ivybusiness.iastate.edu/degree/management/>)

Student Learning Outcomes

Upon graduation, undergraduate students majoring in Management will:

1. Be effective communicators.
2. Be effective collaborators.
3. Be problem solvers.
4. Understand business concepts.
5. Recognize ethical and legal responsibilities to organizations.

Curriculum:

In addition to the basic business degree requirements (<https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusinesstext>) the Management major requires students to take 18 credit hours in the Management area, including 12 credit hours of required core courses and 6 credit hours of electives.

Required Courses (12 credits):

MGMT 3700	Managing Organizations	3
MGMT 4220	Negotiation and Conflict Resolution	3
MGMT 4700	Leadership and Change Management	3
MGMT 4720	Diversity, Equity, and Inclusion in Organizations	3

Elective Courses (6 credits):

Select two courses from the following list:		
MGMT 3200	Corporate Entrepreneurship	3
MGMT 3810	Managing Family Businesses	3

MGMT 4140	International Management	3
MGMT 4210X	Personality and Management	3
MGMT 4710	Introduction to Human Resource Management	3
MGMT 4730	Evidence-Based Decision Making in Human Resource Management	3
MGMT 4810X	Nonprofit Management	3
MIS 3400	Project Management	3
MKT 3420	Foundation Of Personal Selling	3
MKT 3670	Consultative Problem Solving	3

* Course not offered on a regular basis. Students should consult with their academic advisor about terms of offering.

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Management, B.S.

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 3000+ level courses from a four-year institution.
3. 50% of required Business courses must be earned at ISU.
4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).
5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.
6. A grade of C or better in ENGL 2500 required, and also in one other required ENGL course.
7. All 3000-level and higher business credits must be earned at a four-year college.
8. Multiple business **majors** must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your advisor regarding multiple business **degree requirements**.

Undergraduate Minor in Management

The Department of Management and Entrepreneurship also offers a minor for non-Management majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Required Courses (6 credits):

MGMT 3710	Organizational Behavior	3
MGMT 4780	Strategic Management	3

Elective Courses (9 credits):

Select nine credit hours from 3000- or 4000-level Management courses (excluding MGMT 3720).

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in Management, please visit: <https://ivybusiness.iastate.edu/degree/zminors-and-certificates/>. (<https://ivybusiness.iastate.edu/degree/zminors-and-certificates/>)

Graduate Programs

The Department of Management and Entrepreneurship participates in the full-time and part-time Master of Business Administration (MBA) and in the Ph.D. in Business and Technology programs.

Master of Business Administration (MBA)

The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students can obtain a specialization in Leadership.

Student Learning Outcomes

Upon graduation, MBA students will:

- 1. Demonstrate effective communication skills.
- 2. Effectively lead and work in diverse teams.
- 3. Critically solve business problems.
- 4. Integrate ethical and global perspectives in decision making.

For more information about the MBA program with a specialization in Leadership, please visit: <https://ivybusiness.iastate.edu/mba-full-time-details/>. (<https://ivybusiness.iastate.edu/mba-full-time-details/>)

Ph.D. in Business and Technology

The doctoral specialization in management (MGMT) will prepare students to conduct and publish scholarly research in management, including the sub-fields of strategy, organizational behavior, and human resource management. In addition to curriculum in these core areas, students will also take courses in research methods and the closely related area of entrepreneurship.

The goal of this program is to prepare students to compete for tenure-track positions at leading research universities in the United States and abroad. As a doctoral candidate, students will learn how to conduct impactful research, and they are expected to develop a research pipeline and publish their work in top academic journals before entering the job market.

Student Learning Outcomes

Upon graduation, Ph.D. students will be able to:

- 1. Understand and advance knowledge.
- 2. Create knowledge through original research.
- 3. Teach effectively in an institution of higher education.

For more information about the Ph.D. program with a specialization in Management, please visit: <https://ivybusiness.iastate.edu/phd/phd-entrepreneurship-and-management/>. (<https://ivybusiness.iastate.edu/phd/phd-entrepreneurship-and-management/>)

Management Information Systems

Management Information Systems is the analysis and use of information systems and technologies to support problem solving and decision making within and across organizations. Organizations and companies use data, most often in digital form, to conduct nearly every part of their businesses and functions. The program provides students with the core knowledge related to every dimension of information systems and technologies, including the creation and implementation of software and databases, to information security, analytics, and the user interface. The program takes a balanced approach with both technical and managerial coursework.

Undergraduate Major in Management Information Systems

For undergraduate curriculum in business, major in management information systems.

The Department of Information Systems and Business Analytics offers a major in management information systems. Students will complete the general education requirements (including business foundation courses), business core requirements for the Bachelor of Science (B.S.) degree, and 18 additional credits in the major.

The instructional objective of the Management Information Systems major is to prepare students for professional careers with a wide variety of firms and roles, ranging from small start-up firms to large multinational corporations. Common job titles include business analyst and systems analyst. Students are also pursuing careers in Information Technology consulting.

For more information on the undergraduate major in Management Information Systems, please visit: <https://ivybusiness.iastate.edu/degree/management-information-systems/>. (<https://ivybusiness.iastate.edu/degree/management-information-systems/>)

Student Learning Outcomes

Upon graduation, undergraduate students majoring in Management Information Systems will:

1. Be effective communicators.
2. Be effective collaborators.
3. Be problem solvers.
4. Understand business concepts.
5. Recognize ethical and legal responsibilities to organizations.

Curriculum:

In addition to the basic business degree requirements (<https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusinesstext>) the Management Information Systems major requires students to take 18 credit hours in the management information systems area, including 12 credit hours of required core courses and 6 credit hours of electives.

Required Courses (12 credits):

MIS 3070	Intermediate Business Programming	3
MIS 3100	Information Systems Analysis	3
MIS 3200	Database Management Systems	3
MIS 3400	Project Management	3

Elective Courses (6 credits):

Select 6 credits of MIS department courses from the list below:

MIS 3150	Business Data Streams and Issues	3
MIS 3670	Consultative Problem Solving	3
MIS 3680	Marketing Analytics	3
MIS 4030	Healthcare Information Systems	3
MIS 4070	Advanced Business Programming	3
MIS 4100X	Blockchain and Cryptocurrency	3
MIS 4350	Cybersecurity in Business	3
MIS 4360	Introduction to Business Analytics [#]	3
MIS 4400	Supply Chain Information Systems	3
MIS 4450	Enterprise Cybersecurity	3

MIS 4460	Advanced Business Analytics [#]	3
MIS 4470	Information Systems Development	3
MIS 4500	Enterprise Resource Planning Systems in Supply Chain	3
MIS 4950	Executive Presentation and Analysis [*]	3

[#] STAT 3260 is a prerequisite for these courses.

^{*} Only 3 credits of MIS 4950 may count as a Management Information Systems major choice elective.

NOTE: Management Information Systems majors must take MIS 2070 Fundamentals of Programming for Business and Analytics as part of the supporting courses.

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Management Information Systems, B.S.

* Must have credit or enrollment in all core courses listed above, except for MGMT 3720, plus senior standing, in order to enroll in MGMT 4780.

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 3000+ level courses from a four-year institution.
3. 50% of required Business courses must be earned at ISU.
4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).
5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.
6. Grade of C or better in ENGL 2500 required, and also in one other required ENGL course.
7. All 3000-level and higher business credits must be earned at a four-year college.
8. Multiple business **majors** must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your advisor regarding multiple business **degree requirements**.

Undergraduate Minor in Management Information Systems

The Department of Information Systems and Business Analytics also offers a minor for non-Management Information Systems majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Required Course (3 credits):

MIS 3010	Management Information Systems	3

Elective Courses (12 credits):

Select twelve credit hours from 3000 or 4000 level MIS courses ^{*}

* Only 3 credits of MIS 4950 Executive Presentation and Analysis may count as a MIS minor choice elective.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in Management Information Systems, please visit: <https://ivybusiness.iastate.edu/degree/zminors-and-certificates/>. (<https://ivybusiness.iastate.edu/degree/zminors-and-certificates/>)

Concurrent Degrees

The Department of Information Systems and Business Analytics offers four concurrent degree programs that allow qualified students to be admitted to the following master's programs while completing their undergraduate degree. Students can double count up to 6 credits of coursework between the degrees, allowing them to complete both a bachelor's and a master's degree in as little as five years. The concurrent degree programs offered include:

- B.S. Management Information Systems (MIS) and Master of Science in Information Systems (MSIS)
- B.S. Management Information Systems (MIS) and Master of Business Analytics (MBAN)
- B.S. Business Analytics (BUSAN) and Master of Science in Information Systems (MSIS)
- B.S. Software Engineering (S E) and Master of Science in Information Systems (MSIS)

For more information on any of the concurrent programs listed above, please visit: <https://www.ivybusiness.iastate.edu/master-programs/>. (<https://www.ivybusiness.iastate.edu/master-programs/>)

Graduate Programs

The Department of Information Systems and Business Analytics participates in the MS in Information Systems (MSIS), the M.S. in Healthcare Analytics and Operations (MHAO), the full-time and part-time Master of Business Administration (MBA) and the Ph.D. in Business and Technology programs. The department also participates in an interdepartmental MS in Cyber Security as well as in a master's and Ph.D. program in Human Computer Interaction.

Master of Science Information Systems (MSIS)

The MSIS is a 30-credit (minimum) curriculum designed around three interrelated areas – business foundation, IS core, and electives. All students are expected to be familiar with basic computing skills before entering the program. The MSIS program will educate students on applying IS theory and concepts to modern IS development through classes that enable them to learn and use the latest software in application projects. Students graduating from the program will have advanced technical and managerial skills to develop and manage information systems projects.

Student Learning Outcomes

Upon graduation, MSIS students will:

1. Work effectively in teams.
2. Be critical thinkers in the field of information systems.
3. Develop an awareness of the ethical dimensions and consequences of business decisions.
4. Have strong written communication skills.
5. Have strong oral communication skills.

For more information about the MSIS program, please visit: <https://ivybusiness.iastate.edu/degree/msis/>. (<https://ivybusiness.iastate.edu/degree/msis/>)

Masters in Healthcare Analytics and Operations (MHAO)

Students graduating from the Masters in Healthcare Analytics and Operations program will apply data and appropriate models to analyze operations and supply chains to develop and present actionable insights leading to better outcomes in the healthcare industry. Healthcare analytics uses historical and current data to predict trends and optimize operations, bringing benefits to patients, medical professionals, and healthcare supply chain partners.

For more information about the Master of Healthcare Analytics and Operations program, please visit: <https://www.ivybusiness.iastate.edu/degree/master-of-healthcare-analytics-and-operations/>. (<https://www.ivybusiness.iastate.edu/degree/master-of-healthcare-analytics-and-operations/>)

www.ivybusiness.iastate.edu/degree/master-of-healthcare-analytics-and-operations/)

Double Graduate Degree

The Department of Information Systems and Business Analytics participates in one double degree program at the graduate level. Students can simultaneously pursue a double degree in Master of Business Administration (MBA) and Master of Healthcare Analytics and Operations (MHAO). The Double Degree plan allows students to share credits between the degrees. See the Director of Graduate Education for more details on sharing credits.

For more information on the double degree in Master of Business Administration (MBA) and Master of Healthcare Analytics and Operations (MHAO), please visit: <https://www.ivybusiness.iastate.edu/master-programs/>. (<https://www.ivybusiness.iastate.edu/master-programs/>)

Master of Business Administration (MBA)

The MBA program is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core business courses, and the remaining 18 credits are graduate electives. Within the MBA program, students may obtain a specialization in information systems or healthcare analytics and operations.

Student Learning Outcomes

Upon graduation, MBA students will:

1. Demonstrate effective communication skills.
2. Effectively lead and work in diverse teams.
3. Critically solve business problems.
4. Integrate ethical and global perspectives in decision making.

For more information about the MBA program with a specialization in Information Systems or Healthcare Analytics and Operations, please visit: <https://ivybusiness.iastate.edu/degree/mba/>. (<https://ivybusiness.iastate.edu/degree/mba/>)

Ph.D. in Business and Technology

The Ph.D. in Business and Technology is a 56-credit curriculum (minimum) which includes a 12-credit dissertation designed around four interrelated areas—core, specialization, minor, and research methods—and the dissertation. The Management Information Systems (MIS) specialization examines issues related to the development, building, management, and use of information and knowledge-based technologies. Such technologies enable users to collect organizational data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. Students in the MIS specialization will study areas such as information technology analysis and development, database and knowledge management systems, decision support and data mining,

human computer interaction, system security and integrity, and project management and collaborative teamwork.

Student Learning Outcomes

Upon graduation, Ph.D. students will be able to:

1. Understand and advance knowledge.
2. Create knowledge through original research.
3. Teach effectively in an institution of higher education.

For more information about the PhD program with a specialization in MIS, please visit: <https://ivybusiness.iastate.edu/degree/phd/phd-information-systems/>. (<https://ivybusiness.iastate.edu/degree/phd/phd-information-systems/>)

Graduate Certificates

Enterprise Cybersecurity Management

The graduate certificate in enterprise cybersecurity management will equip business professionals with basic concepts and techniques in cybersecurity and the management of information assets, including understanding cyber threat and choosing appropriate protections, enterprise cyber risk management, budgeting for cybersecurity, policies, procedures, human relations issues, and compliance and legal issues present in the modern organization.

The certificate is for working professionals as well as students enrolled in graduate programs. The certificate is available on campus in Ames and at Capital Square in Des Moines.

For more information about the graduate certificate in Enterprise Cybersecurity Management, please visit: <https://ivybusiness.iastate.edu/cybersecurity-grad-certificate/>. (<https://ivybusiness.iastate.edu/cybersecurity-grad-certificate/>)

Business Analytics

The graduate certificate in business analytics will address the challenges of dealing with issues of "big data" and its analysis to extract actionable insights, equips business professionals with the basic analytic concepts and techniques necessary in various areas of business such as marketing, supply chain, operations, forensics, and risk management. Students will have a foundation in data management, business analytics, modeling, and communicating through data visualization.

The certificate is for working professionals as well as students enrolled in graduate programs who are employed or seeking a career as business analysts, analytic systems designers, and data scientists to help improve business performance. The certificate is available online, on campus in Ames and at Capital Square in Des Moines.

For more information about the graduate certificate in business analytics, please visit: <https://ivybusiness.iastate.edu/ba-certificate/>. (<https://ivybusiness.iastate.edu/ba-certificate/>)

Marketing

A major in marketing acquaints students with the managerial decisions and actions that surround the satisfaction of customer needs in the purchase and use of goods and services. Examples of marketing decision areas are product development, pricing, marketing communication, customer relationships, social media, marketing analytics, and personal selling. Completion of the major prepares students for careers such as product manager, marketing analyst, digital marketing specialist, marketing consultant, advertising or promotions manager, marketing researcher, sales representative or manager, social media coordinator, retail management, and special events manager, in the public and private sectors.

Undergraduate Major in Marketing

For undergraduate curriculum in business, major in marketing.

The Department of Marketing offers a major in marketing. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the Bachelor of Science (B.S.) degree, and 18 additional credits in the major.

The instructional objective of the Marketing major is to provide knowledge of the marketing process and an understanding of its functions. Students are expected to develop decision-making skills, computational skills, and communication skills with appreciation for global marketplace and ethical concerns.

For more information on the undergraduate major in Marketing, please visit: <https://ivybusiness.iastate.edu/degree/marketing/>. (<https://ivybusiness.iastate.edu/degree/marketing/>)

Student Learning Outcomes

Upon graduation, undergraduate students majoring in Marketing will:

1. Be effective communicators.
2. Be effective collaborators.
3. Be problem solvers.
4. Understand business concepts.
5. Recognize ethical and legal responsibilities to organizations.

Curriculum:

Required and elective marketing major courses can be combined into two distinct tracks: marketing analytics, and marketing management.

NOTE: If you are interested in sales, the Marketing department offers an undergraduate certificate in Professional Sales. The Professional Sales Certificate has different required Marketing courses, and a host of different electives that are available from departments around campus. For more information on the undergraduate certificate in Professional

Sales, please visit: <https://catalog.iastate.edu/collegeofbusiness/marketing/#undergraduatecertificatetext>. (<https://catalog.iastate.edu/collegeofbusiness/marketing/#undergraduatecertificatetext>)

In addition to the basic business degree requirements (<https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusiness>), marketing majors must also complete the following:

Required Courses (9 credits):

MKT 4440	Fundamentals of Marketing Analytics	3
MKT 3420	Foundation Of Personal Selling [#]	3
MKT 4430	Strategic Marketing Management	3

Elective Courses (9 credits):

Select 9 credits of Marketing department courses, OR select one of the two Marketing elective TRACKS described below.

Optional Digital Marketing and Marketing Analytics Track (9 credits)

Select 9 credits:

MKT 3610	Social Media Marketing Strategy	3
MKT 3620	Digital Marketing	3
MKT 3630X	Creative Tools for Digital Marketing	3
MKT 3680	Marketing Analytics	3
MKT 4450	Customer Relationship Management	3
MKT 4520	Sales Enablement Tools and Technology	3
MKT 4560X	Digital Marketing Analytics	3
MKT 4570X	Digital Marketing Applications in Customer Journey	3

Optional Marketing Management Track (9 credits)

Select 9 credits:

MKT 3510	Services Marketing	3
MKT 3610	Social Media Marketing Strategy	3
MKT 3620	Digital Marketing	3
MKT 3670	Consultative Problem Solving	3
MKT 4100	Promotional Strategy	3
MKT 4420	Sales Management [#]	3
MKT 4470	Consumer Behavior	3
MKT 4480	Global Marketing	3
MKT 4500	Advanced Professional Selling [#]	3
MKT 4510	Omnichannel Marketing	3
MKT 4530	Brand Management	3
MKT 4540	Entrepreneurial Marketing	3
MKT 4550X	Managing for Creativity and Innovation	3
MKT 4580X	New Product Marketing	3
MKT 4840	Technology, Globalization and Culture	3

MKT 4920	Comparative Marketing	3
MKT 4950	Live Cases in Marketing [*]	3

^{*} Only 3 credits of MKT 4950 may count as a Marketing major choice elective.

[#] Required courses for the undergraduate certificate in Professional Sales. See the Undergraduate Certificate tab above for more information.

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Undergraduate Minor in Business and Technology Consulting

The Department of Marketing offers a minor in Business and Technology Consulting, which is available to all undergraduate students at Iowa State University.

Management consulting is a profession that constantly attracts top talents across the world. By working with different clients to solve complex problems every day, consultants have many exclusive opportunities to interact with senior executives, build a broad range of business expertise in different industries, and drive influential decision-making. As a result, many consultants experience faster career progression and end up becoming influential leaders or successful entrepreneurs. To prepare students for this exciting and challenging career, our business and technology consulting minor will guide you through a set of core courses, the majority of which contain significant experiential learning components. This training ensures that students leave the minor ready to become adaptable consultants equipped with robust problem-solving, communication, and leadership skills.

The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or

university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Required Courses (6 credits):

MKT 3670	Consultative Problem Solving	3
MIS 3100	Information Systems Analysis [^]	3
or MKT 3420	Foundation Of Personal Selling	

Required Experiential Learning Course (3 credits):

Choose one of the following courses...

MIS 4950	Executive Presentation and Analysis	3
SCM 4950	Executive Analysis and Presentations	3
MKT 4950	Live Cases in Marketing	3

Elective Courses (6 credits):

Select TWO elective courses from the list below. Students are encouraged to take electives that best align with their chosen course of study or projected career path.

SCM 3400	Project Management	3
SCM 4240	Process Management, Analysis, and Improvement	3
SCM 4400	Supply Chain Information Systems	3
SCM 4500	Enterprise Resource Planning Systems in Supply Chain	3

CPRE 4310	Basics of Information System Security	3

[^] MIS majors should take MIS 4350 instead of MIS 3100 as the required course for the minor.

^{*} STAT 3260 is a prerequisite for this course.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Non-business students may not take more than 9 credits of 3000- or 4000-level business courses.

NOTE: Students must follow college-specific rules in selecting courses. The college representatives will be responsible for advising students in their college and will inform students about the details of the college rules.

For more information on the undergraduate minor in Business and Technology Consulting, please visit: <https://ivybusiness.iastate.edu/degree/zminors-and-certificates/>. (<https://ivybusiness.iastate.edu/degree/zminors-and-certificates/>)

Undergraduate Certificate in Professional Sales

Purpose

The certificate in professional sales is a course of study administered by the Department of Marketing in the Ivy College of Business. It is designed for all undergraduate majors who wish to enhance their degree and employment possibilities by adding expertise in professional selling.

The certificate program will equip students with knowledge and skills related to developing and managing mutually beneficial relationships with customers. The certificate program is built on a strong theoretical background but emphasizes applications and practice. The certificate provides students with an opportunity to learn about the ethical, technological, analytical, and global aspects of professional sales.

Learning Outcomes

After completing the certificate in professional sales, students will be able to:

- Identify and describe the steps in a relational selling process to create value and achieve customer satisfaction,
- Apply the sales technology, skills and knowledge to business problems,
- Enhance oral communication skills and basic business writing skills,
- Build a network and develop professional relationships through corporate participation in the sales program, and
- Enhance career management options by gaining a better understanding of sales as a career option.

Requirements

The certificate in professional sales requires the completion of at least 7 courses, totaling 21 credit hours. At least 12 credits should be taken at Iowa State University.

Required Courses (12 credits):

MKT 3400	Principles of Marketing	3
MKT 3420	Foundation Of Personal Selling	3
MKT 4420	Sales Management	3
MKT 4500	Advanced Professional Selling	3
or MKT 4520	Sales Enablement Tools and Technology	

Elective Courses (9 credits):

Select 9 credits of electives from the following list:

AMD 2750	Retail Merchandising	3
AMD 3770	Visual Presentation and Promotions	3
ACCT 4610	Entrepreneurship and Accounting Information *	3
ADVRT 3360	Advertising Account Management	3
AESHM 2220	Creativity on Demand	3
AESHM 2380	Human Resource Management	3
AESHM 2700F	Supervised Work Experience II: Event Management	1-2

AESHM 2720	Fashion Show Production and Promotion	2-3
AESHM 2870	Principles of Management in Human Sciences	3
AESHM 3400	Hospitality and Apparel Marketing Strategies	3
AESHM 3650	Event, Hospitality, and Retail Risk Management	3
AESHM 4210	Developing Global Leadership: Maximizing Human Potential	3
AESHM 4720	Fashion Show Management	2-3
AESHM 4740	Entrepreneurship in Human Sciences	3
AGEDS 3110	Presentation and Sales Strategies for Agricultural Audiences	3
ARTID 2500	Fundamentals of Interior Design	2
ARTID 2510	Human Factors in Interior Design	3
ARTID 2610	Graphic Communication for Interior Design I	3
ARTID 2630	Graphic Communication for Interior Design II	3
CE 2060	Engineering Economic Analysis and Professional Issues in Civil Engineering	3
COMST 2110	Interpersonal Communication	3
COMST 2140	Professional Communication	3
COMST 2180	Conflict Management	3
COMST 3100	Intercultural Communication	3
COMST 3110	Relational Communication	3
COMST 3130	Leadership Communication Theories	3
COMST 3140	Organizational Communication	3
COMST 3170	Small Group Communication	3
COMST 3190	Communication Training and Development	3
COMST 3250	Nonverbal Communication	3
COMST 3300	Computer Mediated Communication	3
COMST 4500A	Special Topics in Communication Studies: General	3
or COMST 4500C	Special Topics in Communication Studies: Health Communication	
ECON 2350	Introduction to Agricultural Markets	3
ECON 2360	Agricultural Selling	3
ECON 3340	Entrepreneurship in Agriculture	3
ECON 3370	Agricultural Marketing	3
ENGL 3090	Proposal and Report Writing	3
ENGL 3140	Technical Communication	3
ENGL 3320	Visual Communication of Quantitative Information	3
ENTSP 3100	Entrepreneurship and Innovation *	3
ENTSP 3670	International Entrepreneurship *	3
ENTSP 4100	Social Entrepreneurship *	3
ENTSP 4800	Applied Entrepreneurship: Executing New Ventures *	3
ENTSP 4850	Trends in Entrepreneurship *	3

EVENT 1710	Introduction to Event Management	3
EVENT 2770	Digital Promotion in the Service Industry	3
EVENT 3280	Incentive Meeting Management	3
EVENT 3330	Entertainment Venue Management	3
EVENT 3670	Event Sales	3
EVENT 3730	Wedding Planning and Management	3
EVENT 3780	Sustainable Event Management	3
EVENT 3790	Nonprofit Fundraising Event Planning	3
EVENT 3830	Sports Event Management	3
EVENT 4710	Special Events Coordination	3
FIN 3340X	Introduction to Financial Technologies and Cryptocurrencies *	3
FIN 3710	Real Estate Principles *	3
FIN 4720	Real Estate Finance *	3
HCM 3010	Introduction to the US Healthcare Industry *	3
HCM 3020	Economics for Healthcare Managers *	3
HORT 1310	Floral Design	2
HORT 1320	Wedding and Event Floral Design	2
HSPM 1010	Introduction to the Hospitality Industry	3
HSPM 2600	Global Tourism Management	3
HSPM 2800	Non-Alcoholic Beverages and Cafe Operations	3
HSPM 2890	Contemporary Club Management	3
HSPM 3200	Attractions and Amusement Park Administration	3
HSPM 3830	Wine and Spirits in Hospitality Management	2
HSPM 3830L	Wine, Spirits, and Mixology Laboratory in Hospitality Management	2
HSPM 3850	Beer and Brewed Beverages in Hospitality Management	1
HSPM 4370	Hospitality Technology Applications	3
HSPM 4870	Fine Dining Management	3
HSPM 5400	Strategic Marketing	3
IE 3050	Engineering Economic Analysis	3
IE 4300	Entrepreneurial Product Engineering	3
IE 4340X	Entrepreneurial Product Engineering Design Project	arr †
IE 4500	Technical Sales for Engineers	3
INTST 2950	International Experience Abroad	1-8
INTST 3500	Topics in International Studies	2-4

SPCM 3120	Business and Professional Speaking	3
SPCM 3230	Gender and Communication	3
WLC 1190	Introduction to World Languages	3

† Arranged with instructor.

* Business courses listed as electives are available only to business majors. Non-business majors are limited to the 12 credits of required business courses for the certificate.

In addition to the courses listed, independent study/special topics or other courses may count as electives for the certificate. Please contact the director of the Professional Sales Program or the chair of the Marketing Department for prior approval of an elective.

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.

Students need to fulfill the course prerequisites set by the Ivy College of Business.

A minimum of 9 credits used for the certificate may not be used to meet any other department (e.g. MKT 3400 & MKT 3420 cannot count for marketing majors), college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 3000 or above.

A certificate is not awarded until baccalaureate requirements are fulfilled.

Courses taken for the certificate may not be taken on a pass/not-pass basis.

A cumulative grade point average of at least 2.0 is required in courses taken for the certificate.

For more information on the undergraduate certificate in Professional Sales, please visit: <https://ivybusiness.iastate.edu/degree/zminors-and-certificates/>. (<https://ivybusiness.iastate.edu/degree/zminors-and-certificates/>)

Graduate Programs

The Department of Marketing participates in the full-time and part-time Master of Business Administration (MBA) and the Ph.D. in Business and Technology programs.

Master of Business Administration (MBA)

The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students may develop an area of specialization in marketing.

Student Learning Outcomes

Upon graduation, MBA students will:

1. Demonstrate effective communication skills.
2. Effectively lead and work in diverse teams.
3. Critically solve business problems.
4. Integrate ethical and global perspectives in decision making.

For more information about the MBA program with a specialization in Marketing, please visit: <https://ivybusiness.iastate.edu/mba-full-time-details/>. (<https://ivybusiness.iastate.edu/mba-full-time-details/>)

Ph.D. in Business and Technology

The Ph.D. in Business and Technology with a Marketing (MKT) specialization is a 56 credit (minimum) curriculum designed around four interrelated areas (core, specialization, minor, and research methods) and dissertation. The focus of the specialization is on marketing issues relating to strategic decision making, understanding consumer preferences and behaviors, and using data analytics for increasing the performance of the firm.

Student Learning Outcomes

Upon graduation, Ph.D. students will be able to:

1. Understand and advance knowledge.
2. Create knowledge through original research.
3. Teach effectively in an institution of higher education.

For more information about the Ph.D. program with a specialization in Marketing, please visit: <https://ivybusiness.iastate.edu/phd/phd-marketing/>. (<https://ivybusiness.iastate.edu/phd/phd-marketing/>)

Supply Chain Management

Supply chain management is an integrated program of study concerned with the efficient flow of information, materials, and products within and among organizations. Supply chain management involves the integration of business processes across organizations, from material sources and suppliers through manufacturing, and processing to the final customer. The program's balanced approach includes courses in the three core areas of supply chain management: procurement, operations, and logistics. Students will develop knowledge related to a wide variety of supply chain activities, including demand planning, purchasing, transportation management, warehouse management, inventory control, material handling, product and service support, information technology, and strategic supply chain management.

Undergraduate Major in Supply Chain Management

For undergraduate curriculum in business, major in supply chain management.

The Department of Supply Chain Management offers a major in supply chain management. Students will complete the general education requirements (including business foundation courses), business core requirements for the Bachelor of Science (B.S.) degree, and 18 additional credits in the major.

The instructional objective of the supply chain management major is to prepare students for professional careers in logistics analysis, plant management, procurement, warehouse management, sustainable supply chain management, and consulting. The curriculum provides the required theoretical and conceptual base and analytical methods for making sound operational and strategic business decisions related to all activities in a supply chain.

For more information on the undergraduate major in Supply Chain Management, please visit: <https://ivybusiness.iastate.edu/degree/supply-chain-management/>. (<https://ivybusiness.iastate.edu/degree/supply-chain-management/>)

Student Learning Outcomes

Upon graduation, undergraduate students majoring in Supply Chain Management will:

1. Be effective communicators.
2. Be effective collaborators.
3. Be problem solvers.

4. Understand business concepts.
5. Recognize ethical and legal responsibilities to organizations.

Curriculum:

In addition to the basic business degree requirements (<https://catalog.iastate.edu/collegeofbusiness/#curriculuminbusinesstext>),

Supply Chain Management majors must also complete:

Required Courses (15 credits):

SCM 4240	Process Management, Analysis, and Improvement	3
SCM 4530	Supply Chain Planning and Control	3
SCM 4600	Decision Tools for Logistics and Operations Management	3
SCM 4610	Principles of Transportation	3
SCM 4860	Principles of Purchasing and Supply Management	3

Elective Courses (3 credits):

Select one elective from the following list:

SCM 3400	Project Management	3
SCM 4280	Special Topics in Operations Management *	3
SCM 4300	Supply Chain Analytics	3
SCM 4340X	Implementing Process Improvement	3
SCM 4400	Supply Chain Information Systems	3
SCM 4500	Enterprise Resource Planning Systems in Supply Chain	3
SCM 4620	Transportation Carrier Management	3
SCM 4660	Global Trade Management	3
SCM 4710	Sustainable Supply Chain Management *	3
SCM 4730	War and Peace and Supply Chains	3
SCM 4910	International Live Case and Study Tour	3
SCM 4950	Executive Analysis and Presentations #	3

* Courses not offered on a regular basis. Students should consult with their academic advisor about terms of offering.

Only 3 credits of SCM 4950 may count as a Supply Chain Management major choice elective.

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors

only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Supply Chain Management, B.S.

Sample 4-Year Plan (Your plan may differ)

Freshman

Total Credits: 122

@ Courses in these requirements may also be used as Global Perspective.

US Diversity courses may be used to satisfy HUM/SOC SCI.

* Must have credit or enrollment in all core courses listed above, except for MGMT 3720, plus senior standing, in order to enroll in MGMT 4780.

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 3000+ level courses from a four-year institution.
3. 50% of required Business courses must be earned at ISU.
4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).
5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.
6. A grade of C or better in ENGL 2500 required, and also in one other required ENGL course.
7. All 3000-level and higher business credits must be earned at a four-year college.
8. Multiple business **majors** must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your advisor regarding multiple business **degree requirements**.

Undergraduate Minor in Supply Chain Management

The Department of Supply Chain Management also offers a minor for non-Supply Chain Management majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Required Courses (6 credits):

SCM 3010	Supply Chain Management	3
SCM 4860	Principles of Purchasing and Supply Management	3

Elective Courses (9 credits):

Select one elective course from:

SCM 4240	Process Management, Analysis, and Improvement
SCM 4500	Enterprise Resource Planning Systems in Supply Chain
SCM 4530	Supply Chain Planning and Control

Select one elective course from:

SCM 4600	Decision Tools for Logistics and Operations Management

SCM 4610	Principles of Transportation
SCM 4620	Transportation Carrier Management
SCM 4660	Global Trade Management
SCM 4730	War and Peace and Supply Chains

Select one additional elective course from either section above.

Students are limited to three business majors/degrees/minors within the Ivy College of Business. This limit is on business majors/degrees/minors only and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in Supply Chain Management, please visit: <https://ivybusiness.iastate.edu/degree/zminors-and-certificates/>. (<https://ivybusiness.iastate.edu/degree/zminors-and-certificates/>)

Graduate Programs

The Department of Supply Chain Management participates in the full-time and part-time Master of Business Administration (MBA) and in the Ph.D. in Business and Technology programs. The department also participates in the interdepartmental M.S. in Transportation program.

Master of Business Administration (MBA)

The MBA program is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students can obtain a specialization in Supply Chain Management or Healthcare Analytics and Operations.

Student Learning Outcomes

Upon graduation, MBA students will:

1. Demonstrate effective communication skills.
2. Effectively lead and work in diverse teams.
3. Critically solve business problems.
4. Integrate ethical and global perspectives in decision making.

For more information about the MBA program with a specialization in Supply Chain Management or Healthcare Management and Operations, please visit: <https://ivybusiness.iastate.edu/mba-full-time-details/>. (<https://ivybusiness.iastate.edu/mba-full-time-details/>)

Masters in Healthcare Analytics and Operations (MHAO)

Students graduating from the Masters in Healthcare Analytics and Operations program will apply data and appropriate models to analyze operations and supply chains to develop and present actionable insights leading to better outcomes in the healthcare industry. Healthcare analytics uses historical and current data to predict trends and optimize

operations, bringing benefits to patients, medical professionals, and healthcare supply chain partners.

For more information about the Masters in Healthcare Analytics and Operations program, please visit: <https://www.ivybusiness.iastate.edu/degree/master-of-healthcare-analytics-and-operations/>. (<https://www.ivybusiness.iastate.edu/degree/master-of-healthcare-analytics-and-operations/>)

Double Graduate Degree

The Department of Supply Chain Management participates in one double degree program at the graduate level. Students can simultaneously pursue a double degree in Master of Business Administration (MBA) and Master of Healthcare Analytics and Operations (MHAO). The Double Degree plan allows students to share credits between the degrees. See the Director of Graduate Education for more details on sharing credits.

For more information on the double degree in Master of Business Administration (MBA) and Master of Healthcare Analytics and Operations (MHAO), please visit: <https://www.ivybusiness.iastate.edu/master-programs/>. (<https://www.ivybusiness.iastate.edu/master-programs/>)

Ph.D. in Business and Technology

The PhD in Business and Technology is a 56-credit curriculum (minimum) that culminates in a dissertation. Students may select Supply Chain Management (SCM) as their major area of specialization. The primary objective of the SCM specialization is to prepare students for careers in research universities. The SCM domain is broad and includes the design, development and control of business processes for the conversion of inputs into outputs and distribution of those outputs. The traditional focus of SCM was on integration of processes across multiple functions within the firm—operations management, logistics, and purchasing primarily, with elements of marketing and information systems also included. However, in today's world, with competition across supply chain networks, SCM also involves integrating business processes across firms. Research in this area is therefore interdisciplinary in nature and addresses both intra- and inter-organizational issues.

Ph.D. core curriculum	6
Doctoral seminars and research practicum in the area of specialization	14
Minor area (9 cr.) plus electives (3 cr.)	12
Research methods courses	12
Dissertation	12
Total Credits	56

Student Learning Outcomes

Upon graduation, Ph.D. students will be able to:

1. Understand and advance knowledge.
2. Create knowledge through original research.
3. Teach effectively in an institution of higher education.

For more information about the PhD program with a specialization in Supply Chain Management, please visit: <https://ivybusiness.iastate.edu/phd/phd-supply-chain/>. (<https://ivybusiness.iastate.edu/phd/phd-supply-chain/>)

Graduate Certificate

The online graduate certificate in Supply Chain Management will provide foundational concepts and applied technical skills that supply chain professionals need to effectively manage a global supply chain.

The certificate is for working professionals as well as students enrolled in graduate programs who are employed or seeking a career as a business analyst, supply chain analyst, or who want to move into a supply chain position.

For more information about the graduate certificate in Supply Chain Management, please visit: <https://ivybusiness.iastate.edu/scm-certificate/>. (<https://ivybusiness.iastate.edu/scm-certificate/>)

COLLEGE OF DESIGN

Luis Rico-Gutierrez - Dean

Seda McKilligan - Associate Dean for Academic Programs

Kevin Kane - Associate Dean for Research and Outreach

www.design.iastate.edu/ (<http://www.design.iastate.edu/>)

Objectives of the Curricula in Design

The College of Design is among a small number of comprehensive design schools offering outstanding opportunities for both disciplinary and interdisciplinary education.

The College of Design strives to provide each student with a broad educational background and preparation in a specific design or art discipline. Each program is designed to develop knowledge and appreciation of the physical and cultural environment, to stimulate creative thinking and analysis, and to prepare students for participation in a wide variety of careers.

The college's programs also encompass many opportunities for individualized study and extracurricular activities such as visiting lectures and symposia, workshops, gallery exhibits, practicum and internship programs, field trips, and international study programs.

Graduates of the college are employed in private firms, government, industry, and education, or are self-employed as designers or artists. Opportunities for graduates include careers as architects, landscape architects, community and regional planners, graphic designers, industrial designers, interior designers, studio artists, arts administrators and environmental designers.

Organization of Curricula

All undergraduate programs in the College of Design share a common foundation curriculum, the Core Design Program, followed by degree-specific curricula. The Core Design Program grounds the undergraduate degree programs and provides a rich, rigorous, inclusive base for the college's professional and non-professional programs. It creates a shared language, experience, and community for programs, faculty, and students and exposes students to all design disciplines, allowing them to make more informed degree choices, apply to multiple degree programs, and experiment with interdisciplinary work.

The intense, discipline-specific professional curricula that follow the Core Design Program focus on developing students' ability and knowledge in their major. Within the major area, students advance creative and professional skills through classroom and studio work, critiques of student projects, discussion with professional practitioners, and field studies.

General education, contained in both the Core Design Program and the degree programs, is composed to ensure that students receive a well-rounded undergraduate education.

High School Preparation

Courses in fine arts and design that develop visualization and freehand drawing abilities are highly recommended, though not required for entrance. Students planning to enroll in an academic program in the College of Design must complete the following high school requirements:

- 4 years of English, including coursework in composition and literature and up to 1 year of speech and/or journalism, to develop communication skills and critical reading/writing ability.
- 3 years of mathematics to develop problem-solving skills, including 1 year each of algebra, geometry, and advanced algebra.
- 3 years of science, including at least two of the following:
 - 1 year of biology, 1 year of chemistry, or 1 year of physics
- 2 years of social studies, including at least 1 year of U.S. history and 1 semester of U.S. government

Admission Standards to Enrollment-Managed Professional Programs

Admission into the enrollment-managed professional programs of Architecture, Graphic Design, Industrial Design, Integrated Studio Arts, Interior Design, and Landscape Architecture requires a separate application after completing the Core Design Program.

Students may apply directly to the professional program in Community and Regional Planning and to the programs in Art and Design and Interdisciplinary Design. Transfer students from two-year institutions also may apply to these three programs.

Advising

Each student receives personal assistance from an academic advisor within the student's curriculum area. Students enrolled in the college's Core Design Program are advised by professional advisors. Once admitted to professional programs, students are assigned to faculty advisors within the student's curriculum area. Advisors help students develop a program of study and access pertinent university resources and provide information on career choice.

The college's career services office works with students to develop their career goals as well as prepare and search for employment.

Honors Program

The College of Design participates in the Honors Program, which provides opportunities for outstanding students to individualize their programs of study. Honors students in the College of Design will work with the Honors Program chair or Honors academic advisor to choose from academic and co-curricular experiences that offer breadth and depth in their learning, as well as opportunities for personal, community, and professional development.

See Honors Program.

Departments of the College

- Architecture
- Art and Visual Culture
- Community and Regional Planning
- Graphic Design
- Industrial Design
- Interior Design
- Landscape Architecture

Requirements in the College of Design

All students in the College of Design are expected to meet the following requirements.

Core Design Program

Cr. Fall/Spring

DSNS 1020	Design Studio I	4
DSNS 1150	Design Collaborative Seminar *	1
DSNS 1310	Drawing I	4
DSNS 1830	Design in Context	3
Social Science/Humanities Electives **		6
Math/Science Electives ***		6
Communications		7

- * Students enrolled in the Design Exchange Learning Community take DSNS 1100 in place of DSNS 1150.
- **General education credits in the Core Design Program may count toward the minimum credits.
- ***Students who intend to apply to the Architecture program are strongly advised to take MATH 1450 Applied Trigonometry and PHYS 1310 General Physics I, PHYS 1310L General Physics I Laboratory during their Core year. While these specific courses are not required to apply to the program, they are required to advance in the B.Arch. program beyond the first semester.
- Students who intend to apply to the Industrial Design program are advised to take PHYS 1010 Physics for the Nonscientist Physics for the Nonscientist, ECON 1010 Principles of Microeconomics Principles of Microeconomics, and a math course during their Core year.

General Education
International Perspective: 3 cr.
U.S. Diversity: 3 cr.
Communications: 7 cr.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3

LIB 1600	Introduction to College Level Research	1
Total Credits		7

According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 1500 and 2500 (or ENGL 2500H).

Mathematics, physical sciences, and biological sciences 6 cr.
Includes courses in the fields of agronomy, astronomy and astrophysics, biology, chemistry, civil engineering, computer science, geology, mathematics, physics, and statistics.

Humanities: 6 cr.
Includes courses in the fields of classical studies, English (literature), foreign languages, history, philosophy, religious studies, as well as history/theory/literature courses in dance, music, theater, journalism, African American studies, American Indian studies, environmental studies, Latino/a studies, women's studies, and university studies.

Social Sciences: 6 cr.
Includes courses in the fields of African American studies, American Indian studies, anthropology, economics, environmental studies, geography, human development and family studies, Latino/a studies, psychology and sociology, women's studies, and university studies.

General Education Electives: 9 cr.
9 cr. from any of the above areas, 6 cr. of course level 3000-4000.

Undergraduate Programs
Majors

- Art and Design
- Architecture
- Community and Regional Planning
- Graphic Design
- Industrial Design
- Integrated Studio Arts
- Interior Design
- Landscape Architecture
- Biological/Pre-Medical Illustration (BPM I)*

*The College of Design participates in this interdepartmental major.

Secondary Majors

- Environmental Studies**
- Interdisciplinary Design
- International Studies**

Minors

- Critical Studies in Design
- Design Studies
- Digital Media
- Entrepreneurial Studies**
- Environmental Studies**
- Geographic Information Science**
- Gerontology**
- Illustration
- International Studies**
- Preservation and Cultural Heritage
- Sustainability**
- Textile Design**
- Urban Studies**

**The College of Design participates in these interdepartmental secondary majors and minors.

Minors in Design

The College of Design offers or participates in the following undergraduate minors:

- Critical Studies in Design
- Design Studies
- Digital Media
- Entrepreneurship
- Geographic Information Science (GISC)
- Illustration
- Preservation and Cultural Heritage
- Textile Design
- Urban Studies

Critical Studies in Design

The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture and the built environment. In lectures and focused seminars, students explore:

- Historical and contemporary issues
- Cultural production
- Media and technology
- Design in everyday life
- Models of professional practice

Open to undergraduates in all university majors, this minor requires 15 credits of coursework. At least 6 of the 15 credits must be taken at Iowa State University in courses numbered 3000 or above. At least 9 of the

15 credits must not be used to meet any other department, college or university requirements except the credit requirement for graduation.

Requirements:

ARTH 2920	Introduction to Visual Culture Studies	3
DSNS 1830	Design in Context	3
or ARCH 2200	Contemporary Architecture	
or ARCH 2210	Histories and Theories of Architecture to 1750	
or ARTH 2800	History of Art I	
or ARTH 2810	History of Art II	
or CRP 2910	World Cities and Globalization	
or CRP 2930	Environmental Planning	
9 credits from approved list (at least 6 credits at 3000-level or above)		9
Total Credits		15

Design Studies

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for interdisciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

This minor requires 15 credits of course work: three (3) credits selected from College of Design history/theory course offerings (DSNS 1830 will not meet this requirement) and additional 12 credits selected from any College of Design course offerings*.

At least 6 of the 15 credits must be taken at Iowa State University in courses numbered 3000 or above. At least 9 of the 15 credits must not be used to meet any other department, college or university requirements except the credit requirement for graduation.

Students enrolled in the College of Design may not use courses required in their major degree programs or in the Core Design Program to satisfy this minor.

* The following courses **cannot** be used to meet the requirements for the Design Studies Minor: DSNS 1100, 1110, 1150, 3010, 3730, 3970, 4920.

Digital Media

Manipulation of digital media has emerged as an essential skill for design inquiry alongside traditional methods of building models and drawing sketches. To familiarize students with the use of digital media in the design process, the College of Design offers an undergraduate Minor in Digital Media. This minor is open to all undergraduate students at Iowa State University.

This minor requires 15 credits of coursework. At least three (3) credits of fundamental courses at the 2000 level must be taken in the student's primary major (see list below). At least 9 of the 15 credits must be taken

at Iowa State University in courses numbered 3000 or above and may not be used to meet any other department, college, or university requirement.

Fundamental Courses:

ARCH 2300	Design Communications I (for Architecture majors)	3
ARTGR 2750	Graphic Technology I (prereq: ARTGR 2700; for Graphic Design majors)	3
ARTGR 2760	Graphic Technology II (for Graphic Design majors)	3
ARTID 2630	Graphic Communication for Interior Design II (prereq: ARTID 2610; for Interior Design majors)	3
ARTIS 2120	Studio Fundamentals: Digital Media (for Integrated Studio Arts and all majors)	3
ARTIS 2270	Introduction to Creative Digital Photography (for Integrated Studio Arts majors)	3
CRP 2510	Fundamentals of Geographic Information Systems (for non-design majors)	3
DSNS 2320	Digital Design Communications (for non-design majors)	3
LA 2110	Digital Design Methods for Landscape Architecture (for Landscape Architecture and all majors)	3

Entrepreneurial Studies

The College of Design is an active participant in the Entrepreneurial Studies Minor for undergraduate students.

Geographic Information Science (GISC)

The undergraduate minor in Geographic Information Science (GISC) is an interdisciplinary program that provides students with opportunities to engage the theory, processes, techniques and tools that use spatial data and computational technology to create cutting-edge analysis and mapping approaches for a wide range of fields, such as urban planning, architecture, landscape architecture, design, community development, agriculture, environmental sciences, natural resources, sociology, criminology, anthropology, political science, environmental studies and others.

The minor is open to undergraduates in all university majors with a minimum overall GPA of 2.0 prior to enrolling.

Students must complete a minimum of 15 undergraduate credits of GIS coursework to receive the minor. At least 6 of the 15 credits must be taken at Iowa State University in courses numbered 3000 or above with a grade of C or higher. At least 9 of the 15 credits must not be used to meet any other department, college or university requirements except the credit requirement for graduation.

Requirements:

Foundations of GIS - complete the following 2 courses: 6

CRP 2510	Fundamentals of Geographic Information Systems	
CRP 3510	Intermediate Geographic Information Systems	

GIS Tools and Techniques - choose 3 courses from the following: 9

ABE 4370	Watershed Modeling and Policy	
CRP 4490	Geodesign: Planning for Sustainable Futures	
CRP 4520	Geographic Data Management and Planning Analysis	
CRP 4540	Fundamentals of Remote Sensing and Spatial Analysis	3
CRP 4560	GIS Programming and Automation	
CRP 4570	Geogames for Civic Engagement	
GEOL 4520	Intro GIS for Geoscientists	
GEOL 4680	Applied Geostatistics for Geoscientists	
GEOL 4880	Raster GIS for Geoscientists	
NREM 3450	Natural Resource Photogrammetry and Geographic Information Systems	
NREM 4460	Integrating GPS and GIS for Natural Resource Management	

Total Credits 18

Illustration

The undergraduate minor in Illustration is ideal for students interested in illustration for books, graphic novels, magazine articles, advertising and concept art for game design and film. This minor provides the ability to tailor a curriculum that serves these varied career interests, whether you want to work in the industry or freelance as an independent studio practitioner.

Through this minor, students will:

- Develop conceptual skills directed toward communicating narrative content in sequential visual form.
- Demonstrate the ability for critical thinking through visual, verbal and written communication.
- Develop technical skills, working with a range of both traditional and digital media used in the field of illustration.
- Develop an awareness of historical and contemporary illustration.
- Strengthen individual portfolios to position themselves for success in their chosen field after graduation.

Requirements:

Students must complete two prerequisites prior to pursuing the Illustration minor.

Prerequisites:

DSNS 1310	Drawing I	4
ARTIS 2300	Drawing II	3

After completion of the prerequisites, students must complete a minimum of 15 credits of Illustration coursework to receive the minor. At

least 9 of the 15 credits must not be used to meet any other department, college or university requirements except the credit requirement for graduation.

Required Courses:	6
ARTIS 3300	Drawing III: Life Drawing
ARTIS 4320	Sequential Narrative Drawing
Elective Courses:	9
ARTGR 4640	Digital Imaging
ARTH 4890	History of Comics
ARTIS 2330	Watercolor Painting
ARTIS 3080	Computer Modeling, Rendering and Virtual Photography
ARTIS 3380	Painting II
ARTIS 3560	Relief Printmaking: Digital/Traditional
ARTIS 3570	Intaglio and Monotype Printmaking: Digital / Traditional
ARTIS 3580	Lithography: Digital / Traditional
ARTIS 4080	Principles of 3D Animation
ARTIS 4300	Drawing IV
ARTIS 4380	Painting III
ARTIS 4900F	Independent Study: Illustration
BPMI 3230	Scientific Illustration Principles and Techniques or ARTIS 3230Scientific Illustration Principles and Techniques
BPMI 3260	Illustration and Illustration Software or ARTIS 3260Illustration and Illustration Software
BPMI 3270	Illustration as Communication or ARTIS 3270Illustration as Communication
BPMI 3370	Application of Scientific Illustration Techniques or ARTIS 3370Application of Scientific Illustration Techniques

Preservation and Cultural Heritage

The undergraduate minor in Preservation and Cultural Heritage provides students with knowledge, skills, and credentials that complement undergraduate degrees in a wide variety of majors, but especially Architecture, Interior Design, Community & Regional Planning, Landscape Architecture, and History. To these ends, the Minor has two major curricular objectives:

- Provide student with a holistic understanding of historic preservation that draws from the various departments involved, yet allows for the development of expertise within a student’s specific major.
- Provide a curriculum that conforms with the National Council for Preservation Education’s pedagogical guidelines and the Federal

government’s Professional Qualification Standards for historic preservation under 36 Code of Federal Regulations (CFR) Part 61.

The minor requires a minimum of 15 credit hours. At least six (6) credits need to be taken at the 3000 or above (see list below), and at least 9 of the 15 credits must not be used to meet any other department, college or university requirement except the credit requirement for graduation.

For more information go to <https://www.preservation.design.iastate.edu/pch-undergraduate-minor/>
For any questions, please send an email to historicplaces@iastate.edu

Preservation & Cultural Heritage Minor Curriculum:

The Minor requirements are divided into three sections (see below). Please choose six (6) credits from **Section 1 (Preservation Courses)**, three (3) credits from **Section 2 (General History)**, and six (6) credits from **Section 3 (History and Design of the Built Environment)**.

Section 1: Preservation Courses (choose two of the following)		6
ARCH 5670	Preservation, Restoration, Rehabilitation, Cultural Heritage, and Technology	
ARCH 5680	Historic Preservation	
ARTID 5720	Preservation & Cultural Heritage	3
CRP 5110	Documenting the Historic Built Environment	
Section 2: General History (choose one of the following)		3
ARTH 3830	Greek and Roman Art	
ARTH 3840	Art of Islam	
ARTH 3850	Renaissance Art	
ARTH 3860	American Art to 1945	
HIST 3070	American Popular Culture	
HIST 3200	History of Modern Europe, 1789 to Present	
HIST 3620	Global Environmental History	
HIST 3630	U. S. Environmental History	3
HIST 3860	History of Women in America	
HIST 4880	American Stuff, Colonial Times to the Present	
Section 3: History, Design, and Planning of the Built Environment (choose two courses or one studio)		6
One of the two courses can be an independent study course that students can take with faculty teaching courses in the Minor in Preservation & Cultural Heritage Program		
ARCH 2210	Histories and Theories of Architecture to 1750	
ARCH 3220	Histories and Theories of Architecture after 1750	
ARTH 2800	History of Art I	
ARTH 2810	History of Art II	
ARTH 5970	Green Art: Earthworks and Beyond	
ARTID 3550	Interior Design History/Theory/Criticism I	
ARTID 3560	Interior Design History/Theory/Criticism II	

CRP 4210	Financing Historic Preservation Projects
CRP 5210	Historic Preservation Planning: Theory and Practice
DSNS 5460	Interdisciplinary Design Studio
INDD 3800	History and Culture of Objects
LA 3710	History of Modern Landscapes, 1750 to Present
LA 3730	Gardens and Landscapes from Antiquity to 1750

Textile Design

The undergraduate minor in Textile Design allows students to focus specifically on the design and creation of textiles - a practice with applications in the fine arts, fashion and related fields. Open to undergraduates at the sophomore level and above enrolled in any College of Design major or in the Apparel, Merchandising and Design major in the College of Human Sciences.

Through this minor, students will:

- Learn historical and contemporary applications of textile production.
- Develop conceptual skills in textile media and techniques such as printing, dyeing and weaving for self-expression.
- Develop technical skills in both hand skills and digital tools.
- Demonstrate the ability for critical thinking through visual, verbal and written communications with an emphasis on what it means to be an artist/designer using textile media and techniques.
- Strengthen individual portfolios to position themselves for success in their chosen field after graduation.

Students must complete 16-18 credits of Textile Design coursework to receive the minor. At least 9 of the 15 credits must not be used to meet any other department, college or university requirements except the credit requirement for graduation.

Requirements:

Required Core	6
AMD 2040	Textile Science
ARTIS 2140	Studio Fundamentals: Textiles
History/Theory (choose one of the following)	3
AMD 3620	Global Dress in the Fashion System and Society
ARTH 2800	History of Art I
ARTH 2810	History of Art II
ARTH 2920	Introduction to Visual Culture Studies
Practice (choose two of the following)	6
AMD 1210	Apparel Assembly Processes
AMD 3280T	Apparel, Merchandising, and Design Seminar: Fashion Trend Forecasting
or AMD 3280Y	Apparel, Merchandising, and Design Seminar: Styling

AMD 4900	Independent Study
ARTIS 2080	Color
ARTIS 3450	Introduction to Weaving
ARTIS 3460	Natural Dyes
ARTIS 3470	Dyed and Printed Textiles
ARTIS 4480	Digital Textile Design
Electives (choose from the following)	3-5
AMD 3540	Euro-American Dress History: Prehistoric to Mid-19th Century
AMD 3560	Euro-American Dress History: Mid-19th Century to the Present
ARTIS 2060	Studio Fundamentals: Printmaking
ARTIS 2130	Studio Fundamentals: Painting
ARTIS 3100	Sources and Methods of Visual Art
ARTH 3820	Art and Architecture of Asia
ARTH 3840	Art of Islam
DSNS 1310	Drawing I

Urban Studies

The undergraduate minor in Urban Studies is an interdisciplinary program that emphasizes urban life in a variety of settings and from different disciplinary and methodological approaches. The Urban Studies minor will allow students to explore varied and multiple dimensions of urban and community life through differing conceptual and analytical frameworks. Students can pursue interests in:

- Urban history
- Urban design
- Neighborhood revitalization
- Economic development
- Social movements
- Global urbanization

The minor is open to undergraduates in all university majors except Community & Regional Planning.

This minor requires 15 credit hours of coursework. At least 6 of the 15 credits must be taken at Iowa State University in courses numbered 3000 or above. At least 9 of the 15 credits must not be used to meet any other department, college or university requirements except the credit requirement for graduation.

Requirements:

CRP 2010	The North American Metropolis	3
CRP 2910	World Cities and Globalization	3
Nine (9) credits in three other courses from the approved list **		9
Total Credits		15

** Approved list of elective courses for Urban Studies Minor (<https://www.design.iastate.edu/programs-minors/minors/urban-studies/>)

Graduate Programs

The College of Design offers graduate study in the areas shown below. Graduate study is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Majors

- Architecture
- Community and Regional Planning
- Graphic Design
- Industrial Design
- Integrated Visual Arts
- Interior Design
- Landscape Architecture
- Sustainable Environments*
- Transportation*
- Urban Design*

Double Degree Programs

- Architecture / Business Administration
- Architecture / Community and Regional Planning
- Architecture / Sustainable Environments
- Architecture / Urban Design
- Community and Regional Planning / Business Administration
- Community and Regional Planning / Landscape Architecture
- Community and Regional Planning / Sustainable Agriculture
- Community and Regional Planning / Sustainable Environments
- Community and Regional Planning / Urban Design
- Industrial Design / Human Computer Interaction (HCI)
- Integrated Visual Arts / Sustainable Environments
- Landscape Architecture / Sustainable Environments
- Landscape Architecture / Urban Design

Certificates

- Geographic Information Systems (GIS)
- Gerontology*
- Preservation and Cultural Heritage

* The College of Design participates in this interdepartmental graduate program.

Architecture OVERVIEW

<http://www.design.iastate.edu/architecture> (<https://www.design.iastate.edu/architecture/>)

The Department of Architecture is committed to the study of architecture as a cultural discipline in which issues of practice, of the multiplicity of social formations in which buildings exist, and of environmental effects are integrated with building design through construction, space, material, form and use. Architecture arises from the aspirations that diverse individuals and groups have for their physical environment, and from the social enterprise of designing and fabricating the landscape we inhabit. It involves individual and multiple buildings, the spaces within them, and the exterior landscape.

The undergraduate program in architecture is an accredited 165-credit five-year undergraduate professional program, including the 31-credit Core Design Program, leading to the Bachelor of Architecture degree (B. Arch). The program provides opportunities for general education as well as preparation for professional practice and/or graduate study. An optional one-semester foreign study program is offered to fourth-year students. Other study abroad opportunities are also available for short-term and semester-long duration.

The undergraduate curriculum includes one year of the college's Core Design Program followed by a four-year professional program. Admission to the professional degree program is based on the applicant's performance in the completed pre-professional curriculum; previous high school record (or transfer record where applicable); portfolio and essay evaluations; and on available departmental resources. Information on admission criteria is posted each year on the College of Design website.

Students completing their bachelor's degree may opt to include a wide range of minor option as part of their course of study. A number of minors related to design, including digital media, critical studies, urban studies, and sustainability, can be integrated within their regular course of study; for details, please refer to the College of Design website.

For students entering the professional program after completion of the Core Design Program, the department requires purchase on their own or through the college of a laptop/notebook computer and appropriate software. Information is provided to students about computer requirements at the time of acceptance to the program.

The department offers two graduate degrees in architecture: a 90-credit graduate professional program leading to the Master of Architecture (M.Arch.) and a 30-credit interdisciplinary graduate program leading to the Master of Science in Architecture (M.S. Arch.). Both degrees offer options for interdisciplinary study within the College of Design and across related fields within the university. Double-degree programs are offered

with a number of other graduate programs of study within the college. Financial support in the form of teaching and research assistantships is available competitively.

Students who complete their Bachelor of Architecture Degree at Iowa State University may have 6 approved credit hours of their undergraduate study applied towards their Graduate Standing, permitting them to complete the M.S.Arch with 24 additional credit hours of study. In addition to graduate studies in Architecture, Bachelor of Architecture students may opt to pursue a one-year program of master's studies from other departments or programs in the College and the University. For complete current graduate program descriptions (many of which can apply 6 transfer credits from undergrad study), please see the College website undergraduate programs.

Student Learning Outcomes

Our program prepares students for careers in architecture and related disciplines, emphasizing a diverse and holistic approach whereby graduates obtain:

- Rigorous, research-driven, and creative design skills.
- A broad, inclusive, and nuanced appreciation for the historic and theoretical frameworks that inform practice today.
- An array of graphic, computational and presentation skills needed to both design and convey design intent.
- An understanding of contemporary technical and performance criteria used to model, analyze, and construct projects, so as to responsibly evaluate the technical and environmental impact of design decisions; and
- A grounding in the critical, aesthetic, and ethical role of the profession and its relationship to public health, safety, well-being, and environmental stewardship.

Program Accreditation

Iowa State University Department of Architecture offers programs accredited by the National Architectural Accrediting Board, which requires the inclusion of the following statement:

"In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year term, an eight-year term with conditions, or a two-year term of continuing accreditation, or a three-year term of initial accreditation, depending on the extent of its conformance with established education standards.

Doctor of Architecture and Master of Architecture degree programs may require a nonaccredited undergraduate degree in architecture for admission. However, the non-accredited degree is not, by itself, recognized as an accredited degree."

Iowa State University Department of Architecture offers the following NAAB-accredited degree programs:

- Bachelor of Architecture (165 cr.)
- Master of Architecture (90 cr.; prerequisite: undergraduate degree in a discipline other than architecture or a four-year pre-professional degree in architecture)

Degree Requirements

Total B. Arch. Requirement: 165 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications: 7 cr.

(C or better grade in ENGL 1500 and ENGL 2500)

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
LIB 1600	Introduction to College Level Research	1
Total Credits		7

Humanities: 6 cr.

6 cr. from approved list.

Social Sciences: 6 cr.

6 cr. from approved list.

Math and Physical Sciences: 8 cr.

MATH 1450	Applied Trigonometry	3
PHYS 1310	General Physics I	4
PHYS 1310L	General Physics I Laboratory	1
Total Credits		8

Design Core 13 cr.

DSNS 1020	Design Studio I	4
DSNS 1150	Design Collaborative Seminar	1
or DSNS 1100	Design Exchange Seminar I	
DSNS 1310	Drawing I	4
DSNS 1320	Digital Design Literacy	1
DSNS 1830	Design in Context	3
Total Credits		13

Design Communications: 6 cr.

ARCH 2300	Design Communications I	3
ARCH 2310	Advanced Design Representation	3

Total Credits 6

Design: 48 cr.

ARCH 2010	Architectural Design I	6
ARCH 2020	Architectural Design II	6
ARCH 3010	Architectural Design III	6
ARCH 3020	Architectural Design IV	6
ARCH 4010	Architectural Design V	6
ARCH 4020	Architectural Design VI	6
ARCH 4030	Architectural Design VII	6
DSNS 5460	Interdisciplinary Design Studio	6

Total Credits 48

Building Technologies: 21 cr.

ARCH 3450	Building Science and Technology I	2
ARCH 3450L	Building Science and Technology I Lab	1
ARCH 3460	Building Science and Technology II	3
ARCH 3460L	Building Science and Technology II Lab	2
ARCH 3470	Building Science and Technology III	3
ARCH 3470L	Building Science and Technology III Lab	2
ARCH 3480	Building Science and Technology IV	3
ARCH 3480L	Building Science and Technology IV Lab	2
ARCH 4450	Building Science and Technology V	2
ARCH 4450L	Building Science and Technology V Lab	1

Total Credits 21

Studies in History, Theory, and Culture: 18 cr.

ARCH 2200	Contemporary Architecture	3
ARCH 2210	Histories and Theories of Architecture to 1750	3
ARCH 3220	Histories and Theories of Architecture after 1750	3
Nine credits from approved HTC Option list.		9

Total Credits 18

Behavioral Studies/Practice: 6 cr.

ARCH 3710	Human Behavior and Environmental Theory	3
ARCH 4820	Professional Practice	3

Total Credits 6

Professional Options: 9 cr.

6 cr. 3000-5000 level Arch; 3 cr. from ARCH, ART, ARTH, ARTID, ARTGR, ARTIS, CRP, DES, DSNS, or LA, SUSE, or URBD.

Electives: 17 cr.

2 cr. KIN or ATH allowed; 4 cr. AFAS, MS, or NS allowed; 9 cr. ARCH allowed (no P/NP).

Architecture, B.Arch.

Admission into the Bachelor of Architecture Program requires the completion of the Core Design Program. Admission depends upon available resources; admission criteria are posted on the College of Design website. Transfer students are considered on a case-by-case basis.

Graduate Programs

Master of Architecture (M.Arch.)

Our 90-credit M.Arch. is an accredited professional degree in architecture designed for students with undergraduate degrees in disciplines other than architecture as well as for students who hold a four-year pre-professional degree in architecture. Applicants holding B.S. or B.A. degrees in Architecture or other affiliated design fields may be given advanced standing in the M.Arch. program.

The M.Arch. program engages with architecture as a form of knowledge, practice and production situated in relation to contemporary concerns and issues. Students gain the knowledge, skills and experience with which to professionally practice architecture, while also developing a critical awareness of the discipline's wider social, political, economic, environmental and cultural implications.

M.Arch. is accredited by the National Architectural Accreditation Board (NAAB) and leads to a professional Master of Architecture degree over three years. The curriculum commences with an intensive sequence of classes that establish the foundations for the study and practice of architecture. Equal emphasis is placed on each of the three study areas: studios in architectural design and media, laboratories and lectures on science and technology, and lectures and seminars on history and theory. Building on these foundations, students are supported in developing their own particular interests and agendas as they progress through the subsequent two years of study. This is facilitated through options in

studying abroad, undertaking specialized studio options both within and outside of the department, and opportunities for independent study.

In addition to architecture, students previously admitted to the full three-year program have held undergraduate degrees in a broad range of fields, including art history, history, literature, interior design, economics, mathematics, computer science, anthropology, medicine and philosophy. This diverse range of previous study and experience is brought to bear on the study of architecture, collectively enriching the range and depth of our program.

While students with undergraduate degrees in other disciplines, must complete the full three years of the curriculum, students with undergraduate degrees in architecture or other related design fields may, on consideration, be given advanced standing in the program. Advanced standing students may waive up to the whole first year.

Master of Architecture (M.Arch.)

Studio Courses: 36 cr.

ARCH 5050	Architectural Design and Media I: Mapping, Programming, Building	6
ARCH 5060	Architectural Design and Media II: Materiality and Representation	6
ARCH 6010	Sustainable Building Design	6
ARCH 6020	Communities, Architecture and the Environment	6
ARCH 6030	Integrative Design	6
ARCH 6040	Design Studio Options	6

Technology and Practice: 18 cr.

ARCH 5430	Building Science and Technology I	6
ARCH 5440	Building Science and Technology II	3
ARCH 5820	Professional Practice	3
ARCH 6410	Building Science and Technology III	3
ARCH 6420	Building Science and Technology IV	3

History and Theory: 12 cr.

ARCH 5950	Seminar on the Built Environment I: History	3
ARCH 5960	Seminar on the Built Environment II: Landscape and Society	3
ARCH 5970	Seminar on the Built Environment III: Theory	3
ARCH 5980	Seminar on the Built Environment IV: Topical Study	3

Electives: 24 cr.

Total Credits: 90

Master of Science in Architecture (M.S.)

M.S. in Arch. is a 30-credit research degree with a required graduate thesis. As a research degree, this program is not subject to NAAB accreditation.

M.S. in Arch. is open for applicants who hold a professional degree in architecture or other related design fields. Applicants are required to submit a research proposal that lies within one of the study areas listed on the program's webpage. The degree is also open for applicants with non-professional degrees in various fields depending on the research proposed by the applicant.

Master of Science In Architecture (M.S.)

History and Theory: 6 cr. (Choose two seminars from this list)

ARCH 5950	Seminar on the Built Environment I: History	3
ARCH 5960	Seminar on the Built Environment II: Landscape and Society	3
ARCH 5970	Seminar on the Built Environment III: Theory	3
ARCH 5980	Seminar on the Built Environment IV: Topical Study	3

Thesis: 9 cr.

ARCH 6990	Research	9

Area of Study: 9 cr.

Electives: 6 cr.

Total Credits: 30

Dual degree

Double degree programs are offered with a number of graduate programs in other college departments. Information about our programs and how to apply can be obtained from the department's web page at: <https://www.design.iastate.edu/architecture/>. (<https://www.design.iastate.edu/architecture/>)

Financial support in the form of teaching and research assistantships is available.

Art and Design

The Department of Art and Visual Culture offers degree programs focused on fine arts and visual culture, offering courses in studio arts, art history, and art education, and scientific illustration. Degree offerings include the Bachelor of Arts (B.A.) in Art and Design, Bachelor of Fine Arts (BFA) in Integrated Studio Arts, and Master of Fine Arts (MFA) in Integrated Visual Arts.

The Bachelor of Arts in Art and Design is a four-year degree program with two options: *Art and Culture* or *Visual Culture Studies*. Both options require students to complement their studio art or visual culture studies coursework with study in a second area, within or outside of the College of Design. This can include a second major or minor, or an alternative program of study approved by the student's academic advisor.

Flexibility is a key feature of the B.A. in Art and Design. Many students, working with an advisor, design a course of study that allows them to pursue the B.A. degree in conjunction with a second major or minor

such as journalism, advertising, business, entrepreneurship, history, or psychology.

The B.A. in Art and Design can serve as a springboard into a wide array of exciting graduate school and career opportunities, including art criticism, art history, art sales, conservation, corporate art collections, gallery/museum studies, and art therapy.

Art and Culture Option (Fine Arts + another area of interest)

In the Art and Culture option, students combine coursework in studio art with another area of interest. Working with an advisor, students design their own programs of study, which may include another major or minor in addition to the concentration emphasizing studio art.

Visual Culture Studies Option (Art History + another area of interest)

The Visual Culture Studies option is for students seeking a concentrated course of study in art and design history, theory, and criticism. For students interested in museum studies, courses may include up to nine (9) credits of museum or gallery internship. Working with an advisor, students design their own programs of study, which may include another major or minor in addition to the concentration in visual culture studies. Required courses include six (6) history courses at the 3000/4000 level.

Student Learning Outcomes

Students will learn to:

- Develop creative problem-solving abilities and traditional and innovative technical skills through the design, research, and creative processes;
- Understand and express in multiple media the relationship between objects, aesthetics, and meaning;
- Exhibit an awareness of their roles as artists and thinkers regarding the ethical, cultural, and ecological impacts of what they do;
- Express through visual, verbal, and written means an awareness of global art movements and a meaningful understanding of historic and contemporary art; and
- Use their understanding and practice of art to engage with local, national, and global communities where they can participate in broad exchange of ideas.

This curriculum offers two concentrations: *Art and Culture* and *Visual Culture Studies*. Both concentrations are combined with an approved program of study, which may consist of a second major or a minor.

Art and Culture Concentration

The curriculum in Art and Design: Art and Culture Concentration leads to a 122-123 credit undergraduate Bachelor of Arts degree.

Total Degree Requirements: 122-123 credits

Only 65 credits from a two-year institution can apply and may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

Community and Regional Planning Overview

www.design.iastate.edu/community-and-regional-planning (<http://www.design.iastate.edu/communityplanning/>)

Community and regional planning are a field of study aimed at understanding the ever-changing socioeconomic and physical environments of our communities and planning for their future. Planners evaluate and seize opportunities to solve problems. Planners work at multiple levels of government, as well as the private sector, and they are concerned with issues that affect every corner of the world: the preservation and enhancement of the quality of life in a community, the protection of the environment, the promotion of equitable economic opportunities; and the management of growth and change of all kinds.

Graduates of the Community and Regional Planning department are able to integrate planning knowledge and skills in a variety of practical applications and can communicate effectively in written and oral form. Graduates will be qualified for a variety of entry-level positions in the public, private, and not-for-profit sectors. They will also be well prepared for graduate study in a variety of fields, including urban planning, law, public policy, public health, environmental science, geography, sociology, urban design, historic preservation, data science, and architecture.

Graduates of the Community and Regional Planning department are expected to understand the structure and functions of urban settlements, including the history of planning and urban development and the processes for plan and policy making. Graduates should have skills in problem formulation, quantitative analysis, written/oral and graphic communications, and collaboration, and in synthesizing and applying knowledge to practice. Graduates are expected to be able to assess the

Student Learning Outcomes

We educate students to be *critical thinkers and engaged global citizens who have the ability to contribute to a better world*. Graduates of the Community and Regional Planning program at Iowa State University will be skilled in understanding and articulating community problems and issues and be able to apply planning knowledge in a diverse and democratic setting, to the standards of conduct outlined by the American Institute of Certified Planners.

Graduates of the program will:

- Demonstrate essential knowledge of the purpose and history of planning;
- Demonstrate knowledge of planning ethics, equity and social justice and be capable of making sound ethical judgments;
- Demonstrate knowledge of planning law and local government institutions regarding how plans and policies are developed and implemented;
- Be knowledgeable about the planning process; understand how social, cultural and economic forces influence land use changes; be able to develop alternative scenarios for the future; and have experience applying these ideas through active learning and real life experiences;
- Have a working knowledge of both qualitative and quantitative methods and demonstrate their ability to apply these methods in order to analyze a planning problem or situation;
- Engage communities, identify a range of tools that can be applied to different situations, and demonstrate their ability to expand participation, ensure inclusion, and give voice to diverse stakeholders;
- Demonstrate professional written, oral and visual communication skills within a variety of educational and community settings;
- Be knowledgeable about the natural environment and understand the factors that create sustainable and resilient communities;
- Be knowledgeable about diverse ideas, cultures and societies; and

- Have a basic knowledge about global issues that affect planning, urbanization, and societies.

Degree Requirements

The Department of Community and Regional Planning administers the 128-credit-hour undergraduate program leading to the Bachelor of Science. Students have the opportunity to work with their faculty advisors to define their own areas of interest, which may include a minor.

The B.S. in Community and Regional Planning program can be completed in two to four years. Students can declare a major in CRP at any time during their enrollment at Iowa State University. If applying by transfer from another program or institution, admission is based on the student's cumulative GPA and a departmental review of course work. Transfer applications from students in programs in anthropology, sociology, political science, history, geography, engineering, and other related disciplines are encouraged. Community and Regional Planning emphasizes responsibility and citizenship, writing and analytical ability, and critical thinking.

Total Degree Requirement: 128 credits

Only 65 credits from a two-year institution may apply which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA; completion of all requirements listed below.

Undergraduate Minors

The Department of Community and Regional Planning offers 15-credit minors in Urban Studies and Geographic Information Science (GISC).

Urban Studies

The Urban Studies minor is earned by completing both CRP 2010 (The North American Metropolis) and CRP 2910 (World Cities and Globalization), plus 9 additional credit hours from the approved list of courses. At least 6 credit hours must be in courses numbered 3000 or above at Iowa State. The College of Design requires students to earn a C or higher in at least 6 of the required 3000-level credits. The minor must include at least nine credits that are not used to meet any other department, college or university requirement except the credit requirement for graduation. The Urban Studies minor is open to students from any college and any major.

Introduction to Urban Studies: 6 credits

CRP 2010	The North American Metropolis	3
CRP 2910	World Cities and Globalization	3

Advanced Urban Studies: 9 credits

ARCH 2210	Histories and Theories of Architecture to 1750	3
ARCH 3210	History of the American City	3
ARCH 4200	Topics in American Architecture	3
ARCH 4290	Topics in Italian Architecture	3
ARCH 5750	Contemporary Urban Design Theory	3
CE 4510	Urban Transportation Planning Models	3
CLST 2750	The Ancient City	3
CRP 2510	Fundamentals of Geographic Information Systems	3
CRP 2930	Environmental Planning	3
CRP 3010	Urban Analytical Methods	4
CRP 3200	Urban Geography	3
CRP 3250	Introduction to Housing	3
CRP 3510	Intermediate Geographic Information Systems	3
CRP 3760	Rural, Urban and Regional Economics	3
or ECON 3760	Rural, Urban and Regional Economics	

CRP 3830	Theory of the Planning Process	3	CRP 4520	Geographic Data Management and Planning Analysis	3
CRP 4170	Urban Revitalization	3	CRP 4540	Fundamentals of Remote Sensing and Spatial Analysis	3

URBD 5220	Contemporary Urban Design Practices	3			

Geographic Information Science

The Geographic Information Science (GISCI) minor is earned by taking CRP 2510 and CRP 3510, plus 9 additional credits from the approved list of courses. At least 6 credit hours must be in courses numbered 3000 or above at Iowa State. The College of Design requires students to earn a C or higher in at least 6 of the required 3000-level credits. The minor must include at least 9 credits that are not used in any other department, college or university requirement except the credit requirement for graduation. The GIS minor is open to students in any college and any major.

Foundations of GIS: 6 credits

CRP 2510: Introduction to Geographic Information Systems	3
CRP 3510: Intermediate Geographic Information Systems	3

GIS Tools and Techniques: 9 credits

ABE 4370	Watershed Modeling and Policy	3
CRP 4490	Geodesign: Planning for Sustainable Futures	3
or CRP 5490	Geodesign: Planning for Sustainable Futures	

Graduate Programs

The Department of Community and Regional Planning (CRP) offers three different graduate degree options for individuals interested in engaging with communities and helping to shape their future: a Master of Community and Regional Planning (MCRP), an interdisciplinary Master of Science with an emphasis in Community Development (CDEV), and a Master of Real Estate Development (MRED).

Master of Community and Regional Planning

The primary focus of the MCRP degree is to prepare students with the education and practical skills to be leaders in the practice of planning. The program of graduate study is accredited by the Planning Accreditation Board of the American Institute of Certified Planners. The program is STEM-designated.

Degree requirements include completion of a 2-year, 48-credit program, including a required core (24 credits), electives (18-21 credits), and a capstone component consisting of either a comprehensive exam (CRP 5980X Comprehensive Exam Preparation, 3 credits) or thesis (CRP 6990 Research, 6 credits). The required core consists of CRP 5320, 5610, 5630, 5640, 5660, 5680 and 5920. Students select electives in consultation with their Program of Study Committee (POSC). Students are encouraged to complete an internship in a planning office during their course of study.

CRP 5320	Community Planning Studio	6
CRP 5610	Planning Theory	3
CRP 5630	Planning the American Metropolis	3
CRP 5640	Introduction to Analytical Methods for Planning	3
CRP 5660	Policy Analysis and Planning	3

CRP 5680	Planning and Development	3
CRP 5920	Land Use and Development Regulation Law	3

Admission to the MCRP program is by application to the department and to the Graduate College. Students with a bachelor's degree in planning or students who have taken highly relevant coursework may be able to waive up to 9 credits of course requirements. Students must petition the department's Director of Graduate Education (DOGE) in writing prior to the first day class of the student's first semester in the program to have credits waived. No foreign language is required for the degree Master of Community and Regional Planning.

Double Degree Programs

Double degree programs are offered with architecture (MCRP/MArch), business administration (MCRP/MBA), landscape architecture (MCRP/MLA) and sustainable agriculture (MCRP/MS). Information about our programs and how to apply can be obtained from the department's web page at: www.design.iastate.edu/community-and-regional-planning or send an email to crp@iastate.edu.

Master of Science in Community Development

The Master of Community Development (MCD) program is an online degree designed to educate students to become community developers and civic leaders who could bring about positive community change. Graduates of the Community Development program at Iowa State University will be skilled in understanding and articulating community problems, issues, and opportunities. Students will have the knowledge and skills to plan and facilitate community action. The MCD degree is designed for working professionals and nontraditional students through online learning. Degree requirements included completion of a 2-year, 30-credit program including a required core (15 credits) and electives (15 credits). The required core includes a capstone 3-credit practicum (COMDV 5300) and COMDV 5020, COMDV 5030, COMDV 5040, and COMDV 5050.

COMDV 5020	Theories and Constructs of Community Change	3
COMDV 5030	Community Development Methods	3
COMDV 5040	Creating Community Change	3
COMDV 5050	Analysis of the Community Economy	3
COMDV 5300	Community Development Practicum	3

Admission to the MCD program is through the Department of Community and Regional Planning and the Graduate College. A bachelor's degree from an accredited institution of higher education is required. Up to nine credits of course requirements may be waived with relevant coursework. Students may petition the program's Director of Graduate Education (DOGE) in writing prior to the first day of class in the student's first semester in the program to have credits waived. Further information on the MCD program can be found on the department's web site at: <https://www.design.iastate.edu/community-and-regional-planning/degrees/master-of-community-development/>.

www.design.iastate.edu/community-and-regional-planning/degrees/master-of-community-development/. (<https://www.design.iastate.edu/community-and-regional-planning/degrees/master-of-community-development/>)

Master of Real Estate Development

In partnership with the Department of Finance in the College of Business, CRP offers a two-year, 33-credit Master of Real Estate Development (MRED) degree. The program is designed for working professionals, with coursework delivered in a blended online/on-campus format. During the academic year, students can complete coursework remotely and come to campus for three, one-week intensive workshops throughout the two-year degree. More information on the MRED program is available on the program website: <https://www.ivybusiness.iastate.edu/masters/mred/>.

Graduate Certificates

The Certificate in Preservation and Cultural Heritage (P+CH) is a multidisciplinary graduate program that provides the practical skills and background needed to succeed in the fields of historic preservation and cultural resource management. The certificate program is open to Iowa State University graduate students in any College of Design major as well as those majoring in history, anthropology, and related disciplines. Interested students should visit <https://www.design.iastate.edu/programs-minors/certificates/preservation-and-cultural-heritage/> or contact historicplaces@iastate.edu for guidance.

The department also offers a 13-credit graduate certificate in Geographic Information Systems (GIS) in spatial analysis, GIS applications, and program management. The program is open to graduate students in all disciplines of the university. Information about the graduate certificate may be obtained from the department office and from the department's web page at: www.design.iastate.edu/programs-minors/certificates/gis-certificate/. (<https://www.design.iastate.edu/programs-minors/certificates/gis-certificate/>)

Interdepartmental Undergraduate Program

<http://www.design.iastate.edu>

The Design Studies programs bring together courses that deal with the integrated study of the conceptualization, production, visible form, uses, and history of artifacts, buildings, and environments as well as the common qualities and connections among the design, art and planning fields.

Undergraduate Minors

Minor - Critical Studies in Design

The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture. In lectures and focused seminars, students explore historical and contemporary issues, including cultural production, the built environment, media and technology, design in everyday life, and models of professional practice. The minor is open to all undergraduates at Iowa State University.

Minor - Design Studies

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for multi-disciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

Minor - Digital Media

The undergraduate minor in Digital Media covers the knowledge and techniques for applying digital representations to generate designs and art. The body of knowledge specializes in the fields of design, art and planning. This minor is open to all undergraduate students at Iowa State University.

Minor - Geographic Information Science (GIS)

The undergraduate minor in Geographic Information Science (GIS) is an interdisciplinary program that provides students with opportunities to engage the theory, processes, techniques and tools that use spatial data and computational technology to create cutting-edge analysis and mapping approaches for a wide range of fields, such as urban planning, architecture, landscape architecture, design, community development, agriculture, environmental sciences, natural resources, sociology, criminology, anthropology, political science, environmental studies and others. The minor is open to undergraduates in all university majors with a minimum overall GPA of 2.0 prior to enrolling.

Minor - Illustration

The undergraduate minor in Illustration is ideal for students interested in illustration for books, graphic novels, magazine articles, advertising and concept art for game design and film. This minor provides the ability

to tailor a curriculum that serves these varied career interests, whether you want to work in the industry or freelance as an independent studio practitioner.

Minor - Preservation and Cultural Heritage

The undergraduate minor in Preservation and Cultural Heritage provides students with knowledge, skills, and credentials that complement undergraduate degrees in a wide variety of majors, but especially Architecture, Interior Design, Community & Regional Planning, Landscape Architecture, and History. To these ends, the Minor has two major curricular objectives:

- Provide students with a holistic understanding of historic preservation that draws from the various departments involved, yet allows for the development of expertise within a student's specific major.
- Provide a curriculum that conforms with the National Council for Preservation Education's pedagogical guidelines and the Federal government's Professional Qualification Standards for historic preservation under 36 Code of Federal Regulations (CFR) Part 61.

The Minor requires a minimum of 15 credit hours. At least six (6) credits need to be taken at the 3000 or above, and at least 9 of the 15 credits must not be used to meet any other department, college, or university requirement except the credit requirement for graduation.

Minor - Textile Design

The undergraduate minor in Textile Design allows students to focus specifically on the design and creation of textiles — a practice with applications in the fine arts, fashion and related fields. Open to undergraduates at the sophomore level and above enrolled in any College of Design major or in the Apparel, Merchandising and Design major in the College of Human Sciences.

Minor - Urban Studies

The undergraduate minor in Urban Studies is an interdisciplinary program that emphasizes urban life in a variety of settings and from different disciplinary and methodological approaches. The Urban Studies minor will allow students to explore varied and multiple dimensions of urban and community life through differing conceptual and analytical frameworks. The minor is open to undergraduates in all university majors except Community & Regional Planning.

Additional information about minors is available in the Student Programs and Services Office, 297 College of Design.

Graphic Design

Overview

<http://www.design.iastate.edu/graphicdesign/index.php> (<http://www.design.iastate.edu/graphicdesign/>)

The Curriculum in Graphic Design leads to a 124-credit undergraduate Bachelor of Fine Arts in Graphic Design including the 31-credit Core Design Program.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Information on admission criteria is posted each year on the College of Design website.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.

A 30-graduate-credit program is offered leading to the Master of Arts with a specialization in Graphic Design for students planning to undertake a professional degree. (NOTE: Applicants without a degree background in graphic design may be required to complete up to 18 additional credits of coursework).

A 60-graduate-credit post-professional graduate program is also offered leading to the degree Master of Fine Arts.

Student Learning Outcomes

Students in this program will be able to:

- Use creative problem solving and design processes when faced with graphic design challenges.
- Employ visual organization skills in a variety of communication media.
- Understand applications of visual communication including animation, branding, image creation, information design, interaction design, symbology, typography, video, through contemporary and emerging technologies; and
- Integrate cultural, ethical, and historical considerations in preparation for professional practice.

Degree Requirements

Total Degree Requirement: 124 credits

Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

International Perspective: 3 credits

U.S. Diversity: 3 credits

Communications: 10 credits

ENGL 1500	Critical Thinking and Communication *	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition *	3
LIB 1600	Introduction to College Level Research	1
One of the following:		3
COMST 1010	Introduction to Communication Studies	
COMST 2110	Interpersonal Communication	
SPCM 1100	Listening	
SPCM 2120	Fundamentals of Public Speaking	
Total Credits		10

* with a C or better

Humanities: 6 credits

6 credits from program curriculum sheet.

Social Sciences: 6 credits

6 credits from program curriculum sheet.

Math/Physics/Biol. Sciences: 6 credits

COMS 1060	Introduction to Web Programming	3
3 credits from program curriculum sheet		3
Total Credits		6

General Education Courses: 12 credits

6 credits of course level 3000-4000 from program curriculum sheet;
Complete 6 credits from department curriculum sheet.

College of Design Core: 13 credits

DSNS 1020	Design Studio I	4
DSNS 1150	Design Collaborative Seminar	1
or DSNS 1100	Design Exchange Seminar I	
DSNS 1310	Drawing I	4
DSNS 1320	Digital Design Literacy	1
DSNS 1830	Design in Context	3
Total Credits		13

Art and Design History: 12 credits

ARTH 2800	History of Art I	3
ARTH 2810	History of Art II	3
Six credits from program curriculum sheet		6
Total Credits		12

Studio Options: 6 credits

6 credits from ARTIS, ARTID, LA, ARCH, or another approved studio course.

Graphic Design: 52 credits

ARTGR 2700	Graphic Design Studio I	3
ARTGR 2710	Graphic Design Studio II	3
ARTGR 2720	Digital Photography for Graphic Design	3
ARTGR 2730	Typography I	3
ARTGR 2740	Typography II	3
ARTGR 3770	Graphic Design Internship Seminar	1
ARTGR 3700	Graphic Design Studio III	3
ARTGR 3710	Graphic Design Studio IV	3
ARTGR 3870	Graphic Design History/Theory/ Criticism I	3
ARTGR 3720	Graphic Materials and Processes	3
ARTGR 4700	Graphic Design Studio V	3
ARTGR 4710	Graphic Design Capstone	3
ARTGR 4800	Graphic Design Internship	3
ARTGR 4890	Design Ethics	3
Twelve credit options from program curriculum sheet		12
Total Credits		52

Electives: 1 credits

Remaining electives sufficient to complete graduation requirements.

Graphic Design, B.F.A.

Admission into the BFA in Graphic Design Program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Information on the admission criteria is posted each year on the College of Design website.

Graduate Programs

The department offers the degrees of Master of Fine Arts (M.F.A.) in Graphic Design and Master of Arts (M.A.) in Experiential Graphic Design.

Credit earned at Iowa State University or other institution for the Master of Arts degree may be applied toward the Master of Fine Arts degree at the discretion of the program of study committee.

Applicants to the graduate program should have an undergraduate major in an art or design area and demonstrate the ability to do technically competent and original work through the presentation of a digital portfolio for faculty review. Past academic performance and the quality of studio work are critical in the admission process. A minimum 3.0 GPA in the student's undergraduate major is the standard for full admission to the graduate program. Admission is also determined by studio space available within the program area, which changes yearly due to graduate students' progress in their programs of study.

Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduates in the department can expect that additional supporting coursework, determined by the graduate faculty, may be required.

Prospective students are advised to contact the graduate coordinator with specific questions about admission procedures and portfolio review. Application and additional program information may be obtained from the Department of Graphic Design, College of Design, Iowa State University, Ames, IA 50011-3092.

Master of Fine Arts in Graphic Design (M.F.A.)

The Master of Fine Arts in Graphic Design is recognized as the terminal degree in the field and requires a minimum of 60 credits. M.F.A. graduates in Graphic Design are skilled in communication design, problem solving, and are adept in the use of visual language, symbology, and interaction. Graduates are proficient in the design of communications and the use of technologies that incorporate human interaction with environments, objects, and electronic and traditional publications. Students and faculty work collaboratively on a required thesis, integrating theory, creation, research, and design problem solving.

Master of Arts in Experiential Graphic Design (M.A.)

This 30-credit degree focuses on preparing students for visual communication. This degree provides a comprehensive exposure to all aspects of user experience, including but not exclusive to wayfinding, exhibition design, interaction, information design, and placemaking.

The MAXGD is for those seeking a graphic design specialization with little to no previous experience in the area. Students may use the degree as a complement to a bachelor's degree in graphic design or another design field to enhance their skills and qualifications for employment. It can also be used to complement those students with an undergraduate degree in a graphic design area that would like to add an additional graduate level study to their coursework prior to enter the field.

MFA in Graphic Design Degree Requirements Graphic Design Requirements, 27 cr.

ARTGR 5110	Graphic Design Graduate Studio I	3
ARTGR 5120	Audience and Perception	3
ARTGR 5210	Graphic Design Graduate Studio II	3

Total Credits		10

Elective Focus Area, 9 cr.

Outside of graphic design but supports area of research, may be studio (ex. DSNS 5460) or other class outside the College of Design: See Graphic Design M.F.A Suggested Minor Course List

May also include ISU Preparing Future Faculty (PFF): 3-11 cr.

Art History, Theory, Criticism, 12 cr.

Grad-level art/design history, theory, criticism courses in the College of Design

Total Credits		12

Thesis, 3-6 cr.

ARTGR 6990	Research-Thesis	3-6

Total 60 cr. minimum (not including any potential prerequisites)

Industrial Design

Overview

<http://www.design.iastate.edu/industrialdesign/index.php> (<http://www.design.iastate.edu/industrialdesign/>)

The vision of the Department of Industrial Design is to empower the next generation of designers to identify and solve small to large scale problems in order to devise systemic, forward-thinking solutions, mindful of societal needs and ecological repercussions, fostering health and well-being for people and the environment.

We do this by providing students with the necessary tools and experiences, spanning across the product development timeline from the front-end of problem finding through design research and synthesis, to discovery of meaningful design solutions that can range from products to services and systems. The industrial design program offers opportunities to collaborate with diverse disciplines on campus and beyond to tackle a wide variety of local and global design challenges.

Degree offerings include the Bachelor of Industrial Design (B.I.D.) and the Master of Industrial Design (M.I.D.).

Undergraduate Program Structure

Students in this program take a carefully defined sequence of courses developed to give them exposure and practice in the areas of theory and skill required by industrial design. These include design sketching and visualization, form development, history, creative thinking, engineering principles, research, design methodology, human factors, computer-aided design, manufacturing techniques, commercial factors, management, strategic design development, service design, and user experience design. In their third year, students select electives within and outside of the department, defining current issues in the profession. The upper-

level studio classes are reserved for study abroad programs connecting students to the global design community, internships, and industry-sponsored projects with students from other departments and colleges. The curriculum aims to develop the ability to cope with diverse problem areas in industrial design, without restricting them to specific fields in design.

An industrial design degree from Iowa State prepares students for creative careers in private and corporate practice, with design consulting companies, in-house design departments, and product manufacturers.

Career choices with an industrial design degree include (but are not limited to):
Product designer, design researcher, automotive designer, footwear & accessory designer, construction & agricultural equipment designer, furniture & lighting designer, interaction designer, service designer, exhibit designer, packaging designer, advertising & experience designer, UX designer and researcher.

Student Learning Outcomes

Upon completion of the industrial design program students will be able to:

1. Analyze and address critically the needs of ALL stakeholders involved in the design process and avoid biases, through emphasizing critical thinking, empathy, compassion, and reflective practices. (*DIVERSITY, EQUITY & INCLUSION*)
2. Navigate and apply varying design methods and techniques commonly used to identify and solve small to large scale problems creatively and methodically. (*CREATIVE DESIGN PROCESS*)
3. Develop comprehensive products, services and systems solutions through situation and circumstance appropriate touchpoints and platforms. (*PRODUCTS, SERVICES & SYSTEMS*)
4. Understand and evaluate ethical, societal, environmental, and cultural short and long-term consequences of design solutions for all people and the planet. (*SUSTAINABILITY & ETHICAL DESIGN - aka the designers' dilemma of unintended consequences*)
5. Communicate professionally and effectively with all stakeholders of the design process from peers and co-workers to clients and end users in both forms verbally and visually. (*COLLABORATION, COMMUNICATION & PROFESSIONALISM*)

Degree Requirements

The curriculum in Industrial Design leads to a 133-credit undergraduate Bachelor of Industrial Design including the first year Core Design Program.

Admission into the professional program depends upon available departmental resources. Updated information on admission criteria is announced yearly on the College of Design website.

Transfer students with studio credits from other programs, colleges, and universities must present a portfolio of work done in those courses, for departmental review, in order to have the credits apply toward studio. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.

A 60-credit post-professional graduate program is also offered leading to the terminal degree Master of Industrial Design.

Total Degree Requirements: 133 credits

Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

International Perspective: 3 credits

U.S. Diversity: 3 credits

Communications: 10 credits

Graduate Program**Master of Industrial Design | MID****60 credit study | distributed across two consecutive years**

What will (Industrial) Design look like in the future? Where is the field going? What new methods and methodologies will be needed to tackle current and emergent global issues? What will it mean to be human in the age of Artificial Intelligence? How will design disciplines answer to these new futures, new typologies of users, and constantly evolving technologies, and increasing environmental challenges?

These are just some of the questions we are concerned with in the MID program. Designing successfully during these times of uncertainty will require open minded designers, who, as connectors, are flexible, critical, empathetic and creative risk takers. Designers who are capable of working and collaborating in different contexts, under ever changing circumstances, across domains and most importantly in different roles.

Description of the degree

The Master of Industrial Design (MID) program at the College of Design, Iowa State University, emphasizes a creative problem-solving based curriculum rooted in design thinking methodologies, that allows students to explore their interests in the broad and expanding field.

Industrial Design is a human-centered discipline that questions existing boundaries and makes connections among diverse domains. Therefore, the program challenges students to develop the ability to recognize and define problems in new ways, and then find opportunities others

might have missed or undervalued. Through a strategic and creative problem-solving process, Industrial Design tries to reimagine how we should go about developing innovative, sustainable and durable solutions for people and society at large that genuinely lead to better quality of life and better futures. The MID program actively connects with other knowledge domains and disciplines, to research how things are with the drive to propose how they ought to be. This is achieved through the challenging balance between critical and creative ways of thinking [and working] when devising novel, useful and meaningful artifacts, services, experiences, and environments. Ultimately, the program integrates the design triad of people, business, and technology, in innovative ways, and is based on insightful research to create new value and competitive advantage in a variety of societal, economic, and environmental contexts.

Details about the degree

The MID program is centralized on the creation and application of new knowledge through in-depth investigations of existing 'gaps' culminating in a graduation project, which includes a creative component (project based) or a written thesis (research focused). At the same time, students expand their design practice skills using different methodologies, collaboratively, throughout the entire design process. They explore, generate, transfer, and implement interdisciplinary insights into foundational knowledge for the discipline of Industrial Design.

The MID is accredited and recognized as a terminal degree in Industrial Design. This graduate program is designed to offer significant mix of skills and experiences, including students from different disciplinary backgrounds, faculty-directed research programs, internships, international study abroad, industry-sponsored coursework, and also teaching experience.

The MID program is positioned in one of the most comprehensive design colleges in the country, facilitating the integration of methodologies and skill sets from multiple disciplines. Additionally, the program has established curricular connections to the nationally ranked College of Engineering and its Human Computer Interaction Graduate Program, the Ivy College of Business, as well as to numerous industry collaborators and practitioners.

Degree requirements includes a completion of a 2-year, 60-credit program, including a required core (45 credits), focused electives (9-12 credits) and experiential learning credits (3-6 electives). The final MID Graduate Project includes one of the following: a) creative component with a design process report (6 credits) or b) research-focused written thesis (6 credits). Students and their supervisory team work collaboratively on the in-depth graduate project, adding to the body of knowledge of [industrial] design through investigating, exploring and solution finding of a complex [industrial] design problem.

Curriculum Outline

Required Core Courses: 45 cr.

INDD 5010	Industrial Design Graduate Studio I	6
INDD 5020	Industrial Design Graduate Studio II	6
INDD 5200	Design Theory Methodology	3
INDD 5300	Design Thinking	3

Admission to the MID program is by application to the department and to the Graduate College. Information about our programs and how to apply can be obtained from the department's web page at: <https://www.design.iastate.edu/industrial-design/degrees/master-of-industrial-design/> or send an email directly to the Director of Graduate Studies.

Integrated Studio Arts

Overview

<http://www.design.iastate.edu/artvisualculture/index.php> (<http://www.design.iastate.edu/artvisualculture/>)

The Department of Art and Visual Culture offers degree programs focused on fine arts and visual culture, offering courses in studio arts, art history, art education, and scientific illustration. Degree offerings include the Bachelor of Arts (B.A.) in Art and Design, Bachelor of Fine Arts (BFA) in Integrated Studio Arts, and Master of Fine Arts (MFA) in Integrated Visual Arts.

BFA Integrated Studio Arts (ISA) (Fine/Studio Arts)

Students will select from ISA's studio options including ceramics, digital media, drawing, furniture/wood design, illustration, jewelry and metalsmithing, scientific illustration, mixed media, new genres, painting, photography, printmaking, and textiles.

Over the four-year course of study students will develop a portfolio and prepare for a professional practice in the visual arts. This concentration engages aesthetics, visual problem-solving, critical thinking, and skill development, drawing on historical and cultural theory, contemporary trends, and studio practice.

Transfer students with studio credits from other colleges and universities may present a portfolio of work created in those courses to determine if these credits can be applied toward specific studio requirements. Students will present this portfolio upon admission and prior to registration for classes. Arrangements for this process should be made with the department's academic advisors.

The department offers an undergraduate minor in Illustration and participates in the undergraduate minors in Classical Studies, Critical Studies in Design, Design Studies, Digital Media, and Textile Design.

Student Learning Outcomes

Students will learn to:

- Develop creative problem-solving abilities and traditional and innovative technical skills through the design, research, and creative processes;

- Understand and express in multiple media the relationship between objects, aesthetics, and meaning;
- Exhibit an awareness of their roles as artists and thinkers regarding the ethical, cultural, and ecological impacts of what they do;
- Express through visual, verbal, and written means an awareness of global art movements and a meaningful understanding of historic and contemporary art; and
- Use their understanding and practice of art to engage with local, national, and global communities where they can participate in broad exchange of ideas.

Degree Requirements

The curriculum in leads to a 128-129 credit undergraduate Bachelor of Fine Arts in Integrated Studio Arts. Admission into the program requires the completion of at least 31.0 credits, including the following courses: DSNS 1020, DSNS 1100 or 115, DSNS 1310, DSNS 1320, and DSNS 1830; 6 credits of Social Sciences/Humanities; 6 credits of Math/Science; ENGL 1500 (or test-out credit); LIB 1600. Information on admission criteria is posted each year on the College of Design website.

Total Degree Requirement: 128-129 cr.

Only 65 credits from a two-year institution can apply and may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

International Perspective: 3 credits

U.S. Diversity: 3 credits

Communication: 10 credits

(C or better grade ENGL 1500 and ENGL 2500)

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
LIB 1600	Introduction to College Level Research	1
One course from the following:		3
COMST 1010	Introduction to Communication Studies	
COMST 2110	Interpersonal Communication	
SPCM 2120	Fundamentals of Public Speaking	
Total Credits		10

Humanities: 6 credits

6 credits from College of Design General Education Approved Course list.

Social Sciences: 6 credits

6 credits from College of Design General Education Approved Course list.

Math/Physics/Biol. Sciences: 6 credits

6 credits from College of Design General Education Approved Course list.

Post-Baccalaureate Undergraduate Certificate

Iowa State's Post-Baccalaureate Undergraduate Certificate program in Integrated Studio Arts (ISA) prepares students for either graduate study or career advancements by providing a focused environment for advancing aesthetic, technical, creative, and conceptual skills. While a bachelor's degree in visual or fine arts is not necessary, a strong portfolio of creative work and a written statement of purpose are required for admission. Download application requirements (https://www.design.iastate.edu/wp-content/uploads/2021/03/Postbaccalaureate_ISA.pdf) (PDF) or view online. (<https://www.design.iastate.edu/art-and-visual-culture/degrees/post-baccalaureate-undergraduate-certificate/>)

Curriculum

Post-baccalaureate students will work with a faculty advisor to create a tailored 25-credit program of study including:

- 15 credits of 3000/4000-level Integrated Studio courses
- Six (6) credits of 3000/4000-level art history courses
- Three-credit elective selected from a list of options
- ARTIS 4910: One-credit capstone exhibition course

For the capstone experience, you will be expected to produce an artist's statement and a written assessment of your learning that will be reviewed, along with your art, by the arts faculty.

This certificate program must be completed within two years. Students interested in developing a body of work for admission to graduate school or to focus on further skill development prior to moving into professional practice will be ideal candidates.

Application Requirements

To apply for this program, please submit the following materials.

1. Digital portfolio:
 - Twenty (20) images of recent work with no more than four (4) of the images being details
 - Descriptions on each image need to include title, date, size and medium
2. One-page statement of intent
3. Current resume
4. Name and contact information of three (3) references

Graduate Program

The department offers the Master of Fine Arts (MFA) in Integrated Visual Arts (IVA). The MFA curriculum in IVA requires a minimum of 60 credits.

This MFA is a unique interdisciplinary program offering integrative study among a combination of media areas including ceramics, computer applications, drawing, textiles, illustration, jewelry/metalsmithing, painting, printmaking, photography, furniture/wood design and areas outside of AVC. The IVA program offers an innovative curriculum aligned with emerging art and design markets.

IVA graduates link traditional studio disciplines with interdisciplinary studies. Graduates are prepared as visual artists to enter studio practice, business, higher education, or new interdisciplinary fields. The MFA is recognized as the terminal degree. A required thesis exhibition is composed of two parts: a substantial solo exhibition; and a written thesis statement that describes the development of the work in the exhibition, its objectives, and its historical and cultural points of reference. A written thesis with no exhibition component may be an appropriate alternative, but some portion of the work should entail an element of creative problem-solving in the form of a visual product.

Upon completion of the graduate program IVA graduates are expected to:

- Have developed a fully realized creative direction which provides a platform for continued professional research and growth, and visual expression;
- Have produced a body of work which demonstrates a high level of creative investigation and accomplishment;
- Have acquired a professional level of technical proficiency in one or more media areas;
- Effectively communicate their ideas verbally and in writing;
- Understand the context, both historical and current, within which their creative pursuits exist;
- Have developed a well-formed and informed personal creative philosophy and a strong studio skill set;
- Understand current and relevant ethical, ecological, and social issues; and
- Use relevant theory in pursuing creative university-level scholarship.

Studio Courses: 39 credits

Courses numbered ARTIS	27
Studio Courses outside of ISA	6
ARTIS 6990A and ARTIS 6990B	6

Seminar Courses: 6 credits

(Students take 2 sections of ARTIS 5710, or 1 section of ARTIS 5710 and ARTIS 5110)	
Graduate Seminar ARTIS 5710	3 credits each section

ARTIS 5710A Graduate Seminar: Grants, Residencies, Exhibitions, Entrepreneurialism

ARTIS 5710B Graduate Seminar: Critique and Creative Process

ARTIS 5110 Seminar in Teaching

Art History/Theory/Criticism: 12 credits

ARTH 5010 required 3

Art History courses 9

Related Courses (outside of IVA program): 3 credits

Total: 60 Credits

Interdisciplinary Design

OVERVIEW

Design plays a crucial role in innovation, imagination and human creativity. The secondary major in Interdisciplinary Design is an asset on any resume. It offers courses for students interested in pursuing careers and futures related to creative leadership, design for social change, disruptive innovation and user experience (UX), and provides the knowledge and skill sets necessary to address complex challenges and contemporary societal problems using key innovation and entrepreneurial concepts.

Interdisciplinary Design explores the central principle of human-centered experiences, and how people — users, customers, markets, audiences — are at the core of all creative activities and endeavors. Interdisciplinary Design dives deeply into the fundamental concepts that explain creative processes, from collaboration to iteration to implementation.

This program provides a strong foundation in creative problem solving, design thinking, strategic design, leadership and project management and new product development. Interdisciplinary Design builds an understanding of the innovation journey through design tools and techniques for ideation, insights forecasting and prototyping with users. This is the place to initiate a project, explore how to take an idea to execution and discover how to turn an insight into a reality.

The Interdisciplinary Design curriculum is built around a set of required innovation and design entrepreneurship-focused interdisciplinary studios and other required and elective courses, with many options for students across all university majors.

Student Learning Outcomes

Upon completion of the Interdisciplinary Design degree program, students will be able to:

- Generate ideas and be creative and innovative makers who use design methods, theory, and applications from multiple disciplines;

- Think strategically and creatively about society's increasing economic, social, and environmental challenges across scales and levels of complexity;
- Integrate and apply principles, values, and mindsets of innovation and entrepreneurship;
- Synthesize knowledge from many sources and work collaboratively within interdisciplinary teams; and
- Work with confidence in contexts where design thinking, skills in making, and critical analysis are valued.

Secondary Major

The secondary major in Interdisciplinary Design requires a minimum of 30 semester credits. Students seeking a secondary major in Interdisciplinary Design must complete:

Anchor Courses: 18 cr.

DES 1500	Introduction to Innovation and Design	3
DES 2300	Design Thinking	3
DES 2400	Design Innovation Studio	3
DES 3400	Design Entrepreneurship Studio	3
DES 4950	Design Innovation Launchpad	6
Total Credits		18

Other Required Courses: 9-10 cr.

For majors outside the College of Design

3 credits in a design history course

3 credits in Communications; choose from SPCM 2120, ENGL 3020, ENGL 3140

For College of Design majors

DSNS 1020 Design Studio I

DSNS 1830 Design in Context

3 credits in Communications; choose from SPCM 2120, ENGL 3020, ENGL 3140

Electives: 3 cr.

DES 2500 Design Intersections 3

Or approved elective(s) from a College of Design department (please consult with academic advisor to choose an approved elective that enhances depth of knowledge in first major)

Interior Design

Overview

<http://www.design.iastate.edu/interiordesign/index.php> (<http://www.design.iastate.edu/interiordesign/>)

The department offers the degrees Bachelor of Fine Arts (BFA) in Interior Design, Master of Arts (M.A.) in Interior Design, and Master of Fine Arts (MFA) in Interior Design.

BFA Interior Design

Emphasis is on the student's application of design processes to creatively solve problems of the interior environment based on knowledge of human safety, functional utility, and physical, psychological, and contextual fit. Graduates in interior design are competent in visual communication (sketching, drafting, and computer-aided design), design problem solving, space planning, lighting and color specification for interiors, finish and furniture selection, detailing interior construction, and application of human factors. The curriculum is accredited by the Council for Interior Design Accreditation (CIDA) as providing professional-level education.

Transfer students with studio credits from other colleges and universities must present a portfolio of work done in those courses to determine if these credits can be applied toward specific studio requirements. Students are required to present their portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.

Graduate Study

A 34-graduate-credit program is offered leading to the Master of Arts, for students planning to undertake professional or design research-oriented pursuits. (NOTE: Applicants without a previous undergraduate degree in interior design may be required to complete up to 40 additional credits of deficiency work).

A 60-graduate-credit post-professional graduate program is also offered leading to the degree Master of Fine Arts.

Student Learning Outcomes

All graduating students with a BFA in Interior Design will:

- Develop an understanding of the design process to creatively solve a design problem and apply the design elements and principles to design solutions.
- Communicate ideas and design solutions effectively in written, oral, and visual form, including presentations of studio-based work.
- Collaborate in team-based projects with other students in interior design and work effectively in interdisciplinary teams, including an understanding of the role of interior designers in practice.
- Apply research and theories to projects, including the evidence of human-centered design in the built environment; develop an appreciation of global cultures and the history of interiors, architecture, and art.
- Demonstrate knowledge in the technical aspects of interior design, specifically in light and color, products and materials, environmental

systems and human wellbeing, construction, and regulations and guidelines.

Degree Requirements

The curriculum in Interior Design leads to a 129-credit undergraduate Bachelor of Fine Arts in Interior Design including completion of the Core Design Program.

Admission into the professional program follows completion of the Core Design Program and depends upon available resources. Information on admission criteria to each professional degree is posted each year on the College admissions website.

Total Degree Requirement: 129 cr.

Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA; Completion of all requirements listed below.

International Perspective: 3 cr.
U.S. Diversity: 3 cr.
Communication: 10 cr.

Students enrolled in the Bachelor of Interior Design Program at ISU may apply for concurrent undergraduate/graduate status prior to their final

semester of their undergraduate program. If accepted, students will be allowed to register for six graduate credits and apply the credits to an M.A. degree.

Graduate Study

The Department of Interior Design offers two graduate degrees in interior design: a five-semester Master of Fine Arts (MFA) and a three-semester Master of Arts (M.A.), each of which requires a thesis. The degree programs encourage interdisciplinary work within the College of Design and across related fields within the university. We currently offer double-degree programs and an interdisciplinary Ph.D. program in Human Computer Interaction (HCI) with a home department in Interior Design. Financial support in the form of teaching and research assistantships is available on a competitive basis.

Master of Fine Arts in Interior Design (MFA)

The MFA is a terminal degree in Interior Design with a required thesis and a creative component. It is designed for students with undergraduate degrees in Interior Design or closely related disciplines and for students from other disciplines who complete required prerequisites in the Department of Interior Design. The MFA in Interior Design Program prepares students to become professionals in practice, teaching, and research.

The MFA program encourages students to research and engage diverse contemporary issues within design specializations across the field of Interior Design. Faculty in the program provide students with opportunities to engage and address social, cultural, environmental, historical, practical, and other concerns within regional, national, and international contexts. They amalgamate traditional methods and contemporary technologies and encourage students to develop new processes and methods as needed. Faculty members promote inclusive designs that accommodate current and future needs across diverse cultures and populations. The Interior Design Graduate Programs expect graduates to approach research and interdisciplinary coursework with dedication and commitment.

The MFA curriculum has an intensive five-semester course sequence that emphasizes foundations of interior design including methods, theory, process, the human condition, and studio. Design seminars offer training in varied interior design specializations including preservation and cultural heritage, inclusive design, lighting, color theory, research methods, and environmental design. The program offers study abroad opportunities, studios with specialized faculty, and independent study projects. Interdisciplinary option studios apply and integrate core-course content with technical proficiency in areas of preservation and cultural heritage, healthcare, design for elderly populations, and hospitality, among others. During the last two semesters students explore interior design through focused research and a written thesis. The MFA program concludes with a public defense of the thesis that

includes a thesis exhibition with graphic representations of the research.

Students admitted to the program hold undergraduate degrees in a broad range of fields. A student without an undergraduate degree in interior design or interior architecture must complete the curriculum's prerequisites listed in curriculum sheets posted on the Graduate Programs in Interior Design's website (<https://www.design.iastate.edu/interior-design/graduate-degrees/graduate-program-overview/>). Students with undergraduate degrees in closely related to design fields may be eligible to waive part of the prerequisites in the program.

The post-professional Master of Arts (M.A.) in Interior Design is a 34-credit research degree with required a graduate thesis. The M.A. degree is open to applicants who hold a professional degree in Interior Design or Interior Architecture from an accredited program. The M.A. in Interior Design degree prepares students to become competent professionals in Interior Design practice, while the written research thesis contributes to the body of knowledge in the field.

M.A. candidates are required to develop a thesis proposal with a statement of purpose, research questions, literature review, methods summary, and outline of proposed chapters. A first professional degree is also open for applicants with non-professional degrees in various fields with the completion of required prerequisites in the Department of Interior Design. A first professional M.A. for graduates in closely related design fields may allow some prerequisite courses to be waived.

Master of Arts in Interior Design (M.A.), 34 Credits

Dual Degrees

Double-degree programs are offered with the Department of Architecture with a Master of Arts (M.A.) in Interior Design and a Master of Architecture (MArch). The graduate program also offers a Ph.D. in Human Computer Interaction (HCI) with home department in Interior Design. Information about our programs and how to apply can be obtained from the department of Interior Design Graduate Program website and from the graduate school's departmental web page.

Landscape Architecture

Overview

Landscape architecture is an environmental design discipline. Landscape architects actively shape the human environment: they map, interpret, imagine, draw, build, conceptualize, synthesize, and project ideas that transform landscapes. The design process involves creative expression that derives from an understanding of the context of site (or landscape) ecosystems, cultural frameworks, functional systems, and social dynamics. Students in our program learn to change the world around them by re-imagining and re-shaping the landscape to enhance its aesthetic and functional dimensions, ecological health, cultural significance, and social relevance. The profession addresses a broad range of landscapes in urban, suburban, rural, and wilderness settings. The scale of landscape architecture projects varies from broad, regional landscape analysis and planning to detailed, individual site-scale designs. The curriculum at Iowa State prepares students for this challenge as they develop their abilities to design and communicate ideas through a sequence of foundational courses and studios. The program seeks to produce graduates who understand the ethical, social, and environmental/ecological dimensions of issues involving changes in the landscape.

Graduates are active in a broad range of careers, such as sustainable site design, land development, park management, environmental advocacy, community planning, urban design, and others. In their professional lives, graduates apply their creative and technical skills in the planned arrangement of natural and constructed elements on the land with a concern for the stewardship and conservation of natural, constructed, and human resources. The resulting environments serve useful, aesthetic, safe, and enjoyable purposes. Graduates are able to communicate effectively with colleagues in the sciences and humanities as well as in the allied professions and are prepared to work individually and in multidisciplinary teams to address complex problems dealing with the cultural/ecological environment.

The department offers graduate and undergraduate degree programs and cooperates in the undergraduate minors in Design Studies, Critical Studies in Design, and Digital Media.

The undergraduate curriculum includes one year of the college's Core Design Program followed by four years in the professional program. Applicants are reviewed on the basis of academic performance and a portfolio of original work; admission to the professional program is subject to the approval of a faculty committee at the completion of the Core Design Program. Information on admission criteria is posted each year on the College of Design website.

Following admission to the professional program, students embark on the traveling studio during the fall semester of their second year. This studio is a full semester's credit of integrated departmental courses and involves extensive travel within and beyond the great Midwest region of North America, to study regional natural systems and the cultural responses to those systems.

To enhance the study of landscape architecture in off-campus settings, the department requires students to choose from among the following options during the spring and summer of their fourth year: 1. a professional internship 2. the College of Design Rome Program 3. an independent study abroad experience or 4. National Student Exchange. The department assists students with placement, and additional information is provided through the department and the College of Design's Career Services Office.

The undergraduate program consists of a five-year curriculum, requiring 150 credits, leading to the degree Bachelor of Landscape Architecture. These credits are distributed between a one-year Core Design Program of 30 credits and a four-year professional program of 120 credits.

Student Learning Outcomes

- Understand and practice design as an iterative process.
- Design landscapes as part of the built material world from concept to detail.
- Select and use a wide range of manual and digital techniques to communicate ideas; utilize appropriate communication and representation techniques based on the design problem.
- Present a project clearly and concisely to a client, community, or user group and produce professional communications.
- Produce basic construction documents and other project documentation including plans and specifications.
- Incorporate knowledge of ecology and plants into design proposals.
- Understand and practice landscape architecture as a continuously changing historical and cultural activity.
- Interpret how social, cultural, and political dynamics affect the use and design of public and private space.

- Function effectively in collaborative and multidisciplinary settings.
- Practice professional ethics, judgment, and skills and understand the professional's role as a fiduciary.

Degree Requirements

The department offers graduate and undergraduate degree programs.

The undergraduate program consists of a five-year curriculum, requiring 150 credits, leading to the degree Bachelor of Landscape Architecture. These credits are distributed between a one-year Core Design Program of 31 credits and a four-year professional program of 119 credits.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance and a portfolio of original work. Information on admission criteria is posted each year on the College of Design website.

The BLA from Iowa State University is an LAAB (Landscape Architectural Accreditation Board)-accredited professional degree program. In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for professional licensure. The LAAB is the sole entity recognized by the Council for Higher Education Accreditation to accredit U.S. first-professional degree programs in landscape architecture at the bachelor's and master's levels.

Total Degree Requirement: 150 credits

Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

International Perspective: 3 credits

U.S. Diversity: 3 credits

Communications: 10 credits

(C or better grade in ENGL 1500 and ENGL 2500)

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
LIB 1600	Introduction to College Level Research	1
One of the following:		3
ENGL 3090	Proposal and Report Writing	
ENGL 3140	Technical Communication	

Total Credits 10

Humanities: 9 credits

9 credits from PHIL, HIST, MUSIC or other humanities course offerings.

Social Sciences: 6 credits

6 credits from ANTHR, ECON, POLS, PSYCH, or SOC.

Mathematics and Science: 12 credits

One of the following: 3-4

MATH 1400	College Algebra	
MATH 1450	Applied Trigonometry	
MATH 1650	Calculus I (4 crs)	
ENVS 1200	Introduction to Renewable Resources	3
Science Elective		6

Additional General Education Course 3 credits

3 credits from 3000-4000-level courses

Design Core: 13 credits

DSNS 1020	Design Studio I	4
DSNS 1150	Design Collaborative Seminar	1
or DSNS 1100	Design Exchange Seminar I	
DSNS 1310	Drawing I	4
DSNS 1320	Digital Design Literacy	1
DSNS 1830	Design in Context	3
Total Credits		13

Landscape Architecture: 85 credits

LA 2010	Studio: Landscape Interpretation and Representation	6
LA 2020	Studio: Site Design I	6
LA 2110	Digital Design Methods for Landscape Architecture	3
LA 2410	Developing Identity as a Landscape Architect	1
LA 2720	Landscape Studies	3
LA 2740	The Social and Behavioral Landscape	3
LA 2810	Investigating Landscape Form, Process, and Detail	3
LA 3010	Site Design II	6
LA 3020	Ecological Design	6
LA 3220	Fundamentals of Planting Design	3
LA 3410	Contemporary Landscape Architecture	1
LA 3710	History of Modern Landscapes, 1750 to Present	3
LA 3730	Gardens and Landscapes from Antiquity to 1750	3
LA 3810	Shaping the Land	3
LA 4020	Urban Design	6
LA 4040	Advanced Landscape Architectural Design	6
LA 4440A	Landscape Architecture Independent Educational Enrichment: Professional Internship	
or LA 4440B	Landscape Architecture Independent Educational Enrichment: Study Abroad	
or LA 4440C	Landscape Architecture Independent Educational Enrichment: National Student Exchange	
LA 4420	Professional Practice	2
LA 4810	Landscape Construction	3

LA 4820	Landscape Construction Documentation	3
DSNS 5460	Interdisciplinary Design Studio	6
Plus nine credits professional electives		9
Total Credits		85

Electives: 12 credits

Complete electives sufficient to complete graduation requirements.

Landscape Architecture, B.L.A.

First Year

Fall	Credits Spring	Credits
DSNS 1020 or 1310	4 DSNS 1310 or 1020	4
DSNS 1150	1 DSNS 1320	1
DSNS 1830 (or General Education)	3 Soc. Sciences/Humanities Elective	3
ENGL 1500 or 2500	3 Science Elective or MATH 1420	3
Soc. Sciences/Humanities Elective	3 LIB 1600	1
MATH 1450	3 Elective (Optional for pre-professional year; not required for program application. If not taken in first year, add 3 cr. to a subsequent semester to meet the 150.0 credit total)	3
	17	15

Second Year

Fall	Credits Spring	Credits
LA 2010	6 LA 2020	6
LA 2110	3 LA 2740	3
LA 2210	3 ENVS 1200	3
LA 2410	1 Elective	3
LA 2720	3	
	16	15

Third Year

Fall	Credits Spring	Credits
LA 3010	6 LA 3020	6
LA 3220	3 LA 3410	1
LA 3730	3 LA 3710	3
LA 3810	3 Social Science/Humanities Electives	3

ENGL 2500	3 Math/Science Elective	3
	18	16

Fourth Year

Fall	Credits Spring	Credits
LA 4020	6 One of the following:	
LA 4810	3 LA 4440A	R
Social Science/Humanities Elective	3 LA 4440B	R
LA electives	3 LA 4440C	R
Communications (3000 level English)	3	
DSNS 3010 (Rome option only)	1	
	19	0

Fifth Year

Fall	Credits Spring	Credits
LA 4040	6 DSNS 5460	6
LA Electives	3 LA 4420	2
LA Electives	3 LA 4820	3
Social Science/Humanities Elective (3000 level)	6 Electives/LA Electives	3
	Professional Elective	1
	18	15

Additionally: Each student needs to take 3 credits of a US Diversity and 3 credits of an International Perspectives course (usually covered by LA 3730). Students also need to take at least 6 credits of 3000 level or above in the combined areas of communication, science, math, humanities, and social science (6 total from all the areas).

Graduate Programs

The department offers the Master of Landscape Architecture (MLA), an accredited professional degree designed for students with or without an undergraduate degree in landscape architecture. The degree provides skills and knowledge as measured by the Landscape Architectural Accreditation Board (LAAB) and the licensing exam for students seeking to practice as a licensed professional in the public or private sectors. The MLA degree also offers competency for students interested in post-professional study as it provides the skills and knowledge for the application of research and/or scholarly methods to professional practice.

The MLA program offers three concentration tracks in the following topical areas — Theory/Urbanism, Technology/Ecology, Advocacy/Community — through coursework and an optional thesis or creative component. The concentration in one of the three tracks will be

determined by the student in consultation with his/her advisor.

Concentration electives may be selected from within the college and university from an approved list and up to three (3) credits from within the department. In their final year, students may undertake a creative component or thesis option with the approval of their major professor and the department Graduate Committee.

Students are also able to pursue double degrees with Master of Community and Regional Planning (MLA/MCRP), Master of Urban Design (MLA/MUD), and Master of Design in Sustainable Environments (MLA/MDesSE). Students interested in the double-degree programs should contact the departments to receive a detailed description of requirements.

The department also offers courses in the Graduate Certificate Program in Geographic Information Systems (GIS), administered by the Department of Community and Regional Planning.

Design and Planning: 34 credits

LA 6010 Design Representation	4
LA 6020 Studio I – Land/Form & Plant/Scape	6
LA 6030 Studio II – Living Systems	6
LA 6040 Studio III – City Matters	6
LA 6050 Studio IV – LandWorks/LandDigits	6
DSNS 5460 Interdisciplinary Design Studio	6
or 2 cr. LA 5800 Thesis, Creative Comp. Tutorial + 4 cr. LA 5990 Creative Comp. or LA 6990 Thesis	

Theory/History/Research: 10 credits

LA 5710 Landscape Architectural Theory	3
LA 5900D Special Topics: History/Theory/Criticism	3
or LA 5780D: LA History elective*	
LA 5410 Design Inquiry	3
LA 5430 Colloquium: Landscape Architecture Research	1

Technology/Ecology/Materiality: 14 credits

LA 5220 Advanced Plant Technology	3
LA 5420 Professional Practice	2
LA 5590 Digital Design Methods for Landscape Architecture	3
LA 5830 Landscape TopoGraphics	3
LA 5870 Landscape Construction	3

Advocacy/Planning/Policy: 6 credits

LA 5940 Environmental Justice in Built Environments	3
Planning Elective - choose one from:	3
CRP 5660 Policy Analysis and Planning	
CRP 5680 Planning and Development	

CRP 5910	Environmental Law and Planning
CRP 5920	Land Use and Development Regulation Law

Concentration Electives: 15 credits

Concentration track electives in Theory/History/Urbanism; Advocacy/Planning/Community; Technology/Ecology/Materiality from approved list. Students may in consultation with their advisor also choose courses from CRP, ARCH, MUD, SUSE, INDD, or other relevant departments in the college or university.

Total 80 credits

Sustainable Environments

Master of Design in Sustainable Environments

The Master of Design in Sustainable Environments (MDesSE) is an initial interdisciplinary degree that focuses on holistic design strategies for the production of sustainable, resilient environments and artifacts. MDesSE students and faculty constitute a multidisciplinary, highly interactive community that is deeply engaged in understanding, promoting, and conceiving sustainable practices in design, planning, and artistic production. Students from a variety of backgrounds such as design, art, planning, education, engineering, science, etc., engage in research projects and are challenged to develop individual sustainable design strategies for issues of current relevance that conserve resources, ameliorate ecological problems, and promote social, political, and economic justice.

Coursework focuses on developing skills in modes of representation and information dissemination; foundational and emerging theoretical discourse; as well as research methods and design interventions. The degree concludes with an integrated capstone experience through a student-defined thematic project. Capstone projects are situated in different parts of the world and include themes that draw upon each student's specific area of interest while being informed by the theories, skills, methods, and tactics learned throughout the MDesSE program.

The Master of Design in Sustainable Environments degree consists of 35 credits, typically distributed over three semesters (fall, spring, and summer); however, students may choose to distribute these credits over four or five semesters. The degree is geared toward students with professional degrees in art (BFA, MFA), architecture (BArch, MArch), graphic design (BFA, MFA), interior design (BFA, MFA), industrial design (BID, MID), landscape architecture (BLA, MLA), community and regional planning (BSCR, MCRP, MUP), or engineering. Graduate students can also pursue the following double degrees in the College of Design: MArch/MDesSE, MCRP/MDesSE, MFA in IVA/MDesSE and MLA/MDesSE.

Courses primarily for graduate students, open to qualified undergraduates:

SUSE 5010: Sustainable Design in Communities

Credits: 5. Contact Hours: Lecture 2, Studio 6.

Exploring the challenges faced in implementing social, environmental, and economic sustainable solutions, this studio engages students in an interdisciplinary, team-oriented, and project-based learning environment through engagement with a Central Iowa community.

SUSE 5020: Sustainable Design Capstone Studio

Credits: 6. Contact Hours: Studio 12.

This advanced studio provides a community-based context for an interdisciplinary design team to work on a variety of self-directed, applied design research and intervention projects at multiple scales. Students utilize a common theoretical framework to organize their research and inform their interventions. Field trips.

SUSE 5110: Sustainable Design Colloquium I

Credits: 3. Contact Hours: Lecture 3.

Study and discuss practices of sustainable design and design research. Investigate responsibilities, roles, technologies and methods for studying and advancing the art and science of designing sustainable environments.

SUSE 5120: Sustainable Design Seminar

Credits: 1. Contact Hours: Lecture 1.

Students begin design research in sustainability issues by learning how to build a network of professional and academic contacts related to their individual research topics. Assignments include developing and engaging in an immersion experience related to their research.

SUSE 5130: Sustainable Design Research Writing

Credits: 3. Contact Hours: Lecture 3.

Students develop a comprehensive and conclusive research manuscript for submission to a conference or journal in their discipline. SUSE student manuscripts detail their capstone projects. Non-majors compose papers detailing completed research projects in their own discipline.

SUSE 5210: Foundation of Sustainable Design

Credits: 3. Contact Hours: Lecture 3.

Introduction to the broad frameworks and tools for implementing sustainability among a variety of environments, industries, and enterprises. Investigates the role and opportunity for sustainable design strategies.

SUSE 5310: Human Dimensions of Sustainability

Credits: 3. Contact Hours: Lecture 3.

This interdisciplinary seminar uses applied research with communities to ground students in the issues and conditions impacting social and economic sustainability. Students develop a broad understanding of community sustainability through weekly readings, discussions, and small made objects. Topics of focus include university-community partnerships, participatory design, and social constructions of sustainability.

SUSE 5400: Methods for Sustainable Design

Credits: 3. Contact Hours: Lecture 3.

Overview of qualitative, quantitative and design research methods. In-depth application of methods relevant to capstone project proposal development (SUSE 5020). Proposal must address research questions, articulation of research methods and preliminary findings grounded within contemporary theoretical discourse on Sustainable Environments. (Typically Offered: Spring)

SUSE 5500: Making Resilient Environments

(Cross-listed with CRP 5500).

Credits: 3. Contact Hours: Lecture 2.

Major theories and ideas revolving around the concept of resilience. Assessing the social and political processes associated with policy making for resilience. Application of the concept of resilience in order to understand and evaluate environments. Evaluate the different approaches toward resilience and develop an understanding of the relationship between sustainability and resilience. Case studies of communities that proactively prepare for, absorb, recover from, and adapt to actual or potential future adverse events. (Typically Offered: Spring)

Urban Design

The Master of Urban Design (M.U.D.) is an initial, interdisciplinary program of study that focuses on contemporary challenges of urbanism at local, regional and global scales. Courses are taught by faculty from Architecture, Community and Regional Planning, and Landscape Architecture; with an understanding that urban environments should be engaged through an integrated design process that includes ecological, social, material, economic, and urban policy factors.

The urban design degree reflects a deep commitment to resilient urban environments within the context of an increasingly concentrated, connected and, diverse urban world. Accordingly, the coursework engages emerging urbanization topics including:

- The formation of more adaptable, flexible and resilient cities;
- the exponential growth of megacities and steady decline of investments in traditional urban economies in the twenty-first century;
- The transformation of Industrial landscapes, particularly within the Midwestern context, and the global impact of transnational economic operations.
- the spatialization of informal economies, practices, and services across the south-north global divide;
- and, a reexamination of the potentials of hard and soft infrastructures, principles of the circular economy and a reframing of the urban-rural divide.

The program consists of 30 credits, typically distributed over three semesters (fall, spring and summer), however, students may choose to distribute these credits over four or five semesters. The degree is geared toward students with professional degrees in architecture (BArch, MArch), landscape architecture (BLA, MLA) or planning (BSCR, MCRP, MUP). Graduate students can also pursue the following double degrees in the College of Design: M Arch/MUD, MCRP/MUD and MLA/MUD.

Requirements:

URBD 5010	Urban Design Local Studio	6
URBD 5020	Urban Design Global Studio	6
History/Theory/Criticism		6
Technology/Methods		12
Total Credits		30

List of Courses:

History/Theory/Criticism - 6 credits from the following list

ARCH 5270	History, Theory, and Criticism of Chinese Architecture	3
ARCH 5280A	Studies in Architecture: Culture	3
ARCH 5750	Contemporary Urban Design Theory	3
ARCH 5970	Seminar on the Built Environment III: Theory	3
ARCH 5980	Seminar on the Built Environment IV: Topical Study	3
ARTH 5010	Issues in Visual and Material Culture Seminar	3
ARTH 5870	Nineteenth Century Art	3
ARTH 5880	Modern Art and Theory	3
ARTH 5920	Art History in Europe	3
ARTH 5940	Women/Gender in Art	3
ARTH 5950	Art and Theory Since 1945	3
ARTH 5960	History of Photography	3
ARTH 5970	Green Art: Earthworks and Beyond	3
CRP 5290	Planning in Developing Countries	3
CRP 5610	Planning Theory	3

CRP 5630	Planning the American Metropolis	3
LA 5780D	Topical Studies in Landscape Architecture: History/Theory/Criticism	2-3
URBD 5110	North American Urbanization	3
URBD 5210	Foundations of Urban Design	3
URBD 5220	Contemporary Urban Design Practices	3
URBD 5310	Methods of Urban Design Workshop	3
URBD 5330	Urbanism Theory and Methods	3

Technology/Methods - 12 credits from the following list

ARCH 4320	Advanced Computer Lighting and Rendering	3
ARCH 4340	Advanced Computer-aided Architectural Design	3
ARCH 5330	Digital Fabrication	3
ARCH 5340	Topics in Computer-aided Architectural Design	3
ARCH 5360	Advanced Design Media	3
ARCH 5580	Sustainability and Green Architecture	3
ARTGR 5730	Multimedia Design	3
ARTGR 5780	Graphic Design Advanced Web Design	3
ARTGR 5790	Wayfinding Design	3
ARTIS 4080	Principles of 3D Animation	3
ARTIS 4930C	Workshop: Computer Art and Design	1-3
ARTIS 5070	Principles of Character Animation	3
ARTIS 5080	Computer Aided Animation and Visualization	3
ARTIS 5090	Computer/Video Game Design and Development	3
ARTIS 5480	Digital Textile Design	3
ARTIS 5560	Relief Printmaking: Digital/Traditional	3-4
ARTIS 5570	Intaglio and Monotype Printmaking: Digital / Traditional	3-4
ARTIS 5580	Lithography: Digital / Traditional	3
CRP 5510	Introduction to Geographic Information Systems	3
CRP 5520	Geographic Data Management and Planning Analysis	3
CRP 5530	Analytical Planning/GIS	3
CRP 5560	GIS Programming and Automation	3
CRP 5950	Seminar in GIS Applications/Research	1
DSNS 5010	Introduction to Research Design	3
INDD 6400	Advanced Digital Technologies	3
LA 5580	Web Mapping and Spatial Data Visualization	3
LA 5780G	Topical Studies in Landscape Architecture: Graphics	2-3
LA 5780K	Landscape Architecture: Computer Applications	2-3

LA 5780L	Topical Studies in Landscape Architecture: Ecological Design	2-3

COLLEGE OF ENGINEERING

W. Samuel Easterling, James L. and Katherine S. Melsa Dean of Engineering

Arun Somani, Senior Associate Dean

Sriram Sundararajan, Associate Dean for Academic Affairs

Connie Hargrave, Associate Dean for Equity and Engagement

Sri Sritharan, Assistant Dean for Research

Cris Schwartz, Assistant Dean for Engineering Student Success

www.engineering.iastate.edu (<http://www.engineering.iastate.edu/>)

Aligning Education in Engineering with the University Mission

The mission of Iowa State University is to create, share, and apply knowledge to make Iowa and the world a better place. Students will become broadly educated, global citizens who are culturally informed, technologically adept, and ready to lead. The College of Engineering echoes this philosophy and emphasizes preparing its graduates to meet the challenges of the 21st century.

Engineering education seeks to develop a capacity for objective analysis, synthesis, and design to obtain a practical solution. The engineering programs at Iowa State University are designed to develop the professional competence of a diverse student body and, by breadth of study, to prepare students to solve the technical problems of society while considering the ethical, social, and economic implications of their work at state, national and global levels.

The focus of each curriculum is to strengthen students' critical thinking, creative abilities, and communication skills. Students in engineering will have the opportunity for interdisciplinary and experiential learning through learning communities, service learning, internships and cooperative education, as well as research, capstone, and study abroad experiences.

The problem-solving skills learned from an engineering education at Iowa State University also provide an excellent launching pad for careers not only in engineering, but also medicine, law, business, and many other fields.

Registration as a professional engineer, which is granted by each individual state, is required for many types of positions. The professional curricula in engineering at Iowa State University are designed to prepare a graduate for subsequent registration in all states.

Seniors in accredited curricula of the College of Engineering are encouraged to take the Fundamentals of Engineering Examination toward professional registration during their final academic year. Seniors in engineering curricula who have obtained at least 6 semester credits

in surveying may take the Fundamentals Examination for professional registration as land surveyors.

Concurrent Graduate/ Undergraduate Programs

Several engineering programs offer the opportunity for well-qualified undergraduate juniors and seniors to pursue a graduate degree in their program while finishing the undergraduate requirements. The programs offering concurrent undergraduate/graduate degrees are aerospace engineering, agricultural engineering, biological systems engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, materials engineering, mechanical engineering and software engineering.

Programs offering concurrent Bachelor of Science/Master of Business Administration degrees are aerospace engineering, agricultural engineering, biological systems engineering, chemical engineering, civil engineering, computer engineering, construction engineering, electrical engineering, industrial engineering, materials engineering, mechanical engineering and software engineering. For more information, refer to the graduate study sections for each engineering program. Advanced work in engineering is offered in the post-graduate programs. See the Graduate College section of this catalog.

Joint Undergraduate Programs

A Bachelor of Science degree in software engineering is offered in the College of Engineering and the College of Liberal Arts and Sciences.

Accreditation

Thirteen undergraduate engineering programs are accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org> (<http://www.abet.org/>). These thirteen programs are: aerospace, agricultural, biological systems, chemical, civil, computer, construction, cyber security, electrical, industrial, materials, mechanical and software engineering. Accreditation status is indicated in the Courses and Programs section for each engineering program.

Organization of Curricula

All curricula in engineering are designed as four-year programs. They are structured in two phases: a basic program and a professional program. The basic program consists primarily of subjects fundamental and common to all branches of engineering and includes chemistry, physics, mathematics, engineering computations, and English. The professional phase of a curriculum includes intensive study in a particular branch of engineering, as well as a continuation of supporting work in mathematics, basic sciences, humanities, and social sciences.

Students should complete the requirements of the basic program before proceeding to a professional program.

Preparation for the Engineering Curricula

In addition to the freshman admission requirements for direct from high school students, the college also requires 2 years of a single foreign language. Students coming in without the 2 years of a single foreign language must meet this requirement by no later than the time of graduation. Other high school credits particularly important to students wishing to study engineering include:

- 2 years of algebra,
- 1 year of geometry
- 1/2 year of trigonometry
- 1/2 year of pre-calculus
- 1 year each of chemistry, biology, and physics
- 3 years of social science
- 4 years of English

See Index (<http://catalog.iastate.edu/azindex/>) for specific admission requirements.

Placement in mathematics, English, and chemistry will generally be based on high school preparation and test scores. Advanced placement is possible for exceptionally well-prepared students. Students who are not adequately prepared may be encouraged or required to take additional preparatory coursework and should expect to spend more than the customary time to complete the engineering program. Any coursework which is preparatory or remedial in nature cannot be used to satisfy credit requirements for graduation in any of the engineering curricula.

Engineering Basic Program

Please see "Basic Program for Engineering Curricula" section.

Requirement for Graduation

In order to graduate in a professional engineering curriculum, students must have a minimum GPA of 2.00 in a department-designated group of 2000-level and above courses known as the Core. These courses will total no fewer than 24 semester credits.

Engineering Minors

The College of Engineering offers five undergraduate minors which are open only to students in the College of Engineering. These are minors in biomedical engineering, cyber-physical systems, energy systems, engineering sales and nondestructive evaluation. These minors must include at least nine credits which are beyond the total used to meet curriculum requirements.

The biomedical engineering minor is a 17-credit interdisciplinary program that complements a student's major discipline by providing additional insight into the interactions between various engineering disciplines

and biomedically relevant systems. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Biomedical Engineering in Courses and Programs.

The energy systems engineering minor is a 15-credit program that provides engineering students with focused educational opportunities in the broad area of energy systems. Students will understand broad energy perspectives, the language of energy systems and the economic, environmental, and policy issues related to energy. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Energy Systems Engineering in Courses and Programs or see <http://www.me.iastate.edu/energy-systems-minor/>.

The engineering sales minor is a 15-credit minor that complements the technical training in the student's major discipline by providing the tools and knowledge required for technical (i.e. business-to-business) sales careers. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Engineering Sales in Courses and Programs.

The nondestructive evaluation minor (16 credit minimum) opens to engineering students who have met the basic program requirements and are not on academic warning or probation. The minor is supervised by an inter-disciplinary Engineering faculty committee. For minor course requirements, refer to Nondestructive Evaluation Engineering in Courses and Programs.

Engineering Minor (Interdisciplinary)

The College of Engineering offers an undergraduate minor in cyber security which is open to all students at ISU who meet the prerequisites. The cyber security minor is a 15-credit minor that is intended for students studying computer engineering, computer science, software engineering or management information systems with the goal of enabling them to work in cyber security. For minor course requirements, refer to the Cyber Security in Courses and Programs.

Undergraduate Majors and Minors Outside the College of Engineering

In addition to the engineering degree program, students may earn majors or minors in other colleges of the university. A major or minor program must meet all requirements of the offering department or program and its college and contain credits beyond the requirements for a B.S. degree in engineering. A minimum of 15 additional credits is required for each major area of study and an additional 9 credits for each minor.

Advising System

The purpose of the advising system in the College of Engineering is to work constructively with students in developing their individual academic

programs and to provide a resource contact person for students during their college careers.

The college offers an orientation program during the spring and summer for students planning to enter in the fall, and during the fall for students planning to enter in the spring. Students may also complete orientation online. All entering students are encouraged to attend orientation which includes meeting with an academic advisor to register for classes. Placement assessments given during the orientation program help determine the student's current level of proficiency which enables the academic advisor to prepare an appropriate course schedule for the student.

Special Programs

All engineering students are strongly encouraged to participate in either the cooperative education or internship programs. Students who are qualified to participate in the engineering honors program are also urged to do so. These programs are integrated into the professional engineering curricula and may require additional work. However, both these professional and academic programs offer opportunities that will enrich the standard academic experience. Engineering students are also encouraged to take advantage of study abroad opportunities available through the College of Engineering's International Programs Office.

a. Cooperative Education Program. The College of Engineering offers, through its curricula, an experiential education program. Enrollment in the program allows students to gain practical work experience in their career field while attending college. In general, students enrolled in the co-op program will require an additional semester to complete curriculum requirements.

Cooperative programs are a mechanism by which a student may work full-time for one semester per academic or calendar year. The student has the opportunity to assess career paths within her/his chosen curriculum and the employer evaluates the student's potential as a future full-time employee. Both domestic and international co-op programs are allowed. Cooperative education students pay no tuition to the university during their work periods and do not receive credit hours for their work experience. Students register for a non-credit cooperative education course (3980) for fall or spring and are considered full-time students while enrolled in these courses. For additional information contact your academic advisor and the Office of Engineering Career Services.

b. Internship Program. The College of Engineering offers, through its curricula, an experiential education program. Internships are a mechanism by which a student may work full-time for the summer.

Enrollment in the program allows students to gain practical work experience in their career field while attending college.

Internship students pay no tuition to the university during their work periods and do not receive credit hours for their work experience. Students who register for the internship course (3960) for the summer

are considered to be full-time students. For additional information contact your academic advisor and the Office of Engineering Career Services.

c. Honors Program. The College of Engineering participates in the University Honors Program (see Index (<http://catalog.iastate.edu/azindex/>)). The honors program is designed for students with above average ability who wish to individualize their programs of study. For further details consult the chair of the Engineering College Honors Program Committee or your departmental honors program advisor.

d. Engineering International Engagement. In a world where the sun never sets, engineers must be prepared to understand other cultures and other ways of doing business. Engineers must expand their exportable skills, language and cross-cultural skills.

The College of Engineering has formed worldwide partnerships to create opportunities for students to work and study with leading universities in other countries and multinational corporations. With careful planning, students may earn credit in courses that fulfill their degree requirements. To learn more about work and study abroad, visit the Engineering International Engagement website: <http://www.engineering.iastate.edu/studyabroad/>. (<http://www.engineering.iastate.edu/studyabroad/>)

Departments of the College

For information on undergraduate options refer to the following curriculum sections, and for graduate specializations or certificate programs, refer to the Courses and Programs section of the catalog.

Engineering

Engineering

Two Bachelor's Degrees versus a Degree and Second Major

A student with multiple curricula within the College of Engineering is permitted to earn only multiple degrees. All requirements for each curricula must be met plus an additional 30 credits for each curricula being pursued beyond the curriculum which requires the most credits.

Students in the College of Engineering are able to earn a degree with a second major/curriculum as long as the second major/curriculum is within another college, meets all requirements of the additional programs and contains a minimum of 15 additional credits beyond the requirements for a B.S. degree in engineering for each additional area of study.

Basic Program for Engineering Curricula

The Basic Program is a set of courses that provides a foundation common to all engineering curricula. Students normally enroll in most of the Basic Program courses during their first year. Before enrolling in engineering courses at the 2000-level and above, students enrolled in the College of Engineering must do the following:

1. Complete the Basic Program with a Basic Program grade point average (GPA) of at least 2.00.
2. Earn an ISU cumulative GPA of at least 2.00.

A grade of C or better is required for any transfer credit course applied to the Basic Program. Grades from transfer courses will not be used in computing the Basic Program GPA.

Students enrolled in the College of Engineering who have not met the above requirements may enroll for no more than two semesters in 2000-level engineering courses. Students not enrolled in the College of Engineering may take engineering courses as long as they meet the prerequisites and space is available; only the first two semesters of engineering courses at the 2000-level and above taken at ISU while a student is not enrolled in the College of Engineering can be applied toward an engineering degree.

Entering undergraduates must demonstrate proficiency in trigonometry based on test scores, or by having transfer credits from a college trigonometry course, or by-passing MATH 1430 Preparation for Calculus before enrolling in MATH 1650 Calculus I.

The Department of English may recommend placement in one or more sections of ENGL 0990 or ENGL 1010 if the placement test administered to students whose first language is not English indicates deficiencies. Satisfactory completion of the recommended English course(s) will be required of students to complete their Basic Program.

Basic Program

(A minimum GPA of 2.00 required for this set of courses. Transfer courses are not used in the Basic Program GPA computation).

MATH 1650	Calculus I	4
MATH 1660	Calculus II	4
ENGL 1500	Critical Thinking and Communication (Must have a C or better)	3
CHEM 1670 or CHEM 1770 or CHEM 2010	General Chemistry for Engineering Students General Chemistry I Advanced General Chemistry	4-5

†	

† Arranged with instructor.

ENGL 2500 Written, Oral, Visual, and Electronic Composition is normally taken in the second year. With advanced placement to ENGL 2500, credit for ENGL 1500 Critical Thinking and Communication is earned upon successful completion of ENGL 2500 Written, Oral, Visual, and Electronic Composition, but only when ENGL 2500 Written, Oral, Visual, and Electronic Composition is completed at Iowa State.

* Students enrolled in the joint software engineering degree program should take SE 1010 Software Engineering Orientation, note that ENGR 1010 can be substituted for SE 1010.

Aerospace Engineering Undergraduate Study

For undergraduate curriculum in aerospace engineering leading to the degree Bachelor of Science. The Aerospace Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the commission's General Criteria and Program Criteria for Aerospace and Similarly Named Engineering Programs.

The aerospace engineer is primarily concerned with the design, analysis, testing, and overall operation of vehicles which operate in air and space. The curriculum is designed to provide the student with an education in the fundamental principles of aerodynamics, flight dynamics, propulsion, structural mechanics, flight controls, design, testing, and space technologies. A wide variety of opportunities awaits the aerospace engineering graduate in research, development, design, production, sales, and management in the aerospace industry, and in many related industries in which fluid flow, control, structural, and transportation challenges play major roles.

Make To Innovate (M:2:I) is an exciting new program in the Aerospace Engineering Department that engages students in hands-on projects to augment their understanding of engineering fundamentals.

A cooperative education program in aerospace engineering is available in cooperation with government agencies and industry. The usual four-year curriculum is extended for students who participate in alternating industrial experience periods and academic periods. This arrangement

offers valuable practical experience and financial assistance during the college years.

Undergraduate Mission and Educational Objectives

The Department of Aerospace Engineering maintains an internationally recognized academic program in aerospace engineering via ongoing consultation with students, faculty, industry, and aerospace professionals. Results of these consultations are used in a process of continuous academic improvement to provide the best possible education for our students.

Mission statement:

The mission of the aerospace engineering program is to prepare the aerospace engineering student for a career with wide-ranging opportunities in research, development, design, production, sales, and management in the aerospace industry and in the many related industries which are involved with the solution of multi-disciplinary, advanced technology problems.

Program Educational Objectives:

The objectives of the Aerospace Engineering program at ISU are to produce graduates:

- Who actively contribute to the field of aerospace, related fields or other disciplines;
- Are critical thinkers and lifelong learners; and
- Are aware of the societal, economic and environmental impact of their work.

Student Learning Outcomes

Upon graduation, students should have:

- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- An ability to communicate effectively with a range of audiences.
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

CURRICULUM IN AEROSPACE ENGINEERING

Leading to the degree Bachelor of Science.

TOTAL CREDITS REQUIRED: 129.0.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements for either required or elective courses.

INTERNATIONAL PERSPECTIVES ¹: 3 CR.

U.S. DIVERSITY ¹: 3 CR.

COMMUNICATION PROFICIENCY/LIBRARY REQUIREMENT:

ENGL 1500	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
LIB 1600	Introduction to College Level Research	1
One of the following:		3
ENGL 3140	Technical Communication (C or better in this course)	3
ENGL 3090	Proposal and Report Writing (C or better in this course)	3

GENERAL EDUCATION ELECTIVES: 12.0 CR. ²

Complete 12 cr. General Education Electives are requirements for graduation so may not be taken on a P-NP basis.

BASIC PROGRAM: 24 CR.

A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 1670	General Chemistry for Engineering Students	4

3 credits from the following	3
any AERE or EM graduate level (5000+ level) course	
AERE 4070 Applied Formal Methods	
AERE 4120 Spacecraft Electric Propulsion	
AERE 4150 Rocket Propulsion	
AERE 4170 Experimental Mechanics	
AERE 4220 Vibrations and Aeroelasticity	
AERE 4230 Composite Flight Structures	
AERE 4260 Design of Aerospace Structures	
AERE 4320 Flight Control Systems II	
AERE 4330 Spacecraft Dynamics and Control	
AERE 4420 V/STOL Aerodynamics and Performance	
AERE 4450 Experimental Flow Mechanics and Heat Transfer	
AERE 4460 Computational Fluid Dynamics	
AERE 4480 Fluid Dynamics of Turbomachinery	
AERE 4510 Astrodynamics II	
AERE 4520 Introduction To Systems Engineering And Analysis	
AERE 4630 Introduction to Multidisciplinary Design Optimization (MDO)	
AERE 4640 Spacecraft Systems	
AERE 4680 Large-Scale Complex Engineered Systems (LSCES)	
AERE 4800 Ultrasonic Nondestructive Evaluation	
AERE 4830 Aeroacoustics	
One of the following:	3
ENGL 3140 Technical Communication (Must have a C or better in this course)	3
ENGL 3090 Proposal and Report Writing (Must have a C or better in this course)	3
Technical Electives (see below) ²	3
Career Electives (see below) ²	3
Total Credits	40

Technical Electives, 3 cr. and Career Electives, 3 cr. selected from preceding AERE list or departmental-approved 3000-level or above courses relevant to technical and career areas.

Seminar/Co-op/Internships/Flight Experience:

AERE 1920	Aerospace Seminar
AERE 3010	Flight Experience

Co-op and internships are optional

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also allowed by the department to meet other course requirements within the degree

program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

2. Choose from department approved list. (http://www.aere.iastate.edu/students/undergraduate_program/)
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Nondestructive Evaluation (NDE)

The NDE Minor (http://catalog.iastate.edu/collegeofengineering/non_destructiveevaluationengineering/) is multidisciplinary and open to undergraduates in the College of Engineering.

BS/MS & BS/ME Degree Programs

The concurrent BS/MS & BS/ME (<https://www.aere.iastate.edu/graduate-students/concurrent-degrees/>) classification offers an opportunity for well-qualified Iowa State juniors and seniors to begin working on a master's degree before completing a bachelor's degree.

Graduate Study

The department offers graduate programs that lead to the degrees Master of Engineering, Master of Science, and Doctor of Philosophy with major in aerospace engineering and minor work to students taking major work in other departments. For all graduate degrees, it is possible to establish a co-major program with another graduate degree-granting department. Within the aerospace program, students can specialize in one or more of the following areas: aerospace systems design, atmospheric and space flight dynamics, computational fluid dynamics, control systems, wind engineering, fluid mechanics, optimization, structural analysis, and non-destructive evaluation.

Master of Science and Master of Engineering

The Master of Science degree requires a thesis and has strong research emphasis. The Master of Science degree is recommended for students who anticipate entering a doctoral program later. The Master of Engineering degree does not require either research credits or a thesis and is intended for students who do not anticipate pursuing a doctoral degree. The Master of Engineering degree can be completed with coursework only or with a combination of coursework and creative component. Credits for creative component will be obtained by registering for **AERE 5990 Creative Component**. A written report and an oral presentation will be given to the student's graduate committee.

At least 30 credits of acceptable graduate work are required for both the Master of Science and the Master of Engineering degrees. For specific course, research, and creative component requirements, see the departmental Graduate Student Handbook (<http://www.aere.iastate.edu/files/2015/04/AerE-Graduate-Handbook-Revised-S15.pdf>).

Bachelor of Science/Master of Science Concurrent Degree Program

The department offers concurrent BS/MS and BS/ME degree programs (<http://www.aere.iastate.edu/students/concurrent-degrees/>) and a concurrent B.S./MBA degree program which offer an opportunity for well-qualified Iowa State juniors and seniors to begin working on a master's degree before completing a bachelor's degree. The concurrent degree programs reduce by one year the normal time period for completing both degrees separately.

Preparation for Graduate Work

The normal prerequisite for major graduate work in aerospace engineering is the completion of an undergraduate curriculum substantially equivalent to that required of aerospace engineering students at this university. Due to the diversity of interests of aerospace faculty, students whose prior undergraduate or graduate education has been in allied engineering and/or scientific fields may also qualify. In such cases, it may be necessary for the student to take additional work to provide the requisite aerospace background. A prospective graduate student is urged to specify the degree program and the specific field(s) of interest on the application for admission.

Courses are offered at the times stated in the course description. Where no specific time of offering is stated, the course may be offered during any semester provided there is sufficient demand.

Graduate Minor Work

Minor work for aerospace engineering majors is usually selected from mathematics, physics, electrical engineering, engineering mechanics, mechanical engineering, materials science, meteorology, computer science, and computer engineering.

Agricultural Engineering

For the undergraduate curriculum in Agricultural Engineering leading to the degree Bachelor of Science. The Agricultural Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the commission's General Criteria and Program Criteria for Agricultural and Similarly Named Engineering Programs.

Goal: To educate students in the analysis and design of machinery, animal housing, and environmental systems for the production, processing, storage, handling, distribution, and use of food, feed, fiber and other biomaterials, and the management of related natural resources, by integrating basic physical and biological sciences with engineering design principles.

Student Learning Outcomes: Graduates of the Agricultural Engineering curriculum should have, at the time of graduation:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives: Three to five years after graduation, our graduates will be using the knowledge, skills, and abilities from their agricultural engineering degree to improve the human condition through successful careers in a wide variety of fields. They will be effective leaders, collaborators, and innovators who address environmental, social, technical, and business challenges. They will be engaged in life-long learning and professional development through self-study, continuing education, or graduate/professional school.

Graduates find employment in diverse ag- and bio-related industries and government agencies dealing with agricultural machines and buildings, animal and environmental control, grain processing and handling, soil and water resources, food, biorenewables, and biotechnology. Their work involves engineering design, development, testing, research, manufacturing, consulting, sales, and service. Students are highly encouraged to participate in either cooperative education or internship programs.

The department also offers a Bachelor of Science curriculum in biological systems engineering. Additionally, the department offers Bachelor of Science curricula in agricultural systems technology and in industrial technology.

Well-qualified juniors and seniors in agricultural engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a Bachelor of Science degree in agricultural engineering and a Master of Science degree in agricultural engineering. A concurrent Bachelor of Science and Master of

Business Administration program is also offered by the department. Refer to Graduate Study for more information.

Curriculum in Agricultural Engineering

Administered by the Department of Agricultural and Biosystems Engineering.

Leading to the degree bachelor of science.

Total credits required:

126.0 cr Land and Water Resources Engineering Option

128.0 cr Power and Machinery Engineering Option

128.0 cr Animal Production Systems Engineering Option.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communication Proficiency/Library requirement :

ENGL 1500	Critical Thinking and Communication (Must have a C or better in this course)	3

ENGL 2500	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3

LIB 1600	Introduction to College Level Research	1

Communication Elective: One of the following (Must have a C or better in this course)		3

AGEDS 3110	Presentation and Sales Strategies for Agricultural Audiences	

ENGL 3090	Proposal and Report Writing	

ENGL 3140	Technical Communication	

MKT 4500	Advanced Professional Selling	

SPCM 2120	Fundamentals of Public Speaking	

SPCM 3120	Business and Professional Speaking	

Social Sciences and Humanities: 12 cr.^{1,2}

3 credits from international perspectives-university approved list	3

3 credits from U.S. diversity-university approved list	3

6 credits from Social Sciences and Humanities courses-department approved list	6

Total Credits	12

Basic Program: 24 cr.

A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section. Within the Agricultural Engineering Basic Program, students are required to complete CHEM 1670 and CHEM 1670L or the sequence of CHEM 1770, CHEM 1770L, and CHEM 1780. This is a departmental requirement within the College of Engineering Basic Program requirements. CHEM 1780 credits can then be applied to the Math/Science Elective within the options of Power and Machinery

Engineering and Animal Production Systems Engineering of the Agricultural Engineering major requirements.

Total Credits		39

Co-op/Internships (Optional)

- These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
U.S. Diversity, International Perspectives and Social Science/ Humanities courses may not be taken Pass/Not Pass.
- Choose from department approved list. (<http://www.abe.iastate.edu/undergraduate-students/agricultural-engineering/ae-curricula/>)

- See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

TRANSFER CREDIT REQUIREMENTS

Students graduating with a degree in AE or BSE are required to have a minimum of 18 credits of 3000-level and 4000-level ABE courses taken at Iowa State University (excluding 4900, 4150, and 4160), and must complete the two-semester ABE Capstone sequence (ABE 4150 & 4160) at Iowa State University. The Department of Agricultural & Biosystems Engineering requires a grade of C or better for any transfer credit course that is applied to the degree program.

See also: A 4-year plan of study grid showing course template by semester.

The Department of Agricultural and Biosystems Engineering has concurrent Bachelor of Science /Master of Science (B.S./M.S.) programs designed especially for departmental seniors who wish to pursue advanced studies. Concurrent BS/MS programs are agricultural engineering (B.S.) with agricultural and biosystems engineering (M.S.) and biological systems engineering (B.S.) with agricultural and biosystems engineering (M.S.).

The concurrent B.S./M.S. program allows seniors to:

- Become eligible for a research assistantship during their senior year.
- Complete an M.S. degree (with thesis) within 18 months of B.S. graduation.

For more information about our concurrent undergraduate and graduate programs in Agricultural & Biosystems Engineering, visit: <https://www.abe.iastate.edu/graduate-students/abe-concurrent-degrees/>.

Graduate Study

The department offers Master of Science, Master of Engineering, and Doctor of Philosophy degrees with a major in agricultural and biosystems engineering. Within the agricultural and biosystems engineering major the student may specialize in advanced machinery engineering, animal production systems engineering, biological and process engineering, occupational safety engineering, or water and environmental stewardship engineering. Details on current research programs available at <http://www.abe.iastate.edu/>. (<http://www.abe.iastate.edu/>)

For the Master of Science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the Master of Engineering program are 32 and 27. For the Doctor of Philosophy degree, at least 72 credits of acceptable graduate work must be completed with a

minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and Doctor of Philosophy degrees in industrial and agricultural technology.

The department also participates in interdepartmental majors in environmental science, sustainable agriculture, human computer interaction, and toxicology (see Index).

Biological Systems Engineering

For the undergraduate curriculum in Biological Systems Engineering leading to the degree Bachelor of Science. The Biological Systems Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the commission's General Criteria and Program Criteria for Biological and Similarly Named Engineering Programs.

Biological Systems Engineering integrates life sciences with engineering to solve problems related to, or using, biological systems. These biological systems may include microbes, plants, animals, humans and/or ecosystems. Biological systems engineers have a worldview shaped by an understanding of fundamental principles of engineering and life-sciences. They use their understanding of engineering to analyze organisms or ecosystems, and their knowledge of biological systems to inspire and inform their designs. They approach engineering design from a biological systems perspective, appreciating the complexity of biological systems and developing solutions that accommodate and anticipate the adaptability of biological systems.

Goal: To educate students to solve problems related to biorenewables production and processing, water quality, environmental impacts of the bioeconomy, food processing, and biosensors, and in so doing to prepare students for professional practice and post-graduate educational opportunities.

Student Learning Outcomes: Graduates of the Biological Systems Engineering curriculum should have at the time of graduation:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must

consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives: Three to five years after graduation, our graduates will be using the knowledge, skills, and abilities from their biological systems engineering degree to improve the human condition through successful careers in a wide variety of fields. They will be effective leaders, collaborators, and innovators who address environmental, social, technical, and business challenges. They will be engaged in life-long learning and professional development through self-study, continuing education, or graduate/professional school.

Well-qualified juniors and seniors in biological systems engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a Bachelor of Science degree in biological systems engineering and a Master of Science degree in agricultural engineering. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses.

A concurrent Bachelor of Science and Master of Business Administration program is also offered by the department.

The department also offers a Bachelor of Science curriculum in agricultural engineering. See College of Engineering. Additionally, the department offers Bachelor of Science curricula in agricultural systems technology and in industrial technology. See College of Agriculture and Life Sciences.

The department also participates in interdepartmental majors in environmental science, sustainable agriculture, human computer interaction, and toxicology (see Index (<http://catalog.iastate.edu/azindex/>)).

Curriculum in Biological Systems Engineering

Administered by the Department of Agricultural and Biosystems Engineering.

Leading to the degree Bachelor of Science.

Total credits required:

127.0 cr Ecological Engineering Option

128.0 cr Food & Bioprocess Engineering Option

128.0 cr Open Option.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

ENGL 1500	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
LIB 1600	Introduction to College Level Research	1
Communication Elective: One of the following (Must have a C or better in this course)		3
AGEDS 3110	Presentation and Sales Strategies for Agricultural Audiences	
ENGL 3090	Proposal and Report Writing	
ENGL 3140	Technical Communication	
MKT 4500	Advanced Professional Selling	
SPCM 2120	Fundamentals of Public Speaking	
SPCM 3120	Business and Professional Speaking	

Social Sciences and Humanities: 12 cr.^{1,2}

3 credits from international perspectives-university approved list	3
3 credits from U.S. diversity-university approved list	3
6 credits from Social Sciences and Humanities courses-department approved list	6

Total Credits **12**

Basic Program: 24 cr.

A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section. Within the Biological Systems Engineering Basic Program, students are required to complete CHEM 1670 and CHEM 1670L or the sequence of CHEM 1770, CHEM 1770L, and CHEM 1780. This is a departmental requirement within the College of Engineering Basic Program requirements. The CHEM 1780 course will show as completing the chemistry portion of the Basic Program and the credits will be applied towards a student's classification.

ABE 1600	Systematic Problem Solving and Computer Programming ³	3
CHEM 1670	General Chemistry for Engineering Students	4
or CHEM 1770 and CHEM 1780

Sequence I, II & III Elective ²		9

Total Credits 16

Co-op/Internships (Optional)

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
U.S. Diversity, International Perspectives and Social Science/ Humanities courses may not be taken Pass/Not Pass.
2. Choose from department approved list. (<http://www.abe.iastate.edu/undergraduate-students/biological-systems-engineering/bse-curricula/>)
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

TRANSFER CREDIT REQUIREMENTS

Students graduating with a degree in AE or BSE are required to have a minimum of 18 credits of 3000-level and 4000-level ABE courses taken at Iowa State University (excluding 4900, 4150, and 4160), and must complete the two-semester ABE Capstone sequence (ABE 4150 & 4160) at Iowa State University. The Department of Agricultural & Biosystems Engineering requires a grade of C or better for any transfer credit course that is applied to the degree program.

The Department of Agricultural and Biosystems Engineering has concurrent Bachelor of Science /Master of Science (B.S./M.S.) programs designed especially for departmental seniors who wish to pursue advanced studies. Concurrent B.S./M.S. programs are: agricultural engineering (BS) with agricultural and biosystems engineering (M.S.) and biological systems engineering (B.S.) with agricultural and biosystems engineering (M.S.).

The concurrent B.S./M.S. program allows seniors to:

- Become eligible for a research assistantship during their senior year.
- Complete an M.S. degree (with thesis) within 18 months of B.S. graduation.

For more information about our concurrent undergraduate and graduate programs in Agricultural & Biosystems Engineering, visit: <https://www.abe.iastate.edu/graduate-students/abe-concurrent-degrees/>.

Graduate Study

The department offers Master of Science, Master of Engineering, and Doctor of Philosophy degrees with a major in agricultural and biosystems engineering. Within the agricultural and biosystems engineering major the student may specialize in advanced machinery engineering, animal production systems engineering, biological and process engineering, occupational safety engineering, or water and environmental stewardship engineering. Details on current research programs available at <http://www.abe.iastate.edu/>.

For the Master of Science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the Master of Engineering program are 32 and 27. For the Doctor of Philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and Doctor of Philosophy degrees in industrial and agricultural technology.

Biomedical Engineering Undergraduate Study

For undergraduate curriculum in biomedical engineering leading to the degree Bachelor of Science.

engineering.iastate.edu/bme/ (<https://www.engineering.iastate.edu/bme/>)

Administered as an interdepartmental degree program.

Biomedical engineering seeks to better human health by designing engineered systems that can interface with biomedical systems

or by controlling the biomedical systems themselves. Biomedical engineers leverage their deep understanding of fundamental scientific disciplines including physics, chemistry and biology as well as a broad understanding of different traditional engineering disciplines such as chemical, electrical and mechanical engineering. Broad areas of biomedical engineering include medical molecules and materials, biomedical mechanics and manufacturing and biomedical instrumentation that allow for engineering of cells and tissues or delivery of drugs and vaccines or devices that can detect or alleviate disease, regenerate tissue or assist after injury.

Practicing biomedical engineers work in research, uncovering fundamental properties of either biomedical systems or the engineered systems with which they interface. They work as product engineers, bringing innovative technology to bear in a usable product that can pass approval processes by the relevant regulatory organizations or process engineers, developing manufacturing approaches that can produce products economically, safely and under the proper conditions to ensure their use in the human body. Finally, biomedical engineers work in technical sales, intellectual property or governmental regulation.

The curriculum of biomedical engineering includes broad training in math, chemistry, physics, biology as well as engineering sciences such as thermodynamics, materials, fluid and solid mechanics and circuits. The curriculum also provides training in areas such as disease therapeutics and drug delivery, implants and tissue engineering, advanced diagnostics and biosensors, prosthetics and organ mechanics, medical device manufacturing, and medical imaging and equipment electronics. This training will culminate in lab and design courses that will emphasize a synthesis of these topics to design, build and test biomedical systems.

The curriculum will prepare students for a career in serving society through designing and manufacturing biomedical systems that improve human health. The curriculum will also prepare students to navigate difficult ethical questions through training in bioethics and will include broader training in the social sciences and humanities. This prepares graduates to better gauge the impact of biomedical engineering design decisions on broader society. Finally, graduates will be well-trained to communicate both with other technical colleagues as well as the broader public that benefits from the biomedical engineering products.

Student Learning Outcomes

Graduates of the biomedical engineering curriculum should have, at the time of graduation:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety,

and welfare, as well as global, cultural, social, environmental, and economic factors.

3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives

The objectives of the biomedical engineering program at Iowa State University are to produce graduates who:

- Will excel in careers as professional biomedical engineers in the businesses and industries related to biomedical engineering.
- Will successfully pursue research and advanced studies in biomedical engineering or in related professional fields such as medicine, law and business.

A cooperative education program is available to students in biomedical engineering.

Curriculum in Biomedical Engineering

Total credits required: 129

See also basic program and special programs.

The BME Program requires a grade of C or better from any transfer credit course that is applied to the degree program but will not be calculated into the ISU cumulative GPA, Basic Program GPA, or Core GPA.

BASIC PROGRAM: 24 CR.

A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Basic Program for Engineering Curricula in College of Engineering section.

BME 1600	Biomedical Engineering Problems with Computer Applications Laboratory	3
CHEM 1670	General Chemistry for Engineering Students or CHEM 1770 General Chemistry I	4
ENGL 1500	Critical Thinking and Communication	3
ENGR 1010	Engineering Orientation	
LIB 1600	Introduction to College Level Research	1

Biomedical Engineering Minor

Minor supervised by an interdisciplinary faculty committee, administered by the Chemical and Biological Engineering Department. The Biomedical Engineering minor is a unique opportunity for engineering students to acquire a multi-disciplinary engineering and life sciences background for entering the field of biomedical engineering.

The program is open to all undergraduate engineering students at Iowa State University. This minor will provide students with a foundation of core biology and engineering relevant to further study in biomedical engineering along with an introduction to the application of engineering principles to biomedical problems from a multidisciplinary perspective as well as the applications within the majors of the participating departments.

A minimum of 17 cr. meeting the six requirements below with a minimum of 9 of those credits not being used to meet degree requirements and a minimum of 6 cr. at the 3000 level or above. No more than 3 cr. of 4900 credit may be applied to this minor.

BIOL 2120	Principles of Biology II	3
CHE 2200/2200	Introduction to Biomedical Engineering	3
BIOL 2560	Fundamentals of Human Physiology	3
or BIOL 3350	Principles of Human and Other Animal Physiology	
Introductory Engineering Elective *		3
Advanced Engineering Elective **		3
Professional Elective ***		2-3
Total Credits		17-18

*A second (Introductory) engineering course from a department other than that of your major. The topic of the course should have ready application to later BME-related electives in that discipline (CE 2740; CHE 2100; CPRE 2810; EE 2010, EE 3140, or EE 4420 and EE 4480; EM 3240 or ABE 3780; IE 2710; MATE 2730; ME 2310; or other courses approved by Minor Chair).

** 3000-5000 level engineering course with clear biomedical engineering application (BME 4900, BME 3410, EE 4500; CHE 4400; MATE 4560; IE 4470; IE 5710; ME 5500; or other courses approved by Minor Chair).

*** 3000-5000 level engineering or life sciences course with clear biomedical engineering application OR BME 4900 OR departmental 4900 with biomedical engineering topic OR 2000+-level life sciences laboratory course (If a 2000-level course is chosen here, the student will need to

meet the required 6 cr. of 3000+ courses by substitution of a higher-level course for the other requirements or by taking an additional course.), OR 3000-5000 level BME course.

Chemical Engineering

<http://www.cbe.iastate.edu/>

Administered by the Department of Chemical and Biological Engineering

For undergraduate curriculum in Chemical Engineering leading to the degree Bachelor of Science. The Chemical Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the commission's General Criteria and Program Criteria for Chemical, Biochemical, Biomolecular and Similarly Named Engineering Programs.

Chemical engineering is a profession, which provides a link between scientific knowledge and manufactured products. The chemical engineer relies on science, experience, creativity, and ingenuity to produce these materials economically. Almost everything of a material nature used by society today has at some point felt the influence of the chemical engineer. From raw materials such as minerals, coal, petroleum, and agricultural products; chemical engineers create versatile intermediate and commodity chemicals, high performance fuels, new materials for construction, pharmaceuticals, high performance foodstuffs, synthetic textiles, plastics, solid state electronic components, and dozens of other engineered materials. The chemical engineer's influence has been important in the development of catalysts, fuel cells, automatic controls, biochemical processes, artificial kidneys, tissue engineering, nuclear energy, medical instruments and devices, as well as in the development of air and water pollution control systems. Many new and equally exciting challenges await the practicing chemical engineer of the future.

The profession of chemical engineering embraces a wide variety of activities including research, process development, product development, design, manufacturing supervision, technical sales, consulting, and teaching. The engineer can be behind a desk, in a laboratory, in a manufacturing plant, or engaged in nationwide and worldwide travel. Successful chemical engineers find chemistry, mathematics, and physics to be interesting and exciting. Many chemical engineers also have interest in the biological sciences. The curriculum in chemical engineering includes continued study of chemistry, biochemistry, mathematics, and physics as well as intensive study in the engineering sciences such as chemical reaction engineering, thermodynamics, mass transfer, fluid mechanics, heat transfer, system analysis and process synthesis, and design.

Student Learning Outcomes

Upon graduation, students should be able to:

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. Communicate effectively with a range of audiences.
4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. Acquire and apply new knowledge as needed, using appropriate learning strategies.

The curriculum assures that graduates have a thorough grounding in chemistry, along with a working knowledge of advanced chemistry such as organic, inorganic, physical, analytical, materials chemistry, or biochemistry. In addition, a working knowledge, including safety and environmental aspects, of material and energy balances applied to chemical processes; thermodynamics of physical and chemical equilibria; heat, mass, and momentum transfer; chemical reaction engineering; continuous and stage-wise separation operations; process dynamics and control; process design; and appropriate modern experimental and computing techniques is assured.

Program Educational Objectives

The objectives of the Chemical Engineering Program at Iowa State University are to produce graduates who:

- Will excel in careers as professional chemical engineers in the businesses and industries related to chemical engineering; and
- Will successfully pursue research and advanced studies in chemical engineering, or in related fields such as chemistry or biology, or in related professional fields such as medicine, law, and business.

Cooperative Education

A cooperative education program is available to students in chemical engineering.

Curriculum in Chemical Engineering

Degree requirements leading to the degree Bachelor of Science.

Total credits required: 128.0.

INTERNATIONAL PERSPECTIVES¹: 3 CR.

U.S. DIVERSITY¹: 3 CR.

COMMUNICATION PROFICIENCY/LIBRARY REQUIREMENT:

ENGL 1500	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
LIB 1600	Introduction to College Level Research	1
One of the following (C or better in this course)		3
ENGL 3090	Proposal and Report Writing	
ENGL 3120	Communicating Science and Public Engagement	
ENGL 3140	Technical Communication	
JLMC 3470	Science Communication	

The CBE Department requires a grade of a C or better for any transfer credit course that is applied to the degree program but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA.

Social Sciences and Humanities: 15 cr.²

Complete a total of 15 cr. with at least 6 cr. but not more than 9 cr. from the same department.

Basic Program: 24 cr.³

A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Basic Program for Engineering Curricula in College of Engineering section.

CHEM 1770	General Chemistry I	4
or CHEM 1670 General Chemistry for Engineering Students

Total Credits		21

SEMINARS/CO-OPS/INTERNSHIPS:

Co-op/Internship is optional

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved list (<http://www.cbe.iastate.edu/current-students/guides-and-handbooks/>).
3. See Basic Program for Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
4. Students who substitute CHEM 2010/2010L credit for CHEM 1770/CHEM 1770L/CHEM 1780L credit cannot also receive credit for CHEM 1780. Credit for CHEM 1780 must be earned through an Advanced Chemistry Elective².

Note: Transfer students with transfer credits in chemical engineering core courses must earn at least 15 semester credits in ISU courses in this category at the 3000-level or above to qualify for the B.S. degree in chemical engineering.

Pass-Not Pass Policy

A maximum of nine Pass-Not Pass semester credits may be used to meet graduation requirements. Courses offered on a Satisfactory-Fail basis may not be taken on a Pass-Not Pass basis. Pass-Not Pass credits can be applied toward requirements for a B.S. degree in chemical engineering only if the course is specified in the curriculum as a social science and humanities elective or is a course not used in the degree program. Pass-Not Pass credits are not acceptable for technical elective courses or for courses used to satisfy the US diversity or international perspectives requirements.

See also: A 4-year plan of study grid showing course template by semester.

Graduate Study

The department offers work for the degrees Master of Science, Master of Engineering, and Doctor of Philosophy with major in chemical engineering, and minor work to students taking major work in other departments. Prerequisite to major graduate work is a bachelor's degree in chemical engineering, chemistry, or another related field. Students with undergraduate background other than chemical engineering should contact the department for further details. A thesis is required for the Master of Science degree. The Master of Science degree also requires a minimum of 30 graduate credits (minimum of 15 for coursework, 12 within CHE and 3 outside). The Master of Engineering requirements are the same for total credits but include a special project or coursework rather than research thesis. The Doctor of Philosophy degree requires a minimum of 72 graduate credits (minimum of 26 for coursework, at least 16 inside CHE). Candidates for the Doctor of Philosophy degree can refer to the department's home page and/or the department's Graduate Student Handbook for degree options and credit requirements.

<http://www.ccee.iastate.edu/>

Administered by the Department of Civil, Construction and Environmental Engineering

For undergraduate curriculum in Civil Engineering leading to the degree Bachelor of Science. The Civil Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the commission's General Criteria and Program Criteria for Civil and Similarly Named Engineering Programs.

Civil engineers apply principles of motion and materials to plan, design, construct, maintain, and operate public and private facilities, while working under economic, social, and environmental constraints.

Commonly included are transportation systems; bridges and buildings; water supply, pollution control, waste management, irrigation, and drainage systems; river and harbor improvements; dams and reservoirs. Civil engineering also includes planning, designing, and executing surveying operations and locating, delimiting, and delineating physical and cultural features on the earth's surface. Research, testing, sales, management, and related functions are also a part of civil engineering. Work on campus is supplemented by inspection trips, which furnish an opportunity for firsthand study of engineering systems in operation, as well as projects under construction.

Environmental engineering, as an emphasis in civil engineering, is concerned with protecting the public and natural health; providing an ample safe water supply; managing solid and hazardous waste; treating and disposing of domestic and industrial wastewaters and waste; resource recovery; providing adequate drainage of urban and rural areas for sanitation; and controlling water quality, soil contamination, and air pollution. The environmental emphasis for the civil engineering degree replaces some of the courses and electives in the general curriculum with further courses in chemistry, biology, and microbiology as well as specific topics in environmental engineering and design.

Student Learning Outcomes

Graduates of the Civil Engineering curriculum should have at the time of graduation:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives

By three to five years after graduation, graduates of the civil engineering program will have:

1. Pursued successful careers and expertise in civil engineering or a related profession.
2. Collaborated effectively on multi-disciplinary teams to address the needs of society and the environment.
3. Pursued lifelong learning, professional development, and licensure as appropriate for their career goals.

The civil engineering curriculum equips students with a broad education that includes technical skills in analysis and design and professional practices such as communication, teamwork, leadership, and ethics.

The faculty encourages the students to develop their professional skills by participating in cooperative education, internships, or progressive summer engineering employment and study abroad programs. Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue the bachelor's degree and either a Master of Science in Civil Engineering or a Master of Business Administration in the College of Business Administration. These students would have the opportunity to graduate in five years with both degrees.

Curriculum in Civil Engineering (General)

Administered by the Department of Civil, Construction and Environmental Engineering.

Leading to the degree bachelor of science.

Total credits required: 129.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement

ENGL 1500	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
LIB 1600	Introduction to College Level Research	1

Social Sciences and Humanities: 12 cr.²

Complete 12 cr. with 6 cr. at 2000-level or above.

Basic Program: 24 cr.³

A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program

GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 1670	General Chemistry for Engineering Students	4
or CHEM 1770	General Chemistry I	
& CHEM 1780	and General Chemistry II	
ENGL 1500	Critical Thinking and Communication (Must have a C or better in this course)	3

A concurrent bachelor of science/master of science (B.S./M.S.) degree program is available to qualified seniors at Iowa State University.

Go to: <https://www.ccee.iastate.edu/prospective-graduate-students/concurrent-programs/> for more information.

Graduate Study

The Department of Civil, Construction and Environmental Engineering offers graduate programs for the degrees of Master of Engineering, Master of Science, and Doctor of Philosophy with a major in civil engineering with areas of specialization in structural engineering, environmental engineering, construction engineering and management, geotechnical engineering, civil engineering materials, transportation engineering, and intelligent infrastructure engineering. The department also offers graduate minors of 9 to 15 credits of coursework to students from other engineering departments.

Candidates for the degrees of Master of Engineering and Master of Science are required to complete a total of 30 acceptable graduate

credits. The Master of Engineering degree involves all course work. The Master of Science degree requires the preparation of a thesis or creative component.

Candidates for the Doctor of Philosophy degree is required to complete a minimum of 72 acceptable graduate credits. Normal prerequisite for major graduate work in civil engineering is the completion of an undergraduate curriculum substantially equivalent to that required of engineering students at this university. Due to the diversity of interests within the graduate programs in civil engineering, a student may qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering. Supporting work will be required depending upon the student's background and area of interest. The department participates in the interdepartmental graduate programs in transportation, environmental science, and wind energy science, engineering and policy.

The department also offers graduate certificates in construction management, environmental engineering, and environmental systems. The construction management certificate requires 12 graduate credits (nine credits of "core courses" and three credits of approved "elective courses").

The environmental engineering or environmental systems certificate requires 12 graduate credits (six credits of "core courses", six credits of approved "elective courses") and a seminar course or an approved equivalent.

Additional information about graduate programs, research and admission criteria are available on the department's website <http://www.ccee.iastate.edu/academics/graduate/>.

Computer Engineering

www.ece.iastate.edu (<http://www.ece.iastate.edu>)

Administered by the Department of Electrical and Computer Engineering

For the undergraduate curriculum in Computer Engineering leading to the degree Bachelor of Science. The Computer Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the commission's General Criteria and Program Criteria for Electrical, Computer, Communications, Telecommunication(s) and Similarly Named Engineering Programs.

The Department of Electrical and Computer Engineering (ECPE) at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, study applications of the most recent advances in state-of-the-art technologies, and to prepare for the practice of computer engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in

undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The computer engineering curriculum offers focus areas in software systems, embedded systems, networking, information security, computer architecture, and VLSI.

Students also may take elective courses in control systems, electromagnetics, microelectronics, VLSI, power systems, and communications and signal processing.

Student Learning Outcomes: Graduates of the Computer Engineering curriculum should have at the time of graduation:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives: The program objectives for the computer engineering programs describe accomplishments that graduates are expected to attain within five years after graduation. Graduates will have applied their expertise to contemporary problem solving, be engaged professionally, have continued to learn and adapt, and have contributed to their organizations through leadership and teamwork. More specifically, the objectives for expertise, engagement, learning, leadership and teamwork are defined below for each program.

The objectives of the computer engineering program at Iowa State University are:

- Graduates, within five years of graduation, should demonstrate peer-recognized **expertise** together with the ability to articulate that expertise and use it for contemporary problem solving in the analysis,

design, and evaluation of computer and software systems, including system integration and implementation.

- Graduates, within five years of graduation, should demonstrate **engagement** in the engineering profession, locally and globally, by contributing to the ethical, competent, and creative practice of engineering or other professional careers.
- Graduates, within five years of graduation, should demonstrate sustained **learning** and adapting to a constantly changing field through graduate work, professional development, and self-study.
- Graduates, within five years of graduation, should demonstrate **leadership** and initiative to ethically advance professional and organizational goals, facilitate the achievements of others, and obtain substantive results.
- Graduates, within five years of graduation, should demonstrate a commitment to **teamwork** while working with others of diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the ECPE department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience. Students have the opportunity to participate in advanced research activities, and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in computer engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees.

Curriculum in Computer Engineering

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree Bachelor of Science.

Total credits required: 127

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Total Credits		29

Seminar/Co-op/Internships:

CPRE 1660	Professional Programs Orientation	
CPRE 4940	Portfolio Assessment	

Co-op or internship is optional.

Outcomes Assessment - Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student's curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 3000-level or above in professional and technical courses earned at ISU in order to receive a B.S. in computer engineering. These 30 credits must include: CPRE 4910 Senior Design Project I and Professionalism, CPRE 4920 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved

by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass but are used to meet the general education electives.

2. From department approved lists. (<http://www.ece.iastate.edu/academics/bachelors-degree-requirements/>)
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Computer Engineering students have the opportunity to become a concurrent undergraduate/graduate student in a few programs.

Concurrent B.S./M.ENG or M.S. in Computer Engineering

Concurrent B.S./M.ENG or M.S. in Cyber Security

Computer engineering students have the opportunity to begin their coursework towards their master's degree in computer engineering or cyber security during their final semester(s) of undergraduate coursework. In order to be eligible, student must have a 3.0 cumulative GPA or higher to begin a Master of Engineering ("M.ENG") degree or a 3.3 cumulative GPA to begin a Master of Science ("M.S.") degree. Students should meet with their academic advisor to discuss this option.

Concurrent B.S./MBA

Juniors and Seniors have the opportunity to continue their undergraduate coursework while also pursuing a Master of Business Administration (MBA) degree. For additional information please visit the concurrent MBA website www.ivybusiness.iastate.edu/full-time-concurrent-mba (<https://www.ivybusiness.iastate.edu/full-time-concurrent-mba/>).

Graduate Study

The department offers work for the degrees Master of Engineering, Master of Science, and Doctor of Philosophy with a major in computer engineering and minor work to students with other majors. Minor work for computer engineering majors is usually selected from a wide range of courses outside computer engineering.

The Master of Engineering degree is coursework only. It is recommended for off-campus students.

The Master of Science degree with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component.

The department also offers three graduate certificate programs in embedded systems, computer networking, and software systems.

The normal prerequisite to graduate major work in computer engineering is the completion of undergraduate work substantially equivalent to that required of computer engineering students at this university. It is possible for a student to qualify for graduate study in computer engineering even though the student's undergraduate or prior graduate training has been in a discipline other than computer engineering. Supporting work, if required, will depend on the student's background and area of research interest. Prospective students from a discipline other than computer engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the Doctor of Philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science and Doctor of Philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an advisor in electrical and computer engineering.

The Department of Electrical and Computer Engineering also is a participating department in the interdepartmental certificate, Master of Engineering, and Master of Science in Cyber Security programs. Students interested in studying information assurance topics may earn a degree in computer engineering or in information assurance. (See catalog section on Cyber Security.)

Well-qualified juniors and seniors in computer engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both Bachelor of Science and Master of Science, or Bachelor of Science and Master of Business Administration, or Bachelor of Science and Master of Engineering degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department's web site.

Construction Engineering

Administered by the Department of Civil, Construction and Environmental Engineering

The curriculum in Construction Engineering, leading to a Bachelor of Science degree can be referenced here: www.catalog.iastate.edu/collegeofengineering/constructionengineering/#curriculumtext. The Construction Engineering Program is accredited by the

Engineering Accreditation Commission of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the commission's General Criteria and Program Criteria for Construction and Similarly Named Engineering Programs.

Student Learning Outcomes

Graduates of the construction engineering curriculum should have at the time of graduation:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives: Three to five years after graduation, our graduates will have pursued successful careers and expertise in construction engineering or a related profession. They will collaborate effectively on multi-disciplinary teams to address the needs of society and the environment. They will pursue lifelong learning, professional development, and licensure as appropriate for their career goals.

Students who successfully complete the curriculum will be prepared for entry into the field or for further study at the graduate level in construction engineering or related fields of study, such as law, business, and/or other engineering disciplines.

Construction engineers need to possess a strong fundamental knowledge of engineering design and management principles, including knowledge of business procedures, economics, and human behavior. Graduates of this curriculum may expect to engage in design of temporary structures, coordination of project design, systems design, cost estimating, planning and scheduling, company and project management, materials procurement, equipment selection, and cost control. With the emergence of integrated project delivery methods such as design-

build construction, the role of the construction engineer is expanding the need for trained professionals that understand both aspects of the project delivery environment. The curriculum offers opportunities to study emphases concerned with building, heavy, mechanical, or electrical construction. The process of construction involves the organization, administration, and coordination of labor resource requirements, temporary and permanent materials, equipment, supplies and utilities, money, technology and methods. These must be integrated in the most efficient manner possible to complete construction projects on schedule, within the budget, and according to the standards of quality and performance specified by the project owner or designer. The curriculum blends engineering, management and business sciences into a study of the processes of construction whereby designer's plans and specifications are converted into physical structures and facilities.

The curriculum develops the ability of students to be team workers, creative thinkers, and effective communicators. This is achieved by encouraging students to:

- Interact with practicing professionals.
- Gain work experience during summer jobs, internship, and cooperative education assignments that emphasize the knowledge required of construction engineers.
- Develop leadership skills by participating in student organizations.
- Develop, analyze, and interpret alternative solutions to open-ended problems.
- Study abroad.

The construction industry is becoming increasingly global. Courses in humanities, social sciences, U.S. diversity, and international perspectives are included in the curriculum to broaden the student's perspective of the work environment. In addition, the department has several exchange program opportunities for students to participate in study abroad programs.

Qualified construction engineering students within 30 credits of completing their degree may apply for concurrent enrollment in the Graduate College. See Civil Engineering (<http://www.ccee.iastate.edu/academics/graduate/>) Graduate Study for more information.

Curriculum in Construction Engineering

Administered by the Department of Civil, Construction and Environmental Engineering; leading to the degree bachelor of science.

Construction Engineering students will initially be considered construction undecided option when starting the degree and are encouraged to choose an option in Construction Engineering before their 5th semester. If not, option courses taken by the student will not be applied until the student chooses an option. Students must pick an option prior to graduation. The four options in the program are building,

electrical, infrastructure, and mechanical. The Core courses for each option are the same whereas the option selections of the degree audit will be comprised of different classes that explore the particular focus the students have chosen.

Total credits required: Building Option - 128.0, Electrical Option - 127.0, Infrastructure Option - 127.0, Mechanical Option - 127.0 cr.

The Construction Engineering program requires a grade of a C or better for any transfer credit course that is applied to the degree program (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements for either required or elective courses.

International Perspectives: 3 cr. ¹

U.S. Diversity: 3 cr. ¹

Communication Proficiency/Library requirements:

ENGL 1500 Critical Thinking and Communication (Must have a C or better in this course) 3

ENGL 2500 Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course) 3

LIB 1600 Introduction to College Level Research 1

Business Communication Elective: one course of the following with a minimum grade of C. 3

ENGL 3020 Business Communication

ENGL 3090 Proposal and Report Writing

ENGL 3140 Technical Communication

Total Credits 10

Social Sciences and Humanities: 12 cr.

A concurrent bachelor of science/master of science (B.S./M.S.) degree program is available to qualified seniors at Iowa State University.

Go to <https://www.ccee.iastate.edu/prospective-graduate-students/concurrent-programs/> for further information.

Graduate Study

An area of specialization in construction engineering and management is offered within the graduate program of the Department of Civil, Construction and Environmental Engineering. This specialization focuses on project management including and beyond the traditional iron triangle of scope, technical, and schedule to include context and financing, enabling project management of more complex projects. Three graduate degrees including, Master of Engineering (30 credits), Master of Science

(30 credits), and Doctor of Philosophy (72 credits) are offered. The Master of Engineering degree is a coursework only option and the other degree programs require a research component at a level adjusted to the degree sought. All degrees are offered on-campus, and some degrees may be completed off-campus through distance education. All degrees require CE 5010, CE 5020, CE 5030, and a minimum of nine additional credits within construction focused CE courses. Course options include but are not limited to:

CE 5010	Preconstruction Project Engineering and Management	3
CE 5020	Construction Project Engineering and Management	3
CE 5030	Construction Finance and Business Management	3
CE 5050	Design of Construction Systems	3
CE 5940A	Special Topics Construction Engineering and Mgt.: Planning and Scheduling	3
CE 5940L	Special Topics Construction Engineering and Mgt.: Advanced Building Construction Topics - LEED for New Construction	3

Undergraduate students may also qualify for the concurrent Bachelor of Science/Master of Science (B.S./M.S.) degree program. Courses are offered for minor work to students taking major work in other curricula or in interdepartmental programs. A graduate certificate is also available which requires 12 credits of coursework. Courses required for the certificate are CE 5010, CE 5020, and CE 5030. For additional information see Civil Engineering, Graduate Programs, <https://www.ccee.iastate.edu/academics/graduate/>.

Cyber Security Engineering

www.ece.iastate.edu (<http://www.ece.iastate.edu/>)

Administered by the Department of Electrical and Computer Engineering

For the undergraduate curriculum in Cyber Security Engineering leading to the degree Bachelor of Science. The Cyber Security Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the commission's General Criteria and Program Criteria for Cybersecurity and Similarly Named Engineering Programs.

The Department of Electrical and Computer Engineering (ECPE) at Iowa State University provides undergraduate students with the opportunity to learn computer engineering fundamentals, study applications of the most recent advances in state-of-the-art technologies, and to prepare for the practice of cyber security engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education

is enhanced by an integrated commitment to successful, long-term research and outreach programs.

Student Learning Outcomes: Graduates of the Cyber Security Engineering curriculum should have, at the time of graduation:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives: The program objectives for the cyber security engineering program describe accomplishments that graduates are expected to attain within five years after graduation. Graduates will have applied their expertise to contemporary problem solving, be engaged professionally, have continued to learn and adapt, and have contributed to their organizations through leadership and teamwork. More specifically, the objectives for expertise, engagement, learning, leadership and teamwork are defined below for the program.

The objectives of the cyber security engineering program at Iowa State University are:

- Graduates, within five years of graduation, should demonstrate peer-recognized **expertise** in computer security principles together with the ability to articulate that expertise and use it for contemporary problem solving in the analysis, design, and operation of the physical, software and human components of a system, including system integration and implementation.
- Graduates, within five years of graduation, should demonstrate **engagement** in the engineering profession, locally and globally, by contributing to the ethical, competent, and creative practice of engineering or other professional careers.

- Graduates, within five years of graduation, should demonstrate sustained **learning** and adapting to a constantly changing field through graduate work, professional development, and self-study.
- Graduates, within five years of graduation, should demonstrate **leadership** and initiative to ethically advance professional and organizational goals, facilitate the achievements of others, and obtain substantive results.
- Graduates, within five years of graduation, should demonstrate a commitment to **teamwork** while working with others of diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the ECPE department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience. Students have the opportunity to participate in advanced research activities, and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in cyber security engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science.

Curriculum in Cyber Security Engineering

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree Bachelor of Science.

Total credits required: 125

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr.¹

Seminar/Co-op/Internships⁴:

CPRE 1660	Professional Programs Orientation	
CPRE 4940	Portfolio Assessment	

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 3000-level or above in professional and technical courses earned at ISU in order to receive a B.S. in computer engineering. These 30 credits must include: CPRE 4910 Senior Design Project I and Professionalism, CPRE 4920 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass but are used to meet the general education electives.
2. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
3. From department approved lists. (<http://www.ece.iastate.edu/academics/bachelors-degree-requirements/>)
4. Co-op / Internships are optional.

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Cyber Security Engineering Minor

The cyber security engineering minor is intended for students studying computer engineering, computer science, software engineering, or management information systems with the goal of enabling them to work in cyber security. The minor consists of a series of lab-based courses that are designed to provide students with both the technical background and the hands-on experiences along with the theoretical background to allow them to compete for jobs in cyber security.

Cyber Security Engineering students have the opportunity to become a concurrent undergraduate/graduate student in a few programs.

CONCURRENT B.S./M.ENG OR M.S. IN COMPUTER ENGINEERING CONCURRENT B.S./M.ENG OR M.S. IN ELECTRICAL ENGINEERING CONCURRENT B.S./M.ENG OR M.S. IN CYBER SECURITY

Cyber Security Engineering students have the opportunity to begin their coursework towards their master's degree in computer engineering, cyber security during, or electrical engineering their final semester(s) of undergraduate coursework. In order to be eligible, student must have a 3.0 cumulative GPA or higher to begin a Master of Engineering ("M.ENG") degree or a 3.3 cumulative GPA to begin a Master of Science ("M.S.") degree. Students should meet with their academic advisor to discuss this option.

CONCURRENT B.S./MBA

Juniors and Seniors have the opportunity to continue their undergraduate coursework while also pursuing a Master of Business Administration (MBA) degree. For additional information please visit the concurrent MBA website www.ivybusiness.iastate.edu/full-time-concurrent-mba (<https://www.ivybusiness.iastate.edu/full-time-concurrent-mba/>).

The department offers work for the degrees Master of Science and Doctor of Philosophy with a major in cyber security and minor work to students with other majors. Minor work for cyber security majors is usually selected from a wide range of courses outside cyber security.

Master of Engineering degree is coursework only. It is recommended for off-campus students.

The degree Master of Science with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component.

The department also offers a graduate certificate program in cyber security.

The normal prerequisite to major in graduate work in cyber security is the completion of undergraduate work substantially equivalent to that required of cyber security students at this university. Because of the diversification in the cyber security graduate program, however, it is possible for a student to qualify for graduate study in certain areas of cyber security even though the student's undergraduate or prior graduate training has been in a discipline other than cyber security. Supporting work, if required, will depend on the student's background and area of research interest. Prospective students from a discipline other than cyber security are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the Doctor of Philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science and Doctor of Philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an advisor in electrical and computer engineering.

Well-qualified juniors or seniors in cyber security who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science degrees, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department's website.

Cyber Security Minor

The minor is intended for students studying computer engineering, computer science, software engineering, or management information systems with the goal of enabling them to work in cyber security. The minor consists of a series of lab based courses that are designed to provide students with both the technical background and the hands-on experiences along with the theoretical background to allow them to compete for jobs in cyber security.

Objectives

The minor in cyber security is designed to prepare students with the technical skills for entry into cybersecurity positions in industry or government agencies.

A few years after graduation, students completing the cyber security minor should be:

1. Contributing to their communities and society in the area of cyber security technology and applications and demonstrating an understanding of contemporary security issues, both technological and societal.
2. Advancing in their careers through application of their knowledge of cyber security
3. Working effectively as team members and demonstrating ethics and responsible behavior
4. Applying cyber security methods and concepts to the general area of their BS degree
5. Continuing their professional development through life-long learning

Learning Outcomes

After earning the minor in cyber security students will

1. Demonstrate the ability to apply knowledge of cyber security concepts, tools and technologies to computer systems.
2. Understand cyber security risks, threats and countermeasures and apply this understanding to develop cyber defense strategies.
3. Demonstrate the ability to design cyber security systems to meet organizational needs within realistic constraints such as economic, environmental, social, and ethical expectations.
4. Demonstrate the ability to function on teams.

The minor requires 15 credits, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Below is the list of courses used in the minor.

Core

CYBE 2300	Cyber Security Fundamentals	3
CYBE 2310	Cyber Security Concepts and Tools	3
CYBE 3310	Application of Cryptographic Concepts to Cyber Security	3
Plus one of the following (3-4 cr.)		3
CPRE 3080	Operating Systems: Principles and Practice	
COMS 2520	Linux Operating System Essentials	
COMS 3520	Introduction to Operating Systems	

One Elective Course ¹	3
Total Credits	15

1. From department approved lists.

Cyber-Physical Systems Minor

Cyber-Physical Systems Minor

With the fourth industrial revolution upon us, physical systems are being designed to have a cyber component, that enables remote access, monitoring and control. In these systems, ubiquitous sensing, and advanced data management capability are taking us from automation to autonomy via a deep interconnection between the cyber and physical entities. Cyber-physical systems (CPS) are becoming abundant in many application sectors including manufacturing, energy, health care, transportation and agriculture. Safety-, time- and life-critical systems are relying on CPS concepts to become more efficient, robust, resilient, flexible and scalable. As CPS applications become more pervasive, the engineering education system needs to produce a next generation CPS workforce who can design, produce, and maintain these systems.

With this motivation and encouraged by the demand from the industry stakeholders of ISU College of Engineering, this CPS minor will focus on sensing, advanced information processing (data analytics and machine learning), and controls aspects of Cyber-Physical Systems. Specific CPS application sectors such as energy/power systems, manufacturing, biomedical devices, autonomous systems, transportation, and agriculture will be in focus.

The minor requires 15 credits, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University. The minor must include 9 credits that are not used to meet any other department, college, or university requirement.

Required courses:

ME 2800X	Design and Analysis of Cyber-Physical Systems	3
CPRE 2870X	Cyber-Physical System Fundamentals	3
AERE 3640X	Cyber-Physical Systems Application	3

Elective courses: 6

ME 3700	Engineering Measurements
ME 4110	Automatic Controls
ME 4180	Mechanical Considerations in Robotics
ME 4210	System Dynamics and Control
ME 4560	Machine Vision
ME 4750	Modeling and Simulation
EE 3240	Signals and Systems II
EE 3330	Electronic Systems Design
EE 4250	Machine learning: A Signal Processing Perspective

EE 4760	Control System Simulation	
CPRE 2300	Cyber Security Fundamentals	3
CPRE 3880	Embedded Systems II: Mobile Platforms	
CPRE 4140	Introduction to Software Systems for Big Data Analytics	
CPRE 4190	Software Tools for Large Scale Data Analysis	
CPRE 4210	Software Analysis and Verification for Safety and Security	
CPRE 4580	Real Time Systems	
CPRE 4880	Embedded Systems Design	
ABE 4030	Physical Modeling and Control of Dynamic Systems	
ABE 4040	Instrumentation for Agricultural and Biosystems Engineering	
ABE 4100	Electronic Systems Integration for Agricultural Machinery	
IE 4130	Stochastic Modeling, Analysis and Simulation	
IE 4320	Industrial Automation	
IE 4870	Big Data Analytics and Optimization	
AERE 4070	Applied Formal Methods	
AERE 4330	Spacecraft Dynamics and Control	
AERE 4630	Introduction to Multidisciplinary Design Optimization (MDO)	
AERE 4640	Spacecraft Systems	
CE 4490	Structural Health Monitoring	
CE 5530	Traffic Engineering	
CE 5560	Transportation Data Analysis	

Total Credits **18**

Electrical Engineering

For the undergraduate curriculum in Electrical Engineering leading to the degree Bachelor of Science. The Electrical Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the commission's General Criteria and Program Criteria for Electrical, Computer, Communications, Telecommunication(s) and Similarly Named Engineering Programs.

The Department of Electrical and Computer Engineering (ECPE) at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, study applications of the most recent advances in state-of-the-art technologies and prepare for the practice of electrical engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in

undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The electrical engineering curriculum offers a number of emphasis areas at the undergraduate level, including control systems, electromagnetics and nondestructive evaluation, microelectronics and photonics, VLSI, electric power and energy systems, and communications and signal processing. Students are required to choose at least one course sequence that focuses on one of these areas; therefore, graduates have substantial depth in specific areas to complement the breadth obtained in the required curriculum. Students also may take elective courses in computer networking, security, computer architecture, digital systems, and software.

Student Learning Outcomes: Graduates of the Electrical Engineering curriculum should have at the time of graduation:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives: The program objectives for the electrical engineering program describe accomplishments that graduates are expected to attain within five years after graduation. Graduates will have applied their expertise to contemporary problem solving, be engaged professionally, have continued to learn and adapt, and have contributed to their organizations through leadership and teamwork. More specifically, the objectives for expertise, engagement, learning, leadership and teamwork are defined below for each program.

The objectives of the electrical engineering program at ISU are:

- Graduates, within five years of graduation, should demonstrate peer-recognized **expertise** together with the ability to articulate that expertise and use it for contemporary problem solving in the analysis, design, and evaluation of electrical and electronic devices and systems.
- Graduates, within five years of graduation, should demonstrate **engagement** in the engineering profession, locally and globally, by contributing to the ethical, competent, and creative practice of engineering or other professional careers.
- Graduates, within five years of graduation, should demonstrate sustained **learning** and adapting to a constantly changing field through graduate work, professional development, and self-study.
- Graduates, within five years of graduation, should demonstrate **leadership** and initiative to ethically advance professional and organizational goals, facilitate the achievements of others, and obtain substantive results.
- Graduates, within five years of graduation, should demonstrate a commitment to **teamwork** while working with others of diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the ECPE department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience.

Students have the opportunity to participate in advanced research activities, and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees.

Courses for students who are not in the electrical engineering program: EE 4420 Introduction to Circuits and Instruments, EE 4480 Introduction to AC Circuits and Motors. Credit in these courses may not be counted toward a degree in either electrical engineering or computer engineering.

Curriculum in Electrical Engineering

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree Bachelor of Science.

Total credits required: 128.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

ENGL 1500	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
LIB 1600	Introduction to College Level Research	1
One of the following:		3
ENGL 3140	Technical Communication (C or better in this course)	
ENGL 3090	Proposal and Report Writing (C or better in this course)	

General Education Electives: 18 cr.

ENGL 2500	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course.)	3
ENGL 3140	Technical Communication (Must have a C or better in this course.)	3
or ENGL 3090	Proposal and Report Writing	
Complete minimum of 3 cr. from Approved General Education Component 3000 level and above. ²		3
Complete additional 9cr. from Approved General Education Component. ²		9
Total Credits		18

Basic Program: 24 cr.

A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 1670	General Chemistry for Engineering Students	4
or CHEM 1770	General Chemistry I	
ENGL 1500	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGR 1010	Engineering Orientation	
EE 1850	Introduction to Electrical Engineering and Problem-Solving I ³	3
LIB 1600	Introduction to College Level Research	1
MATH 1650	Calculus I	4
MATH 1660	Calculus II	4
PHYS 2310	Introduction to Classical Physics I	4

PHYS 2310L	Introduction to Classical Physics I Laboratory	1
Total Credits		24

Math and Physical Science: 16 cr.

MATH 2070	Matrices and Linear Algebra	3
MATH 2650	Calculus III	4
MATH 2670	Elementary Differential Equations and Laplace Transforms	4
PHYS 2320	Introduction to Classical Physics II	4
Total Credits		15

Electrical Engineering Core: 44 cr.

(A minimum GPA of 2.00 required for this set of courses, including any transfer courses; please note that transfer course grades will not be calculated into the Core GPA).

CPRE 2810	Digital Logic	4
CPRE 2880	Embedded Systems I: Introduction	4
EE 2010	Electric Circuits	4
EE 2240	Signals and Systems I	4
EE 2300	Electronic Circuits and Systems	4
EE 2320	Professional and Ethical Issues in Electrical and Computer Engineering	3
EE 2850	Problem Solving Methods and Tools for Electrical Engineering	4
EE 3030	Energy Systems and Power Electronics	3
EE 3110	Electromagnetic Fields and Waves	4
EE 3220	Probabilistic Methods for Electrical Engineers	3
Core Elective: one of the following:		7
EE 3210	Communication Systems I	
EE 3240	Signals and Systems II	
Core Elective: one of the following:		
EE 3300	Integrated Electronics	
EE 3320	Semiconductor Materials and Devices	
Total Credits		44

Note: EE 3210 and EE 3320 are 3-credit courses, whereas EE 3240 and EE 3300 are 4-credit courses. The core credit requirement (44 credits) assumes 7 credits taken for these options. Any core credit surplus or deficiency can be used as credits for EE technical electives.

Other Remaining Courses: 26 cr.

EE 4910	Senior Design Project I and Professionalism	3
EE 4920	Senior Design Project II	2
Econ Elective (ECON 1010, 1020 or IE 3050)		3
EE/CPRE Technical Electives including one approved sequence ²		13
Technical Electives ²		6
Total Credits		27

Seminar/Co-op/Internships:

EE 1660 Professional Programs Orientation

EE 4940 Portfolio Assessment

Co-op or internship is optional

Outcomes Assessment - Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student's curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 3000-level or above in professional and technical courses earned at ISU in order to receive a B.S. in electrical engineering. These 30 credits must include EE 4910 Senior Design Project I and Professionalism, EE 4920 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. From department approved lists (<http://www.ece.iastate.edu/academics/bachelors-degree-requirements/>).
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Electrical Engineering students have the opportunity to become a concurrent undergraduate/graduate student in a few programs.

CONCURRENT B.S./M.ENG OR M.S. IN COMPUTER ENGINEERING

CONCURRENT B.S./M.ENG OR M.S. IN CYBER SECURITY

CONCURRENT B.S./M.ENG OR M.S. IN ELECTRICAL ENGINEERING

Electrical engineering students have the opportunity to begin their coursework towards their master's degree in computer, cyber security or electrical engineering during their final semester(s) of undergraduate coursework. In order to be eligible, student must have a 3.0 cumulative GPA or higher to begin a Master of Engineering ("M.ENG") degree or a 3.3 cumulative GPA to begin a Master of Science ("M.S.") degree. Students should meet with their academic advisor to discuss this option.

CONCURRENT B.S./MBA

Juniors and Seniors have the opportunity to continue their undergraduate coursework while also pursuing a Master of Business Administration (MBA) degree. For additional information please visit the concurrent MBA website www.ivybusiness.iastate.edu/full-time-concurrent-mba (<https://www.ivybusiness.iastate.edu/full-time-concurrent-mba/>).

Graduate Study

The department offers work for the degrees Master of Engineering, Master of Science, and Doctor of Philosophy with a major in electrical engineering and minor work to students with other majors. Minor work for electrical engineering majors is usually selected from a wide range of courses outside electrical engineering.

Master of Engineering degree is coursework only. It is recommended for off-campus students.

The degree Master of Science with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component.

The department also offers a graduate certificate program in power systems engineering.

The normal prerequisite to major in graduate work in electrical engineering is the completion of undergraduate work substantially equivalent to that required of electrical engineering students at this university. Because of the diversification in the electrical engineering graduate program, however, it is possible for a student to qualify for graduate study in certain areas of electrical engineering even though the student's undergraduate or prior graduate training has been in a discipline other than electrical engineering. Supporting work, if required, will depend on the student's background and area of research interest. Prospective students from a discipline other than electrical engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the Doctor of Philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science and Doctor of Philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an advisor in electrical and computer engineering.

Well-qualified juniors or seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science degrees, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department's website.

Energy Systems Minor

Energy Systems Engineering Minor

Energy systems are pervasive in our society. A list of energy-related subjects and applications in the engineering curriculum would be nearly endless, but here are some examples:

- Mechanical engineers have a core area in thermo-fluids where courses in thermodynamics, fluid mechanics, and heat transfer form a base for energy systems.
- Electrical engineers address power transmission and distribution as well as electric motors and power systems.
- Civil engineers develop structures for wind turbines and hydroelectric dams.
- Construction engineers need to understand how building systems impact energy utilization.
- Chemical engineers develop alternative fuels and clean burning technologies.
- Material engineers develop new materials for batteries and fuel cells.
- Aerospace engineers develop wind turbines.
- Industrial engineers address manufacturing efficiency and energy reduction.
- Agricultural engineers develop biorenewable energy sources.

Energy systems are also a significant focus of the grand challenges of engineering (<http://www.engineeringchallenges.org/>), and this minor will help our students address these issues in their engineering careers.

The goal of the minor in energy systems is to provide ISU engineering students with focused educational opportunities in the broad area of energy systems. Successful energy systems minor students will understand broad energy perspectives, the language of energy systems, and the economic, environmental, and policy issues related to energy in the two required courses (six credits) for the minor (ECON 3800 and EE 3510 **OR** ME 4330). *Note that credit for both EE 3510 and ME 4330 is no longer accepted.* The remaining nine credits in the minor can be selected from a list of approved engineering courses related to energy systems to give students the opportunity to extend their knowledge.

The Energy Systems minor is administered by the mechanical engineering department and is open to all undergraduates in the College of Engineering. The minor may be earned by completing 15 credits from the following course list. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. A complete list of approved elective courses can be found below.

Required Courses

ECON 3800	Energy, Environmental and Resource Economics	3
EE 3510	Analysis of Energy Systems	3
or ME 4330	Alternative Energy	
Electives: Choose from list of approved courses as outlined below		9
Total Credits		15

Approved list of electives are as follows:

ABE 3250 Biorenewable Systems
 ABE 3420 Agricultural Tractor Power
 ABE 3630 Agri-Industrial Applications of Electric Power and Electronics
 ABE 3800 Principles of Biological Systems Engineering
 ME 4130 Fluid Power Engineering
 ABE 4720 Controlled Environments for Animals and Plants
 ABE 4800 Engineering Analysis of Biological Systems
 ABE 5720 Controlled Environments for Animals and Plants
 ABE 5800 Engineering Analysis of Biological Systems
 AERE 3810 Introduction to Wind Energy
 AERE 5700 Wind Engineering
 CHE 3560 Transport Phenomena I
 CHE 3570 Transport Phenomena II
 CHE 3580 Separations
 CHE 3810 Chemical Engineering Thermodynamics
 CHE 3820 Chemical Reaction Engineering
 CHE 4150 Biochemical Engineering
 CHE 5150 Biochemical Engineering
 CHE 5540 Integrated Transport Phenomena
 CHE 5830 Advanced Thermodynamics

Engineering Mechanics

Administered by the Department of Aerospace Engineering

Undergraduate Study

The undergraduate courses in mechanics are intermediate between those in physics and mathematics and the professional and design courses of the several engineering curricula. In these courses the student is expected to acquire an understanding of the basic principles and analysis techniques pertaining to the static and dynamic behavior of rigid media, deformable solids, fluids, and gasses. Physical properties of engineering materials are studied in the classroom and are tested in the laboratory. General physical laws are given mathematical expression and are made suitable for use in the solution of specific problems in machine and structural design, and in the flow and measurement of fluids.

Graduate Study

The department offers graduate programs that lead to the degrees master of science, master of engineering, and doctor of philosophy with major in engineering mechanics, and minor work to students taking major work in other departments.

The master of science degree requires a thesis and has strong research emphasis. The master of science degree is recommended for students who anticipate entering a doctoral program later. The master of engineering degree does not require either research credits or a thesis. The program is intended to give students additional instruction at the graduate level to better qualify them for advanced professional engineering work. By careful selection of electives and perhaps additional courses during the senior undergraduate year, students should be able to qualify for the master of engineering degree with an additional year of full-time study after receiving their baccalaureate degree in one of the several engineering curricula.

The master of engineering degree does require a creative component which will be obtained by registering for EM 5990 Creative Component. A written report and an oral presentation will be given to the student's graduate committee.

At least 30 credits of acceptable graduate work are required for both the master of science and the master of engineering degrees. For specific course, research, and creative component requirements, see the departmental Graduate Student Handbook (<http://www.aere.iastate.edu/wp-content/blogs.dir/13/files/2011/09/Graduate-Handbook-Fall-2011.pdf>).

The normal prerequisite to major graduate work is the completion of a curriculum substantially equivalent to that required of undergraduate students in engineering at this university. However, because of the diversity of interests in graduate work in engineering mechanics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering—e.g., physics or mathematics.

Courses primarily for undergraduates:

EM 3240: Mechanics of Materials

Credits: 3. Contact Hours: Lecture 3.

Prereq: CE 2740

Plane stress, plane strain, stress-strain relationships, and elements of material behavior. Application of stress and deformation analysis to members subject to centric, torsional, flexural, and combined loadings. Elementary considerations of theories of failure, buckling. (Typically Offered: Fall, Spring, Summer)

EM 3270: Mechanics of Materials Laboratory

Credits: 1. Contact Hours: Laboratory 2.

Prereq: EM 3240

Experimental determination of mechanical properties of selected engineering materials. Experimental verification of assumptions made in 3240. Use of strain measuring devices. Preparation of reports. (Typically Offered: Fall, Spring)

EM 3620: Principles of Nondestructive Testing

(Cross-listed with MATE 3620).

Credits: 3. Contact Hours: Lecture 3.

Prereq: PHYS 1320 OR PHYS 2320 or PHYS 2320H

Radiography, ultrasonic testing, magnetic particle inspection, eddy current testing, dye penetrant inspection, and other techniques. Physical bases of nondestructive tests, materials to which applicable, effects of material condition, types of defects detectable, calibration standards, and reliability safety precautions. (Typically Offered: Spring)

EM 3620L: Nondestructive Testing Laboratory

(Cross-listed with MATE 3620L).

Credits: 1. Contact Hours: Laboratory 3.

Prereq: Credit or enrollment in MATE 3620 or EM 3620

Application of nondestructive testing techniques to the detection and sizing of flaws in materials and to the characterization of material's microstructure. Included are experiments in hardness, dye penetrant, magnetic particle, x-ray, ultrasonic and eddy current testing. (Typically Offered: Fall, Spring)

EM 4170: Experimental Mechanics

(Cross-listed with AERE 4170).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: EM 3240, and MATE 2730

Introduction to fundamental concepts for force, displacement, stress and strain measurements for structures and materials applications. Strain gage theory and application. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro- and nano-scale regimes. Selected laboratory experiments. Offered even-numbered years. (Typically Offered: Fall)

EM 4240: Intermediate Mechanics of Materials

Credits: 3. Contact Hours: Lecture 3.

Prereq: EM 3240

Analysis of stresses, strains, and deflections. Torsion and bending of unsymmetrical members. Analysis of thick wall pressure vessels and shrink fit problems. Dynamic load effects, fatigue and fracture mechanics introduction. Work-strain energy methods. (Typically Offered: Fall, Spring)

EM 4250: Introduction to the Finite Element Method

Credits: 3. Contact Hours: Lecture 3.

Prereq: EM 3240 and MATH 2660 or MATH 2670

Introduction of finite element analysis through applications to one-dimensional, steady-state problems such as elastic deformation, heat and fluid flow, consolidation, beam bending, and mass transport. Transient heat conduction and wave propagation. Two-dimensional triangular and quadrilateral elements. Plane problems of torsion, thermal and potential flow, stress analysis. Simple computer programs for one- and two-dimensional problems. (Typically Offered: Spring)

EM 4510: Engineering Acoustics

(Cross-listed with EE 4510/ ME 4510).

Credits: 3. Contact Hours: Lecture 3.

Prereq: MATH 2660 or MATH 2670; PHYS 2310 and 2310L

The basics of acoustic wave propagation in fluids with an emphasis on sound propagation in air. Topics include transmission and reflection of sound at a boundary; role of acoustic sources in directing sound fields; diffraction of sound around solid objects; reverberation of sound in a room; and the measurement of sound fields. (Typically Offered: Fall)

EM 4800: Ultrasonic Nondestructive Evaluation

(Cross-listed with AERE 4800).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EM 3240, MATH 2660 or MATH 2670, PHYS 2320

Introduction to stress/strain, Hooke's law, and elastic wave propagation in two dimensions in isotropic media. Ultrasonic plane-wave reflection and transmission; and simple straight-crested guided waves. Transducer construction, behavior, and performance. Simple signal analysis and discrete signal processing. The last few weeks of the course are devoted to case studies. (Typically Offered: Spring)

EM 4900: Independent Study

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EM 4900H: Independent Study: Honors

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

EM 5100: Continuum Mechanics

Credits: 3. Contact Hours: Lecture 3.

Introduction to Cartesian tensors as linear vector transformations. Kinematics of continuous deformations, Lagrangian and Eulerian descriptions of motion. Fundamental equations or balance laws of continuous media, linear and angular momentum balance. Conservation laws of momentum and energy. Introduction to constitutive equations of classical elastic solids and simple fluids. Formulations and solutions of some canonical problems. (Typically Offered: Fall)

EM 5140: Advanced Mechanics of Materials

(Cross-listed with AERE 5140).

Credits: 3. Contact Hours: Lecture 3.

Theory of stress and strain, stress-strain relationships. Unsymmetrical bending, curved beams, shear center. Torsion of thin-walled noncircular sections. Equilibrium, compatibility equations. Airy stress functions. Membrane stresses in shells, thick-walled cylinders. (Typically Offered: Fall)

EM 5160: Applied Elasticity and Mechanics of Deformable Solids

Credits: 3. Contact Hours: Lecture 3.

Fundamental mechanics of linear elasticity, formulation and solution of simple elastostatic boundary value problems. Kinematics of small deformations, constitutive equations for isotropic and anisotropic media. Field equations for elastic solids, plane strain/plane stress and some classic analytical solutions such as Boussinesq, Hertz, Kirsch, Lamé, and Mitchell. Stress functions and potential methods and introduction to finite elements. (Typically Offered: Spring)

EM 5170: Experimental Mechanics

(Cross-listed with AERE 5170).

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Introduction to fundamental concepts for force, displacement, stress and strain measurements for structures and materials applications. Strain gage theory and application. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro- and nano-scale regimes. Selected laboratory experiments. Offered even-numbered years. (Typically Offered: Fall)

EM 5180: Waves in Elastic Solids with Applications to Ultrasonic Nondestructive Evaluation

Credits: 3. Contact Hours: Lecture 3.

Propagation of bulk waves, surface waves, and guided waves in isotropic and anisotropic elastic media. Transmission and reflection of waves at plane and curved interfaces. Radiation of sources with application to ultrasonic transducer beam modeling. Elastic wave scattering from cracks and inclusions. Reciprocity principles and their use in the development of an ultrasonic measurement model. Characterization and measurement of material attenuation. (Typically Offered: Fall)

EM 5250: Finite Element Analysis

(Cross-listed with AERE 5250).

Credits: 3. Contact Hours: Lecture 3.

Variational and weighted residual approach to finite element equations. Emphasis on two- and three-dimensional problems in solid mechanics. Isoparametric element formulation, higher order elements, numerical integration, imposition of constraints and penalty, convergence, and other more advanced topics. Use of two- and three-dimensional computer programs. Dynamic and vibrational problems, eigenvalues, and time integration. Introduction to geometric and material nonlinearities. (Typically Offered: Spring)

EM 5260: Boundary Element Methods in Engineering

Credits: 3. Contact Hours: Lecture 3.

Introductory boundary element methods through plane problems. Singular integrals, Cauchy principal values, integral representations and boundary integrals in one dimension. Direct and indirect formulations. Plane potential and elastostatic problems. Higher order elements, numerical integration. Regularizations. Body forces and infinite regions. Specialized fundamental solutions, half-plane and axisymmetric problems. Diffusion and wave problems. Coupling with finite elements. Offered even-numbered years. (Typically Offered: Fall)

EM 5430: Introduction to Random Vibrations and Nonlinear Dynamics

(Cross-listed with ME 5430).

Credits: 3. Contact Hours: Lecture 3.

Vibrations of continuous systems. Nonlinear vibration phenomena, perturbation expansions; methods of multiple time scales and slowly-varying amplitude and phase. Characteristics of random vibrations; random processes, probability distributions, spectral density and its significance, the normal or Gaussian random process. Transmission of random vibration, response of simple single and two-degree-of-freedom systems to stationary random excitation. Fatigue failure due to random excitation. Offered odd-numbered years. (Typically Offered: Spring)

EM 5480: Advanced Engineering Dynamics

Credits: 3. Contact Hours: Lecture 3.

Prereq: EM 3450, MATH 2660 or MATH 2670

3-D kinematics and dynamics of particles and rigid bodies. Coordinate systems, calculus of variations. Lagrange's equations with constraints, modified Euler's equations, torque-free motion of rigid bodies in 3-D, moment equations with constraints. Offered even-numbered years. (Typically Offered: Spring). (Typically Offered: Spring)

EM 5500: Nondestructive Evaluation

(Cross-listed with MSE 5500).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Principles of five basic NDE methods and their application in engineering inspections. Materials behavior and simple failure analysis. NDE reliability, and damage-tolerant design. Advanced methods such as acoustic microscopy, laser ultrasonics, thermal waves, and computed tomography are analyzed. Computer-based experiments on a selection of methods: ultrasonics, eddy currents, x-rays are assigned for student completion. (Typically Offered: Spring)

EM 5640: Fracture and Fatigue

(Cross-listed with AERE 5640/ ME 5640/ MSE 5640).

Credits: 3. Contact Hours: Lecture 3.

Materials and mechanics approach to fracture and fatigue.

Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue. Offered even-numbered years. (Typically Offered: Fall)

EM 5660: Phase Transformation in Elastic Materials

(Cross-listed with ME 5660).

Credits: 3. Contact Hours: Lecture 3.

Continuum thermodynamics and kinetics approaches to phase transformations. Phase field approach to stress- and temperature-induced martensitic transformations and twinning at the nanoscale. Nucleation and growth. Nanostructural evaluation. Analytical and numerical solutions. Surface stresses and energy. Surface-induced phase transformations. Large Strain formulation. (Typically Offered: Spring)

EM 5670: Nanomechanics of Materials

Credits: 3. Contact Hours: Lecture 3.

Continuum theoretical and computational approaches to material deformation and nanostructure evolution. Thermodynamics and kinetics. Nucleation and growth. Surface and interface tension and phenomena. Chemical reactions, phase transformations, and dislocation evolution. (Typically Offered: Spring)

EM 5690: Mechanics of Composite and Combined Materials

(Cross-listed with AERE 5690/ MSE 5690).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EM 3240

Mechanics of fiber-reinforced materials. Micromechanics of lamina. Macromechanical behavior of lamina and laminates. Strength and interlaminar stresses of laminates. Failure criteria. Stress analysis of laminates. Thermal moisture and residual stresses. Joints in composites. Offered even-numbered years. (Typically Offered: Spring)

EM 5700: Wind Engineering

(Cross-listed with AERE 5700).

Credits: 3. Contact Hours: Lecture 3.

Prereq: ABE 3780 and ME 3450

Atmospheric circulations, atmospheric boundary layer wind, bluff-body aerodynamics, aeroelastic phenomena, wind-tunnel and full-scale testing, wind-load code and standards, effect of tornado and thunderstorm winds, design applications. Offered odd-numbered years. (Typically Offered: Spring)

EM 5800: Phase Transformations and Plasticity

Credits: 3. Contact Hours: Lecture 3.

Continuum approaches to phase transformations and plasticity at nano-, micro-, and macroscales. Interaction between phase transformations and plasticity and different scales. Temperature-, stress-, and strain-induced phase transformations. Transformation-induced plasticity. Thermodynamics and kinetics. Nucleation and growth. Large strain formulation. High pressure phenomena and theories. (Typically Offered: Fall)

EM 5840: High Pressure Mechanics and Phase Transformations

Credits: 3. Contact Hours: Lecture 3.

Techniques for producing static high pressure and measurements. Traditional and rotational diamond anvil cell. Phase diagrams. Pressure, stress, and plastic strain induced phase transformations: continuum thermodynamics and kinetics. Elasticity and plastic flow under high pressure. Transformation pressure hysteresis. Material synthesis and search for new phases. Interaction between phase transformations and plasticity under high pressure. High pressure mechanochemistry. Multiscale modeling.

EM 5860: Micromechanics of Structural Changes in Materials

Credits: 3. Contact Hours: Lecture 2, Discussion 1.

Continuum and micromechanical approaches to material deformation, phase transformations, and microstructure evolution. Thermodynamics and kinetics. Eshelby inclusion. Interface propagation and reorientation. Microscale phase field approach. Large strain formulation. Phase transformations, chemical reactions, twinning, and fracture. (Typically Offered: Fall)

EM 5900F: Engineering Mechanics Special Topics: Introduction to Dislocation and Plasticity

Credits: 1-4. Repeatable.

(Typically Offered: Fall, Spring, Summer)

EM 5900H: Engineering Mechanics Special Topics: Mechanics of Thin Films and Adhesives

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EM 5900I: Engineering Mechanics Special Topics: Mechanics of Cellular and Porous Media

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EM 5900J: Engineering Mechanics Special Topics: Other

Credits: 1-4. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EM 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**EM 6900N: Engineering Mechanics Special Topics: Advanced Experimental Methods**

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EM 6900O: Engineering Mechanics Special Topics: Advanced Wave Propagation

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EM 6900P: Engineering Mechanics Special Topics: Advanced Materials

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EM 6900Q: Engineering Mechanics Special Topics: Advanced Computational Methods

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EM 6900R: Engineering Mechanics Special Topics: Reliability and Failure

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall)

EM 6900S: Engineering Mechanics Special Topics: Other

Credits: 1-6. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

EM 6970: Engineering Internship

Credits: Required. Repeatable.

One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

EM 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Engineering Sales Minor

With approximately 15% of engineering job postings involving product sales, marketing or customer field support, a minor in engineering sales can be a critical step towards a great job offer. Besides being one of the best paid positions in engineering, technical sales offers substantial travel opportunities and the ability to solve customers' engineering problems in the field working with people. Talk to your advisor to see how just a few additional courses could fit into your schedule and fast-track your job prospects.

To fill this need, the Department of Industrial and Manufacturing Systems Engineering has developed a minor in sales engineering. The engineering sales minor is a 15 credit minor that complements the technical training in the student's major discipline by providing the tools and knowledge required for technical (i.e. business-to-business) sales careers. The minor is available only to engineering students and is administered by a supervisory faculty committee. No more than 6 of the 15 credits can be used to meet any other department, college or university requirements.

Requirements:

- IE 4500 Technical Sales for Engineers
- IE 4300 Entrepreneurial Product Engineering
- MKT 3400 Principles of Marketing
- MKT 4500 Advanced Professional Selling

AND

One of the following:

- IE 3050 Engineering Economic Analysis
- CE 2060 Engineering Economic Analysis and Professional Issues in Civil Engineering

The objectives of the minor are to provide a broad understanding of the technical sales process, primarily from the business-to-business perspective. At the conclusion of the minor, students will be able to:

- Calculate a return on investment and communicate this to the customer

- Determine payback period for a given solution and communicate this to the customer
- Perform a market segmentation
- Develop a client value analysis
- Perform prospecting and business-to-business marketing
- Identify decision makers and processes
- Manage a sales process
- Use sales automation software
- Apply knowledge of underlying international sales issues
- Prepare written and verbal sales presentations
- Provide information about product/service pricing
- Lead a team selling process
- Establish sales channel management procedures
- Develop sound distribution strategies and global sales processes
- Formulate bid strategies/negotiation strategies
- Employ good time management skills

Those students interested in pursuing this minor should contact an academic advisor in their home department and fill out a REQUEST FOR MINOR form. Evaluation of all students requesting this minor will be conducted in the Department of Industrial and Manufacturing Systems Engineering. Any questions should be directed to Ms. Devna Popejoy-Sheriff at devna@iastate.edu.

Environmental Engineering

<http://www.ccee.iastate.edu/>

Administered by the Department of Civil, Construction and Environmental Engineering

For undergraduate curriculum in environmental engineering leading to the degree Bachelor of Science.

Students in the environmental engineering bachelor's degree program will complete a curriculum covering the engineering and science knowledge necessary to design and implement effective, affordable solutions for environmental challenges involving water, air, and land. The environmental engineering curriculum equips students with a broad education that includes technical skills in analysis and design and professional practices such as communication, teamwork, leadership, and ethics. Graduates will have a strong foundation necessary to solve complex current and future infrastructure challenges within the diverse areas of environmental engineering.

Graduates of this program will be prepared to work in environmental engineering positions within the private and public (e.g., federal, military, state, and community) sectors that deal with pollution and contamination in all aspects of the built and natural environment. Examples of this

work include analyzing and designing systems for water supply and distribution, collecting and processing waste, controlling air quality, recycling residuals, and protecting public health. Students interested in a more general education in civil engineering should consider the B.S. in civil engineering with environmental emphasis.

Student Learning Outcomes: Graduates of the Environmental Engineering curriculum should have, at the time of graduation:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives: Three to five years after graduation, graduates of the environmental engineering program will have:

1. Pursued successful careers and expertise in environmental engineering or a related profession.
2. Collaborated effectively on multi-disciplinary teams to address the needs of society and the environment.
3. Pursued lifelong learning, professional development, and licensure as appropriate for their career goals.

The faculty encourages the students to develop their professional skills by participating in cooperative education, internships, or progressive summer engineering employment and study abroad programs. Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to pursue concurrently the bachelor's degree and either a Master of Science in Civil Engineering or a Master of Business Administration in the College of Business Administration. These students would have an opportunity to graduate in five years with both degrees.

Curriculum in Environmental Engineering

Administered by the Department of Civil, Construction and Environmental Engineering.

Leading to the degree Bachelor of Science.

Total credits required: 131.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements. International Perspectives: 3 cr.¹ U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement

ENGL 1500	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
LIB 1600	Introduction to College Level Research	1

Social Sciences and Humanities: 12 cr.²

Complete 12 cr. with 6 cr. at 2000-level or above.

Basic Program: 24 cr.³ Minimum GPA of 2.00 required for this set of courses to graduate, including any transfer courses (please note that transfer course grades will not be calculated into the Basic Program GPA).

CHEM 1670	General Chemistry for Engineering Students	4-7
or CHEM 1770	General Chemistry I	
& CHEM 1780	and General Chemistry II	
ENGL 1500	Critical Thinking and Communication (Must have a C or better in this course)	3

Industrial Engineering

Administered by the Department of Industrial and Manufacturing Systems Engineering

The undergraduate curriculum in Industrial Engineering leads to the degree Bachelor of Science.

The Industrial Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the commission's General Criteria and Program Criteria for Industrial and Similarly Named Engineering Programs."

Program Educational Objectives

The Industrial Engineering (IE) Program educates its future graduates to accomplish its program educational objectives (PEO's) in their early careers.

Specifically, the IE Program prepares its majors so that, within a few years after graduation, graduates' attainments are:

1. Industrial engineering solutions that are effectively created and communicated and consider relevant stakeholders and ramifications.
2. Team goal accomplishment through productive and inclusive interactions and leadership.
3. New capabilities, skills, and knowledge that advance professional practice and enable career advancement.

Student Learning Outcomes

The IE Program currently has the following student outcomes describing what IE majors are expected to know and be able to do by the time of graduation.

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety,

and welfare, as well as global, cultural, social, environmental, and economic factors.

3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The Industrial Engineering undergraduate curriculum provides students with fundamental knowledge in mathematics and science, engineering science, social science, and humanities as well as professional industrial engineering course work. In particular, the curriculum includes design, analysis, operation and improvement of integrated systems that produce or supply products or services in an effective, efficient, sustainable and socially responsible manner. Management electives provide students with an opportunity to become familiar with modern business practices that they will encounter in their career. A senior capstone design course provides students with an opportunity to solve open-ended industrial problems with an industrial partner. The cooperative education program provides students with real world experience in the profession and a good perspective on career choices. Students are encouraged to participate in international experiences through exchange programs and industrial internships.

Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue both B.S. and M.S. or M.Eng. degrees in Industrial Engineering, or B.S. and M.B.A. degrees. For further information please refer to Concurrent Undergraduate and Graduate Programs tab.

Curriculum in Industrial Engineering

Administered by the Department of Industrial and Manufacturing Systems Engineering.

Leading to the degree Bachelor of Science.

Total credits required: 122 cr.

See also Basic Program and Special Programs. Grades of C or better are required for any transfer credit course that is applied to the degree program but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirements:

ENGL 1500	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
LIB 1600	Introduction to College Level Research	1

Remaining Communication courses: 9 cr.

ENGL 2500	Written, Oral, Visual, and Electronic Composition (Must have a C or Better in this course)	3
SPCM 2120	Fundamentals of Public Speaking	3
ENGL 3140	Technical Communication	3
Total Credits		9

Social Sciences and Humanities Electives: 12 cr.²

Six of twelve credits must be from 2000-level or above courses. Six credits must be sequential or related courses.

Basic Program: 24 cr.³

A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 1670	General Chemistry for Engineering Students	4
ENGL 1500	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGR 1010	Engineering Orientation	
LIB 1600	Introduction to College Level Research	1
IE 1480	Information Engineering	3
MATH 1650	Calculus I	4
MATH 1660	Calculus II	4
PHYS 2310	Introduction to Classical Physics I	4
PHYS 2310L	Introduction to Classical Physics I Laboratory	1
Total Credits		24

Math and Physical Science: 17 cr.

MATH 2650	Calculus III	4
MATH 2670	Elementary Differential Equations and Laplace Transforms	4
STAT 2310	Probability and Statistical Inference for Engineers	4
PHYS 2320	Introduction to Classical Physics II	4

PHYS 2320L	Introduction to Classical Physics II Laboratory	1
Total Credits		17

Industrial Engineering Core: 34 cr.

A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Core GPA):

IE 2220	Design & Analysis Methods for System Improvements	3
IE 2480	Engineering System Design, Manufacturing Processes and Specifications	3
IE 2710	Applied Ergonomics and Work Design	3
IE 3050	Engineering Economic Analysis	3
IE 3120	Optimization	3
IE 3410	Production Systems	3
IE 3480	Solidification Processes	3
IE 3610	Statistical Quality Assurance	3
IE 4130	Stochastic Modeling, Analysis and Simulation	4
IE 4410	Industrial Engineering Design	3
IE 4480	Manufacturing Systems Engineering	3
Total Credits		34

Other Remaining Courses: 26 cr.²

MATE 2730	Principles of Materials Science and Engineering	3
EE 4420	Introduction to Circuits and Instruments	2
CE 2740	Engineering Statics	3
ME 2310	Engineering Thermodynamics I	3
Focus Electives		6
Management Electives		3
Engineering Topic Electives		6
Total Credits		26

Seminar/Co-op/Internships:

IE 1010	Industrial Engineering Profession	arr†
Optional co-op/internship courses		

† Arranged with instructor.

- These university requirements will add to the minimum credits of the program unless the university-approved courses are also allowed by the department to meet other course requirements within the degree program.
U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
- For Social Sciences and Humanities, Focus, Management, and Engineering Topic Electives, choose from the department approved list. (https://www.imse.iastate.edu/files/2023/08/Elective_List_23-24.pdf)

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Engineering Sales Minor

The Engineering Sales Minor is multidisciplinary and open to undergraduates in the College of Engineering. The minor requires 15 credits, including at least 6 credits in courses numbered 3000 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

IE 4500	Technical Sales for Engineers	3
IE 4300	Entrepreneurial Product Engineering	3
MKT 3400	Principles of Marketing	3
MKT 4500	Advanced Professional Selling	3
	And one of the following:	3
IE 3050	Engineering Economic Analysis	
CE 2060	Engineering Economic Analysis and Professional Issues in Civil Engineering	

Total Credits 15

Concurrent B.S./Master's Industrial Engineering Degree

If you are considering going to graduate school, the concurrent B.S. IE/ master's program (either M.S. or M.Eng.) in industrial engineering is an excellent opportunity to obtain both degrees within 5 years. Up to 6 credits of graduate course work can be used to satisfy your program requirements for both degrees. After completing the B.S. program, you will be a full-time graduate student for the remainder of the master's program.

Program Policies

1. Up to two semesters of concurrent enrollment are allowed.
2. Students can enroll in up to nine credits of coursework at the 5000-level in Industrial Engineering for both the B.S. and M.S./M.Eng. degrees. Six credits will be shared with your undergraduate degree. The remaining three credits will be applied to your M.S. or M.Eng. degree.
3. Students must take at least three credits of 5000-level courses each semester during concurrent enrollment and will be paying graduate tuition and fees.
4. Students participating in the concurrent program must adhere to the requirements for the graduate degree program in which they are enrolled.

Admission Requirements

Students must have a record of high academic achievement and should have a GPA of at least 3.40 on a 4.00 scale. Students must be within

30 credits of completing the requirements for the B.S. degree before applying to the concurrent program. Prospective students **must** speak with their undergraduate advisor prior to applying.

Concurrent B.S. in Industrial Engineering and MBA in the College of Business

Accelerate Your Career with an MBA

Today's successful engineers often need strong business management skills to complement their degree in engineering. These skills are especially important for engineers who are interested in working for technical companies, launching their own business ventures, or pursuing nontraditional jobs such as consulting. The MBA provides an opportunity for competitive advantage for advancement into management positions.

The Colleges of Business and Engineering offer an integrated, concurrent program leading to Bachelor of Science and Master of Business Administration degrees.

The best part is that this program reduces by one year the normal time for completing both degrees separately.

The program is designed to be completed in a minimum of five academic years or ten semesters.

The actual time for completion may be longer depending upon semester course loads, internships, and course sequencing. Careful planning with an academic advisor is essential throughout the program. This program is slightly accelerated through the first six semesters to complete the general education requirements. The remaining four semesters integrate the B.S. in IE requirements and the MBA courses. Twelve credits will be shared in common and will fulfill the requirements for both the B.S. in IE and the MBA.

Summer study is possible, although students are strongly encouraged to complete at least two internships or co-ops in engineering and business for practical experience during their academic program.

Preparation for the B.S. IE/MBA

Students interested in pursuing the MBA need to demonstrate exemplary academic performance throughout their undergraduate program. Mastery of communications, economic theory, global and diversity perspectives, statistical data analysis, and the core professional curriculum is of particular importance.

The Selection Process

The program is demanding, and admission is selective. Students are expected to exhibit superior intellectual ability, strong leadership attributes, and must be highly motivated and career focused. Although not absolute minimums, admitted students typically will have earned a cumulative GPA of 3.00 or above and have scored 600 or higher on

the Graduate Management Admissions Test (GMAT). All application materials, however, are taken into account collectively in the applicant review and student selection process.

GRADUATE STUDY

The department offers programs for the degrees Master of Engineering (M.Eng.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.) with a major in industrial engineering. A minor is available to graduate students having a major in another department. The M.Eng. degree consists of coursework designed to improve professional expertise in industrial engineering. The M.S. and Ph.D. degrees are designed to improve the student's capability to conduct research as well as advancing their professional expertise. In conjunction with the Department of Mechanical Engineering, the department offers a certificate in advanced manufacturing.

The prerequisite to major graduate work is the completion of a curriculum similar to that required of undergraduate students in engineering at this institution. Because of the diversity of industrial engineering topics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering, e.g., mathematics or physics. However, completion of a math sequence of calculus through differential equations is expected.

The graduate program offers advanced study in advanced manufacturing, ergonomics/human factors, operations research/analytics, systems engineering and engineering management.

Well-qualified juniors and seniors in industrial engineering who are interested in graduate study may apply for concurrent enrollment to simultaneously pursue both the industrial engineering bachelor's degree and an M.Eng. or M.S. degree. Another attractive concurrent degree option is the industrial engineering bachelor's degree concurrent with a Master of Business Administration degree from the business college. For additional information about graduate degree programs, admission criteria, and procedures refer to <https://www.imse.iastate.edu/graduate-program/>.

Materials Engineering

For the undergraduate curriculum in Materials Engineering leading to the degree Bachelor of Science. The Materials Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the commission's General Criteria and Program Criteria for Materials (1), Metallurgical (2), Ceramics (3) and Similarly Named Engineering Programs. Materials engineering is a broadly-based discipline relating the composition, structure, and processing of materials to their properties, uses and performance. Materials engineering includes a variety of traditional and modern

technologies involving metals, ceramics, polymers, composites, and electronic materials.

Because of its interdisciplinary nature, career opportunities for materials engineers bridge all industrial and government sectors including: advanced manufacturing, materials for energy and power, biomaterials and biomedical technology, functional materials and devices, nanomaterials and coatings, durable goods, infrastructure, and vehicle technologies (automotive, aerospace).

Student Learning Outcomes

Graduates of the Materials Engineering curriculum should have at the time of graduation:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives

Within a few years of completing the Materials Engineering degree program, our graduates are expected to:

- *Work*-competently engage in professional employment, applying knowledge and skills related to the structure, properties, processing, and performance of materials.
- *Learn*-invest in broad life-long learning activities, such as advanced academic or professional degree programs, practical training, professional development, and leadership training.
- *Serve*-actively contribute to professional communities in their chosen career paths, including professional societies, advisory

boards, standards and regulatory boards, and internal company organizations.

Graduates in materials engineering are able to apply scientific and engineering principles to select or design the best materials to solve engineering problems. They are also able to control the microstructure of materials through processing to optimize properties and performance. They are skilled in creative, independent problem solving under time and resource constraints. Graduates have the opportunity to gain experience in materials engineering practice through cooperative work experience or internships in industry, national laboratories, or another funded research. Graduates can develop a global perspective of engineering through various study abroad opportunities. Classes provide hands-on skills with a broad range of modern materials processing and characterization equipment and methods.

A degree in materials engineering relies on a strong foundation of math, chemistry and physics. The core materials courses include fundamentals of materials, kinetics and thermodynamics, mechanical properties, computational methods, design, and professional practice experience. Students tailor their programs to their goals and interests through the selection of a specialization from the three available: ceramic materials, metallic materials and polymeric materials. Additional technical electives can be taken in other areas of interest. The breadth and depth of the program provide excellent preparation for immediate entry into industry, further study in graduate school, as well as many other unique career paths (i.e. law, military service, art conservation, museum conservatorship, etc.).

Curriculum in Materials Engineering

Administered by the Department of Materials Science and Engineering.

Leading to the degree Bachelor of Science.

Total credits required: 128 cr. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

ENGL 1500	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
LIB 1600	Introduction to College Level Research	1
Complete one of the following courses (Must earn a grade of C or better)		3
ENGL 3020	Business Communication	

ENGL 3090	Proposal and Report Writing	
ENGL 3140	Technical Communication	

Advanced Communication Courses: 6 cr.

ENGL 2500	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3

Complete one of the following courses (Must earn a grade of C or better)

ENGL 3140	Technical Communication	
ENGL 3090	Proposal and Report Writing	
ENGL 3020	Business Communication	

General Education Electives: 12 cr.

Complete 12 cr. from approved list with a minimum of 3 cr. from 2000+ level courses and maximum of 9 cr. from the same designator².

Basic Program: 24 cr.³

A minimum GPA of 2.00 is required for this set of courses. (Please note that transfer course grades will not be calculated into the Basic Program GPA.) See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 1770	General Chemistry I	4
or CHEM 1670	General Chemistry for Engineering Students	
ENGL 1500	Critical Thinking and Communication (Must have a C or better in this course)	3

LIB 1600	Introduction to College Level Research	1
MATH 1650	Calculus I	4
MATH 1660	Calculus II	4
PHYS 2310	Introduction to Classical Physics I	4
PHYS 2310L	Introduction to Classical Physics I Laboratory	1
Total Credits		24

Math and Physical Science: 18 cr.

CHEM 1770L	Laboratory in General Chemistry I	1
CHEM 1780	General Chemistry II	3
CHEM 1780L	Laboratory in College Chemistry II	1
MATH 2650	Calculus III	4
MATH 2670	Elementary Differential Equations and Laplace Transforms	4
PHYS 2320	Introduction to Classical Physics II	4
PHYS 2320L	Introduction to Classical Physics II Laboratory	1
Total Credits		18

Materials/Specialties Engineering Core: 47 cr.

A minimum average GPA of 2.00 is required for this set of courses.

(Please note that transfer course grades will not be calculated into the Core/Specialization GPA.)

MATE 1700	Numeric, Symbolic, and Graphical Methods for Materials Engineering	3
MATE 2140	Structural Characterization of Materials	3
MATE 2150	Introduction to Materials Science and Engineering I	3
MATE 2150L	Introduction to Materials Science and Engineering I - Lab	1
MATE 2160	Introduction to Materials Science and Engineering II	3
MATE 2160L	Introduction to Materials Science and Engineering II - Lab	1
MATE 3110	Thermodynamics in Materials Engineering	3
MATE 3140	Kinetics and Phase Equilibria in Materials	3
MATE 3170	Introduction to Electronic Properties of Materials	3
MATE 3190	Mechanics of Structures and Materials	3
MATE 4130	Materials Design and Professional Practice I	3
MATE 4140	Materials Design and Professional Practice II	3
MATE 4180	Mechanical Behavior of Materials	3
Students must choose one from the three areas of specialization (12 cr.): ceramic, metallic or polymeric materials.		12
Total Credits		47

The courses below meet the specialization requirement. Students select one of the following tracks (ceramics, metals, polymers):

Ceramic Materials:

MATE 3210	Introduction to Ceramic Science	3
MATE 3220	Introduction to Ceramic Processing	3
MATE 4250	Glass Science and Engineering	3
MATE 4330	Advanced Ceramics and Electronic Materials	3

Metallic Materials:

MATE 3410	Metals Processing	3
MATE 3420	Structure/Property Relations in Nonferrous Metals	3
MATE 4430	Physical Metallurgy of Ferrous Alloys	3
MATE 4440	Corrosion and Failure Analysis	3

Polymeric Materials:

MATE 3500	Polymers and Polymer Engineering.	3
MATE 3510	Introduction to Polymeric Materials	3
MATE 4530	Physical and Mechanical Properties of Polymers	3
MATE 4540	Polymer Composites and Processing	3

Other Courses: 21 cr.

STAT 3050	Engineering Statistics	3
In-department electives from list of materials courses ²		6
Technical electives from approved departments ²		12
Total Credits		21

Seminar/Co-op/Internships

Co-op and internships are optional

MATE 3010	Materials Engineering Professional Planning

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved list (<https://www.mse.iastate.edu/files/2019/08/UG-HANDBK-2019-2020-revised-08-19-19.pdf>).
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Note: A MATE student may take up to 6 credit hours from General Education electives on a P/NP basis, except for courses used to meet the U.S. Diversity and International Perspectives requirements. S/F courses (different from P/NP) will be considered for these requirements on a course-by-course basis.

- Polymeric Materials: 3500, 3510, 4530, 4540

The MSE Department offers concurrent enrollment program opportunities for students wishing to enroll in either the M.S. degree program or the M. Eng. degree program during the final stages of their B.S. program completion. Minimum admission requirements for these concurrent programs are the same as those for the regular M.S. and M. Eng. admission. (See MSE Graduate admission requirements (<https://www.grad-college.iastate.edu/academics/programs/apresults.php?id=75>.) Concurrently enrolled students are considered graduate students for official enrollment and tuition/fee purposes. MSE students concurrently enrolled as B.S./M.S. students are eligible for Graduate Research Assistantships (GRA), but these require Major Professor sponsorship and are not guaranteed with admission to the program. Assistantships are not available for B.S./M.Eng. students.

See the Graduate College Handbook for more details concerning application procedures. Undergraduate students should visit with both their academic advisor and the MSE Director of Graduate Education to discuss interest in a concurrent program, learn more about blending

the undergraduate and graduate curricula, and to obtain copies of the application forms.

- **Eligibility** – Undergraduate students who will have earned 90 credits toward the B.S. MATE degree by the time of concurrent enrollment are eligible to apply for a concurrent program.
- **Application Process** – Applications for concurrent enrollment are not submitted through the Graduate College online application system. Rather, completed (paper) application packages should be submitted directly to the MSE Graduate Program Coordinator.
- **Applications are accepted anytime.**
- **Application Package** – The application package must include the following materials:
 - The ISU Concurrent Enrollment application form (“Concurrent Enrollment for Undergraduate Student Wishing to Pursue a Graduate Certificate or Degree”).
 - MSE Concurrent Enrollment Request form
 - Resume/CV
 - Three letters of recommendation

The MSE Department also offers a B.S. MATE and MBA concurrent enrollment program in collaboration with the Ivy College of Business. For more information about this program, please visit: <https://www.ivybusiness.iastate.edu/full-time-concurrent-mba/>.

Materials Science and Engineering Graduate Studies

The Materials Science and Engineering Department offers three graduate degree programs representing a range of opportunities for advanced study. While they share several common features, the programs are designed to serve students with a variety of academic backgrounds, technical interests, and career aspirations. In all three programs, it is expected that our graduate students will acquire fundamental understanding of the structure, properties, processing, and performance of materials, underpinned by the foundational pillars of thermodynamics and kinetics and manifested by the immense landscape of engineered materials and the broad range of physical, chemical, and mechanical functionalities that may be realized in them. Our degree programs include a combination of classroom instruction, seminars, laboratory training, guided teaching experiences, individually mentored independent study, and various forms of materials research experiences, all intended to serve students with a wide range of educational goals. Students are admitted with undergraduate or prior graduate qualifications in a variety of technical areas, and each program of study is tailored to meet the needs of the individual student. The accomplishments of our alumni demonstrate that our graduate training enables a wide range of career paths, but certain types of technical employment opportunities are

targeted by the specific components within each degree program, as summarized below.

The Master of Engineering (M. Eng.) program in Materials Science and Engineering is a coursework-only degree program intended to provide broad knowledge related to materials processing, structure, properties, and performance, coupled with an understanding of the various materials challenges associated with existing and emerging technologies and industry/business sectors. The program is delivered mainly through classroom-based instruction but may also include laboratory-based courses and/or online courses. The curriculum combines a core of fundamental coursework with a highly flexible set of electives, which may include MSE courses and courses from other fields of study. This flexible coursework-only degree option is intended to provide advanced knowledge of fundamental and contemporary issues in Materials Science and Engineering relevant to a broad range of career paths.

The Master of Science (M.S.) program in Materials Science and Engineering is an intensive advanced degree program combining graduate coursework and project-based research. The program is intended to provide broad-based knowledge related to materials processing, structure, properties, and performance, coupled with an understanding of the various materials challenges associated with existing and emerging technologies and industry sectors. The program is delivered mainly through classroom-based instruction but may also include laboratory-based courses and/or online courses. The curriculum combines a core of fundamental coursework and a complement of MSE and non-MSE electives.

Two program options are available, and students enrolled in the MS degree program will select either the *Research Thesis* track or the *Research Portfolio* track. Both tracks include a substantial research component but with different focus.

- The *Research Thesis* track provides an opportunity for the student to complete a full-scale research project from beginning to end, including literature review, project design, planning, laboratory and/or computational investigation, data analysis, decision-making, formulation of conclusions, and appropriate reporting of outcomes. The research, culminating in a thesis document, will be conducted under the supervision of a major professor. In this track, the research efforts are aimed at making an identifiable contribution toward solving a relevant problem in a selected area of science and/or engineering. Project success is judged on the scientific soundness of the contribution and the quality with which it is presented in the Thesis document and in a final oral presentation/examination.
- The *Research Portfolio* track provides an opportunity for the student to complete several separate research projects involving multiple selected topics and methods of experimental and/or computational investigation in accordance with the student’s interests. In this track,

research is conducted through a sequence of three 3-credit project-based courses, each supervised by a specific faculty member and focused on a different area of research and related methods and analysis techniques. Each project has specific scientific objectives, but the focus of the overall portfolio is for the student to develop expertise in a targeted set of laboratories and/or computational research skills. Assessment is based on practical examinations and documented research results associated with each project. The program also requires a comprehensive presentation and oral examination covering all of the student's project work. Each student's overall program is overseen by a major professor.

The Doctor of Philosophy (Ph.D.) degree is the highest academic credential in the field. ISU's robust multi-faceted program is intended to develop state-of-the-art competencies in academic scholarship, enabling graduates to make high-level career-based contributions in fields related to Materials Science and Engineering. The Ph.D. program combines graduate coursework with intensive and specialized project-based research expected to result in significant reportable scientific contributions in one or more selected areas, as evidenced by publication in peer-reviewed journals, industry standards, patents, or other forms of recognizable technical contributions.

The MSE department boasts excellent facilities for academic materials research, maintaining a wide range of faculty laboratories across the ISU campus. In addition, departmental research is highly integrated with the operation of several Research Centers, such as the Ames Laboratory, the Center for Nondestructive Evaluation, the Microelectronics Research Center, the Center for Advanced Nonferrous Structural Materials, the Caloric Materials Consortium, the Critical Materials Institute, and the Sensitive Instruments Facility. These laboratories provide excellent resources for our graduate students in advanced materials research.

Graduate Majors

The Materials Science and Engineering Department offers three graduate degree programs:

- *Master of Engineering* in Materials Science and Engineering
- *Master of Science* in Materials Science and Engineering
- *Doctor of Philosophy* in Materials Science and Engineering

Eligibility: Enrollment in a graduate degree program requires prior* completion of an undergraduate curriculum in Materials Science and Engineering or any discipline of engineering, physical science, or biological science. Graduate students from disciplines other than materials science and engineering may expect that supplemental coursework will be needed, in addition to the required graduate coursework.

Requirements: Program requirements include:

- Required core and elective coursework
- Research (M.S. and Ph.D. only)
- Research proposal (M.S. and Ph.D. only)
- Qualifying examination (Ph.D. only)
- Preliminary oral examination (Ph.D. only)
- Thesis/dissertation (M.S. and Ph.D. only)
- Final oral examination (M.S. and Ph.D. only)

Specific requirements for each degree program are specified in the MSE Graduate Handbook and Graduate College Handbook.

Minor: The MSE Department offers a graduate minor in Materials Science and Engineering. The graduate minor requires 12 credits of MSE graduate coursework, including 6 credits selected from MSE 5100, MSE 5200, MSE 5300, and MSE 5400. In addition, the minor program requires that the POS committee includes at least one member of the MSE Graduate Faculty.

* Qualified students enrolled in the undergraduate materials engineering program at Iowa State University are eligible to apply to the Graduate College for admission to the concurrent enrollment program, where students may simultaneously pursue undergraduate and graduate degrees.

Courses primarily for graduate students, open to qualified undergraduates:

MSE 5010: Fundamentals of Materials Science and Engineering I

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

An examination of structure-property-process relationships in materials, focusing on control and measurement of end-use performance characteristics. Materials design fundamentals are discussed as they pertain to various critical industries, applications, and manufacturing technologies. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

MSE 5020: Fundamentals of Materials Science and Engineering II

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 1 credits.

An examination of the physical behavior of materials, as underpinned by multiphase multicomponent thermodynamics, transport phenomena, interfaces, defect structures, the kinetics of phase transformations, and the mechanistic origins of structure-property-processing relationships in various types of materials. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

MSE 5030: Fundamentals of Materials Science and Engineering III

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Directed study of advanced topics in Materials Science and Engineering. Fundamental principles and relationships connecting structure, chemistry, stability, physical behavior, properties, and processing response are reviewed. Experimental and computational methods for materials research are emphasized. Offered on a satisfactory-fail basis only. (Typically Offered: Summer)

MSE 5100: Fundamentals of Structure and Chemistry of Materials

Credits: 3. Contact Hours: Lecture 3.

Geometric and algebraic representations of symmetry. Pair distribution function. Structure, chemistry, and basic properties of covalent, ionic, and metallic solids, glasses and liquids, and polymers. Interactions of materials with particles and waves. Relationships between direct and reciprocal spaces. The kinematical theory of diffraction, with an introduction to the dynamical theory. (Typically Offered: Fall)

MSE 5190: Magnetism and Magnetic Materials

(Dual-listed with EDUC 5190). (Cross-listed with EE 5190).

Credits: 3. Contact Hours: Lecture 3.

Magnetic fields, flux density and magnetization. Magnetic materials, magnetic measurements. Magnetic properties of materials. Domains, domain walls, domain processes, magnetization curves and hysteresis. Types of magnetic order, magnetic phases and critical phenomena. Magnetic moments of electrons, theory of electron magnetism. Technological application, soft magnetic materials for electromagnets, hard magnetic materials, permanent magnets, magnetic recording technology, magnetic measurements of properties for materials evaluation. Offered odd-numbered years. (Typically Offered: Fall)

MSE 5200: Thermodynamics and Kinetics in Multicomponent Materials

Credits: 3. Contact Hours: Lecture 3.

A review of the fundamental principles of heat, work, basic thermodynamic relations, and criteria for equilibrium. Analytical treatments for the thermodynamic description of multicomponent chemical solutions and reacting systems are developed and employed to predict phase equilibria in materials systems. Builds on the thermodynamic construction to treat the kinetics of chemical reactions and phase transformations. Topics include general first order and second order transitions, along with chemical diffusion. Detailed examples involving nucleation and diffusion limited growth, spinodal decomposition, martensitic transformations, magnetic and electric transitions, and glass formation will be considered. (Typically Offered: Fall)

MSE 5210: Mechanical Behavior and Manufacturing of Polymers and Composites

(Cross-listed with ME 5210).

Credits: 3. Contact Hours: Lecture 3.

Effect of chemical structure and morphology on properties. Linear viscoelasticity, damping and stress relaxation phenomena. Structure and mechanics of filler and fiber reinforced composites. Mechanical properties and failure mechanisms. Material selection and designing with polymers. Processing of polymer and composite parts. (Typically Offered: Spring)

MSE 5300: Solid State Science

Credits: 3. Contact Hours: Lecture 3.

Development of a quantitative description of the electronic structure of solids starting with fundamentals of atoms, atomic bonding, basic crystallography, and band theory of solids. Continuum properties of solids in response to electromagnetic fields and thermal gradients. Quantitative description of the atomistic properties of solids through electron-electron interactions, electron-phonon interactions, and dipole interactions. (Typically Offered: Spring)

MSE 5320: Microelectronics Fabrication Techniques

(Cross-listed with EE 5320).

Credits: 4. Contact Hours: Lecture 2, Laboratory 4.

Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and micro-electro-mechanical systems (MEMS).

MSE 5370: Electronic Properties of Materials

(Cross-listed with EE 5370).

Credits: 3. Contact Hours: Lecture 3.

Magnetic fields, flux density and magnetization. Magnetic materials, magnetic measurements. Magnetic properties of materials. Domains, domain walls, domain processes, magnetization curves and hysteresis. Types of magnetic order, magnetic phases and critical phenomena. Magnetic moments of electrons, theory of electron magnetism. Technological application, soft magnetic materials for electromagnets, hard magnetic materials, permanent magnets, magnetic recording technology, biomedical applications of magnetism, magnetic evaluation of materials. (Typically Offered: Spring)

MSE 5400: Mechanical Behavior of Materials

Credits: 3. Contact Hours: Lecture 3.

Mechanical behavior of materials with emphasis on micromechanics of deformation in three generic regimes: elasticity, plasticity, and fracture. A materials science approach is followed to understand and model the mechanical behavior that combines continuum mechanics, thermodynamics, kinetics, and microstructure. Some topics include elastic properties of materials, permanent deformation mechanisms at different temperatures (e.g., via dislocation motion and creep), and fracture in ductile and brittle materials. Specific classes of materials that are studied: metals, ceramics, polymers, glasses and composites. (Typically Offered: Spring)

MSE 5500: Nondestructive Evaluation

(Cross-listed with EM 5500).

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Principles of five basic NDE methods and their application in engineering inspections. Materials behavior and simple failure analysis. NDE reliability, and damage-tolerant design. Advanced methods such as acoustic microscopy, laser ultrasonics, thermal waves, and computed tomography are analyzed. Computer-based experiments on a selection of methods: ultrasonics, eddy currents, x-rays are assigned for student completion. (Typically Offered: Spring)

MSE 5510: Characterization Methods in Materials Science

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Characterization of ceramic, metal, polymer and glassy materials using modern analytical techniques. Spectroscopic (IR, Raman, UV/VIS/NIR, and NMR), thermal (DSC, DTA/TGA, and DMA) methods, mechanical and rheological testing, magnetic and electrical characterization, and powder characterization. (Typically Offered: Spring)

MSE 5520: Scanning and Auger Electron Microscopy

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Characterization of materials using scanning electron microscopes (SEM) and variants thereof, including electron microprobe, Auger spectrometer, and DualBeam focused ion beams (FIB)/SEMs). Compositional determination using energy and wavelength dispersive x-ray and Auger spectroscopies. Orientation determination using electron backscattered diffraction. Specimen preparation. Laboratory covers SEM operation. (Typically Offered: Fall)

MSE 5530: Physical and Mechanical Properties of Polymers

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Overview of polymer chemical composition, microstructure, thermal and mechanical properties, rheology, and principles of polymer materials selection. Intensive laboratory experiments include chemical composition studies, microstructural characterization, thermal analysis, and mechanical testing. (Typically Offered: Fall)

MSE 5540: Polymer Composites and Processing

Credits: 3. Contact Hours: Lecture 3.

Basic concepts in polymer composites, blends, and block copolymers. Phase separation and miscibility, microstructures and mechanical behavior. Fiber reinforced and laminated composites. Viscosity, rheology, viscoelasticity of polymers. Polymer melt processing methods such as injection molding and extrusion; selection of suitable processing methods and their applications. (Typically Offered: Spring)

MSE 5560: Biomaterials

(Dual-listed with BME 4560/ MATE 4560).

Credits: 3. Contact Hours: Lecture 3.

Presentation of the basic chemical and physical properties of biomaterials, with special emphasis on metallic, ceramic, polymeric, and composite biomaterials, as they are related to their manipulation by the engineer for incorporation into living systems. Role of microstructure and properties needed to select and design biomaterials used in medical devices, artificial organs, implants, and prostheses. Overview of medical science vis-à-vis materials science. (Typically Offered: Fall)

MSE 5570: Chemical and Physical Metallurgy of Rare Earth Metals

Credits: 3. Contact Hours: Lecture 3.

Electronic configuration, valence states, minerals, ores, beneficiation, extraction, separation, metal preparation and purification. Crystal structures, phase transformations and polymorphism, and thermochemical properties of rare earth metals. Chemical properties: inorganic and organometallic compounds, alloy chemistry, nature of the chemical bonding. Physical properties: mechanical and elastic properties, magnetic properties, resistivity, and superconductivity. (Typically Offered: Spring)

MSE 5640: Fracture and Fatigue

(Cross-listed with AERE 5640/ ME 5640/ EM 5640).

Credits: 3. Contact Hours: Lecture 3.

Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue. Offered even-numbered years. (Typically Offered: Fall)

MSE 5690: Mechanics of Composite and Combined Materials

(Cross-listed with AERE 5690/ EM 5690).

Credits: 3. Contact Hours: Lecture 3.

Prereq: EM 3240

Mechanics of fiber-reinforced materials. Micromechanics of lamina. Macromechanical behavior of lamina and laminates. Strength and interlaminar stresses of laminates. Failure criteria. Stress analysis of laminates. Thermal moisture and residual stresses. Joints in composites. Offered even-numbered years. (Typically Offered: Spring)

MSE 5800X: Introduction of Project Management for Thesis Research

(Cross-listed with CHE 5800X/ IE 5800X).

Credits: 1. Contact Hours: Lecture 1.

Tools and skills of Project Management (PM) adapted from industry to improve efficiency in thesis research. Project charter initiation for thesis, timeline and meeting scheduling tools, expectation management, and communication with advisors. Practice of the PM skills using student's own thesis. Presentation of a project charter. Demonstration of knowledge of related PM skills and the ability of utilizing these skills for thesis research. Sharing thesis ideas and learning experience in the Graduate for Advancing Professional Skills (GAPS) learning community. Offered on a satisfactory-fail basis only. (Typically Offered: Fall)

MSE 5810: Computational Modeling of Materials

Credits: 3. Contact Hours: Lecture 3.

Introduction to the basic methods used in the computational modeling and simulation of materials, from atomistic simulations to methods at the mesoscale. Students will be expected to develop and run sample programs. Topics to be covered include, for example, electronic structure calculations, molecular dynamics, Monte Carlo, phase-field methods, etc. (Typically Offered: Fall)

MSE 5880: Eddy Current Nondestructive Evaluation

(Cross-listed with EE 5880).

Credits: 3. Contact Hours: Lecture 3.

Electromagnetic fields of various eddy current probes. Probe field interaction with conductors, crack and other material defects. Ferromagnetic materials. Layered conductors. Elementary inversion of probe signals to characterize defects. Special techniques including remote-field, transient, potential drop nondestructive evaluation and the use of Hall sensors. Practical assignments using a 'virtual' eddy current instrument will demonstrate key concepts. Offered odd-numbered years. (Typically Offered: Fall)

MSE 5900: Special Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

MSE 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**MSE 6010: Materials Seminar**

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Seminar course - presentations given on a weekly basis by leading U.S. and International researchers that are experts in their respective fields closely related to Materials Science. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

MSE 6200: Fundamentals of Phase Transformations

Credits: 3. Contact Hours: Lecture 3.

Explores various advanced theoretical treatments of the energetics and kinetics of multicomponent materials. Topics include analytical and computational descriptions of thermodynamic quantities, experimental measurement of essential physical properties, analytical and computational treatments of kinetic processes, and the use of theoretical predictions of phase equilibria and evolution in materials systems. (Typically Offered: Spring)

MSE 6300: Physical Properties of Solids

Credits: 3. Contact Hours: Lecture 3.

Advanced course in the behavior of solids within the framework of solid state physics and chemistry. Includes magnetic, dielectric, transport, and optical phenomena in solids. Influence of phase transformations and crystal symmetry on the physical properties.

MSE 6510: Powder Diffraction Methods

Credits: 3. Contact Hours: Lecture 3.

Advanced structural characterization of materials using powder diffraction. Production of X-ray and neutron radiation. Review of symmetry, group and kinematical theories of diffraction. Mathematical and computational backgrounds of powder diffraction data. Introduction to single crystal diffraction methods, origin of powder diffraction pattern, history of the technique. Modern powder diffraction methods. Indexing of powder diffraction patterns, figures of merit, precise lattice parameters. Phase problem, determining crystal structures from symmetry and geometry, Patterson, direct and Fourier methods. Rietveld method, precise crystal structures: atomic parameters, qualitative and quantitative phase identification, preferred orientation, grain size, strain, residual stress, order-disorder. Powder diffraction at non-ambient conditions. Applications of powder diffraction: data bases, phase transformations, phase diagrams, local structures, magnetism. (Typically Offered: Spring, Summer)

MSE 6520: Transmission Electron Microscopy

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Theory and application of transmission electron microscopy to inorganic materials. Specimen preparation, selected area and convergent beam electron diffraction, bright field/dark field/high resolution imaging. Compositional analysis using X-ray and electron energy loss spectroscopy. (Typically Offered: Spring)

MSE 6900: Advanced Topics in Materials Science

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

MSE 6970: Engineering Internship

Credits: Required. Repeatable.

One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

MSE 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Mechanical Engineering

For the undergraduate curriculum in mechanical engineering leading to the degree Bachelor of Science. The Mechanical Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the commission's General Criteria and Program Criteria for Mechanical and Similarly Named Engineering Programs.

Mechanical engineers apply the principles of motion, energy, and force to create mechanical solutions to technological problems, thereby realizing devices and systems that make life better. About one-fifth of all engineers practicing today are mechanical engineers. Their skills are used in research, development, design, testing, production, technical sales, technical management, as well as medicine, law, and business. Mechanical engineers are characterized by personal creativity, breadth of knowledge, and versatility. For these reasons they are found to function and thrive as valuable members and leaders of multidisciplinary teams. Mechanical engineers are employed in a wide range of industries; examples include agricultural/heavy equipment, biomedical, consulting, energy and power, manufacturing, product design and transportation.

Student Learning Outcomes:

Graduates of the Mechanical Engineering curriculum should have at the time of graduation:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.

4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives:

The mechanical engineering curriculum is organized to provide students with a broad foundation in mathematics, science, engineering, social science and humanities. Areas emphasized in the curriculum are design and optimization, dynamic systems and control, materials processing and mechanics, and thermo-fluid sciences. Elective courses provide additional emphasis in terms of the student's unique educational goals, whether they include immediate entry into industry or further professional or graduate study.

The mechanical engineering curriculum at Iowa State University is dedicated to preparing students for productive careers in the state, nation, and the world and has the following objectives:

1. Graduates will have utilized a foundation in engineering and science to improve lives and livelihoods through a successful career in mechanical engineering or other fields.
2. Graduates will have become effective leaders, collaborators, and innovators solving social, technical, business, and global challenges.
3. Graduates will have engaged in life-long learning and professional development through self-study, continuing education, or graduate and professional studies in engineering, business, law, medicine, or other fields.
4. Graduates will have fostered inclusive and diverse environments and functioned effectively in inclusive and diverse environments.

A major focus throughout the mechanical engineering curriculum is a series of experiences that emphasize engineering design, culminating in a capstone design experience in the senior year. Students will develop engineering judgment through open-ended problems that require establishment of reasonable engineering assumptions and realistic constraints. Development of skills needed to be independent, creative thinkers, effective communicators, and contributing team members is integrated throughout the curriculum. Students also develop an understanding of the societal context in which they will practice

engineering, including environmental, legal, aesthetic, and human aspects.

Students are encouraged to participate in the cooperative education program or to obtain engineering internships, both domestically and abroad. Study abroad is encouraged, and the department has exchange programs with several universities around the world. These experiences help students to round out their education and to better prepare for careers in the increasingly global practice of engineering.

Curriculum in Mechanical Engineering

Administered by the Department of Mechanical Engineering. Leading to the degree Bachelor of Science.

Total credits required: 129 cr.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.
International Perspectives: 3 cr.¹
U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

ENGL 1500	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
LIB 1600	Introduction to College Level Research	1
Choose one of the following communication courses (minimum grade of C)		3
ENGL 3020	Business Communication	
ENGL 3090	Proposal and Report Writing	
ENGL 3140	Technical Communication	
SPCM 2120	Fundamentals of Public Speaking	

General Education Electives: 15 cr.

No more than three 1000-level courses for this set of courses can be applied to the Bachelor of Science Degree in Mechanical Engineering.

Choose one course from the following:		3
ECON 1010	Principles of Microeconomics	
	or ECON 102Principles of Macroeconomics	
Social Science		3
Humanities		6
Humanities or Social Science		3
Total Credits		15

Basic Program: 24 cr.

A minimum GPA of 2.00 is required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program

GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 1670	General Chemistry for Engineering Students	4
or CHEM 1770 General Chemistry I		
ENGL 1500	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGR 1010	Engineering Orientation	
ME 1600	Mechanical Engineering Problem Solving with Computer Applications ³	3
LIB 1600	Introduction to College Level Research	1
MATH 1650	Calculus I	4
MATH 1660	Calculus II	4
PHYS 2310	Introduction to Classical Physics I	4
PHYS 2310L	Introduction to Classical Physics I Laboratory	1
Total Credits		24

Mechanical Engineering Foundations: 25 cr.

A minimum GPA of 2.00 for the complete group of Foundations courses is required before students are permitted to enroll in the following Mechanical Engineering Core courses (please note that transfer course grades will not be calculated into the ME Foundations GPA): ME 3240, ME 3250, ME 3320, ME 3350, ME 3700 and ME 4210.

MATH 2650	Calculus III	4
4 credits from the following:		4
MATH 2670	Elementary Differential Equations and Laplace Transforms	
MATH 2660	Elementary Differential Equations & MATH 2680 and Laplace Transforms	
PHYS 2320	Introduction to Classical Physics II	4
PHYS 2320L	Introduction to Classical Physics II Laboratory	1
EM 3240	Mechanics of Materials	3
MATE 2730	Principles of Materials Science and Engineering	3
ME 2310	Engineering Thermodynamics I	3
CE 2740	Engineering Statics	3
Total Credits		25

Mechanical Engineering Core: 38 cr.

A minimum GPA of 2.00 is required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Core GPA):

ME 3450	Engineering Dynamics	3
EE 4420	Introduction to Circuits and Instruments	2
EE 4480	Introduction to AC Circuits and Motors	2
ME 2700	Introduction to Mechanical Engineering Design	3

ME 3240	Manufacturing Engineering	3
ME 3240L	Manufacturing Engineering Laboratory	1
ME 3250	Mechanical Component Design	3
ME 3320	Engineering Thermodynamics II	3
ME 3350	Fluid Flow	4
ME 3700	Engineering Measurements	3
ME 4210	System Dynamics and Control	4
ME 4360	Heat Transfer	4
One Senior Capstone Design course from the following		3
ME 4150	Mechanical Systems Design	
ME 4420	Heating and Air Conditioning Design	
Total Credits		38

Other Remaining Courses: 27 cr.

Complete 15 cr. Technical Electives ²		15
ME 1700	Engineering Graphics and Introductory Design	3
ME 2020	Mechanical Engineering - Professional Planning	
ENGL 2500	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
STAT 3050	Engineering Statistics	3
Complete one of the following communication courses with a minimum grade of C.		3
ENGL 3020	Business Communication	
ENGL 3090	Proposal and Report Writing	
ENGL 3140	Technical Communication	
SPCM 2120	Fundamentals of Public Speaking	
Total Credits		27

Co-op/Internships (Optional)

- These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
- Choose from department approved list of technical electives (<https://www.me.iastate.edu/undergraduate-program/advising/degree-planning/>) and general education electives (<https://www.me.iastate.edu/undergraduate-program/advising/degree-planning/>). Note: electives used to meet graduation requirements may not be taken Pass-Not Pass (P-NP).
- See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Transfer Credit Requirements

The Mechanical Engineering Department requires a grade of a C or better for any transfer credit course that is applied to the degree program.

The degree program must include a minimum of 15 credits taken from courses offered through the Mechanical Engineering Department at Iowa State University. Of these 15 credits, 3 must be from one of the senior capstone design courses. The remaining 12 credits may be from the core curriculum program (if a student is deficient in these courses) or from 4000-level ME technical electives. No more than 3 credits of independent study shall be applied to meet the 12-credit requirement.

See also: A 4-year plan of study grid showing course template by semester.

Energy Systems Minor

The Energy Systems minor is administered by the mechanical engineering department and is open to all undergraduates in the College of Engineering. The minor may be earned by completing 15 credits from the following courses. The complete list of approved elective courses can be found below. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

<http://www.me.iastate.edu/energy-systems-minor/>

Required courses

ECON 3800	Energy, Environmental and Resource Economics	3
EE 3510	Analysis of Energy Systems	3
or ME 4330	Alternative Energy

WESEP 5020	Wind Energy Systems	3

Concurrent Mechanical Engineering BS/MS Degree

The Department of Mechanical Engineering (ME) provides B.S./M.S. concurrent degrees that allow well-qualified students to be admitted to the graduate program while still working on their undergraduate degrees during their senior year. Concurrent degrees allow well-qualified students to begin their graduate studies before completing their undergraduate degree to complete their graduate degree on an accelerated timeline. Students in concurrent status must be making good progress toward a bachelor's degree. The minimum requirements for admission to concurrent-student status are the same as those required for admission to the Graduate College. Other aspects of concurrent status include:

- Official enrollment and fee payment will be as a graduate student.
- The graduate credential will be awarded at the same time or after the undergraduate degree is conferred.
- Students may be appointed to graduate research assistantships.
- With the approval of a student's Program of Study (POS) Committee, up to 6 ISU credits taken while in concurrent status may be applied to a bachelor's degree and a graduate degree.

Details on the master's degree requirements and graduate admission in mechanical engineering may be found at: <https://www.me.iastate.edu/graduate-admissions/>. (<https://www.me.iastate.edu/graduate-admissions/>)

Details on the graduate college policies on concurrent degrees may be found at: <https://www.grad-college.iastate.edu/handbook/chapter.php?id=4#4.3>. (<https://www.grad-college.iastate.edu/handbook/chapter.php?id=4#4.3>)

Graduate Study

The department offers programs for the degrees Master of Engineering (M. Eng.), Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) with a major in mechanical engineering. The M.Eng. degree is a coursework-only degree designed to improve professional expertise in mechanical engineering. The M.S. and Ph.D. degrees are designed to improve the

student's capability to conduct research as well as their professional expertise. Although co-major and formal minor programs are not offered in mechanical engineering, courses may be used for minor work by students taking major work in other departments.

Well-qualified juniors and seniors in mechanical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science, the Bachelor of Science and Master of Business Administration. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Graduate Programs Office and on the department's website (<http://www.me.iastate.edu/>).

The graduate program offers advanced study in a variety of thrust areas, including biological and nanoscale sciences, clean energy technologies, complex fluid systems, design and manufacturing innovation, and simulation and visualization.

The department offers students the opportunity to broaden their education by participating in minor programs in established departments, interdepartmental programs, or other experiences as approved by their program of study committees.

The requirements for advanced degrees are established by the student's program of study committee within established guidelines of the Graduate College. Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduate students in the department can expect that additional supporting coursework will be required.

Program requirements can be found on the department webpage (<http://www.me.iastate.edu/>) and in the Mechanical Engineering Graduate Student Handbook.

Non-destructive Evaluation Minor

Minor supervised by an interdisciplinary faculty committee, administered by Materials Science and Engineering. The NDE minor is a unique opportunity for engineering students to acquire a multidisciplinary engineering qualification in the rapidly evolving field of Nondestructive Evaluation.

Undergraduate Study

Students interested in completing the NDE engineering minor must be enrolled in the College of Engineering at Iowa State University. They must submit a "Curriculum Change" form and complete the minimum prescribed 16 credit-hours of course work defined below. Acceptance is based on approval by the administering department, Materials Science and Engineering.

A combined average grade of C or higher is required in courses applied to the minor. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

The course requirements for the undergraduate minor in NDE are:

EM 3620/3620	Principles of Nondestructive Testing	3
MATE/EM 3620L	Nondestructive Testing Laboratory	1
At least one of the following NDE specific courses		3-4
CE 4490	Structural Health Monitoring	
EM 4800	Ultrasonic Nondestructive Evaluation	
MATE 4850X	Penetrating Radiation Methods in Nondestructive Evaluation	
MATE 4880	Eddy Current Nondestructive Evaluation	
MSE/EM 5500	Nondestructive Evaluation	

Independent Study courses on NDE projects from other engineering disciplines will need to be approved by the NDE Minor Coordinator

AERE 4900J	Aerospace Engineering Independent Study: Non-destructive Evaluation (Research Topic related to NDE for any 4900)
or EE 4900	Independent Study
or MATE 490C	Independent Study
or ME 4900H	Independent Study: Honors
or ME 4900N	Independent Study: Non Technical Elective
or ME 4900T	Independent Study: Technical Elective

Up to three of the following or additional NDE specific courses from the list above

AERE 3210	Flight Structures Analysis
AERE 4210	Advanced Flight Structures
AERE 4220	Vibrations and Aeroelasticity
AERE 4230	Composite Flight Structures
AERE 4260	Design of Aerospace Structures
CPRE 4180	High Speed System Engineering Measurement and Testing
EE 2240	Signals and Systems I
EE 4180	High Speed System Engineering Measurement and Testing
EM 4240	Intermediate Mechanics of Materials
EM 4250	Introduction to the Finite Element Method
IE 3480	Solidification Processes
IE 3610	Statistical Quality Assurance
ME 4170	Advanced Machine Design
ME 4180	Mechanical Considerations in Robotics
MATE 4180	Mechanical Behavior of Materials
MATE 4430	Physical Metallurgy of Ferrous Alloys

MATE 4440	Corrosion and Failure Analysis
STAT 2310	Probability and Statistical Inference for Engineers
STAT 3050	Engineering Statistics
STAT 3220	Probabilistic Methods for Electrical Engineers

Total Credits

16-20

Software Engineering

Administrated by the College of Engineering and the College of Liberal Arts and Sciences.

For the undergraduate curriculum in Software Engineering (<http://www.se.iastate.edu>) leading to the degree Bachelor of Science. The Software Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the commission's General Criteria and Program Criteria for Software and Similarly Named Engineering Programs.

A software engineer uses their expertise to design, develop, and evaluate software, configure and install computer systems, and build and maintain software systems throughout their lifecycle. Specific tasks software engineers perform evolve quickly, reflecting changes in technology, as well as the needs of employers. Software engineers work as members of teams that may include experts in engineering, marketing, manufacturing, accounting, training, and design.

The Software Engineering Program provides undergraduate students with the opportunity to learn Software Engineering fundamentals, to study applications of state-of-the art software technologies, and to prepare for the practice of Software Engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research, and outreach programs.

Student learning outcomes

Graduates of the Software Engineering curriculum should have, at the time of graduation:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must

consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PROGRAM EDUCATIONAL Objectives

Within five years of graduation, the graduates should:

1. Attain a **productive career** in Software Engineering or related fields.
2. Attain **leadership** roles and become **effective collaborators** to advance professional and organizational goals.
3. Engage in **lifelong learning** and professional development.
4. Encourage and support **diversity** and **inclusiveness** in their workplace.

We expect that these objectives will be manifested in our graduates through the following five key attributes: (a) *peer-recognized expertise*, (b) *engagement in professional practice*, (c) *sustained learning*, (d) *leadership* and (e) *teamwork*.

Demonstration of expertise involves applying state-of-the-art practices for solving problems in the design, development, validation, evolution and sustainment of (software) products. Demonstration of professional engagement involves contributing locally and globally to the use of ethical, competent, and creative practices in industry, academia or the public sector. Demonstration of sustained learning involves the ability to adapt to rapid technological, environmental, and organizational changes through self-study and group study and through opportunities of professional development or graduate study. Demonstration of leadership involves the ability to take initiative, and to facilitate the advancements of individuals and the community by influencing others and by having a widespread, positive impact on critical issues and projects. Finally, demonstration of teamwork involves the ability to work with collaborators who have varied expertise, and with diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the College of Engineering and the College of Liberal Arts and Sciences provide opportunities for each student to have experience with broadening activities. Students have the opportunity to gain practical industry experience in the cooperative education and internship program. Students have the

opportunity to participate in advanced research activities. Through international exchange programs, students learn about engineering practices in other parts of the world.

Curriculum in Software Engineering

Degree requirements leading to the degree Bachelor of Science in Software Engineering.

Total credits required: 125 cr.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Engineering Basic Program GPA, or Software Engineering Core GPA). See also Engineering Basic Program and Special Programs. Note: Pass/Not Pass credits cannot be used to meet graduation requirements.

International Perspectives: 3 cr. ¹

U.S. Diversity: 3 cr. ¹

Communication Proficiency/Library requirement:

ENGL 1500	Critical Thinking and Communication (C or better in this course)	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition (C or better in this course)	3
LIB 1600	Introduction to College Level Research	1
Choose one of the following:		3
ENGL 3090	Proposal and Report Writing (C or better in this course)	
ENGL 3140	Technical Communication (C or better in this course)	

Total Credits 10

General Education Requirements: 21 cr. ²

Choose 1 course from the following:		3
ECON 1010	Principles of Microeconomics	
ECON 1020	Principles of Macroeconomics	
IE 3050	Engineering Economic Analysis	
Approved Arts and Humanities or Social Sciences courses		9
ENGL 2500	Written, Oral, Visual, and Electronic Composition (C or better in this course)	3
Choose one of the following ENGL courses (C or better in this course)		3
ENGL 3090	Proposal and Report Writing	
ENGL 3140	Technical Communication	
SPCM 2120	Fundamentals of Public Speaking	3
Total Credits		21

Engineering Basic Program: 24 cr.

A minimum GPA of 2.00 is required for this set of courses (please note that transfer course grades will not be calculated into the Engineering

Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 1670	General Chemistry for Engineering Students	4
or CHEM 1770	General Chemistry I	
ENGL 1500	Critical Thinking and Communication (C or better in this course)	3
SE 1010	Software Engineering Orientation	
SE 1850	Problem Solving in Software Engineering ³	3
LIB 1600	Introduction to College Level Research	1
MATH 1650	Calculus I	4
MATH 1660	Calculus II	4
PHYS 2310	Introduction to Classical Physics I	4
PHYS 2310L	Introduction to Classical Physics I Laboratory	1
Total Credits		24

Math and Physical Science: 17 cr.

COMS 2270	Object-oriented Programming (C- or better in this course)	4
COMS 2280	Introduction to Data Structures (C- or better in this course)	3
MATH 2670	Elementary Differential Equations and Laplace Transforms	4
Math Elective: Choose one of the following:		3
MATH 2070	Matrices and Linear Algebra	
MATH 2650	Calculus III	
MATH 3040	Combinatorics	
MATH 3140	Graph Theory	
MATH 3170	Theory of Linear Algebra	
STAT 3300	Probability and Statistics for Computer Science	3
Total Credits		17

Software Engineering Core: 37 cr.

A minimum GPA of 2.00 is required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Software Engineering Core GPA):

CPRE 2810	Digital Logic	4
Choose one of the following:		3
COMS 3270	Advanced Programming Techniques	
CPRE 2880	Embedded Systems I: Introduction	
Choose one of the following:		3
COMS 3210	Introduction to Computer Architecture and Machine-Level Programming	
CPRE 3810	Computer Organization and Assembly Level Programming	

Choose one of the following:		3
COMS 3520	Introduction to Operating Systems	
CPRE 3080	Operating Systems: Principles and Practice	
Choose one of the following:		3
COMS 2300	Discrete Computational Structures	
CPRE 3100	Theoretical Foundations of Computer Engineering	
COMS 3110	Introduction to the Design and Analysis of Algorithms	3
COMS 3630	Introduction to Database Management Systems	3
SE 3090	Software Development Practices	3
SE 3170	Introduction to Software Testing	3
SE 3190	Construction of User Interfaces	3
SE 3390	Software Architecture and Design	3
SE 4210	Software Analysis and Verification for Safety and Security	3

Note: CPRE 2880, CPRE 3810, and CPRE 3080 are 4-credit courses.

The Software Engineering Core credit requirement (37 credits) is given in terms of 3-credit courses. If the 4-credit courses are taken instead, then the extra credits will be used as credits for Supplemental Electives.

Total Credits 37

Other Remaining Courses: 26 cr.

SE 4910	Senior Design Project I and Professionalism	3
SE 1660	Careers in Software Engineering	
SE 4920	Senior Design Project II	2
Software Engineering Electives ²		9
Supplemental Electives ²		9
Open Elective ²		3
Total Credits		26

Optional Co-op/Internships

Co-op (ENGR 3980) or internship (ENGR 3960) is optional

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 3000-level or above in professional and technical courses earned at ISU in order to receive a Bachelor of Science in Software Engineering. These 30 credits must include SE 4910 Senior Design Project I and Professionalism and SE 4920 Senior Design Project II. The Software Engineering degree program requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree

program. U.S Diversity and International Perspectives courses may not be taken Pass/Not Pass.

2. Choose from approved lists (<http://www.se.iastate.edu/academics/>).
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Engineering Basic Program.

See also: A 4-year plan of study grid showing course template by semester.

Note: International Perspectives and U.S. Diversity courses are used to meet the General Education Electives (<http://www.se.iastate.edu/academics/>).

Total Credits: 125

* Total credits required - 125 credits. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU Cumulative GPA, Engineering Basic Program GPA, or Software Engineering Core GPA). See also Basic Program and Special Programs.

Engineering Basic Program - A minimum GPA of 2.00 is required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Engineering Basic Program GPA)

Must receive a C or better grade in required English classes.

Must receive a C- or better grade in MATH 1650, MATH 1660, COMS 2270, and COMS 2280.

General Educational Elective courses to be selected in consultation with Software Engineering Academic Advisors from a list of approved courses. They must include courses that satisfy university and college general education requirements. These courses include courses or categories of courses such as International Perspectives and U.S. Diversity, World Language, Arts and Humanities, and Social Sciences. Pass/Not Pass credit is not accepted.

Software Engineering Electives and Supplemental Electives must be selected from the program-approved list (<http://www.se.iastate.edu/academics/>).

- ¹ Software Engineering Core (A minimum GPA of 2.00 is required for this set of courses, including any transfer courses but transfer course grades will not be calculated into the Software Engineering Core GPA)
- ² Students who take the 4-credit lab courses CPRE 2880, CPRE 3080, and CPRE 3810 instead of the corresponding 3-credit alternatives can apply the additional credits toward Supplemental Electives. The total number of credits required in the Software Engineering Program remains the same for all students.

The Software Engineering Program has established concurrent undergraduate and graduate programs with the Department of Computer Science, the Department of Electrical and Computer Engineering, and the

Ivy College of Business. Please visit <https://se.iastate.edu/academics/> for details.

Systems Engineering

Systems Engineering Master’s Degree

Administered by the Department of Industrial and Manufacturing Systems Engineering

The Systems Engineering Program focuses on developing an individual’s analytical skills to design, evaluate, and build modern complex engineered systems. Engineers who can conceptualize, model, and integrate hardware, software, data, and humans are critical in technology driven multi-disciplinary design teams. The Iowa State University Master of Engineering in Systems Engineering Program is designed to train engineers to excel in the technology driven design environment commonly found in developing modern complex engineered systems. The program can be completed on line or in residence, part-time or full-time.

Admission Requirements

To be considered for admission, the applicant should have a bachelor’s degree in engineering or related field from a college, university, or technical school of recognized standing. Non-engineering backgrounds will be considered on a case-by-case basis. High academic achievement or other persuasive evidence of professional accomplishments is expected for admission to the program. The GRE is not required.

Applicants for admission to this program apply through the ISU Graduate College. Each applicant must submit:

- Application and application fee
- Official academic transcripts
- Three letters of recommendation
- Resume

Applications should be submitted as early as possible before the beginning of the semester for which admission is sought. Individuals may also take up to nine credits at Iowa State as a non-degree seeking student and then transfer them to the program when they are admitted. (<https://iowastateonline.iastate.edu/apply-and-enroll> (<https://iowastateonline.iastate.edu/apply-and-enroll/>))

The Master of Engineering in Systems Engineering Program at Iowa State University is focused on supporting working professionals so teaching or research assistantships typically are not available.

Degree Requirements

(10 courses total = 30 credits)

Intro Core (required first year)

IE 5630	Engineering and Systems Management	3
IE 5650	Systems Engineering and Analysis	3
Core (required)		
IE 5640	Decision Analysis	3
IE 5700	Systems Engineering and Project Management	3
IE 5850	Requirements and Architecture Engineering	3
Electives		
IE 4480	Manufacturing Systems Engineering	3
IE 4520	Introduction To Systems Engineering And Analysis	3
IE 5030	Introduction to Sustainable Production Systems	3
IE 5600	Engineering Risk Analysis	3
IE 5610	Total Quality Management	3
IE 5720	Design and Evaluation of Human-Computer Interaction	3
IE 5770	Human Factors	3
IE 5810	e-Commerce Systems Engineering	3
IE 5820	Enterprise Modeling and Integration	3
AERE 5680	Large-Scale Complex Engineered Systems (LSCES)	3
ME 5250	Optimization Methods for Complex Designs	3
AERE 5630	Introduction to Multidisciplinary Design Optimization	3
One course from any graduate program		3

Students working in research and development who are interested in furthering their research skills may select a creative component option as part of their supporting courses.

Systems Engineering Certificate

(4 courses total = 12 credits)

Intro Core (required first year)

IE 5630	Engineering and Systems Management
IE 5650	Systems Engineering and Analysis
Core (required to pick 2)	
IE 5600	Engineering Risk Analysis
IE 5640	Decision Analysis
IE 5700	Systems Engineering and Project Management
IE 5850	Requirements and Architecture Engineering

Other focus areas in related disciplines, such as systems engineering, human factors, supply chain management, or manufacturing, may be substituted for supporting courses. A program of study is developed by the student and academic advisor to fit individual needs.

Students working in research and development who are interested in furthering their research skills may select a creative component option as part of their supporting courses.

COLLEGE OF HUMAN SCIENCES

Laura Jolly, Dean, Dean's Chair

Jennifer Margrett, Associate Dean Research and Graduate Education

Robert D. Reason, Associate Dean Undergraduate Academic Affairs

Debra Sellers, Associate Dean and Director of Human Sciences Extension and Outreach

www.hs.iastate.edu/ (<http://www.hs.iastate.edu/>)

The College of Human Sciences (CHS) provides an integrative approach to improving the quality of life for individuals, families, schools and communities by linking discovery, science, creativity, and practice; applying the knowledge of learning in all endeavors; and developing leaders for roles in research, education, business and industry, and health and human services.

The College of Human Sciences, founded in 2005, fosters innovative synergies in teaching and learning in addition to the discovery of new knowledge. Members of the college work to enhance human potential in many ways and strive to improve the quality of people's lives - helping them learn better, live longer, and lead lives that are more productive and fulfilling.

Departments/School

- Apparel, Events, and Hospitality Management (<http://www.aeshm.hs.iastate.edu/>)
- Food Science and Human Nutrition (<http://www.fshn.hs.iastate.edu/>)
- Human Development and Family Studies (<http://www.hdfs.hs.iastate.edu/>)
- Kinesiology (<http://www.kin.hs.iastate.edu/>)
- School of Education (<http://www.education.iastate.edu/>)

Recommended High School Preparation

Recommended preparation for students entering most departments in the College of Human Sciences should include 4 years of English (including speech) with emphasis in composition and communication skills; 3 years each of mathematics and natural sciences, and at least 2 years of social sciences and/or humanities. In addition, students interested in Elementary Education are advised to complete two or more years of high school study in one foreign language.

Information for Prospective Students

Each student in the College of Human Sciences works closely with an academic advisor who is associated with the program in which the student is majoring. Advisors assist students in developing academic programs and in adjusting to university life. They also provide information and guidance about career choices. Advisors attempt to assist students

as they develop their schedule of classes to meet their goals, interests, and capabilities.

The college offers a number of orientation sessions during the summer for students planning to enter in the fall. Students who enter in spring or summer terms are also offered orientation sessions which are held prior to the beginning of the student's first term. Incoming students are encouraged to attend an orientation session so that academic assessments can be made, and appropriate classes may be scheduled for the following term.

Undecided Students

The College of Human Sciences offers an academic support program for students who are considering several majors in CHS. This program is administered to undecided Human Sciences students through the MINDS Learning Community. Students in the MINDS Learning Community take coursework together, including an orientation and career exploration course which is taught by college advisors. This course provides opportunities for students to evaluate their interests, skills, and strengths while also receiving additional support through a peer mentor program.

All undecided majors in the College of Human Sciences are required to participate in MINDS Learning Community and will sign up for the program during orientation. For more information, visit the MINDS webpage: <https://hs.iastate.edu/learning-community/minds/>. (<https://hs.iastate.edu/learning-community/minds/>)

Planned Transfer Programs

By planning carefully, students may begin their education at another college and then transfer their courses to a curriculum within the College of Human Sciences with maximum efficiency in meeting the degree requirements. The college works closely with community colleges in Iowa and surrounding states to facilitate a transfer to Iowa State University. For more information, call 1-800-522-0683 or visit the College of Human Sciences Recruitment Office.

Accreditation and Licensure

The following program-specific accreditation/ licensure/registrations have been attained by departments or School of Education within the college:

Department of Apparel, Events, and Hospitality Management:

Apparel, Merchandising, and Design major is endorsed by the American Apparel and Footwear Association's Education Foundation. The Design primary option is accredited by the National Association of Schools in Art and Design.

Hospitality Management is accredited by the Accreditation Commission for Programs in Hospitality Administration.

Department of Food Science and Human Nutrition:

The Food Science degree, including Industry and Technology options are approved by the Institute of Food Technologists.

The Didactic Program in Dietetics and Dietetics Internship are accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics.

The Baccalaureate Degree in Nursing at Iowa State University is pursuing initial accreditation by the Commission on Collegiate Nursing Education (CCNE), One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791. Applying for accreditation does not guarantee that accreditation will be granted. The program has interim approval from the Iowa Board of Nursing.

Department of Human Development and Family Studies:

The Child Development Laboratory School is accredited by the National Association for the Education of Young Children (NAEYC), Academy for Early Childhood Programs, is licensed by the Iowa Department of Human Services, and maintains a 5 Star Rating from the Iowa Quality Rating System.

The Early Childhood Education Program (administered in collaboration with the School of Education) and the Family and Consumer Sciences Education Teacher Licensure Program are accredited by the Iowa Department of Education and students may be recommended for licensure to the Iowa Board of Educational Examiners.

Financial Counseling and Planning (FCP) is a registered education program with the Certified Financial Planner Board of Standards and the Association for Financial Counseling and Planning Education. With these registrations FCP students are eligible to sit for the Certified Financial Planner™ and Accredited Financial Counselor® examinations.

Department of Kinesiology:

The Athletic Training program is accredited by the Commission on Accreditation of Athletic Training Education.

The Physical Education Educator Preparation Program is recommended for approval by the Iowa Department of Education and approved by the State of Iowa Board of Education.

School of Education - Educator Preparation

All Iowa State University Educator Preparation Programs are recommended for approval by the Iowa Department of Education and approved by the State of Iowa Board of Education.

Each student will be enrolled in the School or Department in which he or she plans to major and must meet the graduation

requirements of that department and the college in which it is located.

All candidates must meet the program completion requirements of the Iowa State University Educator Preparation Program in order to be recommended for teacher or educational leadership licensure by Iowa State University.

For details about Teacher Education programs, requirements, and endorsement areas, see Teacher Education. (<https://education.iastate.edu/current-students/educator-preparation-program/>)

For details about Educational Leadership programs and requirements, see Educational Leadership (<https://education.iastate.edu/graduate-students/graduate-programs/division-of-teaching-learning-leadership-and-policy/>)

Undergraduate Core Curriculum Purpose

The College of Human Sciences has established core learning outcomes to provide the unifying foundation critical to personal and professional success for all College of Human Sciences undergraduate students. Assessment of College of Human Sciences' core learning outcomes will measure student competence in four (4) areas. Assessment results will be used by CHS faculty and staff to enhance student learning experiences.

Four components

The core identifies the expected minimum outcomes that each undergraduate in the college must meet:

Communication - Communicate with clear purpose, workable organization and effective style in written, oral, visual and electronic (WOVE) formats without distracting errors in usage or convention.

Self-Assessment/Self Reflection - Consistently and realistically analyze and evaluate one's own knowledge, abilities and actions in comparison to professional standards and create action plans to enhance personal and professional efficacy.

Critical Thinking - Generate, acquire and evaluate information based on scientific evidence, creative processes, and logical and ethical reasoning to make decisions and solve problems in one's personal, professional and community endeavors.

Social Justice - Articulate and demonstrate a clear concept of a just society in which individuals and groups equitably share in societal benefits within a global community.

Expectations for Departments/School of Education/Programs

Departments/schools/programs formally participate in outcomes assessment. Programs identify courses at three levels (introductory, intermediate, and advanced) where at least one significant educational activity is identified and assessed. Increased achievement and level of mastery at advanced levels is discussed and incorporated through continuous improvement efforts.

General Education

Students in the College of Human Sciences are required to complete a program in general education which is integrated in their professional training and extends through the undergraduate curriculum.

The general education program emphasizes intellectual growth and personal development as contrasted with specific career preparation.

The program aims to stimulate a desire for learning and intellectual endeavor, develop understanding and appreciation for the physical and cultural world, encourage independent thinking and analysis, increase competence in all aspects of communication, and create an understanding of individuals as social, psychological, and physical beings.

The student is expected to complete studies in three groups in general education. Areas represented below are not departmental titles. In some cases, courses relating to a given area may be found in several different departments. Credits listed are minimum requirements.

Minimum Group Requirements in the College of Human Sciences

I. Communication Skills (10 cr.): ENGL 1500, ENGL 2500; LIB 1600; and 3 credits in oral communication

II. Biological and physical sciences and mathematical disciplines (9 cr.): at least 3 credits in mathematical disciplines

III. Social sciences and humanities (15 cr.): at least 6 credits in social sciences and at least 6 credits in humanities

Double Majors

Undergraduate students may elect a second major from the departments or school and program areas listed above, or from a major field offered for the bachelor's degree in another college of the university. Double majors may be prohibited between majors as determined by the appropriate curriculum committees.

The major departments must approve the degree program, and if those majors involve two colleges, both deans must approve. Such programs must fulfill the general education requirements of the college of the primary major. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department

of the primary major. If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In this case, the student must satisfy the requirements of each major and of the degree that is chosen for the primary major.

Students with a primary major in another college who wish to take a second major in the College of Human Sciences are required to meet all requirements for the major, prerequisites and supporting courses.

Two Bachelor's Degrees

Any degree offered by the College of Human Sciences may be earned together with a degree in this or any other college of the university. For the requirements for two degrees, see Index (<http://catalog.iastate.edu/azindex/>), bachelor's degree, Two.

International Programs

The College of Human Sciences encourages students to participate in international programs that will help them to become life-long learners of other cultures and perspectives, to enhance their global citizenship, and to expand their opportunities for employment after graduation. The College offers short-term faculty-led study abroad programs, semester-long programs, international student teaching placements, and dietetic internship rotations.

International opportunities change each year, and students should visit <http://intl.hs.iastate.edu> to review the list of available programs and to explore which offerings are designed for specific majors. The College offers several study abroad scholarships and last year over \$73,000 was awarded to support student participation in our international programs.

Faculty members also bring diversity and global perspectives to instruction through research and collaborations with scholars and institutions abroad, and the College employs faculty members from many different countries.

Honors Program

High achieving students, with a grade point average of above 3.50, are invited to apply to the Honors Program. Honors students are encouraged to develop a creative program of study expanding their interests while meeting individual educational objectives. Students in the Honors Program also participate in University Honors Seminars, Honors Courses and collaborate with a faculty member to complete an honors project. For further information, contact the College Honors Committee or academic advisor. See <https://hs.iastate.edu/current-students/academics/honors-program/> or look in the Index (<http://catalog.iastate.edu/azindex/>), under Honors Program.

Human Sciences Extension and Outreach

Students may prepare for a career in the Cooperative Extension System by enrolling in a curriculum in the College of Human Sciences that

provides them with a subject matter base for conducting educational programs for families. Advice on choice of courses should be sought from the Family and Consumer Sciences Education and Studies program, the Associate Dean and Director of Iowa State University Human Sciences Extension and Outreach, and/or the Iowa State University Extension and Outreach 4-H Youth Development Program Leader.

Undergraduate Majors

For more information about a major, see:

1. The curriculum descriptions in this section of the catalog
2. The department catalog section under Courses and Programs
3. Department websites.

Apparel, Events, and Hospitality Management

Apparel, Merchandising, and Design

Options: Merchandising and Retail Analytics; Creative and Technical Design; Fashion Communication; and Product Development and Innovation See Curriculum in Apparel, Merchandising, and Design

Event Management

See Curriculum in Event Management

Hospitality Management

See Curriculum in Hospitality Management

Food Science and Human Nutrition

Culinary Food Science

See Curriculum in Culinary Food Science

Diet and Exercise B.S./M.S.

Jointly administered with the Department of Kinesiology. See Curriculum in Diet and Exercise

Dietetics

See Curriculum in Dietetics

Food Science

Options: Food Science and Industry; Food Science and Technology. See Curriculum in Food Science

Nursing: See Curriculum in Nursing

Nutritional Science

Options: Pre-Health Professional and Research; Family Health; Food Service; Global Health and Policy; Health Coach; and Nutrition and Wellness. See Curriculum in Nutritional Science

Human Development and Family Studies

Human Development and Family Studies

Options: Child Programs; Youth Programs; and Adult/Family Programs. See Human Development and Family Studies

Early Childhood Education - Unified

Administered jointly by the School of Education and the Department of Human Development and Family Studies. See Curriculum in Early Childhood Education - Unified

Family and Consumer Sciences Education and Studies

Options: Communications; Professional Studies; Teacher Licensure. See Curriculum in Family and Consumer Sciences Education and Studies

Financial Counseling and Planning

See Curriculum in Financial Counseling and Planning

Affiliated Program: Early Childcare Education and Programming.

Offered by the Great Plains Interactive Distance Education Alliance (GPIDEA). See Curriculum in Early Childcare Education and Programming

Kinesiology

Athletic Training

See Curriculum in Athletic Training

Diet and Exercise B.S./M.S.

Jointly administered with the Department of Food Science and Human Nutrition. See Curriculum in Diet and Exercise

Kinesiology & Health

Options: Community and Public Health; Exercise Science; Physical Activity and Health Promotion; Physical Education Teacher Education; and Pre-Health Professions. See Curriculum in Kinesiology & Health

School of Education

Early Childhood Education - Unified

Administered jointly by the School of Education and the Department of Human Development and Family Studies. See Curriculum in Early Childhood Education - Unified

Elementary Education

Administered by the School of Education. See Curriculum in Elementary Education

K-12/Secondary Education

The Secondary Education program has three routes, an undergraduate route, a post bachelor route, and a graduate route.

- Undergraduate Secondary Education

Offered in conjunction with subject matter areas, or majors, offered by various departments across the university campus. These subject matter areas include agriculture, biology, chemistry, earth sciences, English, family and consumer sciences, health, history-social sciences, mathematics, music, physics, physical education, and world languages. See Teacher Education

- Post-Bachelor Secondary Education

Coordinated by departments/programs across the university campus. These subject matter areas include agriculture, biology, chemistry, earth sciences, English, family and consumer sciences, health, history-social sciences, mathematics, music, physics, physical education, and world languages. See Teacher Education

- Graduate Secondary Education in the School of Education

Masters of Arts in Teaching in Science Education and Masters of Education in Mathematics Education are coordinated by the School of Education. Other education programs, such as agriculture education, family consumer sciences education, and physical education teacher education, offer masters programs to pursue program completion through their own departments.

International Studies (secondary major only)

The International Studies Program is an interdisciplinary program which may be taken only as a second major. Students pursuing a second major in international studies must complete the International Studies Program as described in this catalog (see International Studies).

Undergraduate Minors

Minors are available to all Iowa State students. Minors consist of at least 15 credits including 6 credits taken at Iowa State University in courses numbered 3000 or above. A student may not apply the same course to two different minors. The minor must include 9 credits that are not used to meet any other department, college or university requirement. Minors are available in the following areas:

Apparel, Merchandising, and Design

Culinary Food Science

Dance

Educational Services in Family and Consumer Sciences

Event Management

Exercise Science

Financial Counseling and Planning

Food and Society

Food Safety (interdepartmental minor)

Food Science

Gerontology (interdisciplinary minor)

Global Human Sciences

Health Promotion

Hospitality Management

Human Development and Family Studies

Learning and Leadership Sciences

Learning Technologies

Kinesiology

Nutrition

Graduate Programs

The College of Human Sciences offers a variety of programs leading to a Master's degree, a Ph.D., or a graduate certificate. Each unit offers a variety of program options, as well as opportunities for interdisciplinary study in the areas of gerontology, toxicology, nutritional studies, and genetics. Multiple opportunities for on-campus and distance education programs are available.

Preparation for Graduate Study

Students considering graduate studies should gain background knowledge in basic subjects related to their area of interest.

Undergraduate mathematics, statistics, and research methods courses are useful as preparation for advanced study in graduate school. Upon completion of graduate programs, students are qualified for leadership positions in business; government agencies; and public and private agencies and institutions; as well as for teaching, research, and extension positions in colleges and universities.

Information for Prospective Students

Graduate study in the College of Human Sciences is conducted through collaboration with the Graduate College, and application is completed through the Graduate College. Details regarding the application process and general information about graduate studies at ISU are found in the Graduate College section of this catalog, (<http://www.grad-college.iastate.edu/>). Details regarding the curricula and specific expectations for each program are found on department websites.

Each graduate student in the College of Human Sciences works closely with an academic advisor and a Program of Study (POSC) committee.

The POSC assists students in developing academic programs tailored to meet individual needs, guide research and/or internship activities, and provide information and guidance about career choices. Graduate assistantship support is available for many students and involves them in research, teaching, and administrative experiences. Incoming students are encouraged to work with departmental advisors to develop appropriate class and assistantship activities.

Graduate Curricula

Information about curricula and degree options for each College of Human Sciences unit is available on the unit websites below.

•Apparel, Events, and Hospitality Management – <http://www.aeshm.hs.iastate.edu/graduate-programs/>

•Food Science & Human Nutrition – <http://www.fshn.hs.iastate.edu/graduate-program/>

•Human Development & Family Studies – <https://www.hdfs.hs.iastate.edu/graduate-programs/>

•Kinesiology – <https://www.kin.hs.iastate.edu/graduate-programs/kinesiology/>

•School of Education - <https://education.iastate.edu/graduate-students/graduate-programs/>

Distance Education Opportunities

The College of Human Sciences offers several online courses and programs. Degrees include PhD, Master's, Undergraduate, and Certificates. Many courses incorporate a blended or hybrid approach, where online students interact with students on campus in real time using webinar services. Some degree programs are provided with a combination of online and condensed schedules that require limited time on campus. Details about these offerings are found on the website at <https://hs.iastate.edu/graduate-students/academics-graduate/online-programs-graduate/>.

Of these programs, six Certificates, one Undergraduate, and four Masters programs are offered through collaboration with the Great Plains Interactive Distance Education Alliance (GP-IDEA; <http://www.gpidea.org/>). These online programs allow students to earn a graduate degree from ISU while taking courses and interacting with students from a number of participating universities. The CHS also offers a Masters of Family and Consumer Sciences-Comprehensive degree online where students have the flexibility to design a program of study the best meets their professional goals.

Undergraduate Certificates

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive

than required for an undergraduate major. At Iowa State University, an undergraduate certificate is awarded concurrently or after baccalaureate requirements are finished. The following undergraduate certificate is available in the College of Human Sciences:

Health Coach Certificate

Graduate Certificates

Graduate certificates provide formal recognition of focused graduate study in an area of specialization that is less comprehensive than required for a master's degree. At Iowa State University, a graduate certificate may be earned either before, after, or concurrently with the master's or doctoral degree. The following graduate certificates are available in the College of Human Sciences:

Applied Research Methods in Human Sciences Certificate - see <https://www.education.iastate.edu/graduate-programs/applied-research/>

Community College Teaching Certificate - see <https://education.iastate.edu/graduate-students/graduate-programs/division-of-higher-education/ed-d-in-education/>

Development and Family Sciences Advanced Research Design and Methods - see <https://hdfs.hs.iastate.edu/graduate-students/graduate-programs/graduate-certificates/>

* Dietetics Internship Certificate - see www.dietetics.iastate.edu/ (<http://www.dietetics.iastate.edu/>)

Education for Social Justice Certificate - see <https://education.iastate.edu/graduate-students/graduate-programs/school-of-education-certification-programs/education-for-social-justice-graduate-certificate/>

* Family Financial Planning Certificate - see www.online.hs.iastate.edu/graduate-programs/masters/mfcs-ffp/ (<http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-ffp/>)

* Financial and Housing Counseling Certificate - see www.online.hs.iastate.edu/graduate-programs/masters/mfcs-ffp/ (<http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-ffp/>)

Family Well Being in Diverse Society - see <https://hdfs.hs.iastate.edu/graduate-students/graduate-programs/graduate-certificates/>

* Gerontology Certificate - see www.hdfs.hs.iastate.edu/graduate-curriculum/ms-fcs/ (<http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-gerontology/>)

* Infant and Early Childhood Mental Health - see <https://hdfs.hs.iastate.edu/graduate-students/graduate-programs/graduate-certificates/>

* Instructional Design Certificate - see <https://education.iastate.edu/graduate-students/graduate-programs/division-of-teaching-learning-leadership-and-policy/graduate-certificates/instructional-design-certificate/>

Life Span Development - see <https://hdfs.hs.iastate.edu/graduate-students/graduate-programs/graduate-certificates/>

* Literacy Coaching Certificate - see <https://education.iastate.edu/graduate-students/graduate-programs/division-of-teaching-learning-leadership-and-policy/graduate-certificates/literacy-coaching-certificate/>

Principal Endorsement (Pre-LEAD) - see <https://education.iastate.edu/graduate-students/graduate-programs/division-of-teaching-learning-leadership-and-policy/educator-prep-programs-for-licensure-recommendation/transformative-school-leadership-program-licensure-recommendation-m-ed/>

Special Education Certificate - see <https://education.iastate.edu/graduate-students/graduate-programs/division-of-teaching-learning-leadership-and-policy/graduate-certificates/special-education-instructional-strategist-certificate/>

Superintendent Licensure - see <https://education.iastate.edu/graduate-students/graduate-programs/division-of-teaching-learning-leadership-and-policy/ed-d-in-education/>

* Youth Development Specialist - see <http://www.online.hs.iastate.edu/graduate-programs/mfcs-youth-development/>

* Youth Program Management & Evaluation - see <http://www.online.hs.iastate.edu/graduate-programs/mfcs-youth-development/>

* Online certificate

Apparel, Events, and Hospitality Management Department

The Apparel, Events, and Hospitality Management department offers courses that provide opportunities for students to learn about interdisciplinary areas including aesthetics, leadership, entrepreneurship, and multi-channel retailing at both undergraduate and graduate levels. AESHM courses serve to complement the student's major area of study whether it be Apparel, Merchandising, and Design; Event Management; Hospitality Management; agriculture, business, design education, engineering, liberal arts and sciences or minor areas of study including entrepreneurial studies, design studies, or international studies.

Apparel, Events, and Hospitality Management, otherwise known as AESHM, is composed of three majors:

- Apparel, Merchandising, and Design
- Event Management
- Hospitality Management

Through each of these three programs, students gain skills and knowledge to help them succeed in the real world. In addition to coursework, they complete an internship that closely relates to their career aspirations.

Graduates of these programs are the managers of your favorite resorts, the designers of your best jeans, and the coordinators of lavish events.

From fine dining to fine apparel, our students, alumni, faculty, and staff have an eye for the original and a taste for quality.

Courses primarily for undergraduates:

AESHM 1110: Professional Development for AESHM

Credits: 1. Contact Hours: Lecture 1.

Introduction to professional experiences within AESHM and CHS Career Services including CyHire. Coursework includes resume development, daily habits for success including stress management, intrapersonal skills with a wellness focus, interpersonal skills and leadership, business etiquette, and professional ethics. (Typically Offered: Fall, Spring)

AESHM 1110L: AESHM Program Orientation and Learning Community

Credits: 1. Contact Hours: Laboratory 2.

Orientation to policies and procedures of department and program. Overview of major and minor options, including entrepreneurship. Exploration of undergraduate research, independent studies, study abroad, and field studies. Coverage of goal setting, curriculum planning, degree audits, and registration. Peer mentor interaction in academic, extracurricular, and service learning arranged component. (Typically Offered: Fall, Spring)

AESHM 1700D: Supervised Work Experience I: Hospitality

Credits: 1. Repeatable, maximum of 2 times.

Prereq: Academic Advisor Permission for Course

Supervised work experience with a cooperating firm or organization. Employer/experience for AESHM 4700 or HSPM 4700 should be different from employer/experience used for AESHM 1700 and AESHM 2700. Graduation Restriction: No more than 12 credits total from AESHM 1700, 2700, and 4700 may be applied toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AESHM 1700F: Supervised Work Experience I: Event Management

Credits: 1. Repeatable, maximum of 2 times.

Prereq: Academic Advisor Permission for Course

Supervised work experience with a cooperating firm or organization. Employer/experience for AESHM 4700 or HSPM 4700 should be different from employer/experience used for AESHM 1700 and AESHM 2700. Graduation Restriction: No more than 12 credits total from AESHM 1700, 2700, and 4700 may be applied toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AESHM 1700N: Supervised Work Experience I: Apparel

Credits: 1. Repeatable, maximum of 2 times.

Prereq: Advisor permission required; freshman classification

Supervised work experience with a cooperating firm or organization. Employer/experience for AESHM 4700 or HSPM 4700 should be different from employer/experience used for AESHM 1700 and AESHM 2700. Graduation Restriction: No more than 12 credits total from AESHM 1700, 2700, and 4700 may be applied toward graduation. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AESHM 1750D: Financial Applications for Retail and Hospitality**Industries: Hospitality Management**

Credits: 2. Contact Hours: Lecture 2.

Using an online delivery method, students will learn basic mathematical concepts, calculations and formulas commonly used in the apparel and hospitality industries. Emphasis on problem solving, critical/creative thinking, and mathematical interpretation of calculations and formulas used within the hospitality industries. (Typically Offered: Spring)

AESHM 1750N: Financial Applications for Retail and Hospitality**Industries: Retail Merchandising**

Credits: 2. Repeatable.

Using an online delivery method, students will learn basic mathematical concepts, calculations and formulas commonly used in the apparel and hospitality industries. Emphasis on problem solving, critical/creative thinking, and mathematical interpretation of calculations and formulas used within the apparel industries. (Typically Offered: Fall, Spring, Summer)

AESHM 1800E: First Year Student Field Study: Hospitality and Event Management

Credits: 1-2. Contact Hours: Lecture 2.5, Laboratory 0.

Repeatable, maximum of 2 times.

Prereq: Instructor Permission for Course

Study of and tours of regional areas of interest to majors in the HSPM and EVENT majors. Trip to regional location under supervision of faculty member. Locations vary. Journal entries and final report/analysis are required. Cost associated with trip. (Typically Offered: Fall, Spring)

AESHM 1800N: First Year Student Field Study: Apparel, Merchandising, and Design

Credits: 1-2. Contact Hours: Lecture 2.

Repeatable, maximum of 2 times.

Prereq: Instructor Permission for Course

Study of and tours of regional areas of interest to AMD majors. Trip to regional location under supervision of faculty member. Locations vary. Journal entries and final report/analysis are required. Cost associated with trip. (Typically Offered: Fall, Spring)

AESHM 2110: Leadership Experiences and Development (LEAD)

Credits: 3. Contact Hours: Lecture 3.

Introduction to leadership behaviors. Development and utilization of leadership behaviors to positively impact school life, community life, and work life. (Typically Offered: Fall, Spring)

AESHM 2220: Creativity on Demand

Credits: 3. Contact Hours: Lecture 3.

Learn to use creativity strategies to solve everyday problems related to personal and professional lives. Application of creative thinking techniques to view things from different perspectives; identify unique opportunities; and generate and evaluate original ideas. Offered even-numbered years. (Typically Offered: Spring)

AESHM 2380: Human Resource Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 2750 or AESHM 2700, or AESHM 2870 or concurrent enrollment; sophomore classification

Principles and practices of human resource management relevant to human science-related organizations. Emphasis on the entry-level manager's role. (Typically Offered: Fall, Spring)

AESHM 2700D: Supervised Work Experience II: Hospitality

Credits: 1-2. Repeatable, maximum of 2 times.

Supervised work experience with a cooperating firm or organization.

Employer/experience for AESHM 4700 or HSPM 4700 should be different from employer/experience used for AESHM 1700 and AESHM 2700.

Graduation Restriction: No more than 12 credits total from AESHM 1700, 2700, and 4700 may be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

AESHM 2700F: Supervised Work Experience II: Event Management

Credits: 1-2. Repeatable, maximum of 2 times.

Supervised work experience with a cooperating firm or organization.

Employer/experience for AESHM 4700 or HSPM 4700 should be different from employer/experience used for AESHM 1700 and AESHM 2700.

Graduation Restriction: No more than 12 credits total from AESHM 1700, 2700, and 4700 may be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

AESHM 2700N: Supervised Work Experience II: Apparel

Credits: 1-2. Repeatable, maximum of 2 times.

Supervised work experience with a cooperating firm or organization.

Employer/experience for AESHM 4700 or HSPM 4700 should be different from employer/experience used for AESHM 1700 and AESHM 2700.

Graduation Restriction: No more than 12 credits total from AESHM 1700, 2700, and 4700 may be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

AESHM 2720: Fashion Show Production and Promotion

Credits: 2-3. Contact Hours: Lecture 3, Laboratory 2.

Repeatable, maximum of 5 credits.

Prereq: Instructor Permission for Course

Planning and production of fashion show including developing budgets, public relations, advertising, fund-raising, choreography, staging, lighting, and food. Promotion of fashion show and similar events. Permission by application. Graduation Restriction: Maximum of 5 credits can be applied to graduation. (Typically Offered: Fall, Spring)

AESHM 2800: Orientation to U.S. Field Study

Credits: Required. Contact Hours: Lecture 1.

Repeatable, maximum of 2 times.

Orientation to the field study location during the semester preceding the trip. (Typically Offered: Fall, Spring)

AESHM 2810: Orientation to International Field Study

Credits: 1. Contact Hours: Lecture 1.

Repeatable, maximum of 2 times.

Orientation to the field study location during the semester preceding the trip. (Typically Offered: Fall, Spring, Summer)

AESHM 2870: Principles of Management in Human Sciences

Credits: 3. Contact Hours: Lecture 3.

Introduction to management concepts and principles with application to human sciences-related businesses and organizations. Includes service quality management, professionalism, and social responsibility. (Typically Offered: Fall, Spring)

AESHM 3110E: Seminar on Careers and Internships: Event Management and Hospitality Management

Credits: 1. Contact Hours: Lecture 1.

Prereq: AESHM 1110; Sophomore classification

Internship and career planning, professional expectations and responsibilities. Resume development, business letters/professional correspondence, interviewing techniques, and business etiquette. (Typically Offered: Fall, Spring)

AESHM 3110N: Seminar on Careers and Internships: Apparel, Merchandising, and Design

Credits: 1. Contact Hours: Lecture 1.

Prereq: AESHM 1110; Sophomore classification

Internship and career planning, professional expectations and responsibilities. Resume development, cover letters, interviewing techniques, and business etiquette. (Typically Offered: Fall, Spring)

AESHM 3400: Hospitality and Apparel Marketing Strategies

Credits: 3. Contact Hours: Lecture 3.

Application of marketing principles to the hospitality-, events-, and apparel-related industries. Emphasis on the role of marketing in an organization's overall strategic planning. Development and evaluation techniques available to hospitality, events, apparel, and related businesses, including advertising, sales promotion, packaging, and public relations. (Typically Offered: Fall, Spring)

AESHM 3420: Aesthetics of Consumer Experience

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Design principles, aesthetic concepts, and research applied to consumer experiences, with an emphasis on hospitality and retail environments and events. Influence of individual differences and cultural patterns on aesthetic preferences. (Typically Offered: Fall, Spring)

AESHM 3450X: Retail/Hospitality Experiences & Events

Credits: 1-3. Contact Hours: Lecture 3.

Survey course of retail and hospitality events. Production and execution of retail and hospitality events in the Student Innovation Center.

AESHM 3650: Event, Hospitality, and Retail Risk Management

Credits: 3. Contact Hours: Lecture 3.

Overview and management of hazards and risks in the planning, design, operation, and evaluation stages of events, hospitality organizations, and apparel/retail environments. (Typically Offered: Summer)

AESHM 3800D: U.S. Field Study: Hospitality Management

Credits: 1-3. Repeatable, maximum of 3 credits.

Study and tours of areas of interest to majors in the Hospitality Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2800. Permission by application. (Typically Offered: Fall, Spring, Summer)

AESHM 3800F: U.S. Field Study: Event Management

Credits: 1-3. Repeatable, maximum of 3 credits.

Study and tours of areas of interest to majors in the Event Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2800. Permission by application. (Typically Offered: Fall, Spring, Summer)

AESHM 3800N: U.S. Field Study: Apparel, Merchandising, and Design

Credits: 1-3. Repeatable, maximum of 3 credits.

Prereq: AESHM 2800 or concurrent enrollment; permission of instructor

Study and tours of areas of interest to majors in the Apparel, Merchandising, and Design program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2800. Permission by application. (Typically Offered: Fall, Spring, Summer)

AESHM 3810D: International Field Study: Hospitality Management

Credits: 1-3. Repeatable.

Prereq: AESHM 2810 or concurrent enrollment; Instructor permission

Study and tours of areas of interest to majors in the Hospitality Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2810. Permission by application. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

AESHM 3810F: International Field Study: Event Management

Credits: 1-3. Repeatable.

Prereq: AESHM 2810 or concurrent enrollment; Instructor permission

Study and tours of areas of interest to majors in the Event Management major. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2810. Permission by application. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

AESHM 3810N: International Field Study: Apparel, Merchandising, and Design

Credits: 1-3. Repeatable, maximum of 3 times.

Prereq: AESHM 2810 or concurrent enrollment; Instructor permission

Study and tours of areas of interest to majors in the Apparel, Merchandising, and Design major. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2810. Permission by application. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

AESHM 3980: Cooperative Education

Credits: Required. Repeatable.

Prereq: Permission of Advisor; Junior classification

Required of all cooperative education students seeking full-time status. Students register for this course prior to commencing each work period. (Typically Offered: Fall, Spring, Summer)

AESHM 4210: Developing Global Leadership: Maximizing Human Potential

Credits: 3. Contact Hours: Lecture 3.

Development of leadership in a global environment. Focus on global concerns that impact on the well-being of individuals, families, and communities. Strategies for working with individuals, families and communities in other countries and cultures. Taking local action on global issues. Participation in a service activity. Meets International Perspectives Requirement. (Typically Offered: Spring)

AESHM 4620X: Black Lives Matter: Fashion, Politics, and Resistance Movements

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 1650 or Permission of Instructor

Use historical and cultural methods to examine the history of the Black Lives Matter movement its relationship to past resistance/activist movements and fashion and appearance. Summarize and evaluate literature on Black activism and Black identity. Plan and develop a public exhibition and opening event. Offered even-numbered years. Meets U.S. Diversity Requirement. (Typically Offered: Spring)

AESHM 4700F: Supervised Professional Internship: Event Management

Credits: 3-6. Repeatable.

Prereq: Permission by application; Junior classification

Supervised and structured practical industry work experience with a cooperating firm or organization. Employer/experience for AESHM 4700 or HSPM 4700 should be different from employer/experience used for AESHM 1700 and AESHM 2700. This course is offered for a grade. Graduation Restriction: Maximum number of credits given in a semester is 6. No more than 12 credits from AESHM 1700, 2700, and 4700 may be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

AESHM 4700MX: Supervised Professional Internship: Apparel (Out-of-state)

Credits: 3-6. Repeatable, maximum of 12 credits.

Prereq: AESHM 3110, 9 credits in AMD, minimum 2.0 GPA, permission by application; junior or senior classification; employer/experience should be different than employer/experience for AESHM 1700 and 2700.

Supervised work experience with a cooperating firm or organization. Graduation Restrictions: No more than 12 credits from AESHM 1700, 2700, and 4700 may be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

AESHM 4700N: Supervised Professional Internship: Apparel

Credits: 3-6. Repeatable.

Prereq: Instructor Permission for Course

Supervised work experience with a cooperating firm or organization. Employer/experience for AESHM 4700 or HSPM 4700 should be different from employer/experience used for AESHM 1700 and AESHM 2700. Graduation Restriction: No more than 12 credits total from AESHM 1700, 2700, and 4700 may be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

AESHM 4720: Fashion Show Management

Credits: 2-3. Contact Hours: Lecture 2, Laboratory 2.

Repeatable, maximum of 5 credits.

Prereq: Instructor Permission for Course

Provide leadership and communicate direction for planning and production of fashion show, including developing budgets, publicity, advertising, fundraising, choreography, staging, lighting, and food. Graduation Restriction: Maximum of 5 credits can be applied to graduation. (Typically Offered: Fall, Spring)

AESHM 4740: Entrepreneurship in Human Sciences

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 2750 or AESHM 2870 or ACCT 2840 or 3 cr in MKT or permission of instructor

Comprehensive approach to entrepreneurship including concepts of innovation, creativity, opportunity assessment, and business planning. Focus on human sciences-related businesses: retail, service, hospitality, event, food-related, family-owned, rural, and community businesses. Interaction with entrepreneurs, market research, feasibility analysis, business proposals, and business/community outreach and consulting. (Typically Offered: Fall, Spring)

AESHM 4790X: Data Analytics for Apparel, Events, and Hospitality Management

Credits: 3. Contact Hours: Lecture 3.

Introduction to business analytics concepts and techniques in retail business including fashion, hospitality, and event. Offers opportunities to learn basic hands-on data analytics methods for data summarization, analysis, visualization, and interpretation. (Typically Offered: Fall)

AESHM 4900H: Independent Study: Honors

Credits: 2-4.

Prereq: Instructor Permission for Course

Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AESHM 4970: Cooperative Education

Credits: Required. Contact Hours: Lecture 1.

Repeatable.

Prereq: Permission of advisor; Senior or Graduate classification

Required of cooperative education students. Students must register for this course prior to commencing each work period. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

AESHM 5010: Introduction to Scholarly Research for Graduate Students

Credits: Required.

Focus on the basics of developing scholarly research, including definition and purpose of research and the components of research reporting. Emphasis on standards for each section of research reports. Tips for research reporting and processes of research development. An introduction to ethical standards. Required of all new AESHM graduate students. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring, Summer)

AESHM 5020: Research Methods in Apparel, Events, and Hospitality

Credits: 3. Contact Hours: Lecture 3.

Overview of research methods for qualitative, quantitative, and mixed methods. Topics include philosophical worldviews, the use of theory, and different research approach, design, methodologies, and procedures. (Typically Offered: Summer)

AESHM 5100: Quantitative Research Methods in Apparel, Events, and Hospitality

Credits: 3. Contact Hours: Lecture 3.

Overview of quantitative research methods in apparel and hospitality fields. Topics include types of quantitative research design, sampling design, measurement, validity issues, power and precision analysis, methods of data gathering and analysis techniques, and interpretation of statistical results. Use of statistical packages. Development of research plan. Offered odd-numbered years. (Typically Offered: Spring, Summer)

AESHM 5110: Seminar

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable, maximum of 6 times.

Discussion of scholarship and current issues. Topics vary.

AESHM 5120: Qualitative Research Methods in Apparel, Events, and Hospitality

Credits: 3. Contact Hours: Lecture 3.5.

Introduction to and hands-on experiences with a variety of qualitative research methods specific to apparel, events and hospitality research. Students will develop skills at research design, data, collection, analysis, and write-up for qualitative inquiry. Offered even-numbered years. (Typically Offered: Summer)

AESHM 5700A: Apparel Merchandising and Design

Credits: 1-3. Repeatable, maximum of 2 times.

Supervised experience related to career objective. Proposal must be approved semester before placement. (Typically Offered: Fall, Spring, Summer)

AESHM 5700B: Hospitality Management

Credits: 1-3. Repeatable, maximum of 2 times.

Supervised experience related to career objective. Proposal must be approved semester before placement. (Typically Offered: Fall, Spring, Summer)

AESHM 5740: Entrepreneurship in Human Sciences

Credits: 3. Contact Hours: Lecture 3.

Comprehensive approach to entrepreneurship including concepts of innovation, creativity, opportunity assessment, and business planning. Focus on human sciences-related businesses: retail, service, hospitality, event, food-related, family-owned, rural, and community businesses. Interaction with entrepreneurs, market research, feasibility analysis, business proposals, and business/community outreach and consulting. (Typically Offered: Fall, Spring)

AESHM 5790: Data Analytics for Apparel, Event, and Hospitality Management

Credits: 3. Contact Hours: Lecture 3.

Business analytics is a process of transforming data into meaningful insights and actionable results in the context of decision making and problem solving. Review of the data-related challenges apparel, event, and hospitality organizations confront and the importance of data analytics in making critical management decisions. Basic analytic techniques including data management, analysis, interpretation, and visualization and analyze case studies that successfully deployed these techniques. Typically Offered: Fall (even-numbered years), Summer (odd-numbered years).

AESHM 5800D: U.S. Field Study: Hospitality Management

Credits: 1-3. Repeatable, maximum of 3 times.

Study and tours of areas of interest to majors in the Hospitality Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2800. Permission by application. (Typically Offered: Fall, Spring, Summer)

AESHM 5800F: U.S. Field Study: Event Management

Credits: 1-3. Repeatable, maximum of 3 times.

Study and tours of areas of interest to majors in the majors in the Event Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2800. Permission by application. (Typically Offered: Fall, Spring, Summer)

AESHM 5800N: U.S. Field Study: Apparel, Merchandising, and Design

Credits: 1-3. Repeatable, maximum of 3 times.

Study and tours of areas of interest to majors in the Apparel, Merchandising, and Design program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2800. Permission by application. (Typically Offered: Fall, Spring, Summer)

AESHM 5810D: International Field Study: Hospitality Management

Credits: 1-3. Repeatable.

Study and tours of areas of interest to majors in the Hospitality Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2810. Permission by application. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

AESHM 5810F: International Field Study: Event Management

Credits: 1-3. Repeatable.

Study and tours of areas of interest to majors in the Event Management major. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2810. Permission by application. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

AESHM 5810N: International Field Study: Apparel, Merchandising, and Design

Credits: 1-3. Repeatable, maximum of 3 times.

Study and tours of areas of interest to majors in the Apparel, Merchandising, and Design major. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 2810. Permission by application. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**AESHM 6110: Seminar**

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Scholarship and current issues. Topics vary.

AESHM 6700A: Teaching Practicum: Apparel Merchandising and Design

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Supervised experience in the university classroom. Proposal must be approved semester before placement. (Typically Offered: Fall, Spring, Summer)

AESHM 6700B: Teaching Practicum: Hospitality Management

Credits: 1-3. Repeatable.

Prereq: Instructor Permission for Course

Supervised experience in the university classroom. Proposal must be approved semester before placement. (Typically Offered: Fall, Spring, Summer)

AESHM 6700C: Teaching Practicum: Event Management

Credits: 1-3. Repeatable.

This practicum is designed to provide event management graduate students (the graduate instructor) with experience in instructional planning, management, and systematic delivery of designed instruction for event undergraduate courses. Proposal must be approved semester before placement. (Typically Offered: Fall, Spring, Summer)

Courses primarily for undergraduates:**AMD 1210: Apparel Assembly Processes**

Credits: 4. Contact Hours: Lecture 1, Laboratory 6.

Principles of garment and soft good product assembly taught using industrial machines and production equipment. Intermediate construction techniques that build with complexity. Understanding how to manipulate different types of fabrics. Garment analysis and learning to understand technical packages in terms of sewing. (Typically Offered: Fall, Spring)

AMD 1310: Fashion Products and Markets

Credits: 3. Contact Hours: Lecture 3.

Fashion industry from concept to consumer. Focus on fashion-driven consumer goods. Development and prototyping of fashion products for a target market. (Typically Offered: Fall)

AMD 1650: Dress, Appearance, and Diversity in U.S. Society

Credits: 3. Contact Hours: Lecture 3.

Analyze foundational concepts and theories related to dress, identity, fashion, and culture and how they intersect with sex, gender, sexuality, beauty, attractiveness, disability, religion, race, and ethnicity with heightened attention to marginalized communities in the United States. Analyze the experiences and the role of fashion, clothing, dress, and/or accessories for identity development. Critique the social justice issues within the fashion system and identify the driving forces of transformative social justice change in the fashion system. Deconstruct one's personal values and positionalities in relation to fashion, clothing, dress, and/or accessories. Meets U.S. Diversity Requirement. (Typically Offered: Fall, Spring)

AMD 1780: Introduction to Apparel Design Studio

Credits: 3. Contact Hours: Studio 6.

Introduction to the elements and principles of design in fashion and apparel including skill development in fashion illustration, technical drawing, and fabric rendering using traditional media. Application of written and verbal presentations to communicate fashion and apparel design concepts and terminology. Fashion presentation and introduction to portfolio development. (Typically Offered: Fall, Spring)

AMD 2040: Textile Science

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: AMD 1310

Textile fibers, yarns, fabrication, coloration, and finishes. Quality and performance application to textile products. Lab work included. (Typically Offered: Fall, Spring)

AMD 2060: Design Selective Advancement

Credits: Required. Contact Hours: Lecture 1.

Repeatable, maximum of 2 times.

Prereq: Credit or concurrent enrollment in (AMD 1210, AMD 1310, AMD 1650, AMD 1780, and AMD 2040)

Project review and skill assessment related to 2-dimensional and 3-dimensional visualization, apparel assembly, basic product knowledge, design problem solving, illustration, textiles. Grade point averages are part of scoring process. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

AMD 2100: Computer Applications in Digital Design

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Credit or concurrent enrollment in AMD 2450

Applications of skills in Photoshop, Illustrator, InDesign, Google Sketch-up, Excel, and website development. Introduction to digital product design and line development. Focus on elements and principles of design. Introduction to digital portfolio development for design and merchandising. In-class demonstrations and online lectures. (Typically Offered: Fall, Spring)

AMD 2250: Patternmaking I: Drafting and Flat Pattern

Credits: 3.

Prereq: AMD 1210; AMD 2040

Application of patternmaking tools and their functions, measurement techniques, pattern labeling, and patternmaking communication documents. Sloper drafting and flat pattern manipulation methods for women's apparel. Design and construction of original garments using drafted slopers and flat pattern manipulation methods to enable the analysis of fit. (Typically Offered: Fall, Spring)

AMD 2310: Product Development and Manufacturing

Credits: 4. Contact Hours: Laboratory 2, Lecture 3.

Introduction to the product development cycle, career paths, and manufacturing process. Analysis of garment manufacturing, materials, and specifications relative to quality, performance, cost, and price. Introduction to PLM skills via product development simulation. Credit or concurrent enrollment in AMD 2040 and AMD 2100 recommended. (Typically Offered: Fall, Spring)

AMD 2450: Aesthetics and Brand Image

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 1310; credit or concurrent enrollment in AMD 2040

Elements and principles of design. Analysis of sensory, expressive, and symbolic aspects that build brand image, with a focus on fashion products and promotional settings. (Typically Offered: Fall, Spring)

AMD 2570: Museum Studies

Credits: 3. Contact Hours: Lecture 3.

Prereq: Sophomore classification

Overview of museums including history, functions, and philosophy. Collection and curatorial practices. Funding and governance issues. Hands-on object research and exhibit development. Required field trip. (Typically Offered: Fall)

AMD 2750: Retail Merchandising

Credits: 3. Contact Hours: Lecture 3.

Prereq: 3 credits in Math

Principles of merchandising as applied to retail-, service-, events-, and hospitality-related businesses. Study of the planning, development, and presentation of apparel- and hospitality-related products, services, and experiences. Industry and market research, planning of new offerings, and development of promotional and competitive strategies for various retail formats. (Typically Offered: Fall, Spring)

AMD 2780: Fashion Illustration

Credits: 3. Contact Hours: Studio 6.

Prereq: AMD 1780, AMD 2100 or concurrent enrollment, AMD 2450 or concurrent enrollment

Development of fashion plates and focused apparel lines/collections. Proficiency in drawing the fashion figure, technical drawings/flats, and apparel using a variety of media. Continuation of fashion presentation and portfolio development. (Typically Offered: Fall, Spring)

AMD 2880: Styling

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 1310; AMD 2750

Focus on the many facets of the styling profession, including commercial styling, editorial (magazine) styling, personal style consultation, and red-carpet styling. Study of the practical requirements of the profession and the importance of an appropriate digital presence. Course will utilize a hands-on approach with lectures and projects. (Typically Offered: Fall, Spring)

AMD 2900: Independent Study

Credits: 1-2. Repeatable, maximum of 4 credits.

Prereq: Permission of instructor and advisor

Independent study on topics of special interest to the student, facilitated by approved faculty member. Permission of instructor and advisor. (Typically Offered: Fall, Spring, Summer)

AMD 2900R: Independent Study: Professional Practice

Credits: 1-2. Repeatable, maximum of 4 credits.

Prereq: Permission of instructor and advisor

Experiences in teaching assistantship for first year and second-year students. Permission of instructor and advisor. Graduation Restriction: Total number of AMD 2900 and AMD 4900 credits applied to graduation cannot exceed 9 credits. (Typically Offered: Fall, Spring, Summer)

AMD 3050: Quality Assurance of Textiles and Apparel

Credits: 3.

Prereq: AMD 2040, AMD 2310, one course in natural science; STAT 1010, or STAT 2260, or STAT 5870

Undergrad: Principles of product and materials evaluation and quality assurance. Developing specifications and using standard practices for evaluating materials, product characteristics, performance, and quality. Grad: Principles of product and materials evaluation and quality assurance. Developing specifications and using standard practices for evaluating materials, product characteristics, performance, and quality. Previous coursework in natural science and statistics recommended. (Typically Offered: Fall)

AMD 3100: Computer Aided Apparel Patternmaking

Credits: 3. Contact Hours: Laboratory 6.

Prereq: AMD 2100, AMD 2250

Introduction to the computer-aided patternmaking software related to pattern modification, pattern drafting, grading, marker making, and 3-D virtual fitting. (Typically Offered: Fall, Spring)

AMD 3210: Computer Integrated Textile and Fashion Design

Credits: 3. Contact Hours: Laboratory 6.

Prereq: AMD 2100

Analysis and advanced use of computer-aided design software for soft-good fabrication design for various target markets. Development of digital presentation for portfolio integration. (Typically Offered: Fall, Spring)

AMD 3250: Patternmaking II: Draping

Credits: 3. Contact Hours: Laboratory 6.

Prereq: AMD 2250

Principles of patternmaking through basic draping techniques. Application of draping techniques to sportswear and formal wear garments. Analysis of fit and design; problem solving and interaction of fabric characteristics with style features. (Typically Offered: Fall, Spring)

AMD 3280T: Apparel, Merchandising, and Design Seminar: Fashion Trend Forecasting

Credits: 1-3. Contact Hours: Studio 3.

Focus on artisanal textile, apparel, or surface and structural design techniques. Design processes for specialty fabrics and markets. Topics vary by term. Graduation Restriction: Maximum of 6 credits can be applied toward graduation. (Typically Offered: Fall, Spring)

AMD 3280Y: Apparel, Merchandising, and Design Seminar: Styling

Credits: 1-3. Contact Hours: Studio 3.

Focus on artisanal textile, apparel, or surface and structural design techniques. Design processes for specialty fabrics and markets. Topics vary by term. Graduation Restriction: Maximum of 6 credits can be applied toward graduation.

AMD 3290: Digital Textile Printing for Apparel Design

Credits: 3.

Prereq: AMD 3250; Permission of instructor

Overview of the use of digital printing in the textile and apparel industry, color matching, repeat print patterns, engineered prints, and creation of apparel prototypes. (Typically Offered: Spring)

AMD 3540: Euro-American Dress History: Prehistoric to Mid-19th Century

Credits: 3. Contact Hours: Lecture 3.

Survey of fashion history from ancient times up to the mid-19th century; focus on European and North American dress. Emphasis on influence from social, cultural, environmental, political, economic, and technological contexts of the Western world. Social justice perspectives embedded within all topics. Meets International Perspectives Requirement. (Typically Offered: Fall)

AMD 3560: Euro-American Dress History: Mid-19th Century to the Present

Credits: 3. Contact Hours: Lecture 3.

Survey of fashion history from the 1870s through the present. Emphasis on influence from social, cultural, environmental, political, economic, and technological contexts of the Western world. Social justice perspectives embedded within all topics. (Typically Offered: Spring)

AMD 3620: Global Dress in the Fashion System and Society

Credits: 3. Contact Hours: Lecture 3.

Analyze concepts and theories related to dress, identify, fashion, and culture and how they intersect with sex, gender, sexuality, beauty, attractiveness, disability, religion, race, ethnicity, space/place, land, and/or nation with heightened attention to marginalized communities across the globe. Critique the social justice issues within the global fashion system and identify the driving forces of transformative social justice change from a global perspective. Emphasis on decolonizing philosophies. Deconstruct one's personal values and positionalities in relation to the course topics. Meets International Perspectives Requirement. (Typically Offered: Spring)

AMD 3720: Sourcing and Global Issues

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 2310; AMD 2750

Evaluation of key issues facing textile and apparel industries in global markets considering ethical, economic, political, social, and professional implications. Sourcing strategies in a global environment. Corporate and consumer social responsibility and sustainability. ECON 1010 or ECON 1020 recommended. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

AMD 3750: Omni-Channel Retailing

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 2750 or AESHM 2870 or AESHM 3400 or MKT 3400

A customer-centric view of marketing with a focus on the retailer-customer relationship and omni-channel strategies. Analysis and evaluation of integrated retail applications and strategies using digital media, including store formats, e-commerce, catalog, mobile, crowdsourcing, and social media. (Typically Offered: Spring)

AMD 3760: Merchandise Planning and Buying

Credits: 4. Contact Hours: Lecture 3, Laboratory 2.

Prereq: AMD 2750; COMS 1130; 3 credits from MATH

Calculations and computer application in the planning and control of merchandise. Emphasis on retail math as it pertains to assortment planning, the six-month buying plan process, and other buying concepts and strategies. Online modules. (Typically Offered: Fall, Spring)

AMD 3770: Visual Presentation and Promotions

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 2450 or AESHM 3420 and AMD 2100 and AESHM 3400 or MKT 3400

Principles of visual aspects of brand development and management; emphasis on branding, visual merchandising, design/layout of retail spaces. Includes applications such as visual communication and documentation using Adobe Creative Suite(R), hands-on display projects, and brand case studies. (Typically Offered: Fall, Spring)

AMD 3880: Trend Forecasting

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 2040; AMD 2450; AMD 2750; (3 credits from ACCT 2840 or MATH)

Explore many facets of fashion forecasting, including trend research, managing inspiration sources and trend ideas, product adoption, degrees of difference, and turning a fashion forecast into a buying plan. Applications of fashion forecasting will be examined, who does it and how it fits into various careers. The course will utilize a hands-on approach with lecture, discussion, and projects. (Typically Offered: Fall, Spring)

AMD 4040: Innovative Textiles

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: AMD 2040; CHEM with lab

Undergrad: Theories and principles of textile science. Textile product serviceability. Effect of fiber structure on properties and performance. New developments in textiles. Grad: Theories and principles of textile science. Textile product serviceability. Effect of fiber structure on properties and performance. New developments in textiles. Previous coursework in textile science and chemistry recommended. (Typically Offered: Spring)

AMD 4150: Technical Design Processes

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: AMD 2250 and AMD 2310

Garment development and analysis of fit, performance, quality, cost. Exploration of alternative materials, construction methods, grading, and specifications. Applications of software for PLM. (Typically Offered: Fall)

AMD 4260: Creative Design Processes

Credits: 3. Contact Hours: Laboratory 6.

Prereq: AMD 1780; AMD 2100; AMD 2250

Exploration of the apparel and soft goods design process. Analysis of inspiration sources for different markets. Development of a professional portfolio. (Typically Offered: Spring)

AMD 4310: Apparel Production Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: AMD 2310; AMD 3720; AMD 4150

Procedures and experiences related to application and use of process controls: method analysis, work measurement, costing, pricing, and production planning. Resource management, technology applications, and quality assurance. Applications of software for PLM. (Typically Offered: Spring)

AMD 4580: Queer Fashions: History, Culture, and the Industry

(Cross-listed with WGS 4580).

Credits: 3. Contact Hours: Lecture 3.

Focus on analyzing the dressed and undressed body of individuals in the queer and trans communities in various cultural contexts with a focus on material culture. Examine concepts related to gender and sexuality and the changing definitions and representations of individuals who identify in the queer and trans communities focusing on appearance, fashion, and the body. Historic and current representations of fashion, styles, and appearances will be analyzed and discussed. Attention to how sexuality and gender intersect with and shape other identities including race, ability, body size, and class. Examine the complex structures, systems, and ideologies that uphold discrimination and unequitable distribution of power and resources as related to the course material. Attention will mostly be given to North American perspectives. We will use material culture to explore how objects related to fashioning the body reveal lived experiences about the owners and consumers. Offered even-numbered years. Meets U.S. Diversity Requirement. (Typically Offered: Spring)

AMD 4670: Consumer Studies in Apparel and Fashion Products

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 1650 and AESHM 3400 or MKT 3400 and STAT 1010 or STAT 1040 or STAT 2260

Application of concepts and theories from the social sciences to the study of consumer behavior related to dress, textile and apparel products, and retail experiences. Experience in conducting consumer research. (Typically Offered: Fall)

AMD 4750: Retail Analytics

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: AMD 3760

Evaluation of information needed to make effective retail decisions. Use of technology in analyzing and interpreting retail systems data. Application of concepts related to forecasting, consumer demand, assortment planning, market research, data mining, database interface, pattern recognition, supply-chain/logistics management, retail technology applications. (Typically Offered: Fall, Spring)

AMD 4900A: Independent Study: Textile Science

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4900B: Independent Study: Historical, Cultural, and Museum Studies of Dress and Textiles

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4900C: Independent Study: Textile and Apparel Design

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4900E: Independent Study: Merchandising, Aesthetics, and Entrepreneurship

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4900F: Independent Study: Sociological, Psychological, and Consumer Behavioral Aspects of Dress

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4900H: Independent Study: Honors

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4900J: Independent Study: Product Development, Innovation, and Sourcing

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4900R: Independent Study: Professional Practice

Credits: 1-30. Repeatable, maximum of 30 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4900S: Independent Study: Production and Quality Assurance

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4900W: Independent Study: Fashion Show, Fashion Public Relations and Marketing

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

AMD 4950: Senior Design Studio

Credits: 3. Contact Hours: Studio 6.

Prereq: AMD 3100, AMD 3250 and AMD 3290

Undergrad: Creation of an apparel line from target market research to prototypes through the use of manual techniques and CAD technologies. The line is to be included in a professional portfolio and pieces submitted to a juried exhibition. Grad: Creation of an apparel line from target market research to prototypes through the use of manual techniques and CAD technologies. The line is to be included in a professional portfolio and pieces submitted to a juried exhibition. Previous coursework in apparel construction and design recommended. (Typically Offered: Fall)

AMD 4960: Soft-Goods Product Development and Prototyping

Credits: 3. Contact Hours: Lecture 3.

Prereq: AMD 2310; AMD 2450; AMD 2750

Capstone soft-good innovative product development course focusing on product development through design thinking and practice. Applying consumer, aesthetic, and quantitative trend information to develop value-added soft-good products and product lines for diverse target markets. Integrated course with industry partner(s) with development of a prototype and presentation for portfolio integration. (Typically Offered: Spring)

AMD 4990: Undergraduate Research

Credits: 1-3. Repeatable.

Prereq: Senior classification, 15 credits in AMD. Permission of instructor, advisor, and department chair

Research experience in textiles and clothing with application to a selected problem. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

AMD 5040: Innovative Textiles

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Prereq: Instructor Permission for Course

Theories and principles of textile science. Textile product serviceability. Effect of fiber structure on properties and performance. New developments in textiles. Previous coursework in textile science and chemistry recommended.

AMD 5050: Quality Assurance of Textiles and Apparel

Credits: 3.

Prereq: Instructor Permission for Course

Principles of product and materials evaluation and quality assurance. Developing specifications and using standard practices for evaluating materials, product characteristics, performance, and quality. Previous coursework in natural science and statistics recommended. (Typically Offered: Fall)

AMD 5090X: Clothing Comfort: Theory and Practice

Credits: 3. Contact Hours: Lecture 3.

Provide background knowledge and relevant theories on clothing comfort issues, specifically the functional garment and protective clothing. Introduce the heat stress/heat strain associated with wearing personal protective equipment (PPE) including several cases on sportswear, firefighter gear, military personnel, mining workers, medical practitioners and law enforcement. Research project. (Typically Offered: Fall)

AMD 5100: Foundation of Scholarship in Apparel, Merchandising, and Design

Credits: 3. Contact Hours: Lecture 3.

Overview of scholarship in apparel, merchandising, and design with emphasis on current and future directions. Fundamentals of writing literature reviews. Examination of ethical issues in scholarship and academic life. Introduction to creativity, sustainability, and entrepreneurship. (Typically Offered: Fall)

AMD 5210: Digital Technologies in Textile and Apparel

Credits: 3. Contact Hours: Lecture 3.

Digital technologies in textile and apparel design. Theories and practices connected to technology in apparel fields. Technologies explored in this class may include digital textile design and printing, 3D body scanning, avatar development for digital fitting or other advanced technologies used in the textile and apparel industries. Previous coursework in research methods recommended. Offered odd-numbered years. (Typically Offered: Fall)

AMD 5250: Experimental Patternmaking

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or enrollment in AMD 5100

Research, analyze, and apply experimental patternmaking techniques to original garments suitable for entry into a juried competition/exhibitions. Compare, contrast, and organize a framework of research patternmaking principles through content analysis or other appropriate research techniques. Documentation of learning and design process. Previous coursework in apparel construction and patternmaking recommended. Offered odd-numbered years. (Typically Offered: Spring)

AMD 5390: Digital Textile Design and Theory

Credits: 3. Contact Hours: Studio 3.

Repeatable.

Focus on artisanal textile, apparel, or surface and structural design techniques. Design processes for specialty fabrics and markets. Topics vary by term. Offered even-numbered years. (Typically Offered: Spring)

AMD 5450: Consumer Experience and Retail Branding

Credits: 3. Contact Hours: Lecture 3.

Examination of hedonic nature of consumer experience and its application to experiential design and branding of retail/hospitality establishments. Emphasis on consumer behavior, environmental psychology, and marketing literature. Previous coursework in psychology, consumer behavior, or marketing recommended. Offered even-numbered years. (Typically Offered: Spring)

AMD 5540: Dress History Research Methods

Credits: 3. Contact Hours: Lecture 3.

Using a variety of sources and methods of analysis, students will develop their ability to read and interpret primary and secondary sources and to understand the methodology underpinnings and process of constructing dress history. Anticipated Semesters Offered: Spring - Alternate offered odd-numbered years. (Typically Offered: Spring)

AMD 5580: Queer Fashions: History, Culture, and the Industry

(Cross-listed with WGS 5580).

Credits: 3. Contact Hours: Lecture 3.

Focus on analyzing the dressed and undressed body of individuals in the queer and trans communities in various cultural contexts with a focus on material culture. Examine concepts related to gender and sexuality and the changing definitions and representations of individuals who identify in the queer and trans communities focusing on appearance, fashion, and the body. Historic and current representations of fashion, styles, and appearances will be analyzed and discussed. Attention to how sexuality and gender intersect with and shape other identities including race, ability, body size, and class. Examine the complex structures, systems, and ideologies that uphold discrimination and unequitable distribution of power and resources as related to the course material. Attention will mostly be given to North American perspectives. We will use material culture to explore how objects related to fashioning the body reveal lived experiences about the owners and consumers. Offered even-numbered years. Meets U.S. Diversity Requirement. (Typically Offered: Spring)

AMD 5620X: Fashion Studies, Culture, Industry, and Social Justice

Credits: 3. Contact Hours: Lecture 3.

Analysis of fashion and cultural practices of historically marginalized communities with a focus on power, privilege, and social justice. Heightened attention towards the 20th and 21st centuries. Examination of the way the global fashion industry intersects with and is related to the communities and their dress practices under study. Emphasis on ethnographic research methods. Offered even-numbered years. (Typically Offered: Fall)

AMD 5650: Sustainability: Theory and Practical Application

Credits: 3. Contact Hours: Lecture 3.

Overview of current sustainability theory, research, and methodology. Emphasis on the evaluation and discussion of current sustainability literature and sustainable practice of apparel, textiles, and related products and services through people, processes, and the environment. Development and presentation of original scholarly and creative design work under various sustainability frameworks. Previous knowledge in apparel industry and product development recommended. Offered even-numbered years. (Typically Offered: Fall)

AMD 5670: Consumer Behavior and Apparel

Credits: 3. Contact Hours: Lecture 3.

Application of concepts and theories from the social sciences to the study of consumer behavior. Experience in conducting research; manuscript writing. Previous coursework in consumer behavior and statistics recommended. Offered odd-numbered years. (Typically Offered: Fall)

AMD 5720: Sourcing and Global Issues

Credits: 3. Contact Hours: Lecture 3.

Evaluation of textile and apparel industries in global markets considering ethical, economic, political, social, and professional implications. Sourcing strategies in a global environment. Corporate and consumer social responsibility and sustainability. Experience in conducting research using secondary data. Previous coursework in merchandising, marketing, or economics recommended. Offered odd-numbered years. Meets International Perspectives Requirement. (Typically Offered: Spring)

AMD 5760: Industry Applications in Merchandising and Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: Instructor Permission for Course

Using the case study method, students apply merchandising theory, principles, and practices to industry scenarios. Emphasis on problem solving, creative thinking, data analysis, and data interpretation involved in business operations. Focus on the development of leadership skills while functioning in small and large groups. (Typically Offered: Spring)

AMD 5770: E-Commerce for Apparel and Hospitality Companies

Credits: 3. Contact Hours: Lecture 3.

Prereq: Instructor Permission for Course

Analysis of technology and consumer trends, industry practices, and marketing strategies for e-commerce including big data, data mining, and social media. Evaluation and development of apparel or hospitality company websites. Theory application to the development of multi-channel business strategies. Previous coursework in marketing recommended. Offered even-numbered years. (Typically Offered: Fall)

AMD 5780: Social Network Analysis

Credits: 3. Contact Hours: Lecture 3.

Introduction to social network related theories, practices and analyses. Visualize and analyze social structures, formed from social relationships, interactions, communications, and social media activities. Explore methods for social network data collection and data management, including application on big data. Practical guidelines on conducting S research in social science contexts, including applying S with big data. Previous coursework in statistics recommended. Offered odd-numbered years. (Typically Offered: Spring)

AMD 5900A: Special Topics: Textile Science

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Individually designed AMD-related projects that reflect the special interests of the student.

AMD 5900B: Special Topics: Historical, Cultural, and Museum Studies of Dress and Textiles

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Individually designed AMD-related projects that reflect the special interests of the student.

AMD 5900C: Special Topics: Textile and Apparel Design

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Individually designed AMD-related projects that reflect the special interests of the student.

AMD 5900E: Special Topics: Merchandising, Aesthetics, and Entrepreneurship

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Individually designed AMD-related projects that reflect the special interests of the student.

AMD 5900F: Special Topics: Sociological, Psychological, and Consumer Behavioral Aspects of Dress

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Individually designed AMD-related projects that reflect the special interests of the student.

AMD 5900J: Special Topics: Product Development, Innovation, and Sourcing

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Individually designed AMD-related projects that reflect the special interests of the student. (Typically Offered: Fall, Spring, Summer)

AMD 5900S: Special Topics: Production and Quality Assurance

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Individually designed AMD-related projects that reflect the special interests of the student. (Typically Offered: Fall, Spring, Summer)

AMD 5900W: Special Topics: Fashion Show, Fashion Public Relations and Marketing

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Individually designed AMD-related projects that reflect the special interests of the student. (Typically Offered: Fall, Spring, Summer)

AMD 5950: Senior Design Studio

Credits: 3. Contact Hours: Studio 6.

Creation of an apparel line from target market research to prototypes through the use of manual techniques and CAD technologies. The line is to be included in a professional portfolio and pieces submitted to a juried exhibition. Previous coursework in apparel construction and design recommended. (Typically Offered: Fall)

AMD 5990: Creative Component

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Creative Component.

Courses for graduate students:

AMD 6110: Seminar

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable.

Discussion of scholarship and current issues. Topics vary.

AMD 6250: Design Theory and Process

Credits: 4. Contact Hours: Lecture 2, Laboratory 4.

Analysis and application of design theory and creative processes, including strategies for solving aesthetic, functional, and/or technology-focused design problems. Creation and dissemination of design scholarship. Offered even-numbered years. (Typically Offered: Spring, Summer)

AMD 6650: Critical Social Science Theories in Fashion Studies

Credits: 3. Contact Hours: Lecture 3.

Analysis of cultural and social science theories, concepts, frameworks, and epistemologies applicable to how fashion products, management, and media are produced, distributed, consumed, regulated, and represented. Emphasis on qualitative research, theoretical interpretation, and theory development while centering justice and decolonizing theories. Example theories examined include Black feminist thought, critical race theory, feminist queer crip, tribalcrit, symbolic interaction, and semiotics. Collection, analysis, and interpretation of qualitative data. Offered odd-numbered years. (Typically Offered: Spring)

AMD 6760: Merchandising Theory and Research Applications

Credits: 3. Contact Hours: Lecture 3.

Prereq: Instructor Permission for Course

Review of current merchandising theory, research, and methodology. Emphasis on the evaluation and discussion of current and seminal merchandising literature, understanding research processes, interpretation of findings, assessing implications of research for future directions in merchandising, and the development and presentation of original scholarly work. Previous coursework in statistics recommended. Offered even-numbered years. (Typically Offered: Fall)

AMD 6900: Advanced Topics

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Advanced Topics.

AMD 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Courses primarily for undergraduates:

EVENT 1710: Introduction to Event Management

Credits: 3. Contact Hours: Lecture 3.

Overview of the event management industries. Techniques and procedures required for designing and implementing successful events. (Typically Offered: Fall, Spring)

EVENT 2030: Event Management Sophomore Mentorship

Credits: 2. Contact Hours: Lecture 1.

Prereq: Sophomore classification; AESHM 1110; EVENT 1710; by application only

Event Management sophomore students will be paired with a professional mentor in the event industry. Students will meet in the class and individually with their professional mentor throughout the spring semester. Students will be assessed on their experience through reflection, presentation, and mentor evaluation. (Typically Offered: Fall, Spring, Summer)

EVENT 2120: Digital Production in Event Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Applications of skills in Adobe Suite and other software technologies. Introduction to design elements used within the event management industry with a focus on digital publishing of marketing and promotional materials, wayfinding, and other stationery items. Face-to-face lecture and laboratory work. (Typically Offered: Fall, Spring)

EVENT 2770: Digital Promotion in the Service Industry

Credits: 3. Contact Hours: Lecture 3.

Service industry management digital channels and platforms, including media planning, search advertising, social media, and mobile. Students will be introduced to the trending social media management platforms as well as digital marketing management topics of influencer marketing, digital media planning, and content marketing. (Typically Offered: Spring, Summer)

EVENT 2900: Independent Study

Credits: 1-2. Repeatable, maximum of 4 credits.

Prereq: Freshman or Sophomore Classification. Permission of instructor, advisor, and department chair.

Independent study on topics of special interest to the student, facilitated by approved faculty member. Graduation Restriction: No more than 9 credits of EVENT 2900 and EVENT 4900 may be applied towards graduation requirements. (Typically Offered: Fall, Spring, Summer)

EVENT 3280: Incentive Meeting Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: EVENT 1710; Event Management major or minor

Overview of the incentive meeting industry. Focus on incentive meeting planning, destination selection, program development, risk management, cultural aspects of destination, incentive meeting execution, and incentive meeting evaluation. (Typically Offered: Fall, Spring)

EVENT 3330: Entertainment Venue Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: EVENT 1710; Event Management major or minor

Organization and management of various types of entertainment venues including clubs, theaters, auditoriums, and arenas. (Typically Offered: Fall)

EVENT 3430X: Virtual and Hybrid Events

Credits: 3. Contact Hours: Lecture 3.

Repeatable.

Prereq: EVENT 1710; Event Management major or minor

Application of event management leadership, communication, strategies, and production to analyze and execute virtual and hybrid events. (Typically Offered: Fall, Spring)

EVENT 3670: Event Sales

Credits: 3. Contact Hours: Lecture 3.

Prereq: EVENT 1710; (AESHM 3400 or MKT 3400)

Overview of sales marketing management in the event industry and highlights of the role of the professional event sales manager in the marketing process. As an event professional, students will identify best sales practices to develop their personal selling style, to build on their strengths, and to create a referral business that delivers results. Principles covered include evaluation of characteristics and skills necessary for success in sales; strategic planning; sales leadership; analyzing customers and markets; designing and developing the sales force; recognize the importance of relationship building; process management; and measurement, analysis, and knowledge management. (Typically Offered: Fall, Spring)

EVENT 3710: Conference and Meeting Planning

Credits: 1-3. Contact Hours: Lecture 3.

Repeatable, maximum of 4 times.

Prereq: Credit or concurrent enrollment in EVENT 1710; Sophomore classification

Application of event management principles to conference and meeting planning, trade shows, and conventions focusing on budget development, resource allocation, promotion, hospitality, and professional development. Graduation Restriction: Course must be taken for 3 credits first time, can be repeated for 1-3 credits. (Typically Offered: Fall)

EVENT 3730: Wedding Planning and Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: EVENT 1710; Event Management major or minor

Overview of wedding event industry. Focus on wedding planning processes and implementation, design, and business planning and development. (Typically Offered: Fall, Spring)

EVENT 3780: Sustainable Event Management

Credits: 3. Contact Hours: Lecture 3.

Introduction to organizing sustainable events. Discussion of the business case for sustainability in the events industry, as well as practical solutions for reducing environmental and social impacts in accordance with the United Nations Sustainable Development Goals (SDG). Offered odd-numbered years. (Typically Offered: Spring)

EVENT 3790: Nonprofit Fundraising Event Planning

Credits: 3. Contact Hours: Lecture 3.

Prereq: EVENT 1710; Event Management major or minor

Provides a comprehensive understanding of the principles underlying event fundraising. Students will be provided with the necessary knowledge and skills to conceptualize and implement a fundraising plan, either for their own venture, or for a not-for-profit organization. Through practical exercise, students will have the opportunity to put their fundraising concepts and techniques into practice, gaining valuable insights into the challenges and opportunities of the funding process. (Typically Offered: Fall)

EVENT 3830: Sports Event Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: EVENT 1710; Event Management major or minor

A comprehensive overview of sports and recreation competitions, events, and facilities. Best practices in sports event management, sports organizations, and franchises across the industry. In depth look at athlete and guest services, game day operations, marketing, sponsorship, and post-competition. (Typically Offered: Fall, Spring)

EVENT 3930: Event Management Workshop

Credits: 1-3. Repeatable, maximum of 6 credits.

Prereq: EVENT Junior or Senior classification; Permission of Instructor

Topics vary each time offered. Graduation Restriction: Maximum of 6 EVENT 3930 credits can be applied to graduation. (Typically Offered: Fall, Spring, Summer)

EVENT 4230: International Meetings and Conferences Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: EVENT 1710

A comprehensive understanding of the strategies, procedures and nuances of planning and executing multinational and multicultural meetings, expositions, conventions or events held outside of the United States. The international aspects that will be covered include planning, budgeting, logistics, venue selection, risk management, and cross-cultural understanding. Meets International Perspectives Requirement. (Typically Offered: Fall)

EVENT 4710: Special Events Coordination

Credits: 1-3. Contact Hours: Lecture 3.

Prereq: EVENT 1710; credit or enrollment in EVENT 3710; Junior classification

Advanced application of public relations and event management. Provide leadership and communicate direction for production of an event including developing budgets, publicity, advertising, fund raising, choreography, staging, lighting, and food. Graduation Restriction: Course must be taken for 3 credits first time, can be repeated for 1-3 credits. (Typically Offered: Fall, Spring)

EVENT 4850: Event Production

Credits: 3. Contact Hours: Lecture 3.

Prereq: EVENT 3710; Event Management major

Event management production and design elements, including experience design, stakeholder relations, risk management, fundraising and sponsorship, promotion, developing objectives, and evaluation and assessment. (Typically Offered: Fall, Spring)

EVENT 4860: Advanced Event Production

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Repeatable, maximum of 6 credits.

Prereq: EVENT 3710; EVENT 4850; Event Management major

Advanced application event management. Provide leadership and direction for production of an event including vendor and stakeholder relations, budget management, publicity, advertising, choreography, staging, lighting, and food. Graduation Restriction: Maximum of 6 credits may be applied toward graduation. (Typically Offered: Fall)

EVENT 4900B: Independent Study: Conferences

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Independent study. (Typically Offered: Fall, Spring, Summer)

EVENT 4900C: Independent Study: Special Events

Credits: 1-30. Repeatable.

Prereq: Program approval

Independent study. (Typically Offered: Fall, Spring, Summer)

EVENT 4900D: Independent Study: Event Management

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Independent study. (Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

EVENT 5310: Event Business Research Essentials

Credits: 3. Contact Hours: Lecture 3.

Prereq: Instructor Permission for Course

The effective execution of an event necessitates the application of suitable tools and techniques to achieve the event's intended business objectives. This course equips students with the knowledge and skills to cater to the escalating requirement for a structured methodology for conducting event business research and integrating the findings into the strategic decision-making process. Students will be exposed to a comprehensive curriculum that covers research design, measurement, sampling, data collection, processing, analysis, and interpretation, thereby preparing them to navigate the multifaceted challenges of the event industry with poise and proficiency. (Typically Offered: Fall)

EVENT 5610: Advanced Topics in Event Management

Credits: 3. Contact Hours: Lecture 3.

Advanced meeting and event planning topics including event strategy, event risk and security management, event financial management, event design, event project management, and event tourism strategy. (Typically Offered: Spring)

EVENT 5770: Advanced Social Media Marketing in Event Management

Credits: 3. Contact Hours: Lecture 3.

Project-based course that includes analyzing relevant literature in social media and developing, implementing, and assessing an integrated social media marketing strategy in the event planning business marketing plan. Perspective on digital/social/mobile marketing to appreciate its true value to consumers, to managers, and to other corporate stakeholders. Offered odd-numbered years. (Typically Offered: Fall)

EVENT 5780: Advanced Event Sustainability Management

Credits: 3. Contact Hours: Lecture 3.

The course centers on the pivotal domain of sustainability and highlights the compelling justifications for event businesses to accord it preeminence in their operations. An erroneous notion prevades that sustainability is synonymous with ecological conservation and solely concerns the environment. In reality, authentic business sustainability takes into account both social and economic factors, incorporating both the impact on societal stakeholders, such as consumers and employees, and the profitability required to sustain a business. Students in this course will undertake a comprehensive inquiry into the adaptation of modern societies to global transformations and the construction of healthier systems that foster lasting sustainability. (Typically Offered: Spring)

EVENT 5900: Special Topics

Credits: 3. Contact Hours: Lecture 3.

Prereq: Instructor Permission for Course

Topics in event management. (Typically Offered: Fall, Spring)

EVENT 5990: Creative Component

Credits: 3. Contact Hours: Lecture 3.

Prereq: Instructor Permission for Course

Creative component as arranged with instructor. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:

EVENT 6340: Theory and Research Seminar in Event Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: STAT 4010 or Permission of Instructor

Analysis and application of theories and research methodologies in event management and is designed to strengthen students' analytical and critical perspectives to evaluate event management research. Multidisciplinary approach to the areas of sports events, festivals and fairs, conventions and tradeshow, mega events, and event tourism. Offered odd-numbered years. (Typically Offered: Fall)

Courses primarily for undergraduates:

HSPM 1010: Introduction to the Hospitality Industry

Credits: 3. Contact Hours: Lecture 3.

Introduction to the foodservice, lodging, and tourism components of the hospitality industry. Background information, current issues, and future challenges in various segments of the industry. (Typically Offered: Fall, Spring)

HSPM 1330: Food Safety Certification

Credits: 1. Contact Hours: Lecture 1.

Introduction to safety and sanitation principles in foodservice operations. Characteristics of food, supplies, and equipment as related to quality, sanitation, and safety are discussed. Application of sanitation principles in restaurants are covered as well. Students must pass a National Sanitation Certification Examination to receive credit. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

HSPM 2010: Casino Management I

Credits: 3. Contact Hours: Lecture 3.

An overview of the casino gaming industry. Emphasis will be placed on examination of the history and development of gaming, casino operations, casino games, marketing of the core gaming products, and social and economic impacts of the gaming industry. (Typically Offered: Fall)

HSPM 2250: Introduction to Food Service Operations

Credits: 3. Contact Hours: Lecture 3.

Introduction to food service operations within the hospitality and event industry. Management concepts, distinct features, sustainability, current issues, and trends. (Typically Offered: Spring)

HSPM 2300: Introduction to Hospitality Performance Analysis

Credits: 3. Contact Hours: Lecture 3.

Introduction to Uniform Systems of Accounts for hospitality industry, profitability, income statements, budgeting, managing cash, accounts receivable and payable, costs control, pricing, and evaluation related to restaurant, lodging, and club industry. Preparation for a hospitality accounting certification exam. (Typically Offered: Fall, Spring)

HSPM 2330: Hospitality Sanitation and Safety

Credits: 3. Contact Hours: Lecture 3.

Sanitation and safety principles in hospitality operations. Issues impacting consumers and operators. (Typically Offered: Fall, Spring)

HSPM 2480: Introduction to Senior Living Management

Credits: 3. Contact Hours: Lecture 3.

Survey course provides a comprehensive overview of the history, current issues, and future trends of the senior living industry. Basics about major aspects of senior living management. (Typically Offered: Fall)

HSPM 2600: Global Tourism Management

Credits: 3. Contact Hours: Lecture 3.

Overview of the global tourism industry: hospitality and related services, destination/ attractions, tourist behaviors, and destination marketing. Introduction to destination mix, socio-economic and cultural impacts of tourism, destination organizations, tourist motivations, destination image, marketing, promotions, tourism distribution system, and the future of tourism. Meets International Perspectives Requirement. (Typically Offered: Fall, Spring)

HSPM 2800: Non-Alcoholic Beverages and Cafe Operations

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or concurrent enrollment in HSPM 1330

Advanced knowledge, preparation, and service of non-alcoholic beverages applied for cafe operations. (Typically Offered: Fall, Spring)

HSPM 2890: Contemporary Club Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: HSPM 1010

Organization and management of private clubs including city, country, and other recreational and social clubs. Field trip may be required. (Typically Offered: Spring)

HSPM 2900: Independent Study

Credits: 1-2. Repeatable, maximum of 4 credits.

Prereq: Freshman or Sophomore Classification. Permission of instructor, advisor, and department chair.

Independent study on topics of special interest to the student, facilitated by approved faculty member. Graduation Restriction: Maximum of 9 credits combined of HSPM 2900 and HSPM 4900 can be applied to graduation. (Typically Offered: Fall, Spring, Summer)

HSPM 3010: Hospitality Revenue Management

Credits: 3. Contact Hours: Lecture 3.

An overview of the revenue management in the lodging and food service industry will be provided. Emphasis will be placed on the application of analytical and forecasting techniques to formulate and implement pricing strategies in responses to daily operation complexities. (Typically Offered: Fall)

HSPM 3150: Hospitality Law

Credits: 3. Contact Hours: Lecture 3.

Laws relating to ownership and operation of hospitality organizations. The duties and rights of both hospitality business operators and customers. Legal implications of various managerial decisions. (Typically Offered: Spring)

HSPM 3200: Attractions and Amusement Park Administration

Credits: 3. Contact Hours: Lecture 3.

Prereq: HSPM 1010 or permission of instructor

Examination of current issues in the attractions and amusement park industry. Emphasis will be placed on development and design along with the functional departments of modern amusement parks and themed attractions. (Typically Offered: Spring)

HSPM 3330: Hospitality Operations Cost Controls

Credits: 3. Contact Hours: Lecture 3.

Introduction to revenue and cost systems in the hospitality industry. Application of principles related to procurement, production, and inventory controls. (Typically Offered: Fall)

HSPM 3520: Lodging Operations Management I

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or concurrent enrollment in HSPM 1010

Introduction to functional department activities and current issues of lodging organizations with emphasis on front office operations and guest services including reservation activities, forecasting, and auditing exercises. (Typically Offered: Fall)

HSPM 3580: Economics for Senior Living Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: HSPM 2480

Overview of supply and demand, product/service development, consumption, and financials of the senior living industry from a management perspective. (Typically Offered: Fall)

HSPM 3800: Food Production Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: HSPM 1330 or 2 cr MICRO; FSHN 1110 or FSHN 2140; FSHN 1150 or FSHN 2150; at least junior classification; enrollment in HSPM 3800L

Principles of and procedures used in food production management including menu planning, costing, work methods, food production systems, quality control, and service. (Typically Offered: Fall, Spring)

HSPM 3800L: Food Production Management Experience

Credits: 3. Contact Hours: Lecture 1, Laboratory 6.

Prereq: HSPM 1330 or 2 cr MICRO; FSHN 1110 or FSHN 2140; FSHN 1150 or FSHN 2150; at least junior classification; enrollment in HSPM 3800

Application of food production and service management principles and procedures in the program's foodservice operation. Field trip. (Typically Offered: Fall, Spring)

HSPM 3830: Wine and Spirits in Hospitality Management

Credits: 2. Contact Hours: Lecture 2.

Prereq: Must be at least 21 years old to register

Introduction to history and methods of production for a variety of wines and spirits. Beverage tasting and sensory analysis; product knowledge; service techniques; sales; and alcohol service related to the hospitality industry. Field trip. Must be age 21 or older by first day of class. . (Typically Offered: Fall, Spring)

HSPM 3830L: Wine, Spirits, and Mixology Laboratory in Hospitality Management

Credits: 2. Contact Hours: Lecture 1, Laboratory 2.

Prereq: Must be at least 21 years old to register

The application of the management principles and procedures related to the sale and service of alcohol, specialty beverages, and cocktails served in the beverage and hospitality industry. Beverage tasting and sensory analysis of products commonly served in the beverage industry. Field trip. Must be age 21 or older by first day of class. . (Typically Offered: Fall, Spring)

HSPM 3850: Beer and Brewed Beverages in Hospitality Management

Credits: 1. Contact Hours: Lecture 2.

Prereq: Must be at least 21 years old to register

Introduction to history and methods of production for a variety of beer, cider, perry, mead, sake and other brewed alcoholic beverages. Beverage tasting and sensory analysis; product knowledge; and service techniques related to the beverage and hospitality industry. Field trip. 8-week course. Must be age 21 or older by first day of class. . (Typically Offered: Fall, Spring)

HSPM 3910: Foodservice Systems Management I

Credits: 3. Contact Hours: Lecture 3.

Prereq: Credit or concurrent enrollment in HSPM 3800 and HSPM 3800L

Principles and techniques related to basic management, leadership, and human resource management of foodservices in health care and other on-site foodservice settings. Food safety and sanitation for on-site foodservice operations. Graduation Restriction: Credit for either HSPM 3910 or AESHM 2870 and AESHM 4380 may count toward graduation. Not accepted for credit toward a major in Hospitality Management. (Typically Offered: Fall)

HSPM 3920: Foodservice Systems Management II

Credits: 3. Contact Hours: Lecture 3.

Prereq: HSPM 3910

Introduction to cost control in foodservice operations: procedures for controlling food and labor variable costs. Application of principles related to food product selection, specification, purchase, and storage in health care and other onsite operations. Interpretation and application of financial records. Graduation Restriction: Credit for either HSPM 3920 or HSPM 2330 and HSPM 3330 may count toward graduation. Not accepted for credit toward a major in Hospitality Management. (Typically Offered: Spring)

HSPM 3930AX: Workshop: Confectionary Art

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Repeatable.

Intensive 2-to-8-week workshop exploration. Topics vary each time offered. Graduation Restriction: Maximum of 6 credits of HSPM 393 can be applied toward graduation.

HSPM 3930B: Hospitality Management Industry Workshop: Baking and Pastry Art

Credits: 3. Repeatable.

Introduces students with practical experience working in a realistic bakeshop situation to restaurant kitchens and bakeries. Students will become familiar with producing a variety of baked goods as well as setting up "Mise En Place", different baking techniques, and dessert plating techniques for the dining room and banquet situations. Focus on weights, measurements, formulas, general baking classifications, handling, and storage of ingredients, safety and handling, production of yeast raised dough products, cakes, cookies, batters, bread, biscuits, muffins, pies, and special dessert preparation. Introduction to various ingredients and how they affect the finished product by giving a tender crumbed and a well-developed crust. The essential basic functions of ingredients and the techniques of scaling, pan preparation, and sifting. (Typically Offered: Fall, Spring, Summer)

HSPM 3930M: Hospitality Management Industry Workshop: Molecular Gastronomy

Credits: 3. Repeatable.

Introduction to molecular gastronomy as a type of modern and innovative cuisine through both sweet and savory culinary applications. Develop and apply basic and advanced culinary skills. Basic principles of chemistry, biology, and physics and how they can be used in combination with culinary arts techniques to create unique culinary experiences. (Typically Offered: Fall, Spring, Summer)

HSPM 4200: Fairs, Festivals, and Events Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: HSPM 3200

Examine current issues within fairs and festivals. Emphasis placed on the evolution of exhibitions to modern day fairs and festivals, along with the processes necessary for operating fairs and festivals. (Typically Offered: Fall)

HSPM 4330: Hospitality Financial Management

Credits: 3. Contact Hours: Lecture 3.

Prereq: ACCT 2840; ECON 1010; HSPM 3330; credit or concurrent enrollment in STAT 1010

Fundamental concepts and issues in hospitality finance and investment. Application of financial statement analysis, accounting ratio analysis, and financial instruments in management decision-making. (Typically Offered: Spring)

HSPM 4370: Hospitality Technology Applications

Credits: 3. Contact Hours: Lecture 3.

Prereq: HSPM 1010

Introduction to hospitality technology. Emphasis will be placed on basic computer software and hardware components, property managements, point-of-sales systems; customer relationship management, selecting and purchasing computer systems, electronic distribution systems, and communication networks. (Typically Offered: Fall)

HSPM 4390: Advanced Hospitality Human Resource Management

Credits: 3. Contact Hours: Lecture 3.

Emphasis on development of management personnel in hospitality organizations. Case studies. (Typically Offered: Fall)

HSPM 4520: Lodging Operations Management II

Credits: 3. Contact Hours: Lecture 3.

Prereq: HSPM 3520

Development of business plan and evaluation of business performance in a simulated environment. Operational decision making practices by applying concepts of management, operations, marketing, and finance for a computer-mediated environment. (Typically Offered: Spring)

HSPM 4550: Strategic Management in Hospitality

Credits: 3. Contact Hours: Lecture 3.

Prereq: AESHM 2380 and AESHM 3400; credit or concurrent enrollment in HSPM 4330

Introduction to strategic management principles and practices with an application of human resources, operations, marketing, and financial management concepts. Case studies. (Typically Offered: Spring)

HSPM 4700: Supervised Professional Internship

Credits: 3. Repeatable.

Prereq: Instructor Permission for Course

Supervised work experience with a cooperating firm or organization, documentation of experience, and completion of an internship project. Coursework includes weekly self-reflection and topics related to current issues and career advancement. Employer/experience should be different than employer/experience used for AESHM 1700 and AESHM 2700. Graduation Restriction: No more than 12 credits from AESHM 1700, AESHM 2700, or HSPM 4700 may be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

HSPM 4870: Fine Dining Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Prereq: HSPM 3800, HSPM 3800L, and HSPM 1330, or ServSafe® Certification

Exploration of the historical and cultural development of the world food table. Creative experiences with U.S. regional and international foods. Application of management and financial principles in food preparation and service in fine dining settings. Meets International Perspectives Requirement. (Typically Offered: Fall)

HSPM 4890: Issues in Food Safety

(Cross-listed with ANS 4890/ FSHN 4890/ VDPAM 4890).

Credits: 1. Contact Hours: Lecture 1.

Prereq: (Credit or concurrent enrollment in FSHN 1010 or FSHN 2720 or HSPM 2330); (FSHN 4190 or FSHN 4200); FSHN 4030

Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective. (Typically Offered: Spring)

HSPM 4900B: Independent Study: Hospitality Management

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Independent Study in Hospitality Management. (Typically Offered: Fall, Spring, Summer)

HSPM 4900D: Independent Study: Lodging Operations

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

HSPM 4900E: Independent Study: Foodservice Operations

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

HSPM 4900H: Independent Study: Honors

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

Courses primarily for graduate students, open to qualified undergraduates:

HSPM 5050: Hospitality Management Scholarship and Applications

Credits: 1-3. Contact Hours: Laboratory 3.

Repeatable.

Focus on teaching and research scholarship involving the hospitality industry. (Typically Offered: Fall, Summer)

HSPM 5060: Research Seminar in Hospitality Management

Credits: 1. Contact Hours: Lecture 1.

Repeatable.

Focus on current research in hospitality industry. Discuss research designs and methods commonly used in hospitality management research; Introduce research proposal development procedures. (Typically Offered: Spring)

HSPM 5070X: Teaching, Career Planning & Professional Development

Credits: 1. Contact Hours: Lecture 1.

Seminar course focused on developing teaching skill, planning career, and practicing professionalism for graduate students in hospitality and tourism management. Introduces and discusses a number of topics regarding the high-impact instructional methods and teaching techniques needs for the future hospitality educators at the college level. Discussion of career planning and professional development for graduate students encompasses the activities and resources that can help students sharpen a skill set to secure their future career as a hospitality educator in the higher education. (Typically Offered: Fall)

HSPM 5330: Financial Decision Making in Hospitality Organizations

Credits: 3. Contact Hours: Lecture 3.

Concepts of financial management applied to strategic decision making. Offered odd-numbered years. (Typically Offered: Spring)

HSPM 5380: Human Resources Development in Hospitality Organizations

Credits: 3. Contact Hours: Lecture 3.

Theories of human resources management. Practices and principles related to development of management personnel. Offered odd-numbered years. (Typically Offered: Fall)

HSPM 5400: Strategic Marketing

Credits: 3. Contact Hours: Lecture 3.

Application of marketing principles in developing effective marketing strategies for hospitality, apparel, and retail organizations. Evaluation of multi-dimensional marketing functions in hospitality organizations. Offered even-numbered years. (Typically Offered: Fall)

HSPM 5550: Strategic Management in Hospitality Organizations

Credits: 3. Contact Hours: Lecture 2, Laboratory 2.

Strategic management process as a planning and decision-making framework; integration of human resources, operations, marketing, and financial management concepts. Offered even-numbered years. (Typically Offered: Spring)

HSPM 5600: Tourism Management and Tourist Behavior

Credits: 3. Contact Hours: Lecture 3.

Tourism theories and research. Overview of tourism industry, tourism theories, methods, and current issues in destination marketing and management and travel behavior. Evaluation of tourism and destination research. (Typically Offered: Spring)

HSPM 5870: Fine Dining Management

Credits: 3. Contact Hours: Lecture 2, Laboratory 3.

Exploration of the historical and cultural development of the world food table. Creative experiences with U.S. regional and international foods. Application of management and financial principles in food preparation and service in fine dining settings. Meets International Perspectives Requirement. (Typically Offered: Fall)

HSPM 5900B: Special Topics: Hospitality Management

Credits: 1-30. Repeatable, maximum of 3 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

HSPM 5900C: Special Topics: Tourism

Credits: 1-30. Repeatable, maximum of 3 credits.

Special topics in tourism. (Typically Offered: Fall, Spring, Summer)

HSPM 5900D: Special Topics: Lodging Operations

Credits: 1-30. Repeatable, maximum of 3 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

HSPM 5900E: Special Topics: Commercial/Retail Foodservice Operations

Credits: 1-30. Repeatable, maximum of 3 credits.

Prereq: Instructor Permission for Course

(Typically Offered: Fall, Spring, Summer)

HSPM 5900F: Special Topics: Onsite Foodservice Operations

Credits: 1-30. Repeatable, maximum of 3 credits.

(Typically Offered: Fall, Spring, Summer)

HSPM 5900G: Special Topics: Event Management

Credits: 1-30. Repeatable, maximum of 6 credits.

Special Topics in Event Management. Graduation Restriction: Only 6 credits of HSPM 5900G can be applied toward graduation. (Typically Offered: Fall, Spring, Summer)

HSPM 5990: Creative Component

Credits: 1-30.

Prereq: Instructor Permission for Course

Creative component as arranged with instructor. (Typically Offered: Fall, Spring, Summer)

Courses for graduate students:**HSPM 6040: Professional Writing**

Credits: 2. Contact Hours: Lecture 2.

Development of professional written communication with emphasis on abstracts, proposals, and manuscripts. (Typically Offered: Spring, Summer)

HSPM 6080: Administrative Problems

Credits: 1-4. Contact Hours: Lecture 4.

Repeatable, maximum of 4 credits.

Advanced administrative problems; case studies in foodservice and lodging organizations. (Typically Offered: Fall, Spring, Summer)

HSPM 6330: Advanced Hospitality Financial Management

Credits: 3. Contact Hours: Lecture 3.

Theories and research in financial management with emphasis on financial performance and financing decisions. (Typically Offered: Fall, Summer)

HSPM 6380: Advanced Human Resources Management in Hospitality Organizations

Credits: 3. Contact Hours: Lecture 3.

Research in human resources management with an emphasis on organization or unit administration. (Typically Offered: Fall, Summer)

HSPM 6400: Seminar on Marketing Thoughts

Credits: 3. Contact Hours: Lecture 3.

Conceptual and theoretical development of marketing strategies. Analytical and critical review of marketing research and industry practices. (Typically Offered: Fall, Summer)

HSPM 6520: Advanced Lodging Operations

Credits: 3. Contact Hours: Lecture 3.

Analysis and applications of concepts and theories of operations research for lodging operations. (Typically Offered: Spring, Summer)

HSPM 6600: Research Seminar in Tourism Management

Credits: 3. Contact Hours: Lecture 3.

Advanced graduate course on tourism and destination theories and research. Analysis and application of theories, research findings, and research methods in tourism and destination management. Offered odd-numbered years. (Typically Offered: Spring)

HSPM 6800: Analysis of Research in Foodservice Operations

Credits: 3. Contact Hours: Lecture 3.

Analysis and application of theories, research, and research methods in foodservice operations. Offered even-numbered years. (Typically Offered: Spring)

HSPM 6900B: Advanced Topics: Hospitality Management

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable, maximum of 30 credits.

Prereq: Instructor Permission for Course

Advanced study of current topics in hospitality management. (Typically Offered: Fall, Spring, Summer)

HSPM 6900C: Advanced Topics: Tourism

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable, maximum of 30 credits.

Prereq: Instructor Permission for Course

Advanced study of current topics in hospitality management. (Typically Offered: Fall, Spring, Summer)

HSPM 6900D: Advanced Topics: Lodging Operations

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable, maximum of 30 credits.

Prereq: Instructor Permission for Course

Advanced study of current topics in hospitality management. (Typically Offered: Fall, Spring, Summer)

HSPM 6900E: Advanced Topics: Commercial/Retail Foodservice Operations

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable, maximum of 30 credits.

Advanced study of current topics in hospitality management. (Typically Offered: Fall, Spring, Summer)

HSPM 6900F: Advanced Topics: Onsite Foodservice Operations

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable, maximum of 30 credits.

Advanced study of current topics in hospitality management. (Typically Offered: Fall, Spring, Summer)

HSPM 6900G: Advanced Topics: Event Management

Credits: 1-30. Contact Hours: Lecture 30.

Repeatable, maximum of 30 credits.

Advanced study of current topics in event management and hospitality management. (Typically Offered: Fall, Spring, Summer)

HSPM 6990: Research

Credits: 1-30. Repeatable.

Prereq: Instructor Permission for Course

Research. (Typically Offered: Fall, Spring, Summer)

Apparel, Merchandising, and Design

Administered by the Department of Apparel, Events, and Hospitality Management. Leading to the degree Bachelor of Science.

Total credits required: 123 including a minimum of 18 credits in AMD at Iowa State University for the degree (12 of the 18 credits must be at the 3000-4000 level). The major in apparel, merchandising, and design provides a broad-based program of study with flexibility in creating program options. Courses are required in general education and the apparel industry professional core. To complete the program, a student selects a primary option from design, product development and innovation, merchandising and retail analytics, or fashion communication.

Minors and a certificate are available in apparel, merchandising, and design: (a) textile science and product performance or (b) a textile design minor in collaboration with the College of Design; and a merchandising certificate.

Student Learning Outcomes

Upon graduation, students should be able to:

1. *Communication.* Use clear and effective written, oral, verbal and electronic (WOVE) communication techniques to foster inquiry, collaboration, and engagement in apparel and related industries.
2. *Self-assessment/self-reflection.* Analyze and evaluate one's own knowledge, abilities, and actions relative to professional standards, seek opportunities to grow professionally, and utilize self-assessment and assessment of others to foster psychological, cognitive, social and emotional well-being.
3. *Critical thinking.* Understand fundamental concepts of apparel, merchandising, and design and apply critical thinking to solve problems from personal, scholarly, and professional perspectives.
4. *Ethics, Diversity, and Social Responsibility.* Demonstrate leadership and social justice to improve quality of life for global citizens and encourage socially responsible decision-making for consumers and businesses.

UNDERGRADUATE STUDY

The program offers study for the degree of Bachelor of Science with a major in apparel, merchandising, and design (AMD). The program offers students a broad understanding of textile and apparel products, merchandising and marketing strategies, technical and creative design, product development, production processes, and business practices leading to a wide range of careers at state, national, and international levels in business and industry. Courses in the program provide scientific, technical, and humanistic knowledge about textiles, apparel, and related products basic to career preparation. Courses also provide knowledge applicable to the development and use of apparel and textile products by individuals, families, and institutions. The program provides a foundation for graduate study. Graduates understand the production, distribution, and use of textiles and apparel, aesthetic expression, and communication. They are prepared to plan, develop, source and present textile and apparel products to meet the needs of consumers. Students understand the issues involved in textile and apparel production and marketing, both nationally and internationally.

The AMD major provides a broad-based program of study with flexibility in creating an individualized program. To complete the program, a student combines general education, AMD core classes, and a structure of focused courses to form an option in: (a) creative and technical design, (b) fashion communication, (c) product development and innovation, or (d) merchandising and retail analytics.

An option in *creative and technical design* is appropriate for those interested in the aesthetic and creative aspects of design, technical design, costuming, textile design, and product development. The *fashion communications* option prepares students for the development and delivery of visual, written, and oral communication. Career opportunities are in visual merchandising, styling, fashion influencing, social media, and communication. An option in *product development and innovation* is appropriate for those interested in developing innovative products for special markets including accessories, footwear, performance wear, smart textiles, functional apparel, and soft goods for home. Career opportunities include designer, materials testing, quality assurance, and technical design. An option in *merchandising and retail analytics* prepares students for the planning, promotion, and presentation of market-oriented product lines and events. Career opportunities are in buying, promotion, sales, product development, branding, and management in both manufacturing and retailing sectors with a focus on the textile and apparel industry.

For additional courses of interest, see Apparel, Events, and Hospitality Management.

GRADE POINT REQUIREMENT

All students majoring in apparel, merchandising, and design are required to earn a C- or better in all AESHM and AMD courses applied toward the degree, including transfer credits.

COMMUNICATION PROFICIENCY REQUIREMENT

Undergraduate English proficiency is certified when the student has received a grade of C or better in ENGL 1500 Critical Thinking and Communication, and ENGL 2500 Written, Oral, Visual, and Electronic Composition.

Curriculum in Apparel, Merchandising, and Design

Administered by the Department of Apparel, Events, and Hospitality Management (AESHM). Leading to the degree bachelor of science.

Total credits required: 123, including a minimum of 18 credits in AMD at Iowa State University for the degree (12 of the 18 credits must be at the 3000-4000 level). Leads to the degree Bachelor of Science.

Administered by the AESHM Department. All students majoring in Apparel, Merchandising, and Design (AMD) are required to earn a C- or better in all AMD, AESHM, EVENT, and HSPM courses applied toward the degree, including transfer credits. All students majoring in Apparel, Merchandising, and Design (AMD) are required to earn a C or better in ENGL 1500 and ENGL 2500. No courses may be applied to more than one degree requirement except those used to meet US Diversity and International Perspective requirements.

Cr. Degree Requirements

Communications Skills

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
LIB 1600	Introduction to College Level Research	1
Select one (1) course:		3
COMST 2100	Communication and U.S. Diversity	
COMST 2140	Professional Communication	
COMST 2180	Conflict Management	
SPCM 2120	Fundamentals of Public Speaking	

Total Credits 10

Mathematics and Science Disciplines

Mathematics (MATH 1500 recommended for merchandising)	3
Select from natural sciences. Creative and technical design, product development, and product innovation options must take CHEM 1630 and CHEM 1630L.	3-5
Select one (1) course:	3-4
STAT 1010 Principles of Statistics	

STAT 1040	Introduction to Statistics	
STAT 2260	Introduction to Business Statistics I	
Total Credits		9-12

Social Sciences and Humanities

ECON 1010	Principles of Microeconomics	3
AMD 1650	Dress, Appearance, and Diversity in U.S. Society	3
AMD 3560	Euro-American Dress History: Mid-19th Century to the Present	3
History/Art History (creative and tech design: ARTH Required)		3
Select one (1) course:		3
AMD 3540	Euro-American Dress History: Prehistoric to Mid-19th Century	
AMD 3620	Global Dress in the Fashion System and Society	
AMD 4580	Queer Fashions: History, Culture, and the Industry	
AESHM 4620X	Black Lives Matter: Fashion, Politics, and Resistance Movements	
College of Liberal Arts & Sciences list of Arts and Humanities courses		
College of Liberal Arts & Sciences list of Social Science courses		
Total Credits		15

AESHM Professional Development

AESHM 1110	Professional Development for AESHM	1
AESHM 1110L	AESHM Program Orientation and Learning Community	1
AESHM 2110	Leadership Experiences and Development (LEAD)	3
AESHM 3110N	Seminar on Careers and Internships: Apparel, Merchandising, and Design	1
AESHM 4700MX	Supervised Professional Internship: Apparel (Out-of-state)	3-6
or AESHM 4700N Supervised Professional Internship: Apparel		
And select three (3) credits from:		
AESHM 1700N	Supervised Work Experience I: Apparel	
AESHM 1800N	First Year Student Field Study: Apparel, Merchandising, and Design	
AESHM 2800	Orientation to U.S. Field Study	
AESHM 2810	Orientation to International Field Study	
AESHM 2700N	Supervised Work Experience II: Apparel	
AESHM 2870	Principles of Management in Human Sciences	
AESHM 3800N	U.S. Field Study: Apparel, Merchandising, and Design	
AESHM 3810N	International Field Study: Apparel, Merchandising, and Design	

AESHM 4210	Developing Global Leadership: Maximizing Human Potential	
Total Credits		9-12

AMD Integrated Core

AMD 1310	Fashion Products and Markets	3
AMD 2040	Textile Science	4
AMD 2100	Computer Applications in Digital Design	3
AMD 2310	Product Development and Manufacturing	4
AMD 2450	Aesthetics and Brand Image	3
AMD 2750	Retail Merchandising	3
AMD 3720	Sourcing and Global Issues	3
COMS 1130	Introduction to Spreadsheets and Databases	3
Total Credits		26

Primary Options

Select one AMD professional primary option from the following four choices:

Creative and Technical Design Primary Option

AMD 1210	Apparel Assembly Processes	4
AMD 1780	Introduction to Apparel Design Studio	3
AMD 2250	Patternmaking I: Drafting and Flat Pattern	3
AMD 2780	Fashion Illustration	3
AMD 3100	Computer Aided Apparel Patternmaking	3
AMD 3210	Computer Integrated Textile and Fashion Design	3
AMD 3250	Patternmaking II: Draping	3
AMD 3290	Digital Textile Printing for Apparel Design	3
AMD 4150	Technical Design Processes	3
AMD 4950	Senior Design Studio	3

Select one (1) course:		3
AMD 3050	Quality Assurance of Textiles and Apparel	
AMD 4040	Innovative Textiles	
AMD 4310	Apparel Production Management	

Select one (1) course:		3
AMD 3540	Euro-American Dress History: Prehistoric to Mid-19th Century	
AMD 3620	Global Dress in the Fashion System and Society	
AMD 4580	Queer Fashions: History, Culture, and the Industry	
AESHM 4620X	Black Lives Matter: Fashion, Politics, and Resistance Movements	
Select two (2) courses:		6

AMD, AESHM, THTRE, ARTIS, DSGN, or DSNS.

This category can be used to fulfill approved double major or minor requirements

Total Credits 43

Product Development for Apparel and Soft Goods Primary Option

AMD 1210	Apparel Assembly Processes	4
AMD 1780	Introduction to Apparel Design Studio	3
AMD 2250	Patternmaking I: Drafting and Flat Pattern	3
AMD 3050	Quality Assurance of Textiles and Apparel	3
AMD 3100	Computer Aided Apparel Patternmaking	3
AMD 3210	Computer Integrated Textile and Fashion Design	3
AMD 4040	Innovative Textiles	3
AMD 4150	Technical Design Processes	3
AMD 4260	Creative Design Processes	3
AMD 4310	Apparel Production Management	3
AMD 4960	Soft-Goods Product Development and Prototyping	3
SCM 3010	Supply Chain Management	3

Total Credits 37

Merchandising and Retail Analytics Primary Option

ACCT 2840	Financial Accounting	3
AESHM 3400	Hospitality and Apparel Marketing Strategies	3
or MKT 3400	Principles of Marketing	
AESHM 4740	Entrepreneurship in Human Sciences	3
AMD 3750	Omni-Channel Retailing	3
AMD 3760	Merchandise Planning and Buying	4
AMD 3770	Visual Presentation and Promotions	3
AMD 3880	Trend Forecasting	3
AMD 4670	Consumer Studies in Apparel and Fashion Products	3
AMD 4750	Retail Analytics	3
DS 2010	Introduction to Data Science	3

Select four (4) courses from: 12-14

AESHM or AMD

This category can be used to fulfill approved double major or minor requirements

Total Credits 43-45

Fashion Communication Primary Option

ACCT 2840	Financial Accounting	2-3
or AESHM 1750	Financial Applications for Retail and Hospitality Industries: Retail Merchandising	
AESHM 3400	Hospitality and Apparel Marketing Strategies	3
or MKT 3400	Principles of Marketing	
AESHM 4740	Entrepreneurship in Human Sciences	3

AMD 2880 Styling 3

AMD 3760 Merchandise Planning and Buying 4

AMD 3770 Visual Presentation and Promotions 3

AMD 3880 Trend Forecasting 3

EVENT 1710 Introduction to Event Management 3

EVENT 2770 Digital Promotion in the Service Industry 3

Select one (1) course from: 3

AESHM or AMD

This category can be used to fulfill approved double major requirements, including ADVRT, COMST, DS, ENTSP, EVENT, JLMC, MKT, and PR

Select two (2) courses from: 6

Approved minor or double major, including ADVRT, COMST, DS, EVENT, JLMC, PR, or Technical Communications.

Total Credits 36-37

Apparel, Merchandising, and Design Minor

A minor in Apparel, Merchandising, and Design requires (15-17 cr.) of the following:

Select from:	3
AMD 1210	Apparel Assembly Processes
AMD 1310	Fashion Products and Markets
AMD 1650	Dress, Appearance, and Diversity in U.S. Society
AMD 1780	Introduction to Apparel Design Studio
Select from:	3-4

AMD 2040	Textile Science	
Select from:		3-4
AMD 2310	Product Development and Manufacturing	
AMD 2450	Aesthetics and Brand Image	
AMD 2750	Retail Merchandising	
AMD 2880	Styling	
3000-4000 level at Iowa State University in AMD or approved AESHM		6
AESHM 3400	Hospitality and Apparel Marketing Strategies or MKT 3400Principles of Marketing	
AESHM 3420	Aesthetics of Consumer Experience	
AESHM 4700N	Supervised Professional Internship: Apparel	
AESHM 4720	Fashion Show Management	
AESHM 4740	Entrepreneurship in Human Sciences	
AESHM 4760CX	Entrepreneurship Studio: Creating an Online Business	
AESHM 4990X	Research, Seminar, or Senior Project	
AMD 3050	Quality Assurance of Textiles and Apparel	
AMD 3540	Euro-American Dress History: Prehistoric to Mid-19th Century	
AMD 3560	Euro-American Dress History: Mid-19th Century to the Present	
AMD 3620	Global Dress in the Fashion System and Society	
AMD 3720	Sourcing and Global Issues	
AMD 3750	Omni-Channel Retailing	
AMD 3760	Merchandise Planning and Buying	
AMD 3770	Visual Presentation and Promotions	
AMD 3880	Trend Forecasting	
AMD 4040	Innovative Textiles	
AMD 4310	Apparel Production Management	
AMD 4580	Queer Fashions: History, Culture, and the Industry	
AMD 4670	Consumer Studies in Apparel and Fashion Products	
AMD 4750	Retail Analytics	
AMD 4900	Independent Study	
AMD 4990	Undergraduate Research	
Total Credits		15-17

FASHION, CULTURE, HISTORY, AND SOCIAL JUSTICE MINOR

The Fashion, Culture, History, and Social Justice minor will benefit emerging professionals and future leaders entering the fashion, museum, or other related industries become more critical people in regard to fashion, appearance, clothing, history, and identity. Examples of a few job titles that this minor would benefit include museum curator, collections

manager, research associate, chief diversity officer, human resource roles, designers, merchandisers, product developers, and/or marketing managers.

Having an increased awareness of appearances and fashions of individuals historically experiencing oppression and marginalization can aid in societal improvements towards developing a more socially just environment. As students enter the workforce with a social justice background, they can better understand and work with others who are different from them. Additionally, having a better understanding of diverse consumers could help provide these consumers with the products they desire, in addition to avoiding public diversity issues that are far too common in the fashion industry.

Learning Outcomes:

- Examine historical, social/psychological, and cultural aspects of fashion, clothing, appearance, and identity with a focus on social justice.
- Define social justice, power, privilege, and inequity as it relates to the historical, social/psychological, and cultural aspects of fashion, clothing, appearance, and identity.
- Examine power dynamics of diverse communities and cultures and their fashions, clothing, appearance, and identities.

Requirements:

The Fashion, Culture, History, and Social Justice minor can be earned by successfully completing the following for a total of 15 credits. All course prerequisites must be completed prior to taking the course. All minor courses must be taken for a grade.

Required course: 3

AMD 1650	Dress, Appearance, and Diversity in U.S. Society

Select from: 6

AMD 3540	Euro-American Dress History: Prehistoric to Mid-19th Century

AMD 3560	Euro-American Dress History: Mid-19th Century to the Present

AMD 4580	Queer Fashions: History, Culture, and the Industry

AESHM 4620X	Black Lives Matter: Fashion, Politics, and Resistance Movements	3

Select from: 6

TEXTILE SCIENCE AND PRODUCT PERFORMANCE MINOR

The Textile Science and Product Performance minor is targeted specifically at the scientific, innovative, evaluative, technological, and performative aspects of textiles, and will fulfill industry demands for graduates that can provide answers to complex, interdisciplinary issues linked to textile-centered products. Textiles are utilized daily in: (a) medical procedures, (b) shelters and homes, (c) transportation, (d) physical and psychological protection, (e) physical performance, (f) adornment.

The minor is designed for:

- Students in the STEM fields of chemistry, chemical and biological engineering, and materials science and engineering who desire academic experiences and knowledge in another applied product area.
- Students in the apparel, merchandising, and design, areas who want a focused concentration on textile science and the evaluation of quality and performance of textiles and textile products.

Learning Outcomes

Students who complete the Textile Science and Product Performance minor will meet the following over-arching learning objectives:

- Apply a comprehensive understanding of the characteristics (physical, chemical and structural) of textiles/textile products and the interrelationship of these characteristics to their major discipline.
- Engage in interdisciplinary research through the analysis, testing and evaluation of textiles and textile products for sustainable industry and global applications in their major.

Requirements

The Textile Science and Product Performance minor consists of 17 credits, including 14 credits distributed over four required classes. Six of the nine required 3000-4000 level credits in the minor must be taken at Iowa State University. Nine credits must be isolated to the minor only.

AMD 2040	Textile Science	4
AMD 2310	Product Development and Manufacturing	4
AMD 3050	Quality Assurance of Textiles and Apparel	3
AMD 4040	Innovative Textiles	3

Select one for 3 credits from:

AESHM 4700N	Supervised Professional Internship: Apparel
AMD 4900A	Independent Study: Textile Science
AMD 4990	Undergraduate Research

Merchandising Certificate

A certificate in Merchandising requires (22 cr.) of the following:

AMD 2750	Retail Merchandising	3
AMD 3750	Omni-Channel Retailing	3
AMD 3760	Merchandise Planning and Buying	4
AMD 4750	Retail Analytics	3

Select from: 9

AESHM 2870	Principles of Management in Human Sciences
AESHM 3400	Hospitality and Apparel Marketing Strategies
AESHM 3420	Aesthetics of Consumer Experience
AESHM 4700N	Supervised Professional Internship: Apparel
AESHM 4740	Entrepreneurship in Human Sciences
AMD 1650	Dress, Appearance, and Diversity in U.S. Society
AMD 2450	Aesthetics and Brand Image
AMD 3720	Sourcing and Global Issues
AMD 3770	Visual Presentation and Promotions

AMD 4670	Consumer Studies in Apparel and Fashion Products

Total Credits	22

The Merchandising Certificate may be earned at the same time as an ISU baccalaureate degree or after the completion of an associate of arts (AA) or associate of science (AS) degree or a baccalaureate degree from any accredited institution.

The AMD program offers a **concurrent B.S. and M.S. degree** that allows students to obtain a B.S. and M.S. degree in apparel, merchandising, and design in **five** years. Application for admission to the Graduate College should be made in the junior year. More information can be found here: <https://aeshm.hs.iastate.edu/graduate-students/graduate-programs/apparel-merchandising-and-design/concurrent-bs-ms/>.

Graduate Study

The program offers work for the concurrent Bachelor of Science and Master of Science; Master of Science (thesis and non-thesis options; on-campus and hybrid); and Doctor of Philosophy (on-campus and distance hybrid) with a major in apparel, merchandising, and design. For all programs the field of study is highly interdisciplinary; programs of study are tailored to students' background and interests. The program offers a concurrent B.S. and M.S. degree that allows students to obtain both the B.S. and M.S. degrees in apparel, merchandising, and design in 5 years. Application for admission to the Graduate College should be submitted in fall semester of the junior year.

Graduates understand how textiles and apparel are essential in meeting individual and societal needs and understand the interdependence of nations and cultures as producers and consumers. Graduates understand diverse philosophies of scholarship and apply multiple methods to creative activity, research, and teaching. Strong writing and oral communication skills help graduates disseminate scholarship and compete successfully for awards and grants.

Graduates accept positions relevant to their academic experience. All doctoral graduates have teaching experience. Master's and doctoral graduates have experience working in team-oriented and interactive environments. Graduates are prepared to adapt to future changes in their professions and to provide leadership in professional and public practice. They bring a strong sense of ethics to research, teaching, and business endeavors.

Program emphases for graduate study include creative design and functional design; product development; consumer behavior; entrepreneurship; merchandising and marketing aspects of textiles and clothing; acquisition and use of textiles and apparel within cultures; U.S. dress and textiles from the 19th into the 21st centuries; textiles and sustainability.

Athletic Training

This major prepares students for a career as an athletic trainer in a variety of settings such as high school, college and professional settings. There are additional settings in sports medicine clinics, hospitals, military, industry, and in performing arts. The accredited program will prepare students for the Board of Certification exam upon graduation. Admission to the athletic training program is competitive and based on available departmental resources. Admission procedures and technical standards can be found at <http://www.kin.hs.iastate.edu/programs/athletic-training/#program-information-and-requirements>.

Iowa State University's Athletic Training Program has transitioned to a Professional Master's degree program. Undergraduate students will be enrolled in the 3+2 athletic training program with a 3-year Pre-Athletic Training undergraduate curriculum and a 2-year Master of Athletic Training program in the Department of Kinesiology. Students with a B.S. or B.A. degree may apply directly to the master's program with completion of prerequisite coursework, program requirements, and observation hours. For more information, please contact the program director, Dr. Mary Meier, at mary@iastate.edu.

Mission

Athletic training is the art and science of the prevention, recognition, care, and rehabilitation of athletic injuries. It includes the organization and administration of athletic training education programs, as well as the education and counseling physically active individuals and athletes. The Iowa State University athletic training program provides high quality education striving to instill intellectual curiosity, evidence-based knowledge, and clinical skills essential for individual development. The athletic training program enrolls academically qualified students who represent diverse socio-economic levels, ethnic heritage and who provide a gender balance. The program faculty and clinical preceptors strive to prepare athletic training students to be productive and responsible citizens of the world and to foster affective, caring individuals to promote the profession of athletic training.

The Athletic Training faculty and clinical preceptors continually update educational curriculum to keep athletic training students current with field knowledge and to ensure the best possible undergraduate and graduate education in both the didactic and clinical settings.

Goals

- 1. We prepare athletic training students for the BOC Certification Exam.
- 2. We produce high quality athletic trainers prepared for employment in educational, clinical, and professional settings.
- 3. We promote professional and ethical conduct at all times.
- 4. We provide athletic training students equal opportunity to develop their skills both in the classroom and in the clinical settings.

5. We continually update the curricular offerings to provide the athletic training student current evidence-based knowledge in the profession.
6. We provide high quality instruction in the classroom and clinical experiences.
7. We assist the athletic training student in gaining employment.
8. We promote the concept of establishing professional contacts by attending professional and educational meetings.
9. We foster an appreciation of athletic training as a component of sports medicine.
10. We foster the affective, caring side of athletic training.

Student Learning Objectives

1. Athletic training graduates will use effective communication skills.
2. Athletic training graduates will demonstrate competence in athletic training skills and knowledge.
3. Athletic training graduates will possess ethical, caring, professional attributes and behaviors as a health care professional.
4. Athletic training graduates will demonstrate effective critical thinking and problem-solving skills ensuring them of being an effective athletic trainer.
5. Athletic training graduates will demonstrate the ability to apply clinical skills and make evidence-based decisions to optimize patient outcomes.

UNDERGRADUATE STUDY

The Department of Kinesiology offers a Bachelor of Science degree in Kinesiology & Health. The B.S. in Athletic Training degree is only offered upon completion of the 3+2 B.S./M.A.TR. Athletic Training program. The undergraduate curriculum major/option is comprised of three components: general education, required departmental courses and the component courses. The intent of the general education component is to promote intellectual and personal growth and to prepare students for success in the basic, advanced and major/option components. Required courses provide an introduction to the field and fundamental principles of physical activity, fitness, health and disease.

B.S./M.A.TR. degree in Athletic Training

Certified Athletic Trainers are allied medical health care professionals who specialize in the prevention, assessment, diagnosis, emergency care, and treatment and rehabilitation of injuries. To gain certification as an athletic trainer, candidates must graduate from a CAATE accredited athletic training education program and successfully pass the Board of Certification (BOC) examination. In addition, most states have licensure requirements to practice athletic training. The ISU Athletic Training undergraduate education program has been CAATE accredited since 2001 and has transitioned to a Professional Master's program. The Athletic Training program at Iowa State University includes various athletic training clinical rotations including high school settings, physical

therapy and hospital clinics, college and university settings, surgical and emergency room observations, and immersive clinical opportunities in orthopedic and non-orthopedic settings.

Curriculum in Athletic Training

This major prepares students for a career as an athletic trainer in high school, college, professional sport settings. Additional settings include sports medicine clinics, hospitals, military, industry, and with the performing arts. The 3+2 program prepares students for the Board of Certification exam upon graduation from the master's program. Admission to the Athletic Training Master's degree program is competitive. Admission requirements for the Professional Master's in Athletic Training program can be found at <http://www.kin.hs.iastate.edu/graduate-programs/athletic-training/> (<http://www.kin.hs.iastate.edu/programs/athletic-training/#program-information-and-requirements>).

Curriculum in Athletic Training Communication Proficiency

In order to meet graduation requirements, all students must earn an average of C (2.0) or better in ENGL 1500 and ENGL 2500, with neither grade being lower than a C-. Students not meeting this condition must earn a C or better in an advanced writing course:

ENGL 3020	Business Communication	3
or ENGL 3140	Technical Communication	
LIB 1600	Introduction to College Level Research	1
SPCM 2120	Fundamentals of Public Speaking	3

U.S. Diversity and International Perspectives

In order to meet graduation requirements, all students must complete 3 cr. of course work in U.S. Diversity and 3 cr. in International Perspectives. See university approved list.

General Education

Physical and Life Sciences:

BIOL 2550	Fundamentals of Human Anatomy	3
BIOL 2550L	Fundamentals of Human Anatomy Laboratory	1
BIOL 2560	Fundamentals of Human Physiology	3
BIOL 2560L	Fundamentals of Human Physiology Laboratory	1

Additional major-specific requirements are:

CHEM 1630	College Chemistry	4
or CHEM 1770	General Chemistry I	
CHEM 1630L	Laboratory in College Chemistry	1
or CHEM 1770L	Laboratory in General Chemistry I	
FSHN 1670	Introductory Human Nutrition and Health	3

PHYS 1310	General Physics I	4-5
& 1310L	and General Physics I Laboratory	
or PHYS 1150	Physics for the Life Sciences	

Mathematics and Statistics:

From the following: 3-4

MATH 1400	College Algebra
or MATH 14	Preparation for Calculus
or MATH 14	Applied Trigonometry
or MATH 16	Calculus I

From the following: 3-4

STAT 1010	Principles of Statistics
or STAT 104	Introduction to Statistics

Social Sciences: 9 cr. min required

PSYCH 1010	Introduction to Psychology	3
or PSYCH 2300	Developmental Psychology	
SOC 1340	Introduction to Sociology	3

Humanities: 6 cr. min required

Choose from department approved list.

Communications:

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
LIB 1600	Introduction to College Level Research	1
SPCM 2120	Fundamentals of Public Speaking	3
One of the following		3
ENGL 3020	Business Communication	
or ENGL 314	Technical Communication	
or SPCM 312	Business and Professional Speaking	

Program requirements:

The following courses are required in all majors and options:

HS 1100	Personal and Consumer Health	3
HS 3500	Human Diseases (*)	3
KIN 2520	Introduction to the Discipline of Kinesiology	1
KIN 2530	Orientation and Learning Community in Kinesiology and Health	1
KIN 2580	Principles of Physical Fitness and Conditioning	2
KIN 3580	Exercise Physiology (*)	3
KIN 3590	Exercise Physiology Lab	1
KIN 3730	Biomechanics and Motor Control Laboratory	1

* A grade of C- or better is required.

Courses for Athletic Training Major

Option Requirements:

ATR 2190	Anatomy Clinical Practicum	1
ATR 2200	Basic Athletic Training	2
ATR 2210	Pre-Athletic Training Clinical Practicum	1
ATR 2230	Preseason Clinical Experience Practicum	1
KIN 3550	Biomechanics (*)	3
KIN 3650	Sport Psychology (*)	3
or KIN 3660	Exercise Psychology	
KIN 4800	Functional Anatomy	3
Electives		3

* A grade of C- or better is required.

* Fall Only Course

** Spring Only Course

Planned course offerings may change, and students need to check the online Schedule of Classes each term to confirm course offerings: <https://classes.iastate.edu/>.

Humanities, Social Science, International Perspectives, and US Diversity courses: <https://kin.hs.iastate.edu/current-students/academics/resources-and-registration/>

This sequence is only an example.

Students who have already completed, or will complete, a B.A. or B.S. degree from an accredited institution and who have completed necessary prerequisite course work and other admission requirements can apply for the Master's in Athletic Training program. More information on the admissions requirements and application can be found here: <https://kin.hs.iastate.edu/graduate-students/graduate-program/masters-in-athletic-training/admissions-requirements-application/>.

Athletics

Administered by the Department of Kinesiology.

Courses primarily for undergraduates:

ATH 1010B: Intercollegiate Athletics: Basketball (men)

Credits: 1. Contact Hours: Laboratory 15.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010C: Intercollegiate Athletics: Basketball (women)

Credits: 1. Contact Hours: Laboratory 15.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010D: Intercollegiate Athletics: Cross Country (men)

Credits: 1. Contact Hours: Laboratory 15.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010E: Intercollegiate Athletics: Cross Country (women)

Credits: 1. Contact Hours: Laboratory 13.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010F: Intercollegiate Athletics: Football (men)

Credits: 1. Contact Hours: Laboratory 15.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010G: Intercollegiate Athletics: Golf (men)

Credits: 1. Contact Hours: Laboratory 15.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010J: Intercollegiate Athletics: Gymnastics (women)

Credits: 1. Contact Hours: Laboratory 13.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010K: Intercollegiate Athletics: Softball (women)

Credits: 1. Contact Hours: Laboratory 13.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010M: Intercollegiate Athletics: Swimming/Diving (women)

Credits: 1. Contact Hours: Laboratory 13.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010O: Intercollegiate Athletics: Tennis (women)

Credits: 1. Contact Hours: Laboratory 15.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010P: Intercollegiate Athletics: Track and Field (men)

Credits: 1. Contact Hours: Laboratory 15.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010Q: Intercollegiate Athletics: Track and Field (women)

Credits: 1. Contact Hours: Laboratory 13.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010R: Intercollegiate Athletics: Volleyball (women)

Credits: 1. Contact Hours: Laboratory 13.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010S: Intercollegiate Athletics: Wrestling (men)

Credits: 1. Contact Hours: Laboratory 15.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010T: Intercollegiate Athletics: Golf (women)

Credits: 1. Contact Hours: Laboratory 13.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

ATH 1010U: Intercollegiate Athletics: Soccer (women)

Credits: 1. Contact Hours: Laboratory 13.

Repeatable, maximum of 4 credits.

Prereq: Athletic Team Coach Permission for Course

Limited to a maximum of 4. Graduation Restriction: Credit for a sport section of ATH 1010 may not be applied toward graduation if credit is also received for KIN 1660 or any skill technique course in the same sport. Offered on a satisfactory-fail basis only. (Typically Offered: Fall, Spring)

Culinary Food Science (HSCI)

The Culinary Food Science degree program is a food science-based degree in which students develop basic culinary skills along with knowledge of the accompanying sciences. As a graduate, you'll combine food product development skills and entrepreneurial talents with scientific and technological knowledge.

The department also offers a culinary food science minor.

Student Learning Outcomes

Upon graduation, students should be able to:

- Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
- Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
- Participate effectively in a group or team.
- Integrate creativity, innovation, or entrepreneurship in ways that produce value.
- Describe sociocultural competence relative to diversity, equity and/or inclusion.
- Explain how human activities impact the natural environment and how societies are affected.
- Meet program specific learning outcomes for the Culinary Food Science major.

Degree Requirements

Administered by the Department of Food Science and Human Nutrition

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 10 cr.

ENGL 1500	Critical Thinking and Communication	3
ENGL 2500	Written, Oral, Visual, and Electronic Composition	3
LIB 1600	Introduction to College Level Research	1
SPCM 2120	Fundamentals of Public Speaking	3
Total Credits		10

Humanities and Social Sciences: 9-15 cr.

FSHN 2200	American Food and Culture	3
ECON 1010	Principles of Microeconomics	3

If a Culinary Food Science student in the College of Human Sciences, 6
select:

Additional Humanities course

Additional Humanities or Social Science course

Ethics: 3 cr. (Included as part of the Humanities and Social sciences requirement)

FSHN 3420 World Food Issues: Past and Present 3

Mathematical Sciences: 6-8 cr.

Select at least 3 credits from: 3-4

MATH 1400 College Algebra

MATH 1430 Preparation for Calculus

MATH 1600 Survey of Calculus

MATH 1650 Calculus I

Select at least 3 credits from: 3-4

STAT 1010 Principles of Statistics

STAT 1040 Introduction to Statistics

Total Credits 6-8

Physical Sciences: 9 cr.

CHEM 1630 College Chemistry 4
or CHEM 1770 General Chemistry I

CHEM 1630L Laboratory in College Chemistry 1
or CHEM 1770L Laboratory in General Chemistry I

CHEM 2310 Elementary Organic Chemistry 3

CHEM 2310L Laboratory in Elementary Organic Chemistry 1

Total Credits 9

Biological Sciences: 10-11 cr.

BBMB 3010 Survey of Biochemistry 3

BIOL 2120 Principles of Biology II 3

BIOL 2120L Principles of Biology Laboratory II 1

MICRO 2010 Introduction to Microbiology 2-3
or MICRO 3020 Biology of Microorganisms

MICRO 2010L Introductory Microbiology Laboratory 1
or MICRO 3020L Microbiology Laboratory

Total Credits 10-11

Animal Science Coursework: 6 cr.

ANS 2700 Foods of Animal Origin 2

ANS 2700L Foods of Animal Origin Laboratory 1

ANS 4600 Science and Technology of Value Added Meat Products 3

Total Credits 6

Food Science and Human Nutrition: 42 cr.

FSHN 1010 Food and the Consumer 3

FSHN 1040 Introduction to Professional Skills in Culinary Science 1

FSHN 1100 Professional and Educational Preparation 1

FSHN 1670 Introductory Human Nutrition and Health 3

FSHN 2030 Contemporary Issues in Food Science and Human Nutrition 1

FSHN 2140 Scientific Study of Food 3

FSHN 2150 Advanced Food Preparation Laboratory 2

FSHN 2650 Nutrition for Active and Healthy Lifestyles 3

FSHN 3050 Food Quality Management and Control 2

FSHN 3110 Food Chemistry 3

FSHN 3110L Food Chemistry Laboratory 1

FSHN 3140 Professional Development for Culinary Food Science and Food Science Majors 1

FSHN 4030 Food Laws and Regulations 2

FSHN 4060 Sensory Evaluation of Food 3

FSHN 4070 Microbiological Safety of Foods of Animal Origins 3

FSHN 4110 Food Ingredient Interactions and Formulations 2

FSHN 4120 Food Product Development 3

FSHN 4200 Food Microbiology 3

Take one of the following courses for 2 credits: 2

FSHN 4910B Supervised Work Experience: Food Science

or FSHN 491 Supervised Work Experience: Culinary Science

Total Credits 42

Hospitality Management: 12 cr.

HSPM 1330 Food Safety Certification 1

HSPM 3800 Food Production Management 3

HSPM 3800L Food Production Management Experience 3

HSPM 3830 Wine and Spirits in Hospitality Management 2
or FSHN 5090 Sensory Evaluation of Wines

HSPM 4870 Fine Dining Management 3

Total Credits 12

Electives 1-13 cr. Select from any university coursework to earn at least 120 total credits.

Go to FSHN courses.

* Choose elective courses to total equal to or greater than 120 credits.

Planned course offerings may change and students need to check the online Schedule of Classes each term to confirm course offerings: <https://classes.iastate.edu> (<https://classes.iastate.edu/>). This sequence is only an example. The number of credits taken each semester should be based on the individual student's situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

More information on the Culinary Food Science minor can be found here: www.catalog.iastate.edu/collegeofagricultureandlifesciences/foodscienceandhumannutrition/#undergraduateminortext.

Dance

Administered by the Department of Kinesiology.

Coursework in dance provides opportunities for students to develop an understanding and appreciation of dance as part of a liberal education. Those interested in teaching dance and physical education in the public schools may major in Kinesiology and Health (Teacher Licensure option) and minor in Dance.

A Performing Arts major with a Dance emphasis is available through the College of Liberal Arts and Sciences. For further information see: Performing Arts.

Diet and Exercise (HSCI)

OVERVIEW

Diet and Exercise, B.S./M.S.

Administered by the Department of Food Science and Human Nutrition and Department of Kinesiology.

This is an accelerated program with concurrent enrollment in the undergraduate and graduate degree programs. Courses included have

been approved as meeting the academic requirements of the Didactic Program in Dietetics (DPD) in preparation for admission to accredited dietetics internship programs; the DPD is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. There is a \$30 fee for the verification statement of completion of the accredited dietetics program. Additionally, courses are included to meet the American College of Sports Medicine (ACSM) requirements for certification at the level of Certified Exercise Physiologist.

Student Learning Outcomes

Upon graduation, students should be able to:

- Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
- Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
- Participate effectively in a group or team.
- Integrate creativity, innovation, or entrepreneurship in ways that produce value.
- Describe sociocultural competence relative to diversity, equity and/or inclusion.
- Explain how human activities impact the natural environment and how societies are affected.
- Meet program specific learning outcomes for the Diet & Exercise major.

Degree Requirements

Dietetics (HSCI)

Dietitians are nutrition experts who strive for optimal health and nutrition of individuals and the population. The curriculum for the dietetics program as well as the diet and exercise program meet the academic requirements of the Didactic Program in Dietetics and prepares students for a career in the field of dietetics. The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency for the Academy of Nutrition and Dietetics.

Student Learning Outcomes

Upon graduation, students should be able to:

- Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
- Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
- Participate effectively in a group or team.
- Integrate creativity, innovation, or entrepreneurship in ways that produce value.
- Describe sociocultural competence relative to diversity, equity and/or inclusion.
- Explain how human activities impact the natural environment and how societies are affected.
- Meet program specific learning outcomes for the Dietetics major.

Administered by the Department of Food Science and Human Nutrition

The dietetics undergraduate curriculum meets the academic requirements as the Didactic Program in Dietetics and is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. Graduates of the program are eligible to apply for admission to accredited supervised practice programs/dietetics internships. There is a \$30 fee for the verification statement of completion of the accredited dietetics program.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Footnotes

* Choose elective courses to total equal to or greater than 120 credits. This sequence is only an example, and the number of credits taken each semester should be based on the individual student's situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

More information on minors offered through Food Science and Human Nutrition can be found here: <http://catalog.iastate.edu/collegeofagricultureandlifesciences/foodscienceandhumannutrition/#undergraduateminortext>.

The Department of Food Science and Human Nutrition offers a Master of Professional Practice in Dietetics (M.P.P.). More information on the program can be found here: <http://catalog.iastate.edu/collegeofhumansciences/professionalpracticeindieterics/>.

Early Childcare Education and Programming

Curriculum in Early Childcare Education and Programming

The **Early Childcare Education and Programming (ECP)** curriculum is designed to prepare graduates to work in a variety of early care and education programs that serve families that are mobile. Families who are mobile include military families, immigrant families, families who must travel to make a living, homeless families, and families living in poverty. Some of the programs are childcare centers and homes, infant/toddler and preschool programs, Head Start programs, and before and after-school programs for children ages birth to eight. This degree does not lead to teacher licensure. Students interested in a license to teach in public schools can refer to the Early Childhood Education - Unified

(ECE) program. The ECP curriculum is designed to provide content for the final two years of a student's program; the content is focused specifically on topics directly relevant to the major. This is an online program offered through a collaboration of universities called Great Plains Interactive Distance Education Alliance (or GPIDEA). The program within GPIDEA is known as Early Care and Education for a Mobile Society. For more information see <https://www.gpidea.org/program/early-care-and-education-in-a-mobile-society> (<https://www.gpidea.org/program/early-care-and-education-in-a-mobile-society/>)

Students will complete a total of 120 credits for the major, 51 of which are specific to the ECP curriculum. These 51 credit hours are comprised of 12 core courses and 3 practica; the final practicum will be a 6-credit capstone experience. Students must complete 30 credits of college work, a lifespan development course, and have a 2.5 GPA to be admitted to ECP. If students prefer to be admitted to ISU before being admitted to the ECP major, they can enroll as Pre ECP (PECP) students until they are eligible for the ECP major. For more information about the program at Iowa State, see <https://online.hs.iastate.edu/early-childcare-programming> (<https://online.hs.iastate.edu/early-childcare-programming/>).

Student Learning Outcomes

Upon successful completion of the ECEMS bachelor's degree program, students will be able to:

- Use their understanding of young children's characteristics and needs, and of multiple interacting influences on children's development and learning, to create environments that are healthy, respectful, supportive, and challenging for each child.
- Understand how successful early childhood education depends upon partnerships with children's families and communities and value the importance and complex characteristics of children's families and communities.
- Use child observation, documentation, and other forms of assessment, in partnership with families and other professionals, to positively influence the development of every child.
- Use their knowledge of academic disciplines to design, implement, and evaluate experiences that promote positive development and learning for every young child.
- Identify and conduct themselves as a member of the early childhood profession, using ethical guidelines and other professional standards related to early childhood practice.
- Demonstrate, through sequential practicum experiences and clinical practice, the knowledge, skills, and professional dispositions necessary to promote the development and learning of young children across the entire developmental period of early childhood.

Administered by the Department of Human Development and Family Studies. Leading to the degree Bachelor of Science.

Early Childhood Education - Unified

Administered by the Department of Human Development and Family Studies and the School of Education. Leading to the degree Bachelor of Science.

The curriculum in early childhood education – unified (ECE) prepares graduates to teach young children and work with their families. This curriculum has been approved by the Iowa Department of Education and meets requirements for candidates to seek a teaching endorsement in PK-3, Inclusive Settings, which permits individuals to teach general and special education for children from birth through third grade. Graduates may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through third grade) or in home-based programs.

Students who enroll in the early childhood education – unified program must apply to and be accepted into the teacher education program prior to enrolling in advanced courses.

Additional information is also available from the student's academic advisor.

Students in early childhood education – unified must meet the performance outcome standards for teacher licensure. Standards are assessed in coursework through artifacts such as assignments, projects, or practicum participation. These standards assessments are based on the early childhood content standards for endorsements 1001 and 262 in the State of Iowa. These include competencies in (1) promoting child development, learning and individual learning differences, (2) building family and community relationships, (3) observing, documenting, and assessing to support young children and families, (4) using developmentally and individually effective approaches to connect with children and families, (5) using content knowledge to build a meaningful curriculum, (6) professional responsibilities, and (7) early childhood field experiences. Pre-student teaching field experiences in at least three settings, and student teaching experiences in at least two different settings is required.

Student Learning Outcomes

Graduates of the Early Childhood Education program will meet the following learning objectives, as defined by the InTASC standards for teacher preparation.

Standard 1: Learner Development

The student understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.

Standard 2: Learning Differences

The student uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.

Standard 3: Learning Environments

The student works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

Standard 4: Content Knowledge

The student understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.

Standard 5: Application of Content

The student understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.

Standard 6: Assessment

The student understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher's and learner's decision making.

Standard 7: Planning for Instruction

The student plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.

Standard 8: Instructional Strategies

The student understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.

Standard 8A: Technology

The student integrates current and emerging technology in instruction to encourage student creativity, problem solving, collaboration, and digital literacy. Teachers practice and advocate safe, legal, and responsible use of information and technology.

Standard 9: Professional Learning and Ethical Practice

The student engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.

Standard 10: Leadership and Collaboration

The student seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

This sheet provides a guide to the sequence of HDFS and EDUC courses; courses adhere to a prescribed sequence of semesters. Your academic advisor will help you develop an individual long-range plan.

B Block of courses listed together in the semester must be taken concurrently as sequenced

* See approved general education options list of courses for courses in Biological Sciences, Humanities, Physical Sciences and Social Sciences

ISU requires a 3 credit U.S. Diversity course (satisfied by HDFS 2400) and a 3 credit international perspective course (usually met through a University approved humanities or social science options from the approved general education options list).

- 5-12 Reading Endorsement
- Additional Science Endorsements
 - 5-12 Basic Science
- Additional Social Sciences Endorsements
 - 5-12 American Government
 - 5-12 Anthropology
 - 5-12 Economics
 - 5-12 Psychology
 - 5-12 Sociology
- Learning Technologies Minor
(See <https://education.iastate.edu/find-your-major/learning-technologies-minor/>)

Specific program requirements can be found within each department that houses the endorsement. Information on K-12 Coaching, K-12 English as a Second Language, 5-12 Reading, and K-12 Speech and Theatre can be found at: <https://iastate.app.box.com/s/m4tr3ogr9ouwmibz5dhv9catyr2jqf>. (<https://iastate.app.box.com/s/m4tr3ogr9ouwmibz5dhv9catyr2jqf/>)

Student Learning Outcomes

Upon graduation, students should be able to:

The Learner and Learning

Standard #1: Learner Development.

Understand how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.

Standard #2: Learning Differences.

Use understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.

Standard #3: Learning Environments.

Work with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

Content

Standard #4: Content Knowledge.

Understand the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.

Standard #5: Application of Content.

Education Secondary

Secondary Major in Education

A secondary major in Education at Iowa State University prepares candidates to teach at the middle school and high school levels. K-12/Secondary Educator Preparation Programs eligible to pursue the secondary major in Education are:

- English Education
- History/Social Sciences Education - History
- History/Social Sciences Education - Political Science
- Mathematics Education
- Science Education – Biology
- Science Education – Chemistry
- Science Education – Earth Science
- Science Education – Physics
- World Languages and Cultures Education – French
- World Languages and Cultures Education – German
- World Languages and Cultures Education – Spanish

Additional Endorsements and Minors

Candidates pursuing the secondary major in Education have the opportunity to pursue additional endorsements and minors:

- K-12 Coaching Endorsement
- K-12 English as a Second Language Endorsement

Understand how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.

Instructional Practices

Standard #6: Assessment.

Understand and use multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher's and learner's decision making.

Standard #7: Planning for Instruction.

Plan instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.

Standard #8: Instructional Strategies.

Understand and use a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.

Standard #8A: Technology.

Integrate current and emerging technology in instruction to encourage student creativity, problem solving, collaboration, and digital literacy.

Teachers practice and advocate safe, legal, and responsible use of information and technology.

Professional Responsibility

Standard #9: Professional Learning and Ethical Practice.

Engage in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.

Standard #10: Leadership and Collaboration.

Seek appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

Curriculum in Secondary Major in Education

Educator Preparation Program Admission Requirements

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- Decision Point 1 - Admission to the Educator Preparation Program (<https://iastate.box.com/s/n8eewbs3fznazf8alerv0qbf216fno7e/>)
- Decision Point 1 - Early Admission to the Educator Preparation Program for Transfer Students (<https://iastate.box.com/s/r3ap8wej7m3bmd0cehixe12epxtekxax/>)

In order to be eligible to student teaching (EDUC 4170), candidates must have completed all degree program requirements and content specific coursework.

- Decision Point 2 - Requirements (<https://iastate.box.com/s/hewm5y0era2j76cdvllaphappmsg43cs/>) (<https://iastate.box.com/s/hewm5y0era2j76cdvllaphappmsg43cs/>) Students Must Meet Prior to Student Teaching (<https://iastate.box.com/s/hewm5y0era2j76cdvllaphappmsg43cs/>)

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an educator preparation program completer.

- Decision Point 3 - Recommendation for Licensure (<https://iastate.box.com/s/tvfae96b3b1y87wbyfna2oonhmfoba7g/>)

All Educator Preparation Program candidates must complete the professional core coursework (information found under each program) and required pedagogy and field experience coursework for their program. In addition, all prospective teachers are required to meet general education requirements as a part of their preparation. They must complete studies in the following general education groups. General education courses may be found in many departments. Credits listed are minimum requirements. Specific departments and/or colleges may require specific coursework to meet these requirements or additional credits. Credits used to satisfy these general education requirements typically satisfy department and college general education requirements.

Educator Preparation General Education Requirements

Natural Sciences	6
Mathematics or Statistics	3
Social Sciences	9
Humanities	6
Communication Skills ^{Must include ENGL 1500 and 250 or an equivalent}	9
Library Skills ^{LIB 1600}	1
HDFS 1020 or PSYCH 2300	3
One course in American history or government	
One course that develops interpersonal or group presentation skills	

NOTE: Specific majors will provide approved options to meet these requirements.

Secondary major in Education Requirements for English, Social Sciences, Mathematics, World Languages, and Science Education Candidates

Educator Preparation Field Experiences:

EDUC 2800L	Pre-Student Teaching Experience I: Secondary Education	0.5
EDUC 3800A	Pre-Student Teaching Experience II: Core Experience	2

Educator Preparation Professional Core Coursework:

EDUC 2020	Educational Technologies in the 7-12 Classroom	3
EDUC 2040	Social Foundations of Education in the United States: Secondary	3
EDUC 2190	Orientation to Teacher Education: English, FCS, History, Math, Science and World Language Majors	1
PSYCH 3330	Educational Psychology	3
EDUC 3950	Teaching Disciplinary Literacy	3
EDUC 4060	Social Justice Education and Teaching: Secondary	3
SPED 4010	Teaching Secondary Students with Exceptionalities in General Education	3

Please check departmental information IN REGARD TO specific content and methods coursework.

Elementary Education

A degree in elementary education at Iowa State prepares you to teach all subjects at the elementary school level (grades K-6). Program completers can be recommended for licensure to the Iowa Board of Education Examiners.

In addition to pursuing a degree in Elementary Education, candidates are required to pursue an endorsement in at least one additional area. Candidates will be prepared to teach students in grades kindergarten through eighth grade in this area of specialization. Endorsements in the following areas are available for elementary education majors:

- K-8 English/Language Arts & Reading
- K-12 English as a Second Language (ESL)
- K-8 Health
- K-8 Mathematics
- K-8 Science

- K-8 Social studies
- K-8 Special education (Instructional Strategist I: Mild/Moderate Disabilities K-8)

In addition, candidates can choose to pursue endorsements in K-8 Reading, K-12 Coaching, and 5-8 Algebra for HS Credit.

Additional information about endorsements can be found at: <https://www.education.iastate.edu/find-majors/elementary-education/>. (<https://www.education.iastate.edu/find-majors/elementary-education/>)

EDUC 4680D	Pre-Student Teaching Experience III: Intermediate Grades, Science	1
Total Credits		12

**Must receive a "C" or above

Related Methods: 7 credits

KIN 2840	Elementary and Pre-school Movement Education **	3
or HS 2750 Health Education in the Elementary School		
MUSIC 2650	Music in Elementary Education **	2
ARTED 2090	Methods of Teaching in and Through Art **	2
Total Credits		7

**Must receive a "C" or above

Primary Endorsement Area: Credits Vary

Minimum grade of a "C" required for all EDUC, HDFS, and SPED courses and all content-specific pedagogy/methods courses. Minimum grade of "C-" required for all other courses in endorsement areas.

Primary Endorsement Options:

- K-8 English/Language Arts & Reading
- K-12 English as a Second Language (ESL)
- K-8 Health
- K-8 Mathematics
- K-8 Science
- K-8 Social studies
- K-8 Special education (Instructional Strategist I: Mild/Moderate Disabilities K-8).

Additional information about endorsements can be found at <https://www.education.iastate.edu/find-majors/elementary-education/>.

Student Teaching: 16 credits

EDUC 4160A	Supervised Student Teaching - Elementary: Primary grades (K-3) **	8
EDUC 4160B	Supervised Student Teaching - Elementary: Intermediate grades (3-6) **	8
Total Credits		16

**Must receive a "C" or above

Total Credits: 122 minimum credits (credits will vary depending on endorsement option)

U.S. Diversity and International Perspectives Requirements: Students in elementary education fulfill the U.S. Diversity and International Perspectives requirements by choosing three credits of coursework from university-approved Humanities or Social Sciences courses included on the Elementary Education approved options sheet.

Additional Endorsement

Candidates can pursue any of the primary endorsement areas listed above and in the following areas:

- K-8 Reading
- K-12 Coaching
- 5-8 Algebra for HS Credit

Information about these endorsements can be found at: <https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jqf> (<https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jqf/>).
Contact an Elementary Education academic advisor for additional information.

Educator Preparation Program Completion Requirements:

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an Educator Preparation Program Completer. Access the policy: Decision Point 3 - Recommendation for Licensure (<https://iastate.box.com/s/tvfae96b3b1y87wbyfna2oonhmfoba7g/>)

It is our expectation that students know the requirements of their academic program and develop and follow an academic plan based on their academic catalog and degree audit using their individual academic advisor as a resource in this process.

Event Management

Administered by the Department of Apparel, Events, and Hospitality Management.

The program offers study for the degree of Bachelor of Science with a major in event management. The program prepares undergraduate students for careers in leading event and meeting management businesses. To complete the program, a student combines general education, Event core classes, and a structure of focused courses to form an option in: (a) corporate/business events, (b) virtual events, (c) social events: weddings and nonprofit events, (d) sport events, or (e) innovative event experiences in retail.

Through the major, students gain background and experiences in planning, budgeting, and implementing conferences, meetings, and other special events in the public or private sectors. Course work provides students with a general education plus professional preparation focusing on the concepts and principles involved in meeting and event planning strategy; special event management; stakeholder development; budgets and finance; site selection; contracts, vendors, and negotiations; marketing and promotions; food and beverage management; meeting technology; event evaluation; and hospitality law. Event electives include courses in event sustainability, event digital promotion, incentive meetings, and international conference planning. Supporting courses

include foodservice, catering, promotion, brand management, trend analysis, fashion, and resource management.

The program also houses "The Meeting Room: Where Experiences and Technology Innovate," a lab designed to allow Event Management students to have hands-on access to a number of cutting-edge technology tools designed to let students focus on new and event disruptive ideas in events and meeting management. The lab is equipped with virtual reality headsets, event sound and lighting equipment, wireless connectivity to displays for BYOD, and group/collaboration furniture.

Graduates from this program are prepared for careers in event planning (corporate events, celebrations, education, promotions, commemorations, trade shows, weddings, conferences, association events, exhibitions, festivals, philanthropies, entertainment, fundraising, conventions, and sport events) and small business development (entrepreneurship). Graduates demonstrate leadership characteristics and make decisions based on integrating knowledge of financial, human resources, promotion, and event management principles. Students are required to complete an internship in event management prior to graduation. The student experience is enhanced through networking and development events with our Event Management Executive Advisory Council, meeting/ event industry conferences and association meetings, and international experiences designed specifically for event management students.

Leading to the degree Bachelor of Science

Total credits required: 123, including a minimum of 18 credits from the AESHM Department at Iowa State University for the degree.

The curriculum in event management prepares students for careers in leading event and meeting management businesses. Courses are required in general education, and the professional area. Students majoring in Event Management are required to earn C- or better in all AESHM and EVENT courses, and all courses in the EVENT Core.

Communication Proficiency Requirement: Grade of C or better in ENGL 1500 Critical Thinking and Communication, and ENGL 2500 Written, Oral, Visual, and Electronic Composition.

Student Learning Outcomes

Upon graduation, students should be able to:

- 1. *Communication.* Use clear and effective written, oral, verbal and electronic (WOVE) communication techniques to foster inquiry, collaboration, and engagement in apparel and related industries.
- 2. *Self-assessment/self-reflection.* Analyze and evaluate one's own knowledge, abilities, and actions relative to professional standards, seek opportunities to grow professionally, and utilize self-assessment and assessment of others to foster psychological, cognitive, social and emotional well-being.

- 3. *Critical thinking.* Understand fundamental concepts of event management and apply critical thinking to solve problems from personal, scholarly, and professional perspectives.
- 4. *Ethics, Diversity, and Social Responsibility.* Demonstrate leadership and social justice to improve quality of life for global citizens and encourage socially responsible decision-making for consumers and businesses.

Curriculum in Event Management

Administered by the Apparel, Events, and Hospitality Management Department.

Leading to the degree Bachelor of Science.

Total credits required: 123 including a minimum of 18 credits from the AESHM Department at Iowa State University for the degree. The curriculum in event management prepares students for careers in leading event and meeting management businesses. Courses are required in general education, and the professional area. Students majoring in Event Management are required to earn C- or better in all AESHM and EVENT courses, and all courses in the EVENT Core. Communication Proficiency Requirement: Grade of C or better in ENGL 1500 Critical Thinking and Communication, and ENGL 2500 Written, Oral, Visual, and Electronic Composition.

A minor in event management is available; see requirements under Apparel, Events, and Hospitality Courses and Programs.

Event Management Minor

The AESHM Department offers a minor in Event Management. The minor can be earned by successfully completing the following for a total of 15 credits. The minor must include at least six (6) credits in courses numbered 3000 or above taken at ISU. All course prerequisites must be completed prior to taking the course. All minor courses must be taken for a grade. The Event Management Minor requires students to complete EVENT 1710, EVENT 3710, and EVENT 4710. The remaining 6 credits may be selected from any courses listed below. **Only 12 total credits of EVENT classes can apply to the minor.

9 credits are required:

EVENT 1710	Introduction to Event Management	3
EVENT 3710	Conference and Meeting Planning	3
EVENT 4710	Special Events Coordination	3

And 6 credits of the following: (only 1 additional course designated "EVENT" can apply towards your minor)

EVENT 2770	Digital Promotion in the Service Industry	3
EVENT 3280	Incentive Meeting Management	3
EVENT 3330	Entertainment Venue Management	3
EVENT 3730	Wedding Planning and Management	3
EVENT 3780	Sustainable Event Management	3
EVENT 3790	Nonprofit Fundraising Event Planning	3
EVENT 3830	Sports Event Management	3
AESHM 2870	Principles of Management in Human Sciences	3
AESHM 3400	Hospitality and Apparel Marketing Strategies	3
AESHM 3420	Aesthetics of Consumer Experience	3
AESHM 4720	Fashion Show Management	2-3

AESHM 4740	Entrepreneurship in Human Sciences	3
HSPM 2890	Contemporary Club Management	3
HSPM 3200	Attractions and Amusement Park Administration	3
HSPM 4370	Hospitality Technology Applications	3
PR 2200	Principles of Public Relations	3

Event Management Master's Program

Event Management Core (required)

AESHM 5010	Introduction to Scholarly Research for Graduate Students	1
EVENT 5310	Event Business Research Essentials	3
EVENT 5610	Advanced Topics in Event Management	3
EVENT 5770	Advanced Social Media Marketing in Event Management	3
EVENT 5780	Advanced Event Sustainability Management	3
EVENT 5990	Creative Component	3
EVENT 6340	Theory and Research Seminar in Event Management	3
Total Credits		19

AESHM Electives

Select three (3) courses from:

AMD 5450	Consumer Experience and Retail Branding	3
AESHM 5740	Entrepreneurship in Human Sciences	3
AESHM 5790	Data Analytics for Apparel, Event, and Hospitality Management	3
AESHM 5800D	U.S. Field Study: Hospitality Management	1-3
	or AESHM 5800B U.S. Field Study: Event Management	
	or AESHM 5800N U.S. Field Study: Apparel, Merchandising, and Design	
AESHM 5810D	International Field Study: Hospitality Management	1-3
	or AESHM 5810C International Field Study: Event Management	
	or AESHM 5810E International Field Study: Apparel, Merchandising, and Design	
AESHM 6700A	Teaching Practicum: Apparel Merchandising and Design	1-3
	or AESHM 6700B Teaching Practicum: Hospitality Management	
	or AESHM 6700C Teaching Practicum: Event Management	
AMD 5450	Consumer Experience and Retail Branding	3
AMD 5650	Sustainability: Theory and Practical Application	3
AMD 5670	Consumer Behavior and Apparel	3
AMD 5770	E-Commerce for Apparel and Hospitality Companies	3
EVENT 5900	Special Topics	3

HSPM 5330	Financial Decision Making in Hospitality Organizations	3
HSPM 5380	Human Resources Development in Hospitality Organizations	3
HSPM 5400	Strategic Marketing	3
HSPM 5550	Strategic Management in Hospitality Organizations	3

Research Methods and Statistics

Select two (2) courses from

AESHM 5020	Research Methods in Apparel, Events, and Hospitality	3
AESHM 5100	Quantitative Research Methods in Apparel, Events, and Hospitality	3
AESHM 5120	Qualitative Research Methods in Apparel, Events, and Hospitality	3
RESEV 5500	Introduction to Educational Research	3
RESEV 5520	Basic Educational Statistics	3
RESEV 5800	Introduction to Qualitative Research Methodology	3
STAT 5870	Statistical Methods for Research Workers	4

Family and Consumer Sciences Education and Studies

Administered by the Department of Human Development and Family Studies. Leading to the degree Bachelor of Science.

The curriculum in Family and Consumer Sciences Education and Studies (FCEDS) prepares graduates with a broad understanding of individual and family well-being. Graduates apply knowledge and research in human sciences content in global professional settings. They work in an integrative fashion to improve well-being by addressing and acting on complex problems confronting individuals, families, and communities. Ours is an interdisciplinary major where students take coursework in content areas including human development, early childhood education, interpersonal relationships, family studies, culinary arts, nutrition, textiles, interior design, and financial planning. This unique program of study integrates multiples facets of human health and well-being, preparing FCEDS graduates to support individuals, families, and communities in diverse settings to achieve optimal quality of life.

Student Learning Outcomes

Graduates of the Family & Consumer Sciences Education program will be meet the following learning objectives, as defined by the InTASC standards for teacher preparation.

Standard 1: Learner Development

The student understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.

Standard 2: Learning Differences

The student uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.

Standard 3: Learning Environments

The student works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

Standard 4: Content Knowledge

The student understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.

Standard 5: Application of Content

The student understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.

Standard 6: Assessment

The student understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher's and learner's decision making.

Standard 7: Planning for Instruction

The student plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.

Standard 8: Instructional Strategies

The student understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.

Standard 8A: Technology

The student integrates current and emerging technology in instruction to encourage student creativity, problem solving, collaboration, and digital literacy. Teachers practice and advocate safe, legal, and responsible use of information and technology.

Standard 9: Professional Learning and Ethical Practice

The student engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her

choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.

Standard 10: Leadership and Collaboration

The student seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

Students in the curriculum choose one of three options: Teacher Licensure, Professional Studies, or Communications.

Graduates of the Teacher Licensure option may teach family and consumer sciences in middle, junior high, and senior high schools. Students who enroll in Teacher Licensure must apply and be accepted into the educator preparation program prior to enrolling in advanced courses. This program option is approved by the Iowa Department of Education for the preparation of comprehensive and occupational career and technical education family and consumer sciences teachers.

Graduates of the Professional Studies option are prepared to work in a variety of careers including Extension & Outreach, non-profit organizations, and governmental agencies as well as within the private business or entrepreneurial sector.

Graduates of the Communications option have the ability to educate consumers in a global and technologically changing society. Students apply the principles of educational presentations, journalism, marketing, and public relations to empower people to critically analyze options and make the best choices for their needs.

Students in FCEDS may choose coursework that leads to becoming a Certified Family Life Educator (CFLE), a program that has been approved by the National Council on Family Relations. These courses provide the basic education for students interested in working with families, including adolescents, parents, or adults working to strengthen relationships. The student takes courses that support the development of knowledge and skills in family life content areas selected by the National Council on Family Relations. The certification is a voluntary credential that requires the individual to complete a degree in an approved program and to have at least two years of work experience in family life education settings. Iowa State University does not grant the Certified Family Life Educator credential. The certification is granted only by the National Council on Family Relations. See <https://hdfs.hs.iastate.edu/future-students/find-your-major/certified-family-life-educator/> and/or <http://www.ncfr.org/cfle-certification> (<http://www.ncfr.org/cfle-certification/>).

Graduates may also choose from one of several nationally recognized professional certifications available from the American Association of Family and Consumer Sciences (AAFCS) Council for Certification. This program measures competencies of FCS professionals using high-quality, rigorous assessments. Certifications that are currently available

are (<https://www.aafcs.org/home> (<https://www.aafcs.org/home/>)):

CFCS: Certified in Family and Consumer Sciences; **CFCS-HDFS:** Certified in Human Development and Family Studies; **CFCS-HNFS:** Certified in Hospitality, Nutrition, and Food Science; and **CPFFE:** Certified Personal and Family Finance Educator.

There is also an opportunity to take courses that will allow you to be recommended for a family and consumer sciences-general endorsement or teacher licensure as a post baccalaureate student.

Communication Proficiency Requirement: A student must achieve a grade of C or higher in ENGL 1500, Critical Thinking and Communication, and ENGL 2500, Written, Oral, Visual, and Electronic Composition. A student achieving a grade of C- or lower in 1500 and/or 2500 must either repeat the course(s), earning a minimum grade of C, or, in consultation with the advisor and the coordinator of freshman English, complete another appropriate English writing course with a minimum grade of C.

A minor in Educational Services in Family and Consumer Sciences is available, see requirements under Undergraduate Minor.

Curriculum in Family and Consumer Sciences Education and Studies

Administered by the Department of Human Development and Family Studies. Leading to a degree bachelor of science.

This curriculum provides a broad-based program of study focusing on preparation for professional careers related to education or community leadership. Courses are required in general education and the College core.

Students in the program choose one of three options: Teacher Licensure, Communications, or Professional Studies.

Option 1, **Teacher Licensure**, is designed for students seeking careers as family and consumer sciences educators in a variety of settings such as middle, junior high, and senior high schools. Further information about educator preparation programs appears under Teacher Education in the School of Education.

Option 2, **Communications**, is designed for students seeking careers emphasizing the use of principles in journalism, marketing, communications, and public relations with diverse populations in business or social agency settings as well as extension, community agencies, community colleges, and youth and adult education programs in the global community.

Option 3, **Professional Studies**, is designed to provide students with the opportunity to pursue an individualized program which is planned with their academic advisors. Careers include working with diverse populations in Extension, business, community agencies, and community

colleges, or non-profit groups and organizations involving youth and adult education programs.

Option 1: Teacher Licensure

Total Credits for FCEDS (Teacher Licensure): 123

Family and Consumer Sciences Education and Studies Core: 22 credits

Family and Consumer Sciences, MFCS

Master of Family and Consumer Sciences (M.F.C.S.)

The College of Human Sciences offers a nonthesis, professional master's degree program offered completely online through the Great Plains Interactive Distance Education Alliance (or GPIDEA).

Students select one of the following specializations (all require 36 credits): Dietetics (no longer accepting new applicants), Family Financial Planning, Gerontology, and Youth Development

The Program of Study committee, in consultation with the student, establishes the courses to be taken and the acceptability of transfer credits. The major professor is selected from the discipline in which the concentration of coursework will be taken. Written and oral final integrative examinations are required in lieu of a thesis or creative component.

Admission requirements for the MFCS include a bachelor's degree from a regionally-accredited college or university, minimum 3.00 cumulative grade point average (students below this GPA will still be considered for admission), transcripts from all colleges and universities attended, two letters of recommendation, and a goal statement. Non-English speaking international students are required to have a TOEFL score of at least 550 at time of admission.

Graduate Certificates

<https://www.hs.iastate.edu/graduate/>

Graduate Certificates

Four graduate certificates are available:

- Family Financial Planning (18 credits): fulfills educational requirements of the Certified Financial Planner Board of Standards CFP® Certification Examination.
- Gerontology (15 credits)
- Youth Development Specialist (12 credits)
- Youth Program Management and Evaluation (12 credits)

For additional information, students should contact the Great Plains IDEA Campus Coordinator, 2155 Lagomarcino, gpideainfo@iastate.edu, 515-294-5397.

Family Financial Planning Interinstitutional Graduate Program

Iowa State University offers a Master's degree in Family and Consumer Sciences with specialization in Family Financial Planning. This is an interinstitutional online program offered through the Great Plains Interactive Distance Education Alliance (or GPIDEA). The student selects a home institution (Iowa State), which ultimately grants the degree. After admission to Iowa State, the student takes courses from Iowa State and the other participating institutions: Montana State University, North Dakota State University, Oklahoma State University; South Dakota State University, and University of Nebraska-Lincoln.

The master's degree consists of 36 credits, 24 required credits and 12 elective credits (<http://www.online.hs.iastate.edu/graduate-degrees/family-financial-planning/>). This program does not require a thesis.

Both the Master's degree and Graduate Certificate programs at Iowa State University are registered with Certified Financial Planner Board of Standards Inc. As a CFP® Board-registered Program, ISU's FFP courses satisfy CFP® Board's education requirement, allowing an individual to sit for the CFP® Certification Examination.

Iowa State University does not certify individuals to use the CFP®, CERTIFIED FINANCIAL PLANNER™ title. CFP® certification is granted only by Certified Financial Planner Board of Standards Inc. to those persons who, in addition to completing an educational requirement such as this CFP® Board-Registered Program, have met its ethics, experience and examination requirements. (CFP® Board of Standards web site: www.cfp.net (<http://www.cfp.net>)).

Certified Financial Planner Board of Standards Inc. owns the certification marks CFP®, CERTIFIED FINANCIAL PLANNER™ and the federally registered CFP®, which it awards to individuals who successfully complete initial and ongoing certification requirements.

FFP Graduate Certificate

The Graduate Certificate in Family Financial Planning requires six courses/18 credits which contain the competencies required for the Certified Financial Planner (CFP®) Certification Examination.

Required courses for the Family Financial Planning graduate certificate program include:

FFP 5400	Estate Planning for Families	3
FFP 5450	Retirement Planning, Employee Benefits, and the Family	3
FFP 5550	Insurance Planning for Families	3
FFP 5650	Personal Income Taxation	3
FFP 5830	Investing for the Family's Future	3
FFP 5950	Financial Planning - Case Studies	3

Both the Family Financial Planning Master's degree and Graduate Certificate programs at Iowa State University are registered with Certified Financial Planner Board of Standards Inc. As a CFP Board-registered Program, ISU FFP courses satisfy CFP Board's education requirement, allowing an individual to sit for the CFP® Certification Examination.

This is an interinstitutional online program offered through the Great Plains Interactive Distance Education Alliance (or GPIDEA). The student selects a home institution (Iowa State), which ultimately grants the certificate. After admission to Iowa State, the student takes courses from Iowa State and the other participating institutions: Montana State

University, North Dakota State University, Oklahoma State University; South Dakota State University, and University of Nebraska-Lincoln.

Courses primarily for graduate students, open to qualified undergraduates:

FFP 5200: Financial Theory and Research I

Credits: 3. Contact Hours: Lecture 3.

Theories of family functioning, macroeconomic theory related to family resource allocation decisions, the family as an economic unit, and the interaction of the economy and families. (Typically Offered: Fall, Spring, Summer)

FFP 5250: Financial Theory and Research II

Credits: 3. Contact Hours: Lecture 3.

Microeconomic theory as it relates to family resource allocation decisions, theories of household behavior, the lifecycle hypothesis, behavioral economics, behavioral finance, theories of behavioral change, and psychological theories of family well-being. Focus on empirical research investigating household financial decision-making. (Typically Offered: Fall, Spring, Summer)

FFP 5300: Fundamentals of Family Financial Planning

Credits: 3. Contact Hours: Lecture 3.

Introduction to the financial planning process and establishing client-planner relationships. Applied work in cash flow, credit and debt, income tax, insurance, investment, retirement and estate planning. Review of services provided to families, documentation required, ethics in financial planning, and Certified Financial Planner licensee responsibilities. (Typically Offered: Fall, Spring, Summer)

FFP 5350: Financial Counseling

Credits: 3. Contact Hours: Lecture 3.

Theory and research regarding the interactive process between the client and the practitioner, including communication techniques, motivation and esteem building, the counseling environment, ethics, and methods of data intake, verification, and analysis. Other topics include legal issues, compensation, uses of technology to identify resources, information management, and current or emerging issues. (Typically Offered: Fall, Spring, Summer)

FFP 5400: Estate Planning for Families

Credits: 3. Contact Hours: Lecture 3.

Fundamentals of the estate planning process, including estate settlement, estate and gift taxes, property ownership and transfer, and powers of appointment. Tools and techniques used in implementing an effective estate plan, ethical considerations used in providing estate planning services, and new and emerging issues in the field. Case studies provide experience in developing estate plans suitable for varied family forms. (Typically Offered: Fall, Spring, Summer)

FFP 5410: Housing and Real Estate in Family Financial Planning

(Cross-listed with HDFS 5410).

Credits: 3. Contact Hours: Lecture 3.

The role of housing and real estate in the family financial planning process, including taxation, mortgages, financial calculations, legal concerns, and ethical issues related to home ownership and real estate investments. Emphasis on emerging issues in the context of housing and real estate. Offered even-numbered years. (Typically Offered: Summer)

FFP 5450: Retirement Planning, Employee Benefits, and the Family

Credits: 3. Contact Hours: Lecture 3.

Study of micro and macro considerations for retirement planning. Survey of various types of retirement plans, ethical considerations in providing retirement planning services, assessing and forecasting financial needs in retirement, and integration of retirement plans with government benefits. (Typically Offered: Fall, Spring, Summer)

FFP 5500: Military Personal Financial Readiness

Credits: 3. Contact Hours: Lecture 3.

Overview of the topics relevant to the financial planning process that address the unique needs of military service members and their families. (Typically Offered: Fall, Summer)

FFP 5550: Insurance Planning for Families

Credits: 3. Contact Hours: Lecture 3.

In-depth study of risk management concepts, tools, and strategies for individuals and families, including life insurance; property and casualty insurance; liability insurance; accident, disability, health, and long-term care insurance; and government-subsidized programs. Current and emerging issues and ethical considerations relative to risk management. Case studies provide experience in selecting insurance products suitable for individuals and family, study of investment options for clients including common stocks, fixed income securities, convertible securities, and related choices. Relationships between investment options and employee/employer benefit plan choices. Current and emerging issues and ethics are included. (Typically Offered: Fall, Spring, Summer)

FFP 5650: Personal Income Taxation

Credits: 3. Contact Hours: Lecture 3.

In-depth information on income tax practices and procedures including tax regulations, tax return preparation, the tax audit processes, the appeals process, preparation for an administrative or judicial forum, and ethical considerations of taxation. New and emerging issues related to taxation. Family/individual case studies provide practice in applying and analyzing tax information and recommending appropriate tax strategies. (Typically Offered: Fall, Spring, Summer)

FFP 5700: Professional Practices in Financial Planning

Credits: 3. Contact Hours: Lecture 3.

Challenges of managing financial planning practices including, but not limited to: business valuation, personnel, marketing, client services, ethics and technological applications. Relying both on a theoretical as well as an applied approach, students analyze case studies that provide relevant, practical exposure to practice management issues, with a strong emphasis on current research findings. (Typically Offered: Fall, Spring, Summer)

FFP 5830: Investing for the Family's Future

(Cross-listed with HDFS 5830).

Credits: 3. Contact Hours: Lecture 3.

Evaluation of investment markets for the household. Analysis of how families choose where to put their savings. Emphasis is on using the family's overall financial and economic goals to help inform investment choices. (Typically Offered: Fall)

FFP 5900: Family Financial Planning Seminar

Credits: 3. Contact Hours: Lecture 3.

Repeatable, maximum of 3 credits.

Through a seminar format comprised of readings, guest lectures, collaborative case studies, peer interaction, and practical application, students will explore the rapidly growing and changing opportunities of sustainable, responsible, and impact investments. (Typically Offered: Spring, Summer)

FFP 5910: Practicum

Credits: 3-6. Repeatable.

Supervised experience in family financial planning. (Typically Offered: Fall, Spring, Summer)

FFP 5950: Financial Planning - Case Studies

Credits: 3. Contact Hours: Lecture 3.

Professional issues in financial planning, including ethical considerations, regulation and certification requirements, communication skills, and professional responsibility. Students are expected to utilize skills obtained in other courses and work experiences in the completion of personal finance case studies, the development of a targeted investment policy, and other related financial planning assignments. (Typically Offered: Fall, Spring, Summer)

Financial Counseling and Planning

Administered by the Department of Human Development and Family Studies. Leading to the degree Bachelor of Science.

The **Financial Counseling and Planning** curriculum prepares students for careers in family financial services. Financial Counseling and Planning is a growing career field and appeals to students who want to work with individuals and families to help them meet their financial

goals and improve their financial capability to better meet financial challenges. Coursework provides students with the family resource management and interpersonal skills needed to help families remain financially secure. Based on individual specific career goals, students may select courses that lead to fulfilling the education requirements for the leading designations and certifications in financial counseling and planning. Graduates of the program are prepared for employment in personal banking, financial services, insurance, financial counseling and planning, and human service organizations. Laboratory and practicum opportunities exist in the Iowa State University Financial Counseling Clinic and with industry partners. A field experience encourages students to apply their studies and to experience the profession in real-world settings.

Student Learning Outcomes

Financial Counseling and Planning graduates are prepared to:

1. Help individuals and families make personal finance decisions using time value of money calculations.
2. Deliver professional, competent, and ethical financial counseling and planning services to clients.
3. Apply principles of client psychology within consumer and financial decision making.
4. Measure individual and family financial health and use these measures to create a comprehensive personal financial plan.
5. Attain the leading designations in financial counseling and planning. Upon graduation students have completed the educational requirements for the CERTIFIED FINANCIAL PLANNER™ and Accredited Financial Counselor® designations.

Total credits required: 120

Financial Counseling and Planning core (AFC & CFP exam ready): 39 credits

management, marketing, political science, psychology, and sociology are suggested.

** See Approved General Education options.

Students in Financial Counseling and Planning fulfill the US Diversity and International Perspectives Requirement by choosing three credits of coursework from each of the university-approved lists.

This sequence is only an example. The number of credits taken each semester should be based on the individual student's situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

The **Financial Counseling and Planning** minor may be earned by completing 15 credits

HDFS 2830	Personal and Family Finance	3
Twelve credits from the following:		12
HDFS 2390	Consumer Issues	
HDFS 3410	Income Tax Planning for Families	
HDFS 3780	Retirement Planning and Employee Benefits	
HDFS 3830	Fundamentals of Financial Planning	
HDFS 3840	Family Insurance Planning	
HDFS 4820	Family Savings and Investments	
HDFS 4840	Estate Planning for Families	
HDFS 4850	Capstone: Family Financial Planning	
HDFS 4890	Financial Counseling	
HDFS 4890L	Financial Counseling Laboratory	

Total Credits 15

Graduate Programs

A master's degree in Family and Consumer Sciences (MFCS) with a specialization in Family Financial Planning as well as a Family Financial Planning certificate are available. More information can be found at: <https://online.hs.iastate.edu/graduate-degrees/family-financial-planning/>.

Food Science (HSCI)

Food science is a degree program focused on food issues from the time crops leave the field until consumers buy the food products. Food scientists apply basic science (chemistry, biology, physics) to improve processing, preservation, and safety of food and to develop new food products. The food science major is approved by the Institute of Food Technologists.

Student Learning Outcomes

Upon graduation, students should be able to:

- Communicate effectively in their field of study using written, oral, visual and/or electronic forms.
- Demonstrate proficiency in ethical data collection and interpretation, literature review and citation, critical thinking and problem solving.
- Participate effectively in a group or team.
- Integrate creativity, innovation, or entrepreneurship in ways that produce value.
- Describe sociocultural competence relative to diversity, equity and/or inclusion.
- Explain how human activities impact the natural environment and how societies are affected.
- Meet program specific learning outcomes for the Food Science major.

The department also offers a food science minor.

Administered by the Department of Food Science and Human Nutrition

Courses listed below are required.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.
